Social Theory is designed to introduce students to three major historical theorists in the social sciences: Karl Marx, Max Weber, and Emile Durkheim. It will also introduce students to contemporary theories, such as functionalism, interactionism and poststructuralism. The theories will be examined chronologically and conceptually; highlighting the historical context in which the theories were written as well as key concepts that can be applied to social issues today.

For extra credit, you may email me a video, or article on a topic, or current event, you think is relevant to the section’s theorist and a two-page write up summarizing the content and how it is relevant to the section’s theory.
