The Dialectics of Social and Behavioral Theory
Salas-Wright, Christopher
Spring 2024
In this course, students will read selected original publications of classical and contemporary theorists in psychology, sociology, political science, urban planning and community development, and economics. They will consider how theories which are foundational to different disciplines in the social and behavioral sciences can inform their studies and predict empirical findings. The theories selected for examination in the course will include: theories of identity and stigma, social integration theories, exchange theory, conflict theories, theories of social integration; critical race theory, role theories, rational choice theory, life course theories, role theories, social justice theories, theories of social change and, and epidemiology. The students will use the assumptions of different theories to prepare three papers, each of which will examine a single issue from a different perspective.

**Regression Analysis for Social and Behavioral Sciences**  
**Hodges, James C; Saran, Indrani**  
**Spring 2024**

Required for all Doctoral Students. This course assumes knowledge of basic statistical concepts used in social research including centrality and dispersion, correlation and association, probability and hypothesis testing, as well as experience of using common statistical package such as SPSS, SAS or STATA. The course will focus on regression-based methods for analyzing quantitative social and behavioral science data using STATA. The topics include multiple regression analysis, major regression diagnostics, and logistic regression analysis for categorical dependent variables.

**Credits:** 3

SCWK997101
Doctoral Group Independent Study
Teixeira, Samantha
Spring 2024
This elective offers students the opportunity for an in-depth examination of a substantive topic that is not comprehensively addressed by other required or elective doctoral courses. The topic is considered from either a theoretical, policy and/or research perspective. The topic area should have direct and substantial relevance to social work research, social work education, evidence-based practice, and/or social policy analysis. A course syllabus should be submitted to the Doctoral Program Director prior to registration.

SCWK997501
Data Analytics for Social Impact
Hawkins, Summer S
Spring 2024
This course provides training for interdisciplinary scholars to analyze big data to have social impact. Students will receive real-world instruction in data analytics from faculty through case studies across the fields of health, social services, business, and psychology. This course is about acquiring new skills in data analytics as well as the application and synthesis of skills obtained across disciplines to tackle complex problems through a social justice lens. Using a team science approach, interdisciplinary groups of students will develop their own research question, link datasets through geographic identifiers, analyze data using quantitative skills and mixed methods techniques, and generate outputs with impact. Training will be provided on how to produce outputs for and present results to a range of audiences. The overarching aim of the course is to provide students with hands-on opportunities to use data analytics to address pressing social problems from interdisciplinary perspectives. A recurring theme will be on the ethical implications of big data and how to design research questions that expose and mitigate social inequities. Prerequisites: At least one semester, but preferably one year, of graduate-level statistics, with experience in regression analysis. Stata statistical software will be used in the course.

SCWK998201
Research grant writing for the health and behavioral sciences
Davison, Kirsten K
Spring 2024
In this applied learning course, students will progress through the steps of preparing a research grant application in the health and behavioral sciences. Target sponsors include, but are not limited to, federal funding agencies (e.g., National Institutes of Health, Centers for Disease Control) and research foundations (e.g., Robert Wood Johnson Foundation, Gates Foundation). Through the course sequence, the grant writing process and the sections of a research grant application will be reviewed. Rigorous research methods, innovative science, and compelling communication strategies will be emphasized throughout. All course assignments will focus on elements of the final deliverable, which is a 6-10 page grant application for a designated sponsor. Students are strongly encouraged to submit their application by the end of the semester or the following summer. In many instances, the resulting deliverable could also form the basis of a dissertation proposal. The course is co-taught by faculty in the School of Social Work and the Connell School of Nursing to foster a strong interdisciplinary perspective in research and grant writing.

ACCT102103
Financial Accounting
Taylor, Edward
Summer 2023
This course develops an understanding of the basic elements of financial accounting and its role in commerce and capital markets. Accounting helps entities measure and communicate their performance to others. Accounting is primarily a language; the language of business. The understanding of this language allows users from different fields analyze financial transactions, evaluate companies and financial products, and understand financial and macroeconomic events. In this spirit, the course's primary objective is to help students get familiar with this language, and to provide them with a deeper understanding of capital markets and the economic transactions they will encounter both as students and professionals.

Allgood, Cecil T
Fall 2023
This course develops an understanding of the basic elements of financial accounting and its role in commerce and capital markets. Accounting helps entities measure and communicate their performance to others. Accounting is primarily a language; the language of business. The understanding of this language allows users from different fields analyze financial transactions, evaluate companies and financial products, and understand financial and macroeconomic events. In this spirit, the course's primary objective is to help students get familiar with this language, and to provide them with a deeper understanding of capital markets and the economic transactions they will encounter both as students and professionals.

**ACCT332101**  
**Intermediate Accounting for Finance and Consulting**  
**Whalen, Thomas F**  
**Fall 2023**  
This intermediate financial accounting course builds on ACCT1021 to provide, in greater depth, a comprehensive understanding of financial accounting topics important to assessing firm performance. The course is designed to teach users of financial statements (rather than preparers of financial statements) how accounting information, shaped by regulation, has advantages and limitations in assessing the economics of the underlying business. The goal of the course is to provide a better understanding of financial reporting and accounting information as an input to evaluating a firm. With hands-on use of cases and SEC filings, this course is beneficial for students seeking careers that require the use of financial statement information as an input to decision-making.

**Credits:** 3

**ACCT333001**  
**ESG Reporting and Analysis: Accounting for a Changing World**  
**Carter, Mary Ellen**  
**Fall 2023**  
As concerns around sustainability grow, firms' reporting on Environmental, Social and Governance (ESG) information is increasingly prevalent and demanded by shareholders and other stakeholders. This course will introduce students to the current reporting landscape and the various ESG reporting frameworks used by firms, exploring these frameworks by comparing and contrasting companies' sustainability reports. We will study proposed regulations to standardize ESG reporting and consider how these disclosures complement what firms already report in their financial statements (e.g. 10-Ks). After understanding how firms report on ESG, we will examine how stakeholders use this information, considering questions such as how to assess the reliability of these disclosures (e.g. is this just "greenwashing"?), how these disclosures relate to commercial ESG ratings, and how these disclosures tie to the firms' sustainability strategies (e.g. tying executive compensation to ESG metrics). Since the regulatory environment is evolving, this course will be fluid; topics we cover may change during the semester as current events dictate.

Satisfies Core Requirement: None
Prerequisites: ACCT1021 and ISYS1021, or CSCI1021
Corequisites: None
Forensic Accounting is a growing area of practice in which the knowledge, skills and abilities of accounting are combined with investigative expertise and applied to legal problems. Forensic accountants are often asked to provide litigation support where they are called on to give expert testimony about financial data and accounting activities. In other more proactive engagements, they probe situations using special investigative accounting skills and techniques. Some even see forensic accounting as practiced by skilled accounting specialists becoming part and parcel of most financial audits, an extra quality control step in the auditing process that will help reduce financial statement fraud. Status: Offered
At the outset, course work will be concerned with the development and use of accounting information to evaluate the status and performance of business enterprises. Attention will be given to the reporting of information for use by persons and institutions outside the enterprise. In the second part of the course, the focus will be on the use of accounting information in managerial decision making.

Accounting Courses: Spring 2024

ACCT102101
Financial Accounting
Yost, Benjamin P
Spring 2024
This course develops an understanding of the basic elements of financial accounting and its role in commerce and capital markets. Accounting helps entities measure and communicate their performance to others. Accounting is primarily a language; the language of business. The understanding of this language allows users from different fields analyze financial transactions, evaluate companies and financial products, and understand financial and macroeconomic events. In this spirit, the course's primary objective is to help students get familiar with this language, and to provide them with a deeper understanding of capital markets and the economic transactions they will encounter both as students and professionals.

ACCT332101
Intermediate Accounting for Finance and Consulting
Whalen, Thomas F
Spring 2024
This intermediate financial accounting course builds on ACCT1021 to provide, in greater depth, a comprehensive understanding of financial accounting topics important to assessing firm performance. The course is designed to teach users of financial statements (rather than preparers of financial statements) how accounting information, shaped by regulation, has advantages and limitations in assessing the economics of the underlying business. The goal of the course is to provide a better understanding of financial reporting and accounting information as an input to evaluating a firm. With hands-on use of cases and SEC filings, this course is beneficial for students seeking careers that require the use of financial statement information as an input to decision-making.

Credits: 3

ACCT332102
Intermediate Accounting for Finance and Consulting
Whalen, Thomas F
Spring 2024
This intermediate financial accounting course builds on ACCT1021 to provide, in greater depth, a comprehensive understanding of financial accounting topics important to assessing firm performance. The course is designed to teach users of financial statements (rather than preparers of financial statements) how accounting information, shaped by regulation, has advantages and limitations in assessing the economics of the underlying business. The goal of the course is to provide a better understanding of financial reporting and accounting information as an input to evaluating a firm. With hands-on use of cases and SEC filings, this course is beneficial for students seeking careers that require the use of financial statement information as an input to decision-making.

ACCT332901
Independent Study for Intermediate Accounting
Carter, Mary Ellen
Spring 2024
This independent study bridges the gap for students who took ACCT3301 and are seeking credit towards ACCT3321. The course is self-study and covers in-depth material on Deferred Taxes, Bonds and Leases. After completing the self-study material (notes, textbook readings, and practice problems), students will take an assessment exam to provide evidence that a necessary understanding of the topics has been achieved.

Forensic Accounting is a growing area of practice in which the knowledge, skills and abilities of accounting are combined with investigative expertise and applied to legal problems. Forensic accountants are often asked to provide litigation support where they are called on to give expert testimony about financial data and accounting activities. In other more proactive engagements, they probe situations using special investigative accounting skills and techniques. Some even see forensic accounting as practiced by skilled accounting specialists becoming part and parcel of most financial audits, an extra quality control step in the auditing process that will help reduce financial statement fraud. Empirical Topics in Accounting III  
Shu, Susan; Yost, Benjamin P  
Spring 2024  
The objective of this course is to provide students with a sound framework for understanding and assessing the quality of empirical archival research in accounting. The course has two objectives. Part of the course is aimed at facilitating a deeper understanding of the econometric issues facing empirical archival research. This part of the course will survey the common problems and potential solutions. The other part of the course will survey the empirical research on accounting and contracting. Topics will include the role of accounting information in evaluating managers and setting executive compensation, earnings management induced by the use of accounting in contracting, and the relation between accounting and corporate governance.

Operations Management
Parker, Delvon B
Summer 2023
This course is an introduction to operations management. Operations, like accounting, finance, marketing, and human resources, is one of the primary functions of every organization. Operations managers transform human, physical, and technical resources into goods and services. Hence, it is vital that every organization manage this resource conversion effectively and efficiently. How effectively this is accomplished depends upon the linkages between operating decisions and top management (strategic) decisions. The focus of the course is decision-making at the operating level of the firm. A strong emphasis will be placed on the development and use of quantitative models to assist decision making.

Data Analytics 1: Model Building  
VanderWerf, Pieter A  
Summer 2023  
Machine Learning, big data, data mining, predictive analytics. These are what the course covers. They consist of the creation and use of mathematical computer models to predict important quantities and events with uncanny accuracy. As one book put it, "Who clicks, who buys, and who dies." The course teaches both the principles and the details of the major methods of making and applying these models to actual business problems. To produce models on the computer, students also learn the R coding language. This is the preferred high-level software for Machine Learning and statistical applications. STEM-designated

BZAN802201
Coding for Business
Kwon, Caleb
Summer 2023
This is an introductory course in computer programming based on Python (a language suitable for all business and analytics programs). The course emphasizes coding literacy and teaches coding skills that are relevant for business decision makers. MBA DA3 is a prerequisite. This course will give students the knowledge and confidence to apply coding to a business problem, and the ability to go from a problem statement to a repeatable set of steps for solving the problem in a general way. It will enable students who might not code professionally to work effectively with colleagues who do, and it will equip interested students to develop significant programs of their own. STEM-Designated.

Managing Projects
Coakley, Charles E
Summer 2023
This course takes a holistic approach to planning, organizing, and controlling projects. It looks at how projects are uniquely suited to support an organization's strategy in a fast-paced business environment. Topics include project life cycle, algorithms and statistical concepts underlying network planning models, managing risk and resource allocation. It emphasizes the use of effective interpersonal and communication skills to organize, plan, and control the project team.

Fall 2023
This course is an introduction to operations management. Operations, like accounting, finance, marketing, and human resources, is one of the primary functions of every organization. Operations managers transform human, physical, and technical resources into goods and services. Hence, it is vital that every organization manage this resource conversion effectively and efficiently. How effectively this is accomplished depends upon the linkages between operating decisions and top management (strategic) decisions. The focus of the course is decision-making at the operating level of the firm. A strong emphasis will be placed on the development and use of quantitative models to assist decision making.

BZAN113501
Statistical Analysis
Boardman Liu, Linda
Fall 2023
This course provides an introduction to statistics with a focus on the analytical tools that are applicable to management practice and decision making. Statistical topics include descriptive statistics, probability, random variables, sampling distributions, estimation of parameters, hypothesis testing, and regression. Data handling and management skills are developed through extensive use of modern statistical programming tools and real data sets. Students will gain an understanding of statistical methods, the ability to formulate business questions as statistical models to test, and critical thinking skills to evaluate the results of those models.

BZAN225501
Managing Projects
Coakley, Charles E
Fall 2023
This course takes a holistic approach to planning, organizing, and controlling projects. It looks at how projects are uniquely suited to support an organization's strategy in a fast-paced business environment. Topics include project life cycle, algorithms and statistical concepts underlying network planning models, managing risk, and resource allocation. Microsoft Project will be used as to support the planning and monitoring phases of project management. The conceptual part of this course is framed with an eye to the behavioral realities a manager faces and the psychology of managing project teams.

BZAN330701

**Machine Learning and Artificial Intelligence**

**Ransbotham, Samuel, III**

**Fall 2023**

Machine Learning and Artificial Intelligence won't replace managers in the near term, but managers who use ML and AI well will replace those who don't. Organizations now have too much data and insufficient time for managers to consume data only in spreadsheets. Instead, the future of work involves managers designing models that, for example, segment customers, forecast sales, schedule preventative maintenance, or predict markets. This course addresses both the technical and managerial aspects of these applications. Technically, students use Python to create, evaluate, and tune multiple practical models (e.g., classifiers, trees, neural networks) in supervised and unsupervised machine learning contexts. Managerially, this course examines how organizations create value through AI applications.

**Credits:** 3

**Room and Schedule:** Fulton Hall 260 TuTh 09:00AM-10:15AM

**Satisfies Core Requirement:** None

**Prerequisites:** Coding for Business (BZAN2021) or Python equivalent and Statistical Analysis (BZAN1135) or equivalent.

BZAN331001
Sports Analytics
Neale, John J
Fall 2023
This course will introduce you to the field of sports analytics. We will apply quantitative methods from statistics and management science in a sports context. Our focus will be on-field analysis including player and team evaluation and game strategy. We will cover baseball, football, and basketball in depth with occasional references to other sports. We will also discuss concepts from behavioral economics and psychology that help explain the actions of players, coaches, and referees.

Credits: 3

Room and Schedule: Fulton Hall 150 W 04:30PM-06:50PM
Satisfies Core Requirement: None
Prerequisites: A previous course in statistics (BZAN1135 OR BZAN1137), management science (BZAN2235 or BZAN6604), and Excel (BZAN1037 or ISYS1021) plus familiarity with the rules of
baseball, football, and basketball.

**BZAN337501**  
**Operations Strategy and Consulting**  
Field, Joy M  
**Fall 2023**

This course examines concepts, principles, and techniques for formulating, implementing, and evaluating operations strategy. It links strategic and tactical operational decisions to creation of a competitive advantage. Topics include operations strategy content and process, service operations, capacity and facilities strategy, supply chain management, process design and technology choice, and quality and productivity improvement. Case studies are used to illustrate concepts covered in the course. In collaboration with a consulting firm, students also learn how to develop and deliver a consulting presentation. These skills are applied to a mock consulting project.

BZAN660401
Management Science
Neale, John J
Fall 2023
This course provides an overview of the concepts and methods of management science. Sometimes referred to as prescriptive analytics or decision analytics, management science is a subset of the larger field of business analytics and focuses on the use of math models to make better business decisions. The primary goal of the course is to help you become a more skilled builder and consumer of models. The course will show you how to use Excel spreadsheets effectively for business analysis and introduce you to some of the more important analytic methods including optimization and simulation. These methods will be applied to problems arising in a variety of functional areas including operations, finance, and marketing. STEM-designated.

Credits: 3
Room and Schedule: Fulton Hall 150 M 04:30PM-06:50PM
Satisfies Core Requirement: None
Prerequisites: A previous course in statistics and familiarity with Excel.
Corequisites: None
Cross-listed with: None

BZAN770001
Operations Management
Parker, Delvon B
Fall 2023
Operations, like accounting, finance and marketing, is one of the primary functions of every organization. Operations managers transform human, physical and technical resources into goods and services. Hence, it is vital that every organization manage this resource conversion effectively and efficiently. How effectively this is accomplished depends upon the linkages between operating decisions and top management (strategic) decisions. The focus of the course is decision-making at the operating level of the firm, converting broad policy directives into specific actions within the organization. Strong emphasis will be placed on the development and use of quantitative models to assist in decision making.

**Credits:** 0

**Room and Schedule:** On-line Asynchronous

BZAN770301
Managerial Statistics
VanderWerf, Pieter A
Fall 2023
This course teaches the tools and techniques of statistics most commonly used in business. The major topic areas include: populations, random variables, distributions, and sampling; parameter estimation; hypothesis testing; and simple and multiple regression. All topics are taught by application to actual business problems using original data. The course provides the tools students will need for their functional courses, such as finance and marketing, as well as for core courses in business analytics. STEM-designated

Data Analytics 1: Model Building
VanderWerf, Pieter A
Fall 2023
Machine Learning, big data, data mining, predictive analytics. These are what the course covers. They consist of the creation and use of mathematical computer models to predict important quantities and events with uncanny accuracy. As one book put it, "Who clicks, who buys, and who dies." The course teaches both the principles and the details of the major methods of making and applying these models to actual business problems. To produce models on the computer, students also learn the R coding language. This is the preferred high-level software for Machine Learning and statistical applications. STEM-designated

Machine Learning for Business Intelligence  
VanderWerf, Pieter A  
Fall 2023  
This course builds on Data Analytics 1 to provide students with advanced tools and skills for Machine learning (ML) in business practice. On the technical side, the course content extends to a wider range of algorithms as well as advanced methods for data sampling and model building and evaluation. More depth in application comes from student reports on current events in Machine Learning, and a course project that involves complete model construction and analysis for an actual business problem with an actual corporate data set. The course assumes the student has experience with the basic machine learning algorithms and the R coding language. STEM-designated.

BZAN113501
Statistical Analysis
Boardman Liu, Linda
Spring 2024
This course provides an introduction to statistics with a focus on the analytical tools that are applicable to management practice and decision making. Statistical topics include descriptive statistics, probability, random variables, sampling distributions, estimation of parameters, hypothesis testing, and regression. Data handling and management skills are developed through extensive use of modern statistical programming tools and real data sets. Students will gain an understanding of statistical methods, the ability to formulate business questions as statistical models to test, and critical thinking skills to evaluate the results of those models.

Statistical topics include descriptive statistics, probability, random variables, sampling distributions, estimation of parameters, hypothesis testing, and regression. Data handling and management skills are developed through extensive use of modern statistical programming tools and real data sets. Students will gain an understanding of statistical methods, the ability to formulate business questions as statistical models to test, and critical thinking skills to evaluate the results of those models.

Statistical Computing: Programming in R
Boardman Liu, Linda
Spring 2024
This course provides an introduction to statistical computing which includes setup of the R operating environment, programming in R, reading data in R, accessing R packages, writing R scripts, and creating R markdown documents. Examples are drawn from the variety of topics covered in business statistics. Students who have completed BZAN1135 or OPER1135/1136 are not eligible to take this course.

Managing Projects
Coakley, Charles E
Spring 2024
This course takes a holistic approach to planning, organizing, and controlling projects. It looks at how projects are uniquely suited to support an organization's strategy in a fast-paced business environment. Topics include project life cycle, algorithms and statistical concepts underlying network planning models, managing risk, and resource allocation. Microsoft Project will be used as to support the planning and monitoring phases of project management. The conceptual part of this course is framed with an eye to the behavioral realities a manager faces and the psychology of managing project teams.

**Machine Learning and Artificial Intelligence**

**Kim, Do Yoon**

**Spring 2024**

Machine Learning and Artificial Intelligence won't replace managers in the near term, but managers who use ML and AI well will replace those who don't. Organizations now have too much data and insufficient time for managers to consume data only in spreadsheets. Instead, the future of work involves managers designing models that, for example, segment customers, forecast sales, schedule preventative maintenance, or predict markets. This course addresses both the technical and managerial aspects of these applications. Technically, students use Python to create, evaluate, and tune multiple practical models (e.g., classifiers, trees, neural networks) in supervised and unsupervised machine learning contexts. Managerially, this course examines how organizations create value through AI applications.

**Credits:** 3

**Room and Schedule:** Fulton Hall 235 M 04:30PM-06:50PM

**Satisfies Core Requirement:** None

**Prerequisites:** Coding for Business (BZAN2021) or Python equivalent and Statistical Analysis (BZAN1135) or equivalent.

Sports Analytics

Parker, Delvon B

Spring 2024
This course will introduce you to the field of sports analytics. We will apply quantitative methods from statistics and management science in a sports context. Our focus will be on-field analysis including player and team evaluation and game strategy. We will cover baseball, football, and basketball in depth with occasional references to other sports. We will also discuss concepts from behavioral economics and psychology that help explain the actions of players, coaches, and referees.

**Credits:** 3  
**Room and Schedule:** Fulton Hall 453 MW 12:00 Noon-01:15PM  
**Satisfies Core Requirement:** None  
**Prerequisites:** A previous course in statistics (BZAN1135 OR BZAN1137), management science (BZAN2235 or BZAN6604), and Excel (BZAN1037 or ISYS1021) plus familiarity with the rules of baseball, football, and basketball.

BZAN660401
Management Science
Neale, John J
Spring 2024
This course provides an overview of the concepts and methods of management science. Sometimes referred to as prescriptive analytics or decision analytics, management science is a subset of the larger field of business analytics and focuses on the use of math models to make better business decisions. The primary goal of the course is to help you become a more skilled builder and consumer of models. The course will show you how to use Excel spreadsheets effectively for business analysis and introduce you to some of the more important analytic methods including optimization and simulation. These methods will be applied to problems arising in a variety of functional areas including operations, finance, and marketing. STEM-designated.

**Forecasting for Business Analytics**

Ulusoy, Veysel

**Spring 2024**

The theory and practice of applied time series analysis will be explored. First the different segments (trend, seasonality, cyclical, and irregular) of a time series will be analyzed by examining the Autocorrelation functions (ACF) and Partial Autocorrelation functions (PACF). The various types of time series models include linear regression, panel regression, seasonal decomposition, exponential smoothing, and ARIMA modeling as well as combining models. In short, this course will equip you with tools necessary to construct forecasts to inform business decisions. As such, the focus of the course will not be only on tools, but also on how they are used in business. STEM-designated

Supply Chain Management
Alev, Isil
Spring 2024
A supply chain consists of all parties involved in fulfilling a customer request, including suppliers, manufacturers, distributors, and retailers. Over the last decade, firms have started focusing on supply chain management as a source of competitive advantage. There’s a realization that no company can do better than its supply chain. This course will provide students with an overview of the concepts, models, and methods that are important for the design and operation of modern, global supply chains. Classes are hands-on, with many opportunities to analyze cases and play simulation games. STEM-designated.

Operations Management
Alev, Isil
Spring 2024
Operations, like accounting, finance and marketing, is one of the primary functions of every organization. Operations managers transform human, physical and technical resources into goods and services. Hence, it is vital that every organization manage this resource conversion effectively and efficiently. How effectively this is accomplished depends upon the linkages between operating decisions and top management (strategic) decisions. The focus of the course is decision-making at the operating level of the firm, converting broad policy directives into specific actions within the organization. Strong emphasis will be placed on the development and use of quantitative models to assist in decision making.

Data Analytics 1: Model Building
VanderWerf, Pieter A
Spring 2024
Machine Learning, big data, data mining, predictive analytics. These are what the course covers. They consist of the creation and use of mathematical computer models to predict important quantities and events with uncanny accuracy. As one book put it, "Who clicks, who buys, and who dies." The course teaches both the principles and the details of the major methods of making and applying these models to actual business problems. To produce models on the computer, students also learn the R coding language. This is the preferred high-level software for Machine Learning and statistical applications. STEM-designated

Coding for Business
Sterpe, Peter J
Spring 2024
This is an introductory course in computer programming based on Python (a language suitable for all business and analytics programs). The course emphasizes coding literacy and teaches coding skills that are relevant for business decision makers. MBA DA3 is a prerequisite. This course will give students the knowledge and confidence to apply coding to a business problem, and the ability to go from a problem statement to a repeatable set of steps for solving the problem in a general way. It will enable students who might not code professionally to work effectively with colleagues who do, and it will equip interested students to develop significant programs of their own. STEM-designated.

BZAN806701
Machine Learning for Business Intelligence
VanderWerf, Pieter A
Spring 2024
This course builds on Data Analytics 1 to provide students with advanced tools and skills for Machine learning (ML) in business practice. On the technical side, the course content extends to a wider range of algorithms as well as advanced methods for data sampling and model building and evaluation. More depth in application comes from student reports on current events in Machine Learning, and a course project that involves complete model construction and analysis for an actual business problem with an actual corporate data set. The course assumes the student has experience with the basic machine learning algorithms and the R coding language. STEM-designated.

International Business Law
Blodgett, Mark S
Summer 2023
This course examines international business law, the law of nations that provides a global framework for doing business. Among topics addressed are sources of international law including custom, principles and treaties; jurisdiction, sales contracts, letters of credit, arbitration, anti-trust, bribery and intellectual property. World Trade Organization and European Union cases are included that address the most current and dynamic global business issues. Students engage in legal research and case analysis as part of a team case presentation.

BSLW112501
Real Estate Fundamentals  
Chazen, Edward  
Fall 2023  
This is an introduction to the real estate industry, looking at it from multiple perspectives. Through lectures, case studies and guests speakers, we will explore the largest asset class in the world. We will learn industry terminology and how leases create property cash flow; how design and market research influences projects; how tenants make leasing decisions; and the role of the public sector and the community in approval and financing - often to advance public purposes - and the tension between the private developer and public sector; we will study affordable, low income and senior housing.

BSLW115601
Introduction to Real Estate Law
Cella, Teresa L
Fall 2023
This course is an introduction to commercial real estate law. The course examines the process inherent in real estate transactions from a legal and functional viewpoint. It covers issues relating to acquisitions, dispositions, ownership, financing, and leasing of commercial properties. The course also examines the legal aspects of relationships involved in real estate transactions, including those between buyers and sellers, landlords and tenants, and borrowers and lenders. The course will follow a property acquisition and financing from the letter of intent stage through closing with an emphasis on the most commonly negotiated aspects of a purchase and sale agreement, the due diligence process (including an examination of title, survey, and zoning matters as well as lease review), real estate financing, and closing logistics. Taking a hands-on approach and with expertise shared by guest speakers, students will gain insight into how commercial real estate transactions come together.

BSLW118501
Topics: Law and Economics
Wesner, Thomas L
Fall 2023
Can we be optimistic about our future as phrases such as "new normal" and "austerity measures" take hold of our national psyche? Is there reason for hope after the Great Recession has substantially altered the global economic landscape? Through this course, students will utilize an interdisciplinary approach to understanding important legal, business, and economic issues they will soon be called to address as leaders, policymakers, businesspersons, and citizens. Over the course of the semester, students will work to create politically and economically viable solutions to many of the most critical legal, economic, and policy issues facing our nation and world.

BSLW200001
The State of Affordable Housing in the States
Houston, Elizabeth Ann; Korman, Henry A
Fall 2023
Course offered for Sophomores only. How does housing affect the lives of Americans? Where you live determines your access to schools, quality of healthcare, fresh food, clean air, parks and recreation, affordable credit, and even how long you are likely to live. This course explores concepts of housing policy and planning at the national, state, and local levels. It examines programs and policies used to subsidize housing for millions of Americans and help them gain access to a decent place to live. Topics will be considered from multiple perspectives including housing finance, design, community planning, inequality, operations management, and sustainability. We will explore the historical and economic context of U.S. housing and discuss the barriers that low-income families face that affects their access to decent housing. The course will be divided into three sections: history, policies, and today's issues. Students will explore some of the most recently developed programs and how they fit into effective community revitalization. These programs will be evaluated in class discussions and group presentations.

BSLW220701
Urban Design for Complexity and Sustainability
Littell, Matthew
Fall 2023
The course explores the changing demands on urban environments in the twenty-first century and the newest policies, technologies, and design approaches that are being developed to address them. Topics will include analyses of the factors that shape the physical form of cities, including zoning and regulatory contexts, real estate development patterns, transportation infrastructure, environmental challenges, and aesthetics. The material will be introduced as case studies and surveys, with presentations by design professionals, city officials, and real estate developers. Students will gain literacy in zoning, real estate metrics, planning, and issues related to architectural design and large scale urban design. The semester will conclude with a final project synthesizing many of the topics covered.

Urban Action Lab
Perkins, Taylor A
Fall 2023
Urban Action Lab is a semester long class that provides students with first hand experience within the field of real estate and urban action, working on projects that advance affordable housing and access to opportunity. Students pursue research projects in partnership with mission driven organizations from across the City of Boston. Each project is completed in collaboration with a partner organization and are selected based on their potential for high-impact contribution to the organization. Project components include research, evaluation, interviewing, and writing. Students will work in close collaboration with partner agencies and fellow students. The class will meet once per week and will occasionally require students to attend meetings off-campus.

BSLW222201
Real Estate Transactions
Chazen, Edward; Herlihy, Joseph, Esq.
Fall 2023
Real Estate Transactions, is a new course that will examine real estate deals through a practitioner perspective that integrates the business and legal aspects of acquiring land and buildings; designing, developing and constructing buildings; financing and loan workouts; leasing and landlord/tenant rights; managing, operating and selling income property. The course will look at each step of the process in consummating a real estate transaction and the role of various parties - property owner; bank or other lender; investor and buyer of tax credits; tenant; attorneys for different parties; city agency; architect; general contractor and others integral to the success (or failure) of the transaction. The course will be team-taught by a CSOM business and law professor, each with many years of teaching and practical experience negotiating, documenting and closing real estate transactions. The format of the course will include lectures, many case studies, simulations of negotiating transactions and selected guest speakers to supplement the course work with real world experiences. The primary student learning goals are to understand the complexity of business and legal issues in a real estate transaction; how to document key aspects in term sheets, letters of intent and other steps in the process; and, develop sound and effective negotiating skills.

BSLW660401
Law for the Entrepreneur
Kaiser, Emily Andrea
Fall 2023
An elective built to explore legal questions and challenges faced by entrepreneurs and those supporting the success of entrepreneurs. Structured as an experiential and collaborative course, students will have the opportunity to explore legal issues presented throughout a company lifestyle. Starting with the inception of an idea, students will survey the considerations and processes required for forming an entity, protecting intellectual property, structuring incentive compensation for founders and employees, drafting agreements for service providers, vendors and customers, and preparing for an investment round. With the assistance of guest speakers and evaluation of case studies, students will have the chance to inquire about and access industry-specific considerations. The final project will consist of a mock conversation with interested investors, requiring the delivery of due diligence of the company, a snapshot of the companies pre- and post-round capitalization, and a presentation of the expected use for the financing. Final assessment will place heavy weight on class participation and group work.

Spring 2024
This course introduces students to the legal system and the social, legal, and regulatory environment of business. In addition to learning how the legal system works, students study substantive areas of business law including antitrust law, securities regulation, environmental law, employment law, international business, and intellectual property rights. The course includes an examination of the law of contracts from formation requirements to remedies for breach.

Real Estate Development
Chazen, Edward
Spring 2024
This course employs various teaching and learning methods: class lectures; videos of interviews with experts and about illustrative projects; case study discussion; guest lectures; team-based virtual tours of Boston neighborhoods that have been transformed by large-scale real estate development; and, a capstone project of teams preparing a development plan for an actual site in the Boston areas. This course is focused on what real estate development is and what it means to be a real estate developer. Students will gain an understanding of the process of real estate development, including design and construction; how developers engage with the public sector and the surrounding community to obtain approval for a development; how projects are financed; and, other important elements that contribute to completing successful real estate projects. Also learn about the legal aspects of developments; the ways that development is a catalyst for neighborhood improvement and local economic growth; and, trends in sustainable development.

BSLW114801
International Law
Scheufele, Ashly E
Spring 2024
The goal of this course is to provide students with an overview of how international law impacts global commerce. We start the semester by examining how companies do business globally and comparing aspects of foreign legal systems. Next, we work to answer the questions: what is international law, where does it come from, and how does it interact with national law? We study specific topics in international law relevant to global companies, including efforts to establish uniform rules for international contracting, methods for resolving international commercial disputes, cross-border investment protections and trade agreements, and corruption. Finally, we take an in-depth look at real world applications of international legal principles using case studies from around the world. Case topics will range from the legal fallout from industrial disasters to the consequences of bribing foreign officials to the regulation of international sports. By the end of the semester, students will be able to recognize legal problems in the context of global business and will feel comfortable applying appropriate principles of international and national law to move towards a solution. There are no prerequisites.

Labor and Employment Law
Hendler, Elizabeth S
Spring 2024
Considerations pertaining to organized labor in society are examined including the process of establishing collective bargaining, representation, and bargaining status under the Railway Labor Act and the National Labor Relations Act. Discussion of leading cases relevant to the legal controls that are applicable to intra-union relationships and the legal limitations on employer and union economic pressures. The law of arbitration, public sector collective bargaining, and employee safety and health law are studied. Topics including laws prohibiting discrimination based on race, color, religion, gender, national origin, age, and disability are examined, as well as the developing law of employee privacy.

Securities Regulation is the study of how the government regulates financial markets and their participants, whether a start-up seeking capital through a Kickstarter campaign, a multi-national public company disclosing news to its shareholders, or an investment banker advising a company in its IPO. The course focuses upon the key federal statutes that regulate securities and participants in the securities markets: Securities Act of 1933, Securities Exchange Act of 1934, Sarbanes-Oxley, Dodd-Frank Act of 2010, Foreign Corrupt Practices Act, and several criminal statues. The students learn the role of the Securities and Exchange Commission and how the SEC will impact securities markets and their participants. The course covers the multitude of methods for raising capital within the confines of the Securities Act and the J.O.B.S. Act. Students learn how executives of public companies, and their auditors, lawyers, and bankers, decide when and how to make disclosures about the company. The course also examines financial scams and fraud, considering the ethical boundaries of the complex, fast-paced financial world. The class hosts guests ranging from SEC enforcement attorneys, to in-house counsel at a large bank, to defense counsel with specialties in insider trading and white-collar crime, Foreign Corrupt Practices Act, and the Bernie Madoff case. The class is intended for students interested in careers in finance, audit, leadership in public companies, or law.

**Topics:** Law and Economics

**Wesner, Thomas L**

**Spring 2024**
Can we be optimistic about our future as phrases such as "new normal" and "austerity measures" take hold of our national psyche? Is there reason for hope after the Great Recession has substantially altered the global economic landscape? Through this course, students will utilize an interdisciplinary approach to understanding important legal, business, and economic issues they will soon be called to address as leaders, policymakers, businesspersons, and citizens. Over the course of the semester, students will work to create politically and economically viable solutions to many of the most critical legal, economic, and policy issues facing our nation and world.

**Urban Action Lab**  
**McCullagh, Neil P;Perkins, Taylor A**  
**Spring 2024**  
Urban Action Lab is a semester long class that provides students with first hand experience within the field of real estate and urban action, working on projects that advance affordable housing and access to opportunity. Students pursue research projects in partnership with mission driven organizations from across the City of Boston. Each project is completed in collaboration with a partner organization and are selected based on their potential for high-impact contribution to the organization. Project components include research, evaluation, interviewing, and writing. Students will work in close collaboration with partner agencies and fellow students. The class will meet once per week and will occasionally require students to attend meetings off-campus.

Each team will work under the supervision of the Instructor, with weekly team meetings to review the work plan, progress toward identified goals and practicing several presentations that form an important part of the learning experience. There will be three field projects planned. This course is a complement to in-class learning and provides an experiential learning component to the real estate education at CSOM. The course consists of teams of 4-5 students each working on a field project for a real estate/developer investor, not-for-profit organization or government agency. The field projects are "real world" real estate projects that involve extensive data collection/analysis, interviews with a range of experts and others that can influence the conclusions and recommendations of the team, and presentations to management of the sponsoring organization. The field projects typically include development proposals for a property; re-development plans for an existing property; and, real estate market research to assist an investor considering expansion into new geographic markets.

Real Estate Case Competitions
Dept; Pereira, Thomas
Spring 2024
This course is for students interested in learning how to better prepare for real estate case competitions, with a particular focus on development, finance, and affordable housing. The course will meet weekly for seventy-five minutes to develop skills in the following areas: effectively analyzing a real estate development case, analyzing market conditions, crafting a proposal and slide deck, and preparing for judges' questions. This 10-week course will culminate with students submitting proposals in the Corcoran Center Case Competition, a national real estate competition sponsored by Boston College's Joseph E. Corcoran Center for Real Estate and Urban Action.

The U.S Health Care system (or some would argue the lack thereof) often dominates the political, legal, and social policy discussion space. This course is intended to provide a survey-style baseline for educated participation in the discussions and perhaps, ultimately, active participation in the industry solutions going forward. After reviewing the historical context - how did we get here - this course will delve into the current structure of the healthcare services industry and how the legal system has helped shape that structure. Thematically, we will examine equity in access to care, industry efficiency, and quality of care. Across these themes, where has the market failed, and what have legal system players and other market constituents done to address the failures? Topics will include the advent and growth of managed care; provider organization structures; Affordable Care Act and health care reform efforts and concepts; the triple aim of improved patient experience and much more.

Public Speaking
Schwartz, Stacy M
Fall 2023
This course provides an introduction to basic concepts, theories, and principles of oral communications through the mode of public/in class speech performances. You will gain practical experience in exploring, discovering, and arranging ideas, using evidence and research to support claims, preparing organized outlines, and composing speeches while broadening your view of theoretical considerations in communications. This is an oral presentation class. Each student will present varied styles of public speaking to his/her peers. Our class will also include lectures, discussions, video analysis, and oral exercises to alleviate speech anxiety.

**Spring 2024**  
Essential Business Communication is a one-credit asynchronous course designed to support sophomores (and second-semester first-year students) transitioning from academic to business writing and preparing them for on-the-job communication. Students learn how to boost their business writing and presentation skills through various activities, including analyzing audiences, writing everyday business communication, collaborating, and presenting. Instructors and writing coaches provide individualized feedback to students in this online environment. The course is graded pass/fail. The course will be offered in one five-week term within a semester.

BCOM885001
Public Speaking
Schwartz, Stacy M
Spring 2024
This course provides an introduction to basic concepts, theories, and principles of oral communications through the mode of public/in class speech performances. You will gain practical experience in exploring, discovering, and arranging ideas, using evidence and research to support claims, preparing organized outlines, and composing speeches while broadening your view of theoretical considerations in communications. This is an oral presentation class. Each student will present varied styles of public speaking to his/her peers. Our class will also include lectures, discussions, video analysis, and oral exercises to alleviate speech anxiety.

**Individual Directed Study**  
**Sadka, Ronnie**
Summer 2023
This is an opportunity for students interested in independent study to engage in a one-to-one relationship with a faculty member of the Finance Department. This course is only available to students who have demonstrated (1) an extremely strong interest in a particular area of finance, and (2) a strong self-motivation and self-discipline in previous studies. Students are required to present their research results to a departmental faculty group towards the end of the semester. The permission of the department chairperson is to be obtained when the individual faculty member has agreed to direct the student's research project.

MFIN661601
Introduction to the Investment Banking Industry
Cramer, Robert E
Summer 2023
This course provides an overview of investment banking. We will study the investment banking industry with a specific focus on the role of investment bankers in capital markets and recent regulatory changes. Provide both an institutional perspective on the investment banking industry and an opportunity to apply financial theories and models. Some of the specific topics that we will cover are stock underwriting and valuation, fixed-income securities underwriting, including junk bonds, asset securitization, merchant banking and private equity firms, money management and mutual funds, structuring deals, including mergers, acquisitions, and divestitures, global financial markets, securities regulations, and ethics.

Credits: 3
Room and Schedule: Fulton Hall 115 TuTh 06:30PM-09:30PM
Satisfies Core Requirement: None
Prerequisites: MFIN8807 and MFIN1127
Corequisites: None
The course is intended to introduce the students to basic economic concepts such as supply and demand, market equilibrium, efficiency, opportunity costs, sunk costs, different market structures, gross domestic product (GDP), money, inflation, unemployment, and monetary policy. The course will be divided into two parts: (1) Microeconomics where the focus is on individual economic agents. In this part consumer demand, firm supply, market structure, equilibrium, efficiency, opportunity costs, and sunk costs are covered. (2) Macroeconomics where the focus is the economy as a whole. In this part the topics are GDP, growth, money, inflation, and unemployment.

MFIN882001
Management of Financial Institutions
James, Robert F
Summer 2023
This course considers banks and other financial institutions as information and deal-making entities. This broad perspective is used to explain how and why changing information and contracting technologies are altering the structure of the financial services industry and financial regulation. Lectures explore the implications of these ongoing changes for the methods financial institution executives should use to measure and manage an institution's risk and return.

Derivatives and Risk Management
Dong, Gang Nathan
Fall 2023
This course is an introduction to derivative assets such as futures, forwards, swaps, and options, financial engineering, risk management, and mortgage and credit derivatives. We will cover the pricing of these derivative assets as well as securities that contain embedded options. We will consider risk management strategies such as static and dynamic hedging. Applications will be considered from equity, commodity, bond, and mortgage-backed markets.

This course examines how corporate financial managers create value for stakeholders through a broad range of financial transactions. We will first take an in-depth look at corporate valuation methodologies from both a theoretical and applied perspective. Then, using a combination of case studies, class presentations, and assigned readings, we will focus on applications of these methods in the context of various types of corporate restructurings. Specific applications will include capital structure and financing decisions, M&A and other asset restructuring decisions, and more complex financial transactions including buyouts and distressed restructurings.

MFIN220701
Real Estate Finance
Chazen, Edward
Fall 2023
This course focuses on how capital is applied to debt and equity financing of income-producing real estate. The course content covers private debt and equity and public securities markets for real estate finance. The course format includes lectures, case study discussions, financial modeling exercises, guest speakers, REIT stock analysis, discussion of selected readings and simulation of negotiations. The course covers real estate finance from the perspective of the users of capital (developers and property owners) and the sources of capital (lenders and equity investors). The primary student outcomes are the ability to value commercial property; understand risks; how to structure a financing of commercial real estate; know the diverse sources of capital in the real estate industry and analyze, discuss and present a professional financing for debt and equity.

MFIN221001
Entrepreneurial Finance
Hession-Kunz, Andrew
Fall 2023
This course looks at the financial aspects of hyper-growth companies, including fundraising, managing growth, revenue creation, and more. Course includes building a long-term financial projection as part of a simulation, in which you work with the Venture Capital course to analyze early-stage deal terms and negotiate an investment round. This course includes Excel Modeling assignments. This course is for people who are not taking nor plan to take MFIN6602 Venture Capital.

Credits: 3
Room and Schedule: Fulton Hall 511 (Auditorium) TuTh 12:00 Noon-01:15PM
Satisfies Core Requirement: None
Prerequisites: MFIN1127
Corequisites: None
The focus of this course is on the fundamental drivers, functioning and inter-connectedness of global financial markets. Products covered will be interest rate markets (government bonds, money markets, swaps, interest rate derivatives, credit markets), equity indices, and foreign exchange markets. Tickers flash across TV screens detailing every move in interest rates, currencies and equity markets. Why do some events move markets sometimes and not at other times? What just happened in UK markets? We will explore the role of economic data, flow of funds analysis, central bank policy, and fiscal and other government policies from a macro perspective in assessing these questions. We will learn from historical episodes that still shape market structures and behavior today. We will approach these topics from a practitioner's perspective and two or three active portfolio managers will be guest lecturers over the course of the semester. Learning will be via a combination of classroom, reading research papers, and observing markets in real time. There will be weekly homework assignments related to required reading that include current events. A team based project and a mid-term project will tie together subjects covered to that point in the course. Discussions of the current market environment will take place over the period of the course, with the final project requiring each student to formulate and present an investment outlook that ties together the various disciplines learned over the semester. A curious and open mind are helpful attributes for students wishing to take this course.
MFIN223501
Investment Banking
Kisgen, Darren
Fall 2023
This course is the study of investment banking beginning with strategic planning and financial management; moving to the analysis, financing and valuation of investment opportunities; and finishing with the study of corporate governance and ethical issues faced by investment bankers. This course examines the primary functions of investment banking such as syndication, mergers and acquisitions (M&A), leveraged buyouts (LBO) and corporate restructuring.

**MFIN226001**  
**Active Portfolio Management**  
**Risman, Maksim**  
**Fall 2023**  
The course provides an introduction to portfolio management with focus on quantitative investment process and methods. The course balances theoretical foundations with practical applications. Primary topics include asset allocation, portfolio construction including optimization, risk modeling, and risk measurement and management. Instruction will combine lectures, case discussions, and workshops, providing opportunities for students to apply quantitative methods to real world problems in several of the explored areas. The course combines investment ideas with analytics, so prior study in any or all of the following areas will make the course more enjoyable: probability/statistics (e.g., normal distributions, regression analysis), linear algebra (e.g., matrix algebra), and introductory calculus (e.g., derivatives). In addition, workshops will include use of both Microsoft Excel and Python (e.g., Jupyter Notebooks). Basic competency in each is a minimum requirement, and of course, the greater your skills, the better.

This is an opportunity for students interested in independent study to engage in a one-to-one relationship with a faculty member of the Finance Department. This course is only available to students who have demonstrated (1) an extremely strong interest in a particular area of finance, and (2) a strong self-motivation and self-discipline in previous studies. Students are required to present their research results to a departmental faculty group towards the end of the semester. The permission of the department chairperson is to be obtained when the individual faculty member has agreed to direct the student's research project.

MFIN666501
Applied Fundamental Analysis
Navaratnam, Arvind
Fall 2023
The objective of the course is to provide hands-on experience in financial statement analysis in a real-world setting. Students will be exposed to general tools of financial analysis, theoretical concepts, and practical valuation issues. By the end of the course, students should develop a framework for evaluating an investment opportunity by using a firm's financial statements to draw an understanding of their performance and provide a basis for making reasonable valuation estimates, as well as have an understanding of the challenges investor face in determining the earnings power of a company. CGSOM students can earn credit for either MFIN6665 or MFIN8869, not both.

MFIN668001
Renewable Energy and Sustainable Investments
Adamson, Seabron C; Raikar, Santosh G
Fall 2023
In this course we will examine how large scale renewable energy projects actually get financed and built, using the structures of modern non-recourse project finance. We will examine the economics of large-scale green power production, and how it fits into the U.S. and global energy industries. Through a mixture of lectures and real-life examples students will get to see how renewable energy project finance works in actual deals that mix finance, public policy, legal, engineering, and environmental issues. The skills developed in analyzing non-recourse cash flow-based finance will be generally applicable to students interested not just in green energy, but also more widely in private equity and infrastructure investing. The course is designed to introduce students to the theory and practice of project finance in the energy and renewables sector, complementing academic finance theory with the practical aspects of financing capital intensive energy projects.

Management of Financial Institutions
James, Robert F
Fall 2023
This course considers banks and other financial institutions as information and deal-making entities. This broad perspective is used to explain how and why changing information and contracting technologies are altering the structure of the financial services industry and financial regulation. Lectures explore the implications of these ongoing changes for the methods financial institution executives should use to measure and manage an institution's risk and return.

Corporate Valuation and Restructure
Hotchkiss, Edith
Fall 2023
This course exposes students to a broad range of financial restructuring techniques that can be applied to improve business performance. Case discussion and visitors are used to illustrate how various corporate restructuring approaches can be used to increase firm value and to highlight characteristics of potential candidates for different restructuring techniques. The case analysis provides opportunity to practice the application of standard corporate valuation methods.

**MFIN882401**  
**AIM1: Applied Investment Management**  
Martens, David J  
Fall 2023  
This course provides an opportunity for students to utilize both theoretical and practical aspects of the investment management process by competing to actively manage a million dollar portfolio for the University. AIM1 teaches students about institutional portfolio management, asset allocation, risk assessment, investment manager evaluation, and fundamental equity analysis. Students are placed in investment teams to respond to a Request for Proposal (RFP) in which they develop a framework for identifying and evaluating equities and bonds and managing a diversified risk-adjusted portfolio. Winning teams will be selected based on final presentations to a board of professional institutional investors and given the opportunity to manage live accounts in AIM2 during the spring semester.

**MFIN884501**  
**Global Financial Markets**  
Basta, Karim M  
Fall 2023
The focus of this course is on the fundamental drivers, functioning and inter-connectedness of
global financial markets. Products covered will be interest rate markets (government bonds,
money markets, swaps, interest rate derivatives, credit markets), equity indices, and foreign
exchange markets.  Tickers flash across TV screens detailing every move in interest rates,
currencies and equity markets. Why do some events move markets sometimes and not at other
times? What just happened in UK markets? We will explore the role of economic data, flow of
funds analysis, central bank policy, and fiscal and other government policies from a macro
perspective in assessing these questions. We will learn from historical episodes that still
shape market structures and behavior today. We will approach these topics from a practitioner's
perspective and two or three active portfolio managers will be guest lecturers over the course of
the semester. Learning will be via a combination of classroom, reading research papers, and
observing markets in real time. There will be weekly homework assignments related to required
reading that include current events. A team-based project and a mid-term project will tie
together subjects covered to that point in the course. Discussions of the current market
environment will take place over the period of the course, with the final project requiring each
student to formulate and present an investment outlook that ties together the various
disciplines learned over the semester. A curious and open mind are helpful attributes for
students wishing to take this course.

Ph.D. Seminar: Empirical Asset Pricing
Balduzi, Pierluigi
Fall 2023
This course is for second year Ph.D. students of finance. The course is intended to generate enthusiastic, high quality intellectual activity around the course material. Focuses on the development of skills that will help students become conversant enough with basic theory and the current literature on asset pricing that would permit them to read critically and analyze papers in this area, develop enough expertise in selected empirical methods in finance that they will be able to use these techniques in their research, and to find potential thesis topics.

Data Analytics in Finance
Reuter, Jonathan M
Fall 2023
Data Analytics in Finance focuses on critical skills in programming and computation/analysis of financial data, and more importantly, pragmatic applications in portfolio management and risk management. Theoretical concepts and background for these techniques will be introduced, and the focus is on their applications and hands-on implementation utilizing software packages and programming platforms that are widely used in the financial industry (Python). The course will extensively focus on real-world applications of finance theory.

MFIN220701
Real Estate Finance
Chazen, Edward
Spring 2024
This course focuses on how capital is applied to debt and equity financing of income-producing real estate. The course content covers private debt and equity and public securities markets for real estate finance. The course format includes lectures, case study discussions, financial modeling exercises, guest speakers, REIT stock analysis, discussion of selected readings and simulation of negotiations. The course covers real estate finance from the perspective of the users of capital (developers and property owners) and the sources of capital (lenders and equity investors). The primary student outcomes are the ability to value commercial property; understand risks; how to structure a financing of commercial real estate; know the diverse sources of capital in the real estate industry and analyze, discuss and present a professional financing for debt and equity.

MFIN222001
Global Macro and the Financial System
Schmelzing, Paul
Spring 2024
The course is designed for both undergraduate and graduate students with interests in applied finance, economics, and history - especially students who are planning to work in financial markets, financial policy, or economic or financial research. Students should have an interest in current issues in international finance and policy, and enjoy empirical approaches - but no advanced quantitative background is required. This course focuses on a long-run view of the international financial system: we place the post-2008, post-pandemic financial environment in global macro, in asset markets, and in the banking system into very long-run context, in order to assess current secular trends in markets and the macroeconomy, including trends and "cycles" in inflation, growth, asset valuations, and financial crises. Students will first be introduced to the general contours of the international financial system up to 2022 - before turning to the major trends in banking and sovereign crises, monetary policy, asset pricing, and globalization. We put specific emphasis on discussing international financial themes that currently occupy policymakers, practitioners, and academics in a global "high inflation, low interest rate regime", in the context of longer-run historical markets data. We also analyze a wide range of past "shocks" and "crises" in global macro and finance over time, to learn how to evaluate risks. Among other issues, we will focus on the following current debates: 1914, 1981 - and 2022? Major turning points in asset markets. Long-run financial crisis patterns and interventions. Historical shifts in the global reserve currency. Long-run trends in inequality, globalization, and wealth distribution.

MFIN226001
Active Portfolio Management
Leombroni, Matteo
Spring 2024
The course provides an introduction to portfolio management with focus on quantitative investment process and methods. The course balances theoretical foundations with practical applications. Primary topics include asset allocation, portfolio construction including optimization, risk modeling, and risk measurement and management. Instruction will combine lectures, case discussions, and workshops, providing opportunities for students to apply quantitative methods to real world problems in several of the explored areas. The course combines investment ideas with analytics, so prior study in any or all of the following areas will make the course more enjoyable: probability/statistics (e.g., normal distributions, regression analysis), linear algebra (e.g., matrix algebra), and introductory calculus (e.g., derivatives). In addition, workshops will include use of both Microsoft Excel and Python (e.g., Jupyter Notebooks). Basic competency in each is a minimum requirement, and of course, the greater your skills, the better.

MFIN226501  
Behavioral Finance  
Hartzmark, Samuel  
Spring 2024
This course explores how the market is influenced by the behavior of investors, attributable to psychology or institutional constraints. We will survey recent research on possible mispricing in these markets, investor behavior, the predictability of security returns, and the practical limits to arbitrage. Possible topics include earnings and price momentum, market anomalies, tactical asset allocation, under-reaction to news, security complexity and obfuscation, and socially responsible investing. Practical implications for portfolio management are developed and emphasis will be placed on data-driven analysis of financial markets. The course has 3 major goals. The first will be to take the view of a professional money manager to utilize knowledge of investor behavior to understand market movements and (hopefully) profit from opportunities that are available. The second will be to understand how data is used to uncover such opportunities. The third is to understand how individuals make decisions in order to make better personal investment decisions and avoid commonly exhibited biases when making financial decisions. Achieving these goals will require learning some theories, facts and statistical tools. The theories will allow for a common language in the discussion of returns and will include risk-based asset pricing, present value relations and cognitive psychology. The facts relate to risk and return, value vs. growth, momentum, market frictions and trading costs. Support for both of these will come from the data for which we will need the tools of portfolio analysis, multifactor models and forecasting regressions.

Introduction to the Investment Banking Industry
Cramer, Robert E
Spring 2024
This course provides an overview of investment banking. We will study the investment banking industry with a specific focus on the role of investment bankers in capital markets and recent regulatory changes. Provide both an institutional perspective on the investment banking industry and an opportunity to apply financial theories and models. Some of the specific topics that we will cover are stock underwriting and valuation, fixed-income securities underwriting, including junk bonds, asset securitization, merchant banking and private equity firms, money management and mutual funds, structuring deals, including mergers, acquisitions, and divestitures, global financial markets, securities regulations, and ethics.

Equity Securities Analysis
Azevedo Duarte Silva, Ernesto T
Spring 2024
The equities securities analysis and valuation course will teach a highly rigorous approach to equities securities analysis and valuation with a heavy emphasis on in-class discussion and case study analysis. Initially, the course will focus on financial theory that underpins equity security valuation, and then move on to understand how industry structure and a company's competitive advantage influences an investor's decision making and valuation. Financial statement analysis, modeling, and different valuation techniques will be explored in detail. Where appropriate, guest lecturers will be brought in to share their specific expertise and perspectives as an investor. By the end of the course, the goal will be to have every student be able to analyze a company as a potential investment and understand its valuation.

Private Equity
Gasperoni, James H
Spring 2024
This course is the study of Private Equity as an asset class and its various components. Private Equity involves the investment of capital into companies and assets that are not publicly traded on stock exchanges. The objective of the course is to provide a basic understanding of the Private Equity ecosystem: private equity companies, underlying investments in companies (or assets) and the investors that provide financing for deals. A primary focus of the class will be traditional buyout investments: an area of the capital markets that is growing in both size and opportunity as well as increasing in interest from investors. In addition, the course will consider the similarities and differences between typical buyouts and other private equity styles.

This course explores how the market is influenced by the behavior of investors, attributable to psychology or institutional constraints. We will survey recent research on possible mispricing in these markets, investor behavior, the predictability of security returns, and the practical limits to arbitrage. Possible topics include earnings and price momentum, market anomalies, tactical asset allocation, under-reaction to news, security complexity and obfuscation, and socially responsible investing. Practical implications for portfolio management are developed and emphasis will be placed on data-driven analysis of financial markets. The course has 3 major goals. The first will be to take the view of a professional money manager to utilize knowledge of investor behavior to understand market movements and (hopefully) profit from opportunities that are available. The second will be to understand how data is used to uncover such opportunities. The third is to understand how individuals make decisions in order to make better personal investment decisions and avoid commonly exhibited biases when making financial decisions. Achieving these goals will require learning some theories, facts and statistical tools. The theories will allow for a common language in the discussion of returns and will include risk-based asset pricing, present value relations and cognitive psychology. The facts relate to risk and return, value vs. growth, momentum, market frictions and trading costs. Support for both of these will come from the data for which we will need the tools of portfolio analysis, multifactor models and forecasting regressions. STEM-designated

Data Analytics in Finance
Xu, Ran
Spring 2024
Data Analytics in Finance focuses on critical skills in programming and computation/analysis of financial data, and more importantly, pragmatic applications in portfolio management and risk management. Theoretical concepts and background for these techniques will be introduced, and the focus is on their applications and hands-on implementation utilizing software packages and programming platforms that are widely used in the financial industry (Python). The course will extensively focus on real-world applications of finance theory. STEM-designated

PhD Seminar: Research Topics in Behavioral Finance
Hartzmark, Samuel
Spring 2024
This PhD course will examine how psychological biases and non-standard preferences interact with traditional topics in corporate finance and asset pricing. We will survey recent research on biases in individual decision-making, the predictability of security returns, and the practical limits to arbitrage. The objective of the course is (1) to familiarize students with the foundations and recent developments of research in behavioral finance, and (2) to help students develop research ideas and quantitative skills, which can be used to write a successful PhD dissertation.

ISYS770001
Data Analytics 2: Data Management for Analytics
Evenchik, Leonard N
Summer 2023
Information Technology (IT) and Data Analytics now permeate the strategy, structure, and operations of modern enterprises, and new business practices have led to an orders of magnitude increase in the amount of data available for analysis and decision-making. It is essential that managers develop a deep understanding of how data can be structured, captured, and queried in order to support operations, decision-making, and strategic insight. At the same time, managers must become fluent with IT so that they can promote innovative strategic initiatives that are increasingly data and IT dependent. In this course, students will develop an understanding of IT theory and practice, study key emerging technologies, and develop their ability to identify new opportunities made possible by IT. This course will also provide students with a deep understanding of data and analytics by exploring how business processes are analyzed, data is modeled (using entity relationship diagrams), databases are designed, and data is queried using SQL. This combination of theory and practice will allow students to develop their ability to identify and take advantage of the new opportunities now made possible by data analytics and Information Technology.

The on-campus section of this course (ISYS7700) will meet weekly on campus. Please note that the online asynchronous section of this course will also include two or three synchronous web conferences during the semester. Please review the course syllabus for the schedule for these web conferences, or contact the instructor. STEM-designated

**Data Analytics 3: In Practice**  
**Karpovsky, Anna**  
**Summer 2023**
Modern information systems now generate massive volumes of data. Organizations everywhere struggle to aggregate, analyze, and monetize the growing deluge of data. Business Analytics capitalizes on this data by combining statistical and quantitative analysis, explanatory and predictive modeling, and fact-based management. Managers can explore patterns, predict future trends and develop proactive, knowledge-driven decisions that affect all parts of modern organizations. This course provides students with a pragmatic familiarity with the capabilities and limitations of emerging analytics techniques, an introduction to Python, an overview of methods and tools, and a core understanding required to be an intelligent manager, designer, and consumer of analytics models. Information Systems Courses: Fall 2023

ISYS226701
Technology and Culture
Griffith, William
Fall 2023
This interdisciplinary course will first investigate the social, political, psychological, ethical, and spiritual aspects of the Western cultural development with a special emphasis on scientific and technological metaphors and narratives. We will then focus on the contemporary world, examining the impact of our various technological creations on cultural directions, democratic process, the world of work, quality of life, and especially on the emergent meanings for the terms "citizen" and "ethics" in contemporary society. Students will explore technologies in four broad and interrelated domains: (1) computer, media, communications, and information technologies, (2) biotechnology, (3) globalization, and (4) environmental issues.

Credits: 3
Room and Schedule: Fulton Hall 250 M 04:30PM-06:50PM
Design Thinking and Strategy
Dickinson, Kristine D

Fall 2023
Interested students should contact the department or the instructor for application details.
"Design thinking is a human-centered approach to innovation that draws from the designer's toolkit to integrate the needs of people, the possibilities of technology, and the requirements for business success" (Tim Brown, CEO of IDEO). Design thinking is a creative problem-solving method and an integral driver of innovation. When done well, design thinking plays a significant role in a business leader's ability to foresee and adapt to customer needs. This course offers a foundation in design thinking skills, such as empathy, observation, brainstorming, strategic storytelling, and presentation design. This class is highly focused on teaching experience design through practical experimentation, and is directly relevant for students interested in product and brand management, marketing strategy, entrepreneurship, and beyond.

Fichman, Robert  
Fall 2023  
The steady march of Moore's Law has accelerated the introduction of new products, processes, and business models enabled by digital technology. These digital innovations are transforming how we live and work, how companies compete, and the structure of entire industries. This course will provide students with the concepts and frameworks they will need to: (1) understand the nature of digital innovations and the factors affecting their emergence and diffusion, (2) identify and evaluate digital innovation opportunities (and threats), (3) manage the digital innovation process in organizations, and (4) evaluate the effects of digital innovation on business and society.

Systems Analysis and Design
Wyner, George M
Fall 2023
This course is required for Information Systems concentrators. The course studies information systems (IS) development including requirements, analysis, design, and implementation phases and workflows. We investigate the roles of systems analysts; serving as intermediaries between users, managers, and implementers; and helping each to understand the needs and problems of others. The student will learn about major methods and tools used in the systems development process. Please note that Database Systems and Applications (ISYS3257/CSCI1157) must be completed prior to taking this course.

Geographic Information Systems for Planning and Decision-Making
Cohen, Will W
Fall 2023
Large quantities of information are available to describe our social and physical environment with high detail, but making sense of this data requires specialized skill sets. Geographic Information Systems (GIS) is a general approach to analysis and is a powerful set of tools for understanding complex problems or for making a compelling argument about issues grounded in the physical or social environment. It is widely used in the public and private sectors. This course will introduce students to the use of GIS and representation as a means of looking at and representing spatial data. Students will learn how to perform the three broad steps of spatial analysis: 1) collecting and organizing data, 2) analyzing this data for appropriate patterns, and 3) using software to represent data on maps to support decision making. STEM-designated.

ISYS664101
Cybersecurity Strategy and Management
Evenchik, Leonard N
Fall 2023
The challenges and issues of cybersecurity are everywhere, and today, these are not just technical issues, but critically important business issues for all levels of management. The goal of this course is to develop an understanding of cybersecurity principles, procedures, tools and technology from a managerial perspective. The first part of this course is a discussion of why cybersecurity is a difficult and pervasive problem. We then learn about the different types of threats and study the tools and techniques that society, organizations, and individuals have to mitigate them, with a focus on risk management and internal controls. We will also explore a number of new areas of work including cryptocurrency and the security requirements for the Internet of Things (IoT). An important part of the course will be team projects at the end of the term, where students apply the concepts and techniques we have studied to a real-world management problem or challenge. STEM-designated.

ISYS665501
Introduction to Blockchain and its Business Applications
Cathcart, Graham T
Fall 2023
The objective of this course is to introduce the business of blockchain--a technology that has the potential to drastically alter the way value is stored, exchanged, shared, and distributed. It is the backbone of the next iteration of the Internet: Web 3.0 or The Internet of Value. This course does not require any technical knowledge or prior knowledge of the subject, and is designed to give students a foundational knowledge of blockchain technology and a familiarity with the basic principles that govern blockchain protocols. Students will obtain a fluency in the terms and concepts required to understand how this powerful technology works. Most importantly, students will study real-world applications of the technology, which range far beyond blockchain's original use case (cryptocurrency) and hear from a number of influential guest speakers who are using or investing in blockchain technology at their companies today. Students who complete the course will understand blockchain and cryptocurrency's game-changing potential, be able to separate fact from hype, and be effective leaders in the space. STEM-designated

Wyner, George M
Fall 2023
This course is intended for full-time M.B.A. students Information Technology (IT) and Data Analytics now permeate the strategy, structure, and operations of modern enterprises, and new business practices have led to an orders of magnitude increase in the amount of data available for analysis and decision-making. It is essential that managers develop a deep understanding of how data can be structured, captured, and queried in order to support operations, decision-making, and strategic insight. At the same time, managers must become fluent with IT so that they can promote innovative strategic initiatives that are increasingly data and IT dependent. In this course, students will develop an understanding of IT theory and practice, study key emerging technologies, and develop their ability to identify new opportunities made possible by IT. This course will also provide students with a deep understanding of data and analytics by exploring how business processes are analyzed, data is modeled (using entity relationship diagrams), databases are designed, and data is queried using SQL. This combination of theory and practice will allow students to develop their ability to identify and take advantage of the new opportunities now made possible by data analytics and Information Technology. STEM-designated

Information Systems Courses: Spring 2024

ISYS226701
Technology and Culture
Griffith, William
Spring 2024
This interdisciplinary course will first investigate the social, political, psychological, ethical, and spiritual aspects of the Western cultural development with a special emphasis on scientific and technological metaphors and narratives. We will then focus on the contemporary world, examining the impact of our various technological creations on cultural directions, democratic process, the world of work, quality of life, and especially on the emergent meanings for the terms "citizen" and "ethics" in contemporary society. Students will explore technologies in four broad and interrelated domains: (1) computer, media, communications, and information technologies, (2) biotechnology, (3) globalization, and (4) environmental issues.

Design Thinking and Strategy
Dickinson, Kristine D
Spring 2024
Interested students should contact the department or the instructor for application details. "Design thinking is a human-centered approach to innovation that draws from the designer's toolkit to integrate the needs of people, the possibilities of technology, and the requirements for business success" (Tim Brown, CEO of IDEO). Design thinking is a creative problem-solving method and an integral driver of innovation. When done well, design thinking plays a significant role in a business leader's ability to foresee and adapt to customer needs. This course offers a foundation in design thinking skills, such as empathy, observation, brainstorming, strategic storytelling, and presentation design. This class is highly focused on teaching experience design through practical experimentation, and is directly relevant for students interested in product and brand management, marketing strategy, entrepreneurship, and beyond.

Systems Analysis and Design
Sterpe, Peter J
Spring 2024
This course is required for Information Systems concentrators. The course studies information systems (IS) development including requirements, analysis, design, and implementation phases and workflows. We investigate the roles of systems analysts; serving as intermediaries between users, managers, and implementers; and helping each to understand the needs and problems of others. The student will learn about major methods and tools used in the systems development process. Please note that Database Systems and Applications (ISYS3257/CSCI1157) must be completed prior to taking this course.

New Media Industries
McNealy, Paul-Jon
Spring 2024
This course is designed to introduce the changing business models of new media (video games, music, TV and film, and journalism) industries. This is achieved by examining in detail the technology enablers and disruptive forces in both the U.S. and around the world, consumer behaviors, as well as legal and regulatory concerns. A special emphasis will also be placed on media companies whose business models have been heavily influenced or altered by digital distribution. This class will be a combination of in-class and Zoom sessions during class time, and will have an emphasis on influential guest speakers from various industries.

Cybersecurity Strategy and Management
Evenchik, Leonard N
Spring 2024
The challenges and issues of cybersecurity are everywhere, and today, these are not just technical issues, but critically important business issues for all levels of management. The goal of this course is to develop an understanding of cybersecurity principles, procedures, tools and technology from a managerial perspective. The first part of this course is a discussion of why cybersecurity is a difficult and pervasive problem. We then learn about the different types of threats and study the tools and techniques that society, organizations, and individuals have to mitigate them, with a focus on risk management and internal controls. We will also explore a number of new areas of work including cryptocurrency and the security requirements for the Internet of Things (IoT). An important part of the course will be team projects at the end of the term, where students apply the concepts and techniques we have studied to a real-world management problem or challenge. STEM-designated.

**Data Visualization**  
**Karpovsky, Anna**  
**Spring 2024**  
This course covers foundations of data visualization and best practices to help students effectively analyze data and present their insights clearly in a way that will engage their audience. The course provides discussions and presentations on topics such as visual perception, the various chart types and when to use them, the effective use of colors, typography, maps, and other visualization techniques for incorporating analytics and storytelling, and teaches through many examples of compare and contrast. The conceptual discussions will be integrated with hands-on experience using Tableau. STEM-designated.

**Satisfies Core Requirement:** None
The objective of this course is to introduce the business of blockchain—a technology that has the potential to drastically alter the way value is stored, exchanged, shared, and distributed. It is the backbone of the next iteration of the Internet: Web 3.0 or The Internet of Value. This course does not require any technical knowledge or prior knowledge of the subject, and is designed to give students a foundational knowledge of blockchain technology and a familiarity with the basic principles that govern blockchain protocols. Students will obtain a fluency in the terms and concepts required to understand how this powerful technology works. Most importantly, students will study real-world applications of the technology, which range far beyond blockchain's original use case (cryptocurrency) and hear from a number of influential guest speakers who are using or investing in blockchain technology at their companies today. Students who complete the course will understand blockchain and cryptocurrency's game-changing potential, be able to separate fact from hype, and be effective leaders in the space. STEM-designated

Information Technology (IT) and Data Analytics now permeate the strategy, structure, and operations of modern enterprises, and new business practices have led to an orders of magnitude increase in the amount of data available for analysis and decision-making. It is essential that managers develop a deep understanding of how data can be structured, captured, and queried in order to support operations, decision-making, and strategic insight. At the same time, managers must become fluent with IT so that they can promote innovative strategic initiatives that are increasingly data and IT dependent. In this course, students will develop an understanding of IT theory and practice, study key emerging technologies, and develop their ability to identify new opportunities made possible by IT. This course will also provide students with a deep understanding of data and analytics by exploring how business processes are analyzed, data is modeled (using entity relationship diagrams), databases are designed, and data is queried using SQL. This combination of theory and practice will allow students to develop their ability to identify and take advantage of the new opportunities now made possible by data analytics and Information Technology.

The on-campus section of this course (ISYS7700) will meet weekly on campus. Please note that the online asynchronous section of this course will also include two or three synchronous web conferences during the semester. Please review the course syllabus for the schedule for these web conferences, or contact the instructor.

Modern information systems now generate massive volumes of data. Organizations everywhere struggle to aggregate, analyze, and monetize the growing deluge of data. Business Analytics capitalizes on this data by combining statistical and quantitative analysis, explanatory and predictive modeling, and fact-based management. Managers can explore patterns, predict future trends and develop proactive, knowledge-driven decisions that affect all parts of modern organizations. This course provides students with a pragmatic familiarity with the capabilities and limitations of emerging analytics techniques, an introduction to Python, an overview of methods and tools, and a core understanding required to be an intelligent manager, designer, and consumer of analytics models. Management and Organization Courses: Summer 2023

MGMT771001
Strategic Management
Potts, Jeremiah M
Summer 2023
The strategic management course deals with the overall general management of an organization. It stresses the role of the manager as strategist and coordinator whose function is to integrate the conflicting internal forces that arise from among the various organizational units while simultaneously adapting to the external pressures that originate from a changing environment. Drawing on the knowledge and skills developed in the core curriculum, this course serves as the integrating experience for the M.B.A. program.

Power and Influence
Arrowood, Rick J
Summer 2023
Power and Influence is a graduate level course that aims to provide students with a comprehensive understanding of the dynamics of power and influence within organizational and social contexts. The course will cover a range of theories and perspectives on power, including how power is acquired, maintained, and exercised in different settings. In addition to examining the theoretical foundations of power and influence, the course will also provide students with practical skills for analyzing and navigating power dynamics in their own lives and careers. This will include learning how to identify and challenge power imbalances, as well as how to effectively use power and influence to achieve desired outcomes.

Technological Innovation and Disruption
MacDonald, John A
Summer 2023
To be competitive organizations need to drive innovation in their products and services. Organizations need to innovate rapidly and in some cases this involves reinventing the enterprise to compete in disruptive business environments. The course on Technological Innovation looks closely at the company value chain and where technology can be leveraged as a source of innovation. Company vision sets the context for the type of innovation necessary to achieve sustainable competitive growth. During the course we examine the process of building innovative capability across the company value chain, developing and implementing an innovation plan and creating the capacity for sustained innovation as a competitor or disruptor.

A team is defined as three or more people formed into a work group to achieve a clearly identified goal. Teams that are designed to leverage the diverse talent, skills, and competencies of their individual members while also fostering a culture of collaboration through shared purpose are able to achieve far greater levels of performance than anything those individuals could achieve working independently. However, high performing teams do not just happen, no matter how talented the individual members may be! Successful teams need the support of a leader to help them establish a shared purpose, who can set clear performance goals, foster collaboration, and sustain individual and group commitment. This course will cover select leadership and management theories to establish an understanding of the strategic aims and tactical goals for using teams in organizations. Students will learn to identify the steps necessary to shift the mindset (their own or others) from that of individual contributor to a member of a high-performing team. They will learn to recognize the complexities leaders face balancing strategies needed to drive collaboration on a team, while also recognizing the contributions of individuals to keep them motivated and engaged. Specific leadership styles will be reviewed and students will be able to evaluate how (or if) certain approaches are more effective in leading teams to high performance outcomes. Through in-class activities, projects and case studies, students will analyze real-world situations and develop suggested approaches to solutions using their personal experience in team and/or leadership experience and the application of academic theories covered in the course.

Management and Organization Courses: Fall 2023

MGMT102101  
**Organizational Behavior**  
**Grubb, Anitza R**  
**Fall 2023**
Class restriction is only applicable to current Boston College students and does not apply to non-BC (transfer or exchange) students. As an introduction to the study of human behavior in organizations, this course aims at increasing an awareness and understanding of individual, interpersonal, group, and organizational events, as well as increasing a student's ability to explain and influence such events. The course deals with concepts that are applicable to institutions of any type; a central thrust of these concepts concerns the way institutions can become more adaptive and effective. The course is designed to help the student understand and influence the groups and organizations to which he/she currently belongs and with which he/she will become involved in a later career. Note: Restrictions only apply to current Boston College students and do not apply to transfer or exchange students.

Class restriction is only applicable to current Boston College students and does not apply to non-BC (transfer or exchange) students. As an introduction to the study of human behavior in organizations, this course aims at increasing an awareness and understanding of individual, interpersonal, group, and organizational events, as well as increasing a student's ability to explain and influence such events. The course deals with concepts that are applicable to institutions of any type; a central thrust of these concepts concerns the way institutions can become more adaptive and effective. The course is designed to help the student understand and influence the groups and organizations to which he/she currently belongs and with which he/she will become involved in a later career. Note: Restrictions only apply to current Boston College students and do not apply to transfer or exchange students.

**Management of Human Capital and the Employee Experience**  
**Gordon, Judith R**  
**Fall 2023**  
This course addresses the challenges and opportunities organizations face in managing human capital and examines contemporary human resources issues and practices. With a focus on effective people operations and the employee experience, the course considers the selection, deployment, and management of talent in the context of globalization, a diverse workforce, increasing competition, and rapidly changing technology. Managers and employees need both an operational and strategic perspective, and they can benefit from having a toolbox of techniques that help ensure a competitive and high-performing workforce.

Negotiation
Nielsen, Richard P
Fall 2023
Negotiating is a key process in leadership, conflict resolution, and change management at every level of internal and external management. The purpose of the course is to improve students' abilities to analyze, prepare for, and practice win-lose, win-win, dialogic, and third party negotiating methods as appropriate. Emphasis is on practical application and personal development. Teaching methods used are role playing, discussion of readings, discussion with practitioners, original student projects, and discussion of current events. Students are invited to reflect upon how negotiating and conflict resolution practices help them developmentally change themselves, their organizations, and the world.

Leadership
Clair, Judith
Fall 2023
In today's world, there are many challenges that call for effective leadership. Corporate ethics scandals, an increasingly global and diverse work force, and the need for employees to experience renewed meaning and connection to their work are just a few examples. How we respond to these challenges can profoundly change the world in which we live and work. In this course, we learn about the challenges and opportunities of effective leadership and how leaders, including ourselves, can respond to them.

Managing Change
Leduc, Steven M
Fall 2023
What makes change agents effective? This course addresses this question with a focus on change leadership tools and approaches. This course helps prepare students to diagnose and implement successful change both when they are in charge and when they must work through others. Students will also understand the driving forces that organizations and consultants face in managing change and the challenges in responding to those forces. This course is designed to educate the students on the realities of change management in the workforce, provide practical application of change management strategies, engage in theoretical discussions on the subject, and provide a clearer understanding of the consultancy process as it relates to change management. Students are provided with hands-on experience in using tools and techniques involved in diagnosing and implementing change management. This course is particularly relevant for those wishing to develop their leadership and consultation capabilities.

Social Impact and Entrepreneurship
Frechette, Edward K
Fall 2023
Are you moved by a particular social injustice? It could be homelessness on the streets of Boston. It could be famine in Africa. It could be wage inequality across our country. It could be one of hundreds of issues, but one that is meaningful to you. Social Impact and Entrepreneurship explores the innovative ways government agencies, nonprofit groups, and for-profit organizations are addressing societal challenges. This course will focus on understanding the building blocks of a social venture—starting with the mission and working through the operational plan, the financials, and the evaluation criteria. Students, either individually or in small groups, will create a business plan for an enterprise, grounded in her/his passion for change in a given area. Multiple case studies will be used to illustrate various topics. Open to students from all majors.

**Power and Influence**

**Arrowood, Rick J**

**Fall 2023**

Power and influence are crucial to understanding organizational dynamics, resolving conflict, navigating and promoting change, building cooperation, and developing professional skills in the workplace. The course aims to help students identify, diagnose, and analyze power as well as expose them to influence methods from an organizational, managerial, and professional skills perspective. The purpose of this course is to examine the different types of formal and personal power people use to influence others, explore ways power and influence are used for both good and bad, and develop students capabilities to create their own path to obtaining, managing, and sustaining power and influence.

**Credits:** 3

**Room and Schedule:** Stokes Hall 113S Th 04:30PM-06:50PM

**Satisfies Core Requirement:** None
Any change, innovation, or new thing begins with an idea. While one person might come up with an initial idea, the idea, and the thing it consequently turns into, has the potential to become better when built upon by other people. The purpose of this course is to learn how to effectively develop and work with ideas to innovate and enact change in the context of organizations and beyond. Building from research on organizational creativity, innovation, collaboration, and entrepreneurship, students will learn frameworks for understanding the influence of individuals, social processes, and context on creativity and innovation and apply these frameworks throughout the course. Students will practice the key skills of idea work—generating, connecting, communicating, evaluating, and reshaping ideas—so that they can make things that matter.

Entrepreneurial Management
Shaw, Douglas J
Fall 2023
This course focuses on the fundamentals of building a business either as a start-up or within a larger organization. Entrepreneurial Management introduces conceptual frameworks and tools that help students to identify, evaluate, launch and grow innovative ventures that have the potential to revolutionize markets. We will discuss cases set in a range of industries including car sharing, aviation, electronic publishing, fashion, file storage, streaming media, consulting, food services and education. Course goals include: Help you to understand the major issues entrepreneurs face when starting, growing and capturing the value of their ventures. Develop the analytical skills required for the environment in which entrepreneurs operate high uncertainty, rapid growth, ongoing change and limited resources. Be able to compare and contrast the major sources of capital available to entrepreneurs and the expectations of investors. Better understand the role that entrepreneurship will play in your career. Entrepreneurial Management requires strong qualitative and quantitative analysis skills. There are no official prerequisites. To evaluate the drivers of venture profitability and to analyze business models, you will need a basic understanding of income statements which will be reviewed during the initial classes.

The course examines decision making, one of the most prolific and consequential activities undertaken by managers, to improve students skills in exercising choice. It begins by exploring the psychology of judgment. The hidden brain, or subconscious biases and heuristics hard-wired into human cognitive processes, are examined along with pressures arising from group and broader social forces. Through hands-on exercises and case analyses, students will learn how and why decision making often goes awry, and strategies for avoiding prevalent traps. The course will also examine choice architecture. Students will learn and apply management tools and techniques that facilitate effective design of decision processes. The course is particularly apt for those seeking to enhance their decision skills and arrive at better outcomes, both personal and organizational.

MGMT217501
Thinking Strategically Integrative Strategy Simulation
Montes, Juan
Fall 2023
This course prepares students to make executive-level decisions by participating and competing in business simulation. The course utilizes a sophisticated, market-leading simulation platform called "Global DNA" to create a realistic, hands-on learning experience. The course allows students to manage a company and see the results of specific functional and team decisions, integrating all management areas: marketing, organizational behavior, operations, accounting, and finance. The course is based around the concept of experiential learning, and student teams have a high degree of freedom to follow different strategies. The competitive nature of the simulation shows and compares the results of each company in every round, with a high level of detail (i.e., sales and production reports, financial information), teaching teams to effectively analyze quantitative business information. Students learn to think strategically by incorporating the potential scenarios of what other teams can do during the simulation in their own decisions.

Credits: 3
Room and Schedule: Gasson Hall 306 Tu 12:00 Noon-02:30PM
Satisfies Core Requirement: None
Prerequisites: This course encourages interdisciplinary learning and is open to MCAS students. No prior management courses are required, but analytic skills (be fluent in Excel) are necessary to analyze markets and support decision-making in the simulation.

This course helps students learn how to manage responsibly across different countries and cultures. The spread of capitalism and expansion of markets around the globe provoke challenging questions about socially responsible management. Managers must decide whether strategies and ethical principles that make sense in one culture can be applied to others. Central to the course will be the difficult choice between adapting to prevailing cultural norms or initiating a cultural/moral transformation. The course considers a number of cases set in different cultural contexts. There are selected readings about the beliefs, ideals, and values at the core of these different cultures.

Strategic Management
Montes, Juan
Fall 2023
This is the senior integrative capstone course of the CSOM core. This course provides future leaders and strategists with an understanding of strategic management that will enable them to function effectively in a complex, global economy. Successful strategists need to define goals, analyze the organization and its environment, make choices, and take concerted actions to effect positive change in their organization and society. Using the conceptual tools and analytic frameworks of strategic management, this course provides a perspective that is integrative, yet analytical. This perspective helps students make sense of the global business and societal environments, understand the ambiguities and dilemmas of management, and learn how to take effective action.

This is the senior integrative capstone course of the CSOM core. This course provides future leaders and strategists with an understanding of strategic management that will enable them to function effectively in a complex, global economy. Successful strategists need to define goals, analyze the organization and its environment, make choices, and take concerted actions to effect positive change in their organization and society. Using the conceptual tools and analytic frameworks of strategic management, this course provides a perspective that is integrative, yet analytical. This perspective helps students make sense of the global business and societal environments, understand the ambiguities and dilemmas of management, and learn how to take effective action.

**Managing Digital Innovation**  
**Fichman, Robert**  
**Fall 2023**  
The steady march of Moore's Law has accelerated the introduction of new products, processes, and business models enabled by digital technology. These digital innovations are transforming how we live and work, how companies compete, and the structure of entire industries. This course will provide students with the concepts and frameworks they will need to: (1) understand the nature of digital innovations and the factors affecting their emergence and diffusion, (2) identify and evaluate digital innovation opportunities (and threats), (3) manage the digital innovation process in organizations, and (4) evaluate the effects of digital innovation on business and society.

Capstone: Leadership and Mindfulness
Waddock, Sandra A
Fall 2023
Capstone classes may NOT be taken Pass/Fail. You may take only ONE Capstone class before graduation. No matter what your major, you will participate in groups and organizations that will consistently ask or expect you to lead. The best leader is authentic, has integrity, is self- and other-aware, and acts with this awareness firmly in mind. Good leaders, that is, act mindfully with respect for the people and world around them. This course explores your development as a mindful focusing inward and outward, reflecting on where you have come from and where you are going, what type of world you want to live in, your relationships with others, and how you can be an effective leader.

MGMT770101
Introduction to Strategic Management
Potts, Jeremiah M
Fall 2023
The course is designed to provide you with a general understanding of how firms formulate and implement strategies to create competitive advantage. Relying exclusively on the case method, it will expose you to some basic strategy concepts, which will lay the foundation for the strategic management core course that you will take later on. The cases chosen for this course will place you in diversity of managerial situations large multinational firms and small startups, manufacturing and service industries, growing and mature organizations, U.S. and non-U.S. settings. Discussion of these cases will enable you to learn different analytic techniques, and illustrate (1) the essence of strategy, (2) how to understand the external competitive environment, (3) ways to consider beyond the current business landscape, and (4) the role of top management in strategy implementation.

Managing People and Organizations
Leduc, Steven M
Fall 2023
This course focuses on the analysis and diagnosis of organizational problems. It attempts to enable students to apply these concepts to real organizational and managerial problems. It also provides opportunities for participation in ongoing work teams while learning about team effectiveness. Finally, students can examine their own behavior and beliefs about organizations to compare, contrast, and integrate them with the theories and observations of others.

Strategic Management
Kierner, Agnieszka D
Fall 2023
The strategic management course deals with the overall general management of an organization. It stresses the role of the manager as strategist and coordinator whose function is to integrate the conflicting internal forces that arise from among the various organizational units while simultaneously adapting to the external pressures that originate from a changing environment. Drawing on the knowledge and skills developed in the core curriculum, this course serves as the integrating experience for the M.B.A. program.

This course provides an opportunity to explore essential management issues in a nonprofit context alongside topics that are somewhat unique to the nonprofit sector, including distinctive funding methods, governance, and staffing structures. Topical areas include Social Entrepreneurship, Venture Philanthropy, Leadership, Strategic Planning, Performance Measurement, Cause Marketing, and Microfinance. In addition to case and article discussion, the course features local, national, and international nonprofit leaders as guest speakers. The course aims to provide future nonprofit managers, volunteers, board members, donors, or supporters with a more nuanced understanding of critical issues and important trends in the nonprofit sector.

The Strategic Management course focuses on the creation of long-term competitive advantage in companies with a single primary line of business. Corporate Strategy extends those principles to explore strategies of multi-business organizations. The course will take the perspective of the CEO and senior management team whose primary job is to create shareholder value, and addresses questions such as: which businesses should be part of our portfolio? How should we shape that portfolio through M&A and divestitures? How do balance sheet realities, private equity alternatives, and activist investors impact our strategic choices? How do we develop and implement strategy in multi-business companies.

Mergers and Acquisitions
Mucci, Richard L
Fall 2023
This course provides an overview of the various stages of the M&A process, and the key decision points which help guide it. This course is meant to be a survey class, covering a wide range of M&A topics. It is recommended for participants pursuing careers requiring the formulation of inorganic growth options for businesses (e.g., general management, business development, or consulting) or the assessment of business investment opportunities (e.g., investment banking, venture capital, or private equity). A broad overview of each typical stage in an M&A process will be discussed to include strategy, target identification, valuation, due diligence, financing, deal structure, negotiating an agreement, closing, and integration. Armed with an understanding of each stage of the M&A process, possible decision frameworks will be formulated and discussed.

MGMT813201
Responsible Leadership
Ritchie-Dunham, James L
Fall 2023
Whether you lead a team, department, organization, or network, as a leader you are responsible. You are responsible for the consequences of the choices you make in serving your funders, employees, suppliers, local communities, regulators, society, and the environment. Responsible leadership is the ability to engage, transform, and transfer an organization’s creative energy in service to its purpose in highly effective and efficient ways, generating greater value throughout the organization’s ecosystem of stakeholders, an ecosystem you choose. As a leader, you are responsible for the alignment of the organization’s purpose, actions, and broader impacts—a coherent set of whys, hows, and whats. In this course, you will learn how responsible business leaders are outperforming their peers in outputs, outcomes, and impacts. You will learn their business-model and cultural-change strategies, meet their leaders, and apply their frameworks to case studies and your own organization.

Business Wars: Leading Through Change and Disruption
Kierner, Agnieszka D
Fall 2023
In a world where the average lifespan of a company has significantly decreased, leaders find themselves in constant change and disruption management. Each class will take you to an analysis of a real story of what drives these companies and their leaders, investors, and employees to new heights or to ruin. We will analyze and discuss specific situations of a defining time for a company that needs to manage through a disruption in their industry. We will then understand and analyze the business context and learn about leadership behaviors needed to survive and thrive as an executive or employee of a company undergoing such a fascinating change. After finishing the course you will be able to shape your own perspective and behaviors helping you and your firm thrive in our fast-paced world.

MGMT814601
Leading High Performance Teams
Masiello, Diletta M
Fall 2023
A team is defined as three or more people formed into a work group to achieve a clearly identified goal. Teams that are designed to leverage the diverse talent, skills, and competencies of their individual members while also fostering a culture of collaboration through shared purpose are able to achieve far greater levels of performance than anything those individuals could achieve working independently. However, high performing teams do not just happen, no matter how talented the individual members may be! Successful teams need the support of a leader to help them establish a shared purpose, who can set clear performance goals, foster collaboration, and sustain individual and group commitment. This course will cover select leadership and management theories to establish an understanding of the strategic aims and tactical goals for using teams in organizations. Students will learn to identify the steps necessary to shift the mindset (their own or others) from that of individual contributor to a member of a high-performing team. They will learn to recognize the complexities leaders face balancing strategies needed to drive collaboration on a team, while also recognizing the contributions of individuals to keep them motivated and engaged. Specific leadership styles will be reviewed and students will be able to evaluate how (or if) certain approaches are more effective in leading teams to high performance outcomes. Through in-class activities, projects and case studies, students will analyze real-world situations and develop suggested approaches to solutions using their personal experience in team and/or leadership experience and the application of academic theories covered in the course.

Corporate Innovation, Structures and Methods
Pacelle, Thomas
Fall 2023
Innovation is imperative in the dynamic landscape of contemporary corporations. Forward-thinking managers understand that a strategy for innovation must be an integral part of an organization's primary operation in order to remain competitive. This course examines the innovation function within corporations and the vital role that innovation plays in addressing a number of critical strategic objectives within an enterprise. The curriculum is segmented into two halves. The first half will focus on planning and will include innovation strategy, objectives, time horizons, stakeholders, process and metrics & reporting. The second half will focus on execution and will cover implementation options including research partnerships, startup ecosystem engagement, incubator & accelerator programs and direct investment through corporate venture capital. Finally, we will perform quantitative & financial analysis on all stages of corporate innovation planning and implementation. This will include development of quantitative models for market sizing, opportunity analysis, budgeting, pricing/margin analysis, revenue forecasting and return on investment (ROI).

**MGMT887001**  
**Qualitative Research Methods**  
**Pratt, Michael G**  
**Fall 2023**
Open to current Ph.D. students only (not available for MBA students). The purpose of this course is to help you better understand qualitative research methods so as to enable you to be a better researcher and reviewer of work that employs these types of methodologies. Given the variety of methods that fall under the rubric of qualitative methods, some classes will discuss general issues or skills (e.g., gaining access, interviewing, observing) that are applicable to several different methodological approaches, while others will focus more specifically on a particular approach (e.g., ethnography, case studies, grounded theory). Skill development is essential to the course, and there will be opportunities to practice specific methodological techniques and to critique exemplary qualitative research.

Organizational Behavior
Grubb, Anitza R
Spring 2024

Class restriction is only applicable to current Boston College students and does not apply to non-BC (transfer or exchange) students. As an introduction to the study of human behavior in organizations, this course aims at increasing an awareness and understanding of individual, interpersonal, group, and organizational events, as well as increasing a student's ability to explain and influence such events. The course deals with concepts that are applicable to institutions of any type; a central thrust of these concepts concerns the way institutions can become more adaptive and effective. The course is designed to help the student understand and influence the groups and organizations to which he/she currently belongs and with which he/she will become involved in a later career. Note: Restrictions only apply to current Boston College students and do not apply to transfer or exchange students.

Organizational Behavior

Chan, Curtis

Spring 2024
Class restriction is only applicable to current Boston College students and does not apply to non-BC (transfer or exchange) students. As an introduction to the study of human behavior in organizations, this course aims at increasing an awareness and understanding of individual, interpersonal, group, and organizational events, as well as increasing a student's ability to explain and influence such events. The course deals with concepts that are applicable to institutions of any type; a central thrust of these concepts concerns the way institutions can become more adaptive and effective. The course is designed to help the student understand and influence the groups and organizations to which he/she currently belongs and with which he/she will become involved in a later career. Note: Restrictions only apply to current Boston College students and do not apply to transfer or exchange students.

**Ethical Leadership Skills**  
**Nielsen, Richard P**  
**Spring 2024**  
This course focuses on ethics leadership and engagement methods in different types of pre-modern, modern, and postmodern organizational and political-economic contexts. What are our visions of ethical leadership, relationships and organization? What were we doing when we were at our best in leading meaningful and effective change and problem resolution in our relationships with family and friends and in our work and citizenship lives? What have been the individual, organizational, and environmental obstacles that made it difficult for us to lead meaningfully and effectively? What are different types of methods in trying to intervene and lead ethical change?

**Negotiation**
**Nielsen, Richard P**
**Spring 2024**
Negotiating is a key process in leadership, conflict resolution, and change management at every level of internal and external management. The purpose of the course is to improve students' abilities to analyze, prepare for, and practice win-lose, win-win, dialogic, and third party negotiating methods as appropriate. Emphasis is on practical application and personal development. Teaching methods used are role playing, discussion of readings, discussion with practitioners, original student projects, and discussion of current events. Students are invited to reflect upon how negotiating and conflict resolution practices help them developmentally change themselves, their organizations, and the world.

Leadership
Hood, Elizabeth
Spring 2024
In today's world, there are many challenges that call for effective leadership. Corporate ethics scandals, an increasingly global and diverse work force, and the need for employees to experience renewed meaning and connection to their work are just a few examples. How we respond to these challenges can profoundly change the world in which we live and work. In this course, we learn about the challenges and opportunities of effective leadership and how leaders, including ourselves, can respond to them.

Leading High Performance Teams
Masiello, Diletta M
Spring 2024
This course examines the dynamics of groups--such as teams--within organizations. One of the key questions we will investigate is what makes some teams more effective than others. Students will learn and practice high performance team fundamentals, intervening to problem solve and understand the consequences of interpersonal conflicts. The course emphasizes a diagnostic and reflection approach within varied team settings and includes an independent field analysis project relating to an actual team within an organization.

Are you moved by a particular social injustice? It could be homelessness on the streets of Boston. It could be famine in Africa. It could be wage inequality across our country. It could be one of hundreds of issues, but one that is meaningful to you. Social Impact and Entrepreneurship explores the innovative ways government agencies, nonprofit groups, and for-profit organizations are addressing societal challenges. This course will focus on understanding the building blocks of a social venture--starting with the mission and working through the operational plan, the financials, and the evaluation criteria. Students, either individually or in small groups, will create a business plan for an enterprise, grounded in her/his passion for change in a given area. Multiple case studies will be used to illustrate various topics. Open to students from all majors.

Power and Influence
Arrowood, Rick J
Spring 2024
Power and influence are crucial to understanding organizational dynamics, resolving conflict, navigating and promoting change, building cooperation, and developing professional skills in the workplace. The course aims to help students identify, diagnose, and analyze power as well as expose them to influence methods from an organizational, managerial, and professional skills perspective. The purpose of this course is to examine the different types of formal and personal power people use to influence others, explore ways power and influence are used for both good and bad, and develop students capabilities to create their own path to obtaining, managing, and sustaining power and influence.

MGMT214201
The Science of Thriving at Work: Individuals, Groups and Organizations
Clair, Judith
Spring 2024
In this comprehensive exploration, we will immerse ourselves in the growing domain of positive organizational scholarship (POS) and positive psychology, equipping students with research knowledge and practical skills to foster individual and collective flourishing in work settings. Flourishing is a multidimensional concept that captures the optimal state of functioning in individuals, groups, and organizations. It encompasses thriving, engagement, health, growth, creativity, and other markers of positive deviance. Throughout the course, we will delve into the core topics and foundational theories of positive psychology and POS to understand how human flourishing can be nurtured and sustained. Our journey will begin by understanding the historical roots of positive psychology, which emerged as a paradigm shift, challenging traditional psychology to explore the positive aspects of life and build on human strengths and capacities. We will also examine how flourishing extends beyond merely curing pathology, emphasizing the need to unlock and capitalize on potential resources at various levels, from individuals to teams, communities, and institutions. We will unravel the science of habit formation and how positive habits relate to flourishing. We study the science of happiness and general well-being, and explore how to identify and leverage individual strengths to foster personal growth and resilience. We will also build an understanding of research showing the power positive emotions have to shape well-being and performance. We will furthermore study positive Interventions - exploring evidence-based practices to cultivate flourishing in personal and professional contexts and strategies for building thriving workplaces that unleash the best in people. While we embrace the transformative potential of positivity, we also acknowledge the complexities and potential dark sides of this approach. We will critically discuss the challenges of maintaining a positive pathway, aiming for a nuanced understanding of positive psychology and its application in organizations. Our pedagogy will go beyond traditional lectures, actively involving you in individual and group experiential exercises, reflections, and discussions. Moreover, this course places emphasis on research exploration, and includes assignments asking you to design and conduct a research project to examine the effects of positive interventions. By the end of this course, you will have gained valuable insights into cultivating personal well-being and creating positive change within groups and organizations. Together, we will uncover the keys to unlocking human potential and fostering thriving - personally, professionally, in teams, and in organizations.

MGMT217001
Entrepreneurial Management
Shaw, Douglas J
Spring 2024
This course focuses on the fundamentals of building a business either as a start-up or within a larger organization. Entrepreneurial Management introduces conceptual frameworks and tools that help students to identify, evaluate, launch and grow innovative ventures that have the potential to revolutionize markets. We will discuss cases set in a range of industries including car sharing, aviation, electronic publishing, fashion, file storage, streaming media, consulting, food services and education. Course goals include:

- Help you to understand the major issues entrepreneurs face when starting, growing and capturing the value of their ventures.
- Develop the analytical skills required for the environment in which entrepreneurs operate: high uncertainty, rapid growth, ongoing change and limited resources.
- Be able to compare and contrast the major sources of capital available to entrepreneurs and the expectations of investors.
- Better understand the role that entrepreneurship will play in your career.

Entrepreneurial Management requires strong qualitative and quantitative analysis skills. There are no official prerequisites. To evaluate the drivers of venture profitability and to analyze business models, you will need a basic understanding of income statements which will be reviewed during the initial classes.

**MGMT217501**  
**Thinking Strategically Integrative Strategy Simulation**  
**Montes, Juan**  
**Spring 2024**
This course prepares students to make executive-level decisions by participating and competing in business simulation. The course utilizes a sophisticated, market-leading simulation platform called "Global DNA" to create a realistic, hands-on learning experience. The course allows students to manage a company and see the results of specific functional and team decisions, integrating all management areas: marketing, organizational behavior, operations, accounting, and finance. The course is based around the concept of experiential learning, and student teams have a high degree of freedom to follow different strategies. The competitive nature of the simulation shows and compares the results of each company in every round, with a high level of detail (i.e., sales and production reports, financial information), teaching teams to effectively analyze quantitative business information. Students learn to think strategically by incorporating the potential scenarios of what other teams can do during the simulation in their own decisions.

Leadership and Corporate Accountability
Spinello, Richard
Spring 2024
This course is designed to provide an overview of the economic, legal, and ethical responsibilities of companies and their leaders. Through a series of case studies, it will demonstrate the acute challenges of ensuring that a company's conduct conforms to those responsibilities. A major portion of the course will review the principal obligations of corporations to five primary stakeholder groups: investors and shareholders, customers, employees, suppliers, and the general public. Insider trading, fiduciary duties, disclosure of health risks, fairness in pricing, power asymmetries, affirmative action, international labor rights, market failures, privacy rights, environmental sustainability, and corporate citizenship represent some of the issues to be discussed in this segment of the course. A secondary theme is corporate governance. Several cases will explore the proper role of management, the Board of Directors, financial intermediaries, and external regulators.

Strategic Management  
Montes, Juan  
Spring 2024
This is the senior integrative capstone course of the CSOM core. This course provides future leaders and strategists with an understanding of strategic management that will enable them to function effectively in a complex, global economy. Successful strategists need to define goals, analyze the organization and its environment, make choices, and take concerted actions to effect positive change in their organization and society. Using the conceptual tools and analytic frameworks of strategic management, this course provides a perspective that is integrative, yet analytical. This perspective helps students make sense of the global business and societal environments, understand the ambiguities and dilemmas of management, and learn how to take effective action.

Successful strategists need to define goals, analyze the organization and its environment, make choices, and take concerted actions to effect positive change in their organization and society. Using the conceptual tools and analytic frameworks of strategic management, this course provides a perspective that is integrative, yet analytical. This perspective helps students make sense of the global business and societal environments, understand the ambiguities and dilemmas of management, and learn how to take effective action.

Strategic Management
Wilson-Byrne, Christopher
Spring 2024
This is the senior integrative capstone course of the CSOM core. This course provides future leaders and strategists with an understanding of strategic management that will enable them to function effectively in a complex, global economy. Successful strategists need to define goals, analyze the organization and its environment, make choices, and take concerted actions to effect positive change in their organization and society. Using the conceptual tools and analytic frameworks of strategic management, this course provides a perspective that is integrative, yet analytical. This perspective helps students make sense of the global business and societal environments, understand the ambiguities and dilemmas of management, and learn how to take effective action.

**Managing People and Organizations**

Opazo, Maria P

**Spring 2024**

This course focuses on the analysis and diagnosis of organizational problems. It attempts to enable students to apply these concepts to real organizational and managerial problems. It also provides opportunities for participation in ongoing work teams while learning about team effectiveness. Finally, students can examine their own behavior and beliefs about organizations to compare, contrast, and integrate them with the theories and observations of others.

**Strategic Management**
The strategic management course deals with the overall general management of an organization. It stresses the role of the manager as strategist and coordinator whose function is to integrate the conflicting internal forces that arise from among the various organizational units while simultaneously adapting to the external pressures that originate from a changing environment. Drawing on the knowledge and skills developed in the core curriculum, this course serves as the integrating experience for the M.B.A. program.

Strategic Management
Yu, Tieying
Spring 2024
This course introduces you to a set of analytical frameworks that enable you to explain performance differences among firms and that provide a structure for strategic decisions to enhance firms future competitive positions. Building on the foundation laid by the Introduction to Strategic Management course that you took earlier, we will cover strategy both at the business level (introducing tools of industry analysis and competitive positioning) and at the corporate level (examining how decisions regarding corporate scope horizontal, vertical, and global create or destroy value in multibusiness firms). We will also study strategy implementation, focusing on the organizational structure, systems and processes that are put in place to manage the corporation. Throughout the course, our viewpoint will be that of the top management team who has responsibility for the long-term health of the entire organization.

MGMT810701
Competitive Strategy
Sengul, Metin
Spring 2024

Competitive Strategy is an elective course in business-level competitive strategy. It is recommended for participants pursuing careers requiring the analysis and formulation of strategic directions for firms (e.g., general management, business development, consulting) or the assessment of long-term profit opportunities in an industry (e.g., investment banking, venture capital, private equity). The course focuses on how to develop and change strategy to achieve above-normal returns in a dynamic competitive context. The strategy core course introduced several concepts and frameworks for strategic diagnosis of the current competitive environment (e.g., five forces analysis, competitive advantage, value chain). The Competitive Strategy course goes beyond those core concepts to help identify and evaluate strategic moves in dynamic competitive environments, such as those facing new competitors, technological disruptions, industry restructuring, or intense rivalry. Those situations entail gazing into an uncertain future to foresee changes in the industry and competitive environment, and often require a reassessment of strategic direction and actions and the design of the new business models. Because of substantial uncertainty, strategic decisions in dynamic competitive environments also entail taking risks. The course presents principles and tools for balancing strategic opportunities and risks.

Yu, Tieying  
Spring 2024

The course is designed to educate future business leaders about the global context in which business is conducted and its relevance to strategic management. It will increase students' awareness of the key economic, cultural and political issues affecting business on a global scale and the interactions among firms, markets, governments and other social actors in grappling with them. It provides students with the conceptual tools necessary to understand and work effectively in today's interconnected world by developing strategic perspectives that link this changing environment, the state of the global industry, and the capabilities and position of the firm.

Negotiating
DiOrio, Chris M

Spring 2024

Have you found yourself limited in your performance because you lacked the ability to effectively negotiate for more resources, including staff, money, or time? Do you experience difficulty in handling conflict in organizations? Are you anxious to improve your ability to take a problem-solving approach to organizational dilemmas? This course assists students in becoming more effective negotiators in a range of organizational situations. Students learn the different types of negotiating approaches and practice their use in a variety of situations.

Strategic HR
Kierner, Agnieszka D
Spring 2024
Whether leading a start-up or a team in a large organization, after this course you will have the skills needed to effectively design and execute strategies to manage people in such a way that they support long term business goals and outcomes. The course will help you think systematically about critical aspects of managing human assets and provide practical examples on how these strategies need to be implemented to achieve competitive advantage. Through a mix of lecture, case study analysis, in-class simulation and discussion we will take a journey around key issues leaders need to tackle: data driven HR, recruiting and onboarding, talent management, dealing with high and low performers, benefits and compensation, managing in diverse and multicultural environments. The course will draw upon personal experiences of the instructor from leading technology start-ups, advising and driving change in large organizations, as well recent literature on these topics.

Business Wars: Leading Through Change and Disruption
Kierner, Agnieszka D
Spring 2024
In a world where the average lifespan of a company has significantly decreased, leaders find themselves in constant change and disruption management. Each class will take you to an analysis of a real story of what drives these companies and their leaders, investors, and employees to new heights or to ruin. We will analyze and discuss specific situations of a defining time for a company that needs to manage through a disruption in their industry. We will then understand and analyze the business context and learn about leadership behaviors needed to survive and thrive as an executive or employee of a company undergoing such a fascinating change. After finishing the course you will be able to shape your own perspective and behaviors helping you and your firm thrive in our fast-paced world.

MGMT831501  
Digital Innovation and Transformation  
Fichman, Robert  
Spring 2024
In the last two decades, innovative digital products, processes, and business models have become increasingly prevalent. These digital innovations are transforming how we live and work, how companies compete, and the structure of entire industries. As a result, it is essential for aspiring managers to have a strong grounding in digital innovation in order to effectively work in, manage, lead, and transform organizations that are increasingly dependent on innovative digital technologies. Through a combination of seminar-style discussions, brief lectures, case studies, in-class exercises, and guest speakers, students will learn about: (1) fundamental innovation concepts; (2) how digital technologies and platforms are different from non-digital technologies, and how these differences shape their evolution and impact; (3) how to implement effective organizational processes for digital innovation discovery, development, and diffusion; (4) how to evaluate the transformational impacts of digital innovation on businesses, individuals, and society; (5) how to nurture the innovative capabilities of individuals and the firm.

Marketing Courses: Summer 2023

MKTG102101
Marketing Principles
Nunziata, Peter C
Summer 2023
This course is a prerequisite for all other marketing courses. Marketing is a dynamic, creative and challenging discipline that plays a leading role in the strategy and destiny of any company. Marketing is the business function with primary responsibility for generating revenue, defining the value proposition, and managing relationships with customers. Three broad areas will be explored including understanding markets and competitors, developing new products and organizing distribution, and implementing communications and promotions. A variety of examples in traditional industries and the digital sector will be discussed. Analysis and decision skills will be developed by practicing the use of tools and case studies. This course provides a foundational understanding of the marketing discipline, which is necessary for any role within business organizations.

Marketing for Digital Nomads
Nunziata, Peter C
Summer 2023
According to a McKinsey Partners report (2018), almost 60% of new marketing positions are in digital marketing. In this course you will learn how to create a holistic digital marketing strategy, to drive the success of your online search, ecommerce, and social media efforts. With a focus on Social Media Marketing, you will become familiar with the digital marketing tools to manage search engine optimization (SEO), social media campaigns, and to help you develop your personal brand. This will be a hands-on class using a combinations of case studies, simulation programs and SEO skills assessment leading to SEO Certification.

Credits: 3
Room and Schedule: By Arrangement; See Office of Global Education website for details
Satisfies Core Requirement: None
Prerequisites: None
This course focuses on the managerial skills, tools, and concepts required to produce a mutually satisfying exchange between consumers and providers of goods, services, and ideas. The material is presented in a three-part sequence. Part one deals with understanding the marketplace. Part two deals with the individual parts of the marketing program such as pricing, promotion, product decisions, and distribution. Part three of the course deals with overall strategy formulation and control of the marketing function. Students in this course will come to understand the critical links between marketing and the other functional areas of management.
This course provides an in-depth understanding of the unique aspects of marketing in a business-to-business environment. Its focus centers on the importance of linking customer needs to the development of high value products and services throughout the value chain in a global, electronic environment. The course examines the scope and challenges of business-to-business markets, including building and managing customer relationships and services, buying behavior, distribution channels, marketing research, managing R&D and technical product development, managing the sales process and sales force support, new-product launch, positioning and pricing.

**Strategic Brand Management**

**Lucas, Jeffrey S**

**Summer 2023**

This course teaches students fundamental and leading-edge concepts in brand management. Students learn to develop and articulate brand strategy, how to give strategic brand direction, and how to measure strategic brand progress. They learn how to manage key relationships and functions that surround the brand, e.g., advertising, promotion, public relations, licensing, and product and package design agencies. A capable brand manager has exceptional strategic, quantitative, interpersonal, and presentation skills and must be comfortable with decision-making and leadership. The course will focus on the development and application of these skills in brand management via in-class learning, case discussion, and project work.

Marketing Courses: Fall 2023

MKTG102101
Marketing Principles
Lucas, Jeffrey S
Fall 2023
This course is a prerequisite for all other marketing courses. Marketing is a dynamic, creative and challenging discipline that plays a leading role in the strategy and destiny of any company. Marketing is the business function with primary responsibility for generating revenue, defining the value proposition, and managing relationships with customers. Three broad areas will be explored including understanding markets and competitors, developing new products and organizing distribution, and implementing communications and promotions. A variety of examples in traditional industries and the digital sector will be discussed. Analysis and decision skills will be developed by practicing the use of tools and case studies. This course provides a foundational understanding of the marketing discipline, which is necessary for any role within business organizations.

MKTG215201
Consumer Behavior
Zhao, Min
Fall 2023
This course integrates marketing theory with insights from other fields of study, including social psychology, cognitive psychology, evolutionary psychology, and behavioral neuroscience. It analyzes consumer processes such as perception, learning, attitude formation, and decision making. These variables are broadly relevant to marketing challenges, given that the success of products and brands depends on their appeal to consumers. Discussion topics range from art and aesthetics to crisis behavior to new product development.

MKTG215301
Customer Research and Insights for Marketing Decisions
Hunter Antill, Megan K
Fall 2023
Formerly titled Marketing Research. Information is vital for solving critical marketing problems and gaining competitive advantage. This course focuses on how to improve marketing decision-making through better research design and methods. Students learn how to identify managerial problems, develop relevant research hypotheses, determine appropriate methods for data collection and analysis, and develop recommendations for marketing solutions. Topics include foundational methods, such as focus groups, survey design, and marketing experiments. Students will gain the ability to identify, collect, and analyze essential marketing data and apply research results to become better marketing decision-makers.

MKTG314801
Services Marketing
Samaras, Xanthe P
Fall 2023
The service sector of the economy is twice as large as the manufacturing sector. Nearly all new job growth in this country will be in services marketing. Service organizations differ from manufacturing businesses in many important respects and require a distinctive approach to marketing strategy development and execution. Some service businesses to be studied include entertainment, hospitality, travel, retail, telecom, car rental, healthcare, financial and professional services. Service providers include hotel, airline, theme park, car rental and retail personnel, customer service representatives, bankers, doctors, accountants, and lawyers.

In today's digital economy, successful companies must develop new ways to attract, connect with, and delight their customers. This has prompted a decisive shift away from traditional media strategies toward novel, digitally-enabled strategies that can help firms achieve their financial objectives. In this course you will learn about a number of different aspects of digital marketing including content marketing, website optimization, social media marketing, paid search, and search engine optimization. Perhaps more importantly, this course will help you develop a strong understanding of the digital marketing tools and platforms that companies use to differentiate themselves from their competition and will allow you to build a set of digital assets that you can use to demonstrate your digital marketing acumen to prospective employers.

**Strategic Brand Management**

**Fisher, John H**

**Fall 2023**

This course teaches students fundamental and leading-edge concepts in brand management. Students learn to develop and articulate brand strategy, how to give strategic brand direction, and how to measure strategic brand progress. They learn how to manage key relationships and functions that surround the brand, e.g., advertising, promotion, public relations, licensing, and product and package design agencies. A capable brand manager has exceptional strategic, quantitative, interpersonal, and presentation skills and must be comfortable with decision-making and leadership. The course will focus on the development and application of these skills in brand management via in-class learning, case discussion, and project work.

**Credits:** 3

"Design thinking is a human-centered approach to innovation that draws from the designer's toolkit to integrate the needs of people, the possibilities of technology, and the requirements for business success" (Tim Brown, CEO of IDEO). Design thinking is a creative problem-solving method and an integral driver of innovation. When done well, design thinking plays a significant role in a business leader's ability to foresee and adapt to customer needs. This course offers a foundation in design thinking skills, such as empathy, observation, brainstorming, strategic storytelling, and presentation design. This class is highly focused on teaching experience design through practical experimentation, and is directly relevant for students interested in product and brand management, marketing strategy, entrepreneurship, and beyond.

**MKTG318001**  
**Sports Marketing**  
Olesh, Evan S  
Fall 2023  
The goal of this course is to provide an understanding of the business practices of the sports industry. Taking a practical approach, students will be asked to create business solutions for sports organizations. The attributes and failures of real examples will be discussed. Students will be expected to take the experience and apply it to creating specific campaigns, programs, and overall marketing plans for a specific sports application. Relationship architecture principles will be discussed at length and expected to be incorporated into the final project.

MKTG615701
Strategic Selling and Persuasion
Westman, John C
Fall 2023
Two fundamentals of business: someone must get the goods and services out the door, and someone must get the cash to come in the door. Sales is the function that does the latter. It, and its management, will be covered in this course. We will study the art of persuasion, modern day Rhetoric in actual practice. The discipline will be addressed biologically. We will dissect real industry practitioners when they visit class, and actual sales calls in the field as a research paper. Upon course completion, students will have a complete understanding of both the selling and sales management process.

MKTG661001
Sports Marketing
Lev, Mark T
Fall 2023
The goal of this course is to provide an understanding of the business practices of the sports industry. Taking a practical approach, students will be asked to create business solutions for sports organizations. The attributes and failures of real examples will be discussed. Students will be expected to take the experience and apply it to creating specific campaigns, programs, and overall marketing plans for a specific sports application. Relationship architecture principles will be discussed at length and expected to be incorporated into the final project.

MKTG770001
Marketing
Teopaco, John L
Fall 2023
This course focuses on the managerial skills, tools, and concepts required to produce a mutually satisfying exchange between consumers and providers of goods, services, and ideas. The material is presented in a three-part sequence. Part one deals with understanding the marketplace. Part two deals with the individual parts of the marketing program such as pricing, promotion, product decisions, and distribution. Part three of the course deals with overall strategy formulation and control of the marketing function. Students in this course will come to understand the critical links between marketing and the other functional areas of management.

MKTG800301
Product Planning and Strategy
Bright, James P
Fall 2023
This course focuses on the challenge of creating and launching new products and services. It is particularly appropriate for those who are interested in becoming a Product Manager within a larger company, or in starting their own business at some point. The course is built on the concept of learning by doing, as small student teams go through the full process of coming up with their own new product or service ideas, evaluating them, doing market research, and developing launch plans. We also assess a number of current new product ideas, analyze cases from a range of industries, and have one or two outside speakers. There is a heavy emphasis on discussion and practicality.

MKTG800401
Consumer Behavior
Zhao, Min
Fall 2023
This course integrates marketing theory with insights from other fields of study, including social psychology, cognitive psychology, evolutionary psychology, and behavioral neuroscience. It analyzes consumer processes such as perception, learning, attitude formation, and decision making. These variables are broadly relevant to marketing challenges, given that the success of products and brands depends on their appeal to consumers. Discussion topics range from art and aesthetics to crisis behavior to new product development.

MKTG800501
Marketing Strategy & Innovation
Cunningham, Kristy S
Fall 2023
This course builds on the principles covered in the core Marketing course by further developing and applying marketing strategy to different company lifestages (i.e. launch, geographic expansion, repositioning), industries (i.e. luxury, retail, e-commerce) and innovations (i.e. digital marketplaces, AI-driven solutions.) It takes a Marketing practitioners view of determining and owning the strategy and builds the link between strategy, activities, and outcomes. You will be exposed to problems and situations that will require you to assess, analyze and recommend actions within the context of marketing skills and organizational alignment. Extensive case analysis and financial and analytical tools are used to examine marketing growth strategies, target market strategies, external factors, marketing program development, the marketing organization, and implementation of marketing strategy. This course is appropriate for those considering marketing as a career, consultants helping to drive revenue generation, or general managers looking to build an external, customer-centric skillset to complement operational capabilities.

MKTG800801
Integrated Marketing Communications
Hamlin, Pamela A
Fall 2023
This course concerns the communication function in marketing. It is designed to introduce students to integrated marketing communications (IMC). It aims at relating the elements of the marketing mix (4Ps) to the various aspects of the communications that take place between the firm and its customers. The course builds on a base of strategic marketing planning and consumer behavior and then proceeds to examine the role of the promotional mix (e.g., advertising, direct marketing, sales promotion, Internet and interactive marketing, publicity and public relations) in developing integrated marketing communications programs and helping organizations meet strategic marketing objectives.

MKTG801401
Strategic Pricing Management
Jackisch, Kirk
Fall 2023
This course explores pricing strategy and shows how pricing can be managed to achieve profitability. The course is practical and hands-on. It examines current pricing practices used by many companies, and shows how they lead to distortions and problems. It suggests strategic principles that lead to more profitable pricing decisions, including methods for financial analysis that focus on pricing profitability. Other topics include value-based pricing, managing price competition, segmenting markets based on price sensitivity, segmentation pricing strategies, buyer psychology of pricing, and research methods for assessing price sensitivity.

MKTG801501
Strategic Brand Management
Davey, James S
Fall 2023
This course teaches students fundamental and leading-edge concepts in brand management. Students learn to develop and articulate brand strategy, how to give strategic brand direction, and how to measure strategic brand progress. They learn how to manage key relationships and functions that surround the brand, e.g., advertising, promotion, public relations, licensing, and product and package design agencies. A capable brand manager has exceptional strategic, quantitative, interpersonal, and presentation skills and must be comfortable with decision-making and leadership. The course will focus on the development and application of these skills in brand management via in-class learning, case discussion, and project work.

MKTG801901
Entrepreneurial Marketing Strategy
Neeson, John J
Fall 2023
This course focuses on how to develop an integrated marketing plan for a new company. The class will teach techniques and skills for developing a marketing strategy for a startup, including prioritizing market segments, positioning and messaging approaches, sales model and capacity planning for marketing, and developing an integrated marketing model to help scale the new endeavor. Startups are unique, requiring an agile marketing approach, the ability to scale quickly, and the requirement to build a new category or quickly enter an existing one. Classes will incorporate a combination of lectures, projects, guest speakers, and the development of a marketing plan for a new or early stage startup.

Marketing Courses: Spring 2024

MKTG102101
Marketing Principles
Hudson, Bradford T

Spring 2024
This course is a prerequisite for all other marketing courses. Marketing is a dynamic, creative and challenging discipline that plays a leading role in the strategy and destiny of any company. Marketing is the business function with primary responsibility for generating revenue, defining the value proposition, and managing relationships with customers. Three broad areas will be explored including understanding markets and competitors, developing new products and organizing distribution, and implementing communications and promotions. A variety of examples in traditional industries and the digital sector will be discussed. Analysis and decision skills will be developed by practicing the use of tools and case studies. This course provides a foundational understanding of the marketing discipline, which is necessary for any role within business organizations.

MKTG215303
Customer Research and Insights for Marketing Decisions
Segal, Rebecca Z
Spring 2024
Formerly titled Marketing Research. Information is vital for solving critical marketing problems and gaining competitive advantage. This course focuses on how to improve marketing decision-making through better research design and methods. Students learn how to identify managerial problems, develop relevant research hypotheses, determine appropriate methods for data collection and analysis, and develop recommendations for marketing solutions. Topics include foundational methods, such as focus groups, survey design, and marketing experiments. Students will gain the ability to identify, collect, and analyze essential marketing data and apply research results to become better marketing decision-makers.

MKTG315301  
Multichannel Retailing  
Seiders, Kathleen  
Spring 2024  
This class focuses on the necessary concepts and principles of retailing involved in making retail and wholesale decisions. The course looks at retailing from both a consumer perspective (e.g., why does a consumer shop a particular retail outlet?) and a business-to-business perspective (e.g., how does the retailer decide which supplier to use?). Additionally, the course examines the various methods of retailing (e.g., bricks and mortar, bricks and clicks) and how these methods have evolved and will evolve in the future.

MKTG315401
Integrated Marketing Communications
Nenkov, Gergana Y
Spring 2024
This course concerns the communication function in marketing. It is designed to introduce students to integrated marketing communications (IMC). It aims at relating the elements of the marketing mix (4P's) to the various aspects of the communications that take place between the firm and its customers. The course builds on a base of strategic marketing planning and consumer behavior and then proceeds to examine the role of the promotional mix (e.g., advertising, direct marketing, sales promotion, Internet and interactive marketing, publicity and public relations) in developing integrated marketing communications programs and helping organizations meet strategic marketing objectives.

Product Planning and Strategy
Bright, James P
Spring 2024
With the growing concern over the success rate of new products, an intense effort is being employed by marketers to establish more effective new product development and management strategies. Using lectures and case studies, this course will focus on the process of conceiving new products, developing an effective organization, and designing and implementing effective marketing strategies and policies over the course of the product life cycle. Class material will provide the student with insight into new product development across a wide variety of industries.

Strategic Brand Management
Fisher, John H
Spring 2024
This course teaches students fundamental and leading-edge concepts in brand management. Students learn to develop and articulate brand strategy, how to give strategic brand direction, and how to measure strategic brand progress. They learn how to manage key relationships and functions that surround the brand, e.g., advertising, promotion, public relations, licensing, and product and package design agencies. A capable brand manager has exceptional strategic, quantitative, interpersonal, and presentation skills and must be comfortable with decision-making and leadership. The course will focus on the development and application of these skills in brand management via in-class learning, case discussion, and project work.

MKTG317701
Heritage Marketing
Hudson, Bradford T
Spring 2024
This course explores the interaction of marketing and history in the consumer marketplace. Heritage marketing is a strategic approach to capitalize on the historical status of older brands in the present and future. It uses the entire marketing system to develop a strategic position based on heritage, activate powerful dynamics in consumer behavior such as nostalgia, communicate relevant messages, and monetize the past. Business history and archival collections provide the content and inspiration for related communications and new product development. The primary classroom activity will be the analysis and discussion of business case studies from various industries. The pre-requisites are Marketing Principles and any course from the History core sequence.

MKTG317801
Design Thinking and Strategy
Dickinson, Kristine D
Spring 2024
Interested students should contact the department or the instructor for application details.
"Design thinking is a human-centered approach to innovation that draws from the designer's toolkit to integrate the needs of people, the possibilities of technology, and the requirements for business success" (Tim Brown, CEO of IDEO). Design thinking is a creative problem-solving method and an integral driver of innovation. When done well, design thinking plays a significant role in a business leader's ability to foresee and adapt to customer needs. This course offers a foundation in design thinking skills, such as empathy, observation, brainstorming, strategic storytelling, and presentation design. This class is highly focused on teaching experience design through practical experimentation, and is directly relevant for students interested in product and brand management, marketing strategy, entrepreneurship, and beyond.

Credits: 3
Room and Schedule: Fulton Hall 423 F 10:00AM-12:30PM
MKTG318001
Sports Marketing
Olesh, Evan S
Spring 2024
The goal of this course is to provide an understanding of the business practices of the sports industry. Taking a practical approach, students will be asked to create business solutions for sports organizations. The attributes and failures of real examples will be discussed. Students will be expected to take the experience and apply it to creating specific campaigns, programs, and overall marketing plans for a specific sports application. Relationship architecture principles will be discussed at length and expected to be incorporated into the final project.

New Media Industries
McNealy, Paul-Jon
Spring 2024
This course is designed to introduce the changing business models of new media (video games, music, TV and film, and journalism) industries. This is achieved by examining in detail the technology enablers and disruptive forces in both the U.S. and around the world, consumer behaviors, as well as legal and regulatory concerns. A special emphasis will also be placed on media companies whose business models have been heavily influenced or altered by digital distribution. This class will be a combination of in-class and Zoom sessions during class time, and will have an emphasis on influential guest speakers from various industries.

Marketing
Kerbs, Jon W
Spring 2024
This course focuses on the managerial skills, tools, and concepts required to produce a mutually satisfying exchange between consumers and providers of goods, services, and ideas. The material is presented in a three-part sequence. Part one deals with understanding the marketplace. Part two deals with the individual parts of the marketing program such as pricing, promotion, product decisions, and distribution. Part three of the course deals with overall strategy formulation and control of the marketing function. Students in this course will come to understand the critical links between marketing and the other functional areas of management.

MKTG800301
Product Planning and Strategy
Andrelunas, John P
Spring 2024
This course focuses on the challenge of creating and launching new products and services. It is particularly appropriate for those who are interested in becoming a Product Manager within a larger company, or in starting their own business at some point. The course is built on the concept of learning by doing, as small student teams go through the full process of coming up with their own new product or service ideas, evaluating them, doing market research, and developing launch plans. We also assess a number of current new product ideas, analyze cases from a range of industries, and have one or two outside speakers. There is a heavy emphasis on discussion and practicality.

MKTG800501
Marketing Strategy & Innovation
Cunningham, Kristy S
Spring 2024
This course builds on the principles covered in the core Marketing course by further developing and applying marketing strategy to different company lifestages (i.e. launch, geographic expansion, repositioning), industries (i.e. luxury, retail, e-commerce) and innovations (i.e. digital marketplaces, AI-driven solutions.) It takes a Marketing practitioners view of determining and owning the strategy and builds the link between strategy, activities, and outcomes. You will be exposed to problems and situations that will require you to assess, analyze and recommend actions within the context of marketing skills and organizational alignment. Extensive case analysis and financial and analytical tools are used to examine marketing growth strategies, target market strategies, external factors, marketing program development, the marketing organization, and implementation of marketing strategy. This course is appropriate for those considering marketing as a career, consultants helping to drive revenue generation, or general managers looking to build an external, customer-centric skillset to complement operational capabilities.

MKTG801401
Strategic Pricing Management
Jackisch, Kirk
Spring 2024
This course explores pricing strategy and shows how pricing can be managed to achieve profitability. The course is practical and hands-on. It examines current pricing practices used by many companies, and shows how they lead to distortions and problems. It suggests strategic principles that lead to more profitable pricing decisions, including methods for financial analysis that focus on pricing profitability. Other topics include value-based pricing, managing price competition, segmenting markets based on price sensitivity, segmentation pricing strategies, buyer psychology of pricing, and research methods for assessing price sensitivity.

By any number of measures, the American social fabric is fraying. Long before the exacerbations of a global pandemic, polarization was increasing, trust was plummeting, deaths of despair were on the rise, civic participation was down, and we heard talk of a growing epidemic of loneliness. All this amidst a world-historical expansion of wealth, and falling rates of crime. What is going on? This course begins with the suspicion that American business plays a central, underappreciated role in the ongoing evolution of our social fabric. It aims to ask: how do the business community's deep assumptions, values and practices shape our sense of ourselves and each other? Our senses of safety and precarity? Our inclinations to creativity and conformity? This course will examine key documents from management theory, social science, philosophy and literature to explore some ways that American commerce and American culture shape one another, and how this relationship can be brought into healthier alignment.

PRTO330001
Senior Seminar in Business Ethics
Smith, Michael J
Fall 2023
The purpose of this course is to provide Portico Teaching Assistants a greater depth of understanding of the philosophical issues covered in Portico, and to offer an introduction to the core pedagogical techniques involved in teaching applied ethics. Participating TAs will study the course material on a second-order level by considering the evolution of their understanding of the course material over their undergraduate career, and by exploring pedagogical best-practices to improve teaching outcomes. The structure of the course will thus run concurrently with that of Portico. While primarily directed towards enriching the experience of the TAs, the course will simultaneously aim to facilitate the goals of Portico itself by providing TAs with additional tools and resources for engaging with their students and creating a more cohesive and impactful classroom community.

Participating TAs will study the course material on a second-order level by considering the evolution of their understanding of the course material over their undergraduate career, and by exploring pedagogical best-practices to improve teaching outcomes. The structure of the course will thus run concurrently with that of Portico. While primarily directed towards enriching the experience of the TAs, the course will simultaneously aim to facilitate the goals of Portico itself by providing TAs with additional tools and resources for engaging with their students and creating a more cohesive and impactful classroom community.

PRTO330004
Senior Seminar in Business Ethics
Evans, Jeremy A
Fall 2023
The purpose of this course is to provide Portico Teaching Assistants a greater depth of understanding of the philosophical issues covered in Portico, and to offer an introduction to the core pedagogical techniques involved in teaching applied ethics. Participating TAs will study the course material on a second-order level by considering the evolution of their understanding of the course material over their undergraduate career, and by exploring pedagogical best-practices to improve teaching outcomes. The structure of the course will thus run concurrently with that of Portico. While primarily directed towards enriching the experience of the TAs, the course will simultaneously aim to facilitate the goals of Portico itself by providing TAs with additional tools and resources for engaging with their students and creating a more cohesive and impactful classroom community.

Portico Courses: Spring 2024

PRTO240101
Free Markets, Faith, and the Common Good
Cioni, Joseph R
Spring 2024
If sharing our gifts, pursuing justice, and acting on our concern for the poor and marginalized of society are core values of Jesuit-trained students, to what extent is free market capitalism a good "fit" for helping us meet those goals? In this course, we will explore several key moral and philosophical foundations of free market capitalism. These arguments will then be placed in dialogue with central insights contained in Catholic social teaching, especially the principles of human dignity, solidarity, the preferential option for the poor, and the common good.

PRTO430801
Leading Others and Leading the Self
Kelly, Corey R
Spring 2024

Being a leader is about becoming more of yourself and leaning into authenticity and values. This course examines self-development, self-awareness, interpersonal effectiveness and resilience as key elements of leadership. In this course, students will learn about the concepts of authenticity, humility, vulnerability and dignity as a leader. They will be able to articulate their values and how to align those with their leadership philosophy and style, as well as develop a personal leadership vision. Students will learn how to build capacity for resilience and change in themselves and others, and build an understanding of how to shape team culture and cultivate key elements such as trust and belonging. In this course, tools will be utilized to identify individual strengths and students will identify how to leverage those in leadership. This course will also include mindfulness, discernment, and gratitude practices in the context of leadership.

PRTO430901
Everybody's Working for the Weekend: Ambition and Alienation
Rojcewicz, Christine
This course will propose an answer to the following question: Why does it seem like some people are more ambitious than others? On the surface, those with what appears to be a natural drive to succeed seem to become more affluent. That is to say, some people appear to embrace hustle culture, or the idea that any time spent not making money is wasted time, while others are drawn toward a trend identified around 2021 as quiet quitting, that is to say, they refuse to devote more time and energy to their work than is absolutely necessary to avoid losing their jobs. Why is this apparent lack of ambition and motivation so prevalent? Can we blame mere laziness? This question will be answered with a resounding no. Rather, this class will show that there are indeed systematic measures in place that cause some to not appear as motivated as others. In order to work through this answer, this class will look at alienation and capitalism. This course will address the effects of systemic racism, automation and AI, environmental concerns, generational trends, and the COVID-19 pandemic on one’s ambition to succeed in the workforce. This course will combine philosophical readings from Marx, Weber, Arendt, and others with contemporary business case studies.

Undergraduate Management Courses: Fall 2023

UGMG101001
Perspectives on Management
Clavin, John C; Doyle, Jeremiah T
Fall 2023
This course, taught by practitioners John Clavin (BC '84) and Jere Doyle (BC '87), provides BC students with an excellent opportunity to explore the functional disciplines of business from a real-world perspective. Using a combination of lectures, case studies, readings and outside speakers, the course provides students the opportunity to get grounded in each of the CSOM concentrations while gaining outside views on careers in related fields and industries. The course will also provide a framework to explore and discuss cross-functional issues that impact business strategy and execution. This is a highly interactive class that places a premium on both preparation and participation each week. The course is initially open to CSOM sophomores but normally has availability for juniors and seniors across all undergraduate majors

Career Bridge
Barksdale, Andrew C
Fall 2023
UGMG1222 will equip first generation and low income students with: awareness of crucial resources, an understanding of cultural capital, and a supportive network to assist the transition to college and specifically the Carroll School of Management. This course will follow a discussion-based model with class participation being a main emphasis. We will explore themes relevant to first generation and low income students. By the end of the semester, students will gain a working community of peers and confidence in their ability to flourish at Boston College.

UGMG240101  
Case Competition Cohort  
Xiong, Josephine D  
Fall 2023

______________________________
Reserved for Sophomores and Juniors in the Carroll School, with permission of the instructor. This course is for Sophomore and Juniors in the Carroll School of Management who are interested in learning how to better prepare for strategy and ethics case competitions. The class will meet weekly for one hour with the objective to develop skills in the following areas: be able to effectively analyze an ethics case and a strategy case, determine feasible alternatives, craft a recommendation, implement recommendations, and prepare for judges' questions. The course will also help students with a PowerPoint presentation for case competitions and oral tips for such a competition. The 10-week course will end with an internal case competition where winning groups will be chosen to attend competitions and represent the Carroll School nationally in the spring and subsequent fall (juniors who are abroad in the spring will not be eligible to take the course).

Hartley, Jessica M
Spring 2024
Restricted to Sophomores and second semester Freshmen in the Carroll School of Management.

It is a one credit pass/fail course consisting of eight 90 minute sessions designed to ensure that you learn the following: How to identify your top skills/interests and explore career fields that are a good match; Write an effective resume/cover letter; How to talk about yourself to employers; How to network effectively and utilize the BC Network; How to Interview to get the job. You will learn about interviewing from employers/upperclassmen and conduct a video mock interview. How to dress to impress—learn from a professional stylist what you need to wear to all these different employer and networking events, how to make a positive first impression; How to use Social Media to your advantage—You will develop a strong LinkedIn page and learn how to convey a positive image through social media, also how to use social media to network with the right people. It features employers/alumni, and expert speakers on using social media and how to dress for success.

Nursing Courses: Summer 2023

**NURS426101**

**Population Health Practice in the Community**

Cullinan, Donna L  

Summer 2023  

This course focuses on the application of population health, emphasizing public health nursing roles, that include the care of population members in community settings, such as a neighborhood, school, or non-profit organization, locally or globally. Students will gain experience in community engagement, community health assessment, screening, case management, health education, service and program evaluation, and advocacy. Emphasis is placed on the multiple determinants of health and on using interdisciplinary approaches in practice to implement evidence-based interventions aimed at health promotion, risk reduction, and disease prevention.

**Credits:** 3  

**Room and Schedule:** By Arrangement  

**Satisfies Core Requirement:** None  

**Prerequisites:** NURS4253 and NURS4250 and NURS4252 and NURS4251  

**Corequisites:** NURS4260  

**Cross-listed with:** None  

**Frequency:** Every Fall, Every Spring, Every Summer

**NURS426301**

**Nursing Synthesis Clinical Laboratory**

McNutt-Clarke, Beth  

Summer 2023
This course provides senior nursing students with an opportunity to synthesize, expand, and refine nursing concepts and clinical reasoning competencies. Through an intensive clinical experience completed in institutional and/or community settings, students focus on the healthcare needs of specific client populations, study in depth the interventions used to restore and/or optimize health, and utilize evidence-based research in practice. Emphasis will be placed on current quality and safety guidelines and standards of care for the specialty area in which the student is practicing.

**Credits:** 3  
**Room and Schedule:** By Arrangement  
**Satisfies Core Requirement:** None

**NURS534501**  
**Ecuador: Global Health Perspectives**  
**Byrne, Rosemary F**  
**Summer 2023**  
This course will involve the study of global health from the perspective of the various stakeholders: Populations, governments, Non-Government Organizations (NGOs), health care providers and health educators. Social, political, economic, legal and ethical perspectives will be addressed. This course will be offered in Quito, Ecuador and will include field trips to health care facilities and discussions with local health professionals on current health issues and challenges for the future. Using a case-based approach, students will analyze and develop potential solutions and options for addressing global health care issues and create strategies for improving the health of specific populations.

**Credits:** 3  
**Room and Schedule:** By Arrangement; See Office of Global Education website for details  
**Satisfies Core Requirement:** None

NURS972001
Epidemiology
Longacre, Ashley
Summer 2023
Epidemiology is the study of the distribution and determinants of health-related states or events (including disease), and its methods are used in the control of diseases and other health problems in diverse populations. This course introduces basic principles and methods of epidemiology and biostatistics. Measures of disease frequency, association and causation, the design and analysis of studies, and the potential issues that may arise in these studies are addressed. This course prepares advanced practice nurses to engage in inter-professional collaboration with the ultimate goal of improving population health.

NURS973001
Advanced Physiology and Pathophysiology across the Lifespan
Hurley, Dorean L
Summer 2023
This course focuses on physiologic and pathophysiologic processes that affect individuals across the lifespan. The emphasis is on central concepts of physiology and pathophysiology, including genetic and epigenetic mechanisms, immunity, inflammation, cell growth regulation, hematopoiesis, and hemostasis. These concepts are then applied in a systematic survey of diseases within body systems. Current research, clinical examples, and application to advanced nursing practice are incorporated throughout the course.

NURS973101
Pharmacotherapeutics in Advanced Practice Nursing
Faulkner, Kenneth
Summer 2023
This course will provide the advanced practice nursing student with the fundamental pharmacologic principles necessary to support pharmacotherapeutic decision making in collaboration with patients across the lifespan. The interrelationship of physical, psychosocial, cultural, pharmacogenomic, economic, ethical, and legal factors will be explored. The student will develop evidence-based, cost effective interventions to promote optimal person-centered drug therapy. Application of these principles to various real world clinical situations and individual responses will be emphasized.

NURS973201
Advanced Health/Physical Assessment across the LifeSpan
Curtis, Christopher R; Gordon, Leah M
Summer 2023
This course uses a holistic approach and risk appraisal frameworks as a basis for health assessment across the lifespan. Building on knowledge of basic health assessment, the APRN student performs comprehensive health histories and physical and mental health examinations. Students will incorporate subjective and objective data to evaluate healthy individuals and those with acute and/or chronic disease. The course utilizes learning laboratory experiences, high-low fidelity simulation, and standardized patients to facilitate students' learning. Health promotion, health maintenance and harm reduction concepts are emphasized and applied, taking into consideration life circumstances and cultural, ethnic, and developmental variations.

**Credits:** 3

**NURS981401**

**Bridge to Primary Care Advanced Practice Nursing**

**Underwood, Patricia**

**Summer 2023**

This is the first in a series of clinical reasoning and decision-making courses required for all primary care DNP students. Building on the skills acquired in Advanced Health/Physical Assessment across the Lifespan, the course will focus on communication and clinical decision-making for DNP students. Specific consideration will be given to wellness and health promotion across the lifespan, screening procedures, ordering and interpretation of diagnostic tests, health behavior change interventions, as well as problems frequently encountered in primary care. The combination of didactic, clinical, and simulated learning experiences will prepare the student for subsequent specialty clinical course work and experiences.

**Credits:** 3

**Room and Schedule:** 245 Beacon Street Room 125 W 09:00AM-12:00 Noon

**Satisfies Core Requirement:** None

**Prerequisites:** NURS9732 and NURS9731 and NURS9730 or Advanced Health/Physical
NURS981501
Advanced Practice Nursing Role
Tabloski, Patricia
Summer 2023
This course prepares students to transition into an advanced practice nursing role. Historical and contemporary influences leading to the development of this professional role are explored, along with anticipated future dimensions. The impact of the advanced practice nurse on patient, family, and population outcomes will be examined. The course incorporates discussions of relationship-based care, role implementation across practice settings, and advanced practice nursing competencies. It also provides a synthesis of legal, regulatory and scope of practice considerations. The course facilitates a comprehensive understanding of political, economic, social and professional issues relevant to advanced practice nursing.

**NURS984401**  
**Current Issues in Sexual Health Care Across the Life Span**  
**Tappin, Ryan J**  
**Summer 2023**

Sexual health is a critical component of well-being across the lifespan. Current research reveals that gender and sexual health identity and orientation are key factors in understanding patterns of sexual health behaviors and risks, and experiences of health, wellness, and illness. This course examines current and emerging issues affecting sexual health and strategies to inform clinical practice, including: the nurse-patient relationship and its influence on sexual well-being; health disparities linked to societal stigmas, prejudices, and discrimination; and ways to improve access to quality health care for populations disproportionately at risk for or affected by STIs including HIV/AIDS.

NURS984901
Nurse Anesthesia Clinical Practice I
Thomas, Allan C
Summer 2023
This course, the first in a 6-course sequence, introduces students to nurse anesthesia clinical practice. Through a combination of seminar, simulation and patient care, students are encouraged to think critically and integrate theoretical knowledge into a detailed plan of anesthesia care. By participating in the continuum of the perioperative experience, students learn to provide anesthetic care for healthy patients undergoing minimally invasive surgical procedures under the guidance of a clinical preceptor. The course also provides an opportunity for students to become socialized into the advanced practice role of the nurse anesthetist.

**NURS985001**  
**Advanced Practice Principles for the Nurse Anesthetist I**  
**Vitale, Caitlin M**  
**Summer 2023**  
This course focuses on individualization of anesthesia care for patients undergoing specialty procedures. Specific consideration is given to the critical anesthesia implications for patients who require vascular surgery, neurosurgery, and other specialized procedures. The unique requirements for patients undergoing procedures in remote locations are presented. Attention is directed to patient comfort and safety issues in the delivery of anesthesia care in diverse situations.

NURS985501
Nurse Anesthesia Clinical Practice IV
Vitale, Caitlin M
Summer 2023
This course provides continued preparation as students become more proficient in the role of the nurse anesthetist. Through mentored learning experiences by certified registered nurse anesthetists and anesthesiologists, students become more autonomous in anesthesia practice as case complexity allows. Selected experiences in a variety of clinical settings expand students abilities to provide patient care in tertiary and/or community hospitals. The course provides broad clinical experiences that align with standards set forth by the Council on Accreditation of Nurse Anesthesia Educational Programs. Clinical decision-making is the foundation for planning and evaluation of anesthesia care.

NURS986401  
**Chemistry, Biochemistry, and Physics for Nurse Anesthesia Practice**  
**Emery, Susan A**  
**Summer 2023**  
This course is an integrated study of chemistry, biochemistry, and physics underpinning nurse anesthesia practice. The chemical structure of compounds and chemical reactions are examined as they apply to pharmacokinetics and pharmacodynamics of anesthetic agents. Concepts of solubility, diffusion, and osmosis are described as well as the role of acid-base balance in maintaining the body's internal milieu. Metabolic pathways responsible for energy production are examined. Gas laws and other laws of physics as they pertain to nurse anesthesia practice are illustrated with specific examples. The emphasis is placed on integration of scientific theory into practice.

**Credits:** 3

NURS986601
Respiratory Physiology and Pathophysiology for Nurse Anesthesia Practice
Vitale, Caitlin M
Summer 2023
This course is an in-depth study of the anatomy, physiology, and pathophysiology of the respiratory system and related anesthesia implications. The concepts of ventilation and perfusion as well as oxygen transport are examined. Assessment of baseline pulmonary function and alterations seen in common and uncommon disease states are reviewed. Anesthetic implications for the patient with alterations in respiratory or oxygen transport physiology form the basis for the development of an individualized plan of anesthesia care including ventilation modalities.

NURS121001
Public Health in a Global Society  
Camp, Lindsey N; White, Michelle L  
Fall 2023  
This foundation course presents public health as an interdisciplinary science focused on health promotion and disease prevention at the population level. The course provides an overview of the history of public health, global burden of disease, sub-disciplines of public health, maternal/child health, and nutrition, and emphasizes the collaborative nature of the field through examples in research and practice. An inherent principle in public health is advancing social justice and this course, and the public health sequence more broadly, focuses on at-risk populations, reducing health disparities, and improving health equity at the population level.

Seacole Scholars Seminar  
Simonelli, Mary C; Villatoro, Anya G  
Fall 2023  
The Seacole Scholars program is a living and learning community for first-year nursing students that are interested and committed to increasing the diversity of the nursing profession. We highly encourage students of color, first-generation to college students, and Montserrat students to apply for the Seacole Scholars program. Scholars will live in the same residence hall and will be required to participate in a 1-credit course that focuses on diversity, equity, and inclusion.

NURS208001
Pathophysiology
Hurley, Dorean L
Fall 2023
Pathophysiology offers an integrated approach to human disease. The course builds on the underlying concepts of normal function as they apply to the basic processes of pathogenesis. Biological variations of age, gender, and cultural differences are integrated into the course content where applicable. Common acute and chronic health problems are introduced to explore the interrelatedness of a variety of stressors that affect physiological function. Successful completion of Pathophysiology facilitates the student's transition into clinical nursing practice.

Nursing Assessment of Health Across the Life Span
Delva, Sabianca
Fall 2023
This course introduces the concepts of health, health promotion, and growth and development across the lifespan. The interactions of underlying mechanisms such as environment, culture, ethnicity, family, genetics, and gender that are foundational to the development and individual health will be explored. Theories and principles that address physical, cognitive, and psychosocial growth and development will guide understanding of the complex healthy human, from birth to geriatrics and death. Principles and theories of health promotion will be analyzed and applied from a nursing perspective to support the individual's desire to increase personal and/or family health potential and well-being.

**Comparing Health Care Systems through a Global Lens**

Simonelli, Mary C

**Fall 2023**

Introduction to the concepts of global health and the critical links between public health and social and economic development. Determinants of health and patterns of disease and health outcomes across the globe are critically examined. The course reviews the determinants of health status in terms of biology, demography, epidemiology, culture, sociology, economics, and politics. Key concerns regarding reproductive health, child survival, nutrition, communicable diseases, and chronic diseases are examined. Health care delivery in developed vs. undeveloped regions of the world is emphasized.

Principles of Evidence-Based Nursing
Delva, Sabianca
Fall 2023
This course seeks to develop an applied understanding of evidence-based practice as it relates to the science of nursing. Through exploring components of the research process, an appreciation of the various types of evidence used by nurses and an understanding of the importance of evidenced-based research to improve clinical practice will be fostered. The ethical considerations related to evidence-based practice will be discussed. At the conclusion of the course, students are prepared to be critical consumers of research used in evidence-based practice.

Adult Health Nursing Theory II
Barone, Stacey H
Fall 2023
This course builds on the concepts learned in previous courses including adult health and pharmacology and expands the knowledge base for planning and implementing care of adults with acute health problems and acute exacerbations of chronic health problems. Clinical case studies of acute care emergencies are used to discuss clinical judgment. Emphasis is placed on the selection of evidence-based interventions, evaluation of interventions, and use of evaluative data in refining a plan of care for the adult patient. Discussions focus on the role of the primary nurse in the acute care setting including collaboration, discharge planning, and health teaching.

**Childbearing Nursing Theory**  
**Capotosto, Melissa K; Crevecoeur, Thamarah**  
**Fall 2023**  
The course focuses on concepts associated with the unique responses of families during the childbearing cycle, normal and high risk pregnancies, and normal and abnormal events in women's health. Current multidisciplinary research in women's health with a focus on the childbearing cycle, including genetics and cultural competence, is presented. Evidenced based nursing practice for the childbearing family is discussed. The nursing implications of attending to both the physiologic and the psychosocial needs of the childbearing family are reviewed. Emphasis will be placed on AWHONN and ACOG standards of care.

Fall 2023
The course focuses on concepts associated with the unique responses of families during the childbearing cycle, normal and high risk pregnancies, and normal and abnormal events in women's health. Current multidisciplinary research in women's health with a focus on the childbearing cycle, including genetics and cultural competence, is presented. Evidenced based nursing practice for the childbearing family is discussed. The nursing implications of attending to both the physiologic and the psychosocial needs of the childbearing family are reviewed. Emphasis will be placed on AWHONN and ACOG standards of care.

NURS324501
Clinical Laboratory of Childbearing Theory
Crevecoeur, Thamarah; Veroneau, Martha E
Fall 2023
Application of childbearing theory to the diagnoses, interventions, and outcomes for the care of families in structured clinical settings. Focus is on prenatal, perinatal, and post-natal activities. Students work collaboratively with the multidisciplinary team in applying evidenced-based practice derived from current multidisciplinary research to the childbearing family. Supervised by nursing faculty, the students are mentored to extend their skills in critical thinking and clinical judgment to meet the physical, psychosocial, cultural, and spiritual needs of their clients and families. Emphasis will be placed on QSEN, AACN Essentials for baccalaureate education, AWHONN and ACOG standards of care.

**NURS425001**  
**Child Health Nursing Theory**  
**Haze, Nanci J**  
**Fall 2023**  
This course builds on the published *Pediatric Nursing: Scope and Standards of Practice* to discuss the unique responses of children and their families to acute and chronic illness. Emphasis is placed on the child's growth and development in relation to wellness and illness. A family-centered approach is used to address the health teaching, promotion, restoration, and maintenance needs of children and their families. Theoretical principles are presented, and creative, evidence-based nursing intervention strategies to meet the needs of children and their families across the health care continuum are discussed.

**Credits:** 3  
**Room and Schedule:** Carney Hall 303 M 09:00AM-11:50AM  
**Satisfies Core Requirement:** None  
**Prerequisites:** NURS3243 and NURS3245 and NURS3242 and NURS3244

NURS425201  
**Psychiatric Mental Health Nursing Theory**  
Dunne, Julie P  
**Fall 2023**

This course builds upon the standards of practice from APNA-ISPN, AACN, and QSEN to discuss the legal, ethical, and therapeutic role of the psychiatric mental health nurse in caring for individuals with psychiatric disorders across the life span. Current interdisciplinary research on the genetic, neurobiological, and psychosocial theories of depression, psychosis, substance abuse, bipolar illness, eating, anxiety, personality, and cognitive disorders is analyzed. Evidence-based nursing practice, including psychopharmacology and psychosocial treatment modalities such as cognitive-behavioral, interpersonal, group, and milieu therapy is applied from a multicultural perspective. Nursing interventions for families and communities experiencing crisis, grief, and trauma are identified.

**Credits:** 3  
**Room and Schedule:** Higgins Hall 265 W 09:00AM-11:50AM  
**Satisfies Core Requirement:** None  
**Prerequisites:** NURS3242 and NURS3243

NURS425301
Psychiatric Mental Health Nursing Clinical Laboratory
Scott, Nathan
Fall 2023
Therapeutic communication skills provide a foundation for implementing the nursing role based on the American Psychiatric Nurses Association standards of practice with psychiatric patients/clients in a variety of psychiatric treatment settings. In the clinical experience, students work collaboratively with multidisciplinary teams in applying evidenced-based practice based on current interdisciplinary research to the nursing process. In weekly supervision with clinical faculty, students are mentored to extend their skills in clinical reasoning to meet the psychological, social, cultural, biological, and spiritual needs of persons from varied backgrounds (economic, racial, ethnic, age and gender) who are in treatment for mental illness.

NURS426001
Population Health Nursing Theory
Gasser, Raymond F
Fall 2023
This course introduces the conceptual and scientific frameworks of population health, emphasizing public health nursing roles. The course integrates health promotion, risk reduction, and disease prevention across the life span in a range of local and global settings, using case examples that nurses, as part of interdisciplinary teams, will encounter. Community assessment and epidemiological methods are introduced. Health disparities and vulnerability are examined through an ecological lens together with traditional and emerging public health issues. Students will learn about bridging population health and clinical care in order to meet the prevention health needs of individuals, families, and populations.

**Credits:** 3

NURS426401
Actualizing the Role of Professional Nurse
Cullinan, Donna L; Simonelli, Mary C
Fall 2023
Prepares students to transition into the role of the professional nurse. Responsibilities associated with assuming the role of a professional are explored in relation to furthering individual and social good. Contemporary health care policies and economic pressures are examined for their influence on the delivery of quality patient care. Current ethical and legal standards are highlighted and students are encouraged to reflect on how biases and prejudices influence the provision of patient care. Focus is placed on recognizing and addressing injustices in health care access and quality, which is essential to actualizing the role of professional nurse.

**Global Healthcare: Meeting Challenges and Making Connections**  
Simonelli, Mary C  
Fall 2023

This course brings together students and faculty from around the world to discuss and synthesize perspectives on global health, specifically the challenges and common connections experienced across patient centered care, health education, healthcare systems and policy development. The participants will develop a deeper understanding of the particular needs of diverse and underserved populations. Emphasis will be placed on social justice and health of individuals, families, and populations. Through the lens of public health, this course explores assessment of healthcare needs, assurance of a quality healthcare infrastructure, and development of healthcare policy.

Direct Entry Adult Health Nursing Clinical
Hurley, Dorean L; McNutt-Clarke, Beth
Fall 2023
This clinical course focuses on the application of knowledge and implementation of professional nursing practice in caring for adults and older adults with acute and chronic conditions and their families. Students will learn and practice advanced psychomotor skills in simulated settings. Through interprofessional collaboration, students implement evidence-based practice to provide high-quality, safe, cost-sensitive care. Students extend their skills in therapeutic communication, critical thinking, and clinical decision making to meet the biopsychosocial and cultural needs of adults and older adults from diverse backgrounds. Students demonstrate leadership in providing patient education, advocacy, and transitional care.

NURS871401
Nursing Ethics and Professional Responsibility in Advanced Practice
Milliken, Aimee; Ross, Richard E, SJ
Fall 2023
The course prepares advanced practice nurses for ethics leadership within the broader healthcare arena. Links are made among philosophical/theoretical foundations of nursing, ethical theory, and nursing goals. Skills supportive of the ethical decision making of nurses, peers, and the team are developed with in-class opportunities to practice leading ethics rounds and developing ethics education projects. An emphasis is placed on facilitating the interests of current and future patients and society as a professional obligation. Socially derived injustices and professional responsibility to advocate for just healthcare is highlighted along with strategies to influence institutional and health policy on behalf of individual and social good.

Nursing Leadership in Complex Health Care Settings
Given, Sarah; Milliken, Aimee
Fall 2023
This course prepares graduate nursing students to become leaders in health care. Self-reflection, self-assessment, and values clarification provide the groundwork for a nursing leadership self-development plan. Students will explore a broad range of evidence-based approaches, including leadership and organizational theories, to prepare them to lead in today's complex health care environment including practice, organization, system, academic, and policy arenas. Students will explicate the complexities of health care leadership through the examination of topics such as change management, partnership relationships, innovation, accountability models, organizational culture, diversity and inclusion, conflict management, power, creating trust and psychological safety within teams.

Health Care Policy for Nursing Leaders
Uveges, Melissa K
Fall 2023
This course prepares nurse leaders and scholars to influence health care and related policies in support of nursing’s goals and social justice. The structure and financing of U.S. health care system and roles of government, insurers, providers, and consumers are examined. The relationships among health policy and the social and economic determinants of health are explored through analysis of key issues in health policy. Students engage in strategies to analyze and inform health policy. The course provides the foundation for leadership in interdisciplinary collaborative endeavors to address, through a nursing perspective, health policy issues at the local and national levels.

**Methods of Advanced Scholarly Inquiry**  
**Reid Ponte, Patricia A**  
**Fall 2023**  
This is the second of four courses to prepare DNP students to conduct an organization approved, scholarly inquiry project to improve health services and patient outcomes. Students critically evaluate the literature and related information to address a health care problem. Scholarly inquiry approaches are presented to enable students to identify a problem, plan change to improve a process or outcome, or develop innovative solutions related to health care delivery. Upon course completion, there will be a faculty and organization approved DNP project charter, which includes the problem, processes, and expected outcomes.

Epidemiology
Hutchinson, Katharine
Fall 2023
Epidemiology is the study of the distribution and determinants of health-related states or events (including disease), and its methods are used in the control of diseases and other health problems in diverse populations. This course introduces basic principles and methods of epidemiology and biostatistics. Measures of disease frequency, association and causation, the design and analysis of studies, and the potential issues that may arise in these studies are addressed. This course prepares advanced practice nurses to engage in inter-professional collaboration with the ultimate goal of improving population health.

**Applied Health Statistics: Generalized Linear Modeling**

**Lee, Christopher S**

**Fall 2023**

This course focuses on conceptual understanding and application of generalized linear modeling to health-related research questions and real-world health data. Students will develop skills in the performance and interpretation of techniques such as multivariate linear, logistic, gamma and negative binomial regression. This course also will cover common functions within generalized linear modeling such as tests of interaction, moderator and mediator, as well as multilevel modeling, handling of complex sampling designs and common approaches to model selection. Applying health statistics as part of a logical argument is emphasized in this course as opposed to detailed knowledge of the underlying mathematics.

**Credits:** 3

NURS980601
Philosophical Inquiry for Knowledge Development in Nursing
Flanagan, Jane M
Fall 2023
Movements in the history and philosophy of science are reviewed for appreciating nursing's epistemological development. Contemporary understandings of philosophy and philosophy of science and their influences on knowledge development and nursing are examined. A focus is on understanding the relationship of the epistemological foundations of nursing to those of the health and social sciences. The course aims to develop scholars who can critically evaluate scientific initiatives and their relevance for nursing practice and emerging societal needs. Emphasis is on integrating knowledge of movements in philosophy of science and nursing epistemology with themes developed in Strategies for Knowledge Development in Nursing.

**Credits:** 3  
**Room and Schedule:** Maloney Hall #216; Tu 09:00AM-11:50AM

**NURS980701**  
**Strategies for Knowledge Development in Nursing**  
**Lyons, Karen S**  
**Fall 2023**  
In conjunction with Philosophical Inquiry for Knowledge Development in Nursing, this course provides an in-depth exploration of theory and knowledge development for nursing purposes and interdisciplinary collaborations. Students will gain an understanding of the various ways by which important disciplinary questions arise, are formulated, and pursued. Select theoretical frameworks and concepts are critiqued for their clarity, logic and utility for disciplinary knowledge development. A particular focus is placed on application to the student's area of interest and in formulating salient, researchable questions.

**Credits:** 3  
**Room and Schedule:** M 09:00AM-12:00 Noon; Maloney Hall #223  
**Satisfies Core Requirement:** None

NURS980801
Research Design and Methods I
Bowser, Diana M
Fall 2023
This course provides an overview of scientific approaches relevant to nursing and health care research. Current epistemological and qualitative, quantitative and mixed methods approaches are discussed. The application of both classic and emerging quantitative, qualitative, and mixed methods research approaches for answering questions and generating knowledge relevant to the discipline and practice of nursing are explored. Strengths and limitations of research approaches are examined.

NURS981401
Bridge to Primary Care Advanced Practice Nursing
Gordon, Leah M; Tabloski, Patricia

Fall 2023
This is the first in a series of clinical reasoning and decision-making courses required for all primary care DNP students. Building on the skills acquired in Advanced Health/Physical Assessment across the Lifespan, the course will focus on communication and clinical decision-making for DNP students. Specific consideration will be given to wellness and health promotion across the lifespan, screening procedures, ordering and interpretation of diagnostic tests, health behavior change interventions, as well as problems frequently encountered in primary care. The combination of didactic, clinical, and simulated learning experiences will prepare the student for subsequent specialty clinical course work and experiences.

NURS981601
Population Health Principles, Program Planning, and Evaluation
Camp, Lindsey N

Fall 2023
The course focuses on care at the aggregate level and examines the multiple determinants of health. The principles of population health and population health management will be explored. Health promotion theories will be analyzed and evaluated. Building on these theories and epidemiologic principles, students will assess and identify health care needs at the population level. Students will design theory-driven, evidence-based interventions to improve population outcomes. Program planning and evaluation in partnership with community stakeholders will be emphasized.

NURS981901
Adult-Gerontology Primary Care Advanced Practice Nursing I
Conahan, Catherine; LaPierre, Kellie L
Fall 2023
The first of three in the Adult-Gerontology Primary Care Advanced Practice Nursing series, this course focuses on the promotion of optimal physical, mental, and social health of individuals across the adult-gerontology age spectrum through evidence-based, ethical, reflective practice, leadership, and advocacy. Students utilize patient-centered theoretical, evidence-based, cost-effective, high quality, and safe clinical approaches to the health promotion, disease prevention, and common adult and age-related primary care problems. Emphasis is on assessment, diagnosis, and management of common primary care problems. Primary health conditions are addressed within the context of biopsychosocial, developmental, cognitive, socioeconomic, and cultural factors.

**Credits:** 6

**Room and Schedule:** Mcguinn Hall 400 Tu 09:00AM-11:50AM

**Family Primary Care Advanced Practice Nursing I**

**Croke, Bethany A; Marshall, Alison O**

**Fall 2023**

The first of three in the Family Primary Care Advanced Practice Nursing series, this course focuses on health promotion and management of common alterations in individual and family health across the lifespan. Special attention is given to understanding the health effects of disparities associated with gender, race/ethnicity, and socioeconomic status. Emphasis is on utilizing theoretical, evidence-based, cost-effective, high quality, and safe approaches to health promotion for individuals and families across the lifespan. Assessment, diagnosis, and management of common primary care problems are addressed within the context of biopsychosocial, developmental, socioeconomic, and cultural factors. Strategies to promote family health are explored.

**Credits:** 6

**Room and Schedule:** Higgins Hall 280 Tu 09:00AM-11:50AM

**Satisfies Core Requirement:** None
NURS982701
Family Primary Care Advanced Practice Nursing II
Marshall, Alison O
Fall 2023
The second of three in the Family Primary Care Advanced Nursing series, this course focuses on the management of chronic conditions in individuals and families across the lifespan. Critical analysis of data, integration of theory, and evidenced-based, cost-effective, high quality, and safe approaches to care coordination are emphasized. The broader health care system, interprofessional collaboration, and influences of culture and social determinants of health are addressed. The leadership role of the Family Primary Care Advanced Practice Nurse in identifying and addressing barriers to optimal care is integrated throughout the course.

Developmental-Behavioral and Mental Health in Pediatrics
White, Laura S
Fall 2023
This course features a case-based approach that emphasizes early problem identification, advanced evaluation, intervention, and collaborative care for children through young adults with developmental-behavioral or mental health (DBMH) concerns. A biopsychosocial, developmental, interdisciplinary approach is used as the foundation for explicating family-based psychotherapeutic interventions and indications for referral of patients with complex DBMH concerns. Students will build skills to identify and evaluate a variety of multidisciplinary resources to enhance quality DBHM services and promote optimal socioemotional development and functioning. Sociocultural influences are critically analyzed and considered as a basis for advocacy and policy development.

NURS983601
Advanced Psychopharmacology Throughout the Lifespan
Petreca, Victor G
Fall 2023
This course examines the legal, ethical, and therapeutic role of the psychiatric-mental health nurse practitioner (PMHNP) in prescribing psychotropic medications for individuals with psychiatric disorders across the lifespan. The neurobiology, action of medications that affect the central nervous system, and implications for ethno-psychopharmacology will be explored. Standardized tools to evaluate diagnostic criteria and treatment efficacy will be analyzed. Evidence-based practice principles, collaborative practice models, indications for referral, and monitoring to enhance treatment adherence will be integrated throughout the course.

NURS983701
Psychiatric-Mental Health Advanced Practice Nursing Across the Lifespan I
Marchetti, Carol A; Pounds, Karen G; Walker, Sonja
Fall 2023
The first of three in the Psychiatric-Mental Health Advanced Practice Nursing series, this course focuses on promoting optimal mental health treatment for populations in diverse settings through practice, leadership, and advocacy that is evidence-based, reflective, and ethical. Students examine neurobiological, psychosocial, developmental, and nursing frameworks to conduct mental health evaluations and risk assessments; formulate diagnoses; and implement evidence-based, patient-centered care across the lifespan. Societal influences on mental health, such as race, ethnicity, gender, poverty and violence are explored; and factors related to mental health promotion and treatment are identified.

Individual Psychotherapy for Advanced Practice Nursing
Pounds, Karen G
Fall 2023
This course examines major approaches to individual psychotherapy, including psychodynamic, humanistic, interpersonal, behavioral, cognitive, dialectical behavioral, brief, and multicultural perspectives. Commonalities and differences among the processes and techniques are explored. Selected theorists and their approaches to psychotherapy will be evaluated as examples of major schools of thought concerning the nature of the psychotherapeutic relationship. Applications among diverse individuals and populations across the lifespan are critically examined.

**Nurse Anesthesia Clinical Practice II**  
**Thomas, Allan C**  
**Fall 2023**  
This course, the second in a 6-course sequence, provides the nurse anesthesia student with the experience of caring for patients requiring increasingly complex and specialty surgical procedures. The course runs concurrently with NURS9852, Advanced Practice Principles for the Nurse Anesthetist I, such that didactic content presented during that course is applied to patient care through seminar, simulation and clinical practice. Students move from novice level to advanced beginner level as they adapt foundational principles of nurse anesthesia care to unique situations under the guidance of experienced nurse anesthesia preceptors.

NURS986201  
Foundations of Nurse Anesthesia Practice  
Thomas, Allan C  
Fall 2023
This course introduces the student to fundamental knowledge crucial to nurse anesthesia practice. Discussion of patient safety begins in this course, along with legal aspects of nurse anesthesia practice. Key concepts related to patient assessment and fluid management are considered, as are equipment and technology basic to nurse anesthesia practice. Strategies for airway assessment and management and specific anesthesia techniques are reviewed. The importance of provider wellness is emphasized.

Nursing Courses: Spring 2024

NURS121001
Public Health in a Global Society
Camp, Lindsey N; Straif, Kurt H
Spring 2024
This foundation course presents public health as an interdisciplinary science focused on health promotion and disease prevention at the population level. The course provides an overview of the history of public health, global burden of disease, sub-disciplines of public health, maternal/child health, and nutrition, and emphasizes the collaborative nature of the field through examples in research and practice. An inherent principle in public health is advancing social justice and this course, and the public health sequence more broadly, focuses on at-risk populations, reducing health disparities, and improving health equity at the population level.

Credits: 3
Room and Schedule: 245 Beacon Street Room 107 TuTh 01:30PM-02:45PM
Satisfies Core Requirement: Social Science
NURS180501
Seacole Scholars Seminar
Simonelli, Mary C; Villatoro, Anya G
Spring 2024
The Seacole Scholars program is a living and learning community for first-year nursing students that are interested and committed to increasing the diversity of the nursing profession. We highly encourage students of color, first-generation to college students, and Montserrat students to apply for the Seacole Scholars program. Scholars will live in the same residence hall and will be required to participate in a 1-credit course that focuses on diversity, equity, and inclusion.

NURS207001
Introduction to Professional Nursing
Cahill, Jennifer E; Hurley, Dorean L; Ross, Richard E, SJ
Spring 2024
This course provides an introduction to professional nursing, exploring nursing's history and the development of nursing knowledge grounded in theory and evidenced-based practice. The course places the study of socially just nursing practice within the tradition of liberal arts education. Engaging in critical self-reflection, students apply new value-based self-awareness to culturally congruent nursing care. Ethical reasoning processes are applied, utilizing clinical and population-based case studies. Therapeutic communication with individuals across the lifespan is introduced. Nursing education, practice, and professional careers as well as the influence of current health care environmental factors on health and evidenced-based nursing practice are discussed.

NURS209001
Sophomore Formation Seminar
Simonelli, Mary C
Spring 2024
The SCRUBS weekend retreat fulfills the NURS2090 requirement. Attendance at the full retreat is mandatory and an expectation of all sophomore students. Any absences should be discussed as soon as possible with the Teacher of Record (the Associate Dean), who will make decisions regarding activities that will be required to earn credit. This course is required for sophomore undergraduate nursing students and will involve guided review and reflection to reinforce the inherent professional values of altruism, human dignity, integrity, and social justice fundamental to the discipline of nursing. Activities in the weekend long retreat will be guided by the Ignatian formation principles and student's values and beliefs as they relate to professional practice, development as individuals and as members of caregiving teams. The goal is to build a foundation for professional leadership as nursing students become aspiring members of the nursing profession and productive and committed citizens of society at large.

NURS220502
Clinical Pharmacology
Conahan, Catherine; Wood, Lisa J
Spring 2024
This course focuses on the study of clinical pharmacology across the lifespan and scientific principles underlying its use in professional nursing. Major drug classifications and respective prototypes serve as a foundation for lifelong learning and higher-level understanding of pharmacotherapeutics. Using case studies, discussions focus on the importance of collaboration, patient education, and alternative and complementary therapies, while being mindful of patient social factors. Emphasis is placed on delivering high quality and safe patient care related to medication administration.

NURS223001
Adult Health Nursing Theory I
Bond, Stewart; Hurley, Dorean L
Spring 2024
This course focuses on the theoretical basis of the nursing care of adults across the life span with altered states of health. Emphasis is placed on beginning application of the clinical reasoning process with a focus on frequently occurring nursing diagnoses, interventions, and outcomes for adults, in particular older adults. Evidence-based practice and standards of care are integrated throughout the course. The role and responsibilities of the nurse in the acute care setting including those related to quality, safety, ethics, and legal issues are emphasized. Cultural awareness is incorporated throughout the course.

Comparing Health Care Systems through a Global Lens
Cullinan, Donna L
Spring 2024
Introduction to the concepts of global health and the critical links between public health and social and economic development. Determinants of health and patterns of disease and health outcomes across the globe are critically examined. The course reviews the determinants of health status in terms of biology, demography, epidemiology, culture, sociology, economics, and politics. Key concerns regarding reproductive health, child survival, nutrition, communicable diseases, and chronic diseases are examined. Health care delivery in developed vs. undeveloped regions of the world is emphasized.

Principles of Evidence-Based Nursing
Delva, Sabianca
Spring 2024
This course seeks to develop an applied understanding of evidence-based practice as it relates to the science of nursing. Through exploring components of the research process, an appreciation of the various types of evidence used by nurses and an understanding of the importance of evidenced-based research to improve clinical practice will be fostered. The ethical considerations related to evidence-based practice will be discussed. At the conclusion of the course, students are prepared to be to be critical consumers of research used in evidence-based practice.

---

**NURS324201**  
**Adult Health Nursing Theory II**  
**Barone, Stacey H; Delva, Sabianca**  
**Spring 2024**  
This course builds on the concepts learned in previous courses including adult health and pharmacology and expands the knowledge base for planning and implementing care of adults with acute health problems and acute exacerbations of chronic health problems. Clinical case studies of acute care emergencies are used to discuss clinical judgment. Emphasis is placed on the selection of evidence-based interventions, evaluation of interventions, and use of evaluative data in refining a plan of care for the adult patient. Discussions focus on the role of the primary nurse in the acute care setting including collaboration, discharge planning, and health teaching.

**Credits:** 3  
**Room and Schedule:** 245 Beacon Street Room 205 W 01:00PM-03:50PM

NURS324401
Childbearing Nursing Theory
Crevecoeur, Thamarah
Spring 2024
The course focuses on concepts associated with the unique responses of families during the childbearing cycle, normal and high risk pregnancies, and normal and abnormal events in women's health. Current multidisciplinary research in women's health with a focus on the childbearing cycle, including genetics and cultural competence, is presented. Evidenced based nursing practice for the childbearing family is discussed. The nursing implications of attending to both the physiologic and the psychosocial needs of the childbearing family are reviewed. Emphasis will be placed on AWHONN and ACOG standards of care.

NURS324501
Clinical Laboratory of Childbearing Theory
Crevecoeur, Thamarah
Spring 2024
Application of childbearing theory to the diagnoses, interventions, and outcomes for the care of families in structured clinical settings. Focus is on prenatal, perinatal, and post-natal activities. Students work collaboratively with the multidisciplinary team in applying evidenced-based practice derived from current multidisciplinary research to the childbearing family. Supervised by nursing faculty, the students are mentored to extend their skills in critical thinking and clinical judgment to meet the physical, psychosocial, cultural, and spiritual needs of their clients and families. Emphasis will be placed on QSEN, AACN Essentials for baccalaureate education, AWHONN and ACOG standards of care.

NURS425001
Child Health Nursing Theory
Haze, Nanci J
Spring 2024
This course builds on the published *Pediatric Nursing: Scope and Standards of Practice* to discuss the unique responses of children and their families to acute and chronic illness. Emphasis is placed on the child’s growth and development in relation to wellness and illness. A family-centered approach is used to address the health teaching, promotion, restoration, and maintenance needs of children and their families. Theoretical principles are presented, and creative, evidence-based nursing intervention strategies to meet the needs of children and their families across the health care continuum are discussed.

**NURS425201**  
**Psychiatric Mental Health Nursing Theory**  
**Dunne, Julie P**  
**Spring 2024**  
This course builds upon the standards of practice from APNA-ISPN, AACN, and QSEN to discuss the legal, ethical, and therapeutic role of the psychiatric mental health nurse in caring for individuals with psychiatric disorders across the life span. Current interdisciplinary research on the genetic, neurobiological, and psychosocial theories of depression, psychosis, substance abuse, bipolar illness, eating, anxiety, personality, and cognitive disorders is analyzed. Evidence-based nursing practice, including psychopharmacology and psychosocial treatment modalities such as cognitive-behavioral, interpersonal, group, and milieu therapy is applied from a multicultural perspective. Nursing interventions for families and communities experiencing crisis, grief, and trauma are identified.

**Credits:** 3  
**Room and Schedule:** 245 Beacon Street Room 230 M 09:00AM-11:50AM  
**Satisfies Core Requirement:** None  
**Prerequisites:** NURS3242 and NURS3243

NURS425301
Psychiatric Mental Health Nursing Clinical Laboratory
Scott, Nathan
Spring 2024
Therapeutic communication skills provide a foundation for implementing the nursing role based on the American Psychiatric Nurses Association standards of practice with psychiatric patients/clients in a variety of psychiatric treatment settings. In the clinical experience, students work collaboratively with multidisciplinary teams in applying evidenced-based practice based on current interdisciplinary research to the nursing process. In weekly supervision with clinical faculty, students are mentored to extend their skills in clinical reasoning to meet the psychological, social, cultural, biological, and spiritual needs of persons from varied backgrounds (economic, racial, ethnic, age and gender) who are in treatment for mental illness.

NURS426001
Population Health Nursing Theory
Crevecoeur, Thamarah; Gasser, Raymond F
Spring 2024
This course introduces the conceptual and scientific frameworks of population health, emphasizing public health nursing roles. The course integrates health promotion, risk reduction, and disease prevention across the life span in a range of local and global settings, using case examples that nurses, as part of interdisciplinary teams, will encounter. Community assessment and epidemiological methods are introduced. Health disparities and vulnerability are examined through an ecological lens together with traditional and emerging public health issues. Students will learn about bridging population health and clinical care in order to meet the prevention health needs of individuals, families, and populations.

**Population Health Practice in the Community**  
**Cullinan, Donna L**  
**Spring 2024**

This course focuses on the application of population health, emphasizing public health nursing roles, that include the care of population members in community settings, such as a neighborhood, school, or non-profit organization, locally or globally. Students will gain experience in community engagement, community health assessment, screening, case management, health education, service and program evaluation, and advocacy. Emphasis is placed on the multiple determinants of health and on using interdisciplinary approaches in practice to implement evidence-based interventions aimed at health promotion, risk reduction, and disease prevention.

NURS426401
Actualizing the Role of Professional Nurse
Cullinan, Donna L; Simonelli, Mary C
Spring 2024
Prepares students to transition into the role of the professional nurse. Responsibilities associated with assuming the role of a professional are explored in relation to furthering individual and social good. Contemporary health care policies and economic pressures are examined for their influence on the delivery of quality patient care. Current ethical and legal standards are highlighted and students are encouraged to reflect on how biases and prejudices influence the provision of patient care. Focus is placed on recognizing and addressing injustices in health care access and quality, which is essential to actualizing the role of professional nurse.

**Credits**: 3

**NURS491101**  
**Directed Independent Study**  
Simonelli, Mary C  
**Spring 2024**  
Students planning to enroll in Directed Independent Study should obtain guidelines from the Office of the Undergraduate Associate Dean. Proposals must be submitted at least three weeks before the end of the semester prior to that in which the study will begin. This course provides an opportunity to engage in learning activities that are of interest beyond the required nursing curriculum. Examples of learning activities are research, clinical practice, and study of a nursing theory.

**Credits**: 3  
**Room and Schedule**: By Arrangement  
**Satisfies Core Requirement**: None

NUR535001
Global Healthcare: Meeting Challenges and Making Connections
Simonelli, Mary C
Spring 2024
This course brings together students and faculty from around the world to discuss and synthesize perspectives on global health, specifically the challenges and common connections experienced across patient centered care, health education, healthcare systems and policy development. The participants will develop a deeper understanding of the particular needs of diverse and underserved populations. Emphasis will be placed on social justice and health of individuals, families, and populations. Through the lens of public health, this course explores assessment of healthcare needs, assurance of a quality healthcare infrastructure, and development of healthcare policy.

NUR5750001
Advanced Generalist Master's Practicum
Simonelli, Mary C
Spring 2024
This course will enable students to synthesize and apply knowledge from didactic coursework in a mentored practicum experience focusing on a student-identified area of interest (e.g., nursing leadership, nursing education, quality improvement, informatics, evidence-based practice). The course follows an apprenticeship model with oversight and individual mentoring by a faculty member. Students will engage in self-assessment, structured learning activities, clinical interactions, and reflection.

**Credits:** 2  
**Room and Schedule:** By Arrangement  
**Satisfies Core Requirement:** None

NURS800701  
**Direct Entry Child Health Nursing Theory**  
Haze, Nanci J  
**Spring 2024**  
This course focuses on the nursing care of children with acute and chronic conditions and their families. The primary focus is on child growth and development in relation to wellness and illness. Relevant theories from nursing and other disciplines, research, and evidenced-based guidelines related to the care of children and families are examined. Person/family-centered approaches to promote, restore, and maintain health are emphasized. Biopsychosocial, cultural, legal, and ethical factors influencing the health and care of children and families are explored.

**Credits:** 3  
**Room and Schedule:** 245 Beacon Street Room 205 M 09:00AM-11:50AM

NURS800801
Direct Entry Child Health Nursing Clinical
Haze, Nanci J
Spring 2024
This clinical course focuses on the application of knowledge and implementation of professional nursing practice in caring for children and families. A primary focus is promoting wellness and family-centered care for children with acute illness and chronic conditions. Through interprofessional collaboration, students implement evidence-based practice to provide high quality, safe, cost-sensitive care. Students extend their skills in therapeutic communication, critical thinking, and clinical decision-making to meet the biopsychosocial and cultural needs of children and families from diverse backgrounds. Students demonstrate leadership in providing patient education, advocacy, and transitional care for children and families.

Healthcare Quality Management
Reid Ponte, Patricia A; Uveges, Melissa K
Spring 2024
The course explores applications of quality improvement measures to the healthcare environment. Topics covered include an understanding of high reliability organizations, utilization review, risk management in healthcare, quality management, the use of outcomes research in improving patient care efficacy and safety, and performance management through training. This course is consistent with Lean Six Sigma (Green Belt) competencies and can partly contribute to preparation for the certification exam.

**NURS871402**  
**Nursing Ethics and Professional Responsibility in Advanced Practice**  
**Ross, Richard E, SJ**  
**Spring 2024**  
The course prepares advanced practice nurses for ethics leadership within the broader healthcare arena. Links are made among philosophical/theoretical foundations of nursing, ethical theory, and nursing goals. Skills supportive of the ethical decision making of nurses, peers, and the team are developed with in-class opportunities to practice leading ethics rounds and developing ethics education projects. An emphasis is placed on facilitating the interests of current and future patients and society as a professional obligation. Socially derived injustices and professional responsibility to advocate for just healthcare is highlighted along with strategies to influence institutional and health policy on behalf of individual and social good.

NURS871501
Nursing Leadership in Complex Health Care Settings
Gennaro, Susan; Given, Sarah
Spring 2024
This course prepares graduate nursing students to become leaders in health care. Self-reflection, self-assessment, and values clarification provide the groundwork for a nursing leadership self-development plan. Students will explore a broad range of evidence-based approaches, including leadership and organizational theories, to prepare them to lead in today's complex health care environment including practice, organization, system, academic, and policy arenas. Students will explicate the complexities of health care leadership through the examination of topics such as change management, partnership relationships, innovation, accountability models, organizational culture, diversity and inclusion, conflict management, power, creating trust and psychological safety within teams.

NURS871601
Health Care Policy for Nursing Leaders
Given, Sarah; Uveges, Melissa K
Spring 2024
This course prepares nurse leaders and scholars to influence health care and related policies in support of nursing's goals and social justice. The structure and financing of U.S. health care system and roles of government, insurers, providers, and consumers are examined. The relationships among health policy and the social and economic determinants of health are explored through analysis of key issues in health policy. Students engage in strategies to analyze and inform health policy. The course provides the foundation for leadership in interdisciplinary collaborative endeavors to address, through a nursing perspective, health policy issues at the local and national levels.

Healthcare Policy and Social Justice
Given, Sarah; Uveges, Melissa K
Spring 2024
This course prepares scholars to influence healthcare and related policies in support of social justice. Theories of social justice and other scholarly perspectives are used to explore the interrelationships among health policy and the social, political, and economic determinants of health. Strategies for developing, initiating, analyzing and evaluating health policies are proposed using students' areas of focus as a basis. The course provides the foundation for leadership in interdisciplinary collaborative endeavors to address health policy at the regional, national and global levels.

NURS971701
Methods of Advanced Scholarly Inquiry
Given, Sarah; Howard, Elizabeth P
Spring 2024
This is the second of four courses to prepare DNP students to conduct an organization approved, scholarly inquiry project to improve health services and patient outcomes. Students critically evaluate the literature and related information to address a health care problem. Scholarly inquiry approaches are presented to enable students to identify a problem, plan change to improve a process or outcome, or develop innovative solutions related to health care delivery. Upon course completion, there will be a faculty and organization approved DNP project charter, which includes the problem, processes, and expected outcomes.

**NURS973001**  
**Advanced Physiology and Pathophysiology across the Lifespan**  
**Dwyer, Andrew A; Gasser, Raymond F**  
**Spring 2024**

This course focuses on physiologic and pathophysiologic processes that affect individuals across the lifespan. The emphasis is on central concepts of physiology and pathophysiology, including genetic and epigenetic mechanisms, immunity, inflammation, cell growth regulation, hematopoiesis, and hemostasis. These concepts are then applied in a systematic survey of diseases within body systems. Current research, clinical examples, and application to advanced nursing practice are incorporated throughout the course.

NURS973201
Advanced Health/Physical Assessment across the LifeSpan
Gordon, Leah M; Marshall, Alison O
Spring 2024
This course uses a holistic approach and risk appraisal frameworks as a basis for health assessment across the lifespan. Building on knowledge of basic health assessment, the APRN student performs comprehensive health histories and physical and mental health examinations. Students will incorporate subjective and objective data to evaluate healthy individuals and those with acute and/or chronic disease. The course utilizes learning laboratory experiences, high-low fidelity simulation, and standardized patients to facilitate students' learning. Health promotion, health maintenance and harm reduction concepts are emphasized and applied, taking into consideration life circumstances and cultural, ethnic, and developmental variations.

Advanced Practice Nursing Role
Magny-Normilus, Cherlie
Spring 2024
This course prepares students to transition into an advanced practice nursing role. Historical and contemporary influences leading to the development of this professional role are explored, along with anticipated future dimensions. The impact of the advanced practice nurse on patient, family, and population outcomes will be examined. The course incorporates discussions of relationship-based care, role implementation across practice settings, and advanced practice nursing competencies. It also provides a synthesis of legal, regulatory and scope of practice considerations. The course facilitates a comprehensive understanding of political, economic, social and professional issues relevant to advanced practice nursing.

NURS981601
Population Health Principles, Program Planning, and Evaluation
Camp, Lindsey N; McNutt-Clarke, Beth
Spring 2024
The course focuses on care at the aggregate level and examines the multiple determinants of health. The principles of population health and population health management will be explored. Health promotion theories will be analyzed and evaluated. Building on these theories and epidemiologic principles, students will assess and identify health care needs at the population level. Students will design theory-driven, evidence-based interventions to improve population outcomes. Program planning and evaluation in partnership with community stakeholders will be emphasized.

**NURS981901**  
**Adult-Gerontology Primary Care Advanced Practice Nursing I**  
**Barone, Stacey H; Conahan, Catherine; LaPierre, Kellie L**  
**Spring 2024**

The first of three in the Adult-Gerontology Primary Care Advanced Practice Nursing series, this course focuses on the promotion of optimal physical, mental, and social health of individuals across the adult-gerontology age spectrum through evidence-based, ethical, reflective practice, leadership, and advocacy. Students utilize patient-centered theoretical, evidence-based, cost-effective, high quality, and safe clinical approaches to the health promotion, disease prevention, and common adult and age-related primary care problems. Emphasis is on assessment, diagnosis, and management of common primary care problems. Primary health conditions are addressed within the context of biopsychosocial, developmental, cognitive, socioeconomic, and cultural factors.

**Credits:** 6

**Room and Schedule:** Stokes Hall 115N Tu 09:00AM-11:50AM

**Satisfies Core Requirement:** None

NURS982101
Adult-Gerontology Primary Care Advanced Practice Nursing II
Barone, Stacey H; LaPierre, Kellie L
Spring 2024
The second of three in the Adult-Gerontology Primary Care Advanced Practice Nursing series, this course focuses on the management of chronic conditions across the adult-gerontology age spectrum. Critical analysis of data, integration of theory, and evidence-based, cost-effective, high quality, and safe approaches to care coordination are emphasized. The broader health care system, interprofessional collaboration, influences of culture, and social determinants of health are considered. The leadership role of the Adult-Gerontology Primary Care Advanced Practice Nurse in identifying and addressing barriers to optimal care is integrated throughout the course.

Family Primary Care Advanced Practice Nursing I  
Croke, Bethany A; Marshall, Alison O; Underwood, Patricia  
Spring 2024  
The first of three in the Family Primary Care Advanced Practice Nursing series, this course focuses on health promotion and management of common alterations in individual and family health across the lifespan. Special attention is given to understanding the health effects of disparities associated with gender, race/ethnicity, and socioeconomic status. Emphasis is on utilizing theoretical, evidence-based, cost-effective, high quality, and safe approaches to health promotion for individuals and families across the lifespan. Assessment, diagnosis, and management of common primary care problems are addressed within the context of biopsychosocial, developmental, socioeconomic, and cultural factors. Strategies to promote family health are explored.

NURS983201
Advanced Clinical Decision-Making in Pediatrics
White, Laura S; van de Water, Brittney
Spring 2024
This course builds on previous knowledge of diagnostic reasoning and clinical decision-making as it relates to an advanced understanding of human experiences and the complexities of contemporary pediatric primary care. Through faculty-facilitated simulations, seminars, and clinical cases, emphasis is on the process of clinical decision-making and on scholarly and reflective practice. Theories from nursing and other disciplines, research, and policy are synthesized and integrated into advanced pediatric practice. Principles associated with the delivery of safe and high quality care are critiqued. Ethical, legal, global, and social factors are analyzed in relation to current and developing healthcare policy.

NURS983901
Psychiatric-Mental Health Advanced Practice Nursing Across the Lifespan II
Marchetti, Carol A; Pounds, Karen G
Spring 2024
The second of three in the Psychiatric-Mental Health (PMH) Advanced Practice Nursing (APN) series, this course prepares students for the PMH APN role. Knowledge of theoretical frameworks from NURS9837 is applied to assessment, diagnosis, and management of PMH problems. Students hone clinical judgment and communication skills to foster effective therapeutic alliances with patients/families, and facilitate interprofessional collaboration, consultation, and referrals. Topics in crisis management, mental illness prevention, mental health promotion, quality improvement, and case management for diverse populations are explored. A 375-hour supervised practicum provides opportunities for students to develop skills to treat people in diverse PMH clinical settings.

**Psychiatric-Mental Health Advanced Practice Nursing Across the Lifespan III**

Marchetti, Carol A; Pounds, Karen G

**Spring 2024**

The final of three in the Psychiatric-Mental Health (PMH) Advanced Practice Nursing (APN) series, this course focuses on management of high-risk individuals with complex PMH problems. Special attention is given to the sources and impact of complex PMH problems on individuals, families, communities, and populations, including diverse and disadvantaged groups. Theoretical, evidence-based, cost-effective, high quality clinical approaches, including use of information technology, are integrated into the management of complex PMH problems. During a 375-hour, supervised clinical practicum, students prepare for increasingly autonomous practice to assume APN and leadership roles, in consultation with clinical site preceptors and faculty.

**Nurse Anesthesia Clinical Practice III**  
**Emery, Susan A; Thomas, Allan C; Vitale, Caitlin M**  
**Spring 2024**

This course, the third in a 6-course sequence, provides the nurse anesthesia student with experience in caring for patients requiring complex and specialty surgical procedures. Students gain experience with subspecialties and/or special populations. Didactic content presented during NURS XXXX, Advanced Practice Principles for Nurse Anesthesia II, is applied to patient care through seminar, simulation and clinical practice. Students transition from the advanced beginner to the competent nurse anesthetist level depending on patient complexity. Experienced nurse anesthetists and physician anesthesiologists function as mentors.

NURS986001
Pharmacotherapeutics in Nurse Anesthesia Practice
Emery, Susan A
Spring 2024
This course is a study of pharmacotherapy as applied to nurse anesthesia practice. Chemistry and biochemistry form the foundation of the pharmacokinetic, pharmacodynamic, and pharmacogenomic principles discussed. Medications common to nurse anesthesia practice are presented, and individualized drug selection is emphasized. Instructor and student-led simulation experiences provide the opportunity to apply theory to practice involving complex decision-making.

This course builds on basic concepts of the anatomy, physiology, and pathophysiology of the cardiovascular system. A detailed examination of the anatomy and physiology of the heart and circulatory system forms the basis for discussion of common and uncommon diseases of the cardiovascular system. Key components of the history and physical exam together with diagnostic testing inform pre-anesthesia assessment. Anesthetic implications for the patient with cardiovascular system co-morbidities form the basis for the development of an individualized plan of anesthesia care, including the need for specific monitoring modalities.

McNutt-Clarke, Beth
Spring 2024
This is the final course of the scholarly inquiry sequence and focuses on evaluation and dissemination of the completed DNP Project. The project findings will be described in an executive summary, project report, poster presentation, and optional publication. The findings will be disseminated to organizational stakeholders and communities of interest.

FORS531501
Victimology
Burgess, Ann W
Fall 2023
This course examines the wide range of victimization experiences from the perspective of the victim, their families and society. Crimes to be studied include robbery, burglary, carjacking, assault and battery, rape, domestic violence, stalking, homicide, arson, child sexual abuse and exploitation, child pornography crimes, federal crimes, identity theft, terrorism, and internet crimes. Emphasis will be given to exploring the etiology of trauma, motivational issues of offending, response patterns to victimization, secondary trauma effects of victimization, and community and media response. Class format will utilize cases from the forensic practice of the lecturers.

FORS531801
Forensic Science I
Burgess, Ann W
Fall 2023
Forensic science concepts and principles play a critical role in analyzing crime scene evidence. This course draws on scientific principles and examines cases where there has been a death, including suicide, accidental, and criminal; and cases where there is a survivor, in which there is a legal and/or ethical component. Specifically, the course applies a case method format to forensic science issues including forensic pathology, clinical forensics, crime victims, computer crime and equivocal death.

Forensic Mental Health
Burgess, Ann W
Spring 2024
The course examines the components of human behavior that bring people into a criminal justice setting and analyzes the legal question involved. Content will cover homicide, rape, abduction, cyber crimes, stalking, domestic violence, child abuse, and criminal parenthood from the offender's perspective. Content covered includes forensic and behavioral interviewing, interrogation, role of forensic mental health examiners, case formulation, DSM IV-R diagnosis, criminal investigations and charges, state of mind, duty to warn, memory and recall, malingering, and secondary gain. Forensic cases will form the basis for discussion of each class topic.

Palliative Care Courses: Summer 2023

HLTH770001
Serious Ill, Death, and Dying
Tabloski, Patricia
Summer 2023
This course provides an opportunity for examination of personal, professional, and societal beliefs and perspectives on serious illness, death, and dying across the lifespan. Students become aware of and sensitized to personal assumptions, biases, attitudes and reactions to serious illness, death, and dying. Philosophies, principles, and models of palliative and end-of-life care are discussed. Students develop an appreciation for individual and family coping processes throughout serious illness, death, dying, and bereavement. Students explore communication and bio-psycho-social-spiritual strategies that can be used to partner with individuals and families to maximize quality of life throughout serious illness, death, and dying.

Credits: 3
Room and Schedule: On-line Asynchronous
Satisfies Core Requirement: None
Prerequisites: Open to graduate nursing students. Non nursing graduate students or upper division undergraduate students with permission of TOR.

Palliative Care Courses: Fall 2023

HLTH770201
Responding to Suffering in Serious Illness, Death, and Dying
Tabloski, Patricia
Fall 2023
This course focuses on improving the quality of life and care for individuals and families living with serious illness and at end of life. Emphasis is placed on recognizing and responding to suffering from an interdisciplinary perspective. Barriers and facilitators of effective care during serious illness, death and dying, such as social determinants of health, family dynamics, spiritual and cultural variations, are explored. Evidence-based interventions and strategies to address, manage, and alleviate physical, psychosocial, spiritual, and existential suffering across the lifespan are discussed. Established palliative care standards are utilized to evaluate outcomes within the context of interdisciplinary care.

**Credits:** 3

**HLTH800001**  
**Examining Diversity in Nursing and Health Care**  
**Dunne, Julie P**  
**Fall 2023**  
This course is designed to help students develop foundational insights regarding diversity as an all-inclusive concept with complex intersections. It will focus on the professional nurse as a multifaceted cultural being with a network of identities and group affiliations that serve as both resources and barriers in the development of effective and meaningful patient/family-provider interactions. The primary goals of this course involve identifying sources of difference, deconstructing sociopolitical hierarchies, and recognizing the strengths and challenges inherent in diverse societies. The course will emphasize inclusive leadership strategies for transforming care delivery systems across multiple health care contexts.

Palliative Care Courses: Spring 2024

HLTH220601
Principles of Nutrition Across the Life Span
Tucker, Sheila, R.D.
Spring 2024
This course focuses on the principles of normal nutrition as they are applied to individuals and populations across the life span. The content emphasizes the role diet plays in the prevention of disease and promotion of health. Therapeutic and medical nutrition applications are discussed relative to the nurse's role and responsibility in this aspect of patient care. Emphasis is placed on the integration of evidence-informed scientific recommendations into nursing practice.

Credits: 3

Counseling, Developmental, and Educational Psychology Courses: Summer 2023

**APSY224101**  
**Mental Illness: Social and Clinical Perspectives**  
**Goodman, David M**  
**Summer 2023**  
Provides overview of theoretical models and phenomenology currently defining the field of abnormal psychology, focusing particularly on socio-cultural contributions to conceptualizations of mental illness and distress. First half of course reviews and critiques current constructions of the nature of mental illness, as well as classification, assessment, and treatment of mental illness. Second half highlights specific forms of mental illness, with attention to the causes and subjective experience of psychopathology.

**APSY224201**  
**Interpersonal Relations**  
**Hailes, Helen**  
**Summer 2023**
Provides an opportunity to learn a developmental and systems perspective on the nature of family and interpersonal relations. Examines both the nature of interpersonal relations and some of the conditions in contemporary life that are shaping the quality of these relationships. Gives particular emphasis to understanding the self, family life, emotions, and conflicts in field research. Views the concept of interpersonal relations from historical, multicultural, gender, and developmental perspectives.

**Adult Development and Aging**  
**Konowitz, Lily S**  
**Summer 2023**

Explores theories and research on development across early, middle, and late adulthood. Topics include physical, cognitive, social, and emotional development. Both the growth and decline across adulthood are discussed, with attention to prevention and a focus on successful aging. This course offers numerous opportunities for reflection on one's own development as an adult. The course also provides insights into application of adult development to real life situations and is especially helpful to those who wish to work with adult populations.

APSY741801
Applied Child Development
Leer, Jane
Summer 2023
This course will help students understand fundamental principles of cognitive, linguistic, social, and affective development as they apply to children's lives at home, in school, and in their communities. The course is designed to provide students with the skills to apply classic and contemporary research and theory to a wide variety of child-facing fields of practice in education, psychology, social services, and beyond.

Credits: 3
Room and Schedule: Carney Hall 303 MW 04:00PM-07:00PM
Satisfies Core Requirement: None
Prerequisites: pre req undergraduates junior/senior status
Corequisites: None
Cross-listed with: None
This course is designed to provide students with an overview of the theoretical and empirical knowledge base concerning adolescent development. In particular, four broad areas will be considered: (1) psychological, biological, and cognitive transitions; (2) central developmental tasks of adolescence; (3) primary contextual influences; and (4) prevalent types of problematic functioning that emerge during adolescence. The overarching goals of the course are to provide a solid and broad understanding of how and why adolescents develop in the manner they do, and to extend this developmental understanding into research, application, and practice.

APSY744601  
Child Psychopathology  
MacEvoy, Julie P  
Summer 2023  
Introduces the theory and research that provide the context for understanding the socio-emotional problems of children. Places particular emphasis on the role of risk and protective factors as they contribute to children's resilience and vulnerability to childhood problems. Considers implications for clinical practice and work in school settings.

Psychology of Trauma in Adulthood: Theory, Intervention, and Cultural and Social Justice Perspectives
Shorin, Jayme A
Summer 2023
The focus of this course is on the biopsychosocial aspects of traumatic stress, including an exploration of the psychological sequelae of various types of trauma (e.g., physical abuse, sexual assault, political trauma) across diverse adult populations. Assessment and clinical and community-based interventions concerning traumatic stress will be discussed with attention to cultural and linguistic diversity. Social justice and human rights in the context of interpersonal and collective violence is also examined.

Ethical and Legal Issues in School Counseling

MacEvoy, Julie P

Summer 2023

Guided by the ethical codes of the American School Counselor Association (ASCA) and the American Counseling Association (ACA), a wide range of legal and ethical conflicts that school counselors encounter will be discussed. Specific topics will include school counselors' ethical and legal duties as they pertain to confidentiality, suspected child abuse/neglect, mental health referral and treatment, students at risk to themselves and/or others, students involved in the juvenile justice system, bullying, the rights of LGBTQ students, and special education. Knowledge of multicultural school counseling competencies and ethical issues that are related to social justice will be emphasized.

APSY763801
Issues in Short Term Counseling
Walsh-Blair, Lynn Y
Summer 2023
This course is designed to introduce students to the techniques and issues related to the practice of short-term therapy. Special attention is given to current trends in health care delivery, including the managed care environment and how to adapt various models to this environment. Students will learn a number of coherent strategies to treat a variety of presentations and populations in a short-term model. They will also gain an understanding of the complexities of providing quality mental health care in today's clinical settings.

**Counseling, Developmental, and Educational Psychology Courses: Fall 2023**

**APSY103001**  
Child Development  
Laski, Elida V  
Fall 2023
This is one of two foundational courses (APSY 1030 & APSY 1031) focused on multiple dimensions of child development from the prenatal period through middle childhood, with a consideration of applications to educational and other applied settings. The course offers an overview of the array of research methods used in developmental psychology; normative trends in physical, social-emotional, and cognitive development; and factors and processes that affect developmental change and optimize child development. Key questions in the field of developmental psychology, such as "How do nature and nurture together shape development?" and "How do children become so different from one another?" will recur across topics to help students establish a coherent understanding of child development.

This is one of two foundational courses (APSY 1030 & APSY 1031) focused on multiple dimensions of child development from the prenatal period through middle childhood, with a consideration of applications to educational and other applied settings. The course offers an overview of the array of research methods used in developmental psychology; normative trends in physical, social-emotional, and cognitive development; and factors and processes that affect developmental change and optimize child development. Key questions in the field of developmental psychology, such as "How do nature and nurture together shape development?" and "How do children become so different from one another?" will recur across topics to help students establish a coherent understanding of child development.

APSY103101
Family, School, and Society
Lewin-Bizan, Selva
Fall 2023
This is one of two foundational courses (APSY1030-APSY1031) that introduce students to the multiple dimensions of child development, and the place of education in promoting healthy development for all children. This course considers the social and cultural contexts that shape developmental and educational processes. Focuses on understanding the nature of contemporary social problems including racism, sexism, ethnic prejudice, poverty, and violence, as they affect children, families, and schooling. Emphasizes the special role of education in linking community resources for an integrated approach to serving children and families.

APSY203201
Cognition and Learning
Lu, Linxi
Fall 2023
This course will introduce students to what the fields of cognitive, developmental, and educational psychology have to say about how humans learn. This includes comparing and contrasting major theoretical approaches to the study of learning, examining the basic cognitive processes involved in learning (e.g., attention, memory, inhibitory control, problem-solving), and considering how social and biological factors affect these processes. The knowledge gained in this course can be used to maximize individual growth and achievement across a variety of real-life contexts. For instance, it can inform the design of classroom instructional practices, professional training seminars, parenting interventions, community programs, and health initiatives.

APSY204101
Adolescent Development
Volk, Katherine T
Fall 2023
This course introduces the breadth of opportunities and challenges of human development across the adolescent years. It discusses biological, social, psychological, and cognitive changes that occur during adolescence; the role of autonomy, belonging, and motivation in adolescent development; how peers, adults, and technology influence adolescent development; and how adolescents race/ethnicity, gender, sexuality, and academic identities influence their development. Consideration will be given to variability in adolescent development across cultures and contexts, and to the impact of rapid cultural change on youth.

APSY215201
Applied Psychology Practicum: Pathways to Purposeful Work and Life
Morelli, Gilda A
Fall 2023
Preference will be given to APSY majors who are Juniors and Seniors and have completed at least 12 APSY credit hours prior to the semester of Applied Psychology Practicum (APSY2152) enrollment. Sophomores and students who are minoring in Applied Psychology interested in taking the class may join with permission from the LSOEHD Undergraduate Associate Deans Office, if space is available. Lynch Undergraduate Associate Dean's office approval required
Provides an introduction to the applications of psychological theory within various human and community service contexts. Readings and discussion contribute to critical analyses of how social issues and social problems are situated differently due to gender, race, social class and diversities of language, ability, sexuality, etc. Students volunteer for 8-12 hours per week at a site selected with the assistance of the Field Placement office, meet in a weekly seminar, keep a journal of their field experience, and complete reading and written assignments that integrate theory and practice. Early registration is strongly encouraged to ensure support finding a practicum placement. Students who do not secure a placement by the university add/drop date cannot continue in the course. Students should begin the process of determining a practicum placement by completing the Practicum Placement form HERE (scroll down to the Getting Started section).

**Research Methods for Applied Psychology**

Kim, Julie J
Fall 2023
The course prepares professionals in the fields of human development, psychology, and education to understand and design research studies related to applied topics. Students are introduced to fundamental principles of research methodology and learn about different types of research, including quantitative, qualitative, and mixed-method studies. The emphasis is on developing skills that will enable students to comprehend common research procedures, critically evaluate existing research, develop studies to address specific research questions, and communicate the findings clearly and accurately.

Interpersonal Relations
Kim, Oh Myo
Fall 2023
Provides an opportunity to learn a developmental and systems perspective on the nature of family and interpersonal relations. Examines both the nature of interpersonal relations and some of the conditions in contemporary life that are shaping the quality of these relationships. Gives particular emphasis to understanding the self, family life, emotions, and conflicts in field research. Views the concept of interpersonal relations from historical, multicultural, gender, and developmental perspectives.

APSY224301
Social Oppression and Transformation
Mc Intyre, Alice E
Fall 2023
Replacing APSY6348 Culture, Community, and Change This course engages the topic of social oppression and transformation from social and psychological perspectives. Using research, scholarship, and creative work from psychology, education, sociology, history, and popular culture, students will explore institutional, ideological, interpersonal, and individual aspects of oppression across four social locations--social class, gender, race, and sexual orientation. For each location, students will start with their own stories of privilege and oppression; move to an empathic engagement with the stories of others; broaden to understand the way that structural dynamics shape those stories; and finally, dive into specific social issues, including family poverty, violence against women, mass incarceration, and LGBTQ homelessness. Throughout the course, students will have the opportunity to study and reflect on change and transformation, including ways in which to incorporate learning from this course into personal and professional lives.

**Motivation, Emotion, and Self-Regulated Learning**

**Miele, David B**

**Fall 2023**
Self-regulated learning is a process that involves setting learning and academic goals, monitoring your progress toward these goals, and making adjustments when you realize that you are not on track to be successful. The course will primarily focus on the ways that motivation and emotion contribute to this process. For example, students will examine the motivations that lead individuals to adopt particular achievement goals (e.g., the goal of getting a good grade), the ways in which these goals impact learners behaviors, and the impact of these behaviors on important outcomes (e.g., grades and well-being). Students in the course will also examine different types of emotions (e.g., curiosity, boredom, frustration, etc.) that learners experience when pursuing their academic goals and the ways in which these emotions can support or hinder their achievement of these goals. In addition to examining motivation and emotion as factors shape learners' achievement and self-regulation, the course will explore some of the ways in which motivation and emotion can themselves be regulated. For example, students will learn about the kinds of strategies that individuals use to bolster their motivation when they feel like quitting or to calm themselves down when they are feeling anxious. Although the course will explore some of the ways that motivation, emotion, and self-regulation develop, its main focus will be on how adolescents and young adults pursue their learning goals.

APSY331001
**Contemporary Issues in Applied Psychology and Human Development**
Goodman, Lisa A
Fall 2023
Trauma and healing through the lens of intimate partner violence. This course explores the topic of intimate partner violence (IPV), including physical, sexual, and psychological abuse, as a core example of interpersonal violence and trauma more broadly. We will draw from psychology, public health, and sociology, as well as narrative accounts and short stories, to illuminate: 1) the subjective experience of IPV and its radiating effects on individual, family, and social life; 2) how intersecting identities and material realities shape the ways different communities experience and respond to it; 3) the interpersonal, social, and structural factors that cause and maintain it; and 4) how our own backgrounds and positionalities shape the way we view IPV and the people who experience and perpetrate it. Building empathy, mutual respect, and community both within and outside the classroom will be central concerns.

Health Psychology
Lai, Betty S
Fall 2023
Health psychology is the study of how psychology and health interact and influence: health promotion and health risk behaviors, the treatment individuals receive for medical problems, how people cope with stress and pain, and how people behave when they are ill. This course will review these issues across the life course, with special attention to approaches which influence health promoting behaviors and the treatment of illnesses.

APSY421101
Psychology of Work
Blustein, David L
Fall 2023
Work is one of the central roles in life, encompassing much of our time, energy, and effort. Applied psychology has a deep foundation in the psychology of work, which represents a key context for people to interact socially and economically with their communities. In this course, students will learn how psychology can be used to enhance knowledge of the role of work in career development, organizational life in the private and public sectors, and within broader social and political contexts. Students will also explore the impact of the future of work on individuals and communities, and the ways in which the psychology of work can inform meaning, purpose, and social justice.

Senior Thesis I
Whitcavitch-Devoy, Julia
Fall 2023
Registration for this course requires advance approval and the submission of additional paperwork. Students, with the approval of the program coordinator and department chair, may write a thesis during the senior year. In most cases, the thesis involves empirical research, although other scholarly forms may be permitted. Students must meet with a prospective thesis advisor during the junior year to develop a thesis proposal.

**Evaluation Practice and Methods**  
Gates, Emily F  
**Fall 2023**  
This course addresses the theoretical and philosophical foundations of program evaluation, with emphasis on the roles of social and political theory, methodology, epistemology, and philosophy of science in various models of evaluation in education. Each evaluation model will be examined in terms of the purpose, knowledge construction, the role of the evaluator, relationship to objectives, relationship to policy and decision-making, criteria, and design. The course also includes a focus on issues of value-neutrality and value judgment.

APSY642001
Positive Youth Development
Lerner, Jacqueline V
Fall 2023
Applied Developmental Science (ADS) uses research about human development to inform programs and policies pertinent to topics of social importance. Students will integrate readings about and class discussions of ADS theory and research with information about community-based programs. The focus of this class will be a discussion and analysis of the role of developmental research and, in particular from longitudinal research (for example, the 4-H Study of Positive Youth Development), in framing applications (programs and policies) for promoting positive development among youth. In addition to an overview of the theoretical models that are the bases of the PYD perspective, the course will present the work of researchers who have conducted applied developmental studies of adolescents and their ecological settings in order to advance understanding of how individuals and context are involved across the adolescent years in providing a basis for both healthy and problematic development. Faculty: Jacqueline Lerner

Critical Perspectives on Research Methodology
Russell, Michael K
Fall 2023
This course explores foundational concepts that influence the methodologies and methods employed by social science researchers. Core topics explored include: the Enlightenments influence on scientific inquiry; the influence of empiricism, positivism, and universalism on social science research; objectivity and subjectivity; verification and falsification; quantification and standardization; the construction of mental ability and intelligence. Also explored are: the influences White racial framing has and continues to have on the research questions posed, the methods embraced, interpretations made, and discourse produced by social science researchers; and the role critical theory and anti-colonization have begun to play in reorienting social science research to challenge various forms of oppression, with a specific focus on racialized oppression. Upon completion of the course, participants will be positioned to critically examine quantitative methods and measurement techniques commonly employed for educational research that are introduced in future coursework.

APSY731001
Foundations of Counseling: Integrated Behavioral Health I
Louis, Elizabeth F
Fall 2023
The purpose of this yearlong course is to introduce counseling students to an integrated behavioral health (IBH) framework that will help facilitate their learning and understanding of this model. Students will learn fundamental principles, clinical skills, and have the opportunity to expand upon their professional identity. Students will: a) learn to examine the multiple settings of IBH, b) learn to develop strong interdisciplinary relationships, c) gain practical knowledge, skills, and techniques needed to engage competently in professional practice working with patients from diverse backgrounds and within different healthcare systems, d) develop insight into ones cultural background and the influence of personal identities and values in their engagement with patients and professionals of the field, e) identify and understand social justice issues that intersect with the realities of patients and the ways they impact patients quality of life and the wellness of communities, f) foster an awareness of the role of ethical considerations, relevant professional development issues, the role of supervision, and self-care of the counselor, and g) prepare for clinical internships available in the second year of the program. Through weekly lab experiences, students will engage in further discussion, practice their skills, and implement their knowledge of IBH.

APSY741901
Applied Adolescent Development
Seider, Scott C
Fall 2023
This course is designed to provide students with an overview of the theoretical and empirical knowledge base concerning adolescent development. In particular, four broad areas will be considered: (1) psychological, biological, and cognitive transitions; (2) central developmental tasks of adolescence; (3) primary contextual influences; and (4) prevalent types of problematic functioning that emerge during adolescence. The overarching goals of the course are to provide a solid and broad understanding of how and why adolescents develop in the manner they do, and to extend this developmental understanding into research, application, and practice.

Theories of Counseling and Personality I
Mahalik, James R
Fall 2023
First part of a year-long sequence examining personality and counseling theories. To introduce students to major theories of personality in the field of psychology and how theories are applied in constructing counseling and psychotherapy models. Students will focus on humanistic, behavioral, and cognitive personality theories and how they become operationalized in person-centered, behavioral, and cognitive counseling models, respectively. In addition to examining the theoretical foundations, client and counselor dimensions, techniques, and the active ingredients of change for these major models of personality and counseling, students examine how socio-cultural context contributes to client presenting concerns and may be addressed in counseling. **Issues in School Counseling**  
**Theodorakakis, Maria D**  
**Fall 2023**

Restricted to students in the School Counseling program. This course traces the development of school counseling as a profession, and helps students understand the major functions of school counselors. Students gain an understanding of schools as dynamic organizations and learn to recognize and appreciate the intersection of family, school, culture, and community. Professional issues related to the practice of school counseling are examined, and recent innovations in the field are reviewed.

Psychology of Trauma in Childhood and Adolescence: Theory, Intervention, and Cultural and Social Justice Perspectives
Haney, Margaret A
Fall 2023
The focus of this course is on the neuro-developmental and psychosocial aspects of traumatic stress, including an exploration of the psychological sequelae of exposure to various types of trauma (e.g., physical abuse, domestic violence, mass disasters) in childhood and adolescence. Assessment and clinical and community-based interventions concerning traumatic stress will be discussed with attention to cultural and linguistic diversity. Social justice and human rights in the context of interpersonal and collective violence is also examined.

**APSY891701**  
Cognitive-Affective Bases of Behavior  
Vasilyeva, Marina  
Fall 2023

Ph.D. students only. All others must get instructor approval. This course discusses theories of human development and examines empirical research on cognitive and affective processes underlying behavior. In addressing the cognitive bases of behavior, it explores key mental processes (e.g., attention, memory, problem solving) and constructs (e.g., schemas, heuristics) that have been instrumental in understanding everyday functioning. The socio-affective bases of behavior addressed in the course include emotions, temperament, and self-concept. The students in this course explore fundamental theoretical questions, such as the role of biology and environment in development, and consider practical applications of current theoretical and empirical knowledge concerning the bases of human behavior.

**Credits:** 3  
**Room and Schedule:** Campion Hall 306 Th 09:30AM-11:50AM

Quantitative Research Design in Counseling and Developmental Psychology
Dearing, Eric, PHD
Fall 2023
Doctoral students in Counseling and Developmental Psychology. Others by instructor's permission. This is a year-long course, 1 credit in the fall, 2 credits in the spring. In this year-long seminar, students examine quantitative research designs and application employed in the Counseling and Developmental Psychology literatures, including randomized, nonrandomized, cross-sectional, and longitudinal designs. Students present and critique published research exemplifying specific designs, propose empirical studies that could advance counseling and developmental psychology, and present findings from their own empirical work.

**Seminar in Counseling Theory**
**Trantham, Sidney M**
**Fall 2023**

Doctoral students in Counseling Psychology only. Deepens students' understanding of psychological theory, and facilitates a life-long journey of integrating theory with practice. Provides knowledge and understanding of traditional and contemporary theories of psychotherapy, and helps students develop a critical perspective that will enable them to evaluate the usefulness of these theories for their clinical work with clients. Class discussions cast a critical eye on the development of the discipline, including its philosophical and contextual roots, and analyze the values inherent in mainstream psychological practice. Considers strengths and limitations of each school, and uses case examples to gain expertise in applying theory to practice.

Counseling Psychology in Context: Social Action, Consultation, and Collaboration
Goodman, Lisa A
Fall 2023
For doctoral students in Counseling Psychology, and others by permission only. This is a year-long course, 1 credit in the fall, 2 credits in the spring. Accompanying the First Year Experience (FYE) practicum, exposes students to research and practice at the meso- (community, organizations) and macro (government, policy, social norms) levels, in addition to the more traditional micro (individual) level. Students discuss their personal experiences within their FYE placement and read and discuss a series of articles and chapters central to the developing fields of critical psychology, liberation psychology, or counseling with a social justice orientation.

Trantham, Sidney M
Fall 2023
This is a year-long course, 1 credit in the fall, 2 credits in the spring. Pre-internship placement in a mental health setting accompanied by a biweekly seminar on campus. Placement requires 20-24 hours per week over two semesters. Focus will be on the integration of theoretical and research perspectives on clinical interventions utilizing the experience of site-based practice. Satisfactory completion of this course is a prerequisite for the doctoral internship.

Credits: 1
Room and Schedule: Campion Hall 306 W 04:30PM-06:50PM
Satisfies Core Requirement: None
Prerequisites: Advanced Pre-Internship Counseling Practicum. Master's-level counseling practicum.
Corequisites: None
Cross-listed with: None
Frequency: Every Fall, Every Spring
Student Level: Graduate
**APSY984901**

**Doctoral Internship in Counseling Psychology**

Goodman, Lisa A  

**Fall 2023**

Doctoral candidates in Counseling Psychology only. By arrangement only. Internships cover a calendar year, and students must complete the equivalent of one full year (40 hours/week) or two semesters (two credit hours per semester). Applications should be submitted in November of the preceding year. Placement must be in an approved counseling setting for psychodiagnostic and interviewing experience with clients, group counseling, and other staff activities.

**Credits:** 1  
**Room and Schedule:** BY ARRANGEMENT  
**Satisfies Core Requirement:** None  
**Prerequisites:** Permission of Director of Training; minimum of 400 clock hours of counseling practicum (e.g., APSY 7660, 7661, 9846)

Counseling, Developmental, and Educational Psychology Courses: Spring 2024

APSY103001
Child Development
MacEvoy, Julie P
Spring 2024
This is one of two foundational courses (APSY 1030 & APSY 1031) focused on multiple dimensions of child development from the prenatal period through middle childhood, with a consideration of applications to educational and other applied settings. The course offers an overview of the array of research methods used in developmental psychology; normative trends in physical, social-emotional, and cognitive development; and factors and processes that affect developmental change and optimize child development. Key questions in the field of developmental psychology, such as "How do nature and nurture together shape development?" and "How do children become so different from one another?" will recur across topics to help students establish a coherent understanding of child development.

**Credits:** 3

**Room and Schedule:** Mcguinn Hall 121 TuTh 09:00AM-10:15AM

**Satisfies Core Requirement:** Social Science,Cultural Diversity

Family, School, and Society
Stewart, Taylor
Spring 2024
This is one of two foundational courses (APSY1030-APSY1031) that introduce students to the multiple dimensions of child development, and the place of education in promoting healthy development for all children. This course considers the social and cultural contexts that shape developmental and educational processes. Focuses on understanding the nature of contemporary social problems including racism, sexism, ethnic prejudice, poverty, and violence, as they affect children, families, and schooling. Emphasizes the special role of education in linking community resources for an integrated approach to serving children and families.

APSY103102
Family, School, and Society
MacEvoy, Julie P
Spring 2024
This is one of two foundational courses (APSY1030-APSY1031) that introduce students to the multiple dimensions of child development, and the place of education in promoting healthy development for all children. This course considers the social and cultural contexts that shape developmental and educational processes. Focuses on understanding the nature of contemporary social problems including racism, sexism, ethnic prejudice, poverty, and violence, as they affect children, families, and schooling. Emphasizes the special role of education in linking community resources for an integrated approach to serving children and families.

APSY203201  
Cognition and Learning  
Vasilyeva, Marina  
Spring 2024
This course will introduce students to what the fields of cognitive, developmental, and educational psychology have to say about how humans learn. This includes comparing and contrasting major theoretical approaches to the study of learning, examining the basic cognitive processes involved in learning (e.g., attention, memory, inhibitory control, problem-solving), and considering how social and biological factors affect these processes. The knowledge gained in this course can be used to maximize individual growth and achievement across a variety of real-life contexts. For instance, it can inform the design of classroom instructional practices, professional training seminars, parenting interventions, community programs, and health initiatives.

**APSY204101**  
**Adolescent Development**  
**Volk, Katherine T**  
**Spring 2024**  
This course introduces the breadth of opportunities and challenges of human development across the adolescent years. It discusses biological, social, psychological, and cognitive changes that occur during adolescence; the role of autonomy, belonging, and motivation in adolescent development; how peers, adults, and technology influence adolescent development; and how adolescents race/ethnicity, gender, sexuality, and academic identities influence their development. Consideration will be given to variability in adolescent development across cultures and contexts, and to the impact of rapid cultural change on youth.

APSY215201
Applied Psychology Practicum: Pathways to Purposeful Work and Life
Liang, Belle
Spring 2024
Preference will be given to APSY majors who are Juniors and Seniors and have completed at least 12 APSY credit hours prior to the semester of Applied Psychology Practicum (APSY2152) enrollment. Sophomores and students who are minoring in Applied Psychology interested in taking the class may join with permission from the LSOEHD Undergraduate Associate Deans Office, if space is available. Lynch Undergraduate Associate Dean's office approval required.
Provides an introduction to the applications of psychological theory within various human and community service contexts. Readings and discussion contribute to critical analyses of how social issues and social problems are situated differently due to gender, race, social class and diversities of language, ability, sexuality, etc. Students volunteer for 8-12 hours per week at a site selected with the assistance of the Field Placement office, meet in a weekly seminar, keep a journal of their field experience, and complete reading and written assignments that integrate theory and practice. Early registration is strongly encouraged to ensure support finding a practicum placement. Students who do not secure a placement by the university add/drop date cannot continue in the course. Students should begin the process of determining a practicum placement by completing the Practicum Placement form HERE (scroll down to the Getting Started section).

APSY224301
Social Oppression and Transformation
McIntyre, Alice E
Spring 2024
Replacing APSY6348 Culture, Community, and Change This course engages the topic of social oppression and transformation from social and psychological perspectives. Using research, scholarship, and creative work from psychology, education, sociology, history, and popular culture, students will explore institutional, ideological, interpersonal, and individual aspects of oppression across four social locations—social class, gender, race, and sexual orientation. For each location, students will start with their own stories of privilege and oppression; move to an empathic engagement with the stories of others; broaden to understand the way that structural dynamics shape those stories; and finally, dive into specific social issues, including family poverty, violence against women, mass incarceration, and LGBTQ homelessness. Throughout the course, students will have the opportunity to study and reflect on change and transformation, including ways in which to incorporate learning from this course into personal and professional lives.

APSY229501
Spirituality, Religion, and College Student Experience
James, Michael J
Spring 2024
Faith, religion, and spirituality have become topics of increasing interest for scholars and practitioners in higher education and student personnel development. This semester-long, upper-level, undergraduate course explores the historic, developmental, sociological, and philosophical dimensions of the college student experience at the intersection of faith life, spirituality, and academic culture. This course approaches themes and readings from an ecumenical and interreligious set of perspectives. Students will engage several major texts as well as articles from scholarly journals and narratives from institutional models that attempt to integrate faith life and spirituality into the prevailing academic and student development culture.

**Motivation, Emotion, and Self-Regulated Learning**

**Miele, David B**

**Spring 2024**
Self-regulated learning is a process that involves setting learning and academic goals, monitoring your progress toward these goals, and making adjustments when you realize that you are not on track to be successful. The course will primarily focus on the ways that motivation and emotion contribute to this process. For example, students will examine the motivations that lead individuals to adopt particular achievement goals (e.g., the goal of getting a good grade), the ways in which these goals impact learners behaviors, and the impact of these behaviors on important outcomes (e.g., grades and well-being). Students in the course will also examine different types of emotions (e.g., curiosity, boredom, frustration, etc.) that learners experience when pursuing their academic goals and the ways in which these emotions can support or hinder their achievement of these goals. In addition to examining motivation and emotion as factors shape learners' achievement and self-regulation, the course will explore some of the ways in which motivation and emotion can themselves be regulated. For example, students will learn about the kinds of strategies that individuals use to bolster their motivation when they feel like quitting or to calm themselves down when they are feeling anxious. Although the course will explore some of the ways that motivation, emotion, and self-regulation develop, its main focus will be on how adolescents and young adults pursue their learning goals.

Psychology of Gender
Mahalik, James R
Spring 2024
This course examines biological, social, and psychological factors that interact in contributing to men's and women's gender roles. Within the social domain, particular attention will be given to how culture affects the social construction of gender, and how factors such as racism and homophobia interact with societally prescribed norms for men and women. The second half of the class will focus on the effects of gender roles on mental and physical health, social problems like aggression, and issues in education, work, and relationships including family life.

**Health Psychology**  
**Keum, Tae Hyuk**  
**Spring 2024**  
Health psychology is the study of how psychology and health interact and influence: health promotion and health risk behaviors, the treatment individuals receive for medical problems, how people cope with stress and pain, and how people behave when they are ill. This course will review these issues across the life course, with special attention to approaches which influence health promoting behaviors and the treatment of illnesses.

**APSY421101**  
**Psychology of Work**
Blustein, David L  
Spring 2024  
Work is one of the central roles in life, encompassing much of our time, energy, and effort. Applied psychology has a deep foundation in the psychology of work, which represents a key context for people to interact socially and economically with their communities. In this course, students will learn how psychology can be used to enhance knowledge of the role of work in career development, organizational life in the private and public sectors, and within broader social and political contexts. Students will also explore the impact of the future of work on individuals and communities, and the ways in which the psychology of work can inform meaning, purpose, and social justice.

Senior Thesis I
Whitcavitch-Devoy, Julia
Spring 2024
Registration for this course requires advance approval and the submission of additional paperwork. Students, with the approval of the program coordinator and department chair, may write a thesis during the senior year. In most cases, the thesis involves empirical research, although other scholarly forms may be permitted. Students must meet with a prospective thesis advisor during the junior year to develop a thesis proposal.

Prevention and Intervention Strategies for Children, Families, and Communities
Dearing, Eric, PHD
Spring 2024
This course is designed to provide an overview of key issues that arise in the development, implementation, evaluation, and scaling of prevention and intervention programs that intersect with the field of psychology. Key issues include the challenges and opportunities of research-practice partnerships, the critical role of theories of change, diverse perspectives on evidence, and unintended consequences of good intentions. A variety of exemplar prevention and intervention programs are used to illustrate and analyze these key issues using theoretical, conceptual, and empirical works from psychological science.

Introductory Statistics
Brown, Nathaniel
Spring 2024
This course provides an introduction to quantitative research, descriptive statistics, inferential statistics, and null hypothesis significance testing in the context of z tests for proportions, t tests for means, and simple linear regression. In each area, students learn how to apply statistical procedures, interpret concepts and results, effectively display data and models, and critically evaluate evidence and implications. Software instruction is provided for IBM SPSS Statistics, R, Stata, and G*Power.

**Translating the Science of Learning into Practice**  
**Laski, Elida V**  
**Spring 2024**  
The science of learning has a tremendous potential for enhancing educational outcomes and job performance. Yet findings obtained in laboratory settings are not easily replicated, expanded, and integrated into applied settings. This course will consider key issues to consider in translating learning science into practice across diverse contexts. Students will consider examples of how findings from the science of learning have been applied either successfully or unsuccessfully to practice in fields such as education, counseling, design, and business.

Health professionals work with many clients where biological and neurological factors play a role in influencing or exacerbating psychological problems. This course will touch on a variety of topics in psychology from a biological perspective that will be helpful in clinical practice. Areas to be covered include the basic structure and function of neurons, basic neuroanatomy, cognitive functions, substance abuse, addictions, and psychopharmacology. Discussion of these topics will be approached from a biopsychosocial approach. Students are encouraged to ask questions throughout the lecture to both clarify material and to work toward application of the material to clinical work.

The purpose of this yearlong course is to introduce counseling students to an integrated behavioral health (IBH) framework that will help facilitate their learning and understanding of this model. Students will learn fundamental principles, clinical skills, and have the opportunity to expand upon their professional identity. Students will: a) learn to examine the multiple settings of IBH, b) learn to develop strong interdisciplinary relationships, c) gain practical knowledge, skills, and techniques needed to engage competently in professional practice working with patients from diverse backgrounds and within different healthcare systems, d) develop insight into ones cultural background and the influence of personal identities and values in their engagement with patients and professionals of the field, e) identify and understand social justice issues that intersect with the realities of patients and the ways they impact patients quality of life and the wellness of communities, f) foster an awareness of the role of ethical considerations, relevant professional development issues, the role of supervision, and self-care of the counselor, and g) prepare for clinical internships available in the second year of the program. Through weekly lab experiences, students will engage in further discussion, practice their skills, and implement their knowledge of IBH.

**Short Term Therapies & Integrated Behavioral Healthcare**

Clotet Vila, Laia

**Spring 2024**
This course is designed to provide in-depth training and skill development in evidence-based theoretical models of brief therapy within an Integrated Behavioral Health framework. Counseling students will develop an understanding of the fundamental principles of brief therapy models, including Solution Focused Brief Therapy; Focused Acceptance and Commitment Therapy; Motivational Interviewing (MI); and Brief Cognitive Behavioral Therapy. Other areas of emphasis will include crisis intervention, posttraumatic stress disorder management in integrated primary care; addressing substance use disorders in primary care; and trauma-informed integrated primary care. Students will also be given the opportunity to translate this understanding into practice of techniques and skills from these brief therapies.

Issues in Counseling Men
Mahalik, James R
Spring 2024
Examines issues related to counseling men by examining the influence of socially constructed roles on men, their families, and broader society. Specifically examines how men's roles impact on their personal development through the life span as well as on men's health, roles as partners and fathers, and how men approach mental health services. Covers issues specific to counseling men from access to services to creating therapeutic environments for men. Uses case analysis of transcripts and videotapes.

**Theories of Counseling and Personality II**  
**Lewis Harris, Treniece**  
**Spring 2024**  
Second part of a year-long sequence examining personality and counseling theories. Continues introduction to major theories of personality in the field of psychology and how those theories are applied in constructing counseling and psychotherapy models. Focuses on psychoanalytic personality and counseling models as well as critical theory as manifested in the psychology of gender and counseling models that integrate gender into working with clients. Specifically, for each model, students will examine the theoretical foundations developed in its theory of personality, relevant client and counselor dimensions, counseling techniques, and the active ingredients of change that each model uses in bringing about change.

APSY746101
Human Rights Interdisciplinary Seminar
Lykes, M B
Spring 2024
The study of human rights defies disciplinary boundaries. This seminar, sponsored by the Center for Human Rights and International Justice, provides a rare space to examine human rights and international justice from interdisciplinary and transnational theoretical perspectives and through praxis. It brings together faculty affiliated with the Center, students from across the university, visiting scholars, and guest speakers to examine complexities and seeming contradictions vis-a-vis human rights and justice. The spring 2024 seminar will begin with an overview and brief historical review of human rights as understood in the West, drawing on both dominant discourses as well as less well-known histories from marginalized communities. We will then explore a series of complexities for those seeking to engage in human rights scholarship, advocacy, and activism. We seek to engage critically with human rights discourse and actions including the advocacy and activism of those on the move within and across borders as well as those seeking redress through transitional justice in the wake of both contemporary and historical gross violations of human rights as they intersect with violence and exploitation due to intersectional circulations of power vis-a-vis gender, culture/ethnicity, race, social class, and other categorizations or identities. We will also explore emergent decolonization practices including specific challenges from diverse communities of the global South who frame human rights and responsibilities within their Indigenous practices and cosmovisions, in ways that contest Northern epistemologies, understandings, and praxis. The Center invites applications from students enrolled in a graduate or professional degree in any of Boston College's divisions. Undergraduate seniors will be considered, space permitting. Registration by permission only. Apply with a 1-2 statement of interest. Priority application deadline November 8; secondary deadline November 22. More info & apply at: www.bc.edu/content/bc-web/centers/chrij/academics/seminar.html

APSY845001
**Multilevel Regression Models**
**O'Dwyer, Laura**
**Spring 2024**
This course introduces students to multilevel regression modeling (aka hierarchical models or mixed effects models) for analyzing data with a nesting or hierarchical structure. We discuss the appropriate uses of multilevel regression modeling, the statistical models that underpin the approach, and how to construct models to address substantive issues. We consider a variety of types of models, including random intercept, and random slope and intercept models; models for longitudinal data; and models for discrete outcomes. We cover various issues related to the design of multilevel studies, model building and the interpretation of the output from HLM and SPSS software programs.

**Credits:** 3

APSY874101
Advanced Seminar in Psychopathology
Flori, Jessica
Spring 2024
A developmental approach to understanding psychological disorders across the life span. The course will examine the emergence of a range of disorders in children, adolescents, and adults (e.g., depression, violent and abusive behavior). Particular attention will be paid to factors that increase risk and resilience. The implications for prevention and intervention strategies will be discussed.

**APSY891501**  
**Critical Perspectives on the Psychology of Race, Class, and Gender**  
**Pieterse, Alex**  
**Spring 2024**  
Using social and critical psychological frameworks, introduces multiple strategies for thinking culturally about select psychological constructs and processes (for example, the self, family and community relations, and socio-political oppression). Also pays particular attention to race and class as sociocultural constructs important for the critical analysis of the relationships of culture and psychology. Explores the implications of these constructs for intercultural collaboration, advocacy, and action.

Quantitative Research Design in Counseling and Developmental Psychology
Dearing, Eric, Ph.D.
Spring 2024
Doctoral students in Counseling and Developmental Psychology. Others by instructor's permission. This is a year-long course, 1 credit in the fall, 2 credits in the spring. In this year-long seminar, students examine quantitative research designs and application employed in the Counseling and Developmental Psychology literatures, including randomized, nonrandomized, cross-sectional, and longitudinal designs. Students present and critique published research exemplifying specific designs, propose empirical studies that could advance counseling and developmental psychology, and present findings from their own empirical work.

APSY984401
Counseling Psychology in Context: Social Action, Consultation, and Collaboration
Goodman, Lisa A
Spring 2024
For doctoral students in Counseling Psychology, and others by permission only. This is a year-long course, 1 credit in the fall, 2 credits in the spring. Accompanying the First Year Experience (FYE) practicum, exposes students to research and practice at the meso- (community, organizations) and macro (government, policy, social norms) levels, in addition to the more traditional micro (individual) level. Students discuss their personal experiences within their FYE placement and read and discuss a series of articles and chapters central to the developing fields of critical psychology, liberation psychology, or counseling with a social justice orientation.

**ELHE721201**

**Equity and Inclusion in U.S. Higher Education Policy**

**Casellas Connors, Ishara**

**Summer 2023**

This course is designed to provide an introduction to a) state and institutional diversity, equity, and inclusion (DEI) policies, and b) the implications of these policies for different sectors of higher education and the advancement of equity. Students will learn how these policies have changed over the past 30 years, who is involved in implementing such policies, and the role of DEI policies in advancing equity. The course is relevant for students and professionals interested in exploring the role of DEI policy.

ELHE721301
International academic collaboration at a time of geopolitical strife
DeLaquil, Tessa C; DeWit, Johannes W
Summer 2023
This course is designed to explore the contemporary socio-political environment in relation to international academic collaboration in higher education, in the context of acute and ongoing crises at national, regional, and global levels, and to deepen understanding of the effects of these forms of geopolitical strife on a key activity of internationalised higher education academic collaboration.

ELHE732301
Strategic Management of Human Capital
McMahon, Molly
Summer 2023
Proceeding from a discussion of various theories of managing people in organizations, this course enhances management skills and the understanding of how different strategies are most effectively employed in the field of education, particularly Catholic education. To create the conditions upon which others can perform their work effectively, both professional staff and volunteers, one must manage their organizational environment. School leaders have a profound impact on their organizations effectiveness by how they manage faculty, staff, board members, volunteers, external relations, processes and projects. Considering schools are organizations that are complex and changing systems, operated by complex and changing people, this course provides students with a set of tools and enhanced skills for diagnosing and responding to the dynamics of human capital management. The course is designed to increase the understanding of how schools acquire, develop, and maintain high-performing employees. The focus will be managerial in nature and is intended to assist the students to become informed consumers and users of organizational practices. The primary methodology to be learned and applied in this course is organizational analysis, drawing on case studies and ones personal experiences and interactions in a work environment.

*Counseling Techniques in Higher Education*  
Walsh-Blair, Lynn Y  
Summer 2023
Provides an introduction to theoretically-based counseling skills for professionals in higher education and other education and community settings. The areas of communications skills involving the use of role-playing, observation, and practice components are emphasized. Postsecondary case studies cover a range of counseling issues and are applicable to a wide range of settings involving late adolescents and adults. *Please be aware if you have consulted with the instructor at University Counseling Services. If so, please contact the instructor or ELHE Department Chair to address any concerns about your confidentiality as a UCS client or your ability to register for this course.

**Summer Institute WES-CIHE**  
**Blanco, Gerardo L**  
**Summer 2023**  
This annual symposium offered by World Education Services (WES) and the Center for International Higher Education (CIHE) offers a space for graduate students in international higher education to share their work and learn from more established mentors in the field. BC students are eligible to receive credit for attending the conference. Those wishing to earn credit for participation will be required to attend the entire event and submit a 1500-2000 word paper on a topic discussed at the conference. The event runs for two full days in person, and the paper will be due by the end of June.

Catholic Higher Ed Administration&Leadership
James, Michael J
Summer 2023
Please see website for more information on the Institute for Administrators in Catholic Higher Education: http://www.bc.edu/schools/lsoe/cce/highered/iache.html. This course explores contemporary issues, organizational and governance structures and distinct characteristics of successful Mission leadership for administrators at Catholic Colleges and Universities focusing on effective campus policy development, strategic planning, and assessment. Students will engage research, historical literature, Church documents, lectures and group exercises. A unique component to this course is participation in the Institute for Administrators in Catholic Higher Education (IACHE) - a four-day seminar for senior administrators and leaders in Catholic higher education where internationally recognized scholars and practitioners address the challenges and opportunities that Catholic higher education faces on a daily basis.

ELHE750501
Transforming the Field of Catholic Education
Giunco, Kierstin M
Summer 2023
This course explores the history, purpose, current status, and possible futures of Catholic elementary and secondary schools. Students will become conversant with the body of scholarly literature, theoretical and empirical, that defines the field of Catholic education. Though the primary focus will be on Catholic schools in the United States, the course will explore how we can learn from the experience of other religiously affiliated schools here and abroad, and from the experience of Catholic educators worldwide. Special attention will be devoted to how the Ignatian spirituality and pedagogy can be a resource for educators in Jesuit and non-Jesuit schools.

**Introduction to Educational Leadership and Change**

**Gough, Bridget A**

**Summer 2023**

Brings a foundational focus to the work of educational administration, centering on the core work of teaching and learning and exploring how that central work is supported by the cultural, technical, political, and ethical systems of the school. That work is deepened as administrators support learning as meaning making, as involving a learning and civil community, and as involving the search for excellence. Students are asked to research the realities at their work sites using the concepts and metaphors developed in the course and, through discussion and the utilization of case studies, to propose improvements to those realities.

ELHE770201
Education Policy and Practice
Anderson, Daniel
Summer 2023
This course provides an overview of educational policy as it plays out in local practice. Throughout the course, students will develop an understanding of foundational approaches to policy making, interpretation, and implementation as it plays out in education settings. In addition to providing an overview to the field of educational policy, the course investigates the relationship between policy and practice through attention to: (1) policymaking including policy mechanisms, framing, and policy actors; (2) processes of policy interpretation and implementation; and (3) policy as practice and the role of local leaders in developing policy. Throughout the course, we will examine how context shapes the relationship between policy and practice by focusing on sociocultural, organizational, and political influences. The course integrates critical perspectives as well as foundational concepts in our study of policy, highlighting how systems of oppression and power dynamics influence the policy process. During the course, students will have opportunities to apply theories and concepts to their own contexts, engaging in policy analysis and creation through hands-on assignments. The course approaches educational policy as incorporating both formal and informal policies, positioning practitioners as interpreters and implementers of local, state, and federal policies, as well as simultaneously designing and creating policies themselves.

Ethics and Equity in Education
Choquette, Beth; Redden, Jonathan V
Summer 2023
The course explores how schools are used as a vehicle of the state to de-culturalize various communities of people throughout the country's history. Students will explore how schools can more appropriately promote respect for valuing diversity as a generative source of the country's vitality and its relationship to the global village. The role of educators is not only to act ethically in the many individual situations of their daily professional lives, but more importantly to see that the institutional structures and processes of the school system are themselves reflections of a system of justice and care.

ELHE770501
Education Policy Analysis
Viveiros, Steven
Summer 2023
This course provides a foundation for engaging in analysis of educational policy by developing students' knowledge of and experience with tools, data sources, and frameworks that form the toolkit of policy analysts. The course engages with major theories and concepts that guide public policy analysis and provides opportunity to produce novel policy analysis and critique the framing, clarity, and concreteness of published policy analyses and proposed policy tools and solutions. Students will engage with current discourse and considerations in education policy throughout the course, with a particular focus on analyzing policy for equity. By the conclusion of the course, students will be able to engage in public policy analysis and communicate policy issues and analysis that draws on their professional expertise.

**ELHE770701**  
**Leadership for Social Justice**  
**Taylor, Kris A**  
**Summer 2023**  
This course introduces students to the theory and practice of leadership for social justice at the school and district level. Definitions, approaches, and controversies in this emerging field will be examined. Readings, films, class discussions, and case studies related to the topics of race, ethnicity, culture, language, gender, social class, religion, sexual orientation, and disability will focus on how these issues affect educators, students and their families in today's K-12 schools. In particular, students will learn about leadership which is culturally and linguistically responsive; strengthens parent-community-school relationships; and formulates diversity policies to promote educational equity for students from diverse groups.

ELHE770801
Instructional Leadership
Pedersen, Joelle M
Summer 2023
Instructional Leadership. Introduces students to many of the contested issues in the field of supervision, such as the relationship between supervision and teacher development, teacher empowerment, teacher alienation, learning theories, school effectiveness, school restructuring, curriculum development, and scientific management. Supervision will be viewed also as a moral, community-nested, artistic, motivating, and collaborative activity. Will stress the need for a restructuring of supervision as an institutional process.

ELHE771101
Using Data and Evidence for School Improvement
Graves, Kenneth E
Summer 2023
This course prepares policy-, district-, and school-level leaders to manage initiatives involving continuous improvement and data-informed inquiry. These activities include: engaging with policy or program evaluations, leading faculty in data-informed cycles of inquiry, and evaluating commonplace data practices for issues of equity and social justice. By the end of this course, students should be able to develop a plan for data-informed improvement in a school or other organization. Access to a school or other organization is encouraged, but not required.

ELHE772601  
Organizational Theory  
Driscoll, William  
Summer 2023  
Rather than focusing on traits of the individual leader, this course focuses on the dimensions of organizations and teams that both facilitate and complicate leadership. Examples include managing conflict, developing a shared vision, and differentiating between technical and adaptive change. Students will apply various organizational theories in order to understand group- and system-level patterns in how groups get things done (e.g., structures and resources, symbols and values, power and politics). Ultimately, students leave the course better able to plan and evaluate school improvement through the lenses of organizational theory.

Reflection on Leadership Seminar Information
Brunelle, Maryellen
Summer 2023
The primary purpose of the Reflection on Leadership Seminar is for students to synthesize their learning across their course of studies and prepare to apply this as they continue on their career and vocational journey. The course will be conducted in a seminar format, with students sharing in the leadership of the course discussions and activities. Students will: describe how they have experienced the signature pedagogies across their program of study; provide clear evidence of their level of mastery of the key behaviors for educational leadership; articulate how they envision continuing to grow and innovate as a research-informed practitioner. This course also fulfills the requirements for the Master's Comprehensive exam ELHE8100

The Professional School Administrator Program (PSAP) provides an opportunity for full-time administrators to obtain their superintendent licensure and a Doctor of Education in educational leadership. The program was developed by Boston College more than three decades ago to provide an opportunity for full-time school administrators to pursue doctoral study. The Lynch School of Education at Boston College partners with the Massachusetts Association of School Superintendents (MASS) and Teachers21 to prepare future superintendents and school leaders for public, Catholic, charter, and independent schools. Boston College's Ed.D. program is an active member of the Carnegie Project on the Education Doctorate, a national effort by 55 institutions to reform and strengthen the education doctorate. The program is grounded in the core values of the Lynch School, with coursework focusing on leadership for social justice, school reform, community building, and leadership for learning. Through a cohort model that emphasizes collaborative learning and support, PSAP aims to create a powerful network of district-level leaders throughout the Commonwealth of Massachusetts and beyond.

Global Perspectives on Higher Education Economics and Finance
de Gayardon de Fenoyl, Ariane
Summer 2023
This course—which is delivered fully online, but does require some synchronous participation--aims to provide students with an understanding of the complexities of higher education financing, through a comparative and international perspective. The course analyses the rising cost of higher education and how this has led to different financing schemes in different national contexts. Students will learn about the different issues directly from experts and case studies, and get to reflect on their own experience at the national and institutional levels.

Educational Leadership and Higher Education Courses: Fall 2023

ELHE337601
Ed Leadership/Higher Ed
Hogan, Deborah V
Fall 2023
This course will be designed to provide undergraduate students with an overview of numerous leadership concepts and theories in order to impart an understanding of how leadership is expressed within organizational contexts, specifically higher educational settings. Furthermore, students will also develop an in-depth understanding of their own personal leadership aptitudes and preferences, providing them with the knowledge and tools to further their leadership abilities as they pursue their careers within specific educational and community settings.

ELHE683001
Interpretation and Evaluation of Research
Littenberg-Tobias, Joshua S
Fall 2023
This course will improve a students' understanding of the empirical research literature in education and psychology. It concentrates on developing the conceptual foundations of empirical research and the practical analytic skills needed by a competent reader and user of research articles. Topics address purpose statements, hypotheses, sampling techniques, sample sizes and power, instrument development, internal and external validity, and typical quantitative research designs. Exercises emphasize the critical evaluation of published research. Each student will develop a research proposal.

Higher Education in American Society
James, Michael J
Fall 2023
An introduction to higher education in America, this course focuses on the complex relationships between colleges and universities, and the political and social systems of society. This analysis includes a historical perspective on the evolution of American higher education, and especially the development of the contemporary university since the beginning of the twentieth century. Attention is also paid to the impact of federal and state governments on higher education; the role of research in the university; issues of accountability, autonomy, and academic freedom; the academic profession, student politics and culture; affirmative action issues; and others.

Email elhe@bc.edu or department permission from the ELHE department. This course addresses the political and legal aspects of the role of education in our democratic society. Provides an introductory survey of public policy issues and laws governing preschool, elementary, secondary, and higher education. Included are such topics as religious freedom, free speech, and due process; the liability of educational institutions and educators; the legal distinctions between private and public institutions; student and parent privacy rights; disability rights; and the promotion of educational equity among all groups regardless of gender, sexual orientation, language, race, religion, ethnicity, or socioeconomic background.

ELHE720201
Global and Comparative Systems in Higher Education
Schendel, Rebecca
Fall 2023
Higher education the world over is an increasingly complex enterprise, undergoing significant change in many areas. This course seeks to familiarize students with key contemporary trends and developments affecting higher education systems across the globe. Students are also introduced to the use of "comparison" in higher education research. The course can be completed fully online or in a hybrid format.

**Academic Writing for Education Leaders**

**Creps, Ryan**

**Fall 2023**

This course is designed to support ELHE Masters students in meeting the demands of written assignments included as part of their program of study. These written assignments may take a variety of forms, such as an observation write-up, an equity audit, a literature review, or an improvement plan, depending on the course. The pacing of the course is designed to align with the timeline and writing process in a typical Masters-level class. The course will focus on honing skills for analytic writing, including developing a line of inquiry; finding, evaluating, and synthesizing research; crafting a compelling argument; and enhancing clarity of writing. This course will include both synchronous and asynchronous components. Live Zoom sessions will be run workshop-style, with opportunities for students to get feedback from peers and from me on their writing.

ELHE730401
School Finance and Business Administration
Wyttenbach, Melodie
Fall 2023
The financial and business operations of a school are instrumental to the success of students. Often under examined, core concepts in school finance and business management are nuanced, technical, and at times contentious. This class will prepare educational leaders to engage in discourse regarding the key issues in school finance and business management, through the lenses of educational adequacy, equity, efficiency, and liberty. The overarching goal is for educational leaders to be able to debate, craft, and implement school finance and business management policies with an informed understanding of the anticipated implications as well as alternative options. There are tremendous challenges to the conversion of conceptual and theoretical concepts into concrete, actionable financial and business policies for schools. A particular emphasis will be placed on examining these concepts and policies in Catholic schools and opportunities for strengthening the operational vitality of this sector. We will examine these challenges and the proposed solutions, underscoring the strengths and weaknesses of each approach.

**Student Affairs Administration**  
**DeVeau, Laura**  
**Fall 2023**
Student affairs professionals in post-secondary institutions contribute to student learning and personal development through a variety of programs and services. This course focuses on the design of campus environments that promote student development and contribute to the academic mission of higher education. Special attention will be given to the history, philosophy, and ethical standards of the student affairs profession, and to the relation of theory to contemporary student affairs practice. In addition, the course will examine how changing forces in the demographic, social, legal, and technological environment of higher education affect fundamental issues in professional practice.

Special Topics in Higher Education: Contemporary Issues in Higher Education - Strategic Planning
DeVeau, Laura
Fall 2023
This course will equip students with the knowledge and skills needed to lead an organization in planning for a constantly changing internal and external environment with a specific lens on the higher education landscape. Through analysis of institutional contexts, organizations, and plans, students will gain knowledge about institutional strategy, why and how institutions plan, and what distinguishes effective plans. Through in-class lectures, guest expert interviews, readings, assignments and other experiential activities, students will engage actively in applying learning to current issues within higher education.

**Introduction to Educational Leadership and Change**
**Gough, Bridget A**
**Fall 2023**
Brings a foundational focus to the work of educational administration, centering on the core work of teaching and learning and exploring how that central work is supported by the cultural, technical, political, and ethical systems of the school. That work is deepened as administrators support learning as meaning making, as involving a learning and civil community, and as involving the search for excellence. Students are asked to research the realities at their work sites using the concepts and metaphors developed in the course and, through discussion and the utilization of case studies, to propose improvements to those realities.

ELHE770201
Education Policy and Practice
Anderson, Daniel
Fall 2023
This course provides an overview of educational policy as it plays out in local practice. Throughout the course, students will develop an understanding of foundational approaches to policy making, interpretation, and implementation as it plays out in education settings. In addition to providing an overview to the field of educational policy, the course investigates the relationship between policy and practice through attention to: (1) policymaking including policy mechanisms, framing, and policy actors; (2) processes of policy interpretation and implementation; and (3) policy as practice and the role of local leaders in developing policy. Throughout the course, we will examine how context shapes the relationship between policy and practice by focusing on sociocultural, organizational, and political influences. The course integrates critical perspectives as well as foundational concepts in our study of policy, highlighting how systems of oppression and power dynamics influence the policy process. During the course, students will have opportunities to apply theories and concepts to their own contexts, engaging in policy analysis and creation through hands-on assignments. The course approaches educational policy as incorporating both formal and informal policies, positioning practitioners as interpreters and implementers of local, state, and federal policies, as well as simultaneously designing and creating policies themselves.

ELHE770401
Ethics and Equity in Education
Choquette, Beth; Redden, Jonathan V
Fall 2023
The course explores how schools are used as a vehicle of the state to de-culturalize various communities of people throughout the country's history. Students will explore how schools can more appropriately promote respect for valuing diversity as a generative source of the country's vitality and its relationship to the global village. The role of educators is not only to act ethically in the many individual situations of their daily professional lives, but more importantly to see that the institutional structures and processes of the school system are themselves reflections of a system of justice and care.

Education Policy Analysis
Doss, Christopher J
Fall 2023
This course provides a foundation for engaging in analysis of educational policy by developing students' knowledge of and experience with tools, data sources, and frameworks that form the toolkit of policy analysts. The course engages with major theories and concepts that guide public policy analysis and provides opportunity to produce novel policy analysis and critique the framing, clarity, and concreteness of published policy analyses and proposed policy tools and solutions. Students will engage with current discourse and considerations in education policy throughout the course, with a particular focus on analyzing policy for equity. By the conclusion of the course, students will be able to engage in public policy analysis and communicate policy issues and analysis that draws on their professional expertise.

ELHE770701
Leadership for Social Justice
Johnson, Lauri D
Fall 2023
This course introduces students to the theory and practice of leadership for social justice at the school and district level. Definitions, approaches, and controversies in this emerging field will be examined. Readings, films, class discussions, and case studies related to the topics of race, ethnicity, culture, language, gender, social class, religion, sexual orientation, and disability will focus on how these issues affect educators, students and their families in today's K-12 schools. In particular, students will learn about leadership which is culturally and linguistically responsive; strengthens parent-community-school relationships; and formulates diversity policies to promote educational equity for students from diverse groups.

Using Data and Evidence for School Improvement
Graves, Kenneth E
Fall 2023
This course prepares policy-, district-, and school-level leaders to manage initiatives involving continuous improvement and data-informed inquiry. These activities include: engaging with policy or program evaluations, leading faculty in data-informed cycles of inquiry, and evaluating commonplace data practices for issues of equity and social justice. By the end of this course, students should be able to develop a plan for data-informed improvement in a school or other organization. Access to a school or other organization is encouraged, but not required.

Organizational Theory
Cho, Vincent
Fall 2023
Rather than focusing on traits of the individual leader, this course focuses on the dimensions of organizations and teams that both facilitate and complicate leadership. Examples include managing conflict, developing a shared vision, and differentiating between technical and adaptive change. Students will apply various organizational theories in order to understand group- and system-level patterns in how groups get things done (e.g., structures and resources, symbols and values, power and politics). Ultimately, students leave the course better able to plan and evaluate school improvement through the lenses of organizational theory.

ELHE776201
PSAP Cohort
Dept, Dept
Fall 2023

The Professional School Administrator Program (PSAP) provides an opportunity for full-time administrators to obtain their superintendent licensure and a Doctor of Education in educational leadership. The program was developed by Boston College more than three decades ago to provide an opportunity for full-time school administrators to pursue doctoral study. The Lynch School of Education at Boston College partners with the Massachusetts Association of School Superintendents (MASS) and Teachers21 to prepare future superintendents and school leaders for public, Catholic, charter, and independent schools. Boston College's Ed.D. program is an active member of the Carnegie Project on the Education Doctorate, a national effort by 55 institutions to reform and strengthen the education doctorate. The program is grounded in the core values of the Lynch School, with coursework focusing on leadership for social justice, school reform, community building, and leadership for learning. Through a cohort model that emphasizes collaborative learning and support, PSAP aims to create a powerful network of district-level leaders throughout the Commonwealth of Massachusetts and beyond.

**ELHE820401**  
**Data Literacy**  
**Castro Samayoa, Andres**  
**Fall 2023**  
This course introduces students to data management and evaluation and assessment. Students are introduced to federal, state, and institutional datasets to understand how higher education policymakers use data to inform decision-making. The course teaches students to consider the ethical and political implications of how data are produced and used to inform policy-making. Additionally, students will come to better understand how data practices within their own institution relate to broader administrative data systems.

This course is designed to build on the learning outcomes from the Data Literacy and Data-Driven Decision Making as students complete their Executive Doctoral Dossier (EDD) projects in their third year of the program. In this two-semester seminar, students integrate knowledge and skills in alignment with the programs learning outcomes and commitment to whole-person executive formation. The seminar challenges students to develop skills as practitioner-scholars in addressing a complex problem of practice in higher education as they complete their projects. The Executive Ed.D. in Higher Education is designed with a curriculum designed to develop academic leaders capable of navigating an era of rapid change in higher education. This emphasis influences the nature of the program’s culminating product—the Executive Doctoral Dossier (EDD) which is designed to be valuable for executive-level leaders and the organizations they serve now and in the future. The dossier aligns with the principles of the Carnegie Project on the Education Doctorate (CPED) as a scholarly project that demonstrates a synthesis of the students abilities, lays the groundwork for future practice scholarship, and demonstrates mastery of ability to frame and critically inquire into a significant educational problem of practice. It also aligns with BCs commitment to whole-person education that invites the whole person and involves our whole community to see leading and learning as two sides of the same transformative coin. In the Executive Doctoral Dossier project, students address a real-world problem of practice (PoP). They focus on significant, high-leverage questions centered on real-world issues, leadership challenges, and complex problems faced by leaders and organizations. They integrate academic (e.g., empirical research, data, and frameworks) and practice-based (e.g., policy reports, etc.) and use multiple data sources in an applied data-driven project. The project emphasizes research-based, data-informed insights and their implications for higher education institutions, policies, and practices. It is designed to advance professional knowledge and increase their impact as an executive-level leader in an era of rapid change. It invites doctoral students into communities to serve with and for others to use their talents to address critical issues in higher education.

The Executive Ed.D. program at BC offers a doctoral journey that focuses on developing multi-dimensional, integrated, and authentic leaders. This course is designed to be a transformative experience for participants, inviting them to explore four dimensions of their lives: wellness, voice, management, and mission with the goal of enhancing their executive leadership skills. Through a community-oriented approach, participants will have the opportunity to learn from one another and develop a lifelong commitment to leadership development. Our goal is to help you grow as a person and to thrive as a leader. Decades of scientific research prove that personal growth has a significant impact on leadership and professional success. In keeping with the Jesuit tradition, this course poses questions, creates spaces, and encourages practices where students and their cohort uncover, analyze, and strengthen the qualities that enable individual and collective leadership. Students and their cohort will practice the art of asking questions of themselves and each other as part of an ongoing leadership journey. The holistic approach to leadership development in this course focuses on how cura apostolica (care for the work) is integrally related to the better-known idea of cura personalis (care for the whole person). The course focuses on executive leadership development that involves but goes beyond individuals to encompass the whole community that belongs to each other. The course invites doctoral students into communities to serve with and for others to use their talents to address the world’s greatest needs.

Research Design III
Cho, Vincent; Lowenhaupt, Rebecca J
Fall 2023
This course is for PSAP students only. This course aims to support PSAP students during the data analysis phase of their dissertations in practice. These projects may be qualitative, quantitative, or mixed methods. Accordingly, this course is structured in a seminar or workshop format. Although some time is allowed for data collection, the course assignments are geared toward helping students develop, report, and present research findings.

Doctoral Proseminar in K-16 Administration
Martinez-Aleman, Ana M

Fall 2023
Ph.D. students in Ed Admin or Higher Ed only. This seminar is a required cornerstone course for doctoral Ph.D. students in the Educational Administration Program and the Higher Education Program. In addition to orienting students to doctoral studies and research, the course is designed to develop students' critical analysis of theoretical and empirical literature in their field, and to advance their knowledge of key concepts, issues, and theories in the field. Course activities include bibliographic research and skills development in conducting individual inquiry and analyzing scholarly literature.

Educational Leadership and Higher Education Courses: Spring 2024

ELHE229501
Spirituality, Religion, and College Student Experience
James, Michael J
Spring 2024
Faith, religion, and spirituality have become topics of increasing interest for scholars and practitioners in higher education and student personnel development. This semester-long, upper-level, undergraduate course explores the historic, developmental, sociological, and philosophical dimensions of the college student experience at the intersection of faith life, spirituality, and academic culture. This course approaches themes and readings from an ecumenical and interreligious set of perspectives. Students will engage several major texts as well as articles from scholarly journals and narratives from institutional models that attempt to integrate faith life and spirituality into the prevailing academic and student development culture.

ELHE740201
College Student Experience: Access, Choice, and Persistence
Dalton, Kathryn A  
Spring 2024  
This course explores the ways in which the higher education community has addressed three basic questions: Who goes to college? What sorts of experiences do students have in college? And, as a consequence of their experiences, who do they become by graduation? The course will familiarize students with the nature and characteristics of the college student population in American higher education, the variety of research methods used to study college students, and some of the many effects and outcomes of college student experiences.

Religion and Higher Education
James, Michael J
Spring 2024
Faith, religion, and spirituality have become topics of increasing interest for scholars and practitioners in higher education administration and student personnel development. This course explores the historical, sociological, and cultural dynamics between religion and higher education. Topics include secularism, modernity, and challenges to the integration of faith and intellectual life. Additional topics include: religious pluralism; religion in secular higher education; legal issues surrounding religion and higher education; academic freedom; constitutional matters; modernism, post-modernism, post-secularism and the tensions and opportunities that these cultural/intellectual movements pose for religion and higher learning in a modern, democratic, pluralistic society.

ELHE760301
Internationalization of Higher Education
Blanco, Gerardo L
Spring 2024
Higher education around the world today is increasingly affected by the forces of internationalization. Professionals working in postsecondary education in the United States and elsewhere must have a clear understanding of the range of opportunities and challenges presented by the evolution of this phenomenon. This course has two main objectives. The first is to introduce students to the central issues relevant to the international dimension of higher education in different national contexts. The second objective is to promote students' understanding of the practical implications of internationalization for their own work in higher education administration and/or policy-making contexts

ELHE760601
Diversity in Higher Education: Race, Class, and Gender
Castro Samayoa, Andres
Spring 2024
The purpose of this course is to provide students with the opportunity to examine the theoretical scholarship and empirical research on race, class, and gender in American higher education. The course readings are interdisciplinary in nature and require students to identify research claims and their relationship to higher education practice and policy in the U.S. We explore such issues as admissions and affirmative action policy, sexual harassment, access, and financial aid practices.

**ELHE770101**  
**Introduction to Educational Leadership and Change**  
**Johnson, Lauri D**  
**Spring 2024**

Brings a foundational focus to the work of educational administration, centering on the core work of teaching and learning and exploring how that central work is supported by the cultural, technical, political, and ethical systems of the school. That work is deepened as administrators support learning as meaning making, as involving a learning and civil community, and as involving the search for excellence. Students are asked to research the realities at their work sites using the concepts and metaphors developed in the course and, through discussion and the utilization of case studies, to propose improvements to those realities.

ELHE770201
Education Policy and Practice
Anderson, Daniel
Spring 2024
This course provides an overview of educational policy as it plays out in local practice. Throughout the course, students will develop an understanding of foundational approaches to policy making, interpretation, and implementation as it plays out in education settings. In addition to providing an overview to the field of educational policy, the course investigates the relationship between policy and practice through attention to: (1) policymaking including policy mechanisms, framing, and policy actors; (2) processes of policy interpretation and implementation; and (3) policy as practice and the role of local leaders in developing policy. Throughout the course, we will examine how context shapes the relationship between policy and practice by focusing on sociocultural, organizational, and political influences. The course integrates critical perspectives as well as foundational concepts in our study of policy, highlighting how systems of oppression and power dynamics influence the policy process. During the course, students will have opportunities to apply theories and concepts to their own contexts, engaging in policy analysis and creation through hands-on assignments. The course approaches educational policy as incorporating both formal and informal policies, positioning practitioners as interpreters and implementers of local, state, and federal policies, as well as simultaneously designing and creating policies themselves.

ELHE770401
Ethics and Equity in Education
Choquette, Beth; Redden, Jonathan V

Spring 2024

The course explores how schools are used as a vehicle of the state to de-culturalize various communities of people throughout the country's history. Students will explore how schools can more appropriately promote respect for valuing diversity as a generative source of the country's vitality and its relationship to the global village. The role of educators is not only to act ethically in the many individual situations of their daily professional lives, but more importantly to see that the institutional structures and processes of the school system are themselves reflections of a system of justice and care.

Leadership for Social Justice

Edwards, Earl J

Spring 2024

This course introduces students to the theory and practice of leadership for social justice at the school and district level. Definitions, approaches, and controversies in this emerging field will be examined. Readings, films, class discussions, and case studies related to the topics of race, ethnicity, culture, language, gender, social class, religion, sexual orientation, and disability will focus on how these issues affect educators, students and their families in today's K-12 schools. In particular, students will learn about leadership which is culturally and linguistically responsive; strengthens parent-community-school relationships; and formulates diversity policies to promote educational equity for students from diverse groups.

ELHE770801
Instructional Leadership
McEwen, Lori B
Spring 2024
Instructional Leadership. Introduces students to many of the contested issues in the field of supervision, such as the relationship between supervision and teacher development, teacher empowerment, teacher alienation, learning theories, school effectiveness, school restructuring, curriculum development, and scientific management. Supervision will be viewed also as a moral, community-nested, artistic, motivating, and collaborative activity. Will stress the need for a restructuring of supervision as an institutional process.

ELHE771101
Using Data and Evidence for School Improvement
Taylor, Kris A
Spring 2024
This course prepares policy-, district-, and school-level leaders to manage initiatives involving continuous improvement and data-informed inquiry. These activities include: engaging with policy or program evaluations, leading faculty in data-informed cycles of inquiry, and evaluating commonplace data practices for issues of equity and social justice. By the end of this course, students should be able to develop a plan for data-informed improvement in a school or other organization. Access to a school or other organization is encouraged, but not required.

ELHE772601
Organizational Theory
Driscoll, William
Spring 2024
Rather than focusing on traits of the individual leader, this course focuses on the dimensions of organizations and teams that both facilitate and complicate leadership. Examples include managing conflict, developing a shared vision, and differentiating between technical and adaptive change. Students will apply various organizational theories in order to understand group- and system-level patterns in how groups get things done (e.g., structures and resources, symbols and values, power and politics). Ultimately, students leave the course better able to plan and evaluate school improvement through the lenses of organizational theory.

Credits: 3
Room and Schedule: Online Synchronous; Tu 07:00PM-08:00PM
Satisfies Core Requirement: None
Prerequisites: E-mail department for permission if course is closed.

ELHE772701
Family and Community Engagement
Wyttenbach, Melodie
Spring 2024
This course will explore the theory and practice of family-school-community relationships with a particular focus on the role of school leaders in enacting organizational models, educational programs, and political strategies designed to increase authentic parent and community participation in schools and other educational organizations. Topics include community schools/full service schools, parent involvement models, increasing the involvement of diverse families, grassroots organizing for community development, after school/OST (Out of School Time) programs, and school board-community relations.

The primary purpose of the Reflection on Leadership Seminar is for students to synthesize their learning across their course of studies and prepare to apply this as they continue on their career and vocational journey. The course will be conducted in a seminar format, with students sharing in the leadership of the course discussions and activities. Students will: describe how they have experienced the signature pedagogies across their program of study; provide clear evidence of their level of mastery of the key behaviors for educational leadership; articulate how they envision continuing to grow and innovate as a research-informed practitioner. This course also fulfills the requirements for the Master's Comprehensive exam ELHE8100.

ELHE776001
Seminar on Education Reform
Scanlan, Martin K
Spring 2024
This course is for PSAP students only. This interdisciplinary seminar addresses the role of law in education reform and the relationship between law and social science in efforts to promote educational attainment in the nation's elementary and secondary schools. The primary focus will be contemporary education reform issues, including educator quality, access to meaningful opportunity to learn, curriculum control, and student, teacher, administrator, and parental rights. The focus of the course will be inquiry on the role of law in school reform, the limits of law-based education reform, and the consequences of statutory requirements for scientific evidence-based approaches to education programs.

Credits: 3
Room and Schedule: Fulton Hall 453 FSa 08:30AM-04:00PM; Meeting Dates: 1/19 & 1/20, 2/9 & 2/10, 3/1 & 3/2, 3/22 & 3/23, 4/26 & 4/27, 5/3 & 5/4

ELHE776201
PSAP Cohort
Cho, Vincent
Spring 2024
The Professional School Administrator Program (PSAP) provides an opportunity for full-time administrators to obtain their superintendent licensure and a Doctor of Education in educational leadership. The program was developed by Boston College more than three decades ago to provide an opportunity for full-time school administrators to pursue doctoral study. The Lynch School of Education at Boston College partners with the Massachusetts Association of School Superintendents (MASS) and Teachers21 to prepare future superintendents and school leaders for public, Catholic, charter, and independent schools. Boston College's Ed.D. program is an active member of the Carnegie Project on the Education Doctorate, a national effort by 55 institutions to reform and strengthen the education doctorate. The program is grounded in the core values of the Lynch School, with coursework focusing on leadership for social justice, school reform, community building, and leadership for learning. Through a cohort model that emphasizes collaborative learning and support, PSAP aims to create a powerful network of district-level leaders throughout the Commonwealth of Massachusetts and beyond.

Global Perspectives on Academic Affairs in Higher Education
Schendel, Rebecca
Spring 2024
This course provides a comparative analysis of the academic functions of universities. There is a special emphasis on the study of teaching and learning in postsecondary settings, but other equally important aspects of the academic experience will be covered. These include curriculum design, curricular policies, the design and monitoring of student learning outcomes, online delivery, academic advising and student success, academic career pathways, and good practices for faculty development. The course content is covered from a global perspective with special attention to Global South contexts. In addition to providing a comparative view of these issues, critical perspectives that center social justice and inclusion are central to this course, which can be completed fully online or in a hybrid format.

**Advanced Field Experience in Higher Education**  
**James, Michael J**  
**Spring 2024**  
Restricted to M.A. students in the Higher Education program. As a continuation of Field Experience in Higher Education, this course is a guided practicum for students enrolled in higher education programs. The advanced field experience requires supervised field work (graduate assistantship or internship) in a higher education institution or agency and participation in a six-week internship seminar. Advanced field work is overseen by program faculty and supervised by a professional administrator at the graduate assistantship or internship site. The Advanced Field Work in Higher Education seminar requires demonstrated knowledge of the Higher Education program core competencies as they are practiced in a particular area of administrative expertise and demonstrated knowledge of professional skills development related to theory and research in higher education.

Practicum in School Principalship
Libano, Jose A
Spring 2024
A 500-hour, field-based experience designed to enable the student to develop the competencies required to be an effective assistant principal/principal. The practicum is supervised jointly by a University representative and a cooperating practitioner. The student is expected to engage in a variety of experiences defined in the state standards for certification and to provide leadership to a major administrative project. The student will maintain a reflective journal of experiences and develop a portfolio that demonstrates the learning and insights gained during the practicum.

Executive Doctoral Seminar II
Glass, Christopher R; Rowan-Kenyon, Heather T
Spring 2024

This course is designed to build on the learning outcomes from the Data Literacy and Data-Driven Decision Making as students complete their Executive Doctoral Dossier (EDD) projects in their third year of the program. In this two-semester seminar, students integrate knowledge and skills in alignment with the programs learning outcomes and commitment to whole-person executive formation. The seminar challenges students to develop skills as practitioner-scholars in addressing a complex problem of practice in higher education as they complete their projects. The Executive Ed.D. in Higher Education is designed with a curriculum designed to develop academic leaders capable of navigating an era of rapid change in higher education. This emphasis influences the nature of the program’s culminating product the Executive Doctoral Dossier (EDD) which is designed to be valuable for executive-level leaders and the organizations they serve now and in the future. The dossier aligns with the principles of the Carnegie Project on the Education Doctorate (CPED) as a scholarly project that demonstrates a synthesis of the students abilities, lays the groundwork for future practice scholarship, and demonstrates mastery of ability to frame and critically inquire into a significant educational problem of practice. It also aligns with BC's commitment to whole-person education that invites the whole person and involves our whole community to see leading and learning as two sides of the same transformative coin. In the Executive Doctoral Dossier project, students address a real-world problem of practice (PoP). They focus on significant, high-leverage questions centered on real-world issues, leadership challenges, and complex problems faced by leaders and organizations. They integrate academic (e.g., empirical research, data, and frameworks) and practice-based (e.g., policy reports, etc.) and use multiple data sources in an applied data-driven project. The project emphasizes research-based, data-informed insights and their implications for higher education institutions, policies, and practices. It is designed to advance professional knowledge and increase their impact as an executive-level leader in an era of rapid change. It invites doctoral students into communities to serve with and for others to use their talents to address critical issues in higher education.

ELHE821301
Transformative Leadership in a Networked World
Celli, Lynne; Dobson, Gretchen C
Spring 2024
The focus of this course is on topics in transformational leadership, examines elements of executive transformational leadership in American and international higher education and explores how transformational leaders facilitate the work necessary to successfully lead and manage change in positive ways. Students will focus on understanding transformational leadership as the process of facilitating leadership and change through reflective, systems-based, and relational leadership. Students will engage in self-analysis, examine and discuss case studies, and assess leadership at the executive level of college and university leadership.

ERAL410101
Cybersecurity: Innovation, Technology, and Formative Development
Whitcavitch-Devoy, Julia
Summer 2023
This course presents key formative development frameworks and examines their application to current innovations and technologies. Cyberstrategic impacts upon individuals, educational and community settings, future of work, and across key industries are considered. Students use examples and case material from health and biotechnology, environmental and energy, information sciences and social media, and human-centric applied psychology approaches to better understand and gain experience applying models; engaging a constellation of varied stakeholders; fostering a culture of continuous formation and discernment within and across incorporeal cyberspaces; overseeing and facilitating best practices and behaviors; and appropriately responding to cyber trends and cyber trajectories.

Experience, Reflection, Action Courses: Fall 2023

ERAL110001
First Year Experience, Reflection, and Action
Whitcavitch-Devoy, Julia
Fall 2023
First Year Experience, Reflection, and Action (ERA) is a full-year program whereby students develop attention to the needs of others, respect for context, and an appreciation for their own individual gifts and insights. Through key content material, speakers, design-thinking workshops, applied action projects, presentations, small group discussions, and community engagement work, the year-long LSEHD ERA program facilitates students growth across developmental domains. The ERA program connects first-year LSEHD students directly to mentors, including faculty, graduate students, other junior and senior undergraduates, and their undergraduate dean. ERAs model ensures information about opportunities at BC, as well as, externally, fairly reaches all students, while also providing a sound underpinning of student formation, robust academics, and the occasion for explorations of future and possible selves.

First Year Experience, Reflection, and Action
Whitcavitch-Devoy, Julia
Fall 2023
First Year Experience, Reflection, and Action (ERA) is a full-year program whereby students develop attention to the needs of others, respect for context, and an appreciation for their own individual gifts and insights. Through key content material, speakers, design-thinking workshops, applied action projects, presentations, small group discussions, and community engagement work, the year-long LSEHD ERA program facilitates students growth across developmental domains. The ERA program connects first-year LSEHD students directly to mentors, including faculty, graduate students, other junior and senior undergraduates, and their undergraduate dean. ERAs model ensures information about opportunities at BC, as well as, externally, fairly reaches all students, while also providing a sound underpinning of student formation, robust academics, and the occasion for explorations of future and possible selves.

What does it mean to be an educated person? At first, we must defer to the answers of others. Over time, we become curious about our formation. What does all of this schooling add up to? How do all of my influences beyond school fit together? We realize that it is time to take responsibility for our own education, to reflect on what it is admirable to become, to locate resources for self-cultivation, and to integrate them into a life worth living. But this is not solitary work. Together we will consider a range of rich, rival conceptions of what it means to be educated. In this way, you will be invited to join one of the oldest and richest dialogues, the educational conversation.

Schooling as we understand it dates to the early nineteenth century, born of and contributing to a period of rapid social change marked by the spread of literacy, the rise of the nation state, and the advent of industrialization. Schooling remains one of the most powerful educational tools ever invented, but how well does it equip us to confront the educational task of today? How will education, in and out of school, need to evolve in light of new technologies and media ecologies, global interconnectedness, health crises, mass migrations, surges of xenophobia, entrenched inequality, climate emergency, and the new "post-truth" political condition?

**Transformative Teaching and Learning**

**Seider, Scott C**

**Fall 2023**

What distinguishes transformative education from status quo teaching and learning? What are the practices by which we effect intellectual, personal, and social transformation? This course investigates transformative education at the level of classrooms, schools, and school systems, considering approaches focused on deeper learning (mastery, identity, and creativity), character development (moral, performance, civic, and intellectual), and social transformation (purpose, vocation, and justice).

FORM225401
Cross-cultural Perspectives on Religion and Education
Bolton, Caitlyn
Fall 2023
This course examines the intersection of religious experience and education in and beyond schools. In the US, education and religion are typically seen as separate spheres, divided by a firewall between the public and the private. In many other global cultures, this separation would seem absurd. Religion is experienced not as a private sphere but as an ever-present framework for living. In this course, we will examine the relationship of religion and education across multiple cultural contexts and religious traditions, asking: what kind of knowledge does religious education impart, and what kind of human/society is it meant to produce in the world? We will consider how religion figures in educational projects of nation building and socio-economic development, frames the education of character, or mobilizes action against injustice. Topics include how West African Islamic education prompted resistance against the Atlantic slave trade, the tensions around Hindu education in British colonial schools in India, and the gendered features of Hasidic Jewish schooling in Brooklyn, among others.

**FORM880001**  
**Colloquium in Formative Education**  
**Higgins, Christopher R**  
**Fall 2023**
Meeting every other week and open to the public, the Colloquium in Formative Education is devoted to interdisciplinary dialogue about formative education, featuring topical readings, visiting speakers, and work in progress from department faculty and students. Ph.D. students in Formative Education register for FORM 8800 each semester for their first three years, completing additional reading, writing, and reflection keyed to each colloquium session.

FORM881001
Philosophy of Formative Education
Arcilla, Rene; Higgins, Christopher R
Fall 2023
Close reading and discussion of philosophical texts that address questions such as: What is the difference between education understood as transmission, as formation, and as transformation? Why does growth require unlearning and what must be unlearned? How do the traditions of spiritual exercise and liberal learning relate to formative education? What expands and contracts our moral horizons? How do our visions of the good inform our identities? What are the conditions of self-knowledge? In what ways do and should learners themselves drive the process of formative education? What roles do dialogue, practice, and tradition play in our formative quests? What are the ethical stakes of formative and transformative education? This is core course in the Ph.D. Program in Formative Education; open to others by permission.

Psychology and the Other
Goodman, David M
Fall 2023
This course is an interdisciplinary offering wherein students consider the shape of human subjectivity, experience, and identity from a variety of disciplinary, historical, clinical, and conceptual positions. Oriented around the conversation taking place at the Psychology and the Other Conference featuring top thinkers in philosophy, theology, and psychology, this course addresses the many discourses, political imports, phenomenological markers, and philosophical heritages that underlie our understanding of and lived range in human experience. Please note: It is mandatory that students registered for this course attend the Psychology and the Other Conference. The conference runs from October 3-6th, 2023 and the proceedings are available following the event for the entire semester via the conference platform.

The Educational Conversation
Saraydarian, Garo William
Spring 2024
What does it mean to be an educated person? At first, we must defer to the answers of others. Over time, we become curious about our formation. What does all of this schooling add up to? How do all of my influences beyond school fit together? We realize that it is time to take responsibility for our own education, to reflect on what it is admirable to become, to locate resources for self-cultivation, and to integrate them into a life worth living. But this is not solitary work. Together we will consider a range of rich, rival conceptions of what it means to be educated. In this way, you will be invited to join one of the oldest and richest dialogues, the educational conversation.

FORM105101
Reimagining School and Society
Murugaiah, Kirubahari
Spring 2024
Schooling as we understand it dates to the early nineteenth century, born of and contributing to a period of rapid social change marked by the spread of literacy, the rise of the nation state, and the advent of industrialization. Schooling remains one of the most powerful educational tools ever invented, but how well does it equip us to confront the educational task of today? How will education, in and out of school, need to evolve in light of new technologies and media ecologies, global interconnectedness, health crises, mass migrations, surges of xenophobia, entrenched inequality, climate emergency, and the new "post-truth" political condition?

FORM225201
Language Learners in Global Perspective
Yatsu, Kei
Spring 2024
This course provides an overview of language learning as a process, language learning in global contexts, and the experiences of second language learners in schools. We will hear from experts at BC and around the world, learning about current trends in and contexts for language learning. There are several central themes that will recur during this course, including: examining theories of learning, with a focus on language learning and language acquisition; the experiences of bilingual learners and bilingual education; language learning and technology in the twenty-first century, including issues of multimodal literacy and digital storytelling; and connections between language learning and identity formation. While interacting with and reading work by experts in the field, we will discuss both local and global settings, exploring how language learning affects heritage language revitalization, bilingualism, indigenous communities, and others. We will discuss how language learning is never a neutral process, but instead happens in social contexts and inevitably shapes identities. We will learn how to facilitate language learning in ways that promote justice, increase empathy, and meet the needs of diverse students. Throughout, we will take a global perspective and consider language learning from multiple points of view.

**FORM225301**

**Preparing the Whole Person for Global Citizenship**

Bolton, Caitlyn

Spring 2024
What forms of civic education are needed in our politically volatile, globally interdependent world? Can civics expand beyond transmission of information and competencies to become transformation of the whole person? What dispositions are needed in civic life? Can the very idea of citizenship expand beyond the nation state to encompass the possibilities and responsibilities of global citizenship? Drawing on the traditions of civic, intercultural, and peace education and on case studies of holistic, internationally minded education from diverse cultural and geo-political contexts we will explore: the dynamics of identity, attachment, and xenophobia; the concepts of nationalism, patriotism, cosmopolitanism, and cultural imperialism; and questions of environmental and economic justice.

**Technologies of Self and Society**

Larrey, Philip M

Spring 2024
When asked, most of us will admit that we are overly-reliant on technology. Our daily activities and interactions are structured by the devices we use. Yet we often ignore the deep psychological, existential, and ethical implications of this oversaturation. Technology impacts not only how we learn, work, think, and feel, but also how we define responsibility, love, commitment, and political engagement. Technologies of Self and Society is an interdisciplinary exploration of questions at once perennial and pressing: Are our new technologies vastly different from the technological advances that have always defined humanity's tool-using nature, or have we lost touch with important aspects of ourselves in this instrumental and technical age? How do our tools turn around and use us? What is the impact of social media on human formation? What are its implications for democracy? How do the newest technologies challenge or alter our understanding of human personhood? Are AI tools well-described as intelligent? If so, what makes this intelligence artificial? What types of human judgment are we currently offloading to algorithms, and how does this compare to the ways we have always delegated judgment to experts, groups, and traditions? Through experiential learning opportunities and discussion of classic and contemporary texts (including literature and film), we will explore how technology mediates our relationships to ourselves, each other, and the world.

**FORM405001**

The Art of Educational Inquiry

Higgins, Christopher R

Spring 2024
While education and educational research are often seen as separate activities, transformative education holds that the quest to form ourselves entails asking questions about the nature and direction of our growth. Inquiry is simultaneously an effort to understand, a social intervention, and an art of self-fashioning. This seminar invites students into the art of educational inquiry. Through examination of paradigmatic texts and visits from Lynch faculty members describing their own work, we consider the affordances of major traditions of educational inquiry. Working toward a formal proposal for a scholarly investigation, artistic creation, or public action, students are supported to articulate, deepen, and refine their own driving questions about educational concepts, relationships, practices, institutions, and aims. (Students who take EDUC 4050 in their junior year may wish to develop the work itself as a senior project.)

Tech Tools for Playful Learning
Bers, Marina
Spring 2024
This course explores the design and use of new technologies for learning and engages students in current debates around educational technologies, computational thinking, coding and robotics. Students will learn how to develop, implement, and evaluate technology-rich curriculum and will design their own computational meaningful projects. They will visit K-2 classrooms to implement technology-rich curricula, will learn how to use video to document their experiences and will become researchers to assess the thinking and learning fostered by the different tools.

Design, Innovation and Formation
Bers, Marina
Spring 2024
This course explores the role that design and innovation can play in the development and implementation of technology-rich formative learning experiences in different settings such as schools, non-formal educational environments, community-based organizations, and museums. Students will read materials from a variety of disciplines such as design thinking, entrepreneurship, developmental psychology, learning sciences and artificial intelligence and will be exposed to expert guest speakers. In addition, students will gain design skills. Working on a final project of their choice to be determined in consultation with the professor, students will create a prototype, test it, evaluate it and revise it to meet the needs of the identified setting.

FORM880001  
**Colloquium in Formative Education**  
Higgins, Christopher R  
**Spring 2024**  
Meeting every other week and open to the public, the Colloquium in Formative Education is devoted to interdisciplinary dialogue about formative education, featuring topical readings, visiting speakers, and work in progress from department faculty and students. Ph.D. students in Formative Education register for FORM 8800 each semester for their first three years, completing additional reading, writing, and reflection keyed to each colloquium session.

**Credits:** 0

FORM882001
History of Formative Education
Casalini, Cristiano
Spring 2024
Formative education, a concept with a rich historical genealogy, has been a wellspring of inspiration for various educational ideas, thoughts, and models over time. This doctoral course aims to foster a deeper understanding of pivotal moments in the evolution of formative education while nurturing students' skills in conducting historiographical research. It offers a dual invitation: firstly, to explore and examine the philological semantics of formative education, tracing its evolution through historical ideas and practices; secondly, to engage graduate students and researchers in historiographical research within this field. Throughout the course, students will encounter significant instances of formative education, as viewed through the lens of key historiographical works. They will be prompted to reflect on the concepts and models of formative education described in these writings, as well as the methodological and hermeneutical approaches employed to understand, explain, and interpret these concepts and models. In addition to preparing the weekly assigned readings for discussion, students will be tasked with finding and reading supplementary scholarly materials, such as articles, chapters, books, or papers, that deepen their comprehension of the primary reading. The instructor will initially provide a selection of potential supporting readings, gradually encouraging students to explore the broader literature on the weekly topic. FORM 8820 is required for Ph.D. students in Formative Education. Other doctoral students with a special interest in the topic may contact the instructor for permission to take the course.

FORM886001
Experiential Knowledge and Ethnography as Method
Bolton, Caitlyn
Spring 2024
This course offers an introduction to ethnographic methods, set within a broader consideration of what it means to know and learn from an experience. Drawing on historical and contemporary examples of ethnographic research, we will consider the central questions that have shaped ethnography as a method, including those related to the ethics, positionality, and subjectivity of the ethnographer. We will study tools such as participant observation, interviewing, fieldnotes, and digital ethnography, while practicing these skills in a mini-ethnographic project conducted during the semester. Finally, we will grapple with the challenge of analyzing the often complex and variegated data produced through ethnographic research, learning how to capture our observations and analyses in writing.

LREN711301
Design Studio 3
Kolodner, Janet L
Summer 2023
The Design Studio is the venue for learning how to practice Learning Engineering. Students will learn practices of design thinking and design decision making in the context of an internship, focused on designing learning experiences for a targeted population of learners that foster learning of targeted learning objectives. The Design Studio will be richly-facilitated and orchestrated as a Cognitive Apprenticeship. Students will work with the internship organization individually or in pairs, and also spend time as a Knowledge Building Community sharing what they are designing and the complexities they are facing, providing advice to each other, and reflecting on and articulating what they are learning about designing for learners.

Credits: 2
Room and Schedule: 5/17-8/18; Stokes Hall 105S TuTh 09:30AM-12:00 Noon

Reflective Seminar 3
Kolodner, Janet L
Summer 2023
This one-credit seminar is designed to help students make sense of and synthesize across the new concepts, skills, and practices they are learning as participants in the M.A. in Learning Engineering Program. Focus will be taking what they are learning into the workplace. Students will continue to reflect on their experiences to identify their strengths and what brings them joy, to imagine the special expertise they’d like to develop, and to identify the kinds of responsibilities they’d enjoy taking on in the workplace.

LREN720301
Immersive and Augmented Environments for Learning
Lachapelle, Cathy P
Summer 2023
In this module, students will engage with a variety of immersive and augmented environments for learning, reading relevant papers, exploring exemplary projects, and applying ideas to the functional design, adaptation, personalization, and use of learning technology. The module includes a "Design Concept" assignment, where students work in small teams to apply what they are learning to some learning design. Students will work to curate a "knowledge base" of exemplary projects, including examples both from current practice and from the research literature.

LREN740401  
Assessment of and for Learning  
Lachapelle, Cathy P  
Summer 2023  
This course introduces students to the design of valid, reliable, meaningful, and useful assessments that serve both summative (assessment of learning) and formative (assessment for learning) purposes. Students will learn how to evaluate and improve the quality of assessments, both in the context of evaluating the effectiveness of a designed learning experience and supporting the learning that takes place within that context.

Learning Engineering Courses: Fall 2023

LREN710101
Introduction to Learning Engineering
Kolodner, Janet L
Fall 2023
This course introduces the content and skills needed to thrive as systematic designers of learning experiences, environments, and technologies. It focuses on three themes: (1) how people learn--cognitive processes involved in learning and social, cultural, physical, affective, and other influences on those processes; (2) how to fostering or promote learning--what we know about the help learners need to engage and participate at their best and ultimately to become more knowledgeable and capable; and (3) designing for learners and analyzing those designs--how to apply what you are learning to the design and analysis of learning experiences, environments, and technologies.

Credits: 3
Room and Schedule: Campion Hall 224 W 01:30PM-04:00PM

**LREN720101**  
**Games for Learning**  
**Sidman, Jason G**  
**Fall 2023**  
What can we learn from games about engaging learners and fostering learning? How can games be developed specifically to promote learning? What kinds of things can be learned from games? What does it take to foster learning from games? Some educational games that have been designed in research labs can inform about the answers to these questions. As well, there are many computer games around that can teach us about sustaining engagement, particularly important for understanding deeply and mastering capabilities. In this module, students will engage with and read about a variety of games for learning and, hopefully, develop imagination about what different kinds of games and ways of interacting with games afford with respect to learning and come to recognize aspects of game design that are relevant to designing learning experiences. Your project will be the conceptual design of a game to achieve a set of learning goals of your choice.

LREN730101
Principles of Fostering Learning
Laski, Elida V
Fall 2023
This course will introduce students to what the field of psychology has to say about how humans learn. This includes examining the basic cognitive processes involved in learning, and considering how these processes interact with task demands and organization. The course is organized around key principles about learning and cognition which have emerged from empirical work in the fields of cognitive and developmental psychology. Its focus will be to identify practices that can be used to foster learning in different settings and interactions, including approaches such as spaced practice and group discussions.

LREN711401
Designing Online and Hybrid Learning Experiences
Li, Yuhan
Spring 2024
Face-to-face instruction is often considered the gold standard for learning, the most effective and efficient way to gain new knowledge and skills. But various models of distance education exist, including those powered by networked computing. One challenge for online and hybrid learning environments is designing ways that engage learners as well or better than in-person formats. This module will provide an overview of strategies that learning designers and engineers can use to develop effective and engaging online and hybrid learning experiences. Students will be encouraged to actively consider equity and inclusive practices in learning design.

LREN730201
Cognitive Task Analysis
Laski, Elida V
Spring 2024
This course will introduce students to the key conceptual and methodological elements of Cognitive Task Analysis, which can be used to identify the knowledge and skills required for the performance of a complex task. The focus will be on the specification of covert cognitive processes and the integration of those with overt behaviors into a model of task performance. Students will learn knowledge elicitation techniques, such as verbal think aloud protocol, used to uncover the cognitive structures and processes involved in expert performance of a task. Students also will practice generating cognitive models/knowledge representations of tasks relevant to their design area.

LREN730301
Motivation in Educational Contexts
Perez, Shenira A
Spring 2024
In this module, we will explore what it means to be motivated and what it is that we want at a fundamental level (i.e., our basic human needs). We will also learn about important theories of achievement motivation from the fields of educational, developmental, and social psychology, as well as empirical research that supports these theories. The contextual focus of the module will be on what motivates students to learn and what kinds of instructional practices and interventions can be employed in order to foster student motivation and engagement.

Measurement, Evaluation, Statistics, and Assessment Courses: Fall 2023

MESA106001
Classroom Assessment
Brown, Nathaniel
Fall 2023
This course emphasizes that assessment entails more than quizzes, unit tests, and standardized multiple-choice measures of student learning. The course explores how assessment is a key component of all aspects of the instructional process including organizing and creating a classroom culture, planning lessons, delivering instruction, and examining how students have grown as result of instruction. The validity of inferences and decisions made based on assessment information is examined within each phase of instruction. The goal is to show students that assessment is an integral part of teaching that should not be separated from daily classroom practices.

MESA631001
Evaluation Practice and Methods
Gates, Emily F
Fall 2023
This course addresses the theoretical and philosophical foundations of program evaluation, with emphasis on the roles of social and political theory, methodology, epistemology, and philosophy of science in various models of evaluation in education. Each evaluation model will be examined in terms of the purpose, knowledge construction, the role of the evaluator, relationship to objectives, relationship to policy and decision-making, criteria, and design. The course also includes a focus on issues of value-neutrality and value judgment.

MESA641001
Introductory Statistics
Brown, Nathaniel
Fall 2023
This course provides an introduction to quantitative research, descriptive statistics, inferential statistics, and null hypothesis significance testing in the context of z tests for proportions, t tests for means, and simple linear regression. In each area, students learn how to apply statistical procedures, interpret concepts and results, effectively display data and models, and critically evaluate evidence and implications. Software instruction is provided for IBM SPSS Statistics, R, Stata, and G*Power.

MESA682001
Critical Perspectives on Research Methodology
Russell, Michael K
Fall 2023
This course explores foundational concepts that influence the methodologies and methods employed by social science researchers. Core topics explored include: the Enlightenment's influence on scientific inquiry; the influence of empiricism, positivism, and universalism on social science research; objectivity and subjectivity; verification and falsification; quantification and standardization; the construction of mental ability and intelligence. Also explored are: the influences White racial framing has and continues to have on the research questions posed, the methods embraced, interpretations made, and discourse produced by social science researchers; and the role critical theory and anti-colonization have begun to play in reorienting social science research to challenge various forms of oppression, with a specific focus on racialized oppression. Upon completion of the course, participants will be positioned to critically examine quantitative methods and measurement techniques commonly employed for educational research that are introduced in future coursework.

**MESA683001**  
**Interpretation and Evaluation of Research**  
**Littenberg-Tobias, Joshua S**  
**Fall 2023**  
This course will improve a student's understanding of the empirical research literature in education and psychology. It concentrates on developing the conceptual foundations of empirical research and the practical analytic skills needed by a competent reader and user of research articles. Topics address purpose statements, hypotheses, sampling techniques, sample sizes and power, instrument development, internal and external validity, and typical quantitative research designs. Exercises emphasize the critical evaluation of published research. Each student will develop a research proposal.

MESA724001
Assessment Programs
Russell, Michael K
Fall 2023
This course builds on Instrument Design and Development by exploring technical and procedural issues executed when developing and implementing large-scale assessment programs. Among the topics explored are establishing performance levels, standard setting, scale linking and anchoring, field testing and matrix sampling designs, adaptive test designs, accessible test design, technology-enhanced items and tasks, scoring and reporting, and developing technical and validity reports. This course provides students with a strong foundation to critically examine and/or support large-scale assessment programs implemented by state and federal agencies, as well as international research organizations.

MESA747001
Introduction to Mathematical Statistics
Braun, Henry I
Fall 2023
Quantitative methods in educational and psychological research have become increasingly complex over time, employing more sophisticated models and estimation strategies. This course helps students to develop a deeper understanding of the strengths and limitations of different approaches to inference and to appreciate some of the ongoing arguments among the adherents of the different philosophies regarding statistical inference.

MESA822001
Psychometrics I: Classical Test Theory and Rasch Models
Von Davier, Matthias
Fall 2023
Presents a study of theoretical concepts, statistical models, and practical applications in educational and psychological measurement. General topics include the history of measurement, Thurstone and Guttman scales, classical true-score theory, and item response theory. Specific topics include principles of Rasch measurement, parameter estimation procedures, fit statistics, item banking, and computer adaptive testing.

Measurement, Evaluation, Statistics, and Assessment Courses: Spring 2024

MESA106001
Classroom Assessment
Brown, Nathaniel
Spring 2024
This course emphasizes that assessment entails more than quizzes, unit tests, and standardized multiple-choice measures of student learning. The course explores how assessment is a key component of all aspects of the instructional process including organizing and creating a classroom culture, planning lessons, delivering instruction, and examining how students have grown as result of instruction. The validity of inferences and decisions made based on assessment information is examined within each phase of instruction. The goal is to show students that assessment is an integral part of teaching that should not be separated from daily classroom practices.

MESA621001
Instrument Design and Development
Russell, Michael K
Spring 2024
Data collection instruments are commonly employed by educational and social science researchers to collect information about cognitive, affective, attitudinal and psychological constructs. This course explores principles and techniques applied to develop cognitive tests and survey instruments. Topics covered include: validity and reliability; construct definition and representation; item writing principles; bias, sensitivity, and accessibility; cross-cultural considerations; scaling methods; and techniques for examining item and scale properties. Upon completion of the course, participants will be positioned to develop cognitive test and survey instruments independently for their own research initiatives.

MESA641001
Introductory Statistics
Brown, Nathaniel
Spring 2024
This course provides an introduction to quantitative research, descriptive statistics, inferential statistics, and null hypothesis significance testing in the context of z tests for proportions, t tests for means, and simple linear regression. In each area, students learn how to apply statistical procedures, interpret concepts and results, effectively display data and models, and critically evaluate evidence and implications. Software instruction is provided for IBM SPSS Statistics, R, Stata, and G*Power.

MESA732001  
Evaluation Theory and Research  
Gates, Emily F  
Spring 2024
This course will cover the basic steps in planning and carrying out a program evaluation. Topics covered will include identification and selection of measurable objectives, choice of criteria, instruments, addressing limitations related to various issues, analysis of data, interpretation and reporting of data, and budgeting. Standards, competencies, and ethical considerations for program evaluation will also be covered.

**Status:** Offered

MESA733101  
**Advanced Topics in Evaluation**  
Gates, Emily F  
Spring 2024
This course introduces students to theory, practice, and methods for evaluating systemic change. Whereas conventional evaluation draws on social science methods to evaluate discrete policies and programs, systemic approaches to evaluation draw on theory and methods from the systems and complexity sciences to support change or transformation in the face of complex issues and large-scale systems. Focal topics covered include differing rationales for and resistance to systemic change; ways to bring diverse actors and perspectives together; five phases of a systemic change process (i.e., shared vision, systems mapping, leverage points, navigating futures, and learning and adapting); and ways to evaluate the value and impact of a systemic change effort. Course materials span multiple fields (e.g., health, international development, sustainability, education), bridge academic scholarship and practical guidance, and incorporate popular media. By the end of the course, students will develop knowledge of systems and evaluation concepts and methods and apply new skills and experiences to create an original proposal to design and evaluate a systemic change initiative. Additionally, the interdisciplinary and hands-on classroom environment and peer review exercises provide opportunities to build community and shared learning. This course is useful for students seeking careers in research/evaluation or leadership/management whether in government, philanthropy, non-profits, or international organizations. Prerequisites include one or more courses in (a) research or evaluation methodology (b) an applied field or problem area within a field (e.g., educational inequality, restorative justice, elder care); and (c) professional or personal experience with societal systems in need of change (e.g., activism, leadership, teaching).

**Selected Topics in Education Policy Research**

Braun, Henry I

**Spring 2024**

The course will examine some issues that arise in educational accountability. The purpose is to develop a deeper understanding of the policy issues and a critical appreciation of the relevant methodological strategies. Topics include the establishment and use of state-specific performance standards under NCLB and the quantification of the relative rigor of those standards; the evaluation of school or teacher effectiveness using so-called value-added models; and the policy evaluation of school reform efforts (such as charter schools) using data from large-scale cross-sectional surveys. The latter two topics both involve causal inferences from observational studies.

MESA845001
Multilevel Regression Models
O'Dwyer, Laura
Spring 2024
This course introduces students to multilevel regression modeling (aka hierarchical models or mixed effects models) for analyzing data with a nesting or hierarchical structure. We discuss the appropriate uses of multilevel regression modeling, the statistical models that underpin the approach, and how to construct models to address substantive issues. We consider a variety of types of models, including random intercept, and random slope and intercept models; models for longitudinal data; and models for discrete outcomes. We cover various issues related to the design of multilevel studies, model building and the interpretation of the output from HLM and SPSS software programs.

EDUC104401
Education and Development for Students with Disabilities
McKinnon, Rachael E
Summer 2023
Introduces pre-service teachers to a variety of issues surrounding special education, including its historical development, concepts of disability, the terminology commonly used in the field, and recent trends and practices. Examines legislation pertaining to special education, particularly the Individuals With Disabilities Education Act (IDEA). Assists future educators to understand the process of designing and implementing an Individualized Educational Program (IEP).

EDUC330801
Bilingualism in Schools and Communities
Andrade Gonzalez, Paulette R
Summer 2023
Earning the TELL Certificate requires the successful completion of the courses EDUC3308 and EDUC6346 (for elementary teaching) or 6347 (for secondary teaching). In addition, students must complete a field experience in a classroom that includes bilingual learners and/or English language learners. This course is also part of the Foundations in Education minor and the Immigration, Education, and Humanitarian Studies minor at Lynch. This course prepares students to participate in increasingly multilingual and multicultural environments in order to better serve bilingual students, families, and communities. Building on theory, research, and practice form the field of bilingualism, second language acquisition, and education, students will learn about the process of language and literacy development in children and adolescents who are exposed to more than one language, and the social and cultural contexts in which this development occurs. Through the use of case studies and school profiles, students will deepen their understanding of issues in bilingualism and bilingual education. Students will also have an opportunity to build cultural competence skills by learning about diverse communities in the U.S.

Classroom Management
Cass, Richard J
Summer 2023
ED201 is now EDUC6373. Focuses on observation and description of learning behaviors, with emphasis on examining the relationship of teacher behavior and student motivation. Prepares teachers to analyze behavior in the context of a regular classroom setting that serves moderate special needs students and to select, organize, plan, and promote developmentally appropriate behavior management strategies that support positive learning. Also considers theoretical models of discipline and classroom management strategies, and requires students to propose and develop a rationale for selection of specific techniques for specific classroom behaviors.

Special Topics: Models of Teaching and Learning in Catholic Education
Driscoll, William
Summer 2023
This course will examine past, current, and potential future models of Catholic schooling. Special attention will be given to the philosophical and historical foundations of Catholic schooling and how these foundations are lived out in pedagogical and curricular approaches used in contemporary Catholic primary and secondary schools. Additional time will be spent in analyzing how Catholic educational models are evolving to continue to carry out the mission of Catholic education in changing contexts.

**In the Footsteps of Leaders**  
**Beaumier, Casey, SJ**  
**Summer 2023**

This course considers the historical, spiritual, and pedagogical foundations of Jesuit leadership by situating them in their historical and geographic context. The course begins with two weeks of online coursework, followed by twelve days of experiential learning in Spain and Rome where students immerse themselves in the key places that became the roots of the Society of Jesus using primary sources to critically examine the decisions and actions of the early Jesuits. Students will consider contemporary topics such as the challenges and opportunities experienced by administrators and teachers at secondary and higher education schools. Coursework features selected readings, workshops, presentations, and projects to be completed both individually and in small groups. Through this course, students will gain an understanding of the Jesuits' early vision of apostolic effectiveness and of the ways that vision has remained constant while adapting to various circumstances along the way.

EDUC730101
Teaching, Curriculum, and Learning Environments: Global Perspectives
Kim, Han Gil
Summer 2023
What kinds of education are most needed for a world characterized by spiraling political polarization, increasing economic interdependence, rapid climate change, and a global pandemic like COVID-19? This online course will introduce students to contemporary debates about how educators should teach, what students should learn, and how schools should interact with society. The course is global in scope and will require in-depth study of country cases and failed and successful models of change. International students and U.S. students curious about other countries' approaches to education are strongly encouraged to enroll.

EDUC730201
Models and Theories of Instructional Design
Lee, Jieun
Summer 2023
Now well into the twenty-first century, schools struggle with the challenge of offering a high quality education for all learners regardless of race, family status, national origin, language, or ability. Increasingly, curriculum is accessed digitally and student work is generated and exhibited using technology tools. The once familiar artifacts of classrooms are rapidly giving way to radically new forms of teaching and learning. Within this context of change, this course reviews the evolution of theories of learning and instruction and then critically examines a range of contemporary models and theoretical frameworks. Learning activities in the course will allow participants to develop their own personalized framework for planning and implementing instruction.

Globalization, Mobility, and Education
Liu, Qinghua
Summer 2023
This course address political economic issues related to migration and education. Drawing on the anthropology of globalization and sociology of immigration, the course reviews major theories of immigrant incorporation and exclusion processes in schools, examines case studies of im/migrants, refugees, and displaced persons and their adaptation processes in countries in the Global North and the Global South, and considers educational practices and policies that develop to address mobility in diverse contexts. The course asks how cultural, social, political, and economic factors influence im/migrant incorporation, and how educators can facilitate im/migrant students' opportunities for learning through changes in policies, pedagogies, and curricula.

EDUC730601
Language Learner in Global Perspective
Yu, Qun
Summer 2023
This course provides an overview of language learning and the situation of second language learners in schools. First, we review processes of language learning and the challenges language learners face when they must simultaneously learn a language and learn subject matter in that language. We do this from a socialcultural perspective, exploring language learning as embedded in sociohistorically situated activities. We develop and account of how learning language is also learning culture. Second, we study how these processes vary across cultural contexts. Because language learning is woven into social and historical contexts, processes of language learning and schooling vary around the world. The course develops several case studies from different areas of the globe in order to illustrate how language learning and schooling can intersect in different ways.

Preparing the Whole Person for Global Citizenship
DiMuzio, Samantha
**Summer 2023**
This course is for graduate students and upper-level undergraduates who are interested in the fields of education and psychology. The course will focus on the development of individuals and their role as global citizens. We will explore the whole person development of adolescents and emerging adults in the digital age--one marked by a participatory culture. We explore these questions while foregrounding the different strategies and methodologies of counseling, developmental, and educational psychology.

Theories of Instruction
Friedman, Audrey A
Summer 2023
This provides an in-depth review of modern instructional models classified into selected families with regard to perception of knowledge, the learner, curriculum, instruction, and evaluation. Each student will be asked to survey models in his/her own field(s) and to select, describe, and defend a personal theory in light of today's educational settings based upon personal experiences, reflection on current research, and contemporary issues central to the education of all learners.

EDUC743801
Educating Learners with Disabilities
Francis, Heather
Summer 2023
This course focuses on the education of students with disabilities and other learners from culturally and linguistically diverse backgrounds. The goal of the course is to promote access to the general curriculum for all students through participation in standards-based reform. Universal Design for Learning (UDL) provides the theoretical framework for this course. Through an examination of historical milestones, landmark legislation, systems for classification, approaches to intervention, and the daily life experiences of diverse learners, students acquire knowledge about diversity and the resources, services, and supports available for creating a more just society through education.

Transforming the Field of Catholic Education
Giunco, Kierstin M
Summer 2023
This course explores the history, purpose, current status, and possible futures of Catholic elementary and secondary schools. Students will become conversant with the body of scholarly literature, theoretical and empirical, that defines the field of Catholic education. Though the primary focus will be on Catholic schools in the United States, the course will explore how we can learn from the experience of other religiously affiliated schools here and abroad, and from the experience of Catholic educators worldwide. Special attention will be devoted to how the Ignatian spirituality and pedagogy can be a resource for educators in Jesuit and non-Jesuit schools.

Credits: 3
Room and Schedule: 7/25, 7/26, 7/27, 7/31, 8/1, 8/3; Stokes Hall 213S MTuWTh 08:45AM-02:30PM

EDUC754701
Teaching Narrative Writing to K-8 Students
Brisk, Maria E
Summer 2023
This is a project-based course where groups of participants will collaborate to develop a writing unit in a genre appropriate for their grade level. Using a genre-based pedagogy informed by systemic functional linguistics, participants will learn what and how to teach non-fiction narratives (Personal and procedural recounts, autobiographies, biographies, empathetic autobiographies, and historical recounts) and fictional narratives. Features of the genres demanded in elementary and middle schools will be learned and practiced. The strong emphasis on language development distinguishes this approach from others currently used in schools. The approach to teaching guides teachers in ways of apprenticing students to writing that builds confidence and success.

Foundations of Bilingual Education
Nguyen, Minh H; Proctor, Charles P
Summer 2023
Students will be able to walk into any school that offers a bilingual program and/or serves bilingual pupils and identify the type of program in place depending on the specifics of different contexts. In service of this goal, students will explore the following characteristics of language education programs in the U.S specifically: history, models (and key attribute of program types), political contexts, and legal foundations. Students will understand dual language models, design, and implementation, specifically: competencies, knowledge, and skills of dual language teachers, features of instruction and assessment, and implementation.

Teacher Education and Curriculum and Instruction Courses: Fall 2023

EDUC103001
Child Development
Laski, Elida V
Fall 2023
This is one of two foundational courses (APSY 1030 & APSY 1031) focused on multiple
dimensions of child development from the prenatal period through middle childhood, with a
consideration of applications to educational and other applied settings. The course offers an
overview of the array of research methods used in developmental psychology; normative trends
in physical, social-emotional, and cognitive development; and factors and processes that affect
developmental change and optimize child development. Key questions in the field of
developmental psychology, such as "How do nature and nurture together shape development?"
and "How do children become so different from one another?" will recur across topics to help
students establish a coherent understanding of child development.

Learning and Curriculum in the Elementary School  
Homza, Anne E  
Fall 2023  
Students must be registered for EDUC2151 and arrange their schedules to be on-site in a school Tuesday or Thursday. Introduces students to the profession of education and roles of teachers. Provides understanding of contexts in which education is delivered in multicultural settings and opportunity to gain knowledge and experience about interpersonal, observational, and organization skills that underlie teaching. Faculty and students work together throughout course to examine students' commitment to and readiness for career as a teacher. Introduces essentials of curriculum, teaching, and managing classrooms at elementary (K-6) level and links them to major learning theories for children. Views curriculum, instruction, management, and learning theory from perspectives of current school reform movement and social/cultural changes affecting elementary classrooms and schools.

EDUC210101
Teaching Language Arts
McElwaine, Michelle L
Fall 2023
Focuses on the teaching and learning of language arts in the elementary grades. Students will be exposed to theoretical approaches to both oral and written language development in addition to a wide variety of teaching methods. Students will have the opportunity to apply their learning through practical lesson development, and encouraged to reflect on their experiences via the theoretical perspectives highlighted in the course. Student diversity and its implications for teaching language arts will be an integral theme. Students will draw on their experiences in their prepractica to apply and reflect on learning as they mediate theory and practice.

Teaching Reading
Beauchemin, Faythe P
Fall 2023
This course is designed to offer preservice teachers theoretical and practical knowledge and experience into teaching literacy to elementary age students. Emphasis will be placed on the social, political, and cultural context of reading instruction. Students will gain understanding of major theoretical perspectives on literacy development and the myriad strategies for teaching reading in a variety of contexts. Students will also be expected to spend time in a context where they can gain experiences in providing reading instruction in a relevant and productive way.

Teaching the Social Sciences and the Arts
Giunco, Kierstin M

Fall 2023
Provides prospective elementary teachers with opportunities to develop social studies and arts curricula for elementary age students and consider a variety of instructional approaches appropriate for this age group. Students will learn how to develop the skills of an historian and select and integrate knowledge appropriate for diverse learners. Curricular topics include evaluating context-appropriate materials, developing critical thinking, using and critiquing primary sources in the classroom, and developing varied learning activities through the use of multiple media.

EDUC210801
Teaching Mathematics and Technology
Albert, Lillie

Fall 2023
This course presents methods and materials useful in teaching mathematics to elementary school children. It analyzes mathematics content and pedagogy from both conceptual and practical perspectives. Emphasis is placed on the interconnections among theory, procedures, and applications that form the framework on which specific mathematics lessons are constructed. It examines the elementary mathematics curriculum through technology resources, addressing the different ways in which technology can be used. Activities include laboratory experiences with concrete models and technology as well as inquiry into the role of the teacher in the school community in the epoch of teaching for social justice.

**Teaching About the Natural World**  
**McNeill, Katherine L**  
**Fall 2023**  
This course is designed to increase confidence, enthusiasm and knowledge for teaching elementary science. Science can be an essential part of an elementary classroom not only to achieve key science learning goals, but also as a means to engage and motivate students as well as support literacy and mathematics learning. An overarching focus of the course is the idea that doing science entails individuals using wide-ranging ways of acting, reasoning, and communicating with others to figure out phenomena. Science is not about memorizing facts; rather, it is about constructing, debating, and revising multiple explanations and models about the natural world. With this in mind, this course is designed to offer you numerous opportunities to read literature that illustrates this vision and to engage and reflect upon this type of science teaching and learning.

Undergraduate Inquiry Seminar: I
Date, Danielle V; Ryan, Amy
Fall 2023
The purpose of this seminar is to introduce and develop classroom-based inquiry skills in teacher candidates. Teachers develop a self-awareness about their personal beliefs and biases about teaching, learning, and pupils; explore, understand, and learn to navigate the various aspects of school culture; and learn to use their classroom as a research site by posing critical questions about pupil learning, consulting related research, gathering and analyzing data about their pupils and classrooms, attempting interventions, evaluating results, and documenting pupil learning.

Educational Strategies: Children with Special Needs
Scanlon, David
Fall 2023
This course provides instruction to pre-service teachers interested in learning more about instruction, curriculum, and teaching for children with special needs, with a framework highlighting important educational issues pertinent to their professional development and the realities of teaching. The course emphasizes the complexities of teaching children with individual learning profiles in inclusive settings. Students will examine educational readings and instructional practices through the lenses of curriculum, author voice, and academic tension. Class participants will develop a comprehensive understanding of the historical, legal, and political developments influencing current general and special education practices.

Secondary Curriculum and Instruction
Thakurta, Ankhi
Fall 2023
Provides an introduction to secondary teaching practices as well as an overview of the history and structure of secondary schools. Topics include curriculum theory and development, interdisciplinary teaching, teaching students with diverse learning abilities, application of educational research, assessment, national standards, and alternative models for secondary schools. Focuses on the role of the teacher in secondary education reform. Taught on-site and in conjunction with secondary education teacher candidates' first prepracticum experience, this course offers a unique opportunity for a cohort experience in which preservice teachers work closely with each other, high school faculty, the instructor, and urban students.

EDUC330801
Bilingualism in Schools and Communities
Yu, Qun
Fall 2023
Earning the TELL Certificate requires the successful completion of the courses EDUC3308 and EDUC6346 (for elementary teaching) or 6347 (for secondary teaching). In addition, students must complete a field experience in a classroom that includes bilingual learners and/or English language learners. This course is also part of the Foundations in Education minor and the Immigration, Education, and Humanitarian Studies minor at Lynch. This course prepares students to participate in increasingly multilingual and multicultural environments in order to better serve bilingual students, families, and communities. Building on theory, research, and practice from the field of bilingualism, second language acquisition, and education, students will learn about the process of language and literacy development in children and adolescents who are exposed to more than one language, and the social and cultural contexts in which this development occurs. Through the use of case studies and school profiles, students will deepen their understanding of issues in bilingualism and bilingual education. Students will also have an opportunity to build cultural competence skills by learning about diverse communities in the U.S.

**Inclusive Education Field Observation**  
**Scanlon, David**  
**Fall 2023**  
Open to undergraduate majors in the Morrissey College of Arts and Sciences, the Inclusive Education Minor is offered in the LSOE. The minor is designed to (1) introduce Morrissey College of Arts and Sciences students to the world of disabilities and special education with an emphasis on special education practice, and (2) enhance the ability of future professionals to meet the needs of increasingly diverse school populations. Classes address the nature and implications of disabilities and effective practices in special education. The minor consists of six-courses and a zero-credit field observation. Appropriate for those considering a career or further studies in education.

EDUC610001
Partnering with Diverse Families and Communities in Early Childhood
Cristello, Karen M
Fall 2023
This course is designed to help early childhood educators establish effective partnerships and reciprocal relationships with diverse families and communities. First, students will learn about models of family involvement and important family developmental processes in early childhood such as attachment, maternal responsiveness, and parenting styles. Second, we discuss important social, cultural, and linguistic characteristics which shape the life of families and children and are relevant for understanding diverse families. Third, we present strategies for supporting and working with diverse families through family, school, and community partnerships. At the end of this course, students will have developed an action plan for working with diverse families in early childhood settings including activities for: collecting and providing information, planning for family involvement in the classroom, establishing reciprocal relationships with families, and collaborating with communities.

EDUC630001
Secondary/Middle School Science Methods
Lee, Samuel
Fall 2023
Provides an active, instructional environment for science learning that enables each student to construct knowledge (skill, affective, and cognitive) that, in turn, allows them to be prepared to construct instructional environments meeting the needs of tomorrow's secondary and middle school students. Activities reflect on current research: reform movements of AAAS, NRC, NSTA, inclusive practices, interactions with experienced teachers, firsthand experience with instructional technology, and review and development of curriculum and related instructional materials.

EDUC630201
Secondary and Middle School English Methods
Herrmann, Brian W
Fall 2023
Develops knowledge, skills, and dispositions essential for competent understanding, development, and delivery of effective English Language Arts instruction in a diverse classroom. Addresses educational and literary theory, pedagogy, assessment, evaluation, content, curriculum, media literacy, and sensitivity to and respect for adolescents who come from a variety of cultures, abilities, interests, and needs. Provides knowledge of local, state, and national standards and strategies to help students reach those standards. Encourages risk-taking, experimentation, flexibility, application of theory, and innovation. Good teaching demands open-mindedness, critical reading, writing, and thinking, honest reflection, high expectations, ongoing revision, and commitment to social justice.

EDUC638901
Assessment of Students with Extensive Support Needs
Bruce, Susan
Fall 2023
Pre-practicum required (25 hours). This course addresses formal and informal assessment of
students with intensive needs. Students will become familiar with assessments driven by both
the developmental and functional paradigms. All assessment activities will be founded on the
principle that appropriate assessment goes beyond the student to include consideration of the
student's multiple contexts. This course also addresses the IEP, the legal mandates behind the
process, and the collaborative role of the teacher, as part of the educational team, during the
assessment and report writing processes.

EDUC713101
Social Justice in Jesuit Contexts
Casalini, Cristiano
Fall 2023
This is a Graduate-level on-line course. The Social Apostolate of the Society of Jesus has developed in a variety of ways over the centuries according the diverse contexts where Jesuits have operated as agents of "social justice." This class offers students both a broad and deep understanding of: (1) How the Society of Jesus developed its mission in support of creating a "preferential option for the poor"; (2) How the Society understood its role to promote liberation from oppression in diverse social environments; (3) What kind of services have been activated by the Society of Jesus in order to fulfill its core values of "the service of faith and promotion of justice"; and (4) How social justice is pursued through pedagogy and practices by Jesuit and Ignatian schools today, given the significant involvement of the Jesuits with formal education on a global scale. The course is designed to foster deep and meaningful conversation among students. It will include individual and collective readings and video-conferences with leaders and teachers of Jesuit schools around the world, deepening students' knowledge of current practices and stimulating dialogue.

This is a Graduate-level on-line course. For nearly five centuries, the Society of Jesus has been one of the most successful and, at times, most controversial religious orders in the Catholic Church. A History of the Jesuits offers an introductory survey to this rich and varied past with particular attention, following the Jesuits' suppression in 1773, to various enterprises and enterprisers in the Americas. The course seeks to answer these questions: What have been the characteristics of the Society of Jesus and its associated works? And how and why have those characteristics remained the same or changed? Complementing the other courses in the Certificate program, the course traces the development, expansion, suppression, restoration, and recent developments of the Society of Jesus by closely examining the historical contributions of significant Jesuits.

Accessible and Inclusive Design
Francis, Heather
Fall 2023
This survey course focuses on practical considerations regarding inclusive and accessible design. The focus is around guiding principles and key content that learners and designers can apply to their particular area of design. Particular focus is paid to understanding the functional barriers that individuals with disabilities might encounter, how these barriers can be addressed proactively, and why retrofitting designs can be costly and ineffective. After a general introduction to some of the guiding ideas behind inclusion and accessibility, both Universal Design for Learning (UDL) and accessibility are discussed to provide practical paths towards design that is ultimately more effective for all learners.

Teaching, Curriculum, and Learning Environments: Global Perspectives
Francis, Heather
Fall 2023
What kinds of education are most needed for a world characterized by spiraling political polarization, increasing economic interdependence, rapid climate change, and a global pandemic like COVID-19? This online course will introduce students to contemporary debates about how educators should teach, what students should learn, and how schools should interact with society. The course is global in scope and will require in-depth study of country cases and failed and successful models of change. International students and U.S. students curious about other countries' approaches to education are strongly encouraged to enroll.

EDUC730301
Curriculum Theories, Practice, and Design
Lee, Jieun
Fall 2023
The overarching objective for Curriculum Theories and Practice is to help course participants develop and clarify their philosophy of education, in particular, their beliefs regarding the purposes and processes of effective and equitable curricular organization. To do so, the class explores varied ways of conceptualizing a school curriculum, drawing on insights from major curriculum designers, both past and present, U.S. and international. So students appreciate the ever-evolving nature of effective teaching practices and related school curricula, they will assess their own experiences with educational and institutional change processes writ large. Aiming to help course participants to thrive in the current, volatile educational and political climate, students will consider various approaches to multicultural education, anti-racist education, and inclusion practices that aim to transform the curriculum, attending to the needs of all students and overtly promoting equitable outcomes. In doing so, students will enact alternative strategies for assessment that provide multiple and authentic measures of student learning. Ultimately the course intends to help students consider how school curricula can be structured to promote social justice.

Family and Community Engagement  
Steedman, Peter  
Fall 2023
The purpose of this course is to introduce participants to theories, practices, and empirical research regarding family and community engagement in schools. The focus is on how school leaders--formal and informal--enact organizational models, educational programs, and political strategies that increase authentic relationships with parents and community members. Topics of study will include community schools/full service schools, parent involvement models, involvement of diverse families, grassroots organizing for community development, afterschool and community-based education, and school board-community relations. Direct participation in inquiry into school-community activities conducted on-site in schools and neighborhoods will be requirement of the course.

EDUC730701
Global Perspectives on Disabilities and Special Education
Jackson, Richard
Fall 2023
In the modern world there are many differing perspectives about the significance of disabilities. In this course we examine both "medical model" perspectives on the origin and nature of disabilities, as rooted in the scientific method, and post-modern critical perspectives. Cultural influences on how those perspectives are valued will also be considered. Differing approaches to special education practice--both service delivery systems and interventions--will be critically compared to the thought traditions. The ethics and social value of special education will also be considered.

EDUC730801
Designing Learning Environments in a Social and Digital World
Lee, Jieun
Fall 2023
In today's society, what counts as knowledge and expertise has changed considering the global shifts in interconnectivity, social interactions, and technology. Previous models of learning focused on knowledge as a collection of facts within curriculum and learning environments helping individuals obtain those facts. However, today technology can enable all individuals to quickly obtain facts. Instead, expertise requires deep knowledge in which ideas are applied across multiple contexts in particular contexts with people and tools. These shifts in knowledge as well as technological advances have significant implications for how we design curriculum and other learning environments. In this course, we will examine different learning environments as well as various aspects within those environments. For example, we will examine curriculum to evaluate the scaffolds to support student learning, analyze digital learning environments for professional development to support teacher learning and critique video of classroom discourse to examine student interactions and community development. In this course, we will consider the environment both as conceptualized by its designers (the design) and as it is experienced by participants as learning interactions unfold in particular settings (the enactment) to evaluate the effectiveness of those learning environments.

Preparing the Whole Person for Global Citizenship
Agostinelli, Adam V
Fall 2023
This course is for graduate students and upper-level undergraduates who are interested in the fields of education and psychology. The course will focus on the development of individuals and their role as global citizens. We will explore the whole person development of adolescents and emerging adults in the digital age--one marked by a participatory culture. We explore these questions while foregrounding the different strategies and methodologies of counseling, developmental, and educational psychology.

Supervision in Action
Cownie, Charles T
Fall 2023
This course is designed as an introduction to research-based clinical supervision models in teacher education. Hands-on application-in action includes observational strategies, collaborative assessment logs, and summative reports as resources for ongoing data collection. Course participants acquire and then apply the Massachusetts Department of Education Pre-service Performance Assessment rubric for coaching and evaluating student teachers, integrating the BC Teacher Education themes that emphasize teaching for equity and social justice. This course is restricted to cooperating teachers in BC Partnership Schools who are supervising a BC student teacher in a full-time practica and to new BC Clinical Faculty.

EDUC743001
Advanced Graduate Inquiry Seminar
Jacques, Mary
Fall 2023
This course is designed for the Lynch School Fifth Year Program students who have successfully completed a licensure program at Boston College. It is designed to build on teacher candidates' experiences with inquiry as stance and expand their skills in conducting classroom-based research that leads to pupil achievement and teaching for social justice in their new license area. The hybrid course is online with one class meeting. A case-study approach is used to help teacher candidates mediate the relationships of theory and practice, pose questions for inquiry, learn through reflection and discussion, learn from experiences with students and colleagues, construct critical perspectives about teaching, learning, and schooling, and to improve teaching and learning. The second part of this sequence is EDUC7432 which is taken in conjunction with full-time student teaching (EDUC7420).

Educating Learners with Disabilities
Francis, Heather
Fall 2023
This course focuses on the education of students with disabilities and other learners from culturally and linguistically diverse backgrounds. The goal of the course is to promote access to the general curriculum for all students through participation in standards-based reform. Universal Design for Learning (UDL) provides the theoretical framework for this course. Through an examination of historical milestones, landmark legislation, systems for classification, approaches to intervention, and the daily life experiences of diverse learners, students acquire knowledge about diversity and the resources, services, and supports available for creating a more just society through education.

Mathematics and Technology: Teaching, Learning, and Curriculum in the Elementary School
Son, Kyunghoon
Fall 2023
This course presents methods and materials useful in teaching mathematics to early childhood and elementary school children and the different ways in which technology can be used in the elementary school classroom. The course will consider the teaching of mathematics and the use of technology from both theoretical and practical perspectives.

EDUC754201
Teaching Reading
Heavey, MaryKate
Fall 2023
Offers teacher candidates skills for teaching reading to school age children. Students will gain understanding of reading through a historical, political, theoretical, and practical lens. They will understand the delivery of instruction by learning a balanced approach to teaching reading. They will gain familiarity of how children learn to read by partaking in observations, assessments, and instruction with a school age child. Students will learn a variety of ways to meet the needs of linguistically and culturally diverse learners. They will recognize reading difficulties and learn ways to differentiate instruction for such readers.

EDUC754301
Teaching Language Arts
Merlino, Michele M
Fall 2023
Examines the development of written and spoken language and methods of instruction for oral and written language from the preschool years through early adolescence. Students learn strategies for identifying children's areas of strength and weakness and to plan instruction. Addresses the needs of children from non-English speaking homes. Expects students to spend at least 16 hours distributed across at least eight sessions in a classroom or other setting where they can work with one or more children.

EDUC754803
Teaching Report and Explanation Writing to K-8 Students
Hodgson-Drysdale, Tracy L
Fall 2023
This is a project-based course where groups of participants will collaborate to develop a writing unit in a genre appropriate for their grade level. Using a genre-based pedagogy informed by systemic functional linguistics, participants will learn what and how to teach reports and explanations in the context of social studies and/or science. Features of the genres demanded in elementary and middle schools will be learned and practiced. The strong emphasis on language development distinguishes this approach from others currently used in schools. The approach to teaching guides teachers in ways of apprenticing students to writing that builds confidence and success.

**Educational Assessment of Learning Problems**  
**Cass, Richard J**  
**Fall 2023**  
Open to students in the Teacher of Students with Moderate Special Needs Program, Counseling Psychology, and Reading Specialist Programs. Not open to Special Students. This course focuses on formal and informal approaches to the nondiscriminatory assessment of students with a wide range of cognitive and academic difficulties. The focus is on identifying students with mild/moderate disabilities. It is designed to prepare specialists for the process of documenting special needs, identifying current levels of performance, addressing critical issues, and designing approaches to monitoring progress.

Bilingualism, Second Language, and Literacy Development

Kim, Deoksoon

Fall 2023
Explores first and second language and literacy development of children raised bilingually as well as students acquiring a second language during pre-school, elementary, or secondary school years. Also addresses theories of first and second language acquisition, literacy development in the second language, and factors affecting second language and literacy learning. Participants will assess the development of one aspect of language or language skill of a bilingual individual and draw implications for instruction, parent involvement, and policy. This course is fully online. The course will have biweekly synchronous meetings. The course meeting time will be determined at the first session by consulting with all students. The first session will be on September 4 (Thursday) at 9:00 AM.

Research on Teaching
Goodwin, Anne L
Fall 2023
Introduce Ph.D. students to conceptual and empirical scholarship about teaching and teacher education as well as to contrasting paradigms and methodological approaches upon which this literature is based. Helps students become aware of major substantive areas in the field of research on teaching/teacher education, develop critical perspectives and questions on contrasting paradigms, and raise questions about implications of this research for curriculum and instruction, policy and practice, and teacher education/professional development. Considers issues related to epistemology, methodology, and ethics.

**Contemporary Issues: Neurodiversity, Ableism, and Learning**

Bottema-Beutel, Kristen M

Fall 2023
In this seminar, we will explore the concept of neurodiversity in relation to theory, research, educational practice, and disability advocacy. The term neurodiversity originated in the 1990s, and was introduced to challenge the notion that neurodivergent people (at the time, referring primarily to autistic people) were broken and in need of fixing. Borrowing from the concept of biodiversity, neurodiversity involves the radical stipulation that autism and other forms of neurodivergence represent natural forms of human variation, and neurodivergent people should be granted full human rights, autonomy, and support. After taking this course, students will understand the past, present, and potential futures of the neurodiversity paradigm of disability, and the neurodiversity movement. Students will also learn how neurodiversity advocates have transformed disability research, and the possibilities for transforming our conceptualization of teaching and learning through a neurodiversity lens. Through a course paper, students will have the opportunity for deeper reflection on current debates within neurodiversity scholarship and connect their learning in the course with educational practice.

Building upon the foundation concepts of qualitative research and initial exploration of an introductory course in qualitative methodologies, this course explores the theoretical, methodological, and analytic implications of conducting qualitative research from differing theoretical perspectives. Key readings include texts on social theory, qualitative methodologies, and exemplar qualitative research from various social scientific fields. Students will distinguish between methodology and methods, analyze data, and produce either a report for a specified audience or a research manuscript for possible submission to an educational research journal.

Teacher Education and Curriculum and Instruction Courses: Spring 2024

EDUC103001
Child Development
MacEvoy, Julie P
Spring 2024
This is one of two foundational courses (APSY 1030 & APSY 1031) focused on multiple dimensions of child development from the prenatal period through middle childhood, with a consideration of applications to educational and other applied settings. The course offers an overview of the array of research methods used in developmental psychology; normative trends in physical, social-emotional, and cognitive development; and factors and processes that affect developmental change and optimize child development. Key questions in the field of developmental psychology, such as "How do nature and nurture together shape development?" and "How do children become so different from one another?" will recur across topics to help students establish a coherent understanding of child development.

Credits: 3
Room and Schedule: Mcguinn Hall 121 TuTh 09:00AM-10:15AM
Satisfies Core Requirement: Social Science,Cultural Diversity
EDUC103002

EDUC203901
Learning and Curriculum in the Elementary School
Homza, Anne E
Spring 2024
Students must be registered for EDUC2151 and arrange their schedules to be on-site in a school Tuesday or Thursday. Introduces students to the profession of education and roles of teachers. Provides understanding of contexts in which education is delivered in multicultural settings and opportunity to gain knowledge and experience about interpersonal, observational, and organization skills that underlie teaching. Faculty and students work together throughout course to examine students' commitment to and readiness for career as a teacher. Introduces essentials of curriculum, teaching, and managing classrooms at elementary (K-6) level and links them to major learning theories for children. Views curriculum, instruction, management, and learning theory from perspectives of current school reform movement and social/cultural changes affecting elementary classrooms and schools.
