This course develops an understanding of the basic elements of financial accounting and its role in commerce and capital markets. Accounting helps entities measure and communicate their performance to others. Accounting is primarily a language; the language of business. The understanding of this language allows users from different fields analyze financial transactions, evaluate companies and financial products, and understand financial and macroeconomic events. In this spirit, the course's primary objective is to help students get familiar with this language, and to provide them with a deeper understanding of capital markets and the economic transactions they will encounter both as students and professionals.

**ACCT332101**  
**Intermediate Accounting for Finance and Consulting**  
**Williams, Christina**  
**Fall 2022**  
This intermediate financial accounting course builds on ACCT1021 to provide, in greater depth, a comprehensive understanding of financial accounting topics important to assessing firm performance. The course is designed to teach users of financial statements (rather than preparers of financial statements) how accounting information, shaped by regulation, has advantages and limitations in assessing the economics of the underlying business. The goal of the course is to provide a better understanding of financial reporting and accounting information as an input to evaluating a firm. With hands-on use of cases and SEC filings, this course is beneficial for students seeking careers that require the use of financial statement information as an input to decision-making.

ACCT661501
Advanced Federal Taxation
Taylor, Edward
Fall 2022
The course aims to cover federal income tax law as applied to planning for and executing
business transactions and decisions. The focus is on the corporate entity, but some time will be
spent on partnerships, "S" corporations, trusts, estates, and exempt organizations. Practical
application of tax rules rather than technical analysis will be emphasized.

ACCT663501
Forensic Accounting
McCall, Michael P
Fall 2022
Forensic Accounting is a growing area of practice in which the knowledge, skills and abilities of accounting are combined with investigative expertise and applied to legal problems. Forensic accountants are often asked to provide litigation support where they are called on to give expert testimony about financial data and accounting activities. In other more proactive engagements, they probe situations using special investigative accounting skills and techniques. Some even see forensic accounting as practiced by skilled accounting specialists becoming part and parcel of most financial audits: an extra quality control step in the auditing process that will help reduce financial statement fraud.

Accounting Courses: Spring 2023

ACCT102101  
Financial Accounting  
Yost, Benjamin P  
Spring 2023  
This course develops an understanding of the basic elements of financial accounting and its role in commerce and capital markets. Accounting helps entities measure and communicate their performance to others. Accounting is primarily a language; the language of business. The understanding of this language allows users from different fields analyze financial transactions, evaluate companies and financial products, and understand financial and macroeconomic events. In this spirit, the course's primary objective is to help students get familiar with this language, and to provide them with a deeper understanding of capital markets and the economic transactions they will encounter both as students and professionals.

ACCT332101
Intermediate Accounting for Finance and Consulting
Williams, Christina
Spring 2023
This intermediate financial accounting course builds on ACCT1021 to provide, in greater depth, a comprehensive understanding of financial accounting topics important to assessing firm performance. The course is designed to teach users of financial statements (rather than preparers of financial statements) how accounting information, shaped by regulation, has advantages and limitations in assessing the economics of the underlying business. The goal of the course is to provide a better understanding of financial reporting and accounting information as an input to evaluating a firm. With hands-on use of cases and SEC filings, this course is beneficial for students seeking careers that require the use of financial statement information as an input to decision-making.

ACCT440501
Federal Taxation
Taylor, Edward
Spring 2023
This course introduces the student to the various elements of taxation and emphasizes interpretation and application of tax laws. Students are challenged to consider the tax implications of various economic events and to think critically about the broad implications of tax policy. The skills to prepare reasonably complex tax returns and do basic tax research are also developed.

Credits: 3
Room and Schedule: Fulton Hall 110 TuTh 03:00PM-04:15PM
Satisfies Core Requirement: None
Prerequisites: ACCT1021

ACCT440901
Advanced Auditing
Husk, Frederick W
Spring 2023
Spend a semester with a big firm audit partner learning the financial statement audit process chronologically from start to finish. The course includes a semester-long 'hands-on' audit case and emphasizes key areas of accounting and auditing judgement, along with managing difficult client situations. You will greatly expand your auditing knowledge and skills beyond the introductory auditing class and be much more prepared for your first few years in the auditing practice of one of the accounting firms. The course is also excellent preparation for the CPA Exam AUD section.

ACCT661501
Advanced Federal Taxation
Taylor, Edward
Spring 2023
The course aims to cover federal income tax law as applied to planning for and executing
business transactions and decisions. The focus is on the corporate entity, but some time will be
spent on partnerships, "S" corporations, trusts, estates, and exempt organizations. Practical
application of tax rules rather than technical analysis will be emphasized.

**Taxes and Management Decisions**  
**Manzon, Gil**  
**Spring 2023**  
This course provides students with a framework for tax planning. Specific applications of the framework integrate concepts from finance, economics, and accounting to help students develop a more complete understanding of the role of taxes in business strategy (e.g., tax planning for mergers, acquisitions, and divestitures; tax arbitrage strategies; taxation of competing legal entities; employee compensation; and others).

**Ethics and Professionalism in Accounting**  
**Curley, Brad**  
**Spring 2023**  
The professional role of the Certified Public Accountant is to protect the investing public, yet the CPA's profit is dependent on controlling costs and managing a portfolio of satisfied corporate clients. These realities lead to a conflict of interest that is at the heart of this course. This course will focus on the nature of professions and professionalism. Specific attention will be paid to the AICPA's code of ethics, economic and regulatory factors affecting the public accounting profession, and various aspects of the current accounting environment.

**Credits:** 3  
**Room and Schedule:** Fulton Hall 423 Th 03:00PM-05:30PM
Forensic Accounting is a growing area of practice in which the knowledge, skills and abilities of accounting are combined with investigative expertise and applied to legal problems. Forensic accountants are often asked to provide litigation support where they are called on to give expert testimony about financial data and accounting activities. In other more proactive engagements, they probe situations using special investigative accounting skills and techniques. Some even see forensic accounting as practiced by skilled accounting specialists becoming part and parcel of most financial audits an extra quality control step in the auditing process that will help reduce financial statement fraud.

ACCT889301
Empirical Topics in Accounting III
Lee, Lian Fen; Yost, Benjamin P
Spring 2023
The objective of this course is to provide students with a sound framework for understanding and assessing the quality of empirical archival research in accounting. The course has two objectives. Part of the course is aimed at facilitating a deeper understanding of the econometric issues facing empirical archival research. This part of the course will survey the common problems and potential solutions. The other part of the course will survey the empirical research on accounting and contracting. Topics will include the role of accounting information in evaluating managers and setting executive compensation, earnings management induced by the use of accounting in contracting, and the relation between accounting and corporate governance.

Operations Management
Parker, Delvon B
Summer 2022
This course is an introduction to operations management. Operations, like accounting, finance, marketing, and human resources, is one of the primary functions of every organization. Operations managers transform human, physical, and technical resources into goods and services. Hence, it is vital that every organization manage this resource conversion effectively and efficiently. How effectively this is accomplished depends upon the linkages between operating decisions and top management (strategic) decisions. The focus of the course is decision-making at the operating level of the firm. A strong emphasis will be placed on the development and use of quantitative models to assist decision making.

Managerial Statistics
Shea, Lauren; VanderWerf, Pieter A
Summer 2022
This course teaches the tools and techniques of statistics most commonly used in business. The major topic areas include: populations, random variables, distributions, and sampling; parameter estimation; hypothesis testing; and simple and multiple regression. All topics are taught by application to actual business problems using original data. The course provides the tools students will need for their functional courses, such as finance and marketing, as well as for core courses in business analytics.

Data Analytics 1: Model Building
VanderWerf, Pieter A
Summer 2022
Machine Learning, big data, data mining, predictive analytics. These are what the course covers. They consist of the creation and use of mathematical computer models to predict important quantities and events with uncanny accuracy. As one book put it, "Who clicks, who buys, and who dies." The course teaches both the principles and the details of the major methods of making and applying these models to actual business problems. To produce models on the computer, students also learn the R coding language. This is the preferred high-level software for Machine Learning and statistical applications.

**Coding for Business**

**Sterpe, Peter J**

**Summer 2022**

This is an introductory course in computer programming based on Python (a language suitable for all business and analytics programs). The course emphasizes coding literacy and teaches coding skills that are relevant for business decision makers. MBA DA3 is a prerequisite. This course will give students the knowledge and confidence to apply coding to a business problem, and the ability to go from a problem statement to a repeatable set of steps for solving the problem in a general way. It will enable students who might not code professionally to work effectively with colleagues who do, and it will equip interested students to develop significant programs of their own.

Managing Projects
Coakley, Charles E
Summer 2022
This course takes a holistic approach to planning, organizing, and controlling projects. It looks at how projects are uniquely suited to support an organization's strategy in a fast-paced business environment. Topics include project life cycle, algorithms and statistical concepts underlying network planning models, managing risk and resource allocation. It emphasizes the use of effective interpersonal and communication skills to organize, plan, and control the project team.

BZAN102110
Operations Management
Xue, Mei
Fall 2022
This course is an introduction to operations management. Operations, like accounting, finance, marketing, and human resources, is one of the primary functions of every organization. Operations managers transform human, physical, and technical resources into goods and services. Hence, it is vital that every organization manage this resource conversion effectively and efficiently. How effectively this is accomplished depends upon the linkages between operating decisions and top management (strategic) decisions. The focus of the course is decision-making at the operating level of the firm. A strong emphasis will be placed on the development and use of quantitative models to assist decision making.

BZAN103701
Excel for Business Analytics
Beebe, Jonathan R
Fall 2022
This course provides an introduction to the use of Excel in business analytics. Topics include spreadsheet formatting, charts, basic and logical functions, and more advanced Excel tools like vlookups and pivot tables. In addition to learning how to use Excel as an analytical tool, the course will also discuss ways in which Excel can be used to effectively communicate business results and insights.

BZAN113501
Statistical Analysis
Boardman Liu, Linda
Fall 2022
This course provides an introduction to statistics with a focus on the analytical tools that are applicable to management practice and decision making. Statistical topics include descriptive statistics, probability, random variables, sampling distributions, estimation of parameters, hypothesis testing, and regression. Data handling and management skills are developed through extensive use of modern statistical programming tools and real data sets. Students will gain an understanding of statistical methods, the ability to formulate business questions as statistical models to test, and critical thinking skills to evaluate the results of those models.

Managing Projects
Coakley, Charles E
Fall 2022
This course takes a holistic approach to planning, organizing, and controlling projects. It looks at how projects are uniquely suited to support an organization's strategy in a fast-paced business environment. Topics include project life cycle, algorithms and statistical concepts underlying network planning models, managing risk, and resource allocation. Microsoft Project will be used as to support the planning and monitoring phases of project management. The conceptual part of this course is framed with an eye to the behavioral realities a manager faces and the psychology of managing project teams.

Sports Analytics
Neale, John J
Fall 2022
This course will introduce you to the field of sports analytics. We will apply quantitative methods from statistics and management science in a sports context. Our focus will be on-field analysis including player and team evaluation and game strategy. We will cover baseball, football, and basketball in depth with occasional references to other sports. We will also discuss concepts from behavioral economics and psychology that help explain the actions of players, coaches, and referees.

**Credits:** 3  
**Room and Schedule:** Fulton Hall 150 W 04:30PM-06:50PM  
**Satisfies Core Requirement:** None  
**Prerequisites:** A previous course in statistics (BZAN1135 OR BZAN1137), management science (BZAN2235 or BZAN6604), and Excel (BZAN1037 or ISYS1021) plus familiarity with the rules of baseball, football, and basketball.

**Operations Strategy and Consulting**  
**Field, Joy M**  
**Fall 2022**

This course examines concepts, principles, and techniques for formulating, implementing, and evaluating operations strategy. It links strategic and tactical operational decisions to creation of a competitive advantage. Topics include operations strategy content and process, service operations, capacity and facilities strategy, supply chain management, process design and technology choice, and quality and productivity improvement. Case studies are used to illustrate concepts covered in the course. In collaboration with a consulting firm, students also learn how to develop and deliver a consulting presentation. These skills are applied to a mock consulting project.

**Credits:** 3

**Management Science**  
Neale, John J  
**Fall 2022**
This course provides an overview of the concepts and methods of management science. Sometimes referred to as prescriptive analytics or decision analytics, management science is a subset of the larger field of business analytics and focuses on the use of math models to make better business decisions. The primary goal of the course is to help you become a more skilled builder and consumer of models. The course will show you how to use Excel spreadsheets effectively for business analysis and introduce you to some of the more important analytic methods including optimization and simulation. These methods will be applied to problems arising in a variety of functional areas including operations, finance, and marketing. STEM-designated.

BZAN660901
The Business of Sports
Zola, Warren K
Fall 2022
The sports industry is a multi-billion dollars business and has become a pervasive element in our economy and society. This course will profile many aspects of the sporting landscape to highlight the diverse nature of the decisions, and their consequences, that confront managers relative to various financial and strategic issues in this global industry.

BZAN770001
Operations Management
Parker, Delvon B
Fall 2022
Operations, like accounting, finance and marketing, is one of the primary functions of every organization. Operations managers transform human, physical and technical resources into goods and services. Hence, it is vital that every organization manage this resource conversion effectively and efficiently. How effectively this is accomplished depends upon the linkages between operating decisions and top management (strategic) decisions. The focus of the course is decision-making at the operating level of the firm, converting broad policy directives into specific actions within the organization. Strong emphasis will be placed on the development and use of quantitative models to assist in decision making.

Credits: 3
Room and Schedule: On-line Asynchronous
Satisfies Core Requirement: None
Prerequisites: BZAN7703
Corequisites: None

Managerial Statistics
Shea, Lauren; VanderWerf, Pieter A
Fall 2022
This course teaches the tools and techniques of statistics most commonly used in business. The major topic areas include: populations, random variables, distributions, and sampling; parameter estimation; hypothesis testing; and simple and multiple regression. All topics are taught by application to actual business problems using original data. The course provides the tools students will need for their functional courses, such as finance and marketing, as well as for core courses in business analytics.

**BZAN770601**  
**Data Analytics 1: Model Building**  
**VanderWerf, Pieter A**  
**Fall 2022**  
Machine Learning, big data, data mining, predictive analytics. These are what the course covers. They consist of the creation and use of mathematical computer models to predict important quantities and events with uncanny accuracy. As one book put it, "Who clicks, who buys, and who dies." The course teaches both the principles and the details of the major methods of making and applying these models to actual business problems. To produce models on the computer, students also learn the R coding language. This is the preferred high-level software for Machine Learning and statistical applications.

**Credits:** 3

Machine learning (ML) has been a popular topic for data scientists and analysts. The goal in ML is to learn from existing data and extract useful information such as patterns, behaviors and trends. We can then use this information to predict future activity. The ability of learning patterns from data and making accurate predictions on new instances makes ML a powerful tool for Business Intelligence since it helps us transform the raw data into better decisions. This course will not dive into the technical details of ML algorithms but rather focus on how to use these algorithms in Business Intelligence applications. We will study business applications including but not limited to customer segmentation, propensity, and churn. STEM-designated.

**Credits:** 3

**Room and Schedule:** Fulton Hall 245 Tu 07:00PM-09:30PM

**Satisfies Core Requirement:** None

Managing Projects
Coakley, Charles E
Spring 2023
This course takes a holistic approach to planning, organizing, and controlling projects. It looks at how projects are uniquely suited to support an organization's strategy in a fast-paced business environment. Topics include project life cycle, algorithms and statistical concepts underlying network planning models, managing risk, and resource allocation. Microsoft Project will be used as to support the planning and monitoring phases of project management. The conceptual part of this course is framed with an eye to the behavioral realities a manager faces and the psychology of managing project teams.

Machine Learning
VanderWerf, Pieter A
Spring 2023
The course teaches the methods behind the "Big Data" revolution. Using massive data sets, organizations are building models that predict such things as consumer behavior, product failures, and business performance with uncanny accuracy. This course teaches the technical details of creating these models and managing modeling projects. It aims to enable students to build and validate practical models of their own.

Credits: 3
Room and Schedule: Fulton Hall 423 TuTh 01:30PM-02:45PM
Satisfies Core Requirement: None
Prerequisites: Prior to taking this course, students should have completed BZAN1135 (Statistical Analysis) OR BZAN1137 and have familiarity with the R coding language.

BZAN331001
Sports Analytics
Neale, John J
Spring 2023
This course will introduce you to the field of sports analytics. We will apply quantitative methods from statistics and management science in a sports context. Our focus will be on-field analysis including player and team evaluation and game strategy. We will cover baseball, football, and basketball in depth with occasional references to other sports. We will also discuss concepts from behavioral economics and psychology that help explain the actions of players, coaches, and referees.

Credits: 3
Room and Schedule: Fulton Hall 220 Tu 04:30PM-06:50PM
Satisfies Core Requirement: None
Prerequisites: A previous course in statistics (BZAN1135 OR BZAN1137), management science (BZAN2235 or BZAN6604), and Excel (BZAN1037 or ISYS1021) plus familiarity with the rules of baseball, football, and basketball.

BZAN660402
Management Science
Neale, John J
Spring 2023
This course provides an overview of the concepts and methods of management science. Sometimes referred to as prescriptive analytics or decision analytics, management science is a subset of the larger field of business analytics and focuses on the use of math models to make better business decisions. The primary goal of the course is to help you become a more skilled builder and consumer of models. The course will show you how to use Excel spreadsheets effectively for business analysis and introduce you to some of the more important analytic methods including optimization and simulation. These methods will be applied to problems arising in a variety of functional areas including operations, finance, and marketing. STEM-designated.

**Credits:** 3

**Forecasting for Business Analytics**  
Ulusoy, Veysel  
**Spring 2023**

The theory and practice of applied time series analysis will be explored. First the different segments (trend, seasonality, cyclical, and irregular) of a time series will be analyzed by examining the Autocorrelation functions (ACF) and Partial Autocorrelation functions (PACF). The various types of time series models include linear regression, panel regression, seasonal decomposition, exponential smoothing, and ARIMA modeling as well as combining models. In short, this course will equip you with tools necessary to construct forecasts to inform business decisions. As such, the focus of the course will not be only on tools, but also on how they are used in business.

Operations Management  
Parker, Delvon B  
Spring 2023  
Operations, like accounting, finance and marketing, is one of the primary functions of every organization. Operations managers transform human, physical and technical resources into goods and services. Hence, it is vital that every organization manage this resource conversion effectively and efficiently. How effectively this is accomplished depends upon the linkages between operating decisions and top management (strategic) decisions. The focus of the course is decision-making at the operating level of the firm, converting broad policy directives into specific actions within the organization. Strong emphasis will be placed on the development and use of quantitative models to assist in decision making.

Managerial Statistics
Shea, Lauren; VanderWerf, Pieter A
Spring 2023
This course teaches the tools and techniques of statistics most commonly used in business. The major topic areas include: populations, random variables, distributions, and sampling; parameter estimation; hypothesis testing; and simple and multiple regression. All topics are taught by application to actual business problems using original data. The course provides the tools students will need for their functional courses, such as finance and marketing, as well as for core courses in business analytics.

Data Analytics 1: Model Building
VanderWerf, Pieter A
Spring 2023
Machine Learning, big data, data mining, predictive analytics. These are what the course covers. They consist of the creation and use of mathematical computer models to predict important quantities and events with uncanny accuracy. As one book put it, "Who clicks, who buys, and who dies." The course teaches both the principles and the details of the major methods of making and applying these models to actual business problems. To produce models on the computer, students also learn the R coding language. This is the preferred high-level software for Machine Learning and statistical applications.

Coding for Business
Sterpe, Peter J
Spring 2023
This is an introductory course in computer programming based on Python (a language suitable for all business and analytics programs). The course emphasizes coding literacy and teaches coding skills that are relevant for business decision makers. MBA DA3 is a prerequisite. This course will give students the knowledge and confidence to apply coding to a business problem, and the ability to go from a problem statement to a repeatable set of steps for solving the problem in a general way. It will enable students who might not code professionally to work effectively with colleagues who do, and it will equip interested students to develop significant programs of their own.STEM-designated.

International Business Law

Blodgett, Mark S

Summer 2022
This course examines international business law, the law of nations that provides a global framework for doing business. Among topics addressed are sources of international law including custom, principles and treaties; jurisdiction, sales contracts, letters of credit, arbitration, anti-trust, bribery and intellectual property. World Trade Organization and European Union cases are included that address the most current and dynamic global business issues. Students engage in legal research and case analysis as part of a team case presentation.

Real Estate Fundamentals
Chazen, Edward
Fall 2022

This course serves as an introduction to the field of real estate. The course is structured around several themes that will seem more interconnected by the end of the course than at the start. The course covers an overview of real estate and society; landlord-tenant relationship; numbers and capital in real estate; property development; market research and analysis; housing markets; environmental impact and sustainability; and risk management. The course uses various teaching and learning methods: class lectures; case study discussions; videos of interviews with experts and about illustrative projects; homework exercises and guest lectures.

Real Estate
Cella, Teresa L
Fall 2022
This course is an introduction to commercial real estate law. The course examines the process inherent in real estate transactions from a legal and functional viewpoint. It covers issues relating to acquisitions, dispositions, development, ownership, financing, and leasing of commercial properties. The course also explores the legal aspects of relationships involved in real estate transactions, including those between buyers and sellers, landlords and tenants, and borrowers and lenders. Taking a hands-on approach, students will gain insight into how commercial real estate transactions come together.

BSLW118501
Topics: Law and Economics
Wesner, Thomas L
Fall 2022
Can we be optimistic about our future as phrases such as "new normal" and "austerity measures" take hold of our national psyche? Is there reason for hope after the Great Recession has substantially altered the global economic landscape? Through this course, students will utilize an interdisciplinary approach to understanding important legal, business, and economic issues they will soon be called to address as leaders, policymakers, businesspersons, and citizens. Over the course of the semester, students will work to create politically and economically viable solutions to many of the most critical legal, economic, and policy issues facing our nation and world.

The State of Affordable Housing in the States
Van Meter, Robert H
Fall 2022
Course offered for Sophomores only. How does housing affect the lives of Americans? Where you live determines your access to schools, quality of healthcare, fresh food, clean air, parks and recreation, affordable credit, and even how long you are likely to live. This course explores concepts of housing policy and planning at the national, state, and local levels. It examines programs and policies used to subsidize housing for millions of Americans and help them gain access to a decent place to live. Topics will be considered from multiple perspectives including housing finance, design, community planning, inequality, operations management, and sustainability. We will explore the historical and economic context of U.S. housing and discuss the barriers that low-income families face that affects their access to decent housing. The course will be divided into three sections: history, policies, and today's issues. Students will explore some of the most recently developed programs and how they fit into effective community revitalization. These programs will be evaluated in class discussions and group presentations.

Urban Design for Complexity and Sustainability
Littell, Matthew
Fall 2022
The course explores the changing demands on urban environments in the twenty-first century and the newest policies, technologies, and design approaches that are being developed to address them. Topics will include analyses of the factors that shape the physical form of cities, including zoning and regulatory contexts, real estate development patterns, transportation infrastructure, environmental challenges, and aesthetics. The material will be introduced as case studies and surveys, with presentations by design professionals, city officials, and real estate developers. Students will gain literacy in zoning, real estate metrics, planning, and issues related to architectural design and large scale urban design. The semester will conclude with a final project synthesizing many of the topics covered.

The course focuses on the law of commercial transactions relevant to business professionals, especially accountants. It covers the common law of contracts and comprehensively reviews the Uniform Commercial Code, emphasizing the law of sales, commercial paper, and secured transactions. Agency and major forms of doing business such as partnerships, corporations, and limited liability companies, along with securities regulation are examined. The laws of property, bankruptcy, insurance, wills, trusts and estates, along with accountants' liability round out the course. Leading cases and major statutory laws pertaining to business regulation are discussed.

Law II--Business Law
Powers, Richard E
Spring 2023
Recommended for Accounting and Marketing students and for Prelaw students who are interested in a comprehensive overview of the law. Required for those taking the CPA Examination in New York and numerous other states. The course complements BSLW1021, providing broad coverage of topics related to law in business. The content includes many subjects tested on the Business Law portion of the CPA examination including the Uniform Commercial Code law of contracts and sales, negotiable instruments, and secured transactions. The law of agency, various forms of business organizations including general and limited partnerships, corporations, and LLCs, as well as bankruptcy, real property, insurance, wills, trusts and estates, and accountants' liability are discussed.

Real Estate Development
Chazen, Edward
Spring 2023
This course employs various teaching and learning methods: class lectures; videos of interviews with experts and about illustrative projects; case study discussion; guest lectures; team-based virtual tours of Boston neighborhoods that have been transformed by large-scale real estate development; and, a capstone project of teams preparing a development plan for an actual site in the Boston area. This course is focused on what real estate development is and what it means to be a real estate developer. Students will gain an understanding of the process of real estate development, including design and construction; how developers engage with the public sector and the surrounding community to obtain approval for a development; how projects are financed; and, other important elements that contribute to completing successful real estate projects. Also learn about the legal aspects of developments; the ways that development is a catalyst for neighborhood improvement and local economic growth; and, trends in sustainable development.

Labor and Employment Law
Twomey, David P
Spring 2023
Considerations pertaining to organized labor in society are examined including the process of establishing collective bargaining, representation, and bargaining status under the Railway Labor Act and the National Labor Relations Act. Discussion of leading cases relevant to the legal controls that are applicable to intra-union relationships and the legal limitations on employer and union economic pressures. The law of arbitration, public sector collective bargaining, and employee safety and health law are studied. Topics including laws prohibiting discrimination based on race, color, religion, gender, national origin, age, and disability are examined, as well as the developing law of employee privacy.

BSLW117001  
Securities Regulation  
Spooner, Rachel S  
Spring 2023
Securities Regulation is the study of how the government regulates financial markets and their participants, whether a start-up seeking capital through a Kickstarter campaign, a multi-national public company disclosing news to its shareholders, or an investment banker advising a company in its IPO. The course focuses upon the key federal statutes that regulate securities and participants in the securities markets: Securities Act of 1933, Securities Exchange Act of 1934, Sarbanes-Oxley, Dodd-Frank Act of 2010, Foreign Corrupt Practices Act, and several criminal statues. The students learn the role of the Securities and Exchange Commission and how the SEC will impact securities markets and their participants. The course covers the multitude of methods for raising capital within the confines of the Securities Act and the J.O.B.S. Act. Students learn how executives of public companies, and their auditors, lawyers, and bankers, decide when and how to make disclosures about the company. The course also examines financial scams and fraud, considering the ethical boundaries of the complex, fast-paced financial world. The class hosts guests ranging from SEC enforcement attorneys, to in-house counsel at a large bank, to defense counsel with specialties in insider trading and white-collar crime, Foreign Corrupt Practices Act, and the Bernie Madoff case. The class is intended for students interested in careers in finance, audit, leadership in public companies, or law.

BSLW220801  
Urban Action Lab  
McCullagh, Neil P; Perkins, Taylor A  
Spring 2023
Urban Action Lab is a semester long class that provides students with first hand experience working on projects that advance affordable housing and access to opportunity. Students will develop and pursue research projects in partnership with mission driven organizations from across the City of Boston. Each project is completed in collaboration with a partner organization and are selected based on their potential for high-impact contribution to the organization. Project components include research, evaluation, interviewing, and writing. Students will work in close collaboration with partner agencies, the teaching team, and fellow students. The class will meet once per week and will occasionally require students to attend meetings off campus. Please schedule a meeting with professors to discuss.

BSLW229901
Real Estate Field Projects
Chazen, Edward
Spring 2023
Each team will work under the supervision of the Instructor, with weekly team meetings to review the work plan, progress toward identified goals and practicing several presentations that form an important part of the learning experience. There will be three field projects planned.
This course is a complement to in-class learning and provides an experiential learning component to the real estate education at CSOM. The course consists of teams of 4-5 students each working on a field project for a real estate/developer investor, not-for-profit organization, or government agency. The field projects are "real world" real estate projects that involve extensive data collection/analysis, interviews with a range of experts and others that can influence the conclusions and recommendations of the team, and presentations to management of the sponsoring organization. The field projects typically include development proposals for a property; re-development plans for an existing property; and, real estate market research to assist an investor considering expansion into new geographic markets.

Sports Law
Zola, Warren K
Spring 2023
This course studies the law as it applies to professional and amateur sport organizations. The course will focus on how to identify, analyze, and understand legal issues in general and the ramification of those issues on the sports industry specifically, with special attention given to professional teams and leagues. Among the subjects to be discussed will be antitrust law, tort law including the liability for conduct occurring in competition, contract law, constitutional law, labor law, collective bargaining, gender discrimination and Title IX, and agency law.

Business Writing and Communication Courses: Fall 2022

BCOM102101
Essential Business Communication
Rice, Jocelyn L
Fall 2022

Essential Business Communication is a one-credit asynchronous course designed to support sophomores (and second-semester first-year students) transitioning from academic to business writing and preparing them for on-the-job communication. Students learn how to boost their business writing and presentation skills through various activities, including analyzing audiences, writing everyday business communication, collaborating, and presenting. Instructors and writing coaches provide individualized feedback to students in this online environment. The course is graded pass/fail. The course will be offered in one five-week term within a semester.

Individual Directed Study
Sadka, Ronnie
Summer 2022
This is an opportunity for students interested in independent study to engage in a one-to-one relationship with a faculty member of the Finance Department. This course is only available to students who have demonstrated (1) an extremely strong interest in a particular area of finance, and (2) a strong self-motivation and self-discipline in previous studies. Students are required to present their research results to a departmental faculty group towards the end of the semester. The permission of the department chairperson is to be obtained when the individual faculty member has agreed to direct the student's research project.

MFIN661601  
**Introduction to the Investment Banking Industry**  
**Cramer, Robert E**  
**Summer 2022**  
This course provides an overview of investment banking. We will study the investment banking industry with a specific focus on the role of investment bankers in capital markets and recent regulatory changes. Provide both an institutional perspective on the investment banking industry and an opportunity to apply financial theories and models. Some of the specific topics that we will cover are stock underwriting and valuation, fixed-income securities underwriting, including junk bonds, asset securitization, merchant banking and private equity firms, money management and mutual funds, structuring deals, including mergers, acquisitions, and divestitures, global financial markets, securities regulations, and ethics.

MFIN662501  
**Private Equity**  
**Gasperoni, James H**  
**Summer 2022**
This course is the study of Private Equity as an asset class and its various components. Private Equity involves the investment of capital into companies and assets that are not publicly traded on stock exchanges. The objective of the course is to provide a basic understanding of the Private Equity ecosystem: private equity companies, underlying investments in companies (or assets) and the investors that provide financing for deals. A primary focus of the class will be traditional buyout investments: an area of the capital markets that is growing in both size and opportunity as well as increasing in interest from investors. In addition, the course will consider the similarities and differences between typical buyouts and other private equity styles.

**Economics**  
**Sanzenbacher, Geoffrey T**  
**Summer 2022**

The course is intended to introduce the students to basic economic concepts such as supply and demand, market equilibrium, efficiency, opportunity costs, sunk costs, different market structures, gross domestic product (GDP), money, inflation, unemployment, and monetary policy. The course will be divided into two parts: (1) Microeconomics where the focus is on individual economic agents. In this part consumer demand, firm supply, market structure, equilibrium, efficiency, opportunity costs, and sunk costs are covered. (2) Macroeconomics where the focus is the economy as a whole. In this part the topics are GDP, growth, money, inflation, and unemployment.

MFIN882001
Management of Financial Institutions
James, Robert F
Summer 2022
This course considers banks and other financial institutions as information and deal-making entities. This broad perspective is used to explain how and why changing information and contracting technologies are altering the structure of the financial services industry and financial regulation. Lectures explore the implications of these ongoing changes for the methods financial institution executives should use to measure and manage an institution's risk and return.

Corporate Financial Strategies
Hotchkiss, Edith
Fall 2022
This course examines how corporate financial managers create value for stakeholders through a broad range of financial transactions. We will first take an in-depth look at corporate valuation methodologies from both a theoretical and applied perspective. Then, using a combination of case studies, class presentations, and assigned readings, we will focus on applications of these methods in the context of various types of corporate restructurings. Specific applications will include capital structure and financing decisions, M&A and other asset restructuring decisions, and more complex financial transactions including buyouts and distressed restructurings.

This course examines how corporate financial managers create value for stakeholders through a broad range of financial transactions. We will first take an in-depth look at corporate valuation methodologies from both a theoretical and applied perspective. Then, using a combination of case studies, class presentations, and assigned readings, we will focus on applications of these methods in the context of various types of corporate restructurings. Specific applications will include capital structure and financing decisions, M&A and other asset restructuring decisions, and more complex financial transactions including buyouts and distressed restructurings.

MFIN220701
Real Estate Finance
Chazen, Edward
Fall 2022
This course focuses on how capital is applied to debt and equity financing of income-producing real estate. The course content covers private debt and equity and public securities markets for real estate finance. The course format includes lectures, case study discussions, financial modeling exercises, guest speakers, REIT stock analysis, discussion of selected readings and simulation of negotiations. The course covers real estate finance from the perspective of the users of capital (developers and property owners) and the sources of capital (lenders and equity investors). The primary student outcomes are the ability to value commercial property; understand risks; how to structure a financing of commercial real estate; know the diverse sources of capital in the real estate industry and analyze, discuss and present a professional financing for debt and equity.

Financial Policy
Peters, Helen F
Fall 2022
Topics treated intensively include the valuation of the firm, risk analysis in capital budgeting, capital structure theory and policy, and dividends. The second phase will deal almost exclusively with cases designed to provide an opportunity to (1) apply the principles covered during the first segment; (2) integrate the firm's financial decisions; (3) demonstrate the relationship between corporate finance and other subfields of finance; (4) introduce the notion of financial strategy; and (5) show the relationship between finance and other management functions.

MFIN226001
Active Portfolio Management
Dahan, Arie M
Fall 2022
The course provides an introduction to portfolio management with focus on quantitative investment process and methods. The course balances theoretical foundations with practical applications. Primary topics include asset allocation, portfolio construction including optimization, risk modeling, and risk measurement and management. Instruction will combine lectures, case discussions, and workshops, providing opportunities for students to apply quantitative methods to real world problems in several of the explored areas. The course combines investment ideas with analytics, so prior study in any or all of the following areas will make the course more enjoyable: probability/statistics (e.g., normal distributions, regression analysis), linear algebra (e.g., matrix algebra), and introductory calculus (e.g., derivatives). In addition, workshops will include use of both Microsoft Excel and Python (e.g., Jupyter Notebooks). Basic competency in each is a minimum requirement, and of course, the greater your skills, the better.

Applied Fundamental Analysis
Navaratnam, Arvind
Fall 2022
The objective of the course is to provide hands-on experience in financial statement analysis in a real-world setting. Students will be exposed to general tools of financial analysis, theoretical concepts, and practical valuation issues. By the end of the course, students should develop a framework for evaluating an investment opportunity by using a firm's financial statements to draw an understanding of their performance and provide a basis for making reasonable valuation estimates, as well as have an understanding of the challenges investor face in determining the earnings power of a company. CGSOM students can earn credit for either MFIN6665 or MFIN8869, not both.

MFIN668001
Renewable Energy and Sustainable Investments
Adamson, Seabron C; Raikar, Santosh G
Fall 2022
In this course we will examine how large scale renewable energy projects actually get financed and built, using the structures of modern non-recourse project finance. We will examine the economics of large-scale green power production, and how it fits into the U.S. and global energy industries. Through a mixture of lectures and real-life examples students will get to see how renewable energy project finance works in actual deals that mix finance, public policy, legal, engineering, and environmental issues. The skills developed in analyzing non-recourse cash flow-based finance will be generally applicable to students interested not just in green energy, but also more widely in private equity and infrastructure investing. The course is designed to introduce students to the theory and practice of project finance in the energy and renewables sector, complementing academic finance theory with the practical aspects of financing capital intensive energy projects.

AIM1: Applied Investment Management
Martens, David J
Fall 2022

This course provides an opportunity for students to utilize both theoretical and practical aspects of the investment management process by competing to actively manage a million dollar portfolio for the University. AIM1 teaches students about institutional portfolio management, asset allocation, risk assessment, investment manager evaluation, and fundamental equity analysis. Students are placed in investment teams to respond to a Request for Proposal (RFP) in which they develop a framework for identifying and evaluating equities and bonds and managing a diversified risk-adjusted portfolio. Winning teams will be selected based on final presentations to a board of professional institutional investors and given the opportunity to manage live accounts in AIM2 during the spring semester.

MFIN885202
Financial Econometrics
Mullarkey, Colm D
Fall 2022
This course teaches how mathematical techniques and econometrics are used in financial research and decision making. Topics include matrix algebra, differential and integral calculus, simple linear regression, residual analysis, multivariate regression, and the generalized linear model. Students will be introduced to the latest developments in theoretical and empirical modeling.

MFIN886001
Derivatives and Risk Analytics
Dong, Gang Nathan
Fall 2022
This course is reserved for special topics, offering advanced course work in sub-fields of finance. This year, MFIN8860 is an introduction to derivative assets, financial engineering, and risk management. The course covers the pricing of futures and options contracts as well as securities that contain embedded options, risk management strategies using positions in derivative securities, static hedging, and dynamic hedging. Applications from commodity, equity, bond, and mortgage-backed markets are considered. STEM-designated

MFIN886301  
**Ph.D. Seminar: Empirical Asset Pricing**  
Balduzzi, Pierluigi  
**Fall 2022**  
This course is for second year Ph.D. students of finance. The course is intended to generate enthusiastic, high quality intellectual activity around the course material. Focuses on the development of skills that will help students become conversant enough with basic theory and the current literature on asset pricing that would permit them to read critically and analyze papers in this area, develop enough expertise in selected empirical methods in finance that they will be able to use these techniques in their research, and to find potential thesis topics.

**Credits:** 3  
**Room and Schedule:** Fulton Hall 240 Th 09:00AM-11:20AM  
**Satisfies Core Requirement:** None

MFIN887001
Data Analytics in Finance
Reuter, Jonathan M
Fall 2022
Data Analytics in Finance focuses on critical skills in programming and computation/analysis of financial data, and more importantly, pragmatic applications in portfolio management and risk management. Theoretical concepts and background for these techniques will be introduced, and the focus is on their applications and hands-on implementation utilizing software packages and programming platforms that are widely used in the financial industry (Python). The course will extensively focus on real-world applications of finance theory. STEM-designated

Real Estate Finance  
Chazen, Edward  
Spring 2023  
This course focuses on how capital is applied to debt and equity financing of income-producing real estate. The course content covers private debt and equity and public securities markets for real estate finance. The course format includes lectures, case study discussions, financial modeling exercises, guest speakers, REIT stock analysis, discussion of selected readings and simulation of negotiations. The course covers real estate finance from the perspective of the users of capital (developers and property owners) and the sources of capital (lenders and equity investors). The primary student outcomes are the ability to value commercial property; understand risks; how to structure a financing of commercial real estate; know the diverse sources of capital in the real estate industry and analyze, discuss and present a professional financing for debt and equity.

Room and Schedule: Fulton Hall 145 MW 10:30AM-11:45AM
MFIN222001

Global Macro and the Financial System

Schmelzing, Paul

Spring 2023

The course is designed for both undergraduate and graduate students with interests in applied finance, economics, and history - especially students who are planning to work in financial markets, financial policy, or economic or financial research. Students should have an interest in current issues in international finance and policy, and enjoy empirical approaches - but no advanced quantitative background is required. This course focuses on a long-run view of the international financial system: we place the post-2008, post-pandemic financial environment into global macro, in asset markets, and in the banking system into very long-run context, in order to assess current secular trends in markets and the macroeconomy, including trends and "cycles" in inflation, growth, asset valuations, and financial crises. Students will first be introduced to the general contours of the international financial system up to 2022 - before turning to the major trends in banking and sovereign crises, monetary policy, asset pricing, and globalization. We put specific emphasis on discussing international financial themes that currently occupy policymakers, practitioners, and academics in a global "high inflation, low interest rate regime", in the context of longer-run historical markets data. We also analyze a wide range of past "shocks" and "crises" in global macro and finance over time, to learn how to evaluate risks. Among other issues, we will focus on the following current debates: 1914, 1981 - and 2022? Major turning points in asset markets. Long-run financial crisis patterns and interventions. Historical shifts in the global reserve currency. Long-run trends in inequality, globalization, and wealth distribution.

Behavioral Finance
Hartzmark, Samuel
Spring 2023
This course explores how the market is influenced by the behavior of investors, attributable to psychology or institutional constraints. We will survey recent research on possible mispricing in these markets, investor behavior, the predictability of security returns, and the practical limits to arbitrage. Possible topics include earnings and price momentum, market anomalies, tactical asset allocation, under-reaction to news, security complexity and obfuscation, and socially responsible investing. Practical implications for portfolio management are developed and emphasis will be placed on data-driven analysis of financial markets. The course has 3 major goals. The first will be to take the view of a professional money manager to utilize knowledge of investor behavior to understand market movements and (hopefully) profit from opportunities that are available. The second will be to understand how data is used to uncover such opportunities. The third is to understand how individuals make decisions in order to make better personal investment decisions and avoid commonly exhibited biases when making financial decisions. Achieving these goals will require learning some theories, facts and statistical tools. The theories will allow for a common language in the discussion of returns and will include risk-based asset pricing, present value relations and cognitive psychology. The facts relate to risk and return, value vs. growth, momentum, market frictions and trading costs. Support for both of these will come from the data for which we will need the tools of portfolio analysis, multifactor models and forecasting regressions.

Corporations, investment banks, and asset management firms increasingly base their operational and investment decisions on the statistical analysis of "big data." In this course, you will be introduced to Python, a popular open-source modern programming language, and learn how to use it to extract data from online sources, estimate univariate and multivariate regressions on real-world financial data, and perform Monte Carlo simulations. There will be an optional review/help session of Friday afternoons, geared towards students with limited prior coding experience.

Individual Directed Study
Sadka, Ronnie
Spring 2023
This is an opportunity for students interested in independent study to engage in a one-to-one relationship with a faculty member of the Finance Department. This course is only available to students who have demonstrated (1) an extremely strong interest in a particular area of finance, and (2) a strong self-motivation and self-discipline in previous studies. Students are required to present their research results to a departmental faculty group towards the end of the semester. The permission of the department chairperson is to be obtained when the individual faculty member has agreed to direct the student's research project.

Venture Capital
Hession-Kunz, Andrew
Spring 2023
This course looks at the nature of the VC firm, its fundraising, and compensation. It explores the portfolio strategies, valuation, and corporate management issues. Of importance are the VC’s exit strategies, term sheet negotiations, and syndicating. Course includes analyzing long term financial projections as part of a simulation, in which you work with the Entrepreneurial Finance course to analyze early-stage deal terms and negotiate an investment round. This course is for people who are not taking nor plan to take MFIN2210 Entrepreneurial Finance.

Introduction to the Investment Banking Industry
Cramer, Robert E
Spring 2023
This course provides an overview of investment banking. We will study the investment banking industry with a specific focus on the role of investment bankers in capital markets and recent regulatory changes. Provide both an institutional perspective on the investment banking industry and an opportunity to apply financial theories and models. Some of the specific topics that we will cover are stock underwriting and valuation, fixed-income securities underwriting, including junk bonds, asset securitization, merchant banking and private equity firms, money management and mutual funds, structuring deals, including mergers, acquisitions, and divestitures, global financial markets, securities regulations, and ethics.

Equity Securities Analysis
Azevedo Duarte Silva, Ernesto T
Spring 2023
The equities securities analysis and valuation course will teach a highly rigorous approach to equities securities analysis and valuation with a heavy emphasis on in-class discussion and case study analysis. Initially, the course will focus on financial theory that underpins equity security valuation, and then move on to understand how industry structure and a company's competitive advantage influences an investor's decision making and valuation. Financial statement analysis, modeling, and different valuation techniques will be explored in detail. Where appropriate, guest lecturers will be brought in to share their specific expertise and perspectives as an investor. By the end of the course, the goal will be to have every student be able to analyze a company as a potential investment and understand its valuation.

**Private Equity**  
**Gasperoni, James H**  
**Spring 2023**

This course is the study of Private Equity as an asset class and its various components. Private Equity involves the investment of capital into companies and assets that are not publicly traded on stock exchanges. The objective of the course is to provide a basic understanding of the Private Equity ecosystem: private equity companies, underlying investments in companies (or assets) and the investors that provide financing for deals. A primary focus of the class will be traditional buyout investments: an area of the capital markets that is growing in both size and opportunity as well as increasing in interest from investors. In addition, the course will consider the similarities and differences between typical buyouts and other private equity styles.

MFIN884001
International Finance
Albuquerque, Rui
Spring 2023
This course introduces students to identifying and managing currency risk by providing a description of the international financial markets, their products, and applications. The course presents an overview of international money markets, bond markets, the foreign exchange spot and forward markets, and foreign exchange derivative markets. The course sets to identify nominal international risk factors that firms might be exposed to and discusses several of the recent international banking and currency crises. Students are introduced to a variety of financial tools or derivative products that can be used to hedge part or all of the exposure to these risk factors; foreign currency futures, options, forward contracts, and swaps.

MFIN884501
Global Financial Markets
Basta, Karim M
Spring 2023
The focus of this course is on the fundamental drivers, functioning and inter-connectedness of global financial markets. Products covered will be interest rate markets (government bonds, money markets, swaps, interest rate derivatives, credit markets), equity indices, and foreign exchange markets. Tickers flash across TV screens detailing every move in interest rates, currencies and equity markets. Why do some events move markets sometimes and not at other times? What just happened in UK markets? We will explore the role of economic data, flow of funds analysis, central bank policy, and fiscal and other government policies from a macro perspective in assessing these questions. We will learn from historical episodes that still shape market structures and behavior today. We will approach these topics from a practitioner's perspective and two or three active portfolio managers will be guest lecturers over the course of the semester. Learning will be via a combination of classroom, reading research papers, and observing markets in real time. There will be weekly homework assignments related to required reading that include current events. A team based project and a mid-term project will tie together subjects covered to that point in the course. Discussions of the current market environment will take place over the period of the course, with the final project requiring each student to formulate and present an investment outlook that ties together the various disciplines learned over the semester. A curious and open mind are helpful attributes for students wishing to take this course.

MFIN885001  
**Global Macro and the Financial System**  
Schmelzing, Paul  
**Spring 2023**
The course is designed for graduate students with interests in applied finance, economics, and history - especially students who are planning to work in financial markets, financial policy, or economic or financial research. Students should have an interest in current issues in international finance and policy, and enjoy empirical approaches - but no advanced quantitative background is required. This course focuses on a long-run view of the international financial system: we place the post-2008, post-pandemic financial environment into global macro, asset markets, and in the banking system into very long-run context, in order to assess current secular trends in markets and the macroeconomy, including trends and "cycles" in inflation, growth, asset valuations, and financial crises. Students will first be introduced to the general contours of the international financial system up to 2022 - before turning to the major trends in banking and sovereign crises, monetary policy, asset pricing, and globalization. We put specific emphasis on discussing international financial themes that currently occupy policymakers, practitioners, and academics in a global "high inflation, low interest rate regime", in the context of longer-run historical markets data. We also analyze a wide range of past "shocks" and "crises" in global macro and finance over time, to learn how to evaluate risks. Among other issues, we will focus on the following current debates: 1914, 1981 - and 2022? Major turning points in asset markets. Long-run financial crisis patterns and interventions. Historical shifts in the global reserve currency. Long-run trends in inequality, globalization, and wealth distribution.

Spring 2023  
This PhD course will examine how psychological biases and non-standard preferences interact with traditional topics in corporate finance and asset pricing. We will survey recent research on biases in individual decision-making, the predictability of security returns, and the practical limits to arbitrage. The objective of the course is (1) to familiarize students with the foundations and recent developments of research in behavioral finance, and (2) to help students develop research ideas and quantitative skills, which can be used to write a successful PhD dissertation.

Ph.D. Seminar: Topics in Asset Pricing  
Albuquerque, Rui  
Spring 2023  
The course covers a variety of asset pricing topics and models. The first part of the course deals with representative agent models in economies with a single risky asset. The second part of the course introduces heterogeneity along the investor side or the asset side. We cover models of learning, asymmetric information, differences in beliefs, market segmentation, idiosyncratic risk, agency conflicts, and others.

Information Technology (IT) and Data Analytics now permeate the strategy, structure, and operations of modern enterprises, and new business practices have led to an orders of magnitude increase in the amount of data available for analysis and decision-making. It is essential that managers develop a deep understanding of how data can be structured, captured, and queried in order to support operations, decision-making, and strategic insight. At the same time, managers must become fluent with IT so that they can promote innovative strategic initiatives that are increasingly data and IT dependent. In this course, students will develop an understanding of IT theory and practice, study key emerging technologies, and develop their ability to identify new opportunities made possible by IT. This course will also provide students with a deep understanding of data and analytics by exploring how business processes are analyzed, data is modeled (using entity relationship diagrams), databases are designed, and data is queried using SQL. This combination of theory and practice will allow students to develop their ability to identify and take advantage of the new opportunities now made possible by data analytics and Information Technology. The on-campus section of this course (ISYS7700) will meet weekly on campus. Please note that the online asynchronous section of this course will also include two or three synchronous web conferences during the semester. Please review the course syllabus for the schedule for these web conferences, or contact the instructor.

ISYS770501
Data Analytics 3: In Practice
Karpovsky, Anna
Summer 2022
Modern information systems now generate massive volumes of data. Organizations everywhere struggle to aggregate, analyze, and monetize the growing deluge of data. Business Analytics capitalizes on this data by combining statistical and quantitative analysis, explanatory and predictive modeling, and fact-based management. Managers can explore patterns, predict future trends and develop proactive, knowledge-driven decisions that affect all parts of modern organizations. This course provides students with a pragmatic familiarity with the capabilities and limitations of emerging analytics techniques, an introduction to Python, an overview of methods and tools, and a core understanding required to be an intelligent manager, designer, and consumer of analytics models.

**Information Systems Courses: Fall 2022**

**ISYS102105**  
**Digital Technologies: Strategy and Use**  
**Kim, Do Yoon**  
**Fall 2022**
Information systems play a vital role in management. Future business professionals need to be able to assess, evaluate, and apply emerging technology to business. In this course, we approach the subject in two ways. First, students learn how professionals use technology in practice. Through various hands-on tech workshops, students will get a better understanding of how to apply technologies in business fields such as marketing, finance, operations. Second, students learn strategic management through the lens of technology. Students examine the role of technology in promoting innovation and organizational competitiveness across the functional areas of the firm. Through business case studies, students get a better understanding of how organizations use information systems to gain and sustain competitive advantage. Note: This class no longer teaches Excel. It is now taught in: BZAN1037 Excel for Business Analytics.

**ISYS216001**  
**Intro to Programming using Swift for iOS App Development**  
**Gallaugher, John M**  
**Fall 2022**
In this fast-paced course, students will learn the Swift programming language and iOS app development skills. Using a "flipped-classroom" approach, the students take lectures in a series of online videos embedded in a web-based course/reference/quiz book, following along with videos as they learn programming concepts and build apps. Although this is a flipped class, expect a challenging course. Class is mandatory (this is NOT an online course) and class time will be used for additional exercises, concept review, and student questions. Students are required to bring a fully-charged Mac laptop to each class with the latest version of Apple's free Xcode software installed (make sure you have access to a Mac that meets these requirements before enrolling). While this course is rigorous, challenging, and covers a broad set of topics at a rapid pace, the course assumes no prior programming experience. Students should be prepared to spend significant time each week on self-directed learning and regular programming projects. This course can be used in place of ISYS 2157 Programming for Management for credit toward the Information Systems concentration.

ISYS217001
Physical Computing - Interactive Art, Robotics, and Tech for Good
Gallaugher, John M
Fall 2022
Low-cost microcontrollers, sensors, and computing devices like the Raspberry Pi make it possible to create technical projects that humans can physically interact with. This course assumes no prior programming experience but will progress quickly through block-based MakeCode programming, then CircuitPython programming so that all students have coding knowledge necessary to create hardware projects. Students will purchase an amount of hardware and tools similar to the cost of books in a standard course, and we'll use these parts to build a series of projects that control lights, read sensors, produce sound, respond to touch and app control, capture camera images, and more. We'll also build a wheel-based robot, and students will have an opportunity to create and present several original projects and share their work with classmates.

ISYS226701
Technology and Culture
Griffith, William
Fall 2022
This interdisciplinary course will first investigate the social, political, psychological, ethical, and spiritual aspects of the Western cultural development with a special emphasis on scientific and technological metaphors and narratives. We will then focus on the contemporary world, examining the impact of our various technological creations on cultural directions, democratic process, the world of work, quality of life, and especially on the emergent meanings for the terms "citizen" and "ethics" in contemporary society. Students will explore technologies in four broad and interrelated domains: (1) computer, media, communications, and information technologies, (2) biotechnology, (3) globalization, and (4) environmental issues.

Design Thinking and Strategy
Dickinson, Kristine D
Fall 2022

"Design thinking is a human-centered approach to innovation that draws from the designer's toolkit to integrate the needs of people, the possibilities of technology, and the requirements for business success." -Tim Brown, CEO of IDEO. Strategic design thinking is an integral driver of innovation and a significant factor in a business' ability to foresee and adapt to customer needs. Companies like Apple, IDEO, and Pixar are all pioneers in the field, and this course will draw directly from their proven methods. Students will learn the various phases of design thinking, and how to apply a customer-centric approach to products and services in a range of industries. Students will delve into topics such as user experience (UX) product design, creative problem-solving, strategic storytelling, and customer-centric business decision making. Course content will include team projects, case studies, and occasional guest lectures from industry experts. The class will be highly focused on practical experimentation and is directly relevant for students interested in product and brand management, marketing strategy, entrepreneurship, and beyond.

Tech Trek
Doyle, Jeremiah T
Fall 2022
The Tech Trek course is a 1-credit professional development course that introduces students to the entrepreneurial mindset and is open to and intended for undergrads enrolled in any undergraduate program at BC (e.g. CSOM, MCAS, LSOE). An entrepreneurial mindset is a critical component for new ventures, innovation within large companies, starting social initiatives, and developing a rewarding and impactful career in an ever-changing world. The course combines 4 traditional classroom lectures with a series of meetings with entrepreneurs, venture capitalists, and other executives throughout the semester. In the past year, students have met with senior leaders at companies like Google, Facebook, Airbnb, Uber, Salesforce, Goldman Sachs, Tesla, Dropbox, Fanatics, Twitter, numerous venture capital firms, and startups of all shapes and sizes. Course work and visits have an entrepreneurial focus, covering topics such as venture capital, entrepreneurial management, social media and platform strategies, and the social/ethical implications of digital technologies. We spend class time reflecting on our visits with entrepreneurs, discussing what implications the visit has for our understanding of business strategy and our own careers. The class is intended to help students identify and explore their own interests and what these interests mean for their career trajectory. This class is required for students from the class of 2025 and forward who wish to co-concentrate in Entrepreneurship.

Database Systems and Applications
Wyner, George M
Fall 2022
This course is required for Information Systems concentrators class of 2023 and earlier. It is being replaced by ISYS3350 for class of 2024 and later. This course provides in-depth coverage of database systems and their uses. Topics include database architecture, design strategies, SQL queries, security, performance, and using database tools and scripting languages to create sophisticated forms and applications, including web applications. The goal of the course is to give students the knowledge and skills to use databases effectively in any business situation.

**Managing Digital Innovation**  
**Fichman, Robert**  
**Fall 2022**  
The steady march of Moore's Law has accelerated the introduction of new products, processes, and business models enabled by digital technology. These digital innovations are transforming how we live and work, how companies compete, and the structure of entire industries. This course will provide students with the concepts and frameworks they will need to: (1) understand the nature of digital innovations and the factors affecting their emergence and diffusion, (2) identify and evaluate digital innovation opportunities (and threats), (3) manage the digital innovation process in organizations, and (4) evaluate the effects of digital innovation on business and society.

Data Analytics in Practice
Steen, Sebastian
Fall 2022

Organizations everywhere struggle to aggregate, analyze, and monetize the growing deluge of data generated by modern information systems. Data analytics capitalizes on this data by processing, transforming it, and subsequently applying statistical and quantitative analysis and explanatory and predictive modeling. Managers can explore patterns, predict future trends, and develop proactive, knowledge-driven decisions that affect all parts of modern organizations. This course will familiarize you with the capabilities and limitations of emerging analytics techniques, essential knowledge about data analytics programming and tools, and a core understanding required to be an intelligent manager and consumer of analytics. Upon completion of this course, you will be able to: perform basic data analytics tasks including: data profiling and feature engineering, data collection, transformation, and use of API, text transformation, data visualization, predictive modeling; understand biases in data and be a savvy consumer of analytics; justify decisions on the basis of analytics and identify opportunities; define problems that analytics can solve and provide data-driven solutions; use the ideas, concepts, and terminology of analytics appropriately to communicate with both business and data professionals. Systems Analysis and Design
Bernier, Brian; Cann, Scott
Fall 2022
This course is required for Information Systems concentrators. The course studies information systems (IS) development including requirements, analysis, design, and implementation phases and workflows. We investigate the roles of systems analysts; serving as intermediaries between users, managers, and implementers; and helping each to understand the needs and problems of others. The student will learn about major methods and tools used in the systems development process. Please note that Database Systems and Applications (ISYS3257/CSCI1157) must be completed prior to taking this course.

Large quantities of information are available to describe our social and physical environment with high detail, but making sense of this data requires specialized skill sets. Geographic Information Systems (GIS) is a general approach to analysis and is a powerful set of tools for understanding complex problems or for making a compelling argument about issues grounded in the physical or social environment. It is widely used in the public and private sectors. This course will introduce students to the use of GIS and representation as a means of looking at and representing spatial data. Students will learn how to perform the three broad steps of spatial analysis: 1) collecting and organizing data, 2) analyzing this data for appropriate patterns, and 3) using software to represent data on maps to support decision making. STEM-designated.

The challenges and issues of cybersecurity are everywhere, and today, these are not just technical issues, but critically important business issues for all levels of management. The goal of this course is to develop an understanding of cybersecurity principles, procedures, tools and technology from a managerial perspective. The first part of this course is a discussion of why cybersecurity is a difficult and pervasive problem. We then learn about the different types of threats and study the tools and techniques that society, organizations, and individuals have to mitigate them, with a focus on risk management and internal controls. We will also explore a number of new areas of work including cryptocurrency and the security requirements for the Internet of Things (IoT). An important part of the course will be team projects at the end of the term, where students apply the concepts and techniques we have studied to a real-world management problem or challenge. STEM-designated.

ISYS664501
Data Visualization
Parker, Kenneth J
Fall 2022
This course covers foundations of data visualization and best practices to help students effectively analyze data and present their insights clearly in a way that will engage their audience. The course provides discussions and presentations on topics such as visual perception, the various chart types and when to use them, the effective use of colors, typography, maps, and other visualization techniques for incorporating analytics and storytelling, and teaches through many examples of compare and contrast. The conceptual discussions will be integrated with hands-on experience using Tableau. STEM-designated.

ISYS665501
Introduction to Blockchain and its Business Applications
Collen, Bennett I
Fall 2022
The objective of this course is to introduce the business of blockchain—a technology that has the potential to drastically alter the way value is stored, exchanged, shared, and distributed. It is the backbone of the next iteration of the Internet: Web 3.0 or The Internet of Value. This course does not require any technical knowledge or prior knowledge of the subject, and is designed to give students a foundational knowledge of blockchain technology and a familiarity with the basic principles that govern blockchain protocols. Students will obtain a fluency in the terms and concepts required to understand how this powerful technology works. Most importantly, students will study real-world applications of the technology, which range far beyond blockchain's original use case (cryptocurrency) and hear from a number of influential guest speakers who are using or investing in blockchain technology at their companies today. Students who complete the course will understand blockchain and cryptocurrency's game-changing potential, be able to separate fact from hype, and be effective leaders in the space.

ISYS770001  
Data Analytics 2: Data Management for Analytics  
Evenchik, Leonard N  
Fall 2022
Information Technology (IT) and Data Analytics now permeate the strategy, structure, and operations of modern enterprises, and new business practices have led to an orders of magnitude increase in the amount of data available for analysis and decision-making. It is essential that managers develop a deep understanding of how data can be structured, captured, and queried in order to support operations, decision-making, and strategic insight. At the same time, managers must become fluent with IT so that they can promote innovative strategic initiatives that are increasingly data and IT dependent. In this course, students will develop an understanding of IT theory and practice, study key emerging technologies, and develop their ability to identify new opportunities made possible by IT. This course will also provide students with a deep understanding of data and analytics by exploring how business processes are analyzed, data is modeled (using entity relationship diagrams), databases are designed, and data is queried using SQL. This combination of theory and practice will allow students to develop their ability to identify and take advantage of the new opportunities now made possible by data analytics and Information Technology.

The on-campus section of this course (ISYS7700) will meet weekly on campus. Please note that the online asynchronous section of this course will also include two or three synchronous web conferences during the semester. Please review the course syllabus for the schedule for these web conferences, or contact the instructor.

ISYS770501  
Data Analytics 3: In Practice  
Karpovsky, Anna  
Fall 2022
Modern information systems now generate massive volumes of data. Organizations everywhere struggle to aggregate, analyze, and monetize the growing deluge of data. Business Analytics capitalizes on this data by combining statistical and quantitative analysis, explanatory and predictive modeling, and fact-based management. Managers can explore patterns, predict future trends and develop proactive, knowledge-driven decisions that affect all parts of modern organizations. This course provides students with a pragmatic familiarity with the capabilities and limitations of emerging analytics techniques, an introduction to Python, an overview of methods and tools, and a core understanding required to be an intelligent manager, designer, and consumer of analytics models.

Information Systems Courses: Spring 2023

**ISYS216001**  
**Intro to Programming using Swift for iOS App Development**  
**Gallaugher, John M**  
**Spring 2023**

In this fast-paced course, students will learn the Swift programming language and iOS app development skills. Using a "flipped-classroom" approach, the students take lectures in a series of online videos embedded in a web-based course/reference/quiz book, following along with videos as they learn programming concepts and build apps. Although this is a flipped class, expect a challenging course. Class is mandatory (this is NOT an online course) and class time will be used for additional exercises, concept review, and student questions. Students are required to bring a fully-charged Mac laptop to each class with the latest version of Apple's free Xcode software installed (make sure you have access to a Mac that meets these requirements before enrolling). While this course is rigorous, challenging, and covers a broad set of topics at a rapid pace, the course assumes no prior programming experience. Students should be prepared to spend significant time each week on self-directed learning and regular programming projects. This course can be used in place of ISYS 2157 Programming for Management for credit toward the Information Systems concentration.

**Credits:** 3  
**Room and Schedule:** Fulton Hall 415 M 04:30PM-06:50PM  
**Satisfies Core Requirement:** None  
**Prerequisites:** None
ISYS217001
Physical Computing - Interactive Art, Robotics, and Tech for Good
Gallaugher, John M
Spring 2023
Low-cost microcontrollers, sensors, and computing devices like the Raspberry Pi make it possible to create technical projects that humans can physically interact with. This course assumes no prior programming experience but will progress quickly through block-based MakeCode programming, then CircuitPython programming so that all students have coding knowledge necessary to create hardware projects. Students will purchase an amount of hardware and tools similar to the cost of books in a standard course, and we'll use these parts to build a series of projects that control lights, read sensors, produce sound, respond to touch and app control, capture camera images, and more. We'll also build a wheel-based robot, and students will have an opportunity to create and present several original projects and share their work with classmates.

ISYS226701
Technology and Culture
Griffith, William
Spring 2023
This interdisciplinary course will first investigate the social, political, psychological, ethical, and spiritual aspects of the Western cultural development with a special emphasis on scientific and technological metaphors and narratives. We will then focus on the contemporary world, examining the impact of our various technological creations on cultural directions, democratic process, the world of work, quality of life, and especially on the emergent meanings for the terms "citizen" and "ethics" in contemporary society. Students will explore technologies in four broad and interrelated domains: (1) computer, media, communications, and information technologies, (2) biotechnology, (3) globalization, and (4) environmental issues.

ISYS317801  
**Design Thinking and Strategy**  
Dickinson, Kristine D  
Spring 2023
"Design thinking is a human-centered approach to innovation that draws from the designer's toolkit to integrate the needs of people, the possibilities of technology, and the requirements for business success." -Tim Brown, CEO of IDEO. Strategic design thinking is an integral driver of innovation and a significant factor in a business' ability to foresee and adapt to customer needs. Companies like Apple, IDEO, and Pixar are all pioneers in the field, and this course will draw directly from their proven methods. Students will learn the various phases of design thinking, and how to apply a customer-centric approach to products and services in a range of industries. Students will delve into topics such as user experience (UX) product design, creative problem-solving, strategic storytelling, and customer-centric business decision making. Course content will include team projects, case studies, and occasional guest lectures from industry experts. The class will be highly focused on practical experimentation and is directly relevant for students interested in product and brand management, marketing strategy, entrepreneurship, and beyond.

The TechTrek course is a 1-credit professional development course that introduces students to the entrepreneurial mindset and is open to and intended for undergrads enrolled in any undergraduate program at BC (e.g. CSOM, MCAS, LSOE). An entrepreneurial mindset is a critical component for new ventures, innovation within large companies, starting social initiatives, and developing a rewarding and impactful career in an ever-changing world. The course combines 4 traditional classroom lectures with a series of meetings with entrepreneurs, venture capitalists, and other executives throughout the semester. In the past year, students have met with senior leaders at companies like Google, Facebook, Airbnb, Uber, Salesforce, Goldman Sachs, Tesla, Dropbox, Fanatics, Twitter, numerous venture capital firms, and startups of all shapes and sizes. Course work and visits have an entrepreneurial focus, covering topics such as venture capital, entrepreneurial management, social media and platform strategies, and the social/ethical implications of digital technologies. We spend class time reflecting on our visits with entrepreneurs, discussing what implications the visit has for our understanding of business strategy and our own careers. The class is intended to help students identify and explore their own interests and what these interests mean for their career trajectory. This class is required for students from the class of 2025 and forward who wish to co-concentrate in Entrepreneurship.

**Data Analytics in Practice**  
Wyner, George M  
**Spring 2023**
Organizations everywhere struggle to aggregate, analyze, and monetize the growing deluge of data generated by modern information systems. Data analytics capitalizes on this data by processing, transforming it, and subsequently applying statistical and quantitative analysis and explanatory and predictive modeling. Managers can explore patterns, predict future trends, and develop proactive, knowledge-driven decisions that affect all parts of modern organizations. This course will familiarize you with the capabilities and limitations of emerging analytics techniques, essential knowledge about data analytics programming and tools, and a core understanding required to be an intelligent manager and consumer of analytics. Upon completion of this course, you will be able to: perform basic data analytics tasks including: data profiling and feature engineering, data collection, transformation, and use of API, text transformation, data visualization, predictive modeling; understand biases in data and be a savvy consumer of analytics; justify decisions on the basis of analytics and identify opportunities; define problems that analytics can solve and provide data-driven solutions; use the ideas, concepts, and terminology of analytics appropriately to communicate with both business and data professionals. **ISYS425801 Systems Analysis and Design**

**Bernier, Brian; Cann, Scott**

**Spring 2023**

This course is required for Information Systems concentrators. The course studies information systems (IS) development including requirements, analysis, design, and implementation phases and workflows. We investigate the roles of systems analysts; serving as intermediaries between users, managers, and implementers; and helping each to understand the needs and problems of others. The student will learn about major methods and tools used in the systems development process. Please note that Database Systems and Applications (ISYS3257/CSCI1157) must be completed prior to taking this course.

**Credits:** 3

**Room and Schedule:** Gasson Hall 209 MW 04:30PM-05:45PM

**Satisfies Core Requirement:** None

ISYS662501
Geographic Information Systems for Planning and Decision-Making
Cohen, Will W
Spring 2023
Large quantities of information are available to describe our social and physical environment with high detail, but making sense of this data requires specialized skill sets. Geographic Information Systems (GIS) is a general approach to analysis and is a powerful set of tools for understanding complex problems or for making a compelling argument about issues grounded in the physical or social environment. It is widely used in the public and private sectors. This course will introduce students to the use of GIS and representation as a means of looking at and representing spatial data. Students will learn how to perform the three broad steps of spatial analysis: 1) collecting and organizing data, 2) analyzing this data for appropriate patterns, and 3) using software to represent data on maps to support decision making. STEM-designated.

**New Media Industries**  
**McNealy, Paul-Jon**  
**Spring 2023**

This course is designed to introduce the changing business models of new media (video games, music, TV and film, and journalism) industries. This is achieved by examining in detail the technology enablers and disruptive forces in both the U.S. and around the world, consumer behaviors, as well as legal and regulatory concerns. A special emphasis will also be placed on media companies whose business models have been heavily influenced or altered by digital distribution. This class will be a combination of in-class and Zoom sessions during class time, and will have an emphasis on influential guest speakers from various industries.

Cybersecurity Strategy and Management
Evenchik, Leonard N
Spring 2023

The challenges and issues of cybersecurity are everywhere, and today, these are not just technical issues, but critically important business issues for all levels of management. The goal of this course is to develop an understanding of cybersecurity principles, procedures, tools and technology from a managerial perspective. The first part of this course is a discussion of why cybersecurity is a difficult and pervasive problem. We then learn about the different types of threats and study the tools and techniques that society, organizations, and individuals have to mitigate them, with a focus on risk management and internal controls. We will also explore a number of new areas of work including cryptocurrency and the security requirements for the Internet of Things (IoT). An important part of the course will be team projects at the end of the term, where students apply the concepts and techniques we have studied to a real-world management problem or challenge. STEM-designated.

ISYS665501
Introduction to Blockchain and its Business Applications
Cathcart, Graham T
Spring 2023
The objective of this course is to introduce the business of blockchain--a technology that has the potential to drastically alter the way value is stored, exchanged, shared, and distributed. It is the backbone of the next iteration of the Internet: Web 3.0 or The Internet of Value. This course does not require any technical knowledge or prior knowledge of the subject, and is designed to give students a foundational knowledge of blockchain technology and a familiarity with the basic principles that govern blockchain protocols. Students will obtain a fluency in the terms and concepts required to understand how this powerful technology works. Most importantly, students will study real-world applications of the technology, which range far beyond blockchain's original use case (cryptocurrency) and hear from a number of influential guest speakers who are using or investing in blockchain technology at their companies today. Students who complete the course will understand blockchain and cryptocurrency's game-changing potential, be able to separate fact from hype, and be effective leaders in the space.

ISYS770001
Data Analytics 2: Data Management for Analytics
Evenchik, Leonard N
Spring 2023
Information Technology (IT) and Data Analytics now permeate the strategy, structure, and operations of modern enterprises, and new business practices have led to an orders of magnitude increase in the amount of data available for analysis and decision-making. It is essential that managers develop a deep understanding of how data can be structured, captured, and queried in order to support operations, decision-making, and strategic insight. At the same time, managers must become fluent with IT so that they can promote innovative strategic initiatives that are increasingly data and IT dependent. In this course, students will develop an understanding of IT theory and practice, study key emerging technologies, and develop their ability to identify new opportunities made possible by IT. This course will also provide students with a deep understanding of data and analytics by exploring how business processes are analyzed, data is modeled (using entity relationship diagrams), databases are designed, and data is queried using SQL. This combination of theory and practice will allow students to develop their ability to identify and take advantage of the new opportunities now made possible by data analytics and Information Technology.

The on-campus section of this course (ISYS7700) will meet weekly on campus. Please note that the online asynchronous section of this course will also include two or three synchronous web conferences during the semester. Please review the course syllabus for the schedule for these web conferences, or contact the instructor.

ISYS770501  
Data Analytics 3: In Practice  
Karpovsky, Anna  
Spring 2023
Modern information systems now generate massive volumes of data. Organizations everywhere struggle to aggregate, analyze, and monetize the growing deluge of data. Business Analytics capitalizes on this data by combining statistical and quantitative analysis, explanatory and predictive modeling, and fact-based management. Managers can explore patterns, predict future trends and develop proactive, knowledge-driven decisions that affect all parts of modern organizations. This course provides students with a pragmatic familiarity with the capabilities and limitations of emerging analytics techniques, an introduction to Python, an overview of methods and tools, and a core understanding required to be an intelligent manager, designer, and consumer of analytics models.

Management and Organization Courses: Summer 2022

MGMT218001
Introduction to Strategy & Management Consulting in South Africa
Wilson-Byrne, Christopher
Summer 2022
This course provides future leaders with a foundational understanding of business and strategic management that will enable them to function effectively in a complex, global economy. Using the conceptual tools and analytic frameworks of management consulting, this course provides a perspective that is integrative, yet analytical. The course goes beyond the confines of a generic management course by rooting the learning in the geographic and cultural backdrop of South Africa. The aim is to teach strategic management but also overlay the added complexities of doing business in Africa and all that comes with it.

MGMT771001
Strategic Management
Lowd, Nancy E
Summer 2022
The strategic management course deals with the overall general management of an organization. It stresses the role of the manager as strategist and coordinator whose function is to integrate the conflicting internal forces that arise from among the various organizational units while simultaneously adapting to the external pressures that originate from a changing environment. Drawing on the knowledge and skills developed in the core curriculum, this course serves as the integrating experience for the M.B.A. program.

**Technological Innovation and Disruption**  
**MacDonald, John A**  
**Summer 2022**  
To be competitive organizations need to drive innovation in their products and services. Organizations need to innovate rapidly and in some cases this involves reinventing the enterprise to compete in disruptive business environments. The course on Technological Innovation looks closely at the company value chain and where technology can be leveraged as a source of innovation. Company vision sets the context for the type of innovation necessary to achieve sustainable competitive growth. During the course we examine the process of building innovative capability across the company value chain, developing and implementing an innovation plan and creating the capacity for sustained innovation as a competitor or disruptor.

Management and Organization Courses: Fall 2022

MGMT102101
Organizational Behavior
Grubb, Anitza R
Fall 2022
Class restriction is only applicable to current Boston College students and does not apply to non-BC (transfer or exchange) students. As an introduction to the study of human behavior in organizations, this course aims at increasing an awareness and understanding of individual, interpersonal, group, and organizational events, as well as increasing a student's ability to explain and influence such events. The course deals with concepts that are applicable to institutions of any type; a central thrust of these concepts concerns the way institutions can become more adaptive and effective. The course is designed to help the student understand and influence the groups and organizations to which he/she currently belongs and with which he/she will become involved in a later career. Note: Restrictions only apply to current Boston College students and do not apply to transfer or exchange students.

Negotiation
Nielsen, Richard P
Fall 2022
Negotiating is a key process in leadership, conflict resolution, and change management at every level of internal and external management. The purpose of the course is to improve students' abilities to analyze, prepare for, and practice win-lose, win-win, dialogic, and third party negotiating methods as appropriate. Emphasis is on practical application and personal development. Teaching methods used are role playing, discussion of readings, discussion with practitioners, original student projects, and discussion of current events. Students are invited to reflect upon how negotiating and conflict resolution practices help them developmentally change themselves, their organizations, and the world.

In today's world, there are many challenges that call for effective leadership. Corporate ethics scandals, an increasingly global and diverse work force, and the need for employees to experience renewed meaning and connection to their work are just a few examples. How we respond to these challenges can profoundly change the world in which we live and work. In this course, we learn about the challenges and opportunities of effective leadership and how leaders, including ourselves, can respond to them.

**Managing Change**  
**Leduc, Steven M**  
**Fall 2022**  
What makes change agents effective? This course addresses this question with a focus on change leadership tools and approaches. This course helps prepare students to diagnose and implement successful change both when they are in charge and when they must work through others. Students will also understand the driving forces that organizations and consultants face in managing change and the challenges in responding to those forces. This course is designed to educate the students on the realities of change management in the workforce, provide practical application of change management strategies, engage in theoretical discussions on the subject, and provide a clearer understanding of the consultancy process as it relates to change management. Students are provided with hands-on experience in using tools and techniques involved in diagnosing and implementing change management. This course is particularly relevant for those wishing to develop their leadership and consultation capabilities.

Are you moved by a particular social injustice? It could be homelessness on the streets of Boston. It could be famine in Africa. It could be wage inequality across our country. It could be one of hundreds of issues, but one that is meaningful to you. Social Impact and Entrepreneurship explores the innovative ways government agencies, nonprofit groups, and for-profit organizations are addressing societal challenges. This course will focus on understanding the building blocks of a social venture--starting with the mission and working through the operational plan, the financials, and the evaluation criteria. Students, either individually or in small groups, will create a business plan for an enterprise, grounded in her/his passion for change in a given area. Multiple case studies will be used to illustrate various topics. Open to students from all majors.

Any change, innovation, or new thing begins with an idea. While one person might come up with an initial idea, the idea, and the thing it consequently turns into, has the potential to become better when built upon by other people. The purpose of this course is to learn how to effectively develop and work with ideas to innovate and enact change in the context of organizations and beyond. Building from research on organizational creativity, innovation, collaboration, and entrepreneurship, students will learn frameworks for understanding the influence of individuals, social processes, and context on creativity and innovation and apply these frameworks throughout the course. Students will practice the key skills of idea work—generating, connecting, communicating, evaluating, and reshaping ideas—so that they can make things that matter.

Entrepreneurial Management
Shaw, Douglas J
Fall 2022
This course focuses on the fundamentals of building a business either as a start-up or within a larger organization. Entrepreneurial Management introduces conceptual frameworks and tools that help students to identify, evaluate, launch and grow innovative ventures that have the potential to revolutionize markets. We will discuss cases set in a range of industries including car sharing, aviation, electronic publishing, fashion, file storage, streaming media, consulting, food services and education. Course goals include: Help you to understand the major issues entrepreneurs face when starting, growing and capturing the value of their ventures. Develop the analytical skills required for the environment in which entrepreneurs operate high uncertainty, rapid growth, ongoing change and limited resources. Be able to compare and contrast the major sources of capital available to entrepreneurs and the expectations of investors. Better understand the role that entrepreneurship will play in your career. Entrepreneurial Management requires strong qualitative and quantitative analysis skills. There are no official prerequisites. To evaluate the drivers of venture profitability and to analyze business models, you will need a basic understanding of income statements which will be reviewed during the initial classes.

The course examines decision making, one of the most prolific and consequential activities undertaken by managers, to improve students skills in exercising choice. It begins by exploring the psychology of judgment. The hidden brain, or subconscious biases and heuristics hard-wired into human cognitive processes, are examined along with pressures arising from group and broader social forces. Through hands-on exercises and case analyses, students will learn how and why decision making often goes awry, and strategies for avoiding prevalent traps. The course will also examine choice architecture. Students will learn and apply management tools and techniques that facilitate effective design of decision processes. The course is particularly apt for those seeking to enhance their decision skills and arrive at better outcomes, both personal and organizational.

**MGMT217501**  
**Thinking Strategically Integrative Strategy Simulation**  
**Montes, Juan**  
**Fall 2022**
This course prepares students to make executive-level decisions by participating and competing in business simulation. The course utilizes a sophisticated, market-leading simulation platform called "Global DNA" to create a realistic, hands-on learning experience. The course allows students to manage a company and see the results of specific functional and team decisions, integrating all management areas: marketing, organizational behavior, operations, accounting, and finance. The course is based around the concept of experiential learning, and student teams have a high degree of freedom to follow different strategies. The competitive nature of the simulation shows and compares the results of each company in every round, with a high level of detail (i.e., sales and production reports, financial information), teaching teams to effectively analyze quantitative business information. Students learn to think strategically by incorporating the potential scenarios of what other teams can do during the simulation in their own decisions.

**Leadership and Corporate Accountability**

Spinello, Richard

Fall 2022
This course is designed to provide an overview of the economic, legal, and ethical responsibilities of companies and their leaders. Through a series of case studies, it will demonstrate the acute challenges of ensuring that a company's conduct conforms to those responsibilities. A major portion of the course will review the principal obligations of corporations to five primary stakeholder groups: investors and shareholders, customers, employees, suppliers, and the general public. Insider trading, fiduciary duties, disclosure of health risks, fairness in pricing, power asymmetries, affirmative action, international labor rights, market failures, privacy rights, environmental sustainability, and corporate citizenship represent some of the issues to be discussed in this segment of the course. A secondary theme is corporate governance. Several cases will explore the proper role of management, the Board of Directors, financial intermediaries, and external regulators.

This is the senior integrative capstone course of the CSOM core. This course provides future leaders and strategists with an understanding of strategic management that will enable them to function effectively in a complex, global economy. Successful strategists need to define goals, analyze the organization and its environment, make choices, and take concerted actions to effect positive change in their organization and society. Using the conceptual tools and analytic frameworks of strategic management, this course provides a perspective that is integrative, yet analytical. This perspective helps students make sense of the global business and societal environments, understand the ambiguities and dilemmas of management, and learn how to take effective action.

Capstone: Leadership and Mindfulness
Waddock, Sandra A
Fall 2022
Capstone classes may NOT be taken Pass/Fail. You may take only ONE Capstone class before graduation. No matter what your major, you will participate in groups and organizations that will consistently ask or expect you to lead. The best leader is authentic, has integrity, is self- and other-aware, and acts with this awareness firmly in mind. Good leaders, that is, act mindfully with respect for the people and world around them. This course explores your development as a mindful focusing inward and outward, reflecting on where you have come from and where you are going, what type of world you want to live in, your relationships with others, and how you can be an effective leader.

**Introduction to Strategic Management**
Potts, Jeremiah M

**Fall 2022**
The course is designed to provide you with a general understanding of how firms formulate and implement strategies to create competitive advantage. Relying exclusively on the case method, it will expose you to some basic strategy concepts, which will lay the foundation for the strategic management core course that you will take later on. The cases chosen for this course will place you in a diversity of managerial situations--large multinational firms and small startups, manufacturing and service industries, growing and mature organizations, U.S. and non-U.S. settings. Discussion of these cases will enable you to learn different analytic techniques, and illustrate (1) the essence of strategy, (2) how to understand the external competitive environment, (3) ways to consider beyond the current business landscape, and (4) the role of top management in strategy implementation.

Strategic Management
MacDonald, John A
Fall 2022
The strategic management course deals with the overall general management of an organization. It stresses the role of the manager as strategist and coordinator whose function is to integrate the conflicting internal forces that arise from among the various organizational units while simultaneously adapting to the external pressures that originate from a changing environment. Drawing on the knowledge and skills developed in the core curriculum, this course serves as the integrating experience for the M.B.A. program.

Managing Business in Society
Smith, Katherine V
Fall 2022
This course deals with the complexities of managing corporate sustainability and responsibility (new CSR) in today's dynamic and ever-more difficult world. Emphases include the integration of issues related to business in society, ethics, responsibility, accountability, transparency, governance, and ecological sustainability into corporate strategies and practices. We use a strategic management lens to learn the potential sources of strategic and competitive advantage that can derive from CSR, and explore some of the problems associated with poor responsibility practices.

Mergers and Acquisitions
Mucci, Richard L
Fall 2022
This course provides an overview of the various stages of the M&A process, and the key decision points which help guide it. This course is meant to be a survey class, covering a wide range of M&A topics. It is recommended for participants pursuing careers requiring the formulation of inorganic growth options for businesses (e.g., general management, business development, or consulting) or the assessment of business investment opportunities (e.g., investment banking, venture capital, or private equity). A broad overview of each typical stage in an M&A process will be discussed to include strategy, target identification, valuation, due diligence, financing, deal structure, negotiating an agreement, closing, and integration. Armed with an understanding of each stage of the M&A process, possible decision frameworks will be formulated and discussed.

MGMT813201
Responsible Leadership
Ritchie-Dunham, James L
Fall 2022
Whether you lead a team, department, organization, or network, as a leader you are responsible. You are responsible for the consequences of the choices you make in serving your funders, employees, suppliers, local communities, regulators, society, and the environment. Responsible leadership is the ability to engage, transform, and transfer an organization's creative energy in service to its purpose in highly effective and efficient ways, generating greater value throughout the organization's ecosystem of stakeholders, an ecosystem you choose. As a leader, you are responsible for the alignment of the organization's purpose, actions, and broader impact—a coherent set of whys, hows, and whats. In this course, you will learn how responsible business leaders are outperforming their peers in outputs, outcomes, and impacts. You will learn their business-model and cultural-change strategies, meet their leaders, and apply their frameworks to case studies and your own organization.

Business Wars: Leading Through Change and Disruption
Kierner, Agnieszka D
Fall 2022
In a world where the average lifespan of a company has significantly decreased, leaders find themselves in constant change and disruption management. Each class will take you to an analysis of a real story of what drives these companies and their leaders, investors, and employees to new heights or to ruin. We will analyze and discuss specific situations of a defining time for a company that needs to manage through a disruption in their industry. We will then understand and analyze the business context and learn about leadership behaviors needed to survive and thrive as an executive or employee of a company undergoing such a fascinating change. After finishing the course you will be able to shape your own perspective and behaviors helping you and your firm thrive in our fast-paced world.

Management and Organization Courses: Spring 2023

MGMT102101
Organizational Behavior
Grubb, Anitza R
Spring 2023
Class restriction is only applicable to current Boston College students and does not apply to non-BC (transfer or exchange) students. As an introduction to the study of human behavior in organizations, this course aims at increasing an awareness and understanding of individual, interpersonal, group, and organizational events, as well as increasing a student's ability to explain and influence such events. The course deals with concepts that are applicable to institutions of any type; a central thrust of these concepts concerns the way institutions can become more adaptive and effective. The course is designed to help the student understand and influence the groups and organizations to which he/she currently belongs and with which he/she will become involved in a later career. Note: Restrictions only apply to current Boston College students and do not apply to transfer or exchange students.

**Credits:** 3  
**Room and Schedule:** Gasson Hall 204 MWF 10:00AM-10:50AM

**MGMT211101**  
**Ethical Leadership Skills**  
**Nielsen, Richard P**  
**Spring 2023**  
This course focuses on ethics leadership and engagement methods in different types of pre-modern, modern, and postmodern organizational and political-economic contexts. What are our visions of ethical leadership, relationships and organization? What were we doing when we were at our best in leading meaningful and effective change and problem resolution in our relationships with family and friends and in our work and citizenship lives? What have been the individual, organizational, and environmental obstacles that made it difficult for us to lead meaningfully and effectively? What are different types of methods in trying to intervene and lead ethical change?

**Credits:** 3

MGMT212301
Negotiation
Nielsen, Richard P
Spring 2023
Negotiating is a key process in leadership, conflict resolution, and change management at every level of internal and external management. The purpose of the course is to improve students' abilities to analyze, prepare for, and practice win-lose, win-win, dialogic, and third party negotiating methods as appropriate. Emphasis is on practical application and personal development. Teaching methods used are role playing, discussion of readings, discussion with practitioners, original student projects, and discussion of current events. Students are invited to reflect upon how negotiating and conflict resolution practices help them developmentally change themselves, their organizations, and the world.

MGMT212701
Leadership
Danforth, Stuart G
Spring 2023
In today's world, there are many challenges that call for effective leadership. Corporate ethics scandals, an increasingly global and diverse work force, and the need for employees to experience renewed meaning and connection to their work are just a few examples. How we respond to these challenges can profoundly change the world in which we live and work. In this course, we learn about the challenges and opportunities of effective leadership and how leaders, including ourselves, can respond to them.

MGMT213701
Managing Diversity
Clark, Angela
Spring 2023
Students in this course will learn about contemporary empirical and theoretical research on the dynamics of international culture, gender, race, and other special differences in the workplace. They can also increase skills in diagnosing and solving diversity-related conflicts and dilemmas, and develop a capacity to distinguish a monolithic organization from one that treats diversity as a competitive advantage.

MGMT213901
Social Impact and Entrepreneurship
Frechette, Edward K
Spring 2023
Are you moved by a particular social injustice? It could be homelessness on the streets of Boston. It could be famine in Africa. It could be wage inequality across our country. It could be one of hundreds of issues, but one that is meaningful to you. Social Impact and Entrepreneurship explores the innovative ways government agencies, nonprofit groups, and for-profit organizations are addressing societal challenges. This course will focus on understanding the building blocks of a social venture--starting with the mission and working through the operational plan, the financials, and the evaluation criteria. Students, either individually or in small groups, will create a business plan for an enterprise, grounded in her/his passion for change in a given area. Multiple case studies will be used to illustrate various topics. Open to students from all majors.

MGMT214001
International Management
Maritan, James G
Spring 2023
This course provides students with an in-depth survey of the issues related to behavioral aspects in organizations in a non-domestic environment. A focus of the course is the examination of culture and ways in which it influences organizational behavior. This course will give students a solid understanding of effective human resource management practices in an international context and prepare them to lead in a global environment.

MGMT214101
Power and Influence
Arrowood, Rick J
Spring 2023
Power and influence are crucial to understanding organizational dynamics, resolving conflict, navigating and promoting change, building cooperation, and developing professional skills in the workplace. The course aims to help students identify, diagnose, and analyze power as well as expose them to influence methods from an organizational, managerial, and professional skills perspective. The purpose of this course is to examine the different types of formal and personal power people use to influence others, explore ways power and influence are used for both good and bad, and develop students capabilities to create their own path to obtaining, managing, and sustaining power and influence.

MGMT217001
Entrepreneurial Management
Shaw, Douglas J
Spring 2023
This course focuses on the fundamentals of building a business either as a start-up or within a larger organization. Entrepreneurial Management introduces conceptual frameworks and tools that help students to identify, evaluate, launch and grow innovative ventures that have the potential to revolutionize markets. We will discuss cases set in a range of industries including car sharing, aviation, electronic publishing, fashion, file storage, streaming media, consulting, food services and education. Course goals include: Help you to understand the major issues entrepreneurs face when starting, growing and capturing the value of their ventures. Develop the analytical skills required for the environment in which entrepreneurs operate high uncertainty, rapid growth, ongoing change and limited resources. Be able to compare and contrast the major sources of capital available to entrepreneurs and the expectations of investors. Better understand the role that entrepreneurship will play in your career. Entrepreneurial Management requires strong qualitative and quantitative analysis skills. There are no official prerequisites. To evaluate the drivers of venture profitability and to analyze business models, you will need a basic understanding of income statements which will be reviewed during the initial classes.

This course prepares students to make executive-level decisions by participating and competing in business simulation. The course utilizes a sophisticated, market-leading simulation platform called "Global DNA" to create a realistic, hands-on learning experience. The course allows students to manage a company and see the results of specific functional and team decisions, integrating all management areas: marketing, organizational behavior, operations, accounting, and finance. The course is based around the concept of experiential learning, and student teams have a high degree of freedom to follow different strategies. The competitive nature of the simulation shows and compares the results of each company in every round, with a high level of detail (i.e., sales and production reports, financial information), teaching teams to effectively analyze quantitative business information. Students learn to think strategically by incorporating the potential scenarios of what other teams can do during the simulation in their own decisions.

MGMT309901
Strategic Management
Montes, Juan
Spring 2023
This is the senior integrative capstone course of the CSOM core. This course provides future leaders and strategists with an understanding of strategic management that will enable them to function effectively in a complex, global economy. Successful strategists need to define goals, analyze the organization and its environment, make choices, and take concerted actions to effect positive change in their organization and society. Using the conceptual tools and analytic frameworks of strategic management, this course provides a perspective that is integrative, yet analytical. This perspective helps students make sense of the global business and societal environments, understand the ambiguities and dilemmas of management, and learn how to take effective action.

MGMT770903  
**Managing People and Organizations**  
Opazo, Maria P  
**Spring 2023**  
This course focuses on the analysis and diagnosis of organizational problems. It attempts to enable students to apply these concepts to real organizational and managerial problems. It also provides opportunities for participation in ongoing work teams while learning about team effectiveness. Finally, students can examine their own behavior and beliefs about organizations to compare, contrast, and integrate them with the theories and observations of others.

MGMT771001  
**Strategic Management**
Sengul, Metin
Spring 2023

The strategic management course deals with the overall general management of an organization. It stresses the role of the manager as strategist and coordinator whose function is to integrate the conflicting internal forces that arise from among the various organizational units while simultaneously adapting to the external pressures that originate from a changing environment. Drawing on the knowledge and skills developed in the core curriculum, this course serves as the integrating experience for the M.B.A. program.

MGMT773001
Strategic Management
Sengul, Metin
Spring 2023
This course introduces you to a set of analytical frameworks that enable you to explain performance differences among firms and that provide a structure for strategic decisions to enhance firms future competitive positions. Building on the foundation laid by the Introduction to Strategic Management course that you took earlier, we will cover strategy both at the business level (introducing tools of industry analysis and competitive positioning) and at the corporate level (examining how decisions regarding corporate scope horizontal, vertical, and global create or destroy value in multibusiness firms). We will also study strategy implementation, focusing on the organizational structure, systems and processes that are put in place to manage the corporation. Throughout the course, our viewpoint will be that of the top management team who has responsibility for the long-term health of the entire organization.

**MGMT776001**  
**Thinking Strategically: A Global Integrative Simulation**  
**Montes, Juan**  
**Spring 2023**
This course is about the art of strategy. Courses like marketing, organizational behavior, operations, accounting, and finance help you understand the functional areas of management, but now (and before you finish your first-year MBA), you need to close the knowing and doing gap, and that is the role of the present course. We will use a simulation called Global DNA in which teams compete in planning and executing a multi-year, multinational business strategy in a highly competitive global market. The course utilizes a sophisticated, market-leading simulation platform to create a realistic, hands-on learning experience. Engaging with the complexities of the simulated international business environment will prompt discussions on decision making, team dynamics, strategic planning and tactical execution. Thinking strategically is what C-level managers need to understanding competitive contexts, and make decisions that take into account all the relations and variables inside and outside the organization. A simulation presents a unique opportunity to challenge your managerial and strategic skills, and additionally, it creates a virtual competitive context that is usually fun, demanding and complex. This course culminates with the Diane Weiss Competition in which student teams will compete in a final round of the simulation.

**Credits:** 3

Management of Organizational Change
Ritchie-Dunham, James L
Spring 2023
Focuses on the variety of organizational changes that are being implemented in contemporary organizational life. Examines such changes as employee involvement, culture change, life cycle changes, mergers and acquisitions, and downsizing. Discusses such change strategies as envisioning and implementing change, overcoming resistance to change, the power and politics associated with change, organization development, and other action tools.

MGMT810501
Globalization - Building Global Connection
Papagelis, Suela
Spring 2023
This course will introduce you to the fundamentals of the global business environment. Operating in an international setting engenders numerous opportunities for firms to attain above-average returns and presents many challenges due to complexity that arises from the differences (e.g., cultural, political, economic) existing among countries. As a result, we seek to understand the extent to which managing across borders requires that international business practitioners think in a multidimensional fashion and devise international strategies that consider such differences to succeed. This course includes two main components: (1) an introduction to global business fundamentals and main international business theories and (2) an experiential learning project with a company.

Negotiating
DiOrio, Chris M
Spring 2023
Have you found yourself limited in your performance because you lacked the ability to effectively negotiate for more resources, including staff, money, or time? Do you experience difficulty in handling conflict in organizations? Are you anxious to improve your ability to take a problem-solving approach to organizational dilemmas? This course assists students in becoming more effective negotiators in a range of organizational situations. Students learn the different types of negotiating approaches and practice their use in a variety of situations.

Strategic HR
Kierner, Agnieszka D
Spring 2023
Whether leading a start-up or a team in a large organization, after this course you will have the skills needed to effectively design and execute strategies to manage people in such a way that they support long term business goals and outcomes. The course will help you think systematically about critical aspects of managing human assets and provide practical examples on how these strategies need to be implemented to achieve competitive advantage. Through a mix of lecture, case study analysis, in-class simulation and discussion we will take a journey around key issues leaders need to tackle: data driven HR, recruiting and onboarding, talent management, dealing with high and low performers, benefits and compensation, managing in diverse and multicultural environments. The course will draw upon personal experiences of the instructor from leading technology start-ups, advising and driving chance in large organizations, as well recent literature on these topics.

Business Wars: Leading Through Change and Disruption
Kierner, Agnieszka D
Spring 2023
In a world where the average lifespan of a company has significantly decreased, leaders find themselves in constant change and disruption management. Each class will take you to an analysis of a real story of what drives these companies and their leaders, investors, and employees to new heights or to ruin. We will analyze and discuss specific situations of a defining time for a company that needs to manage through a disruption in their industry. We will then understand and analyze the business context and learn about leadership behaviors needed to survive and thrive as an executive or employee of a company undergoing such a fascinating change. After finishing the course you will be able to shape your own perspective and behaviors helping you and your firm thrive in our fast-paced world.

MGMT831501
Digital Innovation and Transformation
Fichman, Robert
Spring 2023
In the last two decades, innovative digital products, processes, and business models have become increasingly prevalent. These digital innovations are transforming how we live and work, how companies compete, and the structure of entire industries. As a result, it is essential for aspiring managers to have a strong grounding in digital innovation in order to effectively work in, manage, lead, and transform organizations that are increasingly dependent on innovative digital technologies. Through a combination of seminar-style discussions, brief lectures, case studies, in-class exercises, and guest speakers, students will learn about: (1) fundamental innovation concepts; (2) how digital technologies and platforms are different from non-digital technologies, and how these differences shape their evolution and impact; (3) how to implement effective organizational processes for digital innovation discovery, development, and diffusion; (4) how to evaluate the transformational impacts of digital innovation on businesses, individuals, and society; (5) how to nurture the innovative capabilities of individuals and the firm.

MGMT886301
Diversity Equity And Inclusion In The Workplace
Clair, Judith
Spring 2023
This course is organized to understand cross-disciplinary research investigating complex issues surrounding diversity, equity and inclusion in the workplace and organizations. Familiarity with research in the domain of diversity, equity, and inclusion in workplaces and organizations provides a basis for understanding not only why progress has been made, but also why challenges persist in a globalized workplace and economy. We draw upon seminal and novel empirical and theory papers on diversity, equity, and inclusion topics, with an emphasis on theory building and new, cutting-edge research in psychology, sociology, organizational studies, and other fields. We spend some of our time exploring taboo topics that are less discussed in research and organizations. And, we seek to surface ideologies on diversity, equity and inclusion that influence workplace policies as well as scholarly research.

Marketing Courses: Summer 2022

MKTG102101
Marketing Principles
Kerbs, Jon W
Summer 2022
This course is a prerequisite for all other marketing courses. Marketing is a dynamic, creative and challenging discipline that plays a leading role in the strategy and destiny of any company. Marketing is the business function with primary responsibility for generating revenue, defining the value proposition, and managing relationships with customers. Three broad areas will be explored including understanding markets and competitors, developing new products and organizing distribution, and implementing communications and promotions. A variety of examples in traditional industries and the digital sector will be discussed. Analysis and decision skills will be developed by practicing the use of tools and case studies. This course provides a foundational understanding of the marketing discipline, which is necessary for any role within business organizations.

**Marketing**  
**O'Hern, Matthew S**  
**Summer 2022**  
This course focuses on the managerial skills, tools, and concepts required to produce a mutually satisfying exchange between consumers and providers of goods, services, and ideas. The material is presented in a three-part sequence. Part one deals with understanding the marketplace. Part two deals with the individual parts of the marketing program such as pricing, promotion, product decisions, and distribution. Part three of the course deals with overall strategy formulation and control of the marketing function. Students in this course will come to understand the critical links between marketing and the other functional areas of management.

Customer Research and Marketing Decisions
Loessi, Edward J
Summer 2022
The current business environment rewards companies that respond to consumer demand faster than their competitors, and marketing research is a key route for companies to learn about their target markets. This course seeks to make you both a smarter producer and consumer of marketing research. Topics covered include formulating project-based research questions, the major styles of marketing research, and fundamental research design such as measurement theory and sampling. SPSS and data analysis are covered from a managerial perspective, and you will learn how to conduct and interpret common forms of data analysis seen in marketing research reports.

Business to Business Marketing
Teopaco, John L
Summer 2022
This course provides an in-depth understanding of the unique aspects of marketing in a business-to-business environment. Its focus centers on the importance of linking customer needs to the development of high value products and services throughout the value chain in a global, electronic environment. The course examines the scope and challenges of business-to-business markets, including building and managing customer relationships and services, buying behavior, distribution channels, marketing research, managing R&D and technical product development, managing the sales process and sales force support, new-product launch, positioning and pricing.

**MKTG801501**  
**Strategic Brand Management**  
**Lucas, Jeffrey S**  
**Summer 2022**  
This course teaches students fundamental and leading-edge concepts in brand management. Students learn to develop and articulate brand strategy, how to give strategic brand direction, and how to measure strategic brand progress. They learn how to manage key relationships and functions that surround the brand, e.g., advertising, promotion, public relations, licensing, and product and package design agencies. A capable brand manager has exceptional strategic, quantitative, interpersonal, and presentation skills and must be comfortable with decision-making and leadership. The course will focus on the development and application of these skills in brand management via in-class learning, case discussion, and project work.

Marketing Courses: Fall 2022

MKTG102101
Marketing Principles
Brasel, Stevan Adam
Fall 2022
This course is a prerequisite for all other marketing courses. Marketing is a dynamic, creative and challenging discipline that plays a leading role in the strategy and destiny of any company. Marketing is the business function with primary responsibility for generating revenue, defining the value proposition, and managing relationships with customers. Three broad areas will be explored including understanding markets and competitors, developing new products and organizing distribution, and implementing communications and promotions. A variety of examples in traditional industries and the digital sector will be discussed. Analysis and decision skills will be developed by practicing the use of tools and case studies. This course provides a foundational understanding of the marketing discipline, which is necessary for any role within business organizations.

Services Marketing
Samaras, Xanthe P
Fall 2022
The service sector of the economy is twice as large as the manufacturing sector. Nearly all new job growth in this country will be in services marketing. Service organizations differ from manufacturing businesses in many important respects and require a distinctive approach to marketing strategy development and execution. Some service businesses to be studied include entertainment, hospitality, travel, retail, telecom, car rental, healthcare, financial and professional services. Service providers include hotel, airline, theme park, car rental and retail personnel, customer service representatives, bankers, doctors, accountants, and lawyers.

Integrated Marketing Communications
Hamlin, Pamela A
Fall 2022
This course concerns the communication function in marketing. It is designed to introduce students to integrated marketing communications (IMC). It aims at relating the elements of the marketing mix (4P's) to the various aspects of the communications that take place between the firm and its customers. The course builds on a base of strategic marketing planning and consumer behavior and then proceeds to examine the role of the promotional mix (e.g., advertising, direct marketing, sales promotion, Internet and interactive marketing, publicity and public relations) in developing integrated marketing communications programs and helping organizations meet strategic marketing objectives.

**Digital Marketing**  
**O'Hern, Matthew S**  
**Fall 2022**  
In today's digital economy, successful companies must develop new ways to attract, connect with, and delight their customers. This has prompted a decisive shift away from traditional media strategies toward novel, digitally-enabled strategies that can help firms achieve their financial objectives. In this course you will learn about a number of different aspects of digital marketing including content marketing, website optimization, social media marketing, paid search, and search engine optimization. Perhaps more importantly, this course will help you develop a strong understanding of the digital marketing tools and platforms that companies use to differentiate themselves from their competition and will allow you to build a set of digital assets that you can use to demonstrate your digital marketing acumen to prospective employers.

**Credits:** 3

Professional Selling and Sales Management
Brown, Jason T
Fall 2022
Two fundamentals of business: someone must get the goods and services out the door, and someone must get the cash to come in the door. Sales is the function that does the latter. It, and its management, will be covered in this course. We will study the art of persuasion, modern day Rhetoric in actual practice. The discipline will be addressed biologically. We will dissect real industry practitioners when they visit class, and actual sales calls in the field as a research paper. Upon course completion, students will have a complete understanding of both the selling and sales management process.

Product Planning and Strategy
Bright, James P
Fall 2022
With the growing concern over the success rate of new products, an intense effort is being employed by marketers to establish more effective new product development and management strategies. Using lectures and case studies, this course will focus on the process of conceiving new products, developing an effective organization, and designing and implementing effective marketing strategies and policies over the course of the product life cycle. Class material will provide the student with insight into new product development across a wide variety of industries.

**Strategic Brand Management**  
Fisher, John H  
**Fall 2022**

This course teaches students fundamental and leading-edge concepts in brand management. Students learn to develop and articulate brand strategy, how to give strategic brand direction, and how to measure strategic brand progress. They learn how to manage key relationships and functions that surround the brand, e.g., advertising, promotion, public relations, licensing, and product and package design agencies. A capable brand manager has exceptional strategic, quantitative, interpersonal, and presentation skills and must be comfortable with decision-making and leadership. The course will focus on the development and application of these skills in brand management via in-class learning, case discussion, and project work.

MKTG317701  
**Heritage Marketing**  
Hudson, Bradford T  
**Fall 2022**
This course explores the interaction of marketing and history in the consumer marketplace. Heritage marketing is a strategic approach to capitalize on the historical status of older brands in the present and future. It uses the entire marketing system to develop a strategic position based on heritage, activate powerful dynamics in consumer behavior such as nostalgia, communicate relevant messages, and monetize the past. Business history and archival collections provide the content and inspiration for related communications and new product development. The primary classroom activity will be the analysis and discussion of business case studies from various industries. The pre-requisites are Marketing Principles and any course from the History core sequence.

"Design thinking is a human-centered approach to innovation that draws from the designer's toolkit to integrate the needs of people, the possibilities of technology, and the requirements for business success." - Tim Brown, CEO of IDEO. Strategic design thinking is an integral driver of innovation and a significant factor in a business' ability to foresee and adapt to customer needs. Companies like Apple, IDEO, and Pixar are all pioneers in the field, and this course will draw directly from their proven methods. Students will learn the various phases of design thinking, and how to apply a customer-centric approach to products and services in a range of industries. Students will delve into topics such as user experience (UX) product design, creative problem-solving, strategic storytelling, and customer-centric business decision making. Course content will include team projects, case studies, and occasional guest lectures from industry experts. The class will be highly focused on practical experimentation and is directly relevant for students interested in product and brand management, marketing strategy, entrepreneurship, and beyond.

**MKTG318001**  
**Sports Marketing**  
**Olesh, Evan S**  
**Fall 2022**  
The goal of this course is to provide an understanding of the business practices of the sports industry. Taking a practical approach, students will be asked to create business solutions for sports organizations. The attributes and failures of real examples will be discussed. Students will be expected to take the experience and apply it to creating specific campaigns, programs, and overall marketing plans for a specific sports application. Relationship architecture principles will be discussed at length and expected to be incorporated into the final project.

MKTG615701
Strategic Selling and Persuasion
Westman, John C
Fall 2022
Two fundamentals of business: someone must get the goods and services out the door, and someone must get the cash to come in the door. Sales is the function that does the latter. It, and its management, will be covered in this course. We will study the art of persuasion, modern day Rhetoric in actual practice. The discipline will be addressed biologically. We will dissect real industry practitioners when they visit class, and actual sales calls in the field as a research paper. Upon course completion, students will have a complete understanding of both the selling and sales management process.

**Credits:** 3

**MKTG661001**

**Sports Marketing**

**Lev, Mark T**

**Fall 2022**

The goal of this course is to provide an understanding of the business practices of the sports industry. Taking a practical approach, students will be asked to create business solutions for sports organizations. The attributes and failures of real examples will be discussed. Students will be expected to take the experience and apply it to creating specific campaigns, programs, and overall marketing plans for a specific sports application. Relationship architecture principles will be discussed at length and expected to be incorporated into the final project.

This course focuses on the managerial skills, tools, and concepts required to produce a mutually satisfying exchange between consumers and providers of goods, services, and ideas. The material is presented in a three-part sequence. Part one deals with understanding the marketplace. Part two deals with the individual parts of the marketing program such as pricing, promotion, product decisions, and distribution. Part three of the course deals with overall strategy formulation and control of the marketing function. Students in this course will come to understand the critical links between marketing and the other functional areas of management.

MKTG800301
Product Planning and Strategy
Andreiunas, John P
Fall 2022
This course focuses on the challenge of creating and launching new products and services. It is particularly appropriate for those who are interested in becoming a Product Manager within a larger company, or in starting their own business at some point. The course is built on the concept of learning by doing, as small student teams go through the full process of coming up with their own new product or service ideas, evaluating them, doing market research, and developing launch plans. We also assess a number of current new product ideas, analyze cases from a range of industries, and have one or two outside speakers. There is a heavy emphasis on discussion and practicality.

MKTG801401  
Strategic Pricing Management  
Smith, Gerald, PHD  
Fall 2022  
This course explores pricing strategy and shows how pricing can be managed to achieve profitability. The course is practical and hands-on. It examines current pricing practices used by many companies, and shows how they lead to distortions and problems. It suggests strategic principles that lead to more profitable pricing decisions, including methods for financial analysis that focus on pricing profitability. Other topics include value-based pricing, managing price competition, segmenting markets based on price sensitivity, segmentation pricing strategies, buyer psychology of pricing, and research methods for assessing price sensitivity.

MKTG801501  
**Strategic Brand Management**  
Fisher, John H  
**Fall 2022**

This course teaches students fundamental and leading-edge concepts in brand management. Students learn to develop and articulate brand strategy, how to give strategic brand direction, and how to measure strategic brand progress. They learn how to manage key relationships and functions that surround the brand, e.g., advertising, promotion, public relations, licensing, and product and package design agencies. A capable brand manager has exceptional strategic, quantitative, interpersonal, and presentation skills and must be comfortable with decision-making and leadership. The course will focus on the development and application of these skills in brand management via in-class learning, case discussion, and project work.

Entrepreneurial Marketing Strategy
Neeson, John J
Fall 2022
This course focuses on how to develop an integrated marketing plan for a new company. The class will teach techniques and skills for developing a marketing strategy for a startup, including prioritizing market segments, positioning and messaging approaches, sales model and capacity planning for marketing, and developing an integrated marketing model to help scale the new endeavor. Startups are unique, requiring an agile marketing approach, the ability to scale quickly, and the requirement to build a new category or quickly enter an existing one. Classes will incorporate a combination of lectures, projects, guest speakers, and the development of a marketing plan for a new or early stage startup.

**Programming and Data Analysis for Marketing**  
**Cirik, Ali A**  
**Fall 2022**  
Data-driven marketing has revolutionized the marketing world and become a fundamental factor of competitive advantage. This marketing course primarily focuses on using programming, data analysis and data visualization techniques to make data-driven marketing decisions. The course builds on 3-course Data Analytics Sequence by providing hands-on, and practical learning experience. By the end of this course, you will learn how to clean, merge, analyze, and visualize data using various technologies such as Python libraries to understand consumer behavior, conduct market analysis, and more. The classes will incorporate a combination of lectures, class discussions, and in-class coding sessions.

Marketing Courses: Spring 2023

MKTG102101
Marketing Principles
Hudson, Bradford T
Spring 2023
This course is a prerequisite for all other marketing courses. Marketing is a dynamic, creative and challenging discipline that plays a leading role in the strategy and destiny of any company. Marketing is the business function with primary responsibility for generating revenue, defining the value proposition, and managing relationships with customers. Three broad areas will be explored including understanding markets and competitors, developing new products and organizing distribution, and implementing communications and promotions. A variety of examples in traditional industries and the digital sector will be discussed. Analysis and decision skills will be developed by practicing the use of tools and case studies. This course provides a foundational understanding of the marketing discipline, which is necessary for any role within business organizations.

This course is a prerequisite for all other marketing courses. Marketing is a dynamic, creative and challenging discipline that plays a leading role in the strategy and destiny of any company. Marketing is the business function with primary responsibility for generating revenue, defining the value proposition, and managing relationships with customers. Three broad areas will be explored including understanding markets and competitors, developing new products and organizing distribution, and implementing communications and promotions. A variety of examples in traditional industries and the digital sector will be discussed. Analysis and decision skills will be developed by practicing the use of tools and case studies. This course provides a foundational understanding of the marketing discipline, which is necessary for any role within business organizations.

**Consumer Behavior**

**Aksu, Gunben Ceren**

**Spring 2023**

This course integrates marketing theory with insights from other fields of study, including social psychology, cognitive psychology, evolutionary psychology, and behavioral neuroscience. It analyzes consumer processes such as perception, learning, attitude formation, and decision making. These variables are broadly relevant to marketing challenges, given that the success of products and brands depends on their appeal to consumers. Discussion topics range from art and aesthetics to crisis behavior to new product development.

**Customer Research and Insights for Marketing Decisions**

**Salisbury, Linda**

**Spring 2023**

Formerly titled Marketing Research. Information is vital for solving critical marketing problems and gaining competitive advantage. This course focuses on how to improve marketing decision-making through better research design and methods. Students learn how to identify managerial problems, develop relevant research hypotheses, determine appropriate methods for data collection and analysis, and develop recommendations for marketing solutions. Topics include foundational methods, such as focus groups, survey design, and marketing experiments. Students will gain the ability to identify, collect, and analyze essential marketing data and apply research results to become better marketing decision-makers.

Multichannel Retailing

Seiders, Kathleen

Spring 2023
This class focuses on the necessary concepts and principles of retailing involved in making retail and wholesale decisions. The course looks at retailing from both a consumer perspective (e.g., why does a consumer shop a particular retail outlet?) and a business-to-business perspective (e.g., how does the retailer decide which supplier to use?). Additionally, the course examines the various methods of retailing (e.g., bricks and mortar, bricks and clicks) and how these methods have evolved and will evolve in the future.

**Integrated Marketing Communications**  
**Nenkov, Gergana Y**  
**Spring 2023**  
This course concerns the communication function in marketing. It is designed to introduce students to integrated marketing communications (IMC). It aims at relating the elements of the marketing mix (4P's) to the various aspects of the communications that take place between the firm and its customers. The course builds on a base of strategic marketing planning and consumer behavior and then proceeds to examine the role of the promotional mix (e.g., advertising, direct marketing, sales promotion, Internet and interactive marketing, publicity and public relations) in developing integrated marketing communications programs and helping organizations meet strategic marketing objectives.

Digital Marketing
O'Hern, Matthew S
Spring 2023
In today's digital economy, successful companies must develop new ways to attract, connect with, and delight their customers. This has prompted a decisive shift away from traditional media strategies toward novel, digitally-enabled strategies that can help firms achieve their financial objectives. In this course you will learn about a number of different aspects of digital marketing including content marketing, website optimization, social media marketing, paid search, and search engine optimization. Perhaps more importantly, this course will help you develop a strong understanding of the digital marketing tools and platforms that companies use to differentiate themselves from their competition and will allow you to build a set of digital assets that you can use to demonstrate your digital marketing acumen to prospective employers.

Product Planning and Strategy
Bright, James P
Spring 2023
With the growing concern over the success rate of new products, an intense effort is being employed by marketers to establish more effective new product development and management strategies. Using lectures and case studies, this course will focus on the process of conceiving new products, developing an effective organization, and designing and implementing effective marketing strategies and policies over the course of the product life cycle. Class material will provide the student with insight into new product development across a wide variety of industries.

Strategic Brand Management
Fisher, John H
Spring 2023
This course teaches students fundamental and leading-edge concepts in brand management. Students learn to develop and articulate brand strategy, how to give strategic brand direction, and how to measure strategic brand progress. They learn how to manage key relationships and functions that surround the brand, e.g., advertising, promotion, public relations, licensing, and product and package design agencies. A capable brand manager has exceptional strategic, quantitative, interpersonal, and presentation skills and must be comfortable with decision-making and leadership. The course will focus on the development and application of these skills in brand management via in-class learning, case discussion, and project work.

MKTG317701
Heritage Marketing
Hudson, Bradford T
Spring 2023
This course explores the interaction of marketing and history in the consumer marketplace. Heritage marketing is a strategic approach to capitalize on the historical status of older brands in the present and future. It uses the entire marketing system to develop a strategic position based on heritage, activate powerful dynamics in consumer behavior such as nostalgia, communicate relevant messages, and monetize the past. Business history and archival collections provide the content and inspiration for related communications and new product development. The primary classroom activity will be the analysis and discussion of business case studies from various industries. The pre-requisites are Marketing Principles and any course from the History core sequence.

Design Thinking and Strategy  
Dickinson, Kristine D  
Spring 2023
"Design thinking is a human-centered approach to innovation that draws from the designer's toolkit to integrate the needs of people, the possibilities of technology, and the requirements for business success." - Tim Brown, CEO of IDEO. Strategic design thinking is an integral driver of innovation and a significant factor in a business' ability to foresee and adapt to customer needs. Companies like Apple, IDEO, and Pixar are all pioneers in the field, and this course will draw directly from their proven methods. Students will learn the various phases of design thinking, and how to apply a customer-centric approach to products and services in a range of industries. Students will delve into topics such as user experience (UX) product design, creative problem-solving, strategic storytelling, and customer-centric business decision making. Course content will include team projects, case studies, and occasional guest lectures from industry experts. The class will be highly focused on practical experimentation and is directly relevant for students interested in product and brand management, marketing strategy, entrepreneurship, and beyond.

Sports Marketing
Olesh, Evan S
Spring 2023
The goal of this course is to provide an understanding of the business practices of the sports industry. Taking a practical approach, students will be asked to create business solutions for sports organizations. The attributes and failures of real examples will be discussed. Students will be expected to take the experience and apply it to creating specific campaigns, programs, and overall marketing plans for a specific sports application. Relationship architecture principles will be discussed at length and expected to be incorporated into the final project.

TechTrek West—Undergraduate
Doyle, Jeremiah T
Spring 2023
The TechTrek course is a 1-credit professional development course that introduces students to the entrepreneurial mindset and is open to and intended for underogs enrolled in any undergraduate program at BC (e.g. CSOM, MCAS, LSOE). An entrepreneurial mindset is a critical component for new ventures, innovation within large companies, starting social initiatives, and developing a rewarding and impactful career in an ever-changing world. The course combines 4 traditional classroom lectures with a series of meetings with entrepreneurs, venture capitalists, and other executives throughout the semester. In the past year, students have met with senior leaders at companies like Google, Facebook, Airbnb, Uber, Salesforce, Goldman Sachs, Tesla, Dropbox, Fanatics, Twitter, numerous venture capital firms, and startups of all shapes and sizes. Course work and visits have an entrepreneurial focus, covering topics such as venture capital, entrepreneurial management, social media and platform strategies, and the social/ethical implications of digital technologies. We spend class time reflecting on our visits with entrepreneurs, discussing what implications the visit has for our understanding of business strategy and our own careers. The class is intended to help students identify and explore their own interests and what these interests mean for their career trajectory. This class is required for students from the class of 2025 and forward who wish to co-concentrate in Entrepreneurship.

In today's business environment, marketers must be adept at creating highly targeted promotional messaging that resonates with their customer base. In this course, through hands-on exercises and by working on campaigns for real-world clients, students will develop a deeper understanding of how to create effective social media campaigns, how to use social listening technologies to assess customer needs, and how to increase online effectiveness via enhanced search engine optimization (SEO) and website optimization techniques. In addition, this course will help prepare students for entry-level positions in digital marketing agencies by introducing them to the challenging processes associated with onboarding clients, developing an appropriate scope of work, creating collateral for client pitch meetings, responding to client feedback, creating high impact creative assets, and creating an effective social media calendar.

This course is designed to introduce the changing business models of new media (video games, music, TV and film, and journalism) industries. This is achieved by examining in detail the technology enablers and disruptive forces in both the U.S. and around the world, consumer behaviors, as well as legal and regulatory concerns. A special emphasis will also be placed on media companies whose business models have been heavily influenced or altered by digital distribution. This class will be a combination of in-class and Zoom sessions during class time, and will have an emphasis on influential guest speakers from various industries.

This course focuses on the managerial skills, tools, and concepts required to produce a mutually satisfying exchange between consumers and providers of goods, services, and ideas. The material is presented in a three-part sequence. Part one deals with understanding the marketplace. Part two deals with the individual parts of the marketing program such as pricing, promotion, product decisions, and distribution. Part three of the course deals with overall strategy formulation and control of the marketing function. Students in this course will come to understand the critical links between marketing and the other functional areas of management.

**Customer Research and Marketing Decisions**  
**Loessi, Edward J**  
**Spring 2023**  
The current business environment rewards companies that respond to consumer demand faster than their competitors, and marketing research is a key route for companies to learn about their target markets. This course seeks to make you both a smarter producer and consumer of marketing research. Topics covered include formulating project-based research questions, the major styles of marketing research, and fundamental research design such as measurement theory and sampling. SPSS and data analysis are covered from a managerial perspective, and you will learn how to conduct and interpret common forms of data analysis seen in marketing research reports.

MKTG800301
Product Planning and Strategy
Andreiunas, John P
Spring 2023
This course focuses on the challenge of creating and launching new products and services. It is particularly appropriate for those who are interested in becoming a Product Manager within a larger company, or in starting their own business at some point. The course is built on the concept of learning by doing, as small student teams go through the full process of coming up with their own new product or service ideas, evaluating them, doing market research, and developing launch plans. We also assess a number of current new product ideas, analyze cases from a range of industries, and have one or two outside speakers. There is a heavy emphasis on discussion and practicality.

MKTG800501
Marketing Strategy & Innovation
Cunningham, Kristy S
Spring 2023
This course builds on the principles covered in the core Marketing course by further developing and applying marketing strategy to different company lifestages (i.e. launch, geographic expansion, repositioning), industries (i.e. luxury, retail, e-commerce) and innovations (i.e. digital marketplaces, AI-driven solutions.) It takes a Marketing practitioners view of determining and owning the strategy and builds the link between strategy, activities, and outcomes. You will be exposed to problems and situations that will require you to assess, analyze and recommend actions within the context of marketing skills and organizational alignment. Extensive case analysis and financial and analytical tools are used to examine marketing growth strategies, target market strategies, external factors, marketing program development, the marketing organization, and implementation of marketing strategy. This course is appropriate for those considering marketing as a career, consultants helping to drive revenue generation, or general managers looking to build an external, customer-centric skillset to complement operational capabilities.

This course concerns the communication function in marketing. It is designed to introduce students to integrated marketing communications (IMC). It aims at relating the elements of the marketing mix (4P’s) to the various aspects of the communications that take place between the firm and its customers. The course builds on a base of strategic marketing planning and consumer behavior and then proceeds to examine the role of the promotional mix (e.g., advertising, direct marketing, sales promotion, Internet and interactive marketing, publicity and public relations) in developing integrated marketing communications programs and helping organizations meet strategic marketing objectives.

MKTG801401
Strategic Pricing Management
Smith, Gerald, PHD
Spring 2023
This course explores pricing strategy and shows how pricing can be managed to achieve profitability. The course is practical and hands-on. It examines current pricing practices used by many companies, and shows how they lead to distortions and problems. It suggests strategic principles that lead to more profitable pricing decisions, including methods for financial analysis that focus on pricing profitability. Other topics include value-based pricing, managing price competition, segmenting markets based on price sensitivity, segmentation pricing strategies, buyer psychology of pricing, and research methods for assessing price sensitivity.

MKTG801501
Strategic Brand Management
Davey, James S
Spring 2023
This course teaches students fundamental and leading-edge concepts in brand management. Students learn to develop and articulate brand strategy, how to give strategic brand direction, and how to measure strategic brand progress. They learn how to manage key relationships and functions that surround the brand, e.g., advertising, promotion, public relations, licensing, and product and package design agencies. A capable brand manager has exceptional strategic, quantitative, interpersonal, and presentation skills and must be comfortable with decision-making and leadership. The course will focus on the development and application of these skills in brand management via in-class learning, case discussion, and project work.

**Entrepreneurial Marketing Strategy**

**Neeson, John J**

**Spring 2023**
This course focuses on how to develop an integrated marketing plan for a new company. The class will teach techniques and skills for developing a marketing strategy for a startup, including prioritizing market segments, positioning and messaging approaches, sales model and capacity planning for marketing, and developing an integrated marketing model to help scale the new endeavor. Startups are unique, requiring an agile marketing approach, the ability to scale quickly, and the requirement to build a new category or quickly enter an existing one. Classes will incorporate a combination of lectures, projects, guest speakers, and the development of a marketing plan for a new or early stage startup.

**Digital Marketing: Building Consumer & Brand Relationships**

Marcotte, Matthew L

**Spring 2023**

This course focuses on the challenges and opportunities brands have in connecting with consumers in an increasingly complex and digital world. Students will explore consumer behavior trends that are shaping expectations of brands, how those changes affect digital marketing strategies and the approaches, tools and infrastructure needed to meet consumers where they are. This course will use research, case studies and current real life brand examples to educate students on the paradigm shifts needed to drive participation, loyalty and profit. Students will learn how brands need to connect, learn, segment, target and engage using systems, platforms and technology.

PRTO240201
American Commerce and American Culture
Corbin, Ian M
Fall 2022
By any number of measures, the American social fabric is fraying. Long before the exacerbations of a global pandemic, polarization was increasing, trust was plummeting, deaths of despair were on the rise, civic participation was down, and we heard talk of a growing epidemic of loneliness. All this amidst a world-historical expansion of wealth, and falling rates of crime. What is going on? This course begins with the suspicion that American business plays a central, underappreciated role in the ongoing evolution of our social fabric. It aims to ask: how do the business community's deep assumptions, values and practices shape our sense of ourselves and each other? Our senses of safety and precarity? Our inclinations to creativity and conformity? This course will examine key documents from management theory, social science, philosophy and literature to explore some ways that American commerce and American culture shape one another, and how this relationship can be brought into healthier alignment.

PRTO330001
Senior Seminar in Business Ethics
Smith, Michael J
Fall 2022
The purpose of this course is to provide Portico Teaching Assistants a greater depth of understanding of the philosophical issues covered in Portico, and to offer an introduction to the core pedagogical techniques involved in teaching applied ethics. Participating TAs will study the course material on a second-order level by considering the evolution of their understanding of the course material over their undergraduate career, and by exploring pedagogical best-practices to improve teaching outcomes. The structure of the course will thus run concurrently with that of Portico. While primarily directed towards enriching the experience of the TAs, the course will simultaneously aim to facilitate the goals of Portico itself by providing TAs with additional tools and resources for engaging with their students and creating a more cohesive and impactful classroom community.

**The Good Life: Life, Money, and Generosity**

**Bagnani, Elizabeth S**

**Fall 2022**

This course is about becoming. It encourages students to reflect on the type of person they are becoming and the type of person they want to become. First part considers the question "what is a good life?" and revisits some themes from Portico. Students also reflect on their assumptions about and tensions around money. Second part narrows to consider some tools relating to budgeting and debt. Final part considers "what does it mean to be generous?" and questions that consider a life that includes both money and much more. In use: reflections, reading quizzes, interview, first-post-graduation-year budget, and final paper.

**Credits:** 3

PRTO240101
Free Markets, Faith, and the Common Good
Cioni, Joseph R
Spring 2023
If sharing our gifts, pursuing justice, and acting on our concern for the poor and marginalized of society are core values of Jesuit-trained students, to what extent is free market capitalism a good "fit" for helping us meet those goals? In this course, we will explore several key moral and philosophical foundations of free market capitalism. These arguments will then be placed in dialogue with central insights contained in Catholic social teaching, especially the principles of human dignity, solidarity, the preferential option for the poor, and the common good.

Perspectives on Management
Clavin, John C; Doyle, Jeremiah T
Fall 2022
This course, taught by practitioners John Clavin (BC '84) and Jere Doyle (BC '87), provides BC students with an excellent opportunity to explore the functional disciplines of business from a real-world perspective. Using a combination of lectures, case studies, readings and outside speakers, the course provides students the opportunity to get grounded in each of the CSOM concentrations while gaining outside views on careers in related fields and industries. The course will also provide a framework to explore and discuss cross-functional issues that impact business strategy and execution. This is a highly interactive class that places a premium on both preparation and participation each week. The course is initially open to CSOM sophomores but normally has availability for juniors and seniors across all undergraduate majors

Fall 2022
UGMG1222 will equip first generation and low income students with: awareness of crucial resources, an understanding of cultural capital, and a supportive network to assist the transition to college and specifically the Carroll School of Management. This course will follow a discussion-based model with class participation being a main emphasis. We will explore themes relevant to first generation and low income students. By the end of the semester, students will gain a working community of peers and confidence in their ability to flourish at Boston College.

**Case Competition Cohort**

**Xiong, Josephine D**

**Fall 2022**
Reserved for Sophomores and Juniors in the Carroll School, with permission of the instructor. This course is for Sophomore and Juniors in the Carroll School of Management who are interested in learning how to better prepare for strategy and ethics case competitions. The class will meet weekly for one hour with the objective to develop skills in the following areas: be able to effectively analyze an ethics case and a strategy case, determine feasible alternatives, craft a recommendation, implement recommendations, and prepare for judges' questions. The course will also help students with a PowerPoint presentation for case competitions and oral tips for such a competition. The 10-week course will end with an internal case competition where winning groups will be chosen to attend competitions and represent the Carroll School nationally in the spring and subsequent fall (juniors who are abroad in the spring will not be eligible to take the course).

Nursing Courses: Summer 2022

NURS121001
Public Health in a Global Society
Edmonds, Joyce K; Hawkins, Summer S
Summer 2022
This foundation course presents public health as an interdisciplinary science focused on health promotion and disease prevention at the population level. The course provides an overview of the history of public health, global burden of disease, sub-disciplines of public health, maternal/child health, and nutrition, and emphasizes the collaborative nature of the field through examples in research and practice. An inherent principle in public health is advancing social justice and this course, and the public health sequence more broadly, focuses on at-risk populations, reducing health disparities, and improving health equity at the population level.

Credits: 3
Room and Schedule: By Arrangement; See Office of Global Education website for details
Satisfies Core Requirement: Social Science
Prerequisites: None

NURS426101
Population Health Practice in the Community
Cullinan, Donna L
Summer 2022
This course focuses on the application of population health, emphasizing public health nursing roles, that include the care of population members in community settings, such as a neighborhood, school, or non-profit organization, locally or globally. Students will gain experience in community engagement, community health assessment, screening, case management, health education, service and program evaluation, and advocacy. Emphasis is placed on the multiple determinants of health and on using interdisciplinary approaches in practice to implement evidence-based interventions aimed at health promotion, risk reduction, and disease prevention.

**NURS426301**  
**Nursing Synthesis Clinical Laboratory**  
**McNutt-Clarke, Beth**  
**Summer 2022**  
This course provides senior nursing students with an opportunity to synthesize, expand, and refine nursing concepts and clinical reasoning competencies. Through an intensive clinical experience completed in institutional and/or community settings, students focus on the healthcare needs of specific client populations, study in depth the interventions used to restore and/or optimize health, and utilize evidence-based research in practice. Emphasis will be placed on current quality and safety guidelines and standards of care for the specialty area in which the student is practicing.

**Credits:** 3  
**Room and Schedule:** By Arrangement  
**Satisfies Core Requirement:** None

NURS759501
Nurse Anesthesia III
Thomas, Allan C
Summer 2022
This course focuses on the delivery of anesthesia care within advanced nursing practice in a broad range of clinical situations for patients with multiple, complex health problems. Through the refinement of assessment and management skills, critical thinking is further developed. With supervision, students assume more overall responsibility for anesthetic management. Through seminar participation students explore the anesthetic management of diverse populations and specialty situations. Likewise, simulation is focused on the management of complex and specialty situations. Concurrent with this semester, students begin a student-directed review of didactic content in advance preparation for the National Certification Exam.

**NURS801101**  
**Direct Entry Nursing Synthesis Clinical**  
**Chavez, Krista S; Downey, Nikora; Harper, Kathryn A; Jones, Melinda D; McNutt-Clarke, Beth**  
**Summer 2022**  
This course provides nursing students with an opportunity to synthesize, expand, and refine nursing concepts and clinical reasoning competencies. Through an intensive clinical experience completed in institutional and/or community settings, students focus on the healthcare needs of specific client populations, study in depth the interventions used to restore and/or optimize health, and utilize evidence-based research in practice. Emphasis will be placed on current quality and safety guidelines and standards of care for the specialty area in which the student is practicing.

**Credits:** 3  
**Room and Schedule:** By Arrangement  
**Satisfies Core Requirement:** None  
**Prerequisites:** NURS8001 and NURS8004 and NURS8013 and NURS8007 and NURS8008 and NURS8009 and NURS8010  
**Corequisites:** None
NURS871201
Healthcare Quality Management
Pearson, Madelyn M; Reid Ponte, Patricia A
Summer 2022
The course explores applications of quality improvement measures to the healthcare environment. Topics covered include an understanding of high reliability organizations, utilization review, risk management in healthcare, quality management, the use of outcomes research in improving patient care efficacy and safety, and performance management through training. This course is consistent with Lean Six Sigma (Green Belt) competencies and can partly contribute to preparation for the certification exam.

NURS871301
Healthcare Information Technology
Stettheimer, Timothy D
Summer 2022
This course explores the critical role of e-health and information systems in the planning, operation, & management of healthcare organizations. Students will learn how to assess and evaluate health information systems and business requirements in a variety of settings such as health systems, hospitals and medical practices. Students will develop skills in healthcare technology implementation design that addresses such industry-specific requirements as translating HIPPA and other regulations into specific technology decisions while implementing medical systems (EMR, lab, clinical services, medical database providers, etc.). Students will also learn how to manage multi-institutional relationships as they are expressed in technology implementations, including the many vendor configurations but also cross-provider organization relationships. Specific topics include data & systems integrations, communications protocols, security standards, procurement, and authentication and authorization.

NURS871401

**Nursing Ethics and Professional Responsibility in Advanced Practice**

**Grace, Pamela J**

**Summer 2022**

The course prepares advanced practice nurses for ethics leadership within the broader healthcare arena. Links are made among philosophical/theoretical foundations of nursing, ethical theory, and nursing goals. Skills supportive of the ethical decision making of nurses, peers, and the team are developed with in-class opportunities to practice leading ethics rounds and developing ethics education projects. An emphasis is placed on facilitating the interests of current and future patients and society as a professional obligation. Socially derived injustices and professional responsibility to advocate for just healthcare is highlighted along with strategies to influence institutional and health policy on behalf of individual and social good.

NURS871601
Health Care Policy for Nursing Leaders
Zwilling, Jana G
Summer 2022
This course prepares nurse leaders and scholars to influence health care and related policies in support of nursing's goals and social justice. The structure and financing of U.S. health care system and roles of government, insurers, providers, and consumers are examined. The relationships among health policy and the social and economic determinants of health are explored through analysis of key issues in health policy. Students engage in strategies to analyze and inform health policy. The course provides the foundation for leadership in interdisciplinary collaborative endeavors to address, through a nursing perspective, health policy issues at the local and national levels.

NURS972001
Epidemiology
Faulkner, Kenneth
Summer 2022
Epidemiology is the study of the distribution and determinants of health-related states or events (including disease), and its methods are used in the control of diseases and other health problems in diverse populations. This course introduces basic principles and methods of epidemiology and biostatistics. Measures of disease frequency, association and causation, the design and analysis of studies, and the potential issues that may arise in these studies are addressed. This course prepares advanced practice nurses to engage in inter-professional collaboration with the ultimate goal of improving population health.

**NURS973001**  
**Advanced Physiology and Pathophysiology across the Lifespan**  
**Hurley, Dorean L**  
**Summer 2022**

This course focuses on physiologic and pathophysiologic processes that affect individuals across the lifespan. The emphasis is on central concepts of physiology and pathophysiology, including genetic and epigenetic mechanisms, immunity, inflammation, cell growth regulation, hematopoiesis, and hemostasis. These concepts are then applied in a systematic survey of diseases within body systems. Current research, clinical examples, and application to advanced nursing practice are incorporated throughout the course.

NURS973101
Pharmacotherapeutics in Advanced Practice Nursing
LaPierre, Kellie L
Summer 2022
This course will provide the advanced practice nursing student with the fundamental pharmacologic principles necessary to support pharmacotherapeutic decision making in collaboration with patients across the lifespan. The interrelationship of physical, psychosocial, cultural, pharmacogenomic, economic, ethical, and legal factors will be explored. The student will develop evidence-based, cost effective interventions to promote optimal person-centered drug therapy. Application of these principles to various real world clinical situations and individual responses will be emphasized.

NURS973201
Advanced Health/Physical Assessment across the LifeSpan
Bashaw, Cynthia M; Curtis, Christopher R; Gribaudo, Amy M
Summer 2022
This course uses a holistic approach and risk appraisal frameworks as a basis for health assessment across the lifespan. Building on knowledge of basic health assessment, the APRN student performs comprehensive health histories and physical and mental health examinations. Students will incorporate subjective and objective data to evaluate healthy individuals and those with acute and/or chronic disease. The course utilizes learning laboratory experiences, high-low fidelity simulation, and standardized patients to facilitate students' learning. Health promotion, health maintenance and harm reduction concepts are emphasized and applied, taking into consideration life circumstances and cultural, ethnic, and developmental variations.

NURS981401
Bridge to Primary Care Advanced Practice Nursing
Underwood, Patricia
Summer 2022
This is the first in a series of clinical reasoning and decision-making courses required for all primary care DNP students. Building on the skills acquired in Advanced Health/Physical Assessment across the Lifespan, the course will focus on communication and clinical decision-making for DNP students. Specific consideration will be given to wellness and health promotion across the lifespan, screening procedures, ordering and interpretation of diagnostic tests, health behavior change interventions, as well as problems frequently encountered in primary care. The combination of didactic, clinical, and simulated learning experiences will prepare the student for subsequent specialty clinical course work and experiences.

NURS981501
Advanced Practice Nursing Role
Kelly-Weeder, Susan A
Summer 2022
This course prepares students to transition into an advanced practice nursing role. Historical and contemporary influences leading to the development of this professional role are explored, along with anticipated future dimensions. The impact of the advanced practice nurse on patient, family, and population outcomes will be examined. The course incorporates discussions of relationship-based care, role implementation across practice settings, and advanced practice nursing competencies. It also provides a synthesis of legal, regulatory and scope of practice considerations. The course facilitates a comprehensive understanding of political, economic, social and professional issues relevant to advanced practice nursing.

NURS984201
Psychobiology of Mental Health and Illness
Dillon, Maeghan A
Summer 2022
This course focuses on the biological and psychological correlates of major psychiatric disorders across the lifespan, as referenced in the Diagnostic and Statistical Manual of Mental Disorders-5 (DSM-5). The central, autonomic, and peripheral nervous systems are examined from cellular, neurotransmitter, circuit, and system perspectives. Behaviors and disorders are understood in light of genetic, anatomical, physiological, neurochemical, and neuroendocrine influences. Scientific, neurobiological, biopsychosocial, and nursing theories about psychological symptom formation and resolution and strategies to recognize and distinguish the presence of physical and mental illness are evaluated.

This course, the first in a 6-course sequence, introduces students to nurse anesthesia clinical practice. Through a combination of seminar, simulation and patient care, students are encouraged to think critically and integrate theoretical knowledge into a detailed plan of anesthesia care. By participating in the continuum of the perioperative experience, students learn to provide anesthesiacare for healthy patients undergoing minimally invasive surgical procedures under the guidance of a clinical preceptor. The course also provides an opportunity for students to becomesocialized into the advanced practice role of the nurse anesthetist.

NURS986401
Chemistry, Biochemistry, and Physics for Nurse Anesthesia Practice
Emery, Susan A
Summer 2022
This course is an integrated study of chemistry, biochemistry, and physics underpinning nurse anesthesia practice. The chemical structure of compounds and chemical reactions are examined as they apply to pharmacokinetics and pharmacodynamics of anesthetic agents. Concepts of solubility, diffusion, and osmosis are described as well as the role of acid-base balance in maintaining the body's internal milieu. Metabolic pathways responsible for energy production are examined. Gas laws and other laws of physics as they pertain to nurse anesthesia practice are illustrated with specific examples. The emphasis is placed on integration of scientific theory into practice.

Respiratory Physiology and Pathophysiology for Nurse Anesthesia Practice
Vitale, Caitlin M
Summer 2022
This course is an in-depth study of the anatomy, physiology, and pathophysiology of the respiratory system and related anesthesia implications. The concepts of ventilation and perfusion as well as oxygen transport are examined. Assessment of baseline pulmonary function and alterations seen in common and uncommon disease states are reviewed. Anesthetic implications for the patient with alterations in respiratory or oxygen transport physiology form the basis for the development of an individualized plan of anesthesia care including ventilation modalities.

NURS121001
Public Health in a Global Society
Longacre, Ashley; van de Water, Brittney
Fall 2022
This foundation course presents public health as an interdisciplinary science focused on health promotion and disease prevention at the population level. The course provides an overview of the history of public health, global burden of disease, sub-disciplines of public health, maternal/child health, and nutrition, and emphasizes the collaborative nature of the field through examples in research and practice. An inherent principle in public health is advancing social justice and this course, and the public health sequence more broadly, focuses on at-risk populations, reducing health disparities, and improving health equity at the population level.

Credits: 3
Room and Schedule: 245 Beacon Street Room 107 TuTh 12:00 Noon-01:15PM
Satisfies Core Requirement: Social Science
Prerequisites: None
Corequisites: None
Cross-listed with: PHCG1210
Frequency: Every Fall
NURS208001
Pathophysiology
Hurley, Dorean L
Fall 2022
Pathophysiology offers an integrated approach to human disease. The course builds on the underlying concepts of normal function as they apply to the basic processes of pathogenesis. Biological variations of age, gender, and cultural differences are integrated into the course content where applicable. Common acute and chronic health problems are introduced to explore the interrelatedness of a variety of stressors that affect physiological function. Successful completion of Pathophysiology facilitates the student's transition into clinical nursing practice.

This course introduces the concepts of health, health promotion, and growth and development across the lifespan. The interactions of underlying mechanisms such as environment, culture, ethnicity, family, genetics, and gender that are foundational to the development and individual health will be explored. Theories and principles that address physical, cognitive, and psychosocial growth and development will guide understanding of the complex healthy human, from birth to geriatrics and death. Principles and theories of health promotion will be analyzed and applied from a nursing perspective to support the individual's desire to increase personal and/or family health potential and well-being.

**NURS317001**  
**Principles of Evidence-Based Nursing**  
**Park, Jinhee**  
**Fall 2022**  
This course seeks to develop an applied understanding of evidence-based practice as it relates to the science of nursing. Through exploring components of the research process, an appreciation of the various types of evidence used by nurses and an understanding of the importance of evidenced-based research to improve clinical practice will be fostered. The ethical considerations related to evidence-based practice will be discussed. At the conclusion of the course, students are prepared to be to be critical consumers of research used in evidence-based practice.

NURS324201
Adult Health Nursing Theory II
Barone, Stacey H
Fall 2022
This course builds on the concepts learned in previous courses including adult health and pharmacology and expands the knowledge base for planning and implementing care of adults with acute health problems and acute exacerbations of chronic health problems. Clinical case studies of acute care emergencies are used to discuss clinical judgment. Emphasis is placed on the selection of evidence-based interventions, evaluation of interventions, and use of evaluative data in refining a plan of care for the adult patient. Discussions focus on the role of the primary nurse in the acute care setting including collaboration, discharge planning, and health teaching.

NURS324401
Childbearing Nursing Theory
Crevecoeur, Thamarah; Finerty, Jacalyn S
Fall 2022
The course focuses on concepts associated with the unique responses of families during the childbearing cycle, normal and high risk pregnancies, and normal and abnormal events in women's health. Current multidisciplinary research in women's health with a focus on the childbearing cycle, including genetics and cultural competence, is presented. Evidenced based nursing practice for the childbearing family is discussed. The nursing implications of attending to both the physiologic and the psychosocial needs of the childbearing family are reviewed. Emphasis will be placed on AWHONN and ACOG standards of care.

**Credits:** 3

Clinical Laboratory of Childbearing Theory
Veroneau, Martha E
Fall 2022
Application of childbearing theory to the diagnoses, interventions, and outcomes for the care of families in structured clinical settings. Focus is on prenatal, perinatal, and post-natal activities. Students work collaboratively with the multidisciplinary team in applying evidenced-based practice derived from current multidisciplinary research to the childbearing family. Supervised by nursing faculty, the students are mentored to extend their skills in critical thinking and clinical judgment to meet the physical, psychosocial, cultural, and spiritual needs of their clients and families. Emphasis will be placed on QSEN, AACN Essentials for baccalaureate education, AWHONN and ACOG standards of care.

NURS425001
Child Health Nursing Theory
Haze, Nanci J
Fall 2022
This course builds on the published *Pediatric Nursing: Scope and Standards of Practice* to discuss the unique responses of children and their families to acute and chronic illness. Emphasis is placed on the child's growth and development in relation to wellness and illness. A family-centered approach is used to address the health teaching, promotion, restoration, and maintenance needs of children and their families. Theoretical principles are presented, and creative, evidence-based nursing intervention strategies to meet the needs of children and their families across the health care continuum are discussed.

NURS425201  
Psychiatric Mental Health Nursing Theory  
Gasser, Raymond F; Hudson-Bryant, Donna J  
Fall 2022
This course builds upon the standards of practice from APNA-ISPN, AACN, and QSEN to discuss the legal, ethical, and therapeutic role of the psychiatric mental health nurse in caring for individuals with psychiatric disorders across the life span. Current interdisciplinary research on the genetic, neurobiological, and psychosocial theories of depression, psychosis, substance abuse, bipolar illness, eating, anxiety, personality, and cognitive disorders is analyzed. Evidence-based nursing practice, including psychopharmacology and psychosocial treatment modalities such as cognitive-behavioral, interpersonal, group, and milieu therapy is applied from a multicultural perspective. Nursing interventions for families and communities experiencing crisis, grief, and trauma are identified.

Psychiatric Mental Health Nursing Clinical Laboratory
Scott, Nathan
Fall 2022

Therapeutic communication skills provide a foundation for implementing the nursing role based on the American Psychiatric Nurses Association standards of practice with psychiatric patients/clients in a variety of psychiatric treatment settings. In the clinical experience, students work collaboratively with multidisciplinary teams in applying evidenced-based practice based on current interdisciplinary research to the nursing process. In weekly supervision with clinical faculty, students are mentored to extend their skills in clinical reasoning to meet the psychological, social, cultural, biological, and spiritual needs of persons from varied backgrounds (economic, racial, ethnic, age, and gender) who are in treatment for mental illness.

NURS426001
Population Health Nursing Theory
Crevecoeur, Thamarah; Gasser, Raymond F
Fall 2022
This course introduces the conceptual and scientific frameworks of population health, emphasizing public health nursing roles. The course integrates health promotion, risk reduction, and disease prevention across the life span in a range of local and global settings, using case examples that nurses, as part of interdisciplinary teams, will encounter. Community assessment and epidemiological methods are introduced. Health disparities and vulnerability are examined through an ecological lens together with traditional and emerging public health issues. Students will learn about bridging population health and clinical care in order to meet the prevention health needs of individuals, families, and populations.

NURS426401
Actualizing the Role of Professional Nurse
Cullinan, Donna L; Simonelli, Mary C
Fall 2022
Prepares students to transition into the role of the professional nurse. Responsibilities associated with assuming the role of a professional are explored in relation to furthering individual and social good. Contemporary health care policies and economic pressures are examined for their influence on the delivery of quality patient care. Current ethical and legal standards are highlighted and students are encouraged to reflect on how biases and prejudices influence the provision of patient care. Focus is placed on recognizing and addressing injustices in health care access and quality, which is essential to actualizing the role of professional nurse.

**NURS759301**  
**Nurse Anesthesia II**
Thomas, Allan C  
Fall 2022  
This course provides the opportunity for students to integrate theory into clinical practice for patients with significant comorbidities undergoing more complex procedures. Anesthetic requirements as dictated by patient assessment, including the surgical procedure are studied in greater depth. Seminar and simulation experiences are sequenced to complement the theoretical content presented in NURS7592, Advanced Principles of Nurse Anesthesia Practice.  

Credits: 5  
Room and Schedule: By Arrangement  
Satisfies Core Requirement: None  
Prerequisites: NURS7591 and NURS7590  
Corequisites: NURS7592  
Cross-listed with: None  
Frequency: Every Spring

Comments: None  
Status: Offered

NURS769101  
Nurse Anesthesia IV  
Emery, Susan A;Thomas, Allan C;Vitale, Caitlin M  
Fall 2022  
This course provides the opportunity for students to assume more responsibility for anesthetic management for routine anesthetics while also gaining appropriately supervised experience with complex and specialty cases. The student-directed review begun during the previous semester continues and students take responsibility for writing, implementing and debriefing scenarios during the simulation experience.  

Credits: 5  
Room and Schedule: Higgins Hall 280 MW 09:00AM-11:50AM  
Satisfies Core Requirement: None  
Prerequisites: NURS7593 and NURS7595 and NURS7592  
Corequisites: None  
Cross-listed with: None

Student Level: Graduate
NURS800101
Pharmacology & Nutrition Direct Entry DNP
Sly, Jacqueline R; Tucker, Sheila, R.D.
Fall 2022
This course focuses on the study of clinical pharmacology and nutritional therapies across the lifespan, and the scientific principles underlying their use in professional nursing. The content accentuates the nurses role and responsibility for safe patient care related to administering medications and promoting a therapeutic diet. Emphasis will be placed on the importance of collaboration, patient education, and alternative and complementary therapies, while using evidence-informed science and being mindful of relevant social and cultural factors.

Credits: 3
Room and Schedule: 245 Beacon Street Room 214 F 09:00AM-11:50AM
Satisfies Core Requirement: None
Prerequisites: None
Corequisites: NURS8013 and NURS8004

NURS800401
Direct Entry Adult Health Nursing Clinical
Hurley, Dorean L; McNutt-Clarke, Beth
Fall 2022
This clinical course focuses on the application of knowledge and implementation of professional nursing practice in caring for adults and older adults with acute and chronic conditions and their families. Students will learn and practice advanced psychomotor skills in simulated settings. Through interprofessional collaboration, students implement evidence-based practice to provide high-quality, safe, cost-sensitive care. Students extend their skills in therapeutic communication, critical thinking, and clinical decision making to meet the biopsychosocial and cultural needs of adults and older adults from diverse backgrounds. Students demonstrate leadership in providing patient education, advocacy, and transitional care.

Credits: 5
Room and Schedule: By Arrangement; Tuesday/Thursday

NURS800901
Direct Entry Childbearing Nursing Theory
Crevecoeur, Thamarah; Finerty, Jacalyn S
Fall 2022
This clinical course focuses on the application of knowledge and implementation of professional nursing practice in caring for children and families. A primary focus is promoting wellness and family-centered care for children with acute illness and chronic conditions. Through interprofessional collaboration, students implement evidence-based practice to provide high quality, safe, cost-sensitive care. Students extend their skills in therapeutic communication, critical thinking, and clinical decision-making to meet the biopsychosocial and cultural needs of children and families from diverse backgrounds. Students demonstrate leadership in providing patient education, advocacy, and transitional care for children and families.

Credits: 3
Room and Schedule: F 08:00AM-09:50AM; W 09:00AM-11:50AM
Satisfies Core Requirement: None
Prerequisites: None
Corequisites: NURS8008 and NURS8010 and NURS8007
NURS801201
Direct Entry Population Health Clinical
Cullinan, Donna L; Doherty, Traci C
Fall 2022
This clinical course focuses on the application of population health concepts; and includes the care of population members in community settings, such as a neighborhood, school, and/or non-profit organization. Students will gain experience in community engagement, community health assessment, screening, case management, health education and advocacy. An interdisciplinary approach will be used to implement and evaluate community-informed interventions using the best available evidence, applying epidemiological principles and population-focused priorities of care.

Credits: 2
Room and Schedule: By Arrangement

NURS801301
Direct Entry Adult Health Theory
Bond, Stewart; Repsha, Christine L
Fall 2022
This course focuses on the nursing care of adults and older adults experiencing complex health problems. Relevant theories from nursing and other disciplines, research, and evidence-based guidelines are applied. Person/family-centered approaches to promote, restore, and maintain health are emphasized. Students develop and revise plans of care considering biopsychosocial, cultural, legal, and ethical factors influencing the health and care of adults and older adults with complex health problems and their families. Students will examine the nurse's role in safety and quality improvement.

**NURS871201**

**Healthcare Quality Management**

Nugent, Luanne; Reid Ponte, Patricia A

**Fall 2022**

The course explores applications of quality improvement measures to the healthcare environment. Topics covered include an understanding of high reliability organizations, utilization review, risk management in healthcare, quality management, the use of outcomes research in improving patient care efficacy and safety, and performance management through training. This course is consistent with Lean Six Sigma (Green Belt) competencies and can partly contribute to preparation for the certification exam.

**Credits:** 3

NURS871301
Healthcare Information Technology
Stettheimer, Timothy D
Fall 2022
This course explores the critical role of e-health and information systems in the planning, operation, & management of healthcare organizations. Students will learn how to assess and evaluate health information systems and business requirements in a variety of settings such as health systems, hospitals and medical practices. Students will develop skills in healthcare technology implementation design that addresses such industry-specific requirements as translating HIPPA and other regulations into specific technology decisions while implementing medical systems (EMR, lab, clinical services, medical database providers, etc.). Students will also learn how to manage multi-institutional relationships as they are expressed in technology implementations, including the many vendor configurations but also cross-provider organization relationships. Specific topics include data & systems integrations, communications protocols, security standards, procurement, and authentication and authorization.

NURS871401
Nursing Ethics and Professional Responsibility in Advanced Practice
Milliken, Aimee; Ross, Richard E, SJ
Fall 2022
The course prepares advanced practice nurses for ethics leadership within the broader healthcare arena. Links are made among philosophical/theoretical foundations of nursing, ethical theory, and nursing goals. Skills supportive of the ethical decision making of nurses, peers, and the team are developed with in-class opportunities to practice leading ethics rounds and developing ethics education projects. An emphasis is placed on facilitating the interests of current and future patients and society as a professional obligation. Socially derived injustices and professional responsibility to advocate for just healthcare is highlighted along with strategies to influence institutional and health policy on behalf of individual and social good.

NURS871501
Nursing Leadership in Complex Health Care Settings
Sly, Jacqueline R
Fall 2022
This course prepares graduate nursing students to become leaders in health care. Self-reflection, self-assessment, and values clarification provide the groundwork for a nursing leadership self-development plan. Students will explore a broad range of evidence-based approaches, including leadership and organizational theories, to prepare them to lead in today's complex health care environment including practice, organization, system, academic, and policy arenas. Students will explicate the complexities of health care leadership through the examination of topics such as change management, partnership relationships, innovation, accountability models, organizational culture, diversity and inclusion, conflict management, power, creating trust and psychological safety within teams.

NURS871601
Health Care Policy for Nursing Leaders
Milliken, Aimee
Fall 2022
This course prepares nurse leaders and scholars to influence health care and related policies in support of nursing's goals and social justice. The structure and financing of U.S. health care system and roles of government, insurers, providers, and consumers are examined. The relationships among health policy and the social and economic determinants of health are explored through analysis of key issues in health policy. Students engage in strategies to analyze and inform health policy. The course provides the foundation for leadership in interdisciplinary collaborative endeavors to address, through a nursing perspective, health policy issues at the local and national levels.

NURS887501
Secondary Analysis of Health-Related Datasets
Jurgens, Corrine Y
Fall 2022
In this course, students apply concepts from earlier methods and statistics courses to the secondary analysis of large datasets to answer health-related research questions of interest. Students may choose to work with one of the datasets available for use in the course or, with permission, work with a faculty member on one of his/her datasets. Students are expected to: a) delineate a research question; b) select an appropriate dataset and analytic approach to answer the question; c) execute the analysis; d) discuss the strengths and limitations of the approach and the results; and e) disseminate findings through publications or presentations.

Credits: 3
Room and Schedule: M 10:00AM-12:00 Noon
Satisfies Core Requirement: None
Prerequisites: NURS9808 Research Design and Methods I; NURS9809 Research Design and Methods II; Grad Level Statistics Course; or with permission of the Teacher of Record (TOR).

Cross-listed with: None
NURS971701
Methods of Advanced Scholarly Inquiry
Reid Ponte, Patricia A
Fall 2022
This is the second of four courses to prepare DNP students to conduct an organization approved, scholarly inquiry project to improve health services and patient outcomes. Students critically evaluate the literature and related information to address a health care problem. Scholarly inquiry approaches are presented to enable students to identify a problem, plan change to improve a process or outcome, or develop innovative solutions related to health care delivery. Upon course completion, there will be a faculty and organization approved DNP project charter, which includes the problem, processes, and expected outcomes.

NURS972001
Epidemiology
Longacre, Ashley; Magny-Normilus, Cherlie
Fall 2022
Epidemiology is the study of the distribution and determinants of health-related states or events (including disease), and its methods are used in the control of diseases and other health problems in diverse populations. This course introduces basic principles and methods of epidemiology and biostatistics. Measures of disease frequency, association and causation, the design and analysis of studies, and the potential issues that may arise in these studies are addressed. This course prepares advanced practice nurses to engage in inter-professional collaboration with the ultimate goal of improving population health.

NURS973001  
**Advanced Physiology and Pathophysiology across the Lifespan**  
Dwyer, Andrew A  
**Fall 2022**  
This course focuses on physiologic and pathophysiologic processes that affect individuals across the lifespan. The emphasis is on central concepts of physiology and pathophysiology, including genetic and epigenetic mechanisms, immunity, inflammation, cell growth regulation, hematopoiesis, and hemostasis. These concepts are then applied in a systematic survey of diseases within body systems. Current research, clinical examples, and application to advanced nursing practice are incorporated throughout the course.

**Credits:** 3

NURS975101
Advanced Qualitative Research Methods
Flanagan, Jane M
Fall 2022
Various qualitative approaches to research typically used in nursing and health science will be examined. Topics will include research paradigms, postpositivism, critical, constructivism, participatory, qualitative rigor, ethics, problem identification, research purpose and specific aims, literature review, sampling strategy and techniques, sample, multiple data collection techniques, data management, multiple strategies for data analysis, differentiating data vs. findings, constructing findings that are congruent with the research aims and specific qualitative approaches, and conclusion-drawing. The course will provide students with experience in conducting data analysis from several qualitative approaches, as well as presentation and critique of in-class and homework data analysis activities.

NURS980601
Philosophical Inquiry for Knowledge Development in Nursing
Flanagan, Jane M
Fall 2022
Movements in the history and philosophy of science are reviewed for appreciating nursing's epistemological development. Contemporary understandings of philosophy and philosophy of science and their influences on knowledge development and nursing are examined. A focus is on understanding the relationship of the epistemological foundations of nursing to those of the health and social sciences. The course aims to develop scholars who can critically evaluate scientific initiatives and their relevance for nursing practice and emerging societal needs. Emphasis is on integrating knowledge of movements in philosophy of science and nursing epistemology with themes developed in Strategies for Knowledge Development in Nursing.

NURS980701
Strategies for Knowledge Development in Nursing
Lyons, Karen S
Fall 2022
In conjunction with Philosophical Inquiry for Knowledge Development in Nursing, this course provides an in-depth exploration of theory and knowledge development for nursing purposes and interdisciplinary collaborations. Students will gain an understanding of the various ways by which important disciplinary questions arise, are formulated, and pursued. Select theoretical frameworks and concepts are critiqued for their clarity, logic and utility for disciplinary knowledge development. A particular focus is placed on application to the student's area of interest and in formulating salient, researchable questions.

Research Design and Methods I

Wood, Lisa J

Fall 2022

This course provides an overview of scientific approaches relevant to nursing and health care research. Current epistemological and qualitative, quantitative and mixed methods approaches are discussed. The application of both classic and emerging quantitative, qualitative, and mixed methods research approaches for answering questions and generating knowledge relevant to the discipline and practice of nursing are explored. Strengths and limitations of research approaches are examined.

**Credits:** 3

Bridge to Primary Care Advanced Practice Nursing
Connolly, Maureen A, RN
Fall 2022
This is the first in a series of clinical reasoning and decision-making courses required for all primary care DNP students. Building on the skills acquired in Advanced Health/Physical Assessment across the Lifespan, the course will focus on communication and clinical decision-making for DNP students. Specific consideration will be given to wellness and health promotion across the lifespan, screening procedures, ordering and interpretation of diagnostic tests, health behavior change interventions, as well as problems frequently encountered in primary care. The combination of didactic, clinical, and simulated learning experiences will prepare the student for subsequent specialty clinical course work and experiences.

NURS981501
Advanced Practice Nursing Role
Conahan, Catherine
Fall 2022
This course prepares students to transition into an advanced practice nursing role. Historical and contemporary influences leading to the development of this professional role are explored, along with anticipated future dimensions. The impact of the advanced practice nurse on patient, family, and population outcomes will be examined. The course incorporates discussions of relationship-based care, role implementation across practice settings, and advanced practice nursing competencies. It also provides a synthesis of legal, regulatory, and scope of practice considerations. The course facilitates a comprehensive understanding of political, economic, social, and professional issues relevant to advanced practice nursing.

Population Health Principles, Program Planning, and Evaluation
LaPierre, Kellie L; Milliken, Aimee
Fall 2022
The course focuses on care at the aggregate level and examines the multiple determinants of health. The principles of population health and population health management will be explored. Health promotion theories will be analyzed and evaluated. Building on these theories and epidemiologic principles, students will assess and identify health care needs at the population level. Students will design theory-driven, evidence-based interventions to improve population outcomes. Program planning and evaluation in partnership with community stakeholders will be emphasized.

NURS981901
Adult-Gerontology Primary Care Advanced Practice Nursing I
Conahan, Catherine; Connolly, Maureen A, RN; Lapierre, Kellie L
Fall 2022
The first of three in the Adult-Gerontology Primary Care Advanced Practice Nursing series, this course focuses on the promotion of optimal physical, mental, and social health of individuals across the adult-gerontology age spectrum through evidence-based, ethical, reflective practice, leadership, and advocacy. Students utilize patient-centered theoretical, evidence-based, cost-effective, high quality, and safe clinical approaches to the health promotion, disease prevention, and common adult and age-related primary care problems. Emphasis is on assessment, diagnosis, and management of common primary care problems. Primary health conditions are addressed within the context of biopsychosocial, developmental, cognitive, socioeconomic, and cultural factors.

Credits: 6
Room and Schedule: Mcguinn Hall 400 Tu 09:00AM-11:50AM
Satisfies Core Requirement: None

NURS982101
Adult-Gerontology Primary Care Advanced Practice Nursing II
LaPierre, Kellie L
Fall 2022
The second of three in the Adult-Gerontology Primary Care Advanced Practice Nursing series, this course focuses on the management of chronic conditions across the adult-gerontology age spectrum. Critical analysis of data, integration of theory, and evidence-based, cost-effective, high quality, and safe approaches to care coordination are emphasized. The broader health care system, interprofessional collaboration, influences of culture, and social determinants of health are considered. The leadership role of the Adult-Gerontology Primary Care Advanced Practice Nurse in identifying and addressing barriers to optimal care is integrated throughout the course.

NURS982501
Family Primary Care Advanced Practice Nursing I
Marshall, Alison O; Underwood, Patricia
Fall 2022
The first of three in the Family Primary Care Advanced Practice Nursing series, this course focuses on health promotion and management of common alterations in individual and family health across the lifespan. Special attention is given to understanding the health effects of disparities associated with gender, race/ethnicity, and socioeconomic status. Emphasis is on utilizing theoretical, evidence-based, cost-effective, high quality, and safe approaches to health promotion for individuals and families across the lifespan. Assessment, diagnosis, and management of common primary care problems are addressed within the context of biopsychosocial, developmental, socioeconomic, and cultural factors. Strategies to promote family health are explored.

NURS982701
Family Primary Care Advanced Practice Nursing II
Marshall, Alison O; Underwood, Patricia
Fall 2022
The second of three in the Family Primary Care Advanced Nursing series, this course focuses on the management of chronic conditions in individuals and families across the lifespan. Critical analysis of data, integration of theory, and evidenced-based, cost-effective, high quality, and safe approaches to care coordination are emphasized. The broader health care system, interprofessional collaboration, and influences of culture and social determinants of health are addressed. The leadership role of the Family Primary Care Advanced Practice Nurse in identifying and addressing barriers to optimal care is integrated throughout the course.

Credits: 6
Room and Schedule: Tu 01:00PM-03:50PM
Satisfies Core Requirement: None
Prerequisites: NURS9730 and NURS9731 and NURS9732 and NURS9814 and NURS9825

NURS983101
Pediatric Primary Care Advanced Practice Nursing I
Haze, Nanci J; St Pierre, Sherri B; White, Laura S
Fall 2022
The first of three in the Pediatric Primary Care Advanced Practice Nursing series, this course focuses on promoting optimal physical, mental, and social health of pediatric populations through evidence-based, ethical, and reflective practice, leadership, and advocacy. Emphasis is placed on utilizing child/family-centered theoretical, evidence-based, cost-effective clinical approaches to the promotion of health, growth and development, and common pediatric primary care problems. Assessment, diagnosis, and management of common pediatric primary health concerns are addressed within the context of biopsychosocial, developmental, cognitive, socioeconomic, and cultural factors.

NURS983401
Developmental-Behavioral and Mental Health in Pediatrics
White, Laura S
Fall 2022
This course features a case-based approach that emphasizes early problem identification, advanced evaluation, intervention, and collaborative care for children through young adults with developmental-behavioral or mental health (DBMH) concerns. A biopsychosocial, developmental, interdisciplinary approach is used as the foundation for explicating family-based psychotherapeutic interventions and indications for referral of patients with complex DBMH concerns. Students will build skills to identify and evaluate a variety of multidisciplinary resources to enhance quality DBHM services and promote optimal socioemotional development and functioning. Sociocultural influences are critically analyzed and considered as a basis for advocacy and policy development.

NURS983601
Advanced Psychopharmacology Throughout the Lifespan
Dillon, Maeghan A
Fall 2022
This course examines the legal, ethical, and therapeutic role of the psychiatric-mental health nurse practitioner (PMHNP) in prescribing psychotropic medications for individuals with psychiatric disorders across the lifespan. The neurobiology, action of medications that affect the central nervous system, and implications for ethno-psychopharmacology will be explored. Standardized tools to evaluate diagnostic criteria and treatment efficacy will be analyzed. Evidence-based practice principles, collaborative practice models, indications for referral, and monitoring to enhance treatment adherence will be integrated throughout the course.

NURS983701
Psychiatric-Mental Health Advanced Practice Nursing Across the Lifespan I
Pounds, Karen G
Fall 2022
The first of three in the Psychiatric-Mental Health Advanced Practice Nursing series, this course focuses on promoting optimal mental health treatment for populations in diverse settings through practice, leadership, and advocacy that is evidence-based, reflective, and ethical. Students examine neurobiological, psychosocial, developmental, and nursing frameworks to conduct mental health evaluations and risk assessments; formulate diagnoses; and implement evidence-based, patient-centered care across the lifespan. Societal influences on mental health, such as race, ethnicity, gender, poverty and violence are explored; and factors related to mental health promotion and treatment are identified.

Individual Psychotherapy for Advanced Practice Nursing
Pounds, Karen G
Fall 2022
This course examines major approaches to individual psychotherapy, including psychodynamic, humanistic, interpersonal, behavioral, cognitive, dialectical behavioral, brief, and multicultural perspectives. Commonalities and differences among the processes and techniques are explored. Selected theorists and their approaches to psychotherapy will be evaluated as examples of major schools of thought concerning the nature of the psychotherapeutic relationship. Applications among diverse individuals and populations across the lifespan are critically examined.

Psychiatric-Mental Health Advanced Practice Nursing Across the Lifespan III
Pounds, Karen G

Fall 2022

The final of three in the Psychiatric-Mental Health (PMH) Advanced Practice Nursing (APN) series, this course focuses on management of high-risk individuals with complex PMH problems. Special attention is given to the sources and impact of complex PMH problems on individuals, families, communities, and populations, including diverse and disadvantaged groups. Theoretical, evidence-based, cost-effective, high quality clinical approaches, including use of information technology, are integrated into the management of complex PMH problems. During a 375-hour, supervised clinical practicum, students prepare for increasingly autonomous practice to assume APN and leadership roles, in consultation with clinical site preceptors and faculty.

Nurse Anesthesia Clinical Practice II
Thomas, Allan C
Fall 2022
This course, the second in a 6-course sequence, provides the nurse anesthesia student with the experience of caring for patients requiring increasingly complex and specialty surgical procedures. The course runs concurrently with NURS9852, Advanced Practice Principles for the Nurse Anesthetist I, such that didactic content presented during that course is applied to patient care through seminar, simulation and clinical practice. Students move from novice level to advanced beginner level as they adapt foundational principles of nurse anesthesia care to unique situations under the guidance of experienced nurse anesthesia preceptors.

NURS986201
Foundations of Nurse Anesthesia Practice
Thomas, Allan C
Fall 2022
This course introduces the student to fundamental knowledge crucial to nurse anesthesia practice. Discussion of patient safety begins in this course, along with legal aspects of nurse anesthesia practice. Key concepts related to patient assessment and fluid management are considered, as are equipment and technology basic to nurse anesthesia practice. Strategies for airway assessment and management and specific anesthesia techniques are reviewed. The importance of provider wellness is emphasized.

Nursing Courses: Spring 2023

NURS121001
Public Health in a Global Society
Camp, Lindsey N; Straif, Kurt H
Spring 2023
This foundation course presents public health as an interdisciplinary science focused on health promotion and disease prevention at the population level. The course provides an overview of the history of public health, global burden of disease, sub-disciplines of public health, maternal/child health, and nutrition, and emphasizes the collaborative nature of the field through examples in research and practice. An inherent principle in public health is advancing social justice and this course, and the public health sequence more broadly, focuses on at-risk populations, reducing health disparities, and improving health equity at the population level.

Room and Schedule: 245 Beacon Street Room 107 TuTh 01:30PM-02:45PM
Satisfies Core Requirement: Social Science
NURS207001
Introduction to Professional Nursing
Cho, Eunji; Delva, Sabianca; Hurley, Dorean L
Spring 2023
This course provides an introduction to professional nursing, exploring nursing's history and the
development of nursing knowledge grounded in theory and evidenced-based practice. The
course places the study of socially just nursing practice within the tradition of liberal arts
education. Engaging in critical self-reflection, students apply new value-based self-awareness to
culturally congruent nursing care. Ethical reasoning processes are applied, utilizing clinical and
population-based case studies. Therapeutic communication with individuals across the lifespan
is introduced. Nursing education, practice, and professional careers as well as the influence of
current health care environmental factors on health and evidenced-based nursing practice are
discussed.

NURS207004
Introduction to Professional Nursing
Hurley, Dorean L
Spring 2023
This course provides an introduction to professional nursing, exploring nursing’s history and the
development of nursing knowledge grounded in theory and evidenced-based practice. The
course places the study of socially just nursing practice within the tradition of liberal arts
education. Engaging in critical self-reflection, students apply new value-based self-awareness to
culturally congruent nursing care. Ethical reasoning processes are applied, utilizing clinical and
population-based case studies. Therapeutic communication with individuals across the lifespan
is introduced. Nursing education, practice, and professional careers as well as the influence of
current health care environmental factors on health and evidenced-based nursing practice are
discussed.

The SCRUBS weekend retreat fulfills the NURS2090 requirement. Attendance at the full retreat is mandatory and an expectation of all sophomore students. Any absences should be discussed as soon as possible with the Teacher of Record (the Associate Dean), who will make decisions regarding activities that will be required to earn credit. This course is required for sophomore undergraduate nursing students and will involve guided review and reflection to reinforce the inherent professional values of altruism, human dignity, integrity, and social justice fundamental to the discipline of nursing. Activities in the weekend long retreat will be guided by the Ignatian formation principles and student's values and beliefs as they relate to professional practice, development as individuals and as members of caregiving teams. The goal is to build a foundation for professional leadership as nursing students become aspiring members of the nursing profession and productive and committed citizens of society at large.

**Clinical Pharmacology**

**Conahan, Catherine; Wood, Lisa J**

**Spring 2023**

This course focuses on the study of clinical pharmacology across the lifespan and scientific principles underlying its use in professional nursing. Major drug classifications and respective prototypes serve as a foundation for lifelong learning and higher-level understanding of pharmacotherapeutics. Using case studies, discussions focus on the importance of collaboration, patient education, and alternative and complementary therapies, while being mindful of patient social factors. Emphasis is placed on delivering high quality and safe patient care related to medication administration.

NURS301601
Comparing Health Care Systems through a Global Lens
Simonelli, Mary C
Spring 2023
Introduction to the concepts of global health and the critical links between public health and social and economic development. Determinants of health and patterns of disease and health outcomes across the globe are critically examined. The course reviews the determinants of health status in terms of biology, demography, epidemiology, culture, sociology, economics, and politics. Key concerns regarding reproductive health, child survival, nutrition, communicable diseases, and chronic diseases are examined. Health care delivery in developed vs. undeveloped regions of the world is emphasized.

Principles of Evidence-Based Nursing
Cahill, Jennifer E; Ross, Richard E, SJ
Spring 2023
This course seeks to develop an applied understanding of evidence-based practice as it relates to the science of nursing. Through exploring components of the research process, an appreciation of the various types of evidence used by nurses and an understanding of the importance of evidenced-based research to improve clinical practice will be fostered. The ethical considerations related to evidence-based practice will be discussed. At the conclusion of the course, students are prepared to be critical consumers of research used in evidence-based practice.

NURS324201
Adult Health Nursing Theory II
Barone, Stacey H
Spring 2023
This course builds on the concepts learned in previous courses including adult health and pharmacology and expands the knowledge base for planning and implementing care of adults with acute health problems and acute exacerbations of chronic health problems. Clinical case studies of acute care emergencies are used to discuss clinical judgment. Emphasis is placed on the selection of evidence-based interventions, evaluation of interventions, and use of evaluative data in refining a plan of care for the adult patient. Discussions focus on the role of the primary nurse in the acute care setting including collaboration, discharge planning, and health teaching.

Childbearing Nursing Theory
Crevecoeur, Thamarah
Spring 2023
The course focuses on concepts associated with the unique responses of families during the childbearing cycle, normal and high risk pregnancies, and normal and abnormal events in women's health. Current multidisciplinary research in women's health with a focus on the childbearing cycle, including genetics and cultural competence, is presented. Evidenced based nursing practice for the childbearing family is discussed. The nursing implications of attending to both the physiologic and the psychosocial needs of the childbearing family are reviewed. Emphasis will be placed on AWHONN and ACOG standards of care.

Clinical Laboratory of Childbearing Theory
Veroneau, Martha E
Spring 2023
Application of childbearing theory to the diagnoses, interventions, and outcomes for the care of families in structured clinical settings. Focus is on prenatal, perinatal, and post-natal activities. Students work collaboratively with the multidisciplinary team in applying evidenced-based practice derived from current multidisciplinary research to the childbearing family. Supervised by nursing faculty, the students are mentored to extend their skills in critical thinking and clinical judgment to meet the physical, psychosocial, cultural, and spiritual needs of their clients and families. Emphasis will be placed on QSEN, AACN Essentials for baccalaureate education, AWHONN and ACOG standards of care.

Psychiatric Mental Health Nursing Theory
Dunne, Julie P
Spring 2023
This course builds upon the standards of practice from APNA-ISPN, AACN, and QSEN to discuss
the legal, ethical, and therapeutic role of the psychiatric mental health nurse in caring for
individuals with psychiatric disorders across the life span. Current interdisciplinary research on
the genetic, neurobiological, and psychosocial theories of depression, psychosis, substance
abuse, bipolar illness, eating, anxiety, personality, and cognitive disorders is analyzed. Evidence-
based nursing practice, including psychopharmacology and psychosocial treatment modalities
such as cognitive-behavioral, interpersonal, group, and milieu therapy is applied from a
multicultural perspective. Nursing interventions for families and communities experiencing
crisis, grief, and trauma are identified.

**Actualizing the Role of Professional Nurse**

Cullinan, Donna L; Simonelli, Mary C; Uveges, Melissa K

**Spring 2023**

Prepares students to transition into the role of the professional nurse. Responsibilities associated with assuming the role of a professional are explored in relation to furthering individual and social good. Contemporary health care policies and economic pressures are examined for their influence on the delivery of quality patient care. Current ethical and legal standards are highlighted and students are encouraged to reflect on how biases and prejudices influence the provision of patient care. Focus is placed on recognizing and addressing injustices in health care access and quality, which is essential to actualizing the role of professional nurse.

**Credits:** 3

**Room and Schedule:** 245 Beacon Street Room 102 M 04:30PM-07:20PM

**Satisfies Core Requirement:** None

**Prerequisites:** NURS2070 and NURS3170

**Directed Independent Study**

Simonelli, Mary C

**Spring 2023**
Students planning to enroll in Directed Independent Study should obtain guidelines from the Office of the Undergraduate Associate Dean. Proposals must be submitted at least three weeks before the end of the semester prior to that in which the study will begin. This course provides an opportunity to engage in learning activities that are of interest beyond the required nursing curriculum. Examples of learning activities are research, clinical practice, and study of a nursing theory.

**Credits:** 3  
**Room and Schedule:** By Arrangement  
**Satisfies Core Requirement:** None  
**Prerequisites:** Senior nursing student with GPA of 3.0 or above in nursing courses.  
**Corequisites:** None  
**Cross-listed with:** None

**An Aging Society: Interdisciplinary Perspectives on Health Care**

Lyons, Karen S; Tabloski, Patricia

Spring 2023
This course provides a conceptual foundation for interdisciplinary health care delivery to older adults and their families. Emphasis is placed on the exploration of significant individual and societal issues in gerontology to guide and expand perspectives of advanced practice nurses and other health professionals in existing and future health systems. These issues are examined at the global and national level. Collaborative inter-professional practice and research are emphasized as a basis for care and services that support meaningful and purposeful life for older adults and families.

Credits: 3  
Room and Schedule: On-line Asynchronous  
Satisfies Core Requirement: None  
Prerequisites: None; Graduate student status OR permission of instructor  
Corequisites: None

NURS752501
Integrative Review of Nursing Research
Vitale, Caitlin M
Spring 2023
The focus of the course is on the use of a systematic and analytic process in the critical analysis and synthesis of empirical nursing research on a topic related to the student's specialty area. Students work independently to develop a publishable integrative review manuscript under guidance of faculty.

Credits: 3  
Room and Schedule: By Arrangement  
Satisfies Core Requirement: None  
Prerequisites: NURS7520 required. May be taken concurrently.  
Corequisites: None

NURS753701
Advanced Practice Psychiatric Nursing Across Life Span II
Petreca, Victor G
Spring 2023
In this second Family PMHNP course, students build on the theoretical frameworks of NURS7437 to continue to examine major DSM-5 diagnoses that occur in childhood, adolescence, and throughout adulthood. Students apply models of individual, family and group psychotherapy from NURS7438 Advanced Practice Theories of Psychotherapy and NURS7538 Advanced Theories of Family and Group Psychotherapies, and pharmacologic approaches from NURS7420 Advanced Pharmacology and NURS7426 Advanced Psychopharmacology. Crisis management, prevention/health promotion, continuous quality improvement, and allocation of services including case management, collaboration, consultation, and referral are analyzed. In the clinical practicum (minimum 250 hours) students synthesize their diagnostic and clinical reasoning abilities and advance their treatment skills as members of the multidisciplinary team.

Credits: 6
Room and Schedule: Campion Hall 204 Tu 09:00AM-11:50AM
Satisfies Core Requirement: None
Prerequisites: NURS7430 and NURS7437 and NURS7438 and NURS7672 and NURS7420

NURS753801
Advanced Theories of Family and Group Psychotherapy
Pounds, Karen G
Spring 2023
This course is designed to explore the major psychotherapeutic approached for families and groups. Emphasis is on the application of theories and models of family and group psychotherapy across the lifespan, among diverse populations, and in traditional and non-traditional settings.

Credits: 3
Room and Schedule: Higgins Hall 280 Tu 01:00PM-03:50PM
NURS759501
Nurse Anesthesia III
Thomas, Allan C
Spring 2023
This course focuses on the delivery of anesthesia care within advanced nursing practice in a broad range of clinical situations for patients with multiple, complex health problems. Through the refinement of assessment and management skills, critical thinking is further developed. With supervision, students assume more overall responsibility for anesthetic management. Through seminar participation students explore the anesthetic management of diverse populations and specialty situations. Likewise, simulation is focused on the management of complex and specialty situations. Concurrent with this semester, students begin a student-directed review of didactic content in advance preparation for the National Certification Exam.

Credits: 5
Room and Schedule: 245 Beacon Street Room 204 M 07:00AM-08:50AM
Satisfies Core Requirement: None
Prerequisites: NURS7592 and NURS7593

**NURS800701**  
**Direct Entry Child Health Nursing Theory**  
**Haze, Nanci J**  
**Spring 2023**  
This course focuses on the nursing care of children with acute and chronic conditions and their families. The primary focus is on child growth and development in relation to wellness and illness. Relevant theories from nursing and other disciplines, research, and evidenced-based guidelines related to the care of children and families are examined. Person/family-centered approaches to promote, restore, and maintain health are emphasized. Biopsychosocial, cultural, legal, and ethical factors influencing the health and care of children and families are explored.

**Credits:** 3  
**Room and Schedule:** Gasson Hall 306 M 09:00AM-11:50AM  
**Satisfies Core Requirement:** None  
**Prerequisites:** None  
**Corequisites:** NURS8010 and NURS8008 and NURS8009

NURS800801
Direct Entry Child Health Nursing Clinical
Haze, Nanci J
Spring 2023
This clinical course focuses on the application of knowledge and implementation of professional nursing practice in caring for children and families. A primary focus is promoting wellness and family-centered care for children with acute illness and chronic conditions. Through interprofessional collaboration, students implement evidence-based practice to provide high quality, safe, cost-sensitive care. Students extend their skills in therapeutic communication, critical thinking, and clinical decision-making to meet the biopsychosocial and cultural needs of children and families from diverse backgrounds. Students demonstrate leadership in providing patient education, advocacy, and transitional care for children and families.

Credits: 2
Room and Schedule: By Arrangement;Thurs 7-3 or 3-11
Satisfies Core Requirement: None
Prerequisites: None

NURS801101
Direct Entry Nursing Synthesis Clinical
McNutt-Clarke, Beth
Spring 2023
This course provides nursing students with an opportunity to synthesize, expand, and refine nursing concepts and clinical reasoning competencies. Through an intensive clinical experience completed in institutional and/or community settings, students focus on the healthcare needs of specific client populations, study in depth the interventions used to restore and/or optimize health, and utilize evidence-based research in practice. Emphasis will be placed on current quality and safety guidelines and standards of care for the specialty area in which the student is practicing.

Credits: 3
Room and Schedule: By Arrangement

NURS871201
Healthcare Quality Management
Reid Ponte, Patricia A
Spring 2023
The course explores applications of quality improvement measures to the healthcare environment. Topics covered include an understanding of high reliability organizations, utilization review, risk management in healthcare, quality management, the use of outcomes research in improving patient care efficacy and safety, and performance management through training. This course is consistent with Lean Six Sigma (Green Belt) competencies and can partly contribute to preparation for the certification exam.

**Credits:** 3

**NURS871401**  
**Nursing Ethics and Professional Responsibility in Advanced Practice**  
**Milliken, Aimee; Ross, Richard E, SJ**  
**Spring 2023**

The course prepares advanced practice nurses for ethics leadership within the broader healthcare arena. Links are made among philosophical/theoretical foundations of nursing, ethical theory, and nursing goals. Skills supportive of the ethical decision making of nurses, peers, and the team are developed with in-class opportunities to practice leading ethics rounds and developing ethics education projects. An emphasis is placed on facilitating the interests of current and future patients and society as a professional obligation. Socially derived injustices and professional responsibility to advocate for just healthcare is highlighted along with strategies to influence institutional and health policy on behalf of individual and social good.

**Credits:** 3

NURS871501
Nursing Leadership in Complex Health Care Settings
Reid Ponte, Patricia A
Spring 2023
This course prepares graduate nursing students to become leaders in health care. Self-reflection, self-assessment, and values clarification provide the groundwork for a nursing leadership self-development plan. Students will explore a broad range of evidence-based approaches, including leadership and organizational theories, to prepare them to lead in today's complex health care environment including practice, organization, system, academic, and policy arenas. Students will explicate the complexities of health care leadership through the examination of topics such as change management, partnership relationships, innovation, accountability models, organizational culture, diversity and inclusion, conflict management, power, creating trust and psychological safety within teams.

NURS871601
Health Care Policy for Nursing Leaders
O'Reilly-Jacob, Monica K
Spring 2023
This course prepares nurse leaders and scholars to influence health care and related policies in support of nursing's goals and social justice. The structure and financing of U.S. health care system and roles of government, insurers, providers, and consumers are examined. The relationships among health policy and the social and economic determinants of health are explored through analysis of key issues in health policy. Students engage in strategies to analyze and inform health policy. The course provides the foundation for leadership in interdisciplinary collaborative endeavors to address, through a nursing perspective, health policy issues at the local and national levels.

**Prerequisites:** Doctoral standing. 2nd year Ph.D. students or permission of instructor. or Permission of Department
NURS971701
Methods of Advanced Scholarly Inquiry
Howard, Elizabeth P
Spring 2023
This is the second of four courses to prepare DNP students to conduct an organization approved, scholarly inquiry project to improve health services and patient outcomes. Students critically evaluate the literature and related information to address a health care problem. Scholarly inquiry approaches are presented to enable students to identify a problem, plan change to improve a process or outcome, or develop innovative solutions related to health care delivery. Upon course completion, there will be a faculty and organization approved DNP project charter, which includes the problem, processes, and expected outcomes.

Credits: 3

Epidemiology
Camp, Lindsey N
Spring 2023
Epidemiology is the study of the distribution and determinants of health-related states or events (including disease), and its methods are used in the control of diseases and other health problems in diverse populations. This course introduces basic principles and methods of epidemiology and biostatistics. Measures of disease frequency, association and causation, the design and analysis of studies, and the potential issues that may arise in these studies are addressed. This course prepares advanced practice nurses to engage in inter-professional collaboration with the ultimate goal of improving population health.

Advanced Physiology and Pathophysiology across the Lifespan
Dwyer, Andrew A
Spring 2023
This course focuses on physiologic and pathophysiologic processes that affect individuals across the lifespan. The emphasis is on central concepts of physiology and pathophysiology, including genetic and epigenetic mechanisms, immunity, inflammation, cell growth regulation, hematopoiesis, and hemostasis. These concepts are then applied in a systematic survey of diseases within body systems. Current research, clinical examples, and application to advanced nursing practice are incorporated throughout the course.

Pharmacotherapeutics in Advanced Practice Nursing
Tabloski, Patricia; Wood, Lisa J
Spring 2023
This course will provide the advanced practice nursing student with the fundamental pharmacologic principles necessary to support pharmacotherapeutic decision making in collaboration with patients across the lifespan. The interrelationship of physical, psychosocial, cultural, pharmacogenomic, economic, ethical, and legal factors will be explored. The student will develop evidence-based, cost effective interventions to promote optimal person-centered drug therapy. Application of these principles to various real world clinical situations and individual responses will be emphasized.

NURS973201
Advanced Health/Physical Assessment across the LifeSpan
Connolly, Maureen A, RN; Gordon, Leah M; Repsha, Christine L
Spring 2023
This course uses a holistic approach and risk appraisal frameworks as a basis for health assessment across the lifespan. Building on knowledge of basic health assessment, the APRN student performs comprehensive health histories and physical and mental health examinations. Students will incorporate subjective and objective data to evaluate healthy individuals and those with acute and/or chronic disease. The course utilizes learning laboratory experiences, high-low fidelity simulation, and standardized patients to facilitate students' learning. Health promotion, health maintenance and harm reduction concepts are emphasized and applied, taking into consideration life circumstances and cultural, ethnic, and developmental variations.

Credits: 3
Room and Schedule: 245 Beacon Street Room 107 M 09:00AM-10:50AM; Lab 1: 11:00 - 12:20pm (CRNA); Lab 2: 12:30-1:50pm; Lab 3: 2:00 - 3:20pm

Research Design and Methods II
Lee, Christopher S
Spring 2023
This course examines specific methods utilized in the conduct of research. Areas of focus include recruitment and retention, sampling, data collection, measurement, instrumentation, fidelity, and data coding, management, and analyses. Methods are discussed in terms of quantitative, qualitative, and mixed methods research approaches. Topics also address components of building a research trajectory including research proposals for institutional approval, grand funding, and the dissemination of research findings.

Milliken, Aimee
Spring 2023
The course focuses on care at the aggregate level and examines the multiple determinants of health. The principles of population health and population health management will be explored. Health promotion theories will be analyzed and evaluated. Building on these theories and epidemiologic principles, students will assess and identify health care needs at the population level. Students will design theory-driven, evidence-based interventions to improve population outcomes. Program planning and evaluation in partnership with community stakeholders will be emphasized.

NURS982101
Adult-Gerontology Primary Care Advanced Practice Nursing II
LaPierre, Kellie L
Spring 2023
The second of three in the Adult-Gerontology Primary Care Advanced Practice Nursing series, this course focuses on the management of chronic conditions across the adult-gerontology age spectrum. Critical analysis of data, integration of theory, and evidence-based, cost-effective, high quality, and safe approaches to care coordination are emphasized. The broader health care system, interprofessional collaboration, influences of culture, and social determinants of health are considered. The leadership role of the Adult-Gerontology Primary Care Advanced Practice Nurse in identifying and addressing barriers to optimal care is integrated throughout the course.

NURS982501
Family Primary Care Advanced Practice Nursing I
Marshall, Alison O; Underwood, Patricia
Spring 2023
The first of three in the Family Primary Care Advanced Practice Nursing series, this course focuses on health promotion and management of common alterations in individual and family health across the lifespan. Special attention is given to understanding the health effects of disparities associated with gender, race/ethnicity, and socioeconomic status. Emphasis is on utilizing theoretical, evidence-based, cost-effective, high quality, and safe approaches to health promotion for individuals and families across the lifespan. Assessment, diagnosis, and management of common primary care problems are addressed within the context of biopsychosocial, developmental, socioeconomic, and cultural factors. Strategies to promote family health are explored.

Pediatric Primary Care Advanced Practice Nursing I

White, Laura S

Spring 2023

The first of three in the Pediatric Primary Care Advanced Practice Nursing series, this course focuses on promoting optimal physical, mental, and social health of pediatric populations through evidence-based, ethical, and reflective practice, leadership, and advocacy. Emphasis is placed on utilizing child/family-centered theoretical, evidence-based, cost-effective clinical approaches to the promotion of health, growth and development, and common pediatric primary care problems. Assessment, diagnosis, and management of common pediatric primary health concerns are addressed within the context of biopsychosocial, developmental, cognitive, socioeconomic, and cultural factors.

Status: Offered
This course builds on previous knowledge of diagnostic reasoning and clinical decision-making as it relates to an advanced understanding of human experiences and the complexities of contemporary pediatric primary care. Through faculty-facilitated simulations, seminars, and clinical cases, emphasis is on the process of clinical decision-making and on scholarly and reflective practice. Theories from nursing and other disciplines, research, and policy are synthesized and integrated into advanced pediatric practice. Principles associated with the delivery of safe and high quality care are critiqued. Ethical, legal, global, and social factors are analyzed in relation to current and developing healthcare policy.

NURS983901
Psychiatric-Mental Health Advanced Practice Nursing Across the Lifespan II
Pounds, Karen G
Spring 2023
The second of three in the Psychiatric-Mental Health (PMH) Advanced Practice Nursing (APN) series, this course prepares students for the PMH APN role. Knowledge of theoretical frameworks from NURS9837 is applied to assessment, diagnosis, and management of PMH problems. Students hone clinical judgment and communication skills to foster effective therapeutic alliances with patients/families, and facilitate interprofessional collaboration, consultation, and referrals. Topics in crisis management, mental illness prevention, mental health promotion, quality improvement, and case management for diverse populations are explored. A 375-hour supervised practicum provides opportunities for students to develop skills to treat people in diverse PMH clinical settings.

**Credits:** 6

NURS984101
Psychiatric-Mental Health Advanced Practice Nursing Across the Lifespan III
Pounds, Karen G
Spring 2023
The final of three in the Psychiatric-Mental Health (PMH) Advanced Practice Nursing (APN) series, this course focuses on management of high-risk individuals with complex PMH problems. Special attention is given to the sources and impact of complex PMH problems on individuals, families, communities, and populations, including diverse and disadvantaged groups. Theoretical, evidence-based, cost-effective, high quality clinical approaches, including use of information technology, are integrated into the management of complex PMH problems. During a 375-hour, supervised clinical practicum, students prepare for increasingly autonomous practice to assume APN and leadership roles, in consultation with clinical site preceptors and faculty.

Nurse Anesthesia Clinical Practice III
Emery, Susan A; Thomas, Allan C; Vitale, Caitlin M
Spring 2023
This course, the third in a 6-course sequence, provides the nurse anesthesia student with experience in caring for patients requiring complex and specialty surgical procedures. Students gain experience with subspecialties and/or special populations. Didactic content presented during NURS XXXX, Advanced Practice Principles for Nurse Anesthesia II, is applied to patient care through seminar, simulation and clinical practice. Students transition from the advanced beginner to the competent nurse anesthetist level depending on patient complexity. Experienced nurse anesthetists and physician anesthesiologists function as mentors.

This course is a study of pharmacotherapy as applied to nurse anesthesia practice. Chemistry and biochemistry form the foundation of the pharmacokinetic, pharmacodynamic, and pharmacogenomic principles discussed. Medications common to nurse anesthesia practice are presented, and individualized drug selection is emphasized. Instructor and student-led simulation experiences provide the opportunity to apply theory to practice involving complex decision-making.

NURS986801
Cardiovascular Physiology and Pathophysiology for Nurse Anesthesia Practice
Emery, Susan A
Spring 2023
This course builds on basic concepts of the anatomy, physiology, and pathophysiology of the cardiovascular system. A detailed examination of the anatomy and physiology of the heart and circulatory system forms the basis for discussion of common and uncommon diseases of the cardiovascular system. Key components of the history and physical exam together with diagnostic testing inform pre-anesthesia assessment. Anesthetic implications for the patient with cardiovascular system co-morbidities form the basis for the development of an individualized plan of anesthesia care, including the need for specific monitoring modalities.

Forensics Courses: Fall 2022

FORS531501
Victimology
Burgess, Ann W
Fall 2022
This course examines the wide range of victimization experiences from the perspective of the victim, their families, and society. Crimes to be studied include robbery, burglary, carjacking, assault and battery, rape, domestic violence, stalking, homicide, arson, child sexual abuse and exploitation, child pornography crimes, federal crimes, identity theft, terrorism, and internet crimes. Emphasis will be given to exploring the etiology of trauma, motivational issues of offending, response patterns to victimization, secondary trauma effects of victimization, and community and media response. Class format will utilize cases from the forensic practice of the lecturers.

FORS531801
Forensic Science I
Burgess, Ann W
Fall 2022
Forensic science concepts and principles play a critical role in analyzing crime scene evidence. This course draws on scientific principles and examines cases where there has been a death, including suicide, accidental, and criminal; and cases where there is a survivor, in which there is a legal and/or ethical component. Specifically, the course applies a case method format to forensic science issues including forensic pathology, clinical forensics, crime victims, computer crime, and equivocal death.

**Forensics Courses: Spring 2023**

**FORS220101**  
**Wounded Warriors in Transition**  
**Burgess, Ann W**  
**Spring 2023**  
Undergraduate Elective only. Over 65,000 U.S. troops have been wounded since 2001. Many have suffered "the hidden injuries" - traumatic brain injuries and post-traumatic stress disorder. The purpose of this course is for students to gain an understanding of military culture, catastrophic injuries, and the journey of Wounded Warriors and their family members. The course examines the history and culture of the Armed Services and the developing knowledge of the rehabilitation of Wounded Warriors.

FORS531701
Forensic Mental Health
Burgess, Ann W
Spring 2023
The course examines the components of human behavior that bring people into a criminal justice setting and analyzes the legal question involved. Content will cover homicide, rape, abduction, cyber crimes, stalking, domestic violence, child abuse, and criminal parenthood from the offender's perspective. Content covered includes forensic and behavioral interviewing, interrogation, role of forensic mental health examiners, case formulation, DSM IV-R diagnosis, criminal investigations and charges, state of mind, duty to warn, memory and recall, malingering, and secondary gain. Forensic cases will form the basis for discussion of each class topic.

Palliative Care Courses: Summer 2022

HLTH770001
Serious Ill, Death, and Dying
Tabloski, Patricia
Summer 2022
This course provides an opportunity for examination of personal, professional, and societal beliefs and perspectives on serious illness, death, and dying across the lifespan. Students become aware of and sensitized to personal assumptions, biases, attitudes and reactions to serious illness, death, and dying. Philosophies, principles, and models of palliative and end-of-life care are discussed. Students develop an appreciation for individual and family coping processes throughout serious illness, death, dying, and bereavement. Students explore communication and bio-psycho-social-spiritual strategies that can be used to partner with individuals and families to maximize quality of life throughout serious illness, death, and dying.

Credits: 3
Room and Schedule: On-line Asynchronous

Palliative Care Courses: Fall 2022

HLTH770201
Responding to Suffering in Serious Illness, Death, and Dying
Tabloski, Patricia
Fall 2022
This course focuses on improving the quality of life and care for individuals and families living with serious illness and at end of life. Emphasis is placed on recognizing and responding to suffering from an interdisciplinary perspective. Barriers and facilitators of effective care during serious illness, death and dying, such as social determinants of health, family dynamics, spiritual and cultural variations, are explored. Evidence-based interventions and strategies to address, manage, and alleviate physical, psychosocial, spiritual, and existential suffering across the lifespan are discussed. Established palliative care standards are utilized to evaluate outcomes within the context of interdisciplinary care.

HLTH800001  
**Examining Diversity in Nursing and Health Care**  
**Abuelezam, Nadia**  
**Fall 2022**  
This course is designed to help students develop foundational insights regarding diversity as an all-inclusive concept with complex intersections. It will focus on the professional nurse as a multifaceted cultural being with a network of identities and group affiliations that serve as both resources and barriers in the development of effective and meaningful patient/family-provider interactions. The primary goals of this course involve identifying sources of difference, deconstructing sociopolitical hierarchies, and recognizing the strengths and challenges inherent in diverse societies. The course will emphasize inclusive leadership strategies for transforming care delivery systems across multiple health care contexts.

**Credits:** 2  
**Room and Schedule:** 245 Beacon Street Room 107 M 04:30PM-06:30PM

**HLTH220601**  
**Principles of Nutrition Across the Life Span**  
**Tucker, Sheila, R.D.**  
**Spring 2023**  
This course focuses on the principles of normal nutrition as they are applied to individuals and populations across the life span. The content emphasizes the role diet plays in the prevention of disease and promotion of health. Therapeutic and medical nutrition applications are discussed relative to the nurse’s role and responsibility in this aspect of patient care. Emphasis is placed on the integration of evidence-informed scientific recommendations into nursing practice.

**Credits:** 3

Counseling, Developmental, and Educational Psychology Courses: Summer 2022

APSY215201

Applied Psychology Practicum: Pathways to Purposeful Work and Life
DiMuzio, Samantha

Summer 2022
Preference will be given to APSY majors who are Juniors and Seniors and have completed at least 12 APSY credit hours prior to the semester of Applied Psychology Practicum (APSY2152) enrollment. Sophomores and students who are minoring in Applied Psychology interested in taking the class may join with permission form the LSOEHD Undergraduate Associate Deans Office, if space is available. Lynch Undergraduate Associate Dean's office approval required
Provides an introduction to the applications of psychological theory within various human and community service contexts. Readings and discussion contribute to critical analyses of how social issues and social problems are situated differently due to gender, race, social class and diversities of language, ability, sexuality, etc. Students volunteer for 8-12 hours per week at a site selected with the assistance of the Field Placement office, meet in a weekly seminar, keep a journal of their field experience, and complete reading and written assignments that integrate theory and practice. Early registration is strongly encouraged to ensure support finding a practicum placement. Students who do not secure a placement by the university add/drop date cannot continue in the course. Students should begin the process of determining a practicum placement by completing the Practicum Placement form HERE (scroll down to the Getting Started section).

Interpersonal Relations
Hailes, Helen
Summer 2022
Provides an opportunity to learn a developmental and systems perspective on the nature of family and interpersonal relations. Examines both the nature of interpersonal relations and some of the conditions in contemporary life that are shaping the quality of these relationships. Gives particular emphasis to understanding the self, family life, emotions, and conflicts in field research. Views the concept of interpersonal relations from historical, multicultural, gender, and developmental perspectives.

**APSY646001**
**Interpretation and Evaluation of Research**
**Shim, Clara D**
**Summer 2022**
This course will improve a students' understanding of the empirical research literature in education and psychology. It concentrates on developing the conceptual foundations of empirical research and the practical analytic skills needed by a competent reader and user of research articles. Topics address purpose statements, hypotheses, sampling techniques, sample sizes and power, instrument development, internal and external validity, and typical quantitative research designs. Exercises emphasize the critical evaluation of published research. Each student will develop a research proposal.

APSY741901
Applied Adolescent Development
Hamilton, Anna N
Summer 2022
This course is designed to provide students with an overview of the theoretical and empirical knowledge base concerning adolescent development. In particular, four broad areas will be considered: (1) psychological, biological, and cognitive transitions; (2) central developmental tasks of adolescence; (3) primary contextual influences; and (4) prevalent types of problematic functioning that emerge during adolescence. The overarching goals of the course are to provide a solid and broad understanding of how and why adolescents develop in the manner they do, and to extend this developmental understanding into research, application, and practice.

**Issues in Counseling Men**  
**Mahalik, James R**  
**Summer 2022**

Examines issues related to counseling men by addressing the influence of socially constructed roles on men, their families, and broader society. Specifically, will examine how men's gender roles impact on their personal development through the life span, and contribute to their health, roles as partners and fathers, and how men approach mental health services. In the final part of the course, issues specific to counseling men from access to services to creating therapeutic environments for men are addressed.

Ethical and Legal Issues in School Counseling
MacEvoy, Julie P
Summer 2022
Guided by the ethical codes of the American School Counselor Association (ASCA) and the American Counseling Association (ACA), a wide range of legal and ethical conflicts that school counselors encounter will be discussed. Specific topics will include school counselors' ethical and legal duties as they pertain to confidentiality, suspected child abuse/neglect, mental health referral and treatment, students at risk to themselves and/or others, students involved in the juvenile justice system, bullying, the rights of LGBTQ students, and special education. Knowledge of multicultural school counseling competencies and ethical issues that are related to social justice will be emphasized.

Counseling, Developmental, and Educational Psychology Courses: Fall 2022

APSY103001
Child Growth and Development
Laski, Elida V
Fall 2022
First part of a two-course sequence (APSY1030 - APSY1031) designed to introduce students to the multiple dimensions of child development, and the place of education in promoting healthy development for all children. This course acquaints students with multiple processes of child development, including physical, social, cognitive, linguistic, and emotional development from birth through adolescence. Both typical and atypical patterns of development will be examined. Students discuss and analyze classic theories, contemporary issues, and key research in child development in view of their application to educational and other applied settings.

First part of a two-course sequence (APSY1030 - APSY1031) designed to introduce students to the multiple dimensions of child development, and the place of education in promoting healthy development for all children. This course acquaints students with multiple processes of child development, including physical, social, cognitive, linguistic, and emotional development from birth through adolescence. Both typical and atypical patterns of development will be examined. Students discuss and analyze classic theories, contemporary issues, and key research in child development in view of their application to educational and other applied settings.

Family, School, and Society
Lewin-Bizan, Selva
Fall 2022
Second part of a two-course sequence (APSY1030-APSY1031) that introduces students to the multiple dimensions of child development, and the place of education in promoting healthy development for all children. This course considers the social and cultural contexts that shape developmental and educational processes. Focuses on understanding the nature of contemporary social problems including racism, sexism, ethnic prejudice, poverty, and violence, as they affect children, families, and schooling. Emphasizes special role of education in linking community resources for an integrated approach to serving children and families.

APSY203201
Cognition and Learning
Clark, Shelby E
Fall 2022
This course will introduce students to what the fields of cognitive, developmental, and educational psychology have to say about how humans learn. This includes comparing and contrasting major theoretical approaches to the study of learning, examining the basic cognitive processes involved in learning (e.g., attention, memory, inhibitory control, problem-solving), and considering how social and biological factors affect these processes. The knowledge gained in this course can be used to maximize individual growth and achievement across a variety of real-life contexts. For instance, it can inform the design of classroom instructional practices, professional training seminars, parenting interventions, community programs, and health initiatives.

APSY215201
Applied Psychology Practicum: Pathways to Purposeful Work and Life
Hwang, Dabin
Fall 2022
Preference will be given to APSY majors who are Juniors and Seniors and have completed at least 12 APSY credit hours prior to the semester of Applied Psychology Practicum (APSY2152) enrollment. Sophomores and students who are minoring in Applied Psychology interested in taking the class may join with permission form the LSOEHD Undergraduate Associate Deans Office, if space is available. Lynch Undergraduate Associate Dean's office approval required. Provides an introduction to the applications of psychological theory within various human and community service contexts. Readings and discussion contribute to critical analyses of how social issues and social problems are situated differently due to gender, race, social class and diversities of language, ability, sexuality, etc. Students volunteer for 8-12 hours per week at a site selected with the assistance of the Field Placement office, meet in a weekly seminar, keep a journal of their field experience, and complete reading and written assignments that integrate theory and practice. Early registration is strongly encouraged to ensure support finding a practicum placement. Students who do not secure a placement by the university add/drop date cannot continue in the course. Students should begin the process of determining a practicum placement by completing the Practicum Placement form HERE (scroll down to the Getting Started section).

**Research Methods for Applied Psychology**

Szendey, Olivia R

**Fall 2022**
The course prepares professionals in the fields of human development, psychology, and education to understand and design research studies related to applied topics. Students are introduced to fundamental principles of research methodology and learn about different types of research, including quantitative, qualitative, and mixed-method studies. The emphasis is on developing skills that will enable students to comprehend common research procedures, critically evaluate existing research, develop studies to address specific research questions, and communicate the findings clearly and accurately.

APSY224101
Mental Illness: Social and Clinical Perspectives
MacEvoy, Julie P
Fall 2022
Provides overview of theoretical models and phenomenology currently defining the field of abnormal psychology, focusing particularly on socio-cultural contributions to conceptualizations of mental illness and distress. First half of course reviews and critiques current constructions of the nature of mental illness, as well as classification, assessment, and treatment of mental illness. Second half highlights specific forms of mental illness, with attention to the causes and subjective experience of psychopathology.

Replacing APSY6348 Culture, Community, and Change Restricted to APSY majors or minors. This course engages the topic of social oppression and transformation from social and psychological perspectives. Using research, scholarship, and creative work from psychology, education, sociology, history, and popular culture, students will explore institutional, ideological, interpersonal, and individual aspects of oppression across four social locations--social class, gender, race, and sexual orientation. For each location, students will start with their own stories of privilege and oppression; move to an empathic engagement with the stories of others; broaden to understand the way that structural dynamics shape those stories; and finally, dive into specific social issues, including family poverty, violence against women, mass incarceration, and LGBTQ homelessness. Throughout the course, students will have the opportunity to study and reflect on change and transformation, including ways in which to incorporate learning from this course into personal and professional lives.

APSY323301  
**Motivation, Emotion, and Self-Regulated Learning**  
Miele, David B  
**Fall 2022**
Self-regulated learning is a process that involves setting learning and academic goals, monitoring your progress toward these goals, and making adjustments when you realize that you are not on track to be successful. The course will primarily focus on the ways that motivation and emotion contribute to this process. For example, students will examine the motivations that lead individuals to adopt particular achievement goals (e.g., the goal of getting a good grade), the ways in which these goals impact learners behaviors, and the impact of these behaviors on important outcomes (e.g., grades and well-being). Students in the course will also examine different types of emotions (e.g., curiosity, boredom, frustration, etc.) that learners experience when pursuing their academic goals and the ways in which these emotions can support or hinder their achievement of these goals. In addition to examining motivation and emotion as factors shape learners' achievement and self-regulation, the course will explore some of the ways in which motivation and emotion can themselves be regulated. For example, students will learn about the kinds of strategies that individuals use to bolster their motivation when they feel like quitting or to calm themselves down when they are feeling anxious. Although the course will explore some of the ways that motivation, emotion, and self-regulation develop, its main focus will be on how adolescents and young adults pursue their learning goals.

Contemporary Issues in Applied Psychology and Human Development
Goodman, Lisa A
Fall 2022
Trauma and healing through the lens of intimate partner violence. This course explores the topic of intimate partner violence (IPV), including physical, sexual, and psychological abuse, as a core example of interpersonal violence and trauma more broadly. We will draw from psychology, public health, and sociology, as well as narrative accounts and short stories, to illuminate: 1) the subjective experience of IPV and its radiating effects on individual, family, and social life; 2) how intersecting identities and material realities shape the ways different communities experience and respond to it; 3) the interpersonal, social, and structural factors that cause and maintain it; and 4) how our own backgrounds and positionalities shape the way we view IPV and the people who experience and perpetrate it. Building empathy, mutual respect, and community both within and outside the classroom will be central concerns.

**Health Psychology**  
**Lai, Betty S**  
**Fall 2022**

Health psychology is the study of how psychology and health interact and influence: health promotion and health risk behaviors, the treatment individuals receive for medical problems, how people cope with stress and pain, and how people behave when they are ill. This course will review these issues across the life course, with special attention to approaches which influence health promoting behaviors and the treatment of illnesses.

APSY421101
Psychology of Work
Blustein, David L
Fall 2022
Work is one of the central roles in life, encompassing much of our time, energy, and effort. Applied psychology has a deep foundation in the psychology of work, which represents a key context for people to interact socially and economically with their communities. In this course, students will learn how psychology can be used to enhance knowledge of the role of work in career development, organizational life in the private and public sectors, and within broader social and political contexts. Students will also explore the impact of the future of work on individuals and communities, and the ways in which the psychology of work can inform meaning, purpose, and social justice.

**Senior Thesis I**  
**Whitcavitch-Devoy, Julia**  
**Fall 2022**

Registration for this course requires advance approval and the submission of additional paperwork. Students, with the approval of the program coordinator and department chair, may write a thesis during the senior year. In most cases, the thesis involves empirical research, although other scholarly forms may be permitted. Students must meet with a prospective thesis advisor during the junior year to develop a thesis proposal.

Social Issues and Social Policy
Volk, Katherine T
Fall 2022
This seminar provides participants with a foundation of knowledge concerning current social policy issues involving children and families in the U.S., with a particular focus on issues related to poverty and disadvantage. Considers how research, politics, and advocacy play a role in the initiation, implementation, and evaluation of policy, and how social policies impact children and families. Seeks to help students explore scientific evidence and social perceptions, and think critically about central social issues and social policies.

APSY642001
Positive Youth Development
Lerner, Jacqueline V
Fall 2022
Applied Developmental Science (ADS) uses research about human development to inform programs and policies pertinent to topics of social importance. Students will integrate readings about and class discussions of ADS theory and research with information about community-based programs. The focus of this class will be a discussion and analysis of the role of developmental research and, in particular from longitudinal research (for example, the 4-H Study of Positive Youth Development), in framing applications (programs and policies) for promoting positive development among youth. In addition to an overview of the theoretical models that are the bases of the PYD perspective, the course will present the work of researchers who have conducted applied developmental studies of adolescents and their ecological settings in order to advance understanding of how individuals and context are involved across the adolescent years in providing a basis for both healthy and problematic development. Faculty: Jacqueline Lerner

**Interpretation and Evaluation of Research**  
**Reynolds, Katherine A**  
**Fall 2022**  
This course will improve a students' understanding of the empirical research literature in education and psychology. It concentrates on developing the conceptual foundations of empirical research and the practical analytic skills needed by a competent reader and user of research articles. Topics address purpose statements, hypotheses, sampling techniques, sample sizes and power, instrument development, internal and external validity, and typical quantitative research designs. Exercises emphasize the critical evaluation of published research. Each student will develop a research proposal.

**APSY646201**  
**Foundations in Research Methodology**  
**Russell, Michael K**  
**Fall 2022**
This course explores foundational concepts that influence the methodologies and methods employed by social science researchers. Core topics explored include: the Enlightenments influence on scientific inquiry; the influence of empiricism, positivism, and universalism on social science research; objectivity and subjectivity; verification and falsification; quantification and standardization; the construction of mental ability and intelligence. Also explored are: the influences White racial framing has and continues to have on the research questions posed, the methods embraced, interpretations made, and discourse produced by social science researchers; and the role critical theory and anti-colonization have begun to play in reorienting social science research to challenge various forms of oppression, with a specific focus on racialized oppression. Upon completion of the course, participants will be positioned to critically examine quantitative methods and measurement techniques commonly employed for educational research that are introduced in future coursework.

**Evaluation Practice and Methods**  
**Gates, Emily F**  
**Fall 2022**  
This course addresses the theoretical and philosophical foundations of program evaluation, with emphasis on the roles of social and political theory, methodology, epistemology, and philosophy of science in various models of evaluation in education. Each evaluation model will be examined in terms of the purpose, knowledge construction, the role of the evaluator, relationship to objectives, relationship to policy and decision-making, criteria, and design. The course also includes a focus on issues of value-neutrality and value judgment.

APSY741901
Applied Adolescent Development
Seider, Scott C
Fall 2022
This course is designed to provide students with an overview of the theoretical and empirical knowledge base concerning adolescent development. In particular, four broad areas will be considered: (1) psychological, biological, and cognitive transitions; (2) central developmental tasks of adolescence; (3) primary contextual influences; and (4) prevalent types of problematic functioning that emerge during adolescence. The overarching goals of the course are to provide a solid and broad understanding of how and why adolescents develop in the manner they do, and to extend this developmental understanding into research, application, and practice.

APSY744001
Foundations of Counseling I
Trantham, Sidney M
Fall 2022
Summer course is intended for non-counseling majors only. Provides an introduction to counseling principles and techniques with an emphasis on interviewing skills. The areas of communication skills involving the use of role playing, observation, and practice components are emphasized. Training consists of peer role-plays and laboratory experiences with individual and group supervision. Theories of Counseling and Personality I
Mahalik, James R
Fall 2022

First part of a year-long sequence examining personality and counseling theories. To introduce students to major theories of personality in the field of psychology and how theories are applied in constructing counseling and psychotherapy models. Students will focus on humanistic, behavioral, and cognitive personality theories and how they become operationalized in person-centered, behavioral, and cognitive counseling models, respectively. In addition to examining the theoretical foundations, client and counselor dimensions, techniques, and the active ingredients of change for these major models of personality and counseling, students examine how socio-cultural context contributes to client presenting concerns and may be addressed in counseling. Interim Study: Master's and C.A.E.S. Students  
Viveiros, Steven  
Fall 2022  
Master's and C.A.E.S. students who need to take one to two semesters off during the academic year but wish to remain active in the University system must enroll in this course. Students cannot enroll in this course for more than two consecutive semesters during the academic year (e.g., fall and spring). Students who need to be away from their studies for more than two consecutive semesters during the academic year should file for a formal leave of absence.

Credits: 0  
Room and Schedule: By Arrangement  
Satisfies Core Requirement: None
This course reviews the theoretical and empirical literatures pertinent to the study of emotional and social development across the life span. Perspectives derived from the disciplines of biology, psychology, anthropology, sociology, and history are presented. The interrelations between social and affective processes, and their association with familial, societal, cultural, and historical context of development are discussed. Issues derived from social psychology, such as group processes, will also be discussed. Methodological problems present in these literatures and resultant conceptual and empirical challenges involved in developing a life span understanding of social and affective processes are reviewed.

Restricted to Ph.D. students in Counseling Psychology. Others by instructors permission.
Provides an introduction to a variety of assessment tools commonly used to diagnose psychological disorders and inform treatment planning for children, adolescents, and adults. Assessment tools covered in this course include projective and personality tests, intelligence tests, tests of achievement, neuropsychological tests, and symptom checklists. Focus will be upon the theory, administration, scoring, and interpretation of these tools. Critical issues in the use of these measures, including ethical, psychometric, social, and legal concerns will be addressed. Students will complete and present integrated test batteries.

History of Psychology
Goodman, David M
Fall 2022
Ph.D. students only; all others by instructor permission. This course surveys the philosophical roots and the development of psychological thought from the Grecian and medieval periods to the present. Topics include: doctrines of human nature in early Greek philosophy; emergence of science in the post-Renaissance period; contributions of Descartes, Locke, the British empiricists and associationists to mental philosophy; major developments in nineteenth-century physiology; Darwin's evolutionary theory and its implications for psychology; emergence of psychology as an independent discipline; the rise and demise of the major systematic schools in psychology--structuralism, functionalism, Gestalt, behaviorism and psychoanalysis and, an overview of recent theoretical developments and controversies in contemporary psychology.

**Participatory Action Research: Gender, Race, Power**  
**Lykes, M B**  
**Fall 2022**  
This graduate seminar introduces students to theoretical and practical issues in the design and implementation of community- and school-based participatory and action research, including a review of theories and practices that have contributed to community-based knowledge construction and social change policies and processes. Ethnographic, narrative, oral history, and visual methodologies are additional resources for understanding and representing the individual and collective stories co-constructed through the research process. Students participate in a community-based collaborative undoing racism workshop and have opportunities for ongoing collaborative work on a site. We reflect collaboratively and contextually on multiple and complex constructions of "gender," "race," and social class in and through these research processes. OPEN TO ALL Ph.D. STUDENTS. MASTER'S LEVEL STUDENTS REQUIRE PERMISSION OF THE INSTRUCTOR.

**Credits:** 3  
**Room and Schedule:** Campion Hall 16 Tu 01:30PM-04:20PM

APSY891701
Cognitive-Affective Bases of Behavior
Vasilyeva, Marina
Fall 2022
Ph.D. students only. All others must get instructor approval. This course discusses theories of human development and examines empirical research on cognitive and affective processes underlying behavior. In addressing the cognitive bases of behavior, it explores key mental processes (e.g., attention, memory, problem solving) and constructs (e.g., schemas, heuristics) that have been instrumental in understanding everyday functioning. The socio-affective bases of behavior addressed in the course include emotions, temperament, and self-concept. The students in this course explore fundamental theoretical questions, such as the role of biology and environment in development, and consider practical applications of current theoretical and empirical knowledge concerning the bases of human behavior.

Quantitative Research Design in Counseling and Developmental Psychology
Pieterse, Alex
Fall 2022
Doctoral students in Counseling and Developmental Psychology. Others by instructor's permission. This is a year-long course, 1 credit in the fall, 2 credits in the spring. In this year-long seminar, students examine quantitative research designs and application employed in the Counseling and Developmental Psychology literatures, including randomized, nonrandomized, cross-sectional, and longitudinal designs. Students present and critique published research exemplifying specific designs, propose empirical studies that could advance counseling and developmental psychology, and present findings from their own empirical work.

**Seminar in Counseling Theory**  
**Trantham, Sidney M**  
**Fall 2022**

Doctoral students in Counseling Psychology only. Deepens students' understanding of psychological theory, and facilitates a life-long journey of integrating theory with practice. Provides knowledge and understanding of traditional and contemporary theories of psychotherapy, and helps students develop a critical perspective that will enable them to evaluate the usefulness of these theories for their clinical work with clients. Class discussions cast a critical eye on the development of the discipline, including its philosophical and contextual roots, and analyze the values inherent in mainstream psychological practice. Considers strengths and limitations of each school, and uses case examples to gain expertise in applying theory to practice.

Counseling Psychology in Context: Social Action, Consultation, and Collaboration
Goodman, Lisa A
Fall 2022

For doctoral students in Counseling Psychology, and others by permission only. This is a year-long course, 1 credit in the fall, 2 credits in the spring. Accompanying the First Year Experience (FYE) practicum, exposes students to research and practice at the meso- (community, organizations) and macro (government, policy, social norms) levels, in addition to the more traditional micro (individual) level. Students discuss their personal experiences within their FYE placement and read and discuss a series of articles and chapters central to the developing fields of critical psychology, liberation psychology, or counseling with a social justice orientation.

First part of a two-course sequence (APSY1030 - APSY1031) designed to introduce students to the multiple dimensions of child development, and the place of education in promoting healthy development for all children. This course acquaints students with multiple processes of child development, including physical, social, cognitive, linguistic, and emotional development from birth through adolescence. Both typical and atypical patterns of development will be examined. Students discuss and analyze classic theories, contemporary issues, and key research in child development in view of their application to educational and other applied settings.

**APSY203201**  
**Cognition and Learning**  
**Vasilyeva, Marina**  
**Spring 2023**  
This course will introduce students to what the fields of cognitive, developmental, and educational psychology have to say about how humans learn. This includes comparing and contrasting major theoretical approaches to the study of learning, examining the basic cognitive processes involved in learning (e.g., attention, memory, inhibitory control, problem-solving), and considering how social and biological factors affect these processes. The knowledge gained in this course can be used to maximize individual growth and achievement across a variety of real-life contexts. For instance, it can inform the design of classroom instructional practices, professional training seminars, parenting interventions, community programs, and health initiatives.

**Credits:** 3  
**Room and Schedule:** Campion Hall 10 TuTh 10:30AM-11:45AM  
**Satisfies Core Requirement:** None

APSY215201
Applied Psychology Practicum: Pathways to Purposeful Work and Life
Hwang, Dabin
Spring 2023
Preference will be given to APSY majors who are Juniors and Seniors and have completed at least 12 APSY credit hours prior to the semester of Applied Psychology Practicum (APSY2152) enrollment. Sophomores and students who are minoring in Applied Psychology interested in taking the class may join with permission form the LSOEHD Undergraduate Associate Deans Office, if space is available. Lynch Undergraduate Associate Dean's office approval required.

Provides an introduction to the applications of psychological theory within various human and community service contexts. Readings and discussion contribute to critical analyses of how social issues and social problems are situated differently due to gender, race, social class and diversities of language, ability, sexuality, etc. Students volunteer for 8-12 hours per week at a site selected with the assistance of the Field Placement office, meet in a weekly seminar, keep a journal of their field experience, and complete reading and written assignments that integrate theory and practice. Early registration is strongly encouraged to ensure support finding a practicum placement. Students who do not secure a placement by the university add/drop date cannot continue in the course. Students should begin the process of determining a practicum placement by completing the Practicum Placement form HERE (scroll down to the Getting Started section).

**Research Methods for Applied Psychology**

Lewin-Bizan, Selva

Spring 2023
The course prepares professionals in the fields of human development, psychology, and education to understand and design research studies related to applied topics. Students are introduced to fundamental principles of research methodology and learn about different types of research, including quantitative, qualitative, and mixed-method studies. The emphasis is on developing skills that will enable students to comprehend common research procedures, critically evaluate existing research, develop studies to address specific research questions, and communicate the findings clearly and accurately.

Spring 2023
Provides overview of theoretical models and phenomenology currently defining the field of abnormal psychology, focusing particularly on socio-cultural contributions to conceptualizations of mental illness and distress. First half of course reviews and critiques current constructions of the nature of mental illness, as well as classification, assessment, and treatment of mental illness. Second half highlights specific forms of mental illness, with attention to the causes and subjective experience of psychopathology.

APSY224201
Interpersonal Relations
Kim, Oh Myo
Spring 2023
Provides an opportunity to learn a developmental and systems perspective on the nature of family and interpersonal relations. Examines both the nature of interpersonal relations and some of the conditions in contemporary life that are shaping the quality of these relationships. Gives particular emphasis to understanding the self, family life, emotions, and conflicts in field research. Views the concept of interpersonal relations from historical, multicultural, gender, and developmental perspectives.

Replacing APSY6348 Culture, Community, and Change Restricted to APSY majors or minors. This course engages the topic of social oppression and transformation from social and psychological perspectives. Using research, scholarship, and creative work from psychology, education, sociology, history, and popular culture, students will explore institutional, ideological, interpersonal, and individual aspects of oppression across four social locations—social class, gender, race, and sexual orientation. For each location, students will start with their own stories of privilege and oppression; move to an empathic engagement with the stories of others; broaden to understand the way that structural dynamics shape those stories; and finally, dive into specific social issues, including family poverty, violence against women, mass incarceration, and LGBTQ homelessness. Throughout the course, students will have the opportunity to study and reflect on change and transformation, including ways in which to incorporate learning from this course into personal and professional lives.

Faith, religion, and spirituality have become topics of increasing interest for scholars and practitioners in higher education and student personnel development. This semester-long, upper-level, undergraduate course explores the historic, developmental, sociological, and philosophical dimensions of the college student experience at the intersection of faith life, spirituality, and academic culture. This course approaches themes and readings from an ecumenical and interreligious set of perspectives. Students will engage several major texts as well as articles from scholarly journals and narratives from institutional models that attempt to integrate faith life and spirituality into the prevailing academic and student development culture.

Counseling Theories  
Sheppard, Alexandria V  
Spring 2023

The purpose of this course is to learn about the major counseling theories including basic concepts, advantages and limitations, techniques, and the counseling process. There is also a focus on personal exploration aimed at helping students adopt their own personal theory of counseling. Issues of multiculturalism and client diversity will be integrated into all course content.

Psychology of Gender
Mahalik, James R
Spring 2023
This course examines biological, social, and psychological factors that interact in contributing to men's and women's gender roles. Within the social domain, particular attention will be given to how culture affects the social construction of gender, and how factors such as racism and homophobia interact with societally prescribed norms for men and women. The second half of the class will focus on the effects of gender roles on mental and physical health, social problems like aggression, and issues in education, work, and relationships including family life.

APSY331001
Contemporary Issues in Applied Psychology and Human Development
Goodman, Lisa A
Spring 2023
Trauma and healing through the lens of intimate partner violence. This course explores the topic of intimate partner violence (IPV), including physical, sexual, and psychological abuse, as a core example of interpersonal violence and trauma more broadly. We will draw from psychology, public health, and sociology, as well as narrative accounts and short stories, to illuminate: 1) the subjective experience of IPV and its radiating effects on individual, family, and social life; 2) how intersecting identities and material realities shape the ways different communities experience and respond to it; 3) the interpersonal, social, and structural factors that cause and maintain it; and 4) how our own backgrounds and positionalities shape the way we view IPV and the people who experience and perpetrate it. Building empathy, mutual respect, and community both within and outside the classroom will be central concerns.

Work is one of the central roles in life, encompassing much of our time, energy, and effort. Applied psychology has a deep foundation in the psychology of work, which represents a key context for people to interact socially and economically with their communities. In this course, students will learn how psychology can be used to enhance knowledge of the role of work in career development, organizational life in the private and public sectors, and within broader social and political contexts. Students will also explore the impact of the future of work on individuals and communities, and the ways in which the psychology of work can inform meaning, purpose, and social justice.

Prevention and Intervention Strategies for Children, Families, and Communities
Dearing, Eric, PHD
Spring 2023
This course is designed to provide an overview of key issues that arise in the development, implementation, evaluation, and scaling of prevention and intervention programs that intersect with the field of psychology. Key issues include the challenges and opportunities of research-practice partnerships, the critical role of theories of change, diverse perspectives on evidence, and unintended consequences of good intentions. A variety of exemplar prevention and intervention programs are used to illustrate and analyze these key issues using theoretical, conceptual, and empirical works from psychological science.

APSY642101
Translating the Science of Learning into Practice
Laski, Elida V
Spring 2023
The science of learning has a tremendous potential for enhancing educational outcomes and job performance. Yet findings obtained in laboratory settings are not easily replicated, expanded, and integrated into applied settings. This course will consider key issues to consider in translating learning science into practice across diverse contexts. Students will consider examples of how findings from the science of learning have been applied either successfully or unsuccessfully to practice in fields such as education, counseling, design, and business.

Interpretation and Evaluation of Research
Littenberg-Tobias, Joshua S

Spring 2023
This course will improve a students' understanding of the empirical research literature in education and psychology. It concentrates on developing the conceptual foundations of empirical research and the practical analytic skills needed by a competent reader and user of research articles. Topics address purpose statements, hypotheses, sampling techniques, sample sizes and power, instrument development, internal and external validity, and typical quantitative research designs. Exercises emphasize the critical evaluation of published research. Each student will develop a research proposal.

Neurological and Biological Bases of Behavior
DeCandia, Carmela J
Spring 2023
Health professionals work with many clients where biological and neurological factors play a role in influencing or exacerbating psychological problems. This course will touch on a variety of topics in psychology from a biological perspective that will be helpful in clinical practice. Areas to be covered include the basic structure and function of neurons, basic neuroanatomy, cognitive functions, substance abuse, addictions, and psychopharmacology. Discussion of these topics will be approached from a biopsychosocial approach. Students are encouraged to ask questions throughout the lecture to both clarify material and to work toward application of the material to clinical work.

Not open to non-degree students; this policy will be strictly enforced. An intensive introduction to student development, this course focuses on interdisciplinary theories of intellectual and psychosocial change among late adolescent and adult learners in post-secondary education. Research on student outcomes is also covered. Special attention is paid to the implications of ethnicity, age, gender, and other individual differences for the development of students. Course projects include individual and collaborative opportunities to relate theory to professional work with college students.

APSY741901

Applied Adolescent Development

Colgan, Courtney A

Spring 2023

This course is designed to provide students with an overview of the theoretical and empirical knowledge base concerning adolescent development. In particular, four broad areas will be considered: (1) psychological, biological, and cognitive transitions; (2) central developmental tasks of adolescence; (3) primary contextual influences; and (4) prevalent types of problematic functioning that emerge during adolescence. The overarching goals of the course are to provide a solid and broad understanding of how and why adolescents develop in the manner they do, and to extend this developmental understanding into research, application, and practice.

Issues in Counseling Men  
Mahalik, James R  
Spring 2023  
Examines issues related to counseling men by addressing the influence of socially constructed roles on men, their families, and broader society. Specifically, will examine how men's gender roles impact on their personal development through the life span, and contribute to their health, roles as partners and fathers, and how men approach mental health services. In the final part of the course, issues specific to counseling men from access to services to creating therapeutic environments for men are addressed.

Theories of Counseling and Personality II  
Lewis Harris, Treniece  
Spring 2023
Second part of a year-long sequence examining personality and counseling theories. Continues introduction to major theories of personality in the field of psychology and how those theories are applied in constructing counseling and psychotherapy models. Focuses on psychoanalytic personality and counseling models as well as critical theory as manifested in the psychology of gender and counseling models that integrate gender into working with clients. Specifically, for each model, students will examine the theoretical foundations developed in its theory of personality, relevant client and counselor dimensions, counseling techniques, and the active ingredients of change that each model uses in bringing about change.

APSY862001
Child and Family Social Policy
Coley, Rebekah L
Spring 2023
Examines a range of social issues relevant to children and families and the social policies directed at such issues. Discusses policy creation, implementation and evaluation, and considers the roles of advocacy, research and politics. Addresses how current social policies impact children and families and compares U.S. policies to those in other industrialized countries. Likely topics include poverty, economic redistribution, work/family balance, early childhood education, educational reform, and other issues. The seminar aims to help students think critically about the political and empirical issues involved in assessing social issues and developing and evaluating social policies.

APSY867001
Psychometric Theory II
Li, Zhushan
Spring 2023
This course continues the examination and application of the principles of item response theory and educational measurement introduced in previous courses. The first section of the course will address the use of a variety of item response theory models for dichotomous and polytomous items. The second section of the course will focus on application of the principles of item response theory to a variety of practical situations and problems commonly encountered in educational testing. In the final section of the course, overarching theoretical and practical issues are addressed and future directions in item response theory are discussed.

APSY886101
Multilevel Regression Models
O'Dwyer, Laura
Spring 2023
This course introduces students to multilevel regression modeling (aka hierarchical models or mixed effects models) for analyzing data with a nesting or hierarchical structure. We discuss the appropriate uses of multilevel regression modeling, the statistical models that underpin the approach, and how to construct models to address substantive issues. We consider a variety of types of models, including random intercept, and random slope and intercept models; models for longitudinal data; and models for discrete outcomes. We cover various issues related to the design of multilevel studies, model building and the interpretation of the output from HLM and SPSS software programs.

APSY891901
Advanced Topics in Cognition and Learning
Laski, Elida V
Spring 2023
For Ph.D. students in Applied Developmental Psychology, open to ADEP MA students and other doctoral students with instructor’s permission. This course will explore the basic processes underlying human cognition and the role of these processes in acquiring knowledge in key domains. Our main goal is to provide our students with a foundational framework in cognitive psychology that can be applied to better understand human behavior and learning. The first part of the course will focus on perception, attention, memory, categorization, and reasoning. The second part of the course will focus on learning in key domains of cognition, such as mathematics, science, and language.

Quantitative Research Design in Counseling and Developmental Psychology
Pieterse, Alex
Spring 2023
Doctoral students in Counseling and Developmental Psychology. Others by instructor's permission. This is a year-long course, 1 credit in the fall, 2 credits in the spring. In this year-long seminar, students examine quantitative research designs and application employed in the Counseling and Developmental Psychology literatures, including randomized, nonrandomized, cross-sectional, and longitudinal designs. Students present and critique published research exemplifying specific designs, propose empirical studies that could advance counseling and developmental psychology, and present findings from their own empirical work.

APSY984301
Seminar in Career Development
Blustein, David L
Spring 2023
Advanced doctoral-level seminar on career development theory and research and on the psychology of working. First part of course consists of critical review of major approaches to understanding career behavior and development, empirical support for prevailing theoretical constructs, and empirical efforts related to career interventions. Special attention to issues specific to persons of color, women, gays, lesbians, individuals with disabling conditions, working-class adults, and non-college-bound youth. Examines space between work and interpersonal relationships.

**APSY984401**  
**Counseling Psychology in Context: Social Action, Consultation, and Collaboration**  
**Goodman, Lisa A**  
**Spring 2023**  
For doctoral students in Counseling Psychology, and others by permission only. This is a year-long course, 1 credit in the fall, 2 credits in the spring. Accompanying the First Year Experience (FYE) practicum, exposes students to research and practice at the meso- (community, organizations) and macro (government, policy, social norms) levels, in addition to the more traditional micro (individual) level. Students discuss their personal experiences within their FYE placement and read and discuss a series of articles and chapters central to the developing fields of critical psychology, liberation psychology, or counseling with a social justice orientation.

ELHE646001
Interpretation and Evaluation of Research
Shim, Clara D
Summer 2022
This course will improve a students' understanding of the empirical research literature in education and psychology. It concentrates on developing the conceptual foundations of empirical research and the practical analytic skills needed by a competent reader and user of research articles. Topics address purpose statements, hypotheses, sampling techniques, sample sizes and power, instrument development, internal and external validity, and typical quantitative research designs. Exercises emphasize the critical evaluation of published research. Each student will develop a research proposal.

ELHE731401
Crisis Management in Higher Education
DeVeau, Laura
Summer 2022
Effective crisis management goes beyond a manual and a checklist. Leaders who are equipped to handle crisis share certain qualities, specifically communication, strategic management, and collaboration. Without these skills, the crisis can become the focus, rather than the community that is being served. This mini-course will focus on how crisis management can become a tool to strengthen organizations, despite trying times. Interviews with crisis leaders as well as case studies will be used to provide students with contemporary examples. The instructor will provide students with live synchronous classes as well as asynchronous opportunities for learning. An experiential learning activity will provide the final capstone for learners.

Marketing and Branding in Higher Education
Blanco, Gerardo L
Summer 2022
In an environment of global competition, universities have become global brands. At all levels of
the organization, higher education leaders need to demonstrate the ability to communicate the
value of their institutions to different constituents. This course explores university brands from
a global perspective and introduces key concepts related to the marketing functions
within higher education. The course is intended for new, aspiring, and established professionals
in higher education interested in deepening their understanding of marketing, as well as for
communication and marketing professionals interested in entering higher education.

**Design Thinking in Higher Education**

**Pryor, Kim**

**Summer 2022**

A global pandemic. Rising inequity. Declining enrollment. Student debt. The field of higher
education faces many challenges today. Increasingly used across many sectors, design thinking
is a structured group process for creative problem-solving. It uses an iterative, collaborative and
human-centered process to reframe complex problems and identify new possibilities for action.
As the design thinking process shifts focus from how organizations identify, frame and solve
problems to how individuals identify, frame and seek organizational support to solve problems,
how can the field of higher education benefit? This hands-on course helps higher education and
organizational leaders understand the history, foundational concepts and key steps of the
design thinking process; apply design thinking to unique problems of practice and evaluate the
usefulness of design thinking for current and future challenges.

ELHE740301
Counseling Techniques in Higher Education
Walsh-Blair, Lynn Y
Summer 2022
Provides an introduction to theoretically-based counseling skills for professionals in higher education and other education and community settings. The areas of communications skills involving the use of role-playing, observation, and practice components are emphasized. Postsecondary case studies cover a range of counseling issues and are applicable to a wide range of settings involving late adolescents and adults. *Please be aware if you have consulted with the instructor at University Counseling Services. If so, please contact the instructor or ELHE Department Chair to address any concerns about your confidentiality as a UCS client or your ability to register for this course.

ELHE740801  
Summer Institute WES-CIHE  
Blanco, Gerardo L  
Summer 2022
This annual symposium offered by World Education Services (WES) and the Center for International Higher Education (CIHE) aims to address questions around the internationalization of higher education and provide a space to discuss implications for institutions worldwide. Over the past decades, international higher education has grown exponentially. The global knowledge economy, the massive movement of students, scholars, and academic programs around the world, the IT revolution and its impact on international teaching and learning have all contributed to a strong feeling of interconnectedness and global citizenship in the higher education community. In many local communities outside of academia, however, an increasing frustration over the lack of benefits from globalization has emerged. This disconnect has resulted in rising nationalism and xenophobia, as manifested in several referenda and elections in the past few years. What does this mean for our policies and strategies for internationalization? What lessons are to be learned from these developments? What are the ethical challenges for international education in this political climate? BC students are eligible to receive credit for attending the conference. Those wishing to earn credit for participation will be required to attend the entire event and submit a 1500-2000 word paper on a topic discussed at the conference. The paper will be due by the end of June.

ELHE750501
Transforming the Field of Catholic Education
Giunco, Kierstin M
Summer 2022
This course explores the history, purpose, current status, and possible futures of Catholic elementary and secondary schools. Students will become conversant with the body of scholarly literature, theoretical and empirical, that defines the field of Catholic education. Though the primary focus will be on Catholic schools in the United States, the course will explore how we can learn from the experience of other religiously affiliated schools here and abroad, and from the experience of Catholic educators worldwide. Special attention will be devoted to how the Ignatian spirituality and pedagogy can be a resource for educators in Jesuit and non-Jesuit schools.

ELHE770101
Introduction to Educational Leadership and Change
Brunelle, Maryellen
Summer 2022
Brings a foundational focus to the work of educational administration, centering on the core work of teaching and learning and exploring how that central work is supported by the cultural, technical, political, and ethical systems of the school. That work is deepened as administrators support learning as meaning making, as involving a learning and civil community, and as involving the search for excellence. Students are asked to research the realities at their work sites using the concepts and metaphors developed in the course and, through discussion and the utilization of case studies, to propose improvements to those realities.

Credits: 3
Room and Schedule: W 04:00PM-05:00PM

ELHE770401
Ethics and Equity in Education
Choquette, Beth; Redden, Jonathan V
Summer 2022
The course explores how schools are used as a vehicle of the state to de-culturalize various communities of people throughout the country's history. Students will explore how schools can more appropriately promote respect for valuing diversity as a generative source of the country's vitality and its relationship to the global village. The role of educators is not only to act ethically in the many individual situations of their daily professional lives, but more importantly to see that the institutional structures and processes of the school system are themselves reflections of a system of justice and care.

ELHE770501
Education Policy Analysis
Viveiros, Steven
Summer 2022
This course provides a foundation for engaging in analysis of educational policy by developing students' knowledge of and experience with tools, data sources, and frameworks that form the toolkit of policy analysts. The course engages with major theories and concepts that guide public policy analysis and provides opportunity to produce novel policy analysis and critique the framing, clarity, and concreteness of published policy analyses and proposed policy tools and solutions. Students will engage with current discourse and considerations in education policy throughout the course, with a particular focus on analyzing policy for equity. By the conclusion of the course, students will be able to engage in public policy analysis and communicate policy issues and analysis that draws on their professional expertise.

This course introduces students to the theory and practice of leadership for social justice at the school and district level. Definitions, approaches, and controversies in this emerging field will be examined. Readings, films, class discussions, and case studies related to the topics of race, ethnicity, culture, language, gender, social class, religion, sexual orientation, and disability will focus on how these issues affect educators, students and their families in today's K-12 schools. In particular, students will learn about leadership which is culturally and linguistically responsive; strengthens parent-community-school relationships; and formulates diversity policies to promote educational equity for students from diverse groups.

Using Data and Evidence for School Improvement
Cho, Vincent
Summer 2022
This course prepares policy-, district-, and school-level leaders to manage initiatives involving continuous improvement and data-informed inquiry. These activities include: engaging with policy or program evaluations, leading faculty in data-informed cycles of inquiry, and evaluating commonplace data practices for issues of equity and social justice. By the end of this course, students should be able to develop a plan for data-informed improvement in a school or other organization. Access to a school or other organization is encouraged, but not required.

ELHE772601  
Organizational Theory and Learning  
Driscoll, William  
Summer 2022
Rather than focusing on traits of the individual leader, this course focuses on the dimensions of organizations and teams that both facilitate and complicate leadership. Examples include managing conflict, developing a shared vision, and differentiating between technical and adaptive change. Students will apply various organizational theories in order to understand group- and system-level patterns in "how groups get things done" (e.g., structures and resources, symbols and values, power and politics). Ultimately, students leave the course better able to plan and evaluate school improvement through the lenses of organizational theory.

Reflection on Leadership Seminar Information
Brunelle, Maryellen
Summer 2022
The primary purpose of the Reflection on Leadership Seminar is for students to synthesize their learning across their course of studies and prepare to apply this as they continue on their career and vocational journey. The course will be conducted in a seminar format, with students sharing in the leadership of the course discussions and activities. Students will: describe how they have experienced the signature pedagogies across their program of study; provide clear evidence of their level of mastery of the key behaviors for educational leadership; articulate how they envision continuing to grow and innovate as a research-informed practitioner. This course also fulfills the requirements for the Master's Comprehensive exam ELHE8100

PSAP Cohort  
Cho, Vincent  
Summer 2022
The Professional School Administrator Program (PSAP) provides an opportunity for full-time administrators to obtain their superintendent licensure and a Doctor of Education in educational leadership. The program was developed by Boston College more than three decades ago to provide an opportunity for full-time school administrators to pursue doctoral study. The Lynch School of Education at Boston College partners with the Massachusetts Association of School Superintendents (MASS) and Teachers21 to prepare future superintendents and school leaders for public, Catholic, charter, and independent schools. Boston College's Ed.D. program is an active member of the Carnegie Project on the Education Doctorate, a national effort by 55 institutions to reform and strengthen the education doctorate. The program is grounded in the core values of the Lynch School, with coursework focusing on leadership for social justice, school reform, community building, and leadership for learning. Through a cohort model that emphasizes collaborative learning and support, PSAP aims to create a powerful network of district-level leaders throughout the Commonwealth of Massachusetts and beyond

Global Perspectives on Higher Education Economics and Finance

de Gayardon de Fenoyl, Ariane

Summer 2022
This course—which is delivered fully online, but does require some synchronous participation—aims to provide students with an understanding of the complexities of higher education financing, through a comparative and international perspective. The course analyses the rising cost of higher education and how this has led to different financing schemes in different national contexts. Students will learn about the different issues directly from experts and case studies, and get to reflect on their own experience at the national and institutional levels.

Practicum in School Principalship
Libano, Jose A
Summer 2022
A 500-hour, field-based experience designed to enable the student to develop the competencies required to be an effective assistant principal/principal. The practicum is supervised jointly by a University representative and a cooperating practitioner. The student is expected to engage in a variety of experiences defined in the state standards for certification and to provide leadership to a major administrative project. The student will maintain a reflective journal of experiences and develop a portfolio that demonstrates the learning and insights gained during the practicum.

Educational Leadership and Higher Education Courses: Fall 2022

ELHE337501
Ed Leadership/Higher Ed
Lally, Marisa
Fall 2022
This course will be designed to provide undergraduate students with an overview of numerous leadership concepts and theories in order to impart an understanding of how leadership is expressed within organizational contexts, specifically higher educational settings. Furthermore, students will also develop an in-depth understanding of their own personal leadership aptitudes and preferences, providing them with the knowledge and tools to further their leadership abilities as they pursue their careers within specific educational and community settings.

Interpretation and Evaluation of Research  
Reynolds, Katherine A  
Fall 2022  
This course will improve a students' understanding of the empirical research literature in education and psychology. It concentrates on developing the conceptual foundations of empirical research and the practical analytic skills needed by a competent reader and user of research articles. Topics address purpose statements, hypotheses, sampling techniques, sample sizes and power, instrument development, internal and external validity, and typical quantitative research designs. Exercises emphasize the critical evaluation of published research. Each student will develop a research proposal.

Higher Education in American Society  
James, Michael J  
Fall 2022  
An introduction to higher education in America, this course focuses on the complex relationships between colleges and universities, and the political and social systems of society. This analysis includes a historical perspective on the evolution of American higher education, and especially the development of the contemporary university since the beginning of the twentieth century. Attention is also paid to the impact of federal and state governments on higher education; the role of research in the university; issues of accountability, autonomy, and academic freedom; the academic profession, student politics and culture; affirmative action issues; and others.

ELHE740101
Student Affairs Administration
DeVeau, Laura
Fall 2022
Student affairs professionals in post-secondary institutions contribute to student learning and personal development through a variety of programs and services. This course focuses on the design of campus environments that promote student development and contribute to the academic mission of higher education. Special attention will be given to the history, philosophy, and ethical standards of the student affairs profession, and to the relation of theory to contemporary student affairs practice. In addition, the course will examine how changing forces in the demographic, social, legal, and technological environment of higher education affect fundamental issues in professional practice.

ELHE750501
Transforming the Field of Catholic Education
O'Connor, Michael T
Fall 2022
This course explores the history, purpose, current status, and possible futures of Catholic elementary and secondary schools. Students will become conversant with the body of scholarly literature, theoretical and empirical, that defines the field of Catholic education. Though the primary focus will be on Catholic schools in the United States, the course will explore how we can learn from the experience of other religiously affiliated schools here and abroad, and from the experience of Catholic educators worldwide. Special attention will be devoted to how the Ignatian spirituality and pedagogy can be a resource for educators in Jesuit and non-Jesuit schools.

Special Topics: Independent School Leadership
Ridley, Kimberly
Fall 2022
Have you wondered what educational leadership looks like in independent schools? What distinct skills and knowledge do we need to lead in this context? Which stakeholders do we need to consider? What does instructional leadership in this context look like? How do we pursue equity and social justice in an independent school context? Discuss these questions and others in this special topics seminar. Students can expect to learn from guest speakers from other independent schools, readings and case studies focused on independent school leadership, and hands-on assignments. The seminar serves as an elective for the ELP Program that contributes toward either the Social Justice or Ed Policy Certificate.

ELHE770101
Introduction to Educational Leadership and Change
Patterson, Leslie M
Fall 2022
Brings a foundational focus to the work of educational administration, centering on the core work of teaching and learning and exploring how that central work is supported by the cultural, technical, political, and ethical systems of the school. That work is deepened as administrators support learning as meaning making, as involving a learning and civil community, and as involving the search for excellence. Students are asked to research the realities at their work sites using the concepts and metaphors developed in the course and, through discussion and the utilization of case studies, to propose improvements to those realities.

ELHE770201
Education Policy and Practice
Anderson, Daniel
Fall 2022
This course provides an overview of educational policy as it plays out in local practice. Throughout the course, students will develop an understanding of foundational approaches to policy making, interpretation, and implementation as it plays out in education settings. In addition to providing an overview to the field of educational policy, the course investigates the relationship between policy and practice through attention to: (1) policymaking including policy mechanisms, framing, and policy actors; (2) processes of policy interpretation and implementation; and (3) policy as practice and the role of local leaders in developing policy. Throughout the course, we will examine how context shapes the relationship between policy and practice by focusing on sociocultural, organizational, and political influences. The course integrates critical perspectives as well as foundational concepts in our study of policy, highlighting how systems of oppression and power dynamics influence the policy process. During the course, students will have opportunities to apply theories and concepts to their own contexts, engaging in policy analysis and creation through hands-on assignments. The course approaches educational policy as incorporating both formal and informal policies, positioning practitioners as interpreters and implementers of local, state, and federal policies, as well as simultaneously designing and creating policies themselves.

The course explores how schools are used as a vehicle of the state to de-culturalize various communities of people throughout the country's history. Students will explore how schools can more appropriately promote respect for valuing diversity as a generative source of the country's vitality and its relationship to the global village. The role of educators is not only to act ethically in the many individual situations of their daily professional lives, but more importantly to see that the institutional structures and processes of the school system are themselves reflections of a system of justice and care.

ELHE770501
Education Policy Analysis
Dougherty, Shaun M
Fall 2022
This course provides a foundation for engaging in analysis of educational policy by developing students' knowledge of and experience with tools, data sources, and frameworks that form the toolkit of policy analysts. The course engages with major theories and concepts that guide public policy analysis and provides opportunity to produce novel policy analysis and critique the framing, clarity, and concreteness of published policy analyses and proposed policy tools and solutions. Students will engage with current discourse and considerations in education policy throughout the course, with a particular focus on analyzing policy for equity. By the conclusion of the course, students will be able to engage in public policy analysis and communicate policy issues and analysis that draws on their professional expertise.

ELHE770701
Leadership for Social Justice
Taylor, Kris A
Fall 2022
This course introduces students to the theory and practice of leadership for social justice at the school and district level. Definitions, approaches, and controversies in this emerging field will be examined. Readings, films, class discussions, and case studies related to the topics of race, ethnicity, culture, language, gender, social class, religion, sexual orientation, and disability will focus on how these issues affect educators, students and their families in today's K-12 schools. In particular, students will learn about leadership which is culturally and linguistically responsive; strengthens parent-community-school relationships; and formulates diversity policies to promote educational equity for students from diverse groups.

ELHE770801
Instructional Leadership
McEwen, Lori B
Fall 2022
Instructional Leadership. Introduces students to many of the contested issues in the field of supervision, such as the relationship between supervision and teacher development, teacher empowerment, teacher alienation, learning theories, school effectiveness, school restructuring, curriculum development, and scientific management. Supervision will be viewed also as a moral, community-nested, artistic, motivating, and collaborative activity. Will stress the need for a restructuring of supervision as an institutional process.

Using Data and Evidence for School Improvement
Cho, Vincent
Fall 2022
This course prepares policy-, district-, and school-level leaders to manage initiatives involving continuous improvement and data-informed inquiry. These activities include: engaging with policy or program evaluations, leading faculty in data-informed cycles of inquiry, and evaluating commonplace data practices for issues of equity and social justice. By the end of this course, students should be able to develop a plan for data-informed improvement in a school or other organization. Access to a school or other organization is encouraged, but not required.

**Organizational Theory and Learning**
Geiser, Jill S  
Fall 2022  
Rather than focusing on traits of the individual leader, this course focuses on the dimensions of organizations and teams that both facilitate and complicate leadership. Examples include managing conflict, developing a shared vision, and differentiating between technical and adaptive change. Students will apply various organizational theories in order to understand group- and system-level patterns in "how groups get things done" (e.g., structures and resources, symbols and values, power and politics). Ultimately, students leave the course better able to plan and evaluate school improvement through the lenses of organizational theory.

Reflection on Leadership Seminar Information
Johnson, Lauri D
Fall 2022
The primary purpose of the Reflection on Leadership Seminar is for students to synthesize their learning across their course of studies and prepare to apply this as they continue on their career and vocational journey. The course will be conducted in a seminar format, with students sharing in the leadership of the course discussions and activities. Students will: describe how they have experienced the signature pedagogies across their program of study; provide clear evidence of their level of mastery of the key behaviors for educational leadership; articulate how they envision continuing to grow and innovate as a research-informed practitioner. This course also fulfills the requirements for the Master's Comprehensive exam ELHE8100

The Professional School Administrator Program (PSAP) provides an opportunity for full-time administrators to obtain their superintendent licensure and a Doctor of Education in educational leadership. The program was developed by Boston College more than three decades ago to provide an opportunity for full-time school administrators to pursue doctoral study. The Lynch School of Education at Boston College partners with the Massachusetts Association of School Superintendents (MASS) and Teachers21 to prepare future superintendents and school leaders for public, Catholic, charter, and independent schools. Boston College's Ed.D. program is an active member of the Carnegie Project on the Education Doctorate, a national effort by 55 institutions to reform and strengthen the education doctorate. The program is grounded in the core values of the Lynch School, with coursework focusing on leadership for social justice, school reform, community building, and leadership for learning. Through a cohort model that emphasizes collaborative learning and support, PSAP aims to create a powerful network of district-level leaders throughout the Commonwealth of Massachusetts and beyond.
Global Perspectives on Academic Affairs in Higher Education
Blanco, Gerardo L
Fall 2022
This course provides a comparative analysis of the academic functions of universities. There is a special emphasis on the study of teaching and learning in postsecondary settings, but other equally important aspects of the academic experience will be covered. These include curriculum design, curricular policies, the design and monitoring of student learning outcomes, online delivery, academic advising and student success, academic career pathways, and good practices for faculty development. The course content is covered from a global perspective with special attention to Global South contexts. In addition to providing a comparative view of these issues, critical perspectives that center social justice and inclusion are central to this course, which can be completed fully online or in a hybrid format.

Conducting Research in International Higher Education
Blanco, Gerardo L
Fall 2022
This course supports students in the MA in International Higher Education program with the design and implementation of their final research project. Students completing both theses and applied research projects complete this course, which guides them through the articulation of a rigorous and appropriate study design, the completion of a literature review and the ethical collection of data. Those completing applied projects submit their final reports at the end of the semester; those completing theses will continue with their projects in the Spring Semester, via the completion of ELHE 7807.

Educational Leadership and Higher Education Courses: Spring 2023

ELHE229501
Spirituality, Religion, and College Student Experience
James, Michael J
Spring 2023
Faith, religion, and spirituality have become topics of increasing interest for scholars and practitioners in higher education and student personnel development. This semester-long, upper-level, undergraduate course explores the historic, developmental, sociological, and philosophical dimensions of the college student experience at the intersection of faith life, spirituality, and academic culture. This course approaches themes and readings from an ecumenical and interreligious set of perspectives. Students will engage several major texts as well as articles from scholarly journals and narratives from institutional models that attempt to integrate faith life and spirituality into the prevailing academic and student development culture.

Ed Leadership/Higher Ed
Lally, Marisa
Spring 2023
This course will be designed to provide undergraduate students with an overview of numerous leadership concepts and theories in order to impart an understanding of how leadership is expressed within organizational contexts, specifically higher educational settings. Furthermore, students will also develop an in-depth understanding of their own personal leadership aptitudes and preferences, providing them with the knowledge and tools to further their leadership abilities as they pursue their careers within specific educational and community settings.

ELHE646001  
Interpretation and Evaluation of Research  
Littenberg-Tobias, Joshua S  
Spring 2023  
This course will improve a students' understanding of the empirical research literature in education and psychology. It concentrates on developing the conceptual foundations of empirical research and the practical analytic skills needed by a competent reader and user of research articles. Topics address purpose statements, hypotheses, sampling techniques, sample sizes and power, instrument development, internal and external validity, and typical quantitative research designs. Exercises emphasize the critical evaluation of published research. Each student will develop a research proposal.

A Boston College report states that approximately 60% of Catholics under the age of 18 are Hispanic. This statistic challenges educators to question, how are our Catholic schools responding to demographic changes and the challenge of educating the next generation of American Catholics? Embracing Ignatian pedagogical designs this course aims to provide Catholic school teachers and leaders an opportunity to encounter immigrant children and families through an immersive educational experience. Participants will come together for prayer, reflection, lectures and discussion prior to and following an immersive experience with the Columban Mission Center (February 17-21, 2019) on the U.S.-Mexico border in El Paso, Texas and Juárez, Mexico. Participants will gather two times prior to the border experience and three times afterward, with final gathering being a symposium on Immigration and the response of Catholic educators. This symposium, which will be the culminating authentic assessment for the course, will be hosted and facilitated by participants for Catholic school educators interested in engaging in further dialogue on this topic. The Roche Center for Catholic Education at Boston College will sponsor the one credit course, including the immersion experience, for students enrolled in the program. The course will be capped at 16 students. For more information please email Dr. Melodie Wyttenbach at wyttenba@bc.edu

ELHE730301
Financial Management in Higher Education
Zona, John J
Spring 2023
This course gives students a unique perspective into the crucial financial aspects of managing large higher educational institutions. The course is appropriate for those students considering higher education careers, consulting related to higher education, or those who want to understand how higher education institutions and their strategies integrate topics associated with financial asset management. In this course, you will be exposed to a range of topics including risk/reward trade-off related to decision making in higher education as applied to endowment and other investments, capital project planning/financing, long-range institutional planning, resource allocation, and balance sheet management.

**College Student Experience: Access, Choice, and Persistence**  
**Dalton, Kathryn A**  
**Spring 2023**  
This course explores the ways in which the higher education community has addressed three basic questions: Who goes to college? What sorts of experiences do students have in college? And, as a consequence of their experiences, who do they become by graduation? The course will familiarize students with the nature and characteristics of the college student population in American higher education, the variety of research methods used to study college students, and some of the many effects and outcomes of college student experiences.

College Student Development
DeVeau, Laura
Spring 2023
Not open to non-degree students; this policy will be strictly enforced. An intensive introduction to student development, this course focuses on interdisciplinary theories of intellectual and psychosocial change among late adolescent and adult learners in post-secondary education. Research on student outcomes is also covered. Special attention is paid to the implications of ethnicity, age, gender, and other individual differences for the development of students. Course projects include individual and collaborative opportunities to relate theory to professional work with college students.

Catholic Higher Education
James, Michael J
Spring 2023
This course offers an historical and philosophical overview of Catholic higher education, a survey of current scholarship and related Church documents, and an examination of the role of Catholic higher education--particularly in the U.S.--and its relationship with the Church, contemporary academic culture, and the broader society. This course also engages students in an analysis of contemporary issues facing Catholic higher education particularly, faith and reason, the Catholic intellectual tradition, Catholic social thought, governance and leadership models, student development, and institutional mission, identity, and culture.

Internationalization of Higher Education
Blanco, Gerardo L
Spring 2023

Higher education around the world today is increasingly affected by the forces of internationalization. Professionals working in postsecondary education in the United States and elsewhere must have a clear understanding of the range of opportunities and challenges presented by the evolution of this phenomenon. This course has two main objectives. The first is to introduce students to the central issues relevant to the international dimension of higher education in different national contexts. The second objective is to promote students' understanding of the practical implications of internationalization for their own work in higher education administration and/or policy-making contexts.

**Diversity in Higher Education: Race, Class, and Gender**  
**Castro Samayoa, Andres**  
**Spring 2023**  
The purpose of this course is to provide students with the opportunity to examine the theoretical scholarship and empirical research on race, class, and gender in American higher education. The course readings are interdisciplinary in nature and require students to identify research claims and their relationship to higher education practice and policy in the U.S. We explore such issues as admissions and affirmative action policy, sexual harassment, access, and financial aid practices.

ELHE760701
Seminar on Law and Higher Education
Muniz Castro, Raquel
Spring 2023
The Law and Higher Education seminar covers a broad range of pressing contemporary topics impacting institutions of higher education. Topics range from First Amendment concerns on campus, to the business of higher educational institutions (e.g., intellectual property protections and high profile athletic programs), to the impact of government and non-governmental actors on the university, to the future prospects of the American higher education model. The legal, historical, and theoretical underpinnings of each issue are covered, but the focus of the seminar is on the practical decision-making of general counsel, administrators, students, and others who coexist in the university context.

ELHE770101
Introduction to Educational Leadership and Change
Johnson, Lauri D
Spring 2023
Brings a foundational focus to the work of educational administration, centering on the core work of teaching and learning and exploring how that central work is supported by the cultural, technical, political, and ethical systems of the school. That work is deepened as administrators support learning as meaning making, as involving a learning and civil community, and as involving the search for excellence. Students are asked to research the realities at their work sites using the concepts and metaphors developed in the course and, through discussion and the utilization of case studies, to propose improvements to those realities.

ELHE770201
Education Policy and Practice
Hegseth, Whitney M
Spring 2023
This course provides an overview of educational policy as it plays out in local practice. Throughout the course, students will develop an understanding of foundational approaches to policy making, interpretation, and implementation as it plays out in education settings. In addition to providing an overview to the field of educational policy, the course investigates the relationship between policy and practice through attention to: (1) policymaking including policy mechanisms, framing, and policy actors; (2) processes of policy interpretation and implementation; and (3) policy as practice and the role of local leaders in developing policy. Throughout the course, we will examine how context shapes the relationship between policy and practice by focusing on sociocultural, organizational, and political influences. The course integrates critical perspectives as well as foundational concepts in our study of policy, highlighting how systems of oppression and power dynamics influence the policy process. During the course, students will have opportunities to apply theories and concepts to their own contexts, engaging in policy analysis and creation through hands-on assignments. The course approaches educational policy as incorporating both formal and informal policies, positioning practitioners as interpreters and implementers of local, state, and federal policies, as well as simultaneously designing and creating policies themselves.

ELHE770401  
**Ethics and Equity in Education**  
**Choquette, Beth; Redden, Jonathan V**  
**Spring 2023**
The course explores how schools are used as a vehicle of the state to de-culturalize various communities of people throughout the country's history. Students will explore how schools can more appropriately promote respect for valuing diversity as a generative source of the country's vitality and its relationship to the global village. The role of educators is not only to act ethically in the many individual situations of their daily professional lives, but more importantly to see that the institutional structures and processes of the school system are themselves reflections of a system of justice and care.

Education Policy Analysis  
Doss, Christopher J  
Spring 2023  
This course provides a foundation for engaging in analysis of educational policy by developing students' knowledge of and experience with tools, data sources, and frameworks that form the toolkit of policy analysts. The course engages with major theories and concepts that guide public policy analysis and provides opportunity to produce novel policy analysis and critique the framing, clarity, and concreteness of published policy analyses and proposed policy tools and solutions. Students will engage with current discourse and considerations in education policy throughout the course, with a particular focus on analyzing policy for equity. By the conclusion of the course, students will be able to engage in public policy analysis and communicate policy issues and analysis that draws on their professional expertise.

Leadership for Social Justice
Edwards, Earl J
Spring 2023
This course introduces students to the theory and practice of leadership for social justice at the school and district level. Definitions, approaches, and controversies in this emerging field will be examined. Readings, films, class discussions, and case studies related to the topics of race, ethnicity, culture, language, gender, social class, religion, sexual orientation, and disability will focus on how these issues affect educators, students and their families in today's K-12 schools. In particular, students will learn about leadership which is culturally and linguistically responsive; strengthens parent-community-school relationships; and formulates diversity policies to promote educational equity for students from diverse groups.

Organizational Theory and Learning
Geiser, Jill S
Spring 2023
Rather than focusing on traits of the individual leader, this course focuses on the dimensions of organizations and teams that both facilitate and complicate leadership. Examples include managing conflict, developing a shared vision, and differentiating between technical and adaptive change. Students will apply various organizational theories in order to understand group- and system-level patterns in "how groups get things done" (e.g., structures and resources, symbols and values, power and politics). Ultimately, students leave the course better able to plan and evaluate school improvement through the lenses of organizational theory.

ELHE776201
PSAP Cohort
Scanlan, Martin K
Spring 2023
The Professional School Administrator Program (PSAP) provides an opportunity for full-time administrators to obtain their superintendent licensure and a Doctor of Education in educational leadership. The program was developed by Boston College more than three decades ago to provide an opportunity for full-time school administrators to pursue doctoral study. The Lynch School of Education at Boston College partners with the Massachusetts Association of School Superintendents (MASS) and Teachers21 to prepare future superintendents and school leaders for public, Catholic, charter, and independent schools.

Boston College's Ed.D. program is an active member of the Carnegie Project on the Education Doctorate, a national effort by 55 institutions to reform and strengthen the education doctorate. The program is grounded in the core values of the Lynch School, with coursework focusing on leadership for social justice, school reform, community building, and leadership for learning. Through a cohort model that emphasizes collaborative learning and support, PSAP aims to create a powerful network of district-level leaders throughout the Commonwealth of Massachusetts and beyond.

**Global Perspectives on Higher Education Leadership and Management**  
Hazelkorn, Ellen S  
**Spring 2023**  
This course—which is delivered fully online, but does require some synchronous participation—aims to provide students with an understanding of the multi-dimensional nature of contemporary higher education leadership and management, and to examine these issues from a comparative and international perspective. Strong emphasis is placed on the global context and appreciating how different national contexts and issues impact and affect higher education. Students learn about different issues and experiences directly from leaders, practitioners, and case studies, and are encouraged to draw upon their own experiences—as university administrators, policy makers, faculty or researchers—at the country and institutional level.

ELHE882101
Research Design II
Lowenhaupt, Rebecca J; Miller, Andrew F
Spring 2023
This course is for PSAP students only. In this course, students will learn about the design of research studies. Building on an introduction to methods presented in Research I, this course will walk students through the proposal writing process. Students will learn about a range of research designs, the ethics of human subjects research, and the initial stages of data collection. In addition to drafting their dissertation proposal during the course of the semester, students will learn about the IRB process, negotiating entry to a research site, and approaches to data collection. They will continue to develop skills in multiple methods, including quantitative, qualitative, and mixed-methods designs.

Credits: 3
Room and Schedule: 1/20-21, 2/10-11, 3/3-4, 3/24-25, 4/28-29; 245 Beacon Street Room 204 FSa 08:00AM-04:00PM

ERAL400001
Restorative Justice and Prison Reform in Global Contexts
Hoyle, Whitney; Mappes, Joyce R; Snyder, Joshua R
Summer 2022
First Year Experience, Reflection, and Action is a seminar designed to help first year students negotiate the rigors and dilemmas of college life and become more critical citizens. Readings, discussions, and panel presentations will address moral-cognitive decision-making, vocational discernment in the context of Ignatian Pedagogy, local, state, and national trends in Applied Psychology and Human Development and Teacher Education and expose students to LSOE and university faculty and student research. Participants will read and critique current research about college student issues and learn to self-reflect critically in order to make more informed choices and decisions.

ERAL410101
Cybersecurity: Innovation, Technology, and Formative Development
Whitcavitch-Devoy, Julia
Summer 2022
This course presents key formative development frameworks and examines their application to current innovations and technologies. Cyberstrategic impacts upon individuals, educational and community settings, future of work, and across key industries are considered. Students use examples and case material from health and biotechnology, environmental and energy, information sciences and social media, and human-centric applied psychology approaches to better understand and gain experience applying models; engaging a constellation of varied stakeholders; fostering a culture of continuous formation and discernment within and across incorporeal cyberspaces; overseeing and facilitating best practices and behaviors; and appropriately responding to cyber trends and cyber trajectories.

First Year Experience, Reflection, and Action
Whitcavitch-Devoy, Julia

Fall 2022
First Year Experience, Reflection, and Action (ERA) is a full-year program whereby students develop attention to the needs of others, respect for context, and an appreciation for their own individual gifts and insights. Through key content material, speakers, design-thinking workshops, applied action projects, presentations, small group discussions, and community engagement work, the year-long LSEHD ERA program facilitates students growth across developmental domains. The ERA program connects first-year LSEHD students directly to mentors, including faculty, graduate students, other junior and senior undergraduates, and their undergraduate dean. ERAs model ensures information about opportunities at BC, as well as, externally, fairly reaches all students, while also providing a sound underpinning of student formation, robust academics, and the occasion for explorations of future and possible selves.

Fall 2022
First Year Experience, Reflection, and Action (ERA) is a full-year program whereby students develop attention to the needs of others, respect for context, and an appreciation for their own individual gifts and insights. Through key content material, speakers, design-thinking workshops, applied action projects, presentations, small group discussions, and community engagement work, the year-long LSEHD ERA program facilitates students growth across developmental domains. The ERA program connects first-year LSEHD students directly to mentors, including faculty, graduate students, other junior and senior undergraduates, and their undergraduate dean. ERAs model ensures information about opportunities at BC, as well as, externally, fairly reaches all students, while also providing a sound underpinning of student formation, robust academics, and the occasion for explorations of future and possible selves.

The Educational Conversation
Shirley, Dennis L
Fall 2022
What does it mean to be an educated person? At first, we must defer to the answers of others. Over time, we become curious about our formation. What does all of this schooling add up to? How do all of my influences beyond school fit together? We realize that it is time to take responsibility for our own education, to reflect on what it is admirable to become, to locate resources for self-cultivation, and to integrate them into a life worth living. But this is not solitary work. Together we will consider a range of rich, rival conceptions of what it means to be educated. In this way, you will be invited to join one of the oldest and richest dialogues, the educational conversation.

FORM105101
Reimagining School and Society
Morelli, Gilda A
Fall 2022
Schooling as we understand it dates to the early nineteenth century, born of and contributing to a period of rapid social change marked by the spread of literacy, the rise of the nation state, and the advent of industrialization. Schooling remains one of the most powerful educational tools ever invented, but how well does it equip us to confront the educational task of today? How will education, in and out of school, need to evolve in light of new technologies and media ecologies, global interconnectedness, health crises, mass migrations, surges of xenophobia, entrenched inequality, climate emergency, and the new "post-truth" political condition?

Teaching, Curriculum, and Learning Environments: Global Perspectives
Shirley, Dennis L
Fall 2022
What kinds of education are most needed for a world characterized by spiraling political polarization, increasing economic interdependence, rapid climate change, and a global pandemic like COVID-19? This online course will introduce students to contemporary debates about how educators should teach, what students should learn, and how schools should interact with society. The course is global in scope and will require in-depth study of country cases and failed and successful models of change. International students and U.S. students curious about other countries' approaches to education are strongly encouraged to enroll.

FORM205001
Transformative Teaching and Learning
Seider, Scott C
Fall 2022
What distinguishes transformative education from status quo teaching and learning? What are the practices by which we effect intellectual, personal, and social transformation? This course investigates transformative education at the level of classrooms, schools, and school systems, considering approaches focused on deeper learning (mastery, identity, and creativity), character development (moral, performance, civic, and intellectual), and social transformation (purpose, vocation, and justice).
Cross-cultural Perspectives on Religion and Education

Bolton, Caitlyn

Fall 2022

This course examines the intersection of religious experience and education in and beyond schools. In the US, education and religion are typically seen as separate spheres, divided by a firewall between the public and the private. In many other global cultures, this separation would seem absurd. Religion is experienced not as a private sphere but as an ever-present framework for living. In this course, we will examine the relationship of religion and education across multiple cultural contexts and religious traditions, asking: what kind of knowledge does religious education impart, and what kind of human/society is it meant to produce in the world? We will consider how religion figures in educational projects of nation building and socio-economic development, frames the education of character, or mobilizes action against injustice. Topics include how West African Islamic education prompted resistance against the Atlantic slave trade, the tensions around Hindu education in British colonial schools in India, and the gendered features of Hasidic Jewish schooling in Brooklyn, among others.

FORM405001
The Art of Educational Inquiry
Higgins, Christopher R
Fall 2022
While education and educational research are often seen as separate activities, transformative
education holds that the quest to form ourselves entails asking questions about the nature and
direction of our growth. Inquiry is simultaneously an effort to understand, a social intervention,
and an art of self-fashioning. This seminar invites students into the art of educational inquiry.
Through examination of paradigmatic texts and visits from Lynch faculty members describing
their own work, we consider the affordances of major traditions of educational inquiry. Working
toward a formal proposal for a scholarly investigation, artistic creation, or public action,
students are supported to articulate, deepen, and refine their own driving questions about
educational concepts, relationships, practices, institutions, and aims. (Students who take EDUC
4050 in their junior year may wish to develop the work itself as a senior project.)

Formative Education Courses: Spring 2023

FORM105001
The Educational Conversation
Casalini, Cristiano
Spring 2023
What does it mean to be an educated person? At first, we must defer to the answers of others. Over time, we become curious about our formation. What does all of this schooling add up to? How do all of my influences beyond school fit together? We realize that it is time to take responsibility for our own education, to reflect on what it is admirable to become, to locate resources for self-cultivation, and to integrate them into a life worth living. But this is not solitary work. Together we will consider a range of rich, rival conceptions of what it means to be educated. In this way, you will be invited to join one of the oldest and richest dialogues, the educational conversation.

Credits: 3
Room and Schedule: Gasson Hall 205 TuTh 03:00PM-04:15PM
Satisfies Core Requirement: Philosophy
Prerequisites: None

FORM105101
Reimagining School and Society
Murugaiah, Kirubahari
Spring 2023
Schooling as we understand it dates to the early nineteenth century, born of and contributing to a period of rapid social change marked by the spread of literacy, the rise of the nation state, and the advent of industrialization. Schooling remains one of the most powerful educational tools ever invented, but how well does it equip us to confront the educational task of today? How will education, in and out of school, need to evolve in light of new technologies and media ecologies, global interconnectedness, health crises, mass migrations, surges of xenophobia, entrenched inequality, climate emergency, and the new "post-truth" political condition?

FORM225301
Preparing the Whole Person for Global Citizenship
Bolton, Caitlyn
Spring 2023
What forms of civic education are needed in our politically volatile, globally interdependent world? Can civics expand beyond transmission of information and competencies to become transformation of the whole person? What dispositions are needed in civic life? Can the very idea of citizenship expand beyond the nation state to encompass the possibilities and responsibilities of global citizenship? Drawing on the traditions of civic, intercultural, and peace education and on case studies of holistic, internationally minded education from diverse cultural and geo-political contexts we will explore: the dynamics of identity, attachment, and xenophobia; the concepts of nationalism, patriotism, cosmopolitanism, and cultural imperialism; and questions of environmental and economic justice.

**FORM405001**  
**The Art of Educational Inquiry**  
**DiMuzio, Samantha**  
**Spring 2023**  
While education and educational research are often seen as separate activities, transformative education holds that the quest to form ourselves entails asking questions about the nature and direction of our growth. Inquiry is simultaneously an effort to understand, a social intervention, and an art of self-fashioning. This seminar invites students into the art of educational inquiry. Through examination of paradigmatic texts and visits from Lynch faculty members describing their own work, we consider the affordances of major traditions of educational inquiry. Working toward a formal proposal for a scholarly investigation, artistic creation, or public action, students are supported to articulate, deepen, and refine their own driving questions about educational concepts, relationships, practices, institutions, and aims. (Students who take EDUC 4050 in their junior year may wish to develop the work itself as a senior project.)

FORM615001
Tech Tools for Playful Learning
Bers, Marina
Spring 2023
This course explores the design and use of new technologies for learning and engages students in current debates around educational technologies, computational thinking, coding and robotics. Students will learn how to develop, implement, and evaluate technology-rich curriculum and will design their own computational meaningful projects. They will visit K-2 classrooms to implement technology-rich curricula, will learn how to use video to document their experiences and will become researchers to assess the thinking and learning fostered by the different tools.

FORM725001
Technologies of Literacy: From Gutenberg to Google
Bers, Marina
Spring 2023
This course explores the role of alphabetical and computational literacy in society by exploring both natural languages and artificial ones, such as programming languages, for expressive and communicative purposes. Students will read materials from a variety of disciplines such as linguistics, philosophy of language, critical theories, developmental psychology, literacy education, computational linguistics, cognitive sciences and artificial intelligence and will be exposed to expert guest speakers. Students will work on a final project of their choice to be determined in consultation with the professor.
FORM765001
Educational Change
Shirley, Dennis L
Spring 2023
This course focuses on the study of change theories and approaches, their application in educational reform, and their impact on teaching and learning. Students examine the history of educational change and consider the forces for and against change in schools and other educational organizations. Each student is expected to conduct a research study of an educational change initiative.

FORM886001
Experiential Knowledge and Ethnography as Method
Bolton, Caitlyn
Spring 2023
This course offers an introduction to ethnographic methods, set within a broader consideration of what it means to know and learn from an experience. Drawing on historical and contemporary examples of ethnographic research, we will consider the central questions that have shaped ethnography as a method, including those related to the ethics, positionality, and subjectivity of the ethnographer. We will study tools such as participant observation, interviewing, fieldnotes, and digital ethnography, while practicing these skills in a mini-ethnographic project conducted during the semester. Finally, we will grapple with the challenge of analyzing the often complex and variegated data produced through ethnographic research, learning how to capture our observations and analyses in writing.

LREN711301
Design Studio 3
Kolodner, Janet L; Smith, Brian K
Summer 2022
The Design Studio is the venue for learning how to practice Learning Engineering. Students will learn practices of design thinking and design decision making in the context of an internship, focused on designing learning experiences for a targeted population of learners that foster learning of targeted learning objectives. The Design Studio will be richly-facilitated and orchestrated as a Cognitive Apprenticeship. Students will work with the internship organization individually or in pairs, and also spend time as a Knowledge Building Community sharing what they are designing and the complexities they are facing, providing advice to each other, and reflecting on and articulating what they are learning about designing for learners.

Credits: 2
Room and Schedule: 5/24, 5/26, 5/31, 6/2, 6/7, 6/9, 6/14, 6/16, 6/21, 6/23; Campion Hall 10 TuTh 09:30AM-12:00 Noon

LREN720301
Immersive and Augmented Environments for Learning
Lachapelle, Cathy P
Summer 2022
In this module, students will engage with a variety of immersive and augmented environments for learning, reading relevant papers, exploring exemplary projects, and applying ideas to the functional design, adaptation, personalization, and use of learning technology. The module includes a "Design Concept" assignment, where students work in small teams to apply what they are learning to some learning design. Students will work to curate a "knowledge base" of exemplary projects, including examples both from current practice and from the research literature.

**Credits:** 1

Learning Engineering Courses: Fall 2022

LREN710101
Introduction to Learning Engineering
Kolodner, Janet L
Fall 2022
This course introduces the content and skills needed to thrive as systematic designers of learning experiences, environments, and technologies. It focuses on three themes: (1) how people learn--cognitive processes involved in learning and social, cultural, physical, affective, and other influences on those processes; (2) how to fostering or promote learning--what we know about the help learners need to engage and participate at their best and ultimately to become more knowledgeable and capable; and (3) designing for learners and analyzing those designs--how to apply what you are learning to the design and analysis of learning experiences, environments, and technologies.

What can we learn from games about engaging learners and fostering learning? How can games be developed specifically to promote learning? What kinds of things can be learned from games? What does it take to foster learning from games? Some educational games that have been designed in research labs can inform about the answers to these questions. As well, there are many computer games around that can teach us about sustaining engagement, particularly important for understanding deeply and mastering capabilities. In this module, students will engage with and read about a variety of games for learning and, hopefully, develop imagination about what different kinds of games and ways of interacting with games afford with respect to learning and come to recognize aspects of game design that are relevant to designing learning experiences. Your project will be the conceptual design of a game to achieve a set of learning goals of your choice.

This course will introduce students to what the field of psychology has to say about how humans learn. This includes examining the basic cognitive processes involved in learning, and considering how these processes interact with task demands and organization. The course is organized around key principles about learning and cognition which have emerged from empirical work in the fields of cognitive and developmental psychology. Its focus will be to identify practices that can be used to foster learning in different settings and interactions, including approaches such as spaced practice and group discussions.

Li, Yuhan
Spring 2023
Face-to-face instruction is often considered the gold standard for learning, the most effective and efficient way to gain new knowledge and skills. But various models of distance education exist, including those powered by networked computing. One challenge for online and hybrid learning environments is designing ways that engage learners as well or better than in-person formats. This module will provide an overview of strategies that learning designers and engineers can use to develop effective and engaging online and hybrid learning experiences. Students will be encouraged to actively consider equity and inclusive practices in learning design.

**Credits:** 1  
**Room and Schedule:** Online Synchronous 3/1, 3/15, 3/22, 3/29, 4/5; W 06:00PM-08:30PM

LREN712201  
Reflective Seminar 2  
Kolodner, Janet L  
Spring 2023

This one-credit seminar is designed to help students make sense of and synthesize across the new concepts, skills, and practices they are learning as participants in the M.A. in Learning Engineering Program. Focus will be on knowing targeted learners and the physical, social, and cultural systems they are part of and keeping those criteria and constraints in mind while designing for learning. Students will continue to reflect on their experiences to identify their strengths and what brings them joy, to imagine the special expertise they'd like to develop, and to identify the kinds of responsibilities they'd enjoy taking on in the workplace.

**Credits:** 1  
**Room and Schedule:** McGuinn 011; Th 01:30PM-04:00PM  
**Satisfies Core Requirement:** None  
**Prerequisites:** None  
**Corequisites:** None  
**Cross-listed with:** None
LREN730201
Cognitive Task Analysis
Laski, Elida V
Spring 2023
This course will introduce students to the key conceptual and methodological elements of Cognitive Task Analysis, which can be used to identify the knowledge and skills required for the performance of a complex task. The focus will be on the specification of covert cognitive processes and the integration of those with overt behaviors into a model of task performance. Students will learn knowledge elicitation techniques, such as verbal think aloud protocol, used to uncover the cognitive structures and processes involved in expert performance of a task. Students also will practice generating cognitive models/knowledge representations of tasks relevant to their design area.

Motivation in Educational Contexts
Perez, Shenira A
Spring 2023
In this module, we will explore what it means to be motivated and what it is that we want at a fundamental level (i.e., our basic human needs). We will also learn about important theories of achievement motivation from the fields of educational, developmental, and social psychology, as well as empirical research that supports these theories. The contextual focus of the module will be on what motivates students to learn and what kinds of instructional practices and interventions can be employed in order to foster student motivation and engagement.

**Theory of Change**

Koleros, Andrew

**Spring 2023**

This course provides introductory training in developing, representing, empirically testing, and presenting a theory of change (ToC). Students will be supported in applying this training through several in-class case examples and a class project to craft a ToC for a real-world design project they are working on.

MESA646001
Interpretation and Evaluation of Research
Shim, Clara D
Summer 2022
This course will improve a students' understanding of the empirical research literature in education and psychology. It concentrates on developing the conceptual foundations of empirical research and the practical analytic skills needed by a competent reader and user of research articles. Topics address purpose statements, hypotheses, sampling techniques, sample sizes and power, instrument development, internal and external validity, and typical quantitative research designs. Exercises emphasize the critical evaluation of published research. Each student will develop a research proposal.

Measurement, Evaluation, Statistics, and Assessment Courses: Fall 2022

MESA106001
Classroom Assessment
Vuilleumier, Caroline E
Fall 2022
This course emphasizes that assessment entails more than quizzes, unit tests, and standardized multiple-choice measures of student learning. The course explores how assessment is a key component of all aspects of the instructional process including organizing and creating a classroom culture, planning lessons, delivering instruction, and examining how students have grown as result of instruction. The validity of inferences and decisions made based on assessment information is examined within each phase of instruction. The goal is to show students that assessment is an integral part of teaching that should not be separated from daily classroom practices.

MESA646201
Foundations in Research Methodology
Russell, Michael K
Fall 2022
This course explores foundational concepts that influence the methodologies and methods employed by social science researchers. Core topics explored include: the Enlightenment's influence on scientific inquiry; the influence of empiricism, positivism, and universalism on social science research; objectivity and subjectivity; verification and falsification; quantification and standardization; the construction of mental ability and intelligence. Also explored are: the influences White racial framing has and continues to have on the research questions posed, the methods embraced, interpretations made, and discourse produced by social science researchers; and the role critical theory and anti-colonization have begun to play in reorienting social science research to challenge various forms of oppression, with a specific focus on racialized oppression. Upon completion of the course, participants will be positioned to critically examine quantitative methods and measurement techniques commonly employed for educational research that are introduced in future coursework.

Evaluation Practice and Methods
Gates, Emily F
Fall 2022
This course addresses the theoretical and philosophical foundations of program evaluation, with emphasis on the roles of social and political theory, methodology, epistemology, and philosophy of science in various models of evaluation in education. Each evaluation model will be examined in terms of the purpose, knowledge construction, the role of the evaluator, relationship to objectives, relationship to policy and decision-making, criteria, and design. The course also includes a focus on issues of value-neutrality and value judgment.

Multivariate Statistical Analysis
Li, Zhushan
Fall 2022
This course provides lectures, examples, and lab analyses that address multinomial and ordinal logistic regression models, multiple group discriminant analysis, cluster analysis, multivariate analysis of variance, principal component analysis, factor analysis, and structural equation modeling. We cover various issues related to research design, model building, and the interpretation of the output from SPSS, R, Lisrel, and SAS software programs

MESA866901
Psychometrics I: Classical Test Theory and Rasch Models
Von Davier, Matthias
Fall 2022
Presents a study of theoretical concepts, statistical models, and practical applications in educational and psychological measurement. General topics include the history of measurement, Thurstone and Guttman scales, classical true-score theory, and item response theory. Specific topics include principles of Rasch measurement, parameter estimation procedures, fit statistics, item banking, and computer adaptive testing.

MESA886201
Design of Experiments and Causal Inference
Khanani, Noman
Fall 2022
This course will introduce experimental design as a paradigm for thinking about the conduct of educational research and evaluation. The goals of this course are to introduce students to the design and statistical principles of the experimental approach to educational research with particular emphasis on the correct analysis of data arising from designed experiments. We will discuss a variety of experimental designs, their advantages and disadvantages, estimation of treatment effects, and significance testing. The topics covered will include the underlying logic of experimental and quasi-experimental designs, regression discontinuity and factorial designs as well as cluster randomized and multi-site trials.

MESA886401
Instrument Design and Development
Russell, Michael K
Fall 2022
Data collection instruments are commonly employed by educational and social science researchers to collect information about cognitive, affective, attitudinal and psychological constructs. This course explores principles and techniques applied to develop cognitive tests and survey instruments. Topics covered include: validity and reliability; construct definition and representation; item writing principles; bias, sensitivity, and accessibility; cross-cultural considerations; scaling methods; and techniques for examining item and scale properties. Upon completion of the course, participants will be positioned to develop cognitive test and survey instruments independently for their own research initiatives.

MESA994101
Dissertation Seminar in Educational Research, Measurement, and Evaluation
O'Dwyer, Laura
Fall 2022
1 credit in the fall, 2 credits in the spring This two-semester seminar is designed to assist doctoral candidates in the preparation of a formal doctoral dissertation proposal. All aspects of dissertation development will be discussed (e.g., problem development, human subjects review, final defense). Students will develop and present a series of draft proposals for faculty and student reaction. Depending on the circumstances of the student, an acceptable pre-proposal (Intent) or full dissertation proposal is required for completion of the course.

Measurement, Evaluation, Statistics, and Assessment Courses: Spring 2023

MESA106001
Classroom Assessment
Lyons, Susan C
Spring 2023
This course emphasizes that assessment entails more than quizzes, unit tests, and standardized multiple-choice measures of student learning. The course explores how assessment is a key component of all aspects of the instructional process including organizing and creating a classroom culture, planning lessons, delivering instruction, and examining how students have grown as result of instruction. The validity of inferences and decisions made based on assessment information is examined within each phase of instruction. The goal is to show students that assessment is an integral part of teaching that should not be separated from daily classroom practices.

MESA646001
Interpretation and Evaluation of Research
Littenberg-Tobias, Joshua S
Spring 2023
This course will improve a students' understanding of the empirical research literature in education and psychology. It concentrates on developing the conceptual foundations of empirical research and the practical analytic skills needed by a competent reader and user of research articles. Topics address purpose statements, hypotheses, sampling techniques, sample sizes and power, instrument development, internal and external validity, and typical quantitative research designs. Exercises emphasize the critical evaluation of published research. Each student will develop a research proposal.

Introductory Statistics
Brown, Nathaniel
Spring 2023
This course provides an introduction to quantitative research, descriptive statistics, inferential statistics, and null hypothesis significance testing in the context of z tests for proportions, t tests for means, and simple linear regression. In each area, students learn how to apply statistical procedures, interpret concepts and results, effectively display data and models, and critically evaluate evidence and implications. Software instruction is provided for IBM SPSS Statistics, R, Stata, and G*Power.

MESA746701
Evaluation Theory and Research
Reid, Aileen M
Spring 2023
Evaluation as a professional practice and academic discipline is characterized by variation in perspectives on what evaluation is and how it should be practiced. This course introduces students to evaluation theory, key debates, and research on evaluation in order to develop students as critical, responsible evaluators and evaluation scholars. Evaluation theories are models, approaches, or frameworks that prescribe how and why one should conduct evaluation in a particular way. Debates in the evaluation field center on the following issues: role of evaluation in society, particularly around advancing equity, social justice, and human rights; the relationship between theory and practice; role of stakeholder and public interest values in evaluation and the theory and practice of valuing; what constitutes credible evidence and, particularly evidence of outcomes and impact; influence of politics on evaluation and evaluation on policy-making; what are and should be evaluators? professional competencies and responsibilities; and future of evaluation. Research on evaluation involves conceptual and empirical investigations of theories, methods, and practices in order to better understand and improve evaluation. By the end of the course, students will be familiar with evaluation theories, debates, and research on evaluation and, ideally, strengthen their perspective and sense of responsibility within the evaluation field.

Interim Study: Master's and C.A.E.S. Students
Viveiros, Steven
Spring 2023
Master's and C.A.E.S. students who need to take one to two semesters off during the academic year, but wish to remain active in the University system must enroll in this course. Students cannot enroll in this course for more than two consecutive semesters during the academic year (e.g., fall and spring). Students who need to be away from their studies for more than two consecutive semesters during the academic year should file for a formal leave of absence.

MESA866701
General Linear Models
Li, Zhushan
Spring 2023
Addresses the construction, interpretation, and application of linear statistical models. Specifically, lectures and computer exercises cover ordinary least squares regression models; matrix algebra operations; parameter estimation techniques; missing data options; power transformations; exploratory versus confirmatory model building; linear-model diagnostics, sources of multicollinearity; diagnostic residual analysis techniques; variance partitioning procedures; dummy, effect, and orthogonal coding procedures; moderation and mediation analysis; regularization techniques, and an introduction to structural equation modeling.

Psychometrics II: Item Response Theory
Li, Zhushan
Spring 2023
This course presents an advanced study of theoretical concepts, statistical models, and practical applications in educational and psychological measurement. Topics include item response theory, two-parameter model, three-parameter model, methods for estimating latent trait and item parameters, models for polytomously scored items, differential Item Functioning (DIF), test equating, vertical scaling, computerized adaptive testing, standard setting, and multidimensional item response theory models. The IRT software or tools used in this course include R, IRTPRO, BILOG-MG, PARSCALE, NOHARM, DIF related software, STUIRT, ST., EQUATE, etc.

MESA886101
Multilevel Regression Models
O'Dwyer, Laura
Spring 2023
This course introduces students to multilevel regression modeling (aka hierarchical models or mixed effects models) for analyzing data with a nesting or hierarchical structure. We discuss the appropriate uses of multilevel regression modeling, the statistical models that underpin the approach, and how to construct models to address substantive issues. We consider a variety of types of models, including random intercept, and random slope and intercept models; models for longitudinal data; and models for discrete outcomes. We cover various issues related to the design of multilevel studies, model building and the interpretation of the output from HLM and SPSS software programs.

Gates, Emily F
Dissertation Seminar in Educational Research, Measurement, and Evaluation
O'Dwyer, Laura

Spring 2023
1 credit in the fall, 2 credits in the spring This two-semester seminar is designed to assist doctoral candidates in the preparation of a formal doctoral dissertation proposal. All aspects of dissertation development will be discussed (e.g., problem development, human subjects review, final defense). Students will develop and present a series of draft proposals for faculty and student reaction. Depending on the circumstances of the student, an acceptable pre-proposal (Intent) or full dissertation proposal is required for completion of the course.

EDUC330801
Bilingualism in Schools and Communities
Andrade Gonzalez, Paulette R
Summer 2022
Earning the TELL Certificate requires the successful completion of the courses EDUC3308 and EDUC6346 (for elementary teaching) or 6347 (for secondary teaching). In addition, students must complete a field experience in a classroom that includes bilingual learners and/or English language learners. This course is also part of the Foundations in Education minor and the Immigration, Education, and Humanitarian Studies minor at Lynch. This course prepares students to participate in increasingly multilingual and multicultural environments in order to better serve bilingual students, families, and communities. Building on theory, research, and practice form the field of bilingualism, second language acquisition, and education, students will learn about the process of language and literacy development in children and adolescents who are exposed to more than one language, and the social and cultural contexts in which this development occurs. Through the use of case studies and school profiles, students will deepen their understanding of issues in bilingualism and bilingual education. Students will also have an opportunity to build cultural competence skills by learning about diverse communities in the U.S.

Teaching Bilingual Students
Alvarado, Jasmine N
Summer 2022
Summer course: Section .01 for Elementary Education majors; Section .02 for Secondary Ed majors. Deals with the practical aspects of the instruction of teaching English Language Learners in Sheltered English Immersion, and mainstream classrooms. Reviews and applies literacy and content area instructional approaches. Includes such other topics as history and legislation related to English Language Learners and bilingual education, and the influences of language and culture on students, instruction, curriculum, and assessment. There are two sections of this course: one for elementary and early childhood education majors and one for secondary education majors.

Classroom Management
Cass, Richard J
Summer 2022
ED201 is now EDUC6373. Focuses on observation and description of learning behaviors, with emphasis on examining the relationship of teacher behavior and student motivation. Prepares teachers to analyze behavior in the context of a regular classroom setting that serves moderate special needs students and to select, organize, plan, and promote developmentally appropriate behavior management strategies that support positive learning. Also considers theoretical models of discipline and classroom management strategies, and requires students to propose and develop a rationale for selection of specific techniques for specific classroom behaviors.

Special Topics: Models of Teaching and Learning in Catholic Education
Cownie, Charles T
Summer 2022
This course will examine past, current, and potential future models of Catholic schooling. Special attention will be given to the philosophical and historical foundations of Catholic schooling and how these foundations are lived out in pedagogical and curricular approaches used in contemporary Catholic primary and secondary schools. Additional time will be spent in analyzing how Catholic educational models are evolving to continue to carry out the mission of Catholic education in changing contexts.

Teaching, Curriculum, and Learning Environments: Global Perspectives
Smith, Reid J
Summer 2022
What kinds of education are most needed for a world characterized by spiraling political polarization, increasing economic interdependence, rapid climate change, and a global pandemic like COVID-19? This online course will introduce students to contemporary debates about how educators should teach, what students should learn, and how schools should interact with society. The course is global in scope and will require in-depth study of country cases and failed and successful models of change. International students and U.S. students curious about other countries' approaches to education are strongly encouraged to enroll.

EDUC730201
Models and Theories of Instructional Design
Lee, Jieun
Summer 2022
Now well into the twenty-first century, schools struggle with the challenge of offering a high quality education for all learners regardless of race, family status, national origin, language, or ability. Increasingly, curriculum is accessed digitally and student work is generated and exhibited using technology tools. The once familiar artifacts of classrooms are rapidly giving way to radically new forms of teaching and learning. Within this context of change, this course reviews the evolution of theories of learning and instruction and then critically examines a range of contemporary models and theoretical frameworks. Learning activities in the course will allow participants to develop their own personalized framework for planning and implementing instruction.

**Family and Community Engagement**  
**Steedman, Peter**  
**Summer 2022**  
The purpose of this course is to introduce participants to theories, practices, and empirical research regarding family and community engagement in schools. The focus is on how school leaders--formal and informal--enact organizational models, educational programs, and political strategies that increase authentic relationships with parents and community members. Topics of study will include community schools/full service schools, parent involvement models, involvement of diverse families, grassroots organizing for community development, afterschool and community-based education, and school board-community relations. Direct participation in inquiry into school-community activities conducted on-site in schools and neighborhoods will be requirement of the course.

EDUC730501
Globalization, Mobility, and Education
Agostinelli, Adam V; Gribaudo, Amy M
Summer 2022
This course addresses political economic issues related to migration and education. Drawing on the anthropology of globalization and sociology of immigration, the course reviews major theories of immigrant incorporation and exclusion processes in schools, examines case studies of im/migrants, refugees, and displaced persons and their adaptation processes in countries in the Global North and the Global South, and considers educational practices and policies that develop to address mobility in diverse contexts. The course asks how cultural, social, political, and economic factors influence im/migrant incorporation, and how educators can facilitate im/migrant students' opportunities for learning through changes in policies, pedagogies, and curricula.

EDUC730601
Language Learner in Global Perspective
Yu, Qun
Summer 2022
This course provides an overview of language learning and the situation of second language learners in schools. First, we review processes of language learning and the challenges language learners face when they must simultaneously learn a language and learn subject matter in that language. We do this from a socialcultural perspective, exploring language learning as embedded in sociohistorically situated activities. We develop an account of how learning language is also learning culture. Second, we study how these processes vary across cultural contexts. Because language learning is woven into social and historical contexts, processes of language learning and schooling vary around the world. The course develops several case studies from different areas of the globe in order to illustrate how language learning and schooling can intersect in different ways.

**Global Perspectives on Disabilities and Special Education**

**Dunn, Lori A**

**Summer 2022**

In the modern world there are many differing perspectives about the significance of disabilities. In this course we examine both "medical model" perspectives on the origin and nature of disabilities, as rooted in the scientific method, and post-modern critical perspectives. Cultural influences on how those perspectives are valued will also be considered. Differing approaches to special education practice--both service delivery systems and interventions--will be critically compared to the thought traditions. The ethics and social value of special education will also be considered.

EDUC730801
Designing Learning Environments in a Social and Digital World
Corbitt, Alexander P
Summer 2022
In today's society, what counts as knowledge and expertise has changed considering the global shifts in interconnectivity, social interactions, and technology. Previous models of learning focused on knowledge as a collection of facts within curriculum and learning environments helping individuals obtain those facts. However, today technology can enable all individuals to quickly obtain facts. Instead, expertise requires deep knowledge in which ideas are applied across multiple contexts in particular contexts with people and tools. These shifts in knowledge as well as technological advances have significant implications for how we design curriculum and other learning environments. In this course, we will examine different learning environments as well as various aspects within those environments. For example, we will examine curriculum to evaluate the scaffolds to support student learning, analyze digital learning environments for professional development to support teacher learning and critique video of classroom discourse to examine student interactions and community development. In this course, we will consider the environment both as conceptualized by its designers (the design) and as it is experienced by participants as learning interactions unfold in particular settings (the enactment) to evaluate the effectiveness of those learning environments.

Preparing the Whole Person for Global Citizenship
White, Allison E
Summer 2022
This course is for graduate students and upper-level undergraduates who are interested in the fields of education and psychology. The course will focus on the development of individuals and their role as global citizens. We will explore the whole person development of adolescents and emerging adults in the digital age--one marked by a participatory culture. We explore these questions while foregrounding the different strategies and methodologies of counseling, developmental, and educational psychology.

EDUC742102
Theories of Instruction
Friedman, Audrey A
Summer 2022
This provides an in-depth review of modern instructional models classified into selected families with regard to perception of knowledge, the learner, curriculum, instruction, and evaluation. Each student will be asked to survey models in his/her own field(s) and to select, describe, and defend a personal theory in light of today's educational settings based upon personal experiences, reflection on current research, and contemporary issues central to the education of all learners.

EDUC743801
Educating Learners with Disabilities
Francis, Heather
Summer 2022
This course focuses on the education of students with disabilities and other learners from culturally and linguistically diverse backgrounds. The goal of the course is to promote access to the general curriculum for all students through participation in standards-based reform. Universal Design for Learning (UDL) provides the theoretical framework for this course. Through an examination of historical milestones, landmark legislation, systems for classification, approaches to intervention, and the daily life experiences of diverse learners, students acquire knowledge about diversity and the resources, services, and supports available for creating a more just society through education.

EDUC750501
Transforming the Field of Catholic Education
Giunco, Kierstin M
Summer 2022
This course explores the history, purpose, current status, and possible futures of Catholic elementary and secondary schools. Students will become conversant with the body of scholarly literature, theoretical and empirical, that defines the field of Catholic education. Though the primary focus will be on Catholic schools in the United States, the course will explore how we can learn from the experience of other religiously affiliated schools here and abroad, and from the experience of Catholic educators worldwide. Special attention will be devoted to how the Ignatian spirituality and pedagogy can be a resource for educators in Jesuit and non-Jesuit schools.

EDUC754701
Teaching Narrative Writing to K-8 Students
Brisk, Maria E
Summer 2022
This is a project-based course where groups of participants will collaborate to develop a writing unit in a genre appropriate for their grade level. Using a genre-based pedagogy informed by systemic functional linguistics, participants will learn what and how to teach non-fiction narratives (Personal and procedural recounts, autobiographies, biographies, empathetic autobiographies, and historical recounts) and fictional narratives. Features of the genres demanded in elementary and middle schools will be learned and practiced. The strong emphasis on language development distinguishes this approach from others currently used in schools. The approach to teaching guides teachers in ways of apprenticing students to writing that builds confidence and success.

Foundations of Bilingual Education
Proctor, Charles P; Soto Viquez, Ana Laura
Summer 2022
Students will be able to walk into any school that offers a bilingual program and/or serves bilingual pupils and identify the type of program in place depending on the specifics of different contexts. In service of this goal, students will explore the following characteristics of language education programs in the U.S specifically: history, models (and key attribute of program types), political contexts, and legal foundations. Students will understand dual language models, design, and implementation, specifically: competencies, knowledge, and skills of dual language teachers, features of instruction and assessment, and implementation.

Literacy from Sociocultural Perspective: Core Concepts, Key Ideas
Wargo, Jon M
Summer 2022
Using sociocultural theory and cultural studies as points of departure, this course investigates language (both oral and written), literacy, and power at the intersections of the social, the political, and the cultural. Working from the presupposition that studying culture (as it is made manifest through the functioning of institutions, their agents, and the experiences, knowledges, expressions, and meaning making of communities) is critical for intervening in the reproduction of inequality, we will pay particular attention to the impact power has in reproducing inequity in language and literacy instruction. The course begins with an introduction to the history, development, and basic tenets of sociocultural theory. We subsequently will discuss how language—particularly oral and written language—both produces and is produced in and through culture. Course topics will include: research on language, literacy and learning in context; literacy, identity, politics, and power in education; curriculum and the negotiated nature of literacy teaching/learning; literacy development as (inter)cultural communication.

Teacher Education and Curriculum and Instruction Courses: Fall 2022

EDUC103001
Child Growth and Development
Laski, Elida V
Fall 2022
First part of a two-course sequence (APSY1030 - APSY1031) designed to introduce students to the multiple dimensions of child development, and the place of education in promoting healthy development for all children. This course acquaints students with multiple processes of child development, including physical, social, cognitive, linguistic, and emotional development from birth through adolescence. Both typical and atypical patterns of development will be examined. Students discuss and analyze classic theories, contemporary issues, and key research in child development in view of their application to educational and other applied settings.

Family, School, and Society
Lewin-Bizan, Selva
Fall 2022
Second part of a two-course sequence (APSY1030-APSY1031) that introduces students to the multiple dimensions of child development, and the place of education in promoting healthy development for all children. This course considers the social and cultural contexts that shape developmental and educational processes. Focuses on understanding the nature of contemporary social problems including racism, sexism, ethnic prejudice, poverty, and violence, as they affect children, families, and schooling. Emphasizes special role of education in linking community resources for an integrated approach to serving children and families.

Learning and Curriculum in the Elementary School
Homza, Anne E
Fall 2022
Students must be registered for EDUC2151 and arrange their schedules to be on-site in a school Tuesday or Thursday. Introduces students to the profession of education and roles of teachers. Provides understanding of contexts in which education is delivered in multicultural settings and opportunity to gain knowledge and experience about interpersonal, observational, and organization skills that underlie teaching. Faculty and students work together throughout course to examine students' commitment to and readiness for career as a teacher. Introduces essentials of curriculum, teaching, and managing classrooms at elementary (K-6) level and links them to major learning theories for children. Views curriculum, instruction, management, and learning theory from perspectives of current school reform movement and social/cultural changes affecting elementary classrooms and schools.

**Teaching Language Arts**

Wargo, Jon M  
**Fall 2022**

Focuses on the teaching and learning of language arts in the elementary grades. Students will be exposed to theoretical approaches to both oral and written language development in addition to teaching methods that support development. In the fall semester, content and approaches related to teaching in English/Spanish bilingual programs will be included. Students will have the opportunity to apply their learning through practical lesson development, and implementation in connection to their pre-practicum placement. Student diversity and its implications for teaching language arts will be an integral theme. Students will draw on their experiences in their prepractica to apply and reflect on learning as they mediate theory and practice.

*Teaching Reading*
Jacques, Mary
**Fall 2022**
This course is designed to offer preservice teachers theoretical and practical knowledge and experience into teaching literacy to elementary age students. Emphasis will be placed on the social, political, and cultural context of reading instruction. Students will gain understanding of major theoretical perspectives on literacy development and the myriad strategies for teaching reading in a variety of contexts. Students will also be expected to spend time in a context where they can gain experiences in providing reading instruction in a relevant and productive way.

Teaching Mathematics and Technology  
Albert, Lillie  
Fall 2022  
This course presents methods and materials useful in teaching mathematics to elementary school children. It analyzes mathematics content and pedagogy from both conceptual and practical perspectives. Emphasis is placed on the interconnections among theory, procedures, and applications that form the framework on which specific mathematics lessons are constructed. It examines the elementary mathematics curriculum through technology resources, addressing the different ways in which technology can be used. Activities include laboratory experiences with concrete models and technology as well as inquiry into the role of the teacher in the school community in the epoch of teaching for social justice.

Teaching About the Natural World
McNeill, Katherine L
Fall 2022
This course is designed to increase confidence, enthusiasm, and knowledge for teaching elementary science. Science can be an essential part of an elementary classroom not only to achieve key science learning goals, but also as a means to engage and motivate students as well as support literacy and mathematics learning. An overarching focus of the course is on the idea that science is a "practice" that includes specific ways of reasoning, communicating, and acting. The course is also designed in partnership with the afterschool program at Gardner Pilot Academy in BPS. For eight weeks during the course, undergraduates will work with elementary students to teach them science and to reflect on how to design more effective science lessons.

Educational Strategies: Children with Special Needs
Scanlon, David
Fall 2022
This course provides instruction to pre-service teachers interested in learning more about instruction, curriculum, and teaching for children with special needs, with a framework highlighting important educational issues pertinent to their professional development and the realities of teaching. The course emphasizes the complexities of teaching children with individual learning profiles in inclusive settings. Students will examine educational readings and instructional practices through the lenses of curriculum, author voice, and academic tension. Class participants will develop a comprehensive understanding of the historical, legal, and political developments influencing current general and special education practices.

Secondary Curriculum and Instruction
Olivo, Marisa E
Fall 2022
Provides an introduction to secondary teaching practices as well as an overview of the history and structure of secondary schools. Topics include curriculum theory and development, interdisciplinary teaching, teaching students with diverse learning abilities, application of educational research, assessment, national standards, and alternative models for secondary schools. Focuses on the role of the teacher in secondary education reform. Taught on-site and in conjunction with secondary education teacher candidates' first prepracticum experience, this course offers a unique opportunity for a cohort experience in which preservice teachers work closely with each other, high school faculty, the instructor, and urban students.

Bilingualism in Schools and Communities

Paez, Mariela M

Fall 2022
Earning the TELL Certificate requires the successful completion of the courses EDUC3308 and EDUC6346 (for elementary teaching) or 6347 (for secondary teaching). In addition, students must complete a field experience in a classroom that includes bilingual learners and/or English language learners. This course is also part of the Foundations in Education minor and the Immigration, Education, and Humanitarian Studies minor at Lynch. This course prepares students to participate in increasingly multilingual and multicultural environments in order to better serve bilingual students, families, and communities. Building on theory, research, and practice from the field of bilingualism, second language acquisition, and education, students will learn about the process of language and literacy development in children and adolescents who are exposed to more than one language, and the social and cultural contexts in which this development occurs. Through the use of case studies and school profiles, students will deepen their understanding of issues in bilingualism and bilingual education. Students will also have an opportunity to build cultural competence skills by learning about diverse communities in the U.S.

Fall 2022
A semester-long, full-time, five day a week practicum experience designed to meet the Massachusetts Department of Elementary and Secondary Educations requirements for endorsement from Boston College. Students will be guided by a qualified school-based mentor (Supervising Practitioner) and a university-based mentor (Program Supervisor). In addition to registering for the course, students must complete the online application (https://bc-us.inplacesoftware.com/student) during the semester preceding the placement by April 15 for fall placements and December 1 for spring placements. Contact the Office of Field Placement and Partnership Outreach at prac@bc.edu for more information. For Lynch School undergraduate students only; Department permission required after August/December 15.

Credits: 12
Room and Schedule: By Arrangement
Satisfies Core Requirement: None
Prerequisites: EDUC3153 or Approval by the Office of Field Placement, good academic standing (grade point average of 2.5 or higher), and successful completion of all pre-practicum teacher education requirements and courses.
Corequisites: EDUC4231

Inclusive Education Field Observation
Scanlon, David
Fall 2022
Open to undergraduate majors in the Morrissey College of Arts and Sciences, the Inclusive Education Minor is offered in the LSOE. The minor is designed to (1) introduce Morrissey College of Arts and Sciences students to the world of disabilities and special education with an emphasis on special education practice, and (2) enhance the ability of future professionals to meet the needs of increasingly diverse school populations. Classes address the nature and implications of disabilities and effective practices in special education. The minor consists of six-courses and a zero-credit field observation. Appropriate for those considering a career or further studies in education.

EDUC610001
Partnering with Diverse Families and Communities in Early Childhood
Paez, Mariela M
Fall 2022
This course is designed to help early childhood educators establish effective partnerships and reciprocal relationships with diverse families and communities. First, students will learn about models of family involvement and important family developmental processes in early childhood such as attachment, maternal responsiveness, and parenting styles. Second, we discuss important social, cultural, and linguistic characteristics which shape the life of families and children and are relevant for understanding diverse families. Third, we present strategies for supporting and working with diverse families through family, school, and community partnerships. At the end of this course, students will have developed an action plan for working with diverse families in early childhood settings including activities for: collecting and providing information, planning for family involvement in the classroom, establishing reciprocal relationships with families, and collaborating with communities.

EDUC630001
Secondary/Middle School Science Methods
Lee, Samuel
Fall 2022
Provides an active, instructional environment for science learning that enables each student to construct knowledge (skill, affective, and cognitive) that, in turn, allows them to be prepared to construct instructional environments meeting the needs of tomorrow’s secondary and middle school students. Activities reflect on current research: reform movements of AAAS, NRC, NSTA, inclusive practices, interactions with experienced teachers, firsthand experience with instructional technology, and review and development of curriculum and related instructional materials.

EDUC630201
Secondary and Middle School English Methods
Corbitt, Alexander P
Fall 2022
Develops knowledge, skills, and dispositions essential for competent understanding, development, and delivery of effective English Language Arts instruction in a diverse classroom. Addresses educational and literary theory, pedagogy, assessment, evaluation, content, curriculum, media literacy, and sensitivity to and respect for adolescents who come from a variety of cultures, abilities, interests, and needs. Provides knowledge of local, state, and national standards and strategies to help students reach those standards. Encourages risk-taking, experimentation, flexibility, application of theory, and innovation. Good teaching demands open-mindedness, critical reading, writing, and thinking, honest reflection, high expectations, ongoing revision, and commitment to social justice.

**Assessment of Students with Extensive Support Needs**  
Bruce, Susan  
**Fall 2022**
Pre-practicum required (25 hours). This course addresses formal and informal assessment of students with intensive needs. Students will become familiar with assessments driven by both the developmental and functional paradigms. All assessment activities will be founded on the principle that appropriate assessment goes beyond the student to include consideration of the student's multiple contexts. This course also addresses the IEP, the legal mandates behind the process, and the collaborative role of the teacher, as part of the educational team, during the assessment and report writing processes.

EDUC713101
Social Justice in Jesuit Contexts
Casalini, Cristiano
Fall 2022
This is a Graduate-level on-line course. The Social Apostolate of the Society of Jesus has developed in a variety of ways over the centuries according the diverse contexts where Jesuits have operated as agents of "social justice." This class offers students both a broad and deep understanding of: (1) How the Society of Jesus developed its mission in support of creating a "preferential option for the poor"; (2) How the Society understood its role to promote liberation from oppression in diverse social environments; (3) What kind of services have been activated by the Society of Jesus in order to fulfill its core values of "the service of faith and promotion of justice"; and (4) How social justice is pursued through pedagogy and practices by Jesuit and Ignatian schools today, given the significant involvement of the Jesuits with formal education on a global scale. The course is designed to foster deep and meaningful conversation among students. It will include individual and collective readings and video-conferences with leaders and teachers of Jesuit schools around the world, deepening students' knowledge of current practices and stimulating dialogue.

A History of The Jesuits
Meehan, Seth M
Fall 2022
This is a Graduate-level on-line course. For nearly five centuries, the Society of Jesus has been one of the most successful and, at times, most controversial religious orders in the Catholic Church. A History of the Jesuits offers an introductory survey to this rich and varied past with particular attention, following the Jesuits' suppression in 1773, to various enterprises and enterprisers in the Americas. The course seeks to answer these questions: What have been the characteristics of the Society of Jesus and its associated works? And how and why have those characteristics remained the same or changed? Complementing the other courses in the Certificate program, the course traces the development, expansion, suppression, restoration, and recent developments of the Society of Jesus by closely examining the historical contributions of significant Jesuits.

EDUC723101
Accessible and Inclusive Design
Francis, Heather
Fall 2022
This survey course focuses on practical considerations regarding inclusive and accessible design. The focus is around guiding principles and key content that learners and designers can apply to their particular area of design. Particular focus is paid to understanding the functional barriers that individuals with disabilities might encounter, how these barriers can be addressed proactively, and why retrofitting designs can be costly and ineffective. After a general introduction to some of the guiding ideas behind inclusion and accessibility, both Universal Design for Learning (UDL) and accessibility are discussed to provide practical paths towards design that is ultimately more effective for all learners

Teaching, Curriculum, and Learning Environments: Global Perspectives
Smith, Reid J
Fall 2022
What kinds of education are most needed for a world characterized by spiraling political polarization, increasing economic interdependence, rapid climate change, and a global pandemic like COVID-19? This online course will introduce students to contemporary debates about how educators should teach, what students should learn, and how schools should interact with society. The course is global in scope and will require in-depth study of country cases and failed and successful models of change. International students and U.S. students curious about other countries' approaches to education are strongly encouraged to enroll.

EDUC730201
Models and Theories of Instructional Design
Jackson, Richard
Fall 2022
Now well into the twenty-first century, schools struggle with the challenge of offering a high quality education for all learners regardless of race, family status, national origin, language, or ability. Increasingly, curriculum is accessed digitally and student work is generated and exhibited using technology tools. The once familiar artifacts of classrooms are rapidly giving way to radically new forms of teaching and learning. Within this context of change, this course reviews the evolution of theories of learning and instruction and then critically examines a range of contemporary models and theoretical frameworks. Learning activities in the course will allow participants to develop their own personalized framework for planning and implementing instruction.

**Curriculum Theories, Practice, and Design**  
Lee, Jieun  
Fall 2022
The overarching objective for Curriculum Theories and Practice is to help course participants develop and clarify their philosophy of education, in particular, their beliefs regarding the purposes and processes of effective and equitable curricular organization. To do so, the class explores varied ways of conceptualizing a school curriculum, drawing on insights from major curriculum designers, both past and present, U.S. and international. So students appreciate the ever-evolving nature of effective teaching practices and related school curricula, they will assess their own experiences with educational and institutional change processes writ large. Aiming to help course participants to thrive in the current, volatile educational and political climate, students will consider various approaches to multicultural education, anti-racist education, and inclusion practices that aim to transform the curriculum, attending to the needs of all students and overtly promoting equitable outcomes. In doing so, students will enact alternative strategies for assessment that provide multiple and authentic measures of student learning. Ultimately the course intends to help students consider how school curricula can be structured to promote social justice.

Family and Community Engagement

Steedman, Peter

Fall 2022
The purpose of this course is to introduce participants to theories, practices, and empirical research regarding family and community engagement in schools. The focus is on how school leaders--formal and informal--enact organizational models, educational programs, and political strategies that increase authentic relationships with parents and community members. Topics of study will include community schools/full service schools, parent involvement models, involvement of diverse families, grassroots organizing for community development, afterschool and community-based education, and school board-community relations. Direct participation in inquiry into school-community activities conducted on-site in schools and neighborhoods will be requirement of the course.

Global Perspectives on Disabilities and Special Education
Francis, Heather
Fall 2022
In the modern world there are many differing perspectives about the significance of disabilities. In this course we examine both "medical model" perspectives on the origin and nature of disabilities, as rooted in the scientific method, and post-modern critical perspectives. Cultural influences on how those perspectives are valued will also be considered. Differing approaches to special education practice--both service delivery systems and interventions--will be critically compared to the thought traditions. The ethics and social value of special education will also be considered.

EDUC730801
Designing Learning Environments in a Social and Digital World
Corbitt, Alexander P
Fall 2022
In today's society, what counts as knowledge and expertise has changed considering the global shifts in interconnectivity, social interactions, and technology. Previous models of learning focused on knowledge as a collection of facts within curriculum and learning environments helping individuals obtain those facts. However, today technology can enable all individuals to quickly obtain facts. Instead, expertise requires deep knowledge in which ideas are applied across multiple contexts in particular contexts with people and tools. These shifts in knowledge as well as technological advances have significant implications for how we design curriculum and other learning environments. In this course, we will examine different learning environments as well as various aspects within those environments. For example, we will examine curriculum to evaluate the scaffolds to support student learning, analyze digital learning environments for professional development to support teacher learning and critique video of classroom discourse to examine student interactions and community development. In this course, we will consider the environment both as conceptualized by its designers (the design) and as it is experienced by participants as learning interactions unfold in particular settings (the enactment) to evaluate the effectiveness of those learning environments.

Supervision in Action  
Cownie, Charles T  
Fall 2022  
This course is designed as an introduction to research-based clinical supervision models in teacher education. Hands-on application-in action includes observational strategies, collaborative assessment logs, and summative reports as resources for ongoing data collection. Course participants acquire and then apply the Massachusetts Department of Education Pre-service Performance Assessment rubric for coaching and evaluating student teachers, integrating the BC Teacher Education themes that emphasize teaching for equity and social justice. This course is restricted to cooperating teachers in BC Partnership Schools who are supervising a BC student teacher in a full-time practica and to new BC Clinical Faculty.

This course is designed for the Lynch School Fifth Year Program students who have successfully completed a licensure program at Boston College. It is designed to build on teacher candidates' experiences with inquiry as stance and expand their skills in conducting classroom-based research that leads to pupil achievement and teaching for social justice in their new license area. The hybrid course is online with one class meeting. A case-study approach is used to help teacher candidates mediate the relationships of theory and practice, pose questions for inquiry, learn through reflection and discussion, learn from experiences with students and colleagues, construct critical perspectives about teaching, learning, and schooling, and to improve teaching and learning. The second part of this sequence is EDUC7432 which is taken in conjunction with full-time student teaching (EDUC7420).

Curriculum Theories and Practice
Murugaiah, Kirubahari
Fall 2022
Asks teachers to analyze the philosophical underpinnings of educational practices. Also asks teachers to examine their own philosophies of education and to construct meaning and practice from the interplay between their beliefs and alternative theories. Designed for individuals advanced in their professional development.

EDUC743801
Educating Learners with Disabilities
Francis, Heather
Fall 2022
This course focuses on the education of students with disabilities and other learners from culturally and linguistically diverse backgrounds. The goal of the course is to promote access to the general curriculum for all students through participation in standards-based reform. Universal Design for Learning (UDL) provides the theoretical framework for this course. Through an examination of historical milestones, landmark legislation, systems for classification, approaches to intervention, and the daily life experiences of diverse learners, students acquire knowledge about diversity and the resources, services, and supports available for creating a more just society through education.

Literacy and Assessment in the Secondary School
Higgins, Claire F
Fall 2022
This course is an advanced study of literacy processes and strategies for use with students, including multiple subjects and content areas, and those literacies used outside of school contexts. Participants will investigate and regard literacy as social practice, situated in particular contexts and accessible to particular participations.

Transforming the Field of Catholic Education
O'Connor, Michael T
Fall 2022
This course explores the history, purpose, current status, and possible futures of Catholic elementary and secondary schools. Students will become conversant with the body of scholarly literature, theoretical and empirical, that defines the field of Catholic education. Though the primary focus will be on Catholic schools in the United States, the course will explore how we can learn from the experience of other religiously affiliated schools here and abroad, and from the experience of Catholic educators worldwide. Special attention will be devoted to how the Ignatian spirituality and pedagogy can be a resource for educators in Jesuit and non-Jesuit schools.

Teaching Reading
Connolly, Marinna L
Fall 2022
Offers teacher candidates skills for teaching reading to school age children. Students will gain understanding of reading through a historical, political, theoretical, and practical lens. They will understand the delivery of instruction by learning a balanced approach to teaching reading. They will gain familiarity of how children learn to read by partaking in observations, assessments, and instruction with a school age child. Students will learn a variety of ways to meet the needs of linguistically and culturally diverse learners. They will recognize reading difficulties and learn ways to differentiate instruction for such readers.

Teaching Language Arts
Merlino, Michele M
Fall 2022
Examines the development of written and spoken language and methods of instruction for oral and written language from the preschool years through early adolescence. Students learn strategies for identifying children's areas of strength and weakness and to plan instruction. Addresses the needs of children from non-English speaking homes. Expects students to spend at least 16 hours distributed across at least eight sessions in a classroom or other setting where they can work with one or more children.

EDUC754701
Teaching Narrative Writing to K-8 Students
Macdonald, Elizabeth A
Fall 2022
This is a project-based course where groups of participants will collaborate to develop a writing unit in a genre appropriate for their grade level. Using a genre-based pedagogy informed by systemic functional linguistics, participants will learn what and how to teach non-fiction narratives (Personal and procedural recounts, autobiographies, biographies, empathetic autobiographies, and historical recounts) and fictional narratives. Features of the genres demanded in elementary and middle schools will be learned and practiced. The strong emphasis on language development distinguishes this approach from others currently used in schools. The approach to teaching guides teachers in ways of apprenticing students to writing that builds confidence and success.

Educational Assessment of Learning Problems
Cass, Richard J
Fall 2022
Open to students in the Teacher of Students with Moderate Special Needs Program, Counseling Psychology, and Reading Specialist Programs. Not open to Special Students. This course focuses on formal and informal approaches to the nondiscriminatory assessment of students with a wide range of cognitive and academic difficulties. The focus is on identifying students with mild/moderate disabilities. It is designed to prepare specialists for the process of documenting special needs, identifying current levels of performance, addressing critical issues, and designing approaches to monitoring progress.

EDUC759201
Foundations of Language and Literacy Development
Proctor, Charles P
Fall 2022
Foundations of Language and Literacy Development is a graduate-level course designed for both masters and doctoral students. At the masters level, the course meets the needs of students in licensure programs and in the Curriculum & Instruction masters programs. At the doctoral level, the course serves as a prerequisite for EDUC8200: Contemporary Issues and Methods in Literacy Research. The overall goal of this course is to provide all students with a foundational understanding of language and literacy development and the relationships between them. Students will leave the class with an understanding of how language and literacy development are theorized, the research that undergirds those theories, and how that research gets summarized and translated for policy contexts.

Bilingualism, Second Language, and Literacy Development
Kim, So Lim
Fall 2022
Explores first and second language and literacy development of children raised bilingually as well as students acquiring a second language during pre-school, elementary, or secondary school years. Also addresses theories of first and second language acquisition, literacy development in the second language, and factors affecting second language and literacy learning. Participants will assess the development of one aspect of language or language skill of a bilingual individual and draw implications for instruction, parent involvement, and policy. This course is fully online. The course will have biweekly synchronous meetings. The course meeting time will be determined at the first session by consulting with all students. The first session will be on September 4 (Thursday) at 9:00 AM.

Participatory Action Research: Gender, Race, Power
Lykes, M B

Fall 2022
This graduate seminar introduces students to theoretical and practical issues in the design and implementation of community- and school-based participatory and action research, including a review of theories and practices that have contributed to community-based knowledge construction and social change policies and processes. Ethnographic, narrative, oral history, and visual methodologies are additional resources for understanding and representing the individual and collective stories co-constructed through the research process. Students participate in a community-based collaborative undoing racism workshop and have opportunities for ongoing collaborative work on a site. We reflect collaboratively and contextually on multiple and complex constructions of "gender," "race," and social class in and through these research processes. OPEN TO ALL Ph.D. STUDENTS. MASTER'S LEVEL STUDENTS REQUIRE PERMISSION OF THE INSTRUCTOR.

Teacher Education and Curriculum and Instruction Courses: Spring 2023

EDUC103001
Child Growth and Development
MacEvoy, Julie P
Spring 2023
First part of a two-course sequence (APSY1030 - APSY1031) designed to introduce students to the multiple dimensions of child development, and the place of education in promoting healthy development for all children. This course acquaints students with multiple processes of child development, including physical, social, cognitive, linguistic, and emotional development from birth through adolescence. Both typical and atypical patterns of development will be examined. Students discuss and analyze classic theories, contemporary issues, and key research in child development in view of their application to educational and other applied settings.
Credits: 3
Room and Schedule: Mcguinn Hall 121 TuTh 09:00AM-10:15AM
EDUC103002

EDUC112801
Computer Applications for Educators
Fidalgo, Kyle L
Spring 2023
This is not a course in computer programming. (EDUC1128 is for undergraduate students only).
The technology which is often available in contemporary classrooms affords opportunities for reaching more students in relevant ways. This course covers fundamental knowledge and skills needed by teachers who wish to use that technology and affords students opportunities to develop their expertise in mainstream and emerging educational technologies. This course includes presentations on hardware (e.g., computers, scanners, digital cameras, video cameras) and software (e.g., interactive, web, productivity) and discussion of how these integrate into classroom instruction. Substantial hands-on project time is provided.

EDUC203901
Learning and Curriculum in the Elementary School
Homza, Anne E
Spring 2023
Students must be registered for EDUC2151 and arrange their schedules to be on-site in a school Tuesday or Thursday. Introduces students to the profession of education and roles of teachers. Provides understanding of contexts in which education is delivered in multicultural settings and opportunity to gain knowledge and experience about interpersonal, observational, and organization skills that underlie teaching. Faculty and students work together throughout course to examine students' commitment to and readiness for career as a teacher. Introduces essentials of curriculum, teaching, and managing classrooms at elementary (K-6) level and links them to major learning theories for children. Views curriculum, instruction, management, and learning theory from perspectives of current school reform movement and social/cultural changes affecting elementary classrooms and schools.

EDUC210101
Teaching Language Arts
Merlino, Michele M
Spring 2023
Focuses on the teaching and learning of language arts in the elementary grades. Students will be exposed to theoretical approaches to both oral and written language development in addition to teaching methods that support development. In the fall semester, content and approaches related to teaching in English/Spanish bilingual programs will be included. Students will have the opportunity to apply their learning through practical lesson development, and implementation in connection to their pre-practicum placement. Student diversity and its implications for teaching language arts will be an integral theme. Students will draw on their experiences in their prepractica to apply and reflect on learning as they mediate theory and practice.

**Teaching Reading**  
**Corbitt, Alexander P**  
**Spring 2023**  
This course is designed to offer preservice teachers theoretical and practical knowledge and experience into teaching literacy to elementary age students. Emphasis will be placed on the social, political, and cultural context of reading instruction. Students will gain understanding of major theoretical perspectives on literacy development and the myriad strategies for teaching reading in a variety of contexts. Students will also be expected to spend time in a context where they can gain experiences in providing reading instruction in a relevant and productive way.

Teaching the Social Sciences and the Arts
Blake, Alexandra
Spring 2023
Provides prospective elementary teachers with opportunities to develop social studies and arts curricula for elementary age students and consider a variety of instructional approaches appropriate for this age group. Students will learn how to develop the skills of an historian and select and integrate knowledge appropriate for diverse learners. Curricular topics include evaluating context-appropriate materials, developing critical thinking, using and critiquing primary sources in the classroom, and developing varied learning activities through the use of multiple media.

EDUC210801
Teaching Mathematics and Technology
Sohn, Sheila
Spring 2023
This course presents methods and materials useful in teaching mathematics to elementary school children. It analyzes mathematics content and pedagogy from both conceptual and practical perspectives. Emphasis is placed on the interconnections among theory, procedures, and applications that form the framework on which specific mathematics lessons are constructed. It examines the elementary mathematics curriculum through technology resources, addressing the different ways in which technology can be used. Activities include laboratory experiences with concrete models and technology as well as inquiry into the role of the teacher in the school community in the epoch of teaching for social justice.

**EDUC210901**  
**Teaching About the Natural World**  
**Lee, Samuel**  
**Spring 2023**  
This course is designed to increase confidence, enthusiasm, and knowledge for teaching elementary science. Science can be an essential part of an elementary classroom not only to achieve key science learning goals, but also as a means to engage and motivate students as well as support literacy and mathematics learning. An overarching focus of the course is on the idea that science is a "practice" that includes specific ways of reasoning, communicating, and acting. The course is also designed in partnership with the afterschool program at Gardner Pilot Academy in BPS. For eight weeks during the course, undergraduates will work with elementary students to teach them science and to reflect on how to design more effective science lessons.

**Credits:** 3  
**Room and Schedule:** Higgins Hall 270 Tu 03:45PM-06:15PM  
**Satisfies Core Requirement:** None

Undergraduate Inquiry Seminar: I
Date, Danielle V; Ryan, Amy
Spring 2023
The purpose of this seminar is to introduce and develop classroom-based inquiry skills in teacher candidates. Teachers develop a self-awareness about their personal beliefs and biases about teaching, learning, and pupils; explore, understand, and learn to navigate the various aspects of school culture; and learn to use their classroom as a research site by posing critical questions about pupil learning, consulting related research, gathering and analyzing data about their pupils and classrooms, attempting interventions, evaluating results, and documenting pupil learning.

EDUC221101
Secondary Curriculum and Instruction
Dunne, Kerry A
Spring 2023
Provides an introduction to secondary teaching practices as well as an overview of the history and structure of secondary schools. Topics include curriculum theory and development, interdisciplinary teaching, teaching students with diverse learning abilities, application of educational research, assessment, national standards, and alternative models for secondary schools. Focuses on the role of the teacher in secondary education reform. Taught on-site and in conjunction with secondary education teacher candidates’ first prepracticum experience, this course offers a unique opportunity for a cohort experience in which preservice teachers work closely with each other, high school faculty, the instructor, and urban students.

EDUC320001
Reading Difference Differently: Issues of Gender(s) and Sexualities in Youth Literature and Media
Wargo, Jon M
Spring 2023
With a particular emphasis on issues of gender and sexuality, this class interrogates how contemporary youth literature and media (texts by and about young people) shape and organize difference differently. Examining how textual understandings of youth, gender, and sexuality intersect with other domains of identity (e.g., race, ability, religion), this course explores how criticism, circulation, and reception of innovative storytelling advance new ways to understand childhood and the young adult.

EDUC330801
Bilingualism in Schools and Communities
Paez, Mariela M
Spring 2023
Earning the TELL Certificate requires the successful completion of the courses EDUC3308 and EDUC6346 (for elementary teaching) or 6347 (for secondary teaching). In addition, students must complete a field experience in a classroom that includes bilingual learners and/or English language learners. This course is also part of the Foundations in Education minor and the Immigration, Education, and Humanitarian Studies minor at Lynch. This course prepares students to participate in increasingly multilingual and multicultural environments in order to better serve bilingual students, families, and communities. Building on theory, research, and practice from the field of bilingualism, second language acquisition, and education, students will learn about the process of language and literacy development in children and adolescents who are exposed to more than one language, and the social and cultural contexts in which this development occurs. Through the use of case studies and school profiles, students will deepen their understanding of issues in bilingualism and bilingual education. Students will also have an opportunity to build cultural competence skills by learning about diverse communities in the U.S.

**Reading and Special Needs Instruction for Secondary and Middle School Students**

Montgomery, Nicholl D

Spring 2023
Develops knowledge of the reading process and how to "teach reading the content areas." Students will develop curriculum and instruction that integrates reading instruction in the content areas, addressing diverse learners. Involves understanding relationship among assessment, evaluation, and curriculum; learning what and how to teach based on student assessments; developing and providing scaffolded instruction that addresses reading comprehension and critical thinking; and integrating reading, writing, speaking, listening, and thinking into content curriculum. Also addresses how to help students comprehend non-printed text.

Inclusive Education Field Observation
Scanlon, David
Spring 2023
Open to undergraduate majors in the Morrissey College of Arts and Sciences, the Inclusive Education Minor is offered in the LSOE. The minor is designed to (1) introduce Morrissey College of Arts and Sciences students to the world of disabilities and special education with an emphasis on special education practice, and (2) enhance the ability of future professionals to meet the needs of increasingly diverse school populations. Classes address the nature and implications of disabilities and effective practices in special education. The minor consists of six-courses and a zero-credit field observation. Appropriate for those considering a career or further studies in education.

Art and Music in Early Childhood Education
Paez, Mariela M
Spring 2023
The main purpose of this course is to encourage early childhood educators to embrace the unique characteristics of young children's artistic and musical expression and appreciation of these experiences. By providing a foundational knowledge of young children's creative thinking and aesthetic development, the course will teach you how to apply effective pedagogical strategies in teaching art and music and how to integrate art and music across the early childhood curriculum. Students will learn how to bridge theory and practice through various readings, recorded lectures, and classroom examples. At the end of this course, you will be able to plan effective process-focused art and music lessons, use various materials and medium for artistic and musical expression, maximize the potential of your classroom resources, and use art and music to promote multiculturalism, diversity, and enhance family involvement.

Science Playing and Learning in the Early Childhood Classroom  
Paez, Mariela M  
Spring 2023  
This course is designed to encourage and prepare early childhood educators for planning and implementing engaging and developmentally appropriate science learning experiences (Pre-K-2nd grade). An overarching focus of the course is instilling in students an appreciation for the wonder of science and the world around them. The course is divided into three science content areas: Earth and Space Sciences, Life Sciences, and Physical Sciences. Students will learn how to connect their teaching with new science, technology, and engineering standards. Through interactive activities and discussions including the review of video, science lessons, and research in science education, we will explore key elements and challenges of science teaching and provide a foundation for supporting science learning in the early childhood classroom.

Room and Schedule: Dates: March 15th - April 5th;On-line Asynchronous
EDUC631601
Developmentally Appropriate Curriculum in Early Childhood Education
Cristello, Karen M
Spring 2023
This course focuses on the development and implementation of curriculum in early education. The Massachusetts Guidelines for Preschool Learning Experiences and the national standards for developmentally appropriate practices will be utilized throughout the semester. This course will highlight each of the curriculum domains (language/literacy, mathematics, science and technology, social studies, health, and the arts) while demonstrating how to build an integrated curriculum in an early childhood classroom. The importance and value of play in the early years will be emphasized, and strategies will be shared to help teacher candidates document student learning.

EDUC637301
Classroom Management
Cass, Richard J
Spring 2023
ED201 is now EDUC6373. Focuses on observation and description of learning behaviors, with emphasis on examining the relationship of teacher behavior and student motivation. Prepares teachers to analyze behavior in the context of a regular classroom setting that serves moderate special needs students and to select, organize, plan, and promote developmentally appropriate behavior management strategies that support positive learning. Also considers theoretical models of discipline and classroom management strategies, and requires students to propose and develop a rationale for selection of specific techniques for specific classroom behaviors.

Teaching Strategies for Students with Low Incidence Multiple Disabilities
Bruce, Susan
Spring 2023
Pre-practicum required (25 hours). This course is designed to assist the special educator in acquiring and developing both the background knowledge and practical skills involved in teaching individuals who have severe or multiple disabilities. The areas of systematic instruction, communication, gross motor, fine motor, community and school functioning, collaboration, functional and age-appropriate programming are emphasized. The role of the educator as developer of curriculum, instructor, and in the transdisciplinary team are included. The students should be prepared to participate in a one-day-per-week field placement.

Room and Schedule: Campion Hall 204 W 04:30PM-06:50PM
EDUC654001
Ed Implications/Sensory, Motor, and Health Impairments
Miller, Thomas
Spring 2023
This course addresses the impact of physical disabilities on learning. Emphasis is placed on the educational needs of children with cerebral palsy, visual impairment, or hearing loss in combination with intellectual disability. Basic anatomy of the eye and ear are covered along with the common causes of vision and hearing loss. This course prepares teachers to perform functional vision and hearing evaluations and to translate those findings into appropriate classroom accommodations and adaptations. Many children with disabilities have unmet sensory integration needs that influence their behavior and subsequent readiness to learn.

EDUC658801
Teaching and Learning Strategies - Moderate Support Needs
Scanlon, David
Spring 2023
Not open to non-degree students. EDUC6589 is intended for general educators and EDUC6588 is required for special educators. This course is intended to help prospective and experienced special education teachers and other educators develop a repertoire of skills for teaching students with mild/moderate (high incidence) educational disabilities. Participants will accomplish this goal by making connections among their knowledge of disabilities, special education policy and practices, assessments, education theory, and teaching methods. Students will learn how to develop, implement, and monitor individualized education programs, implement research-based effective intervention practices, and collaborate with others to meet the needs of special education students in inclusive and other educational settings. Successful students will have familiarity and competency with a variety of special education procedures and teaching approaches and specific practices. Appropriate for both elementary and secondary level education. Class sessions will routinely include time to practice skills being learned.

EDUC658901

Teaching and Learning Strategies for Inclusive Secondary Educators

Scanlon, David

Spring 2023
Designed primarily for elementary and secondary education teacher candidates and practicing educators, this course helps them develop an initial repertoire of skills for teaching students with educational disabilities. The primary emphasis of this course is on the education of students with high-incidence (mild/moderate) disabilities in inclusive classrooms. Participants will learn to develop comprehensive instructional plans fully inclusive of students with educational disabilities, utilized an IEP to guide instruction, develop accommodations and modifications appropriate to students and the curriculum, design individual, small, and large group instruction, and evaluate various service delivery options for educating students with disabilities.

Computer Applications for Educators  
Fidalgo, Kyle L  
Spring 2023  
This is not a course in computer programming. Alternates every other spring with EDUC1128. (EDUC6628 is for graduate students only). Explores the role of emerging technologies in the context of schools. Course is theoretically grounded in the Project-Based Learning literature. Assignments are hands-on, with emphasis placed on producing tangible artifacts that will serve a practical need. Specifically, students will develop PowerPoint presentations to evaluate educational software and web-based curricular materials. Also, each student will develop a website featuring his or her teaching portfolio. Course appropriate for all computer skill levels.

**EDUC705301**  
**Spiritual Sources of Catholic Education and Catechesis**  
**Ospino, Hosffman**  
**Spring 2023**

The course is open to Catholic school teachers and administrators, religious educators, and anyone interested in learning more about the spiritual roots of Catholic education. Catholic education and catechesis are rooted in particular appropriations of the Christian faith articulated as schools of spirituality. From these appropriations emerge commitments to specific charisms and pedagogical practices. It is imperative that Catholic educational efforts continue to affirm the spiritual legacies that have sustained schools, missions, and parochial programs throughout history. In this course we read some foundational texts of major schools of spirituality and explore how they have inspired life-giving philosophies of Catholic education. The guiding principle throughout the course is that a good philosophy of Catholic education and catechesis is always sustained by a deep spirituality.

EDUC713201
Discernment and Prayer in the Spiritual Exercises of St. Ignatius
Geger, Barton T, SJ
Spring 2023
This is a Graduate level online course. A study of the spiritual doctrine of St. Ignatius Loyola as articulated in the text of the Spiritual Exercises, but with reference to other texts such as Ignatius' Testament, letters, and the Constitutions of the Society of Jesus. The focus is how Ignatius' treatment of prayer, discernment of spirits, and discernment of God's will, work together to form a "contemplative in action."

Jesuit Pedagogy
Casalini, Cristiano
Spring 2023
This is an online course. This three-credit, graduate-level online course examines the distinctiveness of the Jesuits' approaches to teaching and of their philosophy of education that have propelled their schools to unprecedented success over the centuries. One key to the unprecedented success of Jesuit education has been the tension between the recognizable mark of uniformity that long distinguished the methods, contents, and practices of Jesuit schools and their ability to adapt to different contexts and times. Both aspects—the uniformity and the adaptability—were explicitly supported by the "Ratio studiorum," the Jesuits' foundational plan of studies issued in 1599, which, despite the schools' many variations and complexities, has retained some influence over time. With the "Ratio" discarded, Jesuit schools had to clarify what made them distinctly Jesuit, reconciling their mission with the contemporary world. This three-credit, graduate-level class sketches the developments of Jesuit educational endeavors by focusing on both the permanent and changing traits of its distinctive pedagogy.

**EDUC725201**  
**What Makes Education Catholic?**  
**Groome, Thomas**  
**Spring 2023**

When a school presents itself to the world as offering Catholic education, it signals, at a minimum, that it is committed to educating from and for faith. It is to educate from deep spiritual convictions that are core to Catholicism and for a Transcendent as well as an immanent perspective on life, preparing students to live well into an Ultimate Horizon God as revealed in Jesus Christ. What does this ask of the curriculum of a Catholic school, of its faculty and administrators? We once took for granted our response to such questions, for example when 95% of faculty and staff were vowed religious and all students were decidedly Catholic. That era has passed, bringing new challenges and opportunities. Note, for example, the growing number of students from other or no faith tradition attending, likewise an often diverse faculty and staff, and many Catholic students who are more cultural than affiliated in their faith. This changed reality, coupled with the secular and postmodern culture of our time, offers new opportunity for a fresh address of what makes education Catholic.

Teaching, Curriculum, and Learning Environments: Global Perspectives
Kim, So Lim
Spring 2023
What kinds of education are most needed for a world characterized by spiraling political polarization, increasing economic interdependence, rapid climate change, and a global pandemic like COVID-19? This online course will introduce students to contemporary debates about how educators should teach, what students should learn, and how schools should interact with society. The course is global in scope and will require in-depth study of country cases and failed and successful models of change. International students and U.S. students curious about other countries' approaches to education are strongly encouraged to enroll.

Models and Theories of Instructional Design
Jackson, Richard
Spring 2023
Now well into the twenty-first century, schools struggle with the challenge of offering a high quality education for all learners regardless of race, family status, national origin, language, or ability. Increasingly, curriculum is accessed digitally and student work is generated and exhibited using technology tools. The once familiar artifacts of classrooms are rapidly giving way to radically new forms of teaching and learning. Within this context of change, this course reviews the evolution of theories of learning and instruction and then critically examines a range of contemporary models and theoretical frameworks. Learning activities in the course will allow participants to develop their own personalized framework for planning and implementing instruction.

EDUC730301
Curriculum Theories, Practice, and Design
Lee, Jieun
Spring 2023
The overarching objective for Curriculum Theories and Practice is to help course participants develop and clarify their philosophy of education, in particular, their beliefs regarding the purposes and processes of effective and equitable curricular organization. To do so, the class explores varied ways of conceptualizing a school curriculum, drawing on insights from major curriculum designers, both past and present, U.S. and international. So students appreciate the ever-evolving nature of effective teaching practices and related school curricula, they will assess their own experiences with educational and institutional change processes writ large. Aiming to help course participants to thrive in the current, volatile educational and political climate, students will consider various approaches to multicultural education, anti-racist education, and inclusion practices that aim to transform the curriculum, attending to the needs of all students and overtly promoting equitable outcomes. In doing so, students will enact alternative strategies for assessment that provide multiple and authentic measures of student learning. Ultimately the course intends to help students consider how school curricula can be structured to promote social justice.

The purpose of this course is to introduce participants to theories, practices, and empirical research regarding family and community engagement in schools. The focus is on how school leaders--formal and informal--enact organizational models, educational programs, and political strategies that increase authentic relationships with parents and community members. Topics of study will include community schools/full service schools, parent involvement models, involvement of diverse families, grassroots organizing for community development, afterschool and community-based education, and school board-community relations. Direct participation in inquiry into school-community activities conducted on-site in schools and neighborhoods will be requirement of the course.

Globalization, Mobility, and Education
Montgomery, Nicholl D
Spring 2023
This course address political economic issues related to migration and education. Drawing on the anthropology of globalization and sociology of immigration, the course reviews major theories of immigrant incorporation and exclusion processes in schools, examines case studies of im/migrants, refugees, and displaced persons and their adaptation processes in countries in the Global North and the Global South, and considers educational practices and policies that develop to address mobility in diverse contexts. The course asks how cultural, social, political, and economic factors influence im/migrant incorporation, and how educators can facilitate im/migrant students' opportunities for learning through changes in policies, pedagogies, and curricula.

EDUC730603
Language Learner in Global Perspective
Borowiec, Katrina
Spring 2023
This course provides an overview of language learning and the situation of second language learners in schools. First, we review processes of language learning and the challenges language learners face when they must simultaneously learn a language and learn subject matter in that language. We do this from a socialcultural perspective, exploring language learning as embedded in sociohistorically situated activities. We develop and account of how learning language is also learning culture. Second, we study how these processes vary across cultural contexts. Because language learning is woven into social and historical contexts, processes of language learning and schooling vary around the world. The course develops several case studies from different areas of the globe in order to illustrate how language learning and schooling can intersect in different ways.

Global Perspectives on Disabilities and Special Education
Park, Haerin
Spring 2023
In the modern world there are many differing perspectives about the significance of disabilities. In this course we examine both "medical model" perspectives on the origin and nature of disabilities, as rooted in the scientific method, and post-modern critical perspectives. Cultural influences on how those perspectives are valued will also be considered. Differing approaches to special education practice--both service delivery systems and interventions--will be critically compared to the thought traditions. The ethics and social value of special education will also be considered.

EDUC742101
Theories of Instruction
Jackson, Richard
Spring 2023
This provides an in-depth review of modern instructional models classified into selected families with regard to perception of knowledge, the learner, curriculum, instruction, and evaluation. Each student will be asked to survey models in his/her own field(s) and to select, describe, and defend a personal theory in light of today's educational settings based upon personal experiences, reflection on current research, and contemporary issues central to the education of all learners.

EDUC743101
Graduate Inquiry Seminar: One
Kim, So Lim
Spring 2023
The course will coincide with the pre-practicum experience. It is designed to introduce teacher candidates to inquiry as stance and the skills necessary to conduct classroom-based research that leads to pupil achievement and teaching for social justice. The course is designed to help teacher candidates mediate the relationships of theory and practice, pose questions for inquiry, learn through reflection and discussion, learn from their students and colleagues, construct critical perspectives about teaching, learning, and schooling, and to improve teaching and learning. The second part of this sequence is 432 which is taken in conjunction with full-time student teaching (EDUC7420). Students who have successfully completed EDUC4231, Senior Inquiry, as part of their undergraduate teacher licensure program at LSEHD are recommended to take EDUC 7430 Advanced Graduate Inquiry Seminar
