

33rd Annual Lonergan Workshop Boston College June 18-23, 2006

Celebrating the 450th Jesuit Jubilee

Since September of 1525, when they were 19 years old, **Francis Xavier** and **Peter Faber** (one a Basque, the other from Savoy) had been college roommates in the College Saint-Barbe in the University of Paris, *when all of a sudden* [in the Fall of 1529] *destiny climbed the stairs of Sainte-Barbe in a shape as strange and unrecognizable as it ever has taken**—Ignatius Loyola, 14 years older than they, and already a seasoned (and injured) soldier, pilgrim, and spiritual enthusiast. These three were the core of a total of 7 original companions who would eventually become the *Compania de Jesus/Society of Jesus/Jesuits*. This year the Jesuits throughout the world celebrate these significant birthdays, along with the 450th anniversary of the death of Ignatius. (July 31, 1555). [John Howard, SJ *James Broderick, SJ, *St. Francis Xavier*]
