As the “Keys to Inclusive Leadership in Nursing” (KILN) program completes its sixth year, new initiatives have been implemented to keep current scholars and alumni connected to the KILN community. KILN staff held sessions with KILN scholars from each class during both semesters, which gave students and staff the opportunity to get to know each other. A variety of topics were discussed, including opportunities to grow as a leader, strategies and resources for job searching, licensure, career goals, mentoring, and suggestions for improving the KILN program. KILN alumni have also been sharing their experiences after graduation and offering advice to current nursing students via the KILN blog. We hope to continue building these programs in the next year and nurturing an inclusive community.
