This “Race in the Criminal Justice System” course is designed to introduce students to sociological and legal analysis of the American justice system as a form of raced social control. We will examine the history of raced social control in the U.S. and its implications for the functioning of American society. We will also examine how the criminal justice system intersects with other systems of social control, like school system, welfare state and foster care. This course will approach this topic with an intersectional lens, in which race, age, class and gender are analyzed as integral parts of the social construction of “criminality.”
