Science on Tap – Summer 2016

June 2, 2016 kicks off the first edition of the Science on Tap! seminar series. The speakers, which were chosen by different BC biology labs, are local graduate students, post-doctoral researchers, or research assistants. Science on Tap! was created to stimulate interdisciplinary discussion and collaboration between biology labs at BC and other research institutions in the Greater Boston Area.

The talks will be held on Thursdays during the summer in Higgins from 4-5pm. A 30-45min power-point presentation will be followed by a small reception.

June 2
Lindsey Robinson, Graduate Student, Whelan Lab, Harvard University
