GERM669901
Honors Thesis
Resler, Michael
Spring 2023
The honors thesis in German Studies is offered to interested students who maintain a cumulative average of at least 3.3 in German. These students may begin a six credit research project that will lead to a 60 to 80 page honors thesis completed during the fall and spring of their senior year. The thesis is a major scholarly enterprise entailing independent research and writing; the final product is an essay embodying the results of original research and substantiating a specific view of the subject matter. Interested students should initiate the preparatory planning during junior year.

Hispanic Studies Courses: Summer 2022

SPAN101501
Elementary Spanish I
Falconi, Silvana
Summer 2022
Conducted in Spanish This introductory course is designed for students with no prior Spanish experience as well as those who have had some high school Spanish. Elementary Spanish I provides a strong foundation in speaking, listening comprehension, reading and writing as well as exploring the products, practices and perspectives that are unique to Hispanic cultures. This course follows a communicative approach, which springs from the idea that languages are best learned when real-world information becomes the focus of student activities. Students will interact in Spanish with the instructor and with classmates. By the end of this course, students should be able to successfully handle in Spanish a significant number of basic communicative tasks. Important note: Students who place into this course through the Spanish Placement Test may not enroll at a different level course without the explicit and prior permission of the coordinator

Credits: 1
Room and Schedule: On-line Asynchronous
Satisfies Core Requirement: None
Prerequisites: This course is for beginners and all sections are 3-credits unless otherwise indicated. Students with prior Spanish experience are admitted only after taking the placement test.

SPAN111501

Intermediate Spanish I

Ioannou, Vasilis

Summer 2022
Conducted in Spanish. Intermediate Spanish I is the first course in the second-year sequence. It continues to develop and strengthen students proficiency in the Spanish language as well as to increase their cultural understanding. Emphasis remains on the four skills and on critical thinking. Throughout the course, students will develop fluency and accuracy, and focus on communication. They will expand the vocabulary and enhance their understanding of essential Spanish grammar concepts. Short literary texts, cultural readings and audiovisual materials will provide opportunities to learn to appreciate cultural differences and impart authentic insight into the Hispanic world. By the end of this course, students should be able to successfully discuss in Spanish topics of importance to the twenty-first century, with emphasis on the development of critical thinking skills in addition to the refinement of the four basic language skills. Important note: Students who place into this course through the Spanish Placement Test may not enroll at a different level course without the explicit and prior permission of the coordinator.

**Intermediate Spanish II**  
Cuenca, Daniel  
Summer 2022
Conducted in Spanish. Intermediate Spanish II is the second course in the second-year sequence with a continued emphasis on the four skills and on critical thinking. This course focuses on vocabulary building, the examination of some of the finer grammar points, and moving students towards a more complex level of comprehension and expression. Students will continue to work with short literary texts, cultural readings and audiovisual materials. After successful completion of this course, the foreign language requirement will be fulfilled for schools that require a 4th-semester proficiency. Important note: Students who place into this course through the Spanish Placement Test may not enroll at a different level course without the explicit and prior permission of the coordinator.

Conducted in Spanish Elementary Spanish II is the second course in the first-year Elementary Spanish I and II sequence. It continues to provide a strong foundation in speaking, listening comprehension, reading and writing as well as exploring the products, practices and perspectives that are unique to Hispanic cultures. This course follows a communicative approach, which springs from the idea that languages are best learned when student activities involve critical thinking about real-world information. Students will interact in Spanish with the instructor and with classmates. By the end of this course, students should be able to successfully handle in Spanish a significant number of communicative and writing tasks in different time frames. Important note: Students who place into this course through the Spanish Placement Test may not enroll at a different level course without the explicit and prior permission of the coordinator.

Fall 2022
Conducted in Spanish. Intermediate Spanish I is the first course in the second-year sequence. It continues to develop and strengthen students' proficiency in the Spanish language as well as to increase their cultural understanding. Emphasis remains on the four skills and on critical thinking. Throughout the course, students will develop fluency and accuracy, and focus on communication. They will expand the vocabulary and enhance their understanding of essential Spanish grammar concepts. Short literary texts, cultural readings and audiovisual materials will provide opportunities to learn to appreciate cultural differences and impart authentic insight into the Hispanic world. By the end of this course, students should be able to successfully discuss in Spanish topics of importance to the twenty-first century, with emphasis on the development of critical thinking skills in addition to the refinement of the four basic language skills. Important note: Students who place into this course through the Spanish Placement Test may not enroll at a different level course without the explicit and prior permission of the coordinator.

**Intermediate Spanish II**

**Ioannou, Vasilis**

**Fall 2022**

Conducted in Spanish. Intermediate Spanish II is the second course in the second-year sequence with a continued emphasis on the four skills and on critical thinking. This course focuses on vocabulary building, the examination of some of the finer grammar points, and moving students towards a more complex level of comprehension and expression. Students will continue to work with short literary texts, cultural readings and audiovisual materials. After successful completion of this course, the foreign language requirement will be fulfilled for schools that require a 4th-semester proficiency. Important note: Students who place into this course through the Spanish Placement Test may not enroll at a different level course without the explicit and prior permission of the coordinator.

SPAN221501

Spanish Conversation, Composition, and Reading I

Uroca, Daniela

**Fall 2022**

Conducted in Spanish. Satisfies Foreign Language Proficiency core requirement. The main objective of this course is to consolidate students' skills so that upon successful completion of the sequence (CCR1 and CCR2) they will have acquired a proficient level of Spanish. Students will acquire discursive fluency and accuracy by working on the following skills: listening and reading comprehension, writing, speaking, and oral interaction. The course focuses on complex grammar topics and extensive vocabulary, as well as on expanding students' knowledge of cultural and historical aspects of Spanish speaking countries. Likewise, the course will foster students' analytical, critical, and creative skills in the target language through the use of a variety of authentic materials such as literary texts, newspaper texts, and audiovisual materials.

**Credits:** 3

**Room and Schedule:** Stokes Hall 261S MWF 10:00AM-10:50AM

SPAN339201
Advanced Spanish
Gil Berrio, Yohana M
Fall 2022
Conducted in Spanish. Elective for the Hispanic Studies major and minor. Satisfies Foreign Language Proficiency core requirement. This course will allow students to improve their command of the Spanish language at an advanced level. By activating communicative and discursive strategies, they will be able to achieve a fluent use of the oral, as well as of the written language, emphasizing linguistic correction and adequacy. Students will become capable of appropriately interpreting a wide variety of complex texts and produce descriptive, narrative, expositive, and argumentative texts autonomously and efficaciously in the target language. The materials provided throughout the course will incite an approximation to different cultural, political, and social aspects related to current issues of the Spanish-speaking world.

**Credits:** 3

**Room and Schedule:** Stokes Hall 363S MWF 10:00AM-10:50AM

**Satisfies Core Requirement:** None

**Prerequisites:** SPAN2216 or : Spanish CCR II, or a score of 5 on the AP Spanish Language Exam, or proficiency equivalent to students completing SPAN2216, to be determined by the Department.

SPAN660901
Portraits of Parenthood in Nineteenth Through Twenty-First Century Spain
Tang, Wan S
Fall 2022
Conducted in Spanish. This course examines evolving notions of parenthood and parenting in Spain from the nineteenth century to the present. Drawing on a range of theories, from the psychoanalytical to the sociological, we will trace the evolution of archetypes such as the absentee father or the selfless mother, paying particular attention to how gender, race, and class shape societal expectations of parents. Class texts will include everything from poetry to propaganda posters and recent television. Satisfies the Peninsular Post-1800 requirement.

**Credits:** 3  
**Room and Schedule:** Gasson Hall 208 TuTh 12:00 Noon-01:15PM

**SPAN661801**  
**The Invention of the Other: Colonial (and Postcolonial) Bodies, Territories, and Identities**  
**Cruz Gonzalez, Gerardo**  
**Fall 2022**  
Conducted in Spanish and fulfills Pre-1900 Latin American requirement for majors. The "discovery" of the "new world" gave way to the first commercial and cultural globalization. This course focuses on colonial literary production, from Columbus to the first emancipatory attempts on the continent, in connection with the postcolonial and decolonial view of contemporary art (sculpture, literature, film, and performance) and its neo-/ultra-baroque aesthetics. We will focus on the fictional and non-fictional representation of the populations that converged in this territory (indigenous people, Africans, and European), considering the colonial way of managing society and life (through race, gender, ethnicity, caste, and mestizaje).

**Credits:** 3  
**Room and Schedule:** Stokes Hall 361S MWF 10:00AM-10:50AM  
**Satisfies Core Requirement:** None

SPAN665001
The Spanish Civil War in Words and Images
Tang, Wan S
Fall 2022
Conducted in Spanish. Open to undergraduates with permission of instructor. This course critically examines representations of the Spanish Civil War across various media including propaganda posters, photography, film, television, and literature. Students will analyze texts produced during the Spanish Civil War as well as posterior cultural production, focusing in particular on the intersections between art and ideology, and examining how representations of the civil conflict serve political, religious, or feminist ends. Secondary readings will draw upon a range of theoretical frameworks, including Marxist, feminist, and trauma theory. Satisfies the Post-1800 Peninsular requirement.

Fall 2022
Conducted in Spanish and requires Instructor permission. Satisfies the Pre-1800 Peninsular distribution requirement and Cultural Diversity. This course does not pose Hispanic culture as more violent than any other, rather offers cultural and historic reasons to explain why and how certain forms of interpersonal violence manifest in great Hispanic art at particular moments in time. Using anthropological theories of interpersonal violence, the class analyzes a variety of texts, from the Middle Ages through Borges and Almodvar, that represent honor killing, mimetic desire, domestic/interpersonal violence, sexual violence, scapegoating, and "aesthetic" violence such as terror-producing works. While these theories were designed without gender in mind, we will be emphasizing how gender inflects the production of violence as well as its consumption in the context of each. Span66620 satisfies pre-1800 peninsular requirement for HS major. Span9980 counts toward the WGS Graduate Certificate.

Credits: 3
Room and Schedule: 245 Beacon Street Room 214 Tu 03:00PM-05:20PM
Satisfies Core Requirement: Cultural Diversity
Prerequisites: Conduct in Spanish and with permission of the Instructor. SPAN6662 satisfies Pre-1800 Peninsular requirement and is a Cultural Diversity course. Previously titled - Violence in Hispanic Culture or Permission of Instructor

SPAN992001

The Spanish Civil War in Words and Images
Tang, Wan S
Fall 2022
Conducted in Spanish. Open to undergraduates with permission of instructor. This course critically examines representations of the Spanish Civil War across various media including propaganda posters, photography, film, television, and literature. Students will analyze texts produced during the Spanish Civil War as well as posterior cultural production, focusing in particular on the intersections between art and ideology, and examining how representations of the civil conflict serve political, religious, or feminist ends. Secondary readings will draw upon a range of theoretical frameworks, including Marxist, feminist, and trauma theory.

Hispanic Studies Courses: Spring 2023

SPAN101501
Elementary Spanish I
Moon, Sehyun S
Spring 2023
Conducted in Spanish This introductory course is designed for students with no prior Spanish experience as well as those who have had some high school Spanish. Elementary Spanish I provides a strong foundation in speaking, listening comprehension, reading and writing as well as exploring the products, practices and perspectives that are unique to Hispanic cultures. This course follows a communicative approach, which springs from the idea that languages are best learned when real-world information becomes the focus of student activities. Students will interact in Spanish with the instructor and with classmates. By the end of this course, students should be able to successfully handle in Spanish a significant number of basic communicative tasks. Important note: Students who place into this course through the Spanish Placement Test may not enroll at a different level course without the explicit and prior permission of the coordinator.

Credits: 3
Room and Schedule: Gasson Hall 209 MWF 10:00AM-10:50AM
Satisfies Core Requirement: None
Prerequisites: This course is for beginners and all sections are 3-credits unless otherwise indicated. Students with prior Spanish experience are admitted only after taking the placement test.

Intermediate Spanish I
Pons, Marcel M
Spring 2023
Conducted in Spanish. Intermediate Spanish I is the first course in the second-year sequence. It continues to develop and strengthen students' proficiency in the Spanish language as well as to increase their cultural understanding. Emphasis remains on the four skills and on critical thinking. Throughout the course, students will develop fluency and accuracy, and focus on communication. They will expand the vocabulary and enhance their understanding of essential Spanish grammar concepts. Short literary texts, cultural readings and audiovisual materials will provide opportunities to learn to appreciate cultural differences and impart authentic insight into the Hispanic world. By the end of this course, students should be able to successfully discuss in Spanish topics of importance to the twenty-first century, with emphasis on the development of critical thinking skills in addition to the refinement of the four basic language skills. Important note: Students who place into this course through the Spanish Placement Test may not enroll at a different level course without the explicit and prior permission of the coordinator.

Throughout the course, students will develop fluency and accuracy, and focus on communication. They will expand the vocabulary and enhance their understanding of essential Spanish grammar concepts. Short literary texts, cultural readings and audiovisual materials will provide opportunities to learn to appreciate cultural differences and impart authentic insight into the Hispanic world. By the end of this course, students should be able to successfully discuss in Spanish topics of importance to the twenty-first century, with emphasis on the development of critical thinking skills in addition to the refinement of the four basic language skills. Important note: Students who place into this course through the Spanish Placement Test may not enroll at a different level course without the explicit and prior permission of the coordinator.

**Spanish Conversation, Composition, and Reading I**  
**McIntosh, Sheila E**  
**Spring 2023**  
Conducted in Spanish. Satisfies Foreign Language Proficiency core requirement.. The main objective of this course is to consolidate students' skills so that upon successful completion of the sequence (CCR1 and CCR2) they will have acquired a proficient level of Spanish. Students will acquire discursive fluency and accuracy by working on the following skills: listening and reading comprehension, writing, speaking, and oral interaction. The course focuses on complex grammar topics and extensive vocabulary, as well as on expanding students' knowledge of cultural and historical aspects of Spanish speaking countries. Likewise, the course will foster students' analytical, critical, and creative skills in the target language through the use of a variety of authentic materials such as literary texts, newspaper texts, and audiovisual materials.

SPAN339001
Advanced Oral Proficiency in Spanish Practicum
Gil Berrio, Yohana M
Spring 2023
This one-credit workshop is designed to advance students oral Spanish using Hispanic social contexts and texts. Course materials will help students improve their speaking fluency, pronunciation, and expand their knowledge of vocabulary in the context of correct grammatical expression. Special attention is given to advanced areas of Spanish grammar appropriate for argumentation. Course materials will treat current issues and include films, newspaper articles, interviews, paintings, as well as literary or historical readings. Students will be assessed based on the progress they make in their linguistic proficiency. Enrollment preference will be given to Hispanic Studies majors and minors.

SPAN339201  
Advanced Spanish  
Bernava, Fernando R  
Spring 2023  
Conducted in Spanish. Elective for the Hispanic Studies major and minor. Satisfies Foreign Language Proficiency core requirement. This course will allow students to improve their command of the Spanish language at an advanced level. By activating communicative and discursive strategies, they will be able to achieve a fluent use of the oral, as well as of the written language, emphasizing linguistic correction and adequacy. Students will become capable of appropriately interpreting a wide variety of complex texts and produce descriptive, narrative, expositive, and argumentative texts autonomously and efficaciously in the target language. The materials provided throughout the course will incite an approximation to different cultural, political, and social aspects related to current issues of the Spanish-speaking world.

Credits: 3  
Room and Schedule: Stokes Hall 286S MWF 11:00AM-11:50AM  
Satisfies Core Requirement: None

SPAN660701
Warrior Women of Spain (Nineteenth Through Twenty-First Centuries)
Tang, Wan S
Spring 2023
Conducted in Spanish
Fulfills post-1800 Peninsular requirement for major. This course examines the portrayal of strong female figures in Spanish literature and film from the nineteenth century to the present. Beginning with the writings of outspoken nineteenth-century authors such as Concepción Arenal and Emilia Pardo Bazán, we move towards literary and filmic depictions of female involvement in the Spanish Civil War, and feminist narrative of recent decades from authors such as Montserrat Roig and Almudena Grandes. This course focuses on the variety of ways in which literature and film have defied gender stereotypes.

Credits: 3
Room and Schedule: Gasson Hall 206 TuTh 03:00PM-04:15PM
Satisfies Core Requirement: None

SPAN662101
Animals and Animality in Latin American Literature
Kulez, Ali
Spring 2023
 Conducted in Spanish. Open to undergraduate with permission of instructor. This course will examine representations of animals and animality in Latin American literature from the 1950s to the present. We will explore how Latin American authors stage, reproduce, and critique the subjugation of animals in their works, as well as the centrality of such representations for their political outlook. Satisfies the Latin American Post-1900 requirement.

Credits: 3
Room and Schedule: Gasson Hall 303 M 03:00PM-05:20PM
Satisfies Core Requirement: None
Prerequisites: Conducted in Spanish and is for advanced Majors & Minors and by permission of the instructor. Satisfies the Latin American Post-1900 or Permission of Instructor
Corequisites: None
Cross-listed with: None

SPAN662701
Passion at Play
Rhodes, Elizabeth
Spring 2023
Conducted in Spanish
Counts as pre-1800 Peninsular distribution requirement. In this course, students interrogate the relationship between love and passion, using early modern theater and love poetry as tools. The themes uniting the dramas examined will be love, honor, and death, with particular attention paid to those works in which violence is represented. What would lead a society to sanction such violent behavior in the name of love? To what extent is that definition still ingrained in Hispanic culture and in our own culture today?

SPAN663301
The Posthuman Condition in Latin America
Cruz Gonzalez, Gerardo
Spring 2023
Conducted in Spanish. Fulfills the Post-1900 Latin American requirement for majors and can be an elective for HS majors/minors. In this course, students will embark upon a journey into a futuristic, posthuman world in Latin-American literature, film, and art: What does it mean to be posthuman? How do we envision our future selves and our future societies? How can thinking about a fictional future help us to think about our factual present? We will address these and other questions to achieve the main objective of this course: an introduction to the posthuman and posthumanism debate through literature, film, and arts. Students analyze and discuss emblematic works to observe the social and political dimensions of our globalized and posthuman condition.

**Credits:** 3

**Room and Schedule:** Gasson Hall 303 MWF 11:00AM-11:50AM

**Satisfies Core Requirement:** None

**Prerequisites:** Contextos, concurrent enrollment in Contextos, or with permission of instructor. Conducted in Spanish.

**SPAN663601**

**Borderlines: Films of Immigration and Exile**

**Rhodes, Elizabeth**

**Spring 2023**

Conducted in Spanish. Counts as an Elective. An advanced undergraduate seminar in film analysis following a trajectory of films that represent the drama of immigration into first-world countries (Spain, the United States). The course covers the historic, economic, and cultural motivations attributed to migrants in these works and the ways in which directors marshal specific cinematographic techniques to achieve the political and artistic objectives of each film. Emphasis is on the Mexico/U.S. border and the Strait of Gibraltar, one of the deadliest points of immigration in the world. The course begins with El alambrista (Robert Young, 1977) and finishes with Retorno a Hansala (Chus Gutierrez, 2007).

**Credits:** 3

**Room and Schedule:** Carney Hall 302 Tu 03:00PM-05:20PM

SPAN667201
Spanish Romanticism
Mizrahi, Irene
Spring 2023
Conducted in Spanish
Fulfills post-1800 Peninsular requirement. This course provides detailed analyses of major works (prose, poetry, and theater) of nineteenth-century Spanish Romanticism. The first part is dedicated to the historical romantic drama of Martínez de la Rosa, Duque de Rivas, García Gutiérrez, Harzenbuch, and Zorilla. The second part concentrates on Larra's *Artículos literarios y de costumbres*, and the third focuses on the lyric poetry of Espronceda, Bécquer, Campoamor, and Rosalía de Castro.

SPAN669701

**Blackness in Conflict. Afro-Latin American Literature, Cinema and the Arts**

Cruz Gonzalez, Gerardo

**Spring 2023**

Conducted in Spanish. Fulfills Post-1900 Latin American requirement for majors and Elective for HS majors or minors. Do Afro-Mexicans and Afro-Argentines exist? Some countries have a recognized Black population but in others this population has been systematically rendered invisible and marginalized as a part of a project enacted by the nation-state. In this course we will compare literary works, films and contemporary art that express blackness and its politics. Our approach to these works will illuminate individual or collective narratives and counternarratives that will allow us to access a postcolonial, transhistorical, and transnational understanding of the Black condition in Latin America.

**Credits:** 3

**Room and Schedule:** Lyons Hall 315 MWF 01:00PM-01:50PM

**Satisfies Core Requirement:** None

**Prerequisites:** Contextos, concurrent enrollment in Contextos, or with permission of instructor. Conducted in Spanish.

HIST111701
Atlantic Worlds I, 1500-1800
Grube, Eric B
Summer 2022
In this course, students examine the significance of developing global relationships, interdependencies, and tensions within and between societies in the Atlantic World between 1500 and 1800. The focus is on responses to religious, economic, and political changes in an increasingly diverse and "dis-integrated" world order of Western Europe, West Africa, and the Americas. As the "known worlds" of the Atlantic expanded, resisted, and attempted to accommodate changes brought about through religion, rights, and revolution over this 300 year period, our tasks are to examine what happened, why they may have happened, and how these changes were significant then and now.

HIST140101
History of the Italian Mediterranean: Una Faccia, Una Razza
Shlala, Elizabeth H
Summer 2022
Today, the Mediterranean Sea, which once appeared to be the cradle of cosmopolitan civilizations, has become the twenty-first century's largest mass grave. The region that served as the heart of a world system for centuries, is now a heavily policed crossroads that divides more than it unites. Levantine has become a derogatory word. Venice is under water, losing her cultural heritage inch by watery inch due to climate change. In this course, we will use primary historical sources to analyze the continuities and changes of the Italian Mediterranean with Venice as our geographical, historical, and architectural center. It is an opportunity for first-hand intellectual exploration that we will not have for much longer.

HIST260101
Food, Power, and Politics
Nakazato, Hiroshi
Summer 2022
This course will seek to provide an intellectual and analytical-driven framework around the question of food as an integral part of any human experience, but particularly our experience with food through across cultures. We each have a unique opportunity to understand better the role of food in each of our lives as we move through this summer program by examining our own cultural and political assumptions and those of others from a new point of view. We can appreciate the lenses brought by other individuals, cultures and places to the acts of eating and producing food. Finally, we can express the human experience of food in ways that represent our understandings, experiences and vision for a healthy, just and pleasurable relationship to food in ways that can be shared and appreciated by others. In eating and producing food, we exist simultaneously in a deeply personal and communal place, a place of the present, past and future in which we are never more and less than human.

HIST285601
Contentious History and the Politics of Contemporary Korea 
Hwang, Ingu
Summer 2022
This introductory immersion course surveys the contentious intersection between history and politics in contemporary Korea. Students will explore the following questions: What were the critical historical experiences and issues that became part of the public discourse and catalyzed political contestations in local and international/global communities? Why did these issues become contentious and for whom? What actions and counteractions did they inspire? In critically examining these questions, students will address four topics: postcolonial disputes, national division, economic development and social justice, and (post-)democratization protests. To facilitate in-class discussions, students need to engage critically with textual and media sources. They are also required to actively participate in the historical and cultural immersion/excursion programs, including the National Museum of Korean Contemporary History, the DMZ tour, and the Kim Dae-jung Presidential Library and Museum.

**HIST752401**

**Colloquium: From Revolution to Human Rights: Histories of Violence and Non-Violence**

**Bourg, Julian E**

**Summer 2022**

Is history just violence? The story of victors over the vanquished? What role does non-violence play in history? How should we think about histories of peaceful co-existence? This graduate course investigates global histories of violence and non-violence from revolution in the eighteenth century to contemporary human rights regimes. Themes include war, peace, imperialism, race, law, terrorism, non-violent social movements, humanitarianism, and policing. We will pay particular attention to how teaching history, especially debating different ideas, can enable students to develop their own ethical and political judgments.

HIST782001
Early America in the World: US History to 1877
Morton, John D
Summer 2022
In this course we will consider recent scholarship on early American history, from the colonial period through the Civil War and Reconstruction. We will pay especially close attention to works that place the early US in its larger Atlantic World context, and those that deal with the shifting boundaries between British, US, French, Spanish, and Native American power. Major topics include race, colonial slave systems, gender, religious change and the Great Awakenings, the American Revolution, and the expansion of slavery and rise of abolitionism in the lead up to the Civil War. Our main focus will be on using this recent scholarship to create a coherent and engaging narrative for the teaching of US History.

Followed in spring semester by HIST1012; Fulfills the History Core I Requirement This course surveys the history of the Atlantic world between the arrival of the Black Death in Europe in the mid-fourteenth century and the French Revolution at the end of the eighteenth century. We will pay particular attention to the ways in which the often violent encounters between people in this region of the world produced new social, cultural, and economic forms. Among these were ideas about gender, race, and the relationship between communities and individuals; notions of equality; and the emergence of a global system of trade.

HIST107701
Globalization I
Peychev, Stefan P
Fall 2022
The course explores the connections that are diminishing the significance of traditional geographical, cultural, and political boundaries. Global connections have increased rapidly in the past half-century, but global convergence has been a powerful force during the eight centuries covered by this survey. The year-long course examines three kinds of globalization: commercial, cultural, and political. While recognizing the Western world's expansiveness as a key force for globalization, the course gives extensive attention to how people from other continents have also been major agents in initiating, promoting, and resisting globalizing forces.

Credits: 3
Room and Schedule: Mcguinn Hall 121 MWF 09:00AM-09:50AM

HIST109101
Roman History
Eshleman, Kendra J
Fall 2022
A study of the social, political and cultural history of ancient Rome from its foundation by Romulus to the rise of Constantine and late antiquity. The course will focus on the development of Roman social and political institutions, the Roman conquest of the Mediterranean, the evolution of Roman identity, and the rise and spread of Christianity. Emphasis will be on the study of the ancient sources: literary, historiographic, archaeological and epigraphic.

HIST109401
Modern History II
Grube, Eric B
Fall 2022

This course is the second half of the History Core. Offered in the fall semester of the academic year. Fulfills Core History II. This course covers several centuries of time (1800 and after) and traces the political, social, economic, and cultural changes that created the modern world. Depending on the expertise of the instructor, different parts of the world may serve as focal points for examining the complex historical processes behind modern-day transnational relationships, values, and ideas. As part of the Core Curriculum, this course seeks to broaden students' intellectual horizons by exposing them to new places, periods, and perspectives.

Bailey, Michael T
Fall 2022
This course is the second half of the History Core. Offered in the fall semester of the academic year. Fulfills Core History II. This course covers several centuries of time (1800 and after) and traces the political, social, economic, and cultural changes that created the modern world. Depending on the expertise of the instructor, different parts of the world may serve as focal points for examining the complex historical processes behind modern-day transnational relationships, values, and ideas. As part of the Core Curriculum, this course seeks to broaden students' intellectual horizons by exposing them to new places, periods, and perspectives.

Credits: 3

HIST11301
The African Diaspora and the World I
Lal, Priya
Fall 2022
This course is the first of a two-course sequence that explores the African diaspora and its relationship to the world. By African diaspora, we are referring to both the continent and the communities of people of African descent that have formed in the Americas, in Europe, and in Asia as the result of forced and voluntary migrations over the last five hundred years. The course seeks to foster a fuller understanding of the African diasporas role in the development of the modern world and the experiences of African-descended peoples from a global perspective.

HIST151301
Valencius, Conevery B
Fall 2022
This is a Complex Problems course and is open to Freshman only. This course explores U.S. energy. From the perspectives of history, culture, technology, engineering, and foreign policy, we ask how we have created and distributed energy in the past, how energy systems function in the present, and how they may evolve. We investigate energy production, distribution, and use--coal, oil, nuclear power, hydropower, wind, and solar power--along with cables, pipelines, and transmission systems. Through hands-on exercises and field trips, students learn how past technological and economic choices shaped current U.S. energy systems, how energy systems affect the environment, and how sustainable energy systems will be in the future.

HIST151501
The Just City: Race, Class, and Communities
Yang, Hongyan
Fall 2022
Cities are diverse and dynamic places characterized by social and environmental inequalities across space, with some areas subject to greater levels of poverty, economic disinvestment, and public health risks than others. This unevenness has led to greater calls for social and environmental justice. But how do these inequalities arise, and what makes a more just city? These paired courses investigate these questions from social, spatial, and environmental perspectives. We will discuss how city-building and suburbanization are mediated through natural resources and infrastructural systems as well as race, ethnicity, immigration, class, and other social attributes. Students will cultivate their own interdisciplinary frameworks of social and environmental justice as a step toward becoming more informed global citizens.

Credits: 3

**Making the Modern World: Design, Ethics & Engineering**

**Tonn, Jenna A**

**Fall 2022**
Together we will consider how engineers and other stakeholders navigate risks related to industrial and environmental disasters; balance financial, technological, and regulatory pressures associated with complex socio-technical problems; and negotiate technical and political liabilities surrounding artificial intelligence, surveillance, and climate adaptation. Students will collaborate on group design projects based on human-centered engineering. Engineering systems present pressing technical, ethical, and moral problems that we must grapple with as engaged global citizens. In this class students will explore the social, cultural, and institutional history of engineering; learn foundational skills in quantitative analysis of real-world engineering designs; and understand the political, environmental, economic, and ethical tradeoffs associated with building the modern world. This is a Complex Problems course and requires a weekly lab and reflection.

Fall 2022
Together we will consider how engineers and other stakeholders navigate risks related to industrial and environmental disasters; balance financial, technological, and regulatory pressures associated with complex socio-technical problems; and negotiate technical and political liabilities surrounding artificial intelligence, surveillance, and climate adaptation. Students will collaborate on group design projects based on human-centered engineering. Engineering systems present pressing technical, ethical, and moral problems that we must grapple with as engaged global citizens. In this class students will explore the social, cultural, and institutional history of engineering; learn foundational skills in quantitative analysis of real-world engineering designs; and understand the political, environmental, economic, and ethical tradeoffs associated with building the modern world. This is a Complex Problems course and requires a weekly lab and reflection.

HIST163001
The Meaning of Boston: History and Memory
Quigley, David
Fall 2022
What does a city--this city in which we find ourselves--mean? Meaning flows through a city just as populations, capital, power, resources, and ideas do, and each of these flows conditions the others. As we consider what Boston has meant in different moments and to different people, we engage follow-on questions: How does the form of a text express meaning? How can we understand the relationship between that text and the historical moment in which it took form, and/or the historical moment it seeks to capture? What happens when we consider the local in relation to national and international events and artistic movements? Our students will develop skills of historical reasoning, will learn how to interpret works of literature and allied arts, and will sharpen their analytical thinking and writing skills within the disciplinary traditions of history and literary/cultural studies. We will encourage them to move beyond the received meanings and standard tropes of Boston--the accent, the city on a hill, the regular-guy mythos retailed by Hollywood--and explore questions that Boston has consistently raised about human beings and nature, race and class difference, the form and function of the good life, the double-edged quality of moral causes, and the contest between the persistence of old ways and the succession of new ones.

Nature and Power: Making the Modern World
Zhang, Ling
Fall 2022
How have we humans changed the environment by clearing forests, farming crops, damming rivers, inventing railways, building bombs, and other transformative activities? How have our aesthetics, values, ideologies, and knowledge shaped the ways we interact with the natural world? By comparing historical cases from Asia, Europe, and America during the past four hundred years, this course takes students onto a journey across historical space and time to observe how human relations with the environment gave birth to our modern world.

HIST171601
Geographies of Imperialism: History of Colonization
Shlala, Elizabeth H
Fall 2022
This is an Enduring Questions course and is open to Freshman only. This course must be taken with THEO1707. The age of empires is past--or is it? In this course, we examine the enduring ideas of empires and their challengers through the present day, using the lenses of history and theology (Christianity and Islam). Beginning with the traditional geographies of maps, we explore how empires colonized not only territories with physical borders, but also bodies and minds, using race, gender, sexuality, ethnicity, education, laws and institutions. Using the British and French empires in the Middle East and North Africa as case studies, we will identify and question how to overcome the boundaries still imposed on people today.

HIST172601
Encountering Inequalities: The Historical Politics of Inequality
Zuniga Nieto, Carlos Gerardo
Fall 2022
How are inequalities normalized, and how might their normalcy be challenged? How did we arrive at our current racial and socioeconomic inequality, and how can we understand this moment in a historical context? How are inequalities normalized, and how might their normalcy be challenged? These paired courses will familiarize students with how power and resistance relate to race, ethnicity, and class. Students will learn to recognize the types and origins of inequalities, as well as their political impacts on U.S. democracy and democracies around the world. Our discussions will focus on the myriad ways civil society and traditional liberal thought create unequal systems and how marginalized communities resist those unequal systems.

HIST174501
Law and Adolescence: History of Childhood
Zuniga Nieto, Carlos Gerardo
Fall 2022
What differentiates childhood from adolescence? How have societies in the United States and Latin America defined shifting notions of childhood and adolescence, and how does law intersect with rites of passage? These paired courses will familiarize students with markers of mobility and incorporation and develop students' understanding of how legal regimes in Latin America and the United States define parameters of childhood, adolescence, and adulthood. Students will learn to recognize how legal regimes in the Americas define boundaries across the life course and the contradictions in how youths experience the emotional, legal, political, and cultural transition of coming-of-age.

Although the capital of the Roman Empire lay in Italy, Asia Minor, greater Syria, Egypt, and North Africa were the brains and the belly of the Empire. Class begins with an exploration of how 19th- and 20th-century imperialism, colonialism, and racism led to the downplaying of the importance of Rome's eastern Mediterranean, Egyptian, and North African provinces. We will then spend the rest of the semester investigating the history and archaeology of the Roman provinces in these regions, and study not only Rome's impact, but explore the ways Rome itself was transformed by its encounters with these people and places.

HIST204101  
China From Antiquity to the Middle Ages  
Zhang, Ling  
Fall 2022  
Fulfills Non-Western Requirement for History Majors. This survey offers a basic understanding of the historical transitions of Chinese society, politics, and culture. Among the topics covered are: the historical discourse of the emergence of early China; archaeological representations of early kingdoms and their path toward the formation of empire; territorial expansion versus the growth of a Chinese identity vis-à-vis non-Chinese ethnic groups; Confucianism as political and ethical philosophy; the Medieval Economic Revolution; and maritime China and its early encounters with the West.

HIST225801
The British Empire: Its Rise and Fall
Rafferty, Oliver P, SJ
Fall 2022
How did a relatively small country at the edge of Europe come to acquire the largest empire in history? At its height it covered 24% of the earth's surface. How was it built up? What sustained it? What were the political, diplomatic, and military accomplishments of this empire "o'er which the sun never set?" Beginning with Colonial America this course will trace the history of the empire, and the men and women who shaped it, from the loss of the American colonies in 1781 to the handover of Hong Kong to China in 1997.

HIST230301
Latin America Before Latin America
Sellers-Garcia, Sylvia M
Fall 2022
Fulfills LAMA Requirement for History Majors and Minors "Latin America" acquired its name from a Frenchman in the 19th century. So what was it beforehand? Anchored in close readings of primary sources, particularly the first-person accounts of contemporaries, this course considers the history of colonial Spanish and Portuguese America (and only a few French toeholds) from the pre-contact period to roughly 1800. It follows the individual, communal, institutional, and national stories of transformation in order to understand how people in this region became Latin American. Among other things, the course considers the making of race and gender, the workings of political power, and the influence of religion.

HIST245101
Russian Meddling: Soviet Spying in America, 1917 to 2017
Gallagher, Charles R, SJ
Fall 2022
The election of 2016 has forced Americans to reevaluate role of foreign entities influencing American electoral practice and foreign policy. This course intends to look at the long view of Russian meddling and Soviet spying in the United States. It will start with the Russian Revolution of 1917 and America's intervention in the Russian Civil War and proceed up to the present. The sweep of the course will look at operations conducted by the Cheka, NKVD, KGB, and FSB against the United States. Topics will include Communism and anti-Communism, U.S. counterespionage, the CPUSA, SMERSH, World War II, the Cold War, VENONA, post-Soviet era infiltration, and the current Special Counsel Investigation. The course is meant to show how Soviet/Russian intrusions into American life via espionage operations, spy rings, infiltrations, and agents of influence have affected U.S. political and cultural structures. Students will assess the impacts of such operations.

HIST247501
America's War in Vietnam
Jacobs, Seth S, PHD
Fall 2022
This course will examine America's thirty-year military involvement in Southeast Asia, one of the most controversial episodes in U.S. history. Students will read a wide variety of primary and secondary sources, from recently declassified state and Defense Department documents to poetry and short stories. Course readings are selected from various points on the left-right political spectrum, with both "hawks" and "doves" receiving their day in court. Lectures will include the origins of the Cold War; the Eisenhower, Kennedy, Johnson, and Nixon presidencies; antiwar activism and other Vietnam era movements; and American soldiers' experience during and after service in Vietnam.

HIST250201
Introduction to Feminisms
Erol, Ali E
Fall 2022
Fulfills Women Writer's requirement for ENGL/LSOE majors. This introductory course offers both an overview and a foundation for understanding the various movements that make up what has come to be called the feminist movement in the U.S. Because systems of privilege and disadvantage shape women's and men's identities and social positions in multiple and unique ways, Introduction to Feminisms analyzes gender from an interdisciplinary approach and applies numerous academic disciplinary methods to the study of gender, including history, literature, psychology, and sociology, and explores women's and men's experiences within various cultural contexts, including socioeconomic class, race and ethnicity, religion and spirituality, nations of citizenship, origin, and generation.

HIST251101
History and Film
Bourg, Julian E
Fall 2022
This course examines the intersections between history and film. We will discuss practicing historians suspicions about movies as well as the critical tools of film theory before turning to a dual task: understanding the history of cinema and reading history through film. Topics may include revolution, rebellion, war, decolonization, the avant-garde, capitalism, class society, and mass culture. Films may include Sergei Eisensteins October (1928), Jean Renoirs The Rules of the Game (1939), Mikhail Kalatozovs I Am Cuba (1964), Gillo Pontecorvos The Battle of Algiers (1966), Jean-Luc Godards La Chinoise (1967), Andrzej Wajdas Danton (1983), and Claude Berris Germinal (1993).

HIST280001
From Slave Patrol to the War on Crime: Policing Blacks Across American History
Summers, Martin A
Fall 2022
During the "racial reckoning" in the summer of 2020, Americans engaged in a lot of discussions about race and the criminal justice system - and especially policing and its historical connections to slavery. While containing some truth, this particular framing of policing obscures a more complex history. This course will explore the larger history of policing Black Americans, from slavery to the early twenty-first century. Topics will include: race and policing in the antebellum period; legal and extralegal forms of policing Blacks in the Jim Crow era; mass incarceration in the late-twentieth century; and activism against the carceral state.

HIST282401  
**Metropolitan America: Cities and Suburbs in the Twentieth Century**  
Glass, Michael  
**Fall 2022**  
In 1920, a majority of Americans lived in cities for the first time. By 1990, a majority lived in suburbs. These dramatic shifts influenced every facet of life, from politics to economics, labor to culture. This course surveys these transformations in metropolitan America during the twentieth century. We will examine the history of the built environment; analyze changes in housing, business, work, and consumption; follow the movement of people, capital, and ideas; and assess how various institutions shaped the fate of urban and suburban communities.

HIST283701
Multiculturalism in the Roman Empire
Thatcher, Mark R
Fall 2022
From its beginnings as a small city-state in central Italy, Rome built a vast multicultural empire stretching across the entire Mediterranean and much of Europe. We will travel through this empire, visiting such different peoples and provinces as the Germans and the Jews, Britain and Greece. How did those people remain loyal to their origins while also becoming Roman? How did the different cultures included within the empire transform who "the Romans" were and what it meant to be Roman? How did the emperors--those larger-than-life figures like Augustus and Nero--use the diversity of the empire to craft their public images as conquerors or as...Greek actors? We'll use a combination of written sources, archaeological evidence, and even visual art to investigate these questions and to explore the ever-expanding melting pot of the Roman world.

HIST325601
Study and Writing of History: Odd Women to the New Women
Ismay, Penelope G
Fall 2022
History Major Standing In the second half of the nineteenth century in Britain, it was discovered that 30% of women of marriageable age remained unmarried. Contemporary observers were alarmed, dubbing it the "redundant woman problem." They proposed shipping these "odd women" off to male-rich colonies. But in addition to proposals for emigration, a number of women started organizations to train these women in occupations that were respectable and could enable them to live independently. In this class, we will use women's magazines to explore why being single in this period was considered so dangerous and how this problem ultimately produced the "new woman."

HIST336401
Study and Writing of History: Space before Google Maps: Geography and Power
Picone, Maria de los Angeles
Fall 2022
History Major Standing. The omnipresence of Google Maps in our lives has homogenized the way we think about space, or at least the way we find places in space. This course will look at how past societies visualized space and, particularly, what geographical space can tell us about power structures. Through a number of case studies from around the world, we will explore how historians incorporate geographical space to historical analysis, the sources they use, and the methodological questions they raise. After examining case students from the last two centuries, students will produce a research paper on a topic of their choice.

**Study and Writing of History: US Radicalism: Social Justice and the Third World Left**  
Bonilla, Eddie  
**Fall 2022**  
History Major Standing  
This course examines how Third World revolutionaries influenced the ideas and strategies of United States activists and social justice movements from the 1960s to the present. Readings and discussions will explore the manifestos, social programs, and newspapers from activists in Black, Asian American, Latina/o, and women of color feminist organizations. By surveying the platforms of organizations, students will gain an appreciation of the ways activists agitated for structural change, built cross-racial solidarities, and imagined new futures. Students will also learn the fundamentals of the historians craft and develop a significant independent research project on a topic of their choosing.

**HIST404901**  
**Farewell to Revolution: Post-Mao China through Film**  
Mo, Yajun  
**Fall 2022**
Fulfills the LAMA requirement for History Majors and Minors This seminar explores post-socialist China (1978-present) through its cinematic representation. Throughout the semester, we will view prominent films made in post-Mao era by art-house directors (such as Jia Zhangke) and blockbuster creators (such as Feng Xiaogang) and discuss how Chinese lived through and reflected back on the dramatic changes of the reform era. We will ask: How do contemporary Chinese remember the socialist revolution? What kind of future do they envision for themselves after China embraced global capitalism? How do varied filmmakers address the issues of gender and class inequality, family, ethnicity, modernity, and the nation through film?

HIST407601  
Democracy Movements and Contemporary China  
Mo, Yajun  
Fall 2022  
Fulfills LAMA requirement for History Majors and Minors This course explores the Tian'anmen Movement as event, experience, and memory. It engages students to examine the rapid and often destabilizing shifts in China since the late 1970s - a period conventionally referred to as "the reform era." Using a variety of readings on the movement (including memoirs, official documents, propaganda, media coverage, and cultural productions in music and art), we will trace the effects of China's earlier experiment with revolutionary socialism on the market-driven present, attending to ways in which the past shapes and haunts the contemporary situation.

HIST413401
The Ottoman Empire, 1300-1924
Shlala, Elizabeth H
Fall 2022
Fulfills the LAMA Requirement for History Majors and Minors The Ottoman Turks founded an empire spanning the three continents of the eastern hemisphere and enduring for nearly three-quarters of a millennium. Despite nomadic origins they established a stable political structure, which grafted the high traditions of Islamic culture onto an ethnically, linguistically, and religiously diverse society. This course explores the evolution of this remarkable enterprise from its origins on the frontiers of Byzantium and Islam through its heyday under Suleyman the Magnificent to its military decline and first steps toward reform.

HIST420201
The Culture of Athenian Democracy
Hoffman, Gail L
Fall 2022
A political and cultural history of Athens during the creation and height of its democracy (circa 480-400 B.C.E.). The course will consider the Persian Wars and their effect on political and constitutional developments in Athens, the workings of the Athenian Democracy under Pericles, and the eventual collapse following the Peloponnesian War. Readings in translation include Thucydides, Plutarch, Aristotle, Xenophon, Plato, and the Greek playwrights (Aeschylus, Sophocles, Euripides, and Aristophanes). Emphasis will be on integrating historical, literary, and archaeological evidence to provide as complete a picture as possible of this dynamic period of ancient history.

HIST423001
The Age of the Renaissance
Ross, Sarah
Fall 2022
During the late fourteenth century, Europe was attacked by the Four Horsemen of the apocalypse: Disease, War, Famine, and Death. In the face of widespread catastrophe, men and women began to seek stability and truth in new ways, within and beyond the confines of state and church. The sum of the many solutions they found is what we call the Renaissance (1350-1650). This course introduces students to cultural and intellectual developments in Italy and Northern Europe, as well as European encounters with the New World.

HIST426401  
Ireland Between the Orange and the Green  
Beiner, Guy  
Fall 2022  
This course offers a critical survey of Irish history over the long nineteenth century, from the late-eighteenth century Age of Atlantic Revolutions through to the eve of the Irish Revolution in the early twentieth century. Episodes and themes include revolutionary republicanism, loyalism and unionism, nationalism, Catholic Emancipation, the Great Famine, emigration, religious devotion, constitutional reform, agrarian protest, cultural revival, and commemoration.

HIST428101  
Film, Media, and Modern Ireland  
Savage, Robert J, Jr  
Fall 2022  
This course will use a variety of sources, including feature and documentary film, to address the transformation of twentieth century Irish society. Students will work with an array of primary and secondary sources to consider how the development of an indigenous film industry and an electronic media challenged and ultimately undermined a conservative political, cultural, and religious consensus that dominated life in post-independence Ireland.

HIST444001
Housing America
Glass, Michael
Fall 2022
Fulfills the US History requirement for History Majors. In the United States today, there is widespread consensus that decent housing should be a human right. At the same time, our political and economic institutions treat housing as a commodity bought and sold in the marketplace. For most Americans, ability to pay dictates their quality of shelter. Taking this contradiction between right and commodity as a starting point, this seminar examines the policies that made America a nation of homeowners. Because housing is always more than just a place to live, we will explore how homeownership is connected to issues of race, gender, sexuality, family, immigration, citizenship, and inequality.

HIST445801
Nannies, Maids, and Mail Order Brides: Gender and Migration in U.S. History
Oh, Arissa H
Fall 2022
Not open to students who have taken HIST4457 Fulfills the US History requirement for History Majors How does gender shape immigration and migration? How does it influence the lived experiences of migrants in the workplaces, families and communities? How does it shape migrants' perceptions and assimilation into U.S. society? How does it intersect with transnational practices and imaginaries? We will consider these questions through a study of migration to and within the United States from the late-19th-century to the present. The class considers a broad range of racial and ethnic groups while also attending to certain categories of migrants in an effort to understand the role of gender, race, and class in migration.

HIST449501
U.S. Foreign Policy I
Jacobs, Seth S, PHD
Fall 2022
Fulfills the US History requirement for History Majors This course is the first half of a two semester survey of the history of U.S. foreign relations from the Revolutionary War through the present day. Students will examine conflicting interpretations of America's role in the world and trace how that role has changed as the nation grew from thirteen isolated, parochial communities on the Atlantic coast to the greatest military and economic superpower in history. Important topics include the territorial expansion of the American empire, the development of - and debate over - constitutional powers, and the struggle for American markets in Asia and elsewhere.

HIST449701
Terrorism in America
Gallagher, Charles R, SJ
Fall 2022
Fulfills the US History requirement for History Majors The aim of this course is to show how terror and violence have affected the United States from the late nineteenth century up to 9/11 and through the current U.S. military operations in Iraq and Afghanistan. It aims to show that while differing in scope and human loss, the latter events, including the so-called Global War on Terror, have certain antecedents in the U.S. experience. The course will concentrate on the theme of terror, both domestic and foreign, and examine the government response to terror and subversive groups aiming to overthrow the government or inflict harm upon its citizens.

HIST451001
Revolutionary Terrorism
Bourg, Julian E
Fall 2022
Terrorism? We know what that is. Revolution? Not so much. We do not live in revolutionary times. For most of the past 250 years, however, revolution seemed a viable option for countless generations around the world: radical change from one social, political, and economic order to another. During this same modern era, the idea of terrorism -- using violence and fear for political goals -- also developed. This course traces the tangled history of revolution and terror from the 1790s to the 1970s, when the two phenomena became separated. Maybe we only think we know what terrorism is.

HIST527501  
**Senior Colloquium: 1916: The World at War**  
**Rafferty, Oliver P, SJ**  
**Fall 2022**  
History Majors Only.. Unlike other courses you may have taken, the aim here is to give students an experience of concentrated study on a single year of the First World War, 1916. Within that parameter there will be twelve topics which will include Gallipoli, the Somme, the Battle of Jutland, and the war on the Eastern Front. Each student will become an expert in two such topics. Students will read a general book on the war in 1916, prepare their two areas of expertise and read two large books on World War I which will provide the context for the concentration on 1916. This is an intense project and is not for the faint hearted. A lot of reading is required, but you will emerge as an expert on WWI in general and of the war in 1916 in particular.

**Credits:** 3  
**Room and Schedule:** Stokes Hall 103S W 03:00PM-05:25PM  
**Satisfies Core Requirement:** None

HIST540601
Senior Colloquium: Before Jamestown
Stanwood, Owen C
Fall 2022
History majors may take one Senior Colloquium. This senior colloquium will focus on North America before the age of permanent European colonies, primarily in the 1500s. After surveying the continent's native American history, we will examine how and why Spain, France, and England came to take interest in the continent, culminating in the formation of outposts in Florida, New Mexico, and Roanoke Island. We will read scholarship from historians and archaeologists as well as selected primary sources, and students will write a substantial paper on this fascinating but understudied epoch of American history.

HIST551001
Making History Public: Propaganda and the Northern Ireland 'Troubles'
Savage, Robert J, Jr
Fall 2022
This course will explore the propaganda war that was a critical component of the Northern Ireland ‘Troubles’. It will consider how governments, political parties, the military and loyalists and republican paramilitaries tried to influence the narrative of a thirty year conflict that raged on the island of Ireland and inside of the United Kingdom. All those involved in the conflict sought to influence how it was understood to regional, national and international audiences by using public art, including posters, murals, and film and the broadcast media to shape a narrative of the conflict that supported their objectives. The course will exploit the rich holdings of the Burns Library (including posters, photographs and polemical pamphlets) to explore how combatants fought to win over the hearts and minds of an increasingly global audience.

HIST731301
Graduate Colloquium: Race, Culture and Power
Lal, Priya
Fall 2022
This course examines a wide variety of literature on race, culture, and identity. It will introduce students to major theories of race and provide an overview of the historiography of race through a selection of case studies from across the world. In particular, we will aim to make sense of how the category of race operates in relation to broader configurations of power within such social, political, and economic formations as empires, nations, and capitalism during the nineteenth and twentieth centuries. In doing so, we will pay close attention to intersecting forms of identity, such as gender, class, and religion.

HIST790101
Colloquium for Master's Degree Students
Matus, Zachary A
Fall 2022
This graduate colloquium is required for first and second year masters students in history. In it, we will explore the basics of a career as a professional historian, exploring the concepts of history, historiography and theory, and practicing how to conduct research, write a variety of historical pieces, teach, design courses, and create museum exhibits. We will also look at how to apply the skills used in graduate school to finding a future either in the academy or as an #altac.

HIST800001
Colloquium: Introduction to Doctoral Studies
Reinburg, Virginia
Fall 2022
This graduate colloquium is required for and limited to first-year doctoral students in history. The course will explore a range of theoretical and methodological approaches to the study of the past. Exemplary works from a range of regional historiographies will constitute a significant portion of the course reading. The course aims to introduce entering students to central traditions and debates in the discipline.

HIST821401
Seminar: Early Modern (European) History
Ross, Sarah
Fall 2022
This seminar offers all graduate students working in the early modern period (roughly 1400-1800) the opportunity to complete original research and writing in this field. To maintain continuity with previous iterations of this seminar, the European context will retain a degree of focus; but those interested in other world regions will be entirely welcome. Through shorter writing exercises, shared readings (to be determined by the particular group's needs), and regular workshopping of drafts-in-progress, we will approach our final goal of crafting a publishable article. Some participants may wish to submit their polished essays to a journal; others may prefer to reserve their work in their portfolios, for later use (variously) as a writing sample for application to doctoral or other graduate programs, incorporation into an MA thesis or dissertation, or as a piece to share in a public-facing venue.

HIST101201
Atlantic Worlds II: Race, Religion, and the Struggle for Democracy
Gallagher, Charles R, SJ
Spring 2023
Formerly Modern Atlantic Worlds This course is a continuation of Atlantic Worlds I, but with new thematic impulses. The course looks at: 1.) The Enlightenment and its challenges to religion; 2.) The rise of the teleological ideology of Marxism/Leninism and its political properties in relation to religion, race, and the state; 3.) European colonial expansionism and its implementation in areas of the world where democratic values were becoming skewed over time; 4.) racial thinking and the role of the churches in the 20th century as eugenic movements swept through various sections of the democracies and as totalitarianism rose in Europe. Business history, Latin American history, African history, Jesuit history, and even the history of Jazz all play a role in this class on the ever-expanding Atlantic World!

HIST104101
World of Early Modern Europe
Ross, Sarah
Spring 2023
Formerly HIST1041 Europe in the World I The purpose of this course is two-fold. First, as an essential part of a liberal education, the course will assist students to develop their skills of critical reading, thinking, speaking, and writing. Second, the course will introduce students to some of the broad outlines of European politics, society, and culture from the Renaissance and Reformation to the outbreak of the French Revolution.

HIST106401
Latin America in the World II
Picone, Maria de los Angeles
Spring 2023
The course looks at the development of modern Latin America through the examination of revolutions that took place throughout the Americas from the late 18th through the early 21st centuries. The independence of United States from England failed as a model for political, economic, and social change in Latin America. Through an understanding of the Haitian Revolution, the Independence movements of the Spanish Americas, Brazil's break from Portuguese authority, the struggle for Cuban Independence in the late 19th century, the Mexican Revolution, and the socialist revolutions in 20th century Latin America, we will trace the development of modern Latin America.

HIST106801
America and the World II
Jacobs, Seth S, PHD
Spring 2023
This class explores the creation of modern America in a global context. We will trace how the United States, the wealthiest and most powerful global hegemon in history, grew out of collisions, at home and abroad, of and among people, ideas, institutions, and cultures. The United States cannot be understood without consideration of its debts to, engagement with, and all-too-often hostility toward the inhabitants of other nations. We will accordingly pay close attention to exchanges with Europe, Africa, and especially the Middle East and Asia.

HIST109301
Modern History I
Grube, Eric B
Spring 2023
This course is the first half of the History Core. Offered in the spring semester of the academic year. Fulfills the Core History I requirement. This course covers several centuries of time (prior to 1800) and traces the political, social, economic, and cultural changes that created the modern world. Depending on the expertise of the instructor, different parts of the world may serve as focal points for examining the complex historical processes behind modern-day transnational relationships, values, and ideas. As part of the Core Curriculum, this course seeks to broaden students' intellectual horizons by exposing them to new places, periods, and perspectives.

Spring 2023
This course is the first half of the History Core. Offered in the spring semester of the academic year. Fulfills the Core History I requirement. This course covers several centuries of time (prior to 1800) and traces the political, social, economic, and cultural changes that created the modern world. Depending on the expertise of the instructor, different parts of the world may serve as focal points for examining the complex historical processes behind modern-day transnational relationships, values, and ideas. As part of the Core Curriculum, this course seeks to broaden students' intellectual horizons by exposing them to new places, periods, and perspectives.

Planet in Peril: The History and Future of Human Impacts on the Planet
Parthasarathi, Prasannan; Schor, Juliet, PHD; Wright, Robin
Spring 2023
Core Renewal Course: Complex Problems The 21st century opened with crises of climate, biodiversity, and eco-system functioning. In this class we address ecological overshoot from the perspectives of sociology and history, emphasizing the role of inequality, the state, inequality and power. The course combines contemporary analyses with a long historical record of human impact, considering both the familiar and the novel in the realm of ecological challenges. We devote substantial attention not only to causes but to solutions. Topics to be covered include: the Columbian exchange, forests, agriculture, water, climate change, toxics, and population. Solutions include state policy, social movements, individual action and social innovation.

HIST162101
The "Other" Americans: Representation and Reality in Asian America
Oh, Arissa H; Tran, Anthony D; Yang, Hongyan
Spring 2023
This is a Complex Problems course and is open to FRESHMEN only. You must take UNAS1729 with this course. Asian American history is American history. It is simply not possible to understand why the United States looks the way it does today without understanding the roles American interactions with Asian nations and people have played in the development of US society. Despite being key figures in immigration, trade, and foreign policies and domestic contests around race, class, gender, and sexuality, Asians in America are continuously (un)seen as the Other Americans. This course will explore the history and mediated representations of Asians in the US to understand how US society has constructed Asians in America, and how Asian Americans have sought to speak for themselves. By analyzing primary sources, films, television, and digital media - as well as producing their own media based on historical materials - students will critically engage with US history as both historians and media producers to examine the complex ways Asian Americans have shaped America itself.

**HIST200101**  
Premodern Japan to 1600  
Ucerler, M Antoni J, SJ  
Spring 2023
Fulfills the LAMA Requirement for the History Major. This course is an introductory survey of ancient, medieval, and premodern Japanese history, from the earliest records to the beginning of the Edo shogunate in 1603. From early Jomon settlements thousands of years ago, the introduction of Chinese Buddhism through Korea ca. 552, and the world's first novel (and science fiction story) composed in the tenth century, to the artistic and literary splendor of the Heian Court in medieval Kyoto and the drama of its Samurai military heritage—all of which inspired contemporary manga and anime—Japan's complex past continues to intrigue and capture the imagination of the present age.

**HIST204301**  
The First Emperor and the Rise of Imperial China  
Zhang, Ling  
Spring 2023

Fulfills the LAMA requirement for History Majors and Minors. This course studies the history of early imperial China, by focusing on the short reign of the First Emperor of the Qin dynasty (221-210 BCE). Students will learn to use a variety of materials (literary, archaeological, artistic, and multimedia) and to think critically about issues including the formation of China's early imperial dynasties; early China's social, intellectual, and cultural histories; the continuity of China's bureaucratic system and authoritarian tradition; and China's relations with the outside world. The course is reading and discussion intensive.

**Credits:** 3

HIST204501
A Material and Cultural History of Food in China
Zhang, Ling
Spring 2023
Fulfills the LAMA requirement for History Majors and Minors. This course studies historical continuity and changes of dietary traditions and culinary practices in China. We will examine how certain foods gave possibilities to and conditioned China's cultural formation and, in return, how food and ways of eating are culturally, socially, and politically constructed. The course's themes include food and religion in early China, food and Chinese medicine in the early medieval, food exchanges with central Asia, food and urbanization during the "Medieval Economic Revolution," the New World food in late imperial China, regional culinary and cultural diversities, and eating in globalized, modern China.

HIST205101
Modern China History
Mo, Yajun
Spring 2023
Fulfills the LAMA Requirement for History Majors This course will trace the history of China from roughly the year 1800 to the present, including the collapse of the imperial system, the rise of nationalism and new political ideologies, the forging of Chinese identity through war and revolution, and the gradual consolidation of the nation-state. The focus will be on the daily life of ordinary people, and their relationship to the family, the village/city, the environment, and the State; their connections with local, regional, and global economic and cultural networks; and their ethnic identity, religious practice, and gender relations. History

HIST218001
Africa Since 1850
Lagace, Martha L; Lal, Priya
Spring 2023
Fulfills the LAMA Requirement for the History Major This course provides an overview of the recent history of sub-Saharan Africa. It begins by examining colonization and the dynamics of colonialism, then traces the development of anti-colonialism and nationalism, and concludes by surveying the trajectories of post-colonial states and societies. Throughout the semester we will think about popular experiences in addition to institutional or elite narratives, ask questions about the changing position of Africa in the world, and contemplate the stakes of conceptualizing African history in the present. Materials will include a range of academic literature, fiction and non-fiction works by African intellectuals, and visual media.

HIST220101
Greek History
Thatcher, Mark R
Spring 2023
A study of the history of Greece from the Bronze Age in the second millennium BCE to the preeminence of Alexander of Macedon in the 4th century. The course will focus on such broad topics as the development of Greek social and political institutions, notions of justice, freedom, and Greek identity, relations among Greek city-states and with foreign nations, imperialism, the golden age of Greek literature, and the rise of Macedonian monarchy. Emphasis will be on the study of the ancient sources: literary, historiographic, archaeological, and epigraphic.

HIST220301
Greco-Roman Egypt
Sapsford, Thomas D
Spring 2023
Under rule by the Ptolemaic dynasty, Egypt became the cultural hub of the ancient Mediterranean; when governed by Rome, it provided natural resources to a vast empire. But what of its multiethnic and multilingual population (the indigenous Egyptians, Nubians, Jews, Romans, Greeks, Arabs who inhabited it) and how did Egypt in this period relate to the rest of Africa and neighboring ancient civilizations? By studying literary, documentary, and visual sources, we will examine several fascinating historical figures such as Alexander the Great, Ptolemy Philadelphus, and perhaps the most notorious woman in antiquity, Cleopatra VII. Students will also encounter first-hand evidence of daily life in this region through letters, contracts, petitions, and arrest warrants recorded on potsherds and papyri and preserved for millennia by the desert sands.

**HIST223001**  
**Science before the Scientific Revolution**  
**Matus, Zachary A**  
**Spring 2023**  
The advent of modern science in the western world was never a necessary outcome of Western intellectual activity. Yet histories of science frequently spin a tale of intellectual progress leading inexorably to scientific thinking (and hint at brighter futures to come). This course examines the technologies and philosophical tools that would give rise to science, but with an eye to their historical contexts and their many non-scientific aspects. We especially will focus on how pre-modern medicine, astronomy, and alchemy relate, or do not, to their modern counterparts.  

**Credits:** 3

HIST224501
Horrors!
Cavallari, Jason R
Spring 2023
A certain percentage of seats in this course is reserved for each class year (Seniors, Juniors, Sophomores, Freshmen). Although it may appear that seats are available during registration, the seats for your class year may be full. Vampires. Werewolves. Witches. Things that go "bump" in the night. Every society learns to fear someone or something in order to protect us from the unfamiliar, the impermissible, or the Other. From dragons to mad serial killers, history is full of the weird, the dark, and the scary; however, who and what defines weird, dark, and scary changes over time and from place to place.

HIST225401
A Social History of Money in the World
Ismay, Penelope G
Spring 2023
Money, they say, makes the world go round. But what is it? How does it acquire value? Who or what says how much it is worth? This question has been answered in very different ways throughout time and throughout the world. Even today the meaning of money varies greatly. This course will explore the meaning of money mostly in ancient, medieval, modern Europe and America but we will also explore the meaning of money in non-Western parts of the world, as well.

**HIST227001**  
**Germany Divided and Reunited**  
**Bowles, Daniel J**  
**Spring 2023**  
Conducted in English.  
Required for the German Studies minor.  
Counts toward German major and German minor.  
This course provides a multi-dimensional look at post-war Germany, East and West. Politics, social and economic structure (East versus West), music, art, literature, philosophy (Critical Theory), the crisis and reform of the West German university system, the young generation, and Americanization will be discussed. Other topics include radicalism/extremism/protest movements (including terrorism), coping with the past (National Socialism), the Revolution of November 1989, and the legal ramifications and unsolved problems deriving from reunification.

HIST230401
Latinx History
Bonilla, Eddie

Spring 2023
Fulfills LAMA and US History requirements for History Majors and Minors. This course introduces students to the histories and cultures of Latina/o/x communities. The course takes a broad approach to the experiences of Mexican Americans, Puerto Ricans, Dominicans, Cubans, and Central Americans. Students will explore how and why Latinas/os/xs have struggled for the right to belong and what their history can tell us about how the United States has developed as a nation and empire. We will cover themes around relational race formation, gender and sexuality, labor, urbanization, and social movements. Students will analyze materials including music, political platforms, and murals to interrogate the evolution of umbrella terms such as Latinidad.

**HIST240601**  
**This Land is Your Land: U. S. Environmental History**  
**Valencius, Conevery B**  
**Spring 2023**

Fulfills the US History requirement for Majors

How have different environments, places, and resources shaped American history? We will survey main themes and events in the environmental history of the United States. We move from colonial-era differences in land use through contemporary environmental debates. We ask how American communities have used, defined, and fought over places and natural resources, from bison herds to nuclear stockpiles. We investigate intriguing aspects of our local Massachusetts environment: the Emerald Necklace of parks, the brass hoof prints of Harvard Square, even our nearby reservoir. No background in history is necessary to thrive in this class. Students in the sciences are welcome.

HIST250201
Introduction to Feminisms
Barko, Emily B
Spring 2023
Fulfills Women Writer's requirement for ENGL/LSOE majors. This introductory course offers both an overview and a foundation for understanding the various movements that make up what has come to be called the feminist movement in the U.S. Because systems of privilege and disadvantage shape women's and men's identities and social positions in multiple and unique ways, Introduction to Feminisms analyzes gender from an interdisciplinary approach and applies numerous academic disciplinary methods to the study of gender, including history, literature, psychology, and sociology, and explores women's and men's experiences within various cultural contexts, including socioeconomic class, race and ethnicity, religion and spirituality, nations of citizenship, origin, and generation.

Spring 2023
Fulfills Women Writer's requirement for ENGL/LSOE majors. This introductory course offers both an overview and a foundation for understanding the various movements that make up what has come to be called the feminist movement in the U.S. Because systems of privilege and disadvantage shape women's and men's identities and social positions in multiple and unique ways, Introduction to Feminisms analyzes gender from an interdisciplinary approach and applies numerous academic disciplinary methods to the study of gender, including history, literature, psychology, and sociology, and explores women's and men's experiences within various cultural contexts, including socioeconomic class, race and ethnicity, religion and spirituality, nations of citizenship, origin, and generation.

**HIST250901**  
**Catholics and Social Justice**  
**Murphy, Thomas, SJ**  
**Spring 2023**  
Fulfills the US History requirement for History Majors This course examines how Catholic lay involvement in the American labor movement stimulated the inauguration of the papal social encyclical tradition in 1891. It will go to describe how American Catholics both supported and opposed this tradition from the Progressive movement to the censure of Senator Joseph McCarthy in 1954. The tendency of the movement's critics to confuse Catholic social teaching with Marxist socialism will be stressed.

HIST251001
Slavery and Nativism in American Catholic History
Murphy, Thomas, SJ
Spring 2023
Fulfills the US History requirement for History Majors Legacy of anti-Catholicism from the Colonial Period merged with an anti-immigrant nativism of the middle nineteenth century. The course will argue that the Catholic failure to address slavery adequately was due to preoccupation with the other two factors.

HIST282501
Sports in U.S. History
Mogan, Thomas
Spring 2023
Fulfills the US History requirement for History Majors Noted author and professor Gerald Early once wrote, "Sports may be among the most powerful human expressions in all history." The above statement lends credence to the notion that sport has become an integral part of the social, cultural, and political fabric of the United States. An examination of sport as an important social institution reveals a number of complex social and economic issues that warrant further discussion and evaluation. This course will examine how the institution of sport has reflected broader changes in American society from a historical perspective. Special focus will be placed on the relationship of sport to race, class, and gender; issues of economics, consumerism, urbanization and the media will also be considered. As such, we will be especially concerned with the experience of certain groups and individuals that have been associated with and affected by sports throughout the history of the United States.

**HIST285401**  
**Colonial Korea and its Legacies**  
**Hwang, Ingu**  
**Spring 2023**  
This course explores Korea's experience under Japanese colonial rule (1910-1945) as well as how this experience was remembered and represented in the post-colonial era. Students will explore the three phases of Japanese rule: military rule (1910-1919); cultural rule (1919-1931), and wartime mobilization (1931-1945) and how each of these phases have shaped and continue to shape Korean national identity and politics, socioeconomic development, and memory culture. The course draws on historical and literary texts as well as film and other visual sources. This course combines lecture with active student discussion and presentations.

**Credits:** 3  
**Room and Schedule:** Gasson Hall 207 TuTh 01:30PM-02:45PM  
**Satisfies Core Requirement:** None
HIST287501
Development and Social Justice in Korea
Hwang, Ingu
Spring 2023
This course introduces students to the political and economic changes that South Korea experienced from the 1960s to the present and explores how these changes contributed to social unrest, to demands for greater democracy, and to other social justice issues. In doing so, it will address how South Korea's economic and political trajectory was informed by pressures at the international, national, and sub-national level and compare the South Korean case to that of other Asian nations.

HIST320101
Study and Writing of History: Material Culture
Fleming, Robin
Spring 2023
Students will learn to write history using things as well as texts. We will begin the course by reading secondary literature on how to read objects. Each student, in consultation with the professor, will then choose a kind of material evidence, a period and a topic, and the rest of the semester will be devoted to learning how to research and write an ambitious and original research paper. Topics in the past have included: Late-Roman women's fashion and social status in Roman floor mosaics; Grave-goods and the construction of early medieval childhood; Union and southern American Civil War amputation kits; British and American World War II ration cookbooks; and a comparative study of Soviet and American bomb shelters during the Cold War.

**HIST336301**

**Study & Writing: History through Memoir of Latin America**

**Sellers-Garcia, Sylvia M**

**Spring 2023**

Open to History Majors Only This course considers the history of Latin America, from the colonial period to the twentieth century, through memoir. At the heart of the course are two themes: identity and evidence. On the one hand, memoirs reveal how authors construct their individual identities; on the other hand, they reveal how authors imagine and construct the national/imperial identities. Memoirs also raise questions about methodology, in particular, questions relating to evidence. How do authors remember the past? How do they change it when they write about it? To what extent are memoir writers more or less reliable as authors of history?

**Credits:** 3

**Room and Schedule:** Stokes Hall 205S Tu 03:00PM-05:25PM

**Satisfies Core Requirement:** None

**Prerequisites:** History Core I and II or its equivalent in AP credits

**Corequisites:** None
HIST343501
Study and Writing of History: Slavery and Memory: The WPA Narratives and Antebellum Slavery
Lyerly, Cynthia L
Spring 2023
This course has one central database that students will use as their primary source(s): the over 2000 accounts of former slaves collected by Works Progress Administration interviewers during the depression. These sources are problematic, and raise interesting questions about the difference between history and memory, how to use sources that are deeply prejudiced and slanted, and about horrific experiences, like enslavement, can be represented. Students will write on some aspect of antebellum slavery or its memory using the WPA narratives and the secondary sources that contextualize them. Writing and reading intensive.

HIST400301
Public Culture in Postwar Japan
Seraphim, Franziska
Spring 2023
Fulfills LAMA requirement This course explores the themes in Japanese public culture since 1945 from a historical perspective. They include the place of war memory in public life, changing social values concerning women and family, cultures of political protest, ethnic diversity, new (and old) religions, and icons of popular culture. The readings focus on major recent works by historians, anthropologists, psychologists, and literary scholars designed to broaden our view of postwar Japan from critical new perspectives. Students will also have the chance to do some research into an area of their particular interest. Some background in twentieth century Japanese history is recommended.

**HIST402101**  
**Korean War: Conflict, Security, and Peace**  
**Hwang, Ingu**  
**Spring 2023**  
The Korean War (1950-1953) began as a civil war but became a global conflict against the backdrop of the emerging Cold War era. Known as "the Forgotten War" in the U.S., this conflict resulted in 5 million deaths and left an indelible imprint on the world. Seven decades later the Korean peninsula remains divided, and the contentious international security mechanisms engendered by this conflict still shape East Asian relations and U.S. foreign policy. Through engagement with recent historical works, this seminar course will explore the origins and legacies of this conflict, security options and limitations, and conditions and visions of peace.

HIST404801
Modern Girls: The Woman Question in Twentieth Century China
Mo, Yajun
Spring 2023
Fulfills the LAMA Requirement for History Majors Formerly titled: Women & Gender in Modern China
How have Chinese defined what it means to be a proper "man" or a "woman"? How have these gender norms and ideologies shaped the life experiences and self-perceptions of individual men and women in modern China? How have they shaped Chinese social, political, economic, and cultural institutions? We will explore these questions by focusing primarily on Chinese womens lives and the changes in shared social ideas about what women should do and be from the mid-19th century to the present. The central question animating the course is this: when we foreground gender as a category of analysis, how does history look different?

HIST419101
African Landscapes and Localities
Lagace, Martha L; Lal, Priya
Spring 2023
Fulfills the LAMA requirement for History Majors and Minors Graduate students not permitted
This course explores the historical geography of sub-Saharan Africa during the colonial and postcolonial eras. We will examine how a variety of spaces and places on the continent were imagined, represented, and practiced over time, concentrating on five major themes: maps, the city, the countryside, transportation, and borders. Students will learn about political, economic, social, and cultural dynamics in modern Africa while engaging with diverse theories regarding the production of space.

This course investigates how the language and culture of ancient Greece and Rome has shaped many of our contemporary ideas on sexuality in the US. Students explore the role of Greco-Roman material in discourses of sexual identity, freedom, and oppression from the first scientific studies of sexual behavior in the late nineteenth-century to notions of sex, gender, and sexuality in the modern day. Throughout the course students analyze both ancient and modern texts to see how classical culture has acted as an explanatory force in the fields of medicine, psychology, law, and politics. Students also explore how marginalized groups, especially LGBTQI peoples, have used Greco-Roman antiquity as a means both for forming community and for arguing equal rights.
The Romans lived in a world full of gods; religion affected every part of Roman life, from politics to warfare to entertainment. Christianity took shape within this world, and Roman religion, especially the mystery cults, has often been regarded as a model for the early church. Yet the Roman concept of 'religion' has very little in common with modern, Judeo-Christian-influenced notions. In this class we will explore the theory and practice of religion in the ancient Roman world, as reflected in ancient literary texts, as well as in epigraphic and archaeological evidence. Themes include the nature of Roman worship, from state cult to magic and mysteries, the interplay between religion and politics, and the development of Christianity in its pagan context.

**HIST422501**  
The Witch, the Church, and the Law  
Reinburg, Virginia  
**Spring 2023**  
During the sixteenth and seventeenth centuries a convergence of political, social, and religious movements produced thousands of trials for crimes of witchcraft, sorcery, and superstition throughout Europe and in North America. This course explores these trials, particularly emphasizing their legal and ecclesiastical aspects. Related issues of popular belief in sorcery, magic, and diabolical activity will also be considered. Attention will be devoted to the question of why women were so frequently among the accused.

HIST426301
History, Memory and Forgetting in Modern Ireland
Beiner, Guy
Spring 2023
Over the past four decades, the humanities and social sciences have been preoccupied with issues pertaining to historical remembrance. Within the wider historiographical context of this so-called 'memory boom', this course will explore Irish traditions and practices of commemoration and remembrance, with reference also to forgetting. Topics to be covered include memory/forgetting of colonization, sectarianism, rebellions, famine, war, loyalism, partition, the Troubles, immigration, and institutional abuse. While focusing on Ireland, Northern Ireland and Irish diasporas, our purpose will be to find out what memory studies can offer to the understanding of the past.

HIST426801
Brave New Worlds: Communist Utopias and Dystopias
Eaton, Nicole M
Spring 2023
Previously titled Socialist Techno-Utopias In the decades following the Russian Revolution, the Soviet state attempted to transform human society and the human species to bring about utopia. Soviet and other socialist scientists carried out numerous experiments in visionary biology, studying reproduction, immunity, and heredity in order to build proletarian new men and women; others sought to breed tame foxes, grow crops in winter, or explore the cosmos.

This course explores socialist utopian visions through the social and cultural history of the experiments and their ideological and geopolitical underpinnings. The course focuses especially on their representations in film and fiction.

HIST437101
The Inquisition in Spain and Spanish America
Sellers-Garcia, Sylvia M
Spring 2023
Fulfills the LAMA requirement for History Majors and Minors. This lecture and discussion course for advanced students will consider the development of the Spanish Inquisition from its medieval roots to its early nineteenth-century demise. Divided roughly between Spain and the Americas, we will consider the following topics: the medieval co-existence of Jews, Muslims, and Christians in Spain; the "re-conquest" of the Iberian peninsula in the 15th century and the formation of the inquisition; the theological debates of the 16th century that determined the scope of heresy. Our focus will be on using the Inquisition as an insight into early modern culture in both Spain and the Americas.

HIST440301
Persecution and Toleration in the Atlantic World
Stanwood, Owen C
Spring 2023
Fulfills the US History requirement for History Majors. This class focuses on religion in early
modern Europe and colonial America, and particularly on the question of tolerance. We will start
by looking at why early modern Christians had so much trouble tolerating each other, and later
find out how they learned to (sometimes) get along. The class includes units on Spain, France,
England, and colonial America, with detours to the Netherlands, Italy, and other locales. Topics
covered will include the Inquisition, European wars of religion, religiously inspired migrations,
and the development of ideologies of toleration in the Age of Enlightenment.

HIST442201
Race, Riots, and Rodeos: U.S., 1865-1900
Richardson, Heather C
Spring 2023
Fulfills the US History requirement for History Majors. In this course we will study the years from the end of the Civil War to the beginning of the twentieth century. While these decades often seem confusing in texts that treat them topically, they are, in fact, some of the most exciting and coherent years in American history. We will look at Reconstruction, urbanization, cowboys, industrialists, laborers, Indians, immigrants, and so on, to see how Americans made sense of the dramatic changes of the post-Civil War years.

HIST442701
Early Medieval Art in Ireland and Britain
Netzer, Nancy D
Spring 2023
The course will examine the development of art in Ireland and Britain in the Early Medieval period and the production of Irish and English missionaries on the Continent. Emphasis will be placed on the following: 1. manuscripts, sculpture, and metalwork of the sixth to ninth century 2. understanding works of art in their historical contexts 3. sources of the works in the Celtic, Germanic and Mediterranean worlds 4. circumstances under which artists and scribes worked 5. the complex problem of defining local styles 6. complexities of dating works of art 7. evidence yielded through excavation of principal archaeological sites 8. deconstructing the scholarship in the field over the last two centuries. 9. placing new archaeological finds in the art historical narrative 10. the role of Irish manuscripts, metalwork, and sculpture in the Celtic Revival and as national monuments 11. misappropriations of Celtic and Anglo-Saxon symbols (i.e. Celtic Cross and Runes) by white supremacists

HIST451101
Religion & Espionage
Braude, Benjamin; Gallagher, Charles R, SJ
Spring 2023
This course aims to look at how religion and religious actors have impacted the practice of espionage, subterfuge, and spying from the Elizabethan era to the present. The course will examine the relative influence of religion on executive political action, counterintelligence, and social history. Modules will include case assessments from four major world religions: Catholicism, Protestantism, Judaism, and Islam. It will engage question of ethics, culture, gender, and race. Whereas historians often view religion as a subspace of cultural history, and intelligence as ancillary to military history, this course seeks to bridge the gap between culture and political history, focusing on the intersection of the two.

HIST451201
Violence, Law, and Empire
Bourg, Julian E
Spring 2023
Does law protect us from violence, or does law express the violence of the state? Is law above politics, or does it embody political power? Can law be racially neutral, or is it structured by race? This course examines the complex histories of violence, legality, imperialism, and race in the nineteenth and twentieth centuries. We will investigate natural, positive, revolutionary, and international law; political versus common crime; the changing nature of warfare as well as the laws of war; humanitarianism and human rights; and the ways that colonialism shaped and anti-colonialism criticized racialized justice.

HIST481901
Ireland, Britain and America during the Cold War and beyond, 1945-1998
Ohalpin, Eunan
Spring 2023
This course addresses relations between the United States and Ireland in the context of evolving Anglo-Irish, Anglo-American and broader geopolitics. Utilizing American, British, Irish and Soviet primary sources, it examines how Ireland sought American support for Irish policy on Northern Ireland and other issues. It explores the influence of the Anglo-American Cold War security partnership, and how accession in 1973 to the European Communities (now EU) has enhanced Irish influence within the American foreign policy system.

The Dynamics of Gender in Ireland: 1850 to the present
Morrison, Eve
Spring 2023
This course explores how concepts of femininity and masculinity shaped historical events and everyday life on the island of Ireland from the mid-nineteenth century to the present day, tracing shifts in gendered notions over time. Topics include the Land War; campaigns for home rule, suffrage and workers rights; constitutional, cultural and radical nationalism; unionism; the Great War; the Irish Revolution; post-partition Independent Ireland and Northern Ireland; the Second World War; the Northern Irish Troubles; reactions to second wave feminism; twenty-first century campaigns for marriage equality and abortion rights.

HIST482301
Ireland at War in the Twentieth Century
Rafferty, Oliver P, SJ
Spring 2023
Twentieth-century Ireland seemed a country imbued with violence. This was not simply because of the Easter Rising of 1916 and the War of Independence, 1919-21. The warlike propensities of the Irish had already been demonstrated by Irish involvement in the Boer War 1899-1902. These events set the parameters of what happened in Ireland in the rest of the century and included such things as the Civil War 1922-23, the activity of the Irish Republican Army (IRA) in the 1930s, 40, and 50s. Ireland's participation in both world wars and the violence of The Troubles 1969-98 will also be examined.

HIST523101
Senior Colloquium: Women Making History
Ross, Sarah
Spring 2023
History majors will have encountered at least some women making history as agentive protagonists in the past. This capstone course offers the opportunity to think about the topic from a different angle, considering women as writers of history, from Christine de Pizan in the fifteenth century to Tiya Miles in 2021. Among our central questions will be how (or if!) gender positioning shapes the historians questions and methods. Along the way, we will also read the work of and speak with women historians in our own department who are making history in many different fields.

Credits: 3
Room and Schedule: Fulton Hall 310 M 03:00PM-05:20PM
Satisfies Core Requirement: None

HIST540401
Senior Colloquium: Energy History
Valencius, Conevery B
Spring 2023
Daily lives depend on oil, gas, and electricity, and yet many of us know little of how energy arrives at homes and businesses or why our energy systems function as they do. This Senior Colloquium focuses on the history of energy sources and technologies, the networks that transport power, and the diverse communities and sprawling companies that purchase, use, and fight over energy supplies. We will anchor in US history but reach out to histories of other countries. We will read and discuss recent exciting books and articles. Students will compose several short analysis papers and write a final comparative analysis involving two books of their own choosing. Main skills: keen writing, sharp analysis, clear oral presentation, useful collaboration, efficient research.

HIST731701
Graduate Colloquium: Global History
Seraphim, Franziska
Spring 2023
Appropriate for graduate students at all levels of study, geographical areas, and specialties, this course invites students to learn and practice the methodologies of THINKING HISTORY GLOBALLY. All historical sources, human and nonhuman alike, are evidence of life experienced in relation to SPACE and PLACE at different scales and according to different temporalities. It is on us to bring critical facilities to the siting of our topics within larger networks of political organization, social experience, cultural meaning, and personal identity. We will have a preliminary meeting in late November to solicit student input in the syllabus.

HIST754301
Graduate Colloquium: The 1970s
Bourg, Julian E
Spring 2023
Sometimes brief moments undergo tremendous, consequential historical transformations. This course examines the sea changes in global history during the 1970s, when many dynamics of our own era began. Topics include: the waning and renewal of the Cold War, decolonization and postcoloniality, post-Sixties social movements, the New Right and religion, the emergent terrorism paradigm, human rights and neoliberalism, and ascendent media culture. Students will both collaborate on a common research project and pursue thick descriptions of other times and places of their choosing. We will weigh the advantages and disadvantages of such historical deep dives.

HIST781801
Graduate Colloquium: Early America in an Atlantic World
Stanwood, Owen C
Spring 2023
This colloquium will survey some of the greatest works, both classic and recent, in the history of North America before around 1850. More than that, we will put that continent in an Atlantic context, connecting its story with Europe, Africa, Latin America, and the Caribbean. We will pay particular attention to processes of enslaved and free migration, the formation of empires, and the transatlantic movement of ideas and political movements. Students will have the option of writing a seminar paper based on original research.

HIST827501  
Capstone: Digital Humanities as Public Scholarship  
Lehman, Brittany  
Spring 2023
Many schools across the United States teach different versions of survey classes for which instructors have to reach outside their own focuses. To do so, those instructors often search for visualizations of historical change, literary development, and examinations of religious networks, depending on the field and course. In this capstone, graduate students will develop projects within their areas of specializations to produce digestible digital exhibits, visualizations, and more that can be made freely available to scholars across the world. The goal would be to promote the free exchange of high quality information and digital sources available in the public domain. Furthermore, through the capstone, students should understand the process of a project from conception to presentation. They should have developed skills engaging metadata, transcription, the process of digitization, and more. Students can bring their own research data from their dissertation project or from previous coursework, or they can be provided with a historical or literary dataset from the Boston College Libraries to utilize over the semester. There are four phases to the class, beginning with performing an environmental scan and writing a proposal for their project. In Phase II and III, students will implement and carry out their projects. Finally in Phase IV, students will engage in peer consulting and prepare their work for online publication.

ITAL111301
Intermediate Italian I
Pagotto, Alessandro
Fall 2022
Conducted in Italian The prime objective of the course is to improve reading and writing skills, to continue building oral proficiency, and to provide a lively and current cultural background of contemporary Italy. A review of the elements of language will be supplemented by the reading of selected texts, oral practice, and individual research, all presented within the context of contemporary Italian society and classic Italian culture. Students will develop their ability to satisfy basic survival needs and to engage in conversation on a fairly complex level.

ITAL221301
Italian Conversation, Composition, and Reading I
Costanzo, Maria Sole
Fall 2022
Conducted in Italian
Elective for major and minor in Italian. Satisfies Foreign Language Proficiency core requirement.
The course topic, "Italian through Fiction and Films", allows development of oral and written language skills. Centered on the analysis of short stories and films related to contemporary Italian society, attention will be paid to analytical and lexical enrichment. Other sources (articles from the Italian Press, audio-visual programs, and the Internet) will provide additional avenues of interpretation.

ITAL556601
Twilight Zones: Italian Fantastic Short-Stories
Acetoso, Mattia
Fall 2022
Conducted in Italian. Literature of the Fantastic has always challenged our perception of reality. Many Italian writers focused on fantastic themes and wrote unique stories about the uncanny, the unfamiliar and the astonishing in everyday life or described marvelous worlds and alternate universes. This course explores the short stories of major Italian writers from Romanticism to the New Millennium who engaged in this genre and mode of narration. Their short stories will show an unedited side of Italian literature, and allow students to more fully understand Italy's history, society and culture.

ITAL881001
Lyric Poetry from Giacomo da Lentini to Petrarca
Costanzo, Maria Sole
Fall 2022
Conducted in Italian This seminar will survey Italian lyric poetry, the most dynamic and
prestigious genre of the medieval period in which the literary language was being formulated.
The course will cover the development of lyric poetry from the thirteenth-century Scuola
Siciliana to the sixteenth-century petrarchisti, but the principal focus of the course is the
Canzoniere of Francesco Petrarca. Discussions will include orality and manuscript/print
transmission of poetry, the complex relation of the individual poet to the tradition, the theory of
imitation, and literary Neoplatonism.

ITAL883001
Bernini and the Baroque
Mormando, Franco A
Fall 2022
Open to both graduate and undergraduate students. An interdisciplinary study of the art, literature and culture of the Baroque age (ca. 1600-1680), focusing on its epicenter, the city of Rome, and on the one artist who more than any other defined and disseminated that style, Gian Lorenzo Bernini. Against the backdrop of the political and institutional crises and social-religious metamorphoses of the period, we will explore the fertile and intimate inter-relationship between the arts (sculpture, architecture, theater, music) and the other forms of cultural expression.

### Italian Courses: Spring 2023

**ITAL100401**  
**Elementary Italian II**  
**Santini, Jessica**  
**Spring 2023**  
Conducted in Italian Admitted by placement test, consent of instructor, or completion of ITAL1003 This course is a continuation of ITAL1003 and further develops the goals of the first semester. Special attention is given this to the production of more complex speech, the expression of personal opinion, and a deeper knowledge of contemporary Italian culture. More formal writing exercises and reading of authentic texts aid students in reinforcing language skills. A group final project at the end of the course attempts to bring together the themes and experiences from previous study.

ITAL221401  
Italian Conversation, Composition, and Reading II  
Costanzo, Maria  
Spring 2023  
Conducted In Italian  
Elective for Italian major or minor. Satisfies Foreign Language Proficiency core requirement. In this course students will continue to strengthen and expand their language skills through oral and written practice. The analysis of a contemporary novel and its cinematographic adaptation will be the basis for class discussion, written assignments, and oral presentations. Both ITAL2213 and ITAL2214 are strongly recommended for students who intend to use Italian to enrich their study experiences at home and abroad.

Credits: 3

ITAL337301
Love, Sex, and Gender: The Western Literary Tradition
Mormando, Franco A
Spring 2023
Conducted entirely in English and Fulfills Literature Core This course explores the modern conception of "romantic love" by examining its birth and development in prominent literary works (by men and women) of the Middle Ages and Renaissance. We will also investigate allied notions of sexuality, gender, and marriage, in both a heterosexual and same-sex ("homosexual") context. For contrast and comparison, the course begins with a study of the Bible and ancient Greek and Roman texts and ends with a look at the depiction of our themes in contemporary cinema as well as a discussion of the current debate in American society over the nature and purpose of marriage.

Credits: 3
Room and Schedule: Devlin Hall 221 TuTh 01:30PM-02:45PM
Satisfies Core Requirement: Literature

ITAL555801
All Roads Lead to Rome: Literature, History and Culture
Costanzo, Maria Sole
Spring 2023
Conducted in Italian. This interdisciplinary course introduces students to the long history of Rome from its foundation to today, from the ancient ruins of the Roman Forum to contemporary street art in multicultural neighborhoods. Students will study a selection of readings, monuments, paintings, and movies, with a particular emphasis on Renaissance and Baroque Rome, and will investigate the relationship between these artifacts and contemporary Italian society. The course will include an on-site class at the Isabella Stewart Gardner Museum and live meetings with on-site experts and scholars in Rome.

ITAL558001
Italian Cinema of the New Millennium
Acetoso, Mattia
Spring 2023
Conducted in Italian From the groundbreaking innovations of Neorealism, to the visionary experimentations of the 1960s, Italian cinema has influenced generations of filmmakers worldwide and shaped Italy's image abroad. In the new millennium, after years of creative impasse, revolutionary young directors are participating in an Italian cinematic renaissance. This course explores the accomplishments of the most talented Italian filmmakers of the last twenty years, analyzing their films not only as works of literary and visual art, but also as portraits of contemporary Italian society and culture.

Leon Battista Alberti and the Languages of the Italian Renaissance
Costanzo, Maria Sole
Spring 2023

Conducted in Italian

Leon Battista Alberti is a unique protagonist of the Italian Renaissance. While best known for his architectural accomplishments, Alberti penned a variety of literary works, including scientific treatises, satirical novels, and the first manual ever of European vernacular. This course explores Alberti's ambition to acquire literary leadership to influence the powerful humanists in Florence and overcome his own illegitimate origins. Throughout the semester, students will discuss central ideas of Medieval and Early Modern Italian culture (the construction of the self, the role of virtue, the condition of exile, etc.), within the context of major theoretical debates of the time.

Conducted in Italian. This course will offer graduate students the opportunity to explore directors, films, and movements of Italian cinema from Postwar to the New Millennium. A central focus will be the definition of authorship in the study of Italian cinema. From Neorealism to Comedy "Italian Style," from the art films of the 1960s to contemporary experimentation, Italian directors have shaped the Italian cinematic universe and consolidated its relevance worldwide. The ultimate goal is to provide graduate students with the critical tools to analyze cinema and acquire methods for both teaching and writing on this subject.

International Studies Courses: Summer 2022

INTL225101
Food, Power, and Politics
Nakazato, Hiroshi
Summer 2022
This course will seek to provide an intellectual and analytical-driven framework around the question of food as an integral part of any human experience, but particularly our experience with food through across cultures. We each have a unique opportunity to understand better the role of food in each of our lives as we move through this summer program by examining our own cultural and political assumptions and those of others from a new point of view. We can appreciate the lenses brought by other individuals, cultures and places to the acts of eating and producing food. Finally, we can express the human experience of food in ways that represent our understandings, experiences and vision for a healthy, just and pleasurable relationship to food in ways that can be shared and appreciated by others. In eating and producing food, we exist simultaneously in a deeply personal and communal place, a place of the present, past and future in which we are never more and less than human.

INTL285601
Contentious History and the Politics of Contemporary Korea
Hwang, Ingu
Summer 2022
This introductory immersion course surveys the contentious intersection between history and politics in contemporary Korea. Students will explore the following questions: What were the critical historical experiences and issues that became part of the public discourse and catalyzed political contestations in local and international/global communities? Why did these issues become contentious and for whom? What actions and counteractions did they inspire? In critically examining these questions, students will address four topics: postcolonial disputes, national division, economic development and social justice, and (post-)democratization protests. To facilitate in-class discussions, students need to engage critically with textual and media sources. They are also required to actively participate in the historical and cultural immersion/excursion programs, including the National Museum of Korean Contemporary History, the DMZ tour, and the Kim Dae-jung Presidential Library and Museum.

Where on Earth: Foundations in Global Culture & Political Geography
Getzoff, Joseph
Fall 2022
Restricted for rising sophomores (class of 2025) for AY 2021-2022
One of two Where onEarth? courses that introduce International Studies majors to the foundational concepts that illuminate today's world. Taking a cultural and political geography perspective, the course explores topics including borders, development, urbanization, and the Anthropocene, as well as the key role of place in connecting our world. The course also has a digital geo-humanities lab component. We will learn to use digital tools including ArcGIS Online to create maps and storytelling tools. These tools also further our cartographic literacy and promote a critical understanding of how digital tools shape how we view global issues.

Jewish Media, Arts, and Culture  
Sienkiewicz, Matthew S  
Fall 2022  
Satisfies one of three elective courses required within the Communication major This course looks at current trends in Jewish cultural creativity, considering both diasporic and Israeli film, television, literature, and visual arts. Designed for students with limited knowledge of Judaism and Jewish culture, the class surveys Jewish religious practice, political history, and traditions of cultural expression as it examines media sources that embody, advance, and grapple with ideas from the Jewish past and present. Topics include, but are not limited to, Jewish comedy, Jewish children's media, Jewish memory, the globalization of Israeli television, and Yiddish language media.

Comparative Politics of Populism and Migration in Europe
Molles, Elitsa V
Fall 2022
Have all European polities and societies become liberal after post-communist transitions? How have populist parties across the Continent transformed discourses, politics, and individual identities? How do race and exclusion of ethnic, religious, or other minorities figure into Europeans' everyday lives? How has migration uprooted social realities across Europe? The course will answer these questions and more through the lens of identity politics. It will trace and analyze the multiple transformations in Western and Eastern European politics and societies in the contemporary period, through a mix of theoretical texts, current case studies, and non-academic sources.

International Law
Nakazato, Hiroshi
Fall 2022
This course examines the role of international public law (the "law of nations") in the world today. It takes as its starting point the academic (and practical) debate about the utility of international law in world politics. From there, we consider the philosophical foundations of law, the sources of international law, and the application of international law in different arenas. In particular, the course will focus on how international law deals with a number of issues, including the connection between domestic and international law and the laws on territory, jurisdiction, human rights, and security, as well as other relevant topics.

INTL223001
Geographies of Nature and the Environment
Getzoff, Joseph
Spring 2023
The study of the environment is urgently important in an era of global climatic change. Geography and other social sciences have long offered critical ways to understand the entangled relationship of humans and their physical environment. This course is an introduction to the many ways to think critically about this relationship, drawing from a robust body of scholarly debate. The course will engage with many topics that explore the significance of the environment in relation to human societies: we will look at the construction of nature as a foundational idea in human cultures, the intersection of economies and ecologies, the histories and legacies of colonial environments, political ecology and conflicts over resources, the shaping of the non-human animal, the science and politics of climate change, and engage with critical questions of environmental justice in an ever changing and globalized world. We will not focus on any one region, instead opting for a global survey of cases that will allow us to critically interrogate the meaning of nature and the environment in relation to human societies past, present, and future.

This course aims at providing both the theory and empirics of modern economic growth theories. In addition to Classical and Neoclassical economic growth approaches, current views such as endogenous growth theory will be discussed. Emphasis will be placed on why some countries lag behind others and ways to solve this problem. The factors that are affecting economic growth such as technology, capital accumulation, change in employment, education, human capital, saving, energy consumption, democracy are studied in detail. The course also addresses the role of financial markets and policy formulation of economic growth.

21st Century Vatican Diplomacy
Martin, Peter G
Spring 2023
The Holy See maintains interests in every corner of the globe and a striking political influence in the world today. Foreign governments value the impact that partnerships with the Holy See produce for common foreign policy priorities. In this course, students will learn how the Holy See engages with other nations and international organizations on global and regional issues. They will explore its foreign policy priorities and the mechanics of such engagement. The course is taught by a former U.S. diplomat to the Holy See from the point of view of the practitioner, focusing on the day-to-day diplomacy of the most recent pontificates. The course begins with a short introduction to the practice of diplomacy with an emphasis on the U.S. Foreign Service.

Politics of Energy and Climate in the U.S. and International Perspective
Deese, David A
Spring 2023
Why is energy and climate policy fundamentally political, deeply entwined with human, national, and international security, and critical to global stability and well-being? Major course units assess the main actors and institutions in energy; including OPEC and international markets; contrast the primary challenges confronting energy policy in the exporting and importing states; evaluate the implications of climate disruption and the solutions across the sixty largest greenhouse gas emitting states; and analyze how energy and climate politics shapes global security and sustainability. Class members will also conduct a global climate negotiation and study in depth the regional security and political economy of the (Persian) Gulf states.

Colonial Korea and its Legacies
Hwang, Ingu
Spring 2023
This course explores Korea's experience under Japanese colonial rule (1910-1945) as well as how this experience was remembered and represented in the post-colonial era. Students will explore the three phases of Japanese rule: military rule (1910-1919); cultural rule (1919-1931), and wartime mobilization (1931-1945) and how each of these phases have shaped and continue to shape Korean national identity and politics, socioeconomic development, and memory culture. The course draws on historical and literary texts as well as film and other visual sources. This course combines lecture with active student discussion and presentations.

This course introduces students to the political and economic changes that South Korea experienced from the 1960s to the present and explores how these changes contributed to social unrest, to demands for greater democracy, and to other social justice issues. In doing so, it will address how South Korea's economic and political trajectory was informed by pressures at the international, national, and sub-national level and compare the South Korean case to that of other Asian nations.

INTL334001  
Environmental Politics of the Middle East  
Getzoff, Joseph  
Spring 2023  
This course will critically explore the contemporary and historical environmental issues associated with the Middle East and North Africa (MENA) in order to understand the relationship between nature, politics, colonialism, culture, and geography. First, the course will interrogate the geographic label, Middle East, to understand how American and European literature, politics, and culture created different bodies of knowledge and replicated popular discourses that justify intervention in West/Southwest Asia and North Africa. Understanding the Middle East as a geographical construction also allows us to critically think through how environmental issues are interconnected with the global and localized histories of colonialism, imperialism, and empire. Students will read and discuss scholarship on development, postcolonial theory, environmental history, and political ecology. Throughout the semester, students will complete a project on a topic of their choosing, developing it from start to finish with instructor and peer feedback.  
Credits: 3

International Finance
Valchev, Rosen Z
Spring 2023
Not open to students who have taken ECON2271 or ECON3376. International financial markets, international trade, and balance of payments issues will be studied by using analytical models of the open economy. Topics of particular interests are exchange rate determination, capital flows, trade flows, and other international linkages between economies. The course will apply the analytical tools of international economics to address macroeconomic aspects of current policy issues such as the global impact of the financial crisis, exchange rate policy, sovereign debt crises, and persistent trade deficits and international indebtedness.

INTL337601
International Economic Relations
Anderson, James
Spring 2023
Not open to students who have taken ECON3371 or ECON3372. This course introduces the study of economic relations among countries. It combines material contained in ECON3371 and ECON3372, and substitutes for both those courses. Primarily designed for international studies majors, it is also appropriate for economics and other social science majors, with the proviso that the comprehensive coverage of the course implies that the workload is heavy and expectations for students are high. Topics include the determinants of trade in goods, services, and capital; the economic policies that nations use to influence such trade; the theory and practice of international macroeconomics; and problems of coordinating macroeconomic policies among countries. The course features the usefulness (and limitations) of game theory for explaining international economic interactions.

INTL340201
Comparative Revolutions
Kadivar, Mohammad Ali
Spring 2023
What are revolutions? Why do they happen? How do they happen? What are their consequences? This course critically engages with these questions, and reviews the main answers presented in the social scientific literature on the revolutions. In addition to a theoretical understanding of the revolutionary processes, the course also presents case studies of some of the classic examples of revolutions such as the Haitian and Russian revolution, as well as more recent revolutions such as the uprisings in the Arab World. Through reviewing the literature and case studies, we also examine how the meanings and dynamics of the revolutions have changed from the early 20th century to the 21st century.

INTL345001
Research Methods for International Studies
Getzoff, Joseph
Spring 2023
Course will introduce students to research methodology and politics in the social sciences and humanities. How do you approach doing research, especially in international settings? What are the politics of research and knowledge production? What is the history of research as a colonial practice of power? What are the politics of going out into the "field" only to return "home" to produce work? Students will critically evaluate approaches to research, while also surveying research methods in the social sciences and the humanities, focusing mostly on qualitative methods. Students will gain experience designing and implementing a short research project. Course will draw from methodologies in the social sciences, as well as critical approaches to research from geography, anthropology, indigenous studies, postcolonial theory, feminist theory, and more.

Globalization
Christensen, Paul T
Spring 2023
This course examines the political, economic, social, and cultural implications of the increasingly integrated world system. The course focuses on conflicting assessments of international institutions (IMF, World Bank, WTO) and political governance; the impact of economic integration; and the effects of globalization on state sovereignty, democracy, and social cohesion. Specific case studies will include: globalization and the environment; globalization, gender, and work; globalization and immigration/migration; globalization and the illicit economy, and anti-globalization social movements and activism.

Korean War: Conflict, Security, and Peace
Hwang, Ingu
Spring 2023
The Korean War (1950-1953) began as a civil war but became a global conflict against the backdrop of the emerging Cold War era. Known as "the Forgotten War" in the U.S., this conflict resulted in 5 million deaths and left an indelible imprint on the world. Seven decades later the Korean peninsula remains divided, and the contentious international security mechanisms engendered by this conflict still shape East Asian relations and U.S. foreign policy. Through engagement with recent historical works, this seminar course will explore the origins and legacies of this conflict, security options and limitations, and conditions and visions of peace.

Islamic Civilization
DiPasquale, David M
Fall 2022
This course introduces the varieties of Islamic civilization from the seventh century to the modern world. It explores not only the tenets of faith and practice, and political, social, theological, and economic history, but also considers Muslim cultural and intellectual contributions, including by women, from Indonesia to Morocco and in the Western world. Students will read primary sources, listen to recordings, and view films. The course will emphasize the variety of experiences of Muslims and their contributions to the world.

Music and Culture in the Middle East  
Lucas, Ann E  
Fall 2022  
This course explores the relationship between different music traditions of the Middle East and their respective cultural contexts. It addresses issues of music’s structure and content vis-à-vis its role in social, political, and religious situations in the region; the ways that these forces influence musical aesthetics, while also addressing the role of music in the Middle East historically. The cultural areas covered in this class include the Arab World, Iran, Turkey, and Afghanistan.

Islam and Liberal Democracy  
DiPasquale, David M  
Fall 2022  
We will take advantage of current geopolitical controversies in order to unearth the theoretical core of the debate between Islam and the West. Materials related to the Islamic heritage will be placed next to arguments made on behalf of the West in relation to certain key issues, such as rights versus duties; religion and freedom; and democracy and progress. Modern, pre-modern, sacred, and secular texts will be studied. How can the secular world defend itself against a critique that begins from a position of faith and emphasizes virtue, God, and justice?

ICSP331001
Women and Gender in Islam
Delong-Bas, Natana J
Fall 2022
This course explores women and gender roles in Islamic history, civilization, and societies, beginning with the pre-Islamic period and continuing through the present. The goal is to present women and women's issues as central to the main narrative of Islamic history, rather than as a side story. This course explores questions related to both historical and contemporary religious interpretation and practice, Sunni, Shia and Sufi, as well as the impact of religion and gender constructs on women's access to the public sphere, positions of leadership, and legal status.

ICSP331501
Islam and Modernity: The Turkish Experience
Akyol, Mustafa
Spring 2023
Located on the Western edge of the Islamic civilization, the Ottoman empire and later Republican Turkey faced modernity early on. New ideas such as constitutionalism, equal citizenship for all (including women and non-Muslims), nationalism, secularism, and democracy had both deep impacts and complex reactions. This course will present an overview of this history beginning with the Tanzimat (Reform) era of the 19th century, to the secularist foundations of the Turkish Republic, to the post-secular New Turkey of today. Focus will be on Islamic ideas, which, throughout this turbulent history, took various forms: progressive or reactionary, moderate or militant, liberal or authoritarian.

Jesuit Studies Courses: Summer 2022

JESU715701

In the Footsteps of Leaders
Beaumier, Casey, SJ
Summer 2022
This course considers the historical, spiritual, and pedagogical foundations of Jesuit leadership by situating them in their historical and geographic context. The course begins with two weeks of online coursework, followed by twelve days of experiential learning in Spain and Rome where students immerse themselves in the key places that became the roots of the Society of Jesus using primary sources to critically examine the decisions and actions of the early Jesuits. Students will consider contemporary topics such as the challenges and opportunities experienced by administrators and teachers at secondary and higher education schools. Coursework features selected readings, workshops, presentations, and projects to be completed both individually and in small groups. Through this course, students will gain an understanding of the Jesuits’ early vision of apostolic effectiveness and of the ways that vision has remained constant while adapting to various circumstances along the way.

Jesuit Studies Courses: Fall 2022

JESU713101

Social Justice in Jesuit Contexts
Casalini, Cristiano
Fall 2022
This is a Graduate-level on-line course. The Social Apostolate of the Society of Jesus has developed in a variety of ways over the centuries according the diverse contexts where Jesuits have operated as agents of "social justice." This class offers students both a broad and deep understanding of: (1) How the Society of Jesus developed its mission in support of creating a "preferential option for the poor"; (2) How the Society understood its role to promote liberation from oppression in diverse social environments; (3) What kind of services have been activated by the Society of Jesus in order to fulfill its core values of "the service of faith and promotion of justice"; and (4) How social justice is pursued through pedagogy and practices by Jesuit and Ignatian schools today, given the significant involvement of the Jesuits with formal education on a global scale. The course is designed to foster deep and meaningful conversation among students. It will include individual and collective readings and video-conferences with leaders and teachers of Jesuit schools around the world, deepening students' knowledge of current practices and stimulating dialogue.

JESU715901
A History of The Jesuits
Meehan, Seth M
Fall 2022
This is a Graduate-level on-line course. For nearly five centuries, the Society of Jesus has been one of the most successful and, at times, most controversial religious orders in the Catholic Church. A History of the Jesuits offers an introductory survey to this rich and varied past with particular attention, following the Jesuits' suppression in 1773, to various enterprises and enterprisers in the Americas. The course seeks to answer these questions: What have been the characteristics of the Society of Jesus and its associated works? And how and why have those characteristics remained the same or changed? Complementing the other courses in the Certificate program, the course traces the development, expansion, suppression, restoration, and recent developments of the Society of Jesus by closely examining the historical contributions of significant Jesuits.

**Jesuit Studies Courses: Spring 2023**

**JESU713201**

*Discernment and Prayer in the Spiritual Exercises of St. Ignatius*

Geger, Barton T, SJ

**Spring 2023**

This is a Graduate level online course. A study of the spiritual doctrine of St. Ignatius Loyola as articulated in the text of the Spiritual Exercises, but with reference to other texts such as Ignatius' Testament, letters, and the Constitutions of the Society of Jesus. The focus is how Ignatius' treatment of prayer, discernment of spirits, and discernment of God's will, work together to form a "contemplative in action."

JESU715801
Jesuit Pedagogy
Casalini, Cristiano
Spring 2023
This is an online course.. This three-credit, graduate-level online course examines the distinctiveness of the Jesuits’ approaches to teaching and of their philosophy of education that have propelled their schools to unprecedented success over the centuries. One key to the unprecedented success of Jesuit education has been the tension between the recognizable mark of uniformity that long distinguished the methods, contents, and practices of Jesuit schools and their ability to adapt to different contexts and times. Both aspects—the uniformity and the adaptability—were explicitly supported by the "Ratio studiorum," the Jesuits’ foundational plan of studies issued in 1599, which, despite the schools’ many variations and complexities, has retained some influence over time. With the "Ratio" discarded, Jesuit schools had to clarify what made them distinctively Jesuit, reconciling their mission with the contemporary world. This three-credit, graduate-level class sketches the developments of Jesuit educational endeavors by focusing on both the permanent and changing traits of its distinctive pedagogy.

Journalism Courses: Summer 2022

JOUR218401
Sports, Media, Culture
Ellis, Matthew L
Summer 2022
This course may be used to satisfy the Communication major Critical Issues requirement or to satisfy one of three electives required for the Communication major. Sports have long played a vital yet complex role in culture and this course examines that intersection of sports, the mass media, and society. We will appraise and debate the ways in which sports are functional or problematic in their impact on and relationship to players, fans, journalists, co-cultural groups, and nations. Students will read both scholarly and journalistic reflections, view popular and documentary film, and analyze fan experiences, mediated presentations, and critical social issues. In short, we will go beyond the box score to understand the importance and deconstruct the hype that accompanies modern sports.

Journalism Courses: Fall 2022

JOUR200001
Introduction to Journalism
Marcus, Jon P
Fall 2022
Senior Journalism minors only - required Journalism course. To be taken in Freshman, Sophomore, or Junior year. Organized like a professional newsroom, this course will give students interested in journalism a taste of its various facets, including topic-generation, reporting, interviewing, and editing, for print, broadcast, and online media. It will cover basic newswriting, beat reporting, investigative journalism, feature writing, and writing for the web, and provide an introduction to media law and ethics and the business and history of journalism. Students will produce a feature-length final project and will also work in teams to formulate, report, and write investigative stories. Student should expect to meet deadlines and high standards of grammar, style, punctuation, and factual accuracy.

JOUR225501
Writing Narrative Journalism
O’Connor, John
Fall 2022
Note to Journalism minors only: this course satisfies the requirement for an elective with a "craft" orientation. "Artificial Paradises": In his 1860 book Les Paradis Artificiels (Artificial Paradises) Baudelaire's principal concern is the physical, moral, and psychological effects of hashish. But in a broader sense, the work is also an investigation into the connections between the needs of the body and the hungers of the soul. There can be good uses for vices, Baudelaire seems to be saying--to warm, to illuminate, to ease suffering--and they can reveal our deepest beliefs about who we are, or about the kind of person we imagine ourselves to be. In this class, "vice" can mean anything from the sins Thomas Aquinas enumerated in Summa Theologica--pride, envy, anger, lust, sloth, gluttony, avarice (plus despair)--to the over-application of Prudentius's seven virtues of kindness, patience, chastity, humility, temperance, diligence, and charity. And yes, it can also mean the kinds of things you might read about in Vice magazine. But this is emphatically not a class for you to write about your vision quest to Joshua Tree or a lost spring break in Cabo. Its aim instead is to show students effective ways to employ vice in journalistic work, to write intelligently about the many-sided imperatives of passion and pleasure, and to develop clear, informed opinions about the subject. Students will submit four original pieces of writing during the semester. Readings will include works by Hunter S. Thompson, Joan Didion, Machado de Assis, Chris Kraus, Chester Himes, Pauline Reage, and others.

**Truth: A Short History**  
Sennott, Charles  
Fall 2022
Note to Journalism minors: this course satisfies the requirement for an elective with a "critical" orientation. A term borrowed from digital mapping, ground truth argues that reporting from the ground up is a journalists highest calling. This course first explores the idea of truth, from ancient Greece and great theologians to contemporary writers. We will then examine the rise of nationalist leaders around the world weaponizing doubt; how discernible facts and the truth itself have come under attack and; and how news organizations can best live up to Edward R Murrow's admonishment to serve without fear or favor. The course will introduce students to an international survey of ground-level reporting that focuses on the role of the journalist as a witness who speaks truth to power.

JOUR403601
Seminar: Black Memoir Matters
Ards, Angela
Fall 2022
This course explores what an engagement with life writing by black Americans teaches us about the United States and its quest for democracy. We will situate contemporary writers within a larger literary tradition, beginning with James Baldwin's The Fire Next Time, a quintessential civil rights movement text, followed by Between the World & Me by Ta-Nehisi Coates, whom Nobel laureate Toni Morrison called the Baldwin of the Black Lives Matter era. We will also consider how various forms of memoir--as open letter (Imani Perry's Breathe and Kiese Laymon's Heavy), as interconnected essays (Emily Bernard's Black Is the Body), as literary criticism (Farah Jasmine Griffin's Read Until You Understand) meditate upon fundamental questions of citizenship, truth-telling, and fullest human blossoming.

**JOUR220001**  
**The Underground Press**  
**Ards, Angela**  
**Spring 2023**
Note to Journalism minors: this course satisfies the requirement for an elective with a "critical" orientation.

Note to all students: This course is included in CORE - Engaging Differences and Justice.

The underground press was a vast network of loosely affiliated newspapers that emerged in the 1950s and 60s when young people asked very hard questions about the meaning of power and the role of the press. The outsider outlets spread through hundreds of communities throughout the nation, ranging from big city weeklies like "The Village Voice" and the Berkeley "Barb" to specialized periodicals representing the Black press, as well as other ethnic newspapers, progressive weeklies, and various conservative perspectives. This course examines the factors that helped pave the way for this journalism of dissent and how this history affects alternative media today.

Introduction to Magazine Writing
Nanos, Janelle M
Spring 2023
Note to Journalism minors: this course satisfies the requirement for an elective with a craft"orientation.". What does it take to make a magazine? This course will introduce students to the creative process of magazine publishing. Students will learn what distinguishes lifestyle magazines from news, and how to pitch a story. They'll write and edit short front-of-book features, develop elements in themed issue packages, and work on story development for features, profiles, and food and culture reviews. The class will provide instruction on blogging, and the rigors of research and fact-checking. Upon conclusion, students will be well prepared for an internship or entry-level position at a magazine.

JOUR223801  
**Food Writing**  
**O'Connor, John**  
**Spring 2023**  
Note to Journalism minors: this course satisfies the requirement for an elective with a craft orientation. This class takes a close look at the practice and tradition of food journalism, introducing students to narrative techniques, elements of reporting, and works that have shaped the genre. Students will learn how to avoid the clichés and traps of food writing and to develop original, persuasive, surprising ideas about food and the culture of eating. Issues of voice, scene, social observation, and dramatic structure are addressed, with additional attention paid to crafting and pitching articles. Readings will include works from early practitioners like A. J. Liebling and M. F. K. Fisher and contemporary writings by Gabrielle Hamilton, Frank Bruni, David Foster Wallace, and others.

JOUR224601
Podcasting: The Art and Craft of Digital Storytelling
Berkshire, Jennifer C
Spring 2023

Note to Journalism minors: this course satisfies the requirement for an elective with a craft"orientation.". This course will introduce students to all aspects of the podcasting medium. What makes podcasting different from traditional journalism? What are the ingredients that make for great podcasts? We'll be listening, learning the art of interviewing, and doing plenty of storytelling in order to develop personal voice and style. Finally, we'll learn about the technical tools necessary in order to tell powerful stories in sound.

Note to Journalism minors only: this course satisfies the requirement for an elective with a "craft" orientation. "Artificial Paradises": In his 1860 book Les Paradis Artificiels (Artificial Paradises) Baudelaire's principal concern is the physical, moral, and psychological effects of hashish. But in a broader sense, the work is also an investigation into the connections between the needs of the body and the hungers of the soul. There can be good uses for vices, Baudelaire seems to be saying--to warm, to illuminate, to ease suffering--and they can reveal our deepest beliefs about who we are, or about the kind of person we imagine ourselves to be. In this class, "vice" can mean anything from the sins Thomas Aquinas enumerated in Summa Theologica--pride, envy, anger, lust, sloth, gluttony, avarice (plus despair)--to the over-application of Prudentius's seven virtues of kindness, patience, chastity, humility, temperance, diligence, and charity. And yes, it can also mean the kinds of things you might read about in Vice magazine. But this is emphatically not a class for you to write about your vision quest to Joshua Tree or a lost spring break in Cabo. Its aim instead is to show students effective ways to employ vice in journalistic work, to write intelligently about the many-sided imperatives of passion and pleasure, and to develop clear, informed opinions about the subject. Students will submit four original pieces of writing during the semester. Readings will include works by Hunter S. Thompson, Joan Didion, Machado de Assis, Chris Kraus, Chester Himes, Pauline Reage, and others.

JOUR225701  
Telling Difficult Stories  
Caswell McCarron, Christine  
Spring 2023
Note to Journalism minors only: This course satisfies the requirement for an elective with a "critical" orientation. The journalist is offered a unique and personal lens on events that most people can only experience as consumers of media. While many stories are exhilarating to cover, just as many are painful, horrifying, heartbreaking, and extremely difficult to tell. These include such high profile tragedies as the coronavirus pandemic, 9/11, and the Boston Marathon bombing—but also more personal tragedies involving people in our own communities. This course takes a critical look at covering and telling those difficult stories. We will hear from some of the journalists (including but not limited to the instructor) who will share their professional insight into covering the most traumatic stories of their careers, as well as from some of the families and/or victims of these difficult events. Additionally, we will examine the PTSD that often affects journalists and is not limited to first responders and victims. Students should be aware that this course will deal with difficult material including homicide, abduction, suicide, illness, and crime.

JOUR225901
Breaking The News
Sennott, Charles
Spring 2023
Note to Journalism minors: this course satisfies the requirement for an elective with a "critical" orientation. The course examines how the decline of local news has left a fractured landscape across the country, with few reporters left to watch the store and hold government accountable. We will first review newspapers in the 1970s and 80s, then study their rapid decline amid the advent of cable news and the internet, and finally assess what this shifting landscape means. As a case study, we will focus on Boston's media landscape: The Boston Globe, WGBH, The Baystate Banner, as well as new digital startups and narrative podcasts. The class will culminate in a trip to WGBH to meet media colleagues who will discuss their craft.

Senior Seminar
Marcus, Jon P
Spring 2023
Senior Journalism minors only; required Journalism capstone course. Limited to 15 students. Permission of the Journalism Department required. This required course for senior Journalism minors is a blend of seminar and workshop. In it, students work at the craft of journalism by covering stories and also step back to analyze the work of professional journalists. Over the semester, each student chooses a particular subject area on which to concentrate and assembles a body of work that could be submitted to a prospective employer or graduate school. This portfolio might include examples of his or her own journalism, as well as critical assessments of stories, publications, and the news industry. Admission by permission of program.

LING310101
General Linguistics
Owusu, Augustina
Fall 2022
An introduction to linguisticsthe scientific study of human languageand contemporary linguistic theory. Linguists use mathematical systems (often called formal systems) to develop precise theories that help us understand the rich cognitive processes that support our use of language to communicate, to conduct internal monologues, and much more. The course focuses on the major subfields within linguistics: phonetics, phonology, morphology, syntax, and semantics: how do linguists create and manipulate representations of language phenomena, and how do they analyze linguistic data? Our primary data will be from English, but we will also employ data from other languages. No previous exposure to the field is presupposed.

LING310401
Formalism and Functionalism in Linguistics
Thomas, Margaret
Fall 2022
Analysis of two competing orientations in linguistic theory since 1900: formalism (emphasizing systematicity, autonomy, abstraction: American structuralism, varieties of generativism); versus functionalism (prioritizing the role communication imposes on language: Prague School, cognitive linguistics). Extensions into applied linguistics. Readings, lectures, discussion.

LING434001
Pragmatics
Owusu, Augustina
Fall 2022
This course introduces students to pragmatics, a vital subfield of linguistics. In pragmatics, we investigate the relationship between the meaning of an utterance and the context in which it is produced. We will cover a wide range of topics in the discipline in this course, including presupposition, implicature, speech acts, deixis, and reference. Because pragmatics is also defined as "the relationship of signs to their users and interpreters" (Horn, 2010), we will look at how people bring their cultural experiences, worldview, and assumptions to conversations.

Linguistics Courses: Spring 2023

LING237701
Language and the Study of Africa
Owusu, Augustina
Spring 2023
The goal of this course is to introduce students to a vital part of culture, social structure, and education in Africa through the lens of language. We will look at central concepts as multilingualism, language policy/language of literacy, urban youth languages, and African languages in the diaspora. The course is designed for students with little or no background in linguistics. No previous knowledge of any African languages is required.

LING325301
Introduction to Comparative Slavic Linguistics
Woolhiser, Curt F
Spring 2023
An introduction to the history and linguistic typology of the Slavic languages. We will begin with a brief survey of the reconstructed Common Slavic proto-language and its relationship to the other branches of the Indo-European language family. We will examine the disintegration of Late Common Slavic into three main subgroups: East, South, and West Slavic. Our survey of the modern Slavic languages will focus on the most important similarities and differences with regard to their writing, sound, nominal and verbal systems. Using a variety of modern Slavic languages as examples, we will also address topics of current interest to linguists worldwide: language, ethnic identity, and political borders; language ideology and standardization; the role of language contact in linguistic evolution, and language endangerment and language revitalization.

LING338001
Topics in Syntax
Owusu, Augustina
Spring 2023
This course investigates how different languages encode the concepts of definiteness and indefiniteness in noun phrases. Students learn about primary syntactic and semantic literature on these topics, as well as a theory of cross-linguistic variation. This is supplemented by concrete diagnostics that can be used in a fieldwork situation to identify various aspects of noun phrase interpretation. This course has two related goals: the first is to provide a solid foundation in the theoretical issues surrounding in)definiteness and the relationship between morphosyntax and semantics, and the second is to serve as a guide for investigating new languages.

Mathematics Courses: Fall 2022

MATH100201
Functions and Differential Calculus
Goldstein, Ellen J
Fall 2022
This course is intended for students who are required to take Calculus I (either MATH1100 or MATH1102) but whose backgrounds necessitate additional preparation. Topics include the real line and coordinate plane; linear and quadratic functions; higher degree polynomials and rational functions; trigonometry, emphasizing the trigonometric functions; and exponential and logarithmic functions. Note: This course does not satisfy the University Core Requirement in Mathematics. Department permission is required: see the Assistant Chair for Undergraduates.

Credits: 3
Room and Schedule: Stokes Hall 111S MWF 11:00AM-11:50AM
Satisfies Core Requirement: None
MATH100202
Functions and Differential Calculus
Goldstein, Ellen J
Fall 2022
This course is intended for students who are required to take Calculus I (either MATH1100 or MATH1102) but whose backgrounds necessitate additional preparation. Topics include the real line and coordinate plane; linear and quadratic functions; higher degree polynomials and rational functions; trigonometry, emphasizing the trigonometric functions; and exponential and logarithmic functions. Note: This course does not satisfy the University Core Requirement in Mathematics. Department permission is required: see the Assistant Chair for Undergraduates.

MATH100401
Finite Probability and Applications
Fung, Tsz Hin
Fall 2022
Not open to students who have completed their Mathematics Core Curriculum Requirement without permission of the Department Chairperson (except for Psychology majors completing their second mathematics corequisite).. This course, for students in the humanities, the social sciences, School of Education, and School of Nursing, is an introduction to finite combinatorics and probability, emphasizing applications. Topics include finite sets and partitions, enumeration, probability, expectation, and random variables.

Credits: 3
Room and Schedule: Gasson Hall 205 MWF 09:00AM-09:50AM
Satisfies Core Requirement: Mathematics
Prerequisites: Permission of Department
Corequisites: None
Cross-listed with: None
Frequency: Every Fall, Every Spring
Student Level: Undergraduate
Comments: None
Status: Offered

MATH100402
Finite Probability and Applications
Zachos, Ioannis
Fall 2022
Not open to students who have completed their Mathematics Core Curriculum Requirement without permission of the Department Chairperson (except for Psychology majors completing their second mathematics corequisite).. This course, for students in the humanities, the social sciences, School of Education, and School of Nursing, is an introduction to finite combinatorics and probability, emphasizing applications. Topics include finite sets and partitions, enumeration, probability, expectation, and random variables.

Credits: 3
Room and Schedule: Gasson Hall 205 MWF 10:00AM-10:50AM
Satisfies Core Requirement: Mathematics
Prerequisites: Permission of Department
Corequisites: None
Cross-listed with: None
Frequency: Every Fall, Every Spring
Student Level: Undergraduate
MATH100403
Finite Probability and Applications
Ward, Erika
Fall 2022
Not open to students who have completed their Mathematics Core Curriculum Requirement without permission of the Department Chairperson (except for Psychology majors completing their second mathematics corequisite). This course, for students in the humanities, the social sciences, School of Education, and School of Nursing, is an introduction to finite combinatorics and probability, emphasizing applications. Topics include finite sets and partitions, enumeration, probability, expectation, and random variables.

Credits: 3
Room and Schedule: Gasson Hall 205 MWF 12:00 Noon-12:50PM
Satisfies Core Requirement: Mathematics

MATH100701
Ideas in Mathematics
Brooks, Robyn K
Fall 2022
Not open to students who have completed their Mathematics Core Curriculum Requirement without permission of the Department Chairperson (except for Psychology majors completing their second mathematics corequisite). This course is designed to introduce the student to the spirit, beauty, and vitality of mathematics. The emphasis is on development of ideas rather than problem solving skills. Topics vary, but are typically chosen from diverse areas such as geometry, number theory, computation, and graph theory.

Credits: 3
Room and Schedule: Gasson Hall 309 MWF 11:00AM-11:50AM

**MATH110001**

**Calculus I**

**Belding, Juliana V**

**Fall 2022**

MATH1100 is not open to students who have completed a calculus course at the college level. Students contemplating majors in Chemistry, Computer Science/B.S., Environmental Geosciences, Geological Sciences, Mathematics, or Physics should enroll in MATH1102. For further information about selecting your Math courses given your background, please see this link to the BC Math Department. MATH1100 is a first course in the calculus of one variable intended for biology, computer science, economics, management, and premedical students. It is open to others who are qualified and desire a more rigorous mathematics course at the core level. Topics include a brief review of polynomials and trigonometric, exponential, and logarithmic functions, followed by discussion of limits, derivatives, and applications of differential calculus to real-world problem areas. The course concludes with an introduction to integration.

**Credits:** 4

**Room and Schedule:** Fulton Hall 230 MWF 10:00AM-10:50AM; M 06:00PM-07:30PM

MATH1100 is a first course in the calculus of one variable intended for biology, computer science, economics, management, and premedical students. It is open to others who are qualified and desire a more rigorous mathematics course at the core level. Topics include a brief review of polynomials and trigonometric, exponential, and logarithmic functions, followed by discussion of limits, derivatives, and applications of differential calculus to real-world problem areas. The course concludes with an introduction to integration.

MATH1101 is a second course in the calculus of one variable intended for biology, computer science, economics, management, and premedical students. It is open to others who are qualified and desire a more rigorous mathematics course at the core level. Topics include an overview of integration, basic techniques for integration, a variety of applications of integration, and an introduction to (systems of) differential equations.

**Credits:** 4  
**Room and Schedule:** Gasson Hall 306 MWF 02:00PM-02:50PM  
**Satisfies Core Requirement:** Mathematics  
**Prerequisites:** None  
**Corequisites:** None  
**Cross-listed with:** None  
**Frequency:** Every Fall, Every Spring  
**Student Level:** Undergraduate  
**Comments:** None  
**Status:** Offered
MATH1101 is not open to students who have completed MATH1103 or MATH1105. Students contemplating majors in Chemistry, Computer Science/B.S., Environmental Geosciences, Geological Sciences, Mathematics or Physics should enroll in either MATH1103 (Spring) or MATH1105 (Fall). For further information about selecting your Math courses given your background, please see this link to the BC Math Department. MATH119001
Fundamentals of Mathematics I
Zhang, Liyang
Fall 2022
Restricted to Lynch School of Education students. MATH1190-1191 is a course sequence designed for those who plan to teach mathematics in grades K-8. The emphasis is on building conceptual understanding of the mathematics present in the emerging K-8 curriculum and on deepening content knowledge. Number and number systems through the real number system will be studied; functions and the structure of algebra will be developed. Problem solving and reasoning, applications and making connections will be featured.

Linear Algebra  
Grigsby, Julia E, PHD  
Fall 2022  
This course is an introduction to the techniques of linear algebra in Euclidean space. Topics covered include matrices, determinants, systems of linear equations, vectors in n-dimensional space, complex numbers, and eigenvalues. The course is required of mathematics majors and is also suitable for students in the social sciences, natural sciences, and management. 

Credits: 3  
Room and Schedule: 245 Beacon Street Room 214 MWF 12:00 Noon-12:50PM  
Satisfies Core Requirement: None  
Prerequisites: None  
Corequisites: None

MATH221601
Introduction to Abstract Mathematics
Gross, Robert
Fall 2022
This course is designed to develop the student's ability to do abstract mathematics through the presentation and development of the basic notions of logic and proof. Topics include elementary set theory, mappings, integers, rings, complex numbers, and polynomials.

Credits: 3
Room and Schedule: Gasson Hall 205 MWF 01:00PM-01:50PM
Satisfies Core Requirement: None
Prerequisites: None
Corequisites: None
Cross-listed with: None
MATH221602
Introduction to Abstract Mathematics
Leslie, Winston S
Fall 2022
This course is designed to develop the student's ability to do abstract mathematics through the presentation and development of the basic notions of logic and proof. Topics include elementary set theory, mappings, integers, rings, complex numbers, and polynomials.

Credits: 3
Room and Schedule: Gasson Hall 201 MWF 10:00AM-10:50AM
Satisfies Core Requirement: None
Prerequisites: None
Corequisites: None
Cross-listed with: None
Frequency: Every Fall, Every Spring
Student Level: Undergraduate
Comments: None
Status: Offered

MATH221603
Introduction to Abstract Mathematics
Meyerhoff, G R
Fall 2022
This course is designed to develop the student's ability to do abstract mathematics through the presentation and development of the basic notions of logic and proof. Topics include elementary set theory, mappings, integers, rings, complex numbers, and polynomials.

Credits: 3
Room and Schedule: Gasson Hall 202 MWF 09:00AM-09:50AM
Satisfies Core Requirement: None
Prerequisites: None
Corequisites: None
MATH331001
Introduction to Abstract Algebra
Kelmer, Dubi
Fall 2022
Students may not take both MATH3310 and MATH3311.. This course studies four fundamental algebraic structures: groups, including subgroups, cyclic groups, permutation groups, symmetry groups, and Lagrange's Theorem; rings, including sub-rings, integral domains, and unique factorization domains; polynomials, including a discussion of unique factorization and methods for finding roots; and fields, introducing the basic ideas of field extensions and ruler and compass constructions.

Credits: 3
Room and Schedule: Gasson Hall 209 MWF 12:00 Noon-12:50PM
Satisfies Core Requirement: None
Prerequisites: MATH2216 and MATH2210/ADMT2210 or Permission of Department
Corequisites: None
Cross-listed with: None
Frequency: Every Fall,Every Spring
Student Level: Undergraduate
Comments: None
Status: Offered

MATH331101
Algebra I
Jin, Xin
Fall 2022
Students may not take both MATH3310 and MATH3311. This course, with MATH3312, studies the basic structures of abstract algebra. Topics include groups, subgroups, factor groups, Lagrange's Theorem, the Sylow Theorems, rings, ideal theory, integral domains, field extensions, and Galois theory.

**Credits:** 3  
**Room and Schedule:** Gasson Hall 205 MWF 11:00AM-11:50AM  
**Satisfies Core Requirement:** None  
**Prerequisites:** MATH2216 and MATH2210/ADMT2210 or Permission of Department  
**Corequisites:** None  
**Cross-listed with:** None  
**Frequency:** Every Fall  
**Student Level:** Undergraduate  
**Comments:** None  
**Status:** Offered

**MATH332001**  
**Introduction to Analysis**  
**Cheung, Chi-Keung**  
**Fall 2022**  
Students may not take both MATH3320 and MATH3321. This course gives students the theoretical foundations for the topics taught in Calculus. It covers algebraic and order properties of the real numbers, the least upper bound axiom, limits, continuity, differentiation, the Riemann integral, sequences, and series. Definitions and proofs will be stressed throughout the course.

**Credits:** 3  
**Room and Schedule:** Gasson Hall 210 MWF 12:00 Noon-12:50PM  
**Satisfies Core Requirement:** None  
**Prerequisites:** MATH2216 and MATH2202 or Permission of Department  
**Corequisites:** None  
**Cross-listed with:** None  
**Frequency:** Every Fall, Every Spring  
**Student Level:** Undergraduate  
**Comments:** None  
**Status:** Offered
MATH332101
Analysis I
Lehmann, Brian T
Fall 2022
Students may not take both MATH3320 and MATH3321. This course, with MATH3322, studies the basic structure of the real numbers. Topics include the least upper bound principle, compactness of closed intervals (the Heine-Borel theorem), sequences, convergence, the Bolzano-Weierstrass theorem, continuous functions, boundedness and intermediate value theorems, uniform continuity, differentiable functions, the mean value theorem, construction of the Riemann integral, the fundamental theorem of calculus, sequences and series of functions, uniform convergence, the Weierstrass approximation theorem, special functions (exponential and trig), and Fourier series.

Credits: 3
Room and Schedule: Stokes Hall 195S MWF 12:00 Noon-12:50PM
Satisfies Core Requirement: None
Prerequisites: MATH2216 and MATH2202 or Permission of Department
Corequisites: None
Cross-listed with: None

MATH441001
Differential Equations
Chen, Dawei
Fall 2022
This course is a junior-senior elective intended primarily for students interested in applications of mathematics. Topics include first order linear equations, higher order linear equations with constant coefficients, linear systems, qualitative analysis of non-linear systems, and an introduction to stability and bifurcations.

Credits: 3
Room and Schedule: Gasson Hall 202 MWF 10:00AM-10:50AM
Satisfies Core Requirement: None
Prerequisites: MATH2210/ADMT2210 and MATH2202
Corequisites: None
MATH441002
Differential Equations
Chen, Dawei
Fall 2022
This course is a junior-senior elective intended primarily for students interested in applications of mathematics. Topics include first order linear equations, higher order linear equations with constant coefficients, linear systems, qualitative analysis of non-linear systems, and an introduction to stability and bifurcations.

Credits: 3
Room and Schedule: Gasson Hall 202 MWF 11:00AM-11:50AM

MATH442601
Probability
Wolf, Jamison B
Fall 2022
This course provides a general introduction to modern probability theory. Topics include probability spaces, discrete and continuous random variables, joint and conditional distributions, mathematical expectation, the central limit theorem, and the weak law of large numbers. Applications to real data will be stressed, and we will use the computer to explore many concepts.

**Credits:** 3  
**Room and Schedule:** Campion Hall 300 MWF 09:00AM-09:50AM  
**Satisfies Core Requirement:** None  
**Prerequisites:** MATH2202  
**Corequisites:** None  
**Cross-listed with:** None

MATH442701
Mathematical Statistics
Cheung, Chi-Keung
Fall 2022
Topics studied include the following: sampling distributions, parametric point and interval estimation, hypothesis testing, goodness-of-fit, and parametric and nonparametric two-sample analysis. Applications to real data will be stressed, and the computer will be used to explore concepts and analyze data.

Credits: 3

MATH445101
Euclidean and Non-Euclidean Geometry
Biringer, Ian P
Fall 2022
This course surveys the history and foundations of geometry from ancient to modern times. Topics will be selected from Mesopotamian and Egyptian mathematics, Greek geometry, the axiomatic method, history of the parallel postulate, the Lobachevskian plane, Hilbert's axioms for Euclidean geometry, elliptic and projective geometry, the trigonometric formulas, models, and geometry and the study of physical space.

Credits: 3
Room and Schedule: Stokes Hall 115S MWF 10:00AM-10:50AM
Satisfies Core Requirement: None

MATH445301
Euclid's *Elements*
Moss, Eric; Prado Godoy, Miguel A
Fall 2022
This course is a close reading of Euclid's *Elements* in seminar style, with careful attention to axiomatic reasoning and mathematical constructions that build on one another in a sequence of logical arguments. We will also emphasize clear and creative communication on mathematical ideas, with some attention to the cultural background of the *Elements* and its place in a modern education.

**Credits:** 3
**Room and Schedule:** Gasson Hall 301 MW 03:00PM-04:15PM
**Satisfies Core Requirement:** None

MATH446001
Complex Variables
Madapusi Pera, Keerthi S
Fall 2022
This course gives an introduction to the theory of functions of a complex variable, a fundamental and central area of mathematics. It is intended for mathematics majors and well-prepared science majors. Topics covered include complex numbers and their properties, analytic functions and the Cauchy-Riemann equations, the logarithm and other elementary functions of a complex variable, integration of complex functions, the Cauchy integral theorem and its consequences, power series representation of analytic functions, and the residue theorem and applications to definite integrals.

Credits: 3
Room and Schedule: Gasson Hall 304 MW 04:30PM-05:45PM
Satisfies Core Requirement: None
Prerequisites: MATH2202 and MATH2210/ADMT2210

MATH446101
Stochastic Processes
Wolf, Jamison B
Fall 2022
A stochastic process describes the evolution of a system that changes over time in a random manner. This course introduces and studies various properties of some fundamental stochastic processes, including Markov chains in discrete and continuous time, renewal processes, and Brownian motion.

Credits: 3
Room and Schedule: Gasson Hall 203 MWF 12:00 Noon-12:50PM
Satisfies Core Requirement: None

MATH447001
Mathematical Modeling
Gross, Robert
Fall 2022
This course introduces students to methods of mathematical modeling. The emphasis is on ways to analytically represent and study today's complex modeling problems, with cases from the natural and social sciences. Topics include the model building process, mathematical models of systems, and modeling data to discover properties and hidden characteristics. The calculus of finite differences and solutions to classes of difference equations will serve as the core mathematical theory taught in this course. The dynamics of certain linear and nonlinear models will be explored from various domains (e.g., population models, economic models, Markov models). The course will conclude with an introduction to mathematical graph theory and its application to modeling interacting and interdependent systems and networks.

MATH880601  
Algebra I  
Madapusi Pera, Keerthi S  
Fall 2022  
This course, with MATH8807, will cover the following topics: group theory (group actions, Sylow, nilpotent/solvable, simple groups, Jordan-Holder series, presentations); commutative algebra (uniqueness of factorization, Jordan decomposition, Dedekind rings, class groups, local rings, Spec); finite fields; algebraic numbers; Galois theory; homological algebra; semisimple algebra.  
Credits: 3  
Room and Schedule: Maloney Hall 560 MWF 10:00AM-10:50AM  
Satisfies Core Requirement: None  
Prerequisites: None

MATH880801  
Geometry/Topology I  
Baldwin, John A  
Fall 2022  
This course, with MATH8809, will cover the following topics: point-set topology, fundamental group and covering spaces, smooth manifolds, smooth maps, partitions of unity, tangent and general vector bundles, (co)homology, tensors, differential forms, integration and Stokes' theorem, and de Rham cohomology.  
Credits: 3  
Room and Schedule: Stokes Hall 361S MWF 12:00 Noon-12:50PM  
Satisfies Core Requirement: None
MATH881001
Real Analysis
Lindsey, Kathryn A
Fall 2022
Measure theory, Hilbert space, and Fourier theory. Possible topics from Lebesgue measure starting on $\mathbb{R}$, convergence and Fubini theorems, and generalizations to locally compact spaces and groups.

Credits: 3
Room and Schedule: Maloney Hall 560 MW 02:00PM-03:15PM
Satisfies Core Requirement: None
Prerequisites: None

MATH882001
Introduction to Representation Theory
Jin, Xin
Fall 2022
Introduction of a broad range of representation theory, including representations of finite and compact Lie groups, and finite dimensional representations of complex semisimple Lie groups and Lie algebras, and quantum groups.

Credits: 3
Room and Schedule: O'Neill Library 248 MWF 02:00PM-02:50PM
MATH882101
Number Theory I
Treumann, David L
Fall 2022
Along with MATH8822, possible topics include factorization of ideals, local fields, local versus global Galois theory, Brauer group, adèles and idèles, class field theory, Dirichlet L-functions, Chebotarev density theorem, class number formula, and Tate's thesis.

Credits: 3

**MATH991103**
**Doctoral Continuation**
**Lindsey, Kathryn A**
**Fall 2022**
All students who have been admitted to candidacy for the Ph.D. degree are required to register and pay the fee (tuition credits can be used for this) for doctoral continuation during each semester of their candidacy when they are taking no other courses. Doctoral Continuation requires a commitment of at least 20 hours per week working on the dissertation

MATH100401
Finite Probability and Applications
Zevenbergen, Matthew
Spring 2023
Not open to students who have completed their Mathematics Core Curriculum Requirement without permission of the Department Chairperson (except for Psychology majors completing their second mathematics corequisite). This course, for students in the humanities, the social sciences, School of Education, and School of Nursing, is an introduction to finite combinatorics and probability, emphasizing applications. Topics include finite sets and partitions, enumeration, probability, expectation, and random variables.

Credits: 3
Room and Schedule: Stokes Hall 217N MWF 10:00AM-10:50AM
Satisfies Core Requirement: Mathematics
Prerequisites: Permission of Department
Corequisites: None
Cross-listed with: None
Frequency: Every Fall, Every Spring
Student Level: Undergraduate
Comments: None
Status: Offered
MATH100402
Finite Probability and Applications
Ward, Erika
Spring 2023
Not open to students who have completed their Mathematics Core Curriculum Requirement without permission of the Department Chairperson (except for Psychology majors completing their second mathematics corequisite). This course, for students in the humanities, the social sciences, School of Education, and School of Nursing, is an introduction to finite combinatorics and probability, emphasizing applications. Topics include finite sets and partitions, enumeration, probability, expectation, and random variables.

MATH100403
Finite Probability and Applications
Brooks, Robyn K
Spring 2023
Not open to students who have completed their Mathematics Core Curriculum Requirement without permission of the Department Chairperson (except for Psychology majors completing their second mathematics corequisite). This course, for students in the humanities, the social sciences, School of Education, and School of Nursing, is an introduction to finite combinatorics and probability, emphasizing applications. Topics include finite sets and partitions, enumeration, probability, expectation, and random variables.

Credits: 3
Room and Schedule: Gasson Hall 210 MWF 09:00AM-09:50AM
Satisfies Core Requirement: Mathematics
Prerequisites: Permission of Department
Corequisites: None
MATH100404
Finite Probability and Applications
Seaberg, Laura
Spring 2023
Not open to students who have completed their Mathematics Core Curriculum Requirement without permission of the Department Chairperson (except for Psychology majors completing their second mathematics corequisite). This course, for students in the humanities, the social sciences, School of Education, and School of Nursing, is an introduction to finite combinatorics and probability, emphasizing applications. Topics include finite sets and partitions, enumeration, probability, expectation, and random variables.

Credits: 3
Room and Schedule: Stokes Hall 105S MWF 11:00AM-11:50AM
Satisfies Core Requirement: Mathematics
Prerequisites: Permission of Department
Corequisites: None
Cross-listed with: None
Frequency: Every Fall, Every Spring
Student Level: Undergraduate

MATH100406

Finite Probability and Applications

Zachos, Ioannis

Spring 2023

Not open to students who have completed their Mathematics Core Curriculum Requirement without permission of the Department Chairperson (except for Psychology majors completing their second mathematics corequisite). This course, for students in the humanities, the social sciences, School of Education, and School of Nursing, is an introduction to finite combinatorics and probability, emphasizing applications. Topics include finite sets and partitions, enumeration, probability, expectation, and random variables.

Credits: 3

Room and Schedule: 245 Beacon Street Room 125A MWF 12:00 Noon-12:50PM

Satisfies Core Requirement: Mathematics

Prerequisites: Permission of Department

Corequisites: None

Cross-listed with: None

Frequency: Every Fall, Every Spring

Student Level: Undergraduate
MATH100407
Finite Probability and Applications
Prado Godoy, Miguel A
Spring 2023
Not open to students who have completed their Mathematics Core Curriculum Requirement without permission of the Department Chairperson (except for Psychology majors completing their second mathematics corequisite). This course, for students in the humanities, the social sciences, School of Education, and School of Nursing, is an introduction to finite combinatorics and probability, emphasizing applications. Topics include finite sets and partitions, enumeration, probability, expectation, and random variables.

Credits: 3
Room and Schedule: Fulton Hall 210 MWF 02:00PM-02:50PM
Satisfies Core Requirement: Mathematics
Prerequisites: Permission of Department

MATH100701
Ideas in Mathematics
Ash, Avner D
Spring 2023
Not open to students who have completed their Mathematics Core Curriculum Requirement without permission of the Department Chairperson (except for Psychology majors completing their second mathematics corequisite). This course is designed to introduce the student to the spirit, beauty, and vitality of mathematics. The emphasis is on development of ideas rather than problem solving skills. Topics vary, but are typically chosen from diverse areas such as geometry, number theory, computation, and graph theory.

Credits: 3
Room and Schedule: Campion Hall 302 MW 03:00PM-04:15PM
Satisfies Core Requirement: Mathematics
Prerequisites: Permission of Department
Corequisites: None
Cross-listed with: None
Frequency: Every Fall, Every Spring
Student Level: Undergraduate

MATH100702
Ideas in Mathematics
Ionov, Andrei
Spring 2023
Not open to students who have completed their Mathematics Core Curriculum Requirement without permission of the Department Chairperson (except for Psychology majors completing their second mathematics corequisite). This course is designed to introduce the student to the spirit, beauty, and vitality of mathematics. The emphasis is on development of ideas rather than problem solving skills. Topics vary, but are typically chosen from diverse areas such as geometry, number theory, computation, and graph theory.

Credits: 3
Room and Schedule: Mcguinn Hall 121 MWF 12:00 Noon-12:50PM
Satisfies Core Requirement: Mathematics
Prerequisites: Permission of Department
Corequisites: None
Cross-listed with: None
Frequency: Every Fall, Every Spring
Student Level: Undergraduate
MATH110001
Calculus I
Krumpak, McKee
Spring 2023
MATH1100 is not open to students who have completed a calculus course at the college level. Students contemplating majors in Chemistry, Computer Science/B.S., Environmental Geosciences, Geological Sciences, Mathematics, or Physics should enroll in MATH1102. For further information about selecting your Math courses given your background, please see this link to the BC Math Department. MATH1100 is a first course in the calculus of one variable intended for biology, computer science, economics, management, and premedical students. It is open to others who are qualified and desire a more rigorous mathematics course at the core level. Topics include a brief review of polynomials and trigonometric, exponential, and logarithmic functions, followed by discussion of limits, derivatives, and applications of differential calculus to real-world problem areas. The course concludes with an introduction to integration.

Credits: 4
Room and Schedule: Fulton Hall 230 MWF 01:00PM-01:50PM
Satisfies Core Requirement: Mathematics
Prerequisites: None
Corequisites: None
Cross-listed with: None

MATH110113
Calculus II
Mahendraker, Siddharth
Spring 2023
MATH1101 is not open to students who have completed MATH1103 or MATH1105. Students contemplating majors in Chemistry, Computer Science/B.S., Environmental Geosciences, Geological Sciences, Mathematics or Physics should enroll in either MATH1103 (Spring) or MATH1105 (Fall). For further information about selecting your Math courses given your background, please see this link to the BC Math Department. MATH1101 is a second course in the calculus of one variable intended for biology, computer science, economics, management, and premedical students. It is open to others who are qualified and desire a more rigorous mathematics course at the core level. Topics include an overview of integration, basic techniques for integration, a variety of applications of integration, and an introduction to (systems of) differential equations.

Credits: 4
Room and Schedule: M 07:15PM-08:15PM; Stokes Hall 201N MWF 12:00 Noon-12:50PM
Satisfies Core Requirement: Mathematics
Prerequisites: None

MATH118001
Principles of Statistics for the Health Sciences
Zhang, Liyang
Spring 2023
This course introduces statistics as a liberal arts discipline and applies the principles of statistics to problems of interest for health sciences professionals. Students will gain an understanding of statistical ideas and methods, acquire the ability to deal critically with numerical arguments and gain an understanding of the impact of statistical ideas on the health sciences, public policy, and other areas of application.

**Credits:** 3

**Room and Schedule:** Campion Hall 303 MWF 11:00AM-11:50AM

**Satisfies Core Requirement:** Mathematics

**Prerequisites:** Open to Connell School of Nursing students only.

**Corequisites:** None

**Cross-listed with:** None

MATH221001
Linear Algebra
Ashley, Caleb J
Spring 2023
This course is an introduction to the techniques of linear algebra in Euclidean space. Topics covered include matrices, determinants, systems of linear equations, vectors in n-dimensional space, complex numbers, and eigenvalues. The course is required of mathematics majors and is also suitable for students in the social sciences, natural sciences, and management.

MATH221101
Linear Algebra (Honors)
Reeder, Mark
Spring 2023
This honors course in Linear Algebra is intended for students with strong preparation and high motivation. Topics covered include matrices, linear equations, determinants, eigenvectors and eigenvalues, vector spaces and linear transformations, inner products, and canonical forms. The course will include significant work with proofs.

Credits: 3
Room and Schedule: Gasson Hall 203 MWF 10:00AM-10:50AM
Satisfies Core Requirement: None
Prerequisites: MATH2203
Corequisites: None
MATH221601
Introduction to Abstract Mathematics
Baldwin, John A
Spring 2023
This course is designed to develop the student's ability to do abstract mathematics through the presentation and development of the basic notions of logic and proof. Topics include elementary set theory, mappings, integers, rings, complex numbers, and polynomials.

Credits: 3
Room and Schedule: Stokes Hall 215N MWF 12:00 Noon-12:50PM

MATH221604
Introduction to Abstract Mathematics
Reeder, Mark
Spring 2023
This course is designed to develop the student's ability to do abstract mathematics through the presentation and development of the basic notions of logic and proof. Topics include elementary set theory, mappings, integers, rings, complex numbers, and polynomials.

Credits: 3
Room and Schedule: Gasson Hall 203 MWF 09:00AM-09:50AM
Satisfies Core Requirement: None
MATH229101
Geometry for Teachers
Goldstein, Ellen J
Spring 2023
This course is intended for teachers of grades K-9. Geometry now occupies a significant role in the elementary mathematics curriculum. The course will develop ideas for presenting geometry as an activity-based program. Topics include the geoboard and other key manipulatives, elements of motion and Euclidean geometry and suggestions for using Logo as a tool to enhance teaching geometry.

Credits: 3
Room and Schedule: Gasson Hall 204 MWF 02:00PM-02:50PM
Satisfies Core Requirement: Mathematics
Prerequisites: MATH1191 and MATH1190
Corequisites: None
Cross-listed with: None
Frequency: Biannually in the Spring

MATH331001
Introduction to Abstract Algebra
Kelmer, Dubi
Spring 2023
This course studies four fundamental algebraic structures: groups, including subgroups, cyclic groups, permutation groups, symmetry groups, and Lagrange's Theorem; rings, including sub-rings, integral domains, and unique factorization domains; polynomials, including a discussion of unique factorization and methods for finding roots; and fields, introducing the basic ideas of field extensions and ruler and compass constructions.

**Credits:** 3

**Room and Schedule:** Campion Hall 231 MWF 01:00PM-01:50PM

**Satisfies Core Requirement:** None

**Prerequisites:** MATH2216 and MATH2210/ADMT2210 or Permission of Department

**Corequisites:** None

**Cross-listed with:** None

**Frequency:** Every Fall, Every Spring

**Student Level:** Undergraduate

**Comments:** None

**Status:** Offered

---

MATH331201

**Algebra II**

**Jin, Xin**

**Spring 2023**

This course, with MATH3311, studies the basic structures of abstract algebra. Topics include groups, subgroups, factor groups, Lagrange's Theorem, the Sylow Theorems, rings, ideal theory, integral domains, field extensions, and Galois theory.

**Credits:** 3

**Room and Schedule:** Stokes Hall 295S MWF 12:00 Noon-12:50PM

**Satisfies Core Requirement:** None

**Prerequisites:** MATH3311. With the permission of the Assistant Chair for Undergraduates, students who have taken MATH3310 may be allowed to take MATH3312. However, they may need to do additional work on their own in order to make that transition.

**Corequisites:** None

**Cross-listed with:** None

**Frequency:** Every Spring

**Student Level:** Undergraduate

**Comments:** None

**Status:** Offered
MATH332001
Introduction to Analysis
Petit, Nicolas
Spring 2023
Students may not take both MATH3320 and MATH3321. This course gives students the theoretical foundations for the topics taught in Calculus. It covers algebraic and order properties of the real numbers, the least upper bound axiom, limits, continuity, differentiation, the Riemann integral, sequences, and series. Definitions and proofs will be stressed throughout the course.

Credits: 3
Room and Schedule: Campion Hall 303 MWF 09:00AM-09:50AM
Satisfies Core Requirement: None
Prerequisites: MATH2216 and MATH2202 or Permission of Department
Corequisites: None
Cross-listed with: None
Frequency: Every Fall, Every Spring
Student Level: Undergraduate

MATH332201
Analysis II
Lehmann, Brian T
Spring 2023
This course, with MATH3321, studies the basic structure of the real numbers. Topics include the least upper bound principle, compactness of closed intervals (the Heine-Borel theorem), sequences, convergence, the Bolzano-Weierstrass theorem, continuous functions, boundedness and intermediate value theorems, uniform continuity, differentiable functions, the mean value theorem, construction of the Riemann integral, the fundamental theorem of calculus, sequences and series of functions, uniform convergence, the Weierstrass approximation theorem, special functions (exponential and trig), and Fourier series.

Credits: 3
Room and Schedule: Campion Hall 231 MWF 02:00PM-02:50PM
Satisfies Core Requirement: None
Prerequisites: MATH3321. With the permission of the Assistant Chair for Undergraduate
Programs, students who have taken MATH3320 may be allowed to take MATH3322. However, they may need to do additional work on their own in order to make that transition.

**MATH441001**  
**Differential Equations**  
**Petit, Nicolas**  
**Spring 2023**  
This course is a junior-senior elective intended primarily for students interested in applications of mathematics. Topics include first order linear equations, higher order linear equations with constant coefficients, linear systems, qualitative analysis of non-linear systems, and an introduction to stability and bifurcations.

**Credits:** 3  
**Room and Schedule:** Gasson Hall 210 MWF 11:00AM-11:50AM  
**Satisfies Core Requirement:** None  
**Prerequisites:** MATH2210/ADMT2210 and MATH2202

MATH442601  
**Probability**  
**Gross, Robert**  
**Spring 2023**  
This course provides a general introduction to modern probability theory. Topics include probability spaces, discrete and continuous random variables, joint and conditional distributions, mathematical expectation, the central limit theorem, and the weak law of large numbers. Applications to real data will be stressed, and we will use the computer to explore many concepts.

**Credits:** 3

MATH444001
Dynamical Systems
Mirollo, Renato
Spring 2023
This course is an introduction to nonlinear dynamics and their applications, emphasizing qualitative methods for differential equations. Topics include fixed and periodic points, stability, linearization, parameterized families and bifurcations, and existence and nonexistence theorems for closed orbits in the plane. The final part of the course is an introduction to chaotic systems and fractals, including the Lorenz system and the quadratic map.

Credits: 3
Room and Schedule: 245 Beacon Street Room 214 MWF 11:00AM-11:50AM
Satisfies Core Requirement: None
Prerequisites: MATH2202 and MATH2210/ADMT2210
MATH444501
Combinatorics
Greene, Joshua E
Spring 2023
Not open to students who have completed MATH2245 or MATH2248 or CSCI2245. This course is an introduction to graph theory and combinatorics, with a strong emphasis on creative problem-solving techniques and connections with other branches of mathematics. Topics will center around enumeration, Hamiltonian and Eulerian cycles, extremal graph theory, planarity, matching, colorability, Ramsey theory, hypergraphs, combinatorial geometry, and applications of linear algebra, probability, polynomials, and topology to combinatorics.

Credits: 3
Room and Schedule: Gasson Hall 309 MWF 02:00PM-02:50PM
Satisfies Core Requirement: None
Prerequisites: MATH2216 or Permission of Department

MATH446001
Complex Variables
Chen, Yongyi
Spring 2023
This course gives an introduction to the theory of functions of a complex variable, a fundamental and central area of mathematics. It is intended for mathematics majors and well-prepared science majors. Topics covered include complex numbers and their properties, analytic functions and the Cauchy-Riemann equations, the logarithm and other elementary functions of a complex variable, integration of complex functions, the Cauchy integral theorem and its consequences, power series representation of analytic functions, and the residue theorem and applications to definite integrals.

MATH446201
Topology
Brooks, Robyn K
Spring 2023
This course is an introduction to point-set topology. Topics include topological spaces, continuous functions, connectedness, compactness, metric spaces, the Urysohn Metrization Theorem, manifolds, the fundamental group and the classification of surfaces. We will also discuss applications of these concepts to problems in science and engineering.

Credits: 3
Room and Schedule: Fulton Hall 310 MWF 11:00AM-11:50AM
Satisfies Core Requirement: None
Prerequisites: MATH2216

MUSA110001
**Fundamentals of Music Theory**
Gawlick, Barbara S
Summer 2022
An introductory music theory course designed for students with a strong interest in music. As a Core course it includes speculations on how musical discourse informs our perception and understanding of the world around us. Students learn to acquire skills in music notation and transcription. The following theoretical concepts will be extensively covered: notation of pitch and rhythm, scales, intervals, chords, and harmonic progression. Students leave the course prepared for upper level study in music theory and will begin to question broader issues concerning the meaning and use of music. Training in Keyboard Skills is required in the accompanying Lab

MUSA120001  
**Introduction to Music**  
Carpentier, Rachel O  
**Summer 2022**

This course will attempt to develop essential and critical listening faculties by employing a chronological survey of the elements, forms, and various types of music that the serious listener is exposed to today. The principal emphasis of the course will be on traditional Western art music from medieval Gregorian Chant to twentieth-century electronic music, but certain excursions into the world of non-Western musics, jazz, and American popular song will be included to diversify and enrich the experience of listening critically to music.

**Credits:** 3  
**Room and Schedule:** On-line Asynchronous  
**Satisfies Core Requirement:** Arts  
**Prerequisites:** None

MUSA130001
History of Popular Music
James, Donald J
Summer 2022
From the blues to country, jazz to rock, our nation's political, social, and economic history has been mirrored and influenced by the styles of popular music developed in our cultural melting pot. This course will provide an overall history of popular music in America, with emphasis upon mainstream popular music since 1954. Its focus will be on the independence and interdependence of black and white musical cultures in America. Students will learn stylistic developments in popular music and acquire interpretive strategies, including methods of aural analysis that will view popular songs as historical texts and as autonomous works of art.

Music Academic Courses: Fall 2022

MUSA109001
Ear Training/Sight-Singing Lab
Burgo, Michael
Fall 2022
For music majors. In meetings twice a week students learn to sing melodies by sight through a solfège system of drilling scales and intervals (sight-singing) and learn to notate melodic, rhythmic, and harmonic patterns (ear-training). The course principally helps students pass the Ear Training/Sight Singing requirement for the major but can benefit individuals in singing groups or those who wish to improve their practical musical skills. Preference given to majors & minors. Usually taken concurrently with MUSA 2100 Harmony or MUSA 3100 Chromatic Harmony.

MUSA110001
Fundamentals of Music Theory
Gawlick, Barbara S
Fall 2022
An introductory music theory course designed for students with a strong interest in music. As a Core course it includes speculations on how musical discourse informs our perception and understanding of the world around us. Students learn to acquire skills in music notation and transcription. The following theoretical concepts will be extensively covered: notation of pitch and rhythm, scales, intervals, chords, and harmonic progression. Students leave the course prepared for upper level study in music theory and will begin to question broader issues concerning the meaning and use of music. Training in Keyboard Skills is required in the accompanying Lab.

History of Popular Music
Daly Berman, Amanda E
Fall 2022
From the blues to country, jazz to rock, our nation's political, social, and economic history has been mirrored and influenced by the styles of popular music developed in our cultural melting pot. This course will provide an overall history of popular music in America, with emphasis upon mainstream popular music since 1954. Its focus will be on the independence and interdependence of black and white musical cultures in America. Students will learn stylistic developments in popular music and acquire interpretive strategies, including methods of aural analysis that will view popular songs as historical texts and as autonomous works of art.

MUSA132001
Introduction to Musics of the World
Daly Berman, Amanda E
Fall 2022
This course provides an introduction to selected musical traditions from around the world, in their cultural contexts. Our main goals are to study the connections between music and other cultural features and institutions, to become familiar with the features of major musical styles from the cultures studied, and with basic concepts in ethnomusicology and comparative musicology. Case studies include Native North and South American; Western, Central, and Southern African; Arabic; Persian; Hindusthani; Karnatak; Javanese; and Japanese musics. Musical training and background are not required and are not presumed. Fulfills World Music requirement in Major; fulfills x-cultural requirement in Minor

MUSA170101
Aesthetic Exercises: Engagement, Empathy, Ethics
Callahan, Daniel
Fall 2022
In this course you will hone your perceptual and critical faculties on a range of artworks and performances traversing media and frames, from ancient sculpture to contemporary sports. You will explore how differences between media and art forms affect representation, meaning, and reception. You will define and redefine art. You will read aesthetic theorists from Plato to YouTube users. Most importantly, you will lavish attention on your own embodied experience to understand what constitutes aesthetic engagement, with whom or what you empathize in aesthetic experience, and how, if at all, aesthetic exercises better your life and the lives of others.

Music of the Modern Era
Callahan, Daniel
Fall 2022
This is a study of the music of the twentieth century, including concepts, ideas, techniques, compositional materials, and analytical principles of the music, as well as a historical, chronological survey of the composers and compositions of the modern era. The course will include a study of the twentieth-century masters, including: Debussy, Ravel, Stravinsky, and Schoenberg; nationalist composers like Bartok, Britten, and Copland; and the flowering of avant-garde music since 1945, including electronic music. A discussion of the development of Jazz and American Popular Song will be included. Required in the Music Major; fulfills Music Period course in Minor.

MUSA230701
Musics of Asia
Dineen, Douglass
Fall 2022
This course offers an approach to Asian culture focusing on music and the performing arts. Case studies from India, Tibet, China, Japan, Korea, and Indonesia highlight the profound richness of musical experience seen throughout Asia while providing the foundation for a broader analysis of music-as-culture. Examining how music is deployed—such as in religious expression, political and social strategies, identity formation, and entertainment—reveals both continuities in musical uses/meanings and diversity in its cultural, social, and personal dimensions. This course locates contemporary Asian performing arts in their historical contexts, considers the transformations that take place as music flows across borders, and examines the interplay between global information networks and local forms and representations.

**Music and Culture in the Middle East**

Lucas, Ann E

**Fall 2022**

This course explores the relationship between different music traditions of the Middle East and their respective cultural contexts. It addresses issues of music's structure and content vis-à-vis its role in social, political, and religious situations in the region; the ways that these forces influence musical aesthetics, while also addressing the role of music in the Middle East historically. The cultural areas covered in this class include the Arab World, Iran, Turkey, and Afghanistan.

History of Jazz
Mangin, Timothy R
Fall 2022
A history of America's music from its origins in African traditions through the contemporary scene. The course will explore its African roots; its consolidation in New Orleans and its spread into the cultural mainstream in the Jazz Age; its transformation into bebop, cool, third stream, funk, and avant-garde trends; and the return to traditionalism. Key figures covered will be Armstrong, Ellington, Parker, and Marsalis, among others.

Room and Schedule: Lyons Hall 423 MW 03:00PM-04:15PM
Hamilton and the American Musical
McCool, Jason
Fall 2022

Few recent artworks have grabbed hold of the American public consciousness like Hamilton: An American Musical. Lin-Manuel Miranda’s show is deeply rooted in the conventions of American musical theater, which since the mid-nineteenth century has been a site for exploring racial representation, cultural exchange, and national identity. Fueled by the vibrant musical language of hip hop, rooted in Black resistance, Hamilton also seemed to meet and reflect a volatile moment of racial reckoning in America. In this course, open to music majors and non-majors, students will examine the political, cultural, and musical resonances of Hamilton within these rich historical contexts. Fulfills popular music in Music Major, cross-cultural course in Music Minor.

Counterpoint I
Gawlick, Ralf Y
Fall 2022
In this course we will study the fundamentals of two- and three-part polyphonic styles. Using the principles of species counterpoint, we will acquire a dependable contrapuntal technique to write short compositions, first in two parts and eventually in three. Assignments will include short works in free imitation, strict canon, and invertible counterpoint. Our studies will include a brief survey of the historical origins of Western polyphony and analysis of contrapuntal compositions of the Baroque period.

MUSA311401
Jazz Harmony and Improvisation
Lee, Thomas O
Fall 2022
This music theory course will focus on the study of chord structures, chord substitutions, chord scales, composition, and improvisation as they have been codified by contemporary jazz musicians. The technical innovations in the music of Sonny Rollins, Thelonius Monk, Charlie Parker, and Miles Davis will be analyzed and discussed. Special attention will be placed on learning how to improvise on the great standards of the jazz repertory. Additional studies will include the following: piano lead sheet arrangements; ii-V-I keyboard harmony, re-harmonization, and composing original tunes based on chord structures of standards by Berlin, Kern, Gershwin; rhythm changes; and the blues.

Seminar in Composition
Gawlick, Ralf Y
Fall 2022
The course will be conducted in two parts. One: class will meet once a month. Works in both tonal and twentieth century idioms will be discussed and used as models for student compositions. Two: each student will meet once a week with the instructor for a private studio composition lesson. The student will complete, by the end of the semester, three original compositions: theme and variations, a movement for string quartet, and a song cycle for voice and piano. The purchase of Finale music software, created by Coda Music Technology, Mac or PC version, is required for this course.

MUSA322801
The Concerto
Hebert, Sandra
Fall 2022
One of the oldest continuous genres of instrumental music, the concerto began in the 17th century Baroque, but traces its roots to vocal music in the late 16th century. The genre explores the drama inherent in contrast and conversation, in the early concerto in the Concerto Grosso (alternating between the large group and the small group) as well as concertos that feature one or two solo instruments. The genre expanded into the Classical and Romantic concertos of the 18th and 19th centuries and continues to be an important performance vehicle to the present day. This course will cover style and repertoire in concerto form from its inception to current developments and works from Corelli, Vivaldi, Bach, Mozart, Beethoven, Schumann, Chopin, Brahms, Rachmaninoff. Fulfills genre course in Music Major and Minor.

MUSA490004
Readings and Research
Gawlick, Ralf Y
MUSA494101
Senior Seminar
Lucas, Ann E
Fall 2022
For music majors in their senior year (exception only by special permission). Through supervised reading, research, writing, discussion, and performance, this seminar will help majors develop a framework for synthesizing their various courses into a coherent whole, with special emphasis in the area of strongest interest (theory, composition, history, cross-cultural studies, or performance). It will also help prepare students for examinations in listening repertoire and ear-training (see major requirements).

Music Academic Courses: Spring 2023

MUSA109001
Ear Training/Sight-Singing Lab
Burgo, Michael
Spring 2023
For music majors. In meetings twice a week students learn to sing melodies by sight through a
solfege system of drilling scales and intervals (sight-singing) and learn to notate melodic,
rhythmic, and harmonic patterns (ear-training). The course principally helps students pass the
Ear Training/Sight Singing requirement for the major but can benefit individuals in singing
groups or those who wish to improve their practical musical skills. Preference given to majors &
minors. Usually taken concurrently with MUSA 2100 Harmony or MUSA 3100 Chromatic
Harmony.

**MUSA110001**

**Fundamentals of Music Theory**

**Gawlick, Barbara S**

**Spring 2023**

An introductory music theory course designed for students with a strong interest in music. As a
Core course it includes speculations on how musical discourse informs our perception and
understanding of the world around us. Students learn to acquire skills in music notation and
transcription. The following theoretical concepts will be extensively covered: notation of pitch
and rhythm, scales, intervals, chords, and harmonic progression. Students leave the course
prepared for upper level study in music theory and will begin to question broader issues
concerning the meaning and use of music. Training in Keyboard Skills is required in the
accompanying Lab

**Credits:** 3

**Room and Schedule:** Lyons Hall 409 MWF 10:00AM-10:50AM

**Satisfies Core Requirement:** Arts

MUSA130001
History of Popular Music
Daly Berman, Amanda E
Spring 2023
From the blues to country, jazz to rock, our nation's political, social, and economic history has been mirrored and influenced by the styles of popular music developed in our cultural melting pot. This course will provide an overall history of popular music in America, with emphasis upon mainstream popular music since 1954. Its focus will be on the independence and interdependence of black and white musical cultures in America. Students will learn stylistic developments in popular music and acquire interpretive strategies, including methods of aural analysis that will view popular songs as historical texts and as autonomous works of art.

**MUSA132001**  
**Introduction to Musics of the World**  
**Daly Berman, Amanda E**  
**Spring 2023**  
This course provides an introduction to selected musical traditions from around the world, in their cultural contexts. Our main goals are to study the connections between music and other cultural features and institutions, to become familiar with the features of major musical styles from the cultures studied, and with basic concepts in ethnomusicology and comparative musicology. Case studies include Native North and South American; Western, Central, and Southern African; Arabic; Persian; Hindusthani; Karnatak; Javanese; and Japanese musics. Musical training and background are not required and are not presumed. Fulfills World Music requirement in Major; fulfills x-cultural requirement in Minor

**MUSA220101**  
**Medieval/Renaissance**  
**Restrepo, Margarita**  
**Spring 2023**  
A study of the development of Western Music from the first stages of musical notation in the Middle Ages through the polyphonic music of the sixteenth century. Both sacred and secular traditions will be considered, including Gregorian chant, the polyphonic Mass and motet, the chanson, and the madrigal of the 16th century. Although most of the literature of this period is vocal, a study of the instruments and instrumental literature will be included. Fulfills Music Period course in Major and Minor

MUSA230401
Musics of India
Dineen, Douglass
Spring 2023
This course will introduce students to the rich and varied musical arts of India. Students will delve into the ubiquitous songs of Bollywood and Tamil film, karnatak and hindustani art musics, temple musics, as well as the music (and dance) of bharatanatyam, bhangra, and other regional genres. Lectures will focus on situating Indian musics in their cultural and historic contexts while exploring issues of identity formation, regional and transnational movements, and the changing meanings of music and the arts in India. Students will also study performance practices—including basic exercises for South Indian melody (raga), rhythm (tala), and dance—which will provide engaged (and embodied) learning supplements to the lectures. There are no academic or music-skills prerequisites for this course.

**Credits:** 3  
**Room and Schedule:** Lyons Hall 423 TuTh 12:00 Noon-01:15PM  
**Satisfies Core Requirement:** Cultural Diversity

**MUSA310001**  
**Chromatic Harmony**  
**Lee, Thomas O**  
**Spring 2023**  
This course covers the basic principles of chromatic progression. The proper use of secondary dominants, diminished seventh chords, and augmented triads precedes an in-depth study of the harmonization of Bach chorales, the concept of modulation using modal exchange, and the introduction of Neapolitan sixth and augmented sixth chords. We will study via harmonic and form analysis the works of great composers including Bach, Haydn, Mozart, Beethoven, Schubert, Schumann, Chopin, Brahms, Wolf, Mahler, and Wagner. Training in Keyboard Skills is required in the accompanying Lab.

**Credits:** 3  
**Room and Schedule:** Lyons Hall 409 MWF 02:00PM-02:50PM

MUSA312001
Seminar in Composition
Lee, Thomas O
Spring 2023
The course will be conducted in two parts. One: class will meet once a month. Works in both
tonal and twentieth century idioms will be discussed and used as models for student compositions. Two: each student will meet once a week with the instructor for a private studio composition lesson. The student will complete, by the end of the semester, three original compositions: theme and variations, a movement for string quartet, and a song cycle for voice and piano. The purchase of Finale music software, created by Coda Music Technology, Mac or PC version, is required for this course.

**Credits:** 3

**MUSA322001**  
**Opera**  
**Callahan, Daniel**  
**Spring 2023**  
In this course we will look at how text and music combine to relate a drama, concentrating on five representative masters of the seventeenth through nineteenth centuries--Monteverdi, Handel, Mozart, Verdi, and Wagner. This course will take excursions into other works--the operas created for the court of Louis XIV, the vocal pyrotechnics of the Italian golden age of singing, the spectacle of French grand opera, and the operatic qualities of the modern Broadway musical.

**Credits:** 3

MUSA327501
Johannes Brahms
Hebert, Sandra
Spring 2023
A second Beethoven, the last Romantic, a hidden source of Modernism—all these labels have been attached to Johannes Brahms (1833-1897). This course will look at the music of Brahms in light of various issues that defined the latter half of the nineteenth century and that continue to influence the way we listen to his music today. We will consider ideas such as historicism, nationalism, and "conservative" versus "progressive" approaches to musical traditions. We will sample works in almost all of the genres for which Brahms wrote: symphonies, concertos, piano and chamber music, solo and choral songs.

MUSA334201
Music and Ecstasy
Lucas, Ann E
Spring 2023
This course examines the many different contexts where music is used to attain an altered state of consciousness. Throughout the world, music is actively used to drastically alter the emotions, perceptions, and actions of listeners in order to transport them into another state of being. This class deals with music's relationship with specific practices of mysticism, shamanism, and magic; it also explores the specific musical structures associated with altered states of consciousness and analyzes general questions of music versus other factors in achieving an altered state of consciousness.

MUSA335001
The Beatles: From "Yesterday" to "Tomorrow Never Knows"
McCool, Jason
Spring 2023
Restricted to Music Majors and Minors only. Everyone loves the Beatles. In this class, we explore why that is the case. We will chart the rapidly changing idiom of popular music in the 1960s and outline its interaction with various social, political, and cultural movements, such as "Beatlemania" and psychedelia. The primary source material for this class is the established canon of Beatles songs, albums, and films, which we will supplement with secondary articles, reviews, and interviews. This course will challenge you to listen critically to, and think deeply about, one of the most influential bands in the twentieth century.

MUSP162001
Traditional Irish Dance
Haggan, Caitlin M
Fall 2022
This course will introduce students to the traditional dances of Ireland, including solo step dance footwork and group set and ceilidh dances. The class will include warm-ups, technique, and choreography, as well as occasional short readings, video viewings, and music listening exercises. Students will gain an understanding of Irish traditional musical rhythms, while physically embodying their intrinsic connection to the dance patterns. An uplifting and invigorating class. All levels welcome.

MUSP167001
Waaw Waaw Sabar: BC West African Music Ensemble
Mangin, Timothy R; Toure, Amadou L
Fall 2022
This course specializes in sabar, a drumming and dance style of the Wolof people from Senegal. Performed in many contexts, the sabar is heard at baptisms, weddings, wrestling matches, political and community gatherings, the Black Panther soundtrack, and the urban dance music called mbalax. Students will learn the repertoire performed at these events in weekly classes taught by A. Lamine Toure, a master drummer from one of Senegals oldest griot families. We welcome musicians, non-musicians, students, faculty, staff, African music fans, and members of the Boston community. We provide the drums. The ensemble is inspired by the Wolof expression "waaw waaw," a positive affirmation meaning "Yes!!", "That's Right," Good Job, and "Excellent." Our classes encourage collective participation, fun, and a deeper understanding of a millennia-old drumming tradition that continues to evolve as new technologies and musical styles emerge.

Introduction to Improvisation
Kniffin, Eric L
Fall 2022
Improvisation is a central feature of many Western musical styles. This course offers students the opportunity to learn how to improvise in jazz, blues and rock. In a hands-on manner, students are introduced to the fundamental concepts of improvising. No prior experience is necessary, and there is no prerequisite, but you should have at least some experience playing an instrument or singing. In addition to extensive in-class performance, accompaniment recordings are provided for practice outside class.

MUSP177001
Gospel Music Workshop
Jacob Dorman, Shannon D
Fall 2022
This class will examine Black gospel music with an emphasis on choral music and oral traditions that capture the Black experience in America from a historical, socio-political and multicultural standpoint. The syllabus and repertoire is reflective of the great faith tradition that is an integral part of black culture; in that it includes the breadth of musical expression in the Black worship experience. Students will analyze the importance of Black gospel music and its vital role in shaping global music trends. Spirituals, traditional gospel, contemporary gospel, as well as religious music of the European tradition will be reviewed closely from a historical and musical standpoint. The class will comprise of equal parts lecture and practicum (Voices of Imani Gospel Choir). The latter half compromising of the practicum (VOI) will help students engage in practical learning of songs explored in the lecture, consequently accomplishing the age-old institution of oral tradition in Black history.

Liederabend (Art Song)
Albert, Lindsay
Fall 2022
Performance Course. A performance opportunity for advanced singers and advanced collaborative pianists interested in exploring the art of song repertoire. Song text repertoire may include German, English, Spanish, Italian, and French. Students must be available to meet weekly for a 30-minute individual coaching session, time to be arranged with the instructor. Liederabend culminates with a song recital performance. This course requires a high level of musicianship, technical ability, and consistent practice. Preference will be given to students who are also enrolled in private lesson study. Audition required, please contact Lindsay Albert at lindsay.albert@bc.edu.

MUSP162001
Traditional Irish Dance
Haggan, Caitlin M
Spring 2023
This course will introduce students to the traditional dances of Ireland, including solo step dance footwork and group set and cilt dances. The class will include warm-ups, technique, and choreography, as well as occasional short readings, video viewings, and music listening exercises. Students will gain an understanding of Irish traditional musical rhythms, while physically embodying their intrinsic connection to the dance patterns. An uplifting and invigorating class. All levels welcome.

**MUSP167001**  
*Waaw Waaw Sabar: BC West African Music Ensemble*  
*Mangin, Timothy R; Toure, Amadou L*  
*Spring 2023*

This course specializes in sabar, a drumming and dance style of the Wolof people from Senegal. Performed in many contexts, the sabar is heard at baptisms, weddings, wrestling matches, political and community gatherings, the Black Panther soundtrack, and the urban dance music called mbalax. Students will learn the repertoire performed at these events in weekly classes taught by A. Lamine Toure, a master drummer from one of Senegal's oldest griot families. We welcome musicians, non-musicians, students, faculty, staff, African music fans, and members of the Boston community. We provide the drums. The ensemble is inspired by the Wolof expression "waaw waaw," a positive affirmation meaning "Yes!" "That's Right," Good Job, and "Excellent." Our classes encourage collective participation, fun, and a deeper understanding of a millennia-old drumming tradition that continues to evolve as new technologies and musical styles emerge.

MUSP176001
Introduction to Improvisation
Kniffin, Eric L
Spring 2023
Improvisation is a central feature of many Western musical styles. This course offers students the opportunity to learn how to improvise in jazz, blues and rock. In a hands-on manner, students are introduced to the fundamental concepts of improvising. No prior experience is necessary, and there is no prerequisite, but you should have at least some experience playing an instrument or singing. In addition to extensive in-class performance, accompaniment recordings are provided for practice outside class.

This class will examine Black gospel music with an emphasis on choral music and oral traditions that capture the Black experience in America from a historical, socio-political and multicultural standpoint. The syllabus and repertoire is reflective of the great faith tradition that is an integral part of black culture; in that it includes the breadth of musical expression in the Black worship experience. Students will analyze the importance of Black gospel music and its vital role in shaping global music trends. Spirituals, traditional gospel, contemporary gospel, as well as religious music of the European tradition will be reviewed closely from a historical and musical standpoint. The class will comprise of equal parts lecture and practicum (Voices of Imani Gospel Choir). The latter half compromising of the practicum (VOI) will help students engage in practical learning of songs explored in the lecture, consequently accomplishing the age-old institution of oral tradition in Black history.

**Credits:** 1

**Room and Schedule:** Lyons Hall 423 TuTh 06:00PM-07:50PM

**Satisifies Core Requirement:** None

**Prerequisites:** All students are welcome regardless of music theory/reading skills, vocal skills and religious/cultural background. Students can take the course for credit one semester, and this will require joining the Voices of Imani Gospel Choir for that semester...

Modern Middle Eastern and Arabic Literature (in translation)
Salameh, Franck
Spring 2023
All works are read in English translation. The complex, multicultural nature of the Middle East is surveyed through the twentieth-century literature of Arabic-speaking lands, Israel, and Turkey. Identity, culture, religion, nationalism, conflict, and minority narratives. Arabic works: the writings of Adonis, Darwish, and Qabbani. Hebrew works: the writings of Amichai and Bialik. Works written in French, English, Kurdish, Syriac, Turkish, and various Middle Eastern dialects: the writings of Andree Chedid, Mario Levi, Charles Corm, Louis Awad, Said Akl, and Orhan Pamuk.

PHIL125201
Practical Logic
Clemente, Matthew J
Summer 2022
A course not in the "new logic" (symbolic, or mathematical, logic) but in the "old logic" (ordinary language logic) invented by Aristotle and used for 2300 years in all the humanities. Includes such topics as definition, contradiction, syllogisms, implied premises, induction, and analogy. The course includes the commonsensical philosophical bases for this logic and also many practical applications to reading, interpreting, evaluating, and inventing arguments, especially in dialogs. Weekly quizzes, extra credit opportunities, and a take-home final exam. Texts: (1) SOCRATIC LOGIC, (2) THE BEST THINGS IN LIFE, (3) SUMMA PHILOSOPHICA (all 3 titles by Peter Kreeft)

Credits: 3
Room and Schedule: On-line Asynchronous

PHIL220901
Introduction to Formal Logic
Pope, Michael L
Summer 2022
Logic is the careful study of reasoning. It investigates how critical thinking is successful and, when it's not, what goes wrong. Understanding logic enables one to recognize and craft good arguments in every area of life, from science and technology to political debates and everything in between. This course introduces the composition of arguments and fallacious reasoning, honing students' ability to identify and formulate problems and evaluate solutions. Our goal is to analyze and understand the formal tools that allow us to represent the most salient features of reasoning in the most precise terms.

Credits: 3
Room and Schedule: On-line Asynchronous

PHIL327501
Ethics of Migration
Lott, Micah
Summer 2022
The course deals with migration as a topic for philosophical and theological reflection. We will consider key concepts related to migration--e.g., citizen, migrant, human rights, nation. We will examine debates over whether limits on migration are justifiable. We will also pay special attention to rights and duties concerning refugees. The course will be take place in Mexico, first in Mexico City and then in Tijuana, just a few miles from the U.S.-Mexico border. We will use the Mexican context--including both Mexican history and present realities--as a way of making concrete the philosophical and theological discussion of migration. For millennia, Mexico has been a place of migration and settlement by different peoples. And each year, hundreds of thousands of people move in and out of Mexico for a variety of reasons. Moreover, the U.S.-Mexico border is an issue of intense debate in both the U.S. and Mexico. Thus Mexico provides an excellent context for thinking about: (1) the big picture of migration as a human phenomenon, (2) the historical forces that have shaped, and continue to shape, patterns of migration, and (3) the contemporary situation of migrants and contemporary policies toward migration. Our goal is to combine philosophical/theological reflection with cultural immersion in a mutually illuminating way. The Mexican context will help make our philosophical/theological discussions of migration more vivid, nuanced, and realistic.

PHIL108801  
Person and Social Responsibility I  
Troxell, Mary S  
Fall 2022  
Enrollment limited to freshmen, sophomores, and juniors The course requirements include ten to twelve hours per week of community service. In light of classic philosophical and theological texts, students in this course address the relationship of self and society, the nature of community, the mystery of suffering and the practical difficulties of developing a just society. PULSE students are challenged to investigate the insights offered by their readings in relationship to their service work. Places in the course are very limited.

Fall 2022
Enrollment limited to freshmen, sophomores, and juniors. The course requirements include ten to twelve hours per week of community service. In light of classic philosophical and theological texts, students in this course address the relationship of self and society, the nature of community, the mystery of suffering and the practical difficulties of developing a just society. PULSE students are challenged to investigate the insights offered by their readings in relationship to their service work. Places in the course are very limited.

Perspectives on Western Culture I/Perspectives I
Bloechl, Jeffrey
Fall 2022
Freshmen only The course introduces students to the Judeo-Christian Biblical texts and to the writings of such foundational thinkers as Plato, Aristotle, Augustine, Aquinas, Luther, Bacon, Descartes, Hobbes, Locke, Kant, Hegel, and Kierkegaard. The first semester considers the birth of the self-critical Greek philosophic spirit, the story of the people of Israel, the emergence of Christianity and Islam, and concludes with a consideration of medieval explorations of the relationship between faith and reason. Attention will also be paid to non-Western philosophical and theological sources.

PHIL111901
New Scientific Visions I/Perspectives IV
Vandewall, Holly R
Fall 2022
Can the study of modern mathematics and the natural sciences prove to be a genuine liberation of the human spirit? This unusual question will form the central theme of this course. The course will explore major developments in the fields of mathematics, biology, physics, chemistry, and the earth and space sciences from ancient Greece, through the modern scientific revolutions of the seventeenth century, and into the twentieth century achievements and paradoxes of modern number theory, the discovery of DNA, relativity theories, quantum mechanics, and contemporary cosmologies.

**The Challenge of Justice**

**Pope, Stephen J**

**Fall 2022**

This course introduces the student to the principal understandings of justice that have developed in the Western philosophical and theological traditions. Care is taken to relate the theories to concrete, practical and political problems, and to develop good reasons for choosing one way of justice rather than another. The relationship of justice to the complementary notion of peace will also be examined. Special attention is paid to the contribution of Catholic theology in the contemporary public conversation about justice and peace. Problems discussed may include human rights, hunger and poverty, and ecological justice.

PHIL172201
The Formation of Early Christian Thought: A Philosophical Examination
Byers, Sarah C
Fall 2022
How did Greco-Roman philosophy contribute to rational Christian theology? These courses address the enduring question of the relationship between faith and reason. In the early Christian era leading intellectuals attempted to integrate the Jewish and Christian scriptures and traditions with rational philosophy. They employed Greek and Roman philosophy to reflect upon foundational issues in metaphysics, human psychology, epistemology, ethics, and God's action in time. We will examine important concepts, arguments, and theories of ancient pagan philosophers (Plato, Aristotle, Seneca, Epictetus, Plotinus) and trace their adoption and adaptation by leading Christians (Justin Martyr, Origen, Lactantius, Athanasius, Augustine).

PHIL229101
Philosophy and Theology of Community I
Sweeney, Meghan T
Fall 2022
This seminar explores the nature of community, with particular focus on community in the American context. Some of the central historical, cultural, political and religious forces that have shaped both American community and the American understanding of community are examined. These questions are initially approached from an historical perspective with an assessment of philosophical ideas which were dominant in the political thinking of the American founders. The seminar then considers the historical development of those ideas in light of the way they are concretized in political practice, arriving at an assessment of contemporary American thinking on community.

PHIL244401
The Vegetative Soul: The Hidden Life of Plants
Vandewall, Holly R
Fall 2022
By weight, more than 80% percent of the living things on the earth are plants, and without them the earth's animals, including humans, would perish within weeks. But philosophy has spent a vanishingly small part of its efforts in considering this form of life, generally relegating plants to the status of minimally alive, but essentially uninteresting. As Michael Pollan notes, "plants are so unlike people that it's very difficult for us to appreciate fully their complexity and sophistication. Yet plants have been evolving much, much longer than we have, have been inventing new strategies for survival and perfecting their designs for so long that to say that one of us is the more 'advanced' really depends on how you define that term, and what 'advances' you value.'" This class will consider how humans have historically regarded the plant kingdom, what we can learn from the challenging imaginary exercise of attempting to understand how they live, and how we might reconsider the world if we came to regard the plant kingdom not as passive subjects of human actions, but as powerful and vital actors in their own right.

PHIL245001
Philosophies of Happiness
Davenport, Anne A
Fall 2022
How do philosophers approach happiness? Is happiness defined by well-being, pleasure, emotional state, life satisfaction, or is it best approached through some kind of hybrid account? What are, moreover, the sources of happiness? We start with the challenge of human tragedy in Shakespeare's King Lear, drawing on Walter Kaufmann and on Stanley Cavell. We then compare and contrast Thomas More's utopian imagination with the skepticism of Michel de Montaigne. We return to utopian imagination with Francis Bacon and compare his views to Descartes (rationalist), Hobbes (materialist), and Pascal (pragmatist), raising the question of how Faith and reason enter into happiness. We consider John's Ray influential argument for God by design. We read Voltaire's Candide and Emilie du Châtelet's Discourse on Happiness. We examine Diderot's formulation of happiness and Rousseau's contrasting view. We look at the distinctive way in which Rousseau privileges beauty and we pursue the topic of aesthetics in John Ruskin and Jane Addams. We end with Freud and Jean-Louis Chretien.

Energy Justice: Ethics, Economics, and the Environment

Storey, David E

Fall 2022

Energy justice has recently emerged as a name for the moral challenges that lie at the intersection of climate change, geopolitics, and economic development. While the study of energy generally focuses on economics and STEM perspectives (science, technology, engineering, and mathematics), this course approaches energy through a more integral framework that includes humanities perspectives such as history, ethics, and philosophy. We will consider energy as a physical, biological, and social phenomenon, examining the role of energy throughout human history and how societies mode of energy capture shapes their values and culture. In particular, we will scrutinize the history and nature of modern energy transitions, notably from human and animal muscle, windmills and watermills to coal, oil, nuclear, natural gas and, today, to renewable energy sources such as solar, wind, and geothermal. We will challenge the distinction between dirty and clean energy sources, exploring the social and environmental risks and harms in renewable energy supply chains. We will look at the moral and logistical challenges of just transitions from fossil-fuel based to renewable economies. Above all, we will grapple with how energy justice involves balancing climate justice, the global North decarbonizing to protect the global South and future generations and economic justice, helping the global South meet its development needs.

McGill, Cherie  
Fall 2022
What does it mean to call oneself (or someone else) a ‘feminist’? In attempting an answer to this question, we will consider efforts to reveal, unravel, and remedy the conceptual, psychological, and economic dimensions of the oppression of women. We will discuss a variety of feminisms--liberal, existential, radical--and their differing approaches to such ‘feminist’ issues as marriage and domestic violence, reproduction and pregnancy, work and sexual harassment, and the science of gender and gender difference. We will examine the relationship of sexism to racism, heterosexism, and class exploitation, and investigate the role of the concept of difference in creating and maintaining structural inequalities.

PHIL404001
Philosophical Hermeneutics on Race and Justice
Anozie, Stanley
Fall 2022
Philosophical Hermeneutics on Race and Justice examines fundamental questions about the nature of justice, retribution, the relationship between justice and fairness, contemporary debates on issues of race, and how race is a factor in peoples experience of injustice, inequality, discrimination, prejudice, structural violence, and various theoretical and practical issues of law, ethics and public policy. Hermeneutics as a philosophical discipline deals with interpretation and understanding of different perspectives on reality and human affairs. For instance, the idea of race and justice in private and public life, its significance in politics and domestic and international affairs, and its contentiousness and changeability over time. As an instrument of human liberation, the discourse on race and justice is rich for intellectual study, especially in using the tools of philosophical hermeneutics to arrive at inner and higher meanings. Students will explore enduring questions of race and justice, as well as contemporary debates over moral and legal responsibility, punishment, civil disobedience and revenge and their relation to race and justice. As part of the semester’s work students will analyze theories of justice, theories of race, race as a social construct, racial prejudice, examine specific case studies in relation to race and justice/injustice, research topics of individual interest, evaluate arguments, and defend positions of their own through the fusion of horizons. Emphasis will be placed throughout the course on readings some texts by Hans-Georg Gadamer, Martin Heidegger, Tsenay Serequeberhan, Paulo Freire, Frantz Fanon, and otherscholars; on lively discussions, careful research and writing, the formulation of well-reasoned stances on various hermeneutical and philosophical issues, and clarity in reasoning and argument.

**PHIL405001**  
**Major Figures:** Sartre and Merleau-Ponty  
**Johnson, David W**  
**Fall 2022**
This course focuses on the nature of consciousness and the question of intersubjectivity in the work of Sartre and Merleau-Ponty. We look at what each takes from the phenomenology of Husserl and Heidegger in these respects as well as where each makes a break with their predecessors. We consider the meaning and significance of Sartres concepts of nothingness and non-positional self-consciousness and Merleau-Pontys notion of incarnated consciousness. We then investigate the significance of the relation between self and other for Sartre and examine Merleau-Ponty's understanding of intersubjective relations as a primordial, pre-subjective field. The course concludes by turning to consider the way that Renaud Barbaras draws on the work of Merleau-Ponty to break through to a new phenomenology of life.

**PHIL438701**

**Epistemology**

**Atkins, Richard**

**Fall 2022**

Philosophy is full of wonderfully perplexing arguments aimed at undermining our claims to knowledge. Like this one: If I know I have two hands, then I know I'm not just a brain in a vat. But, I don't know I'm not just a brain in a vat. So, I don't know I have two hands. Or this one: A claim is known only if it is justified. Claims cannot rest on themselves for justification, cannot depend on nothing for justification, and cannot be justified by an infinite series of propositions. But as those are the only options, we must not know anything. Or this one: I believe that God exists, but many of my epistemic peers and superiors believe that God does not exist. Therefore, I have a strong countervailing reason to believe God does not exist such that my belief is not justified. This course will examine these and other puzzling arguments about knowledge, justification, and disagreement.

**Credits:** 3

**Room and Schedule:** Stokes Hall 401N TuTh 12:00 Noon-01:15PM
PHIL440801
Nineteenth- and Twentieth-Century Philosophy
Magri, Elisa
Fall 2022

In this course, we will explore the sources, forms, and implications of the concept of alienation, as this emerged in the nineteenth century and developed over twentieth century philosophy. We will start, in the first part of the course, with an overview of the challenges brought about by Kant's philosophy with particular regard to the relation between nature and freedom. Particular attention will be given to the role of education and the re-evaluation of the finitude of human spirit in Fichte, Schiller, and Hegel. We will examine how the concept of alienation is related to the principle of moral autonomy, and how the ideal of self-determination advocated by philosophers of German Idealism shaped pedagogical programs of social and political reform. In the second part of the course, we will explore the relation between alienation and reification in social and political philosophy, starting with Marx and continuing with Arendt and the Frankfurt School. This theoretical journey will offer the basis to investigate alienation in relation to self-estrangement, environmental racism, and gender discrimination in selected classics of the twentieth century. We will also consider ways of resisting alienation by applying methodological frameworks inspired by Lugones' concept of world-traveling.

PHIL442901
Freud and Philosophy
Rumble, Vanessa P
Fall 2022
The course is designed to acquaint students with the scope and evolution of Freud's thinking and with significant developments in psychoanalysis since his time. Students will study and assess Freud's and Breuer's first formulation of the nature of hysteria; Freud's groundbreaking work in dream interpretation and the nature of unconscious processes; Freud's attempt to apply his novel theory of unconscious mechanisms to cultural anthropology as well as individual psychology; and the implications of the ongoing revisions in Freud's classification of the drives. Above all, we'll focus on Freud's attempt, over the course of many years, to account for the origin of human morality and guilt, and his ongoing assessment of the role of Judaism in his life and in his culture.

PHIL529501
Modern Philosophy
Solere, Jean-Luc
Fall 2022
From the early 17th to the end of the 18th century, reason asserted its autonomy and triumphed in the Age of Enlightenment, but at the same time reflected on its own limits. Through a series of themes and problems, the course presents the major philosophies (roughly, from Descartes to Kant) that have accompanied the development of scientific knowledge, the rise of the modern mind, and the transformation of Western societies. This comprehensive survey covers metaphysics, epistemology, ethics, and political philosophy, paying attention to the interconnection between ideas in these different domains (with for instance the centrality of the notion of law: laws of nature, political laws, moral law). It particularly highlights the logical development in the succession of questions and answers that characterize the evolution of philosophy in the modern times. The course will provide you with the central concepts of modern thought, so as to grasp the bases of today understanding of the world and of ourselves. Analysis of representative texts, class discussions, and writing assignments are designed to develop rigorous argumentation and expression skills. (NB: This course was previously offered as PHIL 4406; you cannot take it if you took PHIL 4406)

**Patristic Greek I**

**Schatkin, Margaret**

**Fall 2022**
This course is continued in the spring as THEO5373 New Testament Greek II.. This two-semester course is designed for the student with no previous knowledge of ancient Greek to develop reading and translating skills in Patristic Greek language by mastering the fundamental principles of Greek grammar and syntax and acquiring a basic reading vocabulary. The student becomes familiar with the meaning of Greek words, their forms and structure, and their customary arrangement in sentences. A secondary goal of this course is to serve as a foundation for further studies in Patristic Greek.

**PHIL541801**  
**Capstone: Working, Playing, Being**  
**Storey, David E**  
**Fall 2022**

Capstone classes may NOT be taken Pass/Fail. You may take only ONE Capstone class before graduation. Seniors only. The conventional wisdom is that BC student culture is "work hard, play hard." But what do we mean by "work" and "play" here? How do these implicit meanings reflect broader cultural forces? And do these meanings serve us well? Senior year is an exciting but anxious time, and this seminar is a chance for you to: (a) reflect on how your education has shaped you, and how you have shaped your education and (b) explore your goals, fears, hopes, and expectations around life post-graduation with a small group of peers. We will examine: (1) the meaning of, and relationship between, work and leisure in your own life; (2) how they have developed since your freshman year in light of your education at BC and; (3) how they figure into your vision of a fulfilling life.

PHIL541901
Capstone: A Life Well Lived
DeChiara-Quenzer, Deborah
Fall 2022
Capstone classes may NOT be taken Pass/Fail. You may take only ONE Capstone class before graduation. Seniors only. This course engages students in serious reflection on what it means to have "a life well lived." It is advantageous to do this reflection at this time in your life, as it affords you time and opportunity to shape your life going forward. What kind of life do you hope to live? What will bring you peace and satisfaction--dare we say, even happiness? Students will be asked to examine themselves by looking both backwards and forwards in many dimensions of their lives (education, ethics, relationships, career, etc.) while learning what others have said about having a meaningful life.

PHIL550001
Philosophy of Law
Berger, Christopher D
Fall 2022
This course aims to provide an overview of a number of core debates in contemporary philosophy of law. The primary concern will be to examine the relation between legal validity and the moral normativity of the law, that is, answers to the questions 'What is the law?' and 'Is there a (moral) duty to obey the law?' In addition to these more general questions, we will focus on several more specific questions pertaining to constitutionalism, including 'What is the relationship between a constitution and the rule of law?', 'What is the ground of judicial review?' and 'What connection, if any, is there between questions of legal theory and broader debates in contemporary political philosophy?'

**PHIL551501**

**How to Save the World: Ethics of Climate Change**

**Storey, David E**

**Fall 2022**

Climate change is arguably the defining issue of our time and the hardest problem humanity has ever faced. It raises an array of moral questions, e.g.: What values should guide global and national climate policies? What responsibilities do we have toward the poor, future generations, nonhuman species, and our planet? The course is an introduction to environmental ethics and the moral challenges posed by climate change. In particular, we examine the philosophical and ethical questions that underlie climate science, public policy, energy systems and policy, and economics. The goal is to cultivate an integral understanding of the climate problem through an interdisciplinary inquiry.

PHIL553301
Capstone: Desire and Discernment
Muldoon, Timothy P
Fall 2022
Seniors only. Capstone classes may NOT be taken Pass/Fail. You may take only ONE Capstone class before graduation. First, the course will involve careful reflection on the sifting and pruning of desires. It will introduce philosophical reflection on desire from ancient Greece to modern philosophy, paying particular attention to the Ignatian tradition of discernment of spirits. Second, it will invite particular reflection on our relationships, and the desires that we have for the relationships we seek to cultivate over the course of our lives. Third, it will invite students to reflect on their experiences of work and preparation for a career, asking how their Boston College education has formed them. Fourth, we will reflect on our citizenship within communities: family, local community, society, nation, and world.

Immanuel Kant's Critique of Pure Reason (CPR) represents one of the most significant texts in the history of philosophy. Kant himself defines it as a "treatise of method" (CPR, B XXII). The second part of the work --The Transcendental Doctrine of the Method-- particularly insists on this aspect. It consists of four sections. The first is The discipline of pure reason that deals with the distinction between the method of the mathematics (construction of concepts) and the method of the logic (analysis of concepts). It also treats of the two main forms of theoretical philosophy: the mere opinion (Meinen) and the knowledge (Wissen). The topic of the second section --The canon of pure reason -- is the elucidation of a specific method (Glauben) for the practical use of reason. How a unified whole of metaphysics can be built up as a system from the connection of the theoretical and the practical use of reason is the theme of third section - The Architectonic of Pure Reason ---, the "art of systems" (KrV A 832/B 860). The last section -- The History of Pure Reason --can be seen as the "temporal" counterpart of the "spatial" consideration of the system of pure reason in the Architectonic. In addition, some pre-critical writings that prepared the development of The Transcendental Doctrine of Method will also be considered in the course.

What does it mean to value something or someone? How do these appear valuable to us at all? And how would we know if we have the best values, a rightly ordered scale of values, or even if we are valuing in the right and best way? This course approaches questions like these through its two main aims: (i) to understand some basic terms and relations in the method of a phenomenology of values; (ii) to investigate critically matters, e.g., feelings, values, and the ordering and disordering of values broached by thinkers in this tradition. These two aims together will also prepare us to attend to and to analyze specific values phenomenologically for ourselves and, in so doing, to participate in an on-going conversation. Our main readings will be from Edmund Husserl's Introduction to Ethics (1920/1924), Max Scheler's Ressentiment, and from Bernard Lonergan's writings on the human good and feelings. We will also read shorter selections, including pieces from Franz Brentano, Dietrich von Hildebrand, and Edith Stein, as well as from contemporary thinkers, like Anthony Steinbock, Sara Heinmaa, and Patrick Byrne.

In this course we examine questions in epistemology, ethics and metaphysics using major works of Augustine (354-430 AD/CE), supplemented by works of contemporary philosophers on related themes (Kretzmann, Matthews, MacDonald, VanInwagen). We will aim at depth of understanding and breadth of knowledge, contextualizing Augustine as a philosopher of late antiquity in dialogue with the Hellenistic schools (Stoicism, Skepticism, Neo-Platonism) whose philosophy is still of interest today. Topics include the nature of faith, skepticism, the problem of evil, the nature of God, moral development and conversion, the origin and characteristics of the natural world, including the human soul and body.

PHIL666001
Foundations of Western Law
Kohler, Thomas C
Fall 2022
This seminar will place students into a conversation with some of the key thinkers who have shaped our modern Western legal traditions. In addition to Plato and Aristotle, the readings will be drawn from 17th, 18th, and 19th century English, French and German political philosophers. Themes include: how these authors influenced common and civil law systems; the relation among religion, law and morality and the problem of human knowing; the concepts of "law", "reason", "human nature" and the foundations of rights theory; the shift from the good to legitimacy; the rise of individualism and the problem of community.

PHIL667001
Technology and Culture
Griffith, William
Fall 2022
This interdisciplinary course will first investigate the social, political, psychological, ethical, and spiritual aspects of the Western cultural development with a special emphasis on scientific and technological metaphors and narratives. We will then focus on the contemporary world, examining the impact of our various technological creations on cultural directions, democratic process, the world of work, quality of life, and especially on the emergent meanings for the terms "citizen" and "ethics" in contemporary society. Students will explore technologies in four broad and interrelated domains: (1) computer, media, communications, and information technologies, (2) biotechnology, (3) globalization, and (4) environmental issues.

**PHIL722401**  
**Medieval Christian Mystical Philosophy: Eriugena, Eckhart, Cusanus**  
**Moran, Dermot**  
**Fall 2022**

In this course, I plan to read key texts in the Christian Neoplatonic mystical tradition, focusing in particular on Johannes Scottus Eriugena (c. 800-877), Meister Eckhart of Hochheim (1260-1328), and Nicholas of Cusa (1401-1464). The class will begin with readings from St. Augustine and Dionysius the Areopagite, the two most influential figures for medieval Christian Platonism. We shall then read sections of Eriugena's Periphyseon and Homily on the Prologue to St. John's Gospel, selections from Eckhart's sermons and tracts, and parts of Nicholas of Cusas's On Learned Ignorance and De li non aliud (On God as Not Other). The course will consider the Neoplatonic context, affirmative and negative theology, and the nature of the human being in the context of the dialectics of knowledge and ignorance, immanence, and transcendence.

PHIL740001
Philosophy and the Pedagogy of Service
Byrne, Patrick; McCoy, Marina B
Fall 2022
Graduate PULSE (3 credits per semester, two semester sequence): In this two-semester course, the student will learn both the theory and practice of teaching a Philosophy service-learning course. The student will attend an undergraduate section of PULSE, doing the same readings as the undergraduates and working in a service placement for four hours a week. The student will also attend a bi-weekly seminar with other graduate students in the course and the graduate PULSE instructor, doing readings in the pedagogy of service learning, philosophy of education, and related fields. In consultation with the section instructor, the student will also serve as a writing mentor to undergraduates in the class. Requirements will include short reflection and exploratory papers, similar to the undergraduates, and a final research paper each semester. The first semester will focus on philosophy of education and on the pedagogy of service-learning; the second semester will focus on applied philosophical issues raised by specific service placements, either in the ethics of engaged service work or on policy questions connected to the service. Enrollment requires the permission of the undergraduate section instructor, the instructor for the graduate course, and the Director of the PULSE Program.

PHIL782201
Pragmatism
Atkins, Richard
Fall 2022
From its beginnings in the 1870s to today, Pragmatism has exerted significant influence on philosophy, natural science, political and social thought, law, psychology, education, and economics. Generally, pragmatists maintain that we should eschew the task of providing a conceptual analysis of our ideas, instead focusing on how we use them and how we can elucidate our ideas in light of our practices and expectations. This seminar will involve a close study of the works of some essential pragmatist philosophers, especially Charles S. Peirce and William James and more recent pragmatists such as Richard Rorty and Cheryl Misak. The course will be focused on issues related to truth and inquiry, exploring how a broadly pragmatic account of truth and inquiry bears on issues in philosophy of language, metaphysics, ethics, and social and political philosophy.

PHIL885001
Medieval Theories of Mind and Cognition
Solere, Jean-Luc
Fall 2022
How and what do we perceive? How does one form concepts? Who is the thinking subject? What do we know? This class will offer the opportunity to examine central issues of medieval philosophy: sense perception, realism versus representationalism, nature of the intellect, abstraction process, semantics and concepts. Through the study of some landmark thinkers, such as Avicenna, Averroes, Aquinas, Scotus, Ockham, we will observe the apparition of the modern conceptions of the cognitive subject and of knowledge. The course is especially designed for giving graduate students a strong and in-depth presentation of an essential moment of the development of medieval thought.

Barrette, Andrew
Spring 2023
This course introduces students to philosophical reflection and to its history through the presentation and discussion of the writings of major thinkers from ancient, medieval, modern, and contemporary periods. The course is designed to show how fundamental and enduring questions about the universe and about human beings recur in different historical contexts. Emphasis is given to ethical themes, such as the nature of the human person, the foundation of human rights and corresponding responsibilities, and the problems of social justice.

PHIL108901
Person and Social Responsibility II
Troxell, Mary S
Spring 2023
Enrollment limited to freshmen, sophomores, and juniors The course requirements include ten to twelve hours per week of community service. In light of classic philosophical and theological texts, students in this course address the relationship of self and society, the nature of community, the mystery of suffering and the practical difficulties of developing a just society. PULSE students are challenged to investigate the insights offered by their readings in relationship to their service work. Places in the course are very limited.

PHIL 109101
Perspectives on Western Culture II / Perspectives II
Bloechl, Jeffrey
Spring 2023
Freshmen only The course introduces students to the Judeo-Christian Biblical texts and to the writings of such foundational thinkers as Plato, Aristotle, Augustine, Aquinas, Luther, Bacon, Descartes, Hobbes, Locke, Kant, Hegel, and Kierkegaard. The first semester considers the birth of the self-critical Greek philosophic spirit, the story of the people of Israel, the emergence of Christianity and Islam, and concludes with a consideration of medieval explorations of the relationship between faith and reason. Attention will also be paid to non-Western philosophical and theological sources.

PHIL116001
The Challenge of Justice
Snyder, Joshua R
Spring 2023
This course introduces the student to the principal understandings of justice that have developed in the Western philosophical and theological traditions. Care is taken to relate the theories to concrete, practical and political problems, and to develop good reasons for choosing one way of justice rather than another. The relationship of justice to the complementary notion of peace will also be examined. Special attention is paid to the contribution of Catholic theology in the contemporary public conversation about justice and peace. Problems discussed may include human rights, hunger and poverty, and ecological justice.

Credits: 3
Room and Schedule: Stokes Hall 217N TuTh 03:00PM-04:15PM
PHIL116002

PHIL172301
Faith, Ethics, and the Sciences in the 21st Century
Pope, Stephen J; Powell, Russell C; Vandewall, Holly R
Spring 2023
This is an Enduring Questions course and is open to FRESHMEN only. You must take THEO1723 with this course. The rise of modern science has raised and continues to raise a wide range of questions for both religious belief and religiously based morality. The sciences have made it clear that the cosmos is much older and much bigger that the pre-moderns had recognized. The sciences are often taken as challenging traditional views of religion, morality, and the world. Contemporary critics regard religion as either obsolete or a threat to humanity. Why have the modern sciences been taken to carry these implications and need they be taken in this way? Alternatively, can the sciences play a constructive role in how we think about faith, ethics, and human nature? Can contemporary believers fully accept the findings of science? If so, how might doing so influence how believers think about God and Gods relation to the world. This course will be team-taught by a philosopher and a theologian who have been researching the relationships between natural science and religious belief. We will explore the implications of modern physics and evolutionary biology for Jewish and Christian understandings of human origins, the good life, and ethical responsibility for ourselves, our communities, and our wider natural world.

PHIL172305
Faith, Ethics, and the Sciences in the 21st Century
Powell, Russell C
Spring 2023
This is an Enduring Questions course and is open to FRESHMEN only. You must take THEO1723 with this course. The rise of modern science has raised and continues to raise a wide range of questions for both religious belief and religiously based morality. The sciences have made it clear that the cosmos is much older and much bigger that the pre-moderns had recognized. The sciences are often taken as challenging traditional views of religion, morality, and the world. Contemporary critics regard religion as either obsolete or a threat to humanity. Why have the modern sciences been taken to carry these implications and need they be taken in this way? Alternatively, can the sciences play a constructive role in how we think about faith, ethics, and human nature? Can contemporary believers fully accept the findings of science? If so, how might doing so influence how believers think about God and Gods relation to the world. This course will be team-taught by a philosopher and a theologian who have been researching the relationships between natural science and religious belief. We will explore the implications of modern physics and evolutionary biology for Jewish and Christian understandings of human origins, the good life, and ethical responsibility for ourselves, our communities, and our wider natural world.

Mass Incarceration: Philosophical and Theological Perspectives
McCoy, Marina B
Spring 2023
This course will explore problems of justice in relation to incarceration in the United States with particular attention to attention to race, social class, gender, and immigration status. Students will read authors writing on the philosophy of race, gender, and class in relation to incarceration, the phenomenology of solitary confinement and the concept of "social death," church documents and theological works on incarceration, and works on restorative justice and other models of justice that serves the common good. Catholic Social Justice teachings and discussion will also be a part of the course. The course will also address interconnections between immigration and incarceration. This course will be offered as a PULSE elective, in which students undertake four hours per week of service in the City of Boston at institutions such as Suffolk Country Jail and non-profits that provide transitional services for returning residents or formerly incarcerated individuals or that advocate for prison reform. The PULSE office will vet and coordinate students' placements and serve as a liaison with community partners.

PHIL225901
Perspectives on War, Aggression, and Conflict Resolution I
Johnson, Spencer K
Spring 2023
The Faith, Peace, and Justice Program at Boston College sponsors this course as an introduction to the field of Peace Studies. This course asks: Is it ever ethical to go to war? Is it possible to be ethical in war? And, what does ethical conflict resolution look like? This course investigates these questions primarily using the resources of the Christian theological tradition and the social sciences, as well as engaging with philosophy and film. Special attention will be paid to issues in contemporary warfare and the challenges and promises of peacebuilding.

**Telling Truths II: Depth Writing as Service**  
**Rizzuto, Alexis A**  
**Spring 2023**  
This PULSE elective will focus on the power of story-telling to achieve justice and social liberation. We will read theoretical and narrative accounts of the role of story, examine the use of story-telling among marginal populations as a means of participating in their own solutions. We will explore the benefits and liabilities of social media in emerging change movements. Students will engage in story gathering, telling, and analysis, through their PULSE placements and class discussion, producing a collection of original writings. A four-hour per week (plus travel time) service commitment is a requirement for this course.

PHIL324001
Towards Deep Subjectivity: Architecture, Ethics, and the Personhood of Place
Braman, Brian J
Spring 2023
In *Genius Loci: A Phenomenology of Architecture* Christian Norberg-Schultz argues that if human beings are to dwell authentically under the sky and on the earth, the architecture's role is to provide an "existential foothold," which grounds people's relationship to their environment. "Man dwells when he can orientate himself with his environment and experiences it as meaningful" and thus ethical; to have an existential foothold allows one to "be" at home. To dwell means that human beings achieve an individual and communal identity--a personhood in a given place. The purpose of this course will be to explore the relationship between subjectivity, architecture, ethics, and the notion of personhood as authentic dwelling on the earth and under the sky.

The Ethics of Emerging Technologies  
**Hudson, Stephen A**  
**Spring 2023**

In this course, we will focus on how a philosophically informed interdisciplinary approach is needed for a more human centered ethical application of emerging technologies to address issues like global health, the environment, development, prosperity, and global peace. We will first briefly look at the ancient world and how technology was viewed and assessed using various ethical theories. We will then spend the majority of the course on the ethical debates surrounding emerging technologies such as genetic engineering, artificial intelligence, nanotechnology, life extension, virtual reality, etc.

PHIL400201
Love and Wisdom and Love of God
Bloechl, Jeffrey
Spring 2023
This course studies the relationship between philosophy and spirituality as it emerged in western European monasticism, and is modified by developments in modern and contemporary thought. We will read some texts on early monastic practices, Bonaventure's Journey of the Mind to God, and passages by Ignatius, Pascal, Edith Stein and Simone Weil. This course will include one week in a monastery, immersed in the hours of prayer and study. There will be a program fee of $400 for this course (spring 2023).

PHIL440201
How to Begin Thinking: Aftermaths of Twentieth-Century Literature, Philosophy, History
Newmark, Kevin
Spring 2023
Conducted in English: Undergraduate Elective. Cross listed with English and Philosophy. "Thinking," the French philosopher Emmanuel Levinas once suggested, "probably begins through traumatisms." This course will study a series of disruptive and transformative events that have indelibly marked the twentieth century. What is the task of thinking for a European tradition displaced internally by the Holocaust and externally by the end of colonial expansions into other continents? Authors will include Levinas, Derrida, Nancy, Saussure, Barthes, Duras (in English translation from French); Borges and Dorfman (in English and English translation from Spanish); Calvino (in English translation from Italian); and Descartes (in English translation from Latin). A German component (in English translation) will consider Husserl and Heidegger as a counterpoint to the European tradition of Romance languages, literatures, and cultures.

PHIL444301
What is Democracy?
Lott, Micah
Spring 2023
Etymologically, "democracy" means rule by the people, or people power. But what does it mean for the people to rule, or to have power? And what is so valuable about the people ruling, if anything? This course examines these questions, with a focus on contemporary political philosophy. We will look at issues like: deliberation, participation, political voice, and the relationship between capitalism and democracy. Throughout, we will consider democracy's connection to the social ideal of a "society of equals."

PHIL445401
Unheard Voices: Philosophy at the Crossroads of Identity
McGill, Cherie
Spring 2023
What is a just society? What responsibility does each of us have to contribute to a common good? This course starts from the idea that answering these questions requires hearing the voices of those typically unheard, and recognizing the interlocking systems that construct our world. We will attempt to hear voices typically not heard, identify the forces that converge to make voices heard or unheard, and understand the roles that each of us play as silenced and silencer. We will attempt to discern a way forward to a more just society--a way forward that begins from where we are.

**PHIL456501**

**Happiness and Utopia: Thinking about the Ideal Life**

Lott, Micah

Spring 2023
This course examines the notion of an ideal human life, understood as living well in ideal circumstances. This notion is at once familiar and puzzling. On the one hand, we all have some conception of living well - i.e., happiness, flourishing, the good life. And we recognize some circumstances as inimical to human flourishing, such as conditions of famine, poverty, oppression, and exploitation. Moreover, we seem to operate with some idea of good circumstances whenever we wish good fortune for our loved ones, or whenever we work to make our societies more supportive of human well-being. But on closer inspection, the notion of ideal circumstances raises a number of questions. What would human life look like in utopian conditions? Would humans still work and labor, or would we pass our lives entirely in leisure? Could our lives still have meaning and purpose, if there were nothing in our circumstances to struggle against? Would we still need virtues like courage and perseverance, with nothing to fear or overcome? And what about death: is it the ultimate non-ideal circumstance that might be overcome in some future utopia? This course considers such questions in relation to the notion of an ideal human life. We will read a range of philosophical texts, from Aristotle to Thomas More to contemporary thinkers. We will also examine film and works of imaginative literature by writers such as H.G. Wells.

**PHIL500501**

Medieval Philosophy

Kreeft, Peter J

Spring 2023
Far from being monolithic and repetitive, the Middle Ages were a creative period during which multiple solutions were tried to make sense of the world and of human life. The legacy of Antiquity, the philosophic and scientific knowledge of the time, and religious views were combined in original syntheses. The aim of the course is to provide a picture of this diversity, through a study of the main problems that a wide range of authors (Christian thinkers from St. Augustine to Ockham, but also Islamic and Jewish philosophers) faced. Medieval philosophy was an important step in the development of human thought. Discovering it will be essential to your philosophical education. This course will especially highlight the ideas, in metaphysics, theory of knowledge, and ethics, which medieval thinkers created and transmitted to modern philosophy. In addition, analysis of texts, debates, and writing assignments will help you to develop rigorous argumentation and expression skills. (NB: This course was previously offered as PHIL 4407; you cannot take it if you took PHIL 4407)

**Credits:** 3  
**Room and Schedule:** Stokes Hall 228N TuTh 01:30PM-02:45PM

PHIL500701  
Mahayana Buddhism: Thought and Practice  
Vale, Matthew  
Spring 2023
This course explores Mahayana Buddhist thought, meditation practice, narrative, and ritual practice across Asia. We consider texts ancient and modern. After a basic introduction to Buddhism, we take up topics ranging from meditation, to compassion, nirvana, emptiness, Buddha nature, Zen, and Mahayana Buddhist ethics. Our focus is on fundamental theological questions: What are the causes of suffering? How can meditation and ethical practices illuminate sufferings causes, and put an end to them? What is the state of unconditioned awareness, freedom, and joy that lies beyond suffering? Most importantly, what does this all have to do with me? No background in Buddhism is required.

PHIL524701  
Aquinas and the Classics  
Byers, Sarah C  
Spring 2023  
While it is commonly known that Aquinas was a product of the twelfth-century renaissance of classical thought when it comes to Aristotle, less attention is typically given to his use of Roman Hellenistic philosophy and Greek Neoplatonism. This course is devoted to analysis of how Aquinas developed key elements of his ethics and philosophical psychology, as well as some of his metaphysics, from Roman and Greek authors including Cicero, Seneca, Augustine, and Ps-Dionysius in addition to Aristotle.

**Credits:** 3

PHIL524901
British Empiricists
Davenport, Anne A
Spring 2023
Why are the British Empiricists both perplexing and indispensable? Do they deserve the odium that they often receive? How fundamental are they to our American identity? This course conducts an in-depth examination of John Locke, George Berkeley, and David Hume. We look at the entire spectrum of their concerns, from theories of the self to political science, ethics, and aesthetics. We tease out and discuss their views of the "good life." We probe their arguments critically and look at some of their followers and opponents in order to understand more fully the impact of their positions. We end with Rousseau's critique of British Empiricism.

PHIL550501
The Aristotelian Ethics
DeChiara-Quenzer, Deborah
Spring 2023
This course has recently been added for the fall. For students interested in Aristotle's Nicomachean Ethics, this course is for you! It consists of a close reading of the whole of the Nicomachean Ethics beginning with ethical virtue (Books II-IX) and ending with happiness (Books I and X). I have found that a student's understanding of Aristotle's ethical concepts is enhanced when he/she considers those concepts in relation to leading figures in Ancient Greek literature. Thus, occasionally we will discuss some of Homer's Iliad and Sophocles' Oedipus Tyrannus to consider how some of the following issues relate to Achilles, Hektor, Paris, Oedipus, and Jocasta. What does it means to have an ethical virtue (or vice), to engage in involuntary actions, to be responsible, courageous, good-tempered, truthful, temperate, continent, incontinent, and happy? Since the course will be run seminar style, students are expected to participate generously in classroom discussions.

PHIL552801
Skepticism, Stoicism, and Neo-Platonism
Byers, Sarah C
Spring 2023
Ancient philosophy is the period following Aristotle and stretching into the third century A.D., Hellenistic and Roman Philosophy. A number of philosophical schools flourished: Stoicism, Epicureanism, Skepticism, Middle-Platonism, Neo-Platonism. Some had sophisticated answers to questions in epistemology, ethics, and metaphysics: Does the human mind use mental language? Are we responsible for our thoughts? Is pleasure the goal of life? What kinds of emotions does the wise person have? Can Plato's account of the Forms be enriched by Aristotle's account of God? What is the metaphysical status of Socrates' "daimon"? The primary emphases of the course are Stoicism and the Platonisms.

PHIL553301
Capstone: Desire and Discernment
Muldoon, Timothy P
Spring 2023
Seniors only. Capstone classes may NOT be taken Pass/Fail. You may take only ONE Capstone class before graduation. First, the course will involve careful reflection on the sifting and pruning of desires. It will introduce philosophical reflection on desire from ancient Greece to modern philosophy, paying particular attention to the Ignatian tradition of discernment of spirits. Second, it will invite particular reflection on our relationships, and the desires that we have for the relationships we seek to cultivate over the course of our lives. Third, it will invite students to reflect on their experiences of work and preparation for a career, asking how their Boston College education has formed them. Fourth, we will reflect on our citizenship within communities: family, local community, society, nation, and world.

PHIL554901
Selected Readings in Phenomenology
Moran, Dermot
Spring 2023
This course offers a critical introduction to phenomenology, one of the most important movements of twentieth-century European philosophy, including its French existentialist development, and its critics. The major themes and movements in phenomenology and existentialism will be studied through several key thinkers: Franz Brentano, Edmund Husserl, Martin Heidegger, Edith Stein, Maurice Merleau-Ponty, Jean-Paul Sartre, Emmanuel Levinas. Themes that will be critically considered include: intentionality, phenomenological description, perception and embodiment, moods and emotions, self-consciousness, the nature of the self, sociality and the surrounding lifeworld. The course will have both a historical and a critical orientation with an emphasis on reading selected primary-source texts in English translation.

PHIL555301
Capstone: Poets, Philosophers, and Mapmakers
McNellis, Paul W, SJ
Spring 2023
We go through life with mental maps of reality in various degrees, implicit or explicit. A liberal arts education presupposes such a map of the intelligible world. Is it accurate? What does your map of reality look like? How has it changed since freshman year? The goal of the seminar is to help you see what kind of map you implicitly have now and to begin to ask what you want the map to look like ten years after graduation. How do you develop an open rather than closed map?

PHIL557701  
**Symbolic Logic: Theory and Practices**  
Atkins, Richard  
**Spring 2023**  
An introduction to the powerful ways the logical forms woven into deductive reasoning and language can be analyzed using abstract symbolic structures. The study of these structures is not only relevant for understanding effective reasoning, but also for exploring the Anglo-American analytic philosophical tradition and foundations of mathematics, computer science, and linguistics. Philosophically interesting properties about logical systems will be explored, including the task of proving whether a logical system is complete and consistent. A number of interesting topics of twentieth-century logic will be briefly considered, such as set theory, Russell's paradox, and Goedel's theorems.

PHIL625001
Hegel's Philosophy of Spirit
Magri, Elisa
Spring 2023
This course is dedicated to Hegel's philosophy of Geist, which is often translated in English as "spirit," "mind," or "collective cultural mindset." However, the full meaning of Geist in Hegel's philosophy comprises a more fine-grained and richer development of affective, psychological, and practical elements. Drawing on Hegel's Phenomenology of Spirit as well as on the sections on the Philosophy of Spirit of Hegel's Encyclopaedia, this course will explore the main philosophical questions that surround the dimension of Geist in both Hegel's philosophy and contemporary debates, including Hegel's departure from transcendental philosophy and the nature-spirit relation, the novelty of Hegel's philosophical anthropology, the problem of recognition, and the quest for absolute knowledge.

PHIL655501
Heidegger and Politics
Fried, Charles G
Spring 2023
This course will examine the connection between Heidegger's thought and politics, in his own work, in scholarly debates about the extent and meaning of this connection, and in relation to contemporary issues in global politics. We will begin with an intensive review of concepts and themes in *Being and Time*, especially those having to do with the historicity of community. We will then read key texts from Heidegger's period of political engagement, such as *Introduction to Metaphysics*, *Being and Truth*, his political speeches, and the Black Notebooks to analyze Heidegger's conception of the history of Being in its relation to politics and what he deems the metapolitical features of the Western traditions slide, starting with Plato, into metaphysics, nihilism, and the technicity of modernity. We will conclude with an examination of the debates over the meaning and legacy of Heidegger's political thought and what this can tell us about contemporary politics.

**PHIL661501**  
**Rationality and Religious Commitment**  
**McKAUGHAN, DANIEL J**  
**Spring 2023**  
An examination of cutting edge work in contemporary analytic philosophy of religion, organized around foundational questions about the nature, rationality, and value of religious faith. What is faith? Is faith adequately characterized as believing something without sufficient evidence? To what extent is faith compatible with doubt? Can faith be positively related to skepticism? How is faith related to belief, acceptance, trust, hope, and love? Can it be rational to have faith? If so, under what conditions? Can a deeper understanding of faith open up new ways of thinking about the relations between faith and reason or science and religion?

PHIL667001
Technology and Culture
Griffith, William
Spring 2023
This interdisciplinary course will first investigate the social, political, psychological, ethical, and spiritual aspects of the Western cultural development with a special emphasis on scientific and technological metaphors and narratives. We will then focus on the contemporary world, examining the impact of our various technological creations on cultural directions, democratic process, the world of work, quality of life, and especially on the emergent meanings for the terms "citizen" and "ethics" in contemporary society. Students will explore technologies in four broad and interrelated domains: (1) computer, media, communications, and information technologies, (2) biotechnology, (3) globalization, and (4) environmental issues.

PHIL740101
Philosophy and the Pedagogy of Service II
Byrne, Patrick; McCoy, Marina B
Spring 2023
Part II of Graduate PULSE (3 credits per semester, two semester sequence): In this two-semester course, the student will learn both the theory and practice of teaching a Philosophy service-learning course. The student will attend an undergraduate section of PULSE, doing the same readings as the undergraduates and working in a service placement for four hours a week. The student will also attend a bi-weekly seminar with other graduate students in the course and the graduate PULSE instructor, doing readings in the pedagogy of service learning, philosophy of education, and related fields. In consultation with the section instructor, the student will also serve as a writing mentor to undergraduates in the class. Requirements will include short reflection and exploratory papers, similar to the undergraduates, and a final research paper each semester. The first semester will focus on philosophy of education and on the pedagogy of service-learning; the second semester will focus on applied philosophical issues raised by specific service placements, either in the ethics of engaged service work or on policy questions connected to the service. Enrollment requires the permission of the undergraduate section instructor, the instructor for the graduate course, and the Director of the PULSE Program.

PHIL754301  
The Fundamental Concepts in Phenomenology: New Reflections  
Marion, Jean-luc  
Spring 2023
This course is being offered by the Philosophy Dept. visiting Gadamer Chair, Jean-Luc Marion. It will be offered for an abbreviated semester, from March 28-May 4. Many of the most significant phenomenologists have established a set of fundamental concepts, which remain in use up to the present. However, the more recent developments of the actual practice of phenomenology have modified or enriched many of these concepts. The intention of these seminars will be to check and update some of them, and to measure how far their new definition will open new issues. I propose to examine the following concepts:

(a) Reduction: its relation to epoche; singularity or plurality; the principles in phenomenology.
(b) Intentionality; objectivity, non-objectivity; noema; the core of the noema and the 'in itself' (an sich) of the phenomenon. Empty, common-law, and saturated phenomena.
(c) Reversed or counter-intentionality. The ego, the transcendental subject, Dasein, the hostage and the election, the addon.
(d) The object and the thing in itself.
(e) The face of the Other. Seeing and being seen.
(f) The possible and the impossible. The event. "Es gibt' and the radicality of givenness.

PHIL774201
Narrative and Interpretation
Kearney, Richard
Spring 2023
This course will explore the philosophical implications of narrative imagination and identity. It begins with Aristotle's analysis of mythos-mimesis in the *Poetics* and then focuses on a detailed discussion of Paul Ricoeur's *Time and Narrative* (vol. 1 and 3). Attention will be given to the interpretation of the principal genres of narrative: myth, chronicle, fable, history and fiction. We will discuss the critical implications of a hermeneutics of narrative for the interweaving of story and history, including the case histories of psychoanalysis; testimonial literature of holocaust and genocide; personal and political narratives of identity; and an ethics of oneself as another.

**PHIL775301**  
**Reading Jacques Derrida**  
**Newmark, Kevin**  
**Spring 2023**

This course will examine some of the fundamental ways that the work of Jacques Derrida has contributed to altering the context in which the humanities can be understood and studied within the modern university. It will take examples from Derrida's repeated interventions in such disciplines as literature, philosophy, theology, and history. By situating Derrida's work at the margins where accepted demarcations between the disciplines begin to blur, the course will suggest new possibilities for conducting interdisciplinary work in the future.

**Student Level:** Both
PHIL778801
Aristotle's Metaphysics
Wians, William R
Spring 2023
The course will be devoted to one of the rarest, most excellent, and most difficult philosophical texts ever written. Aristotle's *Metaphysics* presents a profound and profoundly influential answer to the question What is being? But even apart from his answer, the Philosopher reveals his greatness as a thinker by the way he approaches the question of being: what does the question pre-suppose? What does it imply for nature, knowledge and language? How can the question of being be answered when all we experience are individual beings?

PHYS210001
Introduction to Physics I (Calculus)
Engelbrecht, Jan
Summer 2022
PHYS2050 is the laboratory course to supplement the lecture course material. First semester of a two-semester calculus-based introduction to physics primarily for biology majors and premedical students. The development and application of classical physical principles are covered, and students are introduced to more advanced mathematical techniques to extend these applications. Emphasis is placed on problem-solving to better understand the implications of these principles, as well as to develop analytical skills. Topics include classical mechanics, including Newton's laws, energy, rotational motion, hydrostatics and fluid dynamics, oscillations, waves, and gravitation.

Credits: 4
Room and Schedule: MTuTh 04:00PM-07:30PM
Satisfies Core Requirement: Natural Science
Prerequisites: MATH1100 required. May be taken concurrently, or Permission of Department
Corequisites: None
PHYS210002

Physics Courses: Fall 2022

PHYS110001
Structure of the Universe I
Bedell, Kevin
Fall 2022
An introductory course directed at non-science majors. Physical principles are developed and applied to our space and astrophysical environment. Topics include structure and evolution of the solar system, physics of the sun and planets, space discoveries, creation and structure of stars and galaxies, relativity and cosmology, extraterrestrial life, and astronomical concepts.

PHYS140001
The Art of Physics
Herczynski, Andrzej
Fall 2022
This core course is a contemporary prologue to classical physics for students seeking to gain an appreciation of the ethos, scope, methods, and tools of physics, and to reflect on its place among the liberal arts. It explores major physics ideas and paradigms in a broader cultural context, providing historical perspectives from the early Greek astronomy through the scientific revolution. Simultaneously, the aim is to develop practical science skills, including the order-of-magnitude estimates, dimensional analysis, understanding of physics laws, and problem solving techniques. Interdisciplinary connections will be emphasized by inclusion of such topics as the concept of time and examples of applications of mathematics and physics to the visual arts. The course can serve as a preparation for, or a companion to more advanced physics classes.

**PHYS150001**  
**Foundations of Physics I**  
**Tafti, Fazel**  
**Fall 2022**  
Recommended laboratory (optional): PHYS2050-2051.. First semester of a two-semester algebra-based introductory physics course sequence, primarily for non-science majors, that covers the basic principles of physics. Emphasis is placed on problem-solving to demonstrate the implications of these principles, and to develop analytical skills. This course is similar to PHYS2100 in pace and content but with less emphasis on mathematical technique. First semester covers classical mechanics, including Newton's laws, energy, rotational motion, fluids, thermal physics, oscillations, waves, and gravitation.

**Credits:** 3  
**Room and Schedule:** Higgins Hall 310 TuTh 01:30PM-02:45PM

PHYS2050 is the laboratory course to supplement the lecture course material. First semester of a two-semester calculus-based introduction to physics primarily for biology majors and premedical students. The development and application of classical physical principles are covered, and students are introduced to more advanced mathematical techniques to extend these applications. Emphasis is placed on problem-solving to better understand the implications of these principles, as well as to develop analytical skills. Topics include classical mechanics, including Newton's laws, energy, rotational motion, hydrostatics and fluid dynamics, oscillations, waves, and gravitation.

Credits: 4
Room and Schedule: Higgins Hall 300 MWF 01:00PM-01:50PM
Satisfies Core Requirement: Natural Science
Prerequisites: MATH1100 required. May be taken concurrently, or Permission of Department
Corequisites: None
Cross-listed with: None
Frequency: Every Fall, Periodically in the Summer
Student Level: Undergraduate
Comments: None
Status: Offered

PHYS220001
Introductory Physics I (Calculus)
Auner, Alexander
Fall 2022
PHYS2050 is the laboratory course to supplement the lecture course material. First semester of a two-semester calculus-based introduction to physics for those majoring in the physical sciences. Students utilize analytical reasoning combined with mathematical formalism to fully explore the development, consequences and limitations of the classical principles of physics; similar to PHYS2100 in pace and content but at a greater depth appropriate for physical science majors. Class size is limited to promote classroom discussion. Topics cover classical mechanics, including Newton's laws, energy, rotational motion, oscillations, waves, and gravitation.

Credits: 4
Room and Schedule: Higgins Hall 263 Th 03:00PM-03:50PM; Higgins Hall 310 MWF 09:00AM-09:50AM
Satisfies Core Requirement: Natural Science
Prerequisites: MATH1102 required. May be taken concurrently.
Corequisites: None

PHYS310001
Vibrations and Waves
Burch, Kenneth S
Fall 2022
This course is an introduction to the phenomena of vibrations and waves that span most of the areas in physics. The basic subject matter includes the following: mechanical vibrations and waves, free and forced vibrations and resonances, coupled oscillations and normal modes, vibration of continuous systems, propagation of mechanical and electromagnetic waves, phase and group velocity, interference and diffraction. The course also covers the basic concepts in first and second order differential equations, matrices, eigenvalues and eigenvectors and Fourier series.

Credits: 4
Room and Schedule: Experiment instructions given Mondays 4-4:50 pm. Weekly sign up required for a two-hour slot to perform experiments.;Higgins Hall 225 TuTh 12:00 Noon-01:15PM;Higgins Hall 250 M 04:00PM-05:00PM

PHYS440001
Quantum Physics I
Engelbrecht, Jan
Fall 2022
First of a two-semester sequence providing a comprehensive treatment of the principles and applications of non-relativistic quantum mechanics. This semester focuses on basic principles. Topics covered include: historical development of quantum mechanics; the uncertainty principle; the Schrodinger equation and its solution for simple one-dimensional potentials, including constant potentials and the harmonic oscillator; formal presentation of the postulates of quantum mechanics using Dirac notation; commutation relations; basic scattering theory; formulation of Schrodinger equation in three-dimensions, central potentials, orbital angular momentum, and the hydrogen atom; spin angular momentum and the addition of angular momenta.

Credits: 3
Room and Schedule: Higgins Hall 263 MWF 01:00PM-01:50PM
PHYS451501
The Physics of Conventional and Alternative Energy
Opeil, Cyril P, SJ
Fall 2022
PHYS4416 is a three-credit, elective course designed for junior and senior Physics majors. The course consists of an overview of the entire field of energy, presented with attention to the mathematical, physical and economic principles needed to assess the feasibility and desirability of each source. It will also go into the most detail with respect to renewable sources, but there are also sections on nuclear power and fossil fuels. The course assumes an understanding of basic physics, and it strives to address energy problems on a mathematical level at the level of first year calculus.

PHYS454501
Condensed Matter Physics
Ma, Qiong
Fall 2022
Condensed matter physics concerns all aspects of the physics of "condensed" materials, that is, solids, liquids, gels, and plasma. It is the science behind many technologically-relevant applied and integrated science and engineering fields. This course primarily covers the solid state, starting with crystal lattices and their vibrations (phonons), and descriptions of crystalline metals, semiconductors, insulators, and superconductors. It covers in some detail the electrical, magnetic, optical, and thermal properties of materials, and introduces the student to noncrystalline solids and so-called "soft condensed matter."

**Credits:** 3

**PHYS460001**  
**Statistical Mechanics and Thermodynamics**  
**Auner, Alexander**  
**Fall 2022**  
The results of classical thermodynamics are deduced from a statistical basis, including the concepts of temperature and entropy, and the three laws of thermodynamics. Applications to ideal and real gases. Basic elements of statistical mechanics, including the canonical ensemble, partition function, equipartition theorem and Maxwell velocity distribution. Simple application of Maxwell-Boltzmann, Bose-Einstein, and Fermi-Dirac Statistic.

**Credits:** 4  
**Room and Schedule:** Higgins Hall 260 W 03:00PM-03:50PM; Higgins Hall 265 TuTh 10:30AM-11:45AM  
**Satisfies Core Requirement:** None

PHYS774101
Quantum Mechanics I
Wang, Ziqiang
Fall 2022
Introduction includes elements of the linear algebra in Dirac notation. Topics include postulates of quantum theory, simple problems in one dimension, classical limit, harmonic oscillator, Heisenberg uncertainty relations, systems with N-degree of freedom, symmetries, rotational invariance and angular momentum, hydrogen atom, and an introduction to spin. Also included is the path integration formulation of quantum theory.

Credits: 3
Room and Schedule: Higgins Hall 263 MW 09:00AM-10:50AM
Satisfies Core Requirement: None
Prerequisites: None
PHYS783501
Mathematical Physics I
Kempa, Krzysztof
Fall 2022
Matrix algebra, linear vector spaces, orthogonal functions and expansions, boundary value problems, introduction to Green's functions, complex variable theory, and applications.

Credits: 3
Room and Schedule: Higgins Hall 263 TuTh 10:30AM-11:45AM

PHYS875001
Particle Physics
Bakshi, Pradip M
Fall 2022
This graduate-level elective course is a survey of Particle Physics (Fundamental Particles and Interactions). The course will cover a brief history, the `Standard Model, unification of forces at high energy, role of Group Theory and Symmetries, Supersymmetry, experiments and machines, LHC and the Higgs Boson and future directions. A basic understanding of mechanics, quantum mechanics, electromagnetism, and special relativity is required.

Credits: 3

Physics Courses: Spring 2023
PHYS110101
Structure of the Universe II
Bedell, Kevin
Spring 2023
An introductory course directed at non-science majors. Physical principles are developed and applied to our space and astrophysical environment. Topics include structure and evolution of the solar system, physics of the sun and planets, space discoveries, creation and structure of stars and galaxies, relativity and cosmology, extraterrestrial life, and astronomical concepts.

Credits: 3
Room and Schedule: Higgins Hall 225 MWF 12:00 Noon-12:50PM
Satisfies Core Requirement: Natural Science

PHYS150101
Foundations of Physics II
Naughton, Michael J
Spring 2023
Recommended laboratory (optional): PHYS2050-2051.. Second semester of the two-semester algebra-based introductory physics course sequence primarily for non-science majors. This course is similar to PHYS2101 in pace and content but with less emphasis on mathematical technique. Topics to be covered are fundamentals of electrostatics, simple electrical circuits, magnetism, electromagnetism, electromagnetic oscillations and waves, physical optics, and, if time allows, basic concepts and applications of special relativity and quantum physics.

Credits: 3
Room and Schedule: Higgins Hall 310 TuTh 01:30PM-02:45PM
Satisfies Core Requirement: Natural Science
Prerequisites: None
Corequisites: None
Cross-listed with: None
Frequency: Every Spring
PHYS205101
Introductory Physics Laboratory II
Chandra, Malavika
Spring 2023
A laboratory course that provides an opportunity to perform experiments on topics in electricity and magnetism and physical optics. This lab is intended for students in PHYS2200-2201 or PHYS2100-2101.

Credits: 1

PHYS210101
Introduction to Physics II (Calculus)
Gallaba, G M Dinuka H
Spring 2023
PHYS2051 is the laboratory course to supplement the lecture course material. Second semester of a calculus-based introduction to physics primarily for biology majors and premedical students. The development and application of classical physical principles are covered, and students are introduced to more advanced mathematical techniques to extend these applications. Emphasis is placed on problem-solving to better understand the implications of these principles, as well as to develop analytical skills. Topics are electrostatics, electrical circuits, magnetism, electromagnetism and electromagnetic waves, topics in physical optics, and basic concepts of special relativity and quantum physics.

Credits: 4
Room and Schedule: Higgins Hall 300 MWF 09:00AM-09:50AM
Satisfies Core Requirement: Natural Science
Prerequisites: MATH1101 required. May be taken concurrently
Corequisites: None
Cross-listed with: None

PHYS220101
Introductory Physics II (Calculus)
Zeljkovic, Ilija
Spring 2023
PHYS2051 is the laboratory course to supplement the lecture course material. Second semester of a calculus-based introduction to physics for those majoring in the physical sciences. Students utilize analytical reasoning combined with mathematical formalism to fully explore the development, consequences and limitations of the classical principles of physics; similar to PHYS2212 in pace and content but at a greater depth appropriate for physical science majors. Class size is limited to promote classroom discussion. Topics include fundamentals of electrostatics, simple electrical circuits, magnetism, electromagnetism and electromagnetic oscillations and waves, and selected topics in physical optics.

PHYS330001
Introduction to Modern Physics
Wang, Ziqiang
Spring 2023
This course is a transition between introductory and advanced physics courses for science majors. The basic subject matter includes the two principal physical theories of the twentieth century--relativity and quantum mechanics. Included are the following: the Lorentz transformation, kinematic consequences of relativity, origin of the quantum theory, one-dimensional quantum mechanics, quantum mechanics of a particle in three dimensions, applications to the hydrogen atom and to more complex atoms, molecules, crystals, metals, and semiconductors.

**Credits:** 4

**Room and Schedule:** Experiment instructions Mon 4-4:50 pm Wkly sign up for 2 hr slot experiment; Higgins Hall 250 M 04:00PM-04:50PM; Higgins Hall 265 TuTh 12:00 Noon-01:15PM

PHYS420001

Electricity and Magnetism

Zhou, Brian B

Spring 2023

To provide students with the background in electricity and magnetism necessary to deal with experimental problems in electromagnetism. Part 1 will present the mathematical foundations for the entire treatment of electromagnetism. Part 2 deals with Coulomb's law and the electrostatics based on this law. Part 3 addresses stationary currents and magnetostatics. Part 4 deals with induction and quasi-stationary phenomena, self- and mutual-induction. Part 5 presents a treatment of Maxwell equations and the consequences of these equations, e.g., energy and momentum conservation, Plane waves, reflection, and refraction. Time permitting, we will discuss radiation from moving charges.

Experiments in Physics I

Opeil, Cyril P, SJ

Spring 2023

The course includes experiments in optics, solid state physics, nuclear physics, spectroscopy, x-ray, and electron diffraction. Students will carry out independent projects aimed at acquiring a sound understanding of both the physical principles involved in each subject area and of the principles and problems of modern experimental physics.

PHYS440101
Quantum Physics II
Chen, Xiao
Spring 2023
Second semester of the PHYS4407-4408 sequence, focusing on applications. Topics covered include: treatment of the many-particle systems, including effects of spin and symmetry of the wave function; many-electron atoms and the periodic table; basic elements of quantum statistics; approximation techniques, including non-degenerate and degenerate perturbation theory and the variational principle; time-dependent perturbation theory and the interaction of electromagnetic radiation with matter.

PHYS552001
Biophysics
Auner, Alexander
Spring 2023
Biophysics uses calculus and models, typical of the various disciplines of physics, to understand and solve problems in biology. This course will survey the major scales of biophysics problems including, but not limited to molecular-level diffusion and machines, cell-level fluorescence microscopy, tissue-level forces and fabrication, and systems-level bioelectronics (brain circuitry).

POLI106101
Introduction to American Politics
Skeen, Michael T
Summer 2022
For majors and non-majors. An overview of contemporary American government and politics focusing on how the institutions envisioned by the Framers of the Constitution (Congress, the judiciary, the executive) function today. Particular emphasis will be placed on how developments since the 1960s have affected the interaction of national, state, and local governmental actors, political participation, the articulation of interests, and policy formulation and implementation. Topics covered will include the media, public interest and advocacy organizations, campaign technologies and consultants, and public policy research institutes (think tanks). Whenever possible, comparisons between the U.S. and other advanced industrial democracies will be explored.

**Food, Power, and Politics**  
**Nakazato, Hiroshi**  
**Summer 2022**
This course will seek to provide an intellectual and analytical-driven framework around the question of food as an integral part of any human experience, but particularly our experience with food through across cultures. We each have a unique opportunity to understand better the role of food in each of our lives as we move through this summer program by examining our own cultural and political assumptions and those of others from a new point of view. We can appreciate the lenses brought by other individuals, cultures and places to the acts of eating and producing food. Finally, we can express the human experience of food in ways that represent our understandings, experiences and vision for a healthy, just and pleasurable relationship to food in ways that can be shared and appreciated by others. In eating and producing food, we exist simultaneously in a deeply personal and communal place, a place of the present, past and future in which we are never more and less than human.

**Islam, the Muslim World, and Democratic Politics**

**DiPasquale, David M**

**Summer 2022**

What is the relationship between Islam and democracy? Are human rights located in the Koran or some other, more human, source? Are the appeals to an Islamic government or "State" based on fact or fiction? How might we appeal to the sacred sources of Islam to promote attitudes of toleration, inclusion, and respect? These and similar questions will be considered throughout the semester. The purpose of this course will be to use the events related to the Arab Winter and continuing instability throughout the Muslim world as a springboard for a critical evaluation of the respective merits of the two forms of regime. No prior acquaintance with Islam or the Arabic language is necessary or required.

**Credits:** 3

**Room and Schedule:** On-line Asynchronous
Amid rising polarization in the United States and numerous civil wars abroad, terrorism and political violence are unfortunately common occurrences in all corners of the globe. How much do we really know about these forms of political violence? Are they inventions from the modern era, or do they have a deeper past? What drives an individual to join an armed group, or carry out an attack? Why do some groups choose to employ violence, while others do not? Are terrorism and political violence effective tactics? Just how significant is the threat of terrorism? Is the United States likely to face a rising wave of political violence as the country is increasingly torn by partisanship? This course will address these and other questions, while introducing students to relevant analytical frameworks, theories, and cases concerning terrorism, insurgency, and related forms of political violence. In addition to its topical focus, this course could rightly be called a methods course. Students in the class will learn how to improve their analytical thinking, conduct high quality research, and present an effective argument, both orally and in writing. They will learn the potential and pitfalls of theories of political violence through constant analysis and engagement with the history of terrorism and insurgency. By the conclusion of the course, students will emerge not only with a far richer understanding of these issues, but also as more sophisticated consumers, analysts, and producers of knowledge.

POLI104201
Introduction to Modern Politics
DiPasquale, David M
Fall 2022
For majors only. Restricted to freshmen and sophomores only.. This course examines the politics and government of modern states, identifying what is distinctively modern (e.g., representative government, political parties), including in the survey both democratic and non-democratic nations. We will consider the nation-state itself--the most typical modern political arrangement--as well as efforts to "transcend" the nation (e.g., the European Union, the United Nations). We will examine the kinds of public policies that modern states adapt, and consider their consequences. Although this is not a class in international politics, some attention will be paid to the relations among modern states, including war and its causes.

POLI105101
Flawed Founders: George Washington and the Mythology of a Heroic President
Landy, Marc
Fall 2022
This is an Enduring Questions course and is open to FRESHMEN only. You must take THEO1710 with this course. This course focuses on the accomplishments and flaws of a great founder: George Washington. It seeks to illumine his character and also to understand his role in the formation of the new American polity, regarding both its virtues and flaws. As the country's first president he led the effort to forge an enduring national government. How did he succeed so brilliantly in those efforts? Yet even as he was fighting for and presiding over a republic ostensibly dedicated to liberty and equality he abetted a system that perpetuated bondage and inequality. By the end of his life he controlled over 500 slaves. He bought, sold, and rented them. He was a full participant in a culture that subordinated women. This course will scrutinize Washington's public life--as general and politician; his private life--as slaveholder, husband and friend; and the complex interplay between his public and private personas. To better understand his thought processes and his presentation of self it will make extensive use of his speeches and letters as well as contemporary descriptions and assessments of him. The details of his life are most richly captured in Ron Chernow's biography of him, from which students will read. This scrutiny will also help to explain Washington's own role in creating the mythical status he has come to enjoy.

Landy, Marc
Fall 2022
This is an Enduring Questions course and is open to FRESHMEN only. You must take THEO1710 with this course. This course focuses on the accomplishments and flaws of a great founder: George Washington. It seeks to illumine his character and also to understand his role in the formation of the new American polity, regarding both its virtues and flaws. As the country's first president he led the effort to forge an enduring national government. How did he succeed so brilliantly in those efforts? Yet even as he was fighting for and presiding over a republic ostensibly dedicated to liberty and equality he abetted a system that perpetuated bondage and inequality. By the end of his life he controlled over 500 slaves. He bought, sold, and rented them. He was a full participant in a culture that subordinated women. This course will scrutinize Washington's public life--as general and politician; his private life--as slaveholder, husband and friend; and the complex interplay between his public and private personas. To better understand his thought processes and his presentation of self it will make extensive use of his speeches and letters as well as contemporary descriptions and assessments of him. The details of his life are most richly captured in Ron Chernow's biography of him, from which students will read. This scrutiny will also help to explain Washington's own role in creating the mythical status he has come to enjoy.

**Introduction to International Politics**

Crawford, Timothy W

Fall 2022
Course restricted to political science majors only. This course may NOT be taken by any International Studies majors or minors. Class restricted to political science freshmen and sophomores. This course examines the principle sources of the behavior of countries in international politics, including the nature of the international system and the decision-making process within states. It examines such issues as the sources of power, the causes and implications of the security dilemma, the dynamics of alliances, the causes of war, international political economy, and the dilemmas of world order. This course is strongly recommended for students who plan to take upper level international politics courses.

POLI109101  
**Introduction to Comparative Politics**  
McGraw, Sean D  
**Fall 2022**  
This course is open to majors and non-majors. This course is class restricted to freshmen and sophomores. This course provides an overview of the political science subfield of Comparative Politics. Comparative Politics is the study of domestic politics among the 200 plus countries around the world. The class introduces students to three features of Comparative Politics: (1) comparative research design and the comparative method; (2) major theoretical themes in comparative politics; and, (3) sampling of case studies comparing politics in selected countries of the world.

**Credits:** 3  
**Room and Schedule:** 245 Beacon Street Room 125A TuTh 12:00 Noon-01:15PM  
**Satisfies Core Requirement:** Social Science  
**Prerequisites:** None  
**Corequisites:** None  
**Cross-listed with:** None
For Political Science Majors only. This course is class restricted to juniors and seniors only. Graduate students are welcomed. Through a broad range of materials, Democracy & Art will explore the following questions: On what basis do we judge a work of art good or bad? Is artistic excellence an aristocratic value, or is there a democratic version? Does morality play a role? Are some art practices more democratic than others? Are artistic modernism and post-modernism anti-democratic? How does the ideologically based peoples art of authoritarianism compare with the commercialized popular culture of liberal democracy? What are the impacts, good and bad, of electronic and digital media on the arts?

This course is designed to acquaint students with the major features of American policymaking at the national level by engaging in primary research and extensive memo-writing on selected policy issues. Each student will be expected to become familiar with at least three policy areas, understanding existing government policies and underlying tradeoffs and paradoxes; proposing intellectually defensible and politically feasible reforms; and suggesting political strategies for enacting these reforms. Possible topics include social security, environmental regulations, federal aid and mandates for education, affirmative action, welfare, and the use of public lands.

POLI230901
The U.S. Congress
Hopkins, David A
Fall 2022
Americans are habitually fierce critics of Congress even as they like (and usually reelect) their own representatives. In this course, we try to explain this paradox by investigating the ways in which the structure and organization of Congress allows members to cultivate personal popularity despite rampant disapproval of the institution in which they serve. Among other topics, the course addresses the nomination and election of congressional candidates, the roles of congressional parties and leaders, and the influence over the legislative process of the committee system, rules and procedures, lobbyists and interest groups, and other branches of government.

U.S. Constitutional Development
Kersch, Kenneth I
Fall 2022
Restricted to sophomores, juniors, and seniors only. A survey of the development of American constitutionalism, considered historically as the product of legal, political, and intellectual currents and crises. Coverage includes the Founding, the Marshall and Taney eras, the slavery crisis, the rise of corporate capitalism, the emergence of the modern state, the Great Depression/New Deal, and new forms of rights and liberties. Topics include the growth of Supreme Court power, the Court's relation to the states and the other federal branches, and the influence on constitutional understandings of economic developments, reform movements, wars, party competition, and legal and political thought.

POLI241201
Political Parties, Voters and Party Systems in Comparative Perspective
Marcesse, Thibaud
Fall 2022
Do not take this course is you have taken POLI 2412 Political Institutions in the Age of Populism: Parties, Voters, and Elections This course offers an overview of political institutions such as political parties and elections as democracies face a populist challenge in areas as diverse as Western Europe, Latin America, and Asia. After reviewing the theoretical and historical foundations for party politics and party systems, the course will examine the ways in which political parties reach out to voters in countries with different institutional legacies, in industrialized countries as well as in post-colonial democracies in the Global South, whether through programmatic platforms or political quid pro quos (such as vote buying and patronage). The course will also explore the rise of contemporary populist politics and how this brand of politics challenges traditional party-voter linkages and contributes to the erosion of democratic norms.

POLI244001
A Continent on the Move: Immigration in Contemporary Europe
Molles, Elitsa V
Fall 2022
Why do people migrate? How do host states and societies react to an increasingly multicultural and diverse foreign population? What impacts the political, economic, and socio-cultural incorporation of Europe's immigrants? This course explores the central debates in immigration studies through a survey of contemporary Western Europe, with cases comprising immigrant populations in both traditional immigrant receivers (e.g., Moroccans in France or Turks in Germany) and "new" immigration countries (e.g., Africans and Latin Americans in Spain or Poles and Nigerians in Ireland). Middle Eastern refugees in Europe will be discussed throughout the semester. Particular emphasis is placed on how the relationship between the immigrant and the receiving state transforms both.

POLI244101
Comparative Politics of Development
Honig, Lauren
Fall 2022
This is a course about power, politics, and global development. Why are some countries rich and others poor? Why do some communities have few resources while their neighbors have plenty? To answer these questions, we will start by critically examining what development is and how it can be measured. Then we will examine theories linking politics to development. We will explore the effects of colonialism, geography, natural resource wealth, regime types, and foreign aid, among others. The readings from this course draw from political science, economics, anthropology, and history. During this semester we will examine both the deep roots of global inequality and engage with active policy debates about development.

POLI244201
African Politics
Honig, Lauren
Fall 2022
This course examines key questions and debates in the study of politics in Africa. Why and when is ethnicity salient in elections? If state boundaries in Africa are largely colonial creations, why are they so resilient? Why are some countries more prone to civil war? What is the relationship between elections and democracy? How do historical legacies impact contemporary politics? The goal of this course is to provide students with analytical tools to understand a number of questions that are of interest to contemporary politics in Africa. Using the methodologies of comparative politics, we will examine both broad cross-national patterns and focused case studies in this class.

**POLI251501**  
**The Politics of International Money and Finance**  
Kirshner, Jonathan D  
**Fall 2022**
The management of money is generally understood to be a highly complex and technical matter, and as a result, it is commonly argued, best left in the hands of dispassionate technocrats guided by the neutral logic of abstract economic theory. But money is always and everywhere a political phenomenon. When it comes to questions of money and finance, locally and globally, political factors and forces inevitably, inescapably, and fundamentally shape choices and determine outcomes. In this course we consider the political foundations of monetary matters, with a focus on topics including central banking, financial crises, the future of the dollar, the unique social meaning of money, the Euro crisis, and more.

POLI252301  
Intelligence and International Security  
Crawford, Timothy W  
Fall 2022  
This course examines the role of intelligence in international security. It provides an overview of the conceptual foundations of intelligence studies and the traditional dimensions of intelligence activity (clandestine collection, analysis, counterintelligence, and covert action). We will then examine classic cases of intelligence success and failure in times of war and peace. Finally, we will explore intelligence's role in today's most important international security challenges: WMD proliferation; the war on terrorism; peacekeeping and humanitarian intervention; and War Crimes prosecutions.

POLI254101
Global Governance
Erickson, Jennifer L
Fall 2022
How do states and other actors in the international community manage global challenges? What are the sources of order in international politics? In the absence of world government, questions about how international rules are made, monitored, and enforced are important and widespread. This course provides an overview of the concept and theories of global governance, with a focus on power, institutions, and norms in contemporary international relations. It then examines the processes, actors, and outcomes of global governance in the context of policy areas such as human rights, fragile states, the global economy, and the environment.

POLI340601
Irish Politics 1916 to Present
McGraw, Sean D
Fall 2022
Class restricted to sophomores, juniors, and seniors. Ireland, a country rich in history, has undergone dramatic changes in the twentieth century beginning with its fight for independence and culminating in its meteoric rise during the Celtic Tiger years. What explains Ireland's distinctive political trajectory and how does it compare to other European nations? How should we understand the Celtic Tiger, the rapid series of social, economic and political transformations that have occurred within Ireland since the 1990s? This course explores these questions by studying the political actors and institutional settings of Irish politics, the nature of political influence and the shaping of political priorities, and the forces that shape policy outcomes. It will address such critical issues as the legacies of colonialism and civil war, nationalism, democratization, the relationship between the Church and State, the Northern Ireland Troubles and the European Union. While the course focuses on the Republic of Ireland, it will adopt a broad comparative perspective, situating the country both within the wider global context and within the political science literature.

**Rising Powers and Power Transitions in Theory and History**

**Ross, Robert S**

**Fall 2022**

This course is restricted to juniors and seniors. This seminar offers multiple analytical perspectives on rising powers/power transitions as a cause of war among the great powers in international politics. It considers the role of power transitions/rising powers as a particular source of great power war, as well as other sources of war that may affect the likelihood of a power transition war. It examines these issues from both theoretical perspectives and through analysis of significant cases studies of power transitions. It concludes with an effort to understand the implications of the rise of China and the U.S.-China power transition from both theoretical and historical perspectives.

International Law
Nakazato, Hiroshi
Fall 2022
This course examines the role of international public law (the "law of nations") in the world today. It takes as its starting point the academic (and practical) debate about the utility of international law in world politics. From there, we consider the philosophical foundations of law, the sources of international law, and the application of international law in different arenas. In particular, the course will focus on how international law deals with a number of issues, including the connection between domestic and international law and the laws on territory, jurisdiction, human rights, and security, as well as other relevant topics.

POLI439001  
**Immigration: Processes, Politics, and Policies**  
Skerry, Peter N  
**Fall 2022**  
Restricted to juniors, seniors, and graduate students only. Not open to students who have previously taken POLI2330. This course will examine immigration as a social as well as an economic process, with particular attention to its political and policy dimensions. Special attention will be paid to the interaction between immigrants and contemporary American institutions, and to how the contemporary context differs from earlier periods in our history. The various dimensions (social, cultural, economic, and political) of assimilation will be examined. Particular emphasis will be placed on undocumented immigration as well as the group competition and conflict engendered by immigration generally. The course willculminate in an examination of policy responses to the continuing controversy over immigration.

POLI459001
East Asian Security
Ross, Robert S
Fall 2022
This course is class restricted to juniors, seniors, and graduate students only. This class offers an analytical perspective on the strategic conditions of post-Cold War East Asia. It examines the regional political structure, the strategic characteristics of the region's great power relationship--U.S.-China relations and the rise of China--and the implications of great power relations for the conflicts on the Korean peninsula, in the Taiwan Strait, and in the South China Sea, and the role of alliance relationships in regional diplomacy. From these different perspectives, the class seeks an understanding of the sources of state behavior in East Asia and the prospects for regional stability and instability.

POLI493101
Honors Seminar
Schlozman, Kay L
Fall 2022
Honors Seminar: Inequality and Politics. In this course, we will seek to understand the relevance of inequality for politics in America, where Tocqueville long ago noted an egalitarian commitment. We will consider the nature and dimensions of inequalities in society; the contrast between the formal political equality that inheres in citizenship and actual inequalities of political influence; and the nature and impact of public policies that enhance or diminish political, economic, and social inequalities.

POLI723101
Research Methods in Political Science
Hopkins, David A
Fall 2022
This graduate course is a non-subfield elective course. This course provides an introduction to the practice of empirical research in political science. It addresses a variety of prominent methodological approaches, including experimental and quasi-experimental designs, field studies, interviews, content analysis, survey research, and aggregate data analysis. We will also consider relative strengths, tradeoffs, and syntheses of qualitative and quantitative methods. The course aims to equip students both to conduct original research and to evaluate the work of others.

POLI772001
American National Institutions in a Mature Welfare State
Melnick, Rowell S
Fall 2022
This seminar focuses on (1) how our peculiar political institutions have shaped the American welfare state, and (2) how the expansion and maturation of the welfare state has changed American politics. Topics include partisan polarization and the persistence of divided government; the centralization of power within Congress and its preoccupation with budget matters; the paradox of growing administrative power and vulnerability; the entrenchment of "adversarial legalism"; the incentives for presidents to go around rather than through Congress; mobilization and counter-mobilization by interest groups; and efforts by state governments to create national policies.

Room and Schedule: Mcguinn Hall 226A W 04:30PM-07:00PM
POLI772901
American Political Development II
Landy, Marc
Fall 2022
This seminar is look at the course of American history from the Progressive Era through to the present day. Its axiom is that contemporary politics cannot be adequately understand without understanding its philosophical and historical underpinnings nor without examining the critical political conflicts and institutional developments that have occurred. Readings consist of original documents and secondary works by historians and political scientists.

POLI780301
Field Seminar in Comparative Politics
Marcesse, Thibaud
Fall 2022
This course provides a graduate-level survey of the field of comparative politics, introducing students to classic works as well as recent contributions that build upon those works. Readings will draw from leading theoretical approaches—including structural, institutional, rational choice, and cultural perspectives—and cover a broad range of substantive topics, such as democratization, authoritarianism, states and civil society, political economy, and political participation and representation.

POLI780701
Field Seminar in International Relations
Erickson, Jennifer L
Fall 2022
This seminar provides an overview of the field of international relations. It has four main goals: (1) to understanding the dominant theoretical perspectives and debates within the field; (2) to evaluate the strengths and weaknesses of contrasting arguments within those debates; (3) to ground empirical interests within the context of these broader theoretical issues; and (4) to provide a theoretical foundation for academic research and teaching in international relations. As a whole, the course is intended to provide theoretical and conceptual tools for the academic study of international relations.

POLI790701
Hegel's Phenomenology of Spirit
Wilford, Paul T
Fall 2022
The class will undertake a close reading of Hegel's Phenomenology of Spirit. The course will focus especially on the political and religious dimensions on the Phenomenology and how the relation between these two fundamental human interests shapes the desire of consciousness to be at home in the world. Ultimately, we will try to understand Hegel's audacious claim to have brought philosophy “nearer to the form of science, to where it can lay aside the title ‘love of knowing’ and be actual knowing.”

Political Sciences Courses: Spring 2023

POLI104101
Fundamental Concepts of Politics
Hetzner, Candace
Spring 2023
Restricted to freshmen and sophomores only. This is an introduction to the study of politics through a consideration of some of the basic elements associated with governing: the political association, justice, constitutions, equality, liberty, conflict among citizens and between citizens and governments, conflict among governments. Each of the course instructors uses a different set of readings, drawing on a mix of political philosophy texts, works on international politics, novels, biographies. Emphasis is on interesting and important readings, discussion, and writing. NOTE: for academic-year students, this course is major restricted.

POLI104201
Introduction to Modern Politics
Behnegar, Alice P
Spring 2023
For majors only. Restricted to freshmen and sophomores only. This course examines the politics and government of modern states, identifying what is distinctively modern (e.g., representative government, political parties), including in the survey both democratic and non-democratic nations. We will consider the nation-state itself—the most typical modern political arrangement—as well as efforts to “transcend” the nation (e.g., the European Union, the United Nations). We will examine the kinds of public policies that modern states adapt, and consider their consequences. Although this is not a class in international politics, some attention will be paid to the relations among modern states, including war and its causes.

This course examines the politics and government of modern states, identifying what is distinctively modern (e.g., representative government, political parties), including in the survey both democratic and non-democratic nations. We will consider the nation-state itself—the most typical modern political arrangement—as well as efforts to "transcend" the nation (e.g., the European Union, the United Nations). We will examine the kinds of public policies that modern states adapt, and consider their consequences. Although this is not a class in international politics, some attention will be paid to the relations among modern states, including war and its causes.

Introduction to American Politics
Skerry, Peter N
Spring 2023
For majors and non-majors. An overview of contemporary American government and politics focusing on how the institutions envisioned by the Framers of the Constitution (Congress, the judiciary, the executive) function today. Particular emphasis will be placed on how developments since the 1960s have affected the interaction of national, state, and local governmental actors, political participation, the articulation of interests, and policy formulation and implementation. Topics covered will include the media, public interest and advocacy organizations, campaign technologies and consultants, and public policy research institutes (think tanks). Whenever possible, comparisons between the U.S. and other advanced industrial democracies will be explored.

**POLI123301**  
**Hobbes and Christianity**  
**Nakazato, Hiroshi**  
**Spring 2023**  
Hobbes and Christianity is an inquiry into a period of time when religion really mattered in politics. At the start of the seventeenth century, bloody wars were fought across Europe over religious grounds. At the end of the century, other reasons for wars existed, but monarchs and people largely stopped going to war over differences in religious doctrine. Instead, new identities, built on ideas like nationalism, would be the grounds for future conflict. This course puts Hobbes's thinking in historical context, in order to understand the whole argument of Leviathan, and not simply the excerpts from chapters 13 and 17 that are supposed to summarize his political thought.

The Cost of Free Speech
Bayles, Martha
Spring 2023
This course is a non-subfield elective course for Political Science majors only. This course is class-restricted to juniors and seniors only. Graduate students are welcomed. “The Cost of Freedom” will focus on the challenge of preserving the liberal ideal of free speech in a world where democratic governments seem paralyzed by political and cultural polarization; powerful tech companies have become reluctant censors; authoritarian regimes deploy artificial intelligence and "the internet of things" for surveillance, censorship, and propaganda; and many failing democracies and would-be authoritarian regimes seem poised to do the same. The goal is to help you situate the classic debate over free speech in both the broader historical context and the contemporary landscape.

Introduction to Data Science
Krupenkin, Maria T
Spring 2023
Do YOU want to be the next Nate Silver? Data science has transformed many of the ways we engage with politics, from sophisticated voter turnout operations to the ubiquity of data journalism. This course will introduce students to the basic techniques of data science including data visualization, hypothesis testing, and simple linear regression. Students will learn how to use the R statistical software to analyze political data. This is an introductory class; no math or statistics background is necessary.

POLI230501
American Federalism
Landy, Marc
Spring 2023
This course will examine the constitutional foundation, the historical development, and the contemporary character of American Federalism. It will explore the tension between centralization and decentralization as that tension has influenced the course of American politics, government, and contemporary policy debate. Local government is a crucial element of the intergovernmental system and therefore the course encompasses it. In recent years, city government emerged as the most creative and effective aspect of American government, the course explores how and why this has occurred. It examines a variety of aspects of contemporary urban policy innovation as well as the development of city politics.

This course analyzes the contemporary presidency with special attention to its constitutional underpinnings and its political evolution. It traces the critical changes and continuities in presidential politics, institutional development, court rulings and statesmanship that have taken place over time. Its focus is presidential leadership and therefore it dwells on the most significant occasions during which great presidential leadership has been exercised and on the men who exercised it. We will pay close attention to current developments.

POLI233401  
Political Behavior and Participation  
Hopkins, David A  
Spring 2023  
How do citizens form opinions about politics, and how do these attitudes influence their participation in political life? This course addresses these questions by surveying the most prominent sources of influence on the political orientations of individuals, including personality effects, socialization, interpersonal dynamics, cognitive biases, and the news media. We then apply these findings to the most common forms of political behavior, including party affiliation, electoral participation, activism, and protest, aiming to explain why different citizens support different political candidates and causes—as well as why some members of the public engage extensively in political activity while others remain uninvolved.

Conflict and Polarization in American Politics
Hopkins, David A
Spring 2023
It was once common for observers to note--and sometimes bemoan--the relative lack of partisan and ideological polarization in American politics, yet many now believe that Americans have become too politically divided. This course examines the nature of political differences in the public, explaining how distinctions of race, sex, social class, religion, ideology, and issue positions are associated with differing choices at the ballot box. We will consider whether the strong ideological conflict now evident in elite institutions reflects similar divisions among citizens, and investigate whether the United States has in fact split into "red" and "blue" partisan territory.

American Political Thought II
Kersch, Kenneth I
Spring 2023
Class restricted to sophomores, juniors, and seniors. This course surveys the history of American political thought since the Civil War, with an emphasis on both recurring themes (such as liberal individualism and religiosity) and resurgent conflicts (such as over the scope of government power, and the meaning of democracy and political equality). Topics include Populism, Progressivism, feminism, Social Darwinism, the Social Gospel, New Deal/Great Society liberalism, civil rights, the Beat Generation, Black Power, the student revolts of the 1960s, the sexual revolution of the 1970s, and the 1980s conservative ascendancy.

POLI240401  
**Populism and the Rise of Anti-Democracy**  
FitzGibbon, John E  
**Spring 2023**  
This course explores the emergence of Populist political movements around the globe and the increased challenge to democracy more generally. While the late 20th century was characterized by the triumph of democracy over alternative forms of government, democracy is facing both new and old challenges around the world. The course investigates the nature of these challenges, what are they, who leads them, and most critically why are they emerging now? Together we will seek to answer these questions so that we can better understand what is happening around the world with politics right now.

**Room and Schedule:** Gasson Hall 204 MW 04:30PM-05:45PM
POLI240501
Comparative Politics of the Middle East
Bailey, Kathleen T
Spring 2023
The course explores origins of Muslim majority societies and political systems in the Middle East. It covers the formative era of Islamic civilization, and traces the diffusion of the Middle Eastern Islamic paradigm, culminating in the Ottoman system, and explores the social and political disruptions caused by the breakup of Muslim empires and establishment of European economic, political and cultural domination. It addresses how these forces led to the creation of national states and changes in class structure, and explores how the failure of Western forms of modernization and political organization led to demands for the formation of new political communities based on the revival of Islamic principles. Discussions will center Islam's compatibility with liberalism, secularization, modernity, democracy, and terrorism. Recent developments surrounding the "Arab Spring" and its aftermath will be explored. The course includes a crisis simulation exercise.

Radical Political Economy: From Marx to Anti-Globalization
Christensen, Paul T
Spring 2023
This course examines the work of radical thinkers from Marx to contemporary critics of globalization. The course examines Marx's theory of history and his writings on capitalist economics and politics. It explores the evolution of radical thinking on issues such as the state; the role of class in contemporary societies, particularly in relation to issues of gender, ethnicity, and religion as bases for identity and power; and prospects for progressive social transformation. We conclude with a critical examination of theories imperialism and globalization, and what they imply for the future of societies at different stages of development.

POLI244001
A Continent on the Move: Immigration in Contemporary Europe
Molles, Elitsa V
Spring 2023
Why do people migrate? How do host states and societies react to an increasingly multicultural and diverse foreign population? What impacts the political, economic, and socio-cultural incorporation of Europe's immigrants? This course explores the central debates in immigration studies through a survey of contemporary Western Europe, with cases comprising immigrant populations in both traditional immigrant receivers (e.g., Moroccans in France or Turks in Germany) and "new" immigration countries (e.g., Africans and Latin Americans in Spain or Poles and Nigerians in Ireland). Middle Eastern refugees in Europe will be discussed throughout the semester. Particular emphasis is placed on how the relationship between the immigrant and the receiving state transforms both.

POLI244601
Natural Resource Politics
Honig, Lauren
Spring 2023
This course investigates the relationship between natural resources and politics, with an emphasis on developing countries. Key questions include: When and why does wealth in natural resources lead to negative outcomes for governance, democracy, and development? How should scarce resources such as good land and clean water be managed? When does competition over resources devolve into conflict? Is there something special about diamonds? In examining these questions (and others), we will seek to understand how these issues are conditioned by policies and political institutions.

POLI253101
Politics of Energy and Climate in the U.S. and International Perspective
Deese, David A
Spring 2023
Why is energy and climate policy fundamentally political, deeply entwined with human, national, and international security, and critical to global stability and well-being? Major course units assess the main actors and institutions in energy; including OPEC and international markets; contrast the primary challenges confronting energy policy in the exporting and importing states; evaluate the implications of climate disruption and the solutions across the sixty largest greenhouse gas emitting states; and analyze how energy and climate politics shapes global security and sustainability. Class members will also conduct a global climate negotiation and study in depth the regional security and political economy of the (Persian) Gulf states.

This course will examine the political and philosophical implications of architectural design and civic planning. From the time of Socrates, philosophers have paid careful attention to the manner in which the principles of political philosophy could be realized in physical form. The course will offer students an introduction to the history of Western architectural theory, with special emphasis on the manner in which a specific type of regime (democratic, fascist, communist, and monarchic, for example) sought to embody its standard of justice in buildings and the manipulation of space. We will trace the reasoning behind the sometimes radical transformation of the world around us by reviewing and analyzing key texts (and buildings, when applicable) from important artistic and intellectual figures, such as: Frank Lloyd Wright, Claude-Nicolas Ledoux, Adolf Loos, Rem Koolhaas, Jane Jacobs, Le Corbusier, Robert Venturi, plus contemporary works by prominent female architects. Epochal architectural movements like The International Style, Neoclassicism, Postmodernism, and Brutalism will be introduced to help us understand the built environment (and therefore ourselves) a little better. Spanning centuries, the course will also bring matters much closer to home by asking each student to present as a final project one design meant to improve the Boston College campus. Class sessions will include film and additional visual media. Field trips to the Frederick Law Olmsted home office in Brookline and (if possible) the Gropius House in Lincoln will be scheduled.

POLI330001  
**Seminar: Diversity Debates**  
**Melnick, Rowell S**  
**Spring 2023**  
This seminar course is class-restricted to sophomores, juniors, and seniors. "Anti-racism," "white fragility," "critical race theory," "microaggressions," "intersectionality," "implicit bias," "white supremacy": these terms and concepts lie at the heart of current debates over race. Many of these ideas are taught in high schools, colleges, employee training sessions, and (in watered down form) even elementary schools. They are frequently attacked in the political realm, and increasingly subject to critique within academia. The purpose of this course is to familiarize students with both the best works explaining and defending these important ideas, and the most cogent criticisms of them. This is above all a discussion course that requires students to take part in debates, sometimes defending positions with which they agree and sometimes required to defend positions with which they disagree. For each of the topics we cover, students will be expected to answer the key question: which side has the strongest arguments?

**Credits:** 3

Muslims in American Society and Politics
Skerry, Peter N
Spring 2023
Do not take this course if you have previously taken POLI2363. This course is restricted to sophomores, juniors, seniors, and graduate students. An examination of the demographic, social, cultural, religious, and political forces that are shaping the emergent American Muslim community. Intergenerational family dynamics, Muslim schools, mosque governance, civil religion in America, advocacy group politics, and voting patterns will be examined. So will ethnic, linguistic, national-origin, and sectarian differences among immigrant-origin Muslims, particularly their political implications. African-American Muslims will also be considered, especially their relations with immigrant-origin Muslims. Attention will be paid both to the impact of Muslims on American society and to the impact of American institutions and policies, especially post-9/11 initiatives such as the Patriot Act, on Muslims.

POLI469101

**Philosophies of Plato and Aristotle**

DiPasquale, David M

**Spring 2023**

This course will consider the main Platonic and Aristotelian philosophical traditions that arose during the centuries following the death of Aristotle and before the dawn of modernity. One of its purposes will be to assess better the oft-repeated claim that Machiavelli and his philosophical heirs "broke" decisively with the Ancients, thereby paving the way for a new definition of philosophy purged of the deficiencies of (especially) Aristotle and his metaphysics. Whose Aristotle was the object of this purported refutation? Which of the many Platos and Platonisms? How did the reigning monotheisms of the age pervert or otherwise obscure an authentic Platonic or Aristotelian science? We will, throughout the semester, attempt to answer such questions by considering the Aristotelian commentary tradition, Middle- and Neo-Platonism, as well as the Islamic philosophical inheritance. Texts will include Philoponus, *Against Aristotle on the Eternity of the World*; Alcinous, *The Handbook of Platonism*; Plotinus, *The Enneads*; Averroes, *Commentary on Plato's Republic*; and Alfarabi's *Philosophy of Plato and Aristotle*.

The subject of this seminar is the founding of the United States, but the seminar's focus is political thought, not constitutional development as such. The revolutionary and constitutional debates displayed a notable sensitivity to, and interest in, questions of a philosophical nature. We will explore these ideas by beginning at the beginning, with the early colonies and the political debates their governments inspired, taking as our cue Tocqueville's claim that it was the Puritans who founded America. We will then examine the debates around the Revolution, the Constitutional Convention, and the Federalist/Anti-Federalist debates which the Constitution inspired.

The populist wave in American politics highlights the limitations of approaches focusing on formal organizations and government bureaucracies, particularly at the national level. As "political realists" such as Galston, Yack, and Honig note, informal and emergent social bonds and cultural forces also demand attention. Others emphasize the causal priority of ideas. This debate will be engaged by examining the social and cultural dimensions of politics. Topics to be considered will include: informal, pre-political social formations such as families and neighborhoods; non-economic aspects of corruption; community institutions such as churches, synagogues, and mosques; labor unions; and Alinsky community organizations. So will social and political movements such as the Tea Party and other manifestations of populism. These will be examined in the context of a regime improbably characterized by both identity politics and expertise.

POLI780001
Advanced Directed Study
Easter, Gerald M
Spring 2023
Advanced Directed Study is a final paper project for eligible second year Master's students. It is a focused and substantial paper, written under the guidance and approval of a supervising faculty member. The project is intended to cultivate expertise in a subject in which the student has formed an interest and has already done some work in. Examples include: further development of a paper from a previous seminar with a case study, primary sources or original research; an extended critical literature review; or, a delegated project in cooperation with a supervising professor's own research.

POLI781701
The Political Economy of Development
Honig, Lauren
Spring 2023
This is a graduate-level seminar on the political economy of development. There are two primary goals of this seminar. First, for students to develop a thorough understanding of the key debates within the field. We will examine theoretical explanations for development, including the impacts of colonial legacies, institutions, the state, geography, natural resources, distributional conflicts, and inequality. Second, this course will train students to evaluate arguments, towards the goal of generating their own. This includes attention to the methods of comparative politics and the use of empirical evidence.

POLI782501  
**Security Studies**  
**Crawford, Timothy W**  
**Spring 2023**

This course is restricted to Political Science graduate students. Political Science Honors students may take this course with permission of the instructor. This seminar covers major concepts, theories, and research programs in the field of security studies: the concepts of national security and interests, strategy, and grand strategy; morality and war; civil-military relations; the security dilemma and offense-defense theory; alliance politics and collective security; arms races and arms control; nuclear strategy; coercive diplomacy; proliferation and counter-proliferation; and terrorism and counter-terrorism. In addition to reviewing key theoretical works on these subjects, we will examine important empirical cases from the Cold War and recent international crises.

**Credits:** 3  
**Room and Schedule:** Mcguinn Hall 226A W 09:00AM-11:30AM  
**Satisfies Core Requirement:** None  
**Prerequisites:** None  
**Corequisites:** None
Undergraduates allowed by permission of the instructor. An intensive survey of the moral and political philosophy of Adam Smith. Primary focus on his two published texts, The Theory of Moral Sentiments and the Wealth of Nations, with some additional consideration of the roles played in his larger system his lectures on rhetoric and jurisprudence and his essays on scientific inquiry. Specific concepts to be examined will include the key concepts of Smith's moral theory (esp. his concepts of sympathy, spectatorship, virtue, perfection and corruption), the key concepts of his political theory (esp. his concepts of authority, law, and the state and its responsibilities), and the key concepts of his economic thought (esp. the benefits and effects of the division of labor, free trade, and economic planning).

**POLI791701**  
**Kant on Religion and Politics**  
**Shell, Susan**  
**Spring 2023**  
In Plato's Euthyphro Socrates famously asks whether actions are wrong because the gods forbid them or whether rather the gods forbid those actions because they are wrong. Kant takes up this question anew in ways that contribute to, but might also help relieve, the crisis besetting liberal democracies today across the Western world. We will read several of Kant's seminal political and religious works in order to better grasp both the meaning of that question and the answers that he offers.

PSYC227201
Cognitive Psychology: Mental Processes and their Neural Substrates
MacEvoy, Sean P  
Summer 2022  
This course introduces the scientific study of mental function from an information processing perspective. The course examines how information is processed and transformed by the mind to control complex human behavior. Specific topics include the history of cognitive psychology, cognitive neuroscience, attention, perception, consciousness, short-term and long-term memory, mental imagery, language, decision-making, and problem solving. Course material will be drawn from work with clinical populations (e.g., people who have sustained brain injury) as well as from work with non-injured populations. Class sessions will be devoted to lecture, discussion, demonstrations, and (if practical) student presentations.

How Children Learn
Hildebrand, Lindsey M
Summer 2022
Childhood represents a critical period in which learning provides the building blocks for the future. But how do children learn and what factors influence these processes? This course will examine the specific ways in which children learn about themselves, others, and the world around them. Topics include learning of concepts such as: stereotypes, academic skills, and interacting with others. In examining children's learning, we will consider the influence of social, emotional, cultural, and biological factors.

**Research Practicum in Child and Adolescent Clinical Psychology**

**Schneider, Barry H**

**Summer 2022**  

This practicum focuses on research inspired by the assumption that faulty interpersonal interactions are at the core of psychological disorders of children and adolescents. Research methods for studying both peer and family relationships are considered as well as standard tools for the identification of participants for clinical research. Students will participate in the analysis of data on interpersonal relationships and adjustment. They will learn to interpret the data and write a manuscript in APA style.

**PSYC447701**

**Research Practicum in Cognitive Neuroscience**

**Thakral, Preston P**

**Summer 2022**  

This course introduces students to the research process in the cognitive psychology of memory. Research in memory examines how people encode and retrieve information (e.g., personal experiential information and world knowledge). Topics will include implicit memory, explicit memory, semantic memory, and working memory. Class readings will come from journal articles. Students will analyze these articles and lead class discussions. The ultimate goal is to have students propose a novel study and possibly carry out a research project. This will entail reviewing the relevant literature, identifying a novel research question, designing an experiment, interpreting results, and writing up the experiment in publication format.

**Credits:** 3  
**Room and Schedule:** Mcguinn Hall 400 TuTh 09:00AM-12:15PM  
**Satisifies Core Requirement:** None
PSYC447801
Research Practicum in Human Memory
Fritch, Haley A
Summer 2022
The ability to encode and remember information is critical to the human experience. However, human memory is fragile and imperfect. Distortions, disorders, and diseases of memory will be extensively explored in this course. Students will read and critically analyze cognitive psychology and neuroscience research articles, lead a class discussion on a research paper, and ultimately propose a novel study within the realm of human memory.

Psychology and Neuroscience Courses: Fall 2022

PSYC111001
Brain, Mind, & Behavior
Heyman, Gene M
Fall 2022
This course focuses on basic brain function (how neurons work, brain plasticity, and drug effects) and genetic influences on psychological functions (including attitudes), and introduces students to fundamental features of learning, motivation, appetite, memory, and perception, along with their biological underpinnings. A major course theme is the physical bases of psychological phenomena.

**Credits:** 3  
**Room and Schedule:** Devlin Hall 8 TuTh 12:00 Noon-01:15PM

PSYC220201
Introduction to Social Work
Ryan, Sarah E
Fall 2022
This is a Social Work course available to undergraduate students. Starting with a discussion of its history and the relevance of values and ethics to its practice, the course takes up the various social work methods of dealing with individuals, groups, and communities and their problems. In addition to a discussion of the theories of human behavior that apply to social work interventions, the course examines the current policies and programs, issues, and trends of the major settings in which social work is practiced.

Undergraduate Research
Brownell, Hiram H
Fall 2022
An opportunity to participate in research projects in the laboratory of a faculty member. Students are typically assigned to assist with a specific experiment contributing to the laboratory's overall goals. This is the most typical type of undergraduate research course experience in our department. Students may work with researchers at other area universities and hospitals. The work must be relevant to psychology/neuroscience. While primary supervision of the research will be provided by the laboratory PI, a Boston College Department of Psychology and Neuroscience faculty member must agree to serve as the instructor of record for the course. Students are encouraged to obtain permission of the instructor before they register for their other courses, so that they may keep open the time slot for the laboratory meetings associated with the laboratory. Registration requires the Syllabus/Contract form on the department's Academic Opportunities page.

Students are typically assigned to assist with a specific experiment contributing to the laboratory's overall goals. This is the most typical type of undergraduate research course experience in our department. Students may work with researchers at other area universities and hospitals. The work must be relevant to psychology/neuroscience. While primary supervision of the research will be provided by the laboratory PI, a Boston College Department of Psychology and Neuroscience faculty member must agree to serve as the instructor of record for the course. Students are encouraged to obtain permission of the instructor before they register for their other courses, so that they may keep open the time slot for the laboratory meetings associated with the laboratory. Registration requires the Syllabus/Contract form on the department's Academic Opportunities page.

Ford, Jaclyn H
Fall 2022
This course offers students the opportunity to study a topic of personal interest, working independently under the supervision of a faculty member within the Psychology Department. The instructor, working with the student, decides on the nature of readings and related activities involved as well as the precise form of scholarly work required. A student may obtain the consent of a faculty member to serve as his or her instructor by contacting the faculty member directly. Registration requires the Syllabus/Contract form on the department's Academic Opportunities page.

**PSYC223401**  
**Introduction to Psychopathology**  
**Ongis, Martino**  
**Fall 2022**  
This course provides an introduction to the field of psychopathology. Major topics include theoretical and empirical approaches to the study of psychopathology; assessment and diagnosis of abnormality; and psychological, behavioral, biological, and sociocultural characteristics of the major syndromes of psychopathology. Legal and ethical issues and current approaches to the treatment and prevention of psychological disorders will also be discussed.

**Credits:** 3  
**Room and Schedule:** Devlin Hall 221 TuTh 04:30PM-05:45PM  
**Satisfies Core Requirement:** None

PSYC224101
Social Psychology
Heberlein, Andrea S
Fall 2022
This course explores the scientific study of social thought and behavior. How do we understand, interact with, and influence other minds and our own? How might we apply psychology to social problems? Topics include mind perception, emotion, persuasion, stereotyping, and moral psychology.

Credits: 3
Room and Schedule: Gasson Hall 305 TuTh 10:30AM-11:45AM

PSYC224201
Personality Theories
Russell, James
Fall 2022
Does personality make us who we are? Whether selecting a mate, voting for a president, or understanding ourselves, we want and need to know about personality. In this course we consider how personality can be measured, how well it predicts behavior, what shapes our personality, and whether personality can be changed.

PSYC227201
Cognitive Psychology: Mental Processes and their Neural Substrates
Brownell, Hiram H
Fall 2022
This course introduces the scientific study of mental function from an information processing perspective. The course examines how information is processed and transformed by the mind to control complex human behavior. Specific topics include the history of cognitive psychology, cognitive neuroscience, attention, perception, consciousness, short-term and long-term memory, mental imagery, language, decision-making, and problem solving. Course material will be drawn from work with clinical populations (e.g., people who have sustained brain injury) as well as from work with non-injured populations. Class sessions will be devoted to lecture, discussion, demonstrations, and (if practical) student presentations.

**Credits:** 3  
**Room and Schedule:** Campion Hall 300 TuTh 12:00 Noon-01:15PM

PSYC227401  
**Sensation and Perception**  
MacEvoy, Sean P  
**Fall 2022**  
How do our senses tell us what is really in the world around us, and can our senses be trusted? These questions have been pondered by philosophers for centuries, and more recently by psychologists and neuroscientists. This course will explore the anatomical/biological basis of sensation (how the world that we perceive is translated into the raw language of the nervous system) and the cognitive processes underlying perception (how our brains reconstruct the physical world from these neural inputs). We will examine these questions for vision, hearing, touch, smell, and taste.

**Credits:** 3  
**Room and Schedule:** Gasson Hall 310 TuTh 09:00AM-10:15AM  
**Satisfies Core Requirement:** None  
**Prerequisites:** PSYC1110  
**Corequisites:** None  
**Cross-listed with:** None
**PSYC228501**  
**Behavioral Neuroscience**  
**Christianson, John P**  
**Fall 2022**  
This course presents an introduction to the physiological basis of behavior. Basic neuroanatomy and neurophysiology are presented, and the following topics are then discussed: neuropharmacology, psychopharmacology, and the biological bases of mental illness; brain mechanisms of reward and reinforcement; hormones and behavior; an introduction to the development of the nervous system; brain mechanisms of learning and memory; and brain mechanisms of emotion.  

**Credits:** 3

**PSYC332701**  
**Psychology of Prejudice and Discrimination**  
**Zimbler, Mattitiyahu**  
**Fall 2022**
This course focuses on the social psychology of stereotyping, prejudice, and discrimination. In other words, we will examine beliefs about members of social groups (stereotypes), evaluations of group members (prejudice), and behaviors towards members of social groups based on their group membership (discrimination). Also we will study how these issues shape the experiences of social group members, especially when they are members of low-status and/or minority groups. Rather than relying on anecdotal evidence, we will examine theories of stereotyping, prejudice, and discrimination through empirical research findings.

PSYC332901  
Psychophysiology of Stress  
Ivkovic, Vladimir  
Fall 2022  
This course explores the psychological and physiological factors underlying stress, including basic principles of psychophysiology and fundamental concepts of stress. Topics include emotion, motivation, multitasking, attention, arousal, and distraction. Physiological mechanisms underlying stress will be examined relative to health and abnormal behaviors, such as addictions, mood disorders, and violence. Students will be instructed in methods of stress control, including cognitive behavioral techniques and meditation.

Credits: 3  
Room and Schedule: Mcguinn Hall 29 M 04:00PM-06:20PM  
Satisfies Core Requirement: None

PSYC333401
Interpersonal Violence
Tishelman, Amy C
Fall 2022
This course will review research, assessment, treatment, and current controversies in the area of family violence, focusing on child sexual abuse, child physical abuse, and spousal abuse. The course will consist of a combination of a lecture and class discussion of the issues, including those related to memories of abuse, identification of abuse, and the legal, psychological, and social ramifications of extracting women and children from abusive homes.

Credits: 3

PSYC333601
Clinical Psychology
Rosen, Karen
Fall 2022
Issues associated with the treatment of psychological disorders will be examined. The concepts of normality and pathology will be discussed in the context of various models of intervention. Several different schools of psychotherapy will be covered, with an emphasis on the theoretical assumptions and practical applications of each perspective. Studies on the effectiveness of psychotherapy will be reviewed. The clinical training and professional practices of psychologists will be discussed.

Credits: 3
Room and Schedule: Gasson Hall 202 TuTh 03:00PM-04:15PM
PSYC334201
Sport and Exercise Psychology
Moore, Kristina
Fall 2022
This course will provide a broad introduction to sport and exercise psychology as both a science and a practice. Content will include major theories, seminal and current empirical research, and practical considerations concerning the cognitive processes, emotional states, social influences, and developmental systems involved in sport and exercise participation and performance. Topics will span across individual, group, and context and may include personality, motivation, anxiety, team cohesion, group dynamics, as well as psychological skills training areas such as confidence, imagery, arousal regulation, goal-setting, and concentration. Students will synthesize material and design appropriate applications to sport and exercise settings.

PSYC334501
Social Motivation
Zimbler, Mattitiyahu
Fall 2022
How do other people affect our motivation to act? Psychology has given too much emphasis to extrinsic rewards and too little to the ways in which our relationships with others determine our choices, feelings, and thoughts. Many of our behaviors are motivated primarily by our relationships with others. In this course we will explore the influence of others on our behavior. Topics to be considered include kindness and cruelty, cooperation and competition, and conformity and rebellion.

**Credits:** 3

**PSYC335301**  
**Culture and Emotions**  
**Russell, James**  
**Fall 2022**  
The course is devoted to major psychological perspectives on emotion (such as cognitive and social psychological) both historic and contemporary, with an emphasis on how culture enters into the theory. The second part of the course focuses on ethnographies and other evidence on the possible roles of culture in emotion. Specific topics to be covered include universal recognition of emotion from facial expression, role of language in emotion, feeling rules, emotion scripts, and the development of children's understanding of emotion.

**Credits:** 3

PSYC336201
Mind of a Dog: How Canine Cognition Informs Human Psychology
Johnston, Angela M
Fall 2022
This course explores intelligence and cognitive processes across a variety of animal species, including humans. It addresses such questions as, do chimpanzees lie? Can dolphins count? What makes us uniquely human? Topics include mental representation, memory, tool use, counting, problem-solving, self-awareness, social knowledge, and communication/language. For each area, we will examine the evidence from both wild and laboratory settings, continually returning to the questions of what such knowledge tells us about non-human animals, and how this knowledge informs our theories of human cognition.

PSYC337001
Nudge Psychology
Bernhard, Regan
Fall 2022
Small changes in our environments can have big impacts on our behavior. For example, in one hospital in London, simply changing the wording used to remind patients of upcoming appointments dropped the missed appointment rate so dramatically the hospital saved millions of dollars. In this course we will study the power of nudges, subtle but powerful changes in the environment that can counteract behavioral biases and encourage better decision-making. We will start with learning about dual-systems models of cognition and then explore how these systems interact to make us vulnerable to bias, heuristics, jumping to conclusions, and erroneous decision-making. Finally, we will investigate how nudges have been leveraged to positively influence behavior and improve social systems.

**Credits:** 3

---

**PSYC338101**  
**Psychobiology of Emotional Learning**  
**Cole, Sindy**  
**Fall 2022**  
This course will introduce students to research and theory in regards to the psychobiology of emotional learning and behavior. Behavioral experiments demonstrating basic concepts in emotional learning will be described, as well as experiments aimed at determining the neural circuits which govern this learning and behavior. Additional coursework will explore the role of both developmental factors and sex differences in emotional learning. Most of the findings presented will be from non-human animal research, but some human studies will be highlighted.

**Credits:** 3  
**Room and Schedule:** Campion Hall 200 TuTh 10:30AM-11:45AM  
**Satisfies Core Requirement:** None  
**Prerequisites:** PSYC2285 or similar introduction to neuroscience course.  
**Corequisites:** None
PSYC338301
Neurobiological Basis of Learning and Memory
Lamoureux, Jeffrey A, PHD
Fall 2022
This course will explore the neural mechanisms that underpin basic processes of learning and memory. We will investigate both systems-level neuroscience (e.g., What do the hippocampus, amygdala, VTA, etc. actually do?), as well a more molecular view of the role of specific intracellular processes in producing changes in synaptic connections. The molecular focus of the course will comprise a detailed investigation of long-term potentiation (LTP), and its relation to endogenous memory processes. Systems-level topics will focus on fundamental associative and non-associative learning phenomena in non-human animal models.

PSYC338801
Neurobiology of Eating and Eating Disorders
Petrovich, Gorica D
Fall 2022
This course will review the neural mechanisms controlling food intake, and body weight regulation under normal circumstances and in eating disorders. Eating is not only controlled by metabolic signals (e.g., hormones, peptides), but also by extrinsic or environmental factors that are not directly related to energy balance (e.g., stress, emotion, social/cultural factors). Likewise the brain systems regulating hunger are associated with networks mediating stress, reward, emotion, and learning and memory. The course will explore the current neuroscience findings from animal models, and human studies relevant to appetite, regulation of eating, and eating disorders.

PSYC403901  
Research Practicum in Child and Adolescent Clinical Psychology  
Schneider, Barry H  
Fall 2022  
This practicum focuses on research inspired by the assumption that faulty interpersonal interactions are at the core of psychological disorders of children and adolescents. Research methods for studying both peer and family relationships are considered as well as standard tools for the identification of participants for clinical research. Students will participate in the analysis of data on interpersonal relationships and adjustment. They will learn to interpret the data and write a manuscript in APA style.

Credits: 3  
Room and Schedule: 245 Beacon Street Room 230 TuTh 01:30PM-02:45PM  
Satisfies Core Requirement: None

PSYC410101
Research Practicum in Human and Artificial Intelligence
Anzellotti, Stefano
Fall 2022
This course is a practical introduction to the convergence between psychology, neuroscience, and artificial intelligence. Ideas from psychology and neuroscience have inspired the development of artificial neural networks. Their current instantiations, deep neural networks, are having a profound impact on computer science and society, but also on the study of the brain and cognition. This course starts with a brief introduction to the roots of artificial intelligence in psychology and neuroscience, followed by a brief, accessible introduction to the mathematical foundations of deep neural networks. In the remainder of the course, students will learn to use python and pytorch and will work in groups to implement and train deep neural networks to build models of behavior or of the brain. Prior experience with computer programming is highly recommended; students with no experience in programming are encouraged to meet the instructor before enrolling.

**PSYC417301**  
**Research Practicum in Judgment and Decision-Making**  
**Bernhard, Regan**  
**Fall 2022**  
This course explores the scientific study of how different cognitive systems interact with environmental factors to shape individuals' preferences, choices, and judgments. We will discuss empirical research articles related to judgment and decision making and conduct our own experiments. We will cover topics including research ethics, constructing experimental variables, experiment design and methodologies, and how to write an APA-style research report.

**Credits:** 3  
**Room and Schedule:** Mcguinn Hall 303 M 09:30AM-12:00 Noon  
**Satisfies Core Requirement:** None

PSYC417401
Research Practicum in Sensation and Perception
MacEvoy, Sean P
Fall 2022
The course will introduce students to experimental methods used to understand human perception. In a hands-on, laboratory-style course format, students will become familiar with the process of designing perceptual experiments and the collection and analysis of perceptual data. As a final project, with guidance from the instructor each student will complete a perceptual experiment and prepare a report of their work in the style of a scientific publication.

PSYC443501
Images of Mental Illness in Film and Literature
Schneider, Barry H
Fall 2022
This course is devoted to the representations of mental illness in film and literature, which are often more complex and more personal than the descriptions of psychological disorders in scientific writings. Students deepen their understanding of abnormal psychology as they criticize material from selected books and films containing depictions of disorders. These creative works will be examined in terms of the possible motivation of the authors and filmmakers and the potential for the creative works to decrease or increase stigma. The messages conveyed about the nature of abnormality are emphasized throughout the course. The course concludes with consideration of the ways in which psychologists and other mental-health professionals are depicted in these media.

PSYC443601
Clinical Fieldwork in Psychology
Rosen, Karen
Fall 2022
Seniors only. Priority will be given to students who are in the Clinical Concentration. This course will provide students with an opportunity to integrate theoretical and empirical work in clinical psychology with the real-life experience of working in a clinical setting. Students will select, together with the professor, a field placement (e.g., hospital, community clinic, day treatment center, shelter, emergency hot line, preschool classroom, prison). Students' work in the field will involve at least eight hours per week with weekly, on-site supervision. Weekly class meetings will focus on the discussion of issues relevant to the direct application of mental health services to child, adolescent, and adult patients.

Students may elect to write a thesis during the senior year. In most cases, the thesis involves original empirical research, although theoretical papers may be permitted in exceptional instances. Students must obtain the consent of a faculty member to serve as thesis advisor. Students who choose to write a thesis are encouraged to take an Independent Study with a prospective thesis advisor during the junior year to develop a thesis proposal. Registration requires the Syllabus/Contract form on the department's Academic Opportunities page.

PSYC449525
Senior Honors Thesis I
Moore, Kristina
Fall 2022
For students in the Honors Program writing a thesis. All Honors Program students write a thesis during the senior year. In most cases, the thesis involves original empirical research, although theoretical papers may be permitted in exceptional instances. Honors students are encouraged to take an Independent Study with a prospective thesis advisor during the junior year, to develop a thesis proposal. The designation "Graduated with Departmental Honors" will be granted by the Honors Program Committee upon successful completion of the Honors Program requirements and the final evaluation of the thesis. Registration requires the Syllabus/Contract form on the department's Academic Opportunities page.

Experimental Design and Statistics
Magnus, Brooke E
Fall 2022
This course focuses on experimental design and related statistical methods. It covers between-subject, within-subject, and mixed designs with one and two factors. Statistical topics include the relevant statistical model and model assumptions, omnibus test, test of contrasts, multiple comparison, effect size, and power calculations. One and two sample t tests will also be revisited. If time permits, advanced topics such as designs with nested factors or random factors, mixed model approach, and nonparametric approach may also be covered.

PSYC556501
Origins of Virtue
McAuliffe, Katherine J
Fall 2022
Drawing on experimental work with adults, children, and animals, this graduate seminar will explore the origins of virtue. This course is discussion-based and reading/writing intensive. Each meeting will focus on the origins of a different virtue such as justice, honesty, trustworthiness, and loyalty. Students will gain familiarity with evolutionary and developmental perspectives on virtue, will have a chance to develop their own empirical approaches to the study of virtue, and will have a chance to lead class discussions.

PSYC557301
Advanced Topics in the Neuroscience of Memory
Ritchey, Maureen
Fall 2022
When we remember a past event, we form a mental representation of its specific details, including the people, places, and time associated with the event. Understanding the nature of these memory representations is an important challenge for neuroscientists. This seminar will focus on theoretical and experimental approaches to characterizing memory representations in the brain, targeting questions such as: Where are memories stored? Can we identify and manipulate individual memory representations? How do memory representations change over time? And what aspects of memory are reactivated versus reconstructed? The course will integrate research from the cognitive and behavioral neurosciences, incorporating both human and rodent studies of memory. Class meetings will typically include student-led discussions of journal articles related to each week's topic.

-----------------------

PSYC559001
History of Psychology
Weidman, Nadine
Fall 2022
A hundred years ago, psychology was a tiny academic specialty called mental philosophy. In a matter of decades, however, psychology burgeoned into an enormous field influencing both scholars and the popular imagination (think IQ test, think analyst's couch). What accounts for the rise of psychology to its all-powerful position? This course will examine the twentieth century trajectory of psychology, asking how it has shaped, and been shaped by, cultural, social, and political conditions, and exploring major thinkers such as William James, Sigmund Freud, B.F. Skinner, Stanley Milgram, Abraham Maslow, and others.

Credits: 3
Room and Schedule: Gasson Hall 302 M 03:00PM-05:30PM
Satisfies Core Requirement: None
Prerequisites: None
PSYC650101
Graduate Programming Lab
Slotnick, Scott
Fall 2022
The course provides an introduction to MATLAB. Students will learn how to program in MATLAB, and how to use MATLAB for research in psychology. Students will develop a programming mindset by learning and exercising programming tasks, e.g., manage the data, manipulate the variables, plot the data, make graphs and tables, and conduct statistical analysis.

Psychology and Neuroscience Courses: Spring 2023

PSYC103201
Science of Emotion
Heberlein, Andrea S  
**Spring 2023**  
This course examines the scientific study of emotion for undergraduate students with no background in psychology. Topics include such questions as: What are the functions of emotion, interpersonally and intrapersonally? What are some ways that emotions can be dysfunctional? Are emotions the same across cultures? How do we know what someone else is feeling? How does emotion interact with decision-making? In addressing these questions, we will incorporate discussions of how psychological experiments are constructed, performed, and interpreted.

**Credits:** 3  
**Room and Schedule:** Gasson Hall 305 MWF 11:00AM-11:50AM  
**Satisfies Core Requirement:** Social Science

**PSYC111301**  
**Introduction to Neuropsychological Disorders**  
**Kensinger, Elizabeth A**  
**Spring 2023**  
In this seminar, we will discuss the function of the brain through the lens of neuropsychological disorders. We will cover disorders of attention (e.g., neglect), memory (e.g., amnesia, dementia), and vision (e.g., prosopagnosia, blindsight), discussing the characteristics of each disorder and what its existence has taught us about brain function. This course is a one-credit seminar, designed to facilitate communication between a small group of students, to foster scientific thinking, and to enhance each student's communication and critical thinking skills.

**Credits:** 1  
**Room and Schedule:** Higgins Hall 280 W 02:00PM-02:50PM

Ryan, Sarah E
Spring 2023
This is a Social Work course available to undergraduate students. Starting with a discussion of its history and the relevance of values and ethics to its practice, the course takes up the various social work methods of dealing with individuals, groups, and communities and their problems. In addition to a discussion of the theories of human behavior that apply to social work interventions, the course examines the current policies and programs, issues, and trends of the major settings in which social work is practiced.

**Spring 2023**  
An opportunity to participate in research projects in the laboratory of a faculty member. Students are typically assigned to assist with a specific experiment contributing to the laboratory's overall goals. This is the most typical type of undergraduate research course experience in our department. Students may work with researchers at other area universities and hospitals. The work must be relevant to psychology/neuroscience. While primary supervision of the research will be provided by the laboratory PI, a Boston College Department of Psychology and Neuroscience faculty member must agree to serve as the instructor of record for the course. Students are encouraged to obtain permission of the instructor before they register for their other courses, so that they may keep open the time slot for the laboratory meetings associated with the laboratory. Registration requires the Syllabus/Contract form on the department's Academic Opportunities page.

**Credits:** 3

An opportunity to participate in research projects in the laboratory of a faculty member. Students are typically assigned to assist with a specific experiment contributing to the laboratory's overall goals. This is the most typical type of undergraduate research course experience in our department. Students may work with researchers at other area universities and hospitals. The work must be relevant to psychology/neuroscience. While primary supervision of the research will be provided by the laboratory PI, a Boston College Department of Psychology and Neuroscience faculty member must agree to serve as the instructor of record for the course. Students are encouraged to obtain permission of the instructor before they register for their other courses, so that they may keep open the time slot for the laboratory meetings associated with the laboratory. Registration requires the Syllabus/Contract form on the department's Academic Opportunities page.

Credits: 3
Room and Schedule: By Arrangement
Satisfies Core Requirement: None
Prerequisites: Permission of Department
Corequisites: None
Cross-listed with: None
Frequency: Every Fall, Every Spring

Anzellotti, Stefano
Spring 2023
This course offers students the opportunity to study a topic of personal interest, working independently under the supervision of a faculty member within the Psychology Department. The instructor, working with the student, decides on the nature of readings and related activities involved as well as the precise form of scholarly work required. A student may obtain the consent of a faculty member to serve as his or her instructor by contacting the faculty member directly. Registration requires the Syllabus/Contract form on the department's Academic Opportunities page.
