IRB Data Analysis Form

IRB Protocol Number:

Instructions: Investigators who are purely in the data analysis stage and no longer have any interaction with humans or their personally identifying information do not need to submit a continuing review application for their study. Projects that are purely in the data analysis stage no longer require IRB review. Please complete this form by checking the appropriate boxes, signing the form and returning it to ORP via email at irb@bc.edu or facsimile.

I. Study Title:	
II. Principal Investigator:	

III. Study Status: Data Analysis Stage	
If you no longer have any interaction with humans or their personally identifying information your project will not require continuing review by the IRB and will be closed. By checking the boxes below, you agree to the following statements and verify that your project is in the data analysis stage.	
<input type="checkbox"/> No further interaction with human participants will occur. <input type="checkbox"/> No access to personally identifying information will be needed. <input type="checkbox"/> No long term follow up will be conducted.	

If you complete this form, no further action is required. Your project will be closed. Please note that contacting the participants in this study or accessing their identifying data beyond this point is not permitted. You must seek IRB approval by completing an initial IRB application prior to contacting participants in the future.

If you have any questions, please do not hesitate to contact the Office for Research Protections.

SIGNATURE OF PRINCIPAL INVESTIGATOR		
By signing this form, the undersigned acknowledges that any further interaction with the participants in this study or personally identifying information has not been approved by the Boston College IRB.		
Print Name of Principal Investigator	Signature of Principal Investigator	Date
