For students who hold an undergraduate degree in either Biology or Neuroscience, and are in good academic standing with a 3.0 GPA or higher, you may choose to waive the Pathophysiology prerequisite course. We do recommend that all students have a strong understanding of Pathophysiology concepts, as there will be an Advanced Pathophysiology course in the first fall semester of the program.

If you have a strong background on the subject matter and choose to waive the course, based on the aforementioned parameters, please write “Waiver” on the first ‘Institution’ line of the Pathophysiology prerequisite in the online application. Upon review of the application we will confirm that your degree is valid for the waiver (Biology or Neuroscience), and will only contact you if there is a discrepancy.
