INTRODUCTION TO MEXICO

Mexico, a federal constitutional republic, is the fifth largest country in the Americas by area, covering 1,964,375 square kilometers (over 760,000 sq. miles), and the 14th largest in the world. With one of the oldest and richest cultural histories dating back to the Mayan and Aztec cultures, today Mexico has an estimated population of 111 million people (2009). 87.99% of the population is Roman Catholic.

In 1521 Spain conquered the territory and 300 years of colonization followed, until Mexico declared its independence in 1821. The Mexican Revolution occurred in 1910. In the years of the “Mexican miracle” (1940-1970), the rate of economic growth in Mexico was close to or greater than 6.0%. In the last decade, the Mexican economic system has made progress toward achieving economic stability, opening its economy while establishing bases for sustainable, long-term growth.

The 1994 North American Free Trade Agreement (NAFTA) established free trade between Mexico, the United States, and Canada. In 2007, manufacturing produced Mexico’s main exports, 80.7%. Mexico has been a member of the Organization for Economic Cooperation & Development (OECD) since 1994, the only Latin American member.
LABOR FORCE HIGHLIGHTS

- The employment rate in Mexico in 2007 was 61.1%.
- Economically active population in Mexico is projected to increase from 106.5 million in 2007 to 120.5 million in 2020. The “economically active population” comprises all persons of either sex who furnish the supply of labor for the production of goods and services during a specified time reference period.
- The unemployment rate in 2008 was 3.5%.
- In 2004, the average hours usually worked in the main job by Mexican employees (working either full- or part-time) was 43.6.
- In 2004, 15.1% of Mexican employees worked part-time.
- 33.9% of the total civilian employed labor force reported being self-employed in 2008.

Source: OECD

Compared with the other North American countries, Mexico has the lowest rate of employed individuals as a percent of the population.

Compared to countries with similar gross domestic products, Mexico and Italy have the lowest rate of employed individuals as a percent of their populations.
Mexico has the highest employment rate among men and lowest employment rate among women, compared to comparable OECD nations.

The age groups with the lowest employment rates are the youngest (15-19) and the oldest (55-64).

In 2008, Mexico had the lowest employment rate among 25-54 and 55-64 year olds in North America.

In 2009, the Mexican population was 111,211,789, compared to 307,212,123 for the United States and 33,487,208 for Canada.

The most common ethnic groups in Mexico are mestizo (Amerindian-Spanish) (60%), Amerindian or predominantly Amerindian (30%), and white (9%).

Total fertility rate indicates the number of children to be born to a woman during her reproductive span of her life. The total fertility rate for Mexican women in 2009 was 2.3 children.

In 2009, 6.2% of the Mexican population was age 65 or older, compared to 12.8% in the United States and 15.2% in Canada.

Figure 9. Life Expectancy at Birth, Mexico and Regional Comparisons, 2009

The life expectancy at birth for the Mexican population in 2009 was 73.3 years for men and 79.0 years for women.

Source: CIA World Factbook
In Mexico, 8.3% of the male population and 9.6% of the female population is 60 or older. In comparison:

- In Canada, 19.2% of the male population and 22.7% of the female population is 60 or older.
- In the United States, 16.2% of the male population and 19.7% of the female population is 60 or older.

In Mexico, the majority of the population is under the age of 25. Canada and the United States show much different dynamics and have significantly larger older adult population groups. (See Figures 10a-10c, and Figure 11.)

ABOUT THE INSTITUTE

Established in 2007 by the Sloan Center on Aging & Work at Boston College, the Global Perspectives Institute is an international collaboration of scholars and employers committed to the expansion of the quality of employment available to the 21st century multi-generational workforce in countries around the world.

The Global Perspectives Institute focuses on innovative and promising practices that might be adopted by employers and policy-makers.

The Institute’s research, publications, and international forums contribute to:

- a deeper understanding of the employment experiences and career aspirations of employees of different ages who work in countries around the world;
- informed decision making by employers who want to be employers-of-choice in different countries; and
- innovative thinking about private-public partnerships that promote sustainable, high-quality employment.

The Sloan Center on Aging & Work at Boston College promotes quality of employment as an imperative for the 21st century multi-generational workforce. We integrate evidence from research with insights from workplace experiences to inform innovative organizational decision making. Collaborating with business leaders and scholars in a multi-disciplinary dialogue, the Center develops the next generation of knowledge and talent management.

The Sloan Center on Aging & Work is grateful for the continued support of the Alfred P. Sloan Foundation.

Laura Ruiz Pérez, is the Dean of Social Programs at Virtual University, Tecnologico de Monterrey. Over the past few years Dr. Ruiz has been working on the development of capacity building strategies for agents of change. The main objective of her work is to achieve growth and development by empowering social leaders through the creation of educational programs and strategies for innovation and sharing best practices through social networks, using the potential of multimedia learning, Internet and other information and communication technologies.

She has been conducting research on educational program development and evaluation for capacity building in Latin America and, is the co-author and author of several publications and conference papers in cognitive theory, education and distance learning.

Dr Ruiz has held several senior executive positions in the Mexican Government at federal and local levels. She was also a consultant in the development of public policy development programs.
