TONER SCAM!

Procurement has been receiving separate complaints recently about a toner company calling to solicit business. The person on the phone usually knows the make and model # of your copier, printer and fax machine or will tell you that your department has ordered from them before or they know your name or personal information such as your title or birthday. Please refer them to Procurement and remember never to order from any company that calls your department directly unless it’s an established vendor. If you are not sure, please ask for their phone number to call them back. A scammer usually refuses to give that information and hangs up.
