Would you like statistical advice for your research?

You are invited to participate in a research consulting meeting with Dr. Ludlow, the Chair of the Educational Research, Measurement, and Evaluation (ERME) department, as well as PhD students from the department. At the meeting, students from all Lynch School departments will have the opportunity to present their current or future/planned research and pose questions regarding appropriate research methods and statistical analyses.

Future Meeting Dates Include:

- Tuesday, March 10th from 11am – 12pm in Campion 224
- Thursday, March 12th from 7pm – 9pm in Campion 208
- Tuesday, April 7th from 1pm – 2pm in Campion 124
- Thursday, April 9th from 7pm – 9pm in Campion 208

Prior to each meeting, an email will be sent out containing a link to RSVP for the event. Please email Kelsey Klein (ERME PhD student and event co-organizer, kleinkg@bc.edu) with any questions.

If you plan to attend, please think about, and be able to clearly articulate, the following:

1. What is your research question and/or research problem?
2. What methods did you use (or do you plan to use) for data collection?
3. What data do you have (or will have) available (e.g., sample size, description of variables, etc.)?
4. What analyses do you think are appropriate for the data?
5. What is the basic issue or problem that has brought you to this meeting?
