

ECONOMIC CRISIS AND SOCIAL CHANGE
**The Political Economy of Crisis
and the Fight for a Just and Sustainable World**

This course analyzes key topics in social and political economy focusing on the current economic crisis in the context of the corporate order in America and the world. It focuses on the interface between corporations and the state, and the way that the corporate regime organizes economic, political and social life while producing extreme instability and a new economic and financial meltdown. It also proposes changes in the corporate system – both at the national and global levels - that can heal American and world-wide deep social, economic and environmental crises while ushering in a new system of sustainability and global democracy.

The vast power of rising global corporate empires - from Citigroup to Exxon/Mobil to Microsoft - poses new threats to American democracy and the wellbeing of all citizens. Globalization and American corporations are trumpeted as the best hope for global prosperity and democracy. But the vast size of global markets and firms, their single-minded profit seeking, and *lack of public accountability* create a system of corporate domination, with financial deep instability and a deteriorating economy, a dangerously deteriorating planetary environment, and corrupted democracy.

This course offers new solutions for these problems, offering a vision of how to deal with the current crisis in the economy and environment and polity, while bringing corporations and unchecked American power under democratic control. It shows that we need new social movements with a global vision of democracy, equality, and global environmental justice and sustainability.

The course offers students literacy in globalization, political economy, the theory of the corporation and corporate responsibility, the practice of business, and the making of democratic and sustainable social change. It provides a new perspective on world affairs and American society, and should help students interpret the news about the economy and American social problems in a more critical and informed way. It does not require prior background in political economy or economics, and uses texts that are written for the general reader.

- 1) Requirements and Basis For Grading: Midterm and Final Exams (each about 50% of grade) Attendance and Participation are also a consideration

Books (In Book Store and on Library Reserve):
