

Reflection Project Brainstorm Questions

The GP program aims at helping students gain a comprehensive global perspective-what is a comprehensive global perspective? Why is a comprehensive global perspective important in general and for you personally?

If you had not participated in the GP program would you be as globally aware?

What if one piece was missing? (for example what if you just went abroad, or just took globally focused classes?)

After completing, or nearly completing the program, would you tell a freshman to join the program? Why?

How do you best process experiences and reflect? (journaling, painting, writing poems) Can you incorporate this into your reflection project? What are some ideas for reflection projects?

Do you feel you have gained a comprehensive global perspective throughout your time at BC?

What class affected you the most? What co-curricular activity? What about your abroad experience affected you the most?

Why did you decide to complete the GP program in the first place?

Do you feel that you have been able to contribute a unique perspective in your classes?
