

Programs to Look For

This is the fifth year that *U.S. News* is publishing a list of schools with outstanding examples of academic programs that are believed to lead to student success. With the help of education experts, including staff members of the Association of American Colleges and Universities, we identified

eight such program types. We then invited college presidents, chief academic officers, and deans of admission to nominate up to 10 institutions with stellar examples of each kind of program. Colleges and universities that were mentioned most often are listed here, in alphabetical order.

FIRST-YEAR EXPERIENCES

Orientation can go only so far in making freshmen feel connected. Many schools now build into the curriculum first-year seminars or other academic programs that bring small groups of students together with faculty or staff on a regular basis.

INTERNSHIPS

Schools nominated in this category require or encourage students to apply what they're learning in the classroom to work in the real world—through closely supervised internships or practicums, or through cooperative education, in which one period of study typically alternates with one of work.

SENIOR CAPSTONE

Whether they're called a senior capstone or go by some other name, these culminating experiences ask students nearing the end of their college years to create a project of some sort that integrates and synthesizes what they've learned. The project might be a thesis, a performance, or an exhibit of artwork.

UNDERGRADUATE RESEARCH / CREATIVE PROJECTS

Independently or in small teams, and mentored by a faculty member, students do intensive and self-directed research or creative work that results in an original scholarly paper or other product that can be formally presented on or off campus.
