Corporations, investment banks, and asset management firms increasingly base their operational and investment decisions on the statistical analysis of “big data.” In this course, you will be introduced to Python, a popular open-source modern programming language, and learn how to use it to extract data from online sources, estimate univariate and multivariate regressions on real-world financial data, and perform Monte Carlo simulations. THERE WILL BE AN OPTIONAL REVIEW/HELP SESSION ON FRIDAY AFTERNOONS.

Individual Directed Study Sadka, Ronnie Spring 2022
This is an opportunity for students interested in independent study to engage in a one-to-one relationship with a faculty member of the Finance Department. This course is only available to students who have demonstrated (1) an extremely strong interest in a particular area of finance, and (2) a strong self-motivation and self-discipline in previous studies. Students are required to present their research results to a departmental faculty group towards the end of the semester. The permission of the department chairperson is to be obtained when the individual faculty member has agreed to direct the student’s research project.

MFIN6600201
Venture Capital Hession-Kunz, Andrew Spring 2022
This course looks at the nature of the VC firm, its fundraising, and compensation. It explores the portfolio strategies, valuation, and corporate management issues. Of importance are the VC's exit strategies, term sheet negotiations, and syndicating. Course includes analyzing long term financial projections as part of a simulation, in which you work with the Entrepreneurial Finance course to analyze early-stage deal terms and negotiate an investment round. One mandatory class meeting on April 13th from 4:30pm-6:50pm. This course is for people who are not taking nor plan to take MFIN2210 Entrepreneurial Finance.

MFIN661601
Introduction to the Investment Banking Industry Cramer, Robert E Spring 2022
This course provides an overview of investment banking. We will study the investment banking industry with a specific focus on the role of investment bankers in capital markets and recent regulatory changes. Provide both an institutional perspective on the investment banking industry and an opportunity to apply financial theories and models. Some of the specific topics that we will cover are stock underwriting and valuation, fixed-income securities underwriting, including junk bonds, asset securitization, merchant banking and private equity firms, money
management and mutual funds, structuring deals, including mergers, acquisitions, and divestitures, global financial markets, securities regulations, and ethics.

MFIN662101
Equity Securities Analysis Azevedo Duarte Silva, Ernesto T Spring 2022
The equities securities analysis and valuation course will teach a highly rigorous approach to equities securities analysis and valuation with a heavy emphasis on in-class discussion and case study analysis. Initially, the course will focus on financial theory that underpins equity security valuation, and then move on to understand how industry structure and a company’s competitive advantage influences an investor’s decision making and valuation. Financial statement analysis, modeling, and different valuation techniques will be explored in detail. Where appropriate, guest lecturers will be brought in to share their specific expertise and perspectives as an investor. By the end of the course, the goal will be to have every student be able to analyze a company as a potential investment and understand its valuation.

MFIN662501
Private Equity Gasperoni, James H Spring 2022
This course is the study of Private Equity as an asset class and its various components. Private Equity involves the investment of capital into companies and assets that are not publicly traded on stock exchanges. The objective of the course is to provide a basic understanding of the Private Equity ecosystem: private equity companies, underlying investments in companies (or assets) and the investors that provide financing for deals. A primary focus of the class will be traditional buyout investments: an area of the capital markets that is growing in both size and opportunity as well as increasing in interest from investors. In addition, the course will consider the similarities and differences between typical buyouts and other private equity styles.

Economics DEPT Spring 2022
This course is intended to introduce the students to basic economic concepts such as supply and demand, market equilibrium, efficiency, opportunity costs, sunk costs, different market structures, gross domestic product (GDP), money, inflation, unemployment, and monetary policy. The course will be divided into two parts: (1) Microeconomics where the focus is on individual economic agents. In this part consumer demand, firm supply, market structure, equilibrium, efficiency, opportunity costs, and sunk costs are covered. (2) Macroeconomics where the focus is the economy as a whole. In this part the topics are GDP, growth, money, inflation, and unemployment.

Information systems play a vital role in management. Future business professionals need to be able to assess, evaluate, and apply emerging technology to business. In this course, we approach the subject in two ways. First, students learn how professionals use technology in practice. Through various hands-on tech workshops, students will get a better understanding of how to apply technologies in business fields such as marketing, finance, operations. Second, students learn strategic management through the lens of technology. Students examine the role of technology in promoting innovation and organizational competitiveness across the functional areas of the firm. Through business case studies, students get a better understanding of how organizations use information systems to gain and sustain competitive advantage. Note: This class no longer teaches Excel. It is now taught in: BZAN1037 Excel for Business Analytics.

Through business case studies, students get a better understanding of how organizations use information systems to gain and sustain competitive advantage. Note: This class no longer teaches Excel. It is now taught in: BZAN1037 Excel for Business Analytics.

Information systems play a vital role in management. Future business professionals need to be able to assess, evaluate, and apply emerging technology to business. In this course, we approach the subject in two ways. First, students learn how professionals use technology in practice. Through various hands-on tech workshops, students will get a better understanding of how to apply technologies in business fields such as marketing, finance, operations. Second, students learn strategic management through the lens of technology. Students examine the role of technology in promoting innovation and organizational competitiveness across the functional areas of the firm. Through business case studies, students get a better understanding of how organizations use information systems to gain and sustain competitive advantage. Note: This class no longer teaches Excel. It is now taught in: BZAN1037 Excel for Business Analytics.

Physical Computing - Interactive Art, Robotics, and Tech for Good Gallaugher, John M Fall 2021
Low-cost microcontrollers, sensors, and computing devices like the Raspberry Pi make it possible to build a series of projects that humans can physically interact with. This course assumes no prior programming experience but will progress quickly through block-based MakeCode programming, then CircuitPython programming so that all students have coding knowledge necessary to create hardware projects. Students will purchase an amount of hardware and tools similar to the cost of books in a standard course, and we'll use these parts to build a series of projects that control lights, read sensors, produce sound, respond to touch and app control, capture camera images, and more. We'll also build a wheelchair-based robot, and students will have an opportunity to create and present several original projects and share their work with classmates.

Technology and Culture Griffith, William Fall 2021
This interdisciplinary course will first investigate the social, political, psychological, ethical, and spiritual aspects of the Western cultural development with a special emphasis on scientific and technological metaphors and narratives. We will then focus on the contemporary world, examining the impact of our various technological creations on cultural directions, democratic process, the world of work, quality of life, and especially on the emergent meanings for the terms "citizen" and "ethics" in contemporary society. Students will explore technologies in four broad and interrelated domains: (1) computer, media, communications, and information technologies, (2) biotechnology, (3) globalization, and (4) environmental issues.

ISYS320601
TechTrek Doyle, Jeremiah K; Kane, Gerald C Fall 2021
Enrollment is limited and admission is competitive. Interested students should see www.bc.edu/techtrek for application and course details. An entrepreneurial mindset is a critical component for new ventures, innovation within large companies, starting social initiatives, and developing a rewarding and impactful career in an ever-changing world. This course introduces students to the entrepreneurial mindset and is open to and intended for undergrads enrolled in any undergraduate program at BC (e.g. CSOM, MCAS, LSOE). The course combines traditional classroom elements with a series of Zoom meetings with entrepreneurs, venture capitalists, and other executives throughout the semester. In the past year, students have met with senior leaders at companies like Google, Facebook, Airbnb, Uber, Salesforce, Goldman Sachs, Tesla, Dropbox, Fantasitc, Twitter, numerous venture capital firms, and startups of all shapes and sizes. Course work and visits have an entrepreneurial focus, covering topics such as venture capital, entrepreneurial management, artificial intelligence, blockchain/ cryptocurrencies, NFT, social media and platform strategies, cloud computing, and the social/ethical implications of digital technologies. We also spend class time reflecting on our visits with entrepreneurs, discussing what implications the visit has for our understanding of business strategy and our own careers. The class is intended to help students identify and explore their own interests in relation to the increasing digitalization of the business environment and what these interests mean for their career trajectory. Enrollment is limited. Admission is competitive, and applications are available at www.bc.edu/techtrek. This class will be a prerequisite for a 1-credit travel study to NYC and/or SF anticipated for Spring 2022 and beyond.

Data Analytics in Practice Kokkodis, Marios Fall 2021
Organizations everywhere struggle to aggregate, analyze, and monetize the growing deluge of data generated by modern information systems. Data analytics capitalizes on this data by processing, transforming it, and subsequently applying statistical and quantitative analysis and explanatory and predictive modeling. Managers can explore patterns, predict future trends, and develop proactive, knowledge-driven decisions that affect all parts of modern organizations. This course will familiarize you with the capabilities and limitations of emerging analytics techniques, essential knowledge about data analytics programming and tools, and a core understanding required to be an intelligent manager and consumer of analytics. Upon completion of this course, you will be able to: perform basic data analytics tasks including: data profiling and feature engineering, data collection, transformation, and use of API, text transformation, data visualization, predictive modeling; understand biases in data and be a savvy consumer of analytics; justify decisions on the basis of analytics and identify opportunities; define problems that analytics can solve and provide data-driven solutions; use the ideas, concepts, and terminology of analytics appropriately to communicate with both business and data professionals. ISYS770012
Data Analytics 2: Data Management for Analytics Evanchik, Leonard N Fall 2021
Information Technology (IT) and Data Analytics now permeate the strategy, structure, and operations of modern enterprises, and new business practices have led to an order of magnitude increase in the amount of data available for analysis and decision-making. It is essential that managers develop a deep understanding of how data can be structured, captured, and queried in order to support operations, decision-making, and strategic insight. At the same time, managers must become fluent with IT so that they can promote innovative strategic initiatives that are increasingly data and IT dependent. In this course, students will develop an understanding of IT theory and practice, study key emerging technologies, and develop their ability to identify new opportunities made possible by IT. This course will also provide students with a deep understanding of data and analytics by exploring how business processes are modeled, analyzed, and designed, and data is queried using SQL. This combination of theory and practice will allow students to develop their ability to identify and take advantage of the new opportunities now made possible by data analytics and Information Technology.

ISYS665501
Introduction to Blockchain and Its Business Applications Colleen, Bennett I Fall 2021
The objective of this course is to introduce the business of blockchain—a technology that has the potential to drastically alter the way value is stored, exchanged, shared, and distributed. It is the backbone of the next iteration of the Internet: Web 3.0 or The Internet of Value. This course does not require any technical knowledge or prior knowledge of the subject, and is designed to give students a foundational knowledge of blockchain technology and a familiarity with the basic principles that govern blockchain protocols. Students will gain a fluency in the terms and concepts required to understand how this powerful technology works. Most importantly, students will study real-world applications of the technology, which range far beyond blockchain’s original use case (cryptocurrency) and hear from a number of influential guest speakers who are using or investing in blockchain technology at their companies today.

ISYS6640101
Cybersecurity Strategy and Management Evanchik, Leonard N Fall 2021
The challenges and issues of cybersecurity are everywhere, and today, these are not just technical issues, but critically important business issues for all levels of management. The goal of this course is to develop an understanding of cybersecurity principles, procedures, tools and technology from a managerial perspective. The first part of this course is a discussion of why cybersecurity is a difficult and pervasive problem. We then learn about the different types of threats and study the tools and techniques that society, organizations, and individuals have to mitigate them, with a focus on risk management and internal controls. We will also explore a number of new areas of work including cryptocurrency and the security requirements for the Internet of Things (IoT). An important part of the course will be team projects at the end of the term, where students apply the concepts and techniques we have studied to a real-world management problem or challenge.

**Intro to Programming using Swift for iOS App Development Gallaugher, John M**

**Spring 2022**

In this fast-paced course, students will learn the Swift programming language and iOS app development skills. Using a "flipped-classroom" approach, the students take lectures in a series of online videos embedded in a web-based course/reference/quiz book, following along with videos as they learn programming concepts and build apps. Although this is a flipped class, expect a challenging course. Class is mandatory (this is NOT an online course) and class time will be used for additional exercises, concept review, and student questions. Students are required to bring a fully-charged Mac laptop to each class with the latest version of Apple’s free Xcode software installed (make sure you have access to a Mac that meets these requirements before enrolling). While this course is rigorous, challenging, and covers a broad set of topics at a rapid pace, the course assumes no prior programming experience. Students should be prepared to spend significant time each week on self-directed learning and regular programming projects.

This course can be used in place of ISYS 2137 Programming for Management for credit toward the Information Systems concentration.

**Credits:** 3

ISYS335001

Data Management for Analytics and Applications Wyner, George M

Spring 2022

This course provides a foundation in how databases and other data management technologies are used in business analytics and software applications. It will familiarize students with the process of collecting, storing, querying, and manipulating data, which comprise the core practices for building software applications and making data-driven decisions. Credits: 3 Room and Schedule: Fulton Hall 415 TuTh 03:00PM-04:15PM Satisfies Core Requirement: None Prerequisites: Prerequisite: BZAN2021 or proficiency with SQL and BZAN1135 or proficiency with R Corequisites: None Cross-listed with: None: Frequency: Every Fall Student Level: Undergraduate Comments: None Status: Offered

ISYS425801

Systems Analysis and Design Sterpe, Peter J

Spring 2022

This course is required for Information Systems concentrators.. The course studies information systems (IS) development including requirements, analysis, design, and implementation phases and workflows. We investigate the roles of systems analysts; serving as intermediaries between users, managers, and implementers; and helping each to understand the needs and problems of others. The student will learn about major methods and tools used in the systems development process. Please note that Database Systems and Applications (ISYS3257/CSCI1157) must be completed prior to taking this course. Credits: 3 Room and Schedule: Fulton Hall 250 MW 03:00PM-04:15PM Satisfies Core Requirement: None Prerequisites: ISYS3257/CSCI2257 and ISYS1021 and ISYS2157 or CSSCI1157 may be substituted for ISYS2157/CSCI1157. Corequisites: None Cross-listed with: None Frequency: Every Fall, Every Spring Student Level: Undergraduate Comments: None Status: Offered

ISYS662501

Geographic Information Systems for Planning and Decision-Making Cohen,Will M

Spring 2022

Large quantities of information are available to describe our social and physical environment with high detail, but making sense of this data requires specialized skill sets. Geographic
Information Systems (GIS) is a general approach to analysis and is a powerful set of tools for understanding complex problems or for making a compelling argument about issues grounded in the physical or social environment. It is widely used in the public and private sectors. This course will introduce students to the use of GIS and representation as a means of looking at and representing spatial data. Students will learn how to perform the three broad steps of spatial analysis: 1) collecting and organizing data, 2) analyzing this data for appropriate patterns, and 3) using software to represent data on maps to support decision making.

Room and Schedule: Fulton Hall 423 M 07:00PM-09:30PM Satisfies Core Requirement: None Prerequisites: None Corequisites: None Cross-listed with: ECON2121 Frequency: Every Fall, Every Spring Student Level: Both Comments: None Status: Offered

ISYS663501
New Media Industries McNealy, Paul-Jun Spring 2022
This course is designed to introduce the changing business models of new media (video games, music, TV and film, and journalism) industries. This is achieved by examining in detail the technology enablers and disruptive forces in both the U.S. and around the world, consumer behaviors, as well as legal and regulatory concerns. A special emphasis will also be placed on media companies whose business models have been heavily influenced or altered by digital distribution. This class will be a combination of in-class and Zoom sessions during class time, and will have an emphasis on influential guest speakers from various industries.

ISYS664101
Cybersecurity Strategy and Management Ewenchik, Leonard N Spring 2022
The challenges and issues of cybersecurity are everywhere, and today, these are not just technical issues, but critically important business issues for all levels of management. The goal of this course is to develop an understanding of cybersecurity principles, procedures, tools and technology from a managerial perspective. The first part of this course is a discussion of why cybersecurity is a difficult and pervasive problem. We then learn about the different types of threats and study the tools and techniques that society, organizations, and individuals have to mitigate them, with a focus on risk management and internal controls. We will also explore a number of new areas of work including cryptocurrency and the security requirements for the Internet of Things (IoT). An important part of the course will be team projects at the end of the term, where students apply the concepts and techniques we have studied to a real-world management problem or challenge.

ISYS664501
Data Visualization Nobre, Carolina Spring 2022
This course covers foundations of data visualization and best practices to help students effectively analyze data and present their insights clearly in a way that will engage their audience. The course provides discussions and presentations on topics such as visual perception, the various chart types and when to use them, the effective use of colors, typography, maps, and other visualization techniques for incorporating analytics and storytelling, and teaches through many examples of compare and contrast. The conceptual discussions will be integrated with hands-on experience using two popular visualization tools.

ISYS665501
Introduction to Blockchain and its Business Applications Cathcart, Graham T Spring 2022
The objective of this course is to introduce the business of blockchain—a technology that has the potential to drastically alter the way value is stored, exchanged, shared, and distributed. It is the backbone of the next iteration of the Internet: Web 3.0 or The Internet of Value. This course does not require any technical knowledge or prior knowledge of the subject, and is designed to give students a foundational knowledge of blockchain technology and a familiarity with the basic principles that govern blockchain protocols. Students will obtain a fluency in the terms and concepts required to understand how this powerful technology works. Most importantly, students will study real-world applications of the technology, which range far beyond blockchain’s original use case (cryptocurrency) and hear from a number of influential guest speakers who are using or investing in blockchain technology at their companies today. Students who complete the course will understand blockchain and cryptocurrency’s game-changing potential, be able to separate fact from hype, and be effective leaders in the space.

ISYS770001
Data Analytics 2: Data Management for Analytics Ewenchik, Leonard N Spring 2022
Information Technology (IT) and Data Analytics now permeate the strategy, structure, and operations of modern enterprises, and new business practices have led to an orders of magnitude increase in the amount of data available for analysis and decision-making. It is essential that managers develop a deep understanding of how data can be structured, captured, and queried in order to support operations, decision-making, and strategic insight. At the same time, managers must become fluent with IT so that they can promote innovative strategic initiatives that are increasingly data and IT dependent. In this course, students will develop an understanding of IT theory and practice, study key emerging technologies, and develop their ability to identify new opportunities made possible by IT. This course will also provide students with a deep understanding of data and analytics by exploring how business processes are analyzed, data is modeled (using entity relationship diagrams), databases are designed, and data is queried using SQL. This combination of theory and practice will allow students to develop their ability to identify and take advantage of the new opportunities now made possible by data analytics and Information Technology.

Data Analytics 3: In Practice Karpovsky, Anna Spring 2022
Modern information systems now generate massive volumes of data. Organizations everywhere struggle to aggregate, analyze, and monetize the growing deluge of data. Business Analytics capitalizes on this data by combining statistical and quantitative analysis, decision support, and predictive modeling, and fact-based management. Managers can explore patterns, predict future trends and develop proactive, knowledge-driven decisions that affect all parts of modern organizations. This course provides students with a pragmatic familiarity with the capabilities and limitations of emerging analytics techniques, an introduction to Python or R, an overview of methods and tools, and a core understanding required to be an intelligent manager, designer, and consumer of analytics models.

Organizational Behavior Grubb, Anitza R Fall 2021
Class restriction is only applicable to current Boston College students and does not apply to non-BC (transfer or exchange) students. As an introduction to the study of human behavior in organizations, this course aims at increasing an awareness and understanding of individual, interpersonal, group, and organizational events, as well as increasing a student’s ability to explain and influence such events. The course deals with concepts that are applicable to institutions of any type; a central thrust of these concepts concerns the way institutions can become more adaptive and effective. The course is designed to help the student understand and influence the groups and organizations to which he/she currently belongs and with which he/she will become involved in a later career. Note: Restrictions only apply to current Boston College students and do not apply to transfer or exchange students.

Leadership Clair, Judith Fall 2021
In today’s world, there are many challenges that call for effective leadership. Corporate ethics scandals, an increasingly global and diverse work force, and the need for employees to experience renewed meaning and connection to their work are just a few examples. How we respond to these challenges can profoundly change the world in which we live and work. In this course, we learn about the challenges and opportunities of effective leadership and how leaders, including ourselves, can respond to them.

How we respond to these challenges can profoundly change the world in which we live and work.
Entrepreneurship explores the innovative ways government agencies, nonprofit groups, and entrepreneurs face when starting, growing and capturing the value of their ideas. We will discuss case sets in a range of industries, including car sharing, aviation, electronic publishing, fashion, file storage, streaming media, consulting, food services and education. Course goals include: Help you to understand the major issues entrepreneurs face when starting, growing and capturing the value of their ventures. Develop the analytical skills required for the environment in which entrepreneurs operate high uncertainty, rapid growth, ongoing change and limited resources. Be able to compare and contrast the major sources of capital available to entrepreneurs and the expectations of investors. Better understand the role that entrepreneurship will play in your career. Entrepreneurial Management requires strong qualitative and quantitative analytical skills. There are no official prerequisites. To evaluate the drivers of venture profitability and to analyze business models, you will need a basic understanding of income statements which will be reviewed during the initial classes.

This course focuses on the fundamentals of building a business either as a start-up or within a larger organization. Entrepreneurial Management introduces conceptual frameworks and tools that help students to identify, evaluate, launch and grow innovative ventures that have the potential to revolutionize markets. We will discuss cases in a range of industries including car sharing, aviation, electronic publishing, fashion, file storage, streaming media, consulting, food services and education. Be able to compare and contrast the major sources of capital available to entrepreneurs and the expectations of investors. Better understand the role that entrepreneurship will play in your career. Entrepreneurial Management requires strong qualitative and quantitative analytical skills. There are no official prerequisites. To evaluate the drivers of venture profitability and to analyze business models, you will need a basic understanding of income statements which will be reviewed during the initial classes.
goals, analyze the organization and its environment, make choices, and take concerted actions to effect positive change in their organization and society. Using the conceptual tools and analytic frameworks of strategic management, this course provides a perspective that is integrative, yet analytical. This perspective helps students make sense of the global business and societal environments, understand the ambiguities and dilemmas of management, and learn how to take effective action.

Capstone: Leadership and Mindfulness Waddock, Sandra A Fall 2021

Capstone classes may NOT be taken Pass/Fail. You may take only ONE Capstone class before graduation. No matter what your major, you will participate in groups and organizations that will consistently ask or expect you to lead. The best leader is authentic, has integrity, is self- and other-aware, and acts with this awareness firmly in mind. Good leaders, that is, act mindfully with respect for the people and world around them. This course explores your development as a mindful focusing inward and outward, reflecting on where you have come from and where you are going, what type of world you want to live in, your relationships with others, and how you can be an effective leader.

MGMT813101
Mergers and Acquisitions Mucci, Richard L
Fall 2021
This course provides an overview of the various stages of the M&A process, and the key decision points which help guide it. This course is meant to be a survey class, covering a wide range of M&A topics. It is recommended for participants pursuing careers requiring the formulation of inorganic growth options for businesses (e.g., general management, business development, or consulting) or the assessment of business investment opportunities (e.g., investment banking, venture capital, or private equity). A broad overview of each typical stage in an M&A process will be discussed including target identification, valuation, due diligence, financing, deal structure, negotiating an agreement, closing, and integration. Armed with an understanding of each stage of the M&A process, possible decision frameworks will be formulated and discussed.

Qualitative Research Methods Pratt, Michael G
Fall 2021
Open to current Ph.D. students only (not available for MBA students). The purpose of this course is to help you better understand qualitative research methods so as to enable you to be a better researcher and reviewer of work that employs these types of methodologies. Given the variety of methods that fall under the rubric of “qualitative methods,” some classes will discuss general issues or skills (e.g., gaining access, interviewing, observing) that are applicable to a wide range of empirical approaches, while others will focus more specifically on a particular approach (e.g., ethnography, case studies, grounded theory). Skill development is essential to the course, and there will be opportunities to practice specific methodological techniques and to critique exemplary qualitative research.

Management and Organization Courses: Spring 2022
MGMT102101
Organizational Behavior Grubb, Anita R
Spring 2022
Class restriction is only applicable to current Boston College students and does not apply to non-BC (transfer or exchange) students. As an introduction to the study of human behavior in organizations, this course aims at increasing an awareness and understanding of individual, interpersonal, group, and organizational events, as well as increasing a student’s ability to explain and influence such events. The course deals with concepts that are applicable to institutions of any type; a central thrust of these concepts concerns the way institutions can become more adaptive and effective. The course is designed to help the student understand and influence the groups and organizations to which he/she currently belongs and with which he/she will become involved in a later career. Note: Restrictions only apply to current Boston College students and do not apply to transfer or exchange students.

Leadership: Concepts and Practice

MGT211101 Ethical Leadership Skills

This course focuses on ethics leadership and engagement methods in different types of pre-modern, modern, and postmodern organizational and political-economic contexts. What are our visions of ethical leadership, relationships and organization? What were we doing when we were at our best in leading meaningful and effective change and problem resolution in our relationships with family and friends and in our work and citizenship lives? What have been the individual, organizational, and environmental obstacles that made it difficult for us to lead meaningfully and effectively? What are different types of methods in trying to intervene and lead ethical change?

MGT211201 Negotiation

Negotiation is a key process in leadership, conflict resolution, and change management at every level of internal and external management. The purpose of the course is to improve students' abilities to analyze, prepare for, and practice win-lose, win-win, dialogic, and third party negotiating methods as appropriate. Emphasis is on practical application and personal development. Teaching methods used are role playing, discussion of readings, discussion with practitioners, original student projects, and discussion of current events. Students are invited to reflect upon how negotiating and conflict resolution practices help them developmentally change themselves, their organizations, and the world.

Leadership: Concepts and Practice

In today's world, there are many challenges that call for effective leadership. Corporate ethics scandals, an increasingly global and diverse workforce, and the need for employees to experience renewed meaning and connection to their work are just a few examples. How we respond to these challenges can profoundly change the world in which we live and work. In this course, we learn about the challenges and opportunities of effective leadership and how leaders, including ourselves, can respond to them.

MGT213201 Managing Change Ritchie-Dunham, James L Spring 2022

What makes change agents effective? This course addresses this question with a focus on change leadership tools and approaches. This course helps prepare students to diagnose and implement successful change both when they are in charge and when they must work through others. Students will also understand the driving forces that organizations and consultants face in managing change and the challenges in responding to those forces. This course is designed to educate the students on the realities of change management in the workforce, provide practical application of change management strategies, engage in theoretical discussions on the subject, and provide a clearer understanding of the consultancy process as it relates to change management. Students are provided with hands-on experience in using tools and techniques involved in diagnosing and implementing change management. This course is particularly relevant for those wishing to develop their leadership and consultation capabilities.

MGT213302 Leading High Performance Teams DEPT Spring 2022

This course examines the dynamics of teams—such as teams—within organizations. One of the key questions we will investigate is what makes some teams more effective than others. Students will learn and practice high performance team fundamentals, intervening to problem solve and understand the consequences of interpersonal conflicts. The course emphasizes a diagnostic and reflection approach within varied team settings and includes an independent field analysis project relating to an actual team within an organization.

MGT213701 Managing Diversity Clair, Judith Spring 2022

Students in this course will learn about contemporary empirical and theoretical research on the dynamics of international culture, gender, race, and other special differences in the workplace. They can also increase skills in diagnosing and solving diversity-related conflicts and dilemmas, and develop a capacity to distinguish a monolithic organization from one that treats diversity as a competitive advantage.

Entrepreneurial Management Shaw, Douglas J
Spring 2022
This course focuses on the fundamentals of building a business either as a start-up or within a larger organization. Entrepreneurial Management introduces conceptual frameworks and tools that help students to identify, evaluate, launch and grow innovative ventures that have the potential to revolutionize markets. We will discuss cases set in a range of industries including car sharing, aviation, electronic publishing, fashion, file storage, streaming media, consulting, food services and education. Course goals include: Help you to understand the major issues entrepreneurs face when starting, growing and capturing the value of their ventures. Develop the analytical skills required for the environment in which entrepreneurs operate. Enhance your understanding of the factors that influence venture success. Develop a range of entrepreneurial thinking skills. Accordingly, firms have assumed that the primary impetus for competitive advantage comes from a firm's internal assets and its core competencies. Indeed, firms have been developing their core competencies to grow either through increasing market share within its existing industries or by diversifying into new but related industries wherein its competencies are relevant. More recently, however we are witnessing a shift in the way that we think about growth and competitive advantage. Reasons for this shift include an unprecedented expansion of digitization in the business world and the emerging significance of new informational rather than traditional physical assets for competitive advantage. Tech companies such as Uber, Amazon, Facebook, and Airbnb exemplify this shift, showing how digitization can be harnessed to build powerful platforms, directly connect with millions of customers, understand the intricacies of how products and services are consumed rather than produced, draw on the inputs of thousands of third-party organizations, and broaden their business environments from industries to ecosystems. In such ecosystems, the core drivers of competitive advantage and growth are proving to be different from what traditional industrial companies have long relied on. This course delves into how firms should craft their digital strategy in this changing environment. The focus specifically is on traditional firms that are accustomed to crafting competitive strategies tailored to their industries. This course focuses on how they can transition their competitive strategies and make them relevant for the modern digital era.

Leadership and Corporate Accountability Spinello, Richard
Spring 2022
This course is designed to provide an overview of the economic, legal, and ethical responsibilities of companies and their leaders. Through a series of case studies, it will demonstrate the acute challenges of ensuring that a company's conduct conforms to those responsibilities. A major portion of the course will review the principal obligations of corporations to five primary stakeholder groups: investors and shareholders, customers, employees, suppliers, and the general public. Insider trading, fiduciary duties, disclosure of health risks, fairness in pricing, power asymmetries, affirmative action, international labor rights, managing failures, privacy rights, environmental sustainability, and corporate citizenship represent some of the issues to be discussed in this segment of the course. A secondary theme is corporate governance. Several cases will explore the role of management, the Board of Directors, financial intermediaries, and external regulators.

Thinking Strategically Integrative Strategy Simulation Montes, Juan
Spring 2022
This course prepares students to make executive-level decisions by participating and competing in business simulation. The course utilizes a sophisticated, market-leading simulation platform called "Global DNA" to create a realistic, hands-on learning experience. The course allows students to manage a company and see the results of specific functional and team decisions, integrating all management areas: marketing, organizational behavior, operations, accounting, and finance. The course is based around the concept of experiential learning, and student teams have a high degree of freedom to follow different strategies. The competitive nature of the simulation shows and compares the results of each company in every round, with a high level of detail (i.e., sales and production reports, financial information), teaching teams to effectively analyze quantitative business information. Students learn to think strategically by incorporating the potential scenarios of what other teams can do during the simulation in their own decisions.

Strategic Management Montes, Juan
Spring 2022
This is the senior integrative capstone course of the CSOM core. This course provides future leaders and strategists with an understanding of strategic management that will enable them to function effectively in a complex, global economy. Successful strategists need to define goals, analyze the organization and its environment, make choices, and take concerted actions to effect positive change in their organization and society. Using the conceptual tools and analytic frameworks of strategic management, this course provides a perspective that is integrative, yet analytical. This perspective helps students make sense of the global business and societal environment, understand the ambiguities and dilemmas of management, and learn how to take effective action.

The strategic management course deals with the overall general management of an organization. It stresses the role of the manager as strategist and coordinator whose function is to integrate the conflicting internal forces that arise from among the various organizational units while simultaneously adapting to the external pressures that originate from a changing environment. Drawing on the knowledge and skills developed in the core curriculum, this course serves as the integrating experience for the M.B.A. program.

Digital Strategy Subramaniam, Mohan Spring 2022
Digital technologies are revolutionizing traditional interdependencies among businesses. Managers have hence begun to recognize their business environments as digital ecosystems. But for firms accustomed to framing their business environments as industries, this is a significant shift in perspective, requiring an understanding of fresh strategic initiatives necessary to compete in the digital era. This course will elaborate on what is new and different about digital ecosystems for firm strategy. The course will offer frameworks that explain how digital ecosystems provide firms with new sources of value and new avenues for growth and highlight new strategic options for firms to compete in the new digital era.

Strategic HR Kierner, Agnieszka D Spring 2022
Whether leading a start-up or a team in a large organization, after this course you will have the skills needed to effectively design and execute strategies to manage people in such a way that they support long term business goals and outcomes. The course will help you think systematically about critical aspects of managing human assets and provide practical examples on how these strategies need to be implemented to achieve competitive advantage. Through a mix of lecture, case study analysis, in-class simulation and discussion we will take a journey around key issues leaders need to tackle: data driven HR, recruiting and onboarding, talent management, dealing with high and low performers, benefits and compensation, managing in diverse and multicultural environments. The course will draw upon personal experiences of the instructor leading technology start-ups, advising and driving change in large organizations, as well recent literature on these topics.

Business Wars: Leading Through Change and Disruption Kierner, Agnieszka D Spring 2022
In a world where the average lifespan of a company has significantly decreased, leaders find themselves in constant change and disruption management. Each class will take you to an analysis of a real story of what drives these companies and their leaders, investors, and employees to new heights or to ruin. We will analyze and discuss specific situations of a defining time for a company that needs to manage through a disruption in their industry. We will then understand and analyze the business context and learn about leadership behaviors needed to survive and thrive as an executive or employee of a company undergoing such a fascinating change. After finishing the course you will be able to shape your own perspective and behaviors helping you and your firm thrive in our fast-paced world.

Marketing Courses: Summer 2021

MKTG102101
Marketing Principles Brasil, Stevan Adam Fall 2021
This course is a prerequisite for all other marketing courses. Marketing is a dynamic, creative and challenging discipline that plays a leading role in the strategy and destiny of any company. Marketing is the business function with primary responsibility for generating revenue, defining the value proposition, and managing relationships with customers. Three broad areas will be explored including understanding markets and competitors, developing new products and organizing distribution, and implementing communications and promotions. A variety of examples in traditional industries and the digital sector will be discussed. Analysis and decision skills will be developed by practicing the use of tools and case studies. This course provides a foundational understanding of the marketing discipline, which is necessary for any role within business organizations.

Customer Behavior Hagvedt, Henrik Fall 2021
This course integrates marketing theory with insights from other fields of study, including social psychology, cognitive psychology, evolutionary psychology, and behavioral neuroscience. It analyzes consumer processes such as perception, learning, attitude formation, and decision making. These variables are broadly relevant to marketing challenges, given that the success of products and brands depends on their appeal to consumers. Discussion topics range from art and aesthetics to crisis behavior to new product development.

Pricing and Demand Analytics Engel, Samuel 
Fall 2021 
How do companies decide what prices to set for a COVID vaccine? A new model Tesla? Investment fees for a Fidelity mutual fund? A Disney+ subscription? A new financial planning service by Charles Schwab? A new Apple iPhone? Or the Amazon cloud? There are ethical questions about pricing, like Uber's surge prices that fluctuate with demand, or congestion pricing on highways or to enter cities. And there is puzzling pricing, like why Taylor Swift or StubHub tickets at lower prices even though Stub-Hub sells them for way more in the open market. Pricing is one of the most fascinating, and most important skills for anyone entering a management career—in finance, marketing, sales, accounting, retailing, e-commerce, or business analytics. In this course you will learn about value-based pricing based on the value customers perceive, the psychology of pricing ($9.99 versus $10), segmented pricing (for different segments in the marketplace), using cost accounting to estimate customer cost-to-serve and customer profitability, and how to set prices for really new products (like new innovations). In addition, you will learn demand analytics and dynamic pricing used by airlines, destination theme parks like Disney, and the digital economy. The instructor is a leader in pricing innovation for an aviation pricing consulting firm.

Services Marketing Samaras, Xanthe P 
Fall 2021 
The service sector of the economy is twice as large as the manufacturing sector. Nearly all new job growth in this country will be in services marketing. Service organizations differ from manufacturing businesses in many important respects and require a distinctive approach to marketing strategy development and execution. Some service businesses to be studied include entertainment, hospitality, travel, retail, telecom, car rental, healthcare, financial, and professional services. Service providers include hotel, airline, theme park, car rental and retail personnel, customer service representatives, bankers, doctors, accountants, and lawyers. 

Credits: 3
This course teaches students fundamental and leading-edge concepts in brand management. Students learn to develop and articulate brand strategy, how to give strategic brand direction, and how to measure strategic brand progress. They learn how to manage key relationships and functions that surround the brand, e.g., advertising, promotion, public relations, licensing, and product and package design agencies. A capable brand manager has exceptional strategic, quantitative, interpersonal, and presentation skills and must be comfortable with decision-making and leadership. The course will focus on the development and application of these skills in brand management via in-class learning, case discussion, and project work.

Heritage Marketing DEPT
Fall 2021
This course explores the interaction of marketing and history in the consumer marketplace. Heritage marketing is a strategic approach to capitalize on the historical status of older brands in the present and future. It uses the entire marketing system to develop a strategic position based on heritage, activate powerful dynamics in consumer behavior such as nostalgia, communicate relevant messages, and monetize the past. Business history and archival collections provide the content and inspiration for related communications and new product development. The primary classroom activity will be the analysis and discussion of business case studies from various industries. The pre-requisites are Marketing Principles and any course from the History core sequence.

Design Thinking and Strategy Dickinson, Kristine D
Fall 2021
"Design thinking is a human-centered approach to innovation that draws from the designer’s toolkit to integrate the needs of people, the possibilities of technology, and the requirements for business success. “ -Tim Brown, CEO of IDEO. Strategic design thinking is an integral driver of innovation and a significant factor in a business’ ability to foresee and adapt to customer needs. Companies like Apple, IDEO, and Pixar are all pioneers in the field, and this course will draw directly from their proven methods. Students will learn the various phases of design thinking, and how to apply a customer-centric approach to products and services in a range of industries. Students will delve into topics such as user experience (UX) product design, creative problem-solving, strategic storytelling, and customer-centric business decision making. Course content will include team projects, case studies, and occasional guest lectures from industry experts.

The class will be highly focused on practical experimentation and is directly relevant for students interested in product and brand management, marketing strategy, entrepreneurship, and beyond.

MKTG615701
Strategic Selling and Persuasion Westman, John C Fall 2021
Two fundamentals of business: someone must get the goods and services out the door, and someone must get the cash to come in the door. Sales is the function that does the latter. It, and its management, will be covered in this course. We will study the art of persuasion, modern day rhetoric in actual practice. The discipline will be addressed biologically. We will dissect real industry practitioners when they visit class, and actual sales calls in the field as a research paper. Upon course completion, students will have a complete understanding of both the selling and sales management process.

MKTG661001
Sports Marketing Lev, Mark T Fall 2021
The goal of this course is to provide an understanding of the business practices of the sports industry. Taking a practical approach, students will be asked to create business solutions for sports organizations. The attributes and failures of real examples will be discussed. Students will be expected to take the experience and apply it to creating specific campaigns, programs, and overall marketing plans for a specific sports application. Relationship architecture principles will be discussed at length and expected to be incorporated into the final project.

MKTG662101
Social Media, Emerging Technologies, and Digital Business DEPT Fall 2021
The past few years have witnessed the rapid rise of a number of new types of information technologies, such as social media, so-called "sharing economy" platforms, artificial intelligence, blockchain, internet of things, virtual and augmented reality, just to name a few.
These new tools both present immense opportunities and pose considerable threats for businesses of all sizes and across industries. This course explores the impact that these tools are having on the competitive environment, as well as the characteristics that companies, leaders, and employees will need to possess in order to thrive in this new environment increasingly defined by digital tools. Additionally, this course both learns about and learns with these information technologies in novel ways.

MKTG770001
Marketing Teopaco, John L Fall 2021

This course focuses on the managerial skills, tools, and concepts required to produce a mutually satisfying exchange between consumers and providers of goods, services, and ideas. The material is presented in a three-part sequence. Part one deals with understanding the marketplace. Part two deals with the individual parts of the marketing program such as pricing, promotion, product decisions, and distribution. Part three of the course deals with overall strategy formulation and control of the marketing function. Students in this course will come to understand the critical links between marketing and the other functional areas of management.

Product Planning and Strategy Bright, James P Fall 2021

This course focuses on the challenge of creating and launching new products and services. It is particularly appropriate for those who are interested in becoming a Product Manager within a larger company, or in starting their own business at some point. The course is built on the concept of learning by doing, as small student teams go through the full process of coming up with their own new product or service ideas, evaluating them, doing market research, and developing launch plans. We also assess a number of current new product ideas, analyze cases from a range of industries, and have one or two outside speakers. There is a heavy emphasis on discussion and practicality.

Strategic Pricing Management Smith, Gerald Fall 2021

This course explores pricing strategy and shows how pricing can be managed to achieve profitability. The course is practical and hands-on. It examines current pricing practices used by many companies, and shows how they lead to distortions and problems. It suggests strategic principles that lead to more profitable pricing decisions, including methods for financial analysis that focus on pricing profitability. Other topics include value-based pricing, managing price competition, segmenting markets based on price sensitivity, segmentation pricing strategies, buyer psychology of pricing, and research methods for assessing price sensitivity.

Strategic Brand Management Fisher, John H Fall 2021

This course teaches students fundamental and leading-edge concepts in brand management. Students learn to develop and articulate brand strategy, how to give strategic brand direction, and how to measure strategic brand progress. They learn how to manage key relationships and functions that surround the brand, e.g., advertising, promotion, public relations, licensing, and product and package design agencies. A capable brand manager has exceptional strategic, quantitative, interpersonal, and presentation skills and must be comfortable with decision making and leadership. The course will focus on the development and application of these skills in brand management via in-class learning, case discussion, and project work.

MKTG102101
Marketing Principles Hudson, Bradford T Spring 2022
This course is a prerequisite for all other marketing courses. Marketing is a dynamic, creative and challenging discipline that plays a leading role in the strategy and destiny of any company. Marketing is the business function with primary responsibility for generating revenue, defining the value proposition, and managing relationships with customers. Three broad areas will be explored including understanding markets and competitors, developing new products and organizing distribution, and implementing communications and promotions. A variety of examples in traditional industries and the digital sector will be discussed. Analysis and decision skills will be developed by practicing the use of tools and case studies. This course provides a foundational understanding of the marketing discipline, which is necessary for any role within business organizations.

Students learn how to identify managerial problems, develop relevant research hypotheses, determine appropriate methods for data collection and analysis, and develop recommendations for marketing solutions. Topics include foundational methods, such as focus groups, survey design, and marketing experiments.

Students will gain the ability to identify, collect, and analyze essential marketing data and apply research results to become better marketing decision-makers.

MKTG314801
Services Marketing Samaras, Xanthi P Spring 2022

The service sector of the economy is twice as large as the manufacturing sector. Nearly all new job growth in this country will be in services marketing. Service organizations differ from manufacturing businesses in many important respects and require a distinctive approach to marketing strategy development and execution. Some service businesses to be studied include entertainment, hospitality, travel, retail, telecom, car rental, healthcare, financial and professional services. Service providers include hotel, airline, theme park, car rental and retail personnel, customer service representatives, bankers, doctors, accountants, and lawyers.

MKTG315301
Multichannel Retailing Seiders, Kathleen Spring 2022

This class focuses on the necessary concepts and principles of retailing involved in making retail and wholesale decisions. The course looks at retailing from both a consumer perspective (e.g., why does a consumer shop a particular retail outlet?) and a business-to-business perspective (e.g., how does the retailer decide which supplier to use?). Additionally, the course examines the various methods of retailing (e.g., bricks and mortar, bricks and clicks) and how these methods have evolved and will evolve in the future.

Integrated Marketing Communications Nenkov, Gergana Y Spring 2022

This course concerns the communication function in marketing. It is designed to introduce students to integrated marketing communications (IMC). It aims at relating the elements of the marketing mix (4Ps) to the various aspects of the communications that take place between the firm and its customers. The course builds on a base of strategic marketing planning and consumer behavior and then proceeds to examine the role of the promotional mix (e.g., advertising, direct marketing, sales promotion, Internet and interactive marketing, publicity and public relations) in developing integrated marketing communications programs and helping organizations meet strategic marketing objectives.

Digital Marketing O'Hern, Matthew S Spring 2022

In today's digital economy, successful companies must develop new ways to attract, connect with, and delight their customers. This has prompted a decisive shift away from traditional media strategies toward novel, digitally-enabled strategies that can help firms achieve their financial objectives. In this course you will learn about a number of different aspects of digital marketing including content marketing, website optimization, social media marketing, paid search, and search engine optimization. Perhaps more importantly, this course will help you develop a strong understanding of the digital marketing tools and platforms that companies use to differentiate themselves from their competition and will allow you to build a set of digital assets that you can use to demonstrate your digital marketing acumen to prospective employers.

Heritage Marketing Hudson, Bradford T Spring 2022
This course explores the interaction of marketing and history in the consumer marketplace. Heritage marketing is a strategic approach to capitalize on the historical status of older brands in the present and future. It uses the entire marketing system to develop a strategic position based on heritage, activate powerful dynamics in consumer behavior such as nostalgia, communicate relevant messages, and monetize the past. Business history and archival collections provide the content and inspiration for related communications and new product development. The primary classroom activity will be the analysis and discussion of business case studies from various industries. The pre-requisites are Marketing Principles and any course from the History core sequence.

Design Thinking and Strategy Dickinson, Kristine D
Spring 2022
“Design thinking is a human-centered approach to innovation that draws from the designer’s toolkit to integrate the needs of people, the possibilities of technology, and the requirements for business success.” - Tim Brown, CEO of IDEO. Strategic design thinking is an integral driver of innovation and a significant factor in a business’ ability to foresee and adapt to customer needs. Companies like Apple, IDEO, and Pixar are all pioneers in the field, and this course will draw directly from their proven methods. Students will learn the various phases of design thinking, and how to apply a customer-centric approach to products and services in a range of industries. Students will delve into topics such as user experience (UX) product design, creative problem-solving, strategic storytelling, and customer-centric business decision making. Course content will include team projects, case studies, and occasional guest lectures from industry experts.
The class will be highly focused on practical experimentation and is directly relevant for students interested in product and brand management, marketing strategy, entrepreneurship, and beyond.

Sports Marketing Olesh, Evan S Spring 2022
The goal of this course is to provide an understanding of the business practices of the sports industry. Taking a practical approach, students will be asked to create business solutions for sports organizations. The attributes and failures of real examples will be discussed. Students will be expected to take the experience and apply it to creating specific campaigns, programs, and overall marketing plans for a specific sports application. Relationship architecture principles will be discussed at length and expected to be incorporated into the final project.

TechTrek West--Undergraduate Doyle, Jeremiah T;Kane, Gerald C Spring 2022
Enrollment is limited. Admission is competitive, and applications are available at www.bc.edu/techtrek. Interested students can contact the instructor for application details.
TechTrek West is a 3-credit field-study course combining class work and due to the COVID situation one-hour in-person or Zoom meetings with entrepreneurs, venture capitalists, and other executives throughout the semester. The class focuses on developing an entrepreneurial mindset, which is critical for numerous fields both in the broader world of COVID and with the increasing digitalization of work and society. TechTrek should appeal to all majors. The class will meet in a cohort model, with students attending in-person classes every other week and an average of 2-3 Zoom meetings each week outside of class time. Students must also reserve an additional time slot (Monday 3-4:15) for Zoom visits in addition to class time. Course work and visits will have an entrepreneurial focus, helping students identify and explore their interests concerning the increasing digitalization of the business environment. Applications are available at www.bc.edu/techtrek, and students will be admitted on a rolling basis during registration. Further details can be found in a slide deck at https://docs.google.com/presentation/d/1RkPucic9Mms5SlqJpAS4dvhM-eac3HIZ6U/ or an informational video at https://drive.google.com/file/d/1RAGw8329KbnipjQnPi-5Vq1QBjLZ

Digital Agency Experience O’Hern, Matthew S
Spring 2022
In today’s business environment, marketers must be adept at creating highly targeted promotional messaging that resonates with their customer base. In this course, through hands-on exercises and by working on campaigns for real-world clients, students will develop a deeper understanding of how to create effective social media campaigns, how to use social listening technologies to assess customer needs, and how to increase online effectiveness via enhanced search engine optimization (SEO) and website optimization techniques. In addition, this course will help prepare students for entry-level positions in digital marketing agencies by introducing them to the challenging processes associated with onboarding clients, developing an appropriate scope of work, creating collateral for client pitch meetings, responding to client feedback, creating high impact creative assets, and creating an effective social media calendar.

MKTG802101 Programming and Data Analysis for Marketing Cirkic, Ali A Spring 2022
Data-driven marketing has revolutionized the marketing world and become a fundamental factor of competitive advantage. This marketing course primarily focuses on using programming, data analysis and data visualization techniques to make data-driven marketing decisions. The course builds on 3-course Data Analytics Sequence by providing hands-on, and practical learning experience. By the end of this course, you will learn how to clean, merge, analyze, and visualize data using various technologies such as Python libraries to understand consumer behavior, conduct market analysis, and more. The classes will incorporate a combination of lectures, class discussions, and in-class coding sessions.

The purpose of this course is to provide Portico Teaching Assistants a greater depth of understanding of the philosophical issues covered in Portico, and to offer an introduction to the core pedagogical techniques involved in teaching applied ethics. Participating TAs will study the course material on a second-order level by considering the evolution of their understanding of the course material over their undergraduate career, and by exploring pedagogical best-practices to improve teaching outcomes. The structure of the course will thus run concurrently with that of Portico. While primarily directed towards enriching the experience of the TAs, the course will simultaneously aim to facilitate the goals of Portico itself by providing TAs with additional tools and resources for engaging with their students and creating a more cohesive and impactful classroom community.

PRTO430101
The Good Life: Life, Money, and Generosity
Bagnani, Elizabeth S Fall 2021
This course is about becoming. It encourages students to reflect on the type of person they are becoming and the type of person they want to become. First part considers the question "what is a good life?" and revisits some themes from Portico. Students also reflect on their assumptions about and tensions around money. Second part narrows to consider some tools relating to budgeting and debt. Final part considers "what does it mean to be generous?" and questions that consider a life that includes both money and much more. In use: reflections, reading quizzes, interview, first-post-graduation-year budget, and final paper.

PRTO240101
Free Markets, Faith, and the Common Good
Cioni, Joseph R Spring 2022
If sharing our gifts, pursuing justice, and acting on our concern for the poor and marginalized of society are core values of Jesuit-trained students, to what extent is free market capitalism a "fit" for helping us meet those goals? In this course, we will explore several key moral and philosophical foundations of free market capitalism. These arguments will then be placed in dialogue with central insights contained in Catholic social teaching, especially the principles of human dignity, solidarity, the preferential option for the poor, and the common good.
PRTO430701
Happiness in a Commercial Society
Evans, Jeremy A; Smith, Michael J Spring 2022
The aim of this course is to introduce students to the interdisciplinary study of human well-being as it applies to the domains of contemporary business and commercial life. The course will include philosophical, psychological, and social scientific inquiries into human flourishing, as well as the nature of meaningful work, the relationship between wealth and happiness, and the application of well-being measures to thriving economic and political institutions.

UGMG101001
Perspectives on Management Clavin, John C; Doyle, Jeremiah T Fall 2021
This course, taught by practitioners John Clavin (BC ‘84) and Jere Doyle (BC ‘87), provides BC students with an excellent opportunity to explore the functional disciplines of business from a real-world perspective. Using a combination of lectures, case studies, readings and outside speakers, the course provides students the opportunity to get grounded in each of the CSOM concentrations while gaining outside views on careers in related fields and industries. The course will also provide a framework to explore and discuss cross-functional issues that impact business strategy and execution. This is a highly interactive class that places a premium on both preparation and participation each week. The course is initially open to CSOM sophomores but normally has availability for juniors and seniors across all undergraduate majors.

UGMG240102
Case Competition Cohort La Come, Amy M Fall 2021
Reserved for Sophomores and Juniors in the Carroll School, with permission of the instructor. This course is for Sophomores and Juniors in the Carroll School of Management who are interested in learning how to better prepare for strategy and ethics case competitions. The class will meet weekly for one hour with the objective to develop skills in the following areas: be able to effectively analyze an ethics case and a strategy case, determine feasible alternatives, craft a recommendation, implement recommendations, and prepare for judges' questions. The course will also help students with a PowerPoint presentation for case competitions and oral tips for such a competition. The 10-week course will end with an internal case competition where winning groups will be chosen to attend competitions and represent the Carroll School nationally in the spring and subsequent fall (juniors who are abroad in the spring will not be eligible to take the course).

Career Bridge Barksdale, Andrew C Spring 2022
Career Bridge will equip first generation and high financial need college students with the confidence and knowledge to have a successful experience navigating BC. Career Bridge will follow a discussion based model, emphasizing class participation in three main topic areas: BC experience, personal discernment, and career discernment. Have you struggled getting your footing on campus? Are you looking for a like-minded community? Undecided on what concentration to pursue & how this will impact your career choices? If you answered yes to any of these questions, this course is for you. To inquire about joining, please connect with Drew Barksdale, barksdale@bc.edu.

NURS749001
Pharmacology of Anesthetics and Accessory Drugs Emery, Susan A

This course is a study of the pharmacologic theories as they relate to nurse anesthesia practice. The application of pharmacokinetic and pharmacodynamic principles as they relate to specific anesthetic and adjunct drugs used in anesthetized practice will be explored. Integration of theory into practice will be emphasized through the use of case studies. Ethical, legal and economic considerations of drug selection will also be discussed as the student learns to develop an anesthesia plan of care.

Credits: 3

NURS749401
Physiologic Variables for Nurse Anesthesia II—Card Emery, Susan A

This course builds on basic concepts of the anatomy, physiology, and pathophysiology of the cardiovascular system and provides in-depth information about the cardiovascular system and anesthetics. The impact of anesthesia on the structure and function of the heart as a pump as well as the characteristics of both systemic and pulmonary circulation will be explored. Measures to evaluate cardiovascular function, including electrocardiography, cardiac output, blood volume and arterial and venous pressures, will be described using clinical examples. Alterations in normal anatomy and physiology and implications for the anesthetic plan for both non-cardiac and cardiac surgery will be discussed.

NURS871601
Health Care Policy for Nursing Leaders Conahan, Catherine;O'Reilly-Jacob, Monica K Summer 2021

This course prepares nurse leaders and scholars to influence health care and related policies in support of nursing’s goals and social justice. The structure and financing of U.S. health care system and roles of government, insurers, providers, and consumers are examined. The relationships among health policy and the social and economic determinants of health are explored through analysis of key issues in health policy. Students engage in strategies to analyze and inform health policy. The course provides the foundation for leadership in interdisciplinary collaborative endeavors to address, through a nursing perspective, health policy issues at the local and national levels.

Credits: 3

Credits: 3
Epidemiology
Horrell, Lindsey N; Nguyen, Tam H Summer 2021
Epidemiology is the study of the distribution and determinants of health-related states or events (including disease), and its methods are used in the control of diseases and other health problems in diverse populations. This course introduces basic principles and methods of epidemiology and biostatistics. Measures of disease frequency, association and causation, the design and analysis of studies, and the potential issues that may arise in these studies are addressed. This course prepares advanced practice nurses to engage in inter-professional collaboration with the ultimate goal of improving population health.

Advanced Physiology and Pathophysiology across the Lifespan Faulkner, Kenneth Summer 2021
This course focuses on physiologic and pathophysiologic processes that affect individuals across the lifespan. The emphasis is on central concepts of physiology and pathophysiology, including genetic and epigenetic mechanisms, immunity, inflammation, cell growth regulation, hematopoiesis, and hemostasis. These concepts are then applied in a systematic survey of diseases within body systems. Current research, clinical examples, and application to advanced nursing practice are incorporated throughout the course.

NURS121001
Public Health in a Global Society Edmonds, Joyce Kyvan de Water, Brittney Fall 2021
This foundation course presents public health as an interdisciplinary science focused on health promotion and disease prevention at the population level. The course provides an overview of the history of public health, global burden of disease, sub-disciplines of public health, maternal/child health, and nutrition, and emphasizes the collaborative nature of the field through examples in research and practice. An inherent principle in public health is advancing social justice and this course, and the public health sequence more broadly, focuses on at-risk populations, reducing health disparities, and improving health equity at the population level.

NURS208001
Pathophysiology Hurley, Dorean L Fall 2021
Pathophysiology offers an integrated approach to human disease. The course builds on the underlying concepts of normal function as they apply to the basic processes of pathogenesis. Biological variations of age, gender, and cultural differences are integrated into the course content where applicable. Common acute and chronic health problems are introduced to explore the interrelatedness of a variety of stressors that affect physiological function. Successful completion of Pathophysiology facilitates the student’s transition into clinical nursing practice.

NURS21201 Nursing Assessment of Health Across the Life Span Marshall, Alison O; Sly, Jacqueline R Fall 2021
This course introduces the concepts of health, health promotion, and growth and development across the lifespan. The interactions of underlying mechanisms such as environment, culture, ethnicity, family, genetics, and gender that are foundational to the development and individual health will be explored. Theories and principles that address physical, cognitive, and psychosocial growth and development will guide understanding of the complex healthy human, from birth to geriatrics and death. Principles and theories of health promotion will be analyzed and applied from a nursing perspective to support the individual's desire to increase personal and/or family health potential and well-being.

NURS324201 Adult Health Nursing Theory II Barone, Stacey H; Repsha, Christine L Fall 2021
This course builds on the concepts learned in previous courses including adult health and pharmacology and expands the knowledge base for planning and implementing care of adults with acute health problems and acute exacerbations of chronic health problems. Clinical case studies of acute care emergencies are used to discuss clinical judgment. Emphasis is placed on the selection of evidence-based interventions, evaluation of interventions, and use of evaluative data in refining a plan of care for the adult patient. Discussions focus on the role of the primary nurse in the acute care setting including collaboration, discharge planning, and health teaching.

Evidence abuse, bipolar illness, eating, anxiety, personal individuals with psychiatric disorders across the life span. Current interdisciplinary research on the legal, ethical, and therapeutic role of the psychiatric mental health nurse.

NURS425201
Clinical Laboratory of Childbearing Theory Capotosto, Melissa K
Fall 2021
Application of childbearing theory to the diagnoses, interventions, and outcomes for the care of families in structured clinical settings. Focus is on prenatal, perinatal, and post-natal activities.

Students work collaboratively with the multidisciplinary team in applying evidenced-based practice derived from current multidisciplinary research to the childbearing family. Supervised by nursing faculty, the students are mentored to extend their skills in critical thinking and clinical judgment to meet the physical, psychosocial, cultural, and spiritual needs of their clients and families. Emphasis will be placed on QSEN, AACN Essentials for baccalaureate education, AWHONN and ACOG standards of care.

NURS425201
Psychiatric Mental Health Nursing Theory Hanan, Diana M
Fall 2021
This course builds upon the standards of practice from APNA-SPN, AACN, and QSEN to discuss the legal, ethical, and therapeutic role of the psychiatric mental health nurse in caring for individuals with psychiatric disorders across the life span. Current interdisciplinary research on the genetic, neurobiological, and psychosocial theories of depression, psychosis, substance abuse, bipolar illness, eating, anxiety, personality, and cognitive disorders is analyzed. Evidence-based nursing practice, including psychopharmacology and psychosocial treatment modalities such as cognitive-behavioral, interpersonal, group, and milieu therapy is applied from a multicultural perspective. Nursing interventions for families and communities experiencing crisis, grief, and trauma are identified.

NURS425301
Psychiatric Mental Health Nursing Clinical Laboratory Scott, Nathan
Fall 2021
Therapeutic communication skills provide a foundation for implementing the nursing role based on the American Psychiatric Nurses Association standards of practice with psychiatric patients/clients in a variety of psychiatric treatment settings. In the clinical experience, students work collaboratively with multidisciplinary teams in applying evidenced-based practice based on current interdisciplinary research to the nursing process. In weekly supervision with clinical faculty, students are mentored to extend their skills in clinical reasoning to meet the psychological, social, cultural, biological, and spiritual needs of persons from varied backgrounds (economic, racial, ethnic, age, and gender) who are in treatment for mental illness.

NURS426001
Population Health Nursing Theory Horrell, Lindsey N
Fall 2021
This course introduces the conceptual and scientific frameworks of population health, emphasizing public health nursing roles. The course integrates health promotion, risk reduction, and disease prevention across the life span in a range of local and global settings, using case examples that nurses, as part of interdisciplinary teams, will encounter. Community assessment and epidemiological methods are introduced. Health disparities and vulnerability are examined through an ecological lens together with traditional and emerging public health issues. Students will learn about bridging population health and clinical care in order to meet the prevention health needs of individuals, families, and populations.

NURS426401
Actualizing the Role of Professional Nurse Cullinan, Donna L; Simonelli, Mary C
Fall 2021
Prepares students to transition into the role of the professional nurse. Responsibilities associated with assuming the role of a professional are explored in relation to furthering individual and social good. Contemporary health care policies and economic pressures are examined for their influence on the delivery of quality patient care. Current ethical and legal standards are highlighted and students are encouraged to reflect on how biases and prejudices influence the provision of patient care. Focus is placed on recognizing and addressing injustices in health care access and quality, which is essential to actualizing the role of professional nurse.

Ethical Issues in Advanced Practice Nursing Uveges, Melissa K
Fall 2021
The focus of this course is to explore the boundaries of Advanced Practice Nurses’ (APNs) ethical responsibilities to individuals, groups, and society in an intra- and interdisciplinary, collaborative health care environment. The philosophical and theoretical foundations of ethical practice are critically examined for their ability to enhance decision-making that best serves the interests of current and future patients and meets societal needs. An emphasis is placed on developing the skills needed to address challenges and obstacles to ethical practice in advanced practice roles and settings. Strategies to influence health policy related to various specialty populations are explored.

NURS74301
Women's Health Advanced Practice Nursing I Dufany, Meghan W;Murphy-Swenson, Erin E Fall 2021
This course is the first of two courses in the Advanced Practice in Women's Health series. The role of the advanced practice nurse with women across the life span is explored with a focus on wellness promotion and management of common alterations in the sexuality-reproductive pattern, with special concern for cultural, ethnic, and socioeconomic diversity. Theories and research from nursing and other disciplines are synthesized and evaluated through seminars, clinical conferences, clinical experiences (20 hours/week), and course assignments.

NURS775001
Women and Children's Health Advanced Practice Theory St Pierre, Sherri B Fall 2021
This course focuses on theoretical knowledge for the indirect and direct roles of the advanced practice nurse in health care of women and children. Content will address use, analysis, and synthesis of theories and research with attention to the impact of culture, ethnicity, race, socioeconomic status, and family structures. Psychosocial influences on women's health, parenting, and child development are explored. Students will interpret the roles of the advanced practice nurse in MCH as these affect and are affected by health care and health care delivery systems at the national level.

NURS743701
Advanced Practice Psychiatric Nursing Across the Life Span I Marchetti, Carol A;Petreca, Victor G Fall 2021
In this combined didactic and clinical course, students learn to conduct mental health evaluations, to formulate psychiatric and nursing diagnoses, and to plan and implement short-term/initial treatment, case management, referral plans, and patient services for adults, children, and families. Clinical placements (30 hours/week) are individualized to match students' interests in a variety of psychiatric-mental health (PMH) settings including mental health outpatient services and forensic practice settings. Faculty and agency preceptors assist students to develop essential evaluation and diagnostic skills and to provide individualized, culturally sensitive nursing care and clinical services to diverse client populations.

NURS743801
Advanced Practice Theories of Psychotherapy Marchetti, Carol A
Fall 2021
This course is designed to explore major approaches to individual psychotherapy, such as Psychodynamic, Humanistic, Interpersonal, Behavioral, Cognitive, Dialectical Behavioral, Brief, and Multicultural. Commonalities and differences among the processes and techniques are discussed. Selected theorists and their approaches to psychotherapy will be examined as examples of major schools of thought concerning the nature of the psychotherapeutic relationship. Applications across the life span and among diverse populations are critically examined.

NURS745301
Pediatric Primary Care/Advanced Practice Nursing I St Pierre, Sherril B;White, Laura S Fall 2021
This clinical course is the first of two advanced practice specialty nursing courses for preparing pediatric nurse practitioners. This course focuses on health promotion and maintenance of prevention of illness and disability, as well as assessment, diagnosis, and management of common pediatric problems/illnesses. Anatomical, physiological, psychological, cognitive, socioeconomic, and cultural factors affecting a child's growth and development are analyzed. Parenting practices, family life styles, ethical issues, and environmental milieu are also explored. Students engage in precepted clinical practice (20 hours/week) where they apply their cognitive, affective, and psychomotor skills and are guided by critical thinking and clinical decision making.

Healthcare Information Technology Stettheimer, Timothy D
Fall 2021
This course explores the critical role of e-health and information systems in the planning, operation, and management of healthcare organizations. Students will learn how to assess and evaluate health information systems and business requirements in a variety of settings such as health systems, hospitals, and medical practices. Students will develop skills in healthcare technology implementation design that addresses such industry-specific requirements as translating HIPAA and other regulations into specific technology decisions while implementing medical systems (EMR, lab, clinical services, medical database providers, etc.). Students will also learn how to manage multi-institutional relationships as they are expressed in technology implementations, including the many vendor configurations but also cross-sector organization relationships. Specific topics include data & systems integrations, communications protocols, security standards, procurement, and authentication and authorization.

NURS871401
Nursing Ethics and Professional Responsibility in Advanced Practice Uveys, Melissa K
Fall 2021
This course prepares advanced practice nurses for ethics leadership within the broader healthcare arena. Links are made among philosophical/ theoretical foundations of nursing, ethical theory, and nursing goals. Skills supportive of the ethical decision making of nurses, peers, and the team are developed with in-class opportunities to practice leading ethics rounds and developing ethics education projects. An emphasis is placed on facilitating the interests of current and future patients and society as a professional obligation. Socially derived injustices and professional responsibility to advocate for just healthcare is highlighted along with strategies to influence institutional and health policy on behalf of individual and social good.

NURS887501
Secondary Analysis of Health-Related Datasets Qiu, Mei R
Fall 2021
In this course, students apply concepts from earlier methods and statistics courses to the secondary analysis of large datasets to answer health-related research questions of interest. Students may choose to work with one of the datasets available for use in the course or, with permission, work with a faculty member on one of his/her datasets. Students are expected to: a) delineate a research question; b) select an appropriate dataset and analytic approach to answer the question; c) execute the analysis; d) discuss the strengths and limitations of the approach and the results; and e) disseminate findings through publications or presentations.

Epidemiology
Edmonds, Joyce K
Nghuyen, Tam H
Fall 2021
Epidemiology is the study of the distribution and determinants of health-related states or events (including disease), and its methods are used in the control of diseases and other health problems in diverse populations. This course introduces basic principles and methods of epidemiology and biostatistics. Measures of disease frequency, association and causation, the design and analysis of studies, and the potential issues that may arise in these studies are addressed. This course prepares advanced practice nurses to engage in inter-professional collaboration with the ultimate goal of improving population health.

Philosophical Inquiry for Knowledge Development in Nursing Flanagan, Jane M Fall 2021

Movements in the history and philosophy of science are reviewed for appreciating nursing's epistemological development. Contemporary understandings of philosophy and philosophy of science and their influences on knowledge development and nursing are examined. A focus is on understanding the relationship of the epistemological foundations of nursing to those of the health and social sciences. The course aims to develop scholars who can critically evaluate scientific initiatives and their relevance for nursing practice and emerging societal needs. Emphasis is on integrating knowledge of movements in philosophy of science and nursing epidemiology with themes developed in Strategies for Knowledge Development in Nursing.

Strategies for Knowledge Development in Nursing Lyons, Karen S Fall 2021
In conjunction with Philosophical Inquiry for Knowledge Development in Nursing, this course provides an in-depth exploration of theory and knowledge development for nursing purposes and interdisciplinary collaborations. Students will gain an understanding of the various ways by which important disciplinary questions arise, are formulated, and pursued. Select theoretical frameworks and concepts are critiqued for their clarity, logic and utility for disciplinary knowledge development. A particular focus is placed on application to the student's area of interest and in formulating salient, researchable questions.

Bridge to Primary Care Advanced Practice Nursing Kelly-Weeder, Susan A; Underwood, Patricia Fall 2021
This is the first in a series of clinical reasoning and decision-making courses required for all primary care DNP students. Building on the skills acquired in Advanced Health/Physical Assessment across the lifespan, the course will focus on communication and clinical decision-making for DNP students. Specific consideration will be given to wellness and health promotion across the lifespan, screening procedures, ordering and interpretation of diagnostic tests, health behavioral change interventions, as well as problems frequently encountered in primary care. The combination of didactic, clinical, and simulated learning experiences will prepare the student for subsequent specialty clinical course work and experiences.

NURS981501
Advanced Practice Nursing Role Conahan, Catherine
Fall 2021
This course prepares students to transition into an advanced practice nursing role. Historical and contemporary influences leading to the development of this professional role are explored, along with anticipated future dimensions. The impact of the advanced practice nurse on patient, family, and population outcomes will be examined. The course incorporates discussions of relationship-based care, role implementation across practice settings, and advanced practice nursing competencies. It also provides a synthesis of legal, regulatory and scope of practice considerations. The course facilitates a comprehensive understanding of political, economic, social and professional issues relevant to advanced practice nursing.

NURS981601
Population Health Principles, Program Planning, and Evaluation Ryan, Kathleen M
Fall 2021
The course focuses on care at the aggregate level and examines the multiple determinants of health. The principles of population health and population health management will be explored. Health promotion theories will be analyzed and evaluated. Building on these theories and epidemiologic principles, students will assess and identify health care needs at the population level. Students will design theory-driven, evidence-based interventions to improve population outcomes. Program planning and evaluation in partnership with community stakeholders will be emphasized.

NURS982701
Family Primary Care Advanced Practice Nursing II Conahan, Catherine; Connolly, Maureen A; Kelly-Weeder, Susan A; Underwood, Patricia Fall 2021
The second of three in the Family Primary Care Advanced Practice Nursing series, this course focuses on the management of chronic conditions in individuals and families across the lifespan. Critical analysis of data, integration of theory, and evidenced-based, cost-effective, high quality, and safe approaches to care coordination are emphasized. The broader health care system, interprofessional collaboration, and influences of culture and social determinants of health are addressed. The leadership role of the Family Primary Care Advanced Practice Nurse in identifying and addressing barriers to optimal care is integrated throughout the course.

NURS983401
Developmental-Behavioral and Mental Health in Pediatrics White, Laura S
Fall 2021
This course features a case-based approach that emphasizes early problem identification, advanced evaluation, intervention, and collaborative care for children through young adults with developmental-behavioral or mental health (DBMH) concerns. A biopsychosocial, developmental, interdisciplinary approach is used as the foundation for explicating family-based, psychotherapeutic interventions and indications for referral of patients with complex DBMH concerns. Students will build skills to identify and evaluate a variety of multidisciplinary resources to enhance quality DBMH services and promote optimal socioemotional development and functioning. Sociocultural influences are critically analyzed and considered as a basis for advocacy and policy development.

**Nursing Courses: Spring 2022**

**NURS121001**  
Public Health in a Global Society  
Camp, Lindsey N; Ryan, Kathleen M; Sabbah, Erika L  
Spring 2022  
This foundation course presents public health as an interdisciplinary science focused on health promotion and disease prevention at the population level. The course provides an overview of the history of public health, global burden of disease, sub-disciplines of public health, maternal/child health, and nutrition, and emphasizes the collaborative nature of the field through examples in research and practice. An inherent principle in public health is advancing social justice and this course, and the public health sequence more broadly, focuses on at-risk populations, reducing health disparities, and improving health equity at the population level.

**NURS207001**  
Introduction to Professional Nursing Conolly, Maureen A  
Spring 2022  
This course provides an introduction to professional nursing, exploring nursing’s history and the development of nursing knowledge grounded in theory and evidenced-based practice. The course places the study of socially just nursing practice within the tradition of liberal arts education. Engaging in critical self-reflection, students apply new value-based self-awareness to culturally congruent nursing care. Ethical reasoning processes are applied, utilizing clinical and population-based case studies. Therapeutic communication with individuals across the lifespan is introduced. Nursing education, practice, and professional careers as well as the influence of current health care environmental factors on health and evidenced-based nursing practice are discussed.

**NURS209001**  
Sophomore Formation Seminar  
Gonzales-McLean, Juliana A; Simonelli, Mary C  
Spring 2022  
The SCRSBU5 weekend retreat fulfills the NURS2090 requirement. Attendance at the full retreat is mandatory and an expectation of all sophomore students. Any absences should be discussed as soon as possible with the Teacher of Record (the Associate Dean), who will make decisions regarding activities that will be required to earn credit... This course is required for sophomore undergraduate nursing students and will involve guided review and reflection to reinforce the inherent professional values of altruism, human dignity, integrity, and social justice fundamental to the discipline of nursing. Activities in the weekend long retreat will be guided by the Ignatian formation principles and student’s values and beliefs as they relate to professional practice, development as individuals and as members of caregiving teams. The goal is to build a foundation for professional leadership as nursing students become aspiring members of the nursing profession and productive and committed citizens of society at large.

Clinical Pharmacology Sly, Jacqueline R  
Spring 2022  
This course focuses on the study of clinical pharmacology across the lifespan and scientific principles underlying its use in professional nursing. Major drug classifications and respective prototypes serve as a foundation for lifelong learning and higher-level understanding of pharmacotherapeutics. Using case studies, discussions focus on the importance of collaboration, patient education, and alternative and complementary therapies, while being mindful of patient social factors. Emphasis is placed on delivering high quality and safe patient care related to medication administration.

Evidence from the genetic, neurobiological, and psychosocial theories of depression, psychosis, substance use disorders, and eating disorders supports the integrated mental health framework. This course focuses on concepts associated with the unique responses of families during the childbearing cycle, normal and high risk pregnancies, and normal and abnormal events in women’s health. Current multidisciplinary research in women’s health with a focus on the childbearing cycle, including genetics and cultural competence, is presented. Evidenced-based nursing practice for the childbearing family is discussed. The nursing implications of attending to both the physiologic and the psychosocial needs of the childbearing family are reviewed. Emphasis will be placed on AWHONN and ACOG standards of care.

NURS324501
Clinical Laboratory of Childbearing Theory Capotosto, Melissa K

Spring 2022

Application of childbearing theory to the diagnoses, interventions, and outcomes for the care of families in structured clinical settings. Focus is on prenatal, perinatal, and post-natal activities. Students work collaboratively with the multidisciplinary team in applying evidenced-based practice derived from current multidisciplinary research to the childbearing family. Supervised by nursing faculty, the students are mentored to extend their skills in critical thinking and clinical judgment to meet the physical, psychosocial, cultural, and spiritual needs of their clients and families. Emphasis will be placed on QSEN, AACN Essentials for baccalaureate education, AWHONN and ACOG standards of care.

NURS425001
Child Health Nursing Theory Haze, Nanci J

Spring 2022

This course builds on the published Pediatric Nursing: Scope and Standards of Practice to discuss the unique responses of children and their families to acute and chronic illness. Emphasis is placed on the child’s growth and development in relation to wellness and illness. A family-centered approach is used to address the health teaching, promotion, restoration, and maintenance needs of children and their families. Their theoretical principles are presented, and creative, evidence-based nursing intervention strategies to meet the needs of children and their families across the health care continuum are discussed.

NURS425201
Psychiatric Mental Health Nursing Theory Dunne, Julie P

Spring 2022

This course builds upon the standards of practice from APNA-ISPAN, AACN, and QSEN to discuss the legal, ethical, and therapeutic role of the psychiatric mental health nurse in caring for individuals with psychiatric disorders across the life span. Current interdisciplinary research on the genetic, neurobiological, and psychosocial theories of depression, psychosis, substance abuse, bipolar illness, eating, anxiety, personality, and cognitive disorders is analyzed. Evidence-based nursing practice, including psychopharmacology and psychosocial treatment modalities such as cognitive-behavioral, interpersonal, group, and milieu therapy is applied from a multicultural perspective. Nursing interventions for families and communities experiencing crisis, grief, and trauma are identified.

Psychiatric Mental Health Nursing Clinical Laboratory Dunne, Julie P

Spring 2022

Therapeutic communication skills provide a foundation for implementing the nursing role based on the American Psychiatric Nurses Association standards of practice with psychiatric patients/clients in a variety of psychiatric treatment settings. In the clinical experience, students work collaboratively with multidisciplinary teams in applying evidenced-based practice based on current interdisciplinary research to the nursing process. In weekly supervision with clinical faculty, students are mentored to extend their skills in clinical reasoning to meet the psychological, social, cultural, biological, and spiritual needs of persons from varied backgrounds (economic, racial, ethnic, age, and gender) who are in treatment for mental illness.

NURS4260001
Population Health Nursing Theory Camp, Lindsey N; Ryan, Kathleen M

Spring 2022

This course introduces the conceptual and scientific frameworks of population health, emphasizing public health nursing roles. The course integrates health promotion, risk reduction, and disease prevention across the life span in a range of local and global settings, using case examples that nurses, as part of interdisciplinary teams, will encounter. Community assessment and epidemiological methods are introduced. Health disparities and vulnerability are examined through an ecological lens together with traditional and emerging public health issues. Students will learn about bridging population health and clinical care in order to meet the prevention health needs of individuals, families, and populations.

NURS426101
Population Health Practice in the Community
Byrne, Rosemary F; Cullinan, Donna L
Spring 2022
This course focuses on the application of population health, emphasizing public health nursing roles, that include the care of population members in community settings, such as a neighborhood, school, or non-profit organization, locally or globally. Students will gain experience in community engagement, community health assessment, screening, case management, health education, service and program evaluation, and advocacy. Emphasis is placed on the multiple determinants of health and on using interdisciplinary approaches in practice to implement evidence-based interventions aimed at health promotion, risk reduction, and disease prevention.

NURS426301
Nursing Synthesis Clinical Laboratory
Barone, Stacey H; Bond, Stewart; Mansfield, Kathleen J; McNutt-Clarke, Beth; Nugent, Luanne; Ross, Richard E
Spring 2022
This course provides senior nursing students with an opportunity to synthesize, expand, and refine nursing concepts and clinical reasoning competencies. Through an intensive clinical experience completed in institutional and/or community settings, students focus on the healthcare needs of specific client populations, study in depth the interventions used to restore and/or optimize health, and utilize evidence-based research in practice. Emphasis will be placed on current quality and safety guidelines and standards of care for the specialty area in which the student is practicing.

NURS426401
Actualizing the Role of Professional Nurse
Cullinan, Donna L; Harley, Doreen L; Simonelli, Mary C
Spring 2022
Prepares students to transition into the role of the professional nurse. Responsibilities associated with assuming the role of a professional are explored in relation to furthering individual and social good. Contemporary health care policies and economic pressures are examined for their influence on the delivery of quality patient care. Current ethical and legal standards are highlighted and students are encouraged to reflect on how biases and prejudices influence the provision of patient care. Focus is placed on recognizing and addressing injustices in health care access and quality, which is essential to actualizing the role of professional nurse.

NURS742601
Advanced Psychopharmacology Across the Life Span
Petreca, Victor G
Spring 2022
This course builds upon the standards of practice from APNA-ISPN, AACN, NONPF, and APA. The legal, ethical, and therapeutic role of the advanced practice nurse in prescribing psychotropic medications for individuals with psychiatric disorders is examined across the lifespan. The evidence based prescription of psychopharmacological agents according to practice guidelines will be a focus in each class. The course will review neurobiology, the action of central nervous system medications, and the implications for ethno-psychopharmacology. Standardized tools to evaluate treatment efficacy and diagnostic criteria will be identified. Collaborative practice models, indications for referral, and monitoring to enhance treatment adherence are reviewed.

NURS753001
Research Methods for Advanced Practice Nursing
Difazio, Rachel L
Spring 2022
Open to upper-division R.N. and B.S. nursing students, and non-matriculated nursing students... The focus of this course is the formal process of acquiring and evaluating evidence that supports nursing practice. Quantitative and qualitative methods of inquiry are examined. Quality considerations of various research designs are explored. Levels of evidence are identified in relation to existing research outcomes. Evaluation of existing research outcomes as evidence to support clinical practice, demonstrate quality improvement (QI), and advance nursing knowledge is a major emphasis of the course.

NURS753701
Advanced Practice Psychiatric Nursing Across Life Span
Petreca, Victor G
Spring 2022
In this second Family PMHNP course, students build on the theoretical frameworks of NURS7437 to continue to examine major DSM-5 diagnoses that occur in childhood, adolescence, and throughout adulthood. Students apply models of individual, family and group psychotherapy from NURS7438 Advanced Practice Theories of Psychotherapy and NURS7538 Advanced Theories of Family and Group Psychotherapies, and pharmacologic approaches from NURS7420 Advanced Pharmacology and NURS7426 Advanced Psychopharmacology. Crisis management, prevention/health promotion, continuous quality improvement, and allocation of services including case management, collaboration, consultation, and referral are analyzed. In the clinical practicum (minimum 250 hours) students synthesize their diagnostic and clinical reasoning abilities and advance their treatment skills as members of the interdisciplinary team.
Credits: 6
Room and Schedule: None Satisfies Core Requirement: None
Prerequisites: NURS7430 and NURS7437 and NURS7438 and NURS7672 and NURS7420 Corequisites: NURS7538

NURS753801
Advanced Theories of Family and Group Psychotherapy
Marchetti, Carol A
Spring 2022
This course is designed to explore the major psychotherapeutic approaches for families and groups. Emphasis is on the application of theories and models of family and group psychotherapy across the lifespan, among diverse populations, and in traditional and non-traditional settings.
Credits: 3
Sexual health is a critical component of well-being across the lifespan. Current research reveals that gender and sexual health identity and orientation are key factors in understanding patterns of sexual health behaviors and risks, and experiences of health, wellness, and illness. This course examines current and emerging issues affecting sexual health and strategies to inform clinical practice, including the nurse-patient relationship and its influence on sexual well-being; health disparities linked to societal stigmas, prejudices, and discrimination; and ways to improve access to quality health care for populations disproportionately at risk for or affected by STIs including HIV/AIDS.

NURS755301
Women's Health Advanced Practice Nursing II Murphy-Swenson, Erin E
Spring 2022
This course builds on Women and Children's Health Advanced Practice Theory and Women’s Health Advanced Practice Nursing I. It concentrates on the role of the nurse in advanced practice with women across the lifespan, focusing on the development and evaluation of management strategies to promote optimal functioning in women seeking obstetrical and gynecological care as well as the indirect role functions in advanced practice as Clinical Nurse Specialists/Nurse Practitioners. Theories and research from nursing and other disciplines are applied and integrated through seminars, clinical conferences, clinical experiences (20 hours/week), and course assignments.

NURS756301
Primary Care Adult and Older Adult/Advanced Practice Nursing II LaPierre, Kellie L
Spring 2022
This second course in the adult-gerontology health practicum series builds upon the knowledge gained in NURS7463. The course continues to apply the clinical reasoning process used to assess, diagnose, and treat common primary care problems and chronic illnesses of the adult-gerontology population considering lifespan, frailty, and socio-cultural influences. Through critically appraising current strategies used to promote the optimal level of being and functioning of adults and older adults, students will be encouraged to develop plans that address gaps in care.

NURS755001
Primary Care of Adults and Older Adults Theory I DEPT
Spring 2022
The second course focused on primary care of adult/older adult. Analysis/synthesis of nursing and knowledge to guide evidenced-based interventions/outcomes. Intervention strategies, complementary healing modalities, actions responsive to changing health-care delivery systems are explored in relation to outcome indicators that distinguish the APN role addressing commonly occurring nursing problems. Innovative practice models designed to highlight APN leadership and practice. Evaluation of current knowledge to address nurse sensitive indicators is also explored. Interdisciplinary collaborations discussed, especially relating to development of APN led care models promoting health and life transitions of adults/older adults. Measures used to evaluate effectiveness of the APN outcomes are identified.

Credits: 3
This course prepares graduate nursing students to become leaders in health care. Self-reflection, self-assessment, and values clarification provide the groundwork for a nursing leadership self-development plan. Students will explore a broad range of evidence-based approaches, including leadership and organizational theories, to prepare them to lead in today's complex health care environment including practice, organization, system, academic, and policy arenas. Students will explicate the complexities of health care leadership through the examination of topics such as change management, partnership relationships, innovation, accountability models, organizational culture, diversity and inclusion, conflict management, power, creating trust and psychological safety within teams.

NURS8711601
Health Care Policy for Nursing Leaders O'Reilly-Jacob, Monica K Spring 2022
This course prepares nurse leaders and scholars to influence health care and related policies in support of nursing's goals and social justice. The structure and financing of U.S. health care system and roles of government, insurers, providers, and consumers are examined. The relationships among health policy and the social and economic determinants of health are explored through analysis of key issues in health policy. Students engage in strategies to analyze and inform health policy. The course provides the foundation for leadership in interdisciplinary collaborative endeavors to address, through a nursing perspective, health policy issues at the local and national levels.

Advanced Practice Nursing Role Tabloski, Patricia
Spring 2022
This course prepares students to transition into an advanced practice nursing role. Historical and contemporary influences leading to the development of this professional role are explored, along with anticipated future dimensions. The impact of the advanced practice nurse on patient, family, and population outcomes will be examined. The course incorporates discussions of relationship-based care, role implementation across practice settings, and advanced practice nursing competencies. It also provides a synthesis of legal, regulatory and scope of practice considerations. The course facilitates a comprehensive understanding of political, economic, social and professional issues relevant to advanced practice nursing.

Advanced Clinical Decision-Making in Pediatrics Repsha, Christine L;White, Laura S
Spring 2022
This course builds on previous knowledge of diagnostic reasoning and clinical decision-making as it relates to an advanced understanding of human experiences and the complexities of contemporary pediatric primary care. Through faculty-facilitated simulations, seminars, and clinical cases, emphasis is on the process of clinical decision-making and on scholarly and reflective practice. Theories from nursing and other disciplines, research, and policy are synthesized and integrated into advanced pediatric practice. Principles associated with the delivery of safe and high quality care are critiqued. Ethical, legal, global, and social factors are analyzed in relation to current and developing healthcare policy.

Forensics Courses: Fall 2021
FORS531501
Victimology
Burgess, Ann W; Wood, Jeffrey E Fall 2021
This course examines the wide range of victimization experiences from the perspective of the victim, their families, and society. Crimes to be studied include robbery, burglary, carjacking, assault and battery, rape, domestic violence, stalking, homicide, arson, child sexual abuse and exploitation, child pornography crimes, federal crimes, identity theft, terrorism, and internet crimes. Emphasis will be given to exploring the etiology of trauma, motivational issues of offending, response patterns to victimization, secondary trauma effects of victimization, and community and media response. Class format will utilize cases from the forensic practice of the lecturers.

FORS531801
Forensic Science I
Burgess, Ann W; Wood, Jeffrey E Fall 2021
Forensic science concepts and principles play a critical role in analyzing crime scene evidence. This course draws on scientific principles and examines cases where there has been a death, including suicide, accidental, and criminal; and cases where there is a survivor, in which there is a legal and/or ethical component. Specifically, the course applies a case method format to forensic science issues including forensic pathology, clinical forensics, crime victims, computer crime, and equivocal death.

FORS531901
Forensic Science Lab DEPT
Fall 2021
Students will learn and use equipment and techniques from the field of forensics to process and evaluate evidence from mock crime scenes. Students will employ various diagnostic tests and methods from the sciences of serology, pathology, ballistics, molecular biology, physics, and biochemistry to solve a contrived criminal case. The laboratory experience will invite students to utilize an array of scientific techniques and to confront and deliberate the ethical and legal implications surrounding the application of forensic science in a court of law.

Forensics Courses: Spring 2022
FORS220101
Wounded Warriors in Transition Burgess, Ann W; Petreca, Victor G Spring 2022
Undergraduate Elective only. Over 65,000 U.S. troops have been wounded since 2001. Many have suffered "the hidden injuries"--traumatic brain injuries and post-traumatic stress disorder. The purpose of this course is for students to gain an understanding of military culture, catastrophic injuries, and the journey of Wounded Warriors and their family members. The course examines the history and culture of the Armed Services and the developing knowledge of the rehabilitation of Wounded Warriors.

FORS31701
Forensic Mental Health
Burgess, Ann W; Petreca, Victor G Spring 2022
The course examines the components of human behavior that bring people into a criminal justice setting and analyzes the legal question involved. Content will cover homicide, rape, abduction, cybercrimes, stalking, domestic violence, child abuse, and criminal parenthood from the offender's perspective. Content covered includes forensic and behavioral interviewing, interrogation, role of forensic mental health examiners, case formulation, DSM IV-R diagnosis, criminal investigations and charges, state of mind, duty to warn, memory and recall, malingering, and secondary gain. Forensic cases will form the basis for discussion of each class topic.

Palliative Care Courses: Fall 2021

HLTH770201
Responding to Suffering in Serious Illness, Death, and Dying Tabloski, Patricia
Fall 2021
This course focuses on improving the quality of life and care for individuals and families living with serious illness and at end of life. Emphasis is placed on recognizing and responding to suffering from an interdisciplinary perspective. Barriers and facilitators of effective care during serious illness, death and dying, such as social determinants of health, family dynamics, spiritual and cultural variations, are explored. Evidence-based interventions and strategies to address, manage, and alleviate physical, psychosocial, spiritual, and existential suffering across the lifespan are discussed. Established palliative care standards are utilized to evaluate outcomes within the context of interdisciplinary care.
Credits: 3
Room and Schedule: On-line Asynchronous Satisfies Core Requirement: None
Prerequisites: Open to graduate nursing students. Non nursing graduate students and upper division undergraduate students with permission of TOR.
Corequisites: None Cross-listed with: None Frequency: Every Fall Student Level: Graduate Comments: None Status: Offered

HLTH800001
Examining Diversity in Nursing and Health Care Magny-Normilus, Cherlie
Fall 2021
This course is designed to help students develop foundational insights regarding diversity as an all-inclusive concept with complex intersections. It will focus on the professional nurse as a multifaceted cultural being with a network of identities and group affiliations that serve as both resources and barriers in the development of effective and meaningful patient/family-provider interactions. The primary goals of this course involve identifying sources of difference, deconstructing sociopolitical hierarchies, and recognizing the strengths and challenges inherent in diverse societies. The course will emphasize inclusive leadership strategies for transforming care delivery systems across multiple health care contexts.
Credits: 2
Room and Schedule: W 10:00AM-12:00 Noon Satisfies Core Requirement: None Prerequisites: None

Palliative Care Courses: Spring 2022

HLTH220601
Principles of Nutrition Across the Life Span Tucker, Sheila
Spring 2022
This course focuses on the principles of normal nutrition as they are applied to individuals and populations across the life span. The content emphasizes the role diet plays in the prevention of disease and promotion of health. Therapeutic and medical nutrition applications are discussed relative to the nurse’s role and responsibility in this aspect of patient care. Emphasis is placed on the integration of evidence-informed scientific recommendations into nursing practice.

Lynch School of Education and Human Development Counseling, Developmental, and Educational Psychology Courses: Summer 2021

**APSY215201**
Applied Psychology Practicum: Pathways to Purposeful Work and Life
Hwang, Dabin
Summer 2021
Preference will be given to APSY majors who are Juniors and Seniors and have completed at least 12 APSY credit hours prior to the semester of Applied Psychology Practicum (APSY2152) enrollment. Sophomores and students who are minoring in Applied Psychology interested in taking the class may join with permission form the LSEHD Undergraduate Associate Deans Office, if space is available. Lynch Undergraduate Associate Dean’s office approval required.
Readings and discussion contribute to critical analyses of how social issues and social problems are situated differently due to gender, race, social class and diversities of language, ability, sexuality, etc. Students volunteer for 8-12 hours per week at a site selected with the assistance of the Field Placement office, meet in a weekly seminar, keep a journal of their field experience, and complete reading and written assignments that integrate theory and practice. Early registration is strongly encouraged to ensure support finding a practicum placement. Students who do not secure a placement by the university add/drop date cannot continue in the course. Students should begin the process of determining a practicum placement by completing the Practicum Placement form HERE (scroll down to the Getting Started section).

Child Growth and Development

Laski, Elida V
Fall 2021
First part of a two-course sequence (APSY1030 - APSY1031) designed to introduce students to the multiple dimensions of child development, and the place of education in promoting healthy development for all children. This course acquaints students with multiple processes of child development, including physical, social, cognitive, linguistic, and emotional development from birth through adolescence. Both typical and atypical patterns of development will be examined. Students discuss and analyze classic theories, contemporary issues, and key research in child development in view of their application to educational and other applied settings.
Credits: 3

Carey, Naoka E
Fall 2021
First part of a two-course sequence (APSY1030 - APSY1031) designed to introduce students to the multiple dimensions of child development, and the place of education in promoting healthy development for all children. This course acquaints students with multiple processes of child development, including physical, social, cognitive, linguistic, and emotional development from birth through adolescence. Both typical and atypical patterns of development will be examined. Students discuss and analyze classic theories, contemporary issues, and key research in child development in view of their application to educational and other applied settings.

Family, School, and Society Lewin-Bizan, Selva
Fall 2021
Second part of a two-course sequence (APSY1030-APSY1031) that introduces students to the multiple dimensions of child development, and the place of education in promoting healthy development for all children. This course considers the social and cultural contexts that shape developmental and educational processes. Focuses on understanding the nature of contemporary social problems including racism, sexism, ethnic prejudice, poverty, and violence, as they affect children, families, and schooling. Emphasizes special role of education in linking community resources for an integrated approach to serving children and families.

Add/drop date cannot continue in the course. Students should begin the process of finding a practicum placement. Students who do not secure a placement by the university site selected with the assistance of the Field Placement office, meet in a weekly seminar, keep a journal of their field experience, and complete reading and written assignments that integrate theory and practice. Early registration is strongly encouraged to ensure support finding a practicum placement. Students who do not secure a placement by the university add/drop date cannot continue in the course. Students should begin the process of determining a practicum placement by completing the Practicum Placement form HERE (scroll down to the Getting Started section).

Credits: 3
Room and Schedule: Campon Hall 328 Tu 04:30PM-06:50PM
Satisfies Core Requirement: None
Prerequisites: Preference will be given to APSY majors who are Juniors and Seniors and have completed at least 12 APSY credit hours prior to the semester of Applied Psychology Practicum (APSY2152) enrollment. Sophomores and students who are minoring in Applied Psychology interested in taking the class may join with permission form the LSOEHD Undergraduate Associate Deans Office, if space is available. Lynch Undergraduate Associate Deans Office approval required.

Provides an introduction to the applications of psychological theory within various human and community service contexts. Readings and discussion contribute to critical analyses of how social issues and social problems are situated differently due to gender, race, social class and diversities of language, ability, sexuality, etc. Students volunteer for 8-12 hours per week at a site selected with the assistance of the Field Placement office, meet in a weekly seminar, keep a journal of their field experience, and complete reading and written assignments that integrate theory and practice. Early registration is strongly encouraged to ensure support finding a practicum placement. Students who do not secure a placement by the university add/drop date cannot continue in the course. Research Methods for Applied Psychology
The course prepares professionals in the fields of human development, psychology, and education to understand and design research studies related to applied topics. Students are introduced to fundamental principles of research methodology and learn about different types of research, including quantitative, qualitative, and mixed-method studies. The emphasis is on developing skills that will enable students to comprehend common research procedures, critically evaluate existing research, develop studies to address specific research questions, and communicate the findings clearly and accurately.

APSY224301
Social Oppression and Transformation Mc Intyre, Alice E
Fall 2021
Replacing APSY6348 Culture, Community, and Change Restricted to APSY majors or minors
This course engages the topic of social oppression and transformation from social and
psychological perspectives. Using research, scholarship, and creative work from psychology,
education, sociology, history, and popular culture, students will explore institutional,
ideological, interpersonal, and individual aspects of oppression across four social locations–
social class, gender, race, and sexual orientation. For each location, students will start with
their own stories of privilege and oppression; move to an empathic engagement with the
stories of others; broaden to understand the way that structural dynamics shape those stories;
and finally, dive into specific social issues, including family poverty, violence against women,
mass incarceration, and LGBTQ homelessness. Throughout the course, students will have the
opportunity to study and reflect on change and transformation, including ways in which to
incorporate learning from this course into personal and professional lives.

APSY331001
Contemporary Issues in Applied Psychology and Human Development Lykes, M B
Fall 2021
This advanced undergraduate seminar draws from the works of critical, liberation and
decolonial psychologists (e.g., Ignacio Martin-Baro, Shose Kessi, Derek Hook, Erica Burman,
Joseph Gone) to analyze the conceptions of the child and childhood underlying EuroAmerican
developmental psychology. We will explore how normative developmental psychological
theories and research position many children and youth (e.g., unauthorized migrants,
Indigenous youth, youth in the diaspora, and the impoverished) as different, transgressive, or
pathological. Drawing on the narratives and oral histories from minoritized children and youth
in the U.S. and in the majority world/global South, we will analyze their stories of the causes of
their marginalization as well as their liberatory praxis from the periphery to decolonize
discourse, policies and practices grounded in dominant developmental norms of the child and
childhood towards a more liberatory applied psychology and human development.

Cybersecurity Policy: Privacy and Legal Requirements Fick, Katherine; Powers, Kevin R
Fall 2021
Course provides a comprehensive examination of the laws, regulations, and Executive Orders concerning data protection and privacy, including PCI, HIPAA, GLBA, SOX, FISMA, NIST, FISA, CFAA, and their overseas counterparts, and the roles of federal, state, and local regulators and law enforcement officials. The course also examines data protection and national security issues governed by various Federal agencies (e.g., SEC, FTC, FCC, DOE, DOJ, DHS, NSA, Treasury), including suspicious activity reporting (SAR) requirements under the Patriot Act. Additionally, the course addresses intellectual property protection, security classifications, data location requirements, audits, compliance assessments, and individual, class-action, and shareholder derivative litigation and liability.

Incident Response and Management Haugli, Brian W
Fall 2021
Course provides an understanding of the design and development of a Cybersecurity strategy which aligns with private industry and government needs, including incident documentation/analysis, response planning, and the role of a critical event response team (CERT) in determining recovery, managing liability and communications, coordinating with law enforcement, and protecting corporate reputation. Course also examines leadership and the adoption and implementation of a proactive stance through monitoring and responding to internal and external intelligence, including monitoring network traffic, activity logs (SIEM) for data breaches, denial of service (DoS), and integrity events, and outlines the roles of information security operations centers (ISOCs) and network operations centers (NOCs).

Social Issues and Social Policy Morelli, Gilda A
Fall 2021
This seminar provides participants with a foundation of knowledge concerning current social policy issues involving children and families in the U.S., with a particular focus on issues related to poverty and disadvantage. Considers how research, politics, and advocacy play a role in the initiation, implementation, and evaluation of policy, and how social policies impact children and families. Seeks to help students explore scientific evidence and social perceptions, and think critically about central social issues and social policies.

Positive Youth Development Lerner, Jacqueline V
Fall 2021
Applied Developmental Science (ADS) uses research about human development to inform programs and policies pertinent to topics of social importance. Students will integrate readings about and class discussions of new theory and research with information about community-based programs. The focus of this class will be a discussion and analysis of the role of developmental research and, in particular from longitudinal research (for example, the 4-H Study of Positive Youth Development), in framing applications (programs and policies) for promoting positive development among youth. In addition to an overview of the theoretical models that are the bases of the PYD perspective, the course will present the work of researchers who have conducted applied developmental studies of adolescents and their ecological settings in order to advance understanding of how individuals and context are involved across the adolescent years in providing a basis for both healthy and problematic development. Organizational Effectiveness: Governance, Risk Management, and Compliancy DEPT Fall 2021 Organizational Effectiveness: Governance, Risk Management, and Compliancy. Technical proficiency is not enough to manage business risk. Every potential or identified threat cannot be mitigated, and organizations must choose where to focus their often limited resources to support business goals. This course focuses on Governance, Risk and Compliance (GRC) as an organizational capability that all organizations require in today's complex world. Topics include understanding the business context of key stakeholders, corporate culture, and organizational risks. Students will understand how GRC capabilities such as enterprise risk management (ERM), compliance management (SOX, ISO, PCI, NIST, etc.) and policy management should work together to build a cohesive strategy within the business context. Students will learn about GRC technology and GRC program management required to support and grow GRC capabilities. Lastly, students will hear from guest lecturers about the roles and responsibilities of the Board of Directors, Risk/Audit Governance Committees, Chief Executives (Chief Information Security Officer (CISO), Chief Risk Officer (CRO), Chief Security Officer (CSO), etc.) and how they rely on GRC capabilities to support the business. Theories of Counseling and Personality I Mahalik, James R
Fall 2021
First part of a year-long sequence examining personality and counseling theories. To introduce students to major theories of personality in the field of psychology and how theories are applied in constructing counseling and psychotherapy models. Students will focus on humanistic, behavioral, and cognitive personality theories and how they become operationalized in person-centered, behavioral, and cognitive counseling models, respectively. In addition to examining the theoretical foundations, client and counselor dimensions, techniques, and the active ingredients of change for these major models of personality and counseling, students examine how socio-cultural context contributes to client presenting concerns and may be addressed in counseling. To introduce students to major theories of personality in the field of psychology and how theories are applied in constructing counseling and psychotherapy models. Students will focus on humanistic, behavioral, and cognitive personality theories and how they become operationalized in person-centered, behavioral, and cognitive counseling models, respectively. In addition to examining the theoretical foundations, client and counselor dimensions, techniques, and the active ingredients of change for these major models of personality and counseling, students examine how socio-cultural context contributes to client presenting concerns and may be addressed in counseling. Section .01 is for Mental Health Counseling students only Section .02 is for Mental Health Counseling students only

APSY744601
Child Psychopathology MacEvoy, Julie P
Fall 2021
Introduces the theory and research that provide the context for understanding the socio-emotional problems of children. Places particular emphasis on the role of risk and protective factors as they contribute to children’s resilience and vulnerability to childhood problems. Considers implications for clinical practice and work in school settings.

APSY747001
Advanced Practicum: Human Development Morelli, Gilda A
Fall 2021
Students meet once a week to discuss their required field work (8-10 hours per week) and to relate their field work to psychological theories, research, and applications. Readings and discussion contribute to critical analyses of how social issues and social problems are situated differently due to gender, race, social class, and diversities of language, ability, sexuality, etc. Participants will explore strategies for translating this knowledge and experience into resources that enable them to identify future career options. Restricted to ADEP MA students

APSY891202
Participatory Action Research: Gender, Race, Power DEPT
Fall 2021
This graduate seminar introduces students to theoretical and practical issues in the design and implementation of community- and school-based participatory action research, including a review of theories and practices that have contributed to community-based knowledge construction and social change policies and processes. Ethnographic, narrative, oral history, and visual methodologies are additional resources for understanding and representing the individual and collective stories constructed through the research process. Students participate in a community-based collaborative undoing racism workshop and have opportunities for ongoing collaborative work on a site. We reflect collaboratively and contextually on multiple and complex constructions of “gender,” “race,” and social class in and through these research processes. OPEN TO ALL Ph.D. STUDENTS. MASTER’S LEVEL STUDENTS REQUIRE PERMISSION OF THE INSTRUCTOR.

Credits: 3
Room and Schedule: None

APSY891701
Cognitive-Affective Bases of Behavior Vasilyeva, Marina
Fall 2021
Ph.D. students only. All others must get instructor approval. This course discusses theories of human development and examines empirical research on cognitive and affective processes underlying behavior. In addressing the cognitive bases of behavior, it explores key mental processes (e.g., attention, memory, problem solving) and constructs (e.g., schemas, heuristics) that have been instrumental in understanding everyday functioning. The socio-affective bases of behavior addressed in the course include emotions, temperament, and self-concept. The students in this course explore fundamental theoretical questions, such as the role of biology and environment in development, and consider practical applications of current theoretical and empirical knowledge concerning the bases of human behavior.

Quantitative Research Design in Counseling and Developmental Psychology Poteat, Paul Fall 2021

Doctoral students in Counseling and Developmental Psychology. Others by instructor’s permission. This is a year-long course, 1 credit in the fall, 2 credits in the spring. In this year-long seminar, students examine quantitative research designs and application employed in the Counseling and Developmental Psychology literature, including randomized, nonrandomized, cross-sectional, and longitudinal designs. Students present and critique published research exemplifying specific designs, propose empirical studies that could advance counseling and developmental psychology, and present findings from their own empirical work.

Seminar in Counseling Theory Trantham, Sidney M Fall 2021

Doctoral students in Counseling Psychology only. Deepens students’ understanding of psychological theory, and facilitates a life-long journey of integrating theory with practice. Provides knowledge and understanding of traditional and contemporary theories of psychotherapy, and helps students develop a critical perspective that will enable them to evaluate the usefulness of these theories for their clinical work with clients. Class discussions cast a critical eye on the development of the discipline, including its philosophical and contextual roots, and analyze the values inherent in mainstream psychological practice. Considers strengths and limitations of each school, and uses case examples to gain expertise in applying theory to practice.

Counseling, Developmental, and Educational Psychology Courses: Spring 2022

APSY103001
Child Growth and Development MacEvoy, Julie P
Spring 2022
First part of a two-course sequence (APSY1030 - APSY1031) designed to introduce students to the multiple dimensions of child development, and the place of education in promoting healthy development for all children. This course acquaints students with multiple processes of child development, including physical, social, cognitive, linguistic, and emotional development from birth through adolescence. Both typical and atypical patterns of development will be examined. Students discuss and analyze classic theories, contemporary issues, and key research in child development in view of their application to educational and other applied settings.

APSY215201
Applied Psychology Practicum: Pathways to Purposeful Work and Life Trotman, Gracie A Spring 2022
Preference will be given to APSY majors who are Juniors and Seniors and have completed at least 12 APSY credit hours prior to the semester of Applied Psychology Practicum (APSY2152) enrollment. Sophomores and students who are minorin Applied Psychology interested in taking this class may join with permission form the LSEOHD Undergraduate Associate Deans Office, if space is available. Lynch Undergraduate Associate Dean’s office approval required Provides an introduction to the applications of psychological theory within various human and community service contexts. Readings and discussion contribute to critical analyses of how social issues and social problems are situated differently due to gender, race, social class and diversities of language, ability, sexuality, etc. Students volunteer for 8-12 hours per week at a site selected with the assistance of the Field Placement office, meet in a weekly seminar, keep a journal of their field experience, and complete reading and written assignments that integrate theory and practice. Early registration is strongly encouraged to ensure support finding a practicum placement. Students who do not secure a placement by the university add/drop date cannot continue in the course. Students should begin the process of determining a practicum placement by completing the Practicum Placement form HERE (scroll down to the Getting Started section).

This course provides an introduction to statistics with a focus on applications to the fields of human development and education. Students will learn the fundamentals of data analysis, including descriptive statistics, hypothesis testing, confidence intervals, and statistical inference. They will receive experience with statistical software that will allow them to address a wide range of research questions. The course will highlight examples from different areas of practice that require the application of psychology: human services, human resources, social policy, and education.

Mental Illness: Social and Clinical Perspectives Kim, Alice J
Spring 2022
Provides overview of theoretical models and phenomenology currently defining the field of abnormal psychology, focusing particularly on socio-cultural contributions to conceptualizations of mental illness and distress. First half of course reviews and critiques current constructions of the nature of mental illness, as well as classification, assessment, and treatment of mental illness. Second half highlights specific forms of mental illness, with attention to the causes and subjective experience of psychopathology.

Interpersonal Relations Kim, Oh Myo
Spring 2022
Provides an opportunity to learn a developmental and systems perspective on the nature of family and interpersonal relations. Examines both the nature of interpersonal relations and some of the conditions in contemporary life that are shaping the quality of these relationships. Gives particular emphasis to understanding the self, family life, emotions, and conflicts in field research. Views the concept of interpersonal relations from historical, multicultural, gender, and developmental perspectives.

Social Oppression and Transformation Seider, Scott C
Spring 2022
Replacing APSY6348 Culture, Community, and Change Restricted to APSY majors or minors. This course engages the topic of social oppression and transformation from social and psychological perspectives. Using research, scholarship, and creative work from psychology, education, sociology, history, and popular culture, students will explore institutional, ideological, interpersonal, and individual aspects of oppression across four social locations—social class, gender, race, and sexual orientation. For each location, students will start with their own stories of privilege and oppression; move to an empathic engagement with the stories of others; broaden to understand the way that structural dynamics shape those stories; and, finally, dive into specific social issues, including family poverty, violence against women, mass incarceration, and LGBTQI homelessness. Throughout the course, students will have the opportunity to study and reflect on change and transformation, including ways in which to incorporate learning from this course into personal and professional lives.

Inside-Out: Perspectives on Crime, Corrections, and Justice DelSesto, Matthew J Spring 2022
Most sessions will meet at the Suffolk County House of Correction. Due to the unique nature of this course, registration is by application only. This Inside-Out course is an opportunity for a group of students from Boston College and the Suffolk County House of Correction to exchange ideas and perceptions about crime, corrections, and justice. It is a chance for all participants to gain a deeper understanding of the United States criminal justice system through the marriage of theoretical knowledge and practical experience achieved in meetings throughout a semester. Topics include causes and definitions of crime, criminal justice institutions, myths and realities of prison life, experiences of crime victims, theories of punishment and rehabilitation, and the relationship between crime and community. Most sessions will meet at the Suffolk County House of Correction.

Psychology of Work Davila, Alekzander
Spring 2022
Work is one of the central roles in life, encompassing much of our time, energy, and effort. Applied psychology has a deep foundation in the psychology of work, which represents a key context for people to interact socially and economically with their communities. In this course, students will learn how psychology can be used to enhance knowledge of the role of work in career development, occupational life in the private and public sectors, and within broader social and political contexts. Students will also explore the impact of the future of work on individuals and communities, and the ways in which the psychology of work can inform meaning, purpose, and social justice.

In Spring 2022, the course Cyber Ecosystem and Cybersecurity DEPT (APSY605001) is offered. This course provides a comprehensive examination of the laws, regulations, and Executive Orders concerning data protection and privacy, including PCI, HIPAA, GLBA, SOX, FISMA, NIST, FISA, and CFAA, and their overseas counterparts, and the roles of federal, state, and local regulators and law enforcement officials. The course also examines data protection and national security issues governed by various Federal agencies (e.g., SEC, FTC, FCC, DOE, DOJ, DHS, NSA, Treasury), including suspicious activity reporting (SAR) requirements under the Patriot Act. Additionally, the course addresses intellectual property protection, security classifications, data location requirements, audits, compliance assessments, and individual, class-action, and shareholder derivative litigation and liability.

In Spring 2022, the course Prevention and Intervention Strategies for Children, Families, and Communities Dearing, Eric (APSY635001) is offered. This course is designed to provide an overview of key issues that arise in the development, implementation, evaluation, and scaling of prevention and intervention programs that intersect with the field of psychology. Key issues include the challenges and opportunities of research-practice partnerships, the critical role of theories of change, diverse perspectives on evidence, and unintended consequences of good intentions. A variety of exemplar prevention and intervention programs are used to illustrate and analyze these key issues using theoretical, conceptual, and empirical works from psychological science.

In Spring 2022, the course Incident Response and Management Barcomb, Michael J (APSY635001) is offered. This course provides an understanding of the design and development of a Cybersecurity strategy which aligns with private industry and government needs, including incident documentation/analysis, response planning, and the role of a critical event response team (CERT) in determining recovery, managing liability and communications, coordinating with law enforcement, and protecting corporate reputation. Course examinations leadership and the adoption and implementation of a proactive stance through monitoring and responding to threats and security impacts.

In Spring 2022, the course Translating the Science of Learning into Practice Laski, Elida V (APSY642101) is offered. This course translates the science of learning with a tremendous potential for enhancing educational outcomes and job performance. Yet findings obtained in laboratory settings are not easily replicated, expanded, and integrated into applied settings. This course will consider key issues to consider...
in translating learning science into practice across diverse contexts. Students will consider examples of how findings from the science of learning have been applied either successfully or unsuccessfully to practice in fields such as education, counseling, design, and business.

Interpretation and Evaluation of Research Littenberg-Tobias, Joshua S
Spring 2022
This course will improve a students' understanding of the empirical research literature in education and psychology. It concentrates on developing the conceptual foundations of empirical research and the practical analytic skills needed by a competent reader and user of research articles. Topics address purpose statements, hypotheses, sampling techniques, sample sizes and power, instrument development, internal and external validity, and typical quantitative research designs. Exercises emphasize the critical evaluation of published research. Each student will develop a research proposal.

Organizational Effectiveness: Governance, Risk Management, and Compliance DEPT Spring 2022
Organizational Effectiveness: Governance, Risk Management, and Compliance. Technical proficiency is not enough to manage business risk. Every potential or identified threat cannot be mitigated, and organizations must choose where to focus their often limited resources to support business goals.

This course focuses on Governance, Risk and Compliance (GRC) as an organizational capability that all organizations require in today's complex world. Topics include understanding the business context of key stakeholders, corporate culture, and organizational risks. Students will understand how GRC capabilities such as enterprise risk management (ERM), compliance management (SOX, ISO, PCI, NIST, etc.) and policy management should work together to build a cohesive strategy within the business context. Students will learn about GRC technology and GRC program management required to support and grow GRC capabilities. Lastly, students will hear from guest lecturers about the roles and responsibilities of the Board of Directors, Risk/Audit Governance Committees, Chief Executives (Chief Information Security Officer (CSO), Chief Risk Officer (CRO), Chief Security Officer (CSO), etc.) and how they rely on GRC capabilities to support the business.

This course will touch on a variety of topics in psychology from a biological perspective that will be helpful in clinical practice. Areas to be covered include the basic structure and function of neurons, basic neuroanatomy, cognitive functions, substance abuse, addictions, and psychopharmacology. Discussion of these topics will be approached from a biopsychosocial approach. Students are encouraged to ask questions throughout the lecture to both clarify material and to work toward application of the material to clinical work.

Theories of Counseling and Personality II Lewis Harris, Treniece Spring 2022
Second part of a year-long sequence examining personality and counseling theories. Continues introduction to major theories of personality in the field of psychology and how those theories are applied in constructing counseling and psychotherapy models. Focuses on psychoanalytic personality and counseling models as well as critical theory as manifested in the psychology of gender and counseling models that integrate gender into working with clients. Specifically, for each model, students will examine the theoretical foundations developed in its theory of personality, relevant client and counselor dimensions, counseling techniques, and the active ingredients of change that each model uses in bringing about change.

Advanced Practicum: Human Development Morelli, Gilda A Spring 2022
Students meet once a week to discuss their required field work (8-10 hours per week) and to relate their field work to psychological theories, research, and applications. Readings and discussion contribute to critical analyses of how social issues and social problems are sustained differently due to gender, race, social class, and diversities of language, ability, sexuality, etc. Participants will explore strategies for translating this knowledge and experience into resources that enable them to identify future career options. Restricted to ADEP MA students.

Psychometric Theory II
Li, Zhushan Spring 2022
This course continues the examination and application of the principles of item response theory and educational measurement introduced in previous courses. The first section of the course will address the use of a variety of item response theory models for dichotomous and polytomous items. The second section of the course will focus on application of the principles of item response theory to a variety of practical situations and problems commonly encountered in educational testing. In the final section of the course, overarching theoretical and practical issues are addressed and future directions in item response theory are discussed.

APSY886101
Multilevel Regression Models
O’Dwyer, Laura Spring 2022
This course introduces students to multilevel regression modeling (aka hierarchical models or mixed effects models) for analyzing data with a nesting or hierarchical structure. We discuss the appropriate uses of multilevel regression modeling, the statistical models that underpin the approach, and how to construct models to address substantive issues. We consider a variety of types of models, including random intercept, and random slope and intercept models; models for longitudinal data; and models for discrete outcomes. We cover various issues related to the design of multilevel studies, model building and the interpretation of the output from HLM and SPSS software programs.

Critical Perspectives on the Psychology of Race, Class, and Gender
Pieterse, Alex Spring 2022
Using social and critical psychological frameworks, introduces multiple strategies for thinking culturally about select psychological constructs and processes (for example, the self, family and community relations, and socio-political oppression). Also pays particular attention to race and class as sociocultural constructs important for the critical analysis of the relationships of culture and psychology. Explores the implications of these constructs for intercultural collaboration, advocacy, and action.

Quantitative Research Design in Counseling and Developmental Psychology
Potetz, Paul Spring 2022
Doctoral students in Counseling and Developmental Psychology. Others by instructor’s permission. This is a year-long course, 1 credit in the fall, 2 credits in the spring. In this year-long seminar, students examine quantitative research designs and application employed in the Counseling and Developmental Psychology literatures, including randomized, nonrandomized, cross-sectional, and longitudinal designs. Students present and critique published research exemplifying specific designs, propose empirical studies that could advance counseling and developmental psychology, and present findings from their own empirical work.

APSY984401
Counseling Psychology in Context: Social Action, Consultation, and Collaboration
Lykes, M B Spring 2022
For doctoral students in Counseling Psychology, and others by permission only. This is a year-long course, 1 credit in the fall, 2 credits in the spring. Accompanying the First Year Experience (FYE) practicum, exposes students to research and practice at the meso-(community, organizations) and macro (government, policy, social norms) levels, in addition to the more traditional micro (individual) level. Students discuss their personal experiences within their FYE placement and read and discuss a series of articles and chapters central to the developing fields of critical psychology, liberation psychology, or counseling with a social justice orientation.
Credits: 1
Room and Schedule: Campion Hall 224 W 09:30AM-12:00 Noon
Satisfies Core Requirement: None

APSY984601
Advanced Pre-Internship Counseling Practicum
Coutinho, Maria Spring 2022
This is a year-long course, 1 credit in the fall, 2 credits in the spring. Pre-internship placement in a mental health setting accompanied by a biweekly seminar on campus. Placement requires 20-24 hours per week over two semesters. Focus will be on the integration of theoretical and research perspectives on clinical interventions utilizing the experience of site-based practice.
Satisfactory completion of this course is a prerequisite for the doctoral internship.
Credits: 1

ELHE770101
Introduction to Educational Leadership and Change McNeil, Alexandra M
Summer 2021
Brings a foundational focus to the work of educational administration, centering on the core work of teaching and learning and exploring how that central work is supported by the cultural, technical, political, and ethical systems of the school. That work is deepened as administrators support learning as meaning making, as involving a learning and civil community, and as involving the search for excellence. Students are asked to research the realities at their work sites using the concepts and metaphors developed in the course and, through discussion and the utilization of case studies, to propose improvements to those realities.

Credits: 3
Room and Schedule: 5/19-8/13, Monday 6:00pm Satisfies Core Requirement: None Prerequisites: E-mail department for permission if course is closed. Corequisites: None Cross-listed with: None Frequency: Every Fall Student Level: Graduate Comments: None Status: Offered

ELHE770501
Education Policy Analysis Kramer, Jenna
Summer 2021
This course provides a foundation for engaging in analysis of educational policy by developing students’ knowledge of and experience with tools, data sources, and frameworks that form the toolkit of policy analysts. The course engages with major theories and concepts that guide public policy analysis and provides opportunity to produce novel policy analysis and critique the framing, clarity, and concreteness of published policy analyses and proposed policy tools and solutions. Students will engage with current discourse and considerations in education policy throughout the course, with a particular focus on analyzing policy for equity. By the conclusion of the course, students will be able to engage in public policy analysis and communicate policy issues and analysis that draws on their professional expertise.

ELHE770701
Leadership for Social Justice Johnson, Lauri D
Summer 2021
This course introduces students to the theory and practice of leadership for social justice at the school and district level. Definitions, approaches, and controversies in this emerging field will be examined. Readings, films, class discussions, and case studies related to the topics of race, ethnicity, culture, language, gender, social class, religion, sexual orientation, and disability will focus on how these issues affect educators, students and their families in today’s K-12 schools. In particular, students will learn about leadership which is culturally and linguistically responsive; strengthens parent-community-school relationships; and formulates diversity policies to promote educational equity for students from diverse groups.

Instructional Leadership Suchow, Ariella F Summer 2021
Instructional Leadership. Introduces students to many of the contested issues in the field of supervision, such as the relationship between supervision and teacher development, teacher empowerment, teacher alienation, learning theories, school effectiveness, school restructuring, curriculum development, and scientific management. Supervision will be viewed also as a moral, community-nested, artistic, motivating, and collaborative activity. Will stress the need for a restructuring of supervision as an institutional process.

Using Data and Evidence for School Improvements Steedman, Peter Summer 2021
This course prepares leaders to manage initiatives around continuous improvement and data-informed inquiry. On one hand, students will develop basic research skills that will contribute to evidence-based school improvement, including action research. On the other hand, students will explore the landscape of supports and barriers to using data and other evidence effectively in schools. In particular, students will explore the role of leadership in the appropriate use and design of assessments; fostering a positive cycle of inquiry among educators; and the effective use of information systems and other technologies.

Organizational Theory and Learning Driscoll, William Summer 2021
Rather than focusing on traits of the individual leader, this course focuses on the dimensions of organizations and teams that both facilitate and complicate leadership. Examples include managing conflict, developing a shared vision, and differentiating between technical and adaptive change. Students will apply various organizational theories in order to understand group- and system-level patterns in "how groups get things done" (e.g., structures and resources, symbols and values, power and politics). Ultimately, students leave the course better able to plan and evaluate school improvement through the lenses of organizational theory.

Global and Comparative Systems in Higher Education
Schedel, Rebecca
Fall 2021

Colleges and universities are part of an international system of post-secondary education. This course offers a perspective on the organization and structure of higher education worldwide, as well as an analysis of central issues affecting academe internationally. Examples from other countries are related to the American context. Among the topics considered are global trends in the expansion and organization of higher education, international study and its impact, the political role of universities, student activism, the role and status of the academic profession, styles of academic leadership in other countries, and others.

Counseling Techniques in Higher Education
Walsh-Blair, Lynn Y
Fall 2021

Provides an introduction to theoretically-based counseling skills for professionals in higher education and other education and community settings. The areas of communications skills involving the use of role-playing, observation, and practice components are emphasized. Postsecondary case studies cover a range of counseling issues and are applicable to a wide range of settings involving late adolescents and adults. *Please be aware if you have consulted with the instructor at University Counseling Services. If so, please contact the instructor or ELHE Department Chair to address any concerns about your confidentiality as a UCS client or your ability to register for this course.

Strategic Management of Human Capital
McMahon, Molly
Fall 2021

Proceeding from a discussion of various theories of managing people in organizations, this course enhances management skills and the understanding of how different strategies are most effectively employed in the field of education, particularly Catholic education. To create the conditions upon which others can perform their work effectively, both professional staff and volunteers, one must manage their organizational environment. School leaders have a profound impact on their organizations' effectiveness by how they manage faculty, staff, board members, volunteers, external relations, processes and projects. Considering schools are organizations that are complex and changing systems, operated by complex and changing people, this course provides students with a set of tools and enhanced skills for diagnosing and responding to the dynamics of human capital management. The course is designed to increase the understanding of how schools acquire, develop, and maintain high-performing employees. The focus will be managerial in nature and is intended to assist the students to become informed consumers and users of organizational practices. The primary methodology to be learned and applied in this course is organizational analysis, drawing on case studies and one's personal experiences and interactions in a work environment.

Introduction to Educational Leadership and Change
Patterson, Leslie M
Fall 2021

Brings a foundational focus to the work of educational administration, centering on the core work of teaching and learning and exploring how that central work is supported by the cultural, technical, political, and ethical systems of the school. That work is deepened as administrators support learning as meaning making, as involving a learning and civil community, and as involving the search for excellence. Students are asked to research the
realities at their work sites using the concepts and metaphors developed in the course and, through discussion and the utilization of case studies, to propose improvements to those realities.

ELHE770201
Education Policy and Practice Hegseth, Whitney M Fall 2021
This course provides an overview of educational policy as it plays out in local practice. Throughout the course, students will develop an understanding of foundational approaches to policy making, interpretation, and implementation as it plays out in education settings. In addition to providing an overview to the field of educational policy, the course investigates the relationship between policy and practice through attention to: (1) policymaking including policy mechanisms, framing, and policy actors; (2) processes of policy interpretation and implementation; and (3) policy as practice and the role of local leaders in developing policy. Throughout the course, we will examine how context shapes the relationship between policy and practice by focusing on sociocultural, organizational, and political influences. The course integrates critical perspectives as well as foundational concepts in our study of policy, highlighting how systems of oppression and power dynamics influence the policy process. During the course, students will have opportunities to apply theories and concepts to their own contexts, engaging in policy analysis and creation through hands-on assignments. The course approaches educational policy as incorporating both formal and informal policies, positioning practitioners as interpreters and implementers of local, state, and federal policies, as well as simultaneously designing and creating policies themselves.

ELHE770401
Ethics and Equity in Education Miller, Andrew F Fall 2021
This course explores how schools are used as a vehicle of the state to de-culturalize various communities of people throughout the country's history. Students will explore how schools can more appropriately promote respect for valuing diversity as a generative source of the country's vitality and its relationship to the global village. The role of educators is not only to act ethically in the many individual situations of their daily professional lives, but in a more important way to see that the institutional structures and processes of the school system are themselves reflections of a system of justice and care.

ELHE770701
Leadership for Social Justice DEPT Fall 2021
This course introduces students to the theory and practice of leadership for social justice at the school and district level. Definitions, approaches, and controversies in this emerging field will be examined. Readings, films, class discussions, and case studies related to the topics of race, ethnicity, culture, language, gender, social class, religion, sexual orientation, and disability will focus on how these issues affect educators, students and their families in today's K-12 schools. In particular, students will learn about leadership which is culturally and linguistically responsive; strengthens parent-community-school relationships; and formulates diversity policies to promote educational equity for students from diverse groups.

Instructional Leadership Celi, Lynne Fall 2021
Instructional Leadership. Introduces students to many of the contested issues in the field of supervision, such as the relationship between supervision and teacher development, teacher empowerment, teacher alienation, learning theories, school effectiveness, school restructuring, curriculum development, and scientific management. Supervision will be viewed also as a moral, community-nested, artistic, motivating, and collaborative activity. Will stress the need for a restructuring of supervision as an institutional process.

ELHE771101
Using Data and Evidence for School Improvements Steedman, Peter Fall 2021
This course prepares leaders to manage initiatives around continuous improvement and data-informed inquiry. On one hand, students will develop basic research skills that will contribute to evidence-based school improvement, including action research. On the other hand, students will explore the landscape of supports and barriers to using data and other evidence effectively in schools. In particular, students will explore the role of leadership in: the appropriate use and design of assessments; fostering a positive cycle of inquiry among educators; and the effective use of information systems and other technologies.

Applying Research in International Higher Education Blanco, Gerardo L
Fall 2021
This course—provides a framework for a "real world" experience for students interested in international higher education, in combination with an in-depth research project. This combination of practical experience with research gives students an appreciation for the ways that the daily work of different kinds of organizations—higher education institutions, individual programs and offices, policymaking organizations, governmental units, and professional associations—are framed by questions and concerns that require the ability to undertake a significant exploration of information and ideas in order to inform practice.

Educational Leadership and Higher Education Courses:

Spring 2022

ELHE29501
Spirituality, Religion, and College Student Experience James, Michael J Spring 2022
Faith, religion, and spirituality have become topics of increasing interest for scholars and practitioners in higher education and student personnel development. This semester-long, upper-level, undergraduate course explores the historic, developmental, sociological, and philosophical dimensions of the college student experience at the intersection of faith life, spirituality, and academic culture. This course approaches themes and readings from an ecumenical and interreligious set of perspectives. Students will engage several major texts as well as articles from scholarly journals and narratives from institutional models that attempt to integrate faith life and spirituality into the prevailing academic and student development culture.

MLHE466001
Interpretation and Evaluation of Research Litkenberg-Tobias, Joshua S Spring 2022
This course will improve a students' understanding of the empirical research literature in education and psychology. It concentrates on developing the conceptual foundations of empirical research and the practical analytic skills needed by a competent reader and user of research articles. Topics address purpose statements, hypotheses, sampling techniques, sample sizes and power, instrument development, internal and external validity, and typical quantitative research designs. Exercises emphasize the critical evaluation of published research. Each student will develop a research proposal. Credits: 3

El Encuentro: Immigration and the Response of Catholic Educators Wytenbach, Melodie Spring 2022
A Boston College report states that approximately 60% of Catholics under the age of 18 are Hispanic. This statistic challenges educators to question, how are our Catholic schools responding to demographic changes and the challenge of educating the next generation of American Catholics? Embracing Ignatian pedagogical designs this course aims to provide Catholic school teachers and leaders an opportunity to encounter immigrant children and families through an immersive educational experience. Participants will come together for prayer, reflection, lectures and discussion prior to and following an immersive experience with the Columban Mission Center (February 17-21, 2019) on the U.S.-Mexico border in El Paso, Texas and Juárez, Mexico. Participants will gather two times prior to the border experience and three times afterward, with final gathering being a symposium on Immigration and the response of Catholic educators. This symposium, which will be the culminating authentic assessment for the course, will be hosted and facilitated by participants for Catholic school educators interested in engaging in further dialogue on this topic. The Roche Center for Catholic Education at Boston College will sponsor the one credit course, including the immersion experience, for students enrolled in the program. The course will be capped at 16 students. For more information please email Dr. Melodie Wytenbach at wytenba@bc.edu

ELHE730301
Financial Management in Higher Education Zona, John J Spring 2022
The objective of this course is to introduce modern day financial theories and techniques as applied to the management and oversight of colleges and universities in the United States. There is an emphasis on a practical, real-world application across a broad range of specialized topics including endowment management, fundraising, budgeting, long range planning, debt management, financial statement analysis, cash management, resource allocation and risk management. We will examine these topics through the lens of two major shocks to the system that have altered the economic landscape of higher education: the 2008 global financial crisis and more recently, the global pandemic. The tradeoff between risk and return will serve as a common framework for class discussions. We will explore the unique characteristics of higher education institutions and the differences between major research universities and liberal arts colleges. Academic theory combines with executive leadership practice to serve as the underpinning of this course.

ELHE730401
School Finance and Business Administration O'Connor, Michael T;Wytenbach, Melodie Spring 2022
The financial and business operations of a school are instrumental to the success of students. Often under examined, core concepts in school finance and business management are nuanced, technical, and at times contentious. This class will prepare educational leaders to engage in discourse regarding the key issues in school finance and business management, through the lenses of educational adequacy, equity, efficiency, and liberty. The overarching goal is for educational leaders to be able to debate, craft, and implement school finance and business management policies with an informed understanding of the anticipated implications as well as alternative options. There are tremendous challenges to the conversion of conceptual and theoretical concepts into concrete, actionable financial and business policies for schools. A particular emphasis will be placed on examining these concepts and policies in Catholic schools and opportunities for strengthening the operational vitality of this sector. We will examine these challenges and the proposed solutions, underscoring the strengths and weaknesses of each approach.

College Student Experience: Access, Choice, and Persistence Rowan-Kenyon, Heather T Spring 2022
This course explores the ways in which the higher education community has addressed three basic questions: Who goes to college? What sorts of experiences do students have in college? And, as a consequence of their experiences, who do they become by graduation? The course will familiarize students with the nature and characteristics of the college student population in American higher education, the variety of research methods used to study college students, and some of the many effects and outcomes of college student experiences.

Religion and Higher Education James, Michael J Spring 2022
Faith, religion, and spirituality have become topics of increasing interest for scholars and practitioners in higher education administration and student personnel development. This course explores the historical, sociological, and cultural dynamics between religion and higher education. Topics include secularism, modernity, and challenges to the integration of faith and intellectual life. Additional topics include: religious pluralism; religion in secular higher education; legal issues surrounding religion and higher education; academic freedom; constitutional matters; modernism, post-modernism, post-secularism and the tensions and opportunities that these cultural/intellectual movements pose for religion and higher learning in a modern, democratic, pluralistic society.

Internationalization of Higher Education Blanco, Gerardo L Spring 2022
Higher education around the world today is increasingly affected by the forces of internationalization. Professionals working in postsecondary education in the United States and elsewhere must have a clear understanding of the range of opportunities and challenges presented by the evolution of this phenomenon. This course has two main objectives. The first is to introduce students to the central issues relevant to the international dimension of higher education in different national contexts. The second objective is to promote students’ understanding of the practical implications of internationalization for their own work in higher education administration and/or policy-making contexts.

This interdisciplinary seminar addresses the role of law in education reform and the relationship between law and social science in efforts to promote educational attainment in the nations elementary and secondary schools. The primary focus will be contemporary education reform issues, including educator quality, access to meaningful opportunity to learn, curriculum control, and student, teacher, administrator, and parental rights. The focus of the course will be inquiry on the role of law in school reform, the limits of law-based education reform, and the consequences of statutory requirements for scientific evidence-based approaches to education programs.

Brings a foundational focus to the work of educational administration, centering on the core work of teaching and learning and exploring how that central work is supported by the cultural, technical, political, and ethical systems of the school. That work is deepened as administrators support learning as meaning making, as involving a learning and civil community, and as involving the search for excellence. Students are asked to research the realities at their work sites using the concepts and metaphors developed in the course and, through discussion and the utilization of case studies, to propose improvements to those realities.

This course introduces students to the theory and practice of leadership for social justice at the school and district level. Definitions, approaches, and controversies in this emerging field will be examined. Readings, films, class discussions, and case studies related to the topics of race, ethnicity, culture, language, gender, social class, religion, sexual orientation, and disability will focus on how these issues affect educators, students and their families in today's K-12 schools. In particular, students will learn about leadership which is culturally and linguistically responsive; strengthens parent-community-school relationships; and formulates diversity policies to promote educational equity for students from diverse groups.

This course provides an overview of educational policy as it plays out in local practice. Throughout the course, students will develop an understanding of foundational approaches to policy making, interpretation, and implementation as it plays out in education settings. In addition to providing an overview of the field of educational policy, the course investigates the relationship between policy and practice through attention to: (1) policymaking including policy mechanisms, framing, and policy actors; (2) processes of policy interpretation and implementation; and (3) policy practice and the role of local leaders in developing policy. Throughout the course, we will examine how context shapes the relationship between policy and practice by focusing on sociocultural, organizational, and political influences. This course integrates critical perspectives as well as foundational concepts in our study of policy, highlighting how systems of oppression and power dynamics influence the policy process. During the course, students will have opportunities to apply theories and concepts to their own contexts, engaging in policy analysis and creation through hands-on assignments. The course approaches educational policy as incorporating both formal and informal policies, positioning practitioners as interpreters and implementers of local, state, and federal policies, as well as simultaneously designing and creating policies themselves.

Instructional Leadership Celi, Lynne
Spring 2022

Instructional Leadership. Introduces students to many of the contested issues in the field of supervision, such as the relationship between supervision and teacher development, teacher empowerment, teacher alienation, learning theories, school effectiveness, school restructuring, curriculum development, and scientific management. Supervision will be viewed also as a moral, community-nested, artistic, motivating, and collaborative activity. Will stress the need for a restructuring of supervision as an institutional process.

ELHE772602
Organizational Theory and Learning Geiser, Jill S
Spring 2022

Rather than focusing on traits of the individual leader, this course focuses on the dimensions of organizations and teams that both facilitate and complicate leadership. Examples include managing conflict, developing a shared vision, and differentiating between technical and adaptive change. Students will apply various organizational theories in order to understand group- and system-level patterns in "how groups get things done" (e.g., structures and resources, symbols and values, power and politics). Ultimately, students leave the course better able to plan and evaluate school improvement through the lenses of organizational theory.

Spring 2022

Organizational Theory and Learning Driscoll, William
Spring 2022

Rather than focusing on traits of the individual leader, this course focuses on the dimensions of organizations and teams that both facilitate and complicate leadership. Examples include managing conflict, developing a shared vision, and differentiating between technical and adaptive change. Students will apply various organizational theories in order to understand group- and system-level patterns in "how groups get things done" (e.g., structures and resources, symbols and values, power and politics). Ultimately, students leave the course better able to plan and evaluate school improvement through the lenses of organizational theory.

ELHE772701
Family and Community Engagement Suchow, Ariella F
Spring 2022

Please e-mail Gracie Trotman at gracie.taylor@bc.edu for class permission.. This course will explore the theory and practice of family-school-community relationships with a particular focus on the role of school leaders in enacting organizational models, educational programs, and political strategies designed to increase authentic parent and community participation in schools and other educational organizations. Topics include community schools/full service schools, parent involvement models, increasing the involvement of diverse families, grassroots organizing for community development, after school/OST (Out of School Time) programs, and school board-community relations.

School Leadership for Emergent Bilinguals Anton Oldenburg, Mary
Spring 2022

ELHE771101
Using Data and Evidence for School Improvements Graves, Kenneth E
Spring 2022

This course prepares leaders to manage initiatives around continuous improvement and data-informed inquiry. On one hand, students will develop basic research skills that will contribute to evidence-based school improvement, including action research. On the other hand, students will explore the landscape of supports and barriers to using data and other evidence effectively in schools. In particular, students will explore the role of leadership in: the appropriate use and design of assessments; fostering a positive cycle of inquiry among educators; and the effective use of information systems and other technologies.

Reflection on Leadership Seminar Information Lowenhaupt, Rebecca J
Spring 2022

The primary purpose of the Reflection on Leadership Seminar is for students to synthesize their learning across their course of studies and prepare to apply this as they continue on their career and vocational journey. The course will be conducted in a seminar format, with students sharing in the leadership of the course discussions and activities. Students will: describe how they have experienced the signature pedagogies across their program of study; provide clear evidence of their level of mastery of the key behaviors for educational leadership; articulate how they envision continuing to grow and innovate as a research-informed practitioner. This course also fulfills the requirements for the Master’s Comprehensive exam ELHE8100

Seminar on Education Reform Scanlan, Martin K
Spring 2022

This course is for PSAP students only. This interdisciplinary seminar addresses the role of law in education reform and the relationship between law and social science in efforts to promote educational attainment in the nation’s elementary and secondary schools. The primary focus will be contemporary education reform issues, including educator quality, access to meaningful opportunity to learn, curriculum control, and student, teacher, administrator, and parental rights. The focus of the course will be inquiry on the role of law in school reform, the limits of law-based education reform, and the consequences of statutory requirements for scientific evidence-based approaches to education programs.

Global Perspectives on Student Affairs in Higher Education Glass, Christopher R
Spring 2022

In this course students will explore the realities of the student experience around the world, and the ways in which higher education institutions and systems endeavor to understand and respond to them. The course will examine conceptual and practical, historical and contemporary approaches to student affairs. Critical analysis of the similarities and differences in approaches to student affairs across the world will provide students with insights into the relationship between theory and practice in the field.

The Advanced Field Experience in Higher Education James, Michael J
Spring 2022

Restricted to M.A. students in the Higher Education program. As a continuation of Field Experience in Higher Education, this course is a guided practicum for students enrolled in higher education programs. The advanced field experience requires supervised field work (graduate assistantship or internship) in a higher education institution or agency and participation in a six-week internship seminar. Advanced field work is overseen by program faculty and supervised by a professional administrator at the graduate assistantship or internship site. The Advanced Field Work in Higher Education seminar requires demonstrated knowledge of the Higher Education program core competencies as they are practiced in a particular area of administrative expertise and demonstrated knowledge of professional skills development related to theory and research in higher education.

Data Literacy Castro Samayoa, Andres Spring 2022
This course introduces students to data management and evaluation and assessment. Students are introduced to federal, state, and institutional datasets to understand how higher education policymakers use data to inform decision-making. The course teaches students to consider the ethical and political implications of how data are produced and used to inform policy-making. Additionally, students will come to better understand how data practices within their own institution relate to broader administrative data systems.

Experience, Reflection, Action Courses: Fall 2021
ERAL110001
First Year Experience, Reflection, and Action Whitcavitch-Devoy, Julia
Fall 2021
First Year Experience, Reflection, and Action (ERA) is a full-year program whereby students develop attention to the needs of others, respect for context, and an appreciation for their own individual gifts and insights. Through key content material, speakers, design-thinking workshops, applied action projects, presentations, small group discussions, and community engagement work, the year-long LSEHD ERA program facilitates students growth across developmental domains. The ERA program connects first-year LSEHD students directly to mentors, including faculty, graduate students, other junior and senior undergraduates, and their undergraduate dean. ERAs model ensures information about opportunities at BC, as well as, externally, fairly reaches all students, while also providing a sound underpinning of student formation, robust academics, and the occasion for explorations of future and possible selves.

ERAL400001
First Year Experience, Reflection, and Action Whitcavitch-Devoy, Julia Fall 2021
First Year Experience, Reflection, and Action is a seminar designed to help first-year students negotiate the rigorous and dilemmas of college life and become more critical citizens. Readings, discussions, and panel presentations will address moral-cognitive decision-making, vocational discernment in the context of Ignatian Pedagogy, local, state, and national trends in Applied Psychology and Human Development and Teacher Education and expose students to the Lynch School and university faculty and student research. Participants will read and critique current research about college student issues and learn to self-reflect critically in order to make more informed choices and decisions.

Learning Engineering Courses: Fall 2021

LREN710101
Introduction to Learning Engineering Kolodner, Janet L Fall 2021
This course introduces the content and skills needed to thrive as systematic designers of learning experiences, environments, and technologies. It focuses on three themes: (1) how people learn—cognitive processes involved in learning and social, cultural, physical, affective, and other influences on those processes; (2) how to fostering or promote learning—what we know about the help learners need to engage and participate at their best and ultimately to become more knowledgeable and capable; and (3) designing for learners and analyzing those designs—how to apply what you are learning to the design and analysis of learning experiences, environments, and technologies.

LREN712101
Reflective Seminar 1 Kolodner, Janet L Fall 2021
This one-credit seminar is designed to help students make sense of and synthesize across the new concepts, skills, and practices they are learning as participants in the M.A. in Learning Engineering Program. Focus will be on how to be designers of engaging and effective learning experiences. Students will also reflect on their experiences to identify their strengths and what brings them joy, to imagine the special expertise they’d like to develop, and to identify the kinds of responsibilities they’d enjoy taking on in the workplace.

LREN720101
Games for Learning Sidman, Jason G Fall 2021
What can we learn from games about engaging learners and fostering learning? How can games be developed specifically to promote learning? What kinds of things can be learned from games? What does it take to foster learning from games? Some educational games that have been designed in research labs can inform about the answers to these questions. As well, there are many computer games around that can teach us about sustaining engagement, particularly important for understanding deeply and mastering capabilities. In this module, students will engage with and read about a variety of games for learning and, hopefully, develop imagination about what different kinds of games and ways of interacting with games afford with respect to learning and come to recognize aspects of game design that are relevant to designing learning experiences. Your project will be the conceptual design of a game to achieve a set of learning goals of your choice.

LREN720201
Modeling and Simulation for Learning Zhang, Helen Z Fall 2021
Simulations and computational modeling are popular educational activities that can serve as venues for engaging learners in observations and explorations of invisible processes and phenomena, collecting data and evidence, and constructing and iteratively understanding of mechanisms and processes. This module will engage students in exploring interesting questions such as “What are simulation activities good for?”, “What about modeling activities?”, “What are the affordances of each and when should each be used?”, “What makes some simulations better for some situations and learner groups than others?”, and “How can you design modeling/simulations to support desirable interactions?”

Learning Engineering Courses: Spring 2022

LREN730101
Principles of Fostering Learning Laski, Elida V Fall 2021
This course will introduce students to what the field of psychology has to say about how humans learn. This includes examining the basic cognitive processes involved in learning, and considering how these processes interact with task demands and organization. The course is organized around key principles about learning and cognition which have emerged from empirical work in the fields of cognitive and developmental psychology. Its focus will be to identify practices that can be used to foster learning in different settings and interactions, including approaches such as spaced practice and group discussions.

LREN711201
Design Studio 2 Kolodner, Janet L; Lachapelle, Cathy P Spring 2022
The Design Studio is the venue for learning how to practice Learning Engineering. Students will learn practices of design thinking and design decision making in the context of a continuing design project begun in Design Studio 1, focused on designing learning experiences for a targeted population of learners that foster learning of targeted learning objectives. The Design Studio will be richly-facilitated and orchestrated as a Cognitive Apprenticeship. Students will work individually or in pairs and also spend time as a Knowledge Building Community sharing what they are designing and the complexities they are facing, providing advice to each other, and reflecting on and articulating what they are learning about designing for learners.

LREN711401
Designing Online and Hybrid Learning Experiences Valdez, Keisha Spring 2022
Face-to-face instruction is often considered the gold standard for learning, the most effective and efficient way to gain new knowledge and skills. But various models of distance education exist, including those powered by networked computing. One challenge for online and hybrid learning environments is designing ways that engage learners as well or better than in-person formats. This module will provide an overview of strategies that learning designers and engineers can use to develop effective and engaging online and hybrid learning experiences. Students will be encouraged to actively consider equity and inclusive practices in learning design.

LREN712201
Reflective Seminar 2 Kolodner, Janet L Spring 2022
This one-credit seminar is designed to help students make sense of and synthesize across the new concepts, skills, and practices they are learning as participants in the M.A. in Learning Engineering Program. Focus will be on knowing targeted learners and the physical, social, and cultural systems they are part of and keeping those criteria and constraints in mind while designing for learning. Students will continue to reflect on their experiences to identify their strengths and what brings them joy, to imagine the special expertise they’d like to develop, and to identify the kinds of responsibilities they’d enjoy taking on in the workplace.

LREN730201
Cognitive Task Analysis Laski, Elida V
Spring 2022
This course will introduce students to the key conceptual and methodological elements of Cognitive Task Analysis, which can be used to identify the knowledge and skills required for the performance of a complex task. The focus will be on the specification of covert cognitive processes and the integration of those with overt behaviors into a model of task performance. Students will learn knowledge elicitation techniques, such as verbal think aloud protocol, used to uncover the cognitive structures and processes involved in expert performance of a task. Students also will practice generating cognitive models/knowledge representations of tasks relevant to their design area.

LREN730399
Motivation in Educational Contexts DEPT
Spring 2022
In this module, we will explore what it means to be motivated and what it is that we want at a fundamental level (i.e., our basic human needs). We will also learn about important theories of achievement motivation from the fields of educational, developmental, and social psychology, as well as empirical research that supports these theories. The contextual focus of the module will be on what motivates students to learn and what kinds of instructional practices and interventions can be employed in order to foster student motivation and engagement.

MESA760101
Introduction to Mathematical Statistics
Braun, Henry I
Fall 2021
Quantitative methods in educational and psychological research have become increasingly complex over time, employing more sophisticated models and estimation strategies. This course helps students to develop a deeper understanding of the strengths and limitations of different approaches to inference and to appreciate some of the ongoing arguments among the adherents of the different philosophies regarding statistical inference.

Psychometrics I: Classical Test Theory and Rasch Models
Von Davier, Matthias
Fall 2021
This course provides a study of theoretical concepts, statistical models, and practical applications in educational and psychological measurement. General topics include the history of measurement, Thurstone and Guilford scales, classical true-score theory, and item response theory. Specific topics include principles of Rasch measurement, parameter estimation procedures, fit statistics, item banking, and computer adaptive testing.

Spring 2022
This course will improve a student's understanding of the experimental research literature in education and psychology. It concentrates on developing the conceptual foundations of empirical research and the practical analytic skills needed by a competent reader and user of research articles. Topics address purpose statements, hypotheses, sampling techniques, sample sizes and power, instrument development, internal and external validity, and typical quantitative research designs. Exercises emphasize the critical evaluation of published research. Each student will develop a research proposal.

MESA746701
Evaluation Theory and Research Gates, Emily F Spring 2022
Evaluation as a professional practice and academic discipline is characterized by variation in perspectives on what evaluation is and how it should be practiced. This course introduces students to evaluation theory, key debates, and research on evaluation in order to develop students as critical, responsible evaluators and evaluation scholars. Evaluation theories are models, approaches, or frameworks that prescribe how and why one should conduct evaluation in a particular way. Debates in the evaluation field center on the following issues: role of evaluation in society, particularly around advancing equity, social justice, and human rights; the relationship between theory and practice; role of stakeholder and public interest values in evaluation and the theory and practice of valuing; what constitutes credible evidence and, particularly evidence of outcomes and impact; influence of politics on evaluation and evaluation on policy-making; what are and should be evaluators? professional competencies and responsibilities; and future of evaluation. Research on evaluation involves conceptual and empirical investigations of theories, methods, and practices in order to better understand and improve evaluation. By the end of the course, students will be familiar with evaluation theories, debates, and research on evaluation and, ideally, strengthen their perspective and sense of responsibility within the evaluation field. Credits: 3

MESA756101
Evaluation and Public Policy Braun, Henry I Spring 2022
The course will examine some issues that arise in educational accountability. The purpose is to develop a deeper understanding of the policy issues and a critical appreciation of the relevant methodological strategies. Topics include the establishment and use of state-specific performance standards under NCLB and the quantification of the relative rigor of those standards; the evaluation of school or teacher effectiveness using so-called value-added models; and the policy evaluation of school reform efforts (such as charter schools) using data from large-scale cross-sectional surveys. The latter two topics both involve causal inferences from observational studies. Credits: 3

Multilevel Regression Models O'Dwyer, Laura
Spring 2022
This course introduces students to multilevel regression modeling (aka hierarchical models or mixed effects models) for analyzing data with a nesting or hierarchical structure. We discuss the appropriate uses of multilevel regression modeling, the statistical models that underpin the approach, and how to construct models to address substantive issues. We consider a variety of types of models, including random intercept, and random slope and intercept models; models for longitudinal data; and models for discrete outcomes. We cover various issues related to the design of multilevel studies, model building and the interpretation of the output from HLM and SPSS software programs. Credits: 3

EDUC620101 Contemporary African American Children's and Young Adult Literature DEPT
Summer 2021
African American writers and scholars began writing specifically for African American children in the early 1900s. They understood the impact literature had on building a positive self-identity for African American children as well as accurately teaching them African American history. This tradition of writing for African American children by African American authors continues. This course will introduce students to contemporary children’s and young adult literature written by African American authors. The literature will be situated in the historical context in which it was produced to build a better understanding of the themes and lessons presented in the text. Through discussion and written reflections, students will develop a deeper understanding of the presence and significance of African American children and young adult literature.

EDUC630801 Curriculum Theories, Practice, and Design Peters, William D Summer 2021
The overarching objective for Curriculum Theories and Practice is to help course participants develop and clarify their philosophy of education, in particular, their beliefs regarding the purposes and processes of effective and equitable curriculum organization. To do so, the class explores varied ways of conceptualizing a school curriculum, drawing on insights from major curriculum designers, both past and present, U.S. and international. Students appreciate the ever-evolving nature of effective teaching practices and related school curricula, they will assess their own experiences with educational and institutional change processes writ large. Aiming to help course participants thrive in the current, volatile educational and political climate, students will consider various approaches to multicultural education, anti-racist education, and inclusion practices that aim to transform the curriculum, attending to the needs of all students and overtly promoting equitable outcomes. In doing so, students will enact alternative strategies for assessment that provide multiple and authentic measures of student learning. Ultimately the course intends to help students consider how school curricula can be structured to promote social justice.

What kinds of education are most needed for a world characterized by spiraling political polarization, increasing economic interdependence, rapid climate change, and a global pandemic like COVID-19? This online course will introduce students to contemporary debates about how educators should teach, what students should learn, and how schools should interact with society. The course is global in scope and will require in-depth study of country cases and failed and successful models of change. International students and U.S. students curious about other countries’ approaches to education are strongly encouraged to enroll.
Preparing the Whole Person for Global Citizenship Kim, Min Jung Summer 2021
This course is for graduate students and upper-level undergraduates who are interested in the fields of education and psychology. Child Growth and Development Lu, Lixi
Fall 2021
First part of a two-course sequence (APSY1030 - APSY1031) designed to introduce students to the multiple dimensions of child development, and the place of education in promoting healthy development for all children. This course acquaints students with multiple processes of child development, including physical, social, cognitive, linguistic, and emotional development from birth through adolescence. Both typical and atypical patterns of development will be examined. Students discuss and analyze classic theories, contemporary issues, and key research in child development in view of their application to educational and other applied settings.

The Educational Conversation Higgins, Christopher R Fall 2021
What does it mean to be an educated person? At first, we must defer to the answers of others. Over time, we become curious about our formation. What does all of this schooling add up to? How do all of my influences beyond school fit together? We realize that it is time to take responsibility for our own education, to reflect on what it is admirable to become, to locate resources for self-cultivation, and to integrate them into a life worth living. But this is not solitary work. Together we will consider a range of rich, rival conceptions of what it means to be educated. In this way, you will be invited to join one of the oldest and richest dialogues, the educational conversation.

EDUC105101
Reimagining School and Society Peters, William D Fall 2021
Schooling as we understand it dates to the early nineteenth century, born of and contributing to a period of rapid social change marked by the spread of literacy, the rise of the nation state, and the advent of industrialization. Schooling remains one of the most powerful educational tools ever invented, but how well does it equip us to confront the educational task of today? How will education, in and out of school, need to evolve in light of new technologies and media ecologies, global interconnectedness, health crises, mass migrations, surges of xenophobia, entrenched inequality, climate emergency, and the new “post-truth” political condition?

Teaching, Curriculum, and Learning Environments: Global Perspectives Shirley, Dennis L
Fall 2021
What kinds of education are most needed for a world characterized by spiraling political polarization, increasing economic interdependence, rapid climate change, and a global pandemic like COVID-19? This online course will introduce students to contemporary debates about how educators should teach, what students should learn, and how schools should interact with society. The course is global in scope and will require in-depth study of country cases and failed and successful models of change. International students and U.S. students curious about other countries' approaches to education are strongly encouraged to enroll.

Learning and Curriculum in the Elementary School Homza, Anne E
Fall 2021
Students must be registered for EDUC2151 and arrange their schedules to be on-site in a school Tuesday or Thursday. Introduces students to the profession of education and roles of teachers. Provides understanding of contexts in which education is delivered in multicultural settings and opportunity to gain knowledge and experience about interpersonal, observational, and organization skills that underlie teaching. Faculty and students work together throughout course to examine students' commitment to and readiness for career as a teacher. Introduces essentials of curriculum, teaching, and managing classrooms at elementary (K-6) level and links them to major learning theories for children. Views curriculum, instruction, management, and learning theory from perspectives of current school reform movement and social/cultural changes affecting elementary classrooms and schools.

Teaching Language Arts Merlino, Michele M
Fall 2021
Focuses on the teaching and learning of language arts in the elementary grades. Students will be exposed to theoretical approaches to both oral and written language development in addition to teaching methods that support development. In the fall semester, content and approaches related to teaching in English/Spanish bilingual programs will be included. Students will have the opportunity to apply their learning through practical lesson development, and implementation in connection to their pre-practicum placement. Student diversity and its implications for teaching language arts will be an integral theme. Students will draw on their experiences in their prepractica to apply and reflect on learning as they mediate theory and practice.

Teaching Reading Dunn, Lori A
Fall 2021
This course is designed to offer preservice teachers theoretical and practical knowledge and experience into teaching literacy to elementary age students. Emphasis will be placed on the social, political, and cultural context of reading instruction. Students will gain understanding of major theoretical perspectives on literacy development and the myriad strategies for teaching reading in a variety of contexts. Students will also be expected to spend time in a context where they can gain experiences in providing reading instruction in a relevant and productive way.

EDUC210801
Teaching Mathematics and Technology Sohn, Sheila
Fall 2021
This course presents methods and materials useful in teaching mathematics to elementary school children. It analyzes mathematics content and pedagogy from both conceptual and practical perspectives. Emphasis is placed on the interconnections among theory, procedures, and applications that form the framework on which specific mathematics lessons are constructed. It examines the elementary mathematics curriculum through technology resources, addressing the different ways in which technology can be used. Activities include laboratory experiences with concrete models and technology as well as inquiry into the role of the teacher in the school community in the epoch of teaching for social justice.

EDUC210901
Teaching About the Natural World McNeill, Katherine L
Fall 2021
This course is designed to increase confidence, enthusiasm, and knowledge for teaching elementary science. Science can be an essential part of an elementary classroom not only to achieve key science learning goals, but also as a means to engage and motivate students as well as support literacy and mathematics learning. An overarching focus of the course is on the idea that science is a “practice” that includes specific ways of reasoning, communicating, and acting. The course is also designed in partnership with the afterschool program at Gardner Pilot Academy in BPS. For eight weeks during the course, undergraduates will work with elementary students to teach them science and to reflect on how to design more effective science lessons.

EDUC220801 Educational Strategies: Children with Special Needs Scanlon, David Fall 2021
This course provides instruction to pre-service teachers interested in learning more about instruction, curriculum, and teaching for children with special needs, with a framework highlighting important educational issues pertinent to their professional development and the realities of teaching. The course emphasizes the complexities of teaching children with individual learning profiles in inclusive settings. Students will examine educational readings and instructional practices through the lenses of curriculum, author voice, and academic tension. Class participants will develop a comprehensive understanding of the historical, legal, and political developments influencing current general and special education practices.

Practicum for Lynch School Students Hodge, Zina S;Ryan, Amy Fall 2021
A semester-long, full-time, five day a week practicum experience designed to meet the Massachusetts Department of Elementary and Secondary Educations requirements for endorsement from Boston College. Students will be guided by a qualified school-based mentor (Supervising Practitioner) and a university-based mentor (Program Supervisor). In addition to registering for the course, students must complete the online application (https://bc.us.inplacetosoftware.com/student) during the semester preceding the placement by April 15 for fall placements and December 1 for spring placements. Contact the Office of Field Placement and Partnership Outreach at prac@bc.edu for more information. For Lynch School undergraduate students only; Department permission required after August/December 15.
Credits: 12
Room and Schedule: BY ARRANGEMENT Satisfies Core Requirement: None Prerequisites: EDUC153 or Approval by the Office of Field Placement, good academic standing (grade point average of 2.5 or higher), and successful completion of all pre-practicum teacher education requirements and courses.

EDUC436001
Inclusive Education Field Observation Scanlon, David Fall 2021
Open to undergraduate majors in the Morrissey College of Arts and Sciences, the Inclusive Education Minor is offered in the LSOE. The minor is designed to (1) introduce Morrissey College of Arts and Sciences students to the world of disabilities and special education with an emphasis on special education practice, and (2) enhance the ability of future professionals to meet the needs of increasingly diverse school populations. Classes address the nature and implications of disabilities and effective practices in special education. The minor consists of six courses and a zero-credit field observation. Appropriate for those considering a career or further studies in education.

EDUC630801
Curriculum Theories, Practice, and Design Lee, Jeun
Fall 2021
The overarching objective for Curriculum Theories and Practice is to help course participants develop and clarify their philosophy of education, in particular, their beliefs regarding the purposes and processes of effective and equitable curricular organization. To do so, the class explores varied ways of conceptualizing a school curriculum, drawing on insights from major curriculum designers, both past and present, U.S. and international. So students appreciate the ever-evolving nature of effective teaching practices and related school curricula, they will assess their own experiences with educational and institutional change processes writ large. Aiming to help course participants to thrive in the current, volatile educational and political climate, students will consider various approaches to multicultural education, anti-racist education, and inclusion practices that aim to transform the curriculum, attending to the needs of all students and overtly promoting equitable outcomes. In doing so, students will enact alternative strategies for assessment that provide multiple and authentic measures of student learning. Ultimately the course intends to help students consider how school curricula can be structured to promote social justice.

Assessment of Students with Extensive Support Needs Bruce, Susan
Fall 2021
Pre-practicum required (25 hours). This course addresses formal and informal assessment of students with intensive needs. Students will become familiar with assessments driven by both the developmental and functional paradigms. All assessment activities will be founded on the principle that appropriate assessment goes beyond the student to include consideration of the student’s multiple contexts. This course also addresses the IEP, the legal mandates behind the process, and the collaborative role of the teacher, as part of the educational team, during the assessment and report writing processes.

EDUC713101
Social Justice in Jesuit Contexts Casalini, Cristiano
Fall 2021
This is a Graduate-level on-line course. The Social Apostolate of the Society of Jesus has developed in a variety of ways over the centuries according to the diverse contexts where Jesuits have operated as agents of "social justice." This class offers students both a broad and deep understanding of: (1) How the Society of Jesus developed its mission in support of creating a "preferential option for the poor"; (2) How the Society understood its role to promote liberation from oppression in diverse social environments; (3) What kind of services have been activated by the Society of Jesus in order to fulfill its core values of "the service of faith and promotion of justice"; and (4) How social justice is pursued through pedagogy and practices by Jesuit and Ignatian schools today, given the significant involvement of the Jesuits with formal education on a global scale. The course is designed to foster deep and meaningful conversation among students. It will include individual and collective readings and video-conferences with leaders and teachers of Jesuit schools around the world, deepening students' knowledge of current practices and stimulating dialogue.

EDUC715901
A History of The Jesuits Meehan, Seth M
Fall 2021
This is a Graduate-level on-line course. For nearly five centuries, the Society of Jesus has been one of the most successful and, at times, most controversial religious orders in the Catholic Church. A History of the Jesuits offers an introductory survey to this rich and varied past with particular attention, following the Jesuits' suppression in 1773, to various enterprises and enterprisers in the Americas. The course seeks to answer these questions: What have been the characteristics of the Society of Jesus and its associated works? And how and why have those characteristics remained the same or changed? Complementing the other courses in the Certificate program, the course traces the development, expansion, suppression, restoration, and recent developments of the Society of Jesus by closely examining the historical contributions of significant Jesuits.

EDUC723102
Accessible and Inclusive Design Francis, Heather
Fall 2021
This survey course focuses on practical considerations regarding inclusive and accessible design. The focus is around guiding principles and key content that learners and designers can apply to their particular area of design. Particular focus is paid to understanding the functional barriers that individuals with disabilities might encounter, how these barriers can be addressed proactively, and why retrofitting designs can be costly and ineffective. After a general introduction to some of the guiding ideas behind inclusivity and accessibility, both Universal Design for Learning (UDL) and accessibility are discussed to provide practical paths towards design that is ultimately more effective for all learners.

Teaching, Curriculum, and Learning Environments: Global Perspectives Shirkey, Dennis L Fall 2021
What kinds of education are most needed for a world characterized by spiraling political polarization, increasing economic interdependence, rapid climate change, and a global pandemic like COVID-19? This online course will introduce students to contemporary debates about how educators should teach, what students should learn, and how schools should interact with society. The course is global in scope and will require in-depth study of country cases and failed and successful models of change. International students and U.S. students curious about other countries' approaches to education are strongly encouraged to enroll.

EDUC730201 Models and Theories of Instructional Design Jackson, Richard Fall 2021 Now well into the twenty-first century, schools struggle with the challenge of offering a high quality education for all learners regardless of race, family status, national origin, language, or ability. Increasingly, curriculum is accessed digitally and student work is generated and exhibited using technology tools. The once familiar artifacts of classrooms are rapidly giving way to radically new forms of teaching and learning. Within this context of change, this course reviews the evolution of theories of learning and instruction and then critically examines a range of contemporary models and theoretical frameworks. Learning activities in the course will allow participants to develop their own personalized framework for planning and implementing instruction.

EDUC730301 Curriculum Theories, Practice, and Design Lee, Juen Fall 2021 The overarching objective for Curriculum Theories and Practice is to help course participants develop and clarify their philosophy of education, in particular, their beliefs regarding the purposes and processes of effective and equitable curricular organization. To do so, the class explores varied ways of conceptualizing a school curriculum, drawing on insights from major curriculum designers, both past and present, U.S. and international. So students appreciate the ever-evolving nature of effective teaching practices and related school curricula, they will assess their own experiences with educational and institutional change processes writ large. Aiming to help course participants to thrive in the current, volatile educational and political climate, students will consider various approaches to multicultural education, anti-racist education, and inclusion practices that aim to transform the curriculum, attending to the needs of all students and overtly promoting equitable outcomes. In doing so, students will enact alternative strategies for assessment that provide multiple and authentic measures of student learning. Ultimately the course intends to help students consider how school curricula can be structured to promote social justice.

EDUC730401 Family and Community Engagement Asselin, Chloe Fall 2021 The purpose of this course is to introduce participants to theories, practices, and empirical research regarding family and community engagement in schools. The focus is on how school leaders—formal and informal—enact organizational models, educational programs, and political strategies that increase authentic relationships with parents and community members. Topics of study will include community schools/full service schools, parent involvement models, involvement of diverse families, grassroots organizing for community development, afterschool and community-based education, and school board/community relations. Direct participation in inquiry into school-community activities conducted on-site in schools and neighborhoods will be requirement of the course.

Supervision in Action
Assigned, Dept:Cownie, Charles T Fall 2021

This course is designed as an introduction to research-based clinical supervision models in teacher education. Hands-on application in action includes observational strategies, collaborative assessment logs, and summative reports as resources for ongoing data collection. Course participants acquire and then apply the Massachusetts Department of Education Pre-service Performance Assessment rubric for coaching and evaluating student teachers, integrating the BC Teacher Education themes that emphasize teaching for equity and social justice. This course is restricted to cooperating teachers in BC Partnership Schools who are supervising a BC student teacher in a full-time practica and to new BC Clinical Faculty.

EDUC743001
Advanced Graduate Inquiry Seminar Davis, Cheryl J Fall 2021

This course is designed for the Lynch School Fifth Year Program students who have successfully completed a licensure program at Boston College. It is designed to build on teacher candidates' experiences with inquiry as stance and expand their skills in conducting classroom-based research that leads to pupil achievement and teaching for social justice in their new license area. The hybrid course is online with one class meeting. A case-study approach is used to help teacher candidates mediate the relationships of theory and practice, pose questions for inquiry, learn through reflection and discussion, learn from experiences with students and colleagues, construct critical perspectives about teaching, learning, and schooling, and to improve teaching and learning. The second part of this sequence is EDUC7432 which is taken in conjunction with full-time student teaching (EDUC7420).

Teaching Narrative Writing to K-8 Students Brisk, Maria E
Fall 2021
This is a project-based course where groups of participants will collaborate to develop a writing unit in a genre appropriate for their grade level. Using a genre-based pedagogy informed by systemic functional linguistics, participants will learn what and how to teach non-fiction narratives (Personal and procedural recounts, autobiographies, biographies, empathetic autobiographies, and historical recounts) and fictional narratives. Features of the genres demanded in elementary and middle schools will be learned and practiced. The strong emphasis on language development distinguishes this approach from others currently used in schools. The approach to teaching guides teachers in ways of apprenticing students to writing that builds confidence and success.

EDUC891202 Participatory Action Research: Gender, Race, Power DEPT Fall 2021 This graduate seminar introduces students to theoretical and practical issues in the design and implementation of community- and school-based participatory and action research, including a review of theories and practices that have contributed to community-based knowledge construction and social change policies and processes. Ethnographic, narrative, oral history, and visual methodologies are additional resources for understanding and representing the individual and collective stories co-constructed through the research process. Students participate in a community-based collaborative undoing racism workshop and have opportunities for ongoing collaborative work on a site. We reflect collaboratively and contextually on multiple and complex constructions of "gender," "race," and social class in and through these research processes. OPEN TO ALL Ph.D. STUDENTS. MASTER'S LEVEL STUDENTS REQUIRE PERMISSION OF THE INSTRUCTOR.
Credits: 3
Room and Schedule: None Satisfies Core Requirement: None
Prerequisites: Restricted to Ph.D. students. Master's students must get permission from the instructor.

EDUC970901 Research on Teaching Demers, Kelly E Fall 2021 Introduce Ph.D. students to conceptual and empirical scholarship about teaching and teacher education as well as to contrasting paradigms and methodological approaches upon which this literature is based. Helps students become aware of major substantive areas in the field of research on teaching/teacher education, develop critical perspectives and questions on contrasting paradigms, and raise questions about implications of this research for curriculum and instruction, policy and practice, and teacher education/professional development. Considers issues related to epistemology, methodology, and ethics.

EDUC973701 Contemp Issues: Complexity Theories in Practice McQuillan, Patrick J Fall 2021 Everything in made up for systems and everything constitutes aspects of other systems. In brief, systems are everywhere. This systemic view is compelling, as nothing stands alone. To understand those connections is to understand how many features of the world studied by educational researchers constitute systemic relationships and complexity theories offers a lens for understanding how systems operate. With the potential of this focus in mind, this course aims to support students in developing an understanding of the analytic power of complexity theories so they can draw on this analytic framework to enrich their own research. Advanced undergraduate students may take course with Undergraduate Dean's permission.

EDUC986401 Advanced Qualitative Research DEPT Fall 2021 Building upon the foundation concepts of qualitative research and initial exploration of an introductory course in qualitative methodologies, this course explores the theoretical, methodological, and analytic implications of conducting qualitative research from differing theoretical perspectives. Key readings include texts on social theory, qualitative methodologies, and exemplar qualitative research from various social scientific fields. Students will distinguish between methodology and methods, analyze data, and produce either a report for a specified audience or a research manuscript for possible submission to an educational research journal.

Teacher Education and Curriculum and Instruction Courses: Spring 2022
EDUC103001
Child Growth and Development MacEvoy, Julie P Spring 2022
First part of a two-course sequence (APSY1030 - APSY1031) designed to introduce students to the multiple dimensions of child development, and the place of education in promoting healthy development for all children. This course acquaints students with multiple processes of child development, including physical, social, cognitive, linguistic, and emotional development from birth through adolescence. Both typical and atypical patterns of development will be examined. Students discuss and analyze classic theories, contemporary issues, and key research in child development in view of their application to educational and other applied settings.
Credits: 3
Room and Schedule: Mcguinn Hall 121 TuTh 09:00AM-10:15AM Satisfies Core Requirement: Social Science Prerequisites: None

EDUC105001
The Educational Conversation Casalini, Cristiano
Spring 2022
What does it mean to be an educated person? At first, we must defer to the answers of others. Over time, we become curious about our formation. What does all of this schooling add up to? How do all of my influences beyond school fit together? We realize that it is time to take responsibility for our own education, to reflect on what it is admirable to become, to locate resources for self-cultivation, and to integrate them into a life worth living. But this is not solitary work. Together we will consider a range of rich, rival conceptions of what it means to be educated. In this way, you will be invited to join one of the oldest and richest dialogues, the educational conversation.

Reimagining School and Society Alexander, Jeremy;Higgins, Christopher R Spring 2022
Schooling as we understand it dates to the early nineteenth century, born of and contributing to a period of rapid social change marked by the spread of literacy, the rise of the nation state, and the advent of industrialization. Schooling remains one of the most powerful educational tools ever invented, but how well does it equip us to confront the educational task of today? How will education, in and out of school, need to evolve in light of new technologies and media ecologies, global interconnectedness, health crises, mass migrations, surges of xenophobia, entrenched inequality, climate emergency, and the new "post-truth" political condition?

Learning and Curriculum in the Elementary School Homza, Anne E Spring 2022
Students must be registered for EDUC2151 and arrange their schedules to be on-site in a school Tuesday or Thursday. Introduces students to the profession of education and roles of teachers. Provides understanding of contexts in which education is delivered in multicultural settings and opportunities to gain knowledge and experience about interpersonal, observational, and organization skills that underlie teaching. Faculty and students work together throughout course to examine students' commitment to and readiness for career as a teacher. Introduces essentials of curriculum, teaching, and managing classrooms at elementary (K-6) level and links them to major learning theories for children. Views curriculum, instruction, management, and learning theory from perspectives of current school reform movement and social/cultural changes affecting elementary classrooms and schools.

Teaching Language Arts Merlino, Michele M Spring 2022
Focuses on the teaching and learning of language arts in the elementary grades. Students will be exposed to theoretical approaches to both oral and written language development in addition to teaching methods that support development. In the fall semester, content and approaches related to teaching in English/Spanish bilingual programs will be included. Students will have the opportunity to apply their learning through practical lesson development, and implementation in connection to their pre-practicum placement. Student diversity and its implications for teaching language arts will be an integral theme. Students will draw on their experiences in their prepractica to apply and reflect on learning as they meditate theory and practice.

Teaching Reading Corbitt, Alexander P Spring 2022
This course is designed to offer preservice teachers theoretical and practical knowledge and experience into teaching literacy to elementary age students. Emphasis will be placed on the social, political, and cultural context of reading instruction. Students will gain understanding of major theoretical perspectives on literacy development and the myriad strategies for teaching reading in a variety of contexts. Students will also be expected to spend time in a context where they can gain experiences in providing reading instruction in a relevant and productive way.

Teaching Mathematics and Technology Son, Kyunghoon Spring 2022
This course presents methods and materials useful in teaching mathematics to elementary school children. It analyzes mathematics content and pedagogy from both conceptual and practical perspectives. Emphasis is placed on the interconnections among theory, procedures, and applications that form the framework on which specific mathematics lessons are constructed. It examines the elementary mathematics curriculum through technology resources, addressing the different ways in which technology can be used. Activities include laboratory experiences with concrete models and technology as well as inquiry into the role of the teacher in the school community in the epoch of teaching for social justice.

EDUC210901
Teaching About the Natural World Lee, Samuel Spring 2022
This course is designed to increase confidence, enthusiasm, and knowledge for teaching elementary science. Science can be an essential part of an elementary classroom not only to achieve key science learning goals, but also as a means to engage and motivate students as well as support literacy and mathematics learning. An overarching focus of the course is on the idea that science is a "practice" that includes specific ways of reasoning, communicating, and acting. The course is also designed in partnership with the afterschool program at Gardner Pilot Academy in BPS. For eight weeks during the course, undergraduates will work with elementary students to teach them science and to reflect on how to design more effective science lessons.

Secondary Curriculum and Instruction Oliver, Marisa E Spring 2022
This course provides an introduction to secondary teaching practices as well as an overview of the history and structure of secondary schools. Topics include curriculum theory and development, interdisciplinary teaching, teaching students with diverse learning abilities, application of educational research, assessment, national standards, and alternative models for secondary schools. Focuses on the role of the teacher in secondary education reform. Taught on-site and in conjunction with secondary education teacher candidates' first practicum experience, this course offers a unique opportunity for a cohort experience in which preservice teachers work closely with each other, high school faculty, the instructor, and urban students.

Language Learners in Global Perspective DEPT
Spring 2022
This course provides an overview of language learning as a process, language learning in global contexts, and the experiences of second language learners in schools. We will hear from experts at BC and around the world, learning about current trends in and contexts for language learning. There are several central themes that will recur during this course, including: examining theories of learning, with a focus on language learning and language acquisition; the experiences of bilingual learners and bilingual education; language learning and technology in the twenty-first century, including issues of multimodal literacy and digital storytelling; and connections between language learning and identity formation. While interacting with and reading work by experts in the field, we will discuss both local and global settings, exploring how language learning affects heritage language revitalization, bilingualism, indigenous communities, and others. We will discuss how language learning is never a neutral process, but instead happens in social contexts and inevitably shapes identities. We will learn how to facilitate language learning in ways that promote justice, increase empathy, and meet the needs of diverse students. Throughout, we will take a global perspective and consider language learning from multiple points of view.

Reading Difference Differently: Issues of Gender(s) and Sexualities in Youth Literature and Media
Wargo, Jon M Spring 2022
With a particular emphasis on issues of gender and sexuality, this class interrogates how contemporary youth literature and media (texts by and about young people) shape and organize difference differently. Examining how textual understandings of youth, gender, and sexuality intersect with other domains of identity (e.g., race, ability, religion), this course explores how criticism, circulation, and reception of innovative storytelling advance new ways to understand childhood and the young adult.

Bilingualism in Schools and Communities Andrade Gonzalez, Paulette R Spring 2022
Successful completion of the courses EDUC 3308 and EDUC 3346 entitles students to receive the Teaching English Language Learners (TELL) certificate from the Lynch School of Education; this course is also part of the Foundation in Education Minor and the Immigration, Education and Humanitarian Studies Minor at Lynch. The goal of this course is to prepare students to participate in increasingly multilingual and multicultural environments in order to better serve bilingual students, families, and communities. Building on theory, research, and practice from the fields of bilingualism, second language acquisition, and education, students will learn about the process of language and literacy development in children and adolescents who are exposed to more than one language, and the social and cultural contexts in which this development occurs. Through the use of case studies and school profiles, students will deepen their understanding of issues in bilingualism and bilingual education. Students will also have an opportunity to build cultural competence skills by learning about diverse communities in the U.S.

EDUC405001
The Art of Educational Inquiry Ha, Samantha Spring 2022
While education and educational research are often seen as separate activities, transformative education holds that the quest to form ourselves entails asking questions about the nature and direction of our growth. Inquiry is simultaneously an effort to understand, a social intervention, and an art of self-fashioning. This seminar invites students into the art of educational inquiry. Through examination of paradigmatic texts and visits from Lynch faculty members describing their own work, we consider the affordances of major traditions of educational inquiry. Working toward a formal proposal for a scholarly investigation, artistic creation, or public action, students are supported to articulate, deepen, and refine their own driving questions about educational concepts, relationships, practices, institutions, and aims. (Students who take EDUC 4050 in their junior year may wish to develop the work itself as a senior project.)

EDUC423101 Senior Inquiry Seminar
Homza, Anne E; Peters, William D Spring 2022
This capstone inquiry seminar requires teacher candidates to continue to develop an inquiry stance in their practice through the systematic analysis of teaching and learning in their classroom experiences. Grounded in a theory of teacher education for social justice that encourages practitioners to challenge educational inequities by inquiring into practice, this course advances teacher candidates’ skills in planning, delivering, assessing, and analyzing instruction that promotes pupil learning and enhances their life-chances.

EDUC425001 Practicum for Lynch School Students Hodge, Zina S; Ryan, Amy
Spring 2022
A semester-long, full-time, five day a week practicum experience designed to meet the Massachusetts Department of Elementary and Secondary Education's requirements for endorsement from Boston College. Students will be guided by a qualified school-based mentor (Supervising Practitioner) and a university-based mentor (Program Supervisor). In addition to registering for the course, students must complete the online application (https://bcs.inplacesoftware.com/student) during the semester preceding the placement by April 15 for fall placements and December 1 for spring placements. Contact the Office of Field Placement and Partnership Outreach at prac@bc.edu for more information. For Lynch School undergraduate students only; Department permission required after August/December 15.
Credits: 12
Room and Schedule: BY ARRANGEMENT Satisfies Core Requirement: None
Prerequisites: EDUC3153 or Approval by the Office of Field Placement, good academic standing (grade point average of 2.5 or higher), and successful completion of all pre-practicum teacher education requirements and courses.

EDUC436001 Inclusive Education Field Observation Scanlan, David
Spring 2022
Open to undergraduate majors in the Morrissey College of Arts and Sciences, the Inclusive Education Minor is offered in the LSOE. The minor is designed to (1) introduce Morrissey College of Arts and Sciences students to the world of disabilities and special education with an emphasis on special education practice, and (2) enhance the ability of future professionals to meet the needs of increasingly diverse school populations. Classes address the nature and implications of disabilities and effective practices in special education. The minor consists of six courses and a zero-credit field observation. Appropriate for those considering a career or further studies in education.

EDUC610103 Art and Music in Early Childhood Education Paez, Mariela M Spring 2022 The main purpose of this course is to encourage early childhood educators to embrace the unique characteristics of young children's artistic and musical expression and appreciation of these experiences. By providing a foundational knowledge of young children's creative thinking and aesthetic development, the course will teach you how to apply effective pedagogical strategies in teaching art and music and how to integrate art and music across the early childhood curriculum. Students will learn how to bridge theory and practice through various readings, recorded lectures, and classroom experiences. At the end of this course, you will be able to plan effective process-focused art and music lessons, use various materials and medium for artistic and musical expression, maximize the potential of your classroom resources, and use art and music to promote multiculturalism, diversity, and enhance family involvement.

EDUC610201 Science Playing and Learning in the Early Childhood Classroom Paez, Mariela M Spring 2022 This course is designed to encourage and prepare early childhood educators for planning and implementing engaging and developmentally appropriate science learning experiences (Pre-K-2nd grade). An overarching focus of the course is instilling in students an appreciation for the wonder of science and the world around them. The course is divided into three science content areas: Earth and Space Sciences, Life Sciences, and Physical Sciences. Students will learn how to connect their teaching with new science, technology, and engineering standards. Through interactive activities and discussions including the review of video, science lessons, and research in science education, we will explore key elements and challenges of science teaching and provide a foundation for supporting science learning in the early childhood classroom.

EDUC630701 Teachers and Educational Reform McQuillan, Patrick J Spring 2022 Issues of school reform are constantly in the media—high-stakes testing, charter schools, the Common Core. At the heart of these reforms are teachers and the work they do with students in their classrooms. In this course, students look in-depth at the nature of teaching and learning in schools and classrooms. In particular, the course attends to issues and practices linked to current efforts at educational reform, approaching these matters through active inquiry and experiential enactment of such practices. Focused reflection is also a central component of this class.

EDUC630801 Curriculum Theories, Practice, and Design Asante, Christian K Spring 2022 The overarching objective for Curriculum Theories and Practice is to help course participants develop and clarify their philosophy of education, in particular, their beliefs regarding the purposes and processes of effective and equitable curricular organization. To do so, the class explores varied ways of conceptualizing a school curriculum, drawing on insights from major curriculum designers, both past and present, U.S. and international. So students appreciate the ever-evolving nature of effective teaching practices and related school curricula, they will assess their own experiences with educational and institutional change processes writ large. Aiming to help course participants to thrive in the current, volatile educational and political climate, students will consider various approaches to multicultural education, anti-racist education, and inclusion practices that aim to transform the curriculum, attending to the needs of all students and overtly promoting equitable outcomes. In doing so, students will enact alternative strategies for assessment that provide multiple and authentic measures of student learning. Ultimately the course intends to help students consider how school curricula can be structured to promote social justice.

EDUC631601 Developmentally Appropriate Curriculum in Early Childhood Education Cristello, Karen M Spring 2022 This course focuses on the development and implementation of curriculum in early education. The Massachusetts Guidelines for Preschool Learning Experiences and the national standards for developmentally appropriate practices will be utilized throughout the semester. This course will highlight each of the curriculum domains (language/literacy, mathematics, science and technology, social studies, health, and the arts) while demonstrating how to build an integrated curriculum in an early childhood classroom. The importance and value of play in the early years will be emphasized, and strategies will be shared to help teacher candidates document student learning.

EDUC637301
Classroom Management Cass, Richard J
Spring 2022
ED201 is now EDUC6373. Focuses on observation and description of learning behaviors, with emphasis on examining the relationship of teacher behavior and student motivation. Prepares teachers to analyze behavior in the context of a regular classroom setting that serves moderate special needs students and to select, organize, plan, and promote developmentally appropriate behavior management strategies that support positive learning. Also considers theoretical models of discipline and classroom management strategies, and requires students to propose and develop a rationale for selection of specific techniques for specific classroom behaviors.

EDUC638401
Teaching Strategies for Students with Low Incidence Multiple Disabilities Bruce, Susan
Spring 2022
Pre-practicum required (25 hours). This course is designed to assist the special educator in acquiring and developing both the background knowledge and practical skills involved in teaching individuals who have severe or multiple disabilities. The areas of systematic instruction, communication, gross motor, fine motor, community and school functioning, collaboration, functional and age-appropriate programming are emphasized. The role of the educator as developer of curriculum, instructor, and in the transdisciplinary team are included. The students should be prepared to participate in a one-day per-week field placement.

EDUC654001
Ed Implications/Sensory, Motor, and Health Impairments Miller, Thomas
Spring 2022
This course addresses the impact of physical disabilities on learning. Emphasis is placed on the educational needs of children with cerebral palsy, visual impairment, or hearing loss in combination with intellectual disability. Basic anatomy of the eye and ear are covered along with the common causes of vision and hearing loss. This course prepares teachers to perform functional vision and hearing evaluations and to translate those findings into appropriate classroom accommodations and adaptations. Many children with disabilities have unmet sensory integration needs that influence their behavior and subsequent readiness to learn.

EDUC659801
Teaching and Learning Strategies - Moderate Support Needs Scanlon, David
Spring 2022
Not open to non-degree students. EDUC6598 is intended for general educators and EDUC6588 is required for special educators This course is intended to help prospective and experienced special education teachers and other educators a repertoire of skills for teaching students with mild/moderate (high incidence) educational disabilities. Participants will accomplish this goal by making connections among their knowledge of disabilities, special education policy and practices, assessments, education theory, and teaching methods. Students will learn how to develop, implement, and monitor individualized education programs, implement research-based effective intervention practices, and collaborate with others to meet the needs of special education students in inclusive and other educational settings. Successful students will have familiarity and competency with a variety of special education procedures and teaching approaches and specific practices. Appropriate for both elementary and secondary level education. Class sessions will routinely include time to practice skills being learned. Prerequisites EDUC7579

EDUC665801
Teaching and Learning Strategies for Inclusive Secondary Educators Scanlon, David
Spring 2022
Designed primarily for elementary and secondary education teacher candidates and practicing educators, this course helps them develop an initial repertoire of skills for teaching students with educational disabilities. The primary emphasis of this course is on the education of students with mild/moderate disabilities in inclusive classrooms. Participants will learn to develop comprehensive instructional plans fully inclusive of students with educational disabilities, utilize an IEP to guide instruction, develop accommodations and modifications appropriate to students and the curriculum, design individual, small, and large group instructions, and evaluate various service delivery options for educating students with special needs.

EDUC662801
Computer Applications for Educators Kinder, T S
Spring 2022
This is not a course in computer programming. Alternates every other spring with EDUC1128. (EDUC6628 is for graduate students only). Explores the role of emerging technologies in the context of schools. Course is theoretically grounded in the Project-Based Learning literature. Assignments are hands-on, with emphasis placed on producing tangible artifacts that will serve a practical need. Specifically, students will develop PowerPoint presentations to evaluate educational software and web-based curricular materials. Also, each student will develop a website featuring his or her teaching portfolio. Course appropriate for all computer skill levels.
EDUC667001
Teaching Mathematical Problem Solving in Grades 4-12 Albert, Lillie
Spring 2022
This course examines complex issues, trends, and research regarding alternative approaches for teaching mathematical problem solving. Topics include the nature of mathematical inquiry; models for collaborative group work; methods and materials for cultivating problem solving, reasoning, and communication processes; methods of assessing mathematical problem solving; and the impact of Vygotsky’s Psychology on the teaching and learning of mathematical problem solving.

EDUC713201
Discernment and Prayer in the Spiritual Exercises of St. Ignatius Geger, Barton T
Spring 2022
This is a Graduate level online course. A study of the spiritual doctrine of St. Ignatius Loyola as articulated in the text of the Spiritual Exercises, but with reference to other texts such as Ignatius’ Testament, letters, and the Constitutions of the Society of Jesus. The focus is how Ignatius’ treatment of prayer, discernment of spirits, and discernment of God’s will, work together to form a “contemplative in action.”

EDUC715801
Jesuit Pedagogy Casalin, Cristiano
Spring 2022
This is an online course. This three-credit, graduate-level online course examines the distinctiveness of the Jesuits’ approaches to teaching and of their philosophy of education that have propelled their schools to unprecedented success over the centuries. One key to the unprecedented success of Jesuit education has been the tension between the recognizable mark of uniformity that long distinguished the methods, contents, and practices of Jesuit schools and their ability to adapt to different contexts and times. Both aspects—the uniformity and the adaptability—were explicitly supported by the “Ratio studiorum,” the Jesuits’ foundational plan of studies issued in 1599, which, despite the schools’ many variations and complexities, has retained some influence over time. With the "Ratio" discarded, Jesuit schools had to clarify what made them distinctively Jesuit, reconciling their mission with the contemporary world. This three-credit, graduate-level class sketches the developments of Jesuit educational endeavors by focusing on both the permanent and changing traits of its distinctive pedagogy.

Teaching, Curriculum, and Learning Environments: Global Perspectives
Shirley, Dennis L
Spring 2022

What kinds of media are most needed for a world characterized by spiralling political polarization, increasing economic interdependence, rapid climate change, and a global pandemic like COVID-19? This online course will introduce students to contemporary debates about how educators should teach, what students should learn, and how schools should interact with society. The course is global in scope and will require in-depth study of country cases and failed and successful models of change. International students and U.S. students curious about other countries' approaches to education are strongly encouraged to enroll. Credits: 3

Models and Theories of Instructional Design
Jackson, Richard
Spring 2022

Now well into the twenty-first century, schools struggle with the challenge of offering a high quality education for all learners regardless of race, family status, national origin, language, or ability. Increasingly, curriculum is accessed digitally and student work is generated and exhibited using technology tools. The once familiar artifacts of classrooms are rapidly giving way to radically new forms of teaching and learning. Within this context of change, this course reviews the evolution of theories of learning and instruction and then critically examines a range of contemporary models and theoretical frameworks. Learning activities in the course will allow participants to develop their own personalized framework for planning and implementing instruction. Credits: 0

Curriculum Theories, Practice, and Design
Asante, Christian K
Spring 2022

The overarching objective for Curriculum Theories and Practice is to help course participants develop and clarify their philosophy of education, in particular, their beliefs regarding the purposes and processes of effective and equitable curricular organization. To do so, the class explores varied ways of conceptualizing a school curriculum, drawing on insights from major curriculum designers, both past and present, U.S. and international. So students appreciate the ever-evolving nature of effective teaching practices and related school curricula, they will assess their own experiences with educational and institutional change processes writ large. Aiming to help course participants to thrive in the current, volatile educational and political climate, students will consider various approaches to multicultural education, anti-racist education, and inclusion practices that aim to transform the curriculum, attending to the needs of all students and overtly promoting equitable outcomes. In doing so, students will enact alternative strategies for assessment that provide multiple and authentic measures of student learning. Ultimately the course intends to help students consider how school curricula can be structured to promote social justice. Credits: 3

Globalization, Mobility, and Education
Wramaniza, Erasme
Spring 2022

This course addresses major political-economic issues related to migration and education. Drawing on the anthropology of globalization and sociology of immigration, the course reviews major theories of immigrant incorporation and exclusion processes in schools, examines case studies of im/migrants, refugees, and displaced persons and their adaptation processes in countries in the Global North and the Global South, and considers educational practices and policies that develop to address mobility in diverse contexts. The course asks how cultural, social, political, and economic factors influence im/migrant incorporation, and how educators can facilitate im/migrant students' opportunities for learning through changes in policies, pedagogies, and curricula. Language Learner in Global Perspective
Kim, Deoksoon
Spring 2022

This course provides an overview of language learning and the situation of second language learners in schools. First, we review processes of language learning and the challenges language learners face when they must simultaneously learn a language and learn subject matter in that language. We do this from a social cultural perspective, exploring language learning as embedded in sociohistorically situated activities. We develop and account of how learning language is also learning culture. Second, we study how these processes vary across cultural contexts. Because language learning is woven into social and historical contexts, processes of language learning and schooling vary around the world. The course develops several case studies from different areas of the globe in order to illustrate how language learning and schooling can intersect in different ways. Credits: 0

EDUC730701
Global Perspectives on Disabilities and Special Education Dunn, Lori A Spring 2022
In the modern world there are many differing perspectives about the significance of disabilities. In this course we examine both “medical model” perspectives on the origin and nature of disabilities, as rooted in the scientific method, and post-modern critical perspectives. Cultural influences on how those perspectives are valued will also be considered. Differing approaches to special education practice—both service delivery systems and interventions—will be critically compared to the thought traditions. The ethics and social value of special education will also be considered.

EDUC743101 Graduate Inquiry Seminar: One Olivo, Marisa E Spring 2022

The course will coincide with the pre-practicum experience. It is designed to introduce teacher candidates to inquiry as a stance and the skills necessary to conduct classroom-based research that leads to pupil achievement and teaching for social justice. The course is designed to help teacher candidates mediate the relationships of theory and practice, pose questions for inquiry, learn through reflection and discussion, learn from their students and colleagues, construct critical perspectives about teaching, learning, and schooling, and to improve teaching and learning. The second part of this sequence is 432 which is taken in conjunction with full-time student teaching (EDUC7420). In the fall of 2020 this course will be fully online. Part is synchronous and part synchronous. The synchronous part will be scheduled for 8:00-
Social Contexts of Education Asselin, Chloe Spring 2022
Examines the role of situational, school, community, peer, and family factors on the education of children. Participants in the course will strive to understand the effects of their own social context on their education, to develop strategies to help students understand their context, and to understand and contribute to what schools can do to improve teaching and learning and school culture for all students regardless of internal and external variables.

Evaluating Learners with Disabilities Francis, Heather Spring 2022
This course focuses on the education of students with disabilities and other learners from culturally and linguistically diverse backgrounds. The goal of the course is to promote access to the general curriculum for all students through participation in standards-based reform. Universal Design for Learning (UDL) provides the theoretical framework for this course. Through an examination of historical milestones, landmark legislation, systems for classification, approaches to intervention, and the daily life experiences of diverse learners, students acquire knowledge about diversity and the resources, services, and supports available for creating a more just society through education.

Students will be guided by a qualified school-based mentor (Supervising Practitioner) and a university-based mentor (Program Supervisor). In addition to registering for the course, students must complete the online application (https://bc-us.inplacsoftware.com/student) during the semester preceding the placement by April 15 for fall placements and December 1 for spring placements. Contact the Office of Field Placement and Partnership Outreach at prac@bc.edu for more information.

EDUC761602
Bilingual Literacy and Literature Proctor, Charles P
Spring 2022
This course is designed to provide pre- and in-service practitioners exposure to contemporary issues, perspectives, and approaches for literacy instruction in bilingual education settings. These bilingual education settings include transitional and dual language bilingual education programs, and we will explore literacy instruction as it pertains within and across these different program models. At its core, the course is designed to model the types of instructional approaches it espouses. The course will be delivered bilingually, in Spanish and English. As such, the language of instruction of the course, as well as expectations for participation, are fluid and variable. The course targets a range of literacy related topics (see topics grid below) all designed to orient the bilingual educator toward bilingual literacy instruction in contemporary bilingual education contexts.

EDUC762101
Bilingualism, Second Language, and Literacy Development DEPT
Spring 2022
Explores first and second language and literacy development of children raised bilingually as well as students acquiring a second language during pre-school, elementary, or secondary school years. Also addresses theories of first and second language acquisition, literacy development in the second language, and factors affecting second language and literacy learning. Participants will assess the development of one aspect of language or language skill of a bilingual individual and draw implications for instruction, parent involvement, and policy. This course is fully online. The course will have biweekly synchronous meetings. The course meeting time will be determined at the first session by consulting with all students. The first session will be on September 4 (Thursday) at 9:00 AM.

Developmental Disabilities: Evaluation, Assessment, Family, and Systems
Spring 2022
This course focuses on issues facing professionals who work with people with developmental disabilities, their families, and the system whereby services are offered. It is designed for graduate and post-graduate students interested in learning about interdisciplinary evaluation and teams, in understanding disabilities from the person’s and family’s perspective, and in acquiring knowledge about the services available in the community. This course will be held at Children's Hospital.

EDUC773401
Adult Believers in a Postmodern Context
Spring 2022
What are the dynamics that make adults ready and able to live effectively as people of faith in our contemporary postmodern context? What does it mean to be a believer in such a context and how are adults supported in the maturity of faith? Theology, psychology, and education theory all have a contribution to make in addressing these questions. Focused consideration is given to contemporary theories in adult development and adult learning. Attention is given to the implications of this for the parish/congregation, but broader applications are also considered.

Contemporary Issues and Methods in Literacy Research
Spring 2022
This is an advanced graduate seminar designed to support students who are interested in conducting literacy research, particularly in applied educational contexts. This course is meant to introduce and explore literacy research, theory, methodology, with a specific focus on intersections and divergences between developmental and critical literacy research. The course starts by building an understanding of these literacy traditions and moves on to explores different theories, methodologies, and controversies that have emerged, or are currently emerging, in literacy research more broadly. Both critical and developmental perspectives are highly relevant to applied educational contexts, and an understanding of what they are and what they mean is important for the 21st century literacy researchers.

Academic Writing for Multiple Audiences
Spring 2022
The course will provide a foundation focus on the topic of scholarly writing while also supporting the development of the unique writing needs of participating students. Course readings will explicitly introduce students to text structures and language demands of different genres of scholarly writing in education and other related areas. Assignments will build on the writing that students are already doing in their doctoral programs. Foundational instruction sets the stage of individualized attention to the unique challenges and audience demands of each student’s writing focus.

EDUC920101
Discourse Analysis
Spring 2022
Discourse analysis (DA) is a broad field of research which incorporates theory and method from linguistics, anthropology, and sociology, among other disciplines. The common thread across these areas of scholarship is a commitment to studying language in action; to understanding what people do and mean with language, how people interact with language, and what people come to expect with language. Close analysis of language in context can illuminate the processes through which social constructs such as identity, power, and social selves are built. This course will cover the theoretical foundations of DA, in tandem with the methodological implications of each theory. Topics will include Speech Act theory, sequence organization and Conversation Analysis, Narrative Analysis, Classroom Discourse and Critical Discourse Analysis. The course will place an especial focus on the contributions of discourse analytic approaches to understanding educational contexts. Students will be asked to collect, transcribe, analyze, and present their own data over the course of the semester.

EDUC9730101
Contemporary Issues and Methods in Literacy Research
Spring 2022
Explores contemporary curriculum controversies in American education as well as the ways these are shaped by differing conceptions of teaching, learning, and the purposes of schooling
and by the larger social, historical, political, and cultural contexts in which schooling occurs. The course assumes a broad and encompassing definition of curriculum and the aspects of instruction, assessment, and teacher preparation that have major implications for curriculum. Although the focus of the course is on curricular controversies in K-12 education, controversies related to the curriculum of early childhood education, adult learning, and higher education are also relevant.

Dissertation Seminar in Curriculum and Instruction Bottema-Beutel, Kristen M
Spring 2022
This is a student-centered seminar that is aimed at assisting doctoral students in identifying, shaping, and defining a research topic. Students will be expected to develop an interest in proposing a Thesis, and to work toward the development of a full-scale draft of a Thesis proposal. Prior to the completion of the seminar, students will be expected to have established a Dissertation Committee.

African and African Diaspora Studies Courses: Fall 2021

AAD5111001
Introduction to African Diaspora Studies McElwaine, Michelle L Fall 2021
A survey of the African continent and the Diaspora that would include geography, history, politics, economics and literature. The purpose of the course is to introduce students to specific historical, cultural, social and political topics related to Africa and the African Diaspora. Because the scope of the course is so vast, we will explore important issues and themes to give students a desire to further pursue more specific classes in African and African Diaspora Studies. Boston College Faculty members will be invited to lecture in their area of expertise specific to Africa and the Diaspora throughout the semester.

AAD5111401
When Gods Begin Again: Intro to African and African Diaspora Religions Daniels, Kyrah M Fall 2021
This introductory course examines Indigenous African and African Diaspora religions from an interdisciplinary perspective. We explore Yorùbá and other African religions, along with African Christianity, Islam, Haitian Vodou, Cuban Santería, Brazilian Candomblé, Sango Baptist of Trinidad and Tobago, Rastafari and Obeah of Jamaica, Black American conjure, and Oyotunji Village. Important themes of religions in Africa and the Afro-Atlantic Diaspora are addressed, such as: the veneration of God(s), Spirit(s), Ancestors, and the natural world; divination, initiation, sacred space, and healing; the impact of slavery on conversion and continuity; fetish as a colonial construct; globalization, race, gender, and power. Ultimately, this course encourages students to reevaluate their understanding of African religions, recognize diverse cultural practices and ritual knowledge systems, and engage with oral, written and audio/visual texts that underscore the values of these traditions.

AAD5180401
African American History I Miller, Karen Fall 2021
This two-semester survey examines the history and culture of African-Americans from the pre-colonial period to the present. The first semester treats the period before the middle passage, the evolution of slave and free society, the development of Black institutions, and the emergence of protest movements through the Civil War’s end. During the second semester, the emphases are placed on issues of freedom and equality from Reconstruction, urban migration, and civil rights struggles through current consideration of race, class, and gender conflicts.

AAD521801
Black Popular Culture Kützo, Kalemba Fall 2021
This course may be used to satisfy the Communication major Critical Issues requirement or to satisfy one of three electives required for the Communication major. In this class, we will critically examine the development of black popular culture from blackface minstrelsy in the 1800s to present day. While we will primarily focus on black popular culture in the United States, we will also consider the work of diaporic authors and artists and the international implications of American media. Readings will draw upon theories and concepts in media studies, cultural studies, and rhetoric to center our discussion of black popular cultural texts such as television shows, films, music, poetry, and fashion.

AAD522001
The Underground Press Ards, Angela Fall 2021
Note to Journalism minors: this course satisfies the requirement for an elective with a "critical" orientation. Note to all students: This course is included in CORE - Engaging Differences and Justice. The underground press was a vast network of loosely affiliated newspapers that emerged in the 1950s and 60s when young people asked very hard questions about the meaning of power and the role of the press. The outsider outlets spread through hundreds of communities throughout the nation, ranging from big city weeklies like "The Village Voice" and the Berkeley "Barb" to specialized periodicals representing the black press, as well as other ethnic newspapers, progressive weeklies, and various conservative perspectives. This course examines the factors that helped pave the way for this journalism of dissent and how this history affects alternative media today.

Music and Social Justice Dormann, Shannon D Fall 2021
This course examines influential musicians and their artistic endeavors towards the path of social justice, education and awareness, with a special focus on African American musicians and their contribution to the world of entertainment. Emphasis will also be on social movements, activism, industry commodity and the direct correlation between music and society. Students will be encouraged to analyze music through lyrics, and song form; while understanding the historical, political and social climates surrounding these artistic ventures. The conclusive expectation of this class is that students understand the significant impact of music on a global scale and be mindful that it is a powerful tool that can be utilized to educate, inspire, create awareness and unite humanity.

Satisfies one of three elective courses required within the Communication major. The last fifty years have brought tremendous technological change to the United States and the world. This class will explore how media technologies, such as social media, video games, and even digital cameras, shape and are shaped by cultural understandings of race. Through contemporary and historical readings and engagements with media technologies themselves, we will explore the ways that technology is not just neutral.

Community Service Research Seminar Haider, Maheen
Fall 2021
Students should contact the Thea Bowman AHANA and Intercultural Center to obtain permission to register. CRP is a two-semester program that offers leadership, research, and public policy training for students interested in working with communities of color in Massachusetts. In the fall, students will participate in a seminar to study the process of community-based research and its methodologies and begin to design a research proposal for an independent study with a faculty advisor for the spring semester research project. The seminar will also include a lecture series, in which academic researchers and community professionals will discuss their current work and experiences on issues related to four research interest communities.

AADS229001
Gospel Workshop
Jacob Dorman, Shannon D Fall 2021
This class will examine Black gospel music with an emphasis on choral music and oral traditions that capture the Black experience in America from a historical, socio-political and multicultural standpoint. The syllabus and repertoire is reflective of the great faith tradition that is an integral part of black culture; in that it includes the breadth of musical expression in the Black worship experience. Students will analyze the importance of Black gospel music and its vital role in shaping global music trends. Spirituals, traditional gospel, contemporary gospel, as well as religious music of the European tradition will be reviewed closely from a historical and musical standpoint. The class will comprise of equal parts lecture and practicum (Voices of Imani Gospel Choir). The latter half comprising of the practicum (VOI) will help students engage in practical learning of songs explored in the lecture, consequently accomplishing the age old institution of oral tradition in Black history.

Credits: 1
Room and Schedule: None Satisfies Core Requirement: None
Prerequisites: All students are welcome regardless of music theory/reading skills, vocal skills and religious/cultural background. Students can take the course for credit one semester, and this will require joining the Voices of Imani Gospel Choir for that semester...

AADS230001
The Walking Dead Adkins, Ame<br>Fall 2021
What happens when we die? Historically, the conditions of death in America have never been equal or just for all, but do visions of an afterlife resolve the inequities of lived experience? With Orlando Patterson's pronouncement of the black slave and social death in mind, this course examines the way a theological vision of "the damned" informs everything from racialized injustice and incarceration, to sovereignty and Zombie anxiety in the American conscience.

Bringing together philosophy, theology, and critical race theory, we will consider how constructions of death, memory, eternity, and the Other speak to the ethics of a life "well-lived."

Race and Ethnicity in African American History Miller, Karen Fall 2021

This course examines and engages readings that reflect a variety of approaches to questions of racial identity and "American-ness" over time. Textual materials have been selected to illustrate both historical and literary treatments of "race" and "identity" within the context of the United States. How do individuals become conscious of themselves as "racial" beings and as national citizens? How do racial identities comport with other identities? How does racial identity influence or color one's sense of self and relations with others within and outside of one's race? How, ultimately, does race impact the study and writing of history over time?

Languages of Africa Owusu, Augustina Fall 2021

Introduction to the languages in Africa. 2000 of the worlds 7000 languages are spoken in Africa, making it one of the most linguistically diverse continents. Students will learn about the phonetic, phonological, morphological, syntactic, and semantic features of African languages, and their contributions to modern linguistic theory, with special focus on features such as click consonants and noun class systems found in no other parts of the world. The course also explores historical and typological issues in the classification of African languages, and the linguistic consequences of the continents history of colonialism and high migration. No previous knowledge of any African language is presupposed, but students should have taken at least one previous course in Linguistics.

Credits: 3

AADS111401
When Gods Begin Again: Intro to African and African Diaspora Religions McElwaine, Michelle L Spring 2022
This introductory course examines Indigenous African and African Diaspora religions from an interdisciplinary perspective. We explore Yorùbá and other African religions, along with African Christianity, Islam, Haitian Vodou, Cuban Santería, Brazilian Candomblé, Sango Baptist of Trinidad and Tobago, Rastafari and Obeah of Jamaica, Black American conjure, and Oyo/Oni Village. Important themes of religions in Africa and the Afro-Atlantic Diaspora are addressed, such as: the veneration of God(s), Spirit(s), Ancestors, and the natural world; divination, initiation, sacred space, and healing; the impact of slavery on conversion and continuity; fetish as a colonial construct; globalization, race, gender, and power. Ultimately, this course encourages students to reevaluate their understanding of African religions, recognize diverse cultural practices and ritual knowledge systems, and engage with oral, written and audio/visual texts that underscore the values of African participation.

AADS219901
Introduction to Caribbean Writers Frederick, Rhonda Spring 2022
The Caribbean, merely viewed through the lens of colonial history, often does not reflect the diversity and complexity of the region. From a colonial perspective, therefore, the Caribbean is both “known” and “unknown.” Our work for this course compares and contrasts versions of the region by examining colonial histories and current literary traditions. We will pay particular attention to the ways oppositional cultures and identifies manifest in Caribbean literature. Themes of this course include: colonialism, History/histories, gender, geography and identity, sexuality, class, and culture. Varied texts and media will assist in our interpretations of the Caribbean and its diaspora.

AADS221001
We Wear the Mask Daniels, Kyrah M Spring 2022
In acts of mourning and in times of celebration, in solemn rites of passage and in elaborate performance, we decorate our faces and adorn our bodies. This course introduces students to the diversity of African and African Diaspora ritual arts traditions. We take a comparative approach to study traditions of masquerade in initiation ceremonies, street festivals, carnivals, and funerary rites of the Black Atlantic. Employing a material culture approach, we explore particularly “festive” sites such as the sacred city of If-Il, Nigeria, which hosts festivals nearly 360 days of the year, a Caribbean carnival-capital in Jacmel, Haiti, and New Orleans traditions of Mardi Gras Indians and jazz funerals. Students will gain concrete skills in visual art analysis, research, and writing, becoming versed in the fields of art history, religion, anthropology, and museum studies. By the end of this course, students will gain familiarity with various definitions of parade, masquerade, funeral, and carnival, and analyze the role of masks and art implements in private ritual ceremony as well as public festival. In this way, students will develop a deeper understanding of the intricate relationship between sacred arts and religious ceremony.

Capstone: Growing Up Ethnic in America Sarr, Akua
Spring 2022
In this seminar students will read writing that depicts a variety of experiences but suggest that what constitutes an American identity is far from settled. Ethnic difference has a profound effect on personal and social understandings of what it means to be an American. As we discuss the literature, students will be expected to share their own personal narratives of growing up—stories of race, ethnicity, class, gender, faith, and nationality—and what it means to be American. Some of the writers we will read include: Jhumpa Lahiri, Amy Tan, Louise Erdrich, Chang Ra- Lee, Sherman Alexie, Sandra Cisneros, Junot Diaz, Edwidge Danticat, Mat Johnson, and Ta-Nehisi Coates.

Humanitarianism in Africa
Hagan, Ampson Spring 2022
Human suffering amid socio-economic underdevelopment, structural and political crises, and "natural" disasters have long defined the predicament of Africa in relation to the rest of the world, as have the many humanitarian efforts to address that suffering. This course will explore these humanitarian endeavors, what types of politics they reproduce, and what the constant humanitarian focus on Africa contributes to assumptions and notions of "Africa" and "Africans". This course will engage these themes by analyzing concepts such as "secularism," "development," "aid," and "white savior complex" in the context of (post)colonial Africa, through ethnographic and historical research of specific case studies.

AAD5560001
Senior Seminar: Theorizing the Diaspora Adkins, Amey
Spring 2022
This course explores the discourses of diaspora by taking into account the origins, various meanings, multiple dimensions, cultural iterations, and restrictive limitations of the term. How does "the practice of diaspora" translate in different forms of cultural work such as music, film, and literature? How has diaspora shifted in the age of globalization? How can we use diaspora as an analytical tool for reading from a critical perspective? We will consider closely how diaspora is theorized, practiced, and represented in various forms of cultural production. Therefore we will be taking an interdisciplinary approach reading across genre, medium, and disciplines.

The City of Rome Polit, Christopher B  
Fall 2021  
What was a normal day like for ancient Romans? What did they see, hear, and do while going about their lives? How did those things change as Rome shifted from a Republic to an Empire and as their city became caput mundi (“Head of the World”)? In this course we will reconstruct the lived experiences of Romans by examining Rome’s urban spaces through art, architecture, artifacts, and texts. Along the way, we will explore: public buildings, mundane and monumental; recreation (baths, theaters, arenas); civic infrastructure (aqueducts, sewers, roads); economy and commerce (shopping, harbors, slavery); gender and sexuality (domestic spaces, brothels); religion (temples, sacrifices, funerals); and other topics as appropriate.

**ARTH222581**
Modernism and the Avant-Garde, 1900-1945 Lotery, Kevin  
Fall 2021  
In this introductory course we will unpack some of the crucial episodes in art of the first half of the twentieth century, including Italian Futurism and manifesto writing, Dada and the invention of the readymade, the “marvelous” in Surrealist painting and photography, De Stijl and the pursuit of abstraction, the Harlem Renaissance and cross-disciplinarity, and revolutionary Mexican Muralism. We will explore how these avant-gardes sought to break down the barrier between the making of art and the making of life itself, inventing ways of sliding art into the everyday lives of people on the street, at home, and in the factory. Why, these artists ask again and again, must art be sited in privileged gallery spaces that uphold repressive models of gender, class, and race? What new utopian futures are opened up when these spaces are negated or left behind?

This course looks at the evolution of vision and practice through a selected survey of the history, technology, and aesthetics of photography from the earliest experiments in the medium to the present day. We will focus primarily on the photographic practice in Europe and the U.S. In this course, we will investigate the social-cultural, political implications of the revolution of photography, paying critical attention to its manipulations within the contexts of entertainment, advertising, the state, science, journalism, modern and postmodern art. We will also carefully explore our relationships with the proliferation of mass media imagery today.

ARTH334401
Venetian Art and Architecture Leone, Stephanie
Fall 2021
Until its end in 1797, the Republic of Venice, called “La Serenissima” (“the most serene”), occupied a unique position on the Italian peninsula and, even today, it remains a distinctive city. This character of otherness, called “Venezianità,” derived from its geographic location, topography, history, society, economy and culture and resulted in art and architecture that differed from, but at times dovetailed with, the visual arts of other major Italian cities. This course will study the art and architecture of Venice from the Byzantine church of San Marco (eleventh century) to the fall of the Republic (1797), with a particular focus on the Renaissance (fifteenth-sixteenth centuries) that produced many of its major artists: Giovanni Bellini, Titian, Veronese, Tintoretto, Pietro and Tullio Lombardo, Palladio, and others. Intermediate-level art history course with advanced readings and research project. Meets Renaissance/Baroque requirement for Art History Majors.

ARTH431401
The Materials of Art and their Conservation Newman, Richard
Fall 2021
Preservation of a (traditional) work of art requires understanding the materials of which it is made up, their condition, determining a course of treatment, then carrying out a treatment. In this seminar, means by which the materials of art can be understood (historical documents and examination in a conservation lab) will be explored. A major focus will be on how conservators determine the 'state of preservation' that is the desired outcome of a particular treatment (which is rarely how the work of art looked when it was newly created). Other topics are conservation controversies (including cleaning of the Sistine Chapel), 'authenticity' (and authentication) of works of art, and preservation of art that may include highly perishable materials, digital media, or performance. Although some of the subjects are technical, no background in college science is required.

ARTH221001
We Wear the Mask Daniels, Kyrah M Spring 2022
In acts of mourning and in times of celebration, in solemn rites of passage and in elaborate performance, we decorate our faces and adorn our bodies. This course introduces students to the diversity of African and African Diaspora ritual arts traditions. We take a comparative approach to study traditions of masquerade in initiation ceremonies, street festivals, carnivals, and funerary rites of the Black Atlantic. Employing a material culture approach, we explore particularly "festive" sites such as the sacred city of Il-If, Nigeria, which hosts festivals nearly 360 days of the year, a Caribbean carnival-capital in Jacmel, Haiti, and New Orleans traditions of Mardi Gras Indians and jazz funerals. Students will gain concrete skills in visual art analysis, research, and writing, becoming versed in the fields of art history, religion, anthropology, and museum studies. By the end of this course, students will gain familiarity with various definitions of parade, masquerade, funeral, and carnival, and analyze the role of masks and art implements in private ritual ceremony as well as public festival. In this way, students will develop a deeper understanding of the intricate relationship between sacred arts and religious ceremony.

ARTH221501
Art of the Gods: Sacred Arts of the Black Atlantic Daniels, Kyrah M Spring 2022
This comparative course examines ritual arts traditions of the Black Atlantic world, with particular emphasis on regions such as Benin, Nigeria, Congo, Haiti, Cuba, and Brazil. Employing art historical methods and a material culture approach, students will be introduced to sacred implements of the gods featured in myths and origin stories, tools of divination and birthing/initiation rites, masks of masquerade and carnival traditions, sacred bundles/pots for healing ceremonies, ritual devices to invoke spirits of nature, and mortuary arts that honor ancestors and the dead. Ultimately, this course will reveal sacred arts as a foundational component of African and African Diaspora religions and material culture traditions.

ARTH223201
Northern Renaissance Art Craig, Kenneth M Spring 2022
Painting in the Netherlands and in Germany in the fifteenth and sixteenth centuries. Emphasis will be on the style and the meaning of the great works of the masters of Northern Renaissance art such as Jan van Eyck, Hieronymus Bosch, Pieter Bruegel, and Albrecht Durer. We will discuss how the Renaissance in Northern Europe is different from the Italian Renaissance and what influences it absorbed from the Italians. We will consider the importance of printed pictures in this era when books and broadsheets assumed such a crucial role.

ARTH226701
Saltbox to Skyscraper: American Architecture Orwig, Timothy T Spring 2022
This course examines the history of buildings, landscapes, and urban growth in the United States, from early Native American and European contact to the present. Themes studied include topology, materials and technology, style and movements, the emergence of the architectural profession, and specific social contexts such as culture, gender, race, class, and ethnicity. Students will examine how the built environment is linked to climate, geography, and imaginations of the natural world, and influenced by politics, religion, economy, internationalism, and the definition of national and regional identity. Finally, because of the important role of Boston in American architectural history, the course will use Boston as a lens to understand American architectural history. Satisfies Core requirement for Arts.

ARTH442701
Early Medieval Art in Ireland and Britain Netzer, Nancy D Spring 2022
The course will examine the development of art in Ireland and Britain in the Early Medieval period and the production of Irish and English missionaries on the Continent. Emphasis will be placed on the following: 1. manuscripts, sculpture, and metalwork of the sixth to ninth century 2. understanding works of art in their historical contexts 3. sources of the works in the Celtic, Germanic and Mediterranean worlds 4. circumstances under which artists and scribes worked 5. the complex problem of defining local styles 6. complexities of dating works of art 7. evidence yielded through excavation of principal archaeological sites 8. de-constructing the scholarship in the field over the last two centuries. 9. placing new archaeological finds in the art historical narrative 10. the role of Irish manuscripts, metalwork, and sculpture in the Celtic Revival and as national monuments 11. misappropriations of Celtic and Anglo-Saxon symbols (i.e. Celtic Cross and Runes) by white supremacists

ARTH449803
Islamic Book
Netzer, Nancy D Spring 2022
This course will examine the arts of the book in the Islamic world, with particular attention to painting and calligraphy. A broad variety of manuscripts, such as Qurans, which almost never include illustrations, and books of history, science, or literature, such as the Shahnama (Book of Kings), full of exquisite paintings made with gold leaf and opaque watercolors, will be examined. We will focus on production, patronage, aesthetics and reception. Course readings and discussion will be supplemented with visits to local museums to examine manuscripts in person. Faculty: Emine Netzer
Credits: 3
Room and Schedule: Devlin Hall 218 Tu 03:00PM-05:30PM Satisfies Core Requirement: Cultural Diversity
Prerequisites: None Corequisites: None Cross-listed with: None Frequency: null

Biology Courses: Summer 2021

**BIOL10101**
Readings and Research Hoffman, Charles Summer 2021
Intended for M.S. students who are acquiring a knowledge of the literature and experimental methods associated with their research projects under the guidance of a faculty research advisor. Participation in research group meetings, journal clubs, data clubs, etc., may be required. A maximum of six credits may be earned from this course.
Credits: 3
Room and Schedule: By Arrangement Satisfies Core Requirement: None Prerequisites: None Corequisites: None Cross-listed with: None Frequency: Every Fall, Every Spring Student Level: Graduate Comments: None Status: Offered

**BIOL99101**
Doctoral Continuation Hoffman, Charles Summer 2021
All students who have been admitted to candidacy for the Ph.D. degree are required to register and to pay the fee for doctoral continuation during each semester of their candidacy.
Doctoral Continuation requires a commitment of at least 20 hours per week working on the dissertation.
Credits: 0
Room and Schedule: By Arrangement Satisfies Core Requirement: None Prerequisites: Permission of Department Corequisites: None Cross-listed with: None Frequency: Every Fall, Every Spring Student Level: Graduate Comments: None Status: Offered

Biology Courses: Fall 2021

**BIOL106001**
Gateway Topic Seminar for STEM Dunn, Rebecca K Fall 2021 TBD
Credits: 1
Room and Schedule: Higgins Hall 310 W 03:00PM-03:50PM Satisfies Core Requirement: None Prerequisites: Permission of Department Corequisites: None Cross-listed with: None Frequency: Annually Student Level: Undergraduate Comments: None Status: Offered

**BIOL11001**
General Biology
Annunziato, Anthony T; Seyfried, Thomas N Fall 2021
Designed for non-science majors who desire an introduction to cell and molecular biology, this course is also suggested for students who may be interested in the Biology major but lack sufficient preparation to enroll directly into BIOL 2000. Topics include the chemistry of life; biological membranes; cellular metabolism; cell structure; cell division; DNA replication/RNA transcription; protein synthesis; genetics/evolution. Lectures include discussions of the scientific method and current applications of biological investigations. Note: this course does not fulfill any requirement for the biology major, biochemistry major, or the pre-medical program.
Credits: 3
Room and Schedule: Higgins Hall 300 MWF 11:00AM-11:50AM Satisfies Core Requirement: Natural Science Prerequisites: None Corequisites: None Cross-listed with: None Frequency: Every Fall Student Level: Undergraduate Comments: None Status: Offered

**BIOL21001**
Teaching the Biosphere Hake, Laura E Fall 2021 TBD
Credits: 3
Room and Schedule: Higgins Hall 275 MWF 10:00AM-10:50AM Satisfies Core Requirement: None Prerequisites: None Corequisites: None Cross-listed with: None Frequency: Every Fall Student Level: Undergraduate Comments: None Status: Offered

**BIOL30001**
Anatomy and Physiology 1 Nelson, Lisa M Fall 2021
This course lays the foundation for the understanding of human anatomy and physiology. The first portion of the course covers cellular and molecular aspects of eukaryotic cell function: basic chemistry, macromolecules, cell structure, membrane transport, metabolism, gene expression, cell cycle control, and genetics. The course continues with the study of several organ systems.
Beginning with the Integument, which is followed by the Skeletal and Muscular Systems, and ending this first semester with the Nervous System. The cellular and molecular basis for the functions of these systems is an integral element of this portion of the course.
Credits: 3
Room and Schedule: Higgins Hall 300 TuTh 09:00AM-10:15AM Satisfies Core Requirement: None Prerequisites: None Corequisites: BIOL1310 Cross-listed with: None Frequency: Every Fall, Every Summer Student Level: Undergraduate Comments: None Status: Offered

**BIOL131001**
Anatomy and Physiology Lab 1 Eberhard, Jeremy J Fall 2021
This course is restricted to School of Nursing students. Other students may be admitted only during the course drop/add period on a seat-available basis. Laboratory exercises intended to familiarize students with the various structures and principles discussed in BIOL 1300 through the use of anatomical models, physiological experiments, and limited dissection.
Credits: 1

BIOL204001

Investigations in Molecular Cell Biology Lab Jensen, Kari; Warner, Douglas M Fall 2021

A 3-credit laboratory course designed to introduce students to the core techniques and experimental strategies of modern molecular cell biology within the context of an original research investigation. Students will learn to construct testable hypotheses, design experiments, and critically analyze experimental results. During the course of their investigations, students will gain proficiency in microbial cell culture, molecular cloning, genetic analysis, and molecular characterization. Students will also gain proficiency in scientific communication and the use of biological databases.

Credits: 3

BIO130001
Introduction to Physiology Kenaley, Christopher P Fall 2021
This course is intended for Biology, Psychology, and Biochemistry majors and students in the pre-medical program seeking a broad overview of human physiology. This course will offer a comprehensive exploration of fundamental life systems with a primary emphasis on human physiology. The chemical and physical processes common to all living organisms, including hemodynamics, respiration, circulation, acid/base regulation, synaptic transmission, kidney and muscle function will be discussed. Also included are related topics on development of the organism and functional aspects of the immune system in host defense strategies.
Credits: 3
Room and Schedule: Devlin Hall 8 MWF 01:00PM-01:50PM Satisfies Core Requirement: None
Prerequisites: BIOL2000 Corequisites: None Cross-listed with: None
Frequency: Every Fall, Every Spring Student Level: Undergraduate Comments: None Status: Offered

BIO1304001
Cell Biology Burgess, David R Fall 2021
This course is designed to provide students with a strong foundation in the molecular biology of the cell. Topics covered in the course include cellular biochemistry, regulation of gene expression, subcellular organization, regulation of the cell cycle, membrane trafficking, cell-substrate interactions, cytoskeleton, cancer, and cell signaling. It serves as excellent preparation for more advanced courses in cell biology, molecular biology, developmental biology, and genetics.
Credits: 3
Room and Schedule: Higgins Hall 300 TuTh 12:00 Noon-01:15PM Satisfies Core Requirement: None
Prerequisites: BIOL2000 Corequisites: None Cross-listed with: None
Frequency: Every Fall, Every Spring Student Level: Undergraduate Comments: None Status: Offered

BIO1305001
Genetics Dunn, Rebecca K Fall 2021
This course focuses on genetics of microbial and eukaryotic organisms. Topics covered in the course include transmission genetics, chromosome structure, regulation of gene expression, population genetics, multifactorial inheritance and an introduction to genomics.
Credits: 4
Room and Schedule: Higgins Hall 300 TuTh 10:30AM-11:45AM Satisfies Core Requirement: None

BIO1314001
Experimental Methods in Organismal Biology Kenaley, Christopher P Fall 2021
Organismal biology is the study of living systems of all scales that shape the structure, function, ecology, and evolution of individual organisms. Experiments that elucidate how organisms respond to biotic and abiotic environmental stimulus over broad time scales—from changes in behavior to adaptation—are crucial to understanding biological diversity. In this course we'll explore the concepts and analytical tools that frame experimental research in organismal biology. Through group projects and active learning experiences, students will first make hypotheses concerning how organisms respond in time, space, and behavior to changes in environment and then design experiments and instruments that produce data to evaluate these hypotheses. Topics covered will include reconstructing phylogenetic history and the evolution of organismal form and function, evaluating form-function relationships, and the correlates of spatial and temporal distribution of organisms. In addition, the development of an analytical toolbox--specifically, learning the principles of data science and statistical analysis— is a central theme of this course.

BIO1405001
Evolution and Development McMenamin, Sarah K Fall 2021
We see incredible biodiversity on earth, and biologists are now learning how some of this diversity emerges. The field of Evolutionary Development (Evo Devo) asks how development can be modified during evolution to produce the incredible variation observed in nature. How are animal body plans formed, and how can those plans be changed? How do developmental processes constrain adaptive changes in multicellular organisms? What genetic pathways have evolution targeted to modify phenotypes? The course will address these and other fundamental questions through readings, discussion, and case studies. Students will be introduced to the diversity of multicellular organisms and their evolutionary history, and some of the methods and interpretations of modern developmental, molecular, and evolutionary biology.

BIO1409001
Virology Eberhard, Jeremy J Fall 2021
This course will consider eukaryotic DNA and RNA viruses that are important in human disease. Basic principles of virus structure, host cell entry and the molecular biology of virus life cycles will be considered in the context of infectious disease. Viruses to be examined include Influenza, cancer-related viruses such as the Human Papilloma Virus, HIV, and emerging viruses such as Ebola and the hantaviruses. The host immune response to viral infection and the effectiveness of various vaccination strategies will also be discussed.

In this course, students will explore and compare the form and function of representative members of the five vertebrate classes. Evolutionary similarities and differences in form and function will be investigated, as will both the selective pressures, and non-selective constraints that have contributed to vertebrate structure. The course will conceptually integrate vertebrate anatomy with developmental biology, evolutionary biology, and ecology, and will provide skills valuable to careers in a range of biological disciplines, including molecular cell biology, medicine, evolutionary biology, and ecology.

Credits: 0
Room and Schedule: Higgins Hall 375 Tu 04:00PM-06:00PM Satisfies Core Requirement: None Prerequisites: BIOL2000 Corequisites: None Cross-listed with: None Frequency: Every Fall Status: Offered

BIOL432001
Developmental Biology Hake, Laura E
Fall 2021
Developmental biology is in the midst of a far-reaching revolution that profoundly affects many related disciplines, including evolutionary biology, morphology, and genetics. The new tools and strategies of molecular biology have begun to link genetics and embryology and to reveal an incredible picture of how cells, tissues, and organisms differentiate and develop. This course describes both organismal and molecular approaches, which lead to a detailed understanding of (1) how it is that cells containing the same genetic complement can reproducibly develop into drastically different tissues and organs, and (2) the basis and role of pattern information in this process.

Credits: 3
Room and Schedule: Higgins Hall 225 TuTh 01:30PM-02:45PM Satisfies Core Requirement: None Prerequisites: BIOL2040 and additional coursework in molecular cell biology (such as BIOL3040, BIOL4140, BIOL4400) Corequisites: None Cross-listed with: None Frequency: Every Fall Status: Offered

BIO480201
Research in Evolutionary Genomics DaCosta, Jeffrey M
Fall 2021
This course will provide hands-on training in the collection and analysis of genome-scale data from non-model organisms. Students will learn good laboratory practices while preparing samples for next-generation DNA sequencing, which will be run in the department's core sequencing facility. Students will also learn basic Unix/Linux computational skills and several bioinformatics tools that will be applied in managing and analyzing the massive amounts of data generated by this sequencing technology. Through data analyses and reviews of the primary literature, students will gain exposure to modern methods in phylogenetics and population genetics. This course is recommended for students interested in advanced topics in genomics, bioinformatics, and evolution. BIOL3150 and BIOL4400 recommended.
Credits: 3
Room and Schedule: Higgins Hall 470 MW 12:00 Noon-02:50PM Satisfies Core Requirement: None

BIO483001
Research in Molecular Biology Lab Fofana, Ismael B
Fall 2021
Satisfies the advanced experience requirement for the Biology major. An advanced project laboratory course for hands-on training in the experimental techniques of molecular biology under faculty supervision. In addition to formal lab training and discussions, students will have access to the lab outside class hours to work on projects intended to produce publication quality data. The research project will focus on environmentally-mediated gene expression in the organism Pseudomonas fluorescens. Methods taught include: DNA cloning, DNA sequencing, polymerase chain reaction, and the use of national databases for research and analysis. It is ideal for students who desire a solid introduction to hypothesis-driven research in molecular biology through practical training.
Credits: 3
Room and Schedule: Higgins Hall 570 TuTh 02:00PM-05:00PM Satisfies Core Requirement: None

BIO489001
Investigations in Cellular Re-Programming Connolly, Timothy J
Fall 2021
Induced pluripotent stem cells, iPSCs, are cells that can be generated from adult cells such as skin fibroblasts. Once generated, iPSCs can be directed to differentiate into any cell and offer exciting models for disease research. This laboratory course will teach students the techniques used to reprogram adult murine fibroblasts into pluripotent stem cells and their subsequent differentiation into cardiac and neuronal lineages. Resulting cell lines will be characterized using molecular and cell biology techniques and students will work to create novel cellular disease models to progress particular disease research.

BIOLS01001
Nobel Prize Winning Research in Medicine or Physiology Burgess, David R
Fall 2021
In this course we will discuss primary research literature in the fields of cell and developmental biology that have led to the award of the Nobel Prize. Each student will select a primary paper cited by the Nobel Foundation as justification for the award together with a supportive current review on the topic and present the background information to the class. The primary paper will be discussed at the following class period, with all students having defined responsibilities for discussion of the figures and data.
Credits: 2

BIOLS04001
Topics in Developmental Biology McMenamin, Sarah K
Fall 2021
The field of molecular developmental biology asks: How do molecules and cells coordinate and function to produce organisms? How can these processes be modified in the context of disease and evolutionary change? With the goal of better understanding current research in the field of developmental biology, we will read primary literature focusing on a variety of techniques (molecular, cellular, genetic, biochemical) and numerous systems (tissue culture, mouse, fly, frog, zebrafish, and others). The course will focus on developing students' ability to...
comprehend and critically evaluate recent primarily literature, present scientific perspectives, and actively participate in scientific dialogue.

Credits: 2

Room and Schedule: Higgins Hall 552 Th 01:00PM-02:50PM Satisfies Core Requirement: None Prerequisites: BIOL2040 or Additional coursework in molecular cells biology required Corequisites: None

Cross-listed with: None Frequency: Every Spring Student Level: Undergraduate Comments: None Status: Offered

BIOLS07501 Emerging Therapeutics Nystuen, Arne M Fall 2021
This course will focus on novel therapeutic technologies. The first gene therapy has been approved in the U.S. following decades of development. Furthermore, many more gene and cell therapies are in development. The process of therapeutic development will be covered. New technologies will be discussed as well as the results of preclinical and clinical trials. Topics will be presented by the instructor and students and discussions will follow. Students will select their topics for presentation with direction and final approval from the instructor. We will develop presentation skills throughout the course.

Credits: 2

Room and Schedule: Higgins Hall 465 M 04:30PM-06:30PM Satisfies Core Requirement: None Prerequisites: BIOL2000 and additional course work in molecular cell biology. Biochemistry and Physiology recommended.

Corequisites: None

BIOLS09501 Topics in Advanced Cell Biology Rappoport, Joshua Fall 2021
Through the analysis of classical and cutting-edge primary research papers and review articles this course will highlight significant advances in cell biology. The course will include lectures that will provide detailed and nuanced understanding of particularly relevant areas in cell biology, as well as student led presentations and critical analyses of individual research papers. Topics to be discussed include the following: The Secretory Pathway, Endocytosis and the Endocytic Pathway, Cell Adhesion, Cell Migration, Signal Transduction, The Cytoskeleton, The Nuclear Pore Complex, and the Cell Cycle. The course will also highlight important technologies and methodologies responsible for advances in cell biology, as well as how developments in cell biology have led to breakthroughs in areas ranging from biotechnology to medicine.

Credits: 2

Room and Schedule: Higgins Hall 465 W 04:30PM-06:20PM Satisfies Core Requirement: None Prerequisites: None Corequisites: None Cross-listed with: None Frequency: Annually Student Level: Both Comments: None Status: Offered

BIOLS13001 Environmental Disruptors of Development Hake, Laura E Fall 2021
Satisfies the advanced experience requirement for the Biology major. More than 100,000 chemicals are manufactured and may end up as environmental pollutants. Some have toxic effects at high concentrations and protection plans are already in place. However, embryonic, fetal, or neonatal exposure to low “safe” levels of numerous pollutants can (1) induce subtle changes in developmental programs regulated by steroid hormones; (2) increase the reproductive, immune, metabolic, or cognitive disorders; and (3) increase the risk of adult-onset disorders (breast cancer, prostate cancer, diabetes, reduced fertility). This course will examine experiments regarding Environmental Endocrine Disruptors and consider how this work is important in the development of regulatory policy.

Credits: 3

Room and Schedule: Higgins Hall 225 TuTh 10:30AM-11:45AM Satisfies Core Requirement: None Prerequisites: At least two of the following courses: BIOL3040, BIOL5060, BIOL4170, BIOL4510, BIOL4140, BIOL4350, BIOL4400 or instructor permission.

Corequisites: None Cross-listed with: None Frequency: Every Fall Student Level: Both Comments: None Status: Offered

BIOLS42001 Cancer As A Metabolic Disease Seyfried, Thomas N Fall 2021
Satisfies the advanced experience requirement for the Biology major. This seminar will review evidence showing that impaired cellular energy metabolism is the defining characteristic of nearly all cancers regardless of cellular or tissue origin. In contrast to normal cells, which derive most of their usable energy from oxidative phosphorylation, nearly all cancer cells become dependent on non-oxidative substrate level phosphorylations to meet energy demands.

Evidence will be discussed supporting a general hypothesis that all hallmarks of cancer including genomic instability and metastasis can be linked to impaired mitochondrial function. A view of cancer as a metabolic disease will impact approaches to cancer management and prevention.

Credits: 3

Room and Schedule: Higgins Hall 552 TuTh 09:00AM-10:15AM Satisfies Core Requirement: None Prerequisites: BIOL2040 and BIOL3040 or Permission of Instructor Corequisites: None Cross-listed with: None Frequency: Every Fall Student Level: Both Comments: None Status: Offered

BIOLS45001 Advanced Lab in Cell Imaging Judson, Bret Fall 2021
This course satisfies the advanced experience requirement for biology majors. This course will survey the various visualization techniques and instruments used by scientists and biomedical researchers: light microscopy, confocal, electron microscopy, super-resolution, and image processing. Students will discuss the experimental use of these techniques and instruments as described in the primary literature. The laboratory component will focus on becoming familiar with the instrumentation that we have available at Boston College. The course will culminate in individual projects of the students choosing utilizing equipment that we have in the laboratory.

Credits: 2

Room and Schedule: Higgins Hall 552 TuTh 04:00PM-06:00PM Satisfies Core Requirement: None Prerequisites: BIOL2040 and additional coursework in cell and/or molecular biology.

<td>In recent history, never has microbiology been more upfront and more important. As we continue to navigate through the Covid-19 pandemic, it is increasingly important to better understand not only viruses and vaccines, but a broader view of microbes and their impact on society and public health. This course will look at ancient epidemics such as the Plague and TB, the ongoing HIV epidemic and the more recent spillovers leading to outbreaks of Ebola and the current pandemic with Sars2 (Covid-19). In addition to lectures on the biological aspects of microbes and epidemics, classroom discussion will include topics such as rising antibiotic resistance, the anti-vax culture and the intersection of science and politics. This is a discussion-based course and students will participate in a semester-long group research project to be presented to the class. This course satisfies the Natural Science Core and is designed for non-biology majors.</td>

Investigations in Molecular Cell Biology Lab Warner, Douglas M Spring 2022
A 3-credit laboratory course designed to introduce students to the core techniques and experimental strategies of modern molecular cell biology within the context of an original research investigation. Students will learn to construct testable hypotheses, design experiments, and critically analyze experimental results. During the course of their investigations, students will gain proficiency in microbial cell culture, molecular cloning, genetic analysis, and molecular characterization. Students will also gain proficiency in scientific communication and the use of biological databases.
Credits: 3

BIOI403001
Deep Sea Biology Ofisms, Heather C Spring 2022
Roughly 80% of habitable space on this planet is in the ocean below 1000 meters where sunlight never reaches. In this course we will dive into this rarely visited habitat that occupies the majority of our biosphere. We will take an interdisciplinary approach, as studying the deep requires the integration of geology, chemistry, ecology, physiology, and engineering. We will investigate fundamental aspects of biology such as how organisms adapt to challenges posed by their environment. Students will also gain an appreciation for how much of our planet remains unexplored and learn how scientists study the inaccessible ecosystems of the deep.
Credits: 3
Room and Schedule: Higgins Hall 263 MW 03:00PM-04:15PM Satisfies Core Requirement: None Prerequisites: BIOI2010 Corequisites: None Cross-listed with: None Frequency: Every Spring Student Level: Undergraduate Comments: None Status: Offered

BIOI411001
Ornithology DaCosta, Jeffrey M Spring 2022
This course will review the evolution, functional morphology, physiology, ecology, and behavior of birds. Topics covered include dinosaur ancestry, adaptations for flight, breeding behaviors, migration, and conservation. Students will also review the biodiversity and natural history of extant birds and learn to identify common local birds using morphology and vocalizations.
Credits: 3
Room and Schedule: Higgins Hall 310 MW 10:00AM-10:50AM Satisfies Core Requirement: None Prerequisites: BIOI2010 and BIOI2000 Corequisites: None Cross-listed with: None Frequency: Every Fall Student Level: Undergraduate Comments: None Status: Offered

BIOI413001
Ecology in a Changing Olins, Heather C Spring 2022
In the midst of widespread global climate change, Earth’s biodiversity faces multiple synergistic threats. Climate change, habitat loss, pollution, over extraction, and invasive species threaten all species on Earth including our own. The tools of Ecology can help to understand these threats. Advances in science and modeling enable us to make predictions about future climate and ecosystem conditions, but these predictions have their limitations. Focusing solely on climate models and predictions of future scenarios and biodiversity loss can lead to feelings of hopelessness and desperation. To work towards an equitable, sustainable future for all species on Earth (including humans) we need to learn about positive visions for the future, we need to be able to critically assess potential solutions, we need to examine examples of effective solutions, and we need to consider the roles we each can play in bringing about a positive future. In this course we will do these things together. Over the course of the semester, each student will integrate technical scientific literature, a diverse set of views and perspectives on how we interact with the natural world around us, and personal reflection to create an individual plan of action.
Credits: 3
Room and Schedule: Higgins Hall 263 MW 10:00AM-10:50AM Satisfies Core Requirement: None Prerequisites: BIOI2010 Corequisites: None Cross-listed with: None Frequency: Annually Student Level: Undergraduate Comments: None Status: Offered

BIOI425001
Population Genetics Clote, Peter G Spring 2022
In molecular evolution, random events such as pointwise DNA mutations and chromosomal rearrangement events (inversion, reciprocal translocation) create genetic variation in a diploid population that undergoes selection of the fittest to survive. This course describes mathematical models, both deterministic and stochastic, that provide a theoretical foundation for understanding modern genetics. The types of questions we’ll address include the following. In a large population, how do haplotype frequencies change both in the presence and absence of selection and restricted migration? What is linkage disequilibrium and how is it measured? For instance by limited environmental resources, what is the probability that a particular allele will become fixed in the population, and what is the expected time until fixation? What is the coalescent? In addition, some original research papers will be presented.
Credits: 3
Room and Schedule: TuTh 01:30PM-02:45PM Satisfies Core Requirement: None Prerequisites: BIOL3150 Working knowledge of probability and statistics or approval from the instructor Peter Clote Corequisites: None Cross-listed with: None Frequency: Every Spring Student Level: Undergraduate Comments: None Status: Offered

BIOI429001
Medical Biochemistry and Metabolism Altimidis, Emrah Spring 2022
The increasing knowledge about the metabolic pathways has deepened our understanding of human disease. Using studies from recent research and review articles, we will cover a variety of domains in the first half of the semester. These topics include insulin signaling/resistance, regulation of metabolism by different regulatory pathways and endoplasmic reticulum stress.
We will also investigate important regulatory hormones including incretins, leptin and adiponectin and the tissue at the center of obesity, adipose tissue. Based on this foundation, we will focus on metabolic impairments in different human diseases. Specifically, we will be reading from the primary literature and from other relevant sources (e.g., review articles) on metabolic syndrome, pancreas function/dysfunction, type 2 diabetes, type 1 diabetes, gestational diabetes, MODY and obesity. After we complete this section, we will focus on the link between metabolic diseases and other important diseases including cancer and neurological diseases/dysfunction. Lastly, we will study the effects of racism and inequities in society on human health. At the end of the course, the students will develop a deep understanding of basic mechanisms in metabolic disease. This course is based on active teaching/learning principles and the instructor will be the guide on the side, rather than sage on the stage. Thus, the students are expected to actively participate in discussions in each class.

BIOL433001
Human Physiology DiBenedetto, Lynn M Spring 2022
This course will examine the normal functions of a living human organism including its physical and chemical processes. An integrative approach will be used to explore the physiological processes of the nervous, respiratory, cardiovascular, renal, gastrointestinal, and endocrine systems and the relationships between them. In the computer based laboratory, which is a corequisite, students will investigate the functions of intact, living human organisms through real-time, hands-on data acquisition and analysis of the neuromuscular, cardiovascular, and respiratory systems using clinical measurements including EMG, EEG, cardiac electrophysiology, and spirometry.

Credits: 4

This is an upper-level elective in which students will use the primary literature to study the cellular and molecular bases of diverse diseases. Topics will include aberrations in cellular structures, protein misfolding, protein glycation, oxidative damage, immune activation, and autoimmunity. Students will gain an understanding of the interconnections between basic biology and human disease and experience in reading scientific research articles and in presenting scientific work.

Credits: 3
Room and Schedule: Higgins Hall 225 MWF 02:00PM-02:50PM Satisfies Core Requirement: None
Prerequisites: BIOL2000 and additional course work in molecular cell biology or biochemistry required.

BIO454001
Cancer Biology Taghian, Danielle Spring 2022
The onset of cancer occurs through a multi-step process that is accompanied by the deregulation of fundamental cellular processes, including cell cycle control, apoptosis, and angiogenesis. This course will provide an overview of the molecular and cellular changes associated with these processes and with the initiation, progression, and metastasis of tumors. Topics covered will include tumorogenesis, tumor viruses, oncogenes, tumor suppressor genes, genomic instability, and the current treatments for cancer. The class will draw on textbook and primary literature readings to enrich the current view of this complex disease.

Credits: 3
Room and Schedule: Higgins Hall 300 MWF 12:00 Noon-12:50PM Satisfies Core Requirement: None
Prerequisites: BIOL2040 and additional coursework in molecular cell biology (such as BIOL3040, BIOL4140, or BIOL4400)
Corequisites: None

BIO455001
Neuroscience Nystuen, Arne M Spring 2022
This class will cover molecular neuroscience and neuroanatomy in a clinical and pharmaceutical context. Anatomy topics will include the structure, function, and pathology for the brain and associated nerves and vasculature. Sensory and motor systems will be discussed with special attention to the visual system, where genetic disease and current therapeutic strategies will be discussed in depth. We will cover pathology associated with neurodegenerative disease and the current clinical trials within this disease group.

Credits: 3
Room and Schedule: Higgins Hall 300 TuTh 09:00AM-10:15AM Satisfies Core Requirement: None
Prerequisites: BIOL2000 and additional coursework in molecular cell biology or biochemistry.
Corequisites: None

BIO483001
Research in Molecular Biology Lab Fofana, Ismael B Spring 2022
Satisfies the advanced experience requirement for the Biology major. An advanced project laboratory course for hands-on training in the experimental techniques of molecular biology under faculty supervision. In addition to formal lab training and discussions, students will have access to the lab outside class hours to work on projects intended to produce publication quality data. The research project will focus on environmentally-mediated gene expression in the organism Pseudomonas fluorescens. Methods taught include: DNA cloning techniques, DNA sequencing, polymerase chain reaction, and the use of national databases for research and analysis. It is ideal for students who desire a solid introduction to hypothesis-driven research in molecular biology through practical training.

Credits: 3
Room and Schedule: Higgins Hall 570 TuTh 02:00PM-05:00PM Satisfies Core Requirement: None

BIO487001
Research in Molecular Genetics Lab Hoffman, Charles Spring 2022
Satisfies the advanced experience requirement for the Biology major. The fission yeast Schizosaccharomyces pombe is an important model organism for the study of intracellular processes such as cell cycle control, transcription, DNA replication, chromosome maintenance, and signal transduction. This laboratory will involve original molecular genetic research using S. pombe that involves concepts related to forward genetics and gene manipulation. This course is recommended for students interested in pursuing graduate studies or careers in biomedical research.

Credits: 3
Room and Schedule: Higgins Hall 475 MW 01:00PM-04:00PM Satisfies Core Requirement: None

BIOLS06001
Recombinant DNA Technology Hoffman, Charles Spring 2022
In this course we will discuss primary research literature in the fields of cell and developmental biology that have led to the award of the Nobel Prize. Each student will select a primary paper cited by the Nobel Foundation as justification for the award together with a supportive current review on the topic and present the background information to the class. The primary paper will be discussed at the following class period, with all students having defined responsibilities for discussion of the figures and data.

BIOLS07101
Microbial Community Ecology Momeni, Babak Spring 2022
Polymicrobial communities can cause harmful infections as pathogens or facilitate food digestion as resident microbiota. They also have industrial applications for waste remediation or biofuel production. We will examine examples of microbial communities with implications in health, environment, or industry. The course surveys relevant ecological theories and covers current tools and methodologies used for characterization and analysis of microbial communities.

Credits: 2
Room and Schedule: Higgins Hall 552 W 01:00PM-02:50PM Satisfies Core Requirement: None
Prerequisites: BIOL 2010 and 2014; BIOL 414 and a statistics course recommended.

BIOLS07501
Emerging Therapeutics Nystuen, Arne M Spring 2022
This course will focus on novel therapeutic technologies. The first gene therapy has been approved in the U.S. following decades of development. Furthermore, many more gene and cell therapies are in development. The process of therapeutic development will be covered. New technologies will be discussed as well as the results of preclinical and clinical trials. Topics will be presented by the instructor and students and discussions will follow. Students will select their topics for presentation with direction and final approval from the instructor. We will develop presentation skills throughout the course.

Credits: 2
Room and Schedule: Higgins Hall 465 M 04:30PM-06:30PM Satisfies Core Requirement: None

BIOLS15001
Vaccine Development and Public Health Fofana, Ismael B Spring 2022
Despite more than three decades of research, the development of an efficacious HIV/AIDS vaccine remains elusive. Nonetheless, the quality of knowledge generated by HIV researchers is impressive. It is no surprise that potent Ebola virus and Zika virus vaccine candidates have been developed in a short time span. This class will discuss the difficulties and successes encountered with vaccine development (AIDS, tuberculosis, malaria, small-pox, measles, poliomyelitis, tetanus, Ebola, and Zika). At a time when questions have been raised about the link between childhood vaccination regimes and autism, we will discuss the ethics, economics, problems, and benefits of modern day vaccination.

Credits: 3
Room and Schedule: Higgins Hall 310 TuTh 12:00 Noon-01:15PM Satisfies Core Requirement: None
Prerequisites: BIOL2000 and additional course work in molecular cell biology. Microbiology and/or Immunology strongly recommended.

BIOLS23001
Immunity and Infectious Disease Williams, Kenneth C Spring 2022
Satisfies the advanced experience requirement for the Biology major. This course will focus on immune cells, the immune system’s response to viral and bacterial infection and the pathogenesis resulting from these responses. Topics will include questions of self and non-self in immune responses, the role of mucosal immunity and gut flora in immune responses and pathogenesis, AIDS pathogenesis, vaccines, and cutting edge technological approaches to immune therapy. Reading materials will consist of a basic immunology text, classical primary papers, and research reports.

BIOLS30001
Topics in Biomechanics DEPT Spring 2022
This course will explore the physical principles underlying biological processes and mechanisms including movement, feeding, architecture, and transport. Drawing on physics and mechanical engineering, the course will explore how organisms swim, fly, walk, and consume resources, how they respond to moving fluids, and the relationship between their size and design of mechanical systems. Underlying all these topics will be hands-on investigations of how biological materials (e.g., wood, muscle, bone, skin, etc) influence the mechanical behavior of complex life forms. The course will prepare students for more in-depth
explorations of other related disciplines including ergonomics, orthopedics, kinesiology, and sports medicine.

Credits: 3
Room and Schedule: None Satisfies Core Requirement: None
Prerequisites: BIOL3030. Familiarity with basic Newtonian physics and mechanics is recommended.
Corequisites: None

BIOL542002
Cancer As A Metabolic Disease Seyfried, Thomas N Spring 2022
Satisfies the advanced experience requirement for the Biology major. This seminar will review evidence showing that impaired cellular energy metabolism is the defining characteristic of nearly all cancers regardless of cellular or tissue origin. In contrast to normal cells, which derive most of their usable energy from oxidative phosphorylation, nearly all cancer cells become dependent on non-oxidative substrate level phosphorylations to meet energy demands. Evidence will be discussed supporting a general hypothesis that all hallmarks of cancer including genomic instability and metastasis can be linked to impaired mitochondrial function. A view of cancer as a metabolic disease will impact approaches to cancer management and prevention.

Credits: 3
Room and Schedule: Higgins Hall 465 TuTh 09:00AM-10:15AM Satisfies Core Requirement: None
Prerequisites: BIOL2040 and BIOL3040 or Permission of Instructor

BIOL543001
Genomics and Personalized Medicine Connolly, Timothy J Spring 2022
Satisfies the advanced experience requirement for the Biology major. Personalized medicine is based on the idea that each person’s unique genome sequence can be used to predict risk of acquiring specific diseases, allowing for more informed choices about health. The students will be exposed to the scientific concepts and technologies empowering personalized medicine. Through lecture, research paper reading and discussion the students will understand how human genomic information has impacted current topics in biomedical research. Students will write a research paper focused on how genomic information has advanced understanding of a human disease and how translation of genomic information will impact treatment or disease detection in the future.

Credits: 3
Room and Schedule: Higgins Hall 260 MW 03:00PM-04:15PM Satisfies Core Requirement: None
Prerequisites: BIOL2040 and a genetics or genomics course. Additional coursework in biochemistry and molecular biology is strongly recommended.

BIOL545001
Advanced Lab in Cell Imaging Judson, Bret Spring 2022
This course satisfies the advanced experience requirement for biology majors. This course will survey the various visualization techniques and instruments used by scientists and biomedical researchers: light microscopy, confocal, electron microscopy, super-resolution, and image processing. Students will discuss the experimental use of these techniques and instruments as described in the primary literature. The laboratory component will focus on becoming familiar with the instrumentation that we have available at Boston College. The course will culminate in individual projects of the students choosing utilizing equipment that we have in the laboratory.

Credits: 2

Capstone

Capstone Courses: Summer 2021

No records found

Capstone Courses: Fall 2021

UNCPS50101
Capstone: Authenticity and Human Development Bracher, Elizabeth R; Dacey, John S
Fall 2021
Seniors only. Capstone Seniors only. classes may NOT be taken Pass/Fail. You may take only ONE Capstone class before graduation. The path to becoming a more authentic person is twofold: coming to know who you are and who you are not as well as sharing this information with others. As you progress along this path, you become more authentic and are rewarded for doing so. Why should you want to be more authentic? Misrepresenting yourself costs energy.

More importantly, people just seem to know intuitively who is authentic and who is not. If you are, you will be seen as more trustworthy, more deserving of love, more skilled as a leader, and more likable. This course will help you to better recognize and improve on the areas of personal development called for in every Capstone course: your education is to now and in the future; your relationships; your role in society; your vocational callings and choice of career; and your spirituality. Assignments include group projects, personal projects, and lots of small and large group discussions.

UNCPS50501
Capstone: Life and Career Planning Capalbo, Robert F
Fall 2021
Seniors only. Capstone classes may NOT be taken Pass/Fail. You may take only ONE Capstone class before graduation. This course provides an overview of life and career planning in the context of (1) career, (2) personal relationships, (3) spirituality, and (4) ethical decision making. Students are asked to develop autobiographical responses to a series of questions about their lives to find themes related to possible careers and relationship issues. Readings, cases, exercises, and guest lecturers will amplify those personal themes and common issues in life as we enter the twenty-first century. The integration of spirituality and ethical decision making into one’s life will be addressed by readings on ethical perspectives and the students’ written reflections.

UNCPS51901
Capstone: A Life Well Lived DeChiara-Quenzer, Deborah
Fall 2021
Capstone classes may NOT be taken Pass/Fail. You may take only ONE Capstone class before graduation. Seniors only. This course engages students in serious reflection on what it means to have “a life well lived.” It is advantageous to do this reflection at this time in your life, as it affords you time and opportunity to shape your life going forward. What kind of life do you hope to live? What will bring you peace and satisfaction—dare we say, even happiness? Students will be asked to examine themselves by looking both backwards and forwards in many dimensions of their lives (education, ethics, relationships, career, etc.) while learning what others have said about having a meaningful life.

UNCPS52101
Capstone: Surviving Life with Humor Jayasundera, Thushitha
Fall 2021
Capstone classes may NOT be taken Pass/Fail. You may take only ONE Capstone class before graduation. Seniors only. A sense of humor can be a powerful tool that helps us navigate real-life situations that may otherwise cause us anxiety and distress. This course aims to sharpen your emotional intelligence through humor, and help cultivate values and attitudes that will serve you well in life. Class discussions will allow us to acknowledge another point of view with empathy, and convey our own ideas with humor and humility. We will study the Capstone foundations (spirituality, vocation, citizenship, relationships) through the lens of humor and, hopefully, equip you with yet another valuable tool for success, as you embark on the next chapter of your lives.

Capstone: Holistic Living Spector, Rachel E
Fall 2021
Seniors only. Capstone classes may NOT be taken Pass/Fail. You may take only ONE Capstone class before graduation. This seminar will examine spirituality, community, personal and family relationships, and education through the lenses of cross-cultural holistic health and healing practices. Selected readings, films, and field visits will assist you to visualize the relationships of health to the holistic aspects of your life and that of the multicultural communities in which you will live and work. Through this study, the course will provide insight into the nature of health, the comparisons of health and healing practices cross culturally, and the consequences of health-related choices.

UNCPS53301
Capstone: Desire and Discernment Muldoon, Timothy P
Fall 2021
Seniors only. Capstone classes may NOT be taken Pass/Fail. You may take only ONE Capstone class before graduation. This course aims to help students review the process of their education and preview the process of making long-term commitments by taking a long, loving look at how we experience desire, and how we act upon those desires to construct a life well lived. The course will first expose students to spiritual practices of discernment, rooted in the Ignatian and Benedictine spiritual traditions. Second, it will involve careful thinking about stories of discernment which involve the sorting and pruning of desire. Discussions will reflect on these stories, in order to help each other consider what they mean for our own lives.

Fall 2021
Capstone classes may NOT be taken Pass/Fail. You may take only ONE Capstone class before graduation. No matter what your major, you will participate in groups and organizations that will consistently ask or expect you to lead. The best leader is authentic, has integrity, is self- and other-aware, and acts with this awareness firmly in mind. Good leaders, that is, act mindfully with respect for the people and world around them. This course explores your development as a mindful focusing inward and outward, reflecting on where you have come from and where you are going, what type of world you want to live in, your relationships with others, and how you can be an effective leader.

Energy.

...and more authentic and are rewarded for doing so. Why should you want to be more authentic? Misrepresenting yourself costs energy.

More importantly, people just seem to know intuitively who is authentic and who is not. If you are, you will be seen as more trustworthy, more deserving of love, more skilled as a leader, and more likable. This course will help you to better recognize and improve on the areas of personal development called for in every Capstone course: your education up to now and in the future; your relationships; your role in society; your vocational callings and choice of career; and your spirituality. Assignments include group projects, personal projects, and lots of small and large group discussions.

Spring 2022
Capstone classes may NOT be taken Pass/Fail. You may take only ONE Capstone class before graduation.
--Where are we really living day to day? Are we holding onto our past? Are we planning for and overwhelmed by the future? What happened to the present? We will explore these particular challenges of first gen students including the trialblazing necessary to enter and thrive in college and the way in which their past can be seen as an accomplishment that informs their lives but doesn't hold them back from exploring the world in a fearless and unfolded way.

Capstone: Growing Up Ethnic in America Sarr, Akua
Spring 2022
In this seminar students will read writing that depicts a variety of experiences but suggest that what constitutes an American identity is far from settled. Ethnic difference has a profound effect on personal and social understandings of what it means to be an American. As we discuss the literature, students will be expected to share their own personal narratives of growing up—stories of race, ethnicity, class, gender, faith, and nationality—and what it means to be American. Some of the writers we will read include: Humpha Lahiri, Amy Tan, Louise Erdrich, Chang Rae-Lee, Sherman Alexie, Sandra Cisneros, Junot Diaz, Edwidge Danticat, Mat Johnson, and Ta-Nehisi Coates.

Capstone: Creativity and Self Roberts, Susan A
Spring 2022
Capstone classes are for seniors only and may NOT be taken Pass/Fail. You may take only ONE Capstone class before graduation. Creativity is the act of bringing that which does not exist into existence, of bringing forward that which has previously never lived. It is the remarkable experience of bringing something out of nothing. In order to bring something new into the world, you must be willing to go into the unknown. Just as the poet might listen inwardly and stay open for the next word and just as the artist might pay attention to the images that arise from within, creativity asks that we have one foot in what is known, or existence, and one foot in what is not-known, or non-existence. This requires an ability to be still, to look both inward and outward, and then to record the result in art-making or in life. In this Capstone course, students will attend to two areas: the meaning of art and mindfulness, and their own history of making (or lack thereof) and how they would like to build artistic sensibility, creativity and creation into their lives. We will investigate the spiritual roots of creativity, and the ways in which creativity and appreciation of art and art-making can contribute meaningfully to the development of one as a full citizen of the world. You do not have to have any experience in art-making to take this course. Texts include: Creativity: Where the Divine and Human Meet, by Matthew Fox and Art and Fear: Observations on the Perils (and Rewards) of Artmaking, by David Bayles and Ted Orland.

Capstone: Your Roaring 20s (and Beyond) Regan, Tracy L
Spring 2022
Capstone classes are for seniors only and may NOT be taken Pass/Fail. You may take only ONE Capstone class before graduation. As your graduation from Boston College looms, soon you’ll have the opportunity to join the chorus of people proclaiming that college was the best four years of their life. Why does everyone say that and do you feel that way? If not, will you feel that way at some point in the future? The coveted real world awaits you where you’ll finally have a chance to go set the world aflame. As you approach this important juncture in your life, this class will provide you the opportunity to reflect and discuss your time on the Heights all the while helping you prepare for the decade(s) ahead. How did you grow during your time here? What lessons did you learn? Do you have any regrets? What are your most cherished memories? Did you become a person for others? And how will you carry the lessons you learned into the next proverbial chapter of your life as you navigate a career, relationships, a family, getting older, etc.? You’ll have a chance to read a variety of viewpoints about the next decade of your life and beyond. As a class, we’ll consider your academic, professional, and personal development in the context of relationships, spirituality, and citizenship. You’ll join in conversation with your peers, under the guidance of an older economist who has experienced a lot of this already, and be ready to engage in lively dialogue on a weekly basis with the opportunity to reflect, think, and debate matters through a series of written assignments.

Capstone: Boston College/Your Life Burns, John J
Spring 2022
This seminar will focus on the historical development of Boston College and the continually evolving interaction between its traditions and its students. Students will do archival research on some aspect of Boston College in which they have a personal interest and will record oral histories with faculty, administrators, and alumni who can describe the ambiance and personalities of different periods that have shaped the modern university. All students will write a series of reflective essays on their experience with Boston College traditions and the impact it has had on their own personal views of themselves, their pasts, and their futures.

Capstone: Desire and Discernment Muldoon, Timothy P
Spring 2022
Seniors only. Capstone classes may NOT be taken Pass/Fail. You may take only ONE Capstone class before graduation. This course aims to help students review the process of their education and preview the process of making long-term commitments by taking a look, loving look how we experience desire, and how we act upon those desires to construct a life well lived. The course will first expose students to spiritual practices of discernment, rooted in the Ignatian and Benedictine spiritual traditions. Second, it will involve careful thinking about stories of discernment which involve the sorting and pruning of desire. Discussions will reflect on these stories, in order to help each other consider what they mean for our own lives.

Capstone: Poets, Philosophers, and Mapmakers McNellis, Paul W
Spring 2022
We go through life with mental maps of reality in various degrees, implicit or explicit. A liberal arts education presupposes such a map of the intelligible world. Is it accurate? What does your map of reality look like? How has it changed since freshman year? The goal of the seminar is to help you see what kind of map you implicitly have now and to begin to ask what you want the map to look like ten years after graduation. How do you develop an open rather than closed map?

Capstone: Finding and Following Life’s Calling Harrington, J
Spring 2022
Seniors only. Capstone classes may NOT be taken Pass/Fail. You may take only ONE Capstone class before graduation. We live in changing times. Major social trends are impacting us as individuals, employees, family members, and citizens. These changes call on us to play a much more pro-active role in managing our lives (where possible) and to respond to the unexpected callings we hear. Doing this effectively requires an in-depth self-understanding coupled with a heartfelt desire to live a life of meaning. This course will help students develop a clearer sense of identity through a rigorous self-assessment process. It will help each answer the questions: Who am I? How can I make a difference in the world?

Capstone: Moral of Story Sullivan, Ethan A
Spring 2022
Hanging in Boston’s Museum of Fine Arts is the magna opus of Paul Gauguin, “Where Do We Come From? What Are We? Where Are We Going?”. Gauguin left family, friends, and a career in banking to flee to Tahiti, in search of life’s meaning. “Where Do We Come From? What Are We? Where Are We Going?” is his ultimate representation of these philosophical questions. We will move through a different artistic medium -- short story and novel-- to examine Gauguin’s work. We will read Hemingway’s In Our Time and Hitchcock’s short story “The Birds” and a historical novel, C.J. Sansom’s Wolf Hall. We will move through a different artistic medium--that of the short story--as we ask those same questions. We will examine complex plots and characters in the hopes of exploring our own stories.

CHEM110924
General Chemistry I Elander, Brooke Fall 2021
This course is intended for students whose major interest is science or medicine. It offers a rigorous introduction to the principles of chemistry with special emphasis on quantitative relationships and chemical equilibrium and the structures of atoms, molecules, and crystals. The properties of the more common elements and compounds are considered against a background of these principles and the periodic table.

Credits: 0
Room and Schedule: Merkert Chemistry Center 129 F 10:00AM-10:50AM Satisfies Core Requirement: Natural Science Prerequisites: One year of high school chemistry. Corequisites: CHEM1111
Cross-listed with: None Frequency: Every Fall

CHEM111170
Honors Modern Chemistry I, Waegele, Matthias
Fall 2021
This course is intended for students from any major (including undecided) with a strong foundation and interest in chemistry. CHEM1117 begins with the theoretical description of atomic and molecular structure and with examples of modern experimental techniques for visualizing and manipulating individual atoms and molecules. The laws of thermodynamics and kinetics are studied to understand why chemical reactions occur at all, why it is that once reactions start they can’t go all the way to completion, and how molecules act as catalysts to speed up reactions without being consumed themselves.

Credits: 3
Room and Schedule: Merkert Chemistry Center 130 TuTh 09:00AM-10:15AM Satisfies Core Requirement: Natural Science

CHEM111703
Honors Modern Chemistry I Howshall, Casey P
Fall 2021
Laboratory required for all students enrolled in CHEM1117. This laboratory course stresses discovery-based experiments. It uses state-of-the-art instrumentation to illustrate the principles discussed in CHEM1117-1118 and introduces students to techniques used in modern chemical research. One three-hour period per week.

Credits: 1
Room and Schedule: Merkert Chemistry Center 120 M 01:00PM-04:00PM Satisfies Core Requirement: None

CHEM16101
Life Science Chemistry Hartmann, Nathaniel J Fall 2021
This course first introduces basic chemical principles in preparation for a discussion of the chemistry of living systems that forms the major part of the course. Organic chemical concepts will be introduced as necessary, and applications will be made wherever possible to physiological processes and disease states that can be understood in terms of their underlying chemistry.

Credits: 3
Room and Schedule: Fulton Hall 511 (Auditorium) TuTh 10:30AM-11:45AM Satisfies Core Requirement: None Prerequisites: None Corequisites: CHEM1163 Cross-listed with: None Frequency: Every Fall

Student Level: Undergraduate Comments: None Status: Offered
An introduction to the chemistry, properties, and uses of organic compounds. The correlation of structure with properties, reaction mechanisms, and the modern approach to structural and synthetic problems are stressed throughout. In the laboratory, the aim is acquisition of sound experimental techniques through the synthesis of selected compounds.

Credits: 3
Room and Schedule: Merkert Chemistry Center 127 W 05:00PM-05:50PM Satisfies Core Requirement: None
Prerequisites: CHEM1110 or Note that CHEM2231 is a prerequisite for CHEM2232
Corequisites: CHEM2233
Cross-listed with: None Frequency: Every Fall
Student Level: Undergraduate Comments: None
Status: Offered

CHEM223106
Organic Chemistry I Dalzon, Annabelle M Fall 2021
An introduction to the chemistry, properties, and uses of organic compounds. The correlation of structure with properties, reaction mechanisms, and the modern approach to structural and synthetic problems are stressed throughout. In the laboratory, the aim is acquisition of sound experimental techniques through the synthesis of selected compounds.

Credits: 3

Organic Chemistry Laboratory I Nijjar, Amarjit K
Fall 2021
Laboratory required of all students enrolled in CHEM2231. One four-hour period per week. Students acquire fundamental organic lab techniques in the context of principles learned in the lecture course. The semester concludes with a group project where students are required to design their own experiments to solve a problem.
Credits: 1
Room and Schedule: Merkert Chemistry Center 18 Th 05:00PM-08:50PM Satisfies Core Requirement: None
Prerequisites: None Corequisites: CHEM2231 Cross-listed with: None Frequency: Every Fall

Honors Organic Chemistry I Byers, Jeffery; Li, Shih-Yuan Fall 2021
This course is a continuation of the CHEM1117-1118 honors sequence and will concentrate on the structure, bonding, and reactivity of organic compounds. Particular emphasis will be placed on stereochemistry, conformational analysis, reaction mechanisms, principles of organic synthesis, and modern spectroscopic methods.
Credits: 3
Room and Schedule: Merkert Chemistry Center 129 TuTh 09:00AM-10:15AM Satisfies Core Requirement: None
Prerequisites: CHEM1118 and CHEM1117 and CHEM1119 and CHEM1120 or Permission of Department
Corequisites: CHEM2243 Cross-listed with: None Frequency: Every Fall
Student Level: Undergraduate Comments: None Status: Offered

Honors Organic Chemistry I Johnson, Stephanie A
Fall 2021
This course is a continuation of the CHEM1117-1118 honors sequence and will concentrate on the structure, bonding, and reactivity of organic compounds. Particular emphasis will be placed on stereochemistry, conformational analysis, reaction mechanisms, principles of organic synthesis, and modern spectroscopic methods.
Credits: 0
Room and Schedule: Merkert Chemistry Center 129 W 06:00PM-06:50PM Satisfies Core Requirement: None
Prerequisites: CHEM1118 and CHEM1117 and CHEM1119 and CHEM1120 or Permission of Department

Honors Organic Chemistry I Laboratory Young, Allison P
Fall 2021
Laboratory course required for students enrolled in Honors Organic Chemistry (CHEM2241). Students will be instructed in experimental techniques relevant to research in contemporary organic chemistry. It will solidify concepts that are taught in lecture and provide a forum for discovery-based learning in organic chemistry.
Credits: 3
Room and Schedule: Merkert Chemistry Center 21 W 12:15PM-04:15PM Satisfies Core Requirement: None
Prerequisites: None Corequisites: CHEM2241 Cross-listed with: None Frequency: Every Fall

CHEM446103
Biochemistry I Deng, Yu Fall 2021
This course is a two-semester introductory-level course in biochemistry. Topics in the first semester concentrate on protein structure and function, bioenergetics, kinetics and mechanisms of enzyme reactions, intermediary metabolism, control of metabolic pathways, and photosynthesis. Topics in the second semester concentrate on the structure of nucleic acids, recombinant DNA technology, mechanisms of gene rearrangements, DNA replication, RNA synthesis and splicing, protein synthesis, control of gene expression, membrane transport, and hormone action. Experimental methods will also be discussed as they relate to course topics.
Credits: 0
Room and Schedule: Higgins Hall 225 Tu 06:00PM-06:50PM Satisfies Core Requirement: None
Prerequisites: CHEM2231 and BIOL2000 and CHEM2232 or equivalent. Corequisites: None
Cross-listed with: None Frequency: Every Fall Student Level: Both Comments: None Status: Offered

CHEM446104
Biochemistry I Osgood, Arianna O Fall 2021
This course is a two-semester introductory-level course in biochemistry. Topics in the first semester concentrate on protein structure and function, bioenergetics, kinetics and mechanisms of enzyme reactions, intermediary metabolism, control of metabolic pathways, and photosynthesis. Topics in the second semester concentrate on the structure of nucleic acids, recombinant DNA technology, mechanisms of gene rearrangements, DNA replication, RNA synthesis and splicing, protein synthesis, control of gene expression, membrane transport, and hormone action. Experimental methods will also be discussed as they relate to course topics.

Biochemistry (Chemistry Majors) Gao, Jianmin Fall 2021
This course is an accelerated one-semester survey of the basic principles of biochemistry emphasizing a broad understanding of the chemical events in living systems. Although the course is an introduction to biochemistry, prior proficiency in general and organic chemistry is required. Topics will include structure and function of biological molecules, including proteins, enzymes, nucleic acids and biological membranes. Also covered in the course will be bioenergetics, metabolism and photosynthesis. Experimental methods will also be discussed as they relate to course topics. This course fulfills the biochemistry requirement for the Chemistry major.
Credits: 3
Room and Schedule: Campion Hall 302 TuTh 09:00AM-10:15AM Satisfies Core Requirement: None
Prerequisites: CHEM2232 and CHEM2231. Non-chemistry majors are requested to consult with the instructor before registering for this course.
Corequisites: None Cross-listed with: None Frequency: Every Fall Student Level: Undergraduate Comments: None Status: Offered

CHEM553901
Principles and Applications of NMR Spectroscopy Jayasundera, Thusitha
Fall 2021
Nuclear Magnetic Resonance (NMR) is the bread and butter for all organic chemists. This course will introduce the theory of NMR spectroscopy, with concurrent hands-on experiments that illustrate these concepts firsthand and make the subject matter more interactive.

Applications of NMR in biochemistry will also be discussed, with a guided hands-on project that exemplifies how NMR is utilized to study macromolecules (such as proteins and nucleic acids), providing valuable practical experience. Material covered in this class will prepare you well for graduate studies or a chemistry/biochemistry-related career in industry.

Credits: 3

Undergraduate Chemical Research I Assigned, Department
Fall 2021
Course is intended for seniors. Continuation to CHEM5592 requires permission of the adviser.
The essential feature of this course is an independent research project performed under the supervision of a faculty member. The individual work will be preceded by a series of lectures and demonstrations on the use of the library and several essential laboratory techniques. Credits: 3
Room and Schedule: BY ARRANGEMENT Satisfies Core Requirement: None Prerequisites: Permission of Department Corequisites: None

CHEM559501
Advanced Research in Chemistry | Assigned, Department
Fall 2021 Seniors only
Arrangement with an individual faculty member and departmental permission is required. This is a two-semester course and may not be taken for only one semester. A substantial independent research project performed under the supervision of a faculty member. Seniors whose projects are judged by the department to be of the highest quality, and who maintain a minimum GPA of 3.70, will be nominated for Scholar of the College recognition.

Credits: 6
Room and Schedule: BY ARRANGEMENT

CHEM667601
Physical Chemistry: Principles and Applications Bao, Junwei L
Fall 2021

This course intends to build a solid and rigorous foundation for chemistry graduate students to understand chemistry and materials at the microscopic level, and study the physical nature of bonding and chemical reaction dynamics quantitatively. We focus on fundamental principles of quantum mechanics and their connections to chemistry/chemical physics. Topics covered in this course include principles of quantum mechanics, the connections between classical and quantum dynamics, exactly solvable systems, variational principle, introductory perturbation theory, and Hartree-Fock theory. We will also cover some necessary mathematical tools that are tremendously useful in understanding modern physical chemistry.

Credits: 3
Room and Schedule: BY ARRANGEMENT

Prerequisites: This course is theory/math-intensive and involves active learning. We strongly recommend students who are well prepared in introductory quantum mechanics (one-semester undergraduate-level quantum mechanics or equivalent) and in math (multivariable calculus, etc.).

CHEM999901
Doctoral Continuation Mahoney, Dale L
Fall 2021
Admitted students who have been admitted to candidacy for the Ph.D. degree are required to register and pay the fee for doctoral continuation during each semester of their candidacy. Doctoral Continuation requires a commitment of at least 20 hours per week working on the dissertation.
Credits: 1
Room and Schedule: By Arrangement Satisfies Core Requirement: None Prerequisites: None Corequisites: None Cross-listed with: None Frequency: Every Fall, Every Spring Student Level: Graduate Comments: None Status: Offered

Chemistry Courses: Spring 2022

CHEM110601
Chemistry and Society II Morabito, Joseph V Spring 2022
For non-science majors or for those who do not require a lab science course. This is a two-semester sequence. The second semester focuses on the basic principles of organic chemistry and topics covered include the chemistry of life, nutrition, medicine, and agriculture. The goal of the course is to develop a knowledge base from which one can make intelligent decisions about local global environmental issues as well as formulate solutions to the ever-increasingly complex problems of today's technological society.
Credits: 3
Room and Schedule: Fulton Hall 511 (Auditorium) TuTh 03:00PM-04:15PM Satisfies Core Requirement: Natural Science
Prerequisites: None Corequisites: None Cross-listed with: None Frequency: Every Spring Student Level: Undergraduate Comments: None Status: Offered

CHEM111001
General Chemistry II Hartmann, Nathaniel J Spring 2022
For non-science majors or for those who do not require a lab science course. This is a two-semester sequence. CHEM111101
General Chemistry II Hartmann, Nathaniel J Spring 2022
This course is intended for students whose major interest is science or medicine. It offers a rigorous introduction to the principles of chemistry with special emphasis on quantitative relationships, chemical equilibrium, and the structures of atoms, molecules, and crystals. The properties of the more common elements and compounds are considered against a background of these principles and the periodic table.
Credits: 3
Room and Schedule: By Arrangement Satisfies Core Requirement: Natural Science
Prerequisites: CHEM1109 Corequisites: CHEM1112 Cross-listed with: None Frequency: Every Spring Student Level: Undergraduate Comments: None Status: Offered

CHEM111102
General Chemistry II Hartmann, Nathaniel J Spring 2022
This course is intended for students whose major interest is science or medicine. It offers a rigorous introduction to the principles of chemistry with special emphasis on quantitative relationships, chemical equilibrium, and the structures of atoms, molecules, and crystals. The properties of the more common elements and compounds are considered against a background of these principles and the periodic table.
Credits: 3
Room and Schedule: By Arrangement Satisfies Core Requirement: Natural Science
Prerequisites: CHEM1109 Corequisites: CHEM1112 Cross-listed with: None Frequency: Every Spring Student Level: Undergraduate Comments: None Status: Offered

CHEM111103
General Chemistry II Young, Allison P Spring 2022
This course is intended for students whose major interest is science or medicine. It offers a rigorous introduction to the principles of chemistry with special emphasis on quantitative relationships, chemical equilibrium, and the structures of atoms, molecules, and crystals.
The properties of the more common elements and compounds are considered against a background of these principles and the periodic table.

Credits: 3
Room and Schedule: Merkert Chemistry Center 127 MWF 12:00 Noon-12:50PM Satisfies Core Requirement: Natural Science
Prerequisites: CHEM1109 Corequisites: CHEM1112 Cross-listed with: None Frequency: Every Spring Student Level: Undergraduate Comments: None
Status: Offered

CHEM111010
General Chemistry II Wilkes, James R Spring 2022
This course is intended for students whose major interest is science or medicine. It offers a rigorous introduction to the principles of chemistry with special emphasis on quantitative relationships, chemical equilibrium, and the structures of atoms, molecules, and crystals. The properties of the more common elements and compounds are considered against a background of these principles and the periodic table.
Credits: 0
Room and Schedule: Merkert Chemistry Center 129 M 04:00PM-04:50PM Satisfies Core Requirement: Natural Science
Prerequisites: CHEM1109 Corequisites: CHEM1112 Cross-listed with: None Frequency: Every Spring Student Level: Undergraduate Comments: None
Status: Offered

CHEM111011
General Chemistry II Wilkes, James R Spring 2022
This course is intended for students whose major interest is science or medicine. It offers a rigorous introduction to the principles of chemistry with special emphasis on quantitative relationships, chemical equilibrium, and the structures of atoms, molecules, and crystals. The properties of the more common elements and compounds are considered against a background of these principles and the periodic table.
Credits: 0
Room and Schedule: Merkert Chemistry Center 129 M 03:00PM-03:50PM Satisfies Core Requirement: Natural Science
Prerequisites: CHEM1109 Corequisites: CHEM1112 Cross-listed with: None Frequency: Every Spring Student Level: Undergraduate Comments: None
Status: Offered

CHEM111012
General Chemistry II Rubino, Madison A Spring 2022
This course is intended for students whose major interest is science or medicine. It offers a rigorous introduction to the principles of chemistry with special emphasis on quantitative relationships, chemical equilibrium, and the structures of atoms, molecules, and crystals. The properties of the more common elements and compounds are considered against a background of these principles and the periodic table.
Credits: 0
Room and Schedule: Merkert Chemistry Center 129 W 03:00PM-03:50PM Satisfies Core Requirement: Natural Science
Prerequisites: CHEM1109 Corequisites: CHEM1112 Cross-listed with: None Frequency: Every Spring Student Level: Undergraduate Comments: None
Status: Offered

CHEM111013
General Chemistry II Begin, Elijah J Spring 2022
This course is intended for students whose major interest is science or medicine. It offers a rigorous introduction to the principles of chemistry with special emphasis on quantitative relationships, chemical equilibrium, and the structures of atoms, molecules, and crystals. The properties of the more common elements and compounds are considered against a background of these principles and the periodic table.
Credits: 0
Room and Schedule: Merkert Chemistry Center 129 Th 03:00PM-03:50PM Satisfies Core Requirement: Natural Science
Prerequisites: CHEM1109 Corequisites: CHEM1112 Cross-listed with: None Frequency: Every Spring Student Level: Undergraduate Comments: None
Status: Offered

CHEM111014
General Chemistry II Wilkes, James R Spring 2022
This course is intended for students whose major interest is science or medicine. It offers a rigorous introduction to the principles of chemistry with special emphasis on quantitative relationships, chemical equilibrium, and the structures of atoms, molecules, and crystals. The properties of the more common elements and compounds are considered against a background of these principles and the periodic table.
Credits: 0
Room and Schedule: Merkert Chemistry Center 129 F 12:00 Noon-12:50PM Satisfies Core Requirement: Natural Science
Prerequisites: CHEM1109 Corequisites: CHEM1112 Cross-listed with: None Frequency: Every Spring Student Level: Undergraduate Comments: None
Status: Offered

CHEM111015
General Chemistry II Wilkes, James R Spring 2022
This course is intended for students whose major interest is science or medicine. It offers a rigorous introduction to the principles of chemistry with special emphasis on quantitative relationships, chemical equilibrium, and the structures of atoms, molecules, and crystals. The properties of the more common elements and compounds are considered against a background of these principles and the periodic table.
This course is intended for students whose major interest is science or medicine. It offers a rigorous introduction to the principles of chemistry with special emphasis on quantitative relationships, chemical equilibrium, and the structures of atoms, molecules, and crystals. The properties of the more common elements and compounds are considered against a background of these principles and the periodic table.

Credits: 0
Room and Schedule: Merkert Chemistry Center 129 W 10:00AM-10:50AM
Satisfies Core Requirement: Natural Science Prerequisites: CHEM1109
Corequisites: CHEM1112 Cross-listed with: None Frequency: Every Spring Student Level: Undergraduate Comments: None Status: Offered

CHEM111016
General Chemistry II Rubino, Madison A Spring 2022
This course is intended for students whose major interest is science or medicine. It offers a rigorous introduction to the principles of chemistry with special emphasis on quantitative relationships, chemical equilibrium, and the structures of atoms, molecules, and crystals. The properties of the more common elements and compounds are considered against a background of these principles and the periodic table.

Credits: 0

CHEM111018
General Chemistry II Elander, Brooke Spring 2022
This course is intended for students whose major interest is science or medicine. It offers a rigorous introduction to the principles of chemistry with special emphasis on quantitative relationships, chemical equilibrium, and the structures of atoms, molecules, and crystals. The properties of the more common elements and compounds are considered against a background of these principles and the periodic table.

Credits: 0
Room and Schedule: Merkert Chemistry Center 129 M 02:00PM-02:50PM Satisfies Core Requirement: Natural Science Prerequisites: CHEM1109 Corequisites: CHEM1112 Cross-listed with: None Frequency: Every Spring Student Level: Undergraduate Comments: None Status: Offered

CHEM111019
General Chemistry II Reich, Shoshana Spring 2022
This course is intended for students whose major interest is science or medicine. It offers a rigorous introduction to the principles of chemistry with special emphasis on quantitative relationships, chemical equilibrium, and the structures of atoms, molecules, and crystals. The properties of the more common elements and compounds are considered against a background of these principles and the periodic table.

Credits: 0
Room and Schedule: Merkert Chemistry Center 129 W 01:00PM-01:50PM Satisfies Core Requirement: Natural Science Prerequisites: CHEM1109 Corequisites: CHEM1112 Cross-listed with: None Frequency: Every Spring Student Level: Undergraduate Comments: None Status: Offered

CHEM111020
General Chemistry II Reich, Shoshana Spring 2022
This course is intended for students whose major interest is science or medicine. It offers a rigorous introduction to the principles of chemistry with special emphasis on quantitative relationships, chemical equilibrium, and the structures of atoms, molecules, and crystals. The properties of the more common elements and compounds are considered against a background of these principles and the periodic table.

Credits: 0
Room and Schedule: Merkert Chemistry Center 129 F 11:00AM-11:50AM Satisfies Core Requirement: Natural Science Prerequisites: CHEM1109 Corequisites: CHEM1112 Cross-listed with: None Frequency: Every Spring Student Level: Undergraduate Comments: None Status: Offered

CHEM111021
General Chemistry II Yan, Jing Spring 2022
This course is intended for students whose major interest is science or medicine. It offers a rigorous introduction to the principles of chemistry with special emphasis on quantitative relationships, chemical equilibrium, and the structures of atoms, molecules, and crystals. The properties of the more common elements and compounds are considered against a background of these principles and the periodic table.

Credits: 0

CHEM111202
General Chemistry Laboratory II Wang, Dunwei Spring 2022
Laboratory required of all students enrolled in CHEM1110. One three-hour period per week. Experiments reflect and apply the principles learned in the lecture course. Computers are used to both acquire and analyze data. The semester concludes with a group project where students are required to design their own experiments to solve a problem.
Credits: 1
Room and Schedule: Merkert Chemistry Center 116 Tu 09:00AM-11:50AM Satisfies Core Requirement: Natural Science Prerequisites: CHEM1111 Corequisites: CHEM1110 Cross-listed with: None Frequency: Every Spring Student Level: Undergraduate Comments: None Status: Offered

CHEM111203
General Chemistry Laboratory II Waegle, Matthias Spring 2022
Laboratory required of all students enrolled in CHEM1110. One three-hour period per week. Experiments reflect and apply the principles learned in the lecture course. Computers are used to both acquire and analyze data. The semester concludes with a group project where students are required to design their own experiments to solve a problem.
Credits: 1
Room and Schedule: Merkert Chemistry Center 116 Th 09:00AM-11:50AM Satisfies Core Requirement: Natural Science Prerequisites: CHEM1111 Corequisites: CHEM1110 Cross-listed with: None Frequency: Every Spring Student Level: Undergraduate Comments: None Status: Offered

CHEM111204
General Chemistry Laboratory II Weerapana, Eranthie Spring 2022
Laboratory required of all students enrolled in CHEM1110. One three-hour period per week. Experiments reflect and apply the principles learned in the lecture course. Computers are used to both acquire and analyze data. The semester concludes with a group project where students are required to design their own experiments to solve a problem.
Credits: 1
Room and Schedule: Merkert Chemistry Center 116 F 10:00AM-12:50PM Satisfies Core Requirement: Natural Science Prerequisites: CHEM1111 Corequisites: CHEM1110 Cross-listed with: None Frequency: Every Spring Student Level: Undergraduate Comments: None Status: Offered

CHEM111205
General Chemistry Laboratory II Chatterjee, Abhishek Spring 2022
Laboratory required of all students enrolled in CHEM1110. One three-hour period per week. Experiments reflect and apply the principles learned in the lecture course. Computers are used to both acquire and analyze data. The semester concludes with a group project where students are required to design their own experiments to solve a problem.

This is the second part of a one-year course that serves as the Honors alternative to the two-semester General Chemistry CHEM1109-1110. This course will build upon the chemical fundamentals that were covered in the first semester to introduce organic chemistry as well as its physical basis. Topics to be covered include the structure and reactivity of organic compounds.

Credits: 3
Room and Schedule: Merkert Chemistry Center 130 TuTh 09:00AM-10:15AM Satisfies Core Requirement: Natural Science
Prerequisites: CHEM1117 or Permission of Department Corequisites: CHEM1120
Cross-listed with: None Frequency: Every Spring Student Level: Undergraduate Comments: None Status: Offered

CHEM111201 Honors Modern Chemistry Laboratory II Young, Allison P Spring 2022
Laboratory required for all students enrolled in CHEM1118. This laboratory course stresses discovery-based experiments. It uses state-of-the-art instrumentation to illustrate the principles discussed in CHEM1117-1118 and introduces students to techniques used in modern chemical research. One three-hour period per week.
Credits: 1
Room and Schedule: Merkert Chemistry Center 120 M 01:00PM-04:00PM Satisfies Core Requirement: None
Prerequisites: None Corequisites: CHEM1118 Cross-listed with: None Frequency: Every Spring Student Level: Undergraduate Comments: None Status: Offered

CHEM112002 Honors Modern Chemistry Laboratory II Young, Allison P Spring 2022
Laboratory required for all students enrolled in CHEM1118. This laboratory course stresses discovery-based experiments. It uses state-of-the-art instrumentation to illustrate the principles discussed in CHEM1117-1118 and introduces students to techniques used in modern chemical research. One three-hour period per week.
Credits: 1
Room and Schedule: Merkert Chemistry Center 120 M 05:30PM-08:30PM Satisfies Core Requirement: None
Prerequisites: None Corequisites: CHEM1118 Cross-listed with: None Frequency: Every Spring Student Level: Undergraduate Comments: None Status: Offered

CHEM113113 General Chemistry Laboratory II Nijjar, Amarjit K Spring 2022
Laboratory required of all students enrolled in CHEM1110. This three-hour period per week.
Experiments reflect and apply the principles learned in the lecture course. Computers are used to both acquire and analyze data. The semester concludes with a group project where students are required to design their own experiments to solve a problem.
Credits: 1
Room and Schedule: Merkert Chemistry Center 116 Th 05:30PM-08:20PM Satisfies Core Requirement: Natural Science
Prerequisites: CHEM1111 Corequisites: CHEM1110
Cross-listed with: None Frequency: Every Spring Student Level: Undergraduate Comments: None Status: Offered

CHEM11501 Fundamentals of Chemistry Fox, Daniel J Spring 2022
This course is designed to prepare students for the first semester of General Chemistry. The course will consist of two major parts, the first of which will focus on mathematical skills that are fundamental to the deeper understanding of chemical concepts, including but not limited to: ratios, percentages, algebra, exponents, base 10, and natural logarithms. The second part of the course will focus on basic chemical concepts such as atomic structure and isotopes, balancing chemical equations, and stoichiometry. Once they have mastered these proficiencies, students will have a strong foundation in the skills necessary to succeed in higher level chemistry courses.
Credits: 3
Room and Schedule: Merkert Chemistry Center 130 MWF 01:00PM-01:50PM Satisfies Core Requirement: None
Prerequisites: None Corequisites: None Cross-listed with: None Frequency: Every Spring Student Level: Undergraduate Comments: None Status: Offered

CHEM117801 Gateway: General Chemistry Discussion II Yared, Tarah J Spring 2022
Required of all students in Gateway General Chemistry. Discussion will offer a comprehensive review of the material presented in lecture, with a focus on the key mathematical and chemical concepts needed for problem-solving, in a small group setting.
Credits: 1
Room and Schedule: Merkert Chemistry Center 129 Th 04:30PM-05:20PM Satisfies Core Requirement: None
Prerequisites: Permission of Department Corequisites: CHEM1110 Cross-listed with: None Frequency: Every Fall Student Level: Undergraduate Comments: None Status: Offered

CHEM223201 Organic Chemistry II Deak, Holly L Spring 2022
An introduction to the chemistry, properties, and uses of organic compounds. The correlation of structure with properties and reaction mechanisms and the modern approach to structural and synthetic problems are stressed throughout. In the laboratory, the aim is acquisition of sound experimental techniques through the synthesis of selected compounds.
Credits: 3
Room and Schedule: Merkert Chemistry Center 127 W 06:00PM-06:50PM Satisfies Core Requirement: None
Prerequisites: CHEM1117 or Permission of Department Corequisites: CHEM1120
Cross-listed with: None Frequency: Every Spring Student Level: Undergraduate Comments: None Status: Offered

CHEM223202 Organic Chemistry II Deak, Holly L Spring 2022
An introduction to the chemistry, properties, and uses of organic compounds. The correlation of structure with properties and reaction mechanisms and the modern approach to structural and synthetic problems are stressed throughout. In the laboratory, the aim is acquisition of sound experimental techniques through the synthesis of selected compounds.
Credits: 3
Room and Schedule: None Satisfies Core Requirement: None Prerequisites: CHEM2231 Corequisites: CHEM2234
Cross-listed with: None Frequency: Every Spring Student Level: Undergraduate Comments: None Status: Offered
CHEM22303
Organic Chemistry II Zhang, Xiao-Xiang Spring 2022
An introduction to the chemistry, properties, and uses of organic compounds. The correlation of structure with properties and reaction mechanisms and the modern approach to structural and synthetic problems are stressed throughout. In the laboratory, the aim is acquisition of sound experimental techniques through the synthesis of selected compounds.
Credits: 3
Room and Schedule: Merkert Chemistry Center 127 MWF 11:00AM-11:50AM Satisfies Core Requirement: None
Prerequisites: CHEM2231 Corequisites: CHEM2234 Cross-listed with: None Frequency: Every Spring
Student Level: Undergraduate Comments: None Status: Offered

CHEM22304
Organic Chemistry II Gao, Chenpeng Spring 2022
An introduction to the chemistry, properties, and uses of organic compounds. The correlation of structure with properties and reaction mechanisms and the modern approach to structural and synthetic problems are stressed throughout. In the laboratory, the aim is acquisition of sound experimental techniques through the synthesis of selected compounds.
Credits: 0
Room and Schedule: Merkert Chemistry Center 127 M 03:00PM-03:50PM Satisfies Core Requirement: None
Prerequisites: CHEM2231 Corequisites: CHEM2234 Cross-listed with: None Frequency: Every Spring
Student Level: Undergraduate Comments: None Status: Offered

CHEM22305
Organic Chemistry II Liang, Hao Spring 2022
An introduction to the chemistry, properties, and uses of organic compounds. The correlation of structure with properties and reaction mechanisms and the modern approach to structural and synthetic problems are stressed throughout. In the laboratory, the aim is acquisition of sound experimental techniques through the synthesis of selected compounds.
Credits: 0
Room and Schedule: Merkert Chemistry Center 127 W 04:00PM-04:50PM Satisfies Core Requirement: None
Prerequisites: CHEM2231 Corequisites: CHEM2234 Cross-listed with: None Frequency: Every Spring
Student Level: Undergraduate Comments: None Status: Offered

CHEM22306
Organic Chemistry II Liang, Hao Spring 2022
An introduction to the chemistry, properties, and uses of organic compounds. The correlation of structure with properties and reaction mechanisms and the modern approach to structural and synthetic problems are stressed throughout. In the laboratory, the aim is acquisition of sound experimental techniques through the synthesis of selected compounds.
Credits: 0
Room and Schedule: Merkert Chemistry Center 127 W 05:00PM-05:50PM Satisfies Core Requirement: None
Prerequisites: CHEM2231 Corequisites: CHEM2234 Cross-listed with: None Frequency: Every Spring
Student Level: Undergraduate Comments: None Status: Offered

CHEM22307
Organic Chemistry II Gao, Chenpeng Spring 2022
An introduction to the chemistry, properties, and uses of organic compounds. The correlation of structure with properties and reaction mechanisms and the modern approach to structural and synthetic problems are stressed throughout. In the laboratory, the aim is acquisition of sound experimental techniques through the synthesis of selected compounds.
Credits: 0
Room and Schedule: Merkert Chemistry Center 130 M 02:00PM-02:50PM Satisfies Core Requirement: None
Prerequisites: CHEM2231 Corequisites: CHEM2234 Cross-listed with: None Frequency: Every Spring
Student Level: Undergraduate Comments: None Status: Offered

CHEM22308
Organic Chemistry II Lee, Paul S Spring 2022
An introduction to the chemistry, properties, and uses of organic compounds. The correlation of structure with properties and reaction mechanisms and the modern approach to structural and synthetic problems are stressed throughout. In the laboratory, the aim is acquisition of sound experimental techniques through the synthesis of selected compounds.
Credits: 0
Room and Schedule: Merkert Chemistry Center 127 W 03:00PM-03:50PM Satisfies Core Requirement: None
Prerequisites: CHEM2231 Corequisites: CHEM2234 Cross-listed with: None Frequency: Every Spring
Student Level: Undergraduate Comments: None Status: Offered

CHEM22309
Organic Chemistry II Lee, Paul S Spring 2022
An introduction to the chemistry, properties, and uses of organic compounds. The correlation of structure with properties and reaction mechanisms and the modern approach to structural and synthetic problems are stressed throughout. In the laboratory, the aim is acquisition of sound experimental techniques through the synthesis of selected compounds.
Credits: 0
Room and Schedule: Campion Hall 300 F 01:00PM-01:50PM Satisfies Core Requirement: None
Prerequisites: CHEM2231 Corequisites: CHEM2234 Cross-listed with: None Frequency: Every Spring Student Level: Undergraduate Comments: None Status: Offered

CHEM22310
Organic Chemistry II Lee, Paul S Spring 2022
An introduction to the chemistry, properties, and uses of organic compounds. The correlation of structure with properties and reaction mechanisms and the modern approach to structural and synthetic problems are stressed throughout. In the laboratory, the aim is acquisition of sound experimental techniques through the synthesis of selected compounds.
Credits: 0
Room and Schedule: Merkert Chemistry Center 130 F 02:00PM-02:50PM Satisfies Core Requirement: None
Prerequisites: CHEM2231 Corequisites: CHEM2234 Cross-listed with: None Frequency: Every Spring
Student Level: Undergraduate Comments: None Status: Offered

CHEM22311
Organic Chemistry II Golden, Clare M Spring 2022
An introduction to the chemistry, properties, and uses of organic compounds. The correlation of structure with properties and reaction mechanisms and the modern approach to structural and synthetic problems are stressed throughout. In the laboratory, the aim is acquisition of sound experimental techniques through the synthesis of selected compounds.
Credits: 0
Room and Schedule: Merkert Chemistry Center 127 W 02:00PM-02:50PM Satisfies Core Requirement: None
Prerequisites: CHEM2231 Corequisites: CHEM2234 Cross-listed with: None Frequency: Every Spring
Student Level: Undergraduate Comments: None Status: Offered

CHEM22313
Organic Chemistry II Tedder, Mariah L Spring 2022
An introduction to the chemistry, properties, and uses of organic compounds. The correlation of structure with properties and reaction mechanisms and the modern approach to structural and synthetic problems are stressed throughout. In the laboratory, the aim is acquisition of sound experimental techniques through the synthesis of selected compounds.
Credits: 0
Room and Schedule: Merkert Chemistry Center 127 M 04:00PM-04:50PM Satisfies Core Requirement: None
Prerequisites: CHEM2231 Corequisites: CHEM2234 Cross-listed with: None Frequency: Every Spring
Student Level: Undergraduate Comments: None Status: Offered

CHEM22314
Organic Chemistry II Tedder, Mariah L Spring 2022
An introduction to the chemistry, properties, and uses of organic compounds. The correlation of structure with properties and reaction mechanisms and the modern approach to structural and synthetic problems are stressed throughout. In the laboratory, the aim is acquisition of sound experimental techniques through the synthesis of selected compounds.
Credits: 0
Room and Schedule: Merkert Chemistry Center 127 M 05:00PM-05:50PM Satisfies Core Requirement: None
Prerequisites: CHEM2231 Corequisites: CHEM2234 Cross-listed with: None Frequency: Every Spring
Student Level: Undergraduate Comments: None Status: Offered

CHEM22315
Organic Chemistry II Tedder, Mariah L Spring 2022
An introduction to the chemistry, properties, and uses of organic compounds. The correlation of structure with properties and reaction mechanisms and the modern approach to structural and synthetic problems are stressed throughout. In the laboratory, the aim is acquisition of sound experimental techniques through the synthesis of selected compounds.
Credits: 0
Room and Schedule: Campion Hall 204 Th 03:00PM-03:50PM Satisfies Core Requirement: None
Prerequisites: CHEM2231 Corequisites: CHEM2234 Cross-listed with: None Frequency: Every Spring
Student Level: Undergraduate Comments: None Status: Offered

CHEM22316
Organic Chemistry II Tedder, Mariah L Spring 2022
An introduction to the chemistry, properties, and uses of organic compounds. The correlation of structure with properties and reaction mechanisms and the modern approach to structural and synthetic problems are stressed throughout. In the laboratory, the aim is acquisition of sound experimental techniques through the synthesis of selected compounds.
Credits: 0
Room and Schedule: Campion Hall 204 Th 04:00PM-04:50PM Satisfies Core Requirement: None
Chemistry II, Anthony Spring 2022

An introduction to the chemistry, properties, and uses of organic compounds. The correlation of structure with properties and reaction mechanisms and the modern approach to structural and synthetic problems are stressed throughout. In the laboratory, the aim is acquisition of sound experimental techniques through the synthesis of selected compounds.

Credits: 3
Room and Schedule: Merkert Chemistry Center 187 Tu 12:00 Noon-02:50PM Satisfies Core Requirement: None
Prerequisites: CHEM2231 Corequisites: None Frequency: Every Spring Student Level: Undergraduate Comments: None Status: Offered

CHEM22318

Organic Chemistry II Deak, Holly L Spring 2022

An introduction to the chemistry, properties, and uses of organic compounds. The correlation of structure with properties and reaction mechanisms and the modern approach to structural and synthetic problems are stressed throughout. In the laboratory, the aim is acquisition of sound experimental techniques through the synthesis of selected compounds.

Credits: 3
Room and Schedule: Merkert Chemistry Center 127 MWF 10:00AM-10:50AM Satisfies Core Requirement: None
Prerequisites: CHEM2231 Corequisites: CHEM2234 Cross-listed with: None Frequency: Every Spring Student Level: Undergraduate Comments: None Status: Offered

CHEM223403

Organic Chemistry Laboratory II Snapper, Marc Spring 2022

Laboratory required of all students enrolled in CHEM2232. One four-hour period per week. Having acquired the necessary lab skills in Organic Chem Lab I, students now can carry out reaction chemistry in the laboratory that is being taught in the lecture course.

Credits: 1
Room and Schedule: Merkert Chemistry Center 18 Tu 12:00 Noon-03:50PM Satisfies Core Requirement: None
Prerequisites: CHEM2233 Corequisites: CHEM2232 Cross-listed with: None Frequency: Every Spring Student Level: Undergraduate Comments: None Status: Offered

CHEM223402

Organic Chemistry Laboratory II Byers, Jeffery Spring 2022

Laboratory required of all students enrolled in CHEM2232. One four-hour period per week. Having acquired the necessary lab skills in Organic Chem Lab I, students now can carry out reaction chemistry in the laboratory that is being taught in the lecture course.

Credits: 1
Room and Schedule: Merkert Chemistry Center 18 Tu 12:00 Noon-03:50PM Satisfies Core Requirement: None
Prerequisites: CHEM2233 Corequisites: CHEM2232 Cross-listed with: None Frequency: Every Spring Student Level: Undergraduate Comments: None Status: Offered

CHEM223407

Organic Chemistry Laboratory II Nijjar, Amarjit K Spring 2022

Laboratory required of all students enrolled in CHEM2232. One four-hour period per week. Having acquired the necessary lab skills in Organic Chem Lab I, students now can carry out reaction chemistry in the laboratory that is being taught in the lecture course.

Credits: 1
Room and Schedule: Merkert Chemistry Center 18 Tu 05:00PM-08:50PM Satisfies Core Requirement: None
Prerequisites: CHEM2233 Corequisites: CHEM2232 Cross-listed with: None Frequency: Every Spring Student Level: Undergraduate Comments: None Status: Offered

CHEM223408

Organic Chemistry Laboratory II Jayasundera, Thusitha Spring 2022

Laboratory required of all students enrolled in CHEM2232. One four-hour period per week. Having acquired the necessary lab skills in Organic Chem Lab I, students now can carry out reaction chemistry in the laboratory that is being taught in the lecture course.

Credits: 1
Room and Schedule: Merkert Chemistry Center 18 W 05:00PM-08:50PM Satisfies Core Requirement: None
Prerequisites: CHEM2233 Corequisites: CHEM2232 Cross-listed with: None Frequency: Every Spring Student Level: Undergraduate Comments: None Status: Offered

CHEM223409

Organic Chemistry Laboratory II Nijjar, Amarjit K Spring 2022

Laboratory required of all students enrolled in CHEM2232. One four-hour period per week. Having acquired the necessary lab skills in Organic Chem Lab I, students now can carry out reaction chemistry in the laboratory that is being taught in the lecture course.

Credits: 1
Room and Schedule: Merkert Chemistry Center 18 Th 05:00PM-08:50PM Satisfies Core Requirement: None
Prerequisites: CHEM2233 Corequisites: CHEM2232 Cross-listed with: None Frequency: Every Spring Student Level: Undergraduate Comments: None Status: Offered

CHEM223801

Gateway: Organic Chemistry Discussion II Lee, Paul S Spring 2022

Required of all students in Gateway Organic Chemistry. Discussion will offer a fairly comprehensive review of the material presented in lecture, with a focus on the key concepts needed for problem-solving in a small group setting.

Credits: 1
Room and Schedule: Campion Hall 10 W 02:00PM-02:50PM Satisfies Core Requirement: None
Prerequisites: Permission of Department Corequisites: CHEM1110 Cross-listed with: None Frequency: Every Spring Student Level: Undergraduate Comments: None Status: Offered

CHEM224201

Honors Organic Chemistry II Chatterjee, Abhishek Spring 2022

This course is a continuation of the CHEM1117-1118 honors sequence and will concentrate on the structure, bonding, and reactivity of organic compounds. Particular emphasis will be placed on stereochemistry, conformational analysis, reaction mechanisms, principles of organic synthesis, and modern spectroscopic methods.

Credits: 3
Room and Schedule: Merkert Chemistry Center 129 TuTh 09:00AM-10:15AM Satisfies Core Requirement: None

CHEM223405

Organic Chemistry Laboratory II Morken, James P Spring 2022

Laboratory required of all students enrolled in CHEM2232. One four-hour period per week. Having acquired the necessary lab skills in Organic Chem Lab I, students now can carry out reaction chemistry in the laboratory that is being taught in the lecture course.

Credits: 1
Room and Schedule: Merkert Chemistry Center 18 F 01:00PM-04:50PM Satisfies Core Requirement: None

CHEM332001
Introduction to Geochemistry Wang, Xingchen
Spring 2022
This course will apply the principles of chemistry to investigate the chemical compositions of the Earth system, including the atmosphere, hydrosphere, biosphere, and lithosphere. Topics will include the origin of elements in the solar system; distribution of elements in the core, mantle, and crust; cycling of carbon, nitrogen, phosphorus, and other elements in the Earth's surface environments; radiometric dating techniques; and stable isotope geochemistry.
Credits: 3
Room and Schedule: Devlin Hall 215 TuTh 01:30PM-02:45PM Satisfies Core Requirement: None
Prerequisites: One semester of general chemistry or permission from the instructor Corequisites: None
Cross-listed with: EESC3320 Frequency: Periodically Student Level: Undergraduate Comments: None
Status: Offered
CHEM332201
Introduction to Inorganic Chemistry Fox, Daniel J
Spring 2022
Though not required, one year of Organic Chemistry (CHEM2231-2232 or CHEM1118 and CHEM2241) is recommended as a prerequisite for this course. This course offers an introduction to inorganic chemistry. Topics include: applications of group theory to describe structure and bonding, coordination chemistry, organometallic chemistry, bioinorganic chemistry, crystal packing, and semiconducting and superconducting materials.
Credits: 3
Room and Schedule: Merkert Chemistry Center 130 MWF 11:00AM-11:50AM Satisfies Core Requirement: None
Prerequisites: None Corequisites: CHEM3324 Cross-listed with: None Frequency: Every Spring Student Level: Undergraduate Comments: None

CHEM4446201
Biochemistry II Zhou, Huiqing Spring 2022
This course is a two-semester introductory-level course in biochemistry. Topics in the first semester concentrate on protein structure and function, bioenergetics, kinetics and mechanisms of enzyme reactions, intermediary metabolism, control of metabolic pathways, and photosynthesis. Topics in the second semester concentrate on the structure of nucleic acids, recombinant DNA technology, mechanisms of gene rearrangements, DNA replication, RNA synthesis and splicing, protein synthesis, control of gene expression, membrane transport, and hormone action. Experimental methods will also be discussed as they relate to course topics.
Credits: 3
Room and Schedule: Merkert Chemistry Center 127 TuTh 09:00AM-10:15AM Satisfies Core Requirement: None
CHEM446202
Biochemistry II Liu, Xueyi Spring 2022
This course is a two-semester introductory-level course in biochemistry. Topics in the first semester concentrate on protein structure and function, bioenergetics, kinetics and mechanisms of enzyme reactions, intermediary metabolism, control of metabolic pathways, and photosynthesis. Topics in the second semester concentrate on the structure of nucleic acids, recombinant DNA technology, mechanisms of gene rearrangements, DNA replication, RNA synthesis and splicing, protein synthesis, control of gene expression, membrane transport, and hormone action. CHEM447601
Physical Chemistry II Bao, Junwei L Spring 2022
This course intends to build a foundation for understanding the structures of matter and chemical reactions via quantum mechanics and the relationship between structures and macroscopic properties via statistical mechanics. This course serves as the gateway to appreciating modern chemical science with rigorous and quantitative physical models. The topics to be covered include basic principles of quantum mechanics, exactly solvable systems, variational principle, molecular orbital theory and Hückel theory, qualitative solid-state band structure, basic group theory, Boltzmann distribution, ideal-gas statistical thermodynamics, heat capacity of simple solids, and transition-state theory for reaction rate.
Credits: 3
Room and Schedule: Merkert Chemistry Center 130 TuTh 10:30AM-11:45AM Satisfies Core Requirement: None
Prerequisites: MATH2202 and PHYS2101 or PHYS2201 Introductory Physics II (may be taken concurrently). MATH2210 Linear Algebra and PHYS3100 Vibrations and Waves are recommended but not required.
Corequisites: MATH2202 and PHYS2100-2101/2200-2201 are pre- or co-requisites. Cross-listed with: None Frequency: Every Spring Student Level: Undergraduate Comments: None Status: Offered

CHEM449201
Introduction to Undergraduate Research II Bao, Junwei L Spring 2022
CHEM5591-5592 or CHEM5593-5594 cannot be taken concurrently. Sophomores or juniors who show exceptional ability may engage in an independent research project under the supervision of a faculty member. The experimental work will be preceded by library research on the project and training in essential laboratory techniques. Credits: 3
Room and Schedule: BY ARRANGEMENT Satisfies Core Requirement: None
Prerequisites: CHEM1110 and CHEM1109 or Permission of Department Corequisites: None Cross-listed with: None Frequency: Every Spring Student Level: Undergraduate Comments: None Status: Offered

CHEM449202
Introduction to Undergraduate Research II Zhou, Huiqing Spring 2022
CHEM5591-5592 or CHEM5593-5594 cannot be taken concurrently. Sophomores or juniors who show exceptional ability may engage in an independent research project under the supervision of a faculty member. The experimental work will be preceded by library research on the project and training in essential laboratory techniques. Credits: 3

Among the areas to be covered will be structure and bonding in organotransition metal complexes, ligand binding interactions, will be the two central projects of the course. Time permitting, the role of electron paramagnetic resonance in biology will also be discussed.

Credits: 3
Room and Schedule: Merkert Chemistry Center 130 Tu 10:30AM-11:45AM Satisfies Core Requirement: None
Prerequisites: Organic Chemistry and Biochemistry are recommended prerequisites.
Corequisites: None
Cross-listed with: None
Frequency: Every Spring
Student Level: Both Comments: None Status: Offered

CHEM554401
Modern Methods in Organic Synthesis II Hoveyda, Amir H; Snapper, Marc
Spring 2022
Survey and analysis of contemporary strategies employed in the synthesis of medically significant natural and unnatural products. Examines the creativity and logic of approaches toward medicinally important compounds. Topics will include novel strategies toward synthetic problems and landmark total syntheses as well as issues in the current chemical literature.

Credits: 3
Room and Schedule: Merkert Chemistry Center 130 Tu 10:30AM-11:45AM Satisfies Core Requirement: None
Prerequisites: CHEM5531 Corequisites: None
Cross-listed with: None
Frequency: Every Spring
Student Level: Both Comments: None Status: Offered

CHEM55201
Advanced Methods in Chemistry I Metz, Kenneth R
Spring 2022
This course discusses the principles, methods, and applications of instrumental techniques such as calorimetry, chromatography, lasers, and optical spectroscopy in modern chemistry, along with techniques for the analysis and interpretation of experimental data. It is intended mainly for third year students. The accompanying laboratory includes experiments with these methods and emphasizes experimental design, data interpretation, and the presentation of results in written and oral formats.

Credits: 4
Room and Schedule: Merkert Chemistry Center 130 Th 06:00PM-08:00PM Satisfies Core Requirement: None Prerequisites: CHEM3351 and CHEM4475 Corequisites: None Cross-listed with: None Frequency: Every Spring
Student Level: Undergraduate Comments: None Status: Offered

CHEM555001
Drug Discovery and Medicinal Chemistry Deal, Holly L
Spring 2022
This course will provide an overview of the drug development process with an emphasis on the discovery and pre-clinical phases of developing a therapeutic agent. Students will gain an understanding of the fundamental concepts of drug design including the relationships between physicochemical properties, pharmacokinetics, pharmacology, and biological mechanism of action and the chemical structure of drug candidates. Case studies of important drugs will be invoked to facilitate discussion surrounding these topics. The chemical synthesis of these drugs will also be emphasized. The course will conclude with guest lectures from scientists at the forefront of the field. The foundational understanding of drug discovery and development gained in this course will be beneficial to those considering research and healthcare careers.

Credits: 3
Room and Schedule: Higgins Hall 310 MWF 11:00AM-11:50AM Satisfies Core Requirement: None
Prerequisites: CHEM2232 or BIOL2000 recommended in addition to CHEM2232 Corequisites: None Cross-listed with: None Frequency: Periodically in the Spring
Student Level: Undergraduate Comments: None Status: Offered

CHEM552301
Organometallic Chemistry Byers, Jeffery
Spring 2022
The course is intended for graduate students and advanced undergraduates who have completed or are currently enrolled in organic and inorganic chemistry courses. This course will present concepts of organometallic chemistry, e.g., the chemistry of compounds that have bonds between metals and carbon. Organotransition metal chemistry will be emphasized. Among the areas to be covered will be structure and bonding in organotransition metal complexes, ligand systems, catalysis, polymerizations, common reactions, and applications in organic synthesis.

Credits: 3
Room and Schedule: Merkert Chemistry Center 130 MWF 09:00AM-09:50AM Satisfies Core Requirement: None
Prerequisites: None Corequisites: None Cross-listed with: None Frequency: Periodically in the Spring
Student Level: Both Comments: None Status: Offered

CHEM554001
Magnetic Resonance in Biology Jayasundera, Thushita
Spring 2022
Innovations in the fields of biology and medicine over the last three decades have been rapid and immense. This course will focus on studying the applications of magnetic resonance to solve problems in chemistry, chemical biology, biochemistry, and biophysics. Hands-on experience with the complete NMR chemical shift assignments ( backbone, side chain, distance) for the structure determination of proteins, and using NMR to probe the dynamics of protein-ligand binding interactions, will be the two central projects of the course. Time permitting, the role of electron paramagnetic resonance in biology will also be discussed.

Credits: 3
Room and Schedule: Merkert Chemistry Center 130 Tu 06:00PM-08:30PM Satisfies Core Requirement: None
Prerequisites: None Corequisites: None Cross-listed with: None Frequency: Every Spring
Student Level: Both Comments: None Status: Offered

CHEM555202
Advanced Methods in Chemistry I Metz, Kenneth R
Spring 2022
This course discusses the principles, methods, and applications of instrumental techniques such as calorimetry, chromatography, lasers, and optical spectroscopy in modern chemistry, along with techniques for the analysis and interpretation of experimental data. It is intended mainly for third year students. The accompanying laboratory includes experiments with these methods and emphasizes experimental design, data interpretation, and the presentation of results in written and oral formats.

Credits: 4
Room and Schedule: Merkert Chemistry Center 1 TuTh 12:00 Noon-04:00PM Satisfies Core Requirement: None
Prerequisites: CHEM3351 and CHEM4475 Corequisites: None Cross-listed with: None Frequency: Every Spring
Student Level: Undergraduate Comments: None Status: Offered

CHEM555203
Advanced Methods in Chemistry I Metz, Kenneth R
Spring 2022
This course discusses the principles, methods, and applications of instrumental techniques such as calorimetry, chromatography, lasers, and optical spectroscopy in modern chemistry, along with techniques for the analysis and interpretation of experimental data. It is intended mainly for third year students. The accompanying laboratory includes experiments with these methods and emphasizes experimental design, data interpretation, and the presentation of results in written and oral formats.

Credits: 4

CHEM556701
Chemical Biology: Structure and Function Weerapana, Eranthie
Spring 2022
A major component of chemical biology is the application of chemical tools to the study of biological systems. This course will provide an overview of techniques such as genome sequencing, mass spectrometry-based proteomics, fluorescence imaging and unnatural amino-acid incorporation into proteins, with emphasis on examples drawn from the current literature. There will also be a focus on the mechanism of action of drugs, incorporating aspects of both the chemistry and biology of drug design.
Credits: 3
Room and Schedule: Merkert Chemistry Center 129 TuTh 12:00 Noon-01:15PM Satisfies Core Requirement: None
Prerequisites: CHEM2231-2232, and CHEM4465 or CHEM4461 or CHEM4462, or with permission of the instructor.
Corequisites: None
Cross-listed with: None
Frequency: Periodically in the Spring Student Level: Both

- Student Level: Graduate
- Status: Offered

**Course Descriptions:**
- The course will experiment with electronic filters and oscilloscopes.
- An emphasis is placed on practical problem solving skills. To this end, the course is partitioned into theoretical and practical sessions. During the practical sessions, the students will experiment with electronic filters and oscilloscopes.
- An emphasis is placed on practical problem solving skills. To this end, the course is partitioned into theoretical and practical sessions. During the practical sessions, the students will experiment with electronic filters and oscilloscopes.
- This is a series of research seminars by leading scientists, both from within the department and from other institutions, which are presented on a regular (usually weekly) basis.

The Chorus, Ancient and Modern: Forms of Communal Performance and the Body Politic Sapsford, Thomas Fall 2021

This course investigates a particular form of cultural institution developed in ancient Greece, the chorus. It begins by exploring how the ancient chorus both praised and questioned the political systems that facilitated it before considering how choral performance in the modern period has been an effective tool for propaganda, revolt, and riot. Alongside works by ancient Greek poets, students look at a range of modern performance genres such as opera, ballet, sporting ceremonies, Broadway musicals, and flash mobs. Students also gain experience of communal performance themselves through participation in a series of practical movement and singing workshops.

In “Greeks and Barbarians,” we’ll use a combination of written sources, archaeological evidence, and even visual art to investigate the fascinating history of relationships and conflicts between Greeks, Persians, Egyptians, Carthaginians, and more. We’ll read a variety of literature in English, such as the histories of Herodotus and Xenophon, the tragedies of Aeschylus and Euripides, and more, to help us figure out what Greeks really thought about barbarians - and about themselves.

CLAS220801
Art and Myth in Ancient Greece Hoffman, Gail L
Spring 2022
An introduction to the visual representation of the Greek gods and goddesses and to the artistic depiction of the primary cycles of Greek legends (e.g., the Trojan War and heroes such as Herakles, Perseus, and Theseus). This course focuses on how specific visual attributes serve to identify mythological characters and how the development of narrative in Greek art helped to relate their stories. Inquiring into the use of mythological imagery to decorate temples, cult statues, and vases used primarily for the symposium (male drinking parties), we will consider the functions of mythological imagery within Greek society.

Credits: 3

Cross-listed with: ARTH2206 Frequency: Every Spring Student Level: Undergraduate Comments: None Status: Offered

CLAS222501
Ancient Medicine Eshelman, Kendra J
Spring 2022
This course introduces students to the practice and theory of medicine in ancient Greece and Rome, from the archaic world of Homer (eighth century BCE) to late antiquity and early Christian healing practices. Themes will include shifting understandings of health and the body, revolutions in knowledge of human anatomy and physiology, ethical controversies over human and animal dissection, influential theories of pathology, psychology, pharmacology, and nutrition, the intersection of medicine and religion, and ancient ideas about doctors’ responsibility, which, via the Hippocratic Oath, are still with us today. Students interested in history and literature will gain a richer sense of the importance of medicine in ancient society, and its connections to religion, magic and philosophy. Students from a medical and scientific background will discover how perceptions of the body have changed over time and from culture to culture.

CLAS225201
Sex, Power, Gods: Ancient Wisdom Literature Eisenfeld, Hanne E
Spring 2022
Being a human in the world comes with a lot of questions: Why is love so distracting? What is the correct use of power? How can we live together in communities? Why is there suffering? In this course we will consider perspectives on these questions and more from around the ancient Mediterranean preserved in Mesopotamian and Egyptian advice texts, biblical books like Ecclesiastes and Job, Greek epic poetry, and Roman proverbs. We will also consider where we might find modern parallels to this ancient wisdom literature and how we might effectively communicate our own wisdom.

CLAS229401
Greco-Roman Egypt DEPT
Spring 2022
Under rule by the Ptolemaic dynasty, Egypt became the cultural hub of the ancient Mediterranean; when governed by Rome, it provided natural resources to a vast empire. But what of its multiethnic and multilingual population (the indigenous Egyptians, Nubians, Jews, Romans, Greeks, Arabs who inhabited it) and how did Egypt in this period relate to the rest of Africa and neighboring ancient civilizations? By studying literary, documentary, and visual sources, we will examine several fascinating historical figures such as Alexander the Great, Ptolemy Philadelphus, and perhaps the most notorious woman in antiquity, Cleopatra VII. Students will also encounter first-hand evidence of daily life in this region through letters, contracts, petitions, and arrest warrants recorded on potsherds and papyri and preserved for millennia by the desert sands.

CLAS333801
Cicero and Sallust: Catiline Eshelman, Kendra J
Spring 2022
The failed conspiracy of Catiline occupies a pivotal point in the dissolution of the Roman republic. Falling between the civil wars of Sulla (88-81 BCE) and Caesar (49-46 BCE), Catiline’s uprising (63 BCE) is part of the long aftermath of the former and representative of (and contributing to) the social and political breakdown that led to the latter. It is also one of the best attested episodes from the late Republic, the subject of four Ciceroan speeches (and mentioned in many of his other works) and a monograph by the historian Sallust. In this advanced Latin class, we will read Sallust’s Bellum Catilinae and Cicero’s First Catilinarian in Latin, and the rest of Cicero’s Catilinarian orations in English. Topics will include the place of this episode in the political history of the late Republic, its representation by Cicero and Sallust, and the broader historiographic issues it raises. Graduate students will read in addition select letters of Cicero.

CLAS336001
Martial & Juvenal Sapsford, Thomas D
Spring 2022
Rome in the first and second centuries CE was the ultimate performance arena, where one could view games, gladiators, mimas, and dancers; it was also a city whose inhabitants were themselves required to perform on a daily basis. Through reading the biting, bawdy, and blistering epigrams of Martial and satires of Juvenal in Latin, students will explore the various venues for social performance in imperial Rome (such as the salutatio, the baths, the dinner party) and how [not] to behave at them. In addition, we will use these poems to explore the enactment of various identity categories, gender, sex, ethnicity, and ability which contributed to the diversity of life in early imperial Rome.

CLAS338801
Sophokles’ Philoktetes: Frazios, Friends, and the Fall of Troy Eisenfeld, Hanne E
Spring 2022
ADVANCED GREEK COURSE: must have completed Intermediate Greek II or equivalent. Only the bow of Herakles can conquer Troy. Philoktetes sick, isolated, and disillusioned - has it; Odysseus will do anything to get it. Set against the backdrop of the Trojan War, Sophokles play pushes its audiences to weigh individual suffering against collective success and to ask how far ends can justify means. We will read the play in the original Greek, with an emphasis on its depictions of trickery, trust, friendship, enmity and the blurred lines between these categories. Throughout the term we will also consider how mythical material is adapted to address contemporary questions, starting with Sophokles own reinterpretations of famous Trojan war heroes and moving outward to modern interpreters including Seamus Heaney and Michael Ondaatje.

COMM203002 Image as Communication Livon-Grossman, Ernesto Fall 2021
This course may be used to satisfy the Communication major Critical Issues requirement or to satisfy one of three electives required for the Communication major. The goal of this course is to study how images are formed while exploring the ways in which they are being used to communicate. Following the critical tradition that treats images as a static representation all the way to recent studies that focus on writing with images in the era of interactive media, we will read critical texts while exploring concrete examples taken from books, political posters, films, and social media. What is the relation between text and image? What are the politics of image making? How do images change through different national and cultural settings? And how does the materiality of images define the way we make sense of them? From Walter Benjamin, John Berger, Malcom Turvey to Noigandres and Laura Mulvey to Laura Fepoki we will try to answer some of these questions while looking at concrete examples. We will watch and analyze multimedia productions, read texts, and discuss visual representations from a variety of visual and textual sources. Class and readings in English, audiovisual materials in English and/or with English subtitles.

COMM221201 Fascist Rhetoric and Representation Ingram, Brett D Fall 2021
This course may be used to satisfy the Communication major Critical Issues requirement or to satisfy one of three electives required for the Communication major. This course will interrogate the rhetoric and aesthetics of fascism as a system of governmentality and as a mentality, both of which are characterized by a desire for dictatorial control, the forcible suppression of opposing positions and perspectives, and a preoccupation with rigidly defined hierarchies of power and privilege. We will survey the origins of fascism in the 20th century Europe, as embodied in political leaders such as Mussolini, Hitler, and Stalin, with particular focus on the ways in which fascist ideology was disseminated and absorbed through the production and consumption of popular culture. We will then turn to contemporary manifestations of neo-fascism, including the recent rise of ethno-nationalist groups in America.

COMM222201 Digital Media Field Production Howley, Richard J Fall 2021
This course is designed to introduce students to the theories, tools, and techniques of television production. The focus of this class is on developing the production skills necessary for creating effective television communication. To pursue this goal, students will combine the information from the course's texts with practical experience in the form of exercises and the creation of their own television programs. While producing and directing their programs, students, working in crews, will learn to operate studio television equipment and develop an understanding of how messages are communicated using "live" or "live-on-tape" production methods.

COMM222401 The Ideal of the Open Mind Meyvis, Nathan Fall 2021
This course may be used to satisfy the Communication major Critical Issues requirement or to satisfy one of three electives required for the Communication major. In an age of polarization, it is immensely difficult to keep an open mind in public debate. Convinced that our side is right and the other wrong, we readily retreat to our respective corners, rally our allies, and prepare to outvote or shout down our opponents. But insofar as we remain committed to democratic deliberation, we must try to understand our fellow citizens and make the attempt to persuade them. To bring our fellow citizens around to our way of seeing things, we have to first understand where they're coming from, which means keeping an open mind. In this course, we will address the meaning of the open mind as it bears upon political rhetoric and communication, moral debate, and the study of culture. Questions we will address include: is political rhetoric invariably a form of manipulation and deceit, or is it a way of persuading people by appealing to them from within their own perspectives? Can tradition be a source for reform? To what extent have the most radical reforms in American history drawn upon tradition versus left tradition behind? To address these questions, we will examine and assess the ideal of the open mind as it has emerged in the Western philosophical tradition from Plato and Aristotle to the present.

COMM226501
Theory, History and Practice of Talk Media Citorik, Christopher Fall 2021
Satisfies one of three elective courses required within the Communication major. Satisfies one of three elective courses required within the Communication major. This course offers an overview of the historical, theoretical, and practical elements of American talk media from the dawn of broadcasting to today. Beginning with early U.S. radio, the class considers the ways in which economics, politics, technology, and culture have shaped American public discourse. The course concludes by giving students an opportunity to produce their own podcast, teaching skills that will allow them to not only create professional content, but also to understand better the communication history and theory they have studied throughout the semester.

COMM227101
Communicating Nonverbal Messages Duggan, Ashley P Fall 2021
This course may be used to satisfy the Communication major Critical Issues requirement or to satisfy one of three electives required for the Communication major. This course will explore different aspects of nonverbal communication (body language, facial expression, physical appearance, etc.) and the many ways in which they impact our lives. Class activities and discussions will be applicable directly to relationships with friends, family, and romantic partners. By the time you complete this course you will have acquired a resource-base to understand why and how nonverbal signals are used to communicate, to understand the role of theory related to nonverbal communication, and to improve your ability to apply these principles to your day-to-day interpersonal relationships and work settings.

COMM227201
New Media and Society Breen, Marcus J Fall 2021
Satisfies one of three elective courses required within the Communication major. This course surveys and explores new media and interactive communication technologies from a historical and critical perspective. Course content includes theories that explain contemporary social and economic formations influencing the emergence of the Internet and digital applications, including: convergence of user communities, film and television and mediated communication, post-human approaches, computer games, virtual reality, robotics, social media, militarization, business concerns and public policy debates. The course offers students the opportunity to analyze and reflect on research about the impact of media, especially the implications of digital innovations for society.

COMM227801
Social Media Peterson, Kristin M Fall 2021
This course may be used to satisfy the Communication major Critical Issues requirement or to satisfy one of three electives required for the Communication major. This course explores the history, development and use of social media. It connects to the liberal arts and the digital humanities through the lens of social justice. It will build a foundation of knowledge about social media with project-based research. The course identifies the established disciplinary fields of the humanities such as philosophy, literature, culture, religion, art, music, history, politics and language in comprehending the world, using these fields as a foundation with which to critically explore various modes of expression, ideas and values in social media about social justice.

Students will have the opportunity to identify contemporary issues in social media in projects that reflect critical thinking goals.

COMM33201
Film Theory and Criticism Pastel, Renee L
Fall 2021
Satisfies the required theory course in the Communication major. This course is structured around the question of how visual media convey and influence the world in which they are created. By surveying some of the major questions raised by theorists from the beginnings of film as a medium to the present, students will gain critical lenses through which to historically and theoretically engage visual media. We will cover topics including: film aesthetics; Marxist, psychoanalytic, feminist, critical race, and queer theoretical approaches to film criticism; television studies; and new media theories. Students will learn how to analyze film on a formal level, taking into account how form creates meaning, and to think historically and theoretically about how film as art and commerce has contributed to shaping “smaller screen” media forms and understandings.

COMM337801
Critical Theory
Livon-Grosman, Ernesto Fall 2021
Satisfies the required theory course in the Communication major. This course investigates and critiques the many ways that social, cultural, and political power is consolidated, negotiated, or resisted through popular media. We will read an assortment of theoretical approaches and primary texts (including those drawing from Marxist, ritual, semiotic, psychoanalytic, and functionalist traditions, among others) and apply them to ideological norms in society surrounding gender, race, class, violence, and the body. Looking at both the structural constraints in the production process of advertising, television, film, and social media, and the interpretive agency of audiences, our targets for analysis will be wide-ranging and contemporary.

COMM446801 Islam, Media and Popular Culture Peterson, Kristin M Fall 2021
Satisfies one of two writing intensive courses required within the Communication major.
Restricted to Juniors and Seniors. Western media have long portrayed Muslims through one-dimensional, negative stereotypes: the angry and irrational male terrorist or the covered and oppressed female victim. This writing intensive course will examine the roots of these stereotypes and discuss this process of racializing Muslims as the other in order to bolster the dominance of Western countries and imperialist projects like the War on Terror. In response to these persistent stereotypes, the course will focus on how Muslims engage with popular culture spaces to represent their own multi-dimensional, negative cultural diversity.

COMM447102 Children and the Media Hogan, Lindsay R Fall 2021
Satisfies one of two writing intensive courses required within the Communication major.
Restricted to Juniors and Seniors. From film to television to mobile apps, this course examines children's media as an economic, cultural, and political entity and explores the relationships
among young people and the contemporary media environment. Students will analyze various scholarly approaches and major debates in the study of children and media while also learning the larger historical contexts of those debates. This course offers a critical/cultural approach that examines the ways in which media industries, institutions, technologies, and texts intersect to produce particular media practices and considers how such practices relate to the production of cultural norms or social power.

COMM447501
Introduction to Honors Wells, Celeste C
Fall 2021
This course is an honors-level introduction to communication research and scholarship. This course will move beyond the initial concepts explored in research methods and required survey courses in order to prepare students to conduct their thesis research. Students will demonstrate their ability to apply the material through exams, oral presentations, daily participation and the completion of a 25 page thesis prospectus.

COMM105001
Translating Theory to Practice Ingram, Brett D Spring 2022
This is a one-credit Pass/Fail course. As a Communication student at Boston College you have been, and will continue to be, provided with numerous opportunities to learn about communication at both theoretical and practical levels in multiple areas within our discipline (e.g., media, rhetoric, culture, gender, health, interpersonal, family). The objective of this course is to assist in you in discerning how your education in the field of communication will prepare you to ask and eventually answer questions about your life, vocation, and role in the lives of others. Each week, a Communication department faculty member or guest speaker from the professional world will address a topic relevant to students on the precipice of entering the workforce, including (but not limited to): how to discuss academic research in language that resonates with employers in fields such as public advocacy, broadcasting, advertising, public relations, and consulting; whether/how to pursue graduate study; and how to present yourself in job applications and interviews.

COMM106001
Anti-Social Media Hartnett, Kristin A Spring 2022
Do you ever wonder what toll social media might be taking on your mental health? Do you long to ‘break up’ with your phone and live in the moment? This one-credit (pass/fail) seminar examines student anxieties about technology habits and experiments with practices of mindfulness. The course orientes you to think and act more purposefully as a ‘whole person’—in keeping with the Jesuit ideals of attentiveness and character formation—as opposed to one who is screen-dependent. Short readings, fun views, meditative journal entries, and small-class discussions will focus on the social, psychological, and emotional consequences of digital experiences (including friendships, learning, privacy, dating, and so on). Students will also set one #goal per month, of their own choosing, to try to live differently with their tech habits.

Digital Storytelling Reynolds, Paul A Spring 2022

Storytelling is an essential part of every community, organization, and business. However, the channels through which stories are told have evolved. With the advent of the internet, digital media now combines tradition with technology. Narratives can be told in new, multidimensional ways with video, audio, blogs, text, images, and graphics. The purpose of this course is to help you understand why communication professionals and, moreover, civilizations throughout human history create and value stories. You will also learn how to employ a variety of digital technologies to create compelling content. This will be achieved through examining the underlying concepts and technical processes involved in telling stories for delivery on the desktop, the mobile device or tablet. This is a one-credit pass/fail course.

COMM218001
Masculinity, Sexuality, and Difference Ingram, Brett D Spring 2022

Satisfies Critical Issues Course requirement for the class of 2021 and beyond. This course will examine constructions of masculinity and sexuality in Western society from a critical cultural perspective. We will consider the ways in which cultural narratives about acceptable masculine behaviors and attitudes catalyze social conflicts, reinforce established power hierarchies, and organize the modes of being available to people of different gender identities and sexual orientations. We will also evaluate the liberatory potential of emerging discourses and practices that seek to cultivate greater acceptance of diversity, and promote social healing. There will be a concentrated focus on popular cultural forms (especially television, film, music, sports, and social media) that are particularly influential to contemporary men and boys.

Gender, Identity, and Sexuality Erol, Ali E Spring 2022

Satisfies one of three elective courses required within the Communication major This course offers an introduction to the field queer media studies, focusing on several key genres, directors, and themes within transnational queer media cultures and scholarship. Well explore what makes a particular film or television program “queer” and what role media production, distribution, exhibition, and reception play in this process. Well examine constructions of sexuality, gender, race, and nation in a variety of texts and contexts, and investigate how transnational queer media can both participate in and resist dominant notions of sexuality, imperialism, race, gender, politics, and community.

Communicating Politics Fennimore, Jillian
Spring 2022
This course takes both a theoretical and practical approach to the art of political
communication. Taught by an instructor with extensive field experience, this class surveys
major historical trends in campaign advertising, policy messaging, and media relations. It then
considers the modern world of political communication, offering an up-to-the-minute
assessment of major trends in the field. Students have the opportunity to develop their own
skills and portfolios by creating original political advertisements, social media campaigns,
policy speeches, and more. The course features a number of notable guest speakers, including
active politicians, candidates, and campaign managers.

COMM228301 Asian Americans in Sport and Society Kim, Kyung-ym Spring 2022

In the mid-twentieth century, sport was a bastion of white supremacy, and it embodied such U.S national bodily ideals as white, heterosexual, Christian, muscular, and male. Histories of racial exclusion, racist violence, gendered policing, and sexual regulations positioned African-American men as outside the normative abilities of white men. In this respect, sport was a microcosm of the racial nation, with the language of citizenship and racial resistance coded within black-white discourse; however, this dichotomy failed to account for the long histories of Asian Americans in the United States. Asian-American sporting cultures trouble the current racial synchronicity between sport and nation while illuminating multiple performances of racial
COMM328401

Jewish Media, Arts, and Culture Sienkiewicz, Matthew S

Spring 2022

Satisfies one of three elective courses required within the Communication major. This course looks at current trends in Jewish cultural creativity, considering both diasporic and Israeli film, television, literature, and visual arts. Designed for students with limited knowledge of Judaism and Jewish culture, the class surveys Jewish religious practice, political history, and traditions of cultural expression as it examines media sources that embody, advance, and grapple with ideas from the Jewish past and present. Topics include, but are not limited to, Jewish comedy, Jewish children's media, Jewish memory, the globalization of Israeli television, and Yiddish language media.

COMM329501

Latin American Film and Media Livon-Grosman, Ernesto

Spring 2022

The purpose of this course is to explore how contemporary Latin American film and other audiovisual media have approached the subject of representation in both documentary and narrative cinema. We will focus broadly on two themes and four decades: the relationship between art and politics and how film and other media represent the connection between history and personal narratives from the 60s to the 2000s. Analyzing the cinematographic and editing techniques as well as reading critical texts on film and Latin America we will discuss how different media construct a narrative and how they influence the representation of history. Film in Spanish and English with English subtitles. **Satisfies one of three elective courses required within the Communication major**

Advanced Visual Theory and Aesthetics DEPT
Spring 2022
Satisfies one of two writing intensive course requirements within the Communication major. Restricted to Juniors and Seniors.. This course builds on study in Visual Communication Theory, extending into aesthetic principles founded in Eastern and Western visual cultural ideas. Visual design and aesthetics are explored in both our natural appreciation of beauty and through social constructions. Neurological principles provide the foundation for exploring visual persuasion, art appreciation, advertising techniques, political propaganda, and how visual culture creates our mental world.

COMM44401
Social Movements Rosenthal, Rita Spring 2022
Satisfies one of two writing intensive courses required within the Communication major. Restricted to Juniors and Seniors.. This course provides students with methods for critically evaluating the cultural and social impact of television. First, students learn some fundamentals of television production and the structure of the media industry. Based on this knowledge, students examine and practice the critical analysis of contemporary television programs. The goal of the course is to make students more informed critics of our television-saturated age.

COMM44501
From Word to Image: In Search of the Essay Film Groisman, Ernesto Spring 2022
Satisfies one of two writing intensive courses required within the Communication major. Restricted to Juniors and Seniors.. This writing intensive course, we will follow the thread that connects all the elements of the essay as a genre. We will discuss essays by Montaigne, Theodor Adorno, Timothy Corrigan, and Norah Alter and the films of iconic filmakers such as Chris Marker, Nicolai to Guillain Landrin, Albertina Carri, Harun Farocki, and Agnes Varda, among others. How are those films shaped by constantly changing social conditions? What do they tell us about the social and political conditions in which they were made? And how do they relate to other film practices around the world? In addition to
COMM44601 Surveillance, Media and Contemporary Society Kizito, Kalemba
Spring 2022
What is surveillance and how are surveillance technologies altering contemporary life? This course will explore this question by mapping the complex ways that media and digital technologies are used to acculturate us and generate acquiescence/resistance to surveillance in society. We will use film, television, and Internet media along with assigned readings to develop critical perspectives on surveillance and surveillance practices. The class is designed to give you freedom to develop and express your own ideas on the costs and potential benefits of surveillance-based societies. **This course satisfies one of two writing intensive courses required within the Communication Major.**
Credits: 3

COMM447101 Children and the Media Hogan, Lindsay R Spring 2022
Satisfies one of two writing intensive courses required within the Communication major. Restricted to Juniors and Seniors. From film to television to mobile apps, this course examines contemporary intercollegiate debate. Advanced discussion of argumentation theory and debate practice with an emphasis on contemporary intercollegiate debate. Restricted to Juniors and Seniors. This class integrates communication theories and applications in the contexts of healthcare conversations and decisions, and with organizational and social systems. We consider conversations with health providers, family members, and close friends navigating illness. We address the complexities of communication within broader healthcare structures and the distribution of resources to promote health and address illness. We address disparities in access and communication about quality healthcare such that advances in science, technology, and medicine are unequally distributed. This course considers disparities in substantive ways that require us to consider how relationships are tied to resources, to values, and to larger economic motives. We address communication processes as we unpack each of the complexities in health and illness in relationships.

COMM558901 Senior Internship Seminar McCarron, Christine Spring 2022
This course may not be repeated. Satisfies one of three elective courses required within the Communication major. This course gives senior communication majors an opportunity to complete an extended research project that extends beyond the five required courses. This project will involve extensive research in a topic of importance as determined by the student. The course may involve extensive readings and supervised research, and culminate in a 25-page prospectus. Students will work with a faculty mentor to develop and complete their research project. Restricted to Juniors and Seniors. This class integrates communication theories and applications in the contexts of healthcare conversations and decisions, and with organizational and social systems. We consider conversations with health providers, family members, and close friends navigating illness. We address the complexities of communication within broader healthcare structures and the distribution of resources to promote health and address illness. CSCI1102
Software Engineering DEPT
Summer 2021
This course covers the basic life cycle of software development: requirements, design, implementation, testing, and production release. Students will learn the theory related to software engineering, but they will also learn hands-on how to create their own software. The main evaluation of the course is a team project that will simulate a small real project. The project will be done using the framework Django (Python), the CSS Framework Bootstrap, among other technologies. The project will be worth 50% of the grade, as well as 2 midterms, an exam, and a peer assessment (how your team members evaluate the work you did).

CSCI222701

Introduction to Scientific Computation
Alvarez, Sergio
Fall 2021
This is an introductory course in computer programming for students interested in numerical and scientific computation. Emphasis will be placed on problems drawn from the sciences. Many mathematical models of the behavior of complex natural systems have no closed-form solution, and computational modeling is needed for data exploration and to obtain approximate solutions. The course discusses different models and approximation methods, how to implement them as computer programs, and the factors that influence approximation quality.
Topics include computer representation of floating-point numbers and data, computer program design and control flow, data visualization, nonlinear equations, systems of linear equations and least-squares, and Fourier analysis, with additional topics as time allows. Students will write programs in the Python programming language, primarily.

CSCI110123

Computer Science I
Marques Samary, Maira R
Fall 2021
This course is an introduction to the art and science of computer programming and to some of the fundamental concepts of computer science. Students will write programs in the Python programming language. Good program design methodology will be stressed throughout. There will also be a study of some of the basic notions of computer science, including computer systems organization, files and some algorithms of fundamental importance.

Credits: 0
Room and Schedule: Higgins Hall 225 Th 04:00PM-04:50PM Satisfies Core Requirement: Mathematics

CSCI224101 Randomness and Computation Straubing, Howard Fall 2021
This course presents the mathematical and computational tools needed to solve problems that involve randomness. For example, an understanding of randomness allows us to efficiently generate the very large prime numbers needed for information security, and to understand the long-term behavior of random sequences used to rank web search results.
Multidimensional random variables provide useful models for data mining, computer vision, social networks, and machine learning. Topics include combinatorics and counting, random experiments and probability, computational modeling of randomness, random variables and distributions, Bayes rule, collective behavior of random phenomena, vectors and matrices, and Markov chains. Each topic is illustrated with applications of its use.
Credits: 3
Room and Schedule: Gasson Hall 210 TuTh 03:00PM-04:15PM Satisfies Core Requirement: None
Prerequisites: CSCI1101 and MATH1100/ADMT1901 and CSCI2243 Corequisites: None

CSCI225701 Database Systems and Applications Herbstzuber, Robert J Fall 2021
This course is required for Information Systems concentrators class of 2023 and earlier. It is being replaced by ISYS3350 for class of 2024 and later. This course provides in-depth coverage of database systems and their uses. Topics include database architecture, design strategies, SQL queries, security, performance, and using database tools and scripting languages to create sophisticated forms and applications, including web applications. The goal of the course is to give students the knowledge and skills to use databases effectively in any business situation.

CSCI226701 Technology and Culture Griffith, William Fall 2021
This interdisciplinary course will first investigate the social, political, psychological, ethical, and spiritual aspects of the Western cultural development with a special emphasis on scientific and technological metaphors and narratives. We will then focus on the contemporary world, examining the impact of our various technological creations on cultural direction, democratic process, the world of work, quality of life, and especially on the emergent meanings for the terms “citizen” and “ethics” in contemporary society. Students will explore technologies in four broad and interrelated domains: (1) computer, media, communications, and information technologies, (2) biotechnology, (3) globalization, and (4) environmental issues.

Fall 2021

This course studies the internal organization of computers and the processing of machine instructions. Topics include computer representation of numbers, combinational circuit design (decoders, multiplexers), sequential circuit design and analysis, memory design (registers and main memory), and simple processors including datapaths, instruction formats, and control units. In the laboratory-based portion of course students design and build digital circuits related to lecture. Exercises include hardware description languages, combinational and sequential circuits, arithmetic and logic units, and simple datapath and control units.

Fall 2021

This course will not cover the use of commercial database systems; students interested in that topic should consider taking CSCI2257. An introduction to the internals of client-server database systems. A database system is large and sophisticated. By studying its components, one also learns techniques that apply to numerous other large systems. Topics include JDBC drivers, disk and memory management, transaction processing, and efficient query execution. This course will involve substantial programming in Java.

Credits: 3

CSCI336301

Computer Networks Wiseman, Charles Fall 2021

Introduction to computer networks and the services built on top of them. Topics include packet-switched and multi-access networks, routing and flow control, congestion control and quality-of-service, resource sharing, and Internet protocols (IP, TCP, BGP). Principles of relevant state-of-the-art network standards are also discussed. Coursework involves a significant amount of Java/C programming.

CSCI339401

Topics in Computer Systems Tseng, Lewis Fall 2021

Secure and fault-tolerant computing. As the world becomes increasingly connected and driven by computing, failures of large-scale systems and malicious attacks have tremendous impact. This course is aimed to introduce the students to the security issues in real-world systems and the principles of fault-tolerant system design. For example, the course will discuss the techniques (signatures, PoW, hash function, etc.), issues (privacy leak, 51% attack), and applications of Blockchain in detail. The course will also cover the principles of fault tolerance and the use of blockchain.

CSCI339801

Topics in Parallel Computing Bento Ayres Pereira, Jose Fall 2021

Everyone should know how to think "Parallel." Even a laptop or cellphone has multiple CPU cores at our disposal these days. In this hands-on, project oriented class you will learn the
main ideas of parallel computing with GPU. Our focus will be on the CUDA programming language.
You will learn about GPU architectures, about parallel algorithms, CUDA libraries and GPU computing applications. The prerequisite for this class is C programming language, multivariate calculus, linear algebra and algorithms and randomness and computation. If you do not have all of these prerequisites and want to take the class, please talk with me. There is a limited number of spots available.

CSCI11020
Computer Science II Aviram, Amittai F Spring 2022
In this course, the student will write programs that employ more sophisticated and efficient means of representing and manipulating information. Part of the course is devoted to a continued study of programming. The principal emphasis, however, is on the study of the fundamental data structures of computer science (lists, stacks, queues, trees, etc.). Both their abstract properties and their implementations in computer programs and the study of the fundamental algorithms for manipulating these structures. Students will use Java for programming.

Credits: 0

Randomness and Computation Mctague, Carl S Spring 2022
This course presents the mathematical and computational tools needed to solve problems that involve randomness. For example, an understanding of randomness allows us to sufficiently generate the very large prime numbers needed for information security, and to understand the long-term behavior of random sequences used to rank web search results. Multidimensional random variables provide useful models for data mining, computer vision, social networks, and machine learning. Topics include combinatorics and counting, random experiments and probability, computational modeling of randomness, random variables and distributions, Bayes rule, collective behavior of random phenomena, vectors and matrices, and Markov chains. Each topic is illustrated with applications of its use.
Credits: 3

Database Systems and Applications Wyner, George M Spring 2022
This course is required for Information Systems concentrators class of 2023 and earlier. It is being replaced by ISYS3350 for class of 2024 and later. This course provides in-depth coverage of database systems and their uses. Topics include database architecture, design strategies, SQL queries, security, performance, and using database tools and scripting languages to create sophisticated forms and applications, including web applications. The goal of the course is to give students the knowledge and skills to use databases effectively in any business situation.

Technology and Culture Griffith, William Spring 2022
This interdisciplinary course will first investigate the social, political, psychological, ethical, and spiritual aspects of the Western cultural development with a special emphasis on scientific and technological metaphors and narratives. We will then focus on the contemporary world, examining the impact of our various technological creations on cultural directions, democratic process, the world of work, quality of life, and especially on the emergent meanings for the terms “citizen” and “ethics” in contemporary society. Students will explore technologies in four broad and interrelated domains: (1) computer, media, communications, and information technologies, (2) biotechnology, (3) globalization, and (4) environmental issues.

Computer Systems Aviram, Amittai F Spring 2022
The goal of this course is to help you become a better programmer by teaching you the basic concepts underlying all computer systems. We want you to learn what really happens when your programs run, so that when things go wrong (as they always do) you will have the intellectual tools to solve the problem. In most of computer science, we’re pushed to make abstractions and stay within their frameworks. But abstractions often ignore effects that can become critical.
CSCI2271 introduce greater detail about system behavior and operation. This greater detail is needed for optimizing program performance, for working within the finite memory and word size constraints of computers, and for systems-level programming. Programming will be completed in the language C with comparisons to Java.
Credits: 3
This course studies the internal organization of computers and the processing of machine instructions. Topics include computer representation of numbers, combinational circuit design (decoders, multiplexers), sequential circuit design and analysis, memory design (registers and main memory), and simple processors including datapaths, instruction formats, and control units. In the laboratory-based portion of course students design and build digital circuits related to lecture. Exercises include hardware description languages, combinational and sequential circuits, arithmetic and logic units, and simple datapath and control units.

CSCI229101
An Introduction to Data Science Alvarez, Sergio
Spring 2022
This course provides an introduction to concepts and techniques of computational data modeling and inference that can inform rational decision-making based on data. Topics include data preprocessing, exploratory data analysis and visualization, elements of probability and statistical inference, and predictive and descriptive modeling, with an introduction to machine learning concepts and approaches as time allows. Programming in Python will be required.
Prospective students should also be comfortable with mathematical notation and reasoning at the college calculus level.
Credits: 3
Room and Schedule: Integrated Science Building 125 TuTh 09:00AM-10:15AM Satisfies Core Requirement: None
Prerequisites: CSCI1101 or equivalent introduction to CS with programming, and one of MATH 1101 / 1103 / 1105 or an equivalent calculus course.

CSCI334701
Robotics Biswas, Anjum
Spring 2022
This course will introduce the basic principles of mobile robotics history, theory, hardware and control. Topics will include robot components, effectors and actuators, locomotion, sensors, feedback control, control architectures, representation, localization and navigation. This is a project-oriented course and the students will have hands-on experience with a real mobile robot. The students will be required to complete several individual programming assignments and a team design project.
Credits: 3

CSCI335601
Software Engineering Marques Samary, Maira R
Spring 2022
This course covers the basic life cycle of software development: requirements, design, implementation, testing, and production release. Students will learn the theory related to software engineering, but they will also learn hands-on how to create their own software. The main evaluation of the course is a team project that will simulate a small real project. The project will be done using the framework Django (Python), the CSS Framework Bootstrap, among other technologies. The project will be worth 50% of the grade, as well as 2 midterms, an exam, and a peer assessment (how your team members evaluate the work you did).
Credits: 3

CSCI336201
Operating Systems Ubal Tena, Rafael
Spring 2022
This course covers the fundamentals of operating systems (OS) design both from a theoretical and a practical perspective. The course is organized in two parts, each involving a separate course project. The first part deals with the system call interface between applications and the OS, the multi-process abstraction of a computing system, and task scheduling algorithms. The associated project involves the implementation of a custom Unix command-line interpreter (shell). The second part of the course covers memory management, multi-threading libraries, and file systems. A real implementation of these features is studied on a miniature, open-source operating system called ax6. The associated project involves an extension of ax6 to support custom features, such as new scheduling policies, kernel-level threads, or file system recovery.

CSCI336601
Principles of Programming Languages Tassarotti, Joseph D
Spring 2022
Starting with a simple language of expressions, the course develops a sequence of progressively more expressive programming languages keeping in mind the conflicting constraints between the expressiveness of the language and the requirement that it be reliably and efficiently implemented. The course focuses on these essential concepts and the run-time behavior of programs. Type systems play an essential role. By understanding the concepts the student will be able to evaluate the advantages and disadvantages of a language for a given application.

CSCI338401
Computability and Computational Complexity Straubing, Howard
Spring 2022
This is a course in the theoretical foundations of computer science, centered around the theme of fundamental limits on computation. Topics include: Turing Machines, universal computation, undecidability of the halting problem, solvable and unsolvable algorithmic problems, recursive functions, Goedel's Incompleteness Theorem, time- and space-bounded computations, Cook's Theorem, NP-complete problems, problems solvable in polynomial space, randomized computation, application to cryptography, practical approaches to computationally intractable problems (such as SAT solvers), quantum computing, and Shor's Theorem.

CSCI339701
Topics in Machine Intelligence: Biomedical Image Analysis Wei, Donglai
Spring 2022
This course presents both the traditional and the cutting-edge deep-learning-based image processing algorithms with particular emphasis on problems in biomedical research. It covers image acquisition, visualization, filtering, enhancement, registration, classification, segmentation and detection. The course goal is to provide hands-on coding experience for motivated undergraduates and first year PSYC/BIO graduate students in a wide range of image modalities with various popular computational tools. Besides lectures, it has weekly labs in python using Colab and one final project.

Courage to Know Hincks, Martha M Spring 2022
This will be an interactive three-credit seminar of fifteen students, serving as one of students' university electives and one of the five courses in the first semester. Your instructor will serve as your academic advisor during the first year. This course offers an introduction to college life.
The readings and discussions will investigate personal and social development in the college years. Topics will include the nature of learning, diversity, social justice, human sexuality, intimacy, addiction, and other topics. The class materials and strategies are designed to be provocative and practical as well as intellectually stimulating.

UNC5220102
Courage to Know Wells, Celeste C Spring 2022
This will be an interactive three-credit seminar of fifteen students, serving as one of students' university electives and one of the five courses in the first semester. Your instructor will serve as your academic advisor during the first year. This course offers an introduction to college life.
The readings and discussions will investigate personal and social development in the college years. Topics will include the nature of learning, diversity, social justice, human sexuality, intimacy, addiction, and other topics. The class materials and strategies are designed to be provocative and practical as well as intellectually stimulating.

 UNC5224S20
First-Year Topic Seminar Gentilella, Dacia J
Fall 2021
The Freshman Topic Seminars give freshmen an opportunity to meet with their faculty advisor once a week to enjoy small group discussions on a topic of research and intellectual interest to the instructor. The Freshman Topic Seminars are limited to 14 students per section, meet once a week for 75 minutes, end before the Thanksgiving break, earn one credit, and are graded pass/fail. The short readings in the Topic Seminars focus on specific topics unique to each section and are designed to allow students to explore new academic areas. A list of current topics can be found at http://www.bc.edu/offices/fye/cornerstone/freshman/
