

Graduate Programs in Education and Psychology

Prepare to make a difference as an educator, administrator, counselor, researcher, or scholar through the Lynch School of Education's graduate programs in education and psychology.

Since 1952, the Lynch School of Education has offered master's and doctoral programs to prepare students to address contemporary issues and challenges and create opportunities for a rewarding career within the fields of education and psychology. With a focus on collaborative learning and social justice, our programs have earned an outstanding reputation across the nation. The Lynch School is consistently ranked among the top 20 schools of education in the country by *U.S. News*, and in 2009, was ranked first among schools of education at Catholic universities, and ranked second among all schools of education in New England.

A concern for social justice is an integral component of the Lynch School experience. Through faculty research, field experiences, service trips, and more, the Lynch School community is actively involved in improving lives at the local, national, and international levels.

What unites our diverse work is the underlying aspiration to enhance the human condition, to expand the human imagination, and to make the world more just.
