Eye Movement Desensitization and Reprocessing (EMDR): A Model for Accelerated Change

DR. LEANN EGETO, LICSW

Dr. Egeto is a clinician in private practice in downtown Boston. She specializes in working with individual adults who were acutely and chronically traumatized as children. She is a psychodynamically oriented, attachment-based therapist who utilizes CBT, DBT, EMDR IFS, and hypnotherapy in her work. Her talk will focus on reviewing the core components of EMDR as a treatment model for trauma, as well as current supporting research. A case presentation will be shown.
