Undergraduate Research

Russell, James

Fall 2023
An opportunity to participate in research projects in the laboratory of a faculty member. Students are typically assigned to assist with a specific experiment contributing to the laboratory's overall goals. This is the most typical type of undergraduate research course experience in our department. Students may work with researchers at other area universities and hospitals. The work must be relevant to psychology/neuroscience. While primary supervision of the research will be provided by the laboratory PI, a Boston College Department of Psychology and Neuroscience faculty member must agree to serve as the instructor of record for the course. Students are encouraged to obtain permission of the instructor before they register for their other courses, so that they may keep open the time slot for the laboratory meetings associated with the laboratory. Registration requires the Syllabus/Contract form on the department's Academic Opportunities page.

**Brownell, Hiram H**  
**Fall 2023**

This course offers students the opportunity to study a topic of personal interest, working independently under the supervision of a faculty member within the Psychology Department. The instructor, working with the student, decides on the nature of readings and related activities involved as well as the precise form of scholarly work required. A student may obtain the consent of a faculty member to serve as his or her instructor by contacting the faculty member directly. Registration requires the Syllabus/Contract form on the department’s Academic Opportunities page.

PSYC224201
Personality Theories
Russell, James
Fall 2023
Does personality make us who we are? Whether selecting a mate, voting for a president, or understanding ourselves, we want and need to know about personality. In this course we consider how personality can be measured, how well it predicts behavior, what shapes our personality, and whether personality can be changed.

PSYC227201
Cognitive Psychology: Mental Processes and their Neural Substrates
Brownell, Hiram H  
Fall 2023  
This course introduces the scientific study of mental function from an information processing perspective. The course examines how information is processed and transformed by the mind to control complex human behavior. Specific topics include the history of cognitive psychology, cognitive neuroscience, attention, perception, consciousness, short-term and long-term memory, mental imagery, language, decision-making, and problem solving. Course material will be drawn from work with clinical populations (e.g., people who have sustained brain injury) as well as from work with non-injured populations. Class sessions will be devoted to lecture, discussion, demonstrations, and (if practical) student presentations.

Credits: 3  
Room and Schedule: Gasson Hall 305 TuTh 10:30AM-11:45AM

PSYC227401  
Sensation and Perception  
MacEvoy, Sean P  
Fall 2023  
How do our senses tell us what is really in the world around us, and can our senses be trusted? These questions have been pondered by philosophers for centuries, and more recently by psychologists and neuroscientists. This course will explore the anatomical/biological basis of sensation (how the world that we perceive is translated into the raw language of the nervous system) and the cognitive processes underlying perception (how our brains reconstruct the physical world from these neural inputs). We will examine these questions for vision, hearing, touch, smell, and taste.

Credits: 3  
Room and Schedule: Gasson Hall 310 TuTh 09:00AM-10:15AM  
Satisfies Core Requirement: None  
Prerequisites: PSYC1110
PSYC228501
Behavioral Neuroscience
Christianson, John P
Fall 2023
This course presents an introduction to the physiological basis of behavior. Basic neuroanatomy and neurophysiology are presented, and the following topics are then discussed: neuropharmacology, psychopharmacology, and the biological bases of mental illness; brain mechanisms of reward and reinforcement; hormones and behavior; an introduction to the development of the nervous system; brain mechanisms of learning and memory; and brain mechanisms of emotion.

PSYC332701
Psychology of Prejudice and Discrimination
Zimbler, Mattitiyahu
Fall 2023
This course focuses on the social psychology of stereotyping, prejudice, and discrimination. In other words, we will examine beliefs about members of social groups (stereotypes), evaluations of group members (prejudice), and behaviors towards members of social groups based on their group membership (discrimination). Also we will study how these issues shape the experiences of social group members, especially when they are members of low-status and/or minority groups. Rather than relying on anecdotal evidence, we will examine theories of stereotyping, prejudice, and discrimination through empirical research findings.

**PSYC332901**  
**Psychophysiology of Stress**  
**Ivkovic, Vladimir**  
**Fall 2023**  
This course explores the psychological and physiological factors underlying stress, including basic principles of psychophysiology and fundamental concepts of stress. Topics include emotion, motivation, multitasking, attention, arousal, and distraction. Physiological mechanisms underlying stress will be examined relative to health and abnormal behaviors, such as addictions, mood disorders, and violence. Students will be instructed in methods of stress control, including cognitive behavioral techniques and meditation.

PSYC333401
Interpersonal Violence
Tishelman, Amy C
Fall 2023
This course will review research, assessment, treatment, and current controversies in the area of family violence, focusing on child sexual abuse, child physical abuse, and spousal abuse. The course will consist of a combination of a lecture and class discussion of the issues, including those related to memories of abuse, identification of abuse, and the legal, psychological, and social ramifications of extracting women and children from abusive homes.

PSYC333601
Clinical Psychology
Rosen, Karen
Fall 2023
Issues associated with the treatment of psychological disorders will be examined. The concepts of normality and pathology will be discussed in the context of various models of intervention. Several different schools of psychotherapy will be covered, with an emphasis on the theoretical assumptions and practical applications of each perspective. Studies on the effectiveness of psychotherapy will be reviewed. The clinical training and professional practices of psychologists will be discussed.

Credits: 3
Room and Schedule: Gasson Hall 202 TuTh 03:00PM-04:15PM
PSYC334201
Sport and Exercise Psychology
Moore, Kristina
Fall 2023
This course will provide a broad introduction to sport and exercise psychology as both a science and a practice. Content will include major theories, seminal and current empirical research, and practical considerations concerning the cognitive processes, emotional states, social influences, and developmental systems involved in sport and exercise participation and performance. Topics will span across individual, group, and context and may include personality, motivation, anxiety, team cohesion, group dynamics, as well as psychological skills training areas such as confidence, imagery, arousal regulation, goal-setting, and concentration. Students will synthesize material and design appropriate applications to sport and exercise settings.

This course will explore the many psychological mechanisms that play a part in close personal relationships. Using psychological research as our foundation, students will be led in discussions and about attraction, love, lust, and other topics pertinent to close relationships. Students will be asked to think deeply about the social constructs that influence human preferences, and the biopsychosocial processes at play. The course will begin by dissecting the concepts of attraction and love. Once a basis for understanding these fundamental concepts is established, we will progress into discussions about attachment theory and interpersonal dynamics such as jealousy, power, stigmatization, and communication. All matter of relationships (interpersonal, homosexual, asexual, heterosexual, polyamorous, etc.) will be discussed across topics. Lastly, we will finish the course discussing the portrayal of sex in the media and online, and its implications on sex education and sexual understanding.

**PSYC336901**

**Understanding the Social World: Social Cognition in Humans and Other Animals**

**Ahl, Richard**

**Fall 2023**

This course will address the puzzle of how we make sense of our social world by focusing on questions such as: how do we carve our world into meaningful social groups, understand what others are thinking and maintain productive cooperative relationships? These questions will be tackled using both developmental and comparative approaches, with the goal of understanding how social cognition takes shape over childhood and what aspects of human social cognition are shared with other animals.

**Credits:** 3

**Satisfies Core Requirement:** None

**Prerequisites:** PSYC2241
PSYC337001  
Nudge Psychology  
Bernhard, Regan

Fall 2023
Small changes in our environments can have big impacts on our behavior. For example, in one hospital in London, simply changing the wording used to remind patients of upcoming appointments dropped the missed appointment rate so dramatically the hospital saved millions of dollars. In this course we will study the power of nudges, subtle but powerful changes in the environment that can counteract behavioral biases and encourage better decision-making. We will start with learning about dual-systems models of cognition and then explore how these systems interact to make us vulnerable to bias, heuristics, jumping to conclusions, and erroneous decision-making. Finally, we will investigate how nudges have been leveraged to positively influence behavior and improve social systems.

Credits: 3

Room and Schedule: Fulton Hall 117 TuTh 09:00AM-10:15AM

Satisfies Core Requirement: None

Prerequisites: PSYC1110 or PSYC1111

This course examines how human language and communication can be affected by neurological disorders, predominantly acquired brain injury. Specific topics include, among others, deficits producing and understanding words, sentences, discourse, and speech prosody. There is also some coverage of historical themes, neurology, neuropsychology, treatment approaches (speech-language pathology), recovery, and assessment. Thus, the course reflects both clinical and research perspectives. The emphasis is on adults rather than children. Class sessions will be devoted to lecture, discussion, and student presentations. Class attendance is important.

**PSYC338101**  
**Psychobiology of Emotional Learning**  
**Cole, Sindy**  
**Fall 2023**  
This course will introduce students to research and theory in regards to the psychobiology of emotional learning and behavior. Behavioral experiments demonstrating basic concepts in emotional learning will be described, as well as experiments aimed at determining the neural circuits which govern this learning and behavior. Additional coursework will explore the role of both developmental factors and sex differences in emotional learning. Most of the findings presented will be from non-human animal research, but some human studies will be highlighted.

PSYC338301
Neurobiological Basis of Learning and Memory
Foilb, Allison R
Fall 2023
This course will explore the neural mechanisms that underpin basic processes of learning and memory. We will investigate both systems-level neuroscience (e.g., What do the hippocampus, amygdala, VTA, etc. actually do?), as well a more molecular view of the role of specific intracellular processes in producing changes in synaptic connections. The molecular focus of the course will comprise a detailed investigation of long-term potentiation (LTP), and its relation to endogenous memory processes. Systems-level topics will focus on fundamental associative and non-associative learning phenomena in non-human animal models.

Credits: 3

PSYC338701
Behavioral Neuroendocrinology: Sex, Love, and Aggression
Cole, Sindy
Fall 2023
This course is an introduction to the field of behavioral neuroendocrinology, which explores the relationship between hormones, the brain, and behavior, in humans and non-human animals. The course will cover the basics of hormonal systems, including how hormones are synthesized and released, and how they interact with target cells. We will also explore the role of hormones in various behaviors, including reproduction, parental behavior, aggression, stress responses, and the role of hormones in affective disorders.

**PSYC339101**  
**Ethical Controversies in Psychology and Neuroscience**  
**Weidman, Nadine**  
**Fall 2023**  
Can fMRI machines really "see" your thoughts? Should our brains or our free will be held responsible for our behavior? Should psychotropic drugs be used for neural enhancement, or only to treat illness? Psychology and neuroscience raise a host of ethical controversies--from claims to peer into the privacy of the mind, to applications in the courtroom, to treatment of experimental subjects. Rather than determining the "right" answers, this course explores the scientific, political, social, moral, and religious values these debates involve. Readings include works by scientists, philosophers, historians, theologians, and ethicists. Students enact the roles of stakeholders in in-class debates.

**Credits:** 3

PSYC339501
Novel Technologies in Neuroscience
Kilic, Kivilcim
Fall 2023
This course will introduce students to the new and emerging techniques and technological developments used in neuroscience research. The effect of wide spectrum of techniques on the scientific projects will be explored and future probable application will be discussed. The course will also cover the workflow in multidisciplinary settings. During the course, we will also read and discuss some recent research articles using these techniques, and their application to human and non-human subjects.

PSYC339701
Cognitive and Neural Bases of Person Knowledge
Anzellotti, Stefano
Fall 2023
This course is discusses how people acquire knowledge about others. The first part of the course focuses on the perceptual mechanisms involved in the recognition of other agents, their identity, their facial expressions, and their actions. The second part of the course covers how these perceptual "ingredients" are used to make inferences about other people's mental states (i.e., their emotions), their beliefs, their goals, and their traits. During the course, we will read and discuss recent research articles, and explore how different types of evidence and different methods can be used to constrain theories of cognition and of the brain.

**Research Practicum in Sport and Exercise Psychology**

**Moore, Kristina**

**Fall 2023**

This course introduces students to research in sport and exercise psychology. Course content will focus on the various methods used to study psychosocial aspects of sport, exercise, and physical activity. Students will become familiar with quantitative and qualitative methods by examining current research in the field and participating in hands-on, collaborative research assignments. Students will also choose a topic related to course content, conduct a literature review, design a study, collect and analyze data, write a scientific paper in APA style, and present their findings.

**Credits:** 3

**Room and Schedule:** O'Neill Library 246 F 01:30PM-04:00PM

**Satisfies Core Requirement:** None

**Prerequisites:** PSYC1120

PSYC410101
Research Practicum in Human and Artificial Intelligence
Anzellotti, Stefano
Fall 2023
This course is a practical introduction to the convergence between psychology, neuroscience, and artificial intelligence. Ideas from psychology and neuroscience have inspired the development of artificial neural networks. Their current instantiations, deep neural networks, are having a profound impact on computer science and society, but also on the study of the brain and cognition. This course starts with a brief introduction to the roots of artificial intelligence in psychology and neuroscience, followed by a brief, accessible introduction to the mathematical foundations of deep neural networks. In the remainder of the course, students will learn to use python and pytorch and will work in groups to implement and train deep neural networks to build models of behavior or of the brain. Prior experience with computer programming is highly recommended; students with no experience in programming are encouraged to meet the instructor before enrolling.

**PSYC417701**  
**Research Practicum in Cognitive Neuroscience**  
**Thakral, Preston P**  
**Fall 2023**  
This course introduces students to the research process in the cognitive psychology of memory. Research in memory examines how people encode and retrieve information (e.g., personal experiential information and world knowledge). Topics will include implicit memory, explicit memory, semantic memory, and working memory. Class readings will come from journal articles. Students will analyze these articles and lead class discussions. The ultimate goal is to have students propose a novel study and possibly carry out a research project. This will entail reviewing the relevant literature, identifying a novel research question, designing an experiment, interpreting results, and writing up the experiment in publication format.

PSYC443601
Clinical Fieldwork in Psychology
Rosen, Karen
Fall 2023
Seniors only. Priority will be given to students who are in the Clinical Concentration. This course will provide students with an opportunity to integrate theoretical and empirical work in clinical psychology with the real-life experience of working in a clinical setting. Students will select, together with the professor, a field placement (e.g., hospital, community clinic, day treatment center, shelter, emergency hot line, preschool classroom, prison). Students' work in the field will involve at least eight hours per week with weekly, on-site supervision. Weekly class meetings will focus on the discussion of issues relevant to the direct application of mental health services to child, adolescent, and adult patients.

PSYC444601
Social Neuroscience
Young, Liane L
Fall 2023
Human beings are fundamentally social creatures. In this seminar, we will examine topics explored in classic and contemporary social psychology using the tools of neuroscience, such as functional neuroimaging and transcranial magnetic stimulation. Sample topics: social connection and rejection; conforming to crowds and obeying authority; dehumanization and objectification; stereotypes and group membership; first impressions and social expectations; prosocial behavior; sacred values; self-control; the future self.

For students in the Honors Program writing a thesis. All Honors Program students write a thesis during the senior year. In most cases, the thesis involves original empirical research, although theoretical papers may be permitted in exceptional instances. Honors students are encouraged to take an Independent Study with a prospective thesis advisor during the junior year, to develop a thesis proposal. The designation "Graduated with Departmental Honors" will be granted by the Honors Program Committee upon successful completion of the Honors Program requirements and the final evaluation of the thesis. Registration requires the Syllabus/Contract form on the department's Academic Opportunities page.

**Credits:** 3

**Room and Schedule:** BY ARRANGEMENT

PSYC550101

Experimental Design and Statistics
Magnus, Brooke E
Fall 2023
This course focuses on experimental design and related statistical methods. It covers between-subject, within-subject, and mixed designs with one and two factors. Statistical topics include the relevant statistical model and model assumptions, omnibus test, test of contrasts, multiple comparison, effect size, and power calculations. One and two sample t tests will also be revisited. If time permits, advanced topics such as designs with nested factors or random factors, mixed model approach, and nonparametric approach may also be covered.

Credits: 3
Room and Schedule: Mcguinn Hall 303 TuTh 10:30AM-11:45AM
Satisfies Core Requirement: None
Prerequisites: An undergraduate course in statistics
Corequisites: None
Cross-listed with: None
Frequency: Annually

PSYC554201
Theories of Human Emotion
Russell, James
Fall 2023
This seminar covers the major psychological theories of human emotion, beginning with the classic writings of William James and continuing to contemporary controversies about the nature of emotion. Some of the questions to be considered are whether or not there are basic emotions, the relation of emotion to cognition and action, and whether emotions are innate or learned through our particular culture. The focus is on biological, social, and cultural subdisciplines of psychology, but contributions of anthropology, philosophy, and other disciplines will be discussed as well.

**Credits:** 3  
**Room and Schedule:** Mcguinn Hall 303 F 10:00AM-12:30PM  
**Satisfies Core Requirement:** None  
**Prerequisites:** A 3000-level Psychology course  
**Corequisites:** None

**PSYC556501**  
**Origins of Virtue**  
**McAuliffe, Katherine J**  
**Fall 2023**  
Drawing on experimental work with adults, children, and animals, this graduate seminar will explore the origins of virtue. This course is discussion-based and reading/writing intensive. Each meeting will focus on the origins of a different virtue such as justice, honesty, trustworthiness, and loyalty. Students will gain familiarity with evolutionary and developmental perspectives on virtue, will have a chance to develop their own empirical approaches to the study of virtue, and will have a chance to lead class discussions.

**Credits:** 3  
**Room and Schedule:** Mcguinn Hall 332 M 09:30AM-12:00 Noon  
**Satisfies Core Requirement:** None  
**Prerequisites:** PSYC2260

PSYC558701
Cellular Perspectives on Motivated Behavior
McDannald, Michael A
Fall 2023
The goal of the course is to describe how changes in activity and the composition of single cells contribute to motivated behavior. Behaviors to be covered include but are not limited to: fear and anxiety, reward learning, addiction, feeding, pair bonding, and aging. The bulk of the reading and lecture materials will come from the primary literature and an extensive neuroscience background is required. As such this course is targeted for graduate students and only the exceptional undergraduate.

Credits: 3
Room and Schedule: Mcguinn Hall 332 W 09:30AM-12:00 Noon
Satisfies Core Requirement: None
Prerequisites: PSYC2285 and at least two 3000-level courses in the Systems Neuroscience cluster.

PSYC650101
Graduate Programming Lab
Byrne, Molly
Fall 2023
The course provides an introduction to MATLAB. Students will learn how to program in MATLAB, and how to use MATLAB for research in psychology. Students will develop a programming mindset by learning and exercising programming tasks, e.g., manage the data, manipulate the variables, plot the data, make graphs and tables, and conduct statistical analysis.

Credits: 1
Room and Schedule: Mcguinn Hall 332 Tu 03:00PM-04:50PM
PSYC650201
Introduction to Multilevel Modeling
Ryu, Ehri
Fall 2023
The course introduces multilevel analysis and commonly used statistical models. The course begins by providing overall background including what are multilevel data, why multilevel modeling is needed, and how to properly report descriptive statistics for multilevel data. The remainder of the course presents commonly used multilevel models with illustrations using empirical data. R packages will be used. The course will focus on models with linear effects. Students are expected to be familiar with general linear models or multiple regression analysis.

PSYC650401
Analysis of Repeated Measures and Longitudinal Data
Ryu, Ehri
Fall 2023
This course provides an application-oriented introduction to the analysis of repeated measures and longitudinal data. It will be assumed that students are familiar with general linear model or multiple regression analysis. The course will cover the following topics: repeated measures and longitudinal data, data structure, graphical procedures, within-subject analysis of variance, mixed analysis of variance, linear mixed models, and structural equation models for longitudinal data. R packages and Stata will be used.

**Credits:** 1

PSYC112002
Introduction to Behavioral Statistics and Research I
MacEvoy, Sean P
Spring 2024
This course introduces surveying research methodologies and statistical procedures, with an emphasis on statistics. Students will be introduced to the most common topics and procedures in descriptive and inferential statistics.

Credits: 0
Room and Schedule: Gasson Hall 205 W 03:00PM-03:50PM
PSYC112101
Introduction to Behavioral Statistics and Research II
Magnus, Brooke E
Spring 2024
As the second course in PSYC1120-1121 sequence, this course covers one-way and factorial ANOVA, correlation and regression, within subject ANOVA, analysis of contingency tables and nonparametric methods. If time permits, logistic regression will be covered.

Credits: 3
Room and Schedule: Gasson Hall 202 TuTh 09:00AM-10:15AM

**PSYC220201**

**Introduction to Social Work**

**Ryan, Sarah E**

**Spring 2024**

This is a Social Work course available to undergraduate students Starting with a discussion of its history and the relevance of values and ethics to its practice, the course takes up the various social work methods of dealing with individuals, groups, and communities and their problems. In addition to a discussion of the theories of human behavior that apply to social work interventions, the course examines the current policies and programs, issues, and trends of the major settings in which social work is practiced.

PSYC220501
Undergraduate Research
Anzellotti, Stefano
Spring 2024
An opportunity to participate in research projects in the laboratory of a faculty member. Students are typically assigned to assist with a specific experiment contributing to the laboratory's overall goals. This is the most typical type of undergraduate research course experience in our department. Students may work with researchers at other area universities and hospitals. The work must be relevant to psychology/neuroscience. While primary supervision of the research will be provided by the laboratory PI, a Boston College Department of Psychology and Neuroscience faculty member must agree to serve as the instructor of record for the course. Students are encouraged to obtain permission of the instructor before they register for their other courses, so that they may keep open the time slot for the laboratory meetings associated with the laboratory. Registration requires the Syllabus/Contract form on the department's Academic Opportunities page.

Spring 2024
An opportunity to participate in research projects in the laboratory of a faculty member. Students are typically assigned to assist with a specific experiment contributing to the laboratory's overall goals. This is the most typical type of undergraduate research course experience in our department. Students may work with researchers at other area universities and hospitals. The work must be relevant to psychology/neuroscience. While primary supervision of the research will be provided by the laboratory PI, a Boston College Department of Psychology and Neuroscience faculty member must agree to serve as the instructor of record for the course. Students are encouraged to obtain permission of the instructor before they register for their other courses, so that they may keep open the time slot for the laboratory meetings associated with the laboratory. Registration requires the Syllabus/Contract form on the department's Academic Opportunities page.

**Spring 2024**

This course offers students the opportunity to study a topic of personal interest, working independently under the supervision of a faculty member within the Psychology Department. The instructor, working with the student, decides on the nature of readings and related activities involved as well as the precise form of scholarly work required. A student may obtain the consent of a faculty member to serve as his or her instructor by contacting the faculty member directly. Registration requires the Syllabus/Contract form on the department's Academic Opportunities page.

PSYC224201
Personality Theories
Russell, James
Spring 2024
Does personality make us who we are? Whether selecting a mate, voting for a president, or understanding ourselves, we want and need to know about personality. In this course we consider how personality can be measured, how well it predicts behavior, what shapes our personality, and whether personality can be changed.

PSYC224501
Psychology of Motivation
Moore, Kristina
Spring 2024
Understanding human motivation extends beyond instincts, drives, needs, and rewards. This course explores motivation from multiple lenses including biological, cognitive, social, and developmental approaches. Students will examine psychological theories and principles of motivation from biological motives like hunger, thirst, and pleasure to more contemporary social-cognitive views involving self-efficacy, self-determination, competence and control, attribution, and achievement goal theories. Students will consider applications to relevant contexts including the classroom, the workplace, social relationships, and performance.

PSYC225001
Cultural Psychology
Zimbler, Mattitiyahu
Spring 2024
Cultural Psychology involves the study of how psychological processes differ (or are similar) across cultures and groups of people. Central to Cultural Psychology is the idea that one can't separate the self from one's cultural context, and that these entities mutually shape one another. This course explores how culture affects a person's experience of psychological concepts such as morality, perception, acculturation, and motivation. We will investigate how certain identities, such as age, gender, class, and ethnicity, inform one's experience of self and society. Additionally, this course will look at when psychological findings are generalizable, considering the variety of human experiences that are shaped by specific cultural constructs.

PSYC226201
Baby Talk
Hartshorne, Joshua K
Spring 2024
Children have an instinct for language. Every typically developing child learns language—something neither our most powerful machines nor smartest non-human animals can do. Even adults do not learn language as quickly or successfully as children. If not exposed to a language, children will invent one. In this course, we try to understand how children learn language, why animals, machines, and adults have so much difficulty learning language, and what the answers to these questions say about what it means to be human. This course takes an interdisciplinary approach to the problem, drawing on psychology, linguistics, anthropology, animal behavior, and other fields.

PSYC227401
Sensation and Perception
MacEvoy, Sean P
Spring 2024
How do our senses tell us what is really in the world around us, and can our senses be trusted? These questions have been pondered by philosophers for centuries, and more recently by psychologists and neuroscientists. This course will explore the anatomical/biological basis of sensation (how the world that we perceive is translated into the raw language of the nervous system) and the cognitive processes underlying perception (how our brains reconstruct the physical world from these neural inputs). We will examine these questions for vision, hearing, touch, smell, and taste.

Credits: 3
Room and Schedule: Gasson Hall 206 TuTh 10:30AM-11:45AM
PSYC228501  
Behavioral Neuroscience  
McDannald, Michael A  
Spring 2024  
This course presents an introduction to the physiological basis of behavior. Basic neuroanatomy and neurophysiology are presented, and the following topics are then discussed: neuropharmacology, psychopharmacology, and the biological bases of mental illness; brain mechanisms of reward and reinforcement; hormones and behavior; an introduction to the development of the nervous system; brain mechanisms of learning and memory; and brain mechanisms of emotion.

PSYC331701  
Topics in Computational Intelligence: Biomedical Image Analysis  
Wei, Donglai  
Spring 2024
This course presents both the traditional and the cutting-edge deep-learning-based image processing algorithms with particular emphasis on problems in biomedical research. It covers image acquisition, visualization, filtering, enhancement, registration, classification, segmentation and detection. The course goal is to provide hands-on coding experience for motivated undergraduates and first year PSYC/BIO graduate students in a wide range of image modalities with various popular computational tools. Besides lectures, it has weekly labs in python using Colab and one final project. Topics in Comp Intell: Biomedical Image Analysis

PSYC332701
Psychology of Prejudice and Discrimination
Zimbler, Mattitiyahu
Spring 2024
This course focuses on the social psychology of stereotyping, prejudice, and discrimination. In other words, we will examine beliefs about members of social groups (stereotypes), evaluations of group members (prejudice), and behaviors towards members of social groups based on their group membership (discrimination). Also we will study how these issues shape the experiences of social group members, especially when they are members of low-status and/or minority groups. Rather than relying on anecdotal evidence, we will examine theories of stereotyping, prejudice, and discrimination through empirical research findings.

PSYC332901
Psychophysiology of Stress
Ivkovic, Vladimir
Spring 2024
This course explores the psychological and physiological factors underlying stress, including basic principles of psychophysiology and fundamental concepts of stress. Topics include emotion, motivation, multitasking, attention, arousal, and distraction. Physiological mechanisms underlying stress will be examined relative to health and abnormal behaviors, such as addictions, mood disorders, and violence. Students will be instructed in methods of stress control, including cognitive behavioral techniques and meditation.

PSYC333101
Developmental Psychopathology
Tishelman, Amy C
Spring 2024
This course provides an introduction to the field of developmental psychopathology, an area of psychology that combines the topics of developmental and abnormal psychology in order to facilitate an understanding of maladaptive behavior within a developmental framework. Course material emphasizes how aspects of development bear upon the subsequent adaptation of an individual and will generate an appreciation of normal and pathological behavior in the context of the individual, his or her developmental history, and current conditions. Examples of specific topics include the developmental impact of parent-child attachment, child maltreatment, peer relationships, and resilience in development.

**PSYC334501**  
**Social Motivation**  
**Zimbler, Mattitiyahu**  
**Spring 2024**  
How do other people affect our motivation to act? Psychology has given too much emphasis to extrinsic rewards and too little to the ways in which our relationships with others determine our choices, feelings, and thoughts. Many of our behaviors are motivated primarily by our relationships with others. In this course we will explore the influence of others on our behavior. Topics to be considered include kindness and cruelty, cooperation and competition, and conformity and rebellion.

PSYC335301
Culture and Emotions
Russell, James
Spring 2024
The course is devoted to major psychological perspectives on emotion (such as cognitive and social psychological) both historic and contemporary, with an emphasis on how culture enters into the theory. The second part of the course focuses on ethnographies and other evidence on the possible roles of culture in emotion. Specific topics to be covered include universal recognition of emotion from facial expression, role of language in emotion, feeling rules, emotion scripts, and the development of children's understanding of emotion.

PSYC336201
Mind of a Dog: How Canine Cognition Informs Human Psychology
Johnston, Angela M
Spring 2024
This course explores intelligence and cognitive processes across a variety of animal species, including humans. It addresses such questions as, do chimpanzees lie? Can dolphins count? What makes us uniquely human? Topics include mental representation, memory, tool use, counting, problem-solving, self-awareness, social knowledge, and communication/language. For each area, we will examine the evidence from both wild and laboratory settings, continually returning to the questions of what such knowledge tells us about non-human animals, and how this knowledge informs our theories of human cognition.

**PSYC336401**  
**Poverty and Neurodevelopment**  
**Bernhard, Regan**  
**Spring 2024**  
A growing body of research shows that poverty shapes the way children's brains develop. Children who grow up in low-income households show reduced gray matter in parts of the brain essential for memory, planning, and decision-making. However, simple interventions, like providing low-income mothers with a small monthly supplementary income, can dramatically mitigate these effects. How does poverty change the brain, and why do interventions like these help? In this class we will investigate the effects of poverty on the developing brain, focusing on understanding the physiological mechanisms involved. We will also learn about existing interventions, study their efficacy, and explore possible future interventions.

**Credits:** 3  
**Room and Schedule:** 245 Beacon Street Room 107 TuTh 09:00AM-10:15AM  
**Satisfies Core Requirement:** None  
**Prerequisites:** PSYC1110

In this course, we will explore developmental changes in social and emotional functioning from birth through adolescence. We will study the beginning of emotion expression and the emergence of attachment relationships, the development of emotional regulation, and the socialization of children during infancy. We will then continue to examine emotional changes and social development through toddlerhood, early childhood, middle childhood, and adolescence. The influences of parents, siblings, peers, and caregivers will be examined, as will the issues of individual differences, stability and change, and coherence of development across contexts and over time.

**Credits:** 3

**Room and Schedule:** Gasson Hall 203 TuTh 01:30PM-02:45PM

**Satisfies Core Requirement:** None

**Prerequisites:** PSYC2260

**Corequisites:** None

**Cross-listed with:** None
Small changes in our environments can have big impacts on our behavior. For example, in one hospital in London, simply changing the wording used to remind patients of upcoming appointments dropped the missed appointment rate so dramatically the hospital saved millions of dollars. In this course we will study the power of nudges, subtle but powerful changes in the environment that can counteract behavioral biases and encourage better decision-making. We will start with learning about dual-systems models of cognition and then explore how these systems interact to make us vulnerable to bias, heuristics, jumping to conclusions, and erroneous decision-making. Finally, we will investigate how nudges have been leveraged to positively influence behavior and improve social systems.

**PSYC337601**  
**Building Brains: Topics in Developmental Neuroscience**  
**Cole, Sindy**  
**Spring 2024**

Developmental neuroscience refers to the study of the cellular and molecular events underlying the emergence of the nervous system during embryonic development and beyond. This course covers the principles governing the development of the nervous system including induction, neurogenesis, cell migration, differentiation, axonal guidance, synaptogenesis, and experience dependent development of the nervous system. We will also examine how early life experience influences development, and the consequences of disrupted neural development.

**Credits:** 3  
**Room and Schedule:** 245 Beacon Street Room 214 MWF 10:00AM-10:50AM  
**Satisfies Core Requirement:** None  
**Prerequisites:** PSYC2285  
**Corequisites:** None  
**Cross-listed with:** None
The action potential is fundamental to information processing in the brain. Neurons fire action potentials in response to a variety of inputs and action potentials exist in many different shapes, sizes and frequencies. In this course we will begin with a study of ion channels, the membrane bound biochemical switches that give the action potential its shape. Then we will explore the numerous factors that influence the nature of an individual action potential: neuronal morphology, ion channel composition, and intracellular signaling cascades. We will conclude by considering how circuits of diverse neuronal phenotypes integrate synaptic signals, which give rise to sophisticated information processing, learning and memory, and psychiatric disease. Student projects will explore how ion channel abnormalities, so-called "channelopathies," influence cognition and behavior.

**Credits:** 3

**PSYC338701**  
**Behavioral Neuroendocrinology: Sex, Love, and Aggression**  
**Cole, Sindy**  
**Spring 2024**  
This course is an introduction to the field of behavioral neuroendocrinology, which explores the relationship between hormones, the brain, and behavior, in humans and non-human animals. The course will cover the basics of hormonal systems, including how hormones are synthesized and released, and how they interact with target cells. We will also explore the role of hormones in various behaviors, including reproduction, parental behavior, aggression, stress responses, and the role of hormones in affective disorders.

PSYC339301
Neuroscience of Pain
Mott, Devin
Spring 2024
This course explores the neuroscience of both acute and chronic pain. Topics include nociceptive and sensory systems, molecular basis and modulation of pain, neuroanatomy of peripheral and central pain circuits, pain pathologies, and pharmacological and non-pharmacological treatments. This course will be exploring pain through a bio-psychosocial approach looking at the interaction of environment and pain perception.

PSYC404101
Research Practicum in Sport and Exercise Psychology
Moore, Kristina
Spring 2024
This course introduces students to research in sport and exercise psychology. Course content will focus on the various methods used to study psychosocial aspects of sport, exercise, and physical activity. Students will become familiar with quantitative and qualitative methods by examining current research in the field and participating in hands-on, collaborative research assignments. Students will also choose a topic related to course content, conduct a literature review, design a study, collect and analyze data, write a scientific paper in APA style, and present their findings.

Credits: 3
Room and Schedule: O’Neill Library 254 Tu 01:30PM-04:00PM
Satisfies Core Requirement: None
Prerequisites: PSYC1120
PSYC404301
Research Practicum in Social and Cognitive Methods
Heberlein, Andrea S
Spring 2024
This course explores how questions are asked and answered in social and cognitive psychology, focusing on discussions of articles and the conduction of a series of research projects and demonstrations. We will cover topics including research ethics, constructing experimental variables, experiment design, a few specific types of methods and their uses/constraints, and how to write an APA-style research report.

This course is designed to serve as an overview of the research methods used in the study of Developmental Psychology. Over the course of the semester, you will become comfortable with all aspects of the scientific method. While completing a semester long research project proposal, you will learn to identify research questions, design a thoughtful scientific study, and propose statistical analyses. Students will gain experience reading, analyzing, and critiquing current research in developmental psychology. By the end of course, you will be familiar with the different methods used in developmental research and become critical consumers of research in this area.

**PSYC406501**  
**Research Practicum in Developmental Social Psychology**  
**McLaughlin, Abigail**  
**Spring 2024**  
This course introduces students to topics and research methods in developmental social psychology. Key topic areas will include moral evaluation and intervention, fairness, stereotyping and bias, intergroup cognition, and inequality. The primary goal of this course is to teach students how to develop research questions, critically evaluate published articles, synthesize concepts across research domains, and build research skills. Students will learn relevant research methods and statistical analyses in R Studio and will apply these skills to complete a final research project using existing developmental psychology data.

**Credits:** 3  
**Room and Schedule:** Mcguinn Hall 303 Th 01:30PM-04:00PM

PSYC417001
Research Practicum in Cognitive Psychology
Brownell, Hiram H
Spring 2024
This course introduces students to the research process in cognitive psychology and cognitive neuroscience. The semester starts with a review of experimental design, common paradigms, statistical analysis, critical reading of journal articles, and ethics. Then, students work individually or in small groups to carry out a research project in an area of language or cognition that relates to cognitive neuroscience. Possible research topics are discussed in class. The research project entails reviewing the psychological and neuroscientific literature, identifying an appropriate research topic, designing and carrying out an empirical study, and evaluating and communicating the results.

PSYC417701
Research Practicum in Cognitive Neuroscience
Thakral, Preston P
Spring 2024
This course introduces students to the research process in the cognitive psychology of memory. Research in memory examines how people encode and retrieve information (e.g., personal experiential information and world knowledge). Topics will include implicit memory, explicit memory, semantic memory, and working memory. Class readings will come from journal articles. Students will analyze these articles and lead class discussions. The ultimate goal is to have students propose a novel study and possibly carry out a research project. This will entail reviewing the relevant literature, identifying a novel research question, designing an experiment, interpreting results, and writing up the experiment in publication format.

PSYC443601
Clinical Fieldwork in Psychology
Rosen, Karen
Spring 2024
Seniors only. Priority will be given to students who are in the Clinical Concentration. This course will provide students with an opportunity to integrate theoretical and empirical work in clinical psychology with the real-life experience of working in a clinical setting. Students will select, together with the professor, a field placement (e.g., hospital, community clinic, day treatment center, shelter, emergency hot line, preschool classroom, prison). Students' work in the field will involve at least eight hours per week with weekly, on-site supervision. Weekly class meetings will focus on the discussion of issues relevant to the direct application of mental health services to child, adolescent, and adult patients.

**PSYC557601**  
**Methods in Human Brain Mapping**  
**Slotnick, Scott**  
**Spring 2024**  
For over a century, human brain mapping has been conducted by correlating lesion location with impaired behavior. In the last two decades, functional magnetic resonance imaging (fMRI)--a noninvasive neuroimaging technique with excellent spatial resolution--has given rise to an explosion of knowledge regarding the role of specific brain regions in particular types of cognitive processing (such as shifting attention or memory retrieval). This course provides an in-depth examination of fMRI by reviewing the physical basis of the fMRI signal and its relation to neural activity in addition to considering issues of experimental design and data analysis.

PSYC558501
Advanced Brain Systems: Motivation and Emotion
Petrovich, Gorica D
Spring 2024
This course will review the organization of neural networks that control motivated and emotional behaviors in mammals. This is a functional neuroanatomy course that will discuss how the brain regions are interconnected to form functional systems.

**RLRL332001**  
**From Sappho to Stonewall Landmarks of Gay History**  
**Mormando, Franco A**  
**Fall 2023**  
An introductory survey of some of the most important moments, figures, debates, and texts in the history of same-sex desire and behavior in the West (Europe and the USA). The course will span the centuries from classical antiquity all the way to, and including, the watershed event of the NYC Stonewall Uprising of 1969, often seen as marking the effective launch of the modern gay rights movement. We will chart the ever-evolving understanding of same-sex desire and behavior on the part of both legal, medical, and religious authorities as well as the private individuals living that reality. Also examined will be the justifications given by church and state for the persecution of gay people over the centuries, as well as the attempts by gay people to fight against that persecution. Our evidence will embrace a wide variety of primary sources, both textual and visual (film and art).

Modern Middle Eastern and Arabic Literature (in translation)
Mouhib, Abdelkrim

Spring 2024

All works are read in English translation. The complex, multicultural nature of the Middle East by surveying the twentieth-century literature of Arabic-speaking lands, Israel, and Turkey. Identity, culture, religion, nationalism, conflict, and minority narratives. Arabic works: the writings of Adonis, Darwish, and Qabbani. Hebrew works: the writings of Amichai and Bialik. Works written in French, English, Kurdish, Syriac, Turkish, and various Middle Eastern dialects: the writings of Andree Chedid, Mario Levi, Charles Corm, Louis Awad, Said Akl, and Orhan Pamuk.

SLAV188101
Introduction to Bulgarian I
Dakova, Mariela
Fall 2023
A course for beginners in standard modern Bulgarian intended to develop reading, writing, and speaking abilities as well as to introduce students to Bulgarian culture. The study of language structure is based on comparisons with English and Slavic languages. The course provides a basis for further work in translation and composition and continues in the second semester as SLAV1882 (SL036).

Credits: 3
Room and Schedule: Stokes Hall 103N MWF 10:00AM-10:50AM
Satisfies Core Requirement: None
Prerequisites: None
SLAV206501  
Society and National Identity in the Balkans  
Dakova, Mariela  
Fall 2023
An overview of ethnic, cultural, and religious diversity among peoples of the Balkans (Albanians, Bosnians, Bulgarians, Croats, Greeks, Macedonians, Romanians, Serbs, Slovenes, Jews, Turks, and gypsies [Roma]). It is a study of what constitutes the various parameters of identity: linguistic typologies, religious diversity (Catholicism, Orthodoxy, Islam, and Judaism), culture, and social class. An analysis of the origins of nationalism, the emergence of nation-states, and contemporary nationalism as a source of instability and war in the Balkans will be considered.

Credits: 3  
Room and Schedule: Stokes Hall 103S MWF 12:00 Noon-12:50PM  
Satisfies Core Requirement: Cultural Diversity  
Prerequisites: None  
Corequisites: None  
Cross-listed with: SOCY2280

SLAV606001
Holocaust Literature: History, Memory, Legacy
Shrayer, Maxim
Fall 2023
An overview of the history and legacy of the Shoah (Holocaust) followed by an examination of the variety of literary responses by literary witnesses and survivors, as well as by writers removed from the wartime horrors by distance, time, country, and language. Questions of metaphysics, ideology, ethics, aesthetics, memory, and cultural theory as formulated and debated in poetry, fiction, nonfiction, and discursive writings. The readings include works originally written in Russian, Yiddish, Polish, German, Italian, French, and English by Ilya Selvinsky, Vasily Grossman, Ilya Ehrenburg, Avrom Sutzkever, Tadeusz Borowski, Paul Celan, Primo Levi, Theodor Adorno, Elie Wiesel, Vladimir Nabokov, Hannah Arendt, Arthur Miller, W. G. Sebald and others. All the required readings will be in English translation.

Credits: 3
Room and Schedule: Lyons Hall 208 TuTh 03:00PM-04:15PM

SLAV216901
Introduction to Slavic Peoples and Cultures
Lin, Tony H
Spring 2024
Introduction to Slavic Peoples and Cultures (formerly Slavic Civilizations) is a gateway course that satisfies the Cultural Diversity core and is required for both Russian and Slavic majors. The course is designed to familiarize students with major topics, such as languages and religions in Eastern Europe, and the formation of nation states and identities. Special attention will be paid to major events in Slavic cultural history, from the appearance of Slavs in history to the rise and fall of the Soviet Union and Yugoslavia. We will study these events not only through literary texts but also works of art, music, and film. The course is taught entirely in English with no prerequisites.

Credits: 3
Room and Schedule: Lyons Hall 315 MWF 10:00AM-10:50AM
Satisfies Core Requirement: Cultural Diversity

SLAV218001
From Russia with Love: Russian Musical and Visual Culture
Lin, Tony H
Spring 2024
In this interdisciplinary course, students will become familiar with sounds and images that represent Russia's contribution to world culture and Russians live by, such as symphonies by Tchaikovsky and Shostakovich as well as paintings by Repin and Chagall. We will consider the artists' aesthetic convictions in the context of several important artistic movements (e.g., Romanticism, the Avant-Garde, and Socialist Realism). The class will take a trip to the Boston Symphony Orchestra, and each student will design a final project, which can be creative or performative. Formal musical training and/or the ability to read music, while helpful, are not prerequisites for the course.

Credits: 3
Room and Schedule: Devlin Hall 112 MWF 09:00AM-09:50AM
Satisfies Core Requirement: Arts

Sociology Courses: Summer 2023

SOCY100101
Introductory Sociology
Parry, Ashley
Summer 2023
Offered every semester. Do not take SOCY1001 if you have already taken SOCY1002. Only one of these courses will count toward the major or minor. This course conveys a sense of the history of sociology and introduces students to the most essential concepts, ideas, theories, and methods of the discipline. Special topics may include interaction in everyday life, sociology of the family, gender roles, race and ethnic relations, and the sociology of work, among others. We will deal with fundamental questions about what it means to be a human being living in a society at a given moment in history. Ordinarily, SOCY1001.01 is reserved for majors and minors. Note that Introductory Sociology is taught by different instructors; check each instructor's syllabus for a more exact description.

SOCY103001
Deviance and Social Control
Uyan, Deniz
Summer 2023
This course explores the social construction of boundaries between the "normal" and the so-called "deviant." It examines the struggle between powerful forms of social control and what these exclude, silence, or marginalize. Of particular concern is the relationship between dominant forms of religious, legal, and medical social control and gendered, racialized, and global economic structures of power. The course provides an in-depth historical analysis of theoretical perspectives used to explain, study, and control deviance, as well as ethical-political inquiry into such matters as religious excess, crime, madness, corporate and governmental wrong-doing, and sexual subcultures that resist dominant social norms.

SOCY356201
Environmental Sociology I
Thombs, Ryan P
Summer 2023
This is an upper-division seminar that provides an overview of theoretical and empirical work in environmental sociology. After a brief introduction to the origins of the field, the seminar will cover topics that are representative of what is current in the area, especially bodies of empirical research that are national, international, and global in scope, and with particular attention given to how large-scale social institutions and organizational forms impact the environment. We will focus on the social dimensions of environmental impacts, the anthropogenic drivers of environmental impacts, and sociological research on solutions to environmental crises. A key takeaway of the course is the necessity in taking a structural approach to the study of socioenvironmental relationships. Attention will also be given to how environmental sociology makes fundamental contributions to interdisciplinary research in environmental studies and sustainability science. The course is required for all Environmental Studies majors.

**Credits:** 3

Offered every semester. Do not take SOCY1001 if you have already taken SOCY1002. Only one of these courses will count toward the major or minor. This course conveys a sense of the history of sociology and introduces students to the most essential concepts, ideas, theories, and methods of the discipline. Special topics may include interaction in everyday life, sociology of the family, gender roles, race and ethnic relations, and the sociology of work, among others. We will deal with fundamental questions about what it means to be a human being living in a society at a given moment in history. Ordinarily, SOCY1001.01 is reserved for majors and minors. Note that Introductory Sociology is taught by different instructors; check each instructor's syllabus for a more exact description.

**SOCY100201**

**Introduction to Sociology for Healthcare Professions**

**Fan, Wen**

**Fall 2023**

Do not take SOCY1002 if you have already taken SOCY1001. Only one of these courses will count toward the major or minor. This course is designed to present the fundamentals of sociology to an audience of future healthcare professionals. Attention is given both to micro-level (interpersonal) and macro-level (organizational) behavior. One of the major goals of the course is to enable students to ground themselves and their families sociologically, by examining their own community and social class origins. It will highlight issues of interest to healthcare professionals, along with sociological concepts that appear on the MCAT exam. NOTE THAT LAPTOPS WILL NOT BE ALLOWED DURING CLASS.

**Credits:** 3

**Room and Schedule:** Campion Hall 300 TuTh 03:00PM-04:15PM

**Satisfies Core Requirement:** Social Science

**Prerequisites:** Permission of Department
SOCY103001
Deviance and Social Control
Pfohl, Stephen J
Fall 2023
This course explores the social construction of boundaries between the "normal" and the so-called "deviant." It examines the struggle between powerful forms of social control and what these exclude, silence, or marginalize. Of particular concern is the relationship between dominant forms of religious, legal, and medical social control and gendered, racialized, and global economic structures of power. The course provides an in-depth historical analysis of theoretical perspectives used to explain, study, and control deviance, as well as ethical-political inquiry into such matters as religious excess, crime, madness, corporate and governmental wrong-doing, and sexual subcultures that resist dominant social norms.

**SOCY104301**

**Introduction to African-American Society**

**McGuffey, Clifton S**

**Fall 2023**

To get Sociology credit for the major or minor (or social science core credit), you must register for SOCY1043 rather than cross-listed course. In 1896, distinguished scholar W.E.B. DuBois became convinced that the experience of Africans in the Americas was so distinctive that it was imperative to study Black people in order to understand power dynamics at all levels of society. This course will study those power dynamics. While paying particular attention to the many ways that racial power dynamics have impacted all people of African descent in the United States, this course does not assume a uniform Black experience. We shall see that gender, class, and sexuality greatly shape the differing experiences of African-Americans.

SOCY107201
Inequality in America
Spangler, Eve
Fall 2023
This course examines class inequality in American society. It not only describes how the rich, the poor, and the middle classes live, but also how they relate to one another. Topics include the strategies used by the rich for maintaining the status quo, the hopes cherished by the middle class for improving their position, and the obstacles that keep the poor in their place. The class is writing intensive, with half the papers focused on readings that emphasize the dynamics of inequality as they are enacted by men and women, and by people of color and Caucasians, and the other half focused on diverse research experiences: simulations, interviews, observations, documentary analysis, fiction writing, etc.

SOCY109201
Peace or War
Derber, Charles
Fall 2023
Offered every semester. We analyze issues of war and peace before and after the Cold War, focusing on U.S. wars, largely in the Third World but also new conflicts with Russia and China, especially in the explosive 2022 conflict in Ukraine. In the first part of the course, we explore core theories of the roots of war and the changing international positions of Super-powers such as the US, Russia and China. In the second part, we focus on the 20thcentury Cold War era, examining Vietnam, El Salvador, and other U.S. conflicts. In the third part, we focus on more recent wars: Iraq, Syria, the Israeli-Palestinian conflict, the "war on terrorism," as well as genocidal conflicts such as Rwanda and Sudan, and the Russian invasion of Ukraine. The fourth section explores the United Nations, social activism among students, and other routes to peace. Satisfies Core requirement for: Social Science

SOCY109601
Aging and Society
Best, Latrica E
Fall 2023
"Age doesn't matter unless you're a cheese," quipped actress Billie Burke (the Good Witch in The Wizard of Oz). Nevertheless, age does matter within societies. This class will cover specific topics in four general areas of sociological study: roles and relationships (e.g., within the family), inequalities (e.g., ageism), institutions (e.g., health care), and social change (e.g., the aging of the population). By the end of the course, you will have acquired a new approach to thinking about how you and others age in the social world and the ways in which age is portrayed in the media.

SOCY200001
Oh my God! A Sociological Intro to Religion in the U.S.
Morello, Gustavo, SJ
Fall 2023
This course presents students with a basic sociological approach to religion in the United States, and how it interacts with ethnicity, gender, social class, and politics. We pay attention to historical developments and theological ideas, but the goal is to understand how do people live religion in their daily lives, and how that practice relates to other aspects of their social life. I expect students will, at the end of the semester, have an informed sociological understanding of religion, will better understand how religion is present in their lives and in American social life.

Introduction to Social Work
Ryan, Sarah E
Fall 2023
This is a Social Work course available to undergraduate students. Starting with a discussion of its history and the relevance of values and ethics to its practice, the course takes up the various social work methods of dealing with individuals, groups, and communities and their problems. In addition to a discussion of the theories of human behavior that apply to social work interventions, the course examines the current policies and programs, issues, and trends of the major settings in which social work is practiced.

Society and National Identity in the Balkans
Dakova, Mariela
Fall 2023
An overview of ethnic, cultural, and religious diversity among peoples of the Balkans (Albanians, Bosnians, Bulgarians, Croats, Greeks, Macedonians, Romanians, Serbs, Slovenes, Jews, Turks, and gypsies [Roma]). It is a study of what constitutes the various parameters of identity: linguistic typologies, religious diversity (Catholicism, Orthodoxy, Islam, and Judaism), culture, and social class. An analysis of the origins of nationalism, the emergence of nation-states, and contemporary nationalism as a source of instability and war in the Balkans will be considered.

SOCY300001
Crime and Punishment
Goldman, Alyssa W
Fall 2023
This course will examine major themes and insights in the areas of crime and criminal justice. The first half of the course will orient students with foundational theories of criminology, and review how these theories have informed recent empirical developments within the field. The second half of the course will focus on the American criminal justice system, with emphasis on how policy changes since the 1970s have driven an expansion in incarceration and other criminal justice sanctions in the United States, as well as the social consequences of such changes for individuals, families, and communities.

Community Advocacy and Research Engagement
Abowd, Thomas P
Fall 2023
CARE is a two-semester course (SOCY 3254/3255) that offers leadership, research, and public policy training for students interested in working with Latino, Asian American and/or African Diaspora communities. In fall, students in SOCY3254 learn the process of community-based research and its methodologies, and begin to design a proposal for an independent study for spring. In the Spring, students sign up for SOCY3255 in conjunction with a Readings and Research to conduct their projects. The Spring seminar complements the R&R serving as a forum for students to discuss their research and continue to develop their oral presentation skills.

SOCY331001
Studies in Crime and Social Justice
Hedges, Jessica D
Fall 2023
Crime and social justice are considered not as distinct, but indivisible constructs produced through specific knowable institutional/personal practices. Course allows students to analyze perspectives on the process through which laws and criminal justice institutions have been/continue to be constructed; situate crime study within a "power reflexive" framework, while being attentive to the operation of race, class, and gender as features of contemporary social relations/institutions; discuss contemporary intellectual and practical efforts challenging existing conceptual and political structures relating to crime and social justice; and imagine/articulate institutions paralleling the vision of social justice developed throughout the course.

**Consumption, Health, and the Environment**

**Ouimette, Monique**

**Fall 2023**
There are many health and environmental impacts associated with consumption activities, yet such impacts often remain hidden or obscured in the course of everyday life. In this applied course, students will examine health and environmental issues associated with consumption activities. Over the course of the semester, students will learn concepts from environmental health, environmental sociology, the sociology of consumption, and public policy. Each student will engage in an original preliminary research project on a contemporary issue related to consumption and environmental health. Students will develop an understanding of the power dynamics and inequalities associated with identifying, defining, managing, and mitigating the health and environmental impacts of consumption activities. Skills, perspectives, and analytic frameworks learned in this course will be useful for students in their roles as individual consumers, citizens, and professionals.

**SOCY334201**  
Faith and Conflict: Religion and Social Change in Latin American Societies  
Morello, Gustavo, SJ  
Fall 2023
This seminar explores the interaction between social changes and religion in Latin America. We study national cases, where we explore the political and religious changes in Latin America during the 1960s and 1970s. Then, we investigate the interactions of religiosity with some social transformations (environmental and gender-related movements, marginality, and migration). During the semester, the students will work on a paper about religion and migration among Latino immigrants to the U.S. After the course, students will be able to explain the origins, context, and consequences of religious transformation in Latin America, to develop their critical assessment of the role of religion in society, and to engage in a clear, concise and analytically sharp reading, writing and speaking.

Sustainable Cities
Bolin, Jessica L
Fall 2023
About 4.2 billion people around the world live in cities today, with this figure expected to double by 2050. Improvement of the urban environment is therefore crucial to a sustainable planetary future. In this course, students will examine current best practices for urban sustainability and resilience in areas such as restoration of watershed health, mitigation of air pollution and soil toxicity, management of solid waste, reduction of the urban heat island effect, improvement of mass transit and infrastructure, support of urban agriculture alongside a variety of other environmental justice efforts, and preparation for sea level rise, extreme weather events, and rising temperatures.

Gender and Sports
Kim, Kyoung-yim
Fall 2023
This course uses sport to understand gender relations in a society. The course examines the ways that gender and intersections of race, class, and sexuality are produced by and within relations of power, and how normative definitions of gender and its intersections underpin normative practices in sport, health, and physical cultural contexts. Drawing on feminist scholarship, this course provides a critical insight into the history of gender relations, and how gender is used to reproduce and resist inequalities in sport, health, and physical culture.

Social Justice in Israel/Palestine
Spangler, Eve
Fall 2023
This seminar provides the intellectual underpinnings for an immersion trip to Israel/Palestine in January. Students in this course must commit to the trip and, upon their return, to a project that uses the knowledge they gained in Israel/Palestine. The seminar will include a review of the Israeli and Palestinian history, an analysis of the contested theological claims to the land, and an examination of conflict resolving strategies focusing on cross-border groups operating in Israel/Palestine (e.g., Prime, Combatants for Peace, Parents Circle). Finally, we will consider possible economic futures for the area under both one and two state scenarios.

American Economic Crisis and Social Change
Derber, Charles
Fall 2023
Course is offered every semester. This course offers a new way to think about American and global capitalism, focusing on our values, our intertwined economic, environmental and social crises exploding in the 2008 Wall Street meltdown, the coronavirus economy, the new militaristic economy after the Ukraine crisis of 2022, and the extinction threats of energy and climate change. We examine economic problems include growing poverty and inequality, an insecure job market, and the failure of many of our industries and corporations to compete globally. We also examine our social crises, involving the growth of violence, family breakdown, global warming, systemic racism, overweening corporate power and erosion of democracy. We look at new visions and social movements to transform our socio-economic system toward a more just, sustainable and democratic economy and society.

**Food Justice Across the African Diaspora**  
**Best, Latrica E**  
**Fall 2023**  
This course is designed to introduce students to the social, political and cultural meanings of food across the African Diaspora. We will cover not only the meaning of food but also the importance of race in key aspects of global food systems, from food production and processing to the distribution and consumption of food. This course will also explore food access and security and the ways in which intersecting identities make meaning, experience, and respond to such issues. By the end of this course, students will be able to apply relevant frameworks, namely environmental justice, to food-related dilemmas globally.

Postmodernity and Social Theory
Pfohl, Stephen J
Fall 2023
This seminar will examine recent theoretical and historical claims concerning the emergence of postmodern social formations. It will also explore the implications of postmodernity for the practice of sociological theory and methods. Of central concern will be critical theoretical attempts to understand shifting configurations of economic, gendered and racialized forms of power within a global context of information-driven capital.

SOCY667001
Technology and Culture
Griffith, William
Fall 2023
This interdisciplinary course will first investigate the social, political, psychological, ethical, and spiritual aspects of the Western cultural development with a special emphasis on scientific and technological metaphors and narratives. We will then focus on the contemporary world, examining the impact of our various technological creations on cultural directions, democratic process, the world of work, quality of life, and especially on the emergent meanings for the terms "citizen" and "ethics" in contemporary society. Students will explore technologies in four broad and interrelated domains: (1) computer, media, communications, and information technologies, (2) biotechnology, (3) globalization, and (4) environmental issues.

Multivariate Statistics
Fan, Wen
Fall 2023
This applied course is designed for students in sociology, education, nursing, organizational studies, political science, psychology, or social work with a prior background in statistics at the level of SOCY7703 Multivariate Statistics. It assumes a strong grounding in multivariate regression analysis. The major topics of the course will include OLS regression diagnostics, binary, ordered, and multinomial logistic regression, models for the analysis of count data (e.g., Poisson and negative binomial regression), treatment of missing data, and the analysis of clustered and stratified samples. Familiarity with Stata is required for this course.

SOCY771001
Social Inquiry Research Seminar
Sarkisian, Natalia
Fall 2023
Required for graduate students. This course presents the wide range of alternative research methods available to and widely used by the social researcher. Among those considered are the following: survey research, observational field research, intensive interviewing, experimental research, historical analysis, and content analysis. Considerable attention will be given to comparisons among these alternative methods, to an assessment of the relative strengths and limitations of each, and to issues related to research design and proposal writing. In the context of these alternative research methods, attention will be given to problem formulation, measurement, reliability, validity, sampling, and ethical considerations.

SOCY771501
Classical Social Theory
Magubane, Zine
Fall 2023
Required for graduate students. Focusing on the work of Marx, Durkheim, and Weber, the course traces the philosophic, intellectual, and social history of the ideas, themes, concepts, and schools of thought we now call "classical sociological theory." Supportive thinkers will also be discussed as they contributed to the emergence and establishment of modern sociological thought.

SOCY776101
Second Year Graduate Writing Seminar
Babb, Sarah L
Fall 2023
This is a 3-credit, 2-semester course that meets approximately every other week for both terms. Students should contact the professor about attending in the fall, but wait to register until the spring term. In the fall term, they should register instead for an independent study with the faculty member advising their writing project. Note that a completed research proposal is required for entry. The writing seminar is intended for second year M.A. and Ph.D. students working on their M.A. theses/papers. The 3-credit seminar begins in fall and continues into the spring term. The seminar employs a supportive structure and a collaborative learning environment to help students to carry out their independent projects.

**Dissertation Seminar**  
**Sarkisian, Natalia**  
**Fall 2023**  
This is a continuing research workshop which covers all stages of the research process, from conceptualization and theory development through data analysis and writing. The workshop is intended primarily for sociology graduate students working on dissertation proposals, dissertations, and/or comprehensive exam papers. Others will be welcomed on a case-by-case basis. The group meets bi-weekly, with individual meetings with the professor as necessary. All students who are writing dissertations are strongly recommended to enroll in this workshop, at least for one semester.

SOCY100101
Introductory Sociology
Bargain-Darrigues, Gaelle
Spring 2024
Offered every semester. Do not take SOCY1001 if you have already taken SOCY1002. Only one of these courses will count toward the major or minor. This course conveys a sense of the history of sociology and introduces students to the most essential concepts, ideas, theories, and methods of the discipline. Special topics may include interaction in everyday life, sociology of the family, gender roles, race and ethnic relations, and the sociology of work, among others. We will deal with fundamental questions about what it means to be a human being living in a society at a given moment in history. Ordinarily, SOCY1001.01 is reserved for majors and minors. Note that Introductory Sociology is taught by different instructors; check each instructor's syllabus for a more exact description.

Special topics may include interaction in everyday life, sociology of the family, gender roles, race and ethnic relations, and the sociology of work, among others. We will deal with fundamental questions about what it means to be a human being living in a society at a given moment in history. Ordinarily, SOCY1001.01 is reserved for majors and minors. Note that Introductory Sociology is taught by different instructors; check each instructor's syllabus for a more exact description.

SOCY100201
Introduction to Sociology for Healthcare Professions
Goldman, Alyssa W
Spring 2024
Do not take SOCY1002 if you have already taken SOCY1001. Only one of these courses will count toward the major or minor. This course is designed to present the fundamentals of sociology to an audience of future healthcare professionals. Attention is given both to micro-level (interpersonal) and macro-level (organizational) behavior. One of the major goals of the course is to enable students to ground themselves and their families sociologically, by examining their own community and social class origins. It will highlight issues of interest to healthcare professionals, along with sociological concepts that appear on the MCAT exam. NOTE THAT LAPTOPS WILL NOT BE ALLOWED DURING CLASS.

**SOCY104301**  
**Introduction to African-American Society**  
**McGuffey, Clifton S**  
**Spring 2024**

To get Sociology credit for the major or minor (or social science core credit), you must register for SOCY1043 rather than cross-listed course. In 1896, distinguished scholar W.E.B. DuBois became convinced that the experience of Africans in the Americas was so distinctive that it was imperative to study Black people in order to understand power dynamics at all levels of society. This course will study those power dynamics. While paying particular attention to the many ways that racial power dynamics have impacted all people of African descent in the United States, this course does not assume a uniform Black experience. We shall see that gender, class, and sexuality greatly shape the differing experiences of African-Americans.

SOCY107201
Inequality in America
Spangler, Eve
Spring 2024
This course examines class inequality in American society. It not only describes how the rich, the poor, and the middle classes live, but also how they relate to one another. Topics include the strategies used by the rich for maintaining the status quo, the hopes cherished by the middle class for improving their position, and the obstacles that keep the poor in their place. The class is writing intensive, with half the papers focused on readings that emphasize the dynamics of inequality as they are enacted by men and women, and by people of color and Caucasians, and the other half focused on diverse research experiences: simulations, interviews, observations, documentary analysis, fiction writing, etc.

SOCY107801
Sociology of Health and Illness
Seim, Joshua D
Spring 2024
This is an undergraduate-level course in the sociology of health and illness, an incredibly broad and fragmented field that frequently overlaps with medical anthropology, public health, and other disciplines. The first half of this course focuses on the social roots of sickness. The second half concerns the social relations of medicine. While we treat these as relatively autonomous topics, we also spend time addressing the mismatches between the forces that make people sick and the organized reactions to sickness. We also study a number of general structures and processes that simultaneously affect health and care. For example, we study how capitalism, racism, and sexism make people sick. We then study how these same systems shape, and are shaped by, medicine.

SOCY109201

**Peace or War**

**Derber, Charles**

**Spring 2024**

Offered every semester. We analyze issues of war and peace before and after the Cold War, focusing on U.S. wars, largely in the Third World but also new conflicts with Russia and China, especially in the explosive 2022 conflict in Ukraine. In the first part of the course, we explore core theories of the roots of war and the changing international positions of Super-powers such as the US, Russia, and China. In the second part, we focus on the 20th-century Cold War era, examining Vietnam, El Salvador, and other U.S. conflicts. In the third part, we focus on more recent wars: Iraq, Syria, the Israeli-Palestinian conflict, the "war on terrorism," as well as genocidal conflicts such as Rwanda and Sudan, and the Russian invasion of Ukraine. The fourth section explores the United Nations, social activism among students, and other routes to peace. Satisfies Core requirement for: Social Science

SOCY171001

Constructing Deviance: Power, Control, and Resistance

Pfohl, Stephen J

Spring 2024

This is an Enduring Question course and is open to FRESHMAN only. You must take GERM1701 with this course. This course examines the historical production, policing, and change of boundaries between normative social life and that condemned as "deviant." To deviate from powerful norms is to risk being repetitively "othered" by social control agents of various sorts—parents, priests, judges, doctors, and politicians. Who wins and who loses in this battle?

Animated by a concern for social justice, the course invites students to reckon with how gendered, racialized, economic, and erotic rituals of power influence the contested construction of dominant and deviant expressions of religion, law, medicine, kinship, governance, commerce, bodily pleasure, and popular culture.

Introduction to Social Work
Ryan, Sarah E
Spring 2024
This is a Social Work course available to undergraduate students. Starting with a discussion of its history and the relevance of values and ethics to its practice, the course takes up the various social work methods of dealing with individuals, groups, and communities and their problems. In addition to a discussion of the theories of human behavior that apply to social work interventions, the course examines the current policies and programs, issues, and trends of the major settings in which social work is practiced.

SOCY222501
Introduction to Feminisms
Barko, Emily B
Spring 2024
Fulfills Women Writer's requirement for ENGL/LSOE majors. This introductory course offers both an overview and a foundation for understanding the various movements that make up what has come to be called the feminist movement in the U.S. Because systems of privilege and disadvantage shape women's and men's identities and social positions in multiple and unique ways, Introduction to Feminisms analyzes gender from an interdisciplinary approach and applies numerous academic disciplinary methods to the study of gender, including history, literature, psychology, and sociology, and explores women's and men's experiences within various cultural contexts, including socioeconomic class, race and ethnicity, religion and spirituality, nations of citizenship, origin, and generation.

Perspectives on War, Aggression, and Conflict Resolution I
Johnson, Spencer K
Spring 2024
The Faith, Peace, and Justice Program at Boston College sponsors this course as an introduction to the field of Peace Studies. This course asks: Is it ever ethical to go to war? Is it possible to be ethical in war? And, what does ethical conflict resolution look like? This course investigates these questions primarily using the resources of the Christian theological tradition and the social sciences, as well as engaging with philosophy and film. Special attention will be paid to issues in contemporary warfare and the challenges and promises of peacebuilding.

SOCY313201
Sociology of Natural Resources
Gao, Lijing
Spring 2024
This course explores the relationship between societal constructs and the perception, utilization, and preservation of natural resources (i.e., air, water, cropland, wetland, and forest). The curriculum is divided into two units. The first introduces students to sociological theories that shape our understanding of human influences on natural resource management. The second unit empowers students with social research methodologies to investigate socio-economic, socio-psychological, structural, and cultural factors that affect natural resource management decisions and their impact on ecosystems through practical projects. This course offers critical analytical skills and a nuanced understanding of current issues involving societal influences on natural resource management.

**Tattoos and Religion. Studying a neglected spiritual practice.**  
**Morello, Gustavo, SJ**  
**Spring 2024**  
This course explores tattoos as a religious practice, from a sociological perspective. There are no previous requirements for this class; we will read some sociology classic authors during the course. We will investigate contemporary religious, spiritual tattoos in the U.S., the Americas and Europe. After paying attention to the role of tattooists, we will study Pierre Bourdieu's field theory to discuss who has the power to define if tattoos are religious practices or not.

SOCY325501  
Community Advocacy and Research Engagement  
Abowd, Thomas P  
Spring 2024  
CARE is a two-semester course (SOCY 3254/3255) that offers leadership, research, and public policy training for students interested in working with Latino, Asian American and/or African Diaspora communities. In fall, students in SOCY3254 learn the process of community-based research and its methodologies, and begin to design a proposal for an independent study for spring. In the Spring, students sign up for SOCY3255 in conjunction with a Readings and Research to conduct their projects. The Spring seminar complements the R&R serving as a forum for students to discuss their research and continue to develop their oral presentation skills.

SOCY332201
Consumption, Health, and the Environment
Ouimette, Monique
Spring 2024
There are many health and environmental impacts associated with consumption activities, yet such impacts often remain hidden or obscured in the course of everyday life. In this applied course, students will examine health and environmental issues associated with consumption activities. Over the course of the semester, students will learn concepts from environmental health, environmental sociology, the sociology of consumption, and public policy. Each student will engage in an original preliminary research project on a contemporary issue related to consumption and environmental health. Students will develop an understanding of the power dynamics and inequalities associated with identifying, defining, managing, and mitigating the health and environmental impacts of consumption activities. Skills, perspectives, and analytic frameworks learned in this course will be useful for students in their roles as individual consumers, citizens, and professionals.

Environmental Justice
El Tinay, Hassan
Spring 2024
This course examines challenges and controversies associated with the unequal distribution of environmental hazards across communities. Students will explore the social, industrial, and government forces that create inequitable burdens of environmental pollution as well as movements to reduce such burdens. While a majority of the course will focus on the United States, readings will include cases from around the world. Students will be expected to actively contribute to class discussions and to complete a pilot research project on the environmental justice implications of an area of everyday consumption such as food, clothing, cleaning, transportation, or technology.

Sustainable Cities
Bolin, Jessica L
Spring 2024
About 4.2 billion people around the world live in cities today, with this figure expected to double by 2050. Improvement of the urban environment is therefore crucial to a sustainable planetary future. In this course, students will examine current best practices for urban sustainability and resilience in areas such as restoration of watershed health, mitigation of air pollution and soil toxicity, management of solid waste, reduction of the urban heat island effect, improvement of mass transit and infrastructure, support of urban agriculture alongside a variety of other environmental justice efforts, and preparation for sea level rise, extreme weather events, and rising temperatures.

SOCY335801
Gender and Sports
Kim, Kyoung-yim
Spring 2024
This course uses sport to understand gender relations in a society. The course examines the ways that gender and intersections of race, class, and sexuality are produced by and within relations of power, and how normative definitions of gender and its intersections underpin normative practices in sport, health, and physical cultural contexts. Drawing on feminist scholarship, this course provides a critical insight into the history of gender relations, and how gender is used to reproduce and resist inequalities in sport, health, and physical culture.

Masculinity, Sexuality, and Difference
Ingram, Brett D
Spring 2024
Satisfies Critical Issues Course requirement for the class of 2021 and beyond. This course will examine constructions of masculinity and sexuality in Western society from a critical cultural perspective. We will consider the ways in which cultural narratives about acceptable masculine behaviors and attitudes catalyze social conflicts, reinforce established power hierarchies, and organize the modes of being available to people of different gender identities and sexual orientations. We will also evaluate the liberatory potential of emergent discourses and practices that seek to cultivate greater acceptance of diversity, and promote social healing. There will be a concentrated focus on popular cultural forms (especially television, film, music, sports, and social media) that are particularly influential to contemporary men and boys.

**American Economic Crisis and Social Change**

Derber, Charles

Spring 2024
Course is offered every semester. This course offers a new way to think about American and global capitalism, focusing on our values, our intertwined economic, environmental and social crises exploding in the 2008 Wall Street meltdown, the coronavirus economy, the new militaristic economy after the Ukraine crisis of 2022, and the extinction threats of energy and climate change. We examine economic problems include growing poverty and inequality, an insecure job market, and the failure of many of our industries and corporations to compete globally. We also examine our social crises, involving the growth of violence, family breakdown, global warming, systemic racism, overweening corporate power and erosion of democracy. We look at new visions and social movements to transform our socio-economic system toward a more just, sustainable and democratic economy and society.

Conflict Zones: Race and Gender-Based Violence in the African Diaspora

McGuffey, Clifton S

Spring 2024

This course will examine interpersonal and state violence throughout the African Diaspora. Primarily utilizing sociological and other social science perspectives, this comparative course will also engage other disciplines in the conceptualization and examination of violence. Topics will include sexual assault, police violence, and genocide.

Social Movements
Kadivar, Mohammad Ali
Spring 2024
In this course we will learn about the main drivers, dynamics, and consequences of contentious politics. We will learn about major mechanisms at work in episodes of contention. We will learn about rival theories, and some of the major debates in the studies of contentious politics and social movements. We will study cases such as the civil rights movements, Arab spring, and other examples of social movements from across the globe.

SOCY356201
Environmental Sociology I
DiDonato, Sandra J
Spring 2024
This is an upper-division seminar that provides an overview of theoretical and empirical work in environmental sociology. After a brief introduction to the origins of the field, the seminar will cover topics that are representative of what is current in the area, especially bodies of empirical research that are national, international, and global in scope, and with particular attention given to how large-scale social institutions and organizational forms impact the environment. We will focus on the social dimensions of environmental impacts, the anthropogenic drivers of environmental impacts, and sociological research on solutions to environmental crises. A key takeaway of the course is the necessity in taking a structural approach to the study of socioenvironmental relationships. Attention will also be given to how environmental sociology makes fundamental contributions to interdisciplinary research in environmental studies and sustainability science. The course is required for all Environmental Studies majors.

**SOCY440001**  
**Racialized Medicine**  
**Best, Latrica E**  
**Spring 2024**  
This course is designed to introduce students to sociological and other interdisciplinary approaches to how race and racism are defined, employed, and contextualized in health and medicine. Though we will cover an array of theoretical perspectives regarding race and its impact on health, the core theoretical underpinnings of this course are rooted in the racialization process. The contemporary readings address four themes: theoretical and methodological perspectives of race, racism, and health, social processes and the racialization of health, health inequities across the life course, and institutional pursuits of health equity. We examine the importance of intersecting identities throughout the course.

SOCY493101
Important Readings in Sociology
Schor, Juliet, PHD
Spring 2024
This course is designed as the first in the sequence of courses required of students who have been admitted into the Sociology Department's Undergraduate Honors Program. Ordinarily, students will take this course during the spring of their junior year. The purpose of this seminar will be to read and discuss a series of books that are generally thought to be important contributions to the field. The books chosen will reflect a range of substantive issues, methodological approaches, and theoretical perspectives. The abiding question throughout this seminar class will be the following: What are the characteristics of powerful and compelling sociological work?

SOCY496301
Senior Honors Thesis
Goldman, Alyssa W
Spring 2024
After having completed their research proposal in SOCY4961, Students in the Undergraduate Sociology Honors Program then complete the data collection, the analysis, and the writing of their senior thesis during the spring of the senior year. In SOCY4963.01 students complete their thesis research under the direction of their faculty advisor. Ordinarily, students are expected to complete their thesis by April 15, approximately two weeks before all senior honors students present the findings of their research in a public meeting.

SOCY557001
Political Sociology
Kadivar, Mohammad Ali
Spring 2024
An intensive examination of foundational texts representing pluralist, elite, and class theories of the state in industrialized capitalist democracies. The course includes lecture and seminar-style discussion of the historical dimensions of political sociology as well as its application to current areas of inquiry. After revealing its foundations, the course will explore how political sociology is used in studies on governmentality, globalization and state crises, and environmental history. Students will be expected to participate in course discussions, provide weekly write-ups, and write a final paper.

SOCY559701
Contemporary Race Theory
Magubane, Zine
Spring 2024
To get sociology credit for the major or minor, you must register for SOCY5597 rather than cross-listed course. This class will explore how various contemporary writers engage with the question of race, both in the United States and transnationally. We will look at social constructionist theories of race, postmodernism, feminist theory, critical legal studies, and the intersection between contemporary race theory and queer theory.

**Technology and Culture**

**Griffith, William**

**Spring 2024**

This interdisciplinary course will first investigate the social, political, psychological, ethical, and spiritual aspects of the Western cultural development with a special emphasis on scientific and technological metaphors and narratives. We will then focus on the contemporary world, examining the impact of our various technological creations on cultural directions, democratic process, the world of work, quality of life, and especially on the emergent meanings for the terms "citizen" and "ethics" in contemporary society. Students will explore technologies in four broad and interrelated domains: (1) computer, media, communications, and information technologies, (2) biotechnology, (3) globalization, and (4) environmental issues.

Regression Models for Categorical Data
Fan, Wen
Spring 2024
This applied course is designed for students in sociology, education, nursing, organizational studies, political science, psychology, or social work with a prior background in statistics at the level of SOCY7703 Multivariate Statistics. It assumes a strong grounding in multivariate regression analysis. The major topics of the course will include OLS regression diagnostics, binary, ordered, and multinomial logistic regression, models for the analysis of count data (e.g., Poisson and negative binomial regression), treatment of missing data, and the analysis of clustered and stratified samples.

SOCY771601
Contemporary Social Theory
Pfohl, Stephen J
Spring 2024
Required for graduate students. This seminar is a graduate level introduction to contemporary social theory. It concerns the historical context and development of a wide variety of perspectives used by social theorists to make sense of multiple social worlds. It also concerns the ways in which social theories are themselves sociologically constructed. Theoretical frameworks addressed include: functionalism and cybernetics; symbolic interactionism and pragmatism; exchange, behavioral, and conflict perspectives; feminism; Marxism; phenomenology and ethnomethodology; critical race theory; queer theory; structuralism and poststructuralism; as well as postcolonial and postmodern theories of the subject and power.

SOCY776101
Second Year Graduate Writing Seminar
Babb, Sarah L
Spring 2024
This is a 3-credit, 2-semester course that meets approximately every other week for both terms. Students should contact the professor about attending in the fall, but wait to register until the spring term. In the fall term, they should register instead for an independent study with the faculty member advising their writing project. Note that a completed research proposal is required for entry. The writing seminar is intended for second year M.A. and Ph.D. students working on their M.A. theses/papers. The 3-credit seminar begins in fall and continues into the spring term. The seminar employs a supportive structure and a collaborative learning environment to help students to carry out their independent projects.

SOCY998101
Dissertation Seminar
Sarkisian, Natalia
Spring 2024
This is a continuing research workshop which covers all stages of the research process, from conceptualization and theory development through data analysis and writing. The workshop is intended primarily for sociology graduate students working on dissertation proposals, dissertations, and/or comprehensive exam papers. Others will be welcomed on a case-by-case basis. The group meets bi-weekly, with individual meetings with the professor as necessary. All students who are writing dissertations are strongly recommended to enroll in this workshop, at least for one semester.

ARTS112501
Innovation through Design Thinking
Gaudette, Glenn R
Summer 2023
Would you like to be innovative in whatever you pursue? Innovation is about solving important and complex problems to create value for the greater good. Innovating through design thinking is a structured, human-centered process for creatively solving problems, which can be adopted by anyone. In this foundational course we will introduce the mindset, process and methods at the core of design thinking. Students will see inspiring case studies, hear from cutting edge practitioners, and work on a project to internalize this learning. Students will discover design thinking is a practical toolkit that helps them reliably innovate in the face of changing social needs, business disruptions, and technology shifts.

ARTS225001
Graphic Design
Reeves, Brian A
Summer 2023
This course is an immersive project-based introductory overview of concepts, contexts, tools, and techniques useful in solving a wide range of contemporary design problems, including logos, business cards, propaganda posters, multi-page documents, data visualizations, web page designs, app wireframes, and proposals for site-specific graphics. Beyond the necessary focus on software, including Adobe InDesign, Illustrator, and Photoshop, the course will incorporate discussion and application of typography, color theory and other 2D design concepts affecting how subject matter is perceived. Students will solve problems on behalf of themselves and choose one or more other clients whom they'll strive to serve.

Issues and Approaches to Studio Art
Gallagher, Sheila E
Fall 2023
This course is intended for Studio Majors and Minors and serious students with previous studio experience. This course enables students to develop skills and ideas by exploring objective, subjective, and conceptual approaches to a variety of media. Practical exercises include live models, scenarios, memory, and imagination. Students develop skills and confidence by exploring a variety of ideas and techniques in preparation for a more individually directed approach in subsequent courses. Discussions and group or individual critiques develop students' critical and analytical skills and provide an open forum for students to bring questions and problems for exploration.

ARTS110401
Design: Seeing Is Believing
Weisberg, Debra
Fall 2023
Seeing is Believing is a hands-on class that will help open the door to the mystery behind effective and engaging visual decision making. Do you find yourself using ambiguous gut feelings to make something that looks "good" without applying meaningful criteria? Using a variety of approaches and materials including photography, charcoal, and collage, assignments, exercises, and field trips are designed to strengthen visual acuity and the ability to communicate dynamically and creatively. This class is designed for both advanced and entry-level students with 2-D and 3-D assignments providing enough flexibility to meet each student at whatever level they are.

**ARTS110501**  
**Making Prints/Making Books: An Introduction to Printmaking and Book Arts**  
Stigliano, Stephanie  
Fall 2023
In this course, students will be introduced to the world of printmaking and book arts through practical, hands-on assignments. Students will learn to make relief prints, and will leave the class with a book designed from their prints. Art in book form tells a story with words, images, structure, and material. The developmental process of making a print is akin to the building of a narrative. Both of these graphic arts have existed in tandem throughout history. They are ways to communicate ideas to a broader public, so it makes sense to explore them together in the classroom. Students who are just learning to draw and accomplished draftsmen can both benefit from making prints and books. Each assignment will balance technical, conceptual, and formal goals. We will discuss the design basics of line, shape, texture, light and shadow, space, and composition. The printmakers will create series, sequences, and variations on a theme. We will look at books and prints from different eras and cultures, and take advantage of the college's numerous collections. There will be written components, such as an observational response to a single print and a reflection on an individual book work. The students will present their artwork as the focus of group discussion and critique. Additionally, they will receive individual feedback during each class meeting.

ARTS110901

*Design is Human*

Burns, Jennifer L

Fall 2023
Design today is buzzed about in fields as diverse as business, medicine, and engineering. But if design can mean everything from the swoosh on a shoe to preparing coastal cities for sea-level rise, how do we comprehend this elastic concept? Considering specific examples from graphic, fashion, and product design, studying the shaping of place by architects, planners, and infrastructure engineers, and finally exploring the virtual worlds of gaming, the internet, and social media, this introductory course critically surveys design practices from the late-nineteenth to early-twenty-first century to understand what design has promised, what it delivered, and what it could still become.

ARTS111201
Digital Drawing
Reeves, Brian A
Fall 2023
Digital Drawing expands upon the techniques and principles of traditional drawing, while exploring the range of approaches possible with current technology. Students develop original works, from sketches to larger-scale finished pieces for screen output and high-quality digital printing. Projects range from observational drawing to drawing from imagination. This class is a good foundation for students who are interested in pursuing digital fine-art, animation, illustration, graphic design, architecture, etc. Class time consists of image lectures, technical demonstrations, and critiques of student work. Though some in-class work time will be available, students are expected to complete projects outside of class. The class covers the foundational elements of digital drawing and painting in Adobe Photoshop and Illustrator, pressure-sensitive styluses, and may also include current apps for tablets and phones. Students are expected to have completed Drawing I: Foundations (or the equivalent) but do not need to have prior experience with Adobe programs.

Introduction to 3D: Sculpture
Della Lucia, Catherine
Fall 2023
An introduction to sculpture and 3 dimensional thinking, this course we will use a variety of materials including paper, wood, organic material, found objects, and light to explore concepts around materiality, nature, play, objecthood, and what it means to be a human in space. Students will be introduced to a variety of skills such as woodworking, 3-D printing, and model making. Through critiques, weekly discussions, reading assignments and field trips, students will develop an appreciation of themselves as people who think through making and the role of sculpture and 3-D thinking in society. Highly recommended for students pursuing the Architectural Studies concentration.

**ARTS116301**  
**Introduction to Digital Photography**  
**Muldowney, Greer R**  
**Fall 2023**

Students must have a digital camera, and a laptop for classes. In this course, students will become familiar with how to create a photograph with a digital camera, and how to use photographic techniques to control the look of an image through post-production techniques. These will be developed with good digital asset management practices by using Adobe Photoshop. Students will also learn an introduction to photographic history and visual literacy. This course introduces the fundamental principles of photography and its history for universal applications and is available to all majors. All those participating will need to have a DSLR that shoots in RAW and is at least 10 megapixels to take this course.*This course does not fulfill the Arts Core

**Credits:** 3

**Room and Schedule:** Devlin Hall 401F Th 09:00AM-12:00 Noon

**Satisfies Core Requirement:** None

ARTS220601
Drawing 2: The Art of Portraiture
Chong, Sammy
Fall 2023
Classroom activities will include demonstration, lecture, and critiques. Basic drawing skills are strongly recommended. This drawing course focuses on the genre of portraiture, both in theory and in practice. The Mona Lisa, carnival portraits, and everything in between they all share the same initial approach to the figure. We will first hone in on the structure of the head. From there, we will use value, shapes, and color to create strong portraits with charcoal, gouache, and watercolor pencils. Along with traditional methods we will explore contemporary approaches to portraiture, with differing uses of format, composition, and color schemes.

ARTS220701
Urban Design for Complexity and Sustainability
Littell, Matthew
Fall 2023
The course explores the changing demands on urban environments in the twenty-first century and the newest policies, technologies, and design approaches that are being developed to address them. Topics will include analyses of the factors that shape the physical form of cities, including zoning and regulatory contexts, real estate development patterns, transportation infrastructure, environmental challenges, and aesthetics. The material will be introduced as case studies and surveys, with presentations by design professionals, city officials, and real estate developers. Students will gain literacy in zoning, real estate metrics, planning, and issues related to architectural design and large scale urban design. The semester will conclude with a final project synthesizing many of the topics covered.

ARTS221001
Intermediate 3-D: Space and Form
Della Lucia, Catherine
Fall 2023
This course offers an in-depth examination of sculptural and spatial concepts ranging from objects to installations, modular construction, site-specific works, and more. In addition to woodworking and alternative materials, students will explore 3-D printing and computer aided drawing to envision and create 3-D objects and spaces. Through hands-on work, critique and site visits, students will be encouraged to refine their artistic vision and grow in their understanding of how space and material function in contemporary culture. Highly recommended for students pursuing the Architectural Studies concentration.

ARTS221101
Ideas in Contemporary Art
Amalfitano, Lelia G
Fall 2023
This course is designed to foster an understanding of the most recent movements in contemporary visual art. Regular visits to galleries and museums serve as a basis for lectures and class discussions. Reading assignments are geared to set the works under discussion in a historical and theoretical context. The course will stress the relevance of the material under study to studio practice. Students are expected to complete reading and written assignments as well as a visual project.

ARTS221601
Photography: Studio Lighting
Jackson, Jonathan
Fall 2023
This advanced level photography class will show students how to use lighting as a tool for photographic production. Students who have taken at least one previous photography course will learn how to light for the studio and location using both strobe setups and LED continuous lighting. An introduction to the history of the studio and how lighting revolutionized the still image will also be a large theme of this course.

ARTS223001
Video Art
Friedman, J Georgie
Fall 2023
This course introduces video as a medium for artistic expression and conceptual inquiry. Hands-on instruction in camera composition, lighting, sound, and editing allows students to produce individual projects which explore a range of approaches and strategies including experimental, animation, and installation. Recent and historical trends in the medium are covered through the viewing of work by media artists since 1965.

ARTS223501
Intermediate Digital Art: Animation
Friedman, J Georgie
Fall 2023
This course will offer an introduction to understanding new and experimental approaches to creating animations. Through screenings, class discussions, and critiques students will analyze aesthetics, concepts and harbor their own, to be made apparent in their assignments. In learning the time-based program Adobe After Effects students will learn how to edit, layer, create, and generate material. Students will gain an understanding of animation, motion graphics, and post-production techniques. Areas covered include gifs, storyboarding, special effects, text animation, and short-form narrative.

ARTS225001
Graphic Design
Reeves, Brian A
Fall 2023
This course is an immersive project-based introductory overview of concepts, contexts, tools, and techniques useful in solving a wide range of contemporary design problems, including logos, business cards, propaganda posters, multi-page documents, data visualizations, webpage designs, app wireframes, and proposals for site-specific graphics. Beyond the necessary focus on software, including Adobe InDesign, Illustrator, and Photoshop, the course will incorporate discussion and application of typography, color theory and other 2D design concepts affecting how subject matter is perceived. Students will solve problems on behalf of themselves and choose one or more other clients whom they'll strive to serve.

ARTS330601  
Drawing 3: Expanded Practice  
Austen, Hartmut  
Fall 2023  
Fresh ideas and approaches to drawing are essential for the creative development of a department and its students. This class will explore both traditional and new conceptions of what drawing can be. We will conduct our investigation using traditional materials as well as new media in the service of crossing and pushing established boundaries. Utilizing and deepening our understanding of "mark-making' we will further explore drawing's breath and expanse across disciplines as well as its potential to expand on the what it means to 'draw from observation'."

ARTS332101
Painting 3: Layered Image
Lacey, Sharon
Fall 2023
This is a hands-on painting course that explores ways to develop and construct new imagery. We will seek challenging approaches to the organization and composition of painting space through layered and juxtaposed images. The many possible sources for imagery may include, but are not limited to, personal memorabilia, cultural references, museums of science and natural history, text and the internet. Class time is organized around painting, complemented by slide lectures, critiques, readings, and gallery visits.

ARTS333001
Pandora's Box
Ivy, Candice M
Fall 2023
This is an all media (painting, drawing, photo, collage) intermediate level studio class. The class will use myth, fable, and fairy tales to generate ideas for art making. Students should have taken at least one studio class in their preferred medium. In addition to in-class studio work there will be assigned readings, class critiques, and slide lectures as well as studio, museum, gallery visits, and a final portfolio review.

Credits: 3
Room and Schedule: Devlin Hall 413 W 09:00AM-12:00 Noon
ARTS334701
Costume Design
Burgess, Quinn M
Fall 2023
Students are not required to have advanced drawing skills to take this class. There are several
class sessions devoted to learning and practicing drawing and painting techniques. The art of
costume design integrates artistic imagination with the practical concerns of theatrical
production. The course is designed to help students develop the fundamental skills used by
costume designers, focusing particular attention on character analysis, period research, and
visual communication. The course will include a series of exercises and projects to develop skills
in figure drawing, rendering in various media, fabric selection and color. Students will learn how
to communicate character, mood and style through costume following two learning tracks: (1)
developing the concept and theory of the design and (2) communicating the design through
figure drawing and rendering.

ARTS110203
Painting I: Foundations
Lacey, Sharon
Spring 2024
This is an introduction to the materials, methods and vocabulary of painting. The course uses observation and learning to see as the cornerstone for painting, but involves expression and abstraction as well as representation. The emphasis is on making the painting come alive rather than on copying. Students are expected to paint in the studio during class and to complete outside assignments. Critiques, slide lectures, and museum visits are integral parts of the course. This course incorporates historical components and writing assignments.

ARTS110301
Issues and Approaches to Studio Art
Gallagher, Sheila E
Spring 2024
This course is intended for Studio Majors and Minors and serious students with previous studio experience. This course enables students to develop skills and ideas by exploring objective, subjective, and conceptual approaches to a variety of media. Practical exercises include live models, scenarios, memory, and imagination. Students develop skills and confidence by exploring a variety of ideas and techniques in preparation for a more individually directed approach in subsequent courses. Discussions and group or individual critiques develop students' critical and analytical skills and provide an open forum for students to bring questions and problems for exploration.

ARTS110401
Design: Seeing Is Believing
Weisberg, Debra
Spring 2024
Seeing is Believing is a hands-on class that will help open the door to the mystery behind effective and engaging visual decision making. Do you find yourself using ambiguous gut feelings to make something that looks "good" without applying meaningful criteria? Using a variety of approaches and materials including photography, charcoal, and collage, assignments, exercises, and field trips are designed to strengthen visual acuity and the ability to communicate dynamically and creatively. This class is designed for both advanced and entry-level students with 2-D and 3-D assignments providing enough flexibility to meet each student at whatever level they are.

ARTS110501
Making Prints/Making Books: An Introduction to Printmaking and Book Arts
Stigliano, Stephanie
Spring 2024
In this course, students will be introduced to the world of printmaking and book arts through practical, hands-on assignments. Students will learn to make relief prints, and will leave the class with a book designed from their prints. Art in book form tells a story with words, images, structure, and material. The developmental process of making a print is akin to the building of a narrative. Both of these graphic arts have existed in tandem throughout history. They are ways to communicate ideas to a broader public, so it makes sense to explore them together in the classroom. Students who are just learning to draw and accomplished draftsmen can both benefit from making prints and books. Each assignment will balance technical, conceptual, and formal goals. We will discuss the design basics of line, shape, texture, light and shadow, space, and composition. The printmakers will create series, sequences, and variations on a theme. We will look at books and prints from different eras and cultures, and take advantage of the college's numerous collections. There will be written components, such as an observational response to a single print and a reflection on an individual book work. The students will present their artwork as the focus of group discussion and critique. Additionally, they will receive individual feedback during each class meeting.

Would you like to be innovative in whatever you pursue? Innovation is about solving important and complex problems to create value for the greater good. Innovating through design thinking is a structured, human-centered process for creatively solving problems, which can be adopted by anyone. In this foundational course we will introduce the mindset, process and methods at the core of design thinking. Students will see inspiring case studies, hear from cutting edge practitioners, and work on a project to internalize this learning. Students will discover design thinking is a practical toolkit that helps them reliably innovate in the face of changing social needs, business disruptions, and technology shifts.

An introduction to sculpture and 3 dimensional thinking, this course we will use a variety of materials including paper, wood, organic material, found objects, and light to explore concepts around materiality, nature, play, objecthood, and what it means to be a human in space. Students will be introduced to a variety of skills such as woodworking, 3-D printing, and model making. Through critiques, weekly discussions, reading assignments and field trips, students will develop an appreciation of themselves as people who think through making and the role of sculpture and 3-D thinking in society. Highly recommended for students pursuing the Architectural Studies concentration.

ARTS114101
Ceramics I
Cooper, Mark
Spring 2024
This course will deal with all phases of ceramics from slab construction to bowl making and a good deal of effort will go into considering a variety of sculptural possibilities at a foundation level. This course covers the broadest range of ceramic techniques and information. The emphasis in the second semester will be on combining the various techniques and concepts acquired previously into a working order, as well as an exposure to additional technical and conceptual information. Those students starting ceramics in second semester will be given individual assistance in beginning techniques.

**Perspectives on Art: Art and the Environment**

**Burns, Jennifer L**

**Spring 2024**
How does the experience of art contribute to a life of purpose and meaning? What do the various forms of art have in common, and how do they differ? What practices and habits constitute meaningful engagement with art? How have aesthetic values and concepts transformed throughout history? What is the nature of artistic creation, and how is it shaped by shifting understandings of the human person? What role does art play in the formation of the values and principles, now and at other times and places? Over the course of the year, these and other enduring questions about art will be addressed by four connected courses: a year-long philosophy course, paired with a literature course in one semester, and an art course in the other. Approaching shared questions from these different perspectives will disclose not only the limits of each perspective, but also the ways in which each perspective serves to supplement and transform the others. The result will be not only a wider and deeper understanding of art, but also growth in the capacity for aesthetic experience. This is Part II of a year-long course.

Drawing the Figure (Drawing II): Observation to Expression
Chong, Sammy
Spring 2024
Together we will venture into a world of the body as represented through drawing materials on 2D surfaces. You will learn techniques and approaches to drawing the figure and will work in the studio from a live model. Studio work include: drawing the body; revise those ideas; developing finished drawings; researching historical and contemporary innovations and doing creative copies of these master works; working from memory and contextualized imagination; translate sensory experience through the representations of the body.

ARTS221001
Intermediate 3-D: Space and Form
Della Lucia, Catherine
Spring 2024
This course offers an in-depth examination of sculptural and spatial concepts ranging from objects to installations, modular construction, site-specific works, and more. In addition to woodworking and alternative materials, students will explore 3-D printing and computer aided drawing to envision and create 3-D objects and spaces. Through hands-on work, critique and site visits, students will be encouraged to refine their artistic vision and grow in their understanding of how space and material function in contemporary culture. Highly recommended for students pursuing the Architectural Studies concentration.

Public Art: The Design Process
Eduardo, Pablo
Spring 2024
This course will provide an introduction to the process of creating public memorials. It will explore how and why communities build public memorials by looking at other public works in Boston and beyond. The course will look at all the components that go into creating monuments and public spaces focusing on the design and design process, ultimately working on a case study to produce a plan for a public art project from thinking about what the community requirements to the conceptual design, construction, and installation. The design process and implementation of the design will rely on problem solving and critical thinking supported through lectures, discussions, presentations, and reading.

ARTS225001
Graphic Design
Reeves, Brian A
Spring 2024
This course is an immersive project-based introductory overview of concepts, contexts, tools, and techniques useful in solving a wide range of contemporary design problems, including logos, business cards, propaganda posters, multi-page documents, data visualizations, web page designs, app wireframes, and proposals for site-specific graphics. Beyond the necessary focus on software, including Adobe InDesign, Illustrator, and Photoshop, the course will incorporate discussion and application of typography, color theory and other 2D design concepts affecting how subject matter is perceived. Students will solve problems on behalf of themselves and choose one or more other clients whom they’ll strive to serve.

ARTS331901
Advanced Digital Media, Moving-Image Projects
Friedman, J Georgie
Spring 2024
This class is for advanced digital-media art and film students working in any moving-image medium (video art, experimental film, animation, programing-based imagery, video and performance, etc.) to refine and develop their ideas, skills, and presentation methods. This class is highly recommended for all Art Majors/Minors who want to incorporate moving-image elements into their thesis work. Though a variety of advanced techniques in Adobe Premiere, After Effects, and other programs will be demonstrated, students are REQUIRED to be proficient with the equipment and programs used in their type of moving-image production. Based on individual goals set in the beginning of the semester, students are expected to complete 3-4 short to medium pieces, or one larger piece over the semester. Students are asked to investigate methods for moving-image presentation and viewer experience/interaction beyond the traditional "movie" screen or monitor, including: multi-channel works; object-based or site-specific video installations; interactive pieces (triggered by motion, sound, or physical inputs); or mobile based pieces that utilize geo-location or augmented reality; etc. Based on a students goals, independent research and skill building may be required. Class sessions will be a mix of screenings, reading discussions, technical demonstrations, in-class work time, peer workshopping, and class critiques of students' projects. Artist talks or exhibition visits may be assigned, based on local event programming. The goal of this class is for students to refine their concepts, polish their formal and technical skills, and make deliberate presentation choices, so all elements add meaning to their moving-image works.

ARTS332801
Senior Minor Project
Austen, Hartmut
Spring 2024
This course is limited to Studio Art Minors in their senior year or by permission of the instructor. This course comprises hands-on studio work and readings that address contemporary issues in the visual arts. It is an upper level class for those with a serious interest in art making and visual thinking. Students are expected to work in a medium of their choice with which they are familiar. Studio assignments will be developed out of the issues explored in the readings. Students are expected to produce a body of studio work and to make an oral presentation that situates their work in relation to the topics under investigation.

**ARTS333501**  
**Advanced Digital Design: Designing Spaces**  
**Cook, Morgan M**  
**Spring 2024**

Preference will be given to majors and minors in Studio Art. The computer is one of myriad facilitators of the output of intellectual design ideas, but is by no means a creator of digital design content. This course begins with that notion and will work as a hybrid: equal parts digital skills workshop where software skills are tested and evaluated -- and artists atelier where design ideas, both articulated and ineffable, seek meaningful expression. Course content will draw from the fields of art, photography, film, graphic design, industrial design and architecture. In addition to works of two dimensions, this course will explore the translation from digital design to physical object.

**Credits:** 3  
**Room and Schedule:** Devlin Hall 401F W 06:00PM-09:00PM  
**Satisfies Core Requirement:** None  
**Prerequisites:** ARTS1156 or ARTS2250 or permission of the Instructor. Adobe Creative Suite knowledge.  
**Corequisites:** None
ARTS336101
Intermediate Photography: Conceptual and Studio
Muldowney, Greer R
Spring 2024
This production course explores the potential of the photographic medium through both color and black and white pictures. Working with current photographic digital imaging technology and techniques, students will advance their skills in digital-image capture and high-quality output as well as analog printing. Lectures and assignments will concentrate on both traditional photographic-based picture making and digital technologies. Students will be expected to develop their own project ideas and to work in series. This course requires additional work outside of class time.

ARTS338501
Independent Work I
Engstrom, Courtney Marie
Spring 2024
A course allowing students who possesses sufficient background in a chosen area to progress to a higher level or to investigate a more specialized area than other courses allow. The student works independently, under the direction of a member of the Department. These studies are normally directed by the full time faculty. Independent work requires weekly meetings with Professor Cooper and students will work on projects that will expand upon their efforts in.

**Credits:** 3  
**Room and Schedule:** By Arrangement  
**Satisfies Core Requirement:** None  
**Prerequisites:** Normally students should have exhausted all course work in the area they choose to do independent work. or Permission of Department  
**Corequisites:** None  
**Cross-listed with:** None  
**Frequency:** Every Fall, Every Spring  
**Student Level:** Undergraduate  
**Comments:** None

Room and Schedule: By Arrangement
ARTS370801
Advanced Film Photography
Jackson, Jonathan
Spring 2024
This course is designed for students looking to develop an advanced practice in film photography through a contemplative semester-long portfolio project. This portfolio project will help students engage in a critique of the photographic essay, a form developed largely in the 20th century through the exhibitions of western photography. Through learning to use medium and large format cameras, students will gain advanced skills in compositional control, creative focusing, and image shape. Technical topics covered in this course include: using the view cameras movements for composition (tilt, swing, shift, rise, and fall), learning medium format film development, sheet film development, advanced darkroom printing, digital scanning, and inkjet printing workflows. In addition to extending students' imaging practice, students will be exposed to historic photographs through visits to prominent photography collections and exhibitions in the Boston area.

Credits: 3
Room and Schedule: Devlin Hall 11 Th 09:00AM-12:00 Noon
Satisfies Core Requirement: None
Prerequisites: Prerequisite: ARTS 1161 Introduction to Photography I, or permission by the instructor.

ARTS371201
Graphic Design II
Reeves, Brian A
Spring 2024
Expanding upon the concepts and techniques of the introductory Graphic Design course, students engage in experimentation, revision, and fine-tuning as they propose, then collaborate to develop personal projects and an exhibition catalog to be published at the end of the semester. In addition to continued practice using Adobes InDesign, Photoshop and Illustrator, the course provides an immersion into creating type using open-source-type design tools. Through readings, image lectures, discussions, and critique, students gain a deeper understanding of type and design principles as they mine their own interests for their individual projects.

THTR101101
Theatre Production Lab I: Scenery Run
Swift, Russell L
Fall 2023
The Theatre Production Run Labs will introduce students to the skills necessary to rehearse and perform the technical duties needed to produce a stage production. Through actual hands-on practice, students will be allowed to develop their abilities in the areas of theatre production related to scene shifting, prop running, rigging, and performance needs. Students will work on a departmental production during the semester. The work that students do on that production will vary by student and will be determined by the needs of the production and may evolve during rehearsal. Students may do multiple labs in a semester but they must be in different areas.

THTR102101
Theatre Production Lab II: Scenery and Paint Prep
Swift, Russell L
Fall 2023
The Scenery Construction and Scenic Paint Prep Lab will introduce students to the skills necessary to construct, rig, and load-in scenery; layout and paint scenery; be introduced to the variety of tools and techniques used in scene painting and construction. Through actual hands-on practice, students will be allowed to develop their abilities in the areas of theatre production. Skills will be developed in construction techniques that include wood working, metal working, fabric manipulation, and rigging, design layouts, painting on large scale, and more. Safety procedures that relate to these areas will be taught and practiced. Students will work on departmental productions during the semester. The work that students do will vary and will be determined by that student's individual abilities and interest, as well as the needs of the specific production that we are working on. Discuss paint or construction preferences with the instructor. Students will complete 26 hours of lab work over the course of the semester. No previous experience is required.

**THTR102701**
Theatre Production Lab II: Dramaturgy
Mohler, Courtney
Fall 2023
The course will be based on the practical application of Dramaturgy Basics: THTR2240. The major emphasis is on the practice and application of the art and science of dramaturgy. Students will apply the knowledge of Dramaturgy Basics to a Theatre Department production. Students will implement typical dramaturgical tasks and receive guidance and feedback on their execution. More importantly, the lab will frame the dramaturgical point of view so students will be able to effectively navigate the role in production. Over the course of the semester students will work on: Script selection and analysis, production dramaturgical research and response, in rehearsal practice and protocol, audience contact, program notes, lobby display and talk backs, new play development, building a theatrical season, and civic engagement.

THTR103901
Theatre Production Lab III: Assistant Stage Manager
Traub, Adele N
Fall 2023
Every department production has two or more assistant stage managers. These students help the stage manager to run rehearsals and are in charge of backstage during performances. ASMs must be at many of the regular rehearsals and at all of the technical and dress rehearsals and performances for the show that they are assigned. ASMing counts as a one credit lab. While it takes a little more time than other labs, you learn how all the theatrical pieces of a show fit together. This lab requires department permission; however, there are no majors only restrictions and no experience is necessary to assistant stage manage a show.

**THTR104901**  
**Advanced Production Lab: Stage Manager**  
**Traub, Adele N**  
**Fall 2023**  
Once students gain experience as an assistant stage manager, they may advance to the two credit Stage Management lab. The stage manager works alongside the director on a production and is in charge of organizing rehearsals, communicating with the production team, and running performances. Stage managers plan each rehearsal with the director, create rehearsal schedules, keep track of blocking, costume and prop needs, and distribute rehearsal reports to theatre staff and designers. Stage managers are assigned at the end of the previous academic school year to stage manage one of the six Theatre Department productions. This lab requires department permission and significant production experience. Stage managers at BC work alongside students and professionals alike and are considered leaders within the department.

This course is designed to develop the student's knowledge and experience of dance as an art form. The elements of dance used in ballet, modern and jazz will be introduced along with the principles of composition. The aesthetics of dance as an art form will also be studied. Students will be reading texts as well as viewing dance works in live performance and on video. This course will provide a groundwork for students who wish to do further work in technique, composition, and performance.

THTR112201
Ballet: Pointe I
Takaishi, Amane
Fall 2023
This course is designed to expand technique on pointe. However, students without pointe experience prior to the course are welcome to take the class on flat shoes and may go on pointe during the warm up at the barre. The course aims for all students to expand on technique, increase artistic expression, and build knowledge of ballet terms. The class structure is divided into three parts: the first part of the class includes warming up on the barre, such as roll-ups and sous-suss. Some foundational steps, such as echappe and pas de bourree are introduced. The second part of the class, which takes place in the center, is dedicated to building strength and maintaining the alignment of the foundational positions. The last part of the class focuses on learning the choreography of ballet repertoires to develop artistic expression as a performer. Prior experience en pointe is preferred. Students with no pointe experience may be permitted to take the course after talking to the instructor. Students must provide their own pointe shoes and have them on the first day of class.

Ballet I
Takaishi, Amane
Fall 2023
This course is designed to challenge both the experienced and beginner dancer. Individual attention will be given with the goal of perceiving the technical and artistic aspects of dance as a performing art. Each class will incorporate barre and center work with phrases appropriate to the individuals in the class. Students will become familiar with the vocabulary and the historical background of ballet. Work in anatomy, kinesiology, costume design, and music will be introduced. Dress code will be leotard and tights or unitard, and ballet shoes. A pianist will accompany each class.

Ballroom Dance: Mid-Nineteenth Century
Burgess, Quinn M
Fall 2023
Students in this course will learn a selection of mid-19th century ballroom dances such as the waltz, the polka, a quadrille, and country dances such as the Virginia Reel. In addition, students will connect with the past through an exploration of topics such as womens and mens fashion, etiquette, and the physical world of the ballroom. Students will be asked to synthesize the information contained in the course though the embodiment of a character that will be presented in class. These elements will encourage each student to envision the past, bringing it to life with an understanding of the relationships between dance, etiquette, fashion, and the culture of the period.

Elements of Theatrical Design
Adelberg, Jeff; Burgess, Quinn M; Tiala, Crystal
Fall 2023
This course is designed for majors and minors. Minors, please get permission from Theatre Department to enroll. This course introduces students to the design and composition of the stage: scenic, lighting, costume, and sound. By the end of the class students will have a working knowledge of the processes involved in design and will have the ability to effectively compose and design visual and auditory components of a performance. The class will utilize creative and collaborative processes that can be applied to any creative work. It is recommended for anyone interested in design and directing. Students must also enroll in the associated one-credit lab THTR1018. Required for Theater Majors.

THTR117201  
Dramatic Structure and Theatrical Process  
Cummings, Scott T  
Fall 2023  
This foundational course provides a thorough introduction to theatre and drama study. It is geared towards, though not limited to, Theatre majors (or prospective majors) in their first year. Dramatic texts are studied as blueprints for performed events. Students will read a wide range of plays in order to develop play analysis skills and to gain an awareness of how structure shapes meaning. Fundamental aspects of theatrical process and production are also taken into consideration.

THTR160301
Perspectives on Art: Contrasting Cultures and Societies
Hecht, Stuart J
Fall 2023
How does the experience of art contribute to a life of purpose and meaning? What do the various forms of art have in common, and how do they differ? What practices and habits constitute meaningful engagement with art? How have aesthetic values and concepts transformed throughout history? What is the nature of artistic creation, and how is it shaped by shifting understandings of the human person? What role does art play in the formation of the values and principles, now and at other times and places? Over the course of the year, these and other enduring questions about art will be addressed by four connected courses: a year-long philosophy course, paired with a literature course in one semester, and an art course in the other. Approaching shared questions from these different perspectives will disclose not only the limits of each perspective, but also the ways in which each perspective serves to supplement and transform the others. The result will be not only a a wider and deeper understanding of art, but also growth in the capacity for aesthetic experience.

THTR220901  
Stage Combat  
Flanagan, Sarah Susan  
Fall 2023
A physical acting course in the performance of safe, dramatically effective Stage Combat. This course introduces students to fundamental principles of unarmed stage combat (particular focus on falls, slaps, and grappling) before focusing on stage combat with a sword. In addition to unarmed and single sword techniques, students will also learn how to approach theatrical violence safely, and how to take care of themselves and their scene partners, and when necessary how to be advocates of their own safety in the professional world. This course will allow students to meet all eligibility requirements for a Skills Proficiency Test (SPT), and ends in the opportunity to perform an adjudicated SPT before a Fight Master of the Society of American Fight Directors. The S.A.F.D. is an internationally recognized, non-profit organization dedicated to promoting safety and fostering excellence in the art of stage combat.

Acting III- Meisner Technique
Riggin, Patricia
Fall 2023
Acting III explores the essential principles of acting using the methods developed by Sanford Meisner and William Esper. Through a progression of structured improvisations, the actors ability to work moment by moment and to truthfully live in those moments is developed. These exercises are designed to stimulate impulses, sharpen concentration and listening skills, and develop the imagination, spontaneity and emotional skills of the actor. During the semester, students apply the expertise acquired through these exercises to scene work.

THTR334701
Costume Design
Burgess, Quinn M
Fall 2023
Students are not required to have advanced drawing skills to take this class. There are several class sessions devoted to learning and practicing drawing and painting techniques. The art of costume design integrates artistic imagination with the practical concerns of theatrical production. The course is designed to help students develop the fundamental skills used by costume designers, focusing particular attention on character analysis, period research, and visual communication. The course will include a series of exercises and projects to develop skills in figure drawing, rendering in various media, fabric selection and color. Students will learn how to communicate character, mood and style through costume following two learning tracks: (1) developing the concept and theory of the design and (2) communicating the design through figure drawing and rendering.

THTR336201
Playwriting I
Cummings, Scott T
Fall 2023
This writing-intensive course offers a practical introduction to the art and craft of writing for performance. Students will engage in numerous writing exercises that highlight the special demands and opportunities of writing for the stage. Emphasis is placed on finding ways to contact and release the theatrical imagination and on mastering the basics of writing a solid dramatic scene. Exemplary plays by established playwrights will be studied as appropriate, but the overwhelming emphasis is on student writing.

**Creative Dramatics**

**Jorgensen, Luke R**

**Fall 2023**

This class investigates the power of drama to educate, inspire and empower the individual. The course focuses on drama pioneers whose work crosses over borders between the fields of education, theater, drama therapy and social justice. This is a hands-on investigation of theories and techniques and will include working with local middle school students to observe and apply ways of making drama with adolescents. Creative Dramatics is essential for activists, directors and for teachers in obtaining additional certification to teach drama. Subjects include storytelling, improvisation, Commedia Dell'Arte, drama therapy, Theatre of the Oppressed, and Theatre for Youth. It examines the work of Viola Spolin, Augusto Boal, Winifred Ward, Jerry Grotowski, and Jacob Moreno.

THTR339201
It’s Not a Moment it’s a Movement: BIPOC Plays for the 21st Century
Mohler, Courtney
Fall 2023
In this course, students will analyze dramatic scripts, performances, and manifestos created by BIPOC dramatists and theatre makers of the 21st century. Lectures, group work, writing assignments, and in-class discussions will explore how theatre can offer insight into the most salient challenges facing our world. Focusing on new North American works, students will read plays that address racism, police brutality, sexism, queerphobia, climate change, gun violence, classism, and xenophobia. Of equal importance, many of the plays we will read will also imagine more equitable futures, offer solace of community, and create space for liberation. To understand the significance of the playwrights thematic and stylistic choices, we must understand the cultural and political contexts in which they write. To this end, we will critically engage with selected historical and contemporary commentary that illuminate key aspects of the works.

THTR554001
Theatre Practicum in Design
Tiala, Crystal
Fall 2023
This is a senior project involving the design of sets, lights, costumes and/or sound for a departmental mainstage production. Candidates are selected in the second semester of their junior year and will discuss the scope of the project with the faculty. Consultation with the faculty will determine whether the student enrolls in the Practicum in the fall or the spring semester of their senior year.

**Credits:** 3
**Room and Schedule:** BY ARRANGEMENT
**Satisfies Core Requirement:** None
**Prerequisites:** Consideration for enrollment will be given to those students who have successfully completed the design sequence THTR1130-1140 the relevant upper level design course in scenic, lighting or costume design and a student workshop design or Permission of Department

Theatre Courses: Spring 2024

THTR101101
Theatre Production Lab I: Scenery Run
Swift, Russell L
Spring 2024
The Theatre Production Run Labs will introduce students to the skills necessary to rehearse and perform the technical duties needed to produce a stage production. Through actual hands-on practice, students will be allowed to develop their abilities in the areas of theatre production related to scene shifting, prop running, rigging, and performance needs. Students will work on a departmental production during the semester. The work that students do on that production will vary by student and will be determined by the needs of the production and may evolve during rehearsal. Students may do multiple labs in a semester but they must be in different areas.

Production Lab: Acting Practicum
Riggin, Patricia
Spring 2024
Theatre majors who have been cast in a role of significant size in a faculty directed Theatre Department production may use the role for one credit counting towards their production lab requirement. The actor must perform all duties of the role in a professional manner. The director of the production will typically serve as the teacher of record. Selected roles counting toward credit will be determined by the Theatre Department in advance of auditions.

The Scenery Construction and Scenic Paint Prep Lab will introduce students to the skills necessary to construct, rig, and load-in scenery; layout and paint scenery; be introduced to the variety of tools and techniques used in scene painting and construction. Through actual hands-on practice, students will be allowed to develop their abilities in the areas of theatre production. Skills will be developed in construction techniques that include wood working, metal working, fabric manipulation, and rigging, design layouts, painting on large scale, and more. Safety procedures that relate to these areas will be taught and practiced. Students will work on departmental productions during the semester. The work that students do will vary and will be determined by that student's individual abilities and interest, as well as the needs of the specific production that we are working on. Discuss paint or construction preferences with the instructor. Students will complete 26 hours of lab work over the course of the semester. No previous experience is required.

Theatre Production Lab II: Dramaturgy
Mohler, Courtney
Spring 2024
The course will be based on the practical application of Dramaturgy Basics: THTR2240. The major emphasis is on the practice and application of the art and science of dramaturgy. Students will apply the knowledge of Dramaturgy Basics to a Theatre Department production. Students will implement typical dramaturgical tasks and receive guidance and feedback on their execution. More importantly, the lab will frame the dramaturgical point of view so students will be able to effectively navigate the role in production. Over the course of the semester students will work on: Script selection and analysis, production dramaturgical research and response, in rehearsal practice and protocol, audience contact, program notes, lobby display and talk backs, new play development, building a theatrical season, and civic engagement.

THTR103901
Theatre Production Lab III: Assistant Stage Manager
Traub, Adele N
Spring 2024
Every department production has two or more assistant stage managers. These students help the stage manager to run rehearsals and are in charge of backstage during performances. ASMs must be at many of the regular rehearsals and at all of the technical and dress rehearsals and performances for the show that they are assigned. ASMing counts as a one credit lab. While it takes a little more time than other labs, you learn how all the theatrical pieces of a show fit together. This lab requires department permission; however, there are no majors only restrictions and no experience is necessary to assistant stage manage a show.

THTR104901
Advanced Production Lab: Stage Manager
Traub, Adele N
Spring 2024
Once students gain experience as an assistant stage manager, they may advance to the two credit Stage Management lab. The stage manager works alongside the director on a production and is in charge of organizing rehearsals, communicating with the production team, and running performances. Stage managers plan each rehearsal with the director, create rehearsal schedules, keep track of blocking, costume and prop needs, and distribute rehearsal reports to theatre staff and designers. Stage managers are assigned at the end of the previous academic school year to stage manage one of the six Theatre Department productions. This lab requires department permission and significant production experience. Stage managers at BC work alongside students and professionals alike and are considered leaders within the department.

**THTR112601**
Ballet II
Takaishi, Amane
Spring 2024
This course is designed for beginners, but all levels are welcome to refine details of the ballet technique, which are essential for Ballet III and Ballet IV. The goal of the course is to work on essential ballet skills, such as proper posture and correct placement of arms, legs, and head. During barre exercises, which are dedicated to building strength and improving flexibility, students accomplish the accurate alignments of ballet positions. This training complements center practice, which is followed by traveling exercises across the floor. Training longer phrase of exercises contributes preparing students to learn choreography of ballet repertories; a solo variation and a group dance from classical ballet, such as the Sleeping Beauty.

THTR113001
Elements of Stagecraft
Burgess, Quinn M; Swift, Russell L; Tiala, Crystal
Spring 2024
This course is required for theatre majors and minors, but it is also open to interested non-majors by permission. Minors please get permission from Theatre Department for registration. Elements I introduces the history, theory, and practice of technical theatre production through lectures, discussions, observation and hands-on experience. The class consists of two paths of learning. The first will be practicing the necessary skills for the preparation of scenery, props, costumes and lights. Students will be required to learn to safely rig scenery, use many power tools, hang and focus lighting equipment, and cut and stitch fabric. The second path develops literacy in the visual design elements as it applies to theatre and theatrical spaces. A number of exercises will expand your visualization and creative skills. Required for Theater Majors and Minors.

THTR113101
History of Ballet
Takaishi, Amane
Spring 2024
This course introduces the history of ballet, focusing on the late 16th century to the 19th century. Students learn the origin of ballet and how it was developed into different styles; court dance, romantic ballet and classical ballet. Study materials, such as reading dance articles and watching performance records provide an opportunity for students to explore the historical, political and cultural influence of ballet productions created within each style of ballet. This course includes a theatre trip to attend a live performance.

THTR113201
Ballet IV
Takaishi, Amane
Spring 2024
This course is designed for students at advanced level. Ballet I, II and III are recommended to take prior to the course. The aim of the course is to improve ballet technique and performance skills at advanced level. The course focuses on details of technique, including maintaining turnout in transition steps as well as the main steps. Some of the advanced technique, such as fouett turns are introduced. In terms of performance skills, learning a group dance and a solo variation from ballet repertories, such as *Le Corsaire* and *Don Quixote*, provides an opportunity for dancers to interpret ballet steps through their artistry.

THTR117001
Introduction to Theatre
Lueger, Michael J
Spring 2024
This is a survey course for primarily non-majors. Its aim is to impart an appreciation of the theatre as an artistic and humanizing experience. There will be discussion of the various elements that contribute to the development of theatre as a specialized art form including historical and cultural influences, staging styles and techniques, and the multiple genres of dramatic writing. Several plays illustrating the above will be read and attendance at selected performances is required.

Credits: 3

THTR221101
Improvisation for the Stage II
Arko, Jacqueline A
Spring 2024
Expanding upon concepts learned in Level 1, students will build new skills for sustaining longer scenes with more character development and emotional depth, ultimately learning how to do an entirely self-directed, self-edited "long form" improvisation comedy show.

Credits: 1
Room and Schedule: Robsham Theater 142 F 12:00 Noon-01:50PM

THTR221201
Acting For Directors
Mohler, Courtney
Spring 2024
In THTR 2212 student actors of all levels will work with student directors and the course instructor on ensemble building, rehearsal practices, and staging techniques. Students will develop scene study skills such as identifying character intensions, obstacles, and actions as they work to create open and closed scenes. This course will introduce actors to a variety of directing styles and experiences, and focus on developing productive collaboration between directors and actors.

THTR224701
Makeup Design for the Stage
Burgess, Quinn M
Spring 2024
This course introduces students to basic makeup techniques for the stage. Students will study makeup design principles and develop a mastery of applied techniques. Using the theories of highlight and shadow, and an examination of facial anatomy and how it changes with age, the student will learn to change the look of the face to suit different characters. Emphasis will be placed on character analysis and research, and translating that into a makeup design. Time will also be given to study various styles of makeup (e.g., fantasy, cartoon, period makeup, etc.) and special-effect makeup.

THTR331901
Musical Theatre Performance
Sousa, Larry
Spring 2024
The study of Musical Theatre Technique is learning the tools required to perform this theatrical form with truth and depth. Students will explore the connection between actor, character and material through solo and scene work. The course is divided into three units with each unit focused primarily on one or more specific aspects of Musical performance. Through exercises, group work and coachings, students will develop a thorough understanding of each technique and will have the opportunity to demonstrate their understand in a final performance. By the end of the course, students will have further developed vocal and acting skills, explored what it is to perform in a variety of Musical Theatre styles, enlarged their Musical Theatre repertory, deepened their understanding of the Music Theatre form, and pushed beyond preconceived personal limitations.

THTR337701
Fashion and Decor: A Cultural History
Burgess, Quinn M; Tiala, Crystal
Spring 2024
Trends in fashion and interior decoration simultaneously shape and are shaped by the culture from which they grow. When we look at styles of a particular period, we see reflections not just of personal taste, but also social values, political and economic developments, influence of popular culture, new technology, and the overall mood of the period. Through lectures, discussions and visual research projects, this class will examine trends in fashion and décor as they relate to the cultures of the eighteenth, nineteenth, and twentieth centuries, highlighting the correlation between fashion, decorative arts, architecture, and interior design.

THTR339601
Chekhov On The Stage
Cummings, Scott T
Spring 2024
Anton Chekhov (1860-1904) is one of the world's most beloved dramatists, celebrated for the humanity of his plays and the appeal of his complex characters to actors and directors. This course will study the comic one-acts and full-length major plays of this great Russian dramatist, first in the context of late-19th century Russian theatre and then for their influence on American theatre in the 20th and early-21st century. Attention will be given to Chekhov's short stories, Konstantin Stanislavsky and the Moscow Art Theatre, the Group Theatre and the legacy of Method acting in the U.S., and several contemporary playwrights inspired by Chekhov. Students will write several short papers or reviews, present independent research to the class, and participate in a class-wide performance project at the end of the semester.

THTR446201
Playwriting II
Cummings, Scott T
Spring 2024
Attendance at local productions of new plays is expected. This laboratory course continues the work begun in Playwriting I on an advanced level and a more independent basis. In addition to in-class writing and take-home assignments, students will write a fully developed full-length play or two complete one-acts. The course places particular emphasis on the completion of lively, well-structured, rehearsal-ready scripts, and in that interest, a major revision of a work-in-progress is important.

The New Testament has been an influential and often fundamental source for many modern, Western views of God, nature, human beings, a just society, and the origin and destiny of humanity and the world. An intelligent, serious reading of the New Testament raises most of the enduring questions that have traditionally stood at the center of philosophical and theological debate. Thus, a thorough analysis of texts from the New Testament in terms of the central concerns of the core curriculum will be the primary goal of THEO 1421 Inscribing the Word: The New Testament. Satisfies Core requirement for: Theology (Sacred Texts and Traditions)

THEO143001
Buddhism and Christianity in Dialogue
Petillo, Louis M
Summer 2023
This course is both an introduction to Buddhism and to Buddhist-Christian comparative learning. In early weeks we study concepts and practices of Theravada and Zen Buddhism from Southeast and East Asia. We then explore some areas of Christian thought that can be compared with Buddhism--understandings of faith, God, Jesus, sin, spiritual rebirth, sacramentality, and social ethics. Finally, from Buddhist and Christian perspectives, we focus on one or more of the following topics: spiritual practices of deepening care and discernment, faith-based action, interfaith learning, ecology, and/or feminism. Satisfies Core requirement for: Theology (Sacred Texts and Traditions)

Credits: 3
Room and Schedule: On-line Asynchronous
Satisfies Core Requirement: Cultural Diversity, Theology

**THEO143102**  
**Islam and Christianity in Dialogue**  
**VanZandt Collins, Michael**  
**Summer 2023**  
This course engages the quest for truth and meaning in the faith traditions and practices of Islam and Christianity through the lens of comparative theology. We will use textual, historical, social, cultural, and gender analyses to examine and reflect on understandings of God, scripture, worship, sacred rites and rituals, religious law, and membership in the faith community, in addition to a comparative approach to Biblical and Quranic narratives, characters, and concepts of prophethood and saints, with special emphasis given to Jesus, Muhammad, and the Virgin Mary. Satisfies Core requirement for: Theology (Sacred Texts and Traditions)

**Credits:** 3  
**Room and Schedule:** On-line Asynchronous  
**Satisfies Core Requirement:** Cultural Diversity, Theology

THEO332201
The Neuroscience of Spirituality: Exploring Religion and the Brain
Black, Jessica M
Summer 2023
The brain is an organ of adaptation and such plasticity allows humans the capacity to build and draw upon faith and reason throughout times of stress and the building of resilience. Brain development throughout all life stages will be examined as we consider the following primary question: What does the field neuroscience help us to understand about faith throughout the life span, and what does it leave out? Contexts that confer stress or build resilience are examined throughout the course as students discover how neuroscience and faith converge or diverge in their contributions to understanding of the human experience and its development throughout life’s unique pathways. To engage in this exciting dialogue about larger questions that may integrate these seemingly disparate and often siloed modern and ancient disciplines, students will be exposed to key concepts, definitions and vocabulary in neuroscience and recent advancements in related biological fields such epigenetics. We will then be able to engage in investigating and returning to important questions that may thematically bridge these fields. Through extensive writing, reflection and dialogue students will have the opportunity to deepen their understanding of the relationships among faith, religion, spirituality, and modern science.

Theology Courses: Fall 2023

THEO108801
Person and Social Responsibility I
Troxell, Mary S
Fall 2023
Enrollment limited to freshmen, sophomores, and juniors. The course requirements include ten to twelve hours per week of community service. In light of classic philosophical and theological texts, students in this course address the relationship of self and society, the nature of community, the mystery of suffering and the practical difficulties of developing a just society. PULSE students are challenged to investigate the insights offered by their readings in relationship to their service work. Places in the course are very limited.

THEO109001

**Perspectives on Western Culture I/Perspectives I**

**Floyd, Gregory P**

**Fall 2023**

Freshmen only The course introduces students to the Judeo-Christian Biblical texts and to the writings of such foundational thinkers as Plato, Aristotle, Augustine, Aquinas, Luther, Bacon, Descartes, Hobbes, Locke, Kant, Hegel, and Kierkegaard. The first semester considers the birth of the self-critical Greek philosophic spirit, the story of the people of Israel, the emergence of Christianity and Islam, and concludes with a consideration of medieval explorations of the relationship between faith and reason. Attention will also be paid to non-Western philosophical and theological sources.

THEO134101
Peaceful Conflict Resolution Methods
Nielsen, Richard P
Fall 2023
This course considers conflict resolution methods in several different types of contexts: personal and family, organizational and work, and international peace-making. Among the methods analyzed and practiced in role playing exercises are: methods for resisting win-lose behaviors, methods for developing win-win solutions to conflicts, dialogic methods for developing creative solutions to conflicts, and third party facilitation, mediation, and arbitration methods. Personal skill development as well as careers in conflict resolution are explored. In addition, different types of personal philosophical and spiritual approaches to conflict resolution are considered.

THEO136101
Praying Our Stories
Ponsetto, Daniel P
Fall 2023
Significant experiences of God's presence are often thought of as extraordinary. They are moments we might expect while on retreat, during community worship, or while sitting under the stars. We might assume that to find God we must transcend our mundane life and get to another place. This course will explore how God is in fact more likely, and thankfully, discovered in the ordinary. Ignatian spirituality does not distinguish between secular and sacred, work and prayer, or God and "real life." Instead, it is about finding God in our lived experience and cooperating with God to transform that experience.

THEO140201
God, Self, and Society
Baldelomar, Cesar J
Fall 2023
The purpose of this course is to introduce students to the dynamics of theological reflection in an academic setting. Framed as a quest for truth, transformation, and justice, the course invites students to explore key questions and themes of enduring human significance in conversation with the classic texts, ideas, and practices that animate the Christian theological tradition. Such questions include: What is theology? What is the ultimate horizon of our lives? What does it mean to be human? Who is Jesus Christ? And how can we know and serve the common good?

THEO142001
The Everlasting Covenant: The Hebrew Bible
Jordan, Jeffery V, OFM
Fall 2023
The Hebrew Bible/Old Testament has been an influential and often fundamental source for many modern, Western views of God, nature, human beings, a just society, and the origin and destiny of humanity and the world. An intelligent, serious reading of the Hebrew Bible raises most of the enduring questions that have traditionally stood at the center of philosophical and theological debate. Thus, a thorough analysis of texts from the Hebrew Bible in terms of the central concerns of the core curriculum will be the primary goal of THEO 1420 The Eternal Covenant: The Hebrew Bible. Satisfies Core requirement for: Theology (Sacred Texts and Traditions)

THEO142202
The Sacred Page: The Bible
Kimmel, Joseph
Fall 2023
The Bible has been an influential and often fundamental source for many modern, Western views of God, nature, human beings, a just society, and the origin and destiny of humanity and the world. An intelligent, serious reading of the Bible raises most of the enduring questions that have traditionally stood at the center of philosophical and theological debate. Thus, a thorough analysis of biblical texts in terms of the central concerns of the core curriculum will be the primary goal of THEO 1422 The Sacred Page: The Bible. Satisfies Core requirement for: Theology (Sacred Texts and Traditions)

THEO143001  
**Buddhism and Christianity in Dialogue**  
**Costas, Michael C; Vale, Matthew**  
**Fall 2023**

This course is both an introduction to Buddhism and to Buddhist-Christian comparative learning. In early weeks we study concepts and practices of Theravada and Zen Buddhism from Southeast and East Asia. We then explore some areas of Christian thought that can be compared with Buddhism--understandings of faith, God, Jesus, sin, spiritual rebirth, sacramentality, and social ethics. Finally, from Buddhist and Christian perspectives, we focus on one or more of the following topics: spiritual practices of deepening care and discernment, faith-based action, interfaith learning, ecology, and/or feminism. Satisfies Core requirement for: Theology (Sacred Texts and Traditions)

THEO143201
Hinduism and Christianity in Dialogue
Cornille, Catherine M; Lee, Shin Jae
Fall 2023
It has been said that to know one religion is to know none. In this course, we seek to gain an understanding of two of the major world religions, Christianity and Hinduism, through a comparative and dialogical approach of the ways in which these traditions have come to terms with some of the basic existential questions and religious aspirations of humanity. We will focus on conceptions of evil and salvation/liberation, on ritual practices, ethical principles, and their respective views of one another. Satisfies Core requirement for: Theology (Sacred Texts and Traditions)

THEO143403
Judaism and Christianity in Dialogue
Joslyn-Siemiatkoski, Daniel; Lugonja, John Bosco
Fall 2023
In 1974, the Vatican explicitly called on Catholics to understand Jews as they understand themselves. In our world of dialogue and post-Holocaust repair of relations, Jews similarly ought to understand Christians. This course will explore key topics in the contemporary Christian-Jewish dialogue with the goal of both enabling this understanding of the other and enhancing self-understanding. Students who do not identify with either tradition are welcome to enrich this conversation. Satisfies Core requirement for: Theology (Sacred Texts and Traditions)

THEO170101  
Spiritual Exercises: Engagement, Empathy, Ethics  
Robinette, Brian  
Fall 2023  
This course introduces students to a variety of spiritual exercises that have helped shape the Christian theological traditions of the East and West. Focusing on figures and texts from antiquity to the current era, such a study presupposes that theology is not merely a theoretical enterprise but a way of life. Drawing upon insights from other disciplines (e.g., philosophy, psychology, the arts) as well other religious traditions, the course highlights the perceptual, emotional, and cognitive transformation of the human person or what Ignatius of Loyola, founder of the Jesuits, called care for the whole human person (cura personalis).

THEO172201
The Formation of Early Christian Thought: A Theological Examination
Magree, Michael C, SJ
Fall 2023
How did Greco-Roman philosophy contribute to rational Christian theology? These courses address the enduring question of the relationship between faith and reason. In the early Christian era leading intellectuals attempted to integrate the Jewish and Christian scriptures and traditions with rational philosophy. They employed Greek and Roman philosophy to reflect upon foundational issues in metaphysics, human psychology, epistemology, ethics, and God's action in time. We will examine important concepts, arguments, and theories of ancient pagan philosophers (Plato, Aristotle, Seneca, Epictetus, Plotinus) and trace their adoption and adaptation by leading Christians (Justin Martyr, Origen, Lactantius, Athanasius, Augustine).

Contemplative Responses to Suffering: Buddhism and Christianity

Vale, Matthew

Fall 2023

This is an Enduring Question course and is open to FRESHMAN only. You must also register for the accompanying ARTH1725 How do we respond in healing ways to sufferingboth our own and those of others? Buddhism and Christianity both offer profound contemplative answers to this question: Meditation and contemplative prayer are a part of this healing response. Both traditions offer diagnoses of the inner causes of our individual and collective suffering, and both outline practical paths for transforming those causes through meditation, prayer, and ethical practice. And both give witness (though differently) to the possibility of the radical transformation of human consciousness: from isolation, fear, and self-clinging to communion, peace, and self-gift; from the ups-and-downs of emotional life to a radiant joy, unshakeable even in suffering. On the Buddhist side, we study basic Buddhist doctrine, meditation, nirvana, the bodhisattva, compassion, Zen, and Buddhist thought on ethics and peace. On the Christian theological side, we cover topics from God, creation, incarnation, sin, Jesus preaching, the cross, deification, baptism, Eucharist, contemplation, and Christian responses to violence. No background in Buddhism is required.

Exploring the Mystery of God: A Theological Perspective
Petillo, Louis M
Fall 2023
This is an Enduring Question course and is open to FRESHMAN only. You must also register for the accompanying PHIL1726. The course will explore various perspectives on God in ancient, medieval, and contemporary theological writings. In particular, the course will examine and compare narrative, symbolic, philosophical, and contemplative modes of theological discourse. We will begin with selections from the Hebrew Bible and New Testament where students will encounter narrative and symbolic discourse on God. In the next section of the course, students will investigate the philosophical discourse on God embodied in the works of Augustine, Anselm, and Aquinas. Finally, we will read the writings of Martin Laird who draws on ancient and medieval mystical traditions to offer a contemplative vision of God.

THEO211401
When Gods Begin Again: Intro to African and African Diaspora Religions
McElwaine, Michelle L
Fall 2023
This introductory course examines Indigenous African and African Diaspora religions from an interdisciplinary perspective. We explore Yorùbá and other African religions, along with African Christianity, Islam, Haitian Vodou, Cuban Santería, Brazilian Candomblé, Sango Baptist of Trinidad and Tobago, Rastafari and Obeah of Jamaica, Black American conjure, and Oyotunji Village. Important themes of religions in Africa and the Afro-Atlantic Diaspora are addressed, such as: the veneration of God(s), Spirit(s), Ancestors, and the natural world; divination, initiation, sacred space, and healing; the impact of slavery on conversion and continuity; fetish as a colonial construct; globalization, race, gender, and power. Ultimately, this course encourages students to reevaluate their understanding of Africana religions, recognize diverse cultural practices and ritual knowledge systems, and engage with oral, written and audio/visual texts that underscore the values of these traditions.

THEO216001
The Challenge of Justice
Wambui, Nelly Wamaitha
Fall 2023
This course introduces the student to the principal understandings of justice that have developed in the Western philosophical and theological traditions. Care is taken to relate the theories to concrete, practical and political problems, and to develop good reasons for choosing one way of justice rather than another. The relationship of justice to the complementary notion of peace will also be examined. Special attention is paid to the contribution of Catholic theology in the contemporary public conversation about justice and peace. Problems discussed may include human rights, hunger and poverty, and ecological justice.

Telling Truths III: The Narratives that Shape Our Lives
Hirsch, Kathleen A
Fall 2023

Telling Truths III is an elective course offered by the PULSE Program for Service Learning. As a PULSE elective, students enrolled in the course serve 4 hours per week (in addition to travel time) of in-person service. As we encounter injustice, conflicting visions of "the good," and different moral scales of behavior, rights and responsibilities, it is essential that we become aware of our own foundational narratives. What "wisdom stories" shape the way you think about yourself in relation to others? What narratives do you carry into encounters with conditions, attitudes and beliefs that are different from yours? In this course, students will have a rare opportunity to bring their weekly experience of service into a time of reflection, and into relation to some of the core narratives of the great spiritual traditions. We will read modern mystics, parables, and creative theologians, including: Anne Lamott, Etty Hillesum, Kendrick Lamar, and Parker Palmer. The conversation will continue as we write in and read from our journals, sharing stories and questions. Several short writing assignments will occur through the course of the term; a final, longer piece of substantive "spiritual reflection" will give students the chance to synthesize the fruits of observation, reading, and reflection. The aim of the course is to expand students' familiarity with the great narratives of grace and forgiveness, suffering and hope, as they engage in service, and to provide a setting in which they can become intentional about adopting narratives that will shape their lives.

The Bible and Ecology
Darr, John A
Fall 2023
In this course we will: (1) identify and analyze a variety of Biblical understandings of how humans relate to nature, from the Genesis creation accounts to St. Paul's notion of a liberated creation; (2) evaluate the influences of these Biblical ideas on current trends in theology, ethics, and ecology; and (3) explore ways in which religious world views hinder and/or enhance efforts to protect and preserve the environment.

THEO226001
Modern Jewish Thought
Block, Nicholas
Fall 2023
This course investigates the impact of modernity on Jewish thought and religion. Highlights include readings from Baruch Spinoza, Moses Mendelssohn, Martin Buber, and Susannah Heschel. Modernity necessitated that Jews renegotiate their identity as they came to be defined along religious, national, and racial lines. The rise of the nation-state led Jews to confront a crucial question: how can they belong to both the Jewish people and as citizens of their countries? How can the modern Jew co-exist with religious law and tradition? We will turn to philosophers and thinkers as they addressed the modern historical phenomena of antisemitism, Zionism, the Holocaust, and feminism. Conducted in English.

Capstone: Becoming a Self
Wilkins, Jeremy
Fall 2023
Seniors only. Capstone classes may NOT be taken Pass/Fail. You may take only ONE Capstone class before graduation. A Capstone seminar combines a deep exploration of the self, with a disciplined academic exercise in substantive reading, writing, and discussion, to foster a place to ponder ultimate questions within a community of discourse. This seminar, like all Capstone seminars, invites participants to look both backward and forward. It asks, What have you made of your Boston College education? What has it made of you? It also inquires, How will you carry out the lifelong commitments you have begun to envision? Becoming a Self focuses these questions and goals in a particular direction. Who am I? What will make me happy? Who do I wish to become? What do I owe myself, others, God? Am I called to a special purpose, and how would I discern it? What kind of story do I tell about myself? How much of that story is really my own, and how much have I just drifted into? How do I envision the path from my present self to the self I would like to be in ten, twenty, fifty years? What is the scope, and what are the limits, of my agency to shape myself, or to do good or harm in the world, and how do I respond to circumstances, even very great evils, beyond my control? How do I relate my work and career to my sense of purpose, calling, or desire to be of service? Well explore these questions together through narrative (fiction, diaries, and films), theory, and practices, including some meditative walks, journaling, and the Examen of Consciousness from St Ignatius of Loyola, founder of the Jesuits.

THEO295001
The Ten Commandments
Gillihan, Yonder
Fall 2023
What are the Ten Commandments? Why are there three versions in the Bible? Why are they displayed on the U.S. Supreme Court building, when the Supreme Court has blocked their public display in multiple high profile cases? This class surveys the origin and historical meanings of one of the Bible’s most iconic and frequently cited texts: the Ten Commandments (AKA the "Decalogue," an English term that comes from Greek and means "Ten Laws"). The heart of the class is a ten-week comparative study of major historical interpretations of each of the ten laws. Interpretations that we will consider include ancient writers, Medieval theologians, Catholic and Protestant theologians and Church documents. We will consider how the Ten Commandments have been interpreted from a variety of perspectives, including historical-critical, systematic-construive, in legal theory, and from critical liberationist perspectives, including feminist, Black, queer, and post-colonial. Students will be evaluated on team research and presentation assignments, and on three brief research/reflection essays.

U.S. Catholics: The Old Faith In A New Land
Massa, Mark, SJ
Fall 2023
An undergraduate course focused on the Catholic community in the United States, studying both the "lived religion" of ordinary Catholics in the pews and the important theological contributions of American theologians. The course is organized thematically rather than chronologically, looking at both the ways in which Catholics developed their unique identity within the community, and the ways in which the community as a whole related to the larger culture.

Meaning of Life through Film
Kruger, Matthew C
Fall 2023
This course will explore the meaning of life as a philosophical and theological question through the medium of film. Movies will be paired with readings from theologians and philosophers from various religions and perspectives in order to ask the question of what exactly we are supposed to be doing with our limited time here. We will watch a wide range of films, with works explored from Bergman, Kurosawa, and Varda, to more recent works by Miyazaki, Zhao, and Malick.

THEO310001
Parables in Early Christianity
Roth, Dieter T
Fall 2023
Though parables play an important role in the New Testament and early Christianity, nearly every aspect of the study of parables has been the subject of vigorous disagreement. This course will consider various debated issues including the definition of a parable, the interpretation of parables, and how parables relate to the study of the historical Jesus. Its aim, therefore, is to provide students with the knowledge and tools to better understand early Christian parables and frameworks within which to interpret them.

THEO336001
Living Truthfully: Way to Personal Peace and Social Change
Penna, Anthony
Fall 2023
The primary purpose of this course is to examine the proposition that it is better to tell the truth than tell the lie. Too often, we are tempted to live out an illusion. The personal and social costs of keeping an illusion pumped are steep. Personal peace and courage are born when we settle in on the truth of our identity and dare to live it. In short, this course proposes that the larger life is possible when we come home to the smaller life that defines us as individual women and men.

**Orthodox Christianity in Global Context**  
**Prodromou, Elizabeth**  
**Fall 2023**  
Orthodox Christianity has emerged as a subject of worldwide interest largely within the current context of Russias war in Ukraine, yet Orthodoxys 2000-year history and global scope extend far beyond the present historical conjuncture. This seminar uses social science and historical approaches, insights from policy experts and faith leaders, to provide a broad introduction to Orthodox Christianity in global context. The seminar explores internal and external factors geopolitical, institutional, and religious that help to explain scholarly neglect and policymaking unfamiliarity with an ancient faith tradition and that elucidate Orthodoxys responses to issues of pluralism, human rights, war, and peace.

Queer Theologies: Bodies that don't matter have the floor
Mendoza-Alvarez, Carlos
Fall 2023
This course will explore the narratives that emerged in the Lbgtiq+ community's protests in the streets demanding recognition of their identities and rights. These experiences gave way to political and spiritual thinking that imagines the person and society in new ways. We will also address spirituality, new forms of community and theological narratives that emerge from exclusion as political and spiritual resistance, reshaping the human condition from denied bodies.

THEO440801
After Wrongdoing: Justice or Forgiveness?
Pope, Stephen J
Fall 2023
This undergraduate seminar focuses on theological and ethical responses to wrongdoing, particularly those characterized by justice and those characterized by forgiveness. We will examine the meaning of forgiveness, the significance of repentance, the debate between conditional vs unconditional accounts of forgiveness, the ethics of revenge, the traits of legitimate punishment, the possibility of self-forgiveness, the moral legitimacy of anger and resentment, the relevance of the psychology of forgiveness to the ethics of forgiveness, and the meaning of political forgiveness. While focusing primarily on Christian texts, we will also examine Jewish, Muslim, and secular feminist accounts of forgiveness.

Encounters of Catholic Faith and Belief to Understand Modern China
Carbonneau, Robert Edward

Fall 2023

Most people are surprised to learn that there are at least 10 million Catholics in contemporary China. This course is an historical introduction to understand that Catholic experience. The nineteenth century was a time of European missionary reengagement with Chinese Catholics. Building on the local faith and devotions, European Catholic missionaries sought to strengthen that faith, convert so-called "pagans" and compete with Protestants. This was a time of theological suffering and hope symbolized by the Boxer Uprising martyrs in 1900. The twentieth century describes a new theological opportunity. We will see how American and European missionaries and Chinese Catholics implemented Catholic encyclicals and adapted theological principles to assist Chinese and peoples of the world in the face of famine, environmental disasters, as refugees, and as witnesses to the Catholic faith before and after the establishment of the Peoples' Republic of China in 1949 till after Tiananmen Square in 1989 also seen as a world religions story. Ultimately, this course serves as an introduction to understand how encounters of Chinese theology contribute to contemporary international Catholic theological relationships.

THEO537201

Patristic Greek I
Schatkin, Margaret
Fall 2023
This course is continued in the spring as THEO5373 New Testament Greek II. This two-semester course is designed for the student with no previous knowledge of ancient Greek to develop reading and translating skills in Patristic Greek language by mastering the fundamental principles of Greek grammar and syntax and acquiring a basic reading vocabulary. The student becomes familiar with the meaning of Greek words, their forms and structure, and their customary arrangement in sentences. A secondary goal of this course is to serve as a foundation for further studies in Patristic Greek.

THEO543701
Jewish and Christian Readings of the Bible
Joslyn-Siemiatkoski, Daniel; Langer, Ruth
Fall 2023
This course compares how core themes in the scriptures of Israel have been received, interpreted, and disputed in their classical texts by both the Jewish and Christian communities. It will juxtapose these received readings with contemporary interpretative methods informed by the modern turn to Jewish-Christian understanding. Themes explored include creation, election, covenant, and commandment. This co-taught course will be an intentional exercise in interreligious dialogue.

THEO559901
A Theology of Food: Eating, Drinking and the Eucharist
Bergin, William N
Fall 2023
Eating and drinking are primordial human experiences that nourish individuals, sustain communities and are at the heart of rituals in many religions. In the Judeo-Christian tradition meals play an important part in the unfolding dialog between God and humanity. Christians believe in a privileged encounter with the Lord Jesus in the Eucharistic meal of bread and wine. Eternal life is portrayed as a great banquet in God's presence. This course articulates a theology of the Eucharist that takes meal as its point of departure. It examines how this central Christian action both shapes the divine-human relationship and informs our response to contemporary issues such as creation and ecology, hunger and suffering, solidarity and exclusion, hope and eternity.

THEO701801

Priesthood, Celibacy, and Authority in Ancient Christianity

Hunter, David G

Fall 2023
In the late antique and early medieval periods the eastern and western branches of Christianity developed distinctive practices in regard to the marriage, celibacy, and sexual continence of the clergy. By the sixth century the eastern churches, for the most part, required celibacy of bishops, but allowed presbyters and deacons to marry prior to ordination. By the late fourth century the western churches, by contrast, attempted to enforce permanent sexual continence on the three highest ranks of the clergy, but did not refrain from ordaining married men. The eastern tradition was enshrined in the sixth-century legislation of Emperor Justinian and in the canons of the seventh-century Council in Trullo; the Western tradition is found in papal letters of the late fourth century, as well as in several of the Latin Fathers (Ambrose, Jerome, Ambrosiaster). Our aim in this course is to explore these diverse traditions and to discern the reasons behind these historical developments. We will study the emergence of the offices of bishop, presbyter, and deacon in the early church, the gradual appropriation of hieratic terminology ("priest" and "priesthood"), and the role of regulations such as single marriage, sexual continence, and complete celibacy in defining the authority of the clergy.

THEO704401
Genealogies of Catholicism: Medieval & Modern Trinitarian Theology
Coolman, Boyd; Wilkins, Jeremy
Fall 2023
The primary pedagogical goal of the seminar will be to provide a substantial, genealogical introduction to the fundamental concerns and challenges in contemporary trinitarian theology by tracing its premodern origins and modern/post-modern expressions. The course will begin with the two most influential expressions of medieval theologies of the Trinity, namely, those of Bonaventure and Aquinas. It will then turn to the twentieth century and focus on three distinct versions of trinitarian theology, that of Bernard Lonergan, Hans Urs von Balthasar, and Sarah Coakley.

THEO704501
The Gospels and Acts in Literary Perspective
Darr, John A
Fall 2023

Only within the last four decades have literary theory and methodology begun to take their place alongside traditional historical methods in the critical study of New Testament narrative. In this seminar we will trace the emergence of literary approaches within the discipline, map and evaluate the diversity of literary critical methods advocated by leading theorists, and develop knowledge and skills for interpreting the Gospels and Acts not simply as rough repositories of historical data, but as integrated literary works. We will give special attention to basic narrative elements (e.g., narration, plot, characterization, settings, timing, rhetoric) and to the roles of readers and critics in the generation of meaning.

THEO704901

Council of Nicaea (325): Theology and Discipline
Fernandez, Samuel; Hunter, David G
Fall 2023

The Council of Nicaea (325) is crucial event that shaped both Christian theology and life. Although its main impact revolved around the development of Trinitarian theology, its canonical legislation became a reference point for subsequent Christian discipline. Therefore, the seminar addresses these two aspects. The first part of it deals with the Trinitarian debate, namely, the so-called Arian crisis and focuses on the analysis of contemporary documents rather than fifth-century Christian historians (Fernandez). The second part of the seminar addresses the twenty disciplinary canons of the council, their antecedents and reception (Hunter).

THEO750701
Theology of Religions/Comparative Theology
Cornille, Catherine M
Fall 2023
This seminar will focus on the various theological positions which have been developed with regard to the reality of religious pluralism as well as on the relationship between theology of religions and comparative theology. While we will focus mainly on the works of Christian theologians, we will also pay attention to analogous developments in other religious traditions.

THEO765701
God and Creation
Robinette, Brian
Fall 2023
This seminar will survey and critically assess several contemporary theologies of creation, particularly as they articulate the God-world relation. In addition to exploring how these theologies engage scripture, doctrine, and historical trends in philosophy and theology, the seminar will highlight such topics as creatio ex nihilo, divine action, divine passibility, divine self-communication, creaturely self-transcendence, freedom, relationality, and contingency. Figures for consideration include Jrgen Moltmann, Catherine Keller, Henri de Lubac, Karl Rahner, Elizabeth Johnson, John Haught, Herbert McCabe, and Sara Grant.

THEO767301
The Minor Prophets: Judgment, Justice, Restoration
Vanderhoof, David
Fall 2023
The seminar will investigate the corpus of the Book of the Twelve, sometimes called the Minor Prophets. Emphasis will be on the first nine books, from which students will read substantial selections in Hebrew. The course will emphasize philological precision, exegetical skills, critical methods, and theological interpretation. Recent scholarly approaches to understanding the corpus will figure prominently. Students will also have the opportunity to read Qumran commentaries on the Twelve directly from original photographs.

THEO776201
Christian Ethics: Major Figures
Cahill, Lisa
Fall 2023
Will consider fundamental questions in Christian theological ethics. Major issues are Scripture and ethics, nature and grace, Christian ethics and philosophy or "reason," and faith and social action or politics. Two areas of applied ethics will be emphasized: (1) just war and pacifism; and (2) gender, sex, marriage. The approach will be both historical or descriptive, and critical or normative. Authors include Augustine, Aquinas, Luther, Calvin, Menno Simons. This course is for doctoral students only.

**THEO776301**  
**Forgiveness: Theological and Philosophical Issues**  
**Pope, Stephen J**  
**Fall 2023**  
This graduate course will examine theological and philosophical interpretations of forgiveness and related topics such as guilt, repentance, and accountability. We will focus on various accounts of what it means to forgive a wrongdoer, what it means to be forgiven, and how forgiveness is related to reconciliation. We will also examine whether and, if so, how forgiveness might pertain not only to interpersonal but also intrapersonal and collective wrongdoing. Special attention will be placed on the relation of forgiveness to the virtues of mercy and justice. Readings will include historical figures such as Thomas Aquinas, Joseph Butler, and Fredrich Nietzsche, contemporary philosophers Nicholas Wolterstorff, Martha Nussbaum, and Charles Griswold, and contemporary theologians Miroslav Volf, Anthony Bash, and James Alison. Course requirements: class participation, one seminar presentation, final paper. This is intended for advanced MA and PhD students.

**Credits:** 3

THEO796801
Theological Anthropology
Hinsdale, Mary Ann, IHM
Fall 2023
This graduate seminar explores modern and postmodern theological approaches to the Christian doctrines of creation, sin, and grace. The study of each doctrine begins with a brief survey of biblical and classical understandings/controversies, followed by consideration of the critiques and correctives offered by post-liberal, political, and contextual/liberation theologians. The impact of recent developments in cosmology, social constructivist understandings of gender, sexuality and selfhood, and perspectives from critical race theory, class, and disability may also be explored, according to student interest.

THEO820401
Balthasar and Rahner
Shea, Henry J, SJ
Fall 2023
While Hans Urs von Balthasar and Karl Rahner began doing theology together as young Jesuit collaborators, their perspectives increasingly parted and became perceived as representative of the polarities that pervaded later twentieth-century Catholic thought. This course compares and contrasts the methodologies and major texts of both theologians with a view to their distinct influence on the life of the Church and constructive relevance for theology today.

THEO108923
Person and Social Responsibility II
Maira Sotomayor, Martin
Spring 2024
Enrollment limited to freshmen, sophomores, and juniors. The course requirements include ten to twelve hours per week of community service. In light of classic philosophical and theological texts, students in this course address the relationship of self and society, the nature of community, the mystery of suffering and the practical difficulties of developing a just society. PULSE students are challenged to investigate the insights offered by their readings in relationship to their service work. Places in the course are very limited.

Perspectives on Western Culture II/Perspectives II
Floyd, Gregory P
Spring 2024
Freshmen only The course introduces students to the Judeo-Christian Biblical texts and to the writings of such foundational thinkers as Plato, Aristotle, Augustine, Aquinas, Luther, Bacon, Descartes, Hobbes, Locke, Kant, Hegel, and Kierkegaard. The first semester considers the birth of the self-critical Greek philosophic spirit, the story of the people of Israel, the emergence of Christianity and Islam, and concludes with a consideration of medieval explorations of the relationship between faith and reason. Attention will also be paid to non-Western philosophical and theological sources.

THEO109146
Perspectives on Western Culture II/Perspectives II
Boor Mulcahey, Kelsey
Spring 2024
Freshmen only The course introduces students to the Judeo-Christian Biblical texts and to the writings of such foundational thinkers as Plato, Aristotle, Augustine, Aquinas, Luther, Bacon, Descartes, Hobbes, Locke, Kant, Hegel, and Kierkegaard. The first semester considers the birth of the self-critical Greek philosophic spirit, the story of the people of Israel, the emergence of Christianity and Islam, and concludes with a consideration of medieval explorations of the relationship between faith and reason. Attention will also be paid to non-Western philosophical and theological sources.

Peaceful Ethics: Social Action Leadership Methods
Snyder, Joshua R
Spring 2024
The course focuses on methods we can use individually and together in addressing ethics issues and in helping to build and maintain ethical communities and organizations within different types of political-economic environments and realities. Methods considered include: ethics reasoning, dialogue, and persuasion methods; win-win negotiating and incentive methods; win-lose, nonviolent forcing and compliance methods; internal due process and governance methods; and alternative institution building and social movement methods.

God, Self, and Society
Holmes, Austin J
Spring 2024
The purpose of this course is to introduce students to the dynamics of theological reflection in an academic setting. Framed as a quest for truth, transformation, and justice, the course invites students to explore key questions and themes of enduring human significance in conversation with the classic texts, ideas, and practices that animate the Christian theological tradition. Such questions include: What is theology? What is the ultimate horizon of our lives? What does it mean to be human? Who is Jesus Christ? And how can we know and serve the common good?
Satisfies Core requirement for: Theology (Christian Theology)

THEO142001
The Everlasting Covenant: The Hebrew Bible
Jordan, Jeffery V, OFM
Spring 2024
The Hebrew Bible/Old Testament has been an influential and often fundamental source for many modern, Western views of God, nature, human beings, a just society, and the origin and destiny of humanity and the world. An intelligent, serious reading of the Hebrew Bible raises most of the enduring questions that have traditionally stood at the center of philosophical and theological debate. Thus, a thorough analysis of texts from the Hebrew Bible in terms of the central concerns of the core curriculum will be the primary goal of THEO 1420 The Eternal Covenant: The Hebrew Bible. Satisfies Core requirement for: Theology (Sacred Texts and Traditions)

THEO142102
Inscribing the Word: The New Testament
Darr, John A; Nelson, Sadrack
Spring 2024
The New Testament has been an influential and often fundamental source for many modern, Western views of God, nature, human beings, a just society, and the origin and destiny of humanity and the world. An intelligent, serious reading of the New Testament raises most of the enduring questions that have traditionally stood at the center of philosophical and theological debate. Thus, a thorough analysis of texts from the New Testament in terms of the central concerns of the core curriculum will be the primary goal of THEO 1421 Inscribing the Word: The New Testament. Satisfies Core requirement for: Theology (Sacred Texts and Traditions)

THEO143001  
Buddhism and Christianity in Dialogue  
Vale, Matthew  
Spring 2024  
This course is both an introduction to Buddhism and to Buddhist-Christian comparative learning. In early weeks we study concepts and practices of Theravada and Zen Buddhism from Southeast and East Asia. We then explore some areas of Christian thought that can be compared with Buddhism—understandings of faith, God, Jesus, sin, spiritual rebirth, sacramentality, and social ethics. Finally, from Buddhist and Christian perspectives, we focus on one or more of the following topics: spiritual practices of deepening care and discernment, faith-based action, interfaith learning, ecology, and/or feminism. Satisfies Core requirement for: Theology (Sacred Texts and Traditions)

**Credits:** 3  
**Room and Schedule:** Stokes Hall 461S TuTh 12:00 Noon-01:15PM  
**Satisfies Core Requirement:** Cultural Diversity, Theology

**THEO143101**  
**Islam and Christianity in Dialogue**  
**Costas, Michael C; Delong-Bas, Natana J**  
**Spring 2024**  
This course engages the quest for truth and meaning in the faith traditions and practices of Islam and Christianity through the lens of comparative theology. We will use textual, historical, social, cultural, and gender analyses to examine and reflect on understandings of God, scripture, worship, sacred rites and rituals, religious law, and membership in the faith community, in addition to a comparative approach to Biblical and Quranic narratives, characters, and concepts of prophethood and saints, with special emphasis given to Jesus, Muhammad, and the Virgin Mary. Satisfies Core requirement for: Theology (Sacred Texts and Traditions)

THEO143201
Hinduism and Christianity in Dialogue
Bannon, Richard B
Spring 2024
It has been said that to know one religion is to know none. In this course, we seek to gain an understanding of two of the major world religions, Christianity and Hinduism, through a comparative and dialogical approach of the ways in which these traditions have come to terms with some of the basic existential questions and religious aspirations of humanity. We will focus on conceptions of evil and salvation/liberation, on ritual practices, ethical principles, and their respective views of one another. Satisfies Core requirement for: Theology (Sacred Texts and Traditions)

**THEO143401**

**Judaism and Christianity in Dialogue**  

Hass, Matthew  
Spring 2024
In 1974, the Vatican explicitly called on Catholics to understand Jews as they understand themselves. In our world of dialogue and post-Holocaust repair of relations, Jews similarly ought to understand Christians. This course will explore key topics in the contemporary Christian-Jewish dialogue with the goal of both enabling this understanding of the other and enhancing self-understanding. Students who do not identify with either tradition are welcome to enrich this conversation. Satisfies Core requirement for: Theology (Sacred Texts and Traditions)

THEO172301

Faith, Ethics, and the Sciences in the 21st Century

Jarrett, Madeline; Pope, Stephen J; Vandewall, Holly R; Yargo, John

Spring 2024
This is a Complex Problems course and is open to FRESHMEN only. You must take PHIL1723 with this course. The rise of modern science has raised and continues to raise a wide range of questions for both religious belief and religiously based morality. The sciences have made it clear that the cosmos is much older and much bigger that the pre-moderns had recognized. The sciences are often taken as challenging traditional views of religion, morality, and the world. Contemporary critics regard religion as either obsolete or a threat to humanity. Why have the modern sciences been taken to carry these implications and need they be taken in this way? Alternatively, can the sciences play a constructive role in how we think about faith, ethics, and human nature? Can contemporary believers fully accept the findings of science? If so, how might doing so influence how believers think about God and God's relation to the world. This course will be team-taught by a philosopher and a theologian who have been researching the relationships between natural science and religious belief. We will explore the implications of modern physics and evolutionary biology for Jewish and Christian understandings of human origins, the good life, and ethical responsibility for ourselves, our communities, and our wider natural world.

Spring 2024
This is a Complex Problems course and is open to FRESHMEN only. You must take PHIL1723 with this course. The rise of modern science has raised and continues to raise a wide range of questions for both religious belief and religiously based morality. The sciences have made it clear that the cosmos is much older and much bigger than the pre-moderns had recognized. The sciences are often taken as challenging traditional views of religion, morality, and the world. Contemporary critics regard religion as either obsolete or a threat to humanity. Why have the modern sciences been taken to carry these implications and need they be taken in this way? Alternatively, can the sciences play a constructive role in how we think about faith, ethics, and human nature? Can contemporary believers fully accept the findings of science? If so, how might doing so influence how believers think about God and God’s relation to the world. This course will be team-taught by a philosopher and a theologian who have been researching the relationships between natural science and religious belief. We will explore the implications of modern physics and evolutionary biology for Jewish and Christian understandings of human origins, the good life, and ethical responsibility for ourselves, our communities, and our wider natural world.

THEO200201
Trajectories in Contemporary Theology
Hinsdale, Mary Ann, IHM
Spring 2024
This course will begin with an exploration of contemporary developments in theology, giving particular attention to the Second Vatican Council as a watershed event not only for Catholicism but, in some sense, for the development of Christian theology in general. The remainder of the course will explore post-conciliar, theological trajectories in three to four of the following fields: 1) comparative theology, 2) systematic/constructive theologies, 3) liturgy and sacraments, 4) theological ethics, 5) Biblical studies. This course is restricted to theology majors and minors.

THEO211401
When Gods Begin Again: Intro to African and African Diaspora Religions
McElwaine, Michelle L
Spring 2024
This introductory course examines Indigenous African and African Diaspora religions from an interdisciplinary perspective. We explore Yorùbá and other African religions, along with African Christianity, Islam, Haitian Vodou, Cuban Santería, Brazilian Candomblé, Sango Baptist of Trinidad and Tobago, Rastafari and Obeah of Jamaica, Black American conjure, and Oyotunji Village. Important themes of religions in Africa and the Afro-Atlantic Diaspora are addressed, such as: the veneration of God(s), Spirit(s), Ancestors, and the natural world; divination, initiation, sacred space, and healing; the impact of slavery on conversion and continuity; fetish as a colonial construct; globalization, race, gender, and power. Ultimately, this course encourages students to reevaluate their understanding of Africana religions, recognize diverse cultural practices and ritual knowledge systems, and engage with oral, written and audio/visual texts that underscore the values of these traditions.

THEO216001
The Challenge of Justice
Snyder, Joshua R
Spring 2024
This course introduces the student to the principal understandings of justice that have developed in the Western philosophical and theological traditions. Care is taken to relate the theories to concrete, practical and political problems, and to develop good reasons for choosing one way of justice rather than another. The relationship of justice to the complementary notion of peace will also be examined. Special attention is paid to the contribution of Catholic theology in the contemporary public conversation about justice and peace. Problems discussed may include human rights, hunger and poverty, and ecological justice.

Credits: 3
Room and Schedule: Stokes Hall 217N TuTh 03:00PM-04:15PM

THEO223001
Mass Incarceration: Philosophical and Theological Perspectives
McCoy, Marina B
Spring 2024
This course will explore problems of justice in relation to incarceration in the United States with particular attention to race, social class, gender, and immigration status. Students will read authors writing on the philosophy of race, gender, and class in relation to incarceration, the phenomenology of solitary confinement and the concept of "social death," church documents and theological works on incarceration, and works on restorative justice and other models of justice that serves the common good. Catholic Social Justice teachings and discussion will also be a part of the course. The course will also address interconnections between immigration and incarceration. This course will be offered as a PULSE elective, in which students undertake four hours per week of service in the City of Boston at institutions such as Suffolk Country Jail and non-profits that provide transitional services for returning residents or formerly incarcerated individuals or that advocate for prison reform. The PULSE office will vet and coordinate students' placements and serve as a liaison with community partners.

THEO224601  
**Earth Ethics: Morality, Religion, and Social Justice**  
Powell, Russell C  
Spring 2024
Humans current ways of living do more than threaten Earths life-sustaining capacities they threaten existence itself. This course will examine differing moral visions of Earth ethics that seek to support the common good. The complex relationship between climate change and social justice will be a main focus, and will be explored through the lenses of Christianity and other religions. Topics to be covered include: humans proper role as moral agents, environmental virtues, the place of religion in addressing ecological crises, and more. The methodologies of liberation theology, ecofeminism, environmental justice, and critical perspectives from the Global South will be emphasized.

THEO232701
Perspectives on War, Aggression, and Conflict Resolution I
Johnson, Spencer K
Spring 2024
The Faith, Peace, and Justice Program at Boston College sponsors this course as an introduction to the field of Peace Studies.. This course asks: Is it ever ethical to go to war? Is it possible to be ethical in war? And, what does ethical conflict resolution look like? This course investigates these questions primarily using the resources of the Christian theological tradition and the social sciences, as well as engaging with philosophy and film. Special attention will be paid to issues in contemporary warfare and the challenges and promises of peacebuilding.

Capstone: One Life, Many Lives
Weiss, James M
Spring 2024
Capstone classes cannot be taken Pass/Fail. You may take only one Capstone class before graduation. This Capstone is designed for students who have engaged in service projects during college and want to reflect on that as they plan their future lives. The service projects may have been through BC (Pulse, 4Boston, Arrupe, service trips, etc.) or on their own in Boston, the U.S., or abroad. Please contact Fr. Weiss to enroll: weissj@bc.edu or 617 552 3897.. This course gives you the chance to review what you have made of your education and preview your long-term life commitments to work, relationships, community, and spirituality. We read fiction, psychology, sociology, and wisdom figures to find the deeper continuity underlying our many experiences. Students lead discussions, conduct interviews of working people, and cap off their Capstone by writing their own autobiography.

Meaning of Life through Film
Kruger, Matthew C
Spring 2024
This course will explore the meaning of life as a philosophical and theological question through the medium of film. Movies will be paired with readings from theologians and philosophers from various religions and perspectives in order to ask the question of what exactly we are supposed to be doing with our limited time here. We will watch a wide range of films, with works explored from Bergman, Kurosawa, and Varda, to more recent works by Miyazaki, Zhao, and Malick.

THEO300601  
The Same God? Jews and Christian Debates  
Joslyn-Siemiatkoski, Daniel  
Spring 2024  
Jews and Christians worship the same God. This well-intentioned claim often serves to paper over the often-real differences between how Jews and Christian understand God. This course will examine foundational approaches to the person of God in Jewish and Christian thought including debates over God as one or trinitarian; God as creator, revealer, and covenant maker; and whether God can ever be embodied. Equal time will be given to Jewish and Christian approaches and texts. One course in the Theology core is required.

THEO311701
Love and the Human Condition
Robinette, Brian
Spring 2024
This course introduces students to classic texts and themes related to human and divine love. Through a careful study of primary texts, both in theoretical and narrative formats, the course is designed to promote extensive classroom conversation and written reflection as we consider forms of love such as affection, friendship, erotic attraction, and agapeic service. Other important themes that will emerge in our study include: freedom, rivalry, suffering, death, beauty, conversion, heroism, and vocation. By situating the dynamics of human and divine love in this way, the course offers an opportunity to reflect upon the meaning of the human condition.

THEO322301
The Ethics of Global Public Health and the Common Good
Vicini, Andrea, SJ
Spring 2024
Global public health is both an urgent good and a needed right that is integral to a vision of just society. The course studies, first, the ethical issues raised by global public health (from epidemics and pandemics to poverty and underdevelopment); second, the ethical approaches to address them (from rights to the common good); third, concrete solutions and praxes. International examples from Africa, Asia, Europe, and the Americas help to identify the ethical agenda and to implement it. The course's readings, analyses, and proposals engage: health sciences, anthropology, social sciences, philosophical and theological bioethical discourses, and social doctrine by considering, among others, Catholic and Protestant contributions.

THEO401001
The Samurai and the Cross: Christian Encounters with Japan (1549?1945)
Ucerler, M Antoni J, SJ

Spring 2024

Fulfills the LAMA requirement for History Majors and Minors. This course is an introduction to the dramatic history of Christianity in Japan, from its founding by Francis Xavier during the age of samurai warriors in the 16th century, to the remarkable survival of the Hidden Christians during the Edo period (1603-1868), and the struggle for religious freedom during the early Meiji period (1868-1912). From its establishment by the Jesuits and Portuguese merchants in 1571 until 1945, when the atom bomb was dropped over Urakami Catholic Cathedral, the international port city of Nagasaki has played a central role in this story. How and why Japan first embraced and subsequently rejected this new religion, its culture, and its adherents will be the focus of our study. The course will be held at the Ricci Institute building so that students can work directly with the unique material and visual culture of the period (rare books, manuscripts, maps, artifacts, and artwork) in the Institute's collections that bear witness to these complex intercultural encounters and clashes. We will also make use of rare materials at the Burns Library.

Credits: 3

THEO424201
The Ethics of Accompaniment: East Africa
Bloechl, Jeffrey; Pope, Stephen J

Spring 2024
This course will explore the complicated and urgent problem of refugees and forced migration, in the specific context of East Africa. Our approach will have three dimensions: attention to the social, political and environmental conditions; theoretical analysis from philosophy, theology, and social theory; and active accompaniment of refugees in the form of work with them and for them as facilitated by the Jesuit Refugee Services in East Africa. Our central aim will be to generate and practice the mode of responsibility defined by what the Society of Jesus calls accompaniment. Students will be expected to read and discuss a variety of texts, attend invited lectures and workshops, and participate in an overnight retreat prior to the immersion experience in East Africa. There will be examination on the academic materials prior to departure from the United States, organized reflection while in East Africa, and a reflection paper grounded in scholarly research will be due some weeks after our return. We will be in Uganda for one month, beginning in early June.

Decolonial Theology
Mendoza-Alvarez, Carlos
Spring 2024
This course aims to know, deepen and problematize the existing correlations between liberation theology born in Latin America half a century ago and the Decolonial Thought of the last decades that emerged in the social sciences and humanities from the epistemic South. This undergraduate course will propose a theological reading of the intersectionality between third generation liberation theology and ongoing decolonial thought in the uncertain times of the Anthropocene crisis.

THEO500701
Mahayana Buddhism: Thought and Practice
Vale, Matthew
Spring 2024
This course explores Mahayana Buddhist thought, meditation practice, narrative, and ritual practice across Asia. We consider texts ancient and modern. After a basic introduction to Buddhism, we take up topics ranging from meditation, to compassion, nirvana, emptiness, Buddha nature, Zen, and Mahayana Buddhist ethics. Our focus is on fundamental theological questions: What are the causes of suffering? How can meditation and ethical practices illuminate sufferings causes, and put an end to them? What is the state of unconditioned awareness, freedom, and joy that lies beyond suffering? Most importantly, what does this all have to do with me? No background in Buddhism is required.

THEO501001
THE GREAT BOOKS OF ISLAM
Welle, Jason
Spring 2024
This course surveys some of the literary classics of the Islamic tradition, works that could be counted among the great books of Islam. The texts chosen belong to a strain of Islamic civilization known as adab: classics that offer a variety of perspectives on what it means to be cultivated, learned, virtuous, wise, and pious. The course examines the place of adab in Islam as a whole and in relation to Islam's religious, ethical, and political outlooks. In particular, the question of religious humanism will return throughout the semester: what is the significance of the humanistic venture in Islam for Muslims and non-Muslims alike, and how does this compare to secular notions of humanism? Students will do a close reading of some of the great books of Islam from different centuries and genres, including historical writing, political treatises, belles-lettres, epic poetry, mysticism, autobiography, and the modern novel.

THEO535701
Debating Religion: Muslims, Christians, and Jews in Dialogue and Dispute
Decter, Jonathan
Spring 2024
This course is a history of interreligious polemic, disputation, and dialogue among Jews, Christians, and Muslims from antiquity to modernity. The course not only highlights points of difference among the traditions from abstruse theological doctrines, to competing interpretations of scriptural passages, to ad hominem attacks on religious founding figures but also the ways in which the practice of disputation played a formative role in the development of Judaism, Christianity, and Islam. The course focuses specifically on interreligious debates and dialogues, both real and fictional, although we also consider broader polemical themes as expressed in treatises. Finally, the course considers epistemic shifts that allowed for the transition from interreligious disputation to interfaith dialogue in recent decades even as it highlights the lines of continuity between the two.

**Patristic Greek II**  
**Schatkin, Margaret**  
**Spring 2024**

This two-semester course is designed for the student with no previous knowledge of ancient Greek to develop reading and translating skills in Patristic Greek language by mastering the fundamental principles of Greek grammar and syntax and acquiring a basic reading vocabulary. The student becomes familiar with the meaning of Greek words, their forms and structure, and their customary arrangement in sentences. A secondary goal of this course is to serve as a foundation for further studies in Patristic Greek.

THEO549201
Religion(s) and American Public Schools
Owens, Erik C
Spring 2024
This course examines a controversial but surprisingly unfamiliar topic: religion(s) in American public schools. The class has three objectives: (1) to understand the complex role religions have played in the development of American public schools and the political and educational philosophy that undergirds them; (2) To examine the principled philosophical and theological issues behind contemporary legal cases about religion and public education; and (3) To understand how constitutionally sound approaches to religion in schools can help to modulate or resolve the pedagogical and administrative issues that arise across the curriculum and within school culture.

**THEO550501**  
**Sacraments and Art**  
**Bergin, William N**  
**Spring 2024**

Much of our artistic heritage was commissioned to embellish places of worship and to deepen understanding of the ceremonies celebrated there. These works of art offer often-ignored insights into Christian sacraments that complements more traditional theological approaches. This course seeks to deepen our appreciation of Christian sacraments by acknowledging painting, sculpture and architecture as a locus theologicus. Both historical and thematic in approach, it explores sacramentality, incarnation, iconoclasm, typology as well as selected themes from sacramental theology. The course will include off-site visits.

THEO555901
Dante's "Divine Comedy" in Translation
Costanzo, Maria Sole
Spring 2024
Conducted in English. Elective for Italian major or minor. An introduction to and critical reading of the "Divine Comedy" (in English translation), one of the world's greatest epic poems, produced by "the chief imagination of Christendom" (Yeats). Dante's journey through Hell, Purgatory, and Paradise will be analyzed at its multiple levels of interpretation: literal and allegorical, theological, philosophical, political, and literary. Compendium of an entire epoch of European civilization, the "Comedy" will also be interrogated for its responses to the fundamental questions of human existence: God, the Cosmos, the Self, Good and Evil, Right and Wrong, Suffering, and Happiness.

**THEO700801**  
**Early Christianity in its Jewish Context**  
**Gillihan, Yonder**  
**Spring 2024**  
The course surveys the Jewish context of early Christian literature and history through close analysis of primary texts. We begin with the origins of Jewish sectarianism in the second century BCE and study the development of various Jewish and Christian sects, concluding with Jewish and Christian groups in the second century CE. We will explore how closely related, and in many cases inseparable, Christian and Jewish identity were well into the second century CE.

**THEO700901**  
**Psalms and the Cult**
The Book of Psalms, sometimes called Israel's "Songbook," engages the world of religious practice, or cult, in a variety of ways. This is true, also, of other biblical poetic compositions outside of the Psalms. The present course investigates the problem of Psalms and the Cult from a number of perspectives by posing a variety of questions. To what extent does Israel's poetry reflect or take for granted specific cultic practices? Are such practices individual or communal? Were they connected with expert oversight? How might Psalms have been used during cultic practice? Were they liturgical or performative texts? How might the relationship between psalms and prophecy inform the discussion? Students will formulate answers to these and other questions by close reading of a selection of Psalms in Hebrew, and by engagement with secondary literature and material culture evidence. Three semesters of Biblical Hebrew or equivalent.

THEO702101
Liberation Theology
Adkins, Amey
Spring 2024
This seminar introduces students to classic and contemporary works in liberation theology that emerge from diverse historical contexts and address matters of universal concern. It examines the organic relationship between liberation theology and grassroots social movements confronting problems of extreme poverty, racism, sexual violence, and environmental devastation. It clarifies the liberative meaning of doctrinal traditions in areas such as trinitarian theology, Christology, pneumatology, soteriology, and theological anthropology and explores various approaches to a spirituality of liberation. It engages prominent critiques of liberation theology and touches on recent innovations such as the decolonial turn.

THEO704601
Early Christian Ascetical Theology
Magree, Michael C, SJ
Spring 2024
This course concerns various theologies of the ascetical life in Early Christianity. The course will begin by asking just what Christian asceticism is, both in distinction from the asceticism of Jewish and Hellenistic traditions, and on its own terms. The second unit of the course will pursue questions of how Christian ascetics speak, especially insofar as this is shaped by biblical narrative. Here we will treat cenobitic and eremetical traditions, and the theological import of monastic rules. The final unit will concern theologies of grace and union with God, with special interest in the tradition of divinization in Greek Christianity.

**THEO704701**  
**Marcion and the History of Early Christianity**  
**Roth, Dieter T**  
**Spring 2024**

This course offers an in-depth study of Marcion, one of the most significant heretics of the second century CE, and his impact upon and place within early Christianity. The first half of the course will focus on the portrayal of Marcion found in the writings of several of his most prominent opponents, including, e.g., Justin Martyr, Irenaeus, Clement of Alexandria, Tertullian, Epiphanius, and Origen. The second half hones in on elements of Marcion's theology and texts, along with the proto-orthodox polemic against them, including topics such as Marcion's dualism, ecclesiology, Gospel, Apostolikon, points of contact with ancient philosophies, and "disciples."

**Frequency:** Periodically
Famously, Heidegger accused nearly all western philosophy of ontotheology, the naming of God as Being and everything else as manifestations or participations in that metaphysical scheme, a manifestation of the human desire to grasp, to comprehend, and thus, in some measure, to manipulate and control reality as such, the ultimate extension of humantechnē, our capacity to manipulate the world. Such a metaphysics, he averred, deprives Being of its deep mystery by claiming to know its nature as such, and thus to grasp it and make it useful. In the end, it is little more than a more refined and civilized dimension of the Nietzschean will to power. Ever since, scholars have sought the precise origins and development of this pernicious modernity. Also famously, so-called Radical Orthodox thinkers have sketched an influential genealogy of this modernity that extends through Suarez back to Scotus, and then hinted that behind Scotuss error may be even Bonaventure. In the preface to the second edition of Theology and Social Theory, John Milbank traces this first step through to the Scotist leap and the modern tumble into the ontotheological slough, labeling this bad tradition Franciscan modernity. While this narrative has recently come in for trenchant criticism, it remains widely and resiliently prevalent. This seminar, accordingly, seeks to canvas the problem of Franciscan modernity, critically assessing the accuracy and utility of this genealogical narrative, beginning with its sources in the late Middle Ages and then surveying its modern proponents and detractors.

THEO705001
Queer Theologies
Mendoza-Alvarez, Carlos

Spring 2024
This seminar will explore the narratives that emerged in the Lbgtiq+ community's protests in the streets demanding recognition of their identities and rights. These experiences gave way to political, theological and spiritual thinking that imagines the person and society in new ways. We will also address ecclesial challenges, focusing new horizons for spirituality, new forms of community and new theological narratives that emerge from gender exclusion as political and spiritual resistance, reshaping the human condition and the Christian identity from denied bodies.

THEO746101
Human Rights Interdisciplinary Seminar
Lykes, M B
Spring 2024
The study of human rights defies disciplinary boundaries. This seminar, sponsored by the Center for Human Rights and International Justice, provides a rare space to examine human rights and international justice from interdisciplinary and transnational theoretical perspectives and through praxis. It brings together faculty affiliated with the Center, students from across the university, visiting scholars, and guest speakers to examine complexities and seeming contradictions vis-a-vis human rights and justice. The spring 2024 seminar will begin with an overview and brief historical review of human rights as understood in the West, drawing on both dominant discourses as well as less well-known histories from marginalized communities. We will then explore a series of complexities for those seeking to engage in human rights scholarship, advocacy, and activism. We seek to engage critically with human rights discourse and actions including the advocacy and activism of those on the move within and across borders as well as those seeking redress through transitional justice in the wake of both contemporary and historical gross violations of human rights as they intersect with violence and exploitation due to intersectional circulations of power vis-a-vis gender, culture/ethnicity, race, social class, and other categorizations or identities. We will also explore emergent decolonization practices including specific challenges from diverse communities of the global South who frame human rights and responsibilities within their Indigenous practices and cosmovisions, in ways that contest Northern epistemologies, understandings, and praxis. The Center invites applications from students enrolled in a graduate or professional degree in any of Boston College's divisions. Undergraduate seniors will be considered, space permitting. Registration by permission only. Apply with a 1-2 statement of interest. Priority application deadline November 8; secondary deadline November 22. More info & apply at: www.bc.edu/content/bc-web/centers/chrij/academics/seminar.html

**Ancient Bible for Contemporary Theology**

**Cooley, Jeffrey L**

**Spring 2024**

Concentrating on a series of timely issues and important biblical passages, this course offers an entry-point for doctoral students wishing to consider what role the conclusions of historical-critical biblical study might play in contemporary theology. Our goals will be to become conversant with the most current historical-critical scholarly landscape and gain an understanding of historical-critical methods, their potentials for problem solving and limitations. Students will also consider the challenges and possibilities in applying historical-critical conclusions to problems in systematics, ethics, comparative theology, etc. Readings will be in English. Knowledge of either classical Hebrew or Greek is not expected.

THEO850201
Mercy and Justice
Kaveny, M Cathleen
Spring 2024
This course explores the meaning of mercy, particularly in its relationship to justice. It examines four major topics: (1) mercy in its relationship to retributive justice, focusing on mercy or clemency in the case of criminal sentencing, as well as broader questions of retribution for wrongdoing, such as whether there can or should be criteria for the exercise of mercy, whether mercy can be exercised unjustly, and the relationship of forgiveness to mercy; (2) mercy in its relationship to distributive justice, focusing on the corporal works of mercy and issues such as the relationship of justice and private charity; (3) mercy in its relationship to social justice, or the social face of mercy; and (4) divine justice and mercy, focusing on the way theologians have attempted to reconcile God's mercy and God's justice. Readings for the course will be interdisciplinary, including philosophical, theological, and legal materials.

THEO881701
Christ in the New Testament
Perkins, Pheme
Spring 2024
This seminar studies the diverse Christological patterns in the New Testament: Jesus as
embodiment of Wisdom in sayings and hymns (John); as fulfillment of messianic hopes
(Matthew); as crucified and resurrected redeemer (Paul), and as exalted in heaven (Rev). Both
Jewish elements in these patterns and their reformulation in second and third century
Christianity (Justin Martyr, Irenaeus, Valentinians and Origen) will be discussed. The final section
of the seminar will discuss the use of these studies in Catholic systematics (Schillebeeckx,
Gutierrez, Schussler-Fiorenza, Johnson and Benedict XVI).

OTE First Year Success Seminar
Bell, Karl
Summer 2023
MUST have completed OTE Program in the previous summer. The First Year Success Seminar will take place in the fall semester of every year, and will provide OTE Summer graduates with supplemental information on both the Thea Bowman AHANA and Intercultural Center and other Boston College resources, in-depth coverage of certain topics through interactive workshops, readings, videos, and group discussions. The First Year Success Seminar will also serve as the primary mode of communication between students and BAIC staff. Students can expect to participate in workshops presented by various organizations in the BC community focused on stress management, budgeting, time management, financial literacy, and effective studying techniques.

UNAS102501
Innovation through Design Thinking
Gaudette, Glenn R
Summer 2023
Would you like to be innovative in whatever you pursue? Innovation is about solving important and complex problems to create value for the greater good. Innovating through design thinking is a structured, human-centered process for creatively solving problems, which can be adopted by anyone. In this foundational course we will introduce the mindset, process and methods at the core of design thinking. Students will see inspiring case studies, hear from cutting edge practitioners, and work on a project to internalize this learning. Students will discover design thinking is a practical toolkit that helps them reliably innovate in the face of changing social needs, business disruptions, and technology shifts.

UNAS330801  
Modernism in Paris  
Epstein, Thomas  
Summer 2023
Start and End Dates for this course change from year to year. Please contact the Office of Global Education for more information. This course is both a study of Modernism as a broad cultural phenomenon and an encounter with the city of Paris. In each of the course's four weeks we will have twelve hours of class meetings, three museum visits, three guided walks, and one concert. Exploring Modernism as a cultural phenomenon that begins in a 'crisis of Tradition' we will concentrate on the period between 1900-1930, when Western civilization became a beehive of 'experiments' and 'revolutions' in all the arts and in society. Reading literary and philosophical texts, studying art works and artists' statements, we will not seek a unifying style to Modernism but a series of shared questions. Moreover, as we experience twenty-first century Paris and each other, we will try to understand the legacies of Modernism as they relate to our present. Readings include Eliot and Apollinaire, Proust and Kafka, Klee and Picasso, Pirandello, Weber, Benjamin and Breton. The course is conducted in English.

Designing Your Career: An Exploration Course
Raposa, Tara
Fall 2023
This course is open to sophomores, juniors and seniors in the Morrissey College of Arts and Sciences, Woods College of Advancing Studies, and Applied Psych majors within the Lynch School of Education. Please note that this course is not open to freshman. In this hybrid course (combination of in-person and online sessions), students who are exploring their career interests will use self-assessment exercises, lively discussion, and thought-provoking activities to identify and reflect upon their values, interests, and skills and then connect them to career options. Using a design thinking framework, students will explore the eight skills that are most desired by employers and discover how they are developing those competencies during their time at BC. We will discuss ways to research varied career paths and learn targeted strategies to achieve meaningful professional goals. Students who are considering such questions as In what academic discipline do I want to major? What kind of internship do I want to pursue? What sort of careers am I interested in? will all benefit from this course.

Peaceful Conflict Resolution Methods
Nielsen, Richard P
Fall 2023
This course considers conflict resolution methods in several different types of contexts: personal and family, organizational and work, and international peace-making. Among the methods analyzed and practiced in role playing exercises are: methods for resisting win-lose behaviors, methods for developing win-win solutions to conflicts, dialogic methods for developing creative solutions to conflicts, and third party facilitation, mediation, and arbitration methods. Personal skill development as well as careers in conflict resolution are explored. In addition, different types of personal philosophical and spiritual approaches to conflict resolution are considered.

Coming of Age: Crisis and Calm Revealed through Literature
Michalczyk, Susan A
Fall 2023
Core Renewal: Enduring Questions For Freshmen Only What does it mean to come of age? What experiences define us, as we make our journey through life? How do we process those moments of crisis and calm, so that we can become better prepared to engage effectively in all that life holds for us as adults? Exploring written narratives of the adolescent experience provides opportunities for personal growth, for understanding of this challenging transition, and for recognizing common patterns and bonds we all share. Through analysis of narrative techniques, students explore approaches to storytelling that create a pact between author and reader that encourages consideration of their stories.

**Maternity and Science: Neuroscience & Genetics**

**Black, Jessica M**

**Fall 2023**
In what ways is the maternal experience informed and determined? Birth is one of the building blocks of the human experience. Throughout history, cultures around the world have developed specific beliefs, traditions and rituals regarding menstruation, pregnancy, birth, and infant care. These are related to the societal structures in which they have emerged. An understanding of these beliefs and traditions and the society in which they have developed is an important part of delivering culturally competent reproductive health care. In addition, specific populations have been and continue to be mistreated by the medical establishment regarding pregnancy and birth, including Indigenous communities, prisoners, people living in poverty, and African Americans. It is essential to be aware of historically mistreated populations to create a health care system based on justice and equity. In this survey course, a number of topics related to the historical, societal, and cultural elements of reproductive health will be discussed through the lens of public health.

In addition, specific populations have been and continue to be mistreated by the medical establishment regarding pregnancy and birth, including Indigenous communities, prisoners, people living in poverty, and African Americans. It is essential to be aware of historically mistreated populations to create a health care system based on justice and equity. In this survey course, a number of topics related to the historical, societal, and cultural elements of reproductive health will be discussed through the lens of public health.

UNAS171901
The Rule of Law and the Complex Meaning of Justice
Cassidy, R M
Fall 2023
This is an Enduring Questions course and is open to FRESHMEN only. You must take ENGL1729 with this course. How do societies define justice, and what role do lawyers, authors, and dramatists play in illuminating the many complex issues underlying this concept? In this course we will explore the range of experiences of law for its ministers (lawyers, judges, law enforcement agents) as well as for its recipients/supplicants (citizens, plaintiffs, defendants and victims). We will first begin with the question of what is justice and approach that issue from the standpoint of political theorists. What does justice mean? Is it fairness? equality? morality? maximization of utility? We will use Michael Sandel's *Justice: A Reader* as an introductory text to major political theorists on the justice question, from the ancients to the moderns. We will then examine how the law is mobilized and deployed by professionals as an instrument of justice. What do we mean by the rule of law, what roles do lawyers and judges play in safeguarding and promoting the rule of law, and what, if anything, does the rule of law have to do with justice? A set of topics has been selected to develop an understanding of the situational and systemic demands under which legal actors perform their roles in the United States. For this part of the course we will use Lord Thomas Bingham's reader *The Rule of Law*. The course concludes with an investigation of where lawyers stand in American society today, assessing whether they have succeeded or failed in their larger ambitions to protect the rule of law and to serve as architects of a just society. If not, how might they better serve both society and themselves in uncertain times? For this latter part of the course we will examine the work of two lawyers, one a criminal defense lawyer and one an environmental litigator, in the texts *Just Mercy* and *A Civil Action*.

UNAS172501
Real Estate and Urban Action: Transforming Communities and Increasing Access to Opportunity
McCullagh, Neil P; Sanzenbacher, Geoffrey T; Yang, Hongyan
Fall 2023
The course explores concepts of social economic and racial inequality with a focus on the interaction between housing, labor markets, and the ultimate accumulation of wealth. Housing will be examined through a study of the history of affordable housing, an exploration of the transformation of Columbia Point Public Housing Development to Harbor Point, and an applied simulation. Labor markets will be explored at the theoretical level (e.g., labor supply/demand, human capital, discrimination), before diving into data and literature on how changes over the last 40 years have expanded inequality. The course will conclude with how the lack of both affordable housing and quality labor market opportunities can interact to restrict intergenerational wealth accumulation and opportunity. The course will challenge students to explore and test solutions for transforming distressed communities into safe, desirable neighborhoods that produce better outcomes for all residents through field projects, simulations, and a practical final project.

**Ethical Design for Social Impact**

Bhattacharya, Sunanda; Powell, Russell C

Fall 2023
What makes design ethical? By exploring the real-world factors and practical circumstances in which ethical design emerges, this course will consider the ethics of how people make and rely on the products that play a decisive role in our experience of the modern world. Our examination of theoretical approaches to designs social impacts, our discussion of case studies that illuminate designs role in the pursuit of social justice, and our reflections on our own responsibility to design things ethically will provide a comprehensive picture of the conditions that both catalyze and thwart ethical design. Students will leave this course with concrete ideas for how they might play consequential roles in developing ethical designs that positively impact society.

Community Advocacy and Research Engagement
Abowd, Thomas P
Fall 2023
CARE is a two-semester course (SOCY 3254/3255) that offers leadership, research, and public policy training for students interested in working with Latino, Asian American and/or African Diaspora communities. In fall, students in SOCY3254 learn the process of community-based research and its methodologies, and begin to design a proposal for an independent study for spring. In the Spring, students sign up for SOCY3255 in conjunction with a Readings and Research to conduct their projects. The Spring seminar complements the R&R serving as a forum for students to discuss their research and continue to develop their oral presentation skills.

McGillycuddy-Logue Fellows Senior Seminar
Wells, Celeste C
Fall 2023
The course is restricted to a cohort of students who have participated in the broader McGillycuddy-Logue Fellow's program. This course is the culmination of the McGillycuddy-Logue Fellows Program. It is intended to help students reflect and expand upon their experiences in the program, including both academics and service. The final product of the course will be an electronic book, to be made available to the Boston College community and beyond via O'Neill Library's Open Access system. Each student will contribute a chapter dealing with a global policy issue of particular interest and relevance to them.

Design for ImpACCT
Bhattacharya, Sunanda; Whitcavitch-Devoy, Julia
Fall 2023
Design for ImpACCT is a course on application of a design-driven and innovation mindset to explore, analyze, and help solve complex real-world problems using human-centered, multi-perspective approaches. Students and their supervisors from Boston College, NC State, Virginia Tech, and Clemson work together on fall term Design for ImpACCT projects. Teams work from an interdisciplinary lens including architecture, applied psychology, engineering, business, transformative education, industrial design, and environmental studiesto attend to various real-world project and issues.

Cross Currents Seminar: Thinking About Economic Inequality and College Student Life
Howell, Burton
Fall 2023
This seminar will look at the consequences of economic inequality in the lives of high financial need undergraduates studying at elite universities. Students will apply what they are learning in other classes to daily campus life. We will ask questions about the challenges of thriving at an affluent institution. The class includes readings from memoirs of low income students at Princeton, Vassar, Saint Michaels, Stanford, and Boston College. This course is recommended for Montserrat students.

UNAS333301
Cross Currents: Thinking About Law and Economics (and Psychology)
Felter, John K
Fall 2023
In this seminar, we will explore how traditional and behavioral economic theories apply to the positive and normative analyses of laws, legal issues and legal systems. Incorporating psychology, we will investigate how behavioral economists have challenged or complemented the rational choice theory of traditional economics. To enjoy this seminar, no prior knowledge of law, economics or psychology is required. The assigned readings, response papers and meeting discussions will enable you to understand and to discuss all the topics that we will explore and to contribute to and actively participate in meeting discussions. This seminar will be provocative and stimulating not only for students who are interested in pursuing professional careers in law or economics or psychology or public policy, but also to a wider audience of students who are intellectually curious about how law, economics and psychology can be applied in real world situations and what influences the decisions and choices that we make in our daily lives.

Cross Currents Seminar: Thinking about Resilience
Cobb, Reshauna; Razek, Matthew

Fall 2023
Thinking about Resilience is a seminar course designed to provide students an opportunity to learn about, and explore, the quality of resilience through an approach which creates a space for students to develop their own competencies in this area. The following building blocks of resilience will be incorporated into each class meeting: active coping, building on strengths, and cultivating connections. The seminar format will allow for students to learn about resilience, while engaging in activities and dialogue designed to move students from theory to practice.

Designing Your Career: An Exploration Course
Raposa, Tara
Spring 2024
This course is open to sophomores, juniors and seniors in the Morrissey College of Arts and Sciences, Woods College of Advancing Studies, and Applied Psych majors within the Lynch School of Education. Please note that this course is not open to freshman. In this hybrid course (combination of in-person and online sessions), students who are exploring their career interests will use self-assessment exercises, lively discussion, and thought-provoking activities to identify and reflect upon their values, interests, and skills and then connect them to career options. Using a design thinking framework, students will explore the eight skills that are most desired by employers and discover how they are developing those competencies during their time at BC. We will discuss ways to research varied career paths and learn targeted strategies to achieve meaningful professional goals. Students who are considering such questions as In what academic discipline do I want to major? What kind of internship do I want to pursue? What sort of careers am I interested in? will all benefit from this course.

Innovation through Design Thinking
Bhattacharya, Sunanda; O'Brien, Edward F; Rutirasiri, Chokdee R
Spring 2024
Would you like to be innovative in whatever you pursue? Innovation is about solving important and complex problems to create value for the greater good. Innovating through design thinking is a structured, human-centered process for creatively solving problems, which can be adopted by anyone. In this foundational course we will introduce the mindset, process and methods at the core of design thinking. Students will see inspiring case studies, hear from cutting edge practitioners, and work on a project to internalize this learning. Students will discover design thinking is a practical toolkit that helps them reliably innovate in the face of changing social needs, business disruptions, and technology shifts.

Peaceful Ethics: Social Action Leadership Methods
Snyder, Joshua R
Spring 2024
The course focuses on methods we can use individually and together in addressing ethics issues and in helping to build and maintain ethical communities and organizations within different types of political-economic environments and realities. Methods considered include: ethics reasoning, dialogue, and persuasion methods; win-win negotiating and incentive methods; win-lose, nonviolent forcing and compliance methods; internal due process and governance methods; and alternative institution building and social movement methods.

Global Ethics and Pragmatic Solidarity
Estelrich Barcelo, Bartomeu
Spring 2024
This interdisciplinary seminar offers participants an opportunity to critically reflect upon selected philosophical and social scientific readings and their lived experiences towards understanding multiple local and global systems and structures that give rise to and sustain social injustice. Specifically, you will begin by exploring your social positions at the intersection of 'race,' gender, social class, sexuality, ethnicity, language, abilities, etc. You will develop criteria for understanding the multiple local and global contexts in which you live towards exploring options for taking actions alongside individuals and communities directly affected by social injustices. You will also explore how action-reflection processes can contribute to clarifying your self-understanding and social position vis-à-vis each other and those with whom you act locally and globally.

Life, Liberty & Health: The Economics, Policy and Law of Healthcare
Chirba, Mary Ann
Spring 2024
This is an Enduring Question course and is open to FRESHMEN only. You must take ECON1702 with this course. Why is health care so interconnected with policy, law, and economics? If health is our greatest happiness, why is U.S. health care such a mess? We have rights to vote and free speech, but do we have a right to health? With the global COVID-19 pandemic, access to health care and health insurance have become more important than ever in the pursuit of life, liberty and health. Topics include the history of our health care system, prescription drug costs, vaccine mandates, the opioid crisis, youth vaping, and sports-related concussions. Such complex issues are best understood through interdisciplinary study. Through the lens of contemporary problems, students will learn basic principles of economics and law, and examine how they intersect to drive health policy involving enduring questions of government authority and individual autonomy, morality and ethics, social justice, and human rights.

At its core, the absorption and application of design-driven methods requires one to think differently and reprogram one's habits and outlook toward looking at problem situations. Qualitative research using design-driven methods requires the understanding of situational contexts, users and environments to help provide functionally effective, ethical and impactful services and products that prioritize genuine needs of users. Design Research methods incorporate tools and processes that include ethnographic approaches and other design-based qualitative and quantitative procedures to better understand user-centered intricacies and insights related to a problem situation.

Community Advocacy and Research Engagement
Abowd, Thomas P
Spring 2024
CARE is a two-semester course (SOCY 3254/3255) that offers leadership, research, and public policy training for students interested in working with Latino, Asian American and/or African Diaspora communities. In fall, students in SOCY3254 learn the process of community-based research and its methodologies, and begin to design a proposal for an independent study for spring. In the Spring, students sign up for SOCY3255 in conjunction with a Readings and Research to conduct their projects. The Spring seminar complements the R&R serving as a forum for students to discuss their research and continue to develop their oral presentation skills.

Cross Currents Seminar: Thinking About Race
Bell, Karl;Mashmasarmi, Denise
Spring 2024
The Cross Currents: Thinking About Race seminar explores the concept of race; the effects of race on individuals; the presentation and negotiation of race in society; and the role of race at Boston College. The topics covered in the course are not only important, but also complex and provocative. The seminar is an opportunity to have candid conversations with others who are also exploring race and its effects in society. The seminar will help develop your understanding and intellectually through discussions with other students.

Design-Driven Thinking: Advanced Independent Study
Bhattacharya, Sunanda; Whitcavitch-Devoy, Julia

Spring 2024

Capping off a student's undergraduate design studies experience is the Design-Driven Thinking Advanced Independent Study, a hands-on, supervised applied project intended to integrate and apply knowledge gained across undergraduate design studies coursework and experiences. Students work under their supervising instructor to move through steps in the design and innovation process focusing on a self-selected topic area and related to a real-world challenge. Students from different majors and minors have an opportunity to work with their supervising instructor to bring design and innovation knowledge and best practices to bear upon social impact challenges.

Faith, Peace, and Justice Senior Project Seminar
Edwards, Stephanie C

Spring 2024

Open only to senior students in the FPJ Program. This course provides the finishing touch for students in the program for the Study of Faith, Peace, and Justice. Students enrolled in the seminar work closely with a faculty project advisor from the department of their major and present the preliminary results of their project study in the seminar. Students and faculty responses to the presentation will help shape the presenter's project into a finished form. The seminar provides a unique opportunity for the individual student to integrate several years of study in the Program while at the same time learning about an interesting range of issues from fellow students.

Responding to Campus Sexual Assault
Humphrey, Kimberly A; Mathieu, Paula

Spring 2024
Available to all Boston College graduate students. According to current statistics, there is likely at least one survivor of sexual assault in any college classroom. Understanding that faculty members are a crucial and largely untapped resource in addressing this reality, RCSA provides future faculty in all disciplines with skills and resources to effectively respond to campus sexual assault wherever they are teaching. With content pertinent to all disciplines and a hands-on methodology, the seminar honors the potential and limits of faculty intervention in this context. Participants will acquire (1) awareness of common symptoms of survivorship and how those symptoms can relate to education, (2) tools to identify students who may need extra support without infringing on privacy, and (3) greater confidence in responsible and compassionate response to student disclosures, within the parameters of legal requirements. The program will enrich participants' professional background as well as provide them with unique training of interest to potential employers.

Human Rights Interdisciplinary Seminar
Lykes, M B

Spring 2024

The study of human rights defies disciplinary boundaries. This seminar, sponsored by the Center for Human Rights and International Justice, provides a rare space to examine human rights and international justice from interdisciplinary and transnational theoretical perspectives and through praxis. It brings together faculty affiliated with the Center, students from across the university, visiting scholars, and guest speakers to examine complexities and seeming contradictions vis-a-vis human rights and justice. The spring 2024 seminar will begin with an overview and brief historical review of human rights as understood in the West, drawing on both dominant discourses as well as less well-known histories from marginalized communities. We will then explore a series of complexities for those seeking to engage in human rights scholarship, advocacy, and activism. We seek to engage critically with human rights discourse and actions including the advocacy and activism of those on the move within and across borders as well as those seeking redress through transitional justice in the wake of both contemporary and historical gross violations of human rights as they intersect with violence and exploitation due to intersectional circulations of power vis-à-vis gender, culture/ethnicity, race, social class, and other categorizations or identities. We will also explore emergent decolonization practices including specific challenges from diverse communities of the global South who frame human rights and responsibilities within their Indigenous practices and cosmovisions, in ways that contest Northern epistemologies, understandings, and praxis. The Center invites applications from students enrolled in a graduate or professional degree in any of Boston College's divisions. Undergraduate seniors will be considered, space permitting. Registration by permission only. Apply with a 1-2 statement of interest. Priority application deadline November 8; secondary deadline November 22. More info & apply at: www.bc.edu/content/bc-web/centers/chrij/academics/seminar.html

Global Health Delivery and Health Equity: A South African Context
van de Water, Brittney
Summer 2023
This course will provide understanding and knowledge of global health delivery with a lens of equity, history, racism, and social determinants of health. We will explore global health delivery and implementation science frameworks to create health equity globally. Students will gain understanding both theoretically and practically about social determinants of health, particularly as observed in both urban and rural contexts. We will travel from Cape Town, Western Province via the Garden Route, Sunshine Coast, and Wild Coast in the Eastern Cape and complete the course from Durban, KwaZulu Natal.

Global Public Health and the Common Good Courses: Fall 2023

PHCG121001
Public Health in a Global Society
Camp, Lindsey N; White, Michelle L
Fall 2023
This foundation course presents public health as an interdisciplinary science focused on health promotion and disease prevention at the population level. The course provides an overview of the history of public health, global burden of disease, sub-disciplines of public health, maternal/child health, and nutrition, and emphasizes the collaborative nature of the field through examples in research and practice. An inherent principle in public health is advancing social justice and this course, and the public health sequence more broadly, focuses on at-risk populations, reducing health disparities, and improving health equity at the population level.

**Casebolt, Megan**

**Fall 2023**

In what ways is the maternal experience informed and determined? Birth is one of the building blocks of the human experience. Throughout history, cultures around the world have developed specific beliefs, traditions and rituals regarding menstruation, pregnancy, birth, and infant care. These are related to the societal structures in which they have emerged. An understanding of these beliefs and traditions and the society in which they have developed is an important part of delivering culturally competent reproductive health care. In addition, specific populations have been and continue to be mistreated by the medical establishment regarding pregnancy and birth, including Indigenous communities, prisoners, people living in poverty, and African Americans. It is essential to be aware of historically mistreated populations to create a health care system based on justice and equity. In this survey course, a number of topics related to the historical, societal, and cultural elements of reproductive health will be discussed through the lens of public health.

**Credits:** 3

**Room and Schedule:** 245 Beacon Street Room 204 TuTh 10:30AM-11:45AM

Introduction to Epidemiology
Longacre, Ashley
Fall 2023
Epidemiology is the study of the distribution and determinants of health and disease in populations, and the application of this knowledge to improve health outcomes. This course will provide an introduction to the basic concepts and methods of epidemiology. Topics will include: measures of disease occurrence and association, study design, basic statistics, reading and interpreting published epidemiological studies, and special topics (e.g. chronic disease epidemiology, outbreak investigations), with an emphasis on critical thinking and application.

PHCG213001
Global Public Health Law
Chirba, Mary Ann; Wirth, David
Fall 2023
This course will examine the critical role of law in creating and implementing social policy and achieving (or at least seeking) social justice. Through the lens of current global trends, it will study the ways in which laws and regulations operate to promote and protect--as well as impede--both individual and public health at the local, national, and international levels. Specific topics may include the following: global differences in the definition of health care as a human right, expanded trace in agricultural products, domestic threats to public health, anthropogenic organic compounds, and the integrity of resources of the global commons. This course is designed to instill the policy-makers of tomorrow with the active skill set necessary to grapple with new public health challenges as they arise.

Room and Schedule: 245 Beacon Street Room 214 TuTh 10:30AM-11:45AM
PHCG321001
Contemporary Issues in Public Health
Hawkins, Summer S
Fall 2023
This course provides students the opportunity to apply the foundational skills of public health to contemporary public health issues. The course integrates data and research to begin a more in-depth examination of the major burdens of disease and several emerging areas of concern. With a consistent goal of reducing health disparities, the course identifies population-level risk factors as well as evidence-based interventions for health promotion and disease prevention. Principles and concepts learned in Public Health in a Global Society are reinforced through specific health conditions, behaviors, and topics.

Global Health: Theory to Practice
White, Michelle L
Fall 2023
In this course, students will take the theories and disciplinary practices learned in other global health courses and learn how to apply this knowledge in practical situations. A series of case studies describing real life global health programs, policies, and interventions will be used to present how many diverse disciplines were necessary to address complex public health programs. The case studies will also illustrate the importance of community-based and participatory methods in the day to day work of public health. Students will also assess the case studies to determine best practices and lessons learned from each case that they can then apply in their own future global health work.

Although the practice of public health has always been political, the role of politics and political actors have taken center stage in today's U.S. healthcare system. In recent years, few issues have attracted more controversy and political rancor than matters of women's health. Some issues may seem intractable due to conflicting but sincerely held beliefs rooted in religion, ethics and morality. Other matters are more clear-cut. For many women, this sweeping and intensifying political discord has compromised their health status, and curtailed their social and economic resources along with their legal rights. Relying on their complementary expertise in social work and law, Prof. Hawkins and Prof. Chirba will guide students in understanding the importance of interdisciplinary study when confronting problems of individual and public health, particularly when it comes to women's health. Thus, students will learn to understand the ways in which social, cultural, economic, political and legal forces impede the health status of women across the life course, and more specifically, hamper women's access to health care that is appropriate, adequate and affordable. Students will then use their interdisciplinary training to evaluate how to develop sound social and economic policies to mitigate gaps across the healthcare continuum, and how to use law to implement such measures to protect women regardless of age, race/ethnicity or socioeconomic status.

Public Health in a Global Society
Camp, Lindsey N; Straif, Kurt H
Spring 2024
This foundation course presents public health as an interdisciplinary science focused on health promotion and disease prevention at the population level. The course provides an overview of the history of public health, global burden of disease, sub-disciplines of public health, maternal/child health, and nutrition, and emphasizes the collaborative nature of the field through examples in research and practice. An inherent principle in public health is advancing social justice and this course, and the public health sequence more broadly, focuses on at-risk populations, reducing health disparities, and improving health equity at the population level.

**PHCG312001**

**Cancer Epidemiology**

**Straif, Kurt H**

**Spring 2024**
Cancer is the second leading cause of death today in many countries around the world in the aftermath of the epidemiological transition. Globally, cancer incidence will increase from an estimated 18.1 million new cases in 2018 to 29.5 million new cases by 2040, with the majority of the increase expected in low- and middle-income countries. Cancer is not a single disease, but comprises a broad spectrum of diseases. This course will provide the student with a thorough understanding of the biology and classification of tumors, the global descriptive epidemiology of cancer incidence, mortality, and survival. No country can treat its way out of the rising global burden of cancer. Therefore global cancer control strategies must focus on primary and secondary prevention of cancer as the most effective response to these public health challenges. The first step in cancer prevention is to identify the causes of human cancer and to determine what works in cancer prevention. The aim of the course is to provide the student with the knowledge and skills to identify relevant cancer types, their established and suspected risk factors and established measures of primary and secondary prevention (screening) of cancer, globally, regionally, and nationally. Within and between countries the poor are often more affected by cancer, therefore cancer control must also aim to reduce the social inequalities in cancer.

PHCG322301
The Ethics of Global Public Health and the Common Good
Vicini, Andrea, SJ
Spring 2024
Global public health is both an urgent good and a needed right that is integral to a vision of just society. The course studies, first, the ethical issues raised by global public health (from epidemics and pandemics to poverty and underdevelopment); second, the ethical approaches to address them (from rights to the common good); third, concrete solutions and praxes. International examples from Africa, Asia, Europe, and the Americas help to identify the ethical agenda and to implement it. The course's readings, analyses, and proposals engage: health sciences, anthropology, social sciences, philosophical and theological bioethical discourses, and social doctrine by considering, among others, Catholic and Protestant contributions.

Food Policy and Health
Longacre, Ashley
Spring 2024
What we eat isn't just an individual decision; it is influenced by food policy, an intersection of law, science, economics, the environment, national and international governance structures, biotechnology, and social advocacy. This course explores the layers of US (and some international) food policies that have shaped the current food system, along with the complex web of stakeholder groups involved in food policy design and implementation. Students will analyze and assess how the accumulation of food policy decisions—internationally to locally—impact the health and nutritional status of individuals and communities.

Health Inequities: Origins and Remedies
White, Michelle L
Spring 2024
Health Inequities: Origins and Remedies will explore the social, economic, historical and political factors that are responsible for differences in health between different groups of people. These include differences in disease prevalence, adult and infant mortality, and life expectancy. They are the result of unfair systems such as structural racism, economic discrimination and redlining that negatively affect peoples living conditions, access to healthcare, and overall health status. These factors are known collectively as the social determinants of health. They are manifestations of injustice. Students in this course must have taken PHCG1210 Public Health in a Global Society and PHCG2120 Introduction to Epidemiology.

PHCG406001
Borderlands & Health Justice: Migration, Environment, and Indigenous Rights
White, Michelle L
Spring 2024
This experiential learning course focuses on the borderlands between the U.S. and Mexico, cutting across traditional indigenous lands. We will examine the history, politics, policies, and challenges of the border and the borderlands region. Students will employ a social justice lens to understand histories of nation-building; migration and immigration challenges; local Native rights issues; food, biodiversity and sustainability challenges; rural health delivery; the effects of extractive industry and the possibilities of climate justice and restorative economy; and models of liberatory education honoring indigenous histories and knowledges. This course is built around a REQUIRED, PLACE-BASED TRAVEL EXPERIENCE OVER MARCH 2024 SPRING BREAK in the trinational space of the Sonoran Desert and Sky Islands region of southern Arizona, northern Sonora, Mexico, and the Tohono Oodham Nation. Students will explore local landscapes and have the opportunity to learn from community partners. While we consider historical and contemporary challenges of the region, we will also learn about innovative models of response based in local organizing. Ultimately, students will apply a root-cause analysis to consider health in context, community challenges and assets, and the importance of community-driven models of development and justice. Finally, students will practice leadership skills for social change by developing an action plan to advance health justice in the context of their course learning. This is a Dept. Permission course. Preference will be given to seniors and juniors in the Global Public Health program, majors first. Please contact publichealth@bc.edu for more information. The mandatory trip component of this course carries an additional travel and program fee of approximately $2,000. Financial assistance may be available.

Children's Health and the Environment  
Landrigan, Philip J  
Spring 2024
This course will provide students with fundamental understanding of the powerful influence of the environment on health and disease in children. It will enable students to understand why children are uniquely sensitive to toxic chemicals and other environmental hazards and how toxic exposures in early life can influence risk of disease across the life span. It will familiarize students with the major environmental hazards of our time, including lead, mercury, pesticides, and air pollution as well as with the links between the built environment, climate change, and children's health. Using case studies, it will explore the linkages between children's environmental health and social justice. It will conclude with a discussion of options and strategies for translating science to public policy to prevent diseases of environmental origin in children.

Entrepreneurial Leadership in Energy, Environment and Health
Steinberg, Laura J
Fall 2023
This course is a one-credit professional development course featuring meetings with leaders of organizations who represent the Schiller Institutes mission to serve the common good, focusing on our three core areas: energy, environment, and health. These leaders represent start-ups, corporations, and entrepreneurial incubators. This course will offer opportunities for students in any Boston College major to develop an understanding of entrepreneurship, and skills in communication, business and networking while having unique opportunities to connect with leaders and innovators working on the cutting-edge of these fields. There may be opportunities for optional site visits during Spring Vacation.

SCHI502001
Exploring the Climate-Energy-Sustainability-Policy Nexus
Huang, Jier; Ming, Yi; Tian, Hanqin
Fall 2023
As one of the defining issues of our time, climate change touches every thread of the social fabricate. Also, what we choose to do (or not to do) has long-lasting implications for many generations to come. This interdisciplinary course, to be co-taught by the core faculty members of the Schiller Institute, focuses on the intersection of climate science, renewable energy, sustainable growth, and policy-making. It is designed specifically to provide students with a comprehensive, yet in-depth overview of the complex interrelationships between these four key areas and how they may interact to shape the future of our planet. The course starts with an overview of the scientific evidence for climate change and its causes, as well as the current state of energy production, consumption and technology. Students will then learn about the challenges and opportunities associated with transitioning to a more sustainable economy, nature-based solution to climate change as a prime example. It concludes with a review of the existing policy frameworks at local, national, and international levels, as well as the role of key actors such as governments, industries, non-profit organizations and communities of faith. By the end of the course, students will have a deeper understanding of the complex interplays between climate, energy, sustainability, and policy, and will be able to think creatively about different technological and policy solutions to the most pressing problems in these areas such as net-zero transition and climate justice. They will also develop skills in critical analysis and communication, which will be useful in a variety of fields related to the grand challenge of mitigating and adapting to climate change.

Schiller Institute for Integrated Science and Society Courses: Spring 2024

SCHI300101
Working For and With Communities: Community Engaged and Project Based Learning for the Common Good
Yargo, John
Spring 2024
This course is the first in a sequence of three, 1-credit courses. The spring course features weekly meetings taught by faculty experts in community-engaged collaboration, project management, leadership, and intercultural competence. The summer course is a three-week immersive in an international location where students work on projects in the community. The locations for 2024 are in Quilpu, Vina del Mar, or Santiago, Chile or Zanzibar, Tanzania. The fall course features weekly meetings to further refine the project results and to reflect on the time spent abroad. The potential in-country projects include: 1) Working on a systematized community-engagement intervention model in the midst of environmental and sustainability crisis (Chile); 2) Fostering a sustainable tourism development plan for the town of Colliguay (Chile); 3) Working with urban populations in Santiago (Chile); 4) Investigating how women and men experience the effects of climate change differently (Zanzibar); 5) Exploring the competing ethical systems that undergird human relationships with the natural world in a moment of rapid environmental change (Zanzibar). Students must apply to participate in this course. Selected students will work on these projects in small interdisciplinary teams. For more information about the course and the application, please email Schiller.Institute@bc.edu. Note: This course sequence offers a year-long opportunity to develop and apply specialized knowledge, and to engage in formative experiences motivating personal growth. Students will be required to enroll in all three course sections (spring, summer, and fall). Unfortunately, seniors are not eligible to take this course.

SCHI320001
The Ethics of Sustainability and the Future of the Common Good
Evans, Jeremy A; Smith, Michael J
Spring 2024
This is a course that explores the ethical, political, and social issues related to creating a more sustainable world in light of the challenges posed by our changing planet. In particular, we will look at questions raised about our obligations to design more sustainable social, political and economic institutions that ensure a better future for humanity as well as the other inhabitants of Earth. As a fundamentally interdisciplinary course, we will draw on insights from across philosophy, psychology, and sociology to better understand the challenges and potential solutions for managing energy economies, global health, and the environment more broadly. The subject matter is therefore both academic and practical: the hope is that by better understanding the ethical stakes of the sustainability challenges we face, we might also become more savvy and responsible consumers, citizens, and stewards of our planet.

TMCE700801
Introduction to Catholic Social Ethics
Pope, Stephen J
Summer 2023
This course introduces the rich tradition of social ethics engaged explicitly by Leo XIII, Rerum novarum (1891), continued by his successors and bishops conferences, and enriched by theological reflection that continues today. Attention will be given to the principal documents (encyclicals, Gaudium et spes (1965), pastoral letters), and the contexts from which they emerged to gain facility in applying social analysis to contemporary concerns. Key themes to be studied: life and dignity of the human person, solidarity, social participation and the common good, the preferential option for the poor, and economic development and work, among others.

Virtue Ethics  
Daly, Daniel J  
Fall 2023
This course introduces the emerging field of Christian virtue ethics. The course begins with a study of the theological and philosophical theories of virtue that have shaped contemporary Catholic and Protestant accounts of virtue. Attention is given to the relation of virtue theory and the virtues to: the Gospels and the life of Jesus; the Christian community; theological anthropology; human happiness; the natural law; and moral norms. The course also discusses the academic and pastoral uses of virtue ethics through the examination of contemporary cases in light of the virtues.

**TMCE730001**  
**Gender, Race, and Ethics**  
**McRorie, Christina**  
**Fall 2023**

This course asks how critical reflection on gender and race challenges and may improve Christian conversations about God, faith, moral agency and obligation, culture, and social issues. It will begin by introducing students to feminist ethics, and to a range of methods and concerns that theologians and ethicists in conversation with this literature have addressed. It will then introduce students to the concerns and methods of womanist theologians and other scholars who complement this critical attention to gender with attention to race and ethnicity, as well as other aspects of personhood and social location. It will pay particular attention throughout to the varying conceptions of moral agency, moral obligation, and justice that are proposed by these literatures.

TMCE812401
End of Life Ethics
Daly, Daniel J
Fall 2023
The course endeavors to educate the student about the issues, perspectives, and methodologies in contemporary end of life ethics. Throughout the course the tradition of Catholic end of life ethics will be placed in dialogue with Protestant and secular positions and approaches in the field. The course begins with an exploration of the development of the Catholic end of life ethics tradition from Thomas Aquinas to the present day. Students then consider contemporary issues in end of life ethics, such as physician assisted suicide, the provision of artificial nutrition and hydration for permanently unconscious patients, the ethics of palliative care, and the provision of treatment for neonates suffering from terminal illness. This section of the course analyzes cases in clinical end of life ethics. The course also introduces students to how end of life ethics functions in hospital ethics committees.

**Credits:** 3  
**Room and Schedule:** Simboli Hall 130 W 01:00PM-03:30PM

TMCE857101  
Theological Ethics and Global Development  
McRorie, Christina  
Fall 2023
This course aims to: 1) familiarize students with the state of the conversation on the ethics of global development within economics and related fields, and 2) enable them to theologically engage this debate. Topics addressed include secular and theological conceptions of poverty and growth; the foreign aid effectiveness debate; the capabilities approach and feminist and postcolonial critiques of development theory; the relation of the prosperity gospel to development; and evolving approaches to development within Catholic social thought and liberation theology. Throughout we will ask how economic arguments stand to challenge and enrich theological reflection on solidarity, the path to integral human development, and what it means to bear Christ's love for and to the world from different social locations. In turn, we will also ask whether and how theological analyses shed new light on philosophical and social scientific debates over global justice, how to combat poverty, and our obligations to distant others.

Christian Ethics Courses: Spring 2024

TMCE703401
Critical Ethical Issues
Iozzio, Mary Jo
Spring 2024
This is the introductory course in moral theology for all degree programs, except the M.Div. This course considers critical contemporary issues from Catholic, interdenominational, interfaith, international, and cross-cultural perspectives. Attention will be given to the Wesleyan Quadrilateral (scripture, tradition, reason, and experience) and casuistry to ground a common approach in the examination and interrogation of the issues to be addressed. The principal ethical issues to be studied include: economic justice (access to health and human services), sexual ethics (just love, sexual identity, misogyny, pedophilia, and reproduction), respect life (abortion, euthanasia, hyper-incarceration and capital punishment), fanaticism and religious fundamentalism, environmental degradation and human ecology (natural disasters), and the toll of a perpetual state of war.

TMCE730401
Moral Theology and Spirituality
McRorie, Christina
Spring 2024
Although ethics and spirituality were considered distinct and perhaps even estranged for some time, developments in Catholic moral theology since the mid-twentieth century have led to a renewed awareness of the interdependence of these two kinds of theology. This course introduces students to the historical divergence and current state of the conversation between these disciplines, and to some of the challenges confronting and prospects for developing a moral theological imagination that is organically nourished by spirituality, and a spirituality that is in turn grounded in and structured by morality. Themes addressed include the place of discipleship, discernment, sainthood, and the experience of God in Christian ethics, the spirituality of liberation theology, and the role of conscience, virtue, and community in Christian spiritual life.

TMCE811701
Christian Ethics and Social Structures
Daly, Daniel J
Spring 2024
This course examines the various ways in which Christian ethicists have addressed social structures, from the groundbreaking work of Latin American liberation theologians in the 1960s to today. The course emphasizes the necessity of understanding social realities (such as structure, culture, and the relation of structure and moral agency) in order produce normative claims regarding social evil and how persons should respond such evil. To that end, the course introduces students to prominent social theories, such as methodological individualism and critical realism. The course then turns to critical contemporary ethical problems, such as global warming and the exploitation of labor.

Credits: 3
Room and Schedule: Simboli Hall 135 W 04:00PM-06:20PM
This course explores contemporary Catholic health care ethics. The course begins by examining the sources, methods, and influential documents of the Catholic medical ethical tradition. The syllabus traces the development of the tradition from the sixteenth to the twenty-first century. Prominent secular approaches in the field are studied as well. The course then takes up: (1) clinical, case-based medical ethics; and, (2) ethics at the institutional level. Applied topics include: abortion; access to health care and the distribution of medical resources; end of life ethics; mergers among Catholic and non-Catholic health institutions; and international recruiting of health care workers.

This course brings theological ethics to bear upon key dynamics of contemporary global markets. Taking cues from the See, Judge, Act methodology, it begins with an attempt to understand how markets and economies work through a critical conversation with economics. This will include attending to the production of economic knowledge who gets to describe economic realities? It then uses resources from CST and liberation theology to ask about the place of theological judgments in market show do the commitments of the Christian tradition tutor us to view the goals and stakes of economic activity? Finally, how does this tradition invite us to engage economic life, individually and collectively? This is as much a question about discipleship and spirituality as it is about public policy, and will lead to reflection on how communities of faith can and do partner with God amidst the complexities of our globalized world.

TMCE854101
Disability Studies and Theological Ethics
Iozzo, Mary Jo
Spring 2024
This course investigates Disability Studies at the intersections of interdisciplinary subjects in the humanities, including Scripture, theology, and theological ethics. Attention will be given to the hermeneutic work of Disability Studies and considerations in scripture studies, theology, and theological ethics. The course (1) presents the history of people with disabilities (similar to feminist retrievals of undocumented stories found by reading between the lines of texts), (2) explores the move from institutionalization to rights, liberties, and self-determination, and (3) considers how theological ethics in particular calls for something radically new in the way of solidarity between people with disabilities and their normate counterparts.

TMTM200801
Introductory Latin: Summer Intensive
Harkins, Franklin T
Summer 2023
This elementary course in Latin presumes no prior study of the language. Basic principles of Latin phonology, morphology and syntax will be treated in classes and reinforced by regular homework exercises and their review in class. Emphasis will be placed on the vocabulary that is appropriate to the various theological disciplines. This course is highly intensive and requires significant weekly work and a fair measure of independent learning. Students will be expected to master the basic grammar and most common vocabulary. There will be optional review sessions held on Friday May 27, June 10 and June 24.

TMTM200901
Introductory Hebrew: Summer Intensive
Harkins, Angela K
Summer 2023
This course is an intensive introduction to the grammar and syntax of biblical Hebrew. While no prior knowledge of the language is presumed, students must memorize the biblical Hebrew consonantal alphabet prior to our first meeting. The goals of the course are (1) to learn the grammar of biblical Hebrew; (2) to expose students to the classic reference tools for biblical Hebrew; (3) to read and translate simple passages from the Hebrew Bible into clear idiomatic English. The textbook for this course is J. Hackett, A Basic Introduction to Biblical Hebrew (2010) (ISBN 978-1598560282).

TMTM811401
Intermediate Latin Readings
Harkins, Franklin T

Fall 2023
This course seeks to develop proficiency in reading Latin beyond the basics of syntax and grammar learned at the introductory level. Latin texts considered in the course will be theological in nature and drawn from the ancient, medieval, and/or early-modern period of the history of Christianity. Presently the STM offers no course beyond the Summer Intensive Latin introduction for students seeking to develop their facility with the language further. The course would be especially useful for students planning to apply to doctoral programs in the History of Christianity and Systematic Theology.

Credits: 3
Room and Schedule: Simboli Hall 130 M 10:00AM-12:20PM
Satisfies Core Requirement: None
Prerequisites: Students must have at least one year (two semesters) of coursework in Latin language or its equivalent. The Summer Intensive Latin course, for example, would meet the requirement of this prerequisite.
Corequisites: None

Course Area Unspecified Courses: Spring 2024

TMTM200401
Intermediate Greek II
Kakavas, Maria
Spring 2024
The purpose of the course is to teach fluent reading while reviewing grammar, syntax and vocabulary as needed. It presupposes that the student has taken one full-year course of Greek and that the student has a working knowledge of the elements of Greek morphology and syntax. In accomplishing the course's purpose, the student is introduced to a variety of NT and LXX texts as well as other texts by Greek authors.

The Church and Interreligious Dialogue
Cornille, Catherine M
Spring 2024
Dialogue between religions has become one of the urgent yet intractable challenges of our time. In this course, we will focus on the engagement of the Catholic Church and Catholic theologians in interreligious dialogue. The first part of the course will deal with topical issues, such as the history of, and the theological foundations for dialogue, intermonastic dialogue, scriptural reasoning, etc. The second part will focus on the particular dialogues between Christianity and Islam, Christianity and Judaism, Christianity and Hinduism, and Christianity and Buddhism.

TMHC719501
Classic Wisdom for Discerning the Spirits
Geger, Barton T, SJ
Fall 2023
A study of the discernment of spirits in the ancient church, beginning with the Old and New Testaments, select Church Fathers, the Life of St. Anthony, the sayings of the desert fathers and mothers, and Evagrius Ponticus and John Cassian. For the purposes of showing their relevance for the present day, continuities with the "Spiritual Exercises" of St. Ignatius Loyola and "The Screwtape Letters" of C. S. Lewis will be considered.

TMHC720101
Pathways to God: Classic Texts on Prayer and Christian Mysticism
Mooney, Catherine  
Fall 2023  
This course explores the theological and pastoral dimensions of both classic texts and contemporary theological reflections on prayer and Christian mysticism. Texts are paired with specific topics, e.g., Benedict of Nursia (lectio divina); Francis of Assisi and Teilhard de Chardin (encountering God in the cosmos); Cloud of Unknowing (centering prayer), Ignatius of Loyola (discernment, consolations, desolations); Teresa of Avila (mystical phenomena); John of the Cross (dark night). Other topics include the Church’s public prayer, icons, embodied and performative prayer, the possibility of everyday mysticism, the relationship between prayer/mysticism and social justice. Theological reflections by, e.g., McGinn, Rahner, Ruffing, Boff.

Introduction to Ignatian Spirituality  
Brouillette, Andre, SJ  
Fall 2023  
A study of the coherent theological vision and practical spiritual teachings of Ignatius of Loyola through his writings (e.g. Spiritual Exercises, Diary, and Testament). The course explores both the historical foundations for Ignatius's spiritual program and its subsequent interpretations by theologians and pastoral practitioners.

**TMHC722901**
**Great Christian Thinkers: Augustine, Aquinas, and Luther**
Harkins, Franklin T
Fall 2023
Augustine of Hippo, Thomas Aquinas, and Martin Luther determined the shape of Christian thought and practice in the West in innumerable, profound, and lasting ways. This course provides an introduction to the life, literary works, and theology of these three great Christian thinkers. For each, our readings and discussions will focus on the themes of "Faith and Reason" and "Nature and Grace." Throughout the course, we will consider how the historical and cultural context, education and formation, vocation, personality, and spirituality of each theologian influenced the content and form of his theology.

**TMHC729701**
**Women Theologians, Ministers, & Preachers in Christian History**
Mooney, Catherine
Fall 2023
This course surveys the contributions and impact that women have made within the Christian church as theologians, ministers, and preachers. Attention will be given to church and societal obstacles that have impeded women's contributions and to the varied strategies that women have employed to weaken, subvert, or overcome such obstacles. Primary sources (women's theological writings, sermons, and evidence of their ministries) will be complemented by contemporary scholarship illuminating a diverse selection of women from early Christianity until today.

TMHC857201
Heresy and Revolution, Protest and Reform
Molvarec, Stephen J, SJ
Fall 2023
This course will explore and examine some historical phenomena concerning understanding of sacraments, the bible, ecclesiology, and reform. The course will treat these themes in the context of the medieval church as well as in the context of medieval heretical movements (e.g., the Cathari, the Waldensians, etc.). It will also treat these themes as addressed by both Catholic and Protestant Reformers of the sixteenth-century. These various episodes will serve as comparative illustrations of theological and practical approaches to church reform in both the middle ages and the early modern period. It will significantly consider primary/historical source texts (in translation) as well as secondary, scholarly literature.

History of Christianity Courses: Spring 2024

TMHC702701
History of Western Christianity II: 850-1650
Mooney, Catherine
Spring 2024
General survey of Western Christianity, with special emphasis on institutional, theological, pastoral and spiritual issues. Lays the foundation for understanding many features of the Church today. Topics include monasticism, establishment of the modern papacy, lay apostolic movements (e.g. beguines), religious orders (e.g., Franciscans, Jesuits), heresies, crusades, inquisitions, scholasticism, saints (e.g., Hildegard of Bingen, Francis of Assisi, Ignatius of Loyola), popular devotions, women in church, mysticism, Protestant Reformation, church councils (e.g., Trent), overseas evangelization. Lectures, readings in primary sources, focused discussion.

TMHC723001
Medieval Theology
Harkins, Franklin T
Spring 2024
The course provides an historical introduction to Christian theology in the medieval West, c. 400 - c. 1400, with a focus on medieval scholasticism. Fundamental themes include modes of theological discourse, scriptural exegesis, monasticism, mysticism, and scholasticism. The course considers how such theologians as Augustine of Hippo, Pseudo-Dionysius, Bede, Anselm of Canterbury, Bernard of Clairvaux, Hugh and Richard of St. Victor, Robert of Melun, Peter Lombard, Albert the Great, Thomas Aquinas, Bonaventure, Mechthild of Magdeburg, Gertrude of Helfta, and John Duns Scotus understood such central theological topics as the natural knowledge of God, divine revelation, Trinity, creation, the human person, sin, evil, grace, predestination, Christ, mystical union, the Virgin Mary, salvation, and the sacraments.

TMHC730101
Tolkien: Catholicism, History, and Myth
Molvarec, Stephen J, SJ
Spring 2024
This course will examine the literary works of J.R.R. Tolkien (author of The Hobbit and The Lord of the Rings, among others) in primarily a historical framework, but also with attention to Tolkiens Catholic worldview. Tolkien was a scholar of medieval literature as well as a fantasy author. He intended his fictional Middle Earth to represent not only a new national myth-cycle for the English people, but also a particularly Catholic worldview, potentially counter to the landscape of industrialization and World War I. This course will examine these themes and present a narrative concerned with the middle ages, medievalisms, and early 20th-century Catholicism as refracted through Tolkiens lenses. It will also consider discussions of race in Tolkiens thought, linguistics, and various adaptations of his work as well as his relationship with C.S. Lewis and the other members of the Inklings (his writers group).

Credits: 3
Room and Schedule: TML 319; W 01:30PM-03:50PM
TMHC730301
Screening Saints & Sanctity
Mooney, Catherine
Spring 2024
This course explores saints as they are depicted in award-winning films, primary sources by or about the saints, and scholarly sources regarding the saints and their subsequent portrayals by film directors. These latter figures modern hagiographers contribute toward constructing a given saints image as the saint is popularly understood. Exploring the historical contexts of both the saint in question and his or her later interpreter will illuminate the pressing theological, religious, ecclesial, social, and political concerns in their respective eras. The course aims to elevate teaching and preaching regarding these multi-layered perspectives on saints and notions of sanctity.

TMHC814301
Aquinas's Summa contra Gentiles
Harkins, Franklin T
Spring 2024
This course aims to introduce students to Thomas Aquinass first and only complete summa, the Summa contra Gentiles (ScG; 1259-65). In spite of its considerable depth and its more extensive treatment of certain central theological and philosophical themes (e.g., God, proofs of divine existence, providence) as compared to the Summa theologiae (ST), the ScG is read and studied far less frequently than his mature ST. Unlike the ST, the ScG is written in an accessible discursive-prose format, it is a complete summa, and its comparative brevity means that it can be read and carefully studied over the course of one semester.

**TMHC814401**  
**The Spiritual Theology of Ignatius of Loyola**  
Geger, Barton T, SJ  
**Spring 2024**  
Ignatius of Loyola (1491-1556), primary founder of the Society of Jesus (the Jesuits), produced the largest collection of writings of any sixteenth-century figure, excepting only Philip Melanchton (1497-1560). In this seminar course, students will examine the entire Ignatius corpus with regard to salient themes to assess their development over the course of Ignatius life and how they should be reinterpreted (or not) for twenty-first century Christians. This course is recommended for those intending advanced studies in Jesuit history and spirituality.

**Credits:** 3  
**Room and Schedule:** TML319; Tu 01:00PM-03:30PM  
**Satisfies Core Requirement:** None

TMHC814801
Stones, Bones, Spaces and Places: A History of Christianity’s Relationship with the Material World
Molvarec, Stephen J, Society of Jesus
Spring 2024
This course will explore the relationship of Christians with the material world and with materiality particularly during Antiquity and the Middle Ages, but with some contemporary discussion as well. Christians, on the one hand, have embraced materiality on account of the incarnation and resurrection of Jesus. On the other hand, some Christians have preferred to find a tension between the material and the spiritual. This course will explore those perspectives as well as the material culture of Christianity in its places, objects, relics, and thought. Students will encounter historical methodologies including the reconstruction of landscape and soundscape as well as theories of material culture.

New Testament Courses: Fall 2023

TMNT700501
Synoptic Gospels
Harkins, Angela K
Fall 2023
A study of the Gospels of Mark, Matthew, and Luke. Following an examination of the "synoptic problem," the course offers an extended analysis of Mark's Gospel and then proceeds to examine how Matthew and Luke produced "second edition" Gospels to serve the needs of the communities to whom they wrote. Particular attention is paid to theological and pastoral issues raised by the texts.

Letter to the Romans
Monnig, Matthew S
Fall 2023

The significance of Paul's letter to the Romans for Christian life and theology is hard to overstate. This course offers a careful, verse-by-verse reading of the letter, trying to understand it, in the first place, within Paul's circumstances and concerns. The course will also highlight what the letter says about theology proper, Christology, pneumatology, soteriology, anthropology, and ecclesiology—as well as consider pastoral concerns.

Second Temple Judaisms
Harkins, Angela K
Fall 2023

This course surveys the diverse forms of Judaism that are present during the Second Temple period (519 BCE- 70 CE) in order to better understand the rich cultural and religious context from which Christianity and Rabbinic Judaism emerged. Topics that will be discussed include canonization; deuterocanon, rewritten Bible; prayer and ritual; Hellenistic Judaism; the Maccabean Period; Messianism; Purity/Impurity; Dead Sea Scrolls; Philo; Josephus; Paul and others.

TMNT727101
The Parables of Jesus
Jorgensen, David
Spring 2024
Though it is widely recognized that the parables play an important role in the NT and in the
study of Jesus, nearly every aspect of the study of parables beyond this most basic of
statements has been the subject of vigorous debate. Everything from the definition of a parable
to the number of parables in the NT to the proper interpretation of parables to how parables
relate to the study of the historical Jesus--all of these issues and more have been contested and
disagreed upon by NT scholars. Thus, this course seeks to provide students with insight into the
history of scholarship on parables and to provide students with the knowledge and tools both to
understand the parables better and to interpret them.

TMOT701401
The Core Narrative of the Old Testament: Genesis to Kings
Waters, Jaime L
Fall 2023
A study of the Pentateuch and the Deuteronomistic History (Deuteronomy to Kings) through lectures, and sections in which students present an exegesis of important passages. Solid knowledge of these books is essential to understand the rest of the Bible. This course does not duplicate other introductions, for we read only Genesis through Kings (not the Prophets, Wisdom Literature, or Psalms), and a third of the class time is devoted to small sections, which are designed to sharpen exegetical and preaching skills.

TMOT729401
Ecology and the Bible
Waters, Jaime L
Fall 2023
This course explores biblical perspectives on animals and the earth, reading in light of contemporary conversations about ecological crises and ecological justice. Topics to be studied include care for animals and the earth, perspectives on nonhuman creation, use of animals as food, and mourning animals and the earth. Pope Francis Laudato si will be read alongside Scripture to consider ways that theology can motivate and inspire care for creation. In addition, this course examines how ecology and the Bible have been critically studied in biblical scholarship, drawing insights from ecological hermeneutics and ecowomanist and ecofeminist scholars.

In addition to traditional methods like source criticism and form criticism, recent years have seen the emergence of new methods: literary criticism, anthropological and sociological study, feminist hermeneutics and canonical criticism. This seminar will look at Genesis from both the traditional and the newer methods. Lectures, discussion of supplied readings, and student presentations and papers.

TMOT812001
Wisdom Literature
Davis, Andrew R
Spring 2024
Wisdom literature comprises the Old Testament books of Proverbs, Job, Qoheleth (Ecclesiastes), Sirach, and the Book of Wisdom. We will read the above-named books (plus Song of Songs) and trace the further development of wisdom in the Second Temple period, the Dead Sea Scrolls, and New Testament books influenced by wisdom: the Epistle of James, the Gospel of John, and such passages referring to wisdom as Luke 7:35 and 10:21-22; Matt 11:19 and 11:25-30; Eph 3:8-10; and Col 1:15-20.

Spiritual Formation for Ministry
Quinn, Barbara
Summer 2023
This two semester program, a requirement for first year M.A. Theology and Ministry students, cultivates practices for integrating faith, life, and ministry through prayer and reflection on central themes of spirituality for ministry. The program consists of two parts. First, a student commits to a small faith community, which meets on the same day and same time twelve times during the academic year under the guidance of a trained facilitator. Second, a student creates a spiritual formation plan (SFP), the components of which may be fulfilled throughout the duration of one's degree program.

TMPS719001
Ministering with the LGBTQ Community
Canales, Arthur
Summer 2023
A study of sexual minorities in Christian moral theology and pastoral theology; especially, in relationship with a particular emphasis on LGBTQ persons in light of the dignity of the human person, the principle of imago Dei, and the struggle to live authentically as a sexual minority in the twenty-first century American culture. Theological issues focus on core Christian values such as covenant, human dignity and respect, and fidelity, and with special emphasis on Catholic ecclesial teachings. Pastoral issues concentrate on sexuality (orientation, identity, and expression), compassion, sensitivity, advocacy, support, and pastoral care of the LGBTQ person.

**Canon Law for Pastoral Ministers**  
Ponzone, Andrea  
**Summer 2023**  
This course is a general introduction to canon law. The following topics will be covered: an overview of general norms, the rights and obligations of all the members of the Church, the key structures in the Universal Church and in the Particular Church (archdiocese and diocese), Parish Life, the sacramental office of the Church, marriage law, an introduction to tribunals and the annulment/dissolution processes. Emphasis will be placed on the pastoral aspect of canon law. The goals are for students to leave the class knowing where to find answers to canonical questions and a healthy respect for the law.

Pastoral Studies Courses: Fall 2023

TMPS700601
Grief and Loss
Kelley, Melissa M
Fall 2023
Grief may be understood as the response to a significant loss. We will explore pastoral, theological, religious, and secular perspectives on grief and loss and seek to integrate these perspectives where appropriate. We'll consider important new research in thanatology and review traditional psychological theories of grief in light of contemporary critiques. We will explore the experience of grief in light of context and culture and consider which features may be universal. We will attend to often unrecognized dimensions of grief—disenfranchised grief and the grief born of injustice. We'll focus on how to respond pastorally to grieving individuals and communities.

TMPS704101
The Practice of Ministry with Youth and Young Adults
O'Keefe, Theresa A
Fall 2023
This course aims to explore elements critical to the effective practice of ministry for and with youth and young adults. Considering the broad demographics herein, this class attends to fostering the skills of discernment and mentoring, which would be valuable across the spectrum of these varied constituencies and contexts. Together the class explores the contexts of the ministry (ecclesial and social), identifies a vision for the work, and considers how that vision might assist in discerning God's action in and direction for work with youth and young adults.

TMPS709001
Ministry in a Diverse Church: Latino Perspectives and Beyond
Ospino, Hosffman
Fall 2023
Catholicism in the United States is presently shaped by rich cultural traditions that demand creative approaches to ministry in the midst of diversity. Nearly 45% of all Catholics in the country are Hispanic, 40% Euro-American, 4% Asian-American, 3.7% African-American, among others. Students in this course explore key questions and discuss ministerial strategies that will help them develop cultural competencies for effective ministry today. The course builds on the U.S. Latino/a Catholic experience as a case study while addressing core issues in ministry that affect everyone in the Church. Ecumenical and international perspectives are welcomed into this conversation.

**TMPS718201**  
**Pastoral Care in/with Communities of Faith: Creating Networks of Care**  
Roozeboom, William D  
Fall 2023
Life is inherently relational, multidimensional, interconnected, and located within larger systems and structures - i.e. communities. Thus, our practices of pastoral care and counseling must likewise attend to the multidimensional and systemic nature of relationality. This course uses an interdisciplinary approach to explore personal, pastoral, and communal processes of creating networks of care in communities of faith and para-church organizations. Both pastoral and lay leaders will learn how to engage and utilize systems theory, conflict theory, therapeutic skills and processes, and theological and spiritual resources to navigate conflict, foster dialogue, and build constructive solutions and possibilities in community as part of an overarching practice of pastoral care. Particular attention will be given to one's self-in-relationship and the capacity to remain a non-anxious, non-reactive constructive presence.

M.Div. Spiritual Formation
Quinn, Barbara
Fall 2023
All M.Div. students participate in a one-credit comprehensive program of formation that expresses the STM's commitment to the formation of the whole person for effective ministry. Students who are members of religious orders or candidates for ordination fulfill the one-credit requirement for formation by participating in the formation programs required by their religious orders or diocese. Lay students are required to complete the seven components of the one-credit program that follow over the course of three years.

Professional Ministry Practicum
Weiss, Joseph E, SJ
Fall 2023
Students receive 3-credits in the fall semester and 3-credit in the spring semester. The professional ministry practicum provides M.Div. students with an opportunity to integrate the academic study of theology and ministry with the exercise of a particular pastoral ministry under supervision. There are three required components of the professional ministry practicum. First, students are engaged in pastoral ministry in an approved setting for a required number of hours. Second, students are mentored by approved supervisors at the ministry site. Third, students participate in a course component to deepen their understanding of their ministry experience and to further develop pastoral and professional skills and sensitivities for ministry.

**Mitigating Trauma**

**DuBois, Heather**

**Fall 2023**

Traumatization occurs at the interrelated social, psychic, and physiological boundaries of life and death. This course offers an introduction to trauma healing and prevention for contexts of pastoral and spiritual care. It surveys approaches to trauma developed in peacebuilding, public health, and psychology, as well as the emerging subfield of trauma theology. Assignments include a book review, a presentation, and a research paper. This is a discussion-based (not lecture-based) class. Close reading is required.

Introduction to Canon Law
Ponzone, Andrea
Fall 2023
This course examines the nature, history, and sources of Canon Law in the Catholic Church. It presents an overview of the norms provided in the 1983 Code of Canon Law and relevant complementary canonical legislation. This course will focus on general norms (Book I), the People of God (Book II), the teaching munus of the Church (Book III), temporal goods (Book V). Given the current circumstances and issues about the Catholic Church's sexual abuse crisis, a brief presentation of penal law (Book VI) and processes (Book VII) will be offered. This course is recommended as a foundational background for "Canon Law of the Sacraments."

**Advanced Professional Ministry Practicum**  
**Weiss, Joseph E, SJ**  
**Fall 2023**  
The Advanced Professional Ministry Practicum provides advanced M.Div. or Th.M. students with opportunities for exercising ministerial leadership in settings requiring both advanced ministerial experience and professional expertise in a field other than theology. The aim is to conjoin expertise in another professional field (e.g., health care, law, economics, social work, education, international affairs, etc.) with the practice of ministry. The student is mentored by experienced ministers. The course component offers opportunity for careful reflection on the experience with peers. Students should meet with the instructor early on to allow sufficient time to plan an approved practicum experience.

Spring 2024
This two semester program, a requirement for first year M.A. Theology and Ministry students, cultivates practices for integrating faith, life, and ministry through prayer and reflection on central themes of spirituality for ministry. The program consists of two parts. First, a student commits to a small faith community, which meets on the same day and same time twelve times during the academic year under the guidance of a trained facilitator. Second, a student creates a spiritual formation plan (SFP), the components of which may be fulfilled throughout the duration of one's degree program.

**Introduction to Pastoral Care and Counseling: A Narrative Approach**  
**Gallivan, Kathleen A**  
**Spring 2024**  
In this foundational course, we develop an understanding of critical dimensions of competent and compassionate pastoral care and counseling today. Drawing substantially on a narrative approach to care, we explore pastoral care and counseling from contemporary pastoral-theological, social-scientific, and cultural perspectives. Particular topics addressed are family systems theory; implicit bias and racism; domestic violence; suicide; power and boundaries; resilience and self-care; and skills for pastoral care.

M.Div. Spiritual Formation
Quinn, Barbara
Spring 2024

All M.Div. students participate in a one-credit comprehensive program of formation that expresses the STM’s commitment to the formation of the whole person for effective ministry. Students who are members of religious orders or candidates for ordination fulfill the one-credit requirement for formation by participating in the formation programs required by their religious orders or diocese. Lay students are required to complete the seven components of the one-credit program that follow over the course of three years.

Professional Ministry Practicum
Weiss, Joseph E, SJ
Spring 2024
Students receive 3-credits in the fall semester and 3-credit in the spring semester. The professional ministry practicum provides M.Div. students with an opportunity to integrate the academic study of theology and ministry with the exercise of a particular pastoral ministry under supervision. There are three required components of the professional ministry practicum. First, students are engaged in pastoral ministry in an approved setting for a required number of hours. Second, students are mentored by approved supervisors at the ministry site. Third, students participate in a course component to deepen their understanding of their ministry experience and to further develop pastoral and professional skills and sensitivities for ministry.

TMPS725401
English Chants of the Roman Liturgy
Weiss, Joseph E, SJ
Spring 2024
The English chants provided in the Liturgy of the Hours and the Roman Missal 3rd edition make it possible to sing the liturgy. Sung liturgy is an ideal of the liturgical reforms issuing from the Second Vatican Council. This module provides students with: 1) an exploration of sung vernacular liturgy in the liturgical reform of the II Vatican Council, 2) instruction in the dynamics of singing well, 3) practice in the genres of chant in the English missal and the Liturgy of the Hours. Module course.

TMPS727801
Socio-spiritual Care
DuBois, Heather
Spring 2024
Spiritual care does not occur in a vacuum; it is mediated through identity and history. Topics in this course include: bodies, intersectionality, narratives, social connection, self-care, healing justice, meaning-making, trust, and organizational dynamics. Course materials include secular social theory and psychology as well as Christian theology. Students from other religious traditions and none are welcome. Assignments include a weekly journal, a presentation, and a paper. This is a discussion-based (not lecture-based) class. Close reading is required.

TMPS727901
Conflict Transformation
DuBois, Heather
Spring 2024
Conflict theory can enable constructive responses to situational disagreements and long-term relationship building. This course combines resources from secular conflict theory and Christian theology and ministry to foster transformation of micro (interpersonal), meso (communal), and macro (societal, international) level conflicts. Most texts reference the U.S. context, but other cultural perspectives are welcome. Assignments include regular short papers and a presentation. This is a discussion-based (not lecture-based) class; close reading is required.

TMPS808801
Calling out from the Depths: Jewish and Christian Interpretations of the Psalms
Davis, Andrew R;Rose, Or
Spring 2024
For centuries, Jews and Christians have turned to the Book of Psalms in times of joy and thanksgiving, and in times of sadness and lament. However, there have been far fewer opportunities for members of these two communities and others to explore these ancient poetic texts together as fellow spiritual seekers. What do we share in common? Where do we differ? How might reading these sources with people with different religious or ideological commitments impact our relationship with the text? This is a Module course.

Credits: 1

TMPS812201
Canon Law of the Sacraments
Ponzone, Andrea
Spring 2024
This course examines Book IV of the 1983 Code of Canon Law, the sanctifying munus of the Church. It presents a canonical study of the Sacraments of the Catholic Church, other Acts of Divine Worship, and Sacred Places and Times. Special emphasis is placed on the Sacrament of Marriage, not only on substantive norms (cann. 1055-1165) but also on Book VII as regards the Process for Declaration of Marriage Nullity. A comparison with selected norms of the 1990 Code of Canons of the Eastern Churches will highlight some specificities of Sacramental Law of the Eastern Catholic Churches. Students who have not completed an introductory course in Canon Law are required (prior to the beginning of the course) to submit a preliminary essay to the instructor demonstrating basic knowledge and appropriation of the essential elements of the Code of Canon Law and insights from the work of Martin De Agar, Joseph T., A Handbook on Canon Law (Wilson & Lafleur, 2007).

Credits: 3
Room and Schedule: Simboli Hall 110 W 04:00PM-06:20PM

The Advanced Professional Ministry Practicum provides advanced M.Div. or Th.M. students with opportunities for exercising ministerial leadership in settings requiring both advanced ministerial experience and professional expertise in a field other than theology. The aim is to conjoin expertise in another professional field (e.g., health care, law, economics, social work, education, international affairs, etc.) with the practice of ministry. The student is mentored by experienced ministers. The course component offers opportunity for careful reflection on the experience with peers. Students should meet with the instructor early on to allow sufficient time to plan an approved practicum experience.

Theology in Context: Faith and Culture in American Catholicism
Ospino, Hosffman
Summer 2023
Theology--classically defined as "faith seeking understanding"--does not happen in a vacuum. It is a most human exercise that involves the whole person living in particular socio-historical and cultural contexts. From such particular contexts theology draws its meaningfulness and relevance; rooted in them it speaks universally. Theology draws from our intimate relationships: with God, others, and the world. This course uses historical and contemporary experiences from U.S. Latino communities as a case study. Note: Latinos constitute nearly half of the Catholic population in the country. Examples of theological reflection rooted in the experience of other communities that are part of the U.S. Catholic tapestry will also be analyzed. The course explores the contextual nature of the theological task, the importance of method, and the roles of the theologian and the community in the process of doing theology.

TMPT729601
Religious Leadership, Education, and Trauma
Keefe-Perry, Lincoln Birch
Summer 2023
This course is designed to help students develop a trauma-sensitive approach to engaging with religious leadership, both in congregational ministry and faith-based non-profit settings. Particular attention is given to the context of programming for religious education and adult faith formation. In addition to considering trauma literature broadly, the class will also devote significant attention to moral injury, considering the concept not only in the military context, but also in educational and religious contexts in which trust in systems and authority has been fractured.

**Seminar in Practical Theology**  
**Ospino, Hosffman**  
**Spring 2024**  
An exploration of Practical Theology, its history, methodological commitments, and intent. Practical theology is theology at the service of life. It is theology that takes seriously cultural, social, and political contexts, historical times, places and peoples, as it utilizes the resources of Scripture, tradition and experience. In this course, we will examine Practical Theologys claims for the theory/praxis nexus, interculturality, interdisciplinarity, the noetic content in religious practices, and the significance of bodiliness and context.

**Credits:** 3  
**Room and Schedule:** Simboli Hall 130 W 04:00PM-06:20PM  
**Satisfies Core Requirement:** None  
**Prerequisites:** One year of theology at a graduate level. or Permission of Department
Public Theology, Politics, and Faith in the United States
Keefe-Perry, Lincoln Birch
Spring 2024

This class is an introduction to the history of the academic field and practice of public theology as it emerged at the intersections of liberation and political theology with Christian social ethics, especially in the context of the United States. In our time together we will consider several models and definitions of public theology, reflect on ways to engage faith in public, and examine the role and responsibility of faith leaders and scholars to communicate with a public beyond a congregation. The course will explore some basic legal and political concepts to frame the semester, however it will primarily be focused on theological and philosophical themes. We will explore the United States as a religiously and culturally pluralistic context, considering the challenges and opportunities that emerge as a result of this. Particular attention will be given to engagement with the concept of Christian Nationalism and the ways in which Christianity has sometimes been used as a frame in an attempt to legitimate violence or oppression.

Religious Education Courses: Fall 2023

TMRE708301
Education for Justice and Peace
O'Keefe, Theresa A  
Fall 2023
The course begins with an investigation of the tools of social analysis as a means of getting beneath the surface of issues of injustice, followed by a review of Catholic social teachings as a means of offering a theological foundation for educating for justice. Finally, it looks at educational methods from the early 20th century to the present that reflect on education itself as a work of justice. The course concludes with student groups presenting lessons in which they have used tools of investigation and analysis on an issue, incorporated theological reflection, and developed a methodology for effective education.

TMRE726401
Religious Education, Critical Pedagogy and Liberative Learning
Keefe-Perry, Lincoln Birch
Fall 2023
This course provides familiarity with key concepts and thinkers of the critical pedagogy movement, exploring how they have informed theology and education, both religious and otherwise. The course highlights the contributions of Paulo Freire, considering the influence of Critical Theory and Christian spirituality on his educational scholarship and service. It builds from there to consider bell hooks engaged pedagogy, Antonia Darders decolonial pedagogy, and the work of Henry Giroux and Parker Palmer. Centered on in-class dialogue, the course culminates in student-driven projects exploring possible interventions and contributions that students can make in their own community-building contexts.

Religion and Higher Education
James, Michael J
Spring 2024
Faith, religion, and spirituality have become topics of increasing interest for scholars and practitioners in higher education administration and student personnel development. This course explores the historical, sociological, and cultural dynamics between religion and higher education. Topics include secularism, modernity, and challenges to the integration of faith and intellectual life. Additional topics include: religious pluralism; religion in secular higher education; legal issues surrounding religion and higher education; academic freedom; constitutional matters; modernism, post-modernism, post-secularism and the tensions and opportunities that these cultural/intellectual movements pose for religion and higher learning in a modern, democratic, pluralistic society.

Mission, Curriculum, and Pedagogy: Teaching High School Religion
O'Keefe, Theresa A
Spring 2024
This course is designed to assist students in developing religion curriculum for adolescents, particularly within the setting of Catholic secondary schools. It considers the place of religious instruction within the larger ambit of the Catholic schools mission, including interaction with campus ministry and service learning. It attends to frameworks of faith development within adolescence. It includes the development of learning outcomes and assessment tools; pedagogy; curricular maps; units and lesson plans. Finally, it calls participants to be self-aware of the teachers role through the development of a pedagogic creed.

TMST702001
The Church
Guider, Margaret E
Summer 2023
The ecclesial dimension of Christian faith is the focal point of this course. The course will locate the church within both a Trinitarian theology and a theological anthropology. Specific topics for exploration include the place of the church in the Creed, the sacramentality of the church, a theology of mission, and of structure and authority. The course will also explore current issues shaping the church's life and its place in the wider culture.

TMST702401
Christology
Bader Mayer, Jennifer; Radtke, Barbara A
Summer 2023
This course seeks to clarify what it means to confess that Jesus of Nazareth is the Christ, and why this is a significant claim. The course examines the New Testament, the early councils of the Church, the writings of early and medieval Christian theologians, the dogmatic teachings of the Church, and the contributions of contemporary theologians. Two main questions will be addressed: Who is Jesus? How does Jesus save us?

Credits: 3
Room and Schedule: On-line Asynchronous
Satisfies Core Requirement: None
Theological Foundations in Practical Perspective
Valiente, Orfilio E  
Summer 2023
Taught from a pastoral perspective, this course offers an overview of contemporary Christian theology, introducing basic theological themes reflected in Co-Workers, e.g., the cultural context in which we do theology, God, being human, Jesus, reign of God, Church. It considers theological methods and investigates the sources that contribute constructions of theological positions.

Credits: 3

Room and Schedule: Simboli Hall 100 MTuWTh 05:45PM-09:00PM

Sacraments in the Life of the Church
Bergin, William N  
Summer 2023
After exploring sacrament in its broadest sense, the meaning of sacramentality, and other fundamental elements of Roman Catholic sacramental theology, we will examine each sacrament both in its role in the life of the church as well as its role in each individual's faith journey. We will address historical background and contemporary issues about the Sacraments of Initiation, Baptism, Confirmation and Eucharist, the Sacraments of Healing, Reconciliation and the Sacrament of the Sick; and Sacraments at the Service of Communion, Marriage and Holy Orders.

Systematic and Historical Theology Courses: Fall 2023

TMST700901
Fundamental Theology
Doyle, Dominic F
Fall 2023
The resources and methods of theology provide the framework for this course. A primary focus will be on the relationship between revelation, faith, and theology, which includes the role of the Bible and the church's doctrine. The course will also survey past and present methods in 'doing theology,' and consider the connection between theology and spirituality.

TMST708101
Writing and Research for Theology and Ministry
Regan, Jane
Fall 2023
This course provides an introduction to writing and research for students engaged in STM degree programs. Through a series of workshops, the course will introduce students to the basics of research, developing a thesis statement, and the use of sources, as well as the different kinds of writing that STM faculty require (research papers, biblical exegeses, theological reflection papers). With an individual tutor, students will work on developing research paper that has been assigned in the current semester. This is a year long course. Students register both fall and spring semesters and will receive 1-credit in the spring semester.

Fink, Peter E, Society of Jesus
Fall 2023
This course will be a basic introduction to sacramental theology and pastoral practice geared toward the sacraments requirement for MA students. It will cover basic and general issues like the nature of sacraments in general and the nature and function of ritual and symbol. Each of the Church's seven sacraments will be dealt with from a number of perspectives e.g., feminist and liberationist. Students will be expected to do a "live" analysis of a Eucharistic liturgy as well as one other sacramental liturgy.

TMST724701
Faith and Justice: Liberation Theologies in the U.S.
Valentin, Benjamin
Fall 2023
Liberation theologies are modes of theological discourse that rethink the purpose of religious thought and practice by placing attention on distinctive experiences of injustice and inequality encountered by different individuals and social groups. Although the liberation theology movement is now a global one, the United States has been the birthplace of a good number of liberation theologies. This course examines the emergence, development, emphases, and methodologies of four of these, including African American/Black theology of liberation, feminist theology of liberation, Latino/a theology of liberation, and LGBTQ theology of liberation. Besides offering a solid introduction to liberation theology, the course analyzes basic concepts underlying theories of injustice, domination, and oppression.

TMST802101
Priesthood: Theology and Praxis
Baldovin, John, Sj
Fall 2023
This Level Two course is open to all students and focuses on ordained ministry of the Roman Catholic priesthood in terms of its biblical & theological foundations, historical development, contemporary issues, pastoral practice, & priestly spirituality, especially as treated in the pertinent ecclesial documents. Also treated are the cooperation between laity and clergy and the roles of lay ecclesial ministry as well as both tensions and critiques arising out of the Church's reservation of the priesthood to males and mandatory celibacy. Ecclesiology is a prerequisite for counting this course for the Ecclesial Ministry requirement in the M.Div. curriculum.

TMST804301
Historical Spiritual Classics in Theological Perspective
Griffith, Colleen M
Fall 2023
This course will survey historical classics, examining the generative themes that are suggestive for our time and foundational in the construction of a contemporary spirituality. Authors will include Augustine, Benedict, Francis and Clare of Assisi, Julian of Norwich, Catherine of Genoa, Ignatius of Loyola, Teresa of Avila, and John of the Cross. Thematic questions will be brought to the reading of core texts.

Eschatology and the Kingdom of God
Palazzi Von Buren, Felix J
Fall 2023
This course examines the relationship between history and eschatology through the lens of the "Kingdom of God" that is central to Jesus' preaching. It proposes a hermeneutic that will take as point of departure the church's eschatological statements. We will examine these statements within the framework of the human historical process and the pilgrimage of God's People towards the reign of God.

How are we to account for the upsurge in interest regarding Mary both within and beyond Christian churches around the world? Mindful of this question, the course surveys the origins and development of Marian doctrine and devotion using a fourfold method of theological inquiry (dogmatic, historical, social scientific, aesthetic). Conscious of the interactive dynamics of religion, culture, politics, and social change, the course examines selected themes, claims, and controversies that pertain to the contemporary study of Mary. The course also explores the significance of Marian art, music, literature, film, and sites of pilgrimage for spirituality and theological imagination.

TMST814101  
**Theology of Mission**  
Guider, Margaret E  
**Fall 2023**

This seminar surveys diverse theologies of mission and examines how these theologies have informed and transformed the Church's understanding of mission and missionary activity in the 20th and 21st centuries. Attentive to the contributions of selected biblical scholars, theologians, church historians and social scientists as well as the corpus of Roman Catholic documents on mission, along with documents of the World Council of Churches and the Lausanne Movement, the seminar traces the evolution of critical theological thinking on mission and assesses the ecclesiological relevance of theologies of mission in a religiously pluralistic world.

Systematic and Historical Theology Courses: Spring 2024

TMST702001
The Church
Guider, Margaret E
Spring 2024
The ecclesial dimension of Christian faith is the focal point of this course. The course will locate the church within both a Trinitarian theology and a theological anthropology. Specific topics for exploration include the place of the church in the Creed, the sacramentality of the church, a theology of mission, and of structure and authority. The course will also explore current issues shaping the church's life and its place in the wider culture.

TMST702401
Christology
Valiente, Orfilio E
Spring 2024
This course seeks to clarify what it means to confess that Jesus of Nazareth is the Christ, and why this is a significant claim. The course examines the New Testament, the early councils of the Church, the writings of early and medieval Christian theologians, the dogmatic teachings of the Church, and the contributions of contemporary theologians. Two main questions will be addressed: Who is Jesus? How does Jesus save us?

TMST704501
Grace
Doyle, Dominic F
Spring 2024
A historical and textual examination of how some Christian thinkers have described and conceptualized the experience of grace. After considering New Testament sources, the class will examine, through lecture and discussion, the following approaches: patristic (e.g. Irenaeus, Augustine, Pelagius), medieval (Aquinas), reformation (Luther, Calvin, Trent, John of the Cross), and modern (Congar, Rahner, Balthasar, Lonergan, liberation theology). Themes to be explored include sin, forgiveness, and healing; divine initiative and human freedom; sanctification; the relationship between nature and grace; social dimensions of grace; and theologies of the Spirit.

TMST708101
Writing and Research for Theology and Ministry
Regan, Jane
Spring 2024
This course provides an introduction to writing and research for students engaged in STM degree programs. Through a series of workshops, the course will introduce students to the basics of research, developing a thesis statement, and the use of sources, as well as the different kinds of writing that STM faculty require (research papers, biblical exegeses, theological reflection papers). With an individual tutor, students will work on developing research paper that has been assigned in the current semester. This is a year long course. Students register both fall and spring semesters and will receive 1-credit in the spring semester.

Philosophy for Theological Studies
Doyle, Dominic F
Spring 2024
This course has two aims: (1) critical study of philosophical texts that have been important in the development of Christian theological reflection; (2) investigate relations between philosophy and theology from the Classical epoch into the late 20th century. This course is designed especially for students of Theology, Ministry, and the joint MA program in philosophy and theology, but is open to all students.

Ecclesial Ministry

Guider, Margaret E
Spring 2024
This course explores the theology, history, and spirituality of ministry in the church. The emphasis will be on the ecclesial foundations for ministry and the relationship between ministry and the mission of all the baptized. The course will examine current issues in the theology and practice of ministry as well as the implications of ministry for the faith and practice of the minister.

Theological Anthropology and the Body
Griffith, Colleen M

Spring 2024
Issues of embodiment relating to theology, spirituality, and ministry form the substance of this course. We will probe understandings of the body found in the historical Christian tradition and draw insights regarding human bodiliness from contemporary theology, philosophy, psychology, and social theory. Finally, we will examine the role of the body in lived Christian faith with a particular emphasis on spirituality, education, and pastoral care.

TMST806501
Ellacuria, Sobrino, Romero
Valiente, Orfilio E
Spring 2024
Oscar Romero, Ignacio Ellacura, and Jon Sobrino represent three leading figures in Latin American liberation theology. This seminar explores their converging theological projects, which outline a major trajectory in Catholic Theology since the Second Vatican Council. After exploring the historical and cultural context that shaped the work of these three men, we will engage on a close reading and critical evaluation of their work. Because they influence one another, we will particularly attend to those theological themes in which crosspollination has taken place: Christology, ecclesiology, soteriology and spirituality.

The Mystery of the Trinity
Chong, Vicente, SJ
Spring 2024
The course will offer the Scriptural sources, the dogmatic development and the works of contemporary theologians that have contributed to the Church's reflection on God, One and Triune, as revealed through the life and praxis of Jesus of Nazareth. This fundamental path will permit us to offer a systematic Trinitarian theology of God as Mystery of salvation and liberation of all.

Seminar: Contemporary Liturgical Sacramental Theology
Baldovin, John, SJ
Spring 2024
This seminar will deal with postmodern approaches to sacramental theology, especially the major work of Louis-Marie Chauvet and Sacrament, as well as the work of Jean-Luc Marion, David Power, and others.

Credits: 3
Room and Schedule: Simboli Hall 110 Tu 12:30PM-03:20PM
Satisfies Core Requirement: None
Prerequisites: Prerequisite: A course in either Liturgy or Sacraments
Corequisites: None
Cross-listed with: None
Frequency: Periodically in the Fall
Student Level: Graduate
This Course explores the theological and pastoral roots of synodality as a consequence of the process of reception and deepening of the Ecclesiology of the People of God in the Second Vatican Council. In this context, pastoral conversion and synodal conversion are key to understand today's ecclesial proposal of an inverted pyramid that overcomes clericalism and leads to a new way of proceeding in the Church that starts from below, from the sensus fidei fidelium, and then upwards. From this perspective, we are entering in a new phase in the reception of the Council and a renewed ecclesiology, an event that involves the reform of structures and processes. This demands a conversion in the ecclesial mentality, a revision of lifestyles, practices of communal discernment, and structural reform. Therefore, the course will present synodality as a constitutive and constituent note of the Church that embraces a major reform.

The course examines selected questions in theologys dialogue with the natural sciences. Is it possible to embrace both science and Christian faith? Does science undermine human responsibility and freedom? How do scientific understandings of time relate to the question of Gods eternity? In what ways does God act in the world of nature and how does this relate to the history of salvation? These and other questions are selected to demonstrate how the dialogue between science and theology both informs and challenges contemporary theological thinking. The main dialogue partners in this course are modern physics, cognitive sciences, and evolutionary science.

TMST854301
STD Pro-Seminar
Dunkle, Brian P, SJ
The S.T.D. Pro-Seminar provides an introduction to the doctoral program and covers the required foundational doctoral research competencies of research readiness based on formulation, research and exposition of at least two acceptable pieces scholarly writing (including proper application of the University Chicago Manual of Style), and successfully passing the foreign language requirement of the S.T.D. program, based on reading comprehension of several articles selected that have a direct bearing on the students own research agenda.

TMST854401
Seminar: Teresa of Avila
Brouillette, Andre, SJ

Spring 2024
Canonized in 1622, declared a Doctor of the Church in 1970, St. Teresa of Avila (1515-1582) is a woman whose importance for the Church is paramount. Her works reveal an ingenuous and forceful personality, as well as a most fascinating experience of God. In this seminar at the crossroads of theology, spirituality and history, we will read large parts of Teresa's works (e.g., the Autobiography, and the Interior Castle). Alongside a linear reading of those texts, some themes would be explored which criss-cross this corpus. (Note: some knowledge of Spanish would be helpful, but not required).

Credits: 3
Room and Schedule: Simboli Hall 130 M 12:30PM-02:50PM
Satisfies Core Requirement: None
Prerequisites: Prerequisites: Graduate courses in Theology, Spirituality or Church History.

TMST856501
Advanced Seminar in Spirituality Studies: Foundations and Methodology
Griffith, Colleen M
Spring 2024
The seminar explores the foundations, methodology, major trends and partners of spirituality studies. Through the reading and discussion of classical and contemporary texts, the seminar will sketch the contours of the academic discipline of spirituality and its actuality. The course will unfold along five main axes: foundations, interpretation, dialogue partners (scripture, history, theology, anthropology), research and interdisciplinarity, and current themes (nature, ethics, aesthetics, interfaith dialogue). This course is open to Advanced degree students and Advanced Master’s degree students.

Credits: 3
Room and Schedule: Simboli Hall 110 Th 03:30PM-05:30PM
Satisfies Core Requirement: None
Prerequisites: Permission of Instructor
Theological Aesthetics
Chong, Vicente, SJ
Spring 2024
This course is a study of the mystery of God from the perspective of aesthetics and art. In other words, we will try to understand God's saving presence and action in our lives, in the world, and in history, based on the transcendental and liberating experience of art, and we will try to speak about God who has revealed God's self in Christ using aesthetic categories. We will also explore different ways to establish a conversational relationship between theology and the arts.

ADAN732001
Regression Models
Sharma, Arvind
Summer 2023
This course focuses on the application of statistical tools used to estimate economic relationships. The course begins with a discussion of the linear regression model, and examination of common problems encountered when applying this approach, including serial correlation, heteroscedasticity, and multicollinearity. Models with lagged variables are considered, as is estimation with instrumental variables, two-stage least squares, models with limited dependent variables, and basic time-series techniques. Prerequisite: ADAN 7310 Data Analysis or department approval.

ADAN743001
ML/AI Algorithms I
Veliche, Razvan
Summer 2023
This course demonstrates how to merge economic data analysis and applied econometric tools with the most common machine learning techniques, as the rapid advancement of computational methods provides unprecedented opportunities for understanding big data. This course will provide a hands-on experience with the terminology, technology and methodologies behind machine learning with economic applications in marketing, finance, healthcare, and other areas. The main topics covered in this course include: advanced regression techniques, resampling methods, model selection and regularization, classification models (logistic regression, Naive Bayes, discriminant analysis, k-nearest neighbors, neural networks), tree-based methods, support vector machines, and unsupervised learning (principal components analysis and clustering). Students will apply both supervised and unsupervised machine learning techniques to solve various economics-related problems with real-world data sets. No prior experience with R or Python is necessary.

Credits: 3
Room and Schedule: On-line Asynchronous

Room and Schedule: Stokes Hall 115N W 06:30PM-09:00PM
This course will expose students to the most popular forecasting techniques used in industry. We will cover time series data manipulation and feature creation, including working with transactional and hierarchical time series data as well as methods of evaluating forecasting models. We will cover basic univariate Smoothing and Decomposition forecasting methods, including Moving Averages, ARIMA, Holt-Winters, Unobserved Components Models, and various filtering methods (Hedrick-Prescott, Kalman Filter). Time permitting, we will also extend our models to multivariate modeling options such as Vector Autoregressive Models (VAR). We will also discuss forecasting with hierarchical data and the unique challenges that hierarchical reconciliation creates. The course will use the R programming language though no prior experience with R is required.

Algorithmic Ethics and Governance - from traditional to AI/ML
Zhou, Bing
Summer 2023
This is a survey course of governance frameworks & techniques for algorithms that are used to make decisions within an organization or in servicing clients. The recent acceleration in the use of Artificial Intelligence (AI) and specifically Machine Learning (ML) techniques have introduced unique opportunities and risks that require governance to encourage their responsible and ethical use. We will start with the intent of governance, its roots, its current manifestations and identify trends that are shaping algorithmic decision-making governance with a focus on for-profit firms, mainly the US. Industries covered will vary but may include the Financial Industry, Healthcare, Manufacturing, Defense, and Biotech for illustrative examples.

Software Tools for Data Analysis
Parravano, Stefano A
Summer 2023
The course provides students with an overview of popular software packages used today for data exploration, analysis and visualization. The first part of the course will offer an overview of the non-programming tools Excel and Tableau. In Excel we will cover basic charts with the emphasis on their use with pivot tables. In Tableau students will be introduced to more advanced data exploration and visualization methods via a variety of advanced charts and dashboards. The second part of the course will cover exploratory data analysis in R. Here students will learn how to write their own code for importing, cleaning and exploring large datasets, as well as how to create, modify and export complex charts and summaries for visual, qualitative and quantitative analysis of the data. The third part of the course will provide an intro to using SQL databases, where students will learn how to create SQL queries to select, filter and manipulate the data.

Operations Research in Applied Economics
Chale, Marc W
Fall 2023
This course provides an introduction to the use of operations research methods in economics. For this purpose, the course starts with a brief review of the basics from microeconomic theory, calculus and linear algebra, which is followed by the conceptual foundations of economic modeling and the applications of optimization techniques on various economic problems. The course provides a very sound perspective on how to use operations research techniques in any kind of economic and managerial decision making, which has becoming an increasingly sought after skill. We will work on various problems, including portfolio management, resource management, environment and energy related regulations, etc.

Fall 2023
The course provides students with an overview of popular software packages used today for data exploration, analysis and visualization. The first part of the course will offer an overview of the non-programming tools Excel and Tableau. In Excel we will cover basic charts with the emphasis on their use with pivot tables. In Tableau students will be introduced to more advanced data exploration and visualization methods via a variety of advanced charts and dashboards. The second part of the course will cover exploratory data analysis in R. Here students will learn how to write their own code for importing, cleaning and exploring large datasets, as well as how to create, modify and export complex charts and summaries for visual, qualitative and quantitative analysis of the data. The third part of the course will provide an intro to using SQL databases, where students will learn how to create SQL queries to select, filter and manipulate the data.

Data Analysis
Vicentini, Gustavo J
Spring 2024
This course is designed to introduce students to the concepts and data-based tools of statistical analysis commonly employed in Applied Economics. In addition to learning the basics of statistical and data analysis, students will learn to use the statistical software package Stata to conduct various empirical analyses. Our focus will be on learning to do statistical analysis, not just on learning statistics. The ultimate goal of this course is to prepare students well for ADEC 7320.01, Econometrics.

ADAN732001
Regression Models
Sharma, Arvind
Spring 2024
This course focuses on the application of statistical tools used to estimate economic relationships. The course begins with a discussion of the linear regression model, and examination of common problems encountered when applying this approach, including serial correlation, heteroscedasticity, and multicollinearity. Models with lagged variables are considered, as is estimation with instrumental variables, two-stage least squares, models with limited dependent variables, and basic time-series techniques. Prerequisite: ADAN 7310 Data Analysis or department approval.

ADAN740601
Predictive Analytics/Forecasting
Bradley, Robert J
Spring 2024
Econometrics This course will expose students to the most popular forecasting techniques used in industry. We will cover time series data manipulation and feature creation, including working with transactional and hierarchical time series data as well as methods of evaluating forecasting models. We will cover basic univariate Smoothing and Decomposition methods of forecasting including Moving Averages, ARIMA, Holt-Winters, Unobserved Components Models and various filtering methods (Hodrick-Prescott, Kalman Filter). Time permitting, we will also extend our models to multivariate modeling options such as Vector Autoregressive Models (VAR). We will also discuss forecasting with hierarchical data and the unique challenges that hierarchical reconciliation creates. The course will use the R programming language though no prior experience with R is required.

ADAN743001  
ML/AI Algorithms I  
Veliche, Razvan  
Spring 2024
This course demonstrates how to merge economic data analysis and applied econometric tools with the most common machine learning techniques, as the rapid advancement of computational methods provides unprecedented opportunities for understanding big data. This course will provide a hands-on experience with the terminology, technology and methodologies behind machine learning with economic applications in marketing, finance, healthcare, and other areas. The main topics covered in this course include: advanced regression techniques, resampling methods, model selection and regularization, classification models (logistic regression, Naive Bayes, discriminant analysis, k-nearest neighbors, neural networks), tree-based methods, support vector machines, and unsupervised learning (principal components analysis and clustering). Students will apply both supervised and unsupervised machine learning techniques to solve various economics-related problems with real-world data sets. No prior experience with R or Python is necessary.

ADAN752001
Product Management in Machine Learning
Isler, Derya V
Spring 2024
This course aims to prepare students to develop product solutions that deliver user value and provide viability for the businesses in the technology space that are heavily using Machine Learning. In this course, students will gain skills in identifying user and business problems, sizing the opportunities and leveraging AI and machine learning to provide the most usable solutions for customers while helping the businesses. The course will cover product management basics as well as core Machine learning concepts to prepare the students for this emerging space in technology.

ADBM161011  
Idea to Launch  
Harrington, Brian C  
Fall 2023  
Moving from idea to launch is often the most challenging aspect to a successful execution of a new business. This course starts with identifying a real-world challenge for a small business, researching and measuring consumers' needs and wants, assessing the competitive environment, selecting the most appropriate customer targets and developing a go-to-market strategy for an offering that satisfies consumers' needs better than the competition and understanding financial statements and basic legal principles and practices to help manage the business. This course introduces students to a sequence of processes needed to move from the idea for a new business through the launch of that business. Students will work on a real-world problem in groups and formulate potential ideas, analyze the market and competition, research and evaluate potential customer segments, define a compelling value proposition, design a go-to-market model, and create a pitch to potential investors with their go-to-market strategies.

ADBM310101
Management and Organizational Behavior
Payne, Adam M
Fall 2023
Management and Organizational Behavior examines human behavior in organizations and the relationship between this behavior and organizational effectiveness. Particular attention is given to the issues and dynamics that result from the increasing diversity of the workforce and the global contexts in which people work. The course introduces students to analytical frameworks for understanding and influencing individual, group, inter-group and total organization dynamics. It increases students awareness of and competence in dealing with people different from themselves. Through case studies, self-reflection, experiential exercises, lectures, and readings, students develop knowledge and skills for working effectively with a diverse set of people in complex environments, diagnosing managerial problems and developing effective plans for action, taking into account the impact of external stakeholders on internal organizational dynamics.

Corporate Communication  
Whalen, Martha A  
Spring 2024
In a globally competitive and technologically advanced world, the ability to convey ideas and persuade diverse audiences is critical to professional success in every organization. This course provides a learning environment which develops proficient communication skills. Focusing on business writing and oral presentations with particular attention to purpose and audience, the curriculum offers strategies for effective business communications in letters, memos, e-mail, reports, proposals, resumes, meetings, and presentations. Class interaction, written assignments, collaborative media design, and team presentations provide multiple opportunities to demonstrate and enhance skills and to receive personal feedback on your professional communication style.

**Whalen, Martha A**

**Spring 2024**

In a globally competitive and technologically advanced world, the ability to convey ideas and persuade diverse audiences is critical to professional success in every organization. This course provides a learning environment which develops proficient communication skills. Focusing on business writing and oral presentations with particular attention to purpose and audience, the curriculum offers strategies for effective business communications in letters, memos, e-mail, reports, proposals, resumes, meetings, and presentations. Class interaction, written assignments, collaborative media design, and team presentations provide multiple opportunities to demonstrate and enhance skills and to receive personal feedback on your professional communication style.

ADBM225002  
Design Thinking  
Ingram, Noel E  
Spring 2024  
This course seeks to introduce Design Thinking as an action-oriented creative process for engaging deeply with the problems that matter to you. The course is designed to help you: develop habits of mind and tools for thinking to make creativity a reliable resource in your life; cultivate empathy for both others and yourself as the starting point for creative problem-solving; think flexibility by reframing problems and finding ways to move beyond your first good ideas; and adopt an experimental mindset that allows you to try test out your ideas and collaborate with others. The course will take a learn-by-doing approach combined with ample opportunity for reflection. The goal is to integrate Design Thinking with the rest of your liberal arts studies so you leave the course with a broad-based, personalized creative toolkit for tackling problems in your life and in the world.

Positioning organizations and individuals for success amid global financial, economic, technological, and political uncertainty demands principled, visionary leadership as well as imaginative and innovative operational expertise. Successful organizations exhibit three critical competencies: vision, strategy, and execution. Vision charts a direction through the chaos. (Where are we going?) Strategy tells the organization how to achieve the desired results. (How will we get there?). Execution translates strategies into results. (Let's get it done!). This course will develop competencies in each of these critical areas through readings, discussions, case studies, presentations, and more importantly, practice. Vision is taught by studying successful organizations and visionary individuals. The course examines disruptive sources (e.g. rapidly changing markets, new legislation, scandals), the accelerating pace of change that renders past experience and knowledge insufficient, and the need for leaders making decisions about the future to think and behave like innovators. Thomas Edison invented the electric light when electrification was uncommon. (Vision). Vision can only be successful if you turn an idea into a useful product. Steve Jobs was able to turn his idea about a portable phone into a ubiquitous handheld computer. (Strategy). Organizations are only successful if they can implement strategies in a timely and effective manner with the complete buy-in of the organization. The focus is on creating open, optimistic climates that engage employees, develop skills and talents, and promote continuous knowledge sharing, smart work designs, and creative problem-solving.

ADCO290001
The Age of Misinformation
Carroll, Jaclyn
Summer 2023
Are we living in the Age of Misinformation? Scholars across the social sciences and humanities are united by a fear of how fast false information can spread. Misinformation appears everywhere our workplaces, our social media feeds, our family dinners. But what is misinformation and where does it come from? Why are some people drawn to it while others remain unaffected? How does anyone distinguish good information from bad, experts from dupes? This course is an interdisciplinary examination of misinformation, its character, its origins, and its impact on social and political life. By surveying the leading theoretical explanations of misinformation from sociology, communication & media studies, psychology, and political science, students will be exposed to cutting edge research on the nature of misinformation and will cultivate tools to hinder its spread in their personal and professional lives.

The Society of the Selfie: Social Media and Political Crisis
Morelock, Jeremiah C
Summer 2023
This course explores how the Internet is connected to the global crisis of liberal democracy. Through social media people have new ways of rating and judging themselves and one another, via metrics such as likes, shares, followers and friends. There are new thirsts for authenticity, outlets for verbal aggression, and social problems. Information technologies provide channels for public engagement where extreme ideas reach farther and faster than ever before, and political differences are widened and inflamed. They also provide new opportunities for protest and resistance. Topics covered. Social theories from Debord, Foucault, Giddens, Goffman, and Fromm will be discussed in relation to the topics covered, which include the global history of communication technologies, personal branding, echo chamber effects, alienation, fear of abnormality, authoritarianism, populism, and resistance.

Persuasive Communication
Whalen, Martha A
Fall 2023
In our culture, image is about conveying success. It is what makes us want to buy a brand or vote for a candidate. Course explores the powerful role of imaging, the use of trademarks as a vehicle to convey a corporate image, and how a "marketable personality" (for a product, service, organization, or individual) is defined, developed, and communicated. Examines strategies for balancing the emotional and rational factors of a message, finding a position with "soul," and using research to full advantage in relation to image failure and crisis management. A look at how imaging is affected by the exploding world of media and how it influences the corporate bottom line. Video and audio presentations and case studies provide stimulating examples. Students will better understand the imaging process and develop the know-how to evaluate and use it.

ADCJ305101
American Institutions
Paxson, Peyton J
Fall 2023
The word institution has many meanings. In sociology, it means a large-scale arrangement created and maintained to serve the needs of society. The criminal justice system is one example. Another is marriage. In political science, institutions are the organizations that generate economic and social policy and mediate conflicts. The courts are an example; trade unions are another. In history, institutions are what shaped political, economic, and social outcomes in the past. One example is slavery. Another is the civil rights movement. This course uses these different yet often overlapping meanings of institutions to examine the American experience. In many cases the American experience is a shared one, yet in many cases the experiences of particular groups of people are distinctly different from those of others. Some Americans had to fight for their freedom. Some had to fight to be recognized as U.S. citizens. Women had to fight to be able to vote and to enter into contracts without their husbands permission. Some Americans had to fight to marry a person of another race or of the same gender. Others had to fight for a living wage. Some Americans accused of crimes had to fight to ensure that their rights were protected. Many of these fights occurred in courtrooms. This course uses summaries of important court decisions that were both shaped by, and helped to shape, the American institutions we have today. It also uses writings and speeches by individuals whose efforts made them key figures in their respective movements.

ADCJ110001
Introduction to Social Justice
Carroll, J P
Spring 2024
What is social justice? This phrase has been used so frequently that we often lose sight of its meaning. In this course, students will investigate the many meanings of the term social justice and will be introduced to social justice issues in the US. Students will begin by locating themselves within systems of power, privilege, and oppression and then use their experiences and perspectives in discussion as we analyze and dissect these concepts. The course focuses on studying systems of oppression, methods of resistance, and visions of possibility.

Security in the Cloud
Fitton, Julie A;Hiatt, Alison L
Summer 2023
Course provides an understanding of basic cloud deployment models, including private, public, hybrid, and community, and the various service platforms (e.g., SaaS, PaaS, IaaS). Course addresses governance control and responsibility for cloud security together with cloud security components, and covers service provider security and its evaluation, security standards (e.g., SSAE-16, CSA-CCM, Shared Assessments, NIST, CIS), procurement, and service level agreements (SLAs). Security topics include traffic hijacking, data isolation/storage segregation, identity management, virtualization security, continuity, data recovery, logging, notification, and auditing.

National Security: Law, Policy, & Government Investigations
Noone, Gregory P; Siegmann, B stephanie
Summer 2023
National security law is often inaccessible and can be particularly hard to follow when divorced from the context of historical tradition, governmental structures, and operational reality in which it functions. This course will examine the law governing national security investigations and related litigation and will provide an in-depth examination of national security from the U.S. Government's perspective. Through class lectures, case studies, and hands-on application, students will learn how Federal intelligence and law enforcement agencies work together (and sometimes not) and their interplay with Foreign intelligence and law enforcement agencies to investigate and prosecute national security crimes, starting with the collection of evidence and proceeding through trial and sentencing. The course will highlight the investigative tools and laws used by intelligence and law enforcement agencies to investigate national security concerns and the varying challenges faced in prosecuting such cases. The class will incorporate guest speakers and experts from government organizations and other stakeholders in the national security field.

Cybersecurity: Designing Offensive and Defensive Capabilities
Maor, Etay
Summer 2023
This technical course examines both offensive and defensive tools, tactics, and procedures in cybersecurity. The course focuses on the technical aspects of cybersecurity, including online attacks and the development of counter measures, varying threats (phishing, malware, social engineering, mobile attacks, network exploitation), defensive technologies, tactics, and strategies, and policy issues pertaining to privacy v. national security. This course will analyze offensive capabilities used by cyber criminals, nation states, and other adversaries to attack private and government infrastructures to develop and design proper detection capabilities, mitigation strategies, and response plans to recover from such attacks. Through hands-on simulations, topics covered include cryptography (e.g., PKI, encryption techniques, digital signatures), open source intelligence (OSINT), IoT vulnerabilities, software and hardware based attacks, and recovery procedures, among others.

ADCY690001
Ethical Issues in Cybersecurity
Hurley, Deborah
Summer 2023
Course provides "real life" complex, ethical situations for students to evaluate, as both decision-maker and advisor, by addressing the various issues confronted by senior government and corporate professionals, nation states, and other parties of significance, involving the receipt and protection of critical and sensitive data. Specific topics include standard professional ethical frameworks of beneficence and non-maleficence; rights and justice; and issues related to privacy, intellectual property, and corporate espionage and fraud, while contrasting same with freedom of information and intellectual creativity. The course compares and contrasts global governments' and cultures' differing approaches to ethics, and enhances, from a framework of dialogue, discernment of action, and deliberation, the ability of students to make reasoned and responsible business decisions in a global economy. The course also examines aspirational versus mandatory ethical standards (i.e., the "right thing to do" vs. what is "legal" or "compliant"), through additional frameworks of reference, including review, reflection, and refinement of decisions.

ADCY645001

**CYBER Investigations and Digital Forensics**

**Domin, Andrew A; Domin, Douglas J, JR.**

**Fall 2023**

Course covers forensic investigation, case prioritization, and case management, and addresses procedural documentation, standards of evidence, reporting, and disclosure requirements. The digital forensic portion of the course provides an understanding as to disk imaging, file recovery, trace-back techniques, network analytics, evaluation of metadata, malware, and anti-forensics. Additionally, the course covers the out-sourcing of the investigative function, or part thereof, to third parties, and provides specific case studies, including a practical laboratory project.

**Credits:** 3

**Room and Schedule:** On-line Asynchronous; Open to Law School by permission.

**Satisfies Core Requirement:** None

**Prerequisites:** ADCY6000

**Corequisites:** Coursework Requirement: Access to a computer with Microsoft Windows 8 or higher.
Technical proficiency is not enough to manage business risk. Every potential or identified threat cannot be mitigated, and organizations must choose where to focus their often limited resources to support business goals. This course focuses on Governance, Risk and Compliance (GRC) as an organizational capability that all organizations require in today's complex world.Topics include understanding the business context of key stakeholders, corporate culture, and organizational risks. Students will understand how GRC capabilities such as enterprise risk management (ERM), compliance management (SOX, ISO, PCI, NIST, etc.) and policy management should work together to build a cohesive and balanced risk management strategy within the business context. Students will learn about GRC technology and GRC program management required to support and grow GRC capabilities. Lastly, students will hear from guest lecturers about the roles and responsibilities of the Board of Directors, Risk/Audit Governance Committees, Chief Executives (Chief Information Security Officer (CISO), Chief Risk Officer (CRO), Chief Security Officer (CSO), etc.) and how they rely on GRC capabilities to support the business.

**Credits:** 3

**Room and Schedule:** On-line Asynchronous; Open to Law School by permission of the Program Director. Open to Lynch Cyber minors/Boston College Undergraduate Seniors by permission of the Program Director.

**Satisfies Core Requirement:** None

Cybersecurity: The Role of the CISO
Leigh, Christopher J
Fall 2023
Course provides guidance and the necessary skills to lead, design, and frame a business case for investment. Course outlines cost-benefit analysis and return-on-investment (ROI) by utilizing incident analysis, threat, and residual vulnerability analyses to determine and quantify the underlying business parameters. Course also addresses supporting techniques, including benchmarking and normalization, to enable data-based decision-making. Additionally, the course covers executive dashboard design, security metrics, key performance indicators (KPIs), graphics, illustrative techniques, business reach-out, and leadership engagement.

Our increasingly digital world has led to a wealth of opportunities for cybercriminals and other bad actors. This class, taught by a current and former federal prosecutor, will provide an in-depth examination of cybercrime, including the federal statutes implicated in computer hacking and other computer-based crimes, such as network attacks, identity and data theft, and cyberstalking. Through illustrative case studies, students will learn how federal law enforcement investigates and prosecutes cybercrime, starting with the collection of digital evidence and proceeding through trial and sentencing. The course will highlight the investigative tools law enforcement uses as well as the current challenges law enforcement faces in prosecuting cybercriminals. We will examine legal, procedural, and policy issues surrounding the search and seizure of digital evidence. The class will incorporate guest speakers from government organizations and other stakeholders in the cybersecurity arena.

ADCY664001
National Security: Law, Policy, & Government Investigations
Noone, Gregory P
Fall 2023
National security law is often inaccessible and can be particularly hard to follow when divorced from the context of historical tradition, governmental structures, and operational reality in which it functions. This course will examine the law governing national security investigations and related litigation and will provide an in-depth examination of national security from the U.S. Government’s perspective. Through class lectures, case studies, and hands-on application, students will learn how Federal intelligence and law enforcement agencies work together (and sometimes not) and their interplay with Foreign intelligence and law enforcement agencies to investigate and prosecute national security crimes, starting with the collection of evidence and proceeding through trial and sentencing. The course will highlight the investigative tools and laws used by intelligence and law enforcement agencies to investigate national security concerns and the varying challenges faced in prosecuting such cases. The class will incorporate guest speakers and experts from government organizations and other stakeholders in the national security field.

**Role of Intelligence: Enabling Proactive Security**  
Porter, Christopher B  
Fall 2023
Course addresses internal and external intelligence sources, including intrusion detection, log analysis, data mining, M&A due diligence, HUMINT, and the role of an Information Security Operations Center (ISOC). From an external perspective, the course covers information gathering, intelligence feeds/sources, and fusion centers as well as the automation, filtering, validation, analysis, and dissemination of intelligence. The course also provides an understanding as to technical countermeasures (e.g., sandboxes, honeypots), and addresses the roles of DHS, FBI, NSA, and DOD.

Cybersecurity Courses: Spring 2024

ADCY600001
Cyber Ecosystem and Cybersecurity
Cohen, Hayley; Glick, Adam S
Spring 2024
Course provides an overview of Cyberspace, defines the scope of Cybersecurity, and addresses information classification and system compartmentalization. Course includes an appreciation of information confidentiality, integrity, and availability, and covers Cybersecurity architecture, strategy, services, hardware, software, and cloud services. The course also examines national security issues, critical infrastructure, and the potential for cybercrime and cyber terrorism, as well as the need for corporations to align their security with business needs and consider the threat from malicious employees, contractors, and/or vendors.

Cybersecurity Policy: Privacy and Legal Requirements
DiGiacomo, Henry J; Fick, Katherine J; Powers, Kevin R
Spring 2024
Course provides a comprehensive examination of the laws, regulations, and Executive Orders concerning privacy, including PCI, HIPAA, GLBA and their overseas counterparts, and the roles of Federal, State and local law enforcement. The course also examines national security issues governed by various Federal agencies (e.g., SEC, FTC, FCC, FERC), including suspicious activity reporting (SAR) requirements under the Patriot Act. Additionally, the course addresses intellectual property protection (e.g., SOX, FISMA, NIST), security classifications, data location requirements, audits, compliancy assessments, and individual, class-action, and shareholder derivative litigation and liability.

ADCY630001
Network and Infrastructure Security
Escalante, David J; Rey, Patrick J
Spring 2024
Course provides an understanding of the threats and vulnerabilities in Cybersecurity and an introduction to the concepts of layering defense and providing for defense-in-depth. Specific topics include operating system security, component lifecycle management, database security, server security, application security, mobile devices, BYOD, and end-point security. The course covers the roles of physical security, system hardening, firewalls, encryption, anti-virus, and malware defense. The course also introduces identity and access management, role-based access control (RBAC), intrusion detection, penetration testing, and incident response.

**Incident Response and Management**  
**Hardeman, Elbert E; Powers, Kevin R; Shola, Thomas A**  
**Spring 2024**  
Course provides an understanding of the design and development of a Cybersecurity strategy which aligns with private industry and government needs, including incident documentation/analysis, response planning, and the role of a critical event response team (CERT) in determining recovery, managing liability and communications, coordinating with law enforcement, and protecting corporate reputation. Course also examines leadership and the adoption and implementation of a proactive stance through monitoring and responding to internal and external intelligence, including monitoring network traffic, activity logs (SIEM) for data breaches, denial of service (DoS), and integrity events, and outlines the roles of information security operations centers (ISOCs) and network operations centers (NOCs).

**Cybersecurity: Designing Offensive and Defensive Capabilities**

Maor, Etay

Spring 2024
This technical course examines both offensive and defensive tools, tactics, and procedures in cybersecurity. The course focuses on the technical aspects of cybersecurity, including online attacks and the development of counter measures, varying threats (phishing, malware, social engineering, mobile attacks, network exploitation), defensive technologies, tactics, and strategies, and policy issues pertaining to privacy v. national security. This course will analyze offensive capabilities used by cyber criminals, nation states, and other adversaries to attack private and government infrastructures to develop and design proper detection capabilities, mitigation strategies, and response plans to recover from such attacks. Through hands-on simulations, topics covered include cryptography (e.g., PKI, encryption techniques, digital signatures), open source intelligence (OSINT), IoT vulnerabilities, software and hardware based attacks, and recovery procedures, among others.

**ADCY692501**  
**Cybersecurity: Risk and Resiliency**  
**Wilkinson, David**  
**Spring 2024**
Course provides a comprehensive understanding of the fundamentals of risk management and applies them to the cyber security and digital risk management environments. It addresses methodologies for comparing digital risks and deciding between acceptance, mitigation, risk transfer, and avoidance. The course compares popular methodologies for quantifying, comparing, and categorizing digital risks. It includes specific topics such as Risk and Control Self-Assessment (RCSA), Risk Appetite Statement (RAS), Risk Tolerance metrics, Three Line Defense Model, Risk Register, Third-Party Risk Management, and Factor Analysis of Information Risk (FAIR). Participants attending this course will be introduced to a broad spectrum of risk management principles, learn how to apply them in cyber security and digital environments, and immediately be able to contribute to cyber risk management using a risk management toolbox learned in this course that is applicable across a wide scope of business, government, academia, and beyond.

Economics Courses: Summer 2023

ADEC351001
Mathematics for Economists
Gerraughty, Lorin E
Summer 2023
This course introduces students to mathematical methods used in the analysis of economics and business problems. It focuses on multivariable calculus, optimization, and its economic applications. This includes optimization with equality constraints, utility maximization and consumer demand, and Kuhn-Tucker conditions. The course concludes with lectures on economic dynamics and the application of integral calculus to problems in investment and capital formation, present value analyses, and economic growth models. This course is an upper-level Economics elective, and it also fulfills Calculus II requirement for MS in Applied Economics program.

ADEC720001
Applied Macroeconomic Theory
Erbil, Can
Summer 2023
This course covers the theory and practice of macroeconomics. The course focuses on the underlying determinants of economic growth, unemployment, and inflation by developing and assessing a variety of simple models. The course will also teach the skills needed for interpreting and using macroeconomic data to formulate macroeconomic policy. A central feature of the course includes understanding the ability and limitations of policy for stabilizing the business cycle and promoting long-term growth.

Data Analysis
Fulton, Lawrence V
Summer 2023
This course is designed to introduce students to the concepts and data-based tools of statistical analysis commonly employed in Applied Economics. In addition to learning the basics of statistical and data analysis, students will learn to use the statistical software package Stata to conduct various empirical analyses. Our focus will be on learning to do statistical analysis, not just on learning statistics. The ultimate goal of this course is to prepare students well for ADAN 7320.01, Econometrics.

ADEC732001
Econometrics
Sharma, Arvind
Summer 2023
This course focuses on the application of statistical tools used to estimate economic relationships. The course begins with a discussion of the linear regression model, and examination of common problems encountered when applying this approach, including serial correlation, heteroscedasticity, and multicollinearity. Models with lagged variables are considered, as is estimation with instrumental variables, two-stage least squares, models with limited dependent variables, and basic time-series techniques.

ADEC736001  
**Financial Economics**  
Kowalik, Michal K  
**Summer 2023**  
This course teaches the practical application of finance theory to decisions made in industry. We will learn how individuals and firms choose investment portfolio decisions under uncertainty with a particular focus on topics such as the capital asset pricing model, market imperfections, borrowing constraints, market efficiency and security valuation. Understanding how interest rates, exchange rates, and risk work will aid your understanding of multiple firm problems such as why does a firm chooses a specific investment or place of manufacturing. In addition, studying term structures and discounted cash flows are important to understanding the decision to invest over time.

**Credits:** 3

ADEC738001
Empirical Health Economics
Bowser, Diana M
Summer 2023
At its root, the study of health economics is the study of market failure and of government failure. We will begin the course by studying the ways in which incentives facing players in the health care industry are different from those present in other industries. We will use economics to explore how firms in the health care sector should behave, given the sometimes perverse incentives they face. As the course progresses, our emphasis will shift: in small groups, students will complete and present a data-driven (or empirical) project investigating a question relevant to healthcare providers, pharmaceutical companies, insurance companies, and/or government regulators. Skills developed in this class will allow students to think critically about incentives present in health care settings, analyze various types of health care data, and present ways to improve the performance of different players in the health care industry.

ADEC739001
Empirical Money and Banking
Kazemi, Hossein S
Summer 2023
This course focuses on a study of money, banking and financial markets with a clear emphasis on central banking and conduct of monetary policy. An in-depth analysis of fixed income markets in addition to equities and other financial instruments in this course provides students with the opportunity to master intricacies of financial markets and investing in them. Additionally, the connection between movements in the financial markets and monetary policy is examined on a daily basis. An extended use of Bloomberg Professional LP in this course makes this very applied class particularly valuable to anyone interested in bridging the gap between the economic theory and practice.

**Credits:** 3  
**Room and Schedule:** On-line Asynchronous

ADEC743001
Big Data Econometrics
Veliche, Razvan
Summer 2023
This course demonstrates how to merge economic data analysis and applied econometric tools with the most common machine learning techniques, as the rapid advancement of computational methods provides unprecedented opportunities for understanding "big data." This course will provide a hands-on experience with the terminology, technology, and methodologies behind machine learning with economic applications in marketing, finance, healthcare, and other areas. The main topics covered in this course include: advanced regression techniques, resampling methods, model selection and regularization, classification models (logistic regression, Naïve Bayes, discriminant analysis, k-nearest neighbors, neural networks), tree-based methods, support vector machines, and unsupervised learning (principal components analysis and clustering). Students will apply both supervised and unsupervised machine learning techniques to solve various economics-related problems with real-world data sets. No prior experience with R or Python is necessary.

**Credits:** 3  
**Room and Schedule:** On-line Asynchronous  
**Satisifies Core Requirement:** None  
**Prerequisites:** ADEC7310 AND ADEC7320. Must have successfully completed ADEC731001 Data Analysis or obtain department approval.

ADEC746001
Predictive Analytics/Forecasting
Fulton, Lawrence V
Summer 2023
Econometrics This course will expose students to the most popular forecasting techniques used in industry. We will cover time series data manipulation and feature creation, including working with transactional and hierarchical time series data as well as methods of evaluating forecasting models. We will cover basic univariate Smoothing and Decomposition methods of forecasting including Moving Averages, ARIMA, Holt-Winters, Unobserved Components Models and various filtering methods (Hodrick-Prescott, Kalman Filter). Time permitting, we will also extend our models to multivariate modeling options such as Vector Autoregressive Models (VAR). We will also discuss forecasting with hierarchical data and the unique challenges that hierarchical reconciliation creates. The course will use the R programming language though no prior experience with R is required.

Ethics, Economics, and Public Policy
Mc Gowan, Richard, SJ
Summer 2023
The focus of the course is to ascertain how public policy makers decide to either regulate or legislate how an industry/firm will operate in society. We will examine the process from three different vantage points: ethics, economics, and policy. The first part of the course will be spent examining the role (or lack thereof!) that ethical thinking plays in motivating public policy makers to take action. The second part of the course examines how economic pressure comes into play as policy makers try to establish bounds on an industry or a firm. Finally, we explore the role that social pressures such as the media and various interest groups play in influencing how public policy makers react to various issues that confront an industry or a firm.

ADEC781001
Empirical Behavioral Economics
DeGeest, Lawrence R
Summer 2023
Behavioral economics combines insights from economics and the cognitive sciences to study how human beings make decisions in various contexts. This course will introduce you to the key concepts in this field and give you the tools you need to start designing your own experiments for business or policy applications. Beginning from the standard rational model, we first study the decision-maker in isolation and then move on to the decision-maker in strategic settings. As we go, we will learn how to use simple theoretical models to describe and predict behavior, as well as analyze data from canonical published experiments using R. We will then see how firms and policy makers can design interventions help people make better decisions.

Software Tools for Data Analysis
Parravano, Stefano A
Summer 2023
The course provides students with an overview of popular software packages used today for data exploration, analysis and visualization. The first part of the course will offer an overview of the non-programming tools Excel and Tableau. In Excel we will cover basic charts with the emphasis on their use with pivot tables. In Tableau students will be introduced to more advanced data exploration and visualization methods via a variety of advanced charts and dashboards. The second part of the course will cover exploratory data analysis in R. Here students will learn how to write their own code for importing, cleaning and exploring large datasets, as well as how to create, modify and export complex charts and summaries for visual, qualitative and quantitative analysis of the data. The third part of the course will provide an intro to using SQL databases, where students will learn how to create SQL queries to select, filter and manipulate the data.

Economics Courses: Fall 2023

ADEC110101
Principles of Economics
Lopez Rago, Ricardo A
Fall 2023
This course analyzes prices, output, and income distribution through the interconnections between households and businesses in a Western economy. It studies economic agents, their behavior and interactions, and the outcome of these interactions taking into account government interventions. It analyzes national income and employment, economic fluctuations, monetary and fiscal policy, inflation, growth, interest rates and international aspects of macroeconomic policy such as the trade balance, exchange rates, and the purchasing power parity. The appropriate role of the monetary authority (Central Bank) and government intervention is also examined. Basic analytical tools are applied to current economic problems.

Mathematics for Economists
Gerraughty, Lorin E
Fall 2023
This course introduces students to mathematical methods used in the analysis of economics and business problems. It focuses on multivariable calculus, optimization, and its economic applications. This includes optimization with equality constraints, utility maximization and consumer demand, and Kuhn-Tucker conditions. The course concludes with lectures on economic dynamics and the application of integral calculus to problems in investment and capital formation, present value analyses, and economic growth models. This course is an upper-level Economics elective, and it also fulfills Calculus II requirement for MS in Applied Economics program.

ADEC736001
Financial Economics
Kowalik, Michal K
Fall 2023
This course teaches the practical application of finance theory to decisions made in industry. We will learn how individuals and firms choose investment portfolio decisions under uncertainty with a particular focus on topics such as the capital asset pricing model, market imperfections, borrowing constraints, market efficiency and security valuation. Understanding how interest rates, exchange rates, and risk work will aid your understanding of multiple firm problems such as why does a firm chooses a specific investment or place of manufacturing. In addition, studying term structures and discounted cash flows are important to understanding the decision to invest over time.

ADEC740101
Operations Research in Applied Economics
Chale, Marc W
Fall 2023
This course provides an introduction to the use of operations research methods in economics. For this purpose, the course starts with a brief review of the basics from microeconomic theory, calculus and linear algebra, which is followed by the conceptual foundations of economic modeling and the applications of optimization techniques on various economic problems. The course provides a very sound perspective on how to use operations research techniques in any kind of economic and managerial decision making, which has becoming an increasingly sought after skill. We will work on various problems, including portfolio management, resource management, environment and energy related regulations, etc.

ADEC740601
Predictive Analytics/Forecasting
Bradley, Robert J
Fall 2023
Econometrics This course will expose students to the most popular forecasting techniques used in industry. We will cover time series data manipulation and feature creation, including working with transactional and hierarchical time series data as well as methods of evaluating forecasting models. We will cover basic univariate Smoothing and Decomposition methods of forecasting including Moving Averages, ARIMA, Holt-Winters, Unobserved Components Models and various filtering methods (Hodrick-Prescott, Kalman Filter). Time permitting, we will also extend our models to multivariate modeling options such as Vector Autoregressive Models (VAR). We will also discuss forecasting with hierarchical data and the unique challenges that hierarchical reconciliation creates. The course will use the R programming language though no prior experience with R is required.

**Big Data Econometrics**  
Veliche, Razvan  
**Fall 2023**

This course demonstrates how to merge economic data analysis and applied econometric tools with the most common machine learning techniques, as the rapid advancement of computational methods provides unprecedented opportunities for understanding "big data." This course will provide a hands-on experience with the terminology, technology, and methodologies behind machine learning with economic applications in marketing, finance, healthcare, and other areas. The main topics covered in this course include: advanced regression techniques, resampling methods, model selection and regularization, classification models (logistic regression, Naive Bayes, discriminant analysis, k-nearest neighbors, neural networks), tree-based methods, support vector machines, and unsupervised learning (principal components analysis and clustering). Students will apply both supervised and unsupervised machine learning techniques to solve various economics-related problems with real-world data sets. No prior experience with R or Python is necessary.

ADEC750001
Ethics, Economics, and Public Policy
Erbil, Can
Fall 2023
The focus of the course is to ascertain how public policy makers decide to either regulate or legislate how an industry/firm will operate in society. We will examine the process from three different vantage points: ethics, economics, and policy. The first part of the course will be spent examining the role (or lack thereof!) that ethical thinking plays in motivating public policy makers to take action. The second part of the course examines how economic pressure comes into play as policy makers try to establish bounds on an industry or a firm. Finally, we explore the role that social pressures such as the media and various interest groups play in influencing how public policy makers react to various issues that confront an industry or a firm.

ADEC781001
Empirical Behavioral Economics
DeGeest, Lawrence R
Fall 2023
Behavioral economics combines insights from economics and the cognitive sciences to study how human beings make decisions in various contexts. This course will introduce you to the key concepts in this field and give you the tools you need to start designing your own experiments for business or policy applications. Beginning from the standard rational model, we first study the decision-maker in isolation and then move on to the decision-maker in strategic settings. As we go, we will learn how to use simple theoretical models to describe and predict behavior, as well as analyze data from canonical published experiments using R. We will then see how firms and policy makers can design interventions help people make better decisions.

ADEC782001
Economics of Innovation and Entrepreneurship
Sile, Ayse E
Fall 2023
Innovation and entrepreneurship have been the key drivers behind economic growth across developed economies and even more so in the U.S. However, innovations and entrepreneurism develop under a high degree of risk and uncertainty and, in most cases, rupture existing structural and traditional patterns and practices. Economic policies along with regulation set the incentives for innovation and entrepreneurship. Intellectual property rights and competition ensure that innovators receive a fertile and collaborative market structure to reach their potential.

Communication and Leadership in Applied Economics
Bradley, Robert J
Fall 2023
This course on "Leadership and Communication for Applied Economists" has been specifically designed to meet the needs of graduate students in the Applied Economics program. Each individual session focuses on helping students understand leadership traits and develop commensurate written or oral communication skills to reinforce their influential skills. Students will discuss their current writing projects in the context of each session's topic. Also, the course will also focus on the topics related to leadership, effective written and oral communications tailored to specific audiences. In addition to leadership and communication skills, students will practice elevator speeches, short written communications and other presentations.

ADEC790002
Software Tools for Data Analysis
Sharma, Arvind
Fall 2023
The course provides students with an overview of popular software packages used today for data exploration, analysis and visualization. The first part of the course will offer an overview of the non-programming tools Excel and Tableau. In Excel we will cover basic charts with the emphasis on their use with pivot tables. In Tableau students will be introduced to more advanced data exploration and visualization methods via a variety of advanced charts and dashboards. The second part of the course will cover exploratory data analysis in R. Here students will learn how to write their own code for importing, cleaning and exploring large datasets, as well as how to create, modify and export complex charts and summaries for visual, qualitative and quantitative analysis of the data. The third part of the course will provide an intro to using SQL databases, where students will learn how to create SQL queries to select, filter and manipulate the data.

Economics Courses: Spring 2024

ADEC225101
Special Topics: Economics of Sustainable Development
Sabyrbekov, Rahat
Spring 2024
Growing economies have led to significant challenges for natural ecosystems, threatening human well-being. This course aims to provide students with a basic understanding of how economic analysis is applied to subjects in environmental sustainability and development. Topics include the analysis of situations in which the behavior of individuals indirectly affects the well-being of others, the relationship between the economy and the environment, and the use of policies to promote environmental stewardship.

Credits: 4

Money, Banking and Financial Systems
Kowalik, Michal K
Spring 2024
This course introduces concepts in financial economics with a focus on practical application of finance theory to investment decisions as well as on the institutional framework of financial systems. We will explore how individuals and firms make investment decisions under uncertainty with a particular focus on topics such as discounted cash flows, risk, leverage, interest rates, exchange rates, and applications of the framework for various securities. Studying these topics will allow us to build a foundation for understanding the existence of the financial institutions and markets as well as the central banks and their role in the financial system.

ADEC351001
Mathematics for Economists
Gerraughty, Lorin E
Spring 2024
This course introduces students to mathematical methods used in the analysis of economics and business problems. It focuses on multivariable calculus, optimization, and its economic applications. This includes optimization with equality constraints, utility maximization and consumer demand, and Kuhn-Tucker conditions. The course concludes with lectures on economic dynamics and the application of integral calculus to problems in investment and capital formation, present value analyses, and economic growth models. This course is an upper-level Economics elective, and it also fulfills Calculus II requirement for MS in Applied Economics program.

ADEC351501  
Econometric Methods  
Ulusoy, Veysel  
Spring 2024  
The course aims to cover the basic topics in econometrics. We will focus both on econometric theory, and on applying this theory to working with the data using statistical software. By the end of the course students should be able to apply the knowledge they obtained to real life economic problems using statistical software, as well as to proceed with studying advanced topics in broadly defined econometrics, including forecasting, causal inference and machine learning.

Applied Macroeconomic Theory
Sjuib, Fahlino F
Spring 2024
This course covers the theory and practice of macroeconomics. The course focuses on the underlying determinants of economic growth, unemployment, and inflation by developing and assessing a variety of simple models. The course will also teach the skills needed for interpreting and using macroeconomic data to formulate macroeconomic policy. A central feature of the course includes understanding the ability and limitations of policy for stabilizing the business cycle and promoting long-term growth.

ADEC740601
Predictive Analytics/Forecasting
Bradley, Robert J
Spring 2024
Econometrics This course will expose students to the most popular forecasting techniques used in industry. We will cover time series data manipulation and feature creation, including working with transactional and hierarchical time series data as well as methods of evaluating forecasting models. We will cover basic univariate Smoothing and Decomposition methods of forecasting including Moving Averages, ARIMA, Holt-Winters, Unobserved Components Models and various filtering methods (Hodrick-Prescott, Kalman Filter). Time permitting, we will also extend our models to multivariate modeling options such as Vector Autoregressive Models (VAR). We will also discuss forecasting with hierarchical data and the unique challenges that hierarchical reconciliation creates. The course will use the R programming language though no prior experience with R is required.

ADEC743001
Big Data Econometrics
Veliche, Razvan
Spring 2024
This course demonstrates how to merge economic data analysis and applied econometric tools with the most common machine learning techniques, as the rapid advancement of computational methods provides unprecedented opportunities for understanding "big data." This course will provide a hands-on experience with the terminology, technology, and methodologies behind machine learning with economic applications in marketing, finance, healthcare, and other areas. The main topics covered in this course include: advanced regression techniques, resampling methods, model selection and regularization, classification models (logistic regression, Naïve Bayes, discriminant analysis, k-nearest neighbors, neural networks), tree-based methods, support vector machines, and unsupervised learning (principal components analysis and clustering). Students will apply both supervised and unsupervised machine learning techniques to solve various economics-related problems with real-world data sets. No prior experience with R or Python is necessary.

Credits: 3
Room and Schedule: Gasson Hall 210 M 06:30PM-09:00PM
Satisfies Core Requirement: None
Prerequisites: ADEC7310 AND ADEC7320. Must have successfully completed ADEC731001 Data Analysis or obtain department approval.

ADEC750001  
Ethics, Economics, and Public Policy  
Erbil, Can  
Spring 2024
The focus of the course is to ascertain how public policy makers decide to either regulate or legislate how an industry/firm will operate in society. We will examine the process from three different vantage points: ethics, economics, and policy. The first part of the course will be spent examining the role (or lack thereof!) that ethical thinking plays in motivating public policy makers to take action. The second part of the course examines how economic pressure comes into play as policy makers try to establish bounds on an industry or a firm. Finally, we explore the role that social pressures such as the media and various interest groups play in influencing how public policy makers react to various issues that confront an industry or a firm.

ADEC752001
Transfer Pricing
Dimitrijevic, Stanko
Spring 2024
Transfer pricing involves the valuation of goods, services, and other assets exchanged between affiliated companies. Based on economic principles and governed by the U.S. tax code, international transfer pricing has continued to be a focal point for both multinational companies and tax authorities as a means to evaluate the allocation of income resulting from intercompany transactions conducted across borders. This course will include an introduction to basic tax and transfer pricing concepts, accounting and financial statement analysis, and an application of economic principles underlying transfer pricing analysis. Students will use real case studies and work in groups to consider the economics associated with conducting an international business, and apply transfer pricing methods to develop and support their analysis.

ADEC753001
Measuring Business Cycles, Trends and Growth Cycles
Ozyildirim, Ataman K
Spring 2024
This course will focus on the measurement and analysis of business cycles with a special
emphasis on business forecasting. Leading indicators are used as forecasting tools to predict
when economies move from expansion to recessions and vice versa. Taking an applied empirical
approach, we will cover data and tools used for analysis of short term conditions. While
business cycle analysis is concerned with short-term fluctuations, understanding the long-term
growth path of an economy is important to interpret short-term movements. Applications of
trend estimation methods will also be covered. We will study cycles in developing economies
which have experienced long periods of continuous growth. Our focus is on important economic
indicators and a discussion of data issues such as price indexes, deflation, and seasonal
adjustment. How can these indicators be applied and interpreted to understand short term
trends in the economy? How can they assist in economic and business decision making?

ADEC754001
Marketing Analytics for Economists
Affinito, Letizia
Spring 2024
Specifically designed for Economists, this course will enable students to use analytics to improve marketing performance and lead marketing efforts. Students will be able to answer key questions such as: How to design the appropriate metrics and analytics to monitor/improve marketing efforts? How can I measure my various marketing programs’ impact on revenue and profit? How can I clearly define the business problem? How can I better understand the company's goals? How can I communicate insights, not just facts? Which are all the relevant drivers (e.g., marketing and environmental factors) and outcomes (e.g., purchase funnel metrics) and how do they work in marketing? Which tool, of the many available, is best for which problem? In studying a range of firms across a range of contexts and industries, the course builds on recent advances in industrial organization and organizational economics. We use a number of cases and real life examples/simulations to discuss each of the points presented in the course. As such, the course ultimately is designed to focus on the essential topics and problems of Marketing Analytics as experienced by business managers in real life situations. Ultimately, the course will emphasize two kinds of skills: Analytical skills, which are required for Marketing Analytics; and "soft" (i.e., leadership) skills, which are required for implementation. The course will begin with the analytical skills and then move on to implementation issues.

Communication and Leadership in Applied Economics
Bradley, Robert J
Spring 2024
This course on "Leadership and Communication for Applied Economists" has been specifically designed to meet the needs of graduate students in the Applied Economics program. Each individual session focuses on helping students understand leadership traits and develop commensurate written or oral communication skills to reinforce their influential skills. Students will discuss their current writing projects in the context of each session's topic. Also, the course will also focus on the topics related to leadership, effective written and oral communications tailored to specific audiences. In addition to leadership and communication skills, students will practice elevator speeches, short written communications and other presentations.

ADEC784001
Management of Projects in Applied Economics
Sile, Ayse E
Spring 2024
From an economics perspective, the success of a project mostly relies on the maximization of profit to allow for reinvestment and further growth and profits. The course will focus on best practices that enable the successful implementation of and excellence in project management with a focus on economics. The course also discusses the technical, cultural, and interpersonal skills necessary to successfully manage projects from start to finish. It emphasizes that project management is a professional discipline with its own tools, body of knowledge, and skills. Concepts are reinforced by case studies covering a wide variety of project types and industries.

The course provides students with an overview of popular software packages used today for data exploration, analysis and visualization. The first part of the course will offer an overview of the non-programming tools Excel and Tableau. In Excel we will cover basic charts with the emphasis on their use with pivot tables. In Tableau students will be introduced to more advanced data exploration and visualization methods via a variety of advanced charts and dashboards. The second part of the course will cover exploratory data analysis in R. Here students will learn how to write their own code for importing, cleaning and exploring large datasets, as well as how to create, modify and export complex charts and summaries for visual, qualitative and quantitative analysis of the data. The third part of the course will provide an intro to using SQL databases, where students will learn how to create SQL queries to select, filter and manipulate the data.

Market Research and Analysis
Sile, Ayse E
Spring 2024
Market research is the systematic gathering and interpretation of information and data using the statistical and analytical methods and techniques of the applied economics and statistics to gain insights or support decision making. This course provides you with the skills and tools needed to understand and evaluate market research. Market research and analysis involve developing research questions, collecting data, analyzing it and drawing inference, with a view to making better decisions. To this end, the course is organized into two basic parts: (1) Data collection and research design, and (2) Tools and applications of research and data analysis. The course will provide a framework for conducting research, knowledge to properly design research, techniques and tools to analyze data and infer insights, and practical information sources.

**Fundamentals of Private Equity**

**Yanmaz-Karsligil, Gul**

**Spring 2024**

This course is for students who wish to gain a high-level understanding of the private equity ecosystem. Private equity is no longer niche, but a large and global asset class with trillions of dollars under management that touches many aspects of people's daily lives all over the world. There are now thousands of private equity firms globally, and the industry has evolved to the point where different players offer distinct investment strategies and execution styles. Topics will include LBOs, venture capital, structures, economics, due diligence, portfolio construction, performance measurement, impact on society, agency issues, and ethical considerations. Through class discussion, guest lectures, and case studies, students will develop an understanding and appreciation for this unique asset class that is not well understood by many.

Environmental and Natural Resource Economics
Olcum, Gokce A
Spring 2024
This course examines where the tension between economic activities and environment stems from, how economic activities cause environmental degradation and what kind of regulatory actions should be taken in order to maintain the balance between economic growth and environmental sustainability. The course has two main parts, theory and applications. We will start with analyzing the underlying economic theory of market failures, economic valuation, economic incentive instruments, and then move onto the applications of the economic theory to real world cases, i.e., air pollution control and climate change mitigation policies, water quality management and waste management.

The Graphic Novel and Graphic Narratives
Defusco, Andrea C
Summer 2023

Storytelling via images is as old as humankind, and is the first way that human beings memorialize narratives. From cave drawings to tapestries to comic books and manga, graphic narratives have moved from the worlds of primitive sketches of gods and men to political discourse, countercultural manifesto, and culture-shaping revolutionary works. Beginning with art narratives ranging from cave drawings to Greek sculpture and the Sistine Chapel, passing through mid-century advertising, Stan Lee, Maus, and moving into the contemporary era of Persepolis, Myers, Takei, Medina and the marvelous Nick Sousanis, this course will survey the history and reception of graphic narrative as the genre moves from a predominantly white and male medium towards an increasingly popular international cultural movement that crosses gender, class and ethnic lines.

Ethnic difference has a profound effect on personal and social understandings of what it means to be an American. Multicultural fiction navigates the complex terrain of race and ethnicity in America. Fiction depicts a variety of experiences and suggests that what constitutes an American identity is far from settled. A discussion of the literature invites students to share their own personal narratives - stories of race, ethnicity, class, gender, faith, and nationality - to further uncover what it means to be ethnic in America. Writers include: S. Alexie, E. Danticat, J. Diaz, J. Eugenides, and J. Lahiri.

Creative Nonfiction
Santiago, Elizabeth
Fall 2023
This course focuses on the writing of Creative Nonfiction. In particular, we will focus on the techniques and skills present in creative nonfiction such as the personal essay, memoir, literary journalism, opinion, and blog posts. Students will learn and practice strategies for brainstorming, drafting, critiquing, and revising their work, as well as practice discussing their works-in-progress and providing feedback to others on their works. Well also read and reflect upon a variety of creative nonfiction texts as we compose our own works. Youll explore a wide range of topics and experiment broadly with voice, style, form, and the use of research to enrich your writing.

Special Topics: Studies in Poetry
Roberts, Susan A
Fall 2023
In Studies in Poetry, we will cover a wide range of areas concerning our subject, from the structure and marvelously fluid forms of poetry to its emotive force and analysis of its parts. While students will learn to explicate poetry and write critical analysis by the end of the course, most of our class time will be focused on reading and discussion of poems. The purpose is to get comfortable with poetry, which, by many accounts, is experiencing a new vitality and growing audience in this country. You will be expected to write comprehensively about poetry and will be given a weekly short assignment on a poem or poems of your choice. You will also be writing poems yourself to experience a bit of what a poet faces. Additionally, you will be responsible for participating in all discussions and for fulfilling all reading assignments.

Writing With Precision
Santiago, Elizabeth
Fall 2023
Our personal and professional worlds are driven by the rapidly changing technology tools we use to communicate. The ability to write clearly and effectively using multiple mediums for multiple audiences are vital and necessary skills. Strengthening these writing skills will give you the ability to create and maintain relationships, explain ideas efficiently and effectively, and persuade others to take specific actions. Yet, whether communicating in business, disseminating information online, or blogging for pleasure, writing with precision, economy, and style, are skills that take practice and development. This course expands powers of expression, develops a large and dynamic vocabulary and enables learners to write with precision. We will sharpen writing skills through exercises and brief assignments, with special attention paid to writing for the Web and other forms of online communication.

Global Literature
Trivedi, Nirmal H
Spring 2024
Global literature goes beyond the notion of the globe as a physical geographic entity and transcends national boundaries to comment on the most prevailing aspects of the human condition. This course will attempt to redefine the borders of the world we live in through narratives that recognize the many conflicting issues of race, language, economy, gender and ethnicity, which separate and limit us, while also recognizing that regardless of the differences in our stories, we are united by our humanity. Through literature, students will journey across continents, countries, cultures and landscapes, to reflect on various renditions on the human experience. Writers will include: Aravind Adiga (India), NoViolet Bulawayo (Zimbabwe), Edwidge Danticat (Haiti), Yu Hua (China), Dinaw Mengestu (Ethiopia), and Marjane Satrapi (Iran).

ADET310401  
Social Entrepreneurship  
Frechette, Edward K  
Summer 2023
Social Entrepreneurship focuses on developing innovative, market-based solutions to long-standing social issues. Social entrepreneurs are motivated to create profitable, sustainable companies that have a positive impact on the community, the broader society, and the planet. In this course, students will learn how to design, build, and lead profitable, impactful social enterprises. They will analyze best practices for measuring and assessing the impact of social entrepreneurship in a variety of organizational, enterprise, and community settings. Case studies and guest speakers will illustrate the challenges and expanding opportunities of social entrepreneurship models in the private and public sector. Course topics include defining social entrepreneurship as distinct from traditional entrepreneurship; analyzing the essential components of a sustainable, scalable social enterprise; understanding organizational, governance, and funding options; reflecting on the interpersonal, analytical, and leadership skills that characterize successful social entrepreneurs; developing innovative solutions using strategies for co-creation with core stakeholders; and applying tools for measuring social impact and sustainable change.

Design and Prototyping for Entrepreneurs  
Kenney, Macauley R; Young, Emily J  
Fall 2023
This course introduces entrepreneurs to product design and prototyping principles, including the fundamentals of Design Thinking. Design Thinking has demonstrated its value in developing innovative, user-friendly products and services for all types of organizations. The course provides a detailed overview of design and prototyping techniques and best practices through case studies, demonstrations, guest experts, and lectures. Students will work individually and in small teams to apply these techniques through project-centered assignments grounded in specific design challenges. These projects foster critical thinking, creative exploration of options, customer research, experimentation, rapid prototyping, feasibility testing, and iteration. Design and Prototyping for Entrepreneurs will build problem-solving, creativity-boosting skills that are essential components of an entrepreneurial mindset.

Funding for New Ventures  
Frusztajer, Elisabeth  
Fall 2023
This course presents the landscape of venture funding and provides entrepreneurs with qualitative and quantitative decision-making tools to make well-informed, strategic choices about how to fund their new ventures. It covers the broad spectrum of startup funding options, from bootstrapping and loans, tapping friends and family resources, competing for accelerator and government funding, to seeking angel and venture capital investments. Within this spectrum, students will learn how to assess the feasibility of raising external funds for different business models at different stages of company growth, and how to analyze the tradeoffs of various funding options. The course also provides students with a grounding in the structure of venture capital investing, including term sheets, valuation, capitalization tables, boards of directors, preparing for due diligence, and the risk-reward perspective of traditional venture investors. Students will develop skills in analyzing the early-stage growth, revenue, and financial projections required for different types of funding through assigned business cases. They will prepare and present a funding pitch for a new venture of their choice as a final course project.

Entrepreneurship Courses: Spring 2024

ADET310101
Business Planning for New Ventures
Cronin, Mary J; Reske, David A
Spring 2024
This course teaches students the core components of business planning for new entrepreneurial ventures through lectures, case studies, guest speakers, peer discussions, and self-directed, interactive assignments. It highlights the tools and best practices for each key step in the business planning process, from identifying critical problems and innovative solutions, feasibility and market testing, developing a business and revenue model, to creating an investor pitch and a market launch timeline. Students will reinforce their mastery of these core components through practice and feedback; in parallel with each course module, students will develop and present a full business plan for the startup idea of their choice. Students may opt to develop their business plan individually, or as part of a small team.

The Examined Life

Welch, Christopher J

Summer 2023

The Examined Life is an interdisciplinary course that addresses perennial questions by linking them to contemporary issues of significant ethical import that have bearing on daily living and social life. It is meant to bring multiple lenses to bear on topics related to our shared condition and deepen our understanding of the complex realities of human existence. Through thoughtful engagement with these topics and in community with others, students will attend to and reflect upon their personal experiences with the end goal to form ideas and opinions on how we are called to respond to the challenges confronting our world today. This course is restricted to Woods College BA students.

Credits: 3
Room and Schedule: On-line Asynchronous; Woods College students only. Full summer.

ADEX115101
Woods College Formative Seminar
Welch, Christopher J
Summer 2023
This one credit course aims to support new Woods College students as they transition to college life, while helping them make the most of their Boston College experience. The course will expose students to Boston College on and off campus resources to facilitate their academic success and further deepen their connection to BC. Topics will include time management skills, career planning, ideas and strategies for engaging in critical thinking, communication, study skills and library research, and identifying and utilizing on campus and community resources geared for student success. Students will be empowered to make the most of their BC experience by engaging in reflection and self assessment as they create an academic plan and career plan. This course is designed to be taken with the opening course to the Woods College Core Curriculum, and students should register for the corresponding section of ADEX1150 The Examined Lifeat the same time they register for ADEX1151 Woods College Formative Seminar. Transfer students with more than 30 credits are exempt from the Formative Seminar requirement.

Purposeful Life
Klein, Timothy R
Fall 2023
The Purposeful Life course is the capstone experience to the Woods College Core Curriculum. The course builds upon the personal values and strengths students will concurrently explore in the Designing Your Career course. Students will grapple with and dig deeper into the following big-picture questions: What is my purpose and how do I pursue it? What problems of purpose do I care most about? How can I make a meaningful contribution that also brings me satisfaction? Research posits that having an awareness of how to approach work and the meaning that derives from it is crucial in achieving the best possible outcomes for both individuals and organizations. Course perspectives will combine psychology, adult learning, and organizational leadership topics to help students frame their purposeful path. Students will engage in a semester-long problem-based learning project that explores a local ethical issue they would like to understand better. This project will refine students reflection skills, incorporate their strengths, and enhance practical knowledge needed for future professional aspirations and lifelong learning. This learning experience will help students combine the competencies they have acquired in their Woods College coursework and co-curriculum with practical application in successful project implementation. This course is restricted to Woods College students with more than 100 credits. Students must register for the corequisite course, ADEX4151 Designing your Career.

ADEX415101
Designing your Career
Heaney, Michael C
Fall 2023
Guided by Ignatian principles of self-knowledge and discernment, students will learn how to connect the value of their liberal arts education to their futures. Through self-assessment exercises, lively discussion, and thought-provoking activities, students will identify and reflect upon their values, interests, and skills and then connect them to career options. In addition, students will explore the skills most desired by employers and learn how to develop those competencies during their BC careers. We will also discuss ways to research various career paths and learn targeted search strategies to achieve meaningful profession goals. Using a design thinking framework, students will approach the career exploration process with curiosity and creativity, learn how to identify their unique career interests, take ownership of their career development, and address challenges that often occur in the process. The skills developed will serve students throughout their life by teaching them to focus on possibilities and exploring various career pathways. Students who are considering questions like "what do I want to major in?", "what kind of internship do I want?", or "what sort of career should I pursue?" will all benefit from this course.

**History of American Architecture**
Mc Connell, John C
**Fall 2023**
Introductory course investigates American Architecture from the first European settlement to the present. Within the context of cultural, political, and technological change, students investigate the process whereby society leaves its legacy to posterity through its buildings. Attention focuses on the influence of such factors as tradition, environment, stylistic change, the inventiveness of individual architects, and the impact of technology.

**Introduction to Acting**
Pluto, Anne E
**Fall 2023**
This course lays the foundation for studying the discipline and art of acting, through exercises, games, reading, discussion, scene work, and analysis. We will clarify the necessity of learning the craft of acting, which requires a disciplined commitment to voice, speech and movement training, and an intellectual rigor in dissecting text. We will focus on the work of the Ensemble above all, cultivating the unique spirit of collaboration that is inherent in the theater.

Fine Arts Courses: Spring 2024

ADFA180001
Introduction to Theater
Pluto, Anne E
Spring 2024
This course examines the form and meaning of theatre in civilizations from the ancient Greeks to modern times and is designed to expose the student to the live performance experience through the study of various elements of theatre and performance, the history of theatre, and dramatic literature. Attention is paid to the relationship between live performance and other mediatized forms, like film and television, with which the student likely will already be familiar. Students will be required to read and analyze various plays and films of plays, to view two live productions, take a walking tour of Boston College theatre spaces, and to explore the process of theatrical production.

ADHA701501
Leadership in Healthcare
Guarino, Richard J
Summer 2023
The course introduces leadership models, theories, and skills needed to successfully manage and lead healthcare organizations through transformational versus transactional leadership styles. Students use a variety of self-assessment tools (e.g., Myers-Briggs, SWOT analysis of self, leadership-style inventory) to develop self-awareness and to better understand the role of emotional intelligence in effective leadership. Students gain knowledge and skills for building and growing the interpersonal relationships and political skills required to develop and lead teams, and to successfully advance from organizational management roles to leadership roles.

ADHA702501
Current Issues in Health Economics
Robbins-Murphy, Jeannine G
Summer 2023
This course uses an applied economic framework to help understand the economic and financial landscape of health care systems. The course begins with an overview of economic principles including supply and demand and perfect markets and then describes the economic challenges of healthcare economics and how health and health services are different from other goods. Considerable attention will be given to topics of current public concern including market failure, government interventions, health insurance, rapidly increasing cost, value, and expensive new technologies.

ADHA703301
Health Ethics and Law
Bears, Jeffrey D
Summer 2023
In this course, legal issues related to the organization and delivery of healthcare are examined, along with the ethical and moral considerations associated with the management of healthcare facilities and the provision of health services. Topics include government regulation of healthcare facilities and occupations, civil rights regulations regarding diversity, fraud and abuse, institutional and personal liability for negligence and malpractice, patient consent requirements, termination of care, the confidentiality of medical information, medical staff credentialing, peer review of care, utilization review, and managed care regulations. Treatment of ethical and moral issues emphasizes the understanding of diverse viewpoints and methods for resolving conflicting moral obligations. Student apply course concepts through the development of a compliance plan to prevent fraud, waste, and abuse in billing.

ADHA703501
Healthcare Innovation-Based Strategy: Managing Change
Smith, Karen M
Summer 2023
This course examines how health care organizations can innovate and adapt to the ever-evolving needs and demands of a dynamic, competitive, and regulatory health care environment. To do so, the course explores: What types of innovations are possible and how individuals/organizations develop innovations; Factors that affect the adoption and implementation of these innovations; and Approaches to evaluating whether these innovations had their intended effect. Readings, concepts, and cases focus on the areas of organizational innovation/organizational change, quality improvement, and implementation science. The course ensures that students will be able to Identify different approaches to developing innovations in healthcare; Articulate the opportunities and challenges to implementing innovations; and Analyze real world circumstances that impact the innovation and implementation process.

**Credits:** 2

**Room and Schedule:** MAY 17-JUN 30. DISCUSSION HOUR MON, 8:00-9:00 PM.; On-line Asynchronous

**Satisfies Core Requirement:** None

**Prerequisites:** None

**Corequisites:** None

**Cross-listed with:** None

**Frequency:** Periodically in the Fall, Periodically in the Spring, Periodically in the Summer

In today’s highly competitive healthcare environment, data-driven decision making is key to assuring quality, increasing access, and minimizing cost. In an industry focused on evidence-based practices, healthcare managers must be able to use analytic tools and methods to critically evaluate care and practice to better inform decisions. Tomorrow’s leaders must be able to make decisions based on research, evidence, and data to inform continuous improvement and innovation. The course will review data analysis principles and statistical analysis (e.g., probability, regression modeling, decision science, predictive forecasting, and time series analysis. Students will conduct data analyses and use results to make decisions. Students will focus on how to analyze and interpret data to optimize the decision-making process and assure evidence-based management practice.

**Credits:** 4

ADHA705001
Healthcare Information Technology
Tarab, Basel
Summer 2023
This course explores the critical role of e-health and information systems in the planning, operation, & management of healthcare organizations. Students will learn how to assess and evaluate health information systems and business requirements in a variety of settings such as health systems, hospitals and medical practices. Students will develop skills in healthcare technology implementation design that addresses such industry-specific requirements as translating HIPPA and other regulations into specific technology decisions while implementing medical systems (EMR, lab, clinical services, medical database providers, etc.). Students will also learn how to manage multi-institutional relationships as they are expressed in technology implementations, including the many vendor configurations but also cross-provider organization relationships. Specific topics include data & systems integrations, communications protocols, security standards, procurement, and authentication and authorization.

ADHA705501
Strategic Planning and Marketing
Spooner, Marc A
Summer 2023
Strategy is the result of an organizations choices: both affirmative actions taken, as well as actions not taken. A well-crafted strategy is coherent: it reflects a perspective on an organizations capabilities, an understanding of the competitive dynamics of the market, and a knowledge of customers needs. Ultimately a strategy is bounded by the vision, mission, and values of the organization itself. The interaction of these variables produces an unlimited set of choices for an organization, which is why there is not a right strategy. Rather, there is a chosen strategy that balances these factors, defines a set of actions with the support of both management and a companys board of directors, and then relies on successful implementation to produce results. And then the process begins again. The course is an opportunity to: understand the core components of developing a strategy, reflect on how these components have taken shape in your career to date, and delve into the strategy development process.

Healthcare Administration Courses: Fall 2023

ADHA700001
Introduction to Healthcare Systems and Organizations
Hadar, Nira; Tarab, Basel
Fall 2023
This course provides an overview of healthcare systems and services in the United States, including a unique view of the social, economic, and political environment across the health ecosystem industries. Current institutional structures and delivery and payer systems are explored. Emphasis is placed upon the concepts and issues that are associated with management, regulation of healthcare providers and the delivery of services, health policy, information technology, ethics and law, patient experience, pharmaceutical costs, and emerging trends and evolving health needs.

Health Policy
Sibley, Erin M
Fall 2023
Federal and state-level healthcare policies affect a wide range of issues, including access to care, quality, cost, and modes of delivery. Effective healthcare managers must interpret and anticipate a changing policy landscape, and strategically apply that interpretation as part of the process of organizational planning and execution. In this course, the social and economic implications of contemporary healthcare policies are explored. Emphasis is placed on how public policy (e.g., Patient Protection & Affordable Care Act of 2010) influences human resources/capacity, values, needs, reimbursements and regulation of individuals, insurers, and medical and healthcare organizations.

ADHA701501
Leadership in Healthcare
Guarino, Richard J
Fall 2023
The course introduces leadership models, theories, and skills needed to successfully manage and lead healthcare organizations through transformational versus transactional leadership-styles. Students use a variety of self-assessment tools (e.g., Myers-Briggs, SWOT analysis of self, leadership-style inventory) to develop self-awareness and to better understand the role of emotional intelligence in effective leadership. Students gain knowledge and skills for building and growing the interpersonal relationships and political skills required to develop and lead teams, and to successfully advance from organizational management roles to leadership roles.

Health Ethics and Law
Bears, Jeffrey D
Fall 2023
In this course, legal issues related to the organization and delivery of healthcare are examined, along with the ethical and moral considerations associated with the management of healthcare facilities and the provision of health services. Topics include government regulation of healthcare facilities and occupations, civil rights regulations regarding diversity, fraud and abuse, institutional and personal liability for negligence and malpractice, patient consent requirements, termination of care, the confidentiality of medical information, medical staff credentialing, peer review of care, utilization review, and managed care regulations. Treatment of ethical and moral issues emphasizes the understanding of diverse viewpoints and methods for resolving conflicting moral obligations. Student apply course concepts through the development of a compliance plan to prevent fraud, waste, and abuse in billing.

ADHA707001
Medical Device Regulations  
Kent, Joel C  
Fall 2023  
This course will provide an overview of the U.S. Food and Drug Administration (FDA), explore the history of laws related to medical product development, commercialization, and clinical use, and will consider relevant cases whose decisions have been important in establishing precedents and current guidelines. Governing medical products are the beginning point for regulations that identify how research, development and marketing should be pursued. Reviewing and analyzing the development to commercialization will follow the investigational device exemptions (IDE), premarket approval, 510(k) application process, and product development protocols and review processes.

ADHA707501
Drug Discovery and Product Regulation
Hadar, Nira
Fall 2023
This course will provide an overview of the U.S. Food and Drug Administration (FDA) by describing the basis for FDA regulation of the development, production, and the approval processes for drugs, devices, and biologics. Offers an opportunity to study FDA standards and to develop the foundations necessary of scientific and technical basic understandings of the drug discovery, testing, reporting, manufacturing, and commercialization. Examines the steps in the development and regulation process within the governing FDAs regulatory centers, and ensures overall compliance with policies, laws, and the evolving regulations.

ADHS180101
Themes of African History
Shlala, Elizabeth H
Summer 2023
If you want to go fast, go alone. If you want to go far, go together.- African proverb African history is an exciting subject to study. Human history is longest in Africa and our understanding of this long history is changing because of new discoveries and also because of the changing perspectives of scholars themselves in recent years. In this course, we will work on gaining an understanding of the events and developments of human experiences in Africa over the millennia and we will also examine how perspectives of scholars and people involved in African history have changed. Frequently in the past, people have emphasized how African history relates to the history of other regions, but currently, more emphasis is being given to understanding African history on its own terms. In addition, we will try to see the significance of the African historical experience in a more global or world historical perspective. We will look at major themes, and the myths surrounding them, in our study of African history. These will include: writing the history of Africa, encounters, the Atlantic slave trade, imperialism and colonialism, the history of movements of distinctive African identity (including the rise of nationalism), and the experience of independence. We will also give consideration to Africa's role in globalization to the present day (and looking to the future).

ADHS190201
The Late Ottoman Empire and Egypt
Shlala, Elizabeth H
Summer 2023
In this course, we will learn about the history of the late Ottoman Empire and Egypt. We will examine the external and internal power struggles throughout the empire that led to assorted forms of confrontation, collaboration, and negotiation. The law and other social structures were at the heart of competing imperial projects—British, Ottoman, Egyptian, and Italian among them. We will examine how historical narratives are represented and presented through maps, media, museums, and objects. This course will appeal to students who want to learn more about this fascinating history. It will also interest students who want to understand the historical roots of contemporary global debates on Islam, law, migration, and identities. This course fulfills Woods Core requirement: History (non-western)

**Remaking Europe - Marshall Plan to Brexit**

**Paul, Michael G, PHD**

**Summer 2023**

This course is an examination of European history since the end of World War Two. In this course, students will analyze how the politics, culture, and society of both Western and Eastern Europe were transformed after 1945. Topics covered include the end of World War Two; emergence of Cold War; decolonization; the economic, political, and cultural forces integral to the development of the European Union; the fall of communism; internal migration and its effects on relations between European states; the role of economics, politics, culture, and migration in facilitating the path to the decision by the people of Britain to leave the edifice of the European Union (Brexit). Special focus is placed on identities and interests of individual European countries, how these identities and interests have changed since 1945, and how these changes have affected the European experiment.

History Courses: Fall 2023

ADHS180101
Themes of African History
Shlala, Elizabeth H
Fall 2023
If you want to go fast, go alone. If you want to go far, go together.- African proverb
African history is an exciting subject to study. Human history is longest in Africa and our understanding of this long history is changing because of new discoveries and also because of the changing perspectives of scholars themselves in recent years. In this course, we will work on gaining an understanding of the events and developments of human experiences in Africa over the millennia and we will also examine how perspectives of scholars and people involved in African history have changed. Frequently in the past, people have emphasized how African history relates to the history of other regions, but currently, more emphasis is being given to understanding African history on its own terms. In addition, we will try to see the significance of the African historical experience in a more global or world historical perspective. We will look at major themes, and the myths surrounding them, in our study of African history. These will include: writing the history of Africa, encounters, the Atlantic slave trade, imperialism and colonialism, the history of movements of distinctive African identity (including the rise of nationalism), and the experience of independence. We will also give consideration to Africa's role in globalization to the present day (and looking to the future).

In this course, we will explore the relationship between culture and politics in Russia with the aim of explaining how they work together to shape elite and popular beliefs about Russia's role in the world. We will examine the legacies of Russia's imperial, Soviet, and post-Soviet history; the tensions in Russia's transitions from communism to capitalism and from authoritarianism to flawed democracy (and back to authoritarianism, again); the complexities of Russian nationalism; the realities of Russian civil society; the landscape of Russian media; and, of course, the rise of Vladimir Putin and his influence on the institutions and processes of politics in Russia today. We will analyze historical cases and contemporary news, art, scholarship, and popular culture and we will culminate the course with a look ahead at where we think Russia is going based on what we know about where it has been.

This is an online course. The phrase "For God and Country" seems self-evident, but what if obeying God requires disobeying the country's government? Can a person of faith endorse the slogan "my country, right or wrong?" In this course, historical examples serve to achieve a greater understanding of the tension between religious and civic imperatives. Historical examples will range from Christian martyrdom in the Roman Empire or the Jewish uprising at Masada to Christians resisting the Nazi regime. Examples from the three monotheistic religions of the West will be analyzed. Required readings consist of historical documents. This course is fully online and class discussions will occur synchronously and asynchronously.

**History of Boston: Brahmins to Bosses to Busing**

**Hannan, Christopher W**

**Fall 2023**

The history of Boston from its height as "the Hub of the Universe" in the 1820s, through the tumultuous Civil War and post-war periods. The course will then examine twentieth-century Boston and the great events and figures which have shaped its destiny as one of America's most important cities. It will include the era of forced busing in Boston and assess the lasting impact of this period for Boston.

ADHS301101
Development of the Pre-Modern World
Paul, Michael G, PHD
Fall 2023
In this course, we will trace the development of our pre-modern world society, from Neolithic hunters and gatherers to Early Modern global explorers and scientists. Why did humans shift from a nomadic to a settled lifestyle and how did this facilitate the rise of the first great civilizations of Mesopotamia, Egypt, China and the Indus Valley? We will also focus on the contributions of, and interactions among, the critical civilizations of Greece, Rome, Byzantium, the Middle East, Sub-Saharan Africa, and the Americas, as well as the roots of our contemporary global religions, including Judaism, Christianity, Buddhism and Islam. While this time period featured incredible human ingenuity and technical advancements, it also witnessed catastrophic natural disasters and man-made conflicts that combined to dramatically reshape the course of human progress and lay the foundations of our modern world.

History Courses: Spring 2024

ADHS108101
Modern History I
Menke, Martin R
Spring 2024
Survey of the great ideas of the western tradition from the Renaissance to the French Revolution. The focus is on the rise of the modern state in Germany (Holy Roman Empire, Treaty of Westphalia), England (Glorious Revolution and the roots of constitutional rule), and France (Divine Right Absolutism), the relationship of religion and politics (which suffers more, religion or politics?), and early modern European culture (Renaissance, Baroque, Rococo, Classicism) as well as Europe's interactions with Asia, Africa, and the Americas. Each class consists of a slide lecture and primary source-based discussion.

**Diplomatic U.S. History**

**Paul, Michael G, PHD**

**Spring 2024**

An overview of the main developments of United States diplomatic history from its earliest beginnings to the present day. A look at how United States foreign relations emerged from revolutionary impulses to become a significant feature of American life. Uncovers the underlying trends during this period to see how the U.S. transformed itself from a collection of thirteen colonies into a major superpower. Issues of class, gender and race are at the fore as we discover how the United States came to integrate itself into the world community of nations.

ADHS179101
History of Latin America and the Caribbean
Blakeley, Bryan J
Spring 2024
This course introduces students to the dynamic history of Latin America and the Caribbean. Starting with an examination of the wide range of indigenous cultures that flourished before the arrival of Europeans and progressing through the twentieth century, we will explore the histories of imperial rule, wars of independence and decolonization, nation-state development, inter-regional connections and conflicts, and global political-economic structures. We will also investigate selected country histories in more detail in order to provide a deeper look at this amazingly diverse region. Along the way we will use the interpretive lenses of race, gender, social class, and religion to examine events, and we will hear directly from a range of individuals by reading historical documents. We will pay specific attention to the fundamentals of historical inquiry, including interpreting primary sources, putting them in historical context, and crafting historical arguments.

ADIT198501
Python
Williams, Harris E
Summer 2023
This course is meant for any student interested in learning computer programming concepts with the Python programming language. We will cultivate our problem-solving abilities as we develop programs in Python. This course is suitable for students with little to no programming experience. The course will start with the basics as we discuss logical decisions and loops. Further, we will explore Python data structures such as tuples, sets, lists, and dictionaries. We will couple this knowledge to make our own classes as we learn about object-oriented programming. Throughout the semester we will discover and implement basic debugging techniques. By the end of this course, students will compose Python programs that solve problems on their own.

Information Technology Courses: Fall 2023

**ADIT135001**  
Javascript  
Russo, John P  
**Fall 2023**

This course teaches students the fundamental concepts of programming (coding). First we will define what a programming language is and then we will learn its grammar and syntax. We will learn about variables, conditionals, and iteration. We will also learn about arrays, functions, and objects. We will use the industry-standard JavaScript programming language to put into practice all of these concepts. Designed specifically for individuals who have little-to-no programming experience, this course teaches participants in a project based environment how to code JavaScript, the language of the web. During this course students will: (1) Learn how to think of problems logically and computationally, (2) Use programming tools to express themselves creatively as they learn the fundamentals of coding, and (3) Create real-world applications. No auditors.

Information Technology Courses: Spring 2024

ADIT199001
C++
Russo, John P
Spring 2024
An introduction to programming with C++. This course is meant for students with little or no programming experience. We will start with the basics of programming using the C++ programming language. C++ is the cornerstone programming language used to develop many of the fundamental applications we use on a daily basis. For example operating systems, web browsers and other programming languages such as Java, Python, and SQL are built with C++. We will use the low level nature of the C++ programming language to learn about the fundamental aspects of how a computer works. In this course we will develop basic command line applications, explore how data is stored in memory and how we may use logic to manipulate the data to produce different results.

Computer Security
Bernier, Brian
Spring 2024
This course provides a strong starting foundation for understanding the complex threats system managers face today and what they need to do to harden their systems against attack. Today's business system managers need to understand these threats and know how to protect their digital assets. Students in this course will look at computer security through a variety of lenses. Specific topics will include: protecting the physical infrastructure, computer system design considerations, identity and access management functions and how they fit in, the role of network security tools, the importance of audits and having the right security processes and policies in place, business continuity and disaster recover planning, managing vendor contracts and special consideration for cloud-based systems, and ethical considerations.

Data Visualization
LoPiano, Antonio
Spring 2024
In today's information age with ever pressing demand for data skills, data visualization becomes a critical component of data science. By utilizing visual presentations, data visualization achieves an effective way of communicating insights from data, identifying hidden data patterns and trends, and telling the full story behind data. In this course, students are introduced to the foundations of data visualization along with various data visualization tools. We will introduce the key design principles, how to present data using a number of common data visualization tools (such as Excel and Tableau software). This course will provide students from all backgrounds the opportunity to learn data skills and have hands-on experience working with various datasets, creating visualizations and telling data stories. Students will develop data visualization skills that can be applied to their fields of study and future career. Topics covered include best practices in use of color, visualization principles, static and interactive visualizations, visualization types, and others.

Systems Architecture
Salvitti, Peter
Spring 2024
This course provides an overview of the architecture and design of large-scale and decentralized information systems from a technical and management perspective. The student will learn, through case studies, about various software development life cycles (SDLC) such as waterfall, extreme programming, and scaled agile. The course will focus on system architectures, requirements analysis, design tradeoffs, and the fundamental -ilities that comprise system architecture. It will also cover the various tiered approaches to software architecture such as data, business logic, and the presentation layer. Students will also investigate modern architecture approaches dealing with cloud, and big data. This course requires no software development experience.

ADLA240001
Business Law
Lu, John T
Spring 2024
This course will introduce students to the legal framework applicable to business. It will begin with an overview of the U.S. legal system, including the process by which government and courts establish laws and resolve disputes. The bulk of the course will then review those areas of the law that business leaders regularly encounter, including business formation and governance, finance, securities, employment, contract, real estate, intellectual property and torts. The course will give particular focus to the practical implications for business leaders, including how leaders identify and manage risks to the business when the law is unsettled or ambiguous, or otherwise raises ethical considerations. The course will regularly draw on the experiences of current business leaders and their lawyers and advisors.

ADGR771501
Inclusive Leadership
Ryan, Joan R
Summer 2023
This course is designed to provide a foundation for understanding of the concept of inclusion as well as an overview of the theory bases, terminology, and practices of inclusive leadership. Students will explore the impact of inclusive leadership (and conversely, a lack of inclusive leadership) on individual, group, and organizational dynamics. Activities will include: exploring leadership constructs and traits that impact organizations, psychological processes and behaviors related to inclusion (e.g., unconscious bias, bystander effect, EQ), case analyses, and actions of effective inclusive leaders that lead to greater employee engagement, productivity, and ultimately business outcomes and revenues. The course will also help participants to identify additional individual learning goals that will help position them well on their own journey of enhanced personal leadership. This course is intended to teach foundational concepts and to provide a context for the course work that follows. This course will include reading from texts and 'classic' articles, course discussion, group presentations, guest speakers, and individual work that explores the core processes and skills that are associated with the practice of inclusive leadership. Consistent with the values of effective and inclusive leadership, our learning will be highly participative and consistent with the tenets of human growth potential and positive psychology.

ADGR772601
Leading and Managing Change
Arora, Gary
Summer 2023
The contemporary business environment is constantly changing. Global and domestic markets are in flux, and the workforce is subject to the ebb and flow of generational dynamics. Whether Fortune 500 or small business, the ability to be nimble and strategically change in response to the fluidity of business trends is the key to success. Yet, leading and managing change in the corporate setting is extraordinarily challenging. Change is unsettling. Change challenges the security of how things have been done. Change tests the mettle of project implementation and teams. The prospect of change often impedes creativity rather than promotes innovation in the workplace. No one wants to be wrong or make a wrong decision in the face of change. Hence, managers and the workforce they oversee tend to be change resistant. In order for the organization to change, the people in the organization must be willing to change work/management styles, approaches, and attitudes. In today's highly competitive business environment, rapid and smooth decision-making and implementation is the basis for competitive edge. This course will be presented in three parts. First, students will gain a detailed understanding of change at the macro (organizational) and micro (individual) levels. We will identify the problems associated with anticipating, initiating and implementing change in both for profit and not for profit corporate settings. The second part of the course will explore various techniques in promoting sound analytical corporate response to change at the senior and mid-level managerial levels. The final part of the course is applied. Student teams will assume leadership roles in a fictional company needing change and present their change process in class. Students will also each prepare an analysis of a case studies of corporate change experience. Emphasis will be placed on the process of change in the business context. The class discussions will be grounded in empirical realities rather than theoretical suppositions.

ADGR778501
Leadership and Decision Making: Ignatian-Based Applied Ethics
Utzschneider, Cathy
Summer 2023
What role do ethics and morals play in influencing leaders? Too often, decisions are made based solely on numbers, shareholder value or some other metric of business, often without reflection. Yet, we have an obligation to each other and to ourselves to personally engage and make decisions within a moral context. Using a Thomistic ethical system and Ignatian discernment and values as our guide, this course will explore strategies and options for integrating virtue into leadership decision-making. Thomistic ethics is to be given primacy of place because it is universally applicable, and is based upon a unified, coherent understanding of the nature of humanity. It is thoroughly grounded in the objective order of things. Thomistic ethics is an eminent expression of philosophical realism. Thomistic ethics is guided every step of the way by the assumption that just as human beings are born into a world which is defined and governed by objective physical laws, so that same world is defined and governed by objective moral laws. Applying those strategies to real world case studies, we will develop tools to help navigate those situations where there is pressure to compromise virtue or disengage from our moral compass.

Leadership and Decision Making: Ignatian-Based Applied Ethics
Noone, Gregory P
Summer 2023
What role do ethics and morals play in influencing leaders? Too often, decisions are made based solely on numbers, shareholder value or some other metric of business, often without reflection. Yet, we have an obligation to each other and to ourselves to personally engage and make decisions within a moral context. Using a Thomistic ethical system and Ignatian discernment and values as our guide, this course will explore strategies and options for integrating virtue into leadership decision-making. Thomistic ethics is to be given primacy of place because it is universally applicable, and is based upon a unified, coherent understanding of the nature of humanity. It is thoroughly grounded in the objective order of things. Thomistic ethics is an eminent expression of philosophical realism. Thomistic ethics is guided every step of the way by the assumption that just as human beings are born into a world which is defined and governed by objective physical laws, so that same world is defined and governed by objective moral laws. Applying those strategies to real world case studies, we will develop tools to help navigate those situations where there is pressure to compromise virtue or disengage from our moral compass.

Cross-Cultural Communication
Goldfine, Deborah A
Summer 2023
Successful organizational leaders recognize the enormous potential of globalization, and the absolute need to interact competently with complex multicultural work environments. Students learn to better understand the subtle cultural dynamics and nuances that build and maintain relationships at work and at home as well as in corporate negotiation. Topics include addressing the tension between culture as something fixed, and the push for change, the dynamics of men and women working in partnership, leaders as influencers of a collaborative culture. Media influences, nonverbal cues, and the formation of worldviews are examined. Explores values, stereotyping and cultural biases through readings, presentations and films.

**Business Strategy**  
**Walsh, William T**  
**Summer 2023**  
Strategy is how leaders distinguish the organizations advantage in competitive markets. It is a set of guidelines that help direct decision making and the allocation of resources to accomplish the company's key business goals and objectives. To succeed in the future, leaders must develop the means and capabilities needed to gain and sustain these advantages. This course introduces the concepts of strategic management by using readings, discussion, and case studies. The key components the course will cover are: the three horizons of strategy; external environments (social, political, technological, and economic); global markets; internal Factors and Implications (capabilities, talent, resources); the role of Culture and Change Management.

Organization Theory and Design
Bent, Lauren G
Summer 2023
Designed to identify and explore current strategies and measures that enhance organization productivity within a healthy workplace environment. The course examines the current literature that focuses on workplace productivity in the public, private and non-profit sectors. A look at the changing roles of the game, the melding of the physical and virtual worlds; the evolution from a more vertical hierarchical design into more collaborative, interactive, and horizontal structures, joining with global endeavors. Course is sensitive to cultural dynamics, new patterns of participation and behavior, examines personal, interpersonal, and group behavior and suggests practical approaches to better respond.

**Human Resource Development**

Klayman, Stephen A

**Summer 2023**

This course focuses on employees and how to get the highest level of performance out of employees. What motivates your employees? What makes them want to stay? How do you prevent attrition? This course will start with an introduction to organizational design and relevant organizational development theories. It will then move to talent acquisition and employee training, where use of analytics and metrics will be introduced. Next, students will learn performance management methods and appraisal, including use of instruments and rating scales. The course will then move to career development and leadership development including assessing talent, developing career paths, and succession planning. The course will conclude by helping students understand the differences between coaching and mentoring, and how to effectively manage organizational talent.

Internship
Power, John G
Summer 2023
An internship can provide a student with valuable experience in an industry or company of interest; it may even lead to a permanent job. When approached intentionally, internships can provide students with a host of skills and information that can enhance career opportunities, imbue that career with purpose, and significantly improve the odds of long-term professional success. In this course, students will develop and articulate a simple statement of purpose that will connect them more explicitly with their work and enable them to articulate their personal brand more effectively. They will proactively create a network of collaborators and mentors, simultaneously build the capacity to work in teams, learn from the experiences of those ahead of them, and enhance their ability to speak persuasively in professional settings. This experiential-learning course uses a variety of activities to support student development including articles, podcasts, videos, and guest speakers from the entrepreneurial and corporate worlds. Course experiences will equip students with the tools to perform more effectively in their internships and to extend what they learn to their careers.

This course is designed to provide a foundation for understanding of the concept of inclusion as well as an overview of the theory bases, terminology, and practices of inclusive leadership. Students will explore the impact of inclusive leadership (and conversely, a lack of inclusive leadership) on individual, group, and organizational dynamics. Activities will include: exploring leadership constructs and traits that impact organizations, psychological processes and behaviors related to inclusion (e.g., unconscious bias, bystander effect, EQ), case analyses, and actions of effective inclusive leaders that lead to greater employee engagement, productivity, and ultimately business outcomes and revenues. The course will also help participants to identify additional individual learning goals that will help position them well on their own journey of enhanced personal leadership. This course is intended to teach foundational concepts and to provide a context for the course work that follows. This course will include reading from texts and 'classic' articles, course discussion, group presentations, guest speakers, and individual work that explores the core processes and skills that are associated with the practice of inclusive leadership. Consistent with the values of effective and inclusive leadership, our learning will be highly participative and consistent with the tenets of human growth potential and positive psychology.

Leading and Managing Change  
Arora, Gary  
Fall 2023
The contemporary business environment is constantly changing. Global and domestic markets are in flux, and the workforce is subject to the ebb and flow of generational dynamics. Whether Fortune 500 or small business, the ability to be nimble and strategically change in response to the fluidity of business trends is the key to success. Yet, leading and managing change in the corporate setting is extraordinarily challenging. Change is unsettling. Change challenges the security of how things have been done. Change tests the mettle of project implementation and teams. The prospect of change often impedes creativity rather than promotes innovation in the workplace. No one wants to be wrong or make a wrong decision in the face of change. Hence, managers and the workforce they oversee tend to be change resistant. In order for the organization to change, the people in the organization must be willing to change work/management styles, approaches, and attitudes. In todays highly competitive business environment, rapid and smooth decision-making and implementation is the basis for competitive edge.

This course will be presented in three parts. First, students will gain a detailed understanding of change at the macro (organizational) and micro (individual) levels. We will identify the problems associated with anticipating, initiating and implementing change in both for profit and not for profit corporate settings. The second part of the course will explore various techniques in promoting sound analytical corporate response to change at the senior and mid-level managerial levels. The final part of the course is applied. Student teams will assume leadership roles in a fictional company needing change and present their change process in class. Students will also each prepare an analysis of a case studies of corporate change experience. Emphasis will be placed on the process of change in the business context. The class discussions will be grounded in empirical realities rather than theoretical suppositions.

ADGR809001
Workforce Planning and Employment
Snyder, Shanell L
Fall 2023
Strategic Workforce Planning takes a broad view of the organization to assure the right people and right skillsets are in place to drive strategy and reinforce culture. Key stakeholders are partners in the process to ensure adoption within the organization, and collaboration is necessary to drive alignment of people, process and technology. Workforce planning considers the balance between the current state, the organization's evolution, and the desired future state. Finding that balance requires measuring the system, and evaluating both the internal and external environments. This course will help you think about how to assess organizations, learn to work with the organization's strategy and culture to determine the key factors driving Workforce Planning, how to apply different frameworks, and to create a gap analysis between the current state and the desired state. From this framework, you will look at ways to implement the strategy, and learn to use data to inform your thinking.

Bias in the Workplace
Lowe, Patricia N
Fall 2023
Understanding bias is critical to one's ability to "rewire the system to rewire behaviors" to make sustainable change. This course will examine Implicit Bias, Gender Bias, Cognitive Biases, Affinity Bias, Confirmation Bias, etc. In addition to broad topics of bias, course will examine emotional intelligence, self-awareness, self-knowledge, and empathy. The course will incorporate cases on bias in the workplace and give students practice on how to identify bias and be able to explore how that thread pulls through and can adversely affect advancement, opportunity, compensation, and other key employment aspects. The course will examine how even small biases in seemingly minor people systems can amplify exclusion over time.

**Inclusive Leadership**
Ryan, Joan R
Spring 2024
This course is designed to provide a foundation for understanding of the concept of inclusion as well as an overview of the theory bases, terminology, and practices of inclusive leadership. Students will explore the impact of inclusive leadership (and conversely, a lack of inclusive leadership) on individual, group, and organizational dynamics. Activities will include: exploring leadership constructs and traits that impact organizations, psychological processes and behaviors related to inclusion (e.g., unconscious bias, bystander effect, EQ), case analyses, and actions of effective inclusive leaders that lead to greater employee engagement, productivity, and ultimately business outcomes and revenues. The course will also help participants to identify additional individual learning goals that will help position them well on their own journey of enhanced personal leadership. This course is intended to teach foundational concepts and to provide a context for the course work that follows. This course will include reading from texts and 'classic' articles, course discussion, group presentations, guest speakers, and individual work that explores the core processes and skills that are associated with the practice of inclusive leadership. Consistent with the values of effective and inclusive leadership, our learning will be highly participative and consistent with the tenets of human growth potential and positive psychology.

ADGR772601
Leading and Managing Change
Arora, Gary
Spring 2024
The contemporary business environment is constantly changing. Global and domestic markets are in flux, and the workforce is subject to the ebb and flow of generational dynamics. Whether Fortune 500 or small business, the ability to be nimble and strategically change in response to the fluidity of business trends is the key to success. Yet, leading and managing change in the corporate setting is extraordinarily challenging. Change is unsettling. Change challenges the security of how things have been done. Change tests the mettle of project implementation and teams. The prospect of change often impedes creativity rather than promotes innovation in the workplace. No one wants to be wrong or make a wrong decision in the face of change. Hence, managers and the workforce they oversee tend to be change resistant. In order for the organization to change, the people in the organization must be willing to change work/management styles, approaches, and attitudes. In today's highly competitive business environment, rapid and smooth decision-making and implementation is the basis for competitive edge. This course will be presented in three parts. First, students will gain a detailed understanding of change at the macro (organizational) and micro (individual) levels. We will identify the problems associated with anticipating, initiating and implementing change in both for profit and not for profit corporate settings. The second part of the course will explore various techniques in promoting sound analytical corporate response to change at the senior and mid-level managerial levels. The final part of the course is applied. Student teams will assume leadership roles in a fictional company needing change and present their change process in class. Students will also each prepare an analysis of a case studies of corporate change experience. Emphasis will be placed on the process of change in the business context. The class discussions will be grounded in empirical realities rather than theoretical suppositions.

Leadership and Decision Making: Ignatian-Based Applied Ethics
Noone, Gregory P
Spring 2024
What role do ethics and morals play in influencing leaders? Too often, decisions are made based solely on numbers, shareholder value or some other metric of business, often without reflection. Yet, we have an obligation to each other and to ourselves to personally engage and make decisions within a moral context. Using a Thomistic ethical system and Ignatian discernment and values as our guide, this course will explore strategies and options for integrating virtue into leadership decision-making. Thomistic ethics is to be given primacy of place because it is universally applicable, and is based upon a unified, coherent understanding of the nature of humanity. It is thoroughly grounded in the objective order of things. Thomistic ethics is an eminent expression of philosophical realism. Thomistic ethics is guided every step of the way by the assumption that just as human beings are born into a world which is defined and governed by objective physical laws, so that same world is defined and governed by objective moral laws. Applying those strategies to real world case studies, we will develop tools to help navigate those situations where there is pressure to compromise virtue or disengage from our moral compass.

Cross-Cultural Communication
McKeon, Kerry A
Spring 2024
Successful organizational leaders recognize the enormous potential of globalization, and the absolute need to interact competently with complex multicultural work environments. Students learn to better understand the subtle cultural dynamics and nuances that build and maintain relationships at work and at home as well as in corporate negotiation. Topics include addressing the tension between culture as something fixed, and the push for change, the dynamics of men and women working in partnership, leaders as influencers of a collaborative culture. Media influences, nonverbal cues, and the formation of worldviews are examined. Explores values, stereotyping and cultural biases through readings, presentations and films.

Talent Management
Casey, Kerry G
Spring 2024
Companies often describe the people they employ as their most important asset. The best companies view talent as competitive differentiator and one where the acquisition, engagement, development, and retention of talent is a strategic priority. This course exposes you to methods and practices to acquire, engage, and develop talent, focuses on the development of leaders within an organization, and examines how executive succession is managed. Through readings, cases studies, on-line and in class discussions student will develop their definition of talent management and perspectives on the most effective practices. The course will culminate with a research project and in class presentation that allows learnings throughout the semester to be shared and reflected with the full cohort group.

**ADGR811001**  
**Agile Methodologies**  
**Musserian, Lalig J**  
**Spring 2024**  

Companies that produce software are increasingly turning to agile development practices to help them stay competitive. Strategic project management is focused on the rapid and repeatable delivery of software, speed to market and risk mitigation as part of the project management process. Project Managers and project teams need to become well-versed in Agile practices and the highly collaborative and iterative methods which have made Agile and experienced "Agilista's" in high demand. This course starts with an overview for project managers and project teams on a variety of Agile methods, followed by a deeper dive into the most popular Agile process called Scrum. We will cover a prescriptive methodology for "Scrumming," with activities grouped into categories of People, Process and Technology within the 3 recommended phases for the successful implementation of projects with Scrum. For each phase, we will review a set of inputs and outputs, definitions and common terminologies, tips for success, inputs and outputs and the various Scrum ceremonies for a comprehensive course on running a Scrum project. This will be an interactive, hands-on class, so we can practice Scrum principles and not just learn them from a theoretical perspective.

Business and Marketing Analytics

Baker Hearld, Kristine R

Spring 2024

As industries become increasingly competitive, companies rely more and more on marketing to attract buyers and prove the value of their spend from brand awareness to impact on revenues. Doing so in today's digital world requires a clear understanding and management of metrics and analytics. The Internet promises to revolutionize the dynamics of international commerce and permits new types of measurement tools that will expand the data available to marketers, including advertising measurement and customer profiling. This course will provide students with the main tools to lead marketing performance and help them answer key questions such as: How can I lead marketing performance by designing the appropriate metrics? What are the most important marketing metrics and analytics for me to use? How can I measure my various marketing programs impact on revenue and profit? How can I best communicate marketing results with my executive team and board?

Risk Management/Quality Management
Chirkova, Aza  
Spring 2024  
This course introduces you to the fundamentals of risk and quality management. Managing quality and risks are important elements of effective project management. You will learn how to identify risks, assess probabilities and potential impacts, plan risk response strategies, and monitor, control, and communicate risks throughout the project life cycle. You will also learn principles of quality management, how to successfully assure quality and ensure customer satisfaction by monitoring results using quality control tools. This hybrid course will consist of in-class sessions and online asynchronous work.

ADGR814001  
Problem Solving Through Systematic Thinking  
Bent, Lauren G  
Spring 2024
In an era of uncertainty and disruptions, being able to identify, formulate, and solve problems is a critical leadership competency. In fact, among the many facets of leadership, solving the wrong problem is among the most common, costly, and consequential. Research shows that leaders and teams end up solving the wrong problem >75% of the time. Leaders who master various thinking modes critical, strategic, and systems will significantly improve an organization's capability of solving the right problem, a strategic imperative in today's environment. Students will learn the attributes of wicked, ill-defined, complex problems and how to recognize them. This recognition is important because wicked problems are the ones that can easily spark thinking traps or cognitive fixedness - that prompt solving the wrong problem. These traps cause people to quickly think of and promote solutions to old problems rather than identify the novel elements of the problem that require different answers. Students will be equipped with tools to recognize thinking traps and intervention strategies. Also, students will learn several thinking processes and tools to formulate wicked problems comprehensively. Each thinking process is designed to specifically avoid the thinking traps and promote comprehensive formulation before trying to solve the problem. Students will have the opportunity to apply new tools and processes in real-world situations, reflect upon the results, and develop mastery in problem-solving.

ADGR820002
Social Influence and Content Creation
Sheehy, Erin M
Spring 2024
The Social Influence course is designed to give students a comprehensive approach to understanding social influence marketing. Consumers can be influenced not only for buying products or services but to assume certain attitudes, particular behaviors, or decisions. Social media in its different forms employs multiple tools and strategies to impact the social norms, values, and beliefs. This new field of marketing encompasses different domains such as culture, consumer behavior, social media, social psychology, and its subset of persuasion. Dividing the course into 5 distinctive modules offers the possibility to first cover the determinants of the system of values and norms that are shared among a group of people. Then, the external and internal factors influencing consumers before focusing on the different techniques employed by different media outlets. Through lectures, discussions, case studies, and current news, students will learn and apply various theoretical frameworks to analyze the process of influencing an audience.

ADGR990101
Internship
Heaney, Michael C
Spring 2024
An internship can provide a student with valuable experience in an industry or company of interest; it may even lead to a permanent job. When approached intentionally, internships can provide students with a host of skills and information that can enhance career opportunities, imbue that career with purpose, and significantly improve the odds of long-term professional success. In this course, students will develop and articulate a simple statement of purpose that will connect them more explicitly with their work and enable them to articulate their personal brand more effectively. They will proactively create a network of collaborators and mentors, simultaneously build the capacity to work in teams, learn from the experiences of those ahead of them, and enhance their ability to speak persuasively in professional settings. This experiential-learning course uses a variety of activities to support student development including articles, podcasts, videos, and guest speakers from the entrepreneurial and corporate worlds. Course experiences will equip students with the tools to perform more effectively in their internships and to extend what they learn to their careers.

Marketing Courses: Fall 2023

ADMK220101
Digital Marketing Strategy
Fortney, Erin M
Fall 2023

This course is intended to introduce students to the world of digital marketing and the many different facets that work together in shaping an online digital branding presence to meet strategic business goals. A digital marketing strategic plan is one that helps achieve specific digital goals through carefully selected online marketing channels such as paid, earned, and owned media. Areas of focus include the origins of the digital marketing channel, how it has transformed the way customers interact with brands and products, as well as how marketers leverage different digital channels to optimize sales, awareness, and engagement goals. Students will gain a deeper understanding of how marketing teams function based on different organizational structures and will develop their own strategic plan based on a real-world company or organization.

This course is designed to provide students with a foundation in statistical analysis and computing. This class focuses on the concepts, language, and application of statistics to social sciences. In particular, students will learn to produce and interpret descriptive statistics and graphical and numerical representation of information; additionally, students will learn about measures of location, dispersion, position, and dependence, and how to conduct exploratory data analysis. Additional topics will include elementary probability theory (to aid with interpretation and understanding), point and interval estimation, hypothesis significance testing, and linear regression. To help facilitate understanding of the data analysis process, students will routinely apply what they have learned to real data using SPSS. Students will become familiar with SPSS through class lectures, in-class lab exercises, and take-home assignments. SPSS is available to BC students through BC Apps. Real-world data sets will be provided to students for use in coursework.

ADMT110001  
Calculus I  
Brady, Donald  
Spring 2024  
This is a course in the calculus of one variable and is suggested for Economics majors. The course is also a pre-requisite for ADEC3510, Math for Economists, and for participation in the 5th year MS in Applied Economics program. Topics include a brief review of polynomials and trigonometric, exponential, and logarithmic functions, followed by discussion of limits, derivatives, and applications of differential calculus to real-world problem areas. The course concludes with an introduction to integration.

ADMT180101  
Data Analysis and Probability  
Johnson, Tristan  
Spring 2024
This course takes a practical approach to learning the basics of statistics and probability for Business majors. It covers quantitative reasoning and incorporates the interpretation of numerical data. Students are presented with the key tasks of 1) collecting data, 2) summarizing data, and then 3) interpreting data. The course covers descriptive statistics including measures of central tendency (mean, median, mode) and variability (interquartile range, standard deviation). The course also covers inferential statistics including drawing conclusions about a population based on sample data and analyses including correlation, t-test, and simple / multiple linear regressions.

ADMT180501
Applied Statistics
Khanani, Noman
Spring 2024
This course is designed to provide students with a foundation in statistical analysis and computing. This class focuses on the concepts, language, and application of statistics to social sciences. In particular, students will learn to produce and interpret descriptive statistics and graphical and numerical representation of information; additionally, students will learn about measures of location, dispersion, position, and dependence, and how to conduct exploratory data analysis. Additional topics will include elementary probability theory (to aid with interpretation and understanding), point and interval estimation, hypothesis significance testing, and linear regression. To help facilitate understanding of the data analysis process, students will routinely apply what they have learned to real data using SPSS. Students will become familiar with SPSS through class lectures, in-class lab exercises, and take-home assignments. SPSS is available to BC students through BC Apps. Real-world data sets will be provided to students for use in coursework.

Music Courses: Spring 2024

ADMU130001
History of Popular Music
McCool, Jason
Spring 2024
From blues to bluegrass, minstrels to Motown, ragtime to rap, the story of American popular music pulsates with the vibrant rhythms and urgent cries of its makers. This course surveys that history, stretching from the mid-nineteenth century to today, with a particular focus on how racial struggles and appropriation have reflected American socio-political realities.

Philosophy Courses: Summer 2023

ADPL148301
Philosophy of Human Sexuality
Clemente, Matthew J
Summer 2023
This topic generates more talk and less light than almost any other subject. Course considers what is sexuality? Why is it so mysterious? How important is it to self-identity, self-knowledge and relationships? How can we think clearly and fairly about current controversies such as surrogate parenting, AIDS, contraception, gender identity and roles, relation between sex and family, marriage, religion and society? Philosophers, novelists, scientists, theologians, psychologists and even mystics shed light on this issue.

ADPL180001
World Philosophies
Severson, Eric
Summer 2023
World Philosophies contributes to a project that is at the core of Jesuit education and its intellectual tradition: global conversations on the meaning of human existence. This course will introduce students to global philosophical accounts of the human person. Exploring diverse philosophical approaches also presses students to engage their own thinking in dialogue with a variety of views. By embarking on the quest to understand what it means to be human, around the world and across history, students take up a heritage that they share with past and future generations and their contemporaries across the globe: they will learn to reflect critically on their own culture, assumptions, and responsibility. This course is concerned with foundational topics in philosophy, particularly: what does it mean to be a human person? Such a question is inevitably personal and at the same time vast in scope. This question has been taken up and addressed in some form or another by a wide range of thinkers from around the globe and across human history. The course will be organized around an investigation of the philosophical foundations for living, loving, and dying well. In search for answers to these questions, we will review how they are addressed in the western philosophical tradition, as well as a broad sampling of wisdom from around the world, including Indigenous philosophy, Buddhism, Hinduism, Islam, Judaism and Chinese philosophy. We will discuss the role of feminism in reshaping the ancient question of the human person, which has been for centuries predominantly answered by male voices. Particular attention will be paid to the Jesuit tradition and its focus on justice and reconciliation. Ultimately, the course will press students to reconsider their own human personhood in light of this global collection of movements and ideas.

ADPL201101
True Detectives: Investigating the Crimes and Mysteries of Existence
Clemente, Matthew J
Summer 2023
For modern readers, detectives stand as the image of the ideal thinker. In literature, cinema, and on TV, we see the hold detectives have on our cultural imagination. They are viewed as purveyors of wisdom, personifications of reason, logical thinkers defined by their commitment to the facts and their unflinching pursuit of truth at all cost - especially hard, uncomfortable truths, the kind most of us prefer not to see. From the time of Aristotle, philosophers have approached the world as if it was the scene of a crime, a mystery to be solved, a riddle to be deciphered. Philosophers, it might be said, act as investigators whose job it is to uncover hidden truths. Like detectives, they are late on the scene, arriving after the crime has been committed. Like detectives, they rely upon the facts of existence to question and reason their way to probable answers, to what happened here and why. In this course, students will learn the art of philosophical investigation by learning to think like a detective. Questions of epistemology - what can be known - and metaphysics - why things are the way they are - will be explored in relation to mystery novels, detective shows, and works of philosophical literature.

ADPL149801
Philosophy of Cinema
Clemente, Matthew J
Spring 2024
Just as some of the world's greatest philosophy is to be found in novels, some is to be found in cinema, both films of philosophical novels or plays or original screenplays. This course will be much more than "philosophical discussion of movies." It will raise and debate fundamental issues in the history of Western philosophy in and through selected films. We will also read the books or screenplays on which the films are based and compare the written texts with the film version.

ADPL216001  
**Challenge of Justice**  
**Snyder, Joshua R**  
**Spring 2024**
The pursuit of justice is a dominant concern of our age. But it appears that there are nearly as many understandings of justice as there are persons and communities to claim them. The goal of this course is to consider the principal understandings of justice and peace that have developed in the Western philosophical and theological traditions and assess how these alternative understandings affect personal decisions and social policy choices. We will pay attention to how these theories relate to concrete, practical, political and social issues. Special attention will be paid to the contribution of the Catholic intellectual tradition in formulating an approach to justice and peace. This course highlights what is at stake when we choose one way of justice rather than another. Ultimately, we need to think about how we ought to treat other people and what kind of society we want to build. Over the course of the semester, we will examine issues of justice related to human rights, hunger and poverty, racism, sexuality, ecology, and peace-building.

Political Science Courses: Summer 2023

ADPO300301
The Society of the Selfie: Social Media and Political Crisis
Morelock, Jeremiah C
Summer 2023
This course explores how the Internet is connected to the global crisis of liberal democracy. Through social media people have new ways of rating and judging themselves and one another, via metrics such as likes, shares, followers and friends. There are new thirsts for authenticity, outlets for verbal aggression, and social problems. Information technologies provide channels for public engagement where extreme ideas reach farther and faster than ever before, and political differences are widened and inflamed. They also provide new opportunities for protest and resistance. Topics covered. Social theories from Debord, Foucault, Giddens, Goffman, and Fromm will be discussed in relation to the topics covered, which include the global history of communication technologies, personal branding, echo chamber effects, alienation, fear of abnormality, authoritarianism, populism, and resistance.

ADPO210001
Modern Russia: Culture, Politics, & Foreign Policy
Baumann, Erin E
Fall 2023
In this course, we will explore the relationship between culture and politics in Russia with the aim of explaining how they work together to shape elite and popular beliefs about Russia's role in the world. We will examine the legacies of Russia's imperial, Soviet, and post-Soviet history; the tensions in Russia's transitions from communism to capitalism and from authoritarianism to flawed democracy (and back to authoritarianism, again); the complexities of Russian nationalism; the realities of Russian civil society; the landscape of Russian media; and, of course, the rise of Vladimir Putin and his influence on the institutions and processes of politics in Russia today. We will analyze historical cases and contemporary news, art, scholarship, and popular culture and we will culminate the course with a look ahead at where we think Russia is going based on what we know about where it has been.

Populism and the Rise of Anti-Democracy  
FitzGibbon, John E  
Fall 2023  
This course explores the emergence of Populist political movements around the globe and the increased challenge to democracy more generally. While the late 20th century was characterized by the triumph of democracy over alternative forms of government, democracy is facing both new and old challenges around the world. The course investigates the nature of these challenges, what are they, who leads them, and most critically why are they emerging now?

ADPO200211
Special Topics: The Politics of Public Education
Berkshire, Jennifer C
Spring 2024
Fighting about public education is a pastime nearly as old as the nation itself. While the school culture wars have flared decade after decade, dating back 100+ years, conflicts over the place of evolution, sex education, and critical race theory in schools aren't the only issues that divide us. Fundamental questions remain deeply contested, including who gets to determine where and how children are educated, who should pay for public education, whether education is a public good or a private one, and the role of education as a counter to poverty. In this course, will examine contemporary education debates through the lens of deeper, unresolved conflicts, viewed from a variety of political perspectives. Among the topics will be delving into parent rights; the place of virtue in schooling; meritocracy and discontent; how to measure school performance (when we can't even agree on why we have schools;) the views of education within the populist new right, and whether we still need public education. Education is at the very center of our current culture wars. This course delves into the deep, unresolved conflicts to help us understand why.

Comparative Politics
Baumann, Erin E
Spring 2024
This course introduces students to the comparative method in political science. In doing so it covers the fundamental concepts of political science--the logic of comparison, regime types, and institutionalism. It then goes on to look at the institutional building blocks of modern states--constitutions, executives, legislatures, electoral systems--before employing these same fundamental and institutional concepts to grapple with contemporary political questions around issues such as political violence, the rise of populism, and the impact of globalization on politics and society.

Positive Psychology
Clucas Leaderman, Emilie
Summer 2023
Psychology has often focused on deficits and disability. Recently, however, added focus and research has been placed on the more positive aspects of human life. This course is designed to provide a systemic understanding of what we have learned about human capacity related to positive characteristics and processes, and how these tenets and skills can be learned and applied to improve our well-being. We will explore how a variety of components including biology, emotions, personality, lifestyle, culture, and environment continually interact in a dynamic process to promote a fulfilling and flourishing life. The course will foster creative thinking about concepts and methods of positive psychology. While focusing on each person's unique potential for growth and development, social and professional contexts will also be emphasized, such as thriving within communities and organizations. Students will be encouraged to think critically about well-being and integrate their own personal experiences.

The Age of Misinformation

Carroll, Jaclyn

Summer 2023
Are we living in the Age of Misinformation? Scholars across the social sciences and humanities are united by a fear of how fast false information can spread. Misinformation appears everywhere our workplaces, our social media feeds, our family dinners. But what is misinformation and where does it come from? Why are some people drawn to it while others remain unaffected? How does anyone distinguish good information from bad, experts from dupes? This course is an interdisciplinary examination of misinformation, its character, its origins, and its impact on social and political life. By surveying the leading theoretical explanations of misinformation from sociology, communication & media studies, psychology, and political science, students will be exposed to cutting edge research on the nature of misinformation and will cultivate tools to hinder its spread in their personal and professional lives.

Adolescent Development
Mc Intyre, Alice E
Fall 2023
This course explores the physical, cognitive, social, and emotional changes that occur during adolescence. The role of family, peers, and school will be addressed. The course will also examine employment and career development and growth during the college years. Attention will be given to cohort effects and to the role of gender, socioeconomic status, and ethnic background.

**ADPS325001**  
**Psychology of Trauma**  
**West, Jennifer**  
**Fall 2023**  
This course is designed to introduce students to the psychology of trauma and explore what it means to experience trauma, manage in the aftermath, and find paths to healing. Students will become familiar with the impact and nature of a variety of interpersonal psychological traumas, such as childhood abuse, intimate partner and domestic violence, transgenerational trauma, and race-based and gender-based trauma. The course will explore the evolution of our understanding of trauma, diagnosis of trauma, and treatment of trauma-related disorders. We will investigate the various outcomes of trauma, including psychological disorders (e.g., posttraumatic stress disorder), interpersonal difficulties, and the psychophysiological alterations associated with trauma. We will also explore factors that predict resiliency as well as ways to support and promote personal growth after trauma. A variety of media will be used in this course to cover these topic areas, including empirical and clinical research, classic texts written by trauma experts, case histories, popular media, and personal narratives.

Psychology Courses: Spring 2024

ADPS110101
Theories of Personality
Blattner, Meghan C
Spring 2024
New developments and increasingly sophisticated technology inform and expand our understanding of the brain and human nature, personality, and individual differences. The course takes a fresh look at the similarities and differences that key figures, and key research have attributed to human nature. How do genetic inheritance, environment, and social factors interact to affect personality? Is personality stable or changing? How can modern psychology reconcile individual needs with those of the community? Readings consider theories of key figures and such factors as temperament, resilience, parenting, education, psychotherapy, gender, and attachment.

**Industrial and Organizational Psychology**  
**Payne, Adam M**  
**Spring 2024**  
Industrial and Organizational (I-O) Psychology is a scientific discipline that studies human behavior in the workplace. I-O psychologists help institutions with hiring, managing, developing, supporting employees, while working to align employee efforts with business needs. Some intended outcomes of I-O psychology include better talent to achieve the strategic goals of the organization, reduced turnover, increased productivity, and improved employee engagement. The tools and methods used in I-O psychology are highly transferable, as they are based upon the application of scientific processes toward studying people at work which incorporate aspects of statistics, research techniques, and other evidence-based approaches.

Psychology in Context  
Mc Intyre, Alice E  
Spring 2024
This capstone course requires students to apply content knowledge from the psychology major to real-world problems. Students will develop an applied project that bridges psychology and action as they leverage their background in the discipline of psychology to promote social justice and improve the conditions of their communities. Students should enroll in this course at the conclusion of their psychology major as they will rely on previous content throughout this course. This is the capstone for the psychology major - students should have completed at a minimum: ADPS1100, ADPS1153, ADPS1261, and ADPS2272.

The Age of Misinformation
Carroll, Jaclyn
Summer 2023
Are we living in the Age of Misinformation? Scholars across the social sciences and humanities are united by a fear of how fast false information can spread. Misinformation appears everywhere our workplaces, our social media feeds, our family dinners. But what is misinformation and where does it come from? Why are some people drawn to it while others remain unaffected? How does anyone distinguish good information from bad, experts from dupes? This course is an interdisciplinary examination of misinformation, its character, its origins, and its impact on social and political life. By surveying the leading theoretical explanations of misinformation from sociology, communication & media studies, psychology, and political science, students will be exposed to cutting edge research on the nature of misinformation and will cultivate tools to hinder its spread in their personal and professional lives.

ADSO300301
The Society of the Selfie: Social Media and Political Crisis
Morelock, Jeremiah C
Summer 2023
This course explores how the Internet is connected to the global crisis of liberal democracy. Through social media people have new ways of rating and judging themselves and one another, via metrics such as likes, shares, followers and friends. There are new thirsts for authenticity, outlets for verbal aggression, and social problems. Information technologies provide channels for public engagement where extreme ideas reach farther and faster than ever before, and political differences are widened and inflamed. They also provide new opportunities for protest and resistance. Topics covered. Social theories from Debord, Foucault, Giddens, Goffman, and Fromm will be discussed in relation to the topics covered, which include the global history of communication technologies, personal branding, echo chamber effects, alienation, fear of abnormality, authoritarianism, populism, and resistance.

**Race, Surveillance, and Society**  
**King, Candace**  
**Summer 2023**  
Under the institution of slavery, Black bodies were heavily surveilled through severe monitoring, disciplining, and punishing practices. Although slavery has been abolished, these technologies for surveillance continue to resonate in the contemporary era. From data collection to ancestry tests or artificial intelligence, this course focuses on how society defines, automates, and monitors racial difference. Students will explore the concept of surveillance and its impact on conceptions of race and society from enslavement to the present day. The sociological framing of surveillance equips students with a language to not only unpack, but address contemporary issues within societal institutions such as prisons, health centers, and mass media.

Sociological Theories
Seim, Joshua D
Spring 2024
Sociological theory explores many complex questions that people have pondered for centuries, including the nature of human interdependence and how it evolves, inequality and why it is tolerated, social change and how it occurs, and social order and how it is maintained. This course introduces students to the major thinkers, classic texts, and relevant theoretical questions that have been and continue to be central perspectives within sociology. Through examining both classic and contemporary schools of sociological thought, we explore the basis for many of the core questions, debates, and methodological approaches within the discipline of sociology. Attention is paid to social and intellectual contexts, conceptual frameworks and methods, and contributions to contemporary social analysis. Throughout this course, we will also consider the application of theory and how these emergent ideas are relevant for contemporary society and current sociological research.

Sports Finance
Ayer, David J
Summer 2023
Sports today is a big business. At all levels, revenues currently exceed $65 billion. Colleges and universities have seen their cost per athlete increase by 52% over the past 5 years. With the vast amount of money involved and the visibility of the athletic programs, sports management has necessarily become a separate discipline. Sports Management shares many similarities with other businesses, but there are critically important differences. This course focuses on the financial management of sports programs. The course is designed to provide students with a fundamental understanding of the basic concepts in sports finance. It will focus on creating an understanding of basic financial concepts applicable to all organizations, including financial statement analysis, analyzing risk and return, and the time value of money. It will then apply these concepts to create an understanding of the financial drivers underlying sports management at the collegiate and professional levels. This will be accomplished through readings, videos, online class discussions, group projects, and individual reports.

Athlete Entrepreneurship: Opportunities Created by Name, Image, & Likeness
Okoli, Chimaeze
Summer 2023
This course will explore the rights of college student-athletes to access entrepreneurial opportunities based on their common law rights of publicity, often called rights of Name, Image, and Likeness (NIL) that has been created. Historical amateurism rules had prevented college student-athletes from using these rights going back to the 19th Century. The 2021 law change represented a major shift in how intercollegiate athletics may both operate and relate to its athletes, sponsors, and fans. For student-athletes, the ability to use and potentially profit from these rights offer a range of challenges and opportunities and this course will cover including the legal environment around NIL opportunities, the NCAA rules still applicable to NIL, key contractual terms and provisions related to NIL, opportunities allowed and limited under NIL laws and regulation, institutional responsibilities created by NIL, and strategies for limiting risk in pursuing entrepreneurial opportunities.

ADSA800401
Diversity and Inclusion in Sports
Buenano, Andrea L
Summer 2023
This course is designed to provide students with an overview of the major diversity and inclusion issues in the world of sports. All prime issues impacting contemporary sports are covered, including gender and sex, race and ethnicity, disability, religion, student-athlete welfare, media involvement, and globalization. Students will learn about their own bias, general bias, and how an inclusive and diverse sport organization creates a stronger culture. This course will place a heavy emphasis on critical dialogue and discussion and is designed to challenge students to think critically about the information they are receiving while applying the knowledge they have gained to specific intersections between sport and society. Students will be expected to be a participant in the learning process, including researching on their own, asking poignant questions when they might seem ambiguous, and learning from classmates different experiences all while being open and respectful. This course is considered a collective learning experience between students and the instructor (and occasional guest speaker and/or site visit). Students have diverse backgrounds, experiences, training, and education that they each bring to the classroom, thereby potentially enhancing the classroom exchange and learning experience.

Health and Wellness in Athletics and Sports Administration
Morris, Jade M; Ramos, Douglas J
Summer 2023
This course, with a multidisciplinary perspective that involves athletes, health care providers, and administrators, will provide a basic overview of key health and wellness aspects within sport and the administration and delivery of that health care. It will explore the regulatory and medical legal landscape affecting sports health and wellness, beginning with the history and development of sports medicine at all levels and the evolving models currently being established. In addition to the athletes it will address the personal health and wellness of those nonathletes such as administrators and health care providers involved with athletic programs. Included in the course will be the administration and roles of members of the healthcare team. An overview of the history of sports medicine and the interaction of various health care systems in the U.S. with athletic entities will be discussed. Health and wellness priorities within the construct of an athletic department, team or program will be introduced on such topics as concussion, catastrophic injury, emergency action plans, supplement and drug usage, drug appeals & therapeutic use exemptions, mental health best practices, sexual violence, mind-body interactions in sports & injuries, strength & conditioning and sports performance, impact of select sports in society, families and the health & wellness of athletes, sleep, rest & recovery, health services in large sporting venues & national events and insurance and disability.

Sports today is a big business. At all levels, revenues currently exceed $65 billion. Colleges and universities have seen their cost per athlete increase by 52% over the past 5 years. With the vast amount of money involved and the visibility of the athletic programs, sports management has necessarily become a separate discipline. Sports Management shares many similarities with other businesses, but there are critically important differences. This course focuses on the financial management of sports programs. The course is designed to provide students with a fundamental understanding of the basic concepts in sports finance. It will focus on creating an understanding of basic financial concepts applicable to all organizations, including financial statement analysis, analyzing risk and return, and the time value of money. It will then apply these concepts to create an understanding of the financial drivers underlying sports management at the collegiate and professional levels. This will be accomplished through readings, videos, online class discussions, group projects, and individual reports.

Athlete Entrepreneurship: Opportunities Created by Name, Image, & Likeness
Okoli, Chimaeze
Fall 2023
This course will explore the rights of college student-athletes to access entrepreneurial opportunities based on their common law rights of publicity, often called rights of Name, Image, and Likeness (NIL) that has been created. Historical amateurism rules had prevented college student-athletes from using these rights going back to the 19th Century. The 2021 law change represented a major shift in how intercollegiate athletics may both operate and relate to its athletes, sponsors, and fans. For student-athletes, the ability to use and potentially profit from these rights offer a range of challenges and opportunities and this course will cover including the legal environment around NIL opportunities, the NCAA rules still applicable to NIL, key contractual terms and provisions related to NIL, opportunities allowed and limited under NIL laws and regulation, institutional responsibilities created by NIL, and strategies for limiting risk in pursuing entrepreneurial opportunities.

Sports Leadership and Ignatian-based Ethics
Utzschneider, Cathy
Fall 2023
Sports leadership based on Ignatian ethics helps individuals, teams, and organizations realize high achievement with integrity and compassion. In this course coaches, managers in sport, and student athletes study Ignatian values and how they inform leadership tasks: determining mission, values, and goals; communicating for positive impact; developing and motivating teams; identifying individual and organizational strengths; and in times of constant change, adapting to it and managing organizations through it. Assignments will include a leadership log and a paper and presentation about leaders whom the students identify as role models. Students will also initiate a leadership goal that they will present to the class and then write a paper applying concepts from the course. Students will also practice a range of leadership exercises and discuss current case studies.

Coaching for Performance and Student Athlete Development  
Utzschneider, Cathy  
Spring 2024
High performance with life balance is a focus for coaches, student-athletes, and athletic administrators, requiring an understanding of overlapping fields, concepts, and skills. Students will learn theories of excellence and goal achievement; the role of nature versus nurture in athletic performance; how our physiology reinforces our training; student-athlete challenges including mental health issues, time management, transitions, and career planning beyond college; and theories and skills to form optimal habits and to build positive mindsets, willpower, and best teams. In addition to learning theories, students will practice relevant skills and set goals for high performance in their own lives.

Sports analytics is a rapidly evolving industry with careers in professional and amateur organizations, in the media, for supporting tech companies, and elsewhere. It's a modern application of so many academic disciplines, such as mathematics, computer science, physics, economics, marketing, and psychology; however, success in this course or in the industry doesn't require expertise in any of the above. This is a course on constructing, interpreting and communicating quantitative arguments in sports. For example, it might be quantifying injury risk for a pitcher, analyzing that risk relative to age and injury history, and then arguing to a general manager why they should or shouldn't sign player X to contract Y. Or, it might be investigating if there is a lack of competitive balance in women's college basketball, and if so, the reasons why. Students will develop statistical and writing literacy, learn basic computational skills and practice delivering oral arguments. Most importantly, students will think critically about real-world problems, where there isn't one correct solution and where there are many valid approaches. While students will do all of this in sports--a familiar medium where most have strong opinions and where amazing data is publicly available--these skills and competencies have universal application.

The role of the collegiate athletic director has evolved greatly over the years, from "former football coach turned administrator" to seasoned business executive. The Athletic Director today, particularly at the highest levels of Division I, holds roles and responsibilities similar to a chief executive officer in a corporation and must have the acumen to match in order to be successful. This course will examine the myriad responsibilities that today's AD's hold in running the athletic enterprise on a college campus. The course will also delineate and define the most important leadership aspects of the position and those that are most determinate of successful careers in the field. The course will review the evolution of the position and describe the differences that are inherent in the position, based on university NCAA classification.

Athletic Facilities and Operations

Bendesky, Neal Howard; Disabatino, Louis G

Spring 2024
As the sport industry continues to grow, so do the number of sport-related event management jobs. Event management is one of the most sought-after skills in the sports and entertainment industry. With the construction of massive new facilities, there is a growing need for skilled individuals who can fill arenas, stadiums, and coliseums with programming on a yearly basis. Today's sport event planner must be able to manage his personal life along with having strong conceptual, interpersonal, technical, and time management skills. The event planner must also be able to negotiate with sport event venues and recognize the importance of sport tourism and the need for collaborating with a wide variety of network organizations. This course provides you with necessary foundations of event management, including conceptualization, staffing, budgeting, financing, promoting, securing, and managing. You will have the opportunity to understand the competencies necessary for managing and operating sport events through theory and application.

Sustainable Design As A Way Of Thinking
Foley, David M
Fall 2023
Do you ever dwell, work, eat, sleep, or recreate indoors? Do the location, layout, light, acoustics, air quality, or thermal comfort of buildings affect you? Do you ever rely on wires, pipes, or ductwork to provide you with services you need? Do you use roads, bridges, rail lines, airports, water supplies, sewage treatment systems, or utilities? Then you have a stake in the built environment. Do you agree that providing for our present needs should not diminish the chance for future generations to provide for their needs? Then you have a stake in sustainability. The built environment and environmental sustainability are connected, through energy and water use, alteration of habitats, manufacture and disposal of materials, indoor environmental quality and human well being, transportation of people and goods, and in other important ways. In this course we will examine and think hard about those connections. By the end of the course, we will all develop a broader overview and better understanding of how to think about, assess, measure, advocate for, inhabit, design, and build a more sustainable built environment.

Special Topics: Astronomy
Kruckenberg, Seth C
Spring 2024
Astronomical observations and theories date back to the beginning of recorded history. The development of astronomy is closely tied to the growth of physics, mathematics, philosophy, and theology. Emphasis is on large-scale concepts and on how we know what we know about the stars, our galaxy, and the universe. The course covers these discoveries and ideas from the earliest days of astronomy to many of the recent, exciting advances.

Theology Courses: Fall 2023

ADTH101601
Introduction to Christian Theology I: Christian Life and Spirituality
Snyder, Joshua R
Fall 2023
This course considers significant questions in conversation with some of the most important writings in the tradition of Western Christian thought. Its purpose is to encourage students by drawing systematically on primary sources of historical significance to uncover the roots of the Christian faith and life and to delineate the values for which this tradition of faith stands.

ADTH140201
God, Self, Society
Coolman, Boyd
Fall 2023
The purpose of this course is to introduce students to the dynamics of theological reflection in an academic setting. Framed as a quest for truth, transformation, and justice, the course invites students to explore key questions and themes of enduring human significance in conversation with the classic texts, ideas, and practices that animate the Christian theological tradition. Such questions include: What is theology? What is the ultimate horizon of our lives? What does it mean to be human? Who is Jesus Christ? And how can we know and serve the common good?

ADTH143201
Hinduism and Christianity in Dialogue
Mylroie, Mary K
Fall 2023
It has been said that to know one religion is to know none. In this course, we seek to gain an understanding of two of the major world religions, Christianity and Hinduism, through a comparative and dialogical approach of the ways in which these traditions have come to terms with some of the basic existential questions and religious aspirations of humanity. We will focus on conceptions of creation, evil and salvation/liberation, on ritual practices, ethical principles, and their respective views of one another.

ADTH147101
The Church in Asia
Dehm, Zachary R
Fall 2023
In this course, students will explore the major historical and theological moments for the maturation of Christianity in Asia as part of its relationship with the West. We will construct an overview of colonialism in Asia starting with the arrival of Christianity as 15th-century Spanish ships landed on Filipino shores. With that historical overview, the course will engage in frank conversation on the work and legacies of Christian missionaries from colonialism until today. We will identify the most urgent cultural, economic, political, and ecclesial concerns within Asian contexts, and examine the contemporary church's response. We will also look at how Christian thinkers have engaged other the great religions of East Asia. While privileging a Catholic theological lens for assessment, the course is designed to bring all students worldviews into critical and constructive conversation.

Buddhism and Christianity in Dialogue
Hartnell-Howden, Tiffany L
Spring 2024
This course is an introduction to the comparative study of Buddhism and Christianity. The aims are: 1) to introduce you to the essential teachings and practices of the Buddhist and Christian traditions; 2) to explore each traditions particular understanding of the relationship between the ultimate and the human. This course is designed to engage the students in exploration of how each tradition develops a response to the human condition. In the process, we will compare texts on Buddhist meditation and Christian contemplation, and modern Buddhist and Christian perspectives on race, gender, ecology, and social justice.

ADTH216001
Challenge of Justice
Snyder, Joshua R
Spring 2024
The pursuit of justice is a dominant concern of our age. But it appears that there are nearly as many understandings of justice as there are persons and communities to claim them. The goal of this course is to consider the principal understandings of justice and peace that have developed in the Western philosophical and theological traditions and assess how these alternative understandings affect personal decisions and social policy choices. We will pay attention to how these theories relate to concrete, practical, political and social issues. Special attention will be paid to the contribution of the Catholic intellectual tradition in formulating an approach to justice and peace. This course highlights what is at stake when we choose one way of justice rather than another. Ultimately, we need to think about how we ought to treat other people and what kind of society we want to build. Over the course of the semester, we will examine issues of justice related to human rights, hunger and poverty, racism, sexuality, ecology, and peace-building.

Policies and Procedures

University Policies and Procedures

Accreditation of the University

Since 1935, Boston College has been accredited by the New England Commission of Higher Education (NECHE). NECHE is recognized by the U.S. Secretary of Education as a reliable authority on the quality of education and adheres to the standards of the Council for Higher Education Accreditation. As part of NECHE guidelines, member institutions undergo a peer review process every ten years which involves the preparation of a comprehensive self-study. Boston College’s most recent full review for accreditation occurred in March 2017.

Inquiries regarding Boston College’s accreditation status, including requests for a paper copy of this information, should be directed to the Office of the Provost and Dean of Faculties, Boston College, 270 Hammond Street, Chestnut Hill, MA 02467 (617-552-3260); individuals may also contact the New England Commission of Higher Education, 301 Edgewater Place, Suite 210, Wakefield, MA 01880 (781-425-7785).

In addition to NECHE, a variety of schools and programs at Boston College are affiliated with discipline-based accrediting agencies such as: Connell School of Nursing: American Association of Colleges of Nursing, Commission on Collegiate Nursing Education; Carroll School of Management: Association to Advance Collegiate Schools of Business; Law School: American Bar Association; Boston College School of Social Work: Council on Social Work Education; School of Theology and Ministry: The Association of Theological Schools; Morrissey College of Arts and Sciences, Chemistry Department: American Chemical Society; Lynch School of Education and Human Development, Teacher Education, Special Education, and Curriculum and Instruction programs: Council for the Accreditation of Educator Preparation; Counseling Psychology Programs: American Psychological Association, Masters in Psychology and Counseling Accreditation Council. For distance education, Boston College is an approved member of the National Council for State Authorization Reciprocity Agreements (NC-SARA), and Boston College’s public safety and police department is an accredited program of the Massachusetts Police Accreditation Commission.

Annual Notification of Rights

The University Registrar and the Vice President for Student Affairs are responsible for notifying students annually of their rights under FERPA. The annual notice is to appear in the Boston College Bulletin and in the Boston College Student Guide.

All non-directory information is considered confidential and will not be released to outside inquiries without the express written consent of the student.

Student Rights Under FERPA

Boston College maintains a large number of records regarding its students in the administration of its educational programs, as well as its housing, athletics, and extracurricular programs. The University also maintains employment and financial records for its own use and to comply with state and federal regulations. Boston College is committed to protecting the privacy interests of its students and to maintaining the confidentiality of student records in accordance with the Family Educational Rights and Privacy Act of 1974 (FERPA).

These rights are as follows:

- The right to inspect and review the student’s education record within 45 days of the day the University receives a request for access.

  Any student who wishes to inspect and review information contained in an education record maintained by any office of the University may, with proper identification, request access to the record from the office responsible for maintaining that record. Unless the circumstances require the existence of a formal request, an oral request may be honored.

  Whenever an office responsible for maintaining education records is unable to respond, the student may submit to the Office of Student Services, dean, academic department head, or other appropriate official a written request that identifies the record he or she wishes to inspect. The University official shall provide access within 45 days after the University receives the request, and shall notify the student of the time and place the record may be inspected. If the record is not maintained by the University official to
whom the request is submitted, that official is to advise the student of the correct official to whom the request is to be addressed.

- The right to request the amendment of the student’s education record if the student believes that information contained in his or her record is inaccurate, misleading or in violation of his or her rights of privacy.

Any student who believes that information contained in his or her education record is inaccurate, misleading, or in violation of his or her rights of privacy is to write to the University official responsible for the record, clearly identifying the part of the record he or she wants changed, and specifying why the record should be amended.

If the University concludes that the record should not be amended as requested, the University will notify the student, advise the student of his or her right to a hearing and provide information about the hearing process.

- The right to consent to the disclosure of personally identifiable information contained in the student’s education record, except to the extent permitted under FERPA. One exception that permits disclosure without consent is disclosure to University officials with legitimate educational interests, which may include employees in administrative, supervisory, academic or research, or support staff position (including law enforcement unit personnel and health staff); members of the Board of Trustees; and students serving on an official committees, such as a disciplinary or grievance committees, or assisting another University officials in performing their tasks. University officials may also be contractors, consultants, volunteers or other outside parties to whom the University has outsourced institutional services or functions that would ordinarily be performed by University employees. The University may disclose education records without consent to officials of other educational institutions that have requested the records and in which a student seeks or intends to enroll or is already enrolled so long as the disclosure is for purposes related to the student’s enrollment or transfer.

- The right to file a complaint with the U.S. Department of Education concerning alleged failures by the University to comply with the requirements of FERPA. Written complaints may be directed to the Family Policy Compliance Office, U.S. Department of Education, 400 Maryland Avenue, SW, Washington, D.C., 20202-4605.

Confidentiality of Student Records

Certain personally identifiable information from a student's education record, designated by Boston College as directory information, may be released without the student’s prior consent. This information includes name; term, home, local, and electronic mail addresses; telephone listing; date and place of birth; photograph; major field of study; enrollment status; grade level; participation in officially recognized activities and sports; weight and height of members of athletic teams; dates of attendance; school/college of enrollment; anticipated date of graduation; degrees and awards received; the most recent previous educational agency or institution attended; and other similar information.

Electronic access to selected directory information is available to both the Boston College community and the general public. A student who so wishes has the right to prevent the release of all directory information including verification of enrollment, or to suppress selected directory information at bc.edu/myservices (“Privacy Preferences Confirm/Review).” This must be done by the end of the first week of enrollment.

Disclosures to Parents of Students

When a student reaches the age of 18, or attends a postsecondary institution regardless of age, FERPA rights transfer to the student. Guidelines for the disclosure of information to parents are as follows:

- Parents may obtain directory information at the discretion of the institution.
- Parents may obtain nondirectory information (e.g., grades, GPA) at the discretion of the institution and after it is determined that the student is legally dependent on either parent.
- Parents may also obtain nondirectory information if they have a signed consent from the student.

Certificate of Enrollment

Visit the Certificate of Enrollment page for more information.
Certifying enrollment can be done for the following audiences:

- For current students and employees with access to the Agora Portal
- For alumni and external audiences, including employers

**Disability Services Office**

The Disability Services Office (DSO) serves undergraduate and graduate students with physical, medical, psychological, and temporary disabilities. The Assistant Dean works with each student individually to determine the appropriate accommodations necessary for the student’s full participation in college programs and activities. The Assistant Dean of Student Disability Services also works with university administrators to develop policies and procedures pertinent to students with disabilities while acting as a general referral service on disability issues.

All accommodation requests must be submitted by June 9, 2023 to the DSO. This deadline does not apply to the Connors Family Learning Center and students registering for accommodations based on a learning disability or Attention Deficit Hyperactivity Disorder (ADHD).

For more information, contact:

Disability Services Office  
Maloney Hall—Suite 448  
140 Commonwealth Ave  
Chestnut Hill, MA 02467  
Phone: 617-552-3434  
E-mail: disabsrv@bc.edu

Services for students with learning disabilities and ADHD, as well as all testing accommodations, are coordinated through the Connors Family Learning Center (CFLC). The CFLC, located in O’Neill Library, provides academic support services and accommodations to undergraduate and graduate students. The CFLC’s services are extensive and vary depending upon the unique needs of the individual student.

For more information, contact:

Kathleen M. Duggan, Ph.D.  
Director, Connors Family Learning Center  
The Connors Family Learning Center (CFLC)  
Thomas P. O’Neill Jr. Library, Room 200  
140 Commonwealth Avenue  
Chestnut Hill, MA 02467

E-mail: dugganka@bc.edu

**Family Educational Rights and Privacy Act (FERPA)**

Visit the [Notices and Disclosures](#) page for information regarding the Family Educational Rights and Privacy Act (FERPA).

- The page enumerates student rights under FERPA.
- It also contains other notices and disclosures of interest to students and parents.

**Financial Aid**

Visit the [Financial Aid](#) page for more information about financial aid at Boston College.
Immunization

The state of Massachusetts requires that all full-time, part-time Health Sciences and part-time visa-carrying students entering college must submit proof of the following:

- **Tetanus, Diphtheria, and Pertussis (Tdap):** 1 dose. It must have been given at or after age 7. If Tdap was given before 2013 (≥10 years ago), you must also provide a current Tdap or Td.
- **MMR (measles, mumps, rubella) Vaccine Series:** 2 doses. These doses must be given at least four weeks apart beginning at or after 12 months of age.
- **Hepatitis B Vaccine Series:** 3 doses at varying intervals or two doses of Heplisav-B given on or after 18 years.
- **Meningococcal Conjugate Quadrivalent Vaccine:** 1 dose of (MCV4-A, C, Y, W-135) (Menactra, Meneve Nimenrix, or MenQuadfi) for all full-time students 21 years of age and younger. The vaccine must be on or after the sixteenth birthday, or a signed waiver is acceptable.
- **Varicella Vaccine:** 2 doses of the vaccine or a reliable history of varicella disease documented by a health care provider.
- **Tuberculosis Screening/Testing Form** complete the form and accompanying testing if needed.

If proof of immunization for measles, mumps, rubella, hepatitis B, and/or varicella is unavailable, a blood titer showing immunity will be accepted.

Failure to show proof of immunizations within 30 days from the start of classes will result in a block on your registration, and an administrative fee of $90 will be charged to your student account.

**Important Notices and Disclosures under the HEOA**

Boston College maintains a web page that provides all notices, disclosures, and other information required to be disclosed under the Higher Education Opportunity Act (HEOA). This web page is available at [bc.edu/content/bc-web/offices/executive-vice-president/notices-disclosures.html](http://bc.edu/content/bc-web/offices/executive-vice-president/notices-disclosures.html). This page includes links to disclosures with the following information:

- **Institutional and Student Information,** including information regarding the University's academic programs, facilities, faculty, academic improvement plans, accreditation, student rights with respect to the privacy of student records, transfer of credit policies, resources for students with disabilities, the diversity of the student body, voter registration, copyright and file-sharing, and how to reach the Office of Student Services, which maintains additional resources and information for students and prospective students;
- **Financial Information,** including the cost of attendance, withdrawal and refund policies, information regarding financial aid programs (including information about eligibility requirements and criteria, forms, policies, procedures, standards for maintaining aid, disbursements and repayment), student employment information and exit counseling information, and how to reach the Office of Financial Aid;
- **Student Outcomes,** including information regarding retention rates, graduation rates, and placement and education of graduates;
- **Health and Safety Information,** including the Annual Campus Security and Fire Safety Report which describes the University’s campus safety program policies and includes statistics for the previous three years concerning reported crimes and fires that occurred on campus; the Drug-Free Campus and Workplace Program; and the University’s policies with respect to immunizations required under Massachusetts law; and
- **Athletic Program Information,** describing how to request a report about the University’s athletic programs that includes participation rates, financial support, and other information on men’s and women’s intercollegiate athletic programs.

Each disclosure explains how you may request a paper copy of the information. Alternatively, you may request paper copies of these disclosures by calling the Office of the Executive Vice President (617) 552-3255 or sending a written request to: Boston College, Office of the Executive Vice President, Botolph House, 140 Commonwealth Avenue, Chestnut Hill, MA 02467.

Notice of Nondiscrimination

Founded by the Society of Jesus in 1863, Boston College is dedicated to intellectual excellence and to its Jesuit, Catholic heritage. Boston College recognizes the essential contribution a diverse community of students, faculty, and staff makes to the advancement of its goals and ideals in an atmosphere of respect for one another and for the University’s mission and heritage. Accordingly, Boston College commits itself to maintaining a welcoming environment for all people and extends its welcome in particular to those who may be vulnerable to discrimination on the basis of their race, color, national origin, sex, religion, disability, age, marital or parental status, sexual orientation, military status, or other legally protected status.

Boston College rejects and condemns all forms of harassment, wrongful discrimination, and disrespect. It has developed procedures to respond to incidents of harassment whatever the basis or circumstance. Moreover, it is the policy of Boston College, while reserving its lawful rights where appropriate to take actions designed to promote the Jesuit, Catholic principles that sustain its mission and heritage, to comply with all state and federal laws prohibiting discrimination in employment and in its educational programs and activities on the basis of a person’s race, color, national origin, sex, religion, disability, age, marital or parental status, genetic information or family medical history, or military status, and to comply with state law prohibiting discrimination on the basis of a person’s sexual orientation.

To this end, Boston College has designated its Associate Vice President for Institutional Diversity to coordinate its efforts to prevent discrimination in accordance with this notice and applicable laws. Individuals are welcome to raise any questions regarding this notice and the requirements of state and federal nondiscrimination laws with the Associate Vice President for Institutional Diversity:

Boston College Office for Institutional Diversity (OID)
140 Commonwealth Avenue (Office location: 129 Lake Street)
Chestnut Hill, MA 02467
Patricia Lowe,
Associate Vice President for Institutional Diversity/Title IX Coordinator
patricia.lowe@bc.edu
Phone: 617-552-3334
Email: TitleIXCoordinator@bc.edu

The Associate Vice President for Institutional Diversity oversees the efforts of the following additional Title IX coordinators: (i) Melinda Stoops, Associate Vice President for Student Affairs and Student Affairs Title IX Coordinator (for student sexual harassment complaints), Maloney Hall, Chestnut Hill, MA 02467 (617-552-3482); (ii) Linda Riley, University Harassment Counselor, 129 Lake Street, Brighton, MA (617-552-0486); and (iii) Reshauna Cobb, Senior Associate Director Athletics, Internal Operations, 310 Conte Forum, Chestnut Hill, MA 02467 (617-552-8303).

The following federal laws and regulations require the University not to discriminate on the basis of race, color, national origin, disability, sex, or age in treatment, employment, admission or access to Boston College and its educational programs and activities: Title VI of the Civil Rights Act of 1964 (Title VI), Section 504 of the Rehabilitation Act of 1973 (Section 504), Title IX of the Education Amendments of 1972 (Title IX), the Age Discrimination Act of 1975 (Age Act), and their respective implementing regulations at 34 C.F.R. Parts 100, 104, 106, and 110. Inquiries concerning the application to Boston College of each of the statutes and implementing regulations outlined above may be referred to the U.S. Department of Education, Office for Civil Rights, 5 Post Office Square, 8th Floor, Boston, MA 02109-3921 (617-289-0111).
Tuition and Fees

Visit the Tuition and Fees page for more information on the following:

- Tuition and fees
- Laboratory/course fees
- Tuition refund schedule

Veterans Benefits and Transition Act of 2018

The university will adhere to the requirements of Section 3679 of Title 38 of the Veterans Benefits and Transition Act of 2018 (referred to below as the "Veterans Benefits and Transition Act").

Boston College shall permit any student who is a covered individual (as defined in Section 3679 of the Veterans Benefits and Transition Act) to attend or participate in the course of education during the period beginning on the date on which such student provides to Boston College a certificate of eligibility for entitlement to educational assistance under chapter 31 or 33 of Title 38 of the Veterans Benefits and Transition Act and ending on the earlier of (i) the date on which the U.S. Secretary of Veterans Affairs provides payment for such course of education to Boston College, or (ii) the date that is 90 days after the date on which Boston College certifies for tuition and fees following receipt from the student such certificate of eligibility.

Boston College shall ensure that it will not impose any penalty (including the assessment of late fees, the denial of access to classes, libraries, or other institutional facilities, or the requirement that a covered individual (as defined in Section 3679 of the Veterans Benefits and Transition Act) borrow additional funds) on any student who is a covered individual because of such student's inability to meet his or her financial obligations to Boston College due to the delayed disbursement of a payment to be provided by the Secretary of Veterans Affairs under chapter 31 or 33 of Title 38 of the Veterans Benefits and Transition Act.

The University reserves the right to deny access to services or impose additional fees in accordance with University policy on the difference between the amount of the student's financial obligation and the amount of the VA education benefit disbursement if not paid by the student by the required due dates.

Academic Integrity Policies

Academic Integrity (Undergraduate)

Policy and Procedures

The pursuit of knowledge can proceed only when scholars take responsibility and receive credit for their own work. Recognition of individual contributions to knowledge and of the intellectual property of others builds trust within the University and encourages the sharing of ideas that is essential to scholarship. Similarly, the educational process requires that individuals present their own ideas and insights for evaluation, critique, and eventual reformulation. Presentation of others’ work as one’s own is not only intellectual dishonesty, but it also undermines the educational process.

Standards

Academic integrity is violated by any dishonest act which is committed in an academic context including, but not restricted to, the following:

Cheating is the fraudulent or dishonest presentation of work. Cheating includes but is not limited to:

- the use or attempted use of unauthorized aids in examinations or other academic exercises submitted for evaluation;
- fabrication, falsification, or misrepresentation of data, results, sources for papers or reports, or in clinical practice, as in reporting experiments, measurements, statistical analyses, tests, or other studies never performed; manipulating or altering data or other
manifestations of research to achieve a desired result; selective reporting, including the deliberate suppression of conflicting or unwanted data;

- falsification of papers, official records, or reports;
- copying from another student's work;
- actions that destroy or alter the work of another student;
- unauthorized cooperation in completing assignments or during an examination;
- the use of purchased essays or term papers, or of purchased preparatory research for such papers;
- submission of the same written work in more than one course without prior written approval from the instructors involved;
- dishonesty in requests for make-up exams, for extensions of deadlines for submitting papers, and in any other matter relating to a course.

Plagiarism is the act of taking the words, ideas, data, illustrations, or statements of another person or source, and presenting them as one's own. Each student is responsible for learning and using proper methods of paraphrasing and footnoting, quotation, and other forms of citation, to ensure that the original author, speaker, illustrator, or source of the material used is clearly acknowledged.

Other breaches of academic integrity include:

- the misrepresentation of one's own or another's identity for academic purposes;
- the misrepresentation of material facts or circumstances in relation to examinations, papers, or other evaluative activities;
- the sale of papers, essays, or research for fraudulent use;
- the alteration or falsification of official University records;
- the unauthorized use of University academic facilities or equipment, including computer accounts and files;
- the unauthorized recording, sale, purchase, or use of academic lectures, academic computer software, or other instructional materials;
- the expropriation or abuse of ideas and preliminary data obtained during the process of editorial or peer review of work submitted to journals, or in proposals for funding by agency panels or by internal University committees;
- the expropriation and/or inappropriate dissemination of personally-identifying human subject data;
- the unauthorized removal, mutilation, or deliberate concealment of materials in University libraries, media, or academic resource centers.

Collusion is defined as assistance or an attempt to assist another student in an act of academic dishonesty. Collusion is distinct from collaborative learning, which may be a valuable component of students' scholarly development. Acceptable levels of collaboration vary in different courses, and students are expected to consult with their instructor if they are uncertain whether their cooperative activities are acceptable.

Promoting Academic Integrity: Roles of Community Members

Student Roles in Maintaining Academic Integrity

Students have a responsibility to maintain high standards of academic integrity in their own work and thereby to maintain the integrity of their degree. It is their responsibility to be familiar with, and understand, the University policy on academic integrity.

Students who become aware of a violation of academic integrity by a fellow student should respond in one of the following ways:

- Students may discuss their concerns with the student whom they suspect of a violation. Direct contact by another student may be the best means of resolving the problem. Repeated demonstration of student concern for academic integrity will, in the long run, build a peer-regulated community.
- If the incident is a major violation or part of a repeated pattern of violations, students should bring their concerns to the attention of the instructor or to the appropriate department chairperson or associate dean. Suspected violations by students reported to members of the faculty or to an associate dean will be handled according to the procedures set forth below.

Students who have serious concern that a faculty member is not living up to his or her responsibility to safeguard and promote academic integrity should speak with the faculty member directly, or should bring their concern to the attention of the department chairperson or associate dean.
Faculty Roles in Fostering Academic Integrity

Faculty members should provide students with a positive environment for learning and intellectual growth and, by their words and actions, promote conditions that foster academic integrity.

Faculty should be concerned about the impact of their behavior on students. Students are sensitive to messages communicated in informal discussions and in casual faculty remarks about personal decisions and value judgments. Students are perhaps most sensitive to how responsibly faculty members fulfill their obligations to them in the careful preparation of classes, in the serious evaluation of student achievement, and in their genuine interest in and availability to students.

Faculty should promote academic integrity in the following specific ways:

- At the beginning of each course, instructors should discuss academic integrity in order to promote an ongoing dialogue about academic integrity and to set the tone and establish guidelines for academic integrity within the context of the course, e.g., the extent to which collaborative work is appropriate. Where relevant, instructors should discuss why, when, and how students must cite sources in their written work.
- Instructors should provide students with a written syllabus that states course requirements and, when available, examination dates and times.
- Instructors are encouraged to prepare new examinations and assignments where appropriate each semester in order to ensure that no student obtains an unfair advantage over his or her classmates by reviewing exams or assignments from prior semesters. If previous examinations are available to some students, faculty members should insure that all students in the course have similar access. Course examinations should be designed to minimize the possibility of cheating, and course paper assignments should be designed to minimize the possibility of plagiarism.
- Proctors should be present at all examinations, including the final examination, and should provide students with an environment that encourages honesty and prevents dishonesty.
- Faculty should be careful to respect students' intellectual property and the confidentiality of student academic information.
- Assignment of grades, which is the sole responsibility of the instructor, should be awarded in a manner fair to all students.

Academic Deans

Academic deans have overall responsibility for academic integrity within their schools. In particular, deans' responsibilities include the following:

- promoting an environment where academic integrity is a priority for both students and faculty,
- ensuring that students who are honest are not placed at an unfair disadvantage, and
- establishing procedures to adjudicate charges of academic dishonesty and to protect the rights of all parties.

Procedures

Academic integrity is central to the educational and formative mission of the university. A University-Wide Undergraduate Academic Integrity Committee, made up of Academic Officers from each of the Undergraduate Schools and Colleges, reviews all reports of academic dishonesty. Faculty and students are consulted on an ad-hoc basis depending on the case.

When a faculty member determines that a student's work violates the standards of academic integrity, the faculty member is encouraged to discuss the matter with the student. The faculty member should notify the student of the substance of the violation and the action that the faculty member proposes to take. If the faculty member decides to impose a grading penalty, a letter of notification describing the incident, the evidence supporting the allegation, and the proposed grading penalty is to be sent to the Associate Dean of the school or college in which the course is taught.

On receipt of such a notification, the Undergraduate Academic Integrity Committee will notify the student of the allegation and the evidence. The student’s class Dean will also be notified, if the course is outside of the student’s home school or college. The student will be given an opportunity to respond to the allegation in writing (within 5 business days). The Committee is committed to resolving cases in a just and timely manner and to maintaining the confidentiality of any students involved. While a case is pending, the student may not withdraw from or change status in the course.
Each reported violation of the standards of academic integrity will be reviewed by the University-Wide Undergraduate Committee on Academic Integrity. This will ensure that in cases involving students from more than one school, or students in joint or dual degree programs, the process and penalty will be consistent.

The committee's approach is a formative one that expects students to reflect on their experience, understand the impact of their choices, and make decisions differently based on what they've learned. The approach is meant to be educational and restorative, rather than punitive. For students found responsible for violations, consequences will depend upon the seriousness and circumstances of the violation, the degree of premeditation involved, and the student's previous record of violations. The committee may simply affirm the faculty member's penalty and issue the student a "warning," which will be kept in a confidential electronic file until the student graduates and will not be reportable to professional schools or outside agencies. The Committee may recommend a different grading penalty and/or impose additional administrative penalties. The most severe penalties may include university probation, suspension, or expulsion, all of which become part of a student's academic record and are reportable to graduate/professional schools and outside agencies.

The Associate Dean of the school in which the course is taught will convey to the faculty member and the student the Committee's findings as to responsibility and recommended sanctions. Appeal of the Committee's decision may be made by written request to the Dean of the school or college of the course not later than ten days following notification. The decision of the Dean will be final.

**Summary of Process**

**Step 1:** The faculty member is encouraged to discuss the matter with the student.

**Step 2:** The faculty member should notify the student of the substance of the violation and the action that the faculty member proposes to take.

**Step 3:** If the faculty member decides to impose a grading penalty, a letter of notification describing the incident, the evidence supporting the allegation, and the proposed grading penalty is to be sent to the Associate Dean of the school or college in which the course is taught.

**Step 4:** The Undergraduate Academic Integrity Committee will notify the student, who will be given an opportunity to respond to the allegation in writing (within 5 business days).

**Step 5:** The case will be reviewed by the University-Wide Undergraduate Committee on Academic Integrity.

**Step 6:** The Associate Dean of the school in which the course is taught will convey to the faculty member and the student the Committee's findings as to responsibility and recommended sanctions.

**Step 7:** Appeal of the Committee's decision may be made by written request to the Dean of the school or college of the course not later than ten days following notification. The decision of the Dean will be final.

**Academic Integrity (Graduate)**

**Policy and Procedures**

The pursuit of knowledge can proceed only when scholars take responsibility and receive credit for their work. Recognition of individual contributions to knowledge and of the intellectual property of others builds trust within the University and encourages the sharing of ideas that is essential to scholarship. Similarly, the educational process requires that individuals present their own ideas and insights for evaluation, critique, and eventual reformulation. Presentation of others' work as one's own is not only intellectual dishonesty, but it also undermines the educational process. Cases of falsification, fabrication, and plagiarism that occur in the course of research are also subject to Boston College's research misconduct policy, which can be found at [www.bc.edu/bc-web/research/sites/vice-provost-for-research/integrity-and-compliance/research-misconduct.htm](http://www.bc.edu/bc-web/research/sites/vice-provost-for-research/integrity-and-compliance/research-misconduct.htm).

**Standards**

Academic integrity is violated by any dishonest act which is committed in an academic context including, but not restricted to the following:
Cheating is the fraudulent or dishonest presentation of work. Cheating includes but is not limited to:

- The use or attempted use of unauthorized aids in examinations or other academic exercises submitted for evaluation;
- Fabrication, falsification, or misrepresentation of data, results, sources for papers or reports, or in clinical practice, as in reporting experiments, measurements, statistical analyses, tests, or other studies never performed; manipulating or altering data or other manifestations of research to achieve a desired result; selective reporting, including the deliberate suppression of conflicting or unwanted data;
- Falsification of papers, official records, or reports;
- Copying from another student's work;
- Actions that destroy or alter the work of another student;
- Unauthorized cooperation in completing assignments or during an examination;
- The use of purchased essays or term papers, or of purchased preparatory research for such papers;
- Submission of the same written work in more than one course without prior written approval from the instructors involved;
- Dishonesty in requests for make-up exams, for extensions of deadlines for submitting papers, and in any other matter relating to a course.

Plagiarism is the act of taking the words, ideas, data, illustrations, or statements of another person, program, or source, and presenting them as one's own. Each student is responsible for learning and using proper methods of paraphrasing and footnoting, quotation, and other forms of citation, to ensure that the original author, speaker, illustrator, or source of the material used is clearly acknowledged.

Other breaches of academic integrity include:

- the misrepresentation of one's own or another's identity for academic purposes;
- the misrepresentation of material facts or circumstances in relation to examinations, papers, or other evalulative activities;
- the sale of papers, essays, or research for fraudulent use;
- the alteration or falsification of official University records;
- the unauthorized use of University academic facilities or equipment, including computer accounts and files;
- the unauthorized recording, sale, purchase, or use of academic lectures, academic computer software, or other instructional materials;
- the expropriation or abuse of ideas and preliminary data obtained during the process of editorial or peer review of work submitted to journals, or in proposals for funding by agency panels or by internal University committees;
- the expropriation and/or inappropriate dissemination of personally-identifying human subject data;
- the unauthorized removal, mutilation, or deliberate concealment of materials in University libraries, media, or academic resource centers.

Collusion is defined as assistance or an attempt to assist another student in an act of academic dishonesty. Collusion is distinct from collaborative learning, which may be a valuable component of students’ scholarly development. Acceptable levels of collaboration vary in different courses, and students are expected to consult with their instructor if they are uncertain whether their cooperative activities are acceptable.

Promoting Academic Integrity: Roles of Community Members

Student Roles in Maintaining Academic Integrity

Students have a responsibility to maintain high standards of academic integrity in their own work, and thereby to maintain the integrity of their degree. It is their responsibility to be familiar with, and understand, the University policy on academic integrity.

Students who become aware of a violation of academic integrity by a fellow student should respond in one of the following ways:

- Students may discuss their concerns with the student whom they suspect of a violation. Direct contact by another student may be the best means of resolving the problem. Repeated demonstration of student concern for academic integrity will in the long run build a peer-regulated community.
If the incident is a major violation or part of a repeated pattern of violations, students should bring their concerns to the attention of the instructor or to the appropriate department chairperson or Associate Dean. Suspected violations by students reported to members of the faculty or to an Associate Dean will be handled according to the procedures set forth below.

Students who have serious concern that a faculty member is not living up to his or her responsibility to safeguard and promote academic integrity should speak with the faculty member directly, or should bring their concern to the attention of the department chairperson or Associate Dean.

Faculty Roles in Fostering Academic Integrity

Faculty members should provide students with a positive environment for learning and intellectual growth and, by their words and actions, promote conditions that foster academic integrity.

Faculty should be concerned about the impact of their behavior on students. Students are sensitive to messages communicated in informal discussions and in casual faculty remarks about personal decisions and value judgments. Students are perhaps most sensitive to how responsibly faculty members fulfill their obligations to them in the careful preparation of classes, in the serious evaluation of student achievement, and in their genuine interest in and availability to students.

Faculty should promote academic integrity in the following specific ways:

- At the beginning of each course, instructors should discuss academic integrity in order to promote an ongoing dialogue about academic integrity and to set the tone and establish guidelines for academic integrity within the context of the course, e.g., the extent to which collaborative work is appropriate. Where relevant, instructors should discuss why, when, and how students must cite sources in their written work.
- Instructors should provide students with a written syllabus that states course requirements and, when available, examination dates and times.
- Instructors are encouraged to prepare new examinations and assignments where appropriate each semester in order to ensure that no student obtains an unfair advantage over his or her classmates by reviewing exams or assignments from prior semesters. If previous examinations are available to some students, faculty members should insure that all students in the course have similar access. Course examinations should be designed to minimize the possibility of cheating, and course paper assignments should be designed to minimize the possibility of plagiarism.
- Proctors should be present at all examinations, including the final examination, and should provide students with an environment that encourages honesty and prevents dishonesty.
- Faculty should be careful to respect students’ intellectual property and the confidentiality of student academic information.
- Assignment of grades, which is the sole responsibility of the instructor, should be awarded in a manner fair to all students.

Academic Deans

Academic deans have overall responsibility for academic integrity within their schools. In particular, deans’ responsibilities include the following:

- promoting an environment where academic integrity is a priority for both students and faculty,
- ensuring that students who are honest are not placed at an unfair disadvantage, and
- establishing procedures to adjudicate charges of academic dishonesty and to protect the rights of all parties.

Procedures

Graduate and professional students should refer to their department or school for procedures for adjudicating alleged violations of academic integrity. Penalties for students found responsible for violations may depend upon the seriousness and circumstances of the violation, the degree of premeditation involved, and/or the student’s previous record of violations. Appeal of decision may be made to the representative of the department or school whose decision will be final.
Undergraduate Academic Regulations

Undergraduate Admission

Admission Information

Founded by the Society of Jesus in 1863, Boston College is dedicated to intellectual excellence and to its Jesuit, Catholic heritage. Boston College recognizes the essential contribution a diverse community of students, faculty, and staff makes to the advancement of its goals and ideals in an atmosphere of respect for one another and for the University’s mission and heritage. Accordingly, Boston College commits itself to maintaining a welcoming environment for all people and extends its welcome in particular to those who may be vulnerable to discrimination on the basis of their race, ethnic or national origin, religion, color, age, gender, marital or parental status, veteran status, disabilities, or sexual orientation.

Boston College seeks to maintain an undergraduate student body that represents a broad variety of abilities, backgrounds, and interests. Therefore, in selecting students, the Committee on Admission looks for demonstrated evidence of academic ability, intellectual curiosity, strength of character, motivation, energy, and promise for personal growth and development. Requests for financial aid do not affect decisions on admission. The Undergraduate Admission website provides further details on the application requirements and deadlines.

Admission from Secondary School

While specific courses are not required, the Office of Undergraduate Admission recommends that students pursue a strong college preparatory program that includes four units of English, mathematics, social studies, and foreign language, as well as four units of a natural science. Such a program provides a solid foundation for high quality college work, as well as a stronger application in a highly selective admission process.

Standardized Testing

- The SAT or
- The American College Test (ACT)

*For applicants to BC’s classes of 2026 and 2027, submission of SAT or ACT standardized test scores is optional. International students who speak English as a second language must still prove English language proficiency.

All submitted standardized test results are used in the admission process. Applicants are required to take all standardized tests no later than the October administration date of their senior year for Early Decision and by December of their senior year for Regular Decision.

The Committee on Admission will select the best combination of individual section scores when evaluating an application. International students for whom English is not their primary native language are required to submit scores from the Test of English as a Foreign Language (TOEFL), the International English Language Testing System (IELTS), or the DuoLingo English Test (DET). Students who score 650 or above in the SAT EBRW or 29 or better on the ACT English section may have this requirement waived.

Application Procedures

Regular Freshman Admission

Students applying to Boston College should submit the Common Application, the Boston College Writing Supplement and an $80 application fee no later than January 1. Both the Common Application and Boston College Writing Supplement are available on the Common Application website. Candidates are notified of action taken on their applications no later than April 1.

Early Decision

Early Decision I and II are binding programs for candidates who view Boston College as their unequivocal top choice institution. If admitted to Boston College through Early Decision, candidates must immediately withdraw applications to other institutions and enroll at Boston
College. Students are required to submit an Enrollment Confirmation Fee to Boston College within ten days of receiving their admission offer.

Competitive Early Decision candidates present academic credentials, extracurricular engagement, and personal qualities that fit the profile of currently enrolled Boston College students. Because Early Decision attracts a small, but competitive pool of candidates, the acceptance rate will be higher at Early Decision. Completed Early Decision I applications and the Common Application Early Decision Agreement form must be submitted no later than November 1 for consideration. Candidates will learn of the Admission Committee’s decision by December 15. Early Decision II applications are due by January 1 and candidates will learn of the Admission Committee’s decision by February 15.

Applying to an Undergraduate Division

All applicants must designate to which of the four undergraduate divisions they are making their application: Morrissey College of Arts and Sciences, Carroll School of Management, Lynch School of Education and Human Development, or Connell School of Nursing. Students are only considered for admission to the division to which they applied. Students may not change divisions following admission, but may be eligible to apply for an internal transfer to a new division after: one semester for those seeking a transfer to Morrissey or Lynch and two semesters to Connell or Carroll. Transferring internally is not guaranteed and selectivity varies by division; interested students should complete the Internal Transfer Form found on the Academic Forms page.

International Student Admission

International students are expected to submit the same credentials (transcripts, recommendations, standardized tests, etc.) as domestic applicants. All documents should be submitted in English. If the credentials must be translated, the original must be submitted along with the translation. All international students whose native language is not English are required to take the Test of English as a Foreign Language (TOEFL) exam, the International English Language Testing System (IELTS), or the DuoLingo English Test (DET). Minimum scores of 100 on the TOEFL iBT, 7.5 on the IELTS, or 130 on the DET are recommended.

Transfer Admission

Transfer admission applications are available to students who have successfully completed three or more transferable courses (9 credits minimally) at a regionally accredited college or university. Transfer students must have a minimum cumulative grade point average of 3.0 to be considered for admission. Competitive applicants typically have above a 3.5 cumulative grade point average. Students are encouraged to finish one full year of studies before seeking admission-in-transfer. Because a record of college achievement would not be available at the time of consideration, first-semester freshmen may not apply for admission to the term beginning in January.

All candidates for transfer admission should submit the Transfer Common Application and all other required forms along with the $80 application fee. All portions of the Transfer Application can be found on the transfer website at bc.edu/transfer.

NOTE: An Academic and Disciplinary Report must be submitted for every undergraduate institution attended full-time by the applicant. Additional copies of this form may be obtained from the Common Application website.

All supporting documents must be sent directly to the Boston College Office of Undergraduate Admission by the sending institution. Transcripts issued to students and photocopies will not be accepted. The deadline for submitting applications is March 15 for the fall and November 1 for the spring. Fall candidates will be notified of action taken on their applications no later than May 20. Spring candidates will be notified no later than December 15.

Please consult the transfer admission website for additional information about transfer policies.

Transfer of Credit

Boston College transfer credit policies are established by the Deans and Faculty of each undergraduate division. Course evaluations are completed by the Office of Transfer Admission. Any questions regarding the evaluation of courses, either before or after enrollment, should be directed to the Office of Transfer Admission.

At Boston College, transfer credit is established on a course-by-course basis. Transferable courses must have been completed at regionally accredited colleges or universities and must be similar in content, depth, and breadth to courses taught at Boston College. In addition, a
minimum grade of C- must have been earned. Boston College students must complete the following number of credit hours for graduation: Morrissey College of Arts and Sciences—120, Carroll School of Management—120, Lynch School of Education and Human Development—120, and Connell School of Nursing—117. A maximum of 60 credit hours will be allowed in transfer. The unit of credit at Boston College is the semester hour. Most courses earn 3 semester hours of credit. Lab sciences usually earn 4 semester hours of credit.

No credit will be granted for internships, field experiences, practica, or independent study.

Applicants seeking to have online courses accepted in transfer by Boston College should submit a syllabus for each course, including information about contact hours and exam requirements.

Grade point averages do not transfer with students. A new grade point average begins with the commencement of a student’s career at the University and reflects only work completed as a full-time undergraduate at Boston College.

For transfer students, courses taken during the summer prior to enrollment at Boston College should be approved in advance by the Office of Transfer Admission to avoid difficulty in the transfer of credits. For all incoming freshmen and currently enrolled students, all summer courses must be approved in advance by the appropriate deans.

**College credit courses taken in high school with high school teachers and other high school students cannot be used for credit. These courses may be assigned advanced placement units only if a corresponding College Board AP exam is taken and a qualifying score is earned.**

**Date of Graduation**

All undergraduate students are expected to spend four years enrolled as full-time students in order to earn a bachelor's degree.

Students generally may not accelerate the date of graduation stated in the acceptance letter, with the following exception: students who enter Boston College after three or four semesters at a school where the normal credit requirements are less than those at Boston College and who experience a loss of one semester in their status as a result. If students have attended only one school prior to Boston College and the loss of status is due solely to differences between academic systems, students will be allowed to make up their status and graduate with their class.

A transfer student's date of graduation is determined by the number of credits accepted in transfer and the number of Boston College semesters these satisfy. The normal academic load for undergraduates is five 3- or 4-credit courses per semester. Thus, students are expected to have completed 30 credits at the end of one year, 45 at the end of a year and a half, and 60 credits at the end of two years. In determining a transfer student's date of graduation, leeway of 6 credits is allowed without loss of status. For example, students completing 24–30 credits are accepted as first-semester sophomores.

**Residency Requirement**

The requirements for the bachelor's degree generally include a minimum of eight semesters of full-time enrollment, at least four semesters of which must be at Boston College.

Transfer students may need more than eight semesters in total in order to complete all the university’s degree requirements. As long as transfer students abide by all relevant University academic regulations, including at least four semesters at Boston College, they may seek to regain their original graduation-year status through course overloads and summer courses. In such cases, transfer students will not incur additional tuition charges for course overloads. Transfer students who seek to regain their original graduation date should consult with their associate dean to confirm that they are eligible to do so.

**Special Students**

Only those persons who wish to be enrolled as full-time day students are admitted by the Office of Undergraduate Admission. All other students wishing to attend Boston College on a part-time basis, for either day or evening classes, should contact the Dean of the James A. Woods, S.J., College of Advancing Studies, St. Mary's Hall South, Ground Floor, Boston College, Chestnut Hill, MA 02467.
Advanced Placement Units

There are a number of ways to earn advanced placement units at Boston College including qualifying scores on College Board Advanced Placement (AP) exams, International Baccalaureate exams, British A Level exams, French Baccalaureate exams, as well as results from the German Abitur, and the Swiss Maturité and Italian Maturità. Official results from all testing should be sent to the Office of Transfer Admission for evaluation. Qualifying scores will be assigned advanced placement units as detailed at [bc.edu/advancedplacement](http://bc.edu/advancedplacement).

College Courses Taken During High School

Advanced placement units can be earned for college courses taken during high school. For more information, visit [bc.edu/advancedplacement](http://bc.edu/advancedplacement).

Language Proficiency Requirements

Refer to the Language Proficiency Requirements section below.

Introductory Note on Academic Regulations

Academic Regulations are effective from September of the current academic year (2023–2024) except where a different date is explicitly stated. If there have been changes in the Academic Regulations and degree requirements since a student readmitted after sustained leave was last enrolled, the Academic Regulations in effect at the time of the student's readmission to full-time study will apply, unless the Academic Dean specifies otherwise in writing at the time of readmission.

Academic Grievances

Any student who believes he or she has been treated unfairly in academic matters should consult with the chairperson of the undergraduate or graduate department or his or her Academic Dean to discuss the situation and to obtain information about relevant grievance procedures.

Academic Record

A record of each student's academic work is prepared and maintained permanently by the Office of Student Services. While cumulative averages for academic majors are made available to undergraduate students who are currently enrolled, these averages are not maintained as part of a student's academic record. The student's semester averages and final overall cumulative average appear on the academic record. Student academic records are sealed at the time the degree is conferred. After this date changes may not be made, with the exception of errors or omissions.

Attendance

Students are expected to attend classes regularly, take tests, and submit papers and other work at the times specified by the professor on the course syllabus. Students who are absent repeatedly from class or practica will be evaluated by faculty responsible for the course to ascertain their ability to achieve the course objectives and to continue in the course.

Professors may include, as part of the semester's grades, marks for the quality and quantity of the student's participation in class.

Professors will announce, reasonably well in advance, tests and examinations based on material covered in class lectures and discussions, as well as other assigned material. A student who is absent from class on the day of a previously announced examination, including the final examination, is not entitled, as a matter of right, to make up what was missed. The professor involved is free to decide whether a make-up will be allowed.

A student who is absent from class is responsible for obtaining knowledge of what happened in class, especially information about announced tests, papers, or other assignments.
In cases of prolonged absence, the student or a family member should communicate with the student’s Academic Dean as soon as the prospect of extended absence becomes clear. The academic arrangements for the student’s return to classes should be made with the Academic Dean’s Office as soon as the student’s health and other circumstances permit.

Absences for Religious Reasons

Any student who is unable, because of his or her religious beliefs, to attend classes or to participate in any examination, study, or work requirement on a particular day shall be excused from any such examination, or study or work requirement, and shall be provided with an opportunity to make up such examination, or study or work requirement, that may have been missed because of such absence on any particular day. However, students should notify professors at the end of the first class meeting or at least two weeks in advance of any such planned observances, and such makeup examination or work shall not create an unreasonable burden upon the University. No fees will be charged and no adverse or prejudicial effects shall result to any student who is absent for religious reasons.

Audits

Undergraduate students may not audit a course with the exception of undergraduates in the Woods College of Advancing Studies.

Core Curriculum—Undergraduate University Core Requirements

The following course requirements comprise the Core Curriculum and are required for all students at Boston College in order to graduate. All Core courses must be 3 credits or more and cannot be taken pass/fail.

- 1 course in the Arts—Art, Art History, Film, Music, Theatre
- 1 course in Cultural Diversity—Unlike other Core requirements, Cultural Diversity may be fulfilled by a course above the Core level. It may simultaneously fulfill another requirement of the Core, a major, or minor.
  - A number of Difference, Justice, and the Common Good in the United States and Engaging Difference and Justice courses satisfy the Cultural Diversity requirement, and can be found here: bc.edu/core. Lynch students will take APSY1031. The CSON curriculum satisfies the Cultural Diversity requirement.
- 2 courses in History—one course pre-1800 (History I) and one post-1800 (History II)
- 1 course in Literature—Classical Studies, English, Romance Languages and Literatures, Eastern, German and Slavic Studies.
- 1 course in Mathematics—For CSOM students, one semester of Calculus (MATH1100 or higher) is required, and beginning with the class of 2022, CSOM students may take any course approved for Mathematics Core credit. For CSON students, MATH1180 Principles of Statistics for Health Sciences is the required Mathematics Core course.
- 2 courses in Natural Sciences—Biology, Chemistry, Earth and Environmental Sciences, Physics, Environmental Studies.
- 2 courses in Philosophy—one of each: Philosophy I and Philosophy II.
- 2 courses in Social Sciences—Sociology, Political Science, Psychology, Psychology in Education (APSY1030 and APSY1031 are required for Lynch students), or, Economics (beginning with the Class of 2023, ECON1101 is required for all CSOM students)
- 2 courses in Theology—one of each: Sacred Texts and Traditions and Christian Theology
- 1 course in Writing

Students are encouraged to use the Core to explore their interests, broaden their intellectual horizons, and discover more about themselves. Core courses are identified on the Course Information and Scheduling page (at bc.edu/myservices) as well as on the Core website (bc.edu/core). For more information on the University Core Curriculum please visit bc.edu/core.

University Core Curriculum at Boston College

As a Jesuit, Catholic University, Boston College shares a 450-year old tradition of concern for the integration of the intellectual, moral, and religious development of its students. The centerpiece of Jesuit education has always been a common curriculum that emphasizes the study of the defining works of the humanities, natural sciences, and social sciences.

Our ongoing efforts to renew the University Core Curriculum aim to ensure that engagement with the Core, “broadens the intellectual horizons of students; introduces them to the best of contemporary pedagogy, research, and teaching; promotes their integration of
knowledge, beliefs, and actions, and prepares them for lives of freedom, integrity, leadership, and service” (*The Vision Animating the Boston College Core Curriculum*, 2014). Guided by this vision, students completing the University Core Curriculum will:

- Demonstrate the critical, mathematical, informational, analytic, expressive, and creative skills that are essential tools of the educated person well-prepared for a meaningful life and vocation;
- Understand the major ideas and methods of inquiry of the scholarly disciplines that comprise the university and be able to use those methods of inquiry as beginning practitioners to address complex contemporary problems;
- Be able to identify and articulate the strengths and limitations of the disciplines and the relationship of the disciplines to one another, and demonstrate an understanding of the breadth and diversity of human knowledge as well as its openness to integration in more comprehensive wholes;
- Be conversant with, and able to discuss intelligently, enduring questions and issues that are fundamental to human inquiry and that have shaped the traditions from which the university has emerged;
- Demonstrate the ability to apply more than one disciplinary perspective to the same enduring question or complex contemporary problem;
- Be familiar with the scholarly exploration of religious faith and understand how faith and reason are related in the search for truth;
- Demonstrate the ability to examine their values and experiences and integrate what they learn with the principles that guide their lives; and,
- Be prepared, and disposed, to use their talents and education as engaged global citizens and responsible leaders in service of the common good.

For more information on University Core Curriculum at Boston College, please visit [bc.edu/core](http://bc.edu/core).

**Cross Registration**

**Woods College of Advancing Studies**

All full-time undergraduate students are limited to one Woods College of Advancing Studies (WCAS) course each semester. Freshmen may not enroll in any WCAS course.

WCAS courses can be used to fulfill elective requirements. Students must check with the appropriate department if they want to inquire about using about the possibility of using a Woods College of Advancing Studies course to fulfill a Core or major requirement. Any exception to this policy must be made with the appropriate department and Academic Dean’s approval.

**Boston Theological Interreligious Consortium**

The Boston Theological Interreligious Consortium (BTI), a consortium of theology faculty primarily in the Boston-Newton-Cambridge area, has as its constituent members the following institutions:

- Boston College’s Department of Theology
- Boston College’s School of Theology and Ministry
- Boston Islamic Seminary
- Boston University Graduate Program in Religion
- Boston University School of Theology
- Gordon-Conwell Theological Seminary
- Hartford International University for Religion and Peace
- Harvard Divinity School
- Hebrew College
- Holy Cross Greek Orthodox Seminary
- St. John’s Seminary and Theological Institute

This consortium offers complete cross-registration in several hundred courses, the use of library facilities in the nine schools, joint seminars and programs, and faculty exchange programs. This program is only available to graduate students in a Theology program or in the School of Theology and Ministry.
Students who want to cross register through the Boston Theological Interreligious Consortium should visit the Boston Theological Interreligious Consortium website to create an account and submit a cross registration request. Students are expected to consult with their advisor or department chairperson before cross registering. Graduate Theology majors may take up to half of their courses through BTI.

The Consortium

Under a program of cross registration, sophomores, juniors, and seniors may take one elective course during each fall and spring semester at Boston University, Brandeis University, Northeastern University, Regis College, or Tufts University if a similar course is not available at Boston College. Cross registration forms are available in the Office of Student Services, Lyons Hall.

Dean's List

The Dean's List recognizes the achievement of undergraduates, semester by semester. Students will be classified into two groups: First Honors (3.700–4.000) and Second Honors (3.500–3.699).

In order to be eligible for the Dean's List, students must earn at least 12 or more credits in courses evaluated with a letter grade, excluding the P (pass) grade, and receive a passing grade in all courses. Students who have withdrawn from or failed a course and students who have received an incomplete grade (see Grading section) will not be eligible for the Dean's List.

Degree Audit

A degree audit is a computer-generated analysis that enables an undergraduate or law student and his or her advisor to assess the student’s academic progress and unfulfilled requirements. Students in the Woods College of Advancing Studies can meet with an advisor to review their progress at any time.

The degree audit is a valuable tool for academic planning because it matches the courses that the student has taken with the requirements of his or her degree program or anticipated program. Students receive degree audits each semester prior to registration and have access to actual and simulated degree audits at bc.edu/myservices ("Degree Audit"). Students are responsible for completing all the requirements listed on the degree audit prior to graduation.

Degree with Honors

Academic honors printed in the Commencement program are based on averages at the end of the second semester senior year.

Starting with the class of 2021, the cumulative average for degrees with honors will be as follows:

- *summa cum laude* (with the highest honors)—3.9–4.0
- *magna cum laude* (with high honors)—3.8–3.899
- *cum laude* (with honors)—3.667–3.799

Prior to the class of 2021: The *summa cum laude* was awarded to the top 4.5 percent of the graduating class, *magna cum laude* to the next 9.5 percent, and *cum laude* to the next 15 percent.

Enrollment Status

Undergraduate Full-Time Enrollment Status

To be considered full-time, students must be registered for courses totaling at least 12 credits per semester. At least 9 of the credits must be in courses of 3 credits or more. Ordinarily, students should average 15 credits per semester with a target of completing 30 credits per academic year.

Woods College of Advancing Studies students must be enrolled in 12 credits to be considered full-time.
Undergraduate Part-Time Enrollment Status

Visiting or special students may enroll in one, two, or three courses each semester through the Woods College of Advancing Studies. Additional courses require the Dean's approval.

External Courses

After admission to Boston College, the only courses that a student may apply towards a degree will be those offered at Boston College in a regular course of study during the academic year. Any exceptions to this rule must be approved in writing by the Academic Dean before the courses are begun. Exceptions may be granted by the Academic Dean for official cross-registration programs, external summer study abroad and certain special study programs at other universities.

A student must earn a grade of C- or better to receive credit for any course taken at another university. In some instances, the Academic Dean may stipulate a higher grade. After the course has been completed, the student should request that the registrar at the host university forward an official transcript to the Office of Student Services at Boston College.

Final Examinations

The final examination schedule for most courses is set before classes begin. It is available to the public, and students are responsible for consulting it. A student who misses a final examination is not entitled, as a matter of right, to a make-up examination except for serious illness and/or family emergency. No student should make travel arrangements to return home which are at odds with his or her examination schedule. Students who schedule a departure without regard to their schedules risk failure in their final examinations.

Courses with multiple sections may have common departmental final examinations at a date and time determined by the Office of Student Services. Students with three final examinations scheduled for the same day are entitled to take a make-up exam at a later date during exam week. If one of the three exams is a common departmental exam, this is the exam that is taken at the later date.

In the Graduate School of the Morrissey College of Arts and Sciences, seminars and teacher-training courses may or may not have a semester examination at the discretion of the instructor.

No exams or final assignments are to be scheduled during the Study Days designated on the Academic Calendar.

Language Proficiency Requirements

The study of language, literature, and culture other than one's own enables the Jesuit-educated student to appreciate the world better, to seek commonalities, and honor cultural differences. Therefore, students in the Morrissey College of Arts and Sciences will demonstrate intermediate-level proficiency in a foreign or classical language in order to graduate from Boston College. Intermediate proficiency is defined as completing the fourth semester of a language. Students continuing a language previously studied will take one to four courses, depending on their placement. First-year students should begin/complete the language requirement during their first semester.

The Advanced Placement (AP) test scores below demonstrate intermediate-level proficiency at Boston College.

<table>
<thead>
<tr>
<th>Subject Test</th>
<th>AP Score</th>
</tr>
</thead>
<tbody>
<tr>
<td>Chinese</td>
<td>4</td>

</tr>
</tbody>
</table>

If you have taken the AP Test but have not yet received your score, take the placement test and register for the course recommended when you complete the test. When you receive the AP score, you may make necessary changes. If you have questions, speak with the language advisor at your registration session.

**Other Exams and Exam Score Minimums**

- British A levels: Languages other than English A/B/C levels
- International Baccalaureate: Higher level foreign or modern classical language 6 or 7
- General Certificate of Education: German A level
- DELE exams (Diplomas de Español como Lengua Extranjera): B1 or higher level
- Successful demonstration of native proficiency by documentation. Documentation of native proficiency ordinarily assumes evidence of post-elementary school education in the native language.

Fulfillment of the proficiency requirement by the examinations listed above does not confer course credit.

**Course Work Meeting Language Proficiency Requirement**

- Successful completion of the second semester of an intermediate-level Boston College modern or classical language course
- Successful completion of one Boston College modern or classical language course beyond the intermediate level

Students may not take foreign language courses on a pass/fail basis until they have completed the university’s language proficiency requirement. Language courses will count as Morrissey College of Arts and Sciences electives. Students with documented learning disabilities may be exempt from the foreign language requirement and should consult with the Connors Family Learning Center (bc.edu/connors).

**Grading**

The grading system consists of 12 categories, as follows: A, A-, B+, B, B-, C+, C, C-, D+, D, D-, and F. A is excellent; B is good; C is satisfactory; D is passing but unsatisfactory; F is failure.

Students who withdraw from a course after the drop/add period will receive a grade of W. The grade of W is not included in the calculation of the grade point average.

Students in the Connell School of Nursing must achieve a grade of C- or higher in designated nursing courses, or they will be required to retake the course.

With the approval of the Academic Dean of their school or college, students may be permitted to take courses for enrichment. Courses approved for enrichment only, may, with the approval of the relevant department, go toward fulfilling a Core, major, or minor requirement. However, grades for courses taken for enrichment are not computed into the cumulative average and are not counted toward the total course or credit requirement for graduation.
A student’s cumulative average is based on grades in courses taken in the full-time program at Boston College, plus other courses specifically approved for credit towards the degree by the Academic Dean. If a student fails a course, the course is not credited toward the degree, but the failing grade remains on the student’s transcript and a 0.0 is calculated into the student’s cumulative average. A failed course may be retaken for credit, with the new grade added to the GPA, but the original failure remains on the transcript and continues to be counted in the GPA. If a student retakes a failed course and fails it again, the course is again entered on the transcript and the grade is counted in the GPA. If a student retakes a course in which she or he has already received a passing grade, the repeated course is again entered on the transcript and the grade is calculated in the cumulative GPA, but the course is not credited toward the degree.

Grades will be posted at bc.edu/myservices ("Current Courses and Grades") at the close of each semester. Any student who believes there is a grade discrepancy on a semester grade should resolve the discrepancy with their professor within the first six weeks of the following semester.

Grading Scale

In computing averages, the following numerical equivalents for the twelve (12) letter grades are used:

- A 4.00
- A- 3.67
- B+ 3.33
- B 3.00
- B- 2.67
- C+ 2.33
- C 2.00
- C- 1.67
- D+ 1.33
- D 1.00
- D- .67
- F .00
- P No effect on GPA
- U No effect on GPA

Student Work and Assessment

The grading of student work serves as the primary means of individual evaluation; additionally, student work generally may be used to assess course, program, and the related, learning outcomes in support of continuous improvement.

Incomplete and Deferred Grades

All required work in any course must be completed by the date set for the course examination. A student who has not completed the research or written work for a course taken in the fall or spring semester or is absent from the course examination in either semester, may, with adequate reason and at the discretion of the instructor, receive a temporary grade of Incomplete (I). All such I grades will automatically be changed to F on March 1 for the fall, August 1 for the spring, and October 1 for the summer.

After that time, generally no further grade change will be allowed.

A faculty member may only assign a grade of J for a 2-semester course when the grade in the first semester is dependent on the grade issued at the end of the semester. The J grade has no GPA value. Instructors should assign a grade for each semester at the end of the second semester. Such courses may include an Internship, Dissertation Direction, or Student Teaching.

Pass/Fail

Sophomores, juniors, and seniors may elect to designate a course as pass/fail before the deadline. The deadlines are November 1 for the fall and April 1 for the spring. Only electives can be taken pass/fail. Courses being used to fulfill major, minor, Core, or corequisites cannot be taken pass/fail.
Second-semester freshmen who have been approved by their Academic Dean for an overload of a sixth course of 3 credits or more may take that course on a pass/fail basis, in which case the course may not be used to fulfill a major, minor, Core requirement, or corequisites.

No more than one course of 3 or more credits may be taken pass/fail in any semester. No student may take more than six pass/fail courses of 3 or more credits for credit toward a degree.

Courses in the Carroll School of Management may not be taken on a pass/fail basis. Departments may designate some courses as not available in general for pass/fail enrollment.

Students may not take foreign language courses on a pass/fail basis until they have completed the University's language proficiency requirement. Any foreign language course being used to fulfill a major, minor, Core, or corequirement cannot be taken pass/fail.

A student enrolled in a course on a pass/fail basis who earns a grade of D- or higher will receive a grade of Pass for the course.

**Pass/Fail Option for 1-Credit Courses in the Major**

At the discretion of the school or department, some 1-credit courses that are required for a major or minor may be offered on a pass/fail basis only (e.g., practica, performance).

**Grade Change**

Grade changes should be made only for exceptional reasons. For all students, the grades submitted by faculty at the end of each semester are considered final unless the faculty member has granted the student an Incomplete to provide time to finish his or her course work. Such Incompletes should only be granted for serious reasons, e.g., illness, and only when the student has been able to complete most of the course work but is missing a specific assignment, e.g., a final paper, an examination, etc. Incompletes are not to be granted to allow the student to complete a major portion of the course work after the end of the semester.

**Graduation, Advanced Standing, and Acceleration**

Students are expected to satisfactorily complete eight semesters of full-time study (excluding summer terms) in order to earn the bachelor's degree. The University awards degrees in May, August, and December of each year, although commencement ceremonies are held only in May. A diploma will not be dated before all work is completed. Students who graduate in December may participate in commencement exercises the following May. In order to ensure timely clearance, all students who plan to graduate should confirm their diploma names online.

With permission from the student’s Academic Dean, there are two ways the time to degree can be shortened (accelerated): (1) by qualifying for Advanced Standing or (2) by completing all requirements in less than 8 full-time semesters. Details of these two paths are given below.

**Advanced Standing**

*Beginning with the Class of 2024:* Students who earn a minimum of 30 Advanced Placement units may be eligible for Advanced Standing and complete their undergraduate studies after six semesters of full-time study. Ordinarily, Advanced Standing is for one full year only. Students interested in this option should be in touch with their Academic Dean no sooner than the completion of their first semester at BC. No decisions on Advanced Standing will be made prior to this time. Students seeking Advanced Standing must be able to complete all degree requirements by the proposed graduation date and be approved for Advanced Standing by the Academic Dean before the start of the third year of undergraduate study. No more than 30 Advanced Placement units may be credited toward the degree.

For further details, visit [bc.edu/advancedplacement](http://bc.edu/advancedplacement).

**Acceleration**
After being in residence for at least three semesters, and no later than the end of the drop/add period in the seventh semester, full-time undergraduate students may apply to their Academic Dean to accelerate their degree program by one semester. The following conditions apply:

- Summer courses intended for acceleration must be taken at Boston College.
- Any credits attempted over 15 in a semester used for acceleration are charged the per credit rate for the semester they are taken. Students receiving financial aid should consult their financial aid counselor to determine the impact of accelerating before officially applying for acceleration.
- Students transferring into Boston College with first-semester sophomore status or above are not eligible to accelerate their program of study.
- Students in the 4-4-2 program through Disability Services are not allowed to accelerate.
- Students who have elected to take Advanced Standing are not eligible to accelerate their graduation further.

Internal Transfers

Matriculated students wishing to transfer from one undergraduate college to another within Boston College should contact the Academic Dean’s Office of the school to which admission is sought. Students may be eligible to apply for an internal transfer to a new division after: one semester for those seeking a transfer to Morrissey or Lynch, two semesters to Connell, and three semesters to Carroll. Transferring internally is not guaranteed and selectivity varies by division; interested students should complete the Internal Transfer Form found on the Academic Forms page. WCAS students interested in transferring into Morrissey, Lynch, CSON, or CSOM must apply to do so through the Office of Undergraduate Admission.

Leave of Absence

leave of absence checklist

There may be times—due to personal, medical and/or other reasons—when an undergraduate student may need or want to take a leave of absence from the University. This policy describes the process to take and return from a leave of absence as well as addresses additional expectations and questions about the process.

Taking a leave of absence can be a difficult decision and the University wants to support students as they consider taking a leave. We encourage students to outreach to their Undergraduate Associate Dean of their school or college (MCAS, CSOM, LSEHD, CSON, or WCAS) to ask questions, discuss options, and be referred for additional support if needed.

Undergraduate students may take either a personal or medical leave. In order to request a leave of absence, students must complete the Withdrawal/Leave of Absence Form and indicate whether they are taking a personal or medical leave of absence. In addition, residential students must complete a housing cancellation form.

General Policies

Classes and Tuition

Students who take a personal leave of absence once classes have started will be withdrawn from those classes and receive "W"s on their transcript for those classes. Students may be eligible for a tuition refund depending on the date of the requested leave of absence.

In some cases, students may not be eligible for the full amount of their financial aid package if they do not complete the semester. Fees are non-refundable. Residential Hall charges and Meal Plans are canceled based on the day students move out and in accordance with Residential Life policies. Students may be eligible for a housing and/or meal plan refund depending on the date of the requested leave of absence; this schedule follows the tuition refund schedule. Please contact Residential Life for further details.

If a student takes a leave of absence during the 100% tuition refund period, any classes they are registered for will be dropped and not appear on transcripts.
**Registering for classes in future semesters:** generally, students cannot register for classes while on a leave of absence. Please see the readmission process section below regarding registering for future classes.

**On-Campus Housing**

Students cannot remain in University housing once they have taken a leave of absence and cannot participate in room selection while on leave. Students taking a leave should also complete a housing cancellation form through the Agora Portal: Agora > Other Services > My Reslife > Forms. Please see the Residential Life Conditions of Residency for details. Please see the readmission process section below regarding participating in the room selection process.

**Personal Leave of Absence**

A personal leave of absence may be taken for any reason. To request a personal leave of absence, students must complete the Withdrawal/Leave of Absence Form no later than the semester’s last date for a withdrawal from the University.

While on a leave of absence, students:

- Cannot take courses at BC or another university to advance their degree or maintain their original graduation date at Boston College without obtaining prior approval from their Undergraduate Academic Associate Dean’s Office.
- Will have their graduation term adjusted to reflect their new anticipated graduation date.
- Normally, a student returning from a leave of absence may not regain their original graduation date.
- May not participate in BC extracurricular activities.

**Medical Leave of Absence**

A medical leave of absence may be taken because of a student’s medically documented illness, including physical and/or mental health. Once your request and the supporting documentation have been reviewed, the Directors of UCS and UHS will make a recommendation to your academic dean regarding the medical leave of absence.

**Physical Health**

To request a physical health leave of absence, students must take the following steps.

- Complete the Withdrawal/Leave of Absence Form.
- Complete the Authorization for Release of Medical Information form and submit it to University Health Services (UHS).
- Request that a licensed health provider submit a statement to Boston College indicating
  - Your diagnosis;
  - a proposed treatment plan;
  - a recommendation for the anticipated length of the leave (when possible).

A licensed health provider must submit this statement to the Director of University Health Services (UHS).

Both the Withdrawal/Leave of Absence Form and your provider’s statement must be submitted to the Director of UHS no later than the semester’s last date for a withdrawal from the University. Permission for a medical leave after that deadline is rare and requires additional documentation.

**Mental Health**

To request a mental-health leave of absence, students must take the following steps.

- Complete and submit the online Withdrawal/Leave of Absence Form.
- Complete the Authorization to Release/Exchange Information form and submit it to University Counseling Services (UCS).
- Request that a licensed health provider submit a statement to Boston College indicating
  - your diagnosis;
A licensed health provider must submit this statement to the Director of Counseling Services (UCS).

Both the Withdrawal/Leave of Absence Form and your provider’s statement must be submitted to the Director of UCS no later than the semester’s last date for a withdrawal from the University. Permission for a medical leave after that deadline is rare and requires additional documentation.

Classes and Tuition

- Students approved for a medical leave of absence may also be eligible to receive a tuition credit. If a student is eligible for a tuition credit, it will be applied only during the semester they return as a full-time student to Boston College.
- The student’s bill for the semester in which they are taking the leave must be paid in full in order to be eligible for a tuition credit.
- Students are eligible to receive a tuition credit only once during their tenure at Boston College.
- Students must use a tuition credit within 3 years of the semester in which they took the leave. After that three year period, the tuition credit is voided. In NO case will money be refunded in lieu of the tuition credit.
- Tuition credits are not transferable to siblings.
- Tuition credits are not guaranteed and are granted based on the medical circumstances. Generally, students cannot register for classes while on a leave of absence. Please see the readmission process section below regarding registering for future classes.

While on a medical leave of absence, students:

- Cannot take courses at BC or another university to advance their degree or maintain their original graduation date at Boston College without obtaining prior approval from their Academic Associate Dean’s Office. In instances where students are deficient in credits, they may request prior approval from their Academic Associate Dean’s Office to take limited courses to address those deficiencies while on leave. Taking classes at the Woods College must be approved by the WCAS Associate Dean’s Office.
- Will have their graduation term adjusted to reflect their new anticipated graduation date. Normally, a student returning from a leave of absence may not regain their original graduation date.
- May not participate in BC extracurricular activities while on leaves of absence.

Requesting Readmission from a Leave of Absence

**When you can request readmission:** Students on a leave of absence must request to be readmitted no later than August 1 for the fall semester and December 1 for the spring semester. To make this request, students must complete the online form for readmission. This form will be transmitted to their Undergraduate Academic Associate Dean.

If students wish to participate in course registration, or room selection upon return from a leave, the deadlines are earlier. Students can not participate in the room selection process during the spring semester unless they are already readmitted for the fall semester.

</tbody>
</table>
Additional information regarding returning from a medical leave: when a student takes a medical leave of absence, the Directors of UCS/UHS will provide a recommended length of leave. Generally, Boston College recommends students on medical leave follow that recommendation to ensure that a student can obtain adequate treatment and demonstrate readiness to return.

For a physical health leave of absence: your licensed health provider must provide documentation regarding your readiness to return to BC to the Director of UHS. You must also submit a Release of Information for Return from Medical Leave.

For a mental-health-related leave of absence: your licensed mental health provider must submit the Readmission to Boston College from Medical Leave of Absence form to the Director of UCS. You must also submit a Release of Information for Return from Medical Leave and complete the student section as well.

The Director of UHS or UCS will collect documentation supporting the application for readmission. They may seek additional information and/or request a conversation with the student or treatment provider. The Director will make a recommendation to the appropriate Undergraduate Academic Associate Dean, whose decision will be final.

Majors, Minors, and Concentrations

Majors

A major is a systematic concentration of at least 30 credits taken in a given academic discipline that enables a student to acquire a more specialized knowledge of the discipline, its history, its methodologies and research tools, its subfields, and the areas of concern in which the discipline is presently involved. This is done by means of a hierarchical sequence of courses or appropriate distribution requirements. In order to earn a major, students must have at least 27 credits in the major program that are not used to fulfill requirements for another major or minor.

Minors

Morrissey College of Arts and Sciences

Some departments offer a departmental minor for students who wish to complement their major with intensive study in another area. A departmental minor consists of at least 18 credits. These must include one introductory level course and at least one upper-level course or seminar. In order to earn a departmental minor, students must have at least 15 credits in the minor program that are not used to fulfill requirements for another major or minor. Students carrying a double major are advised not to minor.

For a complete list of minors visit the Majors and Minors page.

Interdisciplinary minors in the Morrissey College of Arts and Sciences must consist of at least 18 credits and must include either a required introductory course or a concluding seminar or project. (Note: Some programs require both.) In order to earn an interdisciplinary minor, students must have at least 15 credits in the minor program that are not used to fulfill requirements for another major or minor or a Core requirement. The list and description of the interdisciplinary minors is available in the Morrissey College of Arts and Sciences section of this Catalog. Students choose courses for the minor in consultation with the director of the department's minor program.

Lynch School of Education and Human Development

Lynch School majors may minor in Special Education. Some Lynch School Elementary and Secondary Education majors are eligible to minor in Middle School Mathematics Teaching.

Further information on these minors is available in the Lynch School of Education and Human Development section of the University Catalog.

Connell School of Nursing

CSON students may pursue a Hispanic Studies minor, a Psychology minor, or a Medical Humanities, Health, and Culture minor specifically for Nursing students by contacting the Academic Dean, Undergraduate Nursing Program. Six courses (18 credits) are required to complete the minor. Full details are available on the CSON website.
Carroll School of Management

Students in the Carroll School of Management may select any minor offered by the Morrissey College of Arts and Sciences.

For a complete list of minors visit the [ Majors and Minors ] page.

Concentrations

Carroll School of Management (CSOM)

Concentrations, or areas of specialization, are required for students earning degrees from Carroll School of Management and are available to Carroll School of Management students only. Most concentrations require four courses beyond the Core. However, some require five. Students must complete a concentration in one of the following areas: Accounting, Accounting and Information Systems, Accounting for Finance and Consulting, Business Analytics, Economics, Entrepreneurship, Finance, General Management, Information Systems, Management and Leadership, Managing for Social Impact and the Public Good, Marketing, or Operations Management. Students declare a concentration second semester sophomore year or during the junior year.

Overloads

The standard semester course load for undergraduates is five 3-credit courses and a maximum of 20 credits, including labs and other 1- or 2-credit courses. Students are eligible to overload if they have earned at least a 3.0 overall cumulative GPA or a 3.0 GPA in the semester immediately prior to the one for which the overload is sought, in which case they may register online for a sixth course of 3 credits or more and a maximum of 24 credits, including labs and other 1- and 2-credit courses, starting on the Wednesday before the first day of classes for the semester.

Students are not permitted to take a sixth course of 3 credits or more during their first semester at Boston College. Second-semester freshmen who wish to overload with a sixth course of 3 credits or more must obtain permission from their Academic Dean.

Students with an overall cumulative GPA between 2.0 and 3.0 may, under exceptional circumstances, be allowed by their Academic Dean to enroll in a sixth course.

Students in a Woods College of Advancing Studies degree program may take a maximum course load of three courses per semester. Authorization for one additional course will be given only if the student has completed three courses in the previous semester, each with a grade of B- or better. Additional courses require authorization. Courses taken without reference to this regulation do not advance a student's Woods College degree program.

Readmission

Students who desire readmission must initiate the process in the Office of the appropriate Academic Dean of their school or college. Applications for readmission should be made at least four weeks before the start of the semester in which the student seeks to resume study. The appropriate Academic Dean will then make the decision about readmission, after careful consideration of the best interests of both the student and the University.

In instances where a sustained period of time (more than one year) has elapsed since a student was last enrolled, the appropriate Academic Dean in consultation with the appropriate representative of the student’s department or program will identify the academic requirements, if any, that must be completed after readmission and before awarding the degree. Factors that will determine these requirements include, but are not limited to: the currency of the student’s knowledge in the student’s proposed academic major(s); the pertinence of courses completed at Boston College to current degree and licensure requirements; any academic work completed elsewhere that is relevant to degree and licensure requirements; and the length of the student’s absence.

If there have been changes in the Academic Regulations and degree requirements since a student readmitted after sustained leave was last enrolled, the Academic Regulations in effect at the time of the student’s readmission to full-time study will apply, unless the Academic Dean specifies otherwise in writing at the time of readmission.
Satisfactory Academic Progress

The requirements for Satisfactory Academic Progress are specified in the academic regulations for each school.

Study Abroad—Office of Global Education

Boston College global programs are open to BC undergraduate students who meet the requirements for study abroad as outlined by their Academic Dean. In order to be eligible for admission, students must be in good academic standing with a GPA of 3.0 or higher and have a clean disciplinary record. Final approval is at the discretion of the OGE, deans, and Student Affairs. Many programs have additional requirements and a selective application process; students should consult with the OGE for specific admission requirements. Boston College approves an equal number of students for study abroad in the fall and spring semesters, and not all applicants can be approved for their preferred term. Students should plan accordingly.

Students remain subject to the academic policies of their home department as well as the host institution. They are expected to register for a full course load as defined by BC and the host university in order to earn a full semester’s worth of credit.

Courses taken abroad which meet BC academic standards automatically count as general elective credit towards graduation. Students wishing to fulfill major, minor, or University Core requirements abroad may do so with the approval of the appropriate department(s) via a Student Services form.

A student’s enrollment in a program of study abroad approved for credit by the home institution may be considered enrollment at the home institution for the purpose of applying for assistance under the Title IV, HEOA programs.

Summer Courses

As of summer 2018, summer courses taken at Boston College count for academic credit and all grades earned are factored into students’ GPA as regular BC courses. Courses may satisfy Core or major/minor requirements as specified by the department, and will count toward the 120 credits required for the degree. A maximum of 4 courses (12–13 credits total) can be taken in the summer.

BC Summer Courses Abroad

BC summer courses taken abroad through the Office of International Programs (OIP) are factored into students’ GPA as regular BC courses, and count for academic credit.

Summer Courses at Other Institutions

Summer courses taken at another university—local, national, international—, must be pre-approved from the Academic Dean using the Course Approval Form. Students will also need departmental approval if they want the summer course to fulfill a Core, language, major, or minor requirement. These summer courses may count for academic degree credit and grades will factor into the GPA if students have credit deficiencies. Students will receive enrichment credit if there is no prior credit deficiency. Enrichment credit means that the course may satisfy Core or major requirements with department permission, but will not count toward the 120 credits required for the degree. Courses, grades, and credits will be listed on the transcript but will not be calculated into the GPA. With the approval of the Academic Dean, students who incur deficiencies may use enrichment courses in previous summers to make up for deficiencies incurred subsequently.

Transcripts

All current students submit requests for academic transcripts at bc.edu/myservices ("Transcript Request and Status"). Alumni should visit bc.edu/transcript for direction on the transcript request process. Students and alumni will be directed to the National Student Clearinghouse transcript fulfillment website as our vendor for transcripts. For more information visit bc.edu/transcript.

Requests are usually processed within 48 to 72 hours of receipt.
Transcript/Diploma Holds

Diplomas will not be issued, nor transcript requests honored, for any student with an outstanding financial obligation to the University. The same policy applies to any student who does not complete the required loan exit interview.

Transfer of Credit

The unit of credit at Boston College is the semester hour. Most courses earn 3 semester hours of credit. Lab sciences usually earn 4 semester hours of credit. Courses in transfer with credit values ranging from 1–4 semester hours of credit will be considered on a course by course basis. A maximum of 30 credit hours for a first semester sophomore, 45 for a second semester sophomore and 60 semester hours of credit for an incoming junior will be allowed in transfer.

No transfer credit will be granted for internships, field experiences, practica, or independent study.

Grade point averages do not transfer with students. A new grade point average begins with the commencement of a student’s career at the University and reflects only work completed as a full-time undergraduate at Boston College. A new grade point average also begins when students transfer from the Woods College of Advancing Studies to one of the full-time undergraduate schools or when a full-time undergraduate transfers to the Woods College of Advancing Studies.

Courses taken at other institutions during the summer prior to enrollment at Boston College must be approved in advance by the Office of Transfer Admission. Courses taken through the Boston College Summer Session during the summer prior to enrollment must be approved by the appropriate Academic Dean.

Once a student matriculates, courses may not be taken concurrently at other institutions for credit or enrichment in a Boston College undergraduate degree program.

University Communication Policies and Student Responsibilities

Official communications of the University with its currently-enrolled students, including notices of academic and administrative matters and communications from faculty and administrative staff, may be sent via postal service, campus mail, or e-mail. To assure that these communications arrive in a timely manner, all enrolled students have the following responsibilities:

Postal service and Campus mail: For purposes of written communication, the student’s local and permanent addresses on record at Student Services will be regarded as the student’s official local and permanent residences. All students have a responsibility to provide both local and permanent mailing addresses, and to enter corrections at bc.edu/myservices ("Update Your Address/Phone/Emergency Contact Information") if the addresses are not accurate in university records. Students should review their address record for accuracy at the beginning of each semester, and again soon after submitting any corrections.

Students who are studying abroad have a responsibility to provide their local international address via a link on the Office of International Programs website.

E-mail: The University recognizes and uses electronic mail as an appropriate medium for official communication. The University provides all enrolled students with Boston College e-mail addresses, as well as access to e-mail services from computer stations at various locations on campus. All students are expected to access their e-mail accounts regularly, to check for official University communications, and to respond as necessary to such communications.

All student responses to official e-mail communications from the University must contain the student’s Boston College e-mail address in the “From:” and “Reply To:” lines, and should originate from the student’s Boston College e-mail address, to assure that the response can be recognized as a message from a member of the University community.

Students may forward their e-mail messages from their Boston College e-mail address to non-university e-mail systems, if they wish. In such cases, however, students shall be solely responsible for all consequences arising from such forwarding arrangements, including any failure by the non-university system to deliver or retain official University communications. Students should send test messages to and from their University e-mail account on a regular basis, to confirm that their e-mail service is functioning reliably.
University Degree Requirements

The requirements for the bachelor's degree in the undergraduate day colleges are the completion with a satisfactory cumulative average (at least 1.5 in the Carroll School of Management and at least 1.667 in all other schools) and credit requirements which are distributed as follows:

- Morrisey College of Arts and Sciences students must accumulate at least 120 credits with 96 of the required 120 credits in departments of the Morrisey College of Arts and Sciences. Additional courses may be chosen from the offerings of the professional schools. Students in the Morrisey College of Arts and Sciences complete the Core curriculum, a major of at least 30 credits, and the language proficiency requirement distributed over eight semesters of full-time academic work.
- Carroll School of Management students complete 120 credits for graduation. All Lynch School of Education and Human Development majors complete 120 credits distributed over eight semesters of full-time academic work.
- Connell School of Nursing students complete at least 117 credits distributed over eight semesters of full-time academic work.

Withdrawal from a Course

Undergraduates may drop or add a course(s) online during the first seven class-days of the semester. Undergraduates only may drop a course until October 1, in the fall and February 15, in the spring semesters in their Academic Dean’s office. Students may not drop below 12 credits in a semester.

After the extended drop period, undergraduates who withdraw from a course will have a "W" recorded in the grade column of their academic record. A grade of W has no effect on the GPA. A student may re-take a course for which a W has been recorded, in which case both the W and the subsequent grade are entered on the academic record.

To withdraw from a course all students must go to the Academic Forms page of the Student Services website, submit the online form that will them be routed, to the Office of the Academic Dean for their school for review. Students will not be permitted to withdraw from courses after the published deadline. Students who are still registered at this point will receive a final grade for the semester.

Withdrawal from Boston College

Students who wish to withdraw from Boston College in good standing are required to submit an online Withdrawal Form, found on the Academic Forms page of the Student Services website, which will be routed to the appropriate Academic Dean’s Office for processing. In the case of students who are dismissed for academic or disciplinary reasons, the Academic Dean will process the withdrawal.

University (Senior) Awards and Honors

Morrisey College of Arts and Sciences

*Frank J. Bailey, Sr. Award*
An award, the gift of the Bailey family, in memory of their father Frank J. Bailey, given to the graduating senior with a distinguished academic record in the field of Middle Eastern and Islamic Studies.

*John Bapst, S.J., Philosophy Award*
An award in honor of John Bapst, S.J., given to the student whose overall performance in philosophy courses has been outstanding.

*J. Robert Barth, S.J., Award for Excellence in the Arts*
An award in honor of the Dean of the Morrisey College of Arts and Sciences (1988–1999), who established and nurtured departments and programs in the arts. This award is presented annually to a senior who has made outstanding contributions to Boston College in the fine or performing arts.

*Andres Bello Award in Spanish*
An award offered by Dr. Philip C. Garber, Consul of Chile in Boston, given to a senior who has excelled in Spanish.
George F. and Jean W. Bemis Award
An award in memory of George Fisher Bemis (1899–1971) and Jean Wilmot Bemis (1903–1987) of Milton, MA, a devoted couple quietly of service to others and with whom it was a delight to work. The award seeks to single out a member of the senior class distinguished for service to others.

Albert A. Bennett Award
In honor of Albert A. Bennett (1888–1971), an accomplished mathematician, distinguished teacher, and a Visiting Professor of Mathematics at Boston College from 1962–1971. This award is given to a member of the senior class, who demonstrates a high level of mathematical achievement and who, in their undergraduate years, has shown interest in or a desire for a career in teaching.

Wendy Berson Language Award
An award, the gift of Mrs. Solomon Berson in memory of her daughter, Wendy Berson, given to the senior who demonstrates excellence in the area of Romance Languages in general and, specifically, the ability to speak one or more languages with great expertise.

Laetitia M. Blain Award for Excellence in Musical Performance
An award named in honor of Laetitia M. Blain, Musician-In-Residence at Boston College (1975–2000). This award is given annually to a senior who has contributed to the musical life on campus in a significant and outstanding way.

Alice E. Bourneuf Award
In honor of Alice E. Bourneuf, Professor of Economics at Boston College (1959–1977), this award is given to an outstanding senior in Economics based on achievement in both major and non-major courses, strength of curriculum, quality of written and creative work, and attitude toward the study of Economics.

Francis A. Brick Award
An award, the gift of Mrs. Francis A. Brick, in memory of her husband, Francis A. Brick, LL.D. 1896, given to the student who has been outstanding in character, loyalty, leadership, and scholarship during their four years at Boston College.

The Dr. Donald S. Brown Award
The Donald S. Brown Award was established in honor of the former director of the Office of AHANA Student Programs from 1978–2005. This award honors a senior who throughout their undergraduate career has made extraordinary contributions to the Boston College community in ways that have benefited AHANA students in the areas of leadership, service and academic development.

Donald S. Carlisle Award
An award established by the Department of Political Science in memory of Donald S. Carlisle, Professor of Political Science at Boston College (1968–1997), given each year to a graduating senior for outstanding achievement in political science.

Normand Cartier Award
The Normand Cartier Award is given to a senior who is a member of the Lambda Psi Chapter of the Pi Delta Phi National French Honors Society and has demonstrated leadership in promoting French and francophone literature and culture in the Boston College community.

Brendan Connolly, S.J., Award
An award in honor of Brendan Connolly, S.J. (1913–1974), Director of Libraries at Boston College (1959–1974), a witty and deeply loyal man who loved books and respected learning. This award is made to a member of the senior class who is distinguished for the same characteristics.

Matthew Copithorne Scholarship
An award given to a graduate, exhibiting qualities of character, industry, and intelligence, and plans to do graduate study at Harvard or MIT.

Cardinal Cushing Award
An award donated by Francis Cardinal Spellman, in honor of Richard Cardinal Cushing, given annually to an undergraduate student for the best writing in fiction published in a Boston College undergraduate publication.
Joseph G. and Margaret M. Dever Fellowship
Founded by Robert Muse, Esq. ’42, in honor of his classmate, Joseph Dever, the cash grant is given to a graduating senior who shows promise of a career in writing.

John D. Donovan Award
An award named in honor of John D. Donovan (Boston College, A.B. 1939; M.A. 1941; Harvard, Ph.D. 1951), Professor of Sociology (1952–1988). The Department of Sociology presents this award to the undergraduate student who submits the best paper written for a course in sociology during the previous year.

Patrick Durcan Award
An award, the gift of Mrs. J. Greer, in memory of her brother, Rev. Patrick Durcan, given to the student whose overall performance in history courses has been outstanding.

Figruto Family Award for Scholarly Achievement in Italian
An award presented in honor of Joseph Figurito, Professor of French and Italian at Boston College for over half the twentieth century, to a senior for scholarly achievement in Italian.

Edward H. Finnegan, S.J., Award
An award in memory of Rev. Edward H. Finnegan, S.J., given to the student who has best exemplified in their four years at Boston College the spirit of the College motto, “Ever to Excel.”

Mary A. and Katherine G. Finneran Commencement Award
An award, the gift of Misses Elizabeth and Theresa Finneran, given to the student who has achieved outstanding success in studies, while also devoting time and talents to other activities for the enrichment of the College and student life.

William A. Gamson Award
An award established by the Department of Sociology in honor of William A. Gamson, given each year to a graduating senior for outstanding academic achievement in sociology.

Thomas I. Gasson, S.J., Award
An award in honor of Thomas I. Gasson, S. J., President of Boston College (1907–1914), given to the graduating senior with a distinguished academic record over a four-year period.

General Excellence Award
A gift of the Philomathia Club, given to the student who has achieved general excellence in all branches of studies during their entire four years at Boston College.

Giffuni Prize
An award sponsored by the Giffuni Family Fund in honor of Vincent Giffuni (BC ’65), given to a senior who has written an outstanding thesis in economics.

The George J. Goldsmith Award
An award given in memory of longtime Physics Department faculty member George J. Goldsmith, who is remembered for both his scholarship and his selfless dedication to the students of Boston College, this award is given annually to a graduating physics major in recognition of excellence in academic achievement and research.

John L. Heineman Award
This award was established by the History Department in honor of the late John L. Heineman, a challenging and inspirational colleague (1963–2003), a Renaissance man, and a master teacher. It is given each year to a graduating senior in recognition of exceptional historical scholarship.

Janet Wilson James Essay Prize
An award in memory of Professor Janet Wilson James, historian and feminist scholar, given to a senior distinguished for scholarship in women’s studies.
The David A. Karp Award
An award in honor of David A. Karp, Professor of Sociology from 1971–2012. While leading the Sociology Honors Program, he inspired generations of students to strive for insightful sociological listening and beautiful writing that is the hallmark of his work.

William A. Kean Memorial Award
An award, the gift of James M. Kean in memory of his brother, William A. Kean ’35, given to that member of the graduating class deemed the outstanding English major.

Bishop Kelleher Award
An award donated by Francis Cardinal Spellman in honor of The Most Reverend Louis F. Kelleher, given to an undergraduate student for the best writing in poetry published in a Boston College undergraduate publication.

William J. Kenealy, S.J., Award
An award in memory of the late William J. Kenealy, S.J., Dean of the Boston College Law School (1939–1956), whose life was distinguished by a passion for social justice. This award is given to the graduating senior who has been distinguished in both academic work and social concern.

T. Frank Kennedy, S.J., Award for Excellence in the Academic Study of Music
An award given in honor of the co-founder, long-term chair, and guiding spirit of the Music Department to an outstanding senior who has shown consistent excellence in the academic study of Music.

Joseph M. Larkin, S.J., Award
An award presented annually to the senior member of the Boston College Dramatics Society who has most clearly exhibited the qualities of dedication and integrity exemplified by the life and career of Rev. Joseph M. Larkin, S.J.

John Henry Lawton Award
An award presented in memory of John Henry Lawton, to the member of the senior class who has shown outstanding scholarship in the Department of Communication.

Allison R. Macomber, Jr., Award in the Fine Arts
Two awards established and supported primarily by gifts from the Horbach Fund for outstanding work in the Fine Arts in honor of Allison R. Macomber, Jr., Artist-in-Residence at Boston College, 1963–1979, whose presence and teaching opened the eyes not only of his students but of the entire community to the greatness and wonders of art.

J. Paul Marcoux Award
An award in honor of J. Paul Marcoux, Professor of Theater at Boston College (1964–1994), presented annually to a senior Theater major for excellence and growth, both academically and artistically, over their four years at Boston College.

Richard and Marianne Martin Award
In memory of Richard and Marianne Martin for their dedication to the ideals of art, and for their unstinting devotion to the goals and values of Boston College. Two awards are given by the Boston College Friends of Art; one to an outstanding scholar in art history, the other to a student who excels in studio art.

Denis A. McCarthy Award
The Denis A. McCarthy Award is given to an undergraduate for outstanding work in creative writing.

John McCarthy, S.J., Award
An award established in memory of Rev. John McCarthy, S.J., a most beloved scholar, faculty member, and Dean in the Morrissey College of Arts and Sciences, for those whose Scholar of the College projects are deemed most distinguished in the Humanities, the Social Sciences, the Natural Sciences and in History.

Gail A. McGrath Award
An award presented in memory of Dr. Gail A. McGrath, a beloved professor of Communication at Boston College (1966–1997), to a member of the senior class pursuing a graduate degree in Communication.
Albert McGuinn, S.J., Award
This award is in memory of the late Albert McGuinn, S.J., long-time Chairman of the Chemistry Department at Boston College, and presented to the senior candidate for the Bachelor of Science degree. The recipient has most successfully combined proficiency in a major field of study with achievements, either academic, extracurricular, or a combination of both, in the social sciences or humanities.

Henry J. McMahon Award
In memory of Henry J. McMahon, faculty member and Associate Dean at Boston College (1946–1984). This award is given annually to the graduating senior of the Morrissey College of Arts and Sciences who has been accepted at a law school and who has been distinguished by scholarship, loyalty, and service to the College.

The John J. Neuhauser Award in Computer Science
An award given to the senior in the Morrissey College of Arts and Sciences who has demonstrated outstanding achievement in computer science.

John F. Norton Award
An award in honor of John F. Norton ’22, Boston College professor (1926–1965), given to the student who best personifies the tradition of humanistic scholarship.

Cardinal O’Connell Theology Award
An award, the gift of the late William Cardinal O’Connell, given to the student whose overall performance in theology courses has been outstanding.

The Thomas H. O’Connor Award
An award established by the History Department in honor of the late Thomas H. O’Connor, who taught in the department from 1950–1999, and who also served as Boston College University Historian. It is given each year to a graduating senior in recognition of outstanding achievement in the study of American history.

Princess Grace of Monaco Award
An award offered by Dr. Helene Day, Consul of Monaco, and Dr. Philip C. Garber, Consul of Chile in Boston, given to a senior who has excelled in French.

E. Paul Robsham Distinguished Service Award
An award given annually by the Theater Department to the graduating senior, who though seldom sharing the spotlight, has worked with exceptional professionalism, dedication, creativity and enthusiasm behind the scenes to bring the benefits of the theater to the Boston College community.

Paul J. Sally, Jr., Award
A cash award, in honor of Paul J. Sally, Jr., ’54, ’56, Professor of Mathematics at the University of Chicago, a highly esteemed mathematician well known for his many contributions to mathematical endeavors at all levels. This award is bestowed on senior mathematics majors who demonstrate excellence in mathematics coursework of a particularly demanding nature.

Secondary Education Minor Award
This award is conferred on a student in the Morrissey College of Arts and Sciences who has completed the Secondary Education Program within the Lynch School of Education and Human Development and has achieved distinguished success as a student teacher.

Harry W. Smith Award
An award, the gift of the Smith Family, in memory of Harry W. Smith, a leader in corporate and community philanthropic work, to honor a member of the senior class who has used personal talents to an exceptional degree in the service of others.

Dr. Joseph R. Stanton, M.D., ’42 Award
This award is a gift from Stanton Medical Associates in memory of Joseph Stanton, M.D. ’42. The award is intended for a graduating senior who has been accepted by a medical school and who has been outstanding in character, loyalty, leadership, and scholarship at Boston College.
Dr. Joseph S. Stanton Memorial Award
An award, the gift of Doctors Richard Stanton ’38 and Joseph R. Stanton ’42 in memory of their father, Joseph Stanton who was also a doctor. The award is given to the student who has been accepted to a medical school and who has been outstanding in character, loyalty, leadership, and scholarship at Boston College.

Tully Theology Award
An award given in memory of the late Dennis H. Tully, given to the student who has written the best paper on a theological subject.

Max Wainer Award
An award, the gift of Anneliese K. Wainer, Ph.D., ’72, in honor of her husband, Max Wainer, given annually to the senior who is deemed the outstanding student in Classics.

Lynch School of Education and Human Development

Charles F. Donovan, S.J., Award
Presented to a member of the senior class in honor of Father Donovan, founding Dean of the School. The recipient exhibits superior leadership, academic, and innovative qualities, and demonstrates excellence in professional and personal commitment, with a genuine concern for the needs and values of others.

General Excellence Award
Presented to a senior who has at the same time manifested outstanding achievement in all courses of study during four academic years and qualifies for teaching licensure.

Saint Edmund Campion Award
Presented for excellence in an academic major.

Reverend Edward H. Finnegan, S.J., Nominee Award
Presented to the Lynch School nominee for the top undergraduate prize given to the graduating senior who best exemplifies the qualities of excellence, humility, and service to others and who best epitomizes the University’s motto, "Ever to Excel."

Dr. Marie M. Gearan Award
Presented in honor of Professor Gearan, a member of the original faculty and first Director of Student Teaching, to a member of the senior class for outstanding academic achievement, campus leadership, and distinguished success as a student teacher.

Saint Richard Gwyn Award
Presented to a member of the senior class for outstanding promise as a secondary teacher.

Reverend Henry P. Wennerberg, S.J., Award
Presented in honor of Father Wennerberg, first spiritual counselor in the School, to a member of the senior class who is outstanding for participation and leadership in school and campus activities.

John J. Cardinal Wright Award
Presented in honor of Cardinal Wright to that senior who has shown expert use of creativity and imagination in the area of motivation, and at the same time is dedicated to high educational ideals.

John A. Schmitt Award
Presented to a member of the senior class who, as Professor Schmitt did, has consistently demonstrated compassion for fellow human beings, integrity in dealings with others, diligence in his or her profession, and courage in the pursuit of what he or she believes to be right.

Mr. and Mrs. Vincent P. Roberts Award
Presented to a member of the senior class who is distinguished for loyalty to the ideals and purposes of the Lynch School.

James F. Moynihan, S.J., Award
Presented in honor of Father Moynihan, first chair of the Psychology Department and Professor of Psychology in Education for many years, to
a student in the Applied Psychology and Human Development Program, who has shown superior scholarship, contributed creatively to the well-being of others, and has manifested dedication and commitment to the enhancement of the human development process.

Patricia M. Coyle Award
Given to the graduating senior in Elementary Education who is a clear thinker in the field, able to translate the theories of child development and learning into the practice of teaching young children with enthusiasm and love, and a person who is a thoughtful, reflective teacher, perceptive and sensitive to the needs of children.

Karen E. Noonan Award
Given to the graduating senior in Elementary Education who has the qualities of a "natural" teacher of young children; a person who can communicate warmth and a sense of excitement for learning; a person who loves the exhilaration of working with challenging students, and making each child in the classroom feel important and unique.

Cynthia J. Sullivan ’79 Memorial Achievement Award
Presented to members of the junior class who have achieved outstanding academic achievement; demonstrated qualities of loyalty, generosity of self, and integrity; and show an appreciation for the arts.

Cynthia J. Sullivan Award Winner
Presented to last year’s winner of the Cynthia J. Sullivan Memorial Achievement Award, this stipend is intended to fund graduate study or post-graduate travel.

Reverend John Christopher Sullivan, S.J., Award
Presented in honor of Father Sullivan, first Associate Dean in the School of Education, to a member of the senior class who, as Father Sullivan did, exhibits cheerfulness, creativity, enthusiasm, and high energy; who demonstrates respect for individuals and is supportive of others; who shares with them the gift of personal care, regard, individual attention, warmth, and respectful sense of humor; and whose personality and actions reflect an appreciation of the dignity and value of every individual.

Bernard A. Stotsky/Professor John Eichorn Prize
Awarded to a student who has demonstrated excellence in the area of special education at the undergraduate level and does a practicum or pre-practicum at the Campus School as part of an academic program of study in the Lynch School.

Gretchen A. Bussard Award
Presented to a member of the junior class in the Applied Psychology and Human Development Program who has used what he or she has learned in the classroom to improve the lives of others.

Albert A. Bennett Award
Presented by the Morrissey College of Arts and Sciences, in honor of Professor Bennett (1888–1971), visiting professor of mathematics at Boston College 1962–1971, to a member of the graduating class who demonstrates a high level of mathematical achievement and who has shown interest in or a desire for a career in teaching.

Secondary Education Award
Given to the student in the Morrissey College of Arts and Sciences who has completed the Secondary Education Program and has achieved distinguished success as a student teacher.

Lynch School Awards
Presented to graduating seniors for academic excellence and outstanding performance in a variety of areas.

Carroll School of Management

Thomas I. Gasson, S.J., Award
Founded by Boston College for general excellence in all courses of study during the four years in the Carroll School of Management.

The Edward H. Finnegan, S.J. Memorial Award Nominee
The top commencement honor which recognizes a senior who best exemplifies the University's motto: "Ever to Excel."
The James Gips Outstanding Student in Information Systems Award
Awarded to the student who has demonstrated outstanding achievement in the field of Information Systems.

The John B. Atkinson Award
Founded by John B. Atkinson for excellence in all courses studied in the field of Operations Management.

George Aragon Outstanding Student Award
For an outstanding senior concentrating in Finance. The selection is made by the faculty committee of the Finance Department.

The Edgar F. Huse Memorial Award
An award presented annually by the faculty for excellence in Management and Leadership.

The Hutchinson Memorial Award
Presented by the Boston chapter of the American Marketing Association to a Marketing student.

The Raymond F. Keyes Service Award
Awarded to a senior concentrating in Marketing who has demonstrated a desire to provide service to the nonprofit community.

Charles W. Lyons, S.J., Award
Founded by Boston College for excellence in all courses studied in the field of Accounting.

The Patrick A. O’Connell Finance Award
Founded by Patrick A. O’Connell for excellence in all courses studied in the field of Finance.

The Patrick A. O’Connell Marketing Award
Founded by Patrick A. O’Connell for excellence in all courses studied in the field of Marketing.

The Eric Allen Serra Award
Established in 1993 by the friends of Eric Allen Serra and awarded to a graduating senior who is actively involved in the BC community and best represents the attributes for which Eric is remembered by his friends.

The James E. Shaw Memorial Award
An award given to a senior in the Carroll School of Management who has been accepted to a recognized Law School. The student demonstrates a strong personal interest in the welfare of fellow students.

The Rev. Stephen Shea, S.J., Award
Awarded to the senior who has attained the highest average in all courses in Philosophy during four years in the Carroll School of Management.

The James D. Sullivan, S.J., Award
Awarded to a senior outstanding in character and achievement.

Outstanding Student in Business Analytics Award
Awarded to the senior who demonstrates excellence in all courses studied in the Business Analytics discipline.

Dean’s Letter of Commendation
Awarded to a senior who is recognized for exemplary accomplishment in the Carroll School community.

Connell School of Nursing

Alumni Award
Established by the alumni to honor a nursing student for general excellence in both the classroom and in the wider Boston College community.
Marie S. Andrews Clinical Performance Award
Established by the faculty to honor the student who has demonstrated, through performance across the clinical education portion of the curriculum, sensitivity to the needs of patients, respect for dignity and “wholeness” of the patient, and outstanding ability to deliver quality nursing care.

Cathy Jean Malek Award
Established by the faculty to honor the student who is a role model for his or her fellow classmates and underclassmen with consistent professionalism and integrity.

William F. Connell Award Undergraduate Nominee
Established by the faculty to honor one graduating student who best demonstrates the attributes of leadership, loyalty, service, achievement, humility, and goodwill.

Edward H. Finnegan, S.J., Award Nominee
Established by the faculty to honor the student, who through excellence, humility, and service to others, exemplifies the Boston College motto of “Ever to Excel.” The faculty of the four undergraduate schools at Boston College each nominates a candidate and the winner is announced at the University Commencement. The award winner will accept the degree for the class at the University Commencement.

Reverend Edward J. Gorman, S.J., Leadership Award
Given to the student who, in the judgment of classmates, best exemplifies leadership and who has contributed to the William F. Connell School of Nursing through dedication, service, and sincerity.

Susan E. Donelan Inclusive Community Award
Given to the student who, in the judgment of classmates, has promoted a spirit of cultural awareness, inclusivity, and support to foster the success of his or her graduating class.

Jean A. O’Neil Achievement Award
Established by the faculty to honor the graduating senior who has shown the greatest academic growth over the course of their four years of study in the baccalaureate nursing program.

Maureen A. Eldredge Leadership and Volunteer Service Award
Established by the faculty to honor the graduate who embodies the Jesuit ideals of being “men and women in service to others” through demonstrated leadership and substantial commitment to others in volunteer service.

Graduate Academic Regulations

University-wide academic regulations that pertain to all graduate and professional students are presented below. Students are expected to become familiar with the regulations that are specific to their school.

To learn about each school’s academic regulations, please refer to the following sites:

Graduate School of the Morrissey College of Arts and Sciences
bc.edu/bc-web/schools/mcas/graduate/current-graduate-students/policies-and-procedures.html

Lynch School of Education and Human Development, Graduate Programs

Master’s Students:
bc.edu/content/bc-web/schools/lynch-school/sites/audience-pages/current-students/policies-and-procedures#tab-masters

Doctoral Students:
bc.edu/content/bc-web/schools/lynch-school/sites/audience-pages/current-students/policies-and-procedures#tab-doctoral
Academic Regulations are effective from September of the current academic year (2023–2024) except where a different date is explicitly stated. If there have been changes in the Academic Regulations and degree requirements since a student readmitted after sustained leave was last enrolled, the Academic Regulations in effect at the time of the student’s readmission to full-time study will apply, unless the Associate Dean specifies otherwise in writing at the time of readmission.

**Academic Grievances**

Any graduate or professional student who believes he or she has been treated unfairly in academic matters should consult with the faculty member or administrator designated by their school to discuss the situation and to obtain information about relevant grievance policies and procedures.

**Academic Record**

A record of each graduate or professional student’s academic work is prepared and maintained permanently by the Office of Student Services. Student academic records are sealed at the time the degree is conferred. After this date changes may not be made, with the exception of errors or omissions.

**Attendance**

Graduate and professional students are expected to meet course requirements in classes, internships, and practica as specified in the syllabus or document prepared explicitly for the academic experience. A student who is absent repeatedly from these academic experiences will be evaluated by the responsible faculty member and/or designated supervisor(s) to ascertain the student’s ability to continue in the course and to achieve course objectives.

Professors may include, as part of the semester’s grades, marks for the quality and quantity of the student’s participation in the course.

Professors will announce, reasonably well in advance, tests, examinations and other forms of assessment based on the material covered in the course, as well as other assigned material. A student who is absent from a course is responsible for obtaining knowledge of what happened in the course, especially information about announced tests, papers, or other assignments.
A student who is absent from a course on the day of a previously announced examination, including the final examination, is not entitled, as a matter of right, to make up what was missed. The professor involved is free to decide whether a makeup will be allowed.

In cases of prolonged absence, the student or his or her representative should communicate with the student’s graduate Associate Dean as soon as the prospect of extended absence becomes clear. The academic arrangements for the student’s return to the course should be made with the Graduate Associate Dean’s Office as soon as the student’s health and other circumstances permit.

Absences for Religious Reasons

Any graduate or professional student who is unable, because of his or her religious beliefs, to attend classes, internships, or practica, or to participate in any examination, study, or work requirement on a particular day shall be excused from any such examination, or study or work requirement, and shall be provided with an opportunity to makeup such examination, study or work requirement that may have been missed because of such absence on any particular day. However, students should notify professors and supervisors at the end of the first course meeting or at least two weeks in advance of any such planned observances, and such makeup examination or work shall not create an unreasonable burden upon the University. No fees will be charged and no adverse or prejudicial effects shall result to any student who is absent for religious reasons.

Audits

Graduate and professional students should consult their school or department for specific policies regarding audits.

Comprehensive Examination or Qualifying Papers: Doctoral

Graduate and professional students should consult their school or department for specific policies regarding comprehensive examinations or qualifying papers for doctoral students.

Comprehensive Examination: Master's Students

Graduate and professional students should consult their school or department for specific policies regarding comprehensive examinations for master's students.

Continuation: Doctoral Candidacy

Graduate and professional students who have completed all required coursework and who have successfully completed the comprehensive examination or the oral defense of a publishable paper are admitted to doctoral candidacy. Doctoral candidates are required to register and pay for Doctoral Continuation (9999) during each semester of their candidacy or its equivalent.

Please refer to your school's regulation for additional information on doctoral candidacy.

Cross Registration

Boston Theological Interreligious Consortium

The Boston Theological Interreligious Consortium (BTI), a consortium of theology faculty primarily in the Boston-Newton-Cambridge area, has as its constituent members the following institutions. Graduate and professional students should consult their school or department for specific policies regarding cross-registration in the BTI.

- Boston College Theology Department
- Boston College School of Theology and Ministry
- Boston University School of Theology
- Gordon-Conwell Theological Seminary
- Hartford Seminary
- Harvard Divinity School
The Consortium

Boston College is part of a consortium that includes Boston University, Brandeis University, Hebrew College, Hellenic College, Regis College, Northeastern, and Tufts University. Eligible students are allowed to take courses at any of these institutions if the same courses are not offered at Boston College at any time during the academic year. Cross registration materials are available from the Office of Student Services on the Academic Forms page. Graduate and professional students should consult their school or department for specific policies regarding cross-registration in this consortium.

Consortium for Graduate Studies in Gender, Culture, Women, and Sexuality

Eligible graduate and professional students enrolled in degree programs during the academic year may apply to participate in the Consortium for Graduate Studies in Gender, Culture, Women, and Sexuality, an inter-institutional enterprise established to advance the field of women’s studies and enlarge the scope of graduate education through new models of team teaching and interdisciplinary study. Faculty and students are drawn from nine member schools: Boston College, Boston University, Brandeis University, Harvard University, MIT, Northeastern, Simmons, Tufts, and UMass Boston. Graduate and professional students should consult their school or department for specific policies regarding cross-registration in this consortium. Eligible students need to obtain permission from their department or school. Registration forms will be mailed from the Consortium to accepted students.

Degree with Honors

Academic honors are not calculated for graduate students except for law. Law students’ Latin honors are calculated as follows: Summa Cum Laude is awarded to the top 2% of the class. Magna Cum Laude is awarded to the top 10% of the class. Cum Laude is awarded to students graduating in the upper third of the class. Honors will be noted on the student’s diploma.

Enrollment Status

Full-Time Enrollment Status

Graduate and professional students should consult their school or department for specific policies regarding full-time enrollment status.

Final Examinations

For graduate level courses that have final examinations, professors may use the University’s final examination schedule, which is public and set before classes begin, or they may set the day and time of their final examination in the syllabus or document prepared explicitly for the academic experience. All students are responsible for knowing when their final examinations will take place and for taking examinations at the scheduled time. Students who miss a final examination are not entitled, as a matter of right, to a makeup examination except for serious illness and/or family emergency. Students who are not able to take a final examination during its scheduled time should contact the person designated by the department or school, preferably prior to the examination date, to inform them of their situation and to make alternative arrangements if granted permission to do so.

Foreign Language Requirement

Graduate and professional students should consult their school or department for specific policies regarding foreign language requirements.

Grading

In each graduate course, in which a graduate or professional student is registered for graduate credit, the student will receive one of the following grades at the end of the semester: A, A-, B+, B, B-, C, F, W, J, U, P, or I. The high passing grade of A is awarded for superior work. The
passing grade of B is awarded for work that clearly is satisfactory at the graduate level. The low passing grade of C is awarded for work that is minimally acceptable at the graduate level. The failing grade of F is awarded for work that is unsatisfactory.

A pass/fail option is available for a limited number of courses. A Sat/Unsat grade is recorded for courses such as doctoral continuation.

A student’s cumulative average is based on grades in courses taken in their program at Boston College, plus other courses specifically approved for credit towards the degree by the Academic Dean. If a student fails a course, the course is not credited toward the degree, but the failing grade remains on the student’s transcript and a 0.0 is calculated into the student’s cumulative average. A failed course may be retaken for credit, with the new grade added to the GPA, but the original failure remains on the transcript and continues to be counted in the GPA. If a student retakes a failed course and fails it again, the course is again entered on the transcript and the grade is counted in the GPA. If a student retakes a course in which she or he has already received a passing grade, the repeated course is again entered on the transcript and the grade is calculated in the cumulative GPA, but the course is not credited toward the degree.

Please refer to your school’s regulation for additional information on grading.

**Grading Scale**

In computing averages, the following numerical equivalents are used. The entire grading scale is not used by all schools.

- A 4.00
- A- 3.67
- B+ 3.33
- B 3.00
- B- 2.67
- C+ 2.33
- C 2.00
- C- 1.67
- D+ 1.33
- D 1.00
- D- .67
- F .00
- P No effect on GPA
- U No effect on GPA

**Grade Changes**

Grade changes should be made only for exceptional reasons. The grades submitted by faculty at the end of each semester are considered final unless the faculty member has granted the student an Incomplete. Incompletes may be granted to provide a student time to finish his or her course work after the date set for the course examination or in the course syllabus. Incompletes should only be granted for serious reasons, e.g., illness, and only when the student has been able to complete most of the course work but is missing a specific assignment, e.g., a final paper, an examination, etc. Incompletes are not to be granted to allow the student to complete a major portion of the course work after the end of the semester.

All I grades will automatically be changed to F on March 1 for the fall, August 1 for the spring, and October 1 for the summer except for students in the Boston College School of Social Work.

Graduate and professional students should consult their school or department for more information on grade changes.

**Student Work and Assessment**

The grading of student work serves as the primary means of individual evaluation; additionally, student work generally may be used to assess course, program, and the related, learning outcomes in support of continuous improvement.

**Pass/Fail Electives**
Graduate and professional students should consult their school or department for specific policies regarding pass/fail electives.

**Good Standing**

Grades, satisfactory performance in internships and practica, and timely completion of degree requirements determine a student’s good standing in his or her program. Students should be informed in a timely manner if their good standing is in jeopardy and the conditions needed to maintain or establish good standing.

Graduate and professional students should consult their school or department for specific policies regarding academic good standing.

**Graduation**

The University awards degrees in May, August, and December of each year. Commencement ceremonies are held only in May. Students who have completed all requirements for the degree before a specific graduation date are eligible to receive the degree as of the university’s next official graduation date. A diploma will not be dated before all work is completed. Students who graduate in December or August may participate in commencement exercises the following May.

In order to ensure timely clearance, all students who plan to graduate should confirm their diploma names online at [bc.edu/myservices](http://bc.edu/myservices) according to the deadline listed on the diploma name/address link.

**Leave of Absence**

**Voluntary Leave of Absence**

Graduate students who do not register for coursework, Thesis or Dissertation Direction, or Interim Study in any given semester must request a leave of absence for that semester. Leaves of absence are not usually granted for more than two semesters at a time, and are rarely granted for students on Doctoral Continuation. Students may apply for a personal or medical leave of absence. As described below, appropriate documentation is required for a medical leave of absence.

Students may submit a personal or medical leave of absence request online using a form found on the Student Services Academic Forms page. Once submitted it will be routed to the appropriate school’s Associate Dean’s for review.

Leave time for either a personal or medical leave of absence will normally be considered a portion of the total time limit for the degree unless the contrary is decided upon initially between the student and the Associate Dean.

**Personal Leave of Absence**

Students on an approved personal leave of absence should contact the Associate Dean’s Office at least six weeks prior to the semester in which they expect to re-enroll. The appropriate Associate Dean will make the decision on the readmission request.

**Medical Leave of Absence**

If a student is unable to complete the coursework or other course of study for a semester due to medical reasons, the student may request a medical leave of absence. Medical leave, whether requested for mental health or physical health reasons, must be supported by appropriate documentation from a licensed care provider and be approved by the student’s Associate Dean.

The University reserves the right to impose conditions on readmission from a medical leave, which may include: length of time on leave; the submission of documentation from the student’s health care provider; the student’s consent for the provider to discuss the student’s condition with University clinicians, and/or an independent evaluation of the student’s condition by University clinicians; and/or making use of University or outside professional services.

The conditions will be specified at the time of leave, and students will be asked to acknowledge their acceptance of them.
Students seeking to return from leave should contact the appropriate Academic Dean prior to seeking readmission no later than four weeks prior to the desired admission date. However, students seeking to return to a practicum, clinical or field education placement must contact the appropriate Academic Dean expressing the intent to seek readmission at least a full semester before the desired return.

Students on Boston College’s medical insurance policy may be eligible to continue their health insurance the semester in which they take a medical leave of absence and the following semester. Students should consult with Student Services and can learn more about this policy at: bc.edu/medinsurance. Students granted a medical leave may be entitled to a semester’s tuition credit to be provided upon readmission, and should consult their school’s policy regarding the tuition credit.

**Involuntary Leave of Absence**

Students may be separated from the University for academic reasons (please refer to specific school or department policies for more information) or for reasons of health, safety, or when a student’s continuance at Boston College poses significant risk to the student or others. For additional information, visit the Division of Student Affairs website.

**Readmission**

Graduate and professional students seeking readmission to the University should consult with the policies and procedures specified by their department or school. The decision to re-admit a student will be based on a consideration of the best interests of both the student and the University.

**Summer Courses**

In graduate programs, summer courses may be an integral part of the curriculum. Graduate and professional students should consult with their schools or departments for specific policies regarding summer courses.

**Time-to-Degree**

Graduate and professional students should consult their school or department for specific policies regarding time-to-degree.

**Transcripts**

All current graduate and professional students submit requests for academic transcripts at bc.edu/myservices. Alumni should visit bc.edu/transcript for directions on the transcript request process. Students and alumni will be directed to the National Student Clearinghouse transcript fulfillment website as our vendor for transcripts. For more information, visit bc.edu/transcript.

**Transcript/Diploma Holds**

The University will not issue diplomas or release transcripts for any graduate or professional student with an outstanding financial obligation to the University, which includes failure to complete a mandatory loan exit interview.

**Transfer of Credit**

Graduate and professional students should consult their school or department for specific policies regarding transfer of credit.

**University Communication Policies and Student Responsibilities**

Official communications of the University with its currently enrolled graduate and professional students, including notices of academic and administrative matters and communications from faculty and administrative staff, may be sent via postal service, campus mail, or e-mail. To assure that these communications arrive in a timely manner, all enrolled students have the following responsibilities:

**Postal service and Campus mail:** For purposes of written communication, the student’s local and permanent addresses on record at the Office of Student Services will be regarded as the student’s official local and permanent residences. All students have a responsibility to
provide both local and permanent mailing addresses and to enter corrections at bc.edu/myservices if the addresses are not accurate in University records. Students should review their address record for accuracy at the beginning of each semester and again soon after submitting any corrections.

E-mail: The University recognizes and uses electronic mail as an appropriate medium for official communication. The University provides all enrolled students with e-mail accounts as well as access to e-mail services from computer stations at various locations on campus. All students are expected to access their e-mail accounts regularly, to check for official University communications, and to respond as necessary to such communications.

Students may forward their e-mail messages from their University e-mail accounts to non-university e-mail systems. In such cases, students shall be solely responsible for all consequences arising from such forwarding arrangements, including any failure by the non-university system to deliver or retain official University communications. Students should send test messages to and from their University e-mail account on a regular basis, to confirm that their e-mail service is functioning reliably.

All student responses to official e-mail communications from the University must contain the student’s University e-mail address in the “From:” and “Reply To:” lines and should originate from the student’s University e-mail account, to assure that the response can be recognized as a message from a member of the University community.

Withdrawal from a Course

Graduate and professional students who withdraw from a course after the drop/add period (after the first seven class-days of the semester) will have a “W” recorded in the grade column of their academic record. To withdraw from a course all students must go to the Academic Forms page of the Student Services website, submit the online form that will then be routed to the Office of the Academic Dean for their school for review. Students will not be permitted to withdraw from courses after the published deadline. Students who are still registered at this point will receive a final grade for the semester.

Withdrawal from Boston College

Graduate and professional students who wish to withdraw from Boston College in good standing are required to submit an online Withdrawal Form, found on the Academic Forms page of the Student Services website, which will be routed to the appropriate Academic Dean’s Office for review and processing. In the case of students who are dismissed for academic or disciplinary reasons, the Academic Dean will process the withdrawal.

University Awards and Honors

Please refer to your school or department website for information about awards and honors.

Distance Education Policies and Procedures

Boston College offers a variety of distance education opportunities, designed to offer students a flexible, online alternative to traditional on-campus programs and courses.

In support of Boston College’s distance education initiatives, BC is an approved member of the National Council for State Authorization Reciprocity Agreements, or SARA.

As described by SARA, the network provides a voluntary, regional approach to state oversight of postsecondary distance education. When states join SARA, they agree to follow uniform processes for approving their eligible institutions’ participation. These policies help protect students and provide benefits to both states and institutions carrying out distance education in multiple states.

Accreditation

Boston College is accredited by the New England Commission of Higher Education (NECHE) and has been accredited by NECHE since 1935.
NECHE is recognized by the U.S. Secretary of Education as a reliable authority on the quality of education and adheres to the standards of the Council for Higher Education Accreditation. As part of NECHE guidelines, member institutions undergo a peer review process every ten years which involves the preparation of a comprehensive self-study. Boston College’s most recent full review for accreditation occurred in March 2017.

Inquiries regarding Boston College’s accreditation status should be directed to the Office of the Provost and Dean of Faculties, Boston College, 270 Hammond Street, Chestnut Hill, MA 02467 (617-552-3260); individuals may also contact the New England Commission of Higher Education, 301 Edgewater Place, Suite 210, Wakefield, MA 01880 (781-425-7785).

Additional accreditation-related information may be found at Boston College’s Accreditation Information site.

Authorization

Boston College has been approved to participate in the National Council for State Authorization Reciprocity Agreements (SARA), which permits the university to offer distance education programming in 49 SARA member states, the District of Columbia, the U.S. Virgin Islands, and Puerto Rico. Note that courses and programs incorporating a “supervised field experience” (sometimes also referred to as an “out-of-state learning placement”) are also covered by the provisions of SARA if under the oversight of a supervisor, mentor, faculty member, or other qualified professional, located in the host state, who has a direct or indirect reporting responsibility to the institution where the student is enrolled. Examples include practica, student teaching, or internships.

Non-SARA States

California does not participate in SARA; however, the California Bureau for Private Postsecondary Education does not regulate non-public higher education institutions that are degree granting, non-profit, and accredited, and so Boston College may offer distance education programming to students in California.
Coverage and Limitations of SARA

As described by NC-SARA, SARA only applies to postsecondary distance education activities conducted across state lines; it does not apply to distance education activity inside the SARA-participating institution’s home state or to on-ground campuses. SARA does not affect the applicability of general purpose state laws; similarly, SARA has no effect on state licensing or certification requirements which often require additional approval from the applicable state board.

Distance Education Programs Leading to Professional Licensure

Boston College is authorized, pursuant to SARA, to enroll students in online programs in the SARA states and territories.

Boston College makes every effort to ensure information about educational requirements for licensure or certification information is current; however, state requirements often change. Separate from educational requirements, state licensure boards may require applicants to complete professional examinations, background checks, years of professional experience, jurisprudence exams, etc. If you are planning to pursue professional licensure or certification in a state other than Massachusetts, it is strongly recommended that you:

- contact the appropriate licensing entity in that state to seek information and guidance regarding licensure or certification requirements before beginning an academic program
- check with departmental personnel in your specific program if you have questions about whether an online program meets licensure requirements in a specific state
- review additional information on state requirements for all programs that lead to licensure which can be accessed at Boston College’s central repository of Notices and Disclosures

Again, SARA does not provide reciprocity for state professional licensing requirements. Academic programs and individual graduates must meet standards set by a state’s licensure requirements in order for a graduate to be eligible for a license.

Please see the table for license eligibility by state. Contact information by state is sourced from NC-SARA and is updated twice per year.

Resources for Distance Education Students

Distance education students at Boston College have access to a wide range of student and academic services, for example:

- Agora, Institutional Portal
- Boston College Bookstore
- Boston College Libraries
- Student Services
- University Catalog

International Students

International students are advised to understand and be apprised of the rules, regulations, and requirements related to distance education in their country of residence, particularly:

- If the country will recognize an online certificate or degree;
- Whether the program meets licensure or certification requirements in the country; and
- If the country charges any additional taxes, withholdings, or fees associated with online distance education programs.

International students are encouraged to research the policies pertaining to degree recognition in their home country, or anticipated country of residence, and to contact the program-specific administrator at Boston College for additional information prior to enrolling in a Boston College distance education program.
Veterans

Boston College is approved by the National Association of State Approving Agencies, advocates for quality education and training programs for our nation’s veterans.

Complaint Procedures for Students Enrolled in Distance Education Programming

Boston College makes available a variety of means to resolve distance education-related issues. A student enrolled in distance education must first attempt to resolve their complaint with their individual department/program or dean's office. In those instances for when a complaint cannot be resolved at the individual department/program or dean’s office level, the student may contact the Office of Student Services for additional direction and/or questions.

Boston College Contact

Jessica Greene
Waul House 308, 140 Commonwealth Avenue
Chestnut Hill, MA 02467
(617) 552-0163, jessica.greene.2@bc.edu

When a distance education-related complaint cannot be resolved at the department/program or dean’s office level, the following pathways to resolution apply:

For Massachusetts Residents and Online Students Located in Non-SARA Member States or Territories

You may file a consumer complaint with the Massachusetts Attorney General’s Office (AGO) by using the consumer complaint form. The AGO consumer complaint form should be used by students who are located in:

- Massachusetts
- Non-SARA Member States or Territories (e.g., California, Guam)

For Online Students Located in SARA Member States or Territories

You may file a complaint with the Massachusetts Department of Higher Education (DHE) by using the DHE’s SARA complaint form. Please note that for SARA complaints, students are explicitly required to exhaust Boston College’s available complaint procedures before filing a SARA complaint with the DHE.

The DHE complaint form should be used by students who are located in SARA member states and territories for the purposes of completing out-of-state learning placements, such as internships, practica, clinical experiences, etc. in SARA member states and territories outside Massachusetts. The SARA complaint process is as follows:

1. Students must first attempt to resolve their complaint using internal administrative procedures offered by the SARA institution.
2. After all administrative remedies have been exhausted with the MA-SARA institution, the student may submit a SARA Complaint to the DHE via the SARA complaint form.
3. The DHE shall send a copy of the complaint to the institution that is the subject of the complaint;
4. Within 30 days of the date that the DHE sends a copy of the complaint to the institution, the institution must provide a written response to the student and the DHE.

For more information, please refer to the DHE’s Complaint Policy and Process.

Student Mobility

A requirement of SARA membership, and as directed by current United States Department of Education regulations as presented in the 2019 Higher Education Authorization, institutions must record in which state a student is located while enrolled in a distance education or correspondence course and apply the method to determine location consistently and to all students. (State Authorization 600.9(c)(1)(i)).
SARA and federal regulations consider a student’s location to be the **state, territory, or district where the student is located while receiving the instruction**; it does not refer to the student’s official state of residence. For prospective students, Boston College’s admissions systems reflect the local address as submitted by the student on the student’s application, and this information serves as the source for “student location.” In the event that this information is not populated, home address information serves as the source for “student location.” For enrolled students, Boston College’s student information system (UIS) reflects the local address as recorded at the time of the student’s initial enrollment, and this information serves as the source for “student location.” In the event that this information is not populated, home address information serves as the source for “student location.”

Changing one’s location prior to enrollment (i.e., during the application process) or while enrolled does not adversely impact a student’s academic standing although students should be mindful that, if interested or enrolled in a program leading to professional licensure, a new state of location may have licensure regulations that are not met by Boston College’s curriculum. Students should review disclosures on professional licensure and confer with their academic advisor and/or their academic program’s department personnel in the event of a location change outside of Massachusetts.

In addition to recording location information related to academic programming, location is also recorded when students participate in learning placements outside of the classroom such as clinical experiences and internships. This information is typically tracked by program departments.

Applicants may update their location information through the application system appropriate to their program or may contact their program’s Office of Admission. Enrolled students may update their location information at any time via Boston College’s institutional portal, **Agora**.

In Agora, under the "Account and Personal Info" section, click Address/Phone/Emergency Contact and follow the on-screen instructions. Support for Agora may be found at: **bc.edu/content/bc-web/offices/its/support/account-network-access/agora.html**.

### Student Verification for Distance Education Courses

Boston College employs a multi-pronged student identity verification system to help ensure that the identity of students who are admitted and enroll in distance education courses or programs are the same students who participate in and complete those courses or programs for academic credit.

At the time of application, all candidates must affirm that the contents of their submission are valid and reflect their own educational, professional, and related credentials, experiences, and accomplishments.

At the time of matriculation, students are assigned a Boston College username, password, and unique eight-digit identification number (EagleID) by Information Technology Services; most electronic services and resources that are restricted to the BC community, including the Agora Portal and Canvas (Boston College’s learning management system), require authentication by entering one’s BC username and password and may also require 2-step verification, thereby serving as an additional means of identity confirmation. Also at the time of matriculation, University students enrolled in on-the-ground and hybrid courses/programs are issued a photo identification card (Eagle-One Card) through the Office of Student Services that serves as the official ID card of Boston College. Proof of identification such as a driver’s license or passport must be presented in order to be issued an Eagle-One Card. Students must keep this card available at all times, and cards must be presented to authorized University officials upon request; falsifying, altering, or misusing one’s own or another’s Eagle-One Card in any way is strictly prohibited and illegal.

Faculty-student engagement is a fundamental dimension of a program’s curriculum, and thus, regardless of a course’s mode of delivery, the frequent and meaningful interaction between an instructor and student serves as an effective method of student identity assurance. Additionally, course experiences and assignments that encourage student-to-student interaction are also employed, principally to enhance learning, but also to serve as another means by which to verify the identity of students.

An additional means of assuring student identity are the verification tools available to instructors via Boston College’s learning management system, Canvas. As students access course materials and discussion groups via Canvas, virtual communication technologies that integrate with Canvas, such as discussion boards, facilitate an instructor’s knowledge of a student’s writing style, ability, and tone, thereby helping to spotlight deviations. Identity verification is also supplemented via video conferencing by allowing instructors to confirm a student’s identity via the comparison of the video image with the student’s Eagle-One Card image. If necessary, IP addresses used to access Canvas can be investigated; other analytics, such as page views and log-in dates/times, are also available for review.
Also available to instructors is Respondus:

Respondus LockDown Browser is a custom browser that locks down the testing environment within Canvas (Boston College’s learning management system) and prevents students from accessing other information and applications on their computer. When an exam is configured with LockDown Browser, it cannot be taken in another browser.

Respondus Monitor is a program that builds on LockDown Browser and records students as they are taking the exam and flags behavior for further review by the instructor and so is well suited for use in online courses.

Boston College’s Center for Teaching Excellence and Center for Digital Innovation in Learning offer support and training for these tools; there is no cost to instructors or students for the use of these resources.

**Special Programs**

Boston College offers a number of special programs, including the following:

**Capstone Seminar Program**

The Capstone Seminar Program helps students to "cap off" their Boston College experience by a review of their education and a preview of their major life commitments after college. Capstone offers several integrative seminars each semester exclusively for seniors in all schools. The Capstone seminars explore the struggle to discern your own calling in life as you integrate the four crucial areas of work, relationships, society, and spirituality. Capstone seminars are taught by two dozen faculty from 20 different departments and all four colleges—Morrissey College of Arts and Sciences, Carroll School of Management, Lynch School of Education and Human Development, and Connell School of Nursing. Seminars are limited to 15 to 19 students. All courses are listed between UNCP5500 and UNCP5599 in the *Boston College Catalog*. Many Capstone Seminars are also cross-listed in the home department of the professor and can be taken for elective credit by majors or minors in that department. Department regulations vary. You may take only one Capstone course during your academic career. Capstones cannot be taken as Pass/Fail. If a course requires permission, contact the instructor directly. For other information, contact the Program Director, Fr. James Weiss at james.weiss@bc.edu or see the University Courses section of this Catalog. You may also reference the Capstone Program website with full course descriptions and syllabi at bc.edu/capstone.

**Faculty and Staff Children Exchange Program (FACHEX)**

FACHEX is an undergraduate tuition remission program for children of full-time faculty, administrators, and staff at participating Jesuit colleges and universities. The program for BC employees is administered through the Benefits Office in cooperation with the Office of Enrollment Management.

For Boston College employees, five consecutive years of full-time employment are required for establishing eligibility for the program. Employees must complete the FACHEX Certification Form available on the Boston College FACHEX website and return it to the Benefits Office for processing before December 1. Only the Benefits Office can certify an employee child as FACHEX eligible in the FACHEX Database, and this form contains the required information for entry. Employees should review the FACHEX website for information regarding rules of the program. In addition, if an employee’s child is interested in applying to any institutions participating in FACHEX, they should be aware of any applicable admission deadlines or requirements at those schools. Contact information for the FACHEX Coordinator at each participating institution can be found on the FACHEX website. BC does not maintain admissions policies of other schools in the program and cannot advise on their behalf.

FACHEX awards tend to be extremely limited in number and are highly competitive in terms of academic selectivity. As a result, there are no guarantees to the children of any given faculty, administrators, or staff that they will be able to utilize the FACHEX benefit at the institution of their choice. Also, many participating schools only consider incoming freshman applicants for FACHEX, so transfer students or upperclassmen may not be eligible.

Employees at other participating institutions should ask their respective Benefits Offices for information on requirements for FACHEX eligibility. Parents and students should then visit the Boston College FACHEX website to view the necessary procedures and conditions for FACHEX applicants.
Gabelli Presidential Scholars Program

The Gabelli Presidential Scholars Program is an undergraduate academic merit program that annually awards full-tuition scholarships and fully-funded, GPSP-sponsored summer programs to 15 incoming freshmen students. Early Decision and Regular Decision applicants who submit their BC applications by the November 1 priority scholarship deadline will be considered. There is no separate application for this scholarship. Students are selected on the basis of superior academic achievement and promise, leadership potential, and a demonstrated commitment to service to society. The Program offers these extraordinary individuals the richest academic experience available at Boston College, one that encourages the pursuit of excellence both within and beyond the University walls. Presidential Scholars receive a full-tuition merit scholarship.

In addition to enrollment in one of the University’s several departmental honors programs, during the academic year Scholars meet weekly to discuss their area of concentrations (science and pre-med, humanities, political science and international studies, and management, economics and finance), to share experiences and find greater wisdom in applying for study grants, language programs, internships, and fellowships, and to partake in the cultural life of Boston at the theater or the symphony. To complement the emphasis on ideas and ideals they encounter in their classes, and in their summer programs, Presidential Scholars also give presentations to their fellow scholars about a variety of their experiences including study abroad, Advanced Study Grants, internships, and thesis writing. These presentations serve as additional avenues of inspiration to younger scholars, offering them a glimpse of the opportunities that are open to them throughout their college careers. In addition, these presentations offer the upperclassmen scholars the opportunity to develop and refine their public speaking skills.

During the spring semester freshman Presidential Scholars travel to a country in Europe, while the sophomore Scholars travel to a country in Latin America. These trips are intended to be the starting point in the Scholars’ journey of becoming “global citizens.” In their freshman year, they spend a week in a non-English speaking European country, so as to realize skills that meet the challenge of linguistic differences. In their sophomore year, they have an immersion experience of the social and economic challenges for our neighbors to the South.

In the summers, Scholars are challenged to test and apply what they have learned at Boston College to the world beyond the campus by participating in experiential learning programs focusing on service learning (after the first year), independent international study and travel (after the second year), and professional internship (after the third year).

Through this carefully balanced combination of academic rigor and co-curricular opportunities and challenges, the Gabelli Presidential Scholars Program seeks to develop exceptional scholars and leaders for the Boston College community and far beyond.

Office of Global Education (OGE)

Global education is an integral part of the undergraduate experience at BC. Each year approximately 1,200 students—or nearly 50% of a given graduating class—spend a semester, summer, or academic year studying, interning, conducting research, and/or volunteering abroad. BC collaborates with a number of partner universities worldwide to administer programs in over 30 countries. To apply for semester/academic year programs abroad, students are required to have at least a 3.0 GPA and be in good academic and disciplinary standing. The OGE also offers approximately 30 short-term, faculty-led summer programs and internships that are open to both BC and non-BC students and have no minimum GPA requirement. Students should begin planning to go abroad as early as their freshman year. Information on the OGE website, Study Abroad 101 group meetings, and individual meetings with OGE advisors help students choose the best program for their academic needs. For more information, please visit bc.edu/global-education. The OGE is located in Hovey House (258 Hammond Street, 617-552-3827).

Academic Year Programs*

*Note: “BC in — ” programs denote those options where there is a resident director or on-the-ground support staff in addition to services offered by the host institution. Services range from full-time coordinators to more limited support.

Argentina
**BC in Buenos Aires: Pontificia Universidad Católica Argentina (UCA)**
Semester or full-year program at this excellent private institution located in downtown Buenos Aires. Offerings include arts and music, economics and business, law and political science, humanities, and communication. During the study abroad program in Buenos Aires, BC students can participate in an internship in order to gain professional experience, while becoming further immersed in Argentine culture and the Spanish language.

**BC in Buenos Aires: Universidad Torcuato Di Tella**
Semester or full-year program in Buenos Aires at one of Argentina’s most prestigious private universities. Offerings include business, economics, political science, international studies, journalism, and history. During the study abroad program in Buenos Aires, BC students can participate in an internship in order to gain professional experience, while becoming further immersed in Argentine culture and the Spanish language.

**Australia**

**Australian Catholic University**
Semester or year program at Australia’s premier Catholic university. Open only to CSON students, who study on ACU’s Melbourne campus.

**Monash University**
One of the Australian Group of Eight schools (most distinguished research institutions). Semester or full-year program in a suburb of Melbourne. Offers courses across all disciplines.

**Notre Dame University**
Semester or full-year program at a small Jesuit university in Fremantle, Western Australia, with a wide range of courses across all subjects, particularly in the arts and humanities. Optional Australian studies course with field trips.

**University of Melbourne**
One of the Group of Eight schools located in the heart of the city. Semester or full-year program. Exceptional in most subject areas.

**University of New South Wales**
Semester or full-year program at one of the Group of Eight schools located in Sydney, with broad offerings across all disciplines. Internship opportunities and an optional pre-semester program to study the environment at the Great Barrier Reef.

**University of Queensland**
Group of Eight school located in Brisbane. Semester or full-year program with a broad curriculum. Exceptional in all subject areas, especially biology, marine studies, psychology, business, and economics. Research opportunities for students.

**University of Western Australia**
Group of Eight school located in Perth. Semester or full-year program with a broad, excellent curriculum. Strong in all subject areas—particularly sciences, environmental sciences, social sciences, business, education, and music.

**University of Sydney**
Group of Eight schools located in Sydney. Semester or full-year program with a broad curriculum. The majority of students enroll in arts and social sciences, business, science, engineering, information technologies, or health sciences.

**Austria**

**Vienna University of Economics and Business (WU)**
Semester or full-year program at one of Europe’s top business schools, with courses taught in English for CSOM or Economics students. No prior German language required.

**Brazil**
BC in Rio de Janeiro: Pontificia Universidade Católica do Rio de Janeiro (PUC-Rio)
Semester or full-year program with courses in all disciplines. For students with elementary, intermediate, and advanced Portuguese as well as advanced Spanish skills. Offers an English-language track in Brazilian and Latin American culture with a mandatory Portuguese course.

Chile

Pontificia Universidad Católica de Chile (PUC)
Semester or full-year program in Santiago at Chile’s premier Catholic university. Courses include humanities, social sciences, economics, education, business, and law.

Universidad Alberto Hurtado (UAH)
Semester or full-year program at a small, prestigious Jesuit institution in Santiago. Good for social sciences, humanities, philosophy, business, literature, and pre-law.

China

Chinese University of Hong Kong (CUNK)
Semester or full-year program in a college system setting, with a wide range of courses taught in English. CUHK offers classes in business administration, education, engineering, the natural and social sciences, as well as a summer academic research opportunity (SURP).

Hong Kong University of Science and Technology (HKUST)
Semester or full-year direct enrollment program with a strong focus on business/management for CSOM students only. On-campus housing. Courses taught in English.

Nanjing University (NJU)
Semester or full-year direct enrollment opportunity. Students may enroll in Chinese-instructed classes or a number of English-taught courses in a range of disciplines on the Xianlin campus. Chinese language courses (elementary to advanced levels) are offered. Students receive support through a buddy program and reside on campus.

University of Hong Kong (HKU)
Semester or full-year program suitable for most students, especially those concentrating in the humanities and sciences. Courses taught in English.

Colombia

Pontificia Universidad Javeriana (PUJ)
Semester or full-year program in Bogotá at one of Latin America’s premier Jesuit institutions. Courses include humanities, social sciences, economics, education, business, and law.

Croatia

BC in Croatia: War, Peace, and Reconciliation
Semester program based at the European Center for the Study of War and Peace. Students take five courses and choose between an internship, independent research, or language course, with the potential to earn major/minor elective credit toward International Studies, Philosophy, Theology, History, Faith, Peace and Justice.

Czech Republic

Charles University: East and Central European Studies
Semester or full-year program set in Prague. Founded in 1348, Charles is one of the oldest universities in Europe and the premier university in the Czech Republic. Courses are taught in English and are offered in a variety of subject areas, with a focus on Central and Eastern Europe.

Denmark
*Copenhagen Business School*
Semester or full-year program with courses taught in English for CSOM or economics students.

*Copenhagen University*
Semester or full-year program with courses taught in English in the humanities, social sciences, law, health science, natural science, and theology.

**Ecuador**

*BC in Quito: Universidad San Francisco de Quito (USFQ)*
Semester or full-year program with course offerings across the disciplines. Science and Community health course available for CSON and pre-med students. Students participate in service work as part of the mandatory resident director course. The program includes a trip to the Galapagos Islands and a weekend with a family in an indigenous village.

**Egypt**

*American University in Cairo*
Semester or full-year direct enrollment. Courses are taught in English. BC students are strongly encouraged to enroll in language classes through the Department of Arabic Language Instruction. Required on-campus housing in New Cairo.

**England**

*BC in London: King's College London, University of London*
Fall semester or full-year program in London with course offerings across many disciplines, including the potential for a pre-medical course track.

*BC in London: London School of Economics (LSE)*
Full-year program only in social sciences, including economics, finance, political science, and sociology.

*BC in London: Queen Mary, University of London*
Semester or full-year program in London's vibrant and diverse East End, with courses across the disciplines.

*BC in London: Royal Holloway, University of London*
Semester or full-year program with a suburban, parkland campus, and a wide range of course offerings for MCAS and CSOM students.

*BC in London: School of Oriental and African Studies (SOAS), University of London*
Semester or full-year program in central London with specialist studies of Africa, Asia, and the Near and Middle East, including history, languages, politics, religion, and sociology.

*BC in London: University College London, University of London*
Semester or full-year program with courses across most disciplines.

*University of Bristol*
Semester or full-year program located in Bristol, England, with courses across the disciplines, including humanities, sciences, and management.

*Durham University*
Full-year program offering courses across many disciplines including English, history, philosophy, theology, economics, and the sciences.

*Lancaster University*
Semester or full-year program with courses across the disciplines, including courses in the sciences and in management for CSOM students.

*Newcastle University*
Semester or full-year program with courses across the disciplines, including humanities, sciences, and management.
University of Liverpool
Semester or full-year program with courses across the disciplines, including humanities, sciences, and management.

University of Oxford, Mansfield College
Full-year program only. Suitable for students in MCAS interested in small, independent study.

France

BC in Paris: Université de Paris
Semester or full-year program based at the University of Paris. BC students attend the University of Paris IV (Sorbonne) or the University of Paris IX (Dauphine). Offers a wide range of disciplines. Courses are taught in French, with a small number taught in English at the University of Paris IX (Dauphine).

BC in Paris: L’Institut de Langue et de Culture Française (ILCF)
A French language institute connected to L’Institut Catholique de Paris (ICP). The French-taught semester program offers courses in French language, phonetics, grammar, and conversation. English-taught courses in other subjects are available.

BC in Paris: L’Institut Catholique de Paris (ICP)
Semester or full-year program offering French-taught courses in humanities, education, theology, and philosophy.

BC in Paris: L’Ecole Supérieure de Commerce (ESCP)
Semester program based at the oldest business school in France. Students take courses in international business, finance, economics, and marketing. Courses taught in French and/or English.

BC in Paris: L’Institut d’Etudes Politiques de Paris (Sciences Po)
Semester or full-year program offering courses in business, history, communications, law, journalism, political science, international relations, economics, and European studies. Courses taught in French and English.

BC in Champagne: Sciences Po Reims
Semester or full-year program at Sciences Po’s campus in Reims, located in the Champagne region of France. Students can take courses in international studies, history, law, political science, economics, and business.

Germany

Eichstätt Catholic University
Spring semester or full-year program at a small university located near Munich, with course offerings in arts and sciences, business, and education. Intensive pre-semester language program in Munich. Offers beginning and advanced track programs.

Frankfurt School of Business and Management
Semester or full-year program offering courses in business and law. Courses are taught in English. Excellent opportunity for business and economics majors in Frankfurt. Students are required to take a German language course.

Universität Tübingen
Spring semester or full-year program at one of Germany’s premier universities for students with German language skills. Courses are available in English and German and cover a variety of subject areas.

Greece

American College of Greece (ACG)
Semester or full-year direct enrollment program in Athens. Course offerings from a wide range of curricula taught in English with highlights in business, communication, and psychology. University housing, activities, service, and internship opportunities.
Ireland

**BC in Cork: University College Cork**
Semester or full-year program offering a broad selection of courses in a wide range of disciplines including business, arts, and sciences. Fall semester students take a university early start program.

**BC in Dublin: National University of Ireland Maynooth**
Semester or full-year program in a small campus environment outside of Dublin. Mandatory Irish Studies course taught by the BC resident director.

**BC in Dublin: Trinity College Dublin**
Semester or full-year program at one of Europe’s oldest and most prestigious institutions located in the center of Dublin. Wide range of courses across all disciplines. Mandatory Irish Studies course taught by the BC resident director.

**BC in Dublin: University College Dublin (UCD)**
Semester or full-year program with offerings across the disciplines, including the arts, business, and social sciences. Students in the Arts and Sciences faculties select two departments in which to take their courses. CSOM students take most classes within the Quinn School of Business. Mandatory Irish Studies course taught by the BC resident director.

**BC in Galway: National University of Ireland, Galway**
Semester or full-year program with course offerings across the disciplines.

Italy

**BC in Parma: University of Parma**
Semester or full-year program at the University of Parma, with a wide range of disciplines offered. Courses taught in Italian.

**BC in Parma: L’Istituto Dante Alighieri, Parma**
Semester or full-year program at the Istituto Dante Alighieri, offering a range of courses taught in English.

**Bocconi University, Milan**
Semester or full-year program based at one of the leading business schools in Europe. Courses taught in English and Italian.

**Università Cattolica del Sacro Cuore (UCSC)**
Semester or full-year program located at the Università Cattolica del Sacro Cuore (“Cattolica”) in Milan. The largest Catholic university in the world, courses are offered in both English and Italian. Students are required to take an intensive pre-semester Italian language course.

**Venice International University**
Semester or full-year program located at Venice International University, an international higher education and research center co-run by 18 consortium members from around the world. Based on San Servolo Island, a few minutes from St. Mark’s Square in the heart of Venice. Students take courses taught in English in the social sciences and international studies.

Japan

**Sophia University**
Spring semester or full-year program at a Jesuit sister university, with course offerings in English covering a wide range of disciplines. University housing in Tokyo.

**Waseda University**
Spring semester or full-year program with course offerings in English. University housing and homestay options in Tokyo.

Malaysia

**Monash University Malaysia**
One of the Australian Group of Eight schools (most distinguished research institutions). Semester or full-year program on Monash University’s
Malaysia campus. Based in Sunway City outside Kuala Lumpur, one of the fastest-growing cities in Asia, the program offers English-taught courses across all disciplines and an opportunity for cultural immersion.

**Mexico**

*Universidad Iberoamericana: Mexico City*
Semester or full-year program for students in most disciplines at this private, Jesuit institution famed for research and social engagement. Courses are taught in Spanish.

**Morocco**

*Al Akhawayn University*
Semester or full-year program in Ifrane, with course offerings in English. Excellent opportunity for business students and those looking to study in francophone North Africa. Recommended for Islamic Studies and intensive Arabic language.

**Nepal**

*BC in Kathmandu: Center for Buddhist Studies at RYI*
Semester or full-year program offers an in-depth study of Buddhist philosophy. Highly recommended for students interested in comparative religion, theology, and philosophy. Courses in Tibetan or colloquial Nepali language offered. Homestays with local families.

**The Netherlands**

*Amsterdam University College*
Semester or full-year program with courses offered in English. Classes are available in the humanities, natural sciences, and social sciences.

*University College Utrecht*
Semester or full-year program with courses offered in English. Classes are available in the humanities, natural sciences, and social sciences.

*University of Amsterdam*
Semester or full-year program with English courses available in the humanities and social sciences.

**New Zealand**

*University of Otago*
Semester or full-year program at one of New Zealand's top-ranked universities. Exceptional course offerings across the disciplines, especially environmental sciences, business, theology, arts, and humanities.

**Norway**

*University of Bergen*
Semester or full-year program with a wide-ranging curriculum in English with strengths in natural and marine sciences.

**The Philippines**

*Ateneo de Manila University*
Semester or full-year program at a leading Jesuit university, with a wide-ranging curriculum in English. Good opportunity for CSOM students, as well as those interested in service. Students reside on campus.

**Poland**

*Jagiellonian University: Center for European Studies*
Semester or full-year program at a prestigious Polish university. Courses are taught in English in politics, sociology, Polish language, literature, and culture at the University’s Center for European Studies.
Portugal

NOVA School of Business and Economics
Semester or full-year program at the NOVA School of Business and Economics (Nova SBE), which is located just outside of Lisbon in Carcavelos. NOVA is strictly a business and economics school and does not offer courses outside of these fields. Classes are taught in English.

Universidade Católica Portuguesa
Students take courses at the Lisbon campus, with classes offered in English in the fields of economics, business, and finance. There is also a limited number of courses offered in other fields through their Liberal Arts Curriculum.

Scotland

BC in Glasgow: University of Glasgow
Semester or full-year program offering courses across all disciplines including economics, business, the sciences, and pre-med.

University of Edinburgh
Semester or full-year program offering courses across all disciplines, including humanities, sciences, and management.

Singapore

National University of Singapore (NUS)
Semester or full-year program at a leading research university. Wide variety of courses instructed in English.

South Africa

BC in Makhanda: Rhodes University
Semester or full-year program in Makhanda (formerly Grahamstown) with courses across the disciplines. Supervised service-learning placements through the BC program.

BC in Cape Town: University of Cape Town
Semester or full-year program in Cape Town with courses across the disciplines. Recommended for students majoring in the sciences, business, and humanities. Volunteer and service opportunities available.

South Korea

Seoul National University
Semester or full-year program at a leading research university with a range of English-taught courses. Opportunities to study Korean language.

Sogang University
Semester or full-year program at a Jesuit university in Seoul, with a range of courses offered in English. On-campus housing.

Spain

BC in Barcelona: Business and Culture
Spring-only program at the Universitat Pompeu Fabra (UPF), designed specifically for CSOM major/minor students. Students take a mandatory core course, focusing on the neighborhoods of Barcelona, and a mixture of additional courses in business, the social sciences, and humanities.

BC in Barcelona: ESADE
Semester program in Barcelona offering business courses. English-taught curriculum.

BC in Barcelona: Universitat Pompeu Fabra (UPF)
Semester or full-year program in Barcelona offering courses in Spanish in many disciplines, except the sciences.

BC in Granada: Granada Institute of International Studies (GRIIS)
Semester or full-year program with courses focusing on Spanish language, culture, history, literature, art history, economics, and politics.
BC in Madrid: Carlos III Immersion and English Tracks
Based at the Universidad Carlos III de Madrid (UC3M), semester or full-year program for students in most disciplines, especially in the social sciences and business. Immersion and English tracks are available, based on students’ level of Spanish proficiency.

BC in Madrid: Universidad Pontificia Comillas
Semester or full-year program for students in many disciplines at this private, Jesuit institution. The ICADE campus offers courses in business, economics, and law. The Sociales campus offers courses in social sciences, humanities, and international relations.

Universidad de Deusto
Semester or full-year program in Spain's Basque country on campuses in San Sebastián and Bilbao. San Sebastián offers courses in business, economics, literature, sociology, philosophy, and communications. Bilbao offers courses in most disciplines.

Taiwan

Fu Jen Catholic University (FJCU)
Students may enroll in Chinese instructed classes, or a number of English-taught courses in a range of disciplines. Evening courses and tutoring in Mandarin are also available. Students receive support through a buddy program, spiritual and pastoral care residing in on-campus dormitories in New Taipei City.

United Arab Emirates

American University of Sharjah (AUS)
Semester or full-year program in a diverse, English-language university in the heart of the UAE with a large international population. Courses available in the arts, humanities, sciences, languages, and management.

Approved External Programs
To complement BC program offerings and accommodate students who would like to study in a country or a city in which BC currently does not offer direct enrollment options, the Office of Global Education offers a selection of approved external programs as semester and full-year options. Students pay Boston College tuition to participate in provider programs and remain eligible for BC institutional financial aid. For a complete list of approved external programs, visit bc.edu/global-education.

Summer Programs
Faculty-led summer programs and internships are open to undergraduate and graduate students with OGE approval. Programs are taught in English, with the exception of language courses. A sampling of Summer 2023 programs listed are subject to change on an annual basis:

Africa

South Africa
Truth, Justice and Reconciliation in South Africa (3 credits)
Global Health Delivery and Health Equity: A South African Context (3 credits)

Asia

Seoul, South Korea
Contentious History and the Politics of Contemporary Korea: Decolonization, Division, Development, and Democratization (3 credits)

Europe

Aix-En-Provence, France
Provence: Art, Culture, Cinema, Diversity (3 credits)
Athens, Greece
Borders and Refugees: The Ethics of Migration (3 credits)

Copenhagen, Denmark
Unlocking the Language Code: Computer Parsing and Acquisition of Grammar (3 credits)

Dublin, Ireland
The Business, History & Politics of Sport (3 credits)
The Neuroscience of Spirituality: Exploring Religion and the Brain (3 credits)
Work, Life, and Retirement in Ireland and the United States (3 credits)

Lisbon, Portugal
Marketing for Digital Nomads: Building the Skills You Need for the Remote Work Revolution (3 credits)
The European Union: The economic and political transformation of Europe (3 credits)

London, United Kingdom
Environment Law and Policy in the US and Europe (3 credits)

Madrid, Spain
Spanish Art History: from Al-Andalus to Picasso (3 credits)

Paris, France
Modernism in Paris (3 credits)
Drawing from the City of Lights (3 credits)

Prague, Czech Republic
The Philosophy of Beauty: Philosophy of the Person II (3 credits)

Rome, Italy
Art and Patronage in Renaissance and Baroque Rome and Beyond (3 credits)
Saints and Sinners (3 credits)

Venice, Italy
History of the Italian Mediterranean: Una Faccia, Una Razza (3 credits)

Latin America

Quito, Ecuador
Collaborative Service Engineering Project (3 credits)
Global Health Perspectives (3 credits)

San Jose, Costa Rica
SPAN2215-CCR1: Composition, Conversation and Reading I (3 credits)

Middle East

Haifa, Israel
Studying An Innovative Economy: Israel and the Start-Up Ecosystem (3 credits)

Internships

Buenos Aires, Montevideo, Seoul, Singapore, Stockholm, and Tokyo
Eight-week, independent internship program offers students the opportunity to experience the local work culture first-hand. OGE staff work with students to design the best possible internship based on student interests, majors, and previous work experience. (1 credit)
Other Opportunities

SEA Education Association Programs

The university offers a semester-long opportunity with SEA Education Association (SEA), an Environmental Studies program, which challenges students intellectually and physically by combining a sailing experience with the study of the deep ocean. The interdisciplinary program tracks are designed for students who wish to gain a comprehensive understanding of the world’s oceans, as well as explore a specific ocean-related theme, including shore components in Woods Hole, MA, and the Pacific.

Pre-Health Program

The Core curriculum at Boston College is an advantage for students interested in professions in the health field, as it allows students to explore their unique talents and passions. The skills acquired in the study of the sciences and the humanities are readily transferable to careers in the field of health and medicine.

“Science is the foundation of an excellent medical education, but a well-rounded humanist is best suited to make the most of that education.”

—David Muller, Dean for Medical Education and Professor and Chair of the Department of Medical Education and Co-Founder of the Visiting Doctors Program at Mount Sinai Medical School (Julie Rovner of KHN; Kaiser Health News, May 27, 2015).

Finding purpose in an academic program of study remains one of the most important decisions for BC students considering a career in the health professions. English majors acquire analytical skills needed for absorbing medical text. Philosophy majors develop critical thinking skills needed for differential diagnoses. Theology majors evaluate tenets beneficial in medical ethics and palliative care. History majors develop the ability to ask the pertinent questions in formulating patient history. According to the Association of American Medical Colleges’ 2022–2023 Report of Applicants and Matriculants to U.S. Medical Schools, the percentage acceptance rate of students majoring in the humanities was higher overall than for those majoring in other disciplines. Listed, as follows, are the acceptance rate percentages by discipline for the 2022–2023 application cycle: Humanities—50%, Mathematics, and Statistics—45%, Physical Sciences—46%, Biological Sciences—40%, and Social Sciences—40%. (Derived from data supplied in Table A-17 of the AAMC summary).

“The humanities provide an outstanding foundation for understanding complexity and human variability, the conceptual basis for understanding medicine.”

—Charles M. Wiener, MD, Professor of Medicine and Director Emeritus, Osler Internal Medicine Training Program at John Hopkins Medical Institute (Beth Howard—AAMC Medical Education, December 12, 2016).

Pre-Health students are encouraged to reflect on who they would like to become as health professionals. Eighty-two percent of BC students participate in campus service and volunteer organizations. This augments the formation of students to be “men and women for others” in the health career of their choice. Health professions graduate schools are interested in students who demonstrate a commitment of service to the underserved and the poor, including populations historically underrepresented in patient care. This dedication to others expands and informs their decision to pursue a career in the health field which supports comprehensive patient care and health equity for all. Students entering the Pre-Health program are encouraged to reflect on the mission of the Core curriculum to refine a purposeful and authentic life that integrates academic disciplines and the building of relationships. Each semester, a student should be engaged in a course (or courses) that inspires them and creates an awareness and a curiosity to explore and grow. Furthermore, Pre-Health students considering their program major are encouraged to reflect upon “The Three Key Questions” posed by Fr. Michael Himes, Professor of Theology at Boston College:

1. What brings me joy?
2. What am I good at?
3. What does the world need me to be?

The Pre-Health program in the Morrissey College of Arts and Sciences is an open program for all students in every major program of study at Boston College. There is no minimum GPA requirement. The program provides support and comprehensive advising to undergraduates and alumni of Boston College interested in medical, dental, or veterinary careers, as well as other areas of health profession study. Students benefit from majoring in any of the varied academic disciplines offered at BC, which would help them address the three aforementioned
questions. As a Jesuit, Catholic institution, Boston College is dedicated to the continual process of intellectual inquiry and student formation. Students are encouraged to examine the full spectrum of options and to select a major and find an enriching program of study in which he/she will excel.

Utilizing the Pre-Health Team to Maximize Success

Irrespective of major (humanities or STEM), the BC Pre-Health team meets with students at every stage of their Pre-Health portfolio development, from prospective freshmen to seniors and alumni. The Pre-Health team assists with all aspects of planning when considering a career in the health professions, including selection of a major, course selection, gaining health-related experience, evaluating extracurricular activities, preparing for professional exams (MCAT, DAT, GRE) and all aspects of the pre-and post-application process for health profession schools. If you are considering a career in a health profession, please set up an appointment with our office by emailing premed@bc.edu. For up-to-date information about the Pre-Health program please email us in order to receive notifications regarding programming and upcoming events. Our office resides within the Academic Advising Center and is located in Stokes Hall S132.

All Majors at Boston College Have Access to the Pre-Health Program

It is important to note that medical, dental, and veterinary medical school admissions committees accept a wide variety of majors. Therefore, it is imperative for students to decide on the particular major that would lead to their success as they embark on their unique career path.

Students are invited to think, explore, and discern in order to learn across disciplines and develop their minds and educational experiences to the fullest potential. The goal is to gain the ability to think critically, both broadly and deeply, and at Boston College, a liberal arts education is focused on the whole person. The liberal arts have always been at the center of the Jesuit, Catholic intellectual tradition, which promotes the integration of students’ academic and personal goals, inspiring them to reflect on who they are, who they want to become, and how they want to engage in the world for the common good.

Gregory Kalscheur, S.J., Dean of the Morrissey College of Arts and Sciences shares, “At Boston College, we hope our students become women and men of depth of thought and creative imagination, who are ready to engage the needs of our world and well-prepared for meaningful lives of leadership, scholarship, and service.”

In choosing a major, we encourage students to allow their choice of major be shaped by academic experiences and exploration in programs of study that resonate with the student’s interests, skills, and talents. For example, a student may want to reflect upon evidence of previous academic success in a certain area when selecting a major. However, if a student is considering a major program of study that is new to the student, without prior foundational coursework, then the student may wish to weigh the pluses and minuses in forging new territory, as opposed to leveraging prior academic success. Exploring the groundwork for future immersion in a discipline is the primary tenet of the Core curriculum which fosters a broad and diverse perspective of the humanities and arts, the sciences, and the social sciences.

The BC Pre-Health team works with students to strategize on the optimal timeframe and coursework necessary to complete the foundational requirements. Keep in mind that course requirements vary when applying to health profession schools. Irrespective of any major at Boston College (humanities or STEM), below is a summary of the necessary Pre-Health program requirements. The Pre-Health team encourages interested students to research the requirements for specific medical or dental schools of interest, as well as research elective coursework helpful in preparation for standardized entrance exams.

Program of Study

Suggested Foundational Curriculum for Pre-Health Students:

- Two semesters of Biology with Lab
- Two semesters of General Chemistry with Lab
- Two semesters of Organic Chemistry with Lab and/or one semester of Organic Chemistry with one semester of Biochemistry*
- Two semesters of Physics with Lab (either Calculus-based Physics or Algebra-based Physics is acceptable; refer to major program requirements as well.)
- Two semesters of English
It is incumbent on the prospective applicant to be knowledgeable of individual medical school requirements when planning his or her course selection. We suggest meeting with a member of the Pre-Health team if uncertain.

The required courses for the professional school of interest may be taken during any of the four undergraduate years in any order with the exception of the General Chemistry– Organic Chemistry sequence. In order to apply to health profession schools directly upon graduation from BC, the student must complete all course requirements in three years, in addition to successful completion of standardized testing. Most BC applicants, however, elect to distribute the Pre-Health coursework over four years of undergraduate study and apply to medical, dental, or veterinary school as seniors and/or as alumni. The average age of a student matriculating into medical school is approximately 25 years old; therefore, electing to take one or more “growth” years to explore, reflect, and act on a specific health-related problem, clinical, or scientific inquiry may inexorably improve the competitiveness of a student’s candidacy. At Boston College, the Pre-Health team operates as a cohesive advising unit that closely collaborates with students during each undergraduate year of portfolio development to help create a career narrative.

**Freshman Year:** Interested students should attend the freshman meeting and set up an initial consultation with the Pre-Health program office to learn and capitalize on the benefits of drop-in advising sessions and explore resources.

**Sophomore Year:** Interested students should attend the sophomore meeting and review progress and achievements with the Pre-Health team. Specific attention should be given to gaining relevant health-related experiences.

**Junior Year/Senior Year:** Interested students should attend the application meeting and meet regularly with the Pre-Health team to ensure that all materials are complete to initiate the BC committee letter application process.

The BC Pre-Health program collaborates closely with BC alumni and the greater professional community to offer students the full gamut of possible pathways leading to a meaningful career in the health field. A unique aspect of a valued service that BC offers students interested in medical or dental school is the opportunity to obtain a committee letter of recommendation endorsed by the Boston College faculty committee. This letter presents a comprehensive assessment of the student under review by the committee and showcases the accomplishments and achievements of an applicant in a personalized portfolio. Additionally, during the application process, students receive one-on-one expert advising from an individual faculty member on the committee. While the Pre-Health team is dedicated to ushering students through the process of applying for professional health programs, it is important to note that the onus is on students to reflect, discern, and act in order to pursue their unique career path.

**Freshman Pre-Health Checklist**

1. Register for Pre-Health program announcements at premed@bc.edu
2. Attend the freshman meeting (first week in September — email invitation will be sent out)
3. Read the freshman checklist online
4. Make an appointment with a member of the Pre-Health team by calling 617-552-4663
5. Cultivate a mentor (get to know your professors and other administrative staff)
6. Develop study skills, attend office hours, and seek tutoring assistance from the Connors Family Learning Center and/or academic support when warranted
7. Visit academic departments to research programs of study, minors, and concentrations
8. Get involved with a health-related club (e.g., Mendel Society, Predental Society)
9. Get involved judiciously with on- or off-campus service organizations and extracurricular activities

**Pre-Law Advising**

Boston College has a dedicated pre-law advisor and offers pre-law advising through the Career Center. The Boston College Career Center and two pre-law student associations, the Bellarmine Law Society and the AHANA Pre-Law Student Association, present panels each year on different aspects of the legal profession and the law school admission process. The pre-law advisor is available to meet individually with students interested in law as a career whenever questions or concerns arise. While no particular major is preferred by law schools, it is suggested that students consider including some of the following courses in their programs of study: logic, mathematics, law, public speaking, English (especially intensive writing courses), history, sociology, and political science. You can indicate your interest in receiving announcements of pre-law panels and activities by officially registering as Pre-Law in the Academic Advising Center or Office of Student Services. Before scheduling a pre-law advising appointment, students should review the [Boston College Pre-Law Advising Handbook](#). For
further information, contact the Career Center at 617-552-3430 and view the Career Center’s website for information on Applying to Law School.

PULSE Program for Service Learning

For a description of the PULSE Program, please visit the PULSE website.

Reserve Officers' Training Corps

Air Force Reserve Officers’ Training Corps

Through a cross-enrolled program with Boston University, interested Boston College students may participate in the Air Force Reserve Officers’ Training Corps program. Scholarships (full and partial) are available to qualified students for four, three, or two years and include tuition (full or partial), books, fees, and a monthly stipend. Freshmen and sophomores can compete for 2- and 3-year scholarships, some of which would cover full tuition, others which cover $15,000 per academic year. Academic specialties for scholarships include all majors. All training, drills, and classes are held at the BU campus. Service obligations are one year for each scholarship year (active duty), while pilots are obligated for eight years active duty after completion of flight school. To obtain further information, contact the Department of Aerospace Studies, Boston University, 617-353-4705, afrotc-all-mail@bu.edu.

Army Reserve Officers’ Training Corps

The U.S. Army offers Reserve Officers’ Training Corps (ROTC) at Boston College as an extension school in cooperation with Northeastern University. Combined, Boston College and Northeastern University make up the Liberty Battalion. Boston College students attend classes and training on the Chestnut Hill campus. Upon graduation and successful completion of all pre-commissioning requirements, Cadets receive a commission as a Second Lieutenant in the U.S. Army and serve on active duty, U.S. Army Reserves, or National Guard in a variety of fields. Qualified graduates may also be selected to attend professional schools, such as medical or law school.

Scholarships may be available for qualified high school students admitted to Boston College and college students currently attending BC. In addition, scholarships may be available to Boston College Nurses through the ROTC program. All scholarships include full tuition and mandatory fees, a monthly stipend, and money for books. Boston College also awards additional incentives for Army ROTC scholarship Cadets. For more information including an application, contact the Liberty Battalion Enrollment and Scholarship Officer at 617-373-2376 or visit the BC Army ROTC website and rotc.northeastern.edu.

Marine Corps Platoon Leaders' Class (PLC)

Available in connection with the Marine Officers Selection Office, Boston, the PLC Program is open to qualified freshmen, sophomores, and juniors. No formal classes or training takes place during the academic year. Students/candidates attend Officer Candidate School (Quantico, VA) training either in two 6-week sessions (male freshmen/sophomores) or one 10-week session (male and female juniors/seniors). Pay and expenses are received during training. No commitment to the USMC is incurred after OCS until a degree is awarded and a Second Lieutenant’s commission issued. Service obligations are then three and a half years active duty or longer for aviation positions. Students/candidates may drop from the program at any time prior to commissioning. For more information, contact the Marine Officer Selection Office, Boston, at 888-753-8762.

Navy Reserve Officers' Training Corps

 Qualified BC students may cross enroll in Navy Reserve Officers’ Training Corps (and the Marine Corps Option) at Boston University. There are 3- and 4-year programs with possible scholarships (full tuition, some books/fees expenses, monthly stipend, but no room and board). All classes and drills are held at Boston University. Scholarship students incur an active duty service obligation. For further information, please contact the Department of Naval Sciences, Boston University, 617-358-0471, burotc@bc.edu.

ROTC courses display on the academic record but do not count towards the required number of credits for graduation or in the G.P.A.
Undergraduate Faculty Research Fellows Program

Boston College established the Undergraduate Faculty Research Fellows Program (URF) for the purpose of enhancing the academic experience of undergraduates by cultivating their research skills and fostering mentor relationships between undergraduates and faculty. The program provides a grant to faculty to pay for a student’s research assistance with a faculty member’s research project. It is considered student employment and the student may work up to 20 hours a week during the academic semester, up to 40 hours a week during semester breaks or the summer, depending on faculty need, the funding available, and student availability. Students do not apply directly.

The application for an Undergraduate Research Fellowship must come from the faculty member whose research project the student will assist. Students can inquire directly with faculty to express their interest in being involved in the faculty member’s research. Students cannot receive academic credit for work done under an URF.
Leadership and University Information

Trustees & Leadership

The University is led by William P. Leahy, S.J., 25th President of Boston College.

Provost and Dean of Faculties David Quigley oversees the University’s academic life and leads its distinguished faculty.

Boston College’s eight schools and colleges are led by academic deans, who report to the provost and direct the academic initiatives related to their schools. University vice presidents oversee Boston College’s administrative areas.

About BC

Education with a heart and soul—and the power to transform

Boston College, the first institution of higher education to operate in the city of Boston, is today among the nation’s foremost universities, a leader in the liberal arts, scientific inquiry, and student formation.

Grounded in the ideals that inspired our Jesuit founders, Boston College urges students to look inward but always to reach out—to develop their minds and talents to the fullest and use them in service to others.

We ask our students to explore the big questions and challenge them to ask: What difference will I make? How will my knowledge serve the world?

BC Basics

Origin
Founded in Boston's South End in 1863.

Colors

Maroon and gold

Motto

"Ever to Excel" from Book Six of *The Iliad*

Mascot

The Eagle
Spotlight
BC Global
True to our Jesuit, Catholic heritage, Boston College has been committed to international collaboration since our founding in 1863. The Global Engagement Committee will explore new opportunities, challenges, and resources needed for enhancing our international presence.

BC Global Website
Global Engagement Committee

Boston College Traditions

Convocation
“Set the World Aflame”
Freshman Eagles begin their BC journey with the traditional “first flight”—a lantern-led procession down the Higgins stairs to the Conte Forum for an inspiring guest speaker.

Beanpot
Best of Boston
Since 1952, teams from BC, BU, Harvard, and Northeastern have competed for hockey dominance in this legendary two-week tournament.

Red Bandana
Remembering Welles Crowther
Every year, the BC community honors the memory of alumnus and 9/11 hero Welles Remy Crowther ’99 with a 5k “Red Bandana Race” and a dedicated football and lacrosse game.

Arts Festival
Creativity on Campus
Music, theater, dance, poetry—this vibrant community event draws more than 1,000 talented student and faculty performers.

ALC Showdown
Let’s Dance!
BC’s largest annual student dance competition promotes diversity and cultural awareness through dance.
Marathon Monday

A Boston Tradition
Every Patriot’s Day, the BC community cheers on runners in the Boston Marathon, including the BC Campus School team, as they make their way up Commonwealth Avenue.

Superfans

Gold Rush
Superfans wear gold and get loud as they cheer the Eagles to victory.

Student Involvement Fair

Find Your Spot
This annual fair gives incoming students a chance to explore the more than 300 diverse organizations, programs, and offices on campus.

Mass of the Holy Spirit

Blessings for a New Year
A Jesuit tradition dating back to the Middle Ages, the Mass of the Holy Spirit brings the BC community together to mark the opening of the school year.

Christmas Tree Lighting

Celebrating the Holidays
BC kicks off the Christmas season with a tree lighting ceremony featuring festive performances, games, and a chance to take a selfie with Santa.

ALS Awareness Game

Fenway Park Takeover
For one night a year, the BC baseball team plays a home game at Fenway Park to raise money in the fight against ALS.

Commencement

Congrats, Grads!
Graduating students and their families celebrate their academic accomplishments and hear from inspiring speakers at the University Commencement ceremony.
President's Message

Boston College: Answering Society's Call

On behalf of the entire Boston College family, I am pleased to introduce you to Boston College, and to offer my vision for the University.

The history of Boston College is a narrative of response to society's call. In 1863, that call came from an immigrant community that sought a Jesuit education to foster social mobility. Boston College offered that promise.

Today, the call emanates from a world that has experienced an explosion of knowledge, but not a corresponding growth in understanding; a world that too often lacks trust in its leaders and faith in its institutions. It is a world that has developed wondrous technologies that link continents, but isolate human beings, leaving many men and women weary and dispirited, feeling distant from moral purpose, uncertain about knowledge or the very worth of human endeavor.

Boston College is uniquely capable of answering this call, of speaking to this world. As an institution of higher education, Boston College is committed to the discovery and transmission of knowledge. But reflecting its Jesuit and Catholic heritage, it also seeks to integrate excellence and religious commitment, to both inform and form its students.

Boston College endeavors to educate a new generation of leaders—men and women who will be capable of shaping the future with vision, justice, and charity—with a sense of calling, with concern for all of the human family.

We pursue this challenge because it is a worthy goal for any university, but particularly for Boston College, a university uniquely suited to be a beacon of hope and light for all. I invite you to join us, as a prospective student, parent, or friend.

William P. Leahy, S.J.
President
Mission & History

Where We Began

Boston College was founded in 1863 by the Society of Jesus (the Jesuits) to educate Boston’s predominantly Irish, Catholic immigrant community. It opened its doors on September 5, 1864, in a building on Harrison Avenue in Boston’s South End, a “small streetcar college” for commuting students.

When it outgrew the limitations of the space, then-president Rev. Thomas I. Gasson, S.J., bought 31 acres of the former Lawrence Farm in Chestnut Hill, Massachusetts, and broke ground in 1909 on a new campus, today fondly known as “the Heights.”

BC began as an undergraduate liberal arts college, but as its aspirations grew, it added graduate programs and professional schools fulfilling its charter as a university.

Through the decades, Boston College has become an internationally respected research university and a center of academic excellence.

Where We Are Going

Boston College builds upon its traditions. It seeks to be the national leader in the liberal arts; to fulfill its Jesuit, Catholic mission of faith and service; to continue to develop model programs to support students in their formation; and to seek solutions—as researchers, educators, leaders, and caregivers—that directly address the world’s most urgent problems.
Guiding Our Path

Boston College remains committed to leading its students on a comprehensive journey of discovery—one that integrates their intellectual, personal, ethical, and religious formation.

Inspiration for Boston College’s academic and societal mission is drawn from the University’s distinctive religious and intellectual heritage. As a Jesuit, Catholic University, Boston College is rooted in a world view that calls us to learn, to search for truth, and to live in service to others. To fulfill that mission, we welcome and embrace the contributions of a diverse student body from many faith traditions.

Advanced Placement

There are a number of ways to earn advanced placement units at Boston College including qualifying scores on College Board Advanced Placement (AP) exams, International Baccalaureate exams, British A Level exams, French Baccalaureate exams, as well as results from the German Abitur, and the Swiss Maturité and Italian Maturità. Official results from all testing should be sent to the Office of Transfer Admission for evaluation. Students seeking Advanced Standing, which is the option to complete their undergraduate studies in six semesters of full-time study, shall be in touch with their Academic Dean no sooner than the completion of their first semester at BC. Qualifying scores will be assigned advanced placement units as outlined in the tabs below.

For current Boston College students:

If your Advanced Placement scores are not reflected on your record on the Agora Portal, please order a new score report from the College Board and have it sent to Boston College. Our code is 3083. Please keep in mind that scores take approximately two weeks to arrive from the College Board. If you have questions about your scores and/or placement, please contact the Office of Undergraduate Admission at uadmit@bc.edu. Thank you.

Advanced Placement

Boston College participates in the Advanced Placement program of the College Entrance Examination Board. Applicants interested in advanced placement should make arrangements to take the Advanced Placement Examinations given by the College Board in May of each year.

The following table displays Boston College’s Advanced Placement policy. Boston College reserves the right to change this policy, as is determined by campus administrators. In general, a student scoring four or five on the exams will be awarded advanced placement. In some instances, a score of three will make a student eligible for advanced placement. In most cases, students do not earn actual credit, rather, they fulfill corresponding requirements in the University Core Curriculum. You will still be required to take the full 120 credits necessary for graduation unless you have the equivalency of 30 AP credits, in which case you may qualify for advanced standing and would be eligible to graduate from Boston College in 3 years.

</table>
**Students in the Connell School of Nursing fulfill their Natural Science and Mathematics Core Curriculum requirements through coursework taken during their freshman year. Therefore, qualifying exam scores cannot be used to fulfill those requirements for nursing students.**

**Beginning with students entering the Spring 2022 term and later, a qualifying score in both Macroeconomics and Microeconomics earns placement for ECON1101 Principles of Economics, which fulfills 1 Social Science Core. Students with qualifying scores in both Macroeconomics and Microeconomics would still need to satisfy the second Social Science Core requirement.**

### International Baccalaureate

Each score of 6 or 7 on Higher Level exams will earn advanced placement units and will generally satisfy a core requirement. You will still be required to take the full 120 credits necessary for graduation, unless you have the equivalency of 30 credits, in which case you may qualify for advanced standing and would be eligible to graduate from Boston College in 3 years. Please reference the table below for specific exams.

* IB elective units cannot be used to fulfill the four arts and sciences electives required for CSOM, but can count toward the 30 units required to be eligible to apply for advanced standing. Electives do not count toward the degree in any other scenario because IB units are generally used for placement only, not credit.

** Students interested in the Computer Science major must consult with the Computer Science Department to determine if these electives can in any way apply to the major.

*** Beginning with students entering the Fall 2023 term and later, a qualifying score in English B Language will no longer earn advanced placement.

Sports, Exercise and Health Science IB is not recognized by Boston College.

SAT Subject Tests

All students in the Morrissey College of Arts and Sciences must demonstrate intermediate-level proficiency in a foreign language in order to graduate from Boston College. The SAT Subject Test scores below demonstrate intermediate-level proficiency at Boston College.

</table>

* There are other A-Level courses offered that do not apply to a degree at Boston College. If the course is not listed here, no advanced placement units can be earned.

**French Baccalaureate**

Scores of 14 or higher* will be considered for a maximum of six placement units for each 12th grade Spécialité subject.

A minimum score of 12* for each 12th grade Spécialité subject will be considered for a maximum of three placement units.

Students completing the French Baccalaureate with International Option (OIB) may earn advanced placement units in English and history for corresponding exam scores.

Scores below 10 do not qualify.

Units may be used to fulfill corresponding University Core or major requirements.

*Advanced Placement is based on the French Baccalaureate exam results and is considered in the context of departmental review. Boston College reserves the right to change this policy, as is determined by campus administrators.
Italian Maturità

For students who earn an exam score of 70 or higher on the final exam, advanced placement units will be awarded only for subjects in which the written exam was taken (no placement for oral exams) and the average score for the final exam over the last two years is 7 or higher. No advanced placement units can be earned for English.

German Abitur

Placement will be considered for the four subjects scored in the Abitur final exams. For two subjects listed as the "main subject," scores of 10 or higher will earn 6 advanced placement units in corresponding subject areas. For two additional "basic courses" with scores of 10 or higher, 3 advanced placement units will be earned in the corresponding subject areas. No advanced placement units can be earned for English.

Swiss Maturité

Advanced placement units can be earned for exam scores of 4 or better. No advanced placement units can be earned for English.

Advanced Standing — Graduating in 3 Years

Students who earn a total of 30 Advanced Placement units may be eligible for Advanced Standing and have the option to complete their undergraduate studies in three years. Students interested in this option should be in touch with their Dean following completion of their first semester at BC. No decisions on Advanced Standing will be made prior to that time. Students seeking Advanced Standing must be able to complete all degree requirements by the proposed graduation date and be approved for Advanced Standing by the Dean before the start of their third year of undergraduate study.

College Courses Taken During High School

Advanced placement units can be earned for college courses taken during high school according to the following guidelines:

Students enrolled in courses designated as “college courses” that are taken at the high school with a high school teacher may only earn advanced placement units if corresponding College Board AP exams are taken and qualifying scores are earned. A college transcript alone cannot be used to earn advanced placement units for these courses.

College coursework taken on a college campus with a college professor and with other college students either during the academic year or over the summer may be evaluated for advanced placement units. Only courses that are deemed equal in depth and breadth to coursework taught at Boston College and are being used to supplement high school coursework (and not to fulfill high school requirements) will be considered.

Each 3 or 4 credit course with a grade of B or better will earn 3 advanced placement units. Students will still be required to take the full 120 credits necessary for graduation, unless they have the equivalency of 30 credits, in which case they may qualify for Advanced Standing and would be eligible to graduate from Boston College in 3 years. College transcripts for these courses should be submitted to the Office of Transfer Admission by August 1. Students who enroll at a local college to satisfy high school graduation requirements are not eligible for advanced placement units unless they take the corresponding College Board AP exams and earn qualifying scores.
Notices & Disclosures

Boston College is committed to providing information in a manner that is accessible to all. If you are in need of a printed copy of the material presented on this web page, please contact the Office of Student Services.

Higher Education Opportunity Act (HEOA)

Visit the link below to learn more about the Higher Education Opportunity Act (HEOA).
Higher Education Opportunity Act (HEOA) Notices and Disclosures

Family Educational Rights and Privacy Act (FERPA)

The Executive Director of Student Services and the Vice President for Student Affairs are responsible for notifying students annually of their rights under FERPA. The annual notice is to appear in the Boston College Bulletin and in the Boston College Student Guide.

All non-directory information is considered confidential and will not be released to outside inquiries without the express written consent of the student.

Student Rights Under FERPA

Boston College maintains a large number of records regarding its students in the administration of its educational programs, as well as its housing, athletics, and extracurricular programs. The University also maintains employment and financial records for its own use and to comply with state and federal regulations. Boston College is committed to protecting the privacy interests of its students and to maintaining the confidentiality of student records in accordance with the Family Educational Rights and Privacy Act of 1974 (FERPA).

These rights are as follows:

- The right to inspect and review the student’s education record within 45 days of the day the University receives a request for access.

  Any student who wishes to inspect and review information contained in an education record maintained by any office of the University may, with proper identification, request access to the record from the office responsible for maintaining that record. Unless the circumstances require the existence of a formal request, an oral request may be honored.

  Whenever an office responsible for maintaining education records is unable to respond, the student may submit to the Office of Student Services, dean, academic department head, or other appropriate official a written request that identifies the record he or she wishes to inspect. The University official shall provide access within 45 days after the University receives the request, and shall notify the student of the time and place the record may be inspected. If the record is not maintained by the University official to whom the request is submitted, that official is to advise the student of the correct official to whom the request is to be addressed.

- The right to request the amendment of the student’s education record if the student believes that information contained in his or her record is inaccurate, misleading or in violation of his or her rights of privacy.

  Any student who believes that information contained in his or her education record is inaccurate, misleading, or in violation of his or her rights of privacy is to write to the University official responsible for the record, clearly identifying the part of the record he or she wants changed, and specifying why the record should be amended.

  If the University concludes that the record should not be amended as requested, the University will notify the student, advise the student of his or her right to a hearing and provide information about the hearing process.

- The right to consent to the disclosure of personally identifiable information contained in the student’s education record, except to the extent permitted under FERPA. One exception that permits disclosure without consent is disclosure to University officials with legitimate educational interests, which may include employees in administrative, supervisory, academic or research, or support staff
The right to file a complaint with the U.S. Department of Education concerning alleged failures by the University to comply with the requirements of FERPA. Written complaints may be directed to the Family Policy Compliance Office, U.S. Department of Education, 400 Maryland Avenue, SW, Washington, D.C., 20202-4605.

Please note that as part of the Solomon Amendment, Boston College is required by law to provide branches of the military access to certain student directory information which normally would be denied to them under the Family Educational Rights and Privacy Act (FERPA).

FERPA Release Form

Student Loan Code of Conduct for Employees

All Boston College employees whose job responsibilities include matters related to student financial aid are expected to maintain exemplary standards of professional conduct and must adhere to this Code of Conduct in compliance with Federal regulations. The Executive Director of Student Services shall notify these employees annually of their obligations under this Code.

Boston College:

- Prohibits all revenue-sharing arrangements with lenders. The University will not promote or recommend any lender in exchange for a fee or other material benefit from that lender.
- Does not request or accept offers of funds for private loans, including opportunity pool loans.
- Certifies loans from any lender selected by a borrower without undue delay, and will not direct a first-time borrower’s loan to a particular lender.
- Ensures that the process through which the student signs a Master Promissory Note preserves the student’s right to select the lender of his or her choice.
- Does not arrange for alternate loan programs that disadvantage students or parents not enrolled in the program or receiving such loan terms.
- Prohibits the request or acceptance of staffing assistance from lenders.
- Prohibits employees or agents of a lender from identifying themselves, either directly or by implication, as an employee of Boston College to students, parents or any persons seeking information from Boston College.
- Bases the selection of lenders for a preferred lender list solely on the best interests of the students and parents.
- Fully discloses the selection process for a preferred lender.
- Provides borrowers with consumer information about the loan products offered by the lenders on a preferred lender list, including any agreements lenders have to sell their loans to other entities.
- Informs students and parents that they are not required to use any of the lenders on a preferred lender list and can select any lender of their choice.

Every Boston College employee involved in any aspect of the loan process (this includes, but is not limited to, the Financial Aid staff, both on the main campus and at the Law School, and the Enrollment Management staff) must avoid any situations that create a potential conflict of interest between the employee’s personal or outside interests and his or her role and responsibilities as an employee of Boston College, and must disclose to his or her supervisor any potential conflict as it arises.

Specifically, staff members must not:

- Solicit or accept gifts with more than a de minimis value from any business entity involved in any aspect of student financial aid, including, without limitation, cash payments, stocks, club memberships, favors, discounts, lodging, meals, entertainment, and
services. This prohibition extends to a staff member’s family (includes staff member’s and spouse’s: parent or stepparent; sibling or step-sibling; child or stepchild; and grandchild or step-grandchild, as well as a child's spouse and a sibling's spouse).

- Undertake any activity, whether compensated or not, outside of Boston College that has the potential to create a conflict of interest with the staff member’s duties as a financial aid professional employed by Boston College, including accepting any fee, payment, or other financial benefit as compensation for any type of employment, consulting or other arrangement with a lender, guarantor, or servicer.
- Receive any compensation for serving on an advisory board, commission, or group established by a lender, guarantor, or group of lenders or guarantors. A staff member wishing to serve on an advisory board must seek prior approval from his or her supervisor, and may be reimbursed only for reasonable expenses while serving on an approved advisory board.

Staff members should understand and adhere to all institutional policies and any local, state and federal requirements that are applicable to their conduct or job performance. Any staff member who has a question whether a particular situation or activity creates a conflict of interest or violates any law or policy should immediately notify their supervisor prior to commencing such activity, or at the earliest time when such a question arises. Supervisors shall contact the Office of the General Counsel upon receipt of any inquiries.

Confidentiality of Student Records

Certain personally identifiable information from a student’s education record, designated by Boston College as directory information, may be released without the student’s prior consent. This information includes name; term, home, local, and electronic mail addresses; telephone listing; date and place of birth; photograph; major field of study; enrollment status; grade level; participation in officially recognized activities and sports; weight and height of members of athletic teams; dates of attendance; school/college of enrollment; anticipated date of graduation; degrees and awards received; the most recent previous educational agency or institution attended; and other similar information.

A student can prevent the release of all directory information including verification of enrollment, and may suppress selected directory information either to the Boston College community or to the general public. In order to do this, students must visit www.bc.edu/myservices to suppress the release of all or selected directory information. Suppression is available by selecting Privacy Preferences. Student directory information will not be blocked from faculty and staff conducting official University business.

All non-directory information is considered confidential and will not be released to outside inquiries without the express written consent of the student unless an exception under FERPA permits the disclosure. For more information, access Boston College's Student Educational Records policy.

Disclosures to Parents of Students

When a student reaches the age of 18, or attends a postsecondary institution regardless of age, FERPA rights transfer to the student.

Guidelines for the disclosure of information to parents are as follows:

- Parents may obtain directory information at the discretion of the institution.
- Parents may obtain nondirectory information (e.g., grades, GPA) at the discretion of the institution and after it is determined that the student is legally dependent on either parent.
- Parents may also obtain nondirectory information if they have a signed consent from the student.

Notice of Nondiscrimination

Visit the link below to view the Notice of Nondiscrimination.

Notice of Nondiscrimination

University Communication Policies and Student Responsibilities

Official communications of the University with its currently enrolled students, including notices of academic and administrative matters and communications from faculty and administrative staff, may be sent via postal service, campus mail, or email. To assure that these communications arrive in a timely manner, all enrolled students have the following responsibilities:
Postal Service and Campus Mail

For purposes of written communication, the student’s local and permanent addresses on record at Student Services will be regarded as the student’s official local and permanent residences. All students have a responsibility to provide both local and permanent mailing addresses, and to enter corrections at www.bc.edu/myservices if the addresses are not accurate in University records. Students should review their address record for accuracy at the beginning of each semester, and again soon after submitting any corrections.

Students who are studying abroad have a responsibility to provide their local international address to the Office of Global Education.

Email

The University recognizes and uses electronic mail as an appropriate medium for official communication. The University provides all enrolled students with Boston College email addresses, as well as access to email services from computer stations at various locations on campus. All students are expected to access their email accounts regularly, to check for official University communications, and to respond as necessary to such communications.

All student responses to official email communications from the University must contain the student’s Boston College email address in the “From:” and “Reply To:” lines, and should originate from the student’s Boston College email address, to assure that the response can be recognized as a message from a member of the University community.

Students may forward their email messages from their Boston College email address to non-university email systems, if they wish. In such cases, however, students shall be solely responsible for all consequences arising from such forwarding arrangements, including any failure by the non-university system to deliver or retain official University communications. Students should send test messages to and from their University email account on a regular basis, to confirm that their email service is functioning reliably.

Voter Registration Information

Boston College believes that every student has a responsibility to be an engaged community member. To that end, we have partnered with TurboVote to provide you with the information and materials you need to vote in every election from local to presidential.

TurboVote gives you the tools to help you register to vote online. You may learn more about this service at bc.turbovote.org.

For questions or concerns, please contact Boston College Student Affairs at bcsa@bc.edu.

2023–2024 Medical Insurance Information

- Enrollment (2023–2024)
- Waivers (2023–2024)
- ID Cards & Your UnitedHealthcare Account (2023–2024)
- Forms (2023–2024)
- Contacts & Questions (2023–2024)
- Summer Enrollment for New Students

Enrollment (2023–2024)

All students listed below are automatically enrolled in and billed for the student health insurance plan:

- Students enrolled in a degree program, regardless of credit hours
- Students who are not citizens or permanent residents of the U.S.
- Non-degree students enrolled at least 75% of full-time. Students are responsible for monitoring their eligibility status. (For graduate students in the schools of Morrissey College of Arts and Sciences, Lynch School of Education and Human Development, Carroll School of Management, Connell Graduate School of Nursing, School of Social Work, School of Theology and Ministry, and Woods College of Advancing Studies, 75% of full-time is 7 credits or more. For undergraduates in the Woods College of Advancing Studies, 75% of full-time is 9 credits or more.)

Graduate students (non-Law): Registration for classes triggers your insurance enrollment, and it takes 5–7 business days for your insurance to show as active in the carrier’s system. While the fall semester coverage begins on August 7 regardless of when you register, you should keep this timeframe in mind if you have health care providers who will need to verify your coverage with the insurance company. You should register for classes by mid-July if you need your insurance to show as active in the insurance system on August 7.

Post-doctorate students are eligible to enroll on a voluntary basis.

Dependent Enrollment

Insured students have the option of enrolling their eligible dependents (a spouse, domestic partner, or a child under the age of 26). The enrollment form is available under the Forms tab. Dependents must be enrolled for the same time period as the student. For example, a student enrolled beginning in the fall semester cannot purchase dependent coverage starting in the spring unless there is a qualifying event; see the enrollment form for further details. Dependents enrolled for the fall must be re-enrolled for the spring, and you are responsible for enrolling and re-enrolling your eligible dependents each semester. The deadline to enroll dependents is September 22, 2023 for the fall semester and January 26, 2024 for students newly enrolling for the spring. Enrollment forms received after that date will not be accepted.

Note to students: You need to be enrolled in the insurance plan in order to enroll dependents. To make the dependent enrollment process as smooth as possible, you should register for classes as early as you are able.
After waivers, students’ enrollment is covered for the remainder of that semester. Coverage may also be extended for the following semester with approval from Boston College. Enrollment is not automatic. Please contact the Office of Student Services for information about enrollment and dates of eligibility.

Insurance Plan Benefits
UnitedHealthcare Coverage

The plan offers comprehensive benefits that include hospital room and board, inpatient and outpatient surgical procedures, lab work, x-rays, chemotherapy, radiation, inpatient and outpatient mental health, physician office and consultant visits, ambulance, and prescription drugs.

Refer to the benefits information (available in late June) and the information available at UnitedHealthcare for complete details about coverage, limitations and exclusions.

Referrals from University Health Services

A referral is not required with the UnitedHealthcare Plan, but there are many benefits to first seeking care or advice from Boston College’s University Health Services. Visit University Health Services’ website for more information.

Coverage off Campus

If you paid the premium for the entire year, you will be covered from August 7, 2023 through August 6, 2024. UnitedHealthcare provides coverage whether you are in Massachusetts, out of state, or studying or travelling abroad.

While studying or traveling abroad, keep your identification card with you and take a copy of the brochure for reference. When outside the United States, you will likely be asked to pay for your medical care first and then will need to seek reimbursement. Covered expenses will be reimbursed on a non-network basis. When you submit claims for reimbursement, you may need to have the itemized bill(s) translated into English and include additional information. UHC Global can be reached toll-free from within the United States at 800-527-0218 or collect from outside of the United States at 410-543-6330, or email at assistance@UHCGlobal.com.

Leave of Absence

If a student who is enrolled in the student insurance plan takes a medical leave of absence effective mid-semester, they will continue to be covered for the remainder of that semester. Coverage may also be extended for the following semester with approval from Boston College. Enrollment is not automatic. Please contact the Office of Student Services for information about enrollment and dates of eligibility.

Enrollment After Waiving the Student Health Insurance Plan

Students who initially waive participation in the student plan and subsequently wish to enroll prior to the waiver deadline may rescind waivers by deleting the prior waiver on the www.bc.edu/myservices or by completing the Rescind Waiver form, available on the Forms tab.

After the waiver deadline, a student may enroll in the student plan only on the basis of a qualifying event. Qualifying events include marriage,
birth of a child, or loss of coverage from an existing policy. Students who qualify may submit a Petition to Add form, which will be available under the Forms tab after the waiver deadline.

**Graduating Students**

Coverage for graduating students ends on January 11, 2024 (for fall graduates) or August 6, 2024 (for spring and summer graduates). There is not an option to extend the student plan. You can contact UnitedHealthcare about enrolling directly, or explore your options through your state Health Connector. The site for the MA State Health Connector is [https://www.mahealthconnector.org/](https://www.mahealthconnector.org/).

**Waivers (2023–2024)**

The medical insurance coverage periods are August 7, 2023 to January 11, 2024 for the fall and January 12, 2024 to August 6, 2024 for the spring. Waivers received by September 22, 2023 are for the entire academic year, and those received by January 26, 2024 are for the spring. By waiving the BC Student Health Insurance Plan, a student is waiving coverage for the full coverage period.

Waiver forms can be found on the Forms tab.

**Domestic Students Waiver Requirements (U.S. Citizens and Permanent Residents)**

Students who are enrolled in a health plan that is comparable to the student plan may waive the BC coverage through [www.bc.edu/myservices](http://www.bc.edu/myservices) if they are at least 18 years old. Students under the age of 18 cannot file an electronic waiver. You and your parent or guardian must **sign and submit a waiver form** before the deadline.

To provide proof of comparable coverage, a student will need to have information about his or her current health insurance plan readily available. By waiving the BC coverage, a student is confirming the following:

- The student is covered by the indicated medical insurance policy and will maintain coverage for the full 2023–2024 academic year.
- The student has compared their policy to the BC student plan and certifies that their plan provides benefits that are at least comparable to the plan: UnitedHealthcare Benefits Information.
- The student’s plan provides reasonable comprehensive coverage of health services, including primary care, emergency services, surgical services, hospitalization benefits, ambulatory patient services, and mental health services, along with coverage for lab work, diagnostic x-rays, physical therapy, chiropractic care, and prescription coverage, and that these services are reasonably accessible in the area where the student is attending school. A plan that provides coverage through a closed network of providers, not reasonably accessible to the student in the area where they attend school, for all but emergency services, does not qualify for a waiver.
- The student’s plan is **not an out-of-state Medicaid plan**, or one of the following MA Medicaid Plans: Children’s Medical Security Program, MassHealth Limited and Health Safety Net. These plans do not qualify for a waiver. MassHealth plans other than those listed here are acceptable for a waiver.
- No claims have been submitted for payment under the UnitedHealthcare student plan for the 2023–2024 enrollment periods.
- The student assumes full responsibility for any medical expenses incurred during the insurance enrollment periods and neither Boston College nor the insurance company will be held responsible for any expenses incurred. If a student’s plan does not cover a claim, they cannot enroll in the BC plan later to have the claim covered.
- Students traveling outside of the United States certify that their insurance plan provides reasonable and comprehensive coverage in the location where they are studying. If the student visits the United States during the 2023–2024 academic year, they will purchase a U.S.-based qualifying medical plan (as described above) for the period of their stay in the U.S.
- The student’s plan is U.S.-based and is NOT a socialized (foreign National Health Service programs) plan. The state of Massachusetts does not permit waivers with these plans.

Incomplete waivers will not be processed. Waivers must be completed every year. **All waivers must be submitted by September 22, 2023 for the entire academic year or by January 26, 2024 for the spring semester only.** Students who do not complete a waiver prior to the deadline will automatically be enrolled in and charged the student-only premium for the UnitedHealthcare student plan. Once the waiver is submitted, the charge will be removed from the student account in one business day; students and authorized payers can verify the adjustment by logging in to [www.bc.edu/myservices](http://www.bc.edu/myservices) ("My Bill") and viewing Current Activity on the View & Pay Accounts tab. **Students are responsible for verifying that their waiver was submitted correctly.**
Providing insurance information to other offices on campus (e.g., Athletics, Health Services) does not fulfill the Massachusetts waiver requirement. If a student does not complete a waiver with the Office of Student Services, either through www.bc.edu/myservices or on paper, prior to the deadline, he or she will automatically be enrolled in and charged for the student insurance plan.

Students who missed the deadline, but have extenuating circumstances, may submit a Petition to Waive After Published Deadline form, available on the Forms tab for a limited period of time.

Students are eligible for the insurance plans offered through the Health Connector but should review these plans carefully, because they may have high deductibles.

International Students Waiver Requirements (Students who are Not U.S. Citizens or Permanent Residents)

To ensure international students are covered by a plan that provides coverage which meets or exceeds the Student Health Insurance Plan, **international students are not eligible to waive BC’s Student Health Insurance Plan.** If you are insured through (1) your own or a parent/guardian/spouse’s health insurance plan offered through a U.S. employer or (2) a government sponsored program, (for example Government of Kuwait/UAE or Government of Saudi Arabia), you may be eligible for a waiver. MA Medicaid Plans: Children’s Medical Security Program, MassHealth Limited, and Health Safety Net do not qualify for a waiver.

International insurance plans, socialized or standard medical policies (including Canadian policies), travel insurance plans, short-term medical plans, or plans not fully compliant with the Affordable Care Act are not acceptable and will not be considered. Your insurance must be effective on or before August 7, 2023 (for fall and annual waivers) or January 12, 2024 (for spring waivers) to qualify for a waiver. For example, a policy beginning on September 1, 2023 would not qualify for a fall or annual waiver.

The waiver form can be found on the Forms tab.

**ID Cards & Your UnitedHealthcare Account (2023–2024)**

Your mobile-friendly online UnitedHealthcare account is the resource for

- Your ID card
- Viewing policy information and estimating the cost of care that you need
- Viewing claims statuses and details
- Seeing what is covered and what additional benefits are available to you

Follow the steps below to create your account once the policy is active on August 7. If you created an account last year, you can use your existing login and do not need to create an account.

1. Go to [www.uhcsr.com/BC](http://www.uhcsr.com/BC) and click “Create Account” at the bottom of the page.
2. Enter your first and last name, date of birth, and your Eagle ID.
3. Create your username and password, and click Next to activate your My Account.
4. Log in using the username and password you just created.
5. Verify your identity using your BC email address. Remember that your email address format can be either username@bc.edu or firstname.lastname@bc.edu, and you should use the username@bc.edu version. You’ll be sent a code to enter to complete your verification.

**ID Cards**

Once you’ve created your online United Healthcare account, you can access your ID card once the policy is active on August 7 by logging in and selecting the ID Card tab.

If you are unable to access your ID card, check the date of the insurance charge on your bill. If you have recently registered, allow 5–7 business days for your ID card to be viewable. **Graduate students** (non-Law): Your insurance enrollment is activated by your registration for
classes, so if you do not have an insurance charge on your BC student account, you need to register for classes, and then allow 5–7 business days for your ID card to be viewable.

2023–2024 Forms
Spring 2024
Waiver Forms

Appeal to Waive After the Deadline Form

Students in exclusively online degree programs: If you are enrolled online only and not visiting Massachusetts, complete this form. You must be logged in to your BC Gmail or Google account to access the form.

Enrollment Forms

Petition to Add: This form is for mid-semester enrollment for students who have lost their prior coverage due to a qualifying event

For summer enrollment, select the Summer Enrollment tab on the left.

Dental and Vision Information

The student insurance has limited pediatric dental and vision benefits. See United's coverage information for details. Your student insurance includes discount (not insurance) plans for dental and vision. For dental or vision insurance, you can enroll in optional plans at additional cost.

EyeMed Vision Care Discount Plan: You are automatically enrolled in the EyeMed discount plan if you are enrolled in the student medical insurance plan. Note that this is a discount program, not a vision insurance plan. Please visit the Gallagher Student website or contact Gallagher at 800-394-4026 for more information.

Basix Dental Savings Program: You are automatically enrolled in the Basix discount plan if you are enrolled in the student medical insurance plan. Note that this is a discount program, not a dental insurance plan. Please see below for optional dental insurance enrollment. Visit Gallagher Student website or contact Gallagher at 800-394-4026 for more information about the Basix Plan.

Summer Enrollment for New Students (2023–2024)

The academic year insurance coverage periods are fall (August 7, 2023 – January 11, 2024) and spring (January 12, 2024 – August 6, 2024). Students enrolled in the spring insurance will continue to be enrolled through August 6.

New graduate students who are starting their program during the summer term are eligible to enroll in the insurance for a summer period beginning May 10 and ending August 6.

Summer 2023 Enrollment

To enroll, log in to your Gallagher account using your BC username and password. Select the “Enroll” button under 2022-2023 summer coverage and follow the prompts. The summer premium is $916.

Summer 2024 Enrollment

Summer 2024 enrollment will open in early May 2024.
Waivers

Medical insurance is automatically charged for the fall and spring insurance periods. If you are beginning your program in the summer, you will not be automatically charged for summer insurance and do not need to file a waiver for the summer.

Please be sure to file a waiver for the fall and spring. These waivers are available by mid-June each year; please see the Forms tab.
## Tuition & Fees

All fees are proposed and subject to change.

The University reserves the right to correct typographical errors or to adjust the Tuition and Fees schedule at any time it deems necessary. The Trustees of Boston College reserve the right to change the tuition rates and to make additional charges within the University whenever such action is deemed necessary.

Boston College is committed to providing information in a manner that is accessible to all. If you are in need of a printed copy of the material presented on this web page, please contact the [Office of Student Services](#).

Tuition does not include the cost of lab fees, textbooks, or other required materials for specific courses. In general, full-time graduate and undergraduate students should anticipate costs for textbooks and course supplies of $1,300–$2,200 for the academic year. Textbook costs for specific courses can be found on the website of the Boston College Bookstore.

Students taking zero credit courses are still subject to mandatory fees.

Undergraduate students attempting to accelerate their graduation to graduate in fewer than eight full academic year semesters are subject to additional charges. For more information, view the Graduation, Advanced Standing, and Acceleration section of the Undergraduate Academic Regulations on the [University Catalog: Policies and Procedures](#) page.

The University reserves the right to correct typographical errors or to adjust the Tuition and Fees schedule at any time it deems necessary.

The Trustees of Boston College reserve the right to change the tuition rates and to make additional charges within the University whenever such action is deemed necessary.

### Collection Cost and Fees

Matriculated students at Boston College are individually, personally, and primarily responsible to the University for paying all tuition and other fees associated with enrollment and housing and food. This obligation also applies to any additional tuition and fees resulting from adjustments to course schedules. Students remain responsible in accordance with University policy for tuition and fees for classes for which they register, including any classes for which they have been withdrawn, been dropped, failed, or failed to attend. Students must formally withdraw from any/all classes that they do not attend in a particular semester. Students will not be relieved of their responsibility to pay tuition unless they withdraw from classes in accordance with the withdrawal timelines and procedures published by the Office of Student Services in the University Catalog.

All billing statements are sent electronically. Information on how to access student bills and related account information is available on the Office of Student Services website, including at [www.bc.edu/mybill](http://www.bc.edu/mybill). Students are responsible for reviewing their billing statements, making payments by the due date stated in the billing statement, and notifying the University’s Office of Student Services in a timely manner of any errors or discrepancies. A student may authorize parents, guardians or others to view their statements and pay on their behalf, but each student shall remain individually, personally and primarily responsible for the payment of all amounts charged to their accounts. There may be a $150 late payment fee assessed to unresolved accounts by the due date. Students will also be charged a fee of $25.00 for a returned check or returned electronic payment ($65 for any returned item over $2,000).

In the event a student’s account becomes delinquent or fails to comply with a payment plan approved by Boston College, then Boston College may withdraw the student, place holds on the student’s transcript and diploma, and deny access to University services, including registration, dining, residence hall selection, library, travel abroad and recreation services.
In the event a student’s account becomes delinquent or if the student fails to comply with a payment plan approved by Boston College to bring the delinquent account current, Boston College may refer the student’s delinquent account to a collection agency, attorney or other third party that provides collection-related services. In addition to the student’s responsibility for paying any amounts due on the account prior to referral for collection-related services, the student shall be responsible for (a) paying any and all collection-related fees, which may be based on a percentage of a student’s delinquent account balance, provided that such percentage does not exceed 40%, and (b) paying any and all costs incurred in connection with the efforts to collect on the student’s delinquent account, including without limitation court costs and reasonable attorneys’ fees. The University, or its agents, may also report a student’s account delinquency to one or more of the national credit bureaus.

**Notice of Consent to Collection Communications**

By registering for a course at Boston College, a student authorizes Boston College and its agents and contractors to contact the student at any current or future phone number(s), email address(es) and wireless device(s) regarding the student’s account and/or any payments owed to Boston College. Students also authorize Boston College and its agents and contractors to use automated telephone dialing equipment, artificial or prerecorded voice or text messages, and personal calls and emails, in their efforts to contact me. Students also consent to Boston College, or its affiliates, agents, and service providers, to recording telephone calls regarding the student’s account in assurance of quality and/or other reasons.

**Tuition Refund Schedule: Fall and Spring**

**Withdrawals and Refunds**

Fees are not refundable.

Tuition is canceled subject to the following conditions:

- Notice of withdrawal must be made in writing to the dean of the student's school.
- The date of receipt of written notice of withdrawal by the Dean's Office determines the amount of tuition canceled.

The cancellation schedule that follows will apply to students withdrawing voluntarily, as well as to students who are dismissed from the University for academic or disciplinary reasons. A student who drops, withdraws or fails to attend some or all of the classes for which the student registers will be responsible for paying all or a portion of tuition and fees in accordance with the refund schedules below. A student's failure to attend class does not absolve the student of his or her financial responsibility as described herein.

**Full-time Undergraduate Day and Law School Refund Schedule**

**2023–2024 Academic Year**

Undergraduate students withdrawing by the following dates will receive the tuition refund indicated below.

**First Semester**

- by Aug. 25, 2023: 100% of tuition charged is canceled
- by Sept. 8, 2023: 80% of tuition charged is canceled
- by Sept. 15, 2023: 60% of tuition charged is canceled
- by Sept. 22, 2023: 40% of tuition charged is canceled
- by Sept. 29, 2023: 20% of tuition charged is canceled
Second Semester

- by Jan. 12, 2024: 100% of tuition charged is canceled
- by Jan. 26, 2024: 80% of tuition charged is canceled
- by Feb. 2, 2024: 60% of tuition charged is canceled
- by Feb. 9, 2024: 40% of tuition charged is canceled
- by Feb. 16, 2024: 20% of tuition charged is canceled

No cancellations are made after the fifth week of classes.

Graduate and Woods College of Advancing Studies Refund Schedule
2023–2024 Academic Year

Graduate (excluding Law) and Woods College of Advancing Studies students withdrawing by the following dates will receive the tuition refund indicated below.

First Semester

- by Sept. 6, 2023: 100% of tuition charged is canceled
- by Sept. 8, 2023: 80% of tuition charged is canceled
- by Sept. 15, 2023: 60% of tuition charged is canceled
- by Sept. 22, 2023: 40% of tuition charged is canceled
- by Sept. 29, 2023: 20% of tuition charged is canceled

Second Semester

- by Jan. 24, 2024: 100% of tuition charged is canceled
- by Jan. 26, 2024: 80% of tuition charged is canceled
- by Feb. 2, 2024: 60% of tuition charged is canceled
- by Feb. 9, 2024: 40% of tuition charged is canceled
- by Feb. 16, 2024: 20% of tuition charged is canceled

No cancellations are made after the fifth week of classes.

Tuition Insurance Plan

Boston College is pleased to offer students a way to help protect their substantial financial investment in a college education. The Tuition Insurance Plan is an optional private insurance plan offered through Dewar, Inc. that assures subscribers who withdraw for illness or accident a refund throughout the semester, even if Boston College’s own refund policy has expired.

For costs, benefit levels, further information, or an application form, please visit Dewar’s website or contact Dewar at 617-774-1555 or trp@dewarinsurance.com.

Federal Regulations Governing Refunds

If a student does not wish to leave any resulting credit balance on his or her account for subsequent use, he or she should request a refund at www.bc.edu/myservices ("Request Student Account Refund"). If a student has a credit balance as a result of Federal Aid and he or she does not request a refund, the University will, within two weeks, send the credit balance to his/her local address.

Federal regulations establish procedural guidelines applicable to the treatment of refunds whenever the student has been the recipient of financial assistance through any program authorized under Title IV of the Higher Education Act of 1965. These guidelines pertain to the Federal Pell Grant, the Federal Supplemental Educational Opportunity Grant, the Federal College Work-Study, and the Federal Stafford and PLUS Loan. In such cases, the regulations require that a portion of any refund be returned according to federal guidelines. Further, if a student
withdraws, the institution must determine if any cash disbursement of Title IV funds, made directly to the student by the institution for non-instructional purposes, is an overpayment that must be repaid to the Title IV program. University policy developed to comply with the regulations at Boston College will be available upon request from the Office of Student Services.

**Tuition Refund Schedule: Summer**

Once a class officially begins, you have until the add/drop deadline for your specific summer term to drop the course using the Course Drop form found on the [Academic Forms](#) page and receive 100% refund. After the add/drop deadline, there is no cancellation of tuition for withdrawing from a course. Students will be required to pay the full cost of the course for any withdrawals after the stated add/drop deadline.

To view the add/drop deadline for your term, visit the [Summer Registration](#) page.
Transcript Requests

The National Student Clearinghouse (NSCH) is the authorized vendor for delivery of official Boston College transcripts. Transcripts can be ordered to be sent electronically or on paper via regular or express mail. Electronic and paper transcript requests will be processed in 1–3 business days. Historical transcripts (those prior to 2001) may take several additional days for processing. Requests for Federal Express shipping will only expedite the shipping after the processing period.

There is a $5.50 charge per electronic transcript and a $7.75 charge per paper transcript (all fees are paid directly to National Student Loan Clearinghouse). Additional fees are required for express mail service. Details including payment options are on the Clearinghouse transcript ordering website.

**Current students** should request official transcripts via the transcript request link in the [Agora Portal](#). **Alumni** requesting official transcripts should log into the [National Student Clearinghouse](#) transcript ordering site to submit a request. Unofficial transcripts are only available as hard-copy documents. They may only be requested and picked up in person by the record-holder with a valid BC or government ID in the Office of Student Services. Unofficial transcripts cannot be sent by Boston College electronically to the record-holder or any third-party. Please contact the Office Student Services with any additional questions.

- Students must know their Eagle ID number when requesting transcripts via NSCH. If you do not know your Eagle ID number please contact the Office of Student Services at 617-552-3300 or 800-294-0294 for assistance prior to logging into the NSCH site to make your request.
- Students who were enrolled at BC prior to the use of Eagle IDs should contact the Office of Student Services at 617-552-3300 or 800-294-0294 to receive their unique identification number.
- International students should review additional information in the accordion below regarding the social security number (SSN) requirement.
- Transcript requests will not be honored for any student with an outstanding financial obligation to the University. The same policy applies to any student who does not complete the required loan exit interview.

**Additional Instructions for International Students**

In addition to Eagle ID number, a student’s social security number (SSN) is required as a secondary security measure when requesting transcripts via the NSCH. For international students without SSNs, the Office of Student Services recommends using 999-99-9999 in the SSN field. This is a completely valid option for international students without SSNs looking to proceed with the request of a transcript.

**Apostilles or Authentication of Documents**

Some foreign governments and agencies require that diplomas, transcripts, or enrollment verifications be certified with an apostille. An apostille is a document issued by the Massachusetts’ Secretary of the Commonwealth that verifies the authenticity of the signature on the document; the capacity in which the person signing the document acted; and the identity of any stamp or seal affixed to the document. The apostille is a specific form of authentication for countries that participate in the Hague Convention of 1961. The Secretary of the Commonwealth’s office is the only agency in Massachusetts that is authorized to issue an apostille or certification for a notarized document going to a foreign country. Massachusetts does not certify out-of-state documents. They must be certified by the state of origin. Additional information can be found at [http://www.sec.state.ma.us/pre/precom/comidx.htm](http://www.sec.state.ma.us/pre/precom/comidx.htm).

Complete the [Apostille Request Form](#). Boston College will notarize the documents as selected and return them to the requestor for further processing for the Apostille.

**Instructions for Pine Manor College Alumni**

Pine Manor College alumni requesting an official transcript should log into the [National Student Clearinghouse](#) transcript ordering site to submit a request.

# Faculty

## Carroll School of Management

### Accounting

**Full-Time Faculty**

- Natalie Berfeld  
  Assistant Professor
- Mark Bradshaw  
  Joseph F. Cotter Professor and Chairperson
- Mary Ellen Carter  
  Professor and Joseph L. Sweeney Chair
- Ki-Soon Choi  
  Assistant Professor
- Jeffrey Cohen  
  Professor
- Dianne Feldman  
  Senior Lecturer
- Amy Hutton  
  Professor
- Lian Fen Lee  
  Associate Professor
- Miao Liu  
  Assistant Professor
- Alvis Lo  
  Associate Professor
- Gil Manzon  
  Associate Professor
- Liz Quinn  
  Senior Lecturer
- Susan Shu  
  Associate Professor

- Billy Soo  
  Vice Provost for Faculties
- Edward Taylor  
  Senior Lecturer
- Benjamin Yost  
  Assistant Professor

**Business Analytics**

- İşıl Alev  
  Associate Professor of the Practice
- Jonathan Beebe  
  Lecturer
- Jiří Chod  
  Professor and Chairperson
- Tolga Disdarer  
  Assistant Professor
- Leonard Evenchik  
  Associate Professor of the Practice
- Joy M. Field  
  Associate Professor
- John Gallaugher  
  Associate Professor
- Samuel B. Graves  
  Professor
- Stephanie Jernigan  
  Professor of the Practice
- Anna Karpovsky  
  Assistant Professor of the Practice
- Do Yoon Kim  
  Assistant Professor
- Linda Boardman Liu  
  Associate Professor of the Practice
- Nan Liu  
  Associate Professor
- Dmitry Mitrofanov  
  Assistant Professor

**Business Law and Society**

- John Neale  
  Professor of the Practice
- Susan (Xiaohong) Pan  
  Assistant Professor of the Practice
- Delvon Parker  
  Associate Professor of the Practice
- Sam Ransbotham  
  Professor
- Sebastian Steffen  
  Assistant Professor
- Peter Sterpe  
  Assistant Professor of the Practice
- Pieter VanderWerf  
  Professor of the Practice
- Lai Wei  
  Assistant Professor
- George Wyner  
  Associate Professor of the Practice
- Mei Xue  
  Associate Professor

- Edward Chazen  
  Senior Lecturer
- Joseph Cioni  
  Associate Professor of the Practice
- Jeremy Evans  
  Assistant Professor of the Practice
- Amy LaCombe  
  Professor of the Practice
- Rita Owens  
  Senior Lecturer
- Christine Rojecwicz  
  Assistant Professor of the Practice
- Ashly Scheufele  
  Assistant Professor of the Practice
Michael Smith  
Associate Professor of the Practice

Rachel Spooner  
Associate Professor of the Practice

Ethan Sullivan  
Senior Associate Dean for Undergraduate Programs and Chairperson

David P. Twomey  
Professor

Thomas Wesner  
Associate Professor of the Practice

**Finance**

Rui Albuquerque  
Professor

Michele Andreolli  
Visiting Assistant Professor

Pierluigi Balduzzi  
Professor

Simcha Barkai  
Assistant Professor

Michael Barry  
Professor of the Practice

Vincent Bogousslavsky  
Assistant Professor

Thomas J. Chemmanur  
Professor

Nathan Dong  
Assistant Professor of the Practice

Ran Duchin  
Professor

Vyacheslav (Slava) Fos  
Professor

Samuel Hartzmark  
Professor

Mathias Hasler  
Visiting Assistant Professor

Drew Hession-Kunz  
Senior Lecturer

Clifford G. Holderness  
Professor

Edith Hotchkiss  
Professor

Robert F. James  
Senior Lecturer

Cheng (Jason) Jiang  
Assistant Professor of the Practice

Adam Jørring  
Assistant Professor

Darren Kisgen  
Associate Professor

Matteo Leombroni  
Assistant Professor

Andrey Malenko  
Professor

Nadya Malenko  
Professor

Alan Marcus  
Professor

Mario J. Gabelli Professor in the Carroll School of Management

Richard McGowan S.J.  
Associate Professor of the Practice

Alicia Munnell  
Peter F. Drucker Chair in Management Sciences

Jeffrey Pontiff  
Professor and James F. Cleary ’50, DBA H ’93 Chair in Finance

Jonathan Reuter  
Associate Professor

Paul M. Romer  
Seidner University Professor

Ronnie Sadka  
Professor and Chairperson

Paul Schmelzing  
Assistant Professor

Aimee Hoffmann Smith  
Assistant Professor of the Practice

David Solomon  
Professor

Philip Strahan  
John L. Collins, S.J. Chair

Hassan Tehranian  
Professor and Griffith Family Millennium Chair

Tuomas Tomunen  
Assistant Professor

Milena Wittwer  
Assistant Professor

Nancy Xu  
Assistant Professor

Hanyi (Livia) Yi  
Assistant Professor

**Management & Organization**

Jean Bartunek  
Robert A. and Evelyn J. Ferris Chair

Curtis Chan  
Assistant Professor

Judith Clair  
Associate Professor

Vanessa Conzon  
Assistant Professor

Robert Fichman  
Professor

Lyndon Garrett  
Assistant Professor
Judith Gordon  
Associate Dean for Teaching and Learning, Professor and Chairperson

Agnieszka Kierner  
Visiting Associate Professor

Juan Montes  
Associate Professor of the Practice

Richard Nielsen  
Professor

Pilar Opazo  
Assistant Professor of the Practice

Jeremiah Potts  
Lecturer

Michael Pratt  
O'Connor Family Professor

Benjamin Rogers  
Assistant Professor

Elizabeth (Bess) Rouse  
Associate Professor

Metin Sengul  
Associate Professor

Richard Spinello  
Professor of the Practice

Njoke Thomas  
Assistant Professor

Tieying Yu  
Associate Professor

Bradford Hudson  
Associate Professor of the Practice

Megan Hunter  
Assistant Professor

Jon Kerbs  
Senior Lecturer

Larisa Kovalenko  
Assistant Professor

Youngeun Lee  
Assistant Professor

Katherine N. Lemon  
Accenture Professor

Gergana Y. Nenkov  
Associate Professor

Linda Court Salisbury  
Associate Professor

Kathleen Seiders  
Professor and Chairperson

Michelle Yingze Song  
Assistant Professor

Min Zhao  
Associate Professor

Connell School of Nursing

Nadia N. Abuelezam, Sc.D.  
Associate Professor

Stacey Hoffman Barone, Ph.D., NP-C, CRRN  
Professor of the Practice

Stewart M. Bond, Ph.D., RN  
Department Chairperson and Associate Professor of the Practice

Diana Bowser, Sc.D., M.P.H.  
Associate Dean for Research and Integrated Science

Ann Wolbert Burgess, D.N.Sc., APRN, FAAN

Lindsey Camp, Ph.D., M.P.H., RN  
Assistant Professor

Eunji Cho, Ph.D., RN  
Assistant Professor

Catherine Conahan, D.N.P., AGNP-C  
Assistant Professor of the Practice

Thamarah Crevecoeur, Dr.P.H., CNM  
Associate Professor of the Practice

Bethany A. Croke, D.N.P., FNP-BC  
Assistant Professor of the Practice

Donna L. Cullinan, D.N.P., FNP, RN  
Associate Professor of the Practice

Sabianca Delva, Ph.D., RN  
Assistant Professor

Julie P. Dunne, Ph.D., RN, PMHNP-BC  
Associate Professor of the Practice

Andrew A. Dwyer, Ph.D., FNP-BC, FNAP, FAAN  
Associate Professor

Joyce K. Edmonds, Ph.D., M.P.H., RN  
Associate Professor

Susan Emery, Ph.D., CRNA  
Professor of the Practice and Director, Nurse Anesthesia Program

Jane M. Flanagan, Ph.D., RN/NP, ANP-BC, AHN-BC, FNAP, FNI, FAAN  
Department Chairperson and Associate Professor

Raymond Gasser, D.N.P., M.S., PMHNP-BC, RN  
Assistant Professor of the Practice

Susan Gennaro, Ph.D., RN, FAAN  
Professor

Marketing

Audrey Azoulay  
Assistant Professor of the Practice

S. Adam Brasel  
Associate Professor

John Fisher  
Senior Lecturer

Henrik Hagvedt  
Associate Professor
Sarah Given, D.N.P., M.S.N
Assistant Professor of the Practice

Leah Gordon, D.N.P., RN, CNP, FNP-C
Associate Dean for Inclusive Excellence, Diversity, and Belonging

Katherine Gregory, Ph.D., RN, FAAN
Dean

Nanci Haze, D.N.P., RN, CPNP
Associate Professor of the Practice

Elizabeth P. Howard, Ph.D., RN, ANP, ACNP, FAAN
Associate Dean of Academic Affairs and Faculty Development and Professor

Doreen Behney Hurley, M.S.N., RN, CCRN
Instructor

Katharine Hutchinson, Dr.P.H., CNM
Program Director of Women’s Health and Associate Professor of the Practice

Corrine Y. Jurgens, Ph.D., RN, ANP, FAHA, FHFA, FAAN
Associate Professor

Kellie LaPierre, D.N.P., GNP-C
Assistant Professor of the Practice

Christopher Sean Lee, Ph.D., RN, FAHA, FAAN, FHFA
Barry Family/Goldman Sachs Endowed Professorship in Nursing

Ashley Longacre, Ph.D., MPH
Assistant Professor of the Practice

Karen S. Lyons, Ph.D., FGSA
Professor

Cherlie Magny-Normilus, Ph.D., FNP-BC
Assistant Professor

Alison Marshall, Ph.D-C., RN, M.S.N., FNP-C
Instructor

Arlene McGuane, M.S., RN
Director of Clinical Learning and Simulation Centers

Beth McNutt-Clarke, D.N.P., M.B.A., RN, CWOCN
Assistant Professor of the Practice

Aimee Milliken, Ph.D., RN, HEC-C
Associate Professor of the Practice

Tam H. Nguyen, Ph.D., M.S.N./M.P.H., RN
Associate Professor and Strakosch Family Faculty Fellow in Community Health

Jinhee Park, Ph.D., RN
Associate Professor

Victor Petreca, Ph.D., D.N.P., PMHNP-BC, CNP
Assistant Professor

Karen Pounds, Ph.D., MS
Associate Professor of the Practice

Melissa Pérez Capotosto, Ph.D., WHNP-BC
Assistant Professor of the Practice

Bryan Ranger, Ph.D.
Courtesy Appointment

Patricia Reid Ponte, RN, D.N.Sc., FAAN, NEA-BC
Associate Professor of the Practice

Richard Ross, S.J., Ph.D., RN
Assistant Professor of the Practice

M. Colleen Simonelli, Ph.D., RNC
Associate Dean for Student Services and Professor of the Practice

Sherri B. St. Pierre, DNP, CNP, PPCNP-BC
Associate Professor of the Practice

Patricia A. Tabloski, Ph.D., GNP-BC, FGSA, FAAN
Associate Professor

Allan Thomas, DNP, MSN, CRNA
Assistant Professor of the Practice and Assistant Program Director, Nurse Anesthesia

Sheila Tucker, M.A., RD, CSSD, LDN
Instructor

Patricia Underwood, Ph.D., FNP-BC, RN, CDCES
Assistant Professor

Melissa Uveges, Ph.D., M.A.R., RN
Assistant Professor

Caitlin Vitale, Ph.D., MSN, BSN
Assistant Professor of the Practice

Laura White, Ph.D., M.S., RN, CPNP, PMHNP-BC
Associate Professor of the Practice

Shelley White, Ph.D., M.P.H.
Associate Professor of the Practice and Director of Experiential Learning

Lisa Wood-Magee, Ph.D., RN, FAAN
Department Chairperson and Professor

Brittney van de Water, Ph.D., RN, CPNP
Assistant Professor
