FILM332201
A Lament for Justice: Good and Evil in Film
Michalczyk, John; Michalczyk, Susan A
Summer 2023
Throughout the course, we will interpret encounters with good and evil, through analyses of film-making techniques and adaptations of narrative in a range of films from tragic to comic. As laments for justice, these films memorialize our fascination of good and evil, the bittersweet twists of fate and the flaws of human nature. We easily identify with the forces of good, while separating ourselves from the forces of evil, counting ourselves among the righteous, yet remaining intrigued by the triumphs of the wicked. How do filmmakers approach this conflict in our nature, in order to manipulate our emotions, and leave us asking questions about our own choices, decisions, and responsibilities? Including classic and contemporary films, such as The Godfather, Apocalypse Now, and The Invention of Lying.

**Coming of Age: Crisis and Calm Revealed through Film**  
**Michalczyk, John**  
**Fall 2023**  
Core Renewal: Enduring Questions For Freshmen Only Coming of age, whether in moments of conflict or peace, remains a central theme in both classic and contemporary films. Film adaptation offers opportunities to study issues confronted from early to late adolescence that affect our adult lives. Viewing moments of crisis and calm through the medium of film has aesthetic value and promotes increased visual and cultural literacy. The films serve as foundational texts, as students engage in understanding the complexities of adapting a singular account of adolescence from printed word to the screen so as to reveal the relevance for our own lives.

FILM222001
Holocaust and the Arts
Michalczyk, John
Fall 2023
To express the inexpressible tragedy of the Holocaust from 1933 to 1945 remains a challenge. The Arts nonetheless attempt to get at the intrinsic experience of this twentieth-century genocide through poetry, film, music and literature. These symbolic, realist and at times surrealist expressions help us in a human way to understand the historical and personal events of the Holocaust.

FILM300501  
Italian Cinema: Passion, Politics, and Pain  
Michalczuk, Susan A  
Fall 2023  
Social issues dominate Italian cinema from the post-WWII era to the present, as filmmakers interpret individual historical moments, literary works, and cultural events, bringing a collective experience of the human condition onto the screen. Visconti establishes the foundation that Fellini, Bertolucci, Rosi, and other directors build upon, creating visual images that evolve from Giovanni Verga, and his written portraits of verismo. Exploring what is true and real, questioning the complexity of the human condition in moments of comedy and tragedy, these films depict socio-economic, philosophical, and political issues, always revolving around the vulnerability and struggles of relationships. Films include: La Terra Trema, Ossessione, Open City, Bicycle Thieves, La Strada, Il Conformista, Tree of Wooden Clogs, Bread and Chocolate, Life is Beautiful, Tre Fratelli, Cinema Paradiso, Bread and Tulips, Gomorrah.

FILM330301
Advanced Screenwriting
Conroy, Mary K
Fall 2023
Limited to 15 students. This course is for students interested in writing for film, applying the knowledge gained in FILM3301 toward their efforts at writing their own screenplays. In the early part of the class, students will select an idea for a film and transform that idea into a story suitable for the screen. From there, in a round-table setting, students will complete a series of exercises to help them focus their stories, eventually moving on to writing a finished first act (28-30 pages) by the semester's end.

FILM331601  
**Film Directing**  
Fano Villaescusa, Laimir  
**Fall 2023**  
This course explores the role of the director of narrative films throughout the different stages of the production process. Topics include film grammar, script analysis, previsualization techniques, staging, continuity, and camera coverage. Particular attention will be given to the creative collaboration between directors and actors during auditions, rehearsal sessions, and filming. Students will be expected to develop a directorial style by planning, shooting, and editing several silent and dialogue scenes from published or original screenplays.

Courtroom drama, blind justice, encounters with the law, all hold tremendous interest for filmmakers and audiences alike. This genre of film recounts real events, as well as fictional accounts to capture the drama of both crimes and punishments, by adapting written accounts into compelling and dynamic visual representations. Law in Film explores the ways in which cinema built upon legal issues continues to capture the audience's attention, whether in retelling of brutal crimes or cruel injustices, through all aspects of the narrative (the tensions and problems of the crime and all involved in the process of seeking justice). The course covers feature films and documentaries from classic to contemporary, including Twelve Angry Men, Central Park Five, The Verdict, and On The Basis of Sex.

Laughter is a universal phenomenon seen widely in films from the birth of cinema in Lumiere Brothers pranks on screen in 1895 to the current spoofs and mockumentaries. This class will trace the evolution of comedy in film from the early silent films (Chaplin), through intellectual comedy (Woody Allen), to the most recent comedies on screen today. The survey will analyze the psychological and sociological essence of comedy in its various forms from slapstick and situational comedy to word-plays and clever one-liners.

**FILM332701**  
**Breaking Free: Conscience, (Dis) connection and Revolt in East European Cinema**  
**Epstein, Thomas**  
**Fall 2023**  
This course will survey the extraordinary cultural intensity of East European cinema during the period roughly between 1965 and 2015, thus dividing the course between the Communist period and what comes after. Focusing on the 1960s 'new wave' films of Czechoslovakia that opens the period, and the 2010s Romanian new wave that closes it, we will fill in the time between with films from Poland, Hungary, and the Balkans. What we will uncover is a cinematic culture of extreme richness that takes up central questions of national and human life: the cost of freedom, moral responsibility to others versus self-interest, the burden of history, and the need to love and be loved.

FILM336201
Film Theory and Criticism
Pastel, Renee L
Fall 2023
Satisfies the required theory course in the Communication major This course is structured around the question of how visual media convey and influence the world in which they are created. By surveying some of the major questions raised by theorists from the beginnings of film as a medium to the present, students will gain critical lenses through which to historically and theoretically engage visual media. We will cover topics including: film aesthetics; Marxist, psychoanalytic, feminist, critical race, and queer theoretical approaches to film criticism; television studies; and new media theories. Students will learn how to analyze film on a formal level, taking into account how form creates meaning, and to think historically and theoretically about how film as art and commerce has contributed to shaping "smaller screen" media forms and understandings.

FILM338901
American Directors Series
Chopra, Gautam
Fall 2023
This series will concentrate on several directors who have chosen to work on the East Coast rather than in the Hollywood mainstream, such as Martin Scorsese, Spike Lee, Sidney Lumet, Elia Kazan and Woody Allen. Many have roots in New York and use the City not only as a setting for their narratives but as a metaphor for the human condition they explore. This school of Urban Realism has enriched American film with a gritty documentary strain that stands in strong contrast to the polished Hollywood style.

FILM330601
Social Issues in Film
Michalczyk, Susan A
Spring 2024
Filmmakers build upon relevant issues in contemporary society, as well as meaningful historical events in order to enlighten, inspire and entertain the audience. Whether through brutally honest portrayals of loss and suffering, or through comedic interpretations of life's challenges, writers and directors search for opportunities to re-examine the ways in which each generation learns from or repeats the past. Film adaptations and original screenplays can prick the conscience of an audience, through the creative techniques and use of media by filmmakers. Films cover a range of social issues, including race and gender (American Violet), disabilities (Lives Worth Living) sports (The Express: The Ernie Davies Story), immigration (The Visitor), business (The Constant Gardener), politics/climate change (Don't Look Up), and extremism (Betrayed).

FILM331101
New Hollywood Cinema
Fulton, Maxeld
Spring 2024
Survey of American narrative film since the 1960s, when the demise of the studio system, the relaxing of censorship, and the influence of foreign productions ignited a revolution in American filmmaking. Focusing on the development of major film genres, we will examine how post-classical filmmakers revised the language of old Hollywood cinema in light of radical social, economic, and technological changes in U.S. culture. Directors may include Hitchcock, Aldrich, Penn, Coppola, Polanski, Fosse, Scott, Kotcheff, Craven, Cameron, Jonze, Bird, Bigelow, McQueen, and Tarantino.

World Cinema
Long, Carter E
Spring 2024
This course provides the opportunity for students to explore films from regions other than Europe and North America. Films of Asia, Africa, or the Middle East will serve as a focus for the course. Special attention is given to the social, economic, cultural, and political contexts from which these films arise, both in the country of origin and in the West.

FILM331801
Documenting Performance
Fano Villaescusa, Laimir
Spring 2024
This course surveys a wide range of production techniques for documenting different forms of artistic performance (music, theater, dance, performance art) as well as social performance (political actions, rallies, protests, etc.). Emphasis will be placed on the creative intervention of the filmmaker to convey a distinct point of view. Students will work on projects that document "live art" and/or social justice events taking place in the Boston area at the time the course is offered.

This class is for advanced digital-media art and film students working in any moving-image medium (video art, experimental film, animation, programming-based imagery, video and performance, etc.) to refine and develop their ideas, skills, and presentation methods. This class is highly recommended for all Art Majors/Minors who want to incorporate moving-image elements into their thesis work. Though a variety of advanced techniques in Adobe Premiere, After Effects, and other programs will be demonstrated, students are REQUIRED to be proficient with the equipment and programs used in their type of moving-image production. Based on individual goals set in the beginning of the semester, students are expected to complete 3-4 short to medium pieces, or one larger piece over the semester. Students are asked to investigate methods for moving-image presentation and viewer experience/interaction beyond the traditional "movie" screen or monitor, including: multi-channel works; object-based or site-specific video installations; interactive pieces (triggered by motion, sound, or physical inputs); or mobile based pieces that utilize geo-location or augmented reality; etc. Based on a student's goals, independent research and skill building may be required. Class sessions will be a mix of screenings, reading discussions, technical demonstrations, in-class work time, peer workshopping, and class critiques of students' projects. Artist talks or exhibition visits may be assigned, based on local event programming. The goal of this class is for students to refine their concepts, polish their formal and technical skills, and make deliberate presentation choices, so all elements add meaning to their moving-image works.

Korean Film and Popular Culture
Klein, Christina
Spring 2024
Requires weekly film screening outside of class time, Mondays, 7-9 PM Korea today is producing some of the most vibrant popular culture in the world. This course takes up Korean film, television drama, and music from the late 1990s to the present. We will look at popular films (Train to Busan), art films (Poetry), and films that defy easy categorization (Parasite). We will explore how television dramas grapple with contemporary social issues such as educational pressures (SKY Castle) and explore how K-pop groups (BTS) have achieved global superstardom. Throughout we will investigate the intersections of popular culture and political, economic, and social history.

FILM332201
A Lament for Justice: Good and Evil in Film
Michalczyk, Susan A
Spring 2024
Throughout the course, we will interpret encounters with good and evil, through analyses of film-making techniques and adaptations of narrative in a range of films from tragic to comic. As laments for justice, these films memorialize our fascination of good and evil, the bittersweet twists of fate and the flaws of human nature. We easily identify with the forces of good, while separating ourselves from the forces of evil, counting ourselves among the righteous, yet remaining intrigued by the triumphs of the wicked. How do filmmakers approach this conflict in our nature, in order to manipulate our emotions, and leave us asking questions about our own choices, decisions, and responsibilities? Including classic and contemporary films, such as The Godfather, Apocalypse Now, and The Invention of Lying.

**FILM332301**  
**Portraits of Women in Film**  
**Michalczuk, Susan A**  
**Spring 2024**  
Portraits of women, salvific or satanic, appear throughout centuries of artistic interpretation, with symbolic representation that often over-simplifies or distorts the real-life complexity of her role. From Eve to the Virgin Mary, the creative muse or the conniving femme-fatale, filmmakers recreate the profound relationships and roles that society sometimes demands, sometimes condemns, and always finds intriguing. Portraits of Women in Film will explore a range of traditional and contemporary films, tragic and comedic, that present glimpses, though often incomplete of the challenges, inspirations, rewards, and punishments that define or attempt to define women through the ages. Films include Dangerous Beauty, Little Miss Sunshine, Moonstruck, Miss Representation, Autumn Sonata, Volver, A League of Their Own, Double Indemnity, Belle, and The French Lieutenants Woman.

FILM333101
Independent American Film
Chopra, Gautam
Spring 2024
How might contemporary independent cinema be seen as both an alternative and a response to mainstream Hollywood fare? How has the acquisition of indie studios, such as Miramax and New Line Cinema, transformed the industry? Has the affordability of technology and accessibility of audiences truly created a democratization of film? This course emphasizes critical examination of contemporary American Independent film from the 1980s films of John Cassavetes, Steven Soderbergh, Spike Lee through the 1990s and 2000s with features from Kevin Smith, Allison Anders, Richard Linklater, Quentin Tarantino; shorts from Wes Anderson and Jane Campion; and current festival hits.

The most common image of combat film is one of "guts and glory." Behind this image, lies a harsh reality of the impact of war on the body and soul of the soldier and civilian. This course will study chronological evolution of war film from racist interpretation of the Civil War in Griffith's *Birth of a Nation*, through World War I and II with Milestone's pacifist *All Quiet on the Western Front*, Spielberg's hyper-realistic *Saving Private Ryan* to more recent times, Vietnam War films, Coppola's surrealistic *Apocalypse Now*, the war in Iraq with *In the Valley of Elah* and *Control Room*.

**Propaganda Film**  
**Michalczyk, John**  
**Spring 2024**  
This course introduces the student to various forms of propaganda usage during the twentieth century, primarily during wartime. Using lectures, film, slides, and outside screenings, it will present in a modified chronological order, the mind set and values of governments in crises periods. On a personal level, the course will offer the student the occasion to see several sides of an issue and help in determining his/her own perspective on the situation.

Advanced Screenwriting II
Conroy, Mary K
Spring 2024
Limited to 12 students. In a round-table setting, students will continue to work on the script they began in Advanced Screenwriting. The course will feature more exercises and outlining, leading to the writing of the remainder of their script. As in Advanced Screenwriting, students will critically examine each other's exercises and writing under the guidance of the professor. It is anticipated that students will complete a finished first draft of a full length feature film (100-120 pages) by the semester's end.

FREN106501
Intensive Reading in French
Bold, Stephen
Summer 2023
The course objectives are (1) to develop the ability to read French readily and accurately through the study of grammatical structures and vocabulary; (2) to develop techniques for the reading of French-language material; and (3) to provide practice in the translation of French texts in general and of texts related to the students' major fields of study and research. This course may be taken for a grade, for pass/fail, or audited (as a registered auditor). Students desiring a pass/fail grade must file this grading preference with the Graduate School of Arts and Sciences. This is a 12 week course and meets for the entire summer session.

FREN202101
Provence: Art, Culture, Cinema, Diversity
Javel, Andrea M
Summer 2023
In this 3-credit immersive course, you will explore Provence, following in the footsteps of great artists, cinematographers, chefs, musicians and innovators. You will be immersed in the same natural environment that inspired Cezanne, Van Gogh and Picasso. Home base will be Aix-en-Provence, in the heart of it all. The city itself is a living, breathing museum with its history and culture inscribed in its architecture, open markets, restaurants, and inhabitants. You will see this stunning region through the eyes of writers like Marcel Pagnol and the films that immortalized his work, filmmakers like Claude Berri and more contemporary ones like Jean-Bernard Marlin.
Marseille, France's second largest city, is only a half an hour away and will feature prominently in this course as well. Through it, we examine what it means to be French today in one of France's most diverse cities. We will learn about the different ethnic groups that make up Marseille and debunk some myths surrounding that beautiful city. We will look at how the notion of diversity has evolved in France over time and we will look at all of these elements through social justice lens. This course counts for Cultural Diversity Core. This course is for post-intermediate level students and will be conducted in French.

**French Writing Workshop**  
**Celestino Montenegro, Ana Cristina**  
**Fall 2023**  
Conducted in French  
Focusing on works of literature, though also including art works and film, this course will introduce students to learning and practicing analytical and expository writing skills. It will allow students to identify key formal and content features of texts from a variety of periods and genres, and to write about them in academic French. Students will acquire practice in various French writing techniques: le resume, l'explication de texte, le commentaire, la dissertation.

Narrative and Identity: The Story You Tell Yourself
Newmark, Kevin
Fall 2023
Conducted in French
Fulfills one of the 3000-level requirements for the French major. Satisfies Foreign Language Proficiency core requirement. This course is designed to help students with a good background in French to progress to the next level. Students in this course will continue to solidify their mastery of French grammar through structural exercises tied to readings, discussion, and written analysis of selected short stories, novels, and narrative film. The stories have been chosen and presented to allow students to progress substantially both in their basic reading skills in French and in their awareness of critical aspects of storytelling such as narrative voice, point of view, and plot structure.

Credits: 3
Room and Schedule: Stokes Hall 133S MW 03:00PM-04:15PM
Satisfies Core Requirement: None
Prerequisites: French CCR II (FREN2210). Students with just four years of high school French or CCR I (FREN2209) may enroll with instructor's permission.

FREN339301
Life at the Limit: Narratives of Transformation
Kearney, Anne D
Fall 2023
This course is conducted in English. This course will consider texts that follow the path of a person making a journey from alienation, loss, or hardship through a turning point. We will read stories of people who, caught in a major life crisis, still manage to keep a deep connection with themselves and the world, people who ultimately survive to share their experience with others in writing. Students will read correspondence between Theo and Vincent Van Gogh, a short story by Fyodor Dostoevsky, excerpts from Les Misérables, a memoir by Primo Levi, and various texts by Albert Camus and several other authors. Satisfies Core Requirement for: Literature
Credits: 3

FREN440501
Parsing the History of the French Language
Conducted in French. This course will study the history of the French language as it was first written and compare it to new discoveries and narratives about the language. While the history of the French language has been represented as a linear and natural path towards national monolingualism, the reality of the formation, development and use of French is different. We will study how: texts from the ninth to the seventeenth centuries reveal the diversity of the use and formation of the language; French was imposed as both a practice and a concept of monolingualism; the use of French has been reconfigured in its former colonies.

**Credits:** 3

**Room and Schedule:** Lyons Hall 315 W 03:00PM-05:20PM

**Satisfies Core Requirement:** None

**Prerequisites:** Conducted in French. Must have taken two courses from the following: FREN3303, FREN3305, FREN3306, FREN3307, FREN3308, FREN3309 or with instructor permission.

**True Fiction: From Philosophy to Literature**

**Newmark, Kevin**

**Fall 2023**

Beginning with Plato's allegory of the cave, this course will examine the question of truth and the way it has been addressed in several key texts, at several key moments, in the history of philosophy and of literature. What is the relation between the philosophical concept of truth and the literary modes of fiction in which that concept is often articulated? Readings will include Plato, Descartes, Kant, Kleist, Kierkegaard, Nietzsche, Kafka and Heidegger, among others.

FREN227601
Conversational Approach to Contemporary France
Labianca, Andrea
Spring 2024
This course is designed to familiarize students with the political and social features of contemporary France while helping them to develop oral communication skills in French. Using authentic documents (television, videos, films, songs, newspapers, and magazines), we will discuss current events and socio-political issues. Students will develop their vocabulary, increase their knowledge of idiomatic expressions, and further their command of spoken French by engaging in structured dialogues based upon real-life situations.

FREN330501
Wordplay: From the Stage to the Page
Bold, Stephen
Spring 2024
Conducted in French
Fulfills one of the 3000 level requirements for the French major. Satisfies Foreign Language Proficiency core requirement. This course is open to any students interested in expanding their linguistic and cultural horizons while developing their literary skills through writing in French. Guided compositions will help students to gain precision and sophistication in their written French and in their writing in general. Selected poems and plays explore a chosen theme and allow students to learn the basics of literary analysis in each genre. Grammar review is tied to the readings. This course will prepare students for 400-level courses in literature and culture.

FREN330601
Narrative and Identity: The Story You Tell Yourself
Celestino Montenegro, Ana Cristina
Spring 2024
Conducted in French
Fulfills one of the 3000-level requirements for the French major. Satisfies Foreign Language Proficiency core requirement. This course is designed to help students with a good background in French to progress to the next level. Students in this course will continue to solidify their mastery of French grammar through structural exercises tied to readings, discussion, and written analysis of selected short stories, novels, and narrative film. The stories have been chosen and presented to allow students to progress substantially both in their basic reading skills in French and in their awareness of critical aspects of storytelling such as narrative voice, point of view, and plot structure.

FREN330701
Great Books in French
Newmark, Kevin
Spring 2024
Conducted in French. Open to majors, prospective majors and interested non-majors. Fulfills one of the four 3000-level requirements for the French major and is designed to prepare students for 4000-level courses in literature and culture. An introduction to the history of the French literary tradition through a selection of great works on a specific theme. The selected works will be studied from a variety of literary, historical, and cultural perspectives. This course will prepare students for 4000-level courses in literature and culture.

Credits: 3
Room and Schedule: Stokes Hall 115S MW 03:00PM-04:15PM
Satisfies Core Requirement: Literature
Prerequisites: French CCR II (FREN2210). Students with just four years of high school French or CCR I (FREN2209) may enroll with instructor's permission.
FREN330901
Artists and their Writings
Kearney, Anne D
Spring 2024
Conducted in French. In this course, students will study French culture through some key artists of the turn of the nineteenth century. The course will explore the rapport between their visual work, their writings (or writings about them) and their lives. The artists studied will be Van Gogh, Gauguin, Matisse, Picasso, Rodin, Camille Claudel, Cézanne. We will look at the evolution of their work in conjunction with their biographies, reading extracts from their letters or pronouncements on art and life.

FREN440601
Versailles: A Cinematic Look at French Culture of the Grand Siecle
Bold, Stephen
Spring 2024
Satisfies Foreign Language Proficiency Core Requirement

Conducted in French. This course will focus on the cultural moment when modern France was born: the age of Louis XIV and his palace at Versailles. We will study the grandeur and the conflict that define this summit of French history through a variety of documents, including a number of recent films that reconstruct the period, and contemporary masterpieces of painting, architecture and music. We will also read a variety of literary, historical, and eyewitness texts that portray the age as it was or wanted to be.

FREN442601
Women Writers in Pre-Modern Times: Around Christine de Pizan
Celestino Montenegro, Ana Cristina
Spring 2024

Conducted in French. Centered on the texts and the publishing activity of Christine de Pizan, a woman writer of the fourteenth and fifteenth centuries, this course will cover three different aspects of poetic production at that time: lyric poetry, didactic literature and manuscript production. Comparing Christine's prolific activity with that of her peers and sources, we will study works of poetry and music, representations of love and loss, allegories of politics and learning, as well as manuscripts and publishing practices. We will pay special attention to the specific ways in which women writers represent themselves as authors.

Credits: 3
Room and Schedule: Stokes Hall 115N W 03:00PM-05:20PM
Satisfies Core Requirement: None
Prerequisites: Conducted in French. Must have taken at least two courses from the following: FREN3303, FREN3305, FREN3306, FREN3307, FREN3308, FREN3309 or with instructor permission.
Corequisites: None
FREN446401
Existentialism from A to Z
Newmark, Kevin
Spring 2024
Conducted in French. This course will examine some of the fundamental literary, philosophical, and historical components of French Existentialism. It will examine the way that the major writers of this movement in twentieth-century thought developed their ideas against the backdrop of Surrealism in literature, existential phenomenology in philosophy, and the historical upheavals of World War II. Of primary concern will be the manner in which the themes, concepts, and experiences of Meaninglessness, Engagement, Occupation, Resistance, and Liberation are confronted and rearticulated in the texts considered. Authors will include Sartre, Camus, Malraux, de Beauvoir, Duras, Ponge, and Blanchot.

Credits: 3
Room and Schedule: Stokes Hall 363S MW 01:30PM-02:45PM
Satisfies Core Requirement: None

FREN447201
The French New Wave
Smirnova-Elentuck, Larysa
Spring 2024
In this course we will study the history and aesthetics of the Nouvelle Vague, a movement started by a group of young French film directors who, in the late 1950s, in an attempt to revolutionize French cinema, proposed a new model of filmmaking. While focusing on the most productive decade in the history of this movement (from the late 1950s through mid-60s), we will also look at the post-Nouvelle-Vague uvres of some of these film makers and explore their influence on the French cinema of the last quarter of the 20th century. The works of the following filmmakers will be discussed: Godard, Truffaut, Rohmer, Chabrol, Marker, Resnais, Varda, Franju, Demy, among others.

How does the experience of art contribute to a life of purpose and meaning? What do the various forms of art have in common, and how do they differ? What practices and habits constitute meaningful engagement with art? How have aesthetic values and concepts transformed throughout history? What is the nature of artistic creation, and how is it shaped by shifting understandings of the human person? What role does art play in the formation of the values and principles, now and at other times and places? Over the course of the year, these and other enduring questions about art will be addressed by four connected courses: a year-long philosophy course, paired with a literature course in one semester, and an art course in the other. Approaching shared questions from these different perspectives will disclose not only the limits of each perspective, but also the ways in which each perspective serves to supplement and transform the others. The result will be not only a wider and deeper understanding of art, but also growth in the capacity for aesthetic experience.

**Credits:** 3

GERM200401
German for Professional Purposes
Sondermann, Ruth
Fall 2023
This language course is designed for students interested in living in a German-speaking country and want to use German in a professional setting. Students will develop presentation skills necessary to be successful at work in Germany. Topics covered include sustainability, the political landscape, social benefits, cultural differences, and expectations when working or studying in a German-speaking environment. Students will learn about organizations and companies that offer opportunities for BC students such as Congress Bundestag Youth Exchange and Fulbright. A visit to a German company is also planned. Not suitable for native speakers of German.

**GERM216001**  
**Modern Jewish Thought**  
**Block, Nicholas**  
**Fall 2023**  
This course investigates the impact of modernity on Jewish thought and religion. Highlights include readings from Baruch Spinoza, Moses Mendelssohn, Martin Buber, and Susannah Heschel. Modernity necessitated that Jews renegotiate their identity as they came to be defined along religious, national, and racial lines. The rise of the nation-state led Jews to confront a crucial question: how can they belong to both the Jewish people and as citizens of their countries? How can the modern Jew co-exist with religious law and tradition? We will turn to philosophers and thinkers as they addressed the modern historical phenomena of antisemitism, Zionism, the Holocaust, and feminism. Conducted in English.

The honors thesis in German Studies is offered to interested students who maintain a cumulative average of at least 3.3 in German. These students may begin a six credit research project that will lead to a 60 to 80 page honors thesis completed during the fall and spring of their senior year. The thesis is a major scholarly enterprise entailing independent research and writing; the final product is an essay embodying the results of original research and substantiating a specific view of the subject matter. Interested students should initiate the preparatory planning during junior year.

Constructing Deviance: Madmen, Hysterics, and Criminals
Bowles, Daniel J
Spring 2024
This is an Enduring Question course and is open to FRESHMEN only. You must take SOCY1710 with this course. This course traverses a history of our cultural and aesthetic conceptions of otherness, abnormality, madness, illness, abjection, and sexual difference through literature and theory. Such notions are bound inextricably to the ways in which we define normality and to the tacit processes of exclusion and discrimination we employ for those definitions. In this course, textual representations of threshold figures and experiences guide students in discovering a poetics of deviance: how what we consider threatening, abnormal, unreasonable, incomprehensible, repellent, or deviant both constitutes a cultural, aesthetic construct and shapes our own changing self-understanding, identity, and imagination.

GERM201101
Deutscher Film
Block, Nicholas
Spring 2024
Conducted in German. An introduction to German culture from the Weimar Republic to the present through the medium of film. The Weimar Republic, the Nazi period, Occupied Germany, East and West Germany, and today's Berlin Republic will be examined through short films, authorial films, and cinematic films, including those directed by Fritz Lang, Leni Riefenstahl, Werner Herzog, and Fatih Akin, among others. The German cinema will be the subject of discussion while focusing on writing and grammar review.

**GERM223901**  
**Knights, Castles, and Dragons**  
**Resler, Michael**  
**Spring 2024**

Conducted in English with all texts in translation. Counts toward German major, German minor, and interdisciplinary German Studies minor. A study of the masterpieces of the first great blossoming in German literature including the Nibelungenlied, Tristan, and Hartmann von Aue's Erec. Central to the works of this age are (1) the rise of knighthood and (2) the spreading to Germany of the legend of King Arthur and the knights of the Round Table. In addition, older Germanic-heroic influences will be examined in certain of the works. The literature will be discussed in the larger context of its sociological and historical background. The literary traditions of France will be systematically linked to contemporary developments in Germany.

**Credits:** 3  
**Room and Schedule:** Gasson Hall 310 MWF 12:00 Noon-12:50PM  
**Satisfies Core Requirement:** Literature

GERM224001
King Arthur in German Literature
Resler, Michael
Spring 2024
Conducted in English with all texts in English translation. Counts toward German major, German minor, and German Studies minor. A study centering on the most popular and enduring of all medieval legendary figures. We will examine the early texts from which the Arthurian mythology took root and contributed to the eventual spread into Germany of the tales of King Arthur and the Knights of the Round Table. We will then focus on a close reading of four or five of the most significant Arthurian romances within the German tradition. In addition, we will systematically trace the relationship between this highly idealized world of literary knighthood and real-life contemporary historical and social events of the twelfth and thirteenth centuries.

Credits: 3
Room and Schedule: Stokes Hall 205S MWF 10:00AM-10:50AM

GERM300601
Kindheit und Krise
Bowles, Daniel J
Spring 2024
Conducted in German. In this seminar we read and discuss recent novels written in German (since roughly 2007) that highlight the challenges, aspirations, and adventures of childhood in order to take the pulse of contemporary German cultures. What can living authors tell us about how we think of childhood? How might fictional texts about the traumas in and of childhood help us develop strategies for coping with our futures? Topics include coming of age, genocide, antisemitism, race, auto-fiction, dystopias, family relationships, and others. Authors may include Vennemann, Fritsch, Kracht, Drscher, Wenzel, Herrndorf, and others.

SPAN101501
Elementary Spanish I
Falconi, Silvana
Summer 2023
Conducted in Spanish This introductory course is designed for students with no prior Spanish experience as well as those who have had some high school Spanish. Elementary Spanish I provides a strong foundation in speaking, listening comprehension, reading and writing as well as exploring the products, practices and perspectives that are unique to Hispanic cultures. This course follows a communicative approach, which springs from the idea that languages are best learned when real-world information becomes the focus of student activities. Students will interact in Spanish with the instructor and with classmates. By the end of this course, students should be able to successfully handle in Spanish a significant number of basic communicative tasks. Important note: Students who place into this course through the Spanish Placement Test may not enroll at a different level course without the explicit and prior permission of the coordinator

Credits: 3
Room and Schedule: On-line Asynchronous
Satisfies Core Requirement: None
Prerequisites: This course is for beginners and all sections are 3-credits unless otherwise indicated. Students with prior Spanish experience are admitted only after taking the placement test.

SPAN101601  
Elementary Spanish II  
Falconi, Silvana  
Summer 2023
Conducted in Spanish Elementary Spanish II is the second course in the first-year Elementary Spanish I and II sequence. It continues to provide a strong foundation in speaking, listening comprehension, reading and writing as well as exploring the products, practices and perspectives that are unique to Hispanic cultures. This course follows a communicative approach, which springs from the idea that languages are best learned when student activities involve critical thinking about real-world information. Students will interact in Spanish with the instructor and with classmates. By the end of this course, students should be able to successfully handle in Spanish a significant number of communicative and writing tasks in different time frames. Important note: Students who place into this course through the Spanish Placement Test may not enroll at a different level course without the explicit and prior permission of the coordinator.

SPAN101602  
Elementary Spanish II  
Falconi, Silvana  
Summer 2023
Conducted in Spanish Elementary Spanish II is the second course in the first-year Elementary Spanish I and II sequence. It continues to provide a strong foundation in speaking, listening comprehension, reading and writing as well as exploring the products, practices and perspectives that are unique to Hispanic cultures. This course follows a communicative approach, which springs from the idea that languages are best learned when student activities involve critical thinking about real-world information. Students will interact in Spanish with the instructor and with classmates. By the end of this course, students should be able to successfully handle in Spanish a significant number of communicative and writing tasks in different time frames. Important note: Students who place into this course through the Spanish Placement Test may not enroll at a different level course without the explicit and prior permission of the coordinator.

SPAN111501
Intermediate Spanish I
Ioannou, Vasilis
Summer 2023
Conducted in Spanish. Intermediate Spanish I is the first course in the second-year sequence. It continues to develop and strengthen students proficiency in the Spanish language as well as to increase their cultural understanding. Emphasis remains on the four skills and on critical thinking. Throughout the course, students will develop fluency and accuracy, and focus on communication. They will expand the vocabulary and enhance their understanding of essential Spanish grammar concepts. Short literary texts, cultural readings and audiovisual materials will provide opportunities to learn to appreciate cultural differences and impart authentic insight into the Hispanic world. By the end of this course, students should be able to successfully discuss in Spanish topics of importance to the twenty-first century, with emphasis on the development of critical thinking skills in addition to the refinement of the four basic language skills. Important note: Students who place into this course through the Spanish Placement Test may not enroll at a different level course without the explicit and prior permission of the coordinator.

SPAN111601  
Intermediate Spanish II  
Cuneo, Pia  
Summer 2023
Conducted in Spanish. Intermediate Spanish II is the second course in the second-year sequence with a continued emphasis on the four skills and on critical thinking. This course focuses on vocabulary building, the examination of some of the finer grammar points, and moving students towards a more complex level of comprehension and expression. Students will continue to work with short literary texts, cultural readings and audiovisual materials. After successful completion of this course, the foreign language requirement will be fulfilled for schools that require a 4th-semester proficiency. Important note: Students who place into this course through the Spanish Placement Test may not enroll at a different level course without the explicit and prior permission of the coordinator.

SPAN221501
Spanish Conversation, Composition, and Reading I
Gil Berrio, Yohana M
Summer 2023
Conducted in Spanish. Satisfies Foreign Language Proficiency core requirement. The main objective of this course is to consolidate students' skills so that upon successful completion of the sequence (CCR1 and CCR2) they will have acquired a proficient level of Spanish. Students will acquire discursive fluency and accuracy by working on the following skills: listening and reading comprehension, writing, speaking, and oral interaction. The course focuses on complex grammar topics and extensive vocabulary, as well as on expanding students' knowledge of cultural and historical aspects of Spanish speaking countries. Likewise, the course will foster students' analytical, critical, and creative skills in the target language through the use of a variety of authentic materials such as literary texts, newspaper texts, and audiovisual materials.

Intermediate Spanish I

Ramos Orta, Yuliana M

Fall 2023
Conducted in Spanish. Intermediate Spanish I is the first course in the second-year sequence. It continues to develop and strengthen students proficiency in the Spanish language as well as to increase their cultural understanding. Emphasis remains on the four skills and on critical thinking. Throughout the course, students will develop fluency and accuracy, and focus on communication. They will expand the vocabulary and enhance their understanding of essential Spanish grammar concepts. Short literary texts, cultural readings and audiovisual materials will provide opportunities to learn to appreciate cultural differences and impart authentic insight into the Hispanic world. By the end of this course, students should be able to successfully discuss in Spanish topics of importance to the twenty-first century, with emphasis on the development of critical thinking skills in addition to the refinement of the four basic language skills. Important note: Students who place into this course through the Spanish Placement Test may not enroll at a different level course without the explicit and prior permission of the coordinator.

SPAN111504  
Intermediate Spanish I  
Mirete Hernandez, Marta  
Fall 2023
Conducted in Spanish. Intermediate Spanish I is the first course in the second-year sequence. It continues to develop and strengthen students proficiency in the Spanish language as well as to increase their cultural understanding. Emphasis remains on the four skills and on critical thinking. Throughout the course, students will develop fluency and accuracy, and focus on communication. They will expand the vocabulary and enhance their understanding of essential Spanish grammar concepts. Short literary texts, cultural readings and audiovisual materials will provide opportunities to learn to appreciate cultural differences and impart authentic insight into the Hispanic world. By the end of this course, students should be able to successfully discuss in Spanish topics of importance to the twenty-first century, with emphasis on the development of critical thinking skills in addition to the refinement of the four basic language skills. Important note: Students who place into this course through the Spanish Placement Test may not enroll at a different level course without the explicit and prior permission of the coordinator.

Fall 2023
Conducted in Spanish. Satisfies Foreign Language Proficiency core requirement. The main objective of this course is to consolidate students' skills so that upon successful completion of the sequence (CCR1 and CCR2) they will have acquired a proficient level of Spanish. Students will acquire discursive fluency and accuracy by working on the following skills: listening and reading comprehension, writing, speaking, and oral interaction. The course focuses on complex grammar topics and extensive vocabulary, as well as on expanding students' knowledge of cultural and historical aspects of Spanish speaking countries. Likewise, the course will foster students' analytical, critical, and creative skills in the target language through the use of a variety of authentic materials such as literary texts, newspaper texts, and audiovisual materials.

SPAN339001
Advanced Oral Proficiency in Spanish Practicum
Gil Berrio, Yohana M
Fall 2023
This one-credit workshop is designed to advance students oral Spanish using Hispanic social contexts and texts. Course materials will help students improve their speaking fluency, pronunciation, and expand their knowledge of vocabulary in the context of correct grammatical expression. Special attention is given to advanced areas of Spanish grammar appropriate for argumentation. Course materials will treat current issues and include films, newspaper articles, interviews, paintings, as well as literary or historical readings. Students will be assessed based on the progress they make in their linguistic proficiency. Enrollment preference will be given to Hispanic Studies majors and minors.

SPAN664501
Race and Representation in Spain (19th-21st centuries)
Tang, Wan S
Fall 2023
Course conducted in Spanish and fulfills the Post-1800 Peninsular requirement for Hispanic Studies majors. This course examines the literary and visual representation of race as the concept has evolved in Spain from the nineteenth century through the present. We focus particularly on how Spain's history of colonialism and contemporary waves of immigration from Eastern Europe, Asia, Latin America, and Africa have shaped Spanish discourses on race, such as the construction of a Spanish "race" and depictions of the racial Otherness of colonized people abroad and immigrant populations within Spain. Finally, this course amplifies the voices of those who have been subject to cultural stereotyping, orientalism, and racism throughout Spanish history from the 1800s onwards.

Credits: 3
Room and Schedule: Stokes Hall 205S TuTh 03:00PM-04:15PM
SPAN665201
Hispanic Nobel Prize Winners in Literature
Mizrahi, Irene
Fall 2023
A wide variety of Spanish and Latin American writes have been honored by the Swedish Academy since the first literary Nobel Prize award in 1901. The literary achievements of these authors play an essential role in the development of twentieth-century Hispanic literature. Although all the Hispanic prize recipients will be taken into account, we will concentrate on eight winners spanning the twentieth century, Gabriel García Márquez and Camilo José Cela among them. By studying limited selections of their representative works, of different genres, students gain an understanding of linguistic and ideological dimensions responsible for the Nobel award to each laureate. Conducted in Spanish

**SPAN668301**  
On the Verge of the World. Hispanic Migrants and the Arts  
Cruz Gonzalez, Gerardo  
**Fall 2023**  
Course is taught in Spanish and fulfills the Post-1900 Latin American requirement for Hispanic Studies majors. What is the experience of the migrant journey when talking about children, women, or families? How does this transit and arrival into a territory impact people? This course will explore canonical and emerging works of literature, cinema, and the arts to listen to the voices and know the faces of migrants from the Hispanic world. This exploration will allow us to observe historical moments of displacement and the current humanitarian crisis that migration represents. To understand this phenomenon, this course will map the inter- and trans-continental cartographies and trajectories involved and focus on the affected subjects' individual experiences.

SPAN669801
Generation of 98
Mizrahi, Irene
Fall 2023
Conducted in Spanish and fulfills the Post-1800 Peninsular Literature and Culture requirement for majors. Spanish arts flourished intensely during the last years of the 19th century, when the works of some of the most important authors in the history of Spain appeared, such as the versatile Miguel de Unamuno, the playwright Jacinto Benavente (Nobel Prize for Literature in 1922), and the essayist José Ortega y Gasset. In this course we will discuss the characteristics that define the Generation of 98 and the authors that compose it, paying attention to the following key aspects: the history of Spain (especially the colonial wars of 1898 and the crisis of the monarchy); the relationship of Spanish literature with Latin American and European art; and the writers traditionally marginalized by criticism. In this course we will read a selection of works of diverse genres (essays, novels, poetry, and theater) that will help us improve our ability to interpret and enjoy literature, while we review a fundamental phase in the history of Spain and practice the four skills of Spanish (speaking, listening, writing and reading).

Hispanic Studies Courses: Spring 2024

SPAN101501
Elementary Spanish I
Ramirez, Kassandra
Spring 2024
Conducted in Spanish This introductory course is designed for students with no prior Spanish experience as well as those who have had some high school Spanish. Elementary Spanish I provides a strong foundation in speaking, listening comprehension, reading and writing as well as exploring the products, practices and perspectives that are unique to Hispanic cultures. This course follows a communicative approach, which springs from the idea that languages are best learned when real-world information becomes the focus of student activities. Students will interact in Spanish with the instructor and with classmates. By the end of this course, students should be able to successfully handle in Spanish a significant number of basic communicative tasks. Important note: Students who place into this course through the Spanish Placement Test may not enroll at a different level course without the explicit and prior permission of the coordinator.

Credits: 3
Room and Schedule: Gasson Hall 209 MWF 10:00AM-10:50AM

Spring 2024
Conducted in Spanish Elementary Spanish II is the second course in the first-year Elementary Spanish I and II sequence. It continues to provide a strong foundation in speaking, listening comprehension, reading and writing as well as exploring the products, practices and perspectives that are unique to Hispanic cultures. This course follows a communicative approach, which springs from the idea that languages are best learned when student activities involve critical thinking about real-world information. Students will interact in Spanish with the instructor and with classmates. By the end of this course, students should be able to successfully handle in Spanish a significant number of communicative and writing tasks in different time frames. Important note: Students who place into this course through the Spanish Placement Test may not enroll at a different level course without the explicit and prior permission of the coordinator.

**Credits:** 3  
**Room and Schedule:** Stokes Hall 363S MWF 12:00 Noon-12:50PM  
**Satisfies Core Requirement:** None  
**Prerequisites:** SPAN1015 or Admission by placement test and all sections are 3-credits unless otherwise indicated.

Gelardo-Rodriguez, Teresa  
Spring 2024
Conducted in Spanish. Intermediate Spanish I is the first course in the second-year sequence. It continues to develop and strengthen students' proficiency in the Spanish language as well as to increase their cultural understanding. Emphasis remains on the four skills and on critical thinking. Throughout the course, students will develop fluency and accuracy, and focus on communication. They will expand the vocabulary and enhance their understanding of essential Spanish grammar concepts. Short literary texts, cultural readings and audiovisual materials will provide opportunities to learn to appreciate cultural differences and impart authentic insight into the Hispanic world. By the end of this course, students should be able to successfully discuss in Spanish topics of importance to the twenty-first century, with emphasis on the development of critical thinking skills in addition to the refinement of the four basic language skills. Important note: Students who place into this course through the Spanish Placement Test may not enroll at a different level course without the explicit and prior permission of the coordinator.

**Spring 2024**

Conducted in Spanish. Intermediate Spanish II is the second course in the second-year sequence with a continued emphasis on the four skills and on critical thinking. This course focuses on vocabulary building, the examination of some of the finer grammar points, and moving students towards a more complex level of comprehension and expression. Students will continue to work with short literary texts, cultural readings and audiovisual materials. After successful completion of this course, the foreign language requirement will be fulfilled for schools that require a 4th-semester proficiency. Important note: Students who place into this course through the Spanish Placement Test may not enroll at a different level course without the explicit and prior permission of the coordinator.

Conducted in Spanish. Satisfies Foreign Language Proficiency core requirement. The main objective of this course is to consolidate students' skills so that upon successful completion of the sequence (CCR1 and CCR2) they will have acquired a proficient level of Spanish. Students will acquire discursive fluency and accuracy by working on the following skills: listening and reading comprehension, writing, speaking, and oral interaction. The course focuses on complex grammar topics and extensive vocabulary, as well as on expanding students' knowledge of cultural and historical aspects of Spanish speaking countries. Likewise, the course will foster students' analytical, critical, and creative skills in the target language through the use of a variety of authentic materials such as literary texts, newspaper texts, and audiovisual materials.

SPAN339001
Advanced Oral Proficiency in Spanish Practicum
Gil Berrio, Yohana M
Spring 2024
This one-credit workshop is designed to advance students oral Spanish using Hispanic social contexts and texts. Course materials will help students improve their speaking fluency, pronunciation, and expand their knowledge of vocabulary in the context of correct grammatical expression. Special attention is given to advanced areas of Spanish grammar appropriate for argumentation. Course materials will treat current issues and include films, newspaper articles, interviews, paintings, as well as literary or historical readings. Students will be assessed based on the progress they make in their linguistic proficiency. Enrollment preference will be given to Hispanic Studies majors and minors.

Room and Schedule: Higgins Hall 280 M 03:00PM-03:50PM
SPAN339301
Spanish-American Philosophy
Gurtler, Gary, SJ
Spring 2024
This course is designed to give the student an opportunity to look at some fundamental philosophical issues regarding human nature and the origins and development of human thought from a fresh perspective. Unamuno's Tragic Sense of Life presents a critique of the rationalism of modern European thought by focusing on human life as dream, theater, and struggle in line with Don Quijote. Paz's The Labyrinth of Solitude explores the meaning of human existence through the lens, or perhaps the mask, of the Mexican quest for identity. Ortega y Gasset and Zubiri represent the contemporary Spanish interaction with European phenomenology.

SPAN661701
Food and Identity in Latin/o American Literature and Culture
Kulez, Ali
Spring 2024
Conducted in Spanish and fulfills the Post-1900 Latin American literature and culture requirement for HS majors. This course examines how images of food and eating mediate questions of identity in Latin American and U.S. Latino cultures from the late 1920s to the present. Studying a diverse range of materials including essays, stories, manifestos, performances, and visual art, we will reflect on the ways in which such scenes intervene in discussions of identity, cosmopolitanism, and national sovereignty. The students will have the chance to meet chefs, food justice activists, and restaurateurs to reflect further on contemporary issues around consumption.

SPAN665301
**Climate Fictions and Realities from Latin America**
Cruz Gonzalez, Gerardo
Spring 2024
Course is taught in Spanish and fulfills the Post-1900 Latin-American requirement for HS Majors.

What has led humanity to the current environmental crisis, and what are its consequences? How do we envision the future of humans and other species in post-environmental collapse and extinction scenarios? In this course, we will explore from an ecocritical perspective how Latin America represents and responds to this crisis through literature, film, and the arts. We will address canonical and emerging authors who have created narratives about extractivism, environmental disasters, activism, the struggle of indigenous peoples to defend the land, climate refugees, and speculative stories of cli-fi (climate fiction). These works will help us to rethink and reevaluate our position.

Early Spanish American Women Writers
Beckjord, Sarah
Spring 2024
Conducted in Spanis. Fulfills pre-1900 requirement in Latin American literature for Hispanic Studies Majors; elective for Minors in Hispanic Studies, Latin American Studies, and Women's Studies. Early Spanish-American society offered both unique opportunities and constraints for women writers. From women who participated in military campaigns to others who wrote from the convent or in the context of the literary circle, these authors reflect on the position of women in society, as well as on questions of love, marriage, family, work, and the public role of the female thinker and writer. Readings in a variety of genres by major writers from the sixteenth to the nineteenth century, and connections to representative twentieth-century works.

Brody, Rachel I
Summer 2023
This course covers several centuries of time and traces the political, social, economic, and cultural changes that created the modern world. Depending on the expertise of the instructor, different parts of the world may serve as focal points for examining the complex historical processes behind modern-day transnational relationships, values, and ideas. As part of the Core Curriculum, this course seeks to broaden students' intellectual horizons by exposing them to new places, periods, and perspectives.

HIST140101
History of the Italian Mediterranean: Una Faccia, Una Razza
Shlala, Elizabeth H
Summer 2023
Today, the Mediterranean Sea, which once appeared to be the cradle of cosmopolitan civilizations, has become the twenty-first century's largest mass grave. The region that served as the heart of a world system for centuries, is now a heavily policed crossroads that divides more than it unites. Levantine has become a derogatory word. Venice is under water, losing her cultural heritage inch by watery inch due to climate change. In this course, we will use primary historical sources to analyze the continuities and changes of the Italian Mediterranean with Venice as our geographical, historical, and architectural center. It is an opportunity for first-hand intellectual exploration that we will not have for much longer.

**Contentious History and the Politics of Contemporary Korea**

Hwang, Ingu

**Summer 2023**

This introductory immersion course surveys the contentious intersection between history and politics in contemporary Korea. Students will explore the following questions: What were the critical historical experiences and issues that became part of the public discourse and catalyzed political contestations in local and international/global communities? Why did these issues become contentious and for whom? What actions and counteractions did they inspire? In critically examining these questions, students will address four topics: postcolonial disputes, national division, economic development and social justice, and (post-)democratization protests. To facilitate in-class discussions, students need to engage critically with textual and media sources. They are also required to actively participate in the historical and cultural immersion/excursion programs, including the National Museum of Korean Contemporary History, the DMZ tour, and the Kim Dae-jung Presidential Library and Museum.

**HIST754502**

Graduate Colloquium: Decolonizing History, Thinking Democracy
In 2022, the president of the American Historical Association set off a firestorm of controversy by questioning presentist politicizations of history. Indeed, from the 1619 Project to the Trump Administrations 1776 Report, today the political stakes of historical interpretation are front and center. Notwithstanding popular confusion about critical race theory, this course will examine how decolonizing history leads to questions of democracy, and how both rely on theory -- critical ways of seeing and thinking through relationships among the past, present, and future. Authors include bell hooks, Leela Gandhi, Frantz Fanon, Dipesh Chakrabarty, Angela Y. Davis, and Jacques Rancire.

---

Early American history is a dynamic and broad field. No longer just about English territorial (and military) conquest, the field now embraces other European powers in North America, indigenous nations and confederacies, enslaved Africans, and the interactions of these various groups. The picture that emerges is vibrant, complex, interactive, as well as tragic and violent. This class will explore recent histories of vast early America.

HIST101101
Atlantic Worlds I
Grasberger, Anne
Fall 2023
Fulfills the History Core I Requirement This course surveys the history of the Atlantic world between the arrival of the Black Death in Europe in the mid-fourteenth century and the French Revolution at the end of the eighteenth century. We will pay particular attention to the ways in which the often violent encounters between people in this region of the world produced new social, cultural, and economic forms. Among these were ideas about gender, race, and the relationship between communities and individuals; notions of equality; and the emergence of a global system of trade.

HIST101201
Atlantic Worlds II: Race, Religion, and the Struggle for Democracy
Mallampalli, Chandra
Fall 2023
Formerly Modern Atlantic Worlds This course is a continuation of Atlantic Worlds I, but with new thematic impulses. The course looks at: 1.) The Enlightenment and its challenges to religion; 2.) The rise of the teleological ideology of Marxism/Leninism and its political properties in relation to religion, race, and the state; 3.) European colonial expansionism and its implementation in areas of the world where democratic values were becoming skewed over time; 4.) racial thinking and the role of the churches in the 20th century as eugenic movements swept through various sections of the democracies and as totalitarianism rose in Europe. Business history, Latin American history, African history, Jesuit history, and even the history of Jazz all play a role in this class on the ever-expanding Atlantic World!

Formerly Modern Atlantic Worlds This course is a continuation of Atlantic Worlds I, but with new thematic impulses. The course looks at: 1.) The Enlightenment and its challenges to religion; 2.) The rise of the teleological ideology of Marxism/Leninism and its political properties in relation to religion, race, and the state; 3.) European colonial expansionism and its implementation in areas of the world where democratic values were becoming skewed over time; 4.) racial thinking and the role of the churches in the 20th century as eugenic movements swept through various sections of the democracies and as totalitarianism rose in Europe. Business history, Latin American history, African history, Jesuit history, and even the history of Jazz all play a role in this class on the ever-expanding Atlantic World!

HIST107701  
Globalization I  
Cole, Emily  
Fall 2023  
The course explores the connections that are diminishing the significance of traditional geographical, cultural, and political boundaries. Global connections have increased rapidly in the past half-century, but global convergence has been a powerful force during the eight centuries covered by this survey. The year-long course examines three kinds of globalization: commercial, cultural, and political. While recognizing the Western world's expansiveness as a key force for globalization, the course gives extensive attention to how people from other continents have also been major agents in initiating, promoting, and resisting globalizing forces.

HIST109401
Modern History II
Carper, Katherine S
Fall 2023
This course is the second half of the History Core. Offered in the fall semester of the academic year. Fulfills Core History II. This course covers several centuries of time (1800 and after) and traces the political, social, economic, and cultural changes that created the modern world. Depending on the expertise of the instructor, different parts of the world may serve as focal points for examining the complex historical processes behind modern-day transnational relationships, values, and ideas. As part of the Core Curriculum, this course seeks to broaden students' intellectual horizons by exposing them to new places, periods, and perspectives.

HIST162701
Making the Modern World: Design, Ethics & Engineering
Krones, Jonathan S; Perreault, Luke; Rodriguez, Hector E; Tonn, Jenna A
Fall 2023
Together we will consider how engineers and other stakeholders navigate risks related to industrial and environmental disasters; balance financial, technological, and regulatory pressures associated with complex socio-technical problems; and negotiate technical and political liabilities surrounding artificial intelligence, surveillance, and climate adaptation. Students will collaborate on group design projects based on human-centered engineering. Engineering systems present pressing technical, ethical, and moral problems that we must grapple with as engaged global citizens. In this class students will explore the social, cultural, and institutional history of engineering; learn foundational skills in quantitative analysis of real-world engineering designs; and understand the political, environmental, economic, and ethical tradeoffs associated with building the modern world. This is a Complex Problems course and requires a weekly lab and reflection.

Together we will consider how engineers and other stakeholders navigate risks related to industrial and environmental disasters; balance financial, technological, and regulatory pressures associated with complex socio-technical problems; and negotiate technical and political liabilities surrounding artificial intelligence, surveillance, and climate adaptation. Students will collaborate on group design projects based on human-centered engineering. Engineering systems present pressing technical, ethical, and moral problems that we must grapple with as engaged global citizens. In this class students will explore the social, cultural, and institutional history of engineering; learn foundational skills in quantitative analysis of real-world engineering designs; and understand the political, environmental, economic, and ethical tradeoffs associated with building the modern world. This is a Complex Problems course and requires a weekly lab and reflection.

HIST163001
The Meaning of Boston: History and Memory
Quigley, David
Fall 2023
What does a city--this city in which we find ourselves--mean? Meaning flows through a city just as populations, capital, power, resources, and ideas do, and each of these flows conditions the others. As we consider what Boston has meant in different moments and to different people, we engage follow-on questions: How does the form of a text express meaning? How can we understand the relationship between that text and the historical moment in which it took form, and/or the historical moment it seeks to capture? What happens when we consider the local in relation to national and international events and artistic movements? Our students will develop skills of historical reasoning, will learn how to interpret works of literature and allied arts, and will sharpen their analytical thinking and writing skills within the disciplinary traditions of history and literary/cultural studies. We will encourage them to move beyond the received meanings and standard tropes of Boston--the accent, the city on a hill, the regular-guy mythos retailed by Hollywood--and explore questions that Boston has consistently raised about human beings and nature, race and class difference, the form and function of the good life, the double-edged quality of moral causes, and the contest between the persistence of old ways and the succession of new ones.

HIST181601
Geographies of Empires
Shlala, Elizabeth H
Fall 2023
The age of empires is past--or is it? In this course, we examine the enduring ideas of empires and their challengers through the present day, using a historical lens. Beginning with the traditional geographies of maps, we explore how empires colonized not only territories with physical borders, but also bodies and minds, using race, gender, sexuality, ethnicity, education, laws, and institutions centered in Africa.

HIST184101
Core Topics: When Worlds Collide: From Contact to the Constitution
Lyerly, Cynthia L
Fall 2023
This course will examine North American history from the perspective of the collision and exchange of cultures and peoples. From the Mississippian Indian civilization at Cahokia to the Illinois, Iroquois, Algonkian, and other Native American peoples, we will see how Indians resisted, adapted, and interacted with French, English, Spanish, and Dutch Europeans. African peoples were another key part of this cultural collision, as hundreds of thousands were brought to North America in the slave trade. The course ends with the consolidation of white European power in the creation of the United States. Major themes in the course are race, power, and religion.

**China From Antiquity to the Middle Ages**  
**Zhang, Ling**  
**Fall 2023**  
Fulfills the LAMA Requirement for History Majors and Minors  
This survey offers a basic understanding of the historical transitions of Chinese society, politics, and culture. Among the topics covered are: the historical discourse of the emergence of early China; archaeological representations of early kingdoms and their path toward the formation of empire; territorial expansion versus the growth of a Chinese identity vis--vis non-Chinese ethnic groups; Confucianism as political and ethical philosophy; the Medieval Economic Revolution; and maritime China and its early encounters with the West.

HIST216201
Muslim Africa
Semley, Lorelle
Fall 2023
Fulfills the LAMA Requirement for the History Major and Minor. The world watched in wonder at the Moroccan soccer team’s improbable run during the 2022 World Cup, not fully understanding how one country inspired African, Arab, and Amazigh (indigenous North African) communities alike. Trade networks, cultural exchange, racial ideologies, European colonialism, gendered practices, and recent Islamist political movements have been part of historical processes of religious change touching the entire African continent. Historical sources including eyewitness accounts, memoir, fiction, film, and works by African scholars and artists show how the history of Islam is one part of Africa’s long global history.

HIST220101
Greek History
Thatcher, Mark R
Fall 2023
A study of the history of Greece from the Bronze Age in the second millennium BCE to the preeminence of Alexander of Macedon in the 4th century. The course will focus on such broad topics as the development of Greek social and political institutions, notions of justice, freedom, and Greek identity, relations among Greek city-states and with foreign nations, imperialism, the golden age of Greek literature, and the rise of Macedonian monarchy. Emphasis will be on the study of the ancient sources: literary, historiographic, archaeological, and epigraphic.

**Roman Law and Family**  
**Eshleman, Kendra J**  
**Fall 2023**  
We will look at the makeup and dynamics of the Roman household through legal sources, which allow investigation of Roman legal arguments and approaches to issues such as marriage, dowry, divorce, disciplining children, adultery, procreation, adoption, and women's rights, and the role of the pater familias. We will also observe similarities and differences between Roman family law and modern American family law. By the end of the course you will have gained a better understanding not only of the Roman family but also of how societies--including our own--use law to order and regulate family relationships.

HIST220701
Roman Spectacles
Polt, Christopher B
Fall 2023
Rome overflowed with spectacle: theatrical shows and gladiatorial combats, chariot races and military parades, animal hunts and funeral processions, ritual sacrifices and Christian martyrdoms. In this course we will explore what public spectacles looked like in Rome and why they were ubiquitous sights in the ancient world, paying special attention to: who produced public spectacles and what benefits they derived from them, tangible or otherwise; how spectators responded to and participated in such events; and how spectacular displays reinforced and/or challenged social norms and traditional values, both individually and for society at large. Students will have hands-on opportunities to reconstruct and perform select spectacles in order to reflect on the ancient and modern experience of spectacular public display.

HIST225801
The British Empire: Its Rise and Fall
Rafferty, Oliver P, SJ
Fall 2023
How did a relatively small country at the edge of Europe come to acquire the largest empire in history? At its height it covered 24% of the earth's surface. How was it built up? What sustained it? What were the political, diplomatic, and military accomplishments of this empire "o'er which the sun never set?" Beginning with Colonial America this course will trace the history of the empire, and the men and women who shaped it, from the loss of the American colonies in 1781 to the handover of Hong Kong to China in 1997.

U.S. History I
Murphy, Thomas, SJ
Fall 2023
Fulfills the US History requirement for Majors Followed in spring semester by HIST2402 A survey of the political, social, economic, and intellectual developments that have shaped and influenced the growth of the United States from a colonial appendage to a world power. The course seeks to provide a firm chronological foundation for the study of the American past but seeks to go beyond narrative and to provide analytical insights into the institutions, society, economy, and ideas upon which American civilization is founded. Consideration will be given to continuity, change, and conflict in American society.

HIST241201
The Pacific Northwest
Murphy, Thomas, SJ
Fall 2023
This course explores a region defined as today including the American states of Oregon, Washington, Idaho, and Alaska, plus the Canadian province and territory of British Columbia and the Yukon. Themes include Indigenous culture; Euro-American colonization; tensions between natural resource extraction and environmental preservation; labor and immigration; race relations; the emergence of United States and Canada as the region's two nation-states; the relationship of this region with its federal governments and national economies. There will be particular attention to the role of arrivals from New England in tying the Northwest to the East Coast of North America.

HIST246301
We Gon' Be Alright: A Pop History of America
Bonilla, Eddie
Fall 2023
Fulfills US History requirement for History Majors. This course explores U.S. history via the development of popular culture. Students will study the creation and evolution of sports, music, television, and film industries to analyze how underground cultures such as hip hop and LGBT+ ballroom culture moved toward mainstream acceptance. Students will analyze a variety of sources including fashion, dance, cartoons, and radio. Course readings and assignments will also feature songs by musical artists such as Kendrick Lamar and television shows such as RuPaul's Drag Race. Students will gain an understanding of how race, gender, class, and sexuality shape the production and consumption of U.S. culture and vice versa.

HIST247501
America's War in Vietnam
Jacobs, Seth S, PHD
Fall 2023
This course will examine America's thirty-year military involvement in Southeast Asia, one of the most controversial episodes in U.S. history. Students will read a wide variety of primary and secondary sources, from recently declassified state and Defense Department documents to poetry and short stories. Course readings are selected from various points on the left-right political spectrum, with both "hawks" and "doves" receiving their day in court. Lectures will include the origins of the Cold War; the Eisenhower, Kennedy, Johnson, and Nixon presidencies; antiwar activism and other Vietnam era movements; and American soldiers' experience during and after service in Vietnam.

**Saints, Scoundrels, and Sinners: Popes and their Histories from St. Peter to Pope Francis**

**Rafferty, Oliver P, SJ**

**Fall 2023**

This course will exam the evolution of one of the most enduring institutions in human history: the papacy. What were its origins, why it settled in Rome, how did it develop from its simple beginnings to become one of the most powerful organizations in medieval Europe and how did it lose its power? What was the relationship between popes and other powerful figures in history? More importantly we will exam the character, personality, and intellectual dispositions of the men who held the office of pope. We shall also investigate how the pope became infallible and the extent of papal corruption.

HIST262001
From Sappho to Stonewall Landmarks of Gay History
Mormando, Franco A
Fall 2023
An introductory survey of some of the most important moments, figures, debates, and texts in the history of same-sex desire and behavior in the West (Europe and the USA). The course will span the centuries from classical antiquity all the way to, and including, the watershed event of the NYC Stonewall Uprising of 1969, often seen as marking the effective launch of the modern gay rights movement. We will chart the ever-evolving understanding of same-sex desire and behavior on the part of both legal, medical, and religious authorities as well as the private individuals living that reality. Also examined will be the justifications given by church and state for the persecution of gay people over the centuries, as well as the attempts by gay people to fight against that persecution. Our evidence will embrace a wide variety of primary sources, both textual and visual (film and art).

HIST280001
From Slave Patrol to the War on Crime: Policing Blacks Across American History
Summers, Martin A
Fall 2023
During the "racial reckoning" in the summer of 2020, Americans engaged in a lot of discussions about race and the criminal justice system - and especially policing and its historical connections to slavery. While containing some truth, this particular framing of policing obscures a more complex history. This course will explore the larger history of policing Black Americans, from slavery to the early twenty-first century. Topics will include: race and policing in the antebellum period; legal and extralegal forms of policing Blacks in the Jim Crow era; mass incarceration in the late-twentieth century; and activism against the carceral state.

**HIST281701**  
**The U.S. Presidency**  
**Murphy, Thomas, SJ**  
**Fall 2023**  
Fulfills US History requirement for History Majors. Following a prologue of introducing several regional cultures of the United States, this course will examine the childhood and lifelong education of some future Presidents of the United States, who were born into these regional cultures. It will also examine some of their experiences in living and working in other regions, and especially other countries, during their pre-presidential years. So, the focus will be on how where they came from, and where they went, prior to the White House. Substantial attention will also be paid to the influences shaping the First Ladies of these presidents. In addition to learning about the Presidency, the course will also introduce students to the diversity of American regions and cultures and to the interaction of Americans with cultures overseas.

HIST325601
Study and Writing of History: Odd Women to the New Women
Ismay, Penelope G
Fall 2023
History Major Standing In the second half of the nineteenth century in Britain, it was discovered that 30% of women of marriageable age remained unmarried. Contemporary observers were alarmed, dubbing it the "redundant woman problem." They proposed shipping these "odd women" off to male-rich colonies. But in addition to proposals for emigration, a number of women started organizations to train these women in occupations that were respectable and could enable them to live independently. In this class, we will use women's magazines to explore why being single in this period was considered so dangerous and how this problem ultimately produced the "new woman."

HIST343801
Study and Writing of History: Black American Lives in the 19th Century: Narratives, Letters, & Testimonies
Conner, Mycah
Fall 2023
History Major Standing. Via first-person accounts, this course introduces students to the thoughts and actions of Black Americans living in a century of tremendous struggle and transformation, encompassing the expansion of slavery, the Civil War, and Reconstruction. We will read slave narratives, autobiographies, correspondence, affidavits, testimonies before Congress (Klan hearings) and other bodies, and WPA narratives, alongside the scholarship that uses these documents. We will discuss what documents may reveal or omit; the circumstances and intentions of their production; how historians question archives, or caution against archival pessimism. Students will hone their historical skills and write a research paper on a topic of their choice.

HIST350301  
Study and Writing: The Age of 'Discovery'  
Stanwood, Owen C  
Fall 2023  
History Major Standing. During the early modern era (c. 1400-1700) European explorers, colonizers, and missionaries encountered, and wrote about, much of the world, from Asia and Africa to the Americas. In this course we will read many of those valuable but problematic sources and determine what they can tell us about the Europeans who wrote them and the non-Europeans they encountered. The first half of the class will include case studies on voyagers to central Africa, India, Brazil, and both Eastern and Western North America, while in the second half students will complete their own projects on a subject of their choice.

HIST404901
**Farewell to Revolution: Post-Mao China through Film**
Mo, Yajun
Fall 2023
Fulfills the LAMA requirement for History Majors and Minors This seminar explores post-socialist China (1978-present) through its cinematic representation. Throughout the semester, we will view prominent films made in post-Mao era by art-house directors (such as Jia Zhangke) and blockbuster creators (such as Feng Xiaogang) and discuss how Chinese lived through and reflected back on the dramatic changes of the reform era. We will ask: How do contemporary Chinese remember the socialist revolution? What kind of future do they envision for themselves after China embraced global capitalism? How do varied filmmakers address the issues of gender and class inequality, family, ethnicity, modernity, and the nation through film?

**Credits:** 3

HIST407601
**Democracy Movements and Contemporary China**
Mo, Yajun
Fall 2023
Fulfills LAMA requirement for History Majors and Minors This course explores the Tian'anmen Movement as event, experience, and memory. It engages students to examine the rapid and often destabilizing shifts in China since the late 1970s - a period conventionally referred to as "the reform era." Using a variety of readings on the movement (including memoirs, official documents, propaganda, media coverage, and cultural productions in music and art), we will trace the effects of China's earlier experiment with revolutionary socialism on the market-driven present, attending to ways in which the past shapes and haunts the contemporary situation.

**HIST413401**  
**The Ottoman Empire, 1300-1924**  
**Braude, Benjamin**  
**Fall 2023**  
Fulfills the LAMA Requirement for History Majors and Minors The Ottoman Turks founded an empire spanning the three continents of the eastern hemisphere and enduring for nearly three-quarters of a millennium. Despite nomadic origins they established a stable political structure, which grafted the high traditions of Islamic culture onto an ethnically, linguistically, and religiously diverse society. This course explores the evolution of this remarkable enterprise from its origins on the frontiers of Byzantium and Islam through its heyday under Suleyman the Magnificent to its military decline and first steps toward reform.

HIST420201
The Culture of Athenian Democracy
Hoffman, Gail L
Fall 2023
A political and cultural history of Athens during the creation and height of its democracy (circa 480-400 B.C.E.). The course will consider the Persian Wars and their effect on political and constitutional developments in Athens, the workings of the Athenian Democracy under Pericles, and the eventual collapse following the Peloponnesian War. Readings in translation include Thucydides, Plutarch, Aristotle, Xenophon, Plato, and the Greek playwrights (Aeschylus, Sophocles, Euripides, and Aristophanes). Emphasis will be on integrating historical, literary, and archaeological evidence to provide as complete a picture as possible of this dynamic period of ancient history.

HIST422301
The French and Haitian Revolutions
Reinburg, Virginia
Fall 2023
Fulfills the LAMA requirement for History Majors and Minors. This course explores the intertwined histories of the French and Haitian revolutions, which together shaped the modern world. We will learn about old regime society in France, the pre-conquest Caribbean, empire and colonization, politics, social movements, the slave trade, racism, and the role of ideas in sparking revolutions and carrying them forward into the future. We will examine large scale social, material, and political forces, as well as the individuals and communities that created or resisted revolution. A major theme of the course will be the complex and contradictory meanings of equality and liberty around the French Atlantic world.

**HIST422701**

**The Ends of Man: Existentialism/Post-Structuralism**

**Bourg, Julian E**

**Fall 2023**

This intellectual history course charts the adventure of French ideas from 1940s existentialism to what became known around the world during the 1970s-1990s as post-structuralism and postmodernism. At issue is the status of man as a figure of Western thought. Following attempts to refound humanism in the wake of the Second World War, the figure of the human subject was intensely criticized by structuralists, anti-colonialists, feminists, and others. Thinkers examined include Jean-Paul Sartre, Simone de Beauvoir, Albert Camus, Claude Levi-Strauss, Frantz Fanon, Aim Csaire, Michel Foucault, Jacques Derrida, Julia Kristeva, Jean-Francois Lyotard, and Jean Baudrillard. Is our future post-humanist?

HIST423201
Michelangelo and His World
Braude, Benjamin
Fall 2023
An interdisciplinary exploration of the life and works of Michelangelo Buonarroti, sculptor, painter, architect and poet, one of the greatest artistic geniuses of Western civilization. Against the historical backdrop of the High Renaissance in Italy, we will study his works, both artistic and literary, examining their roots in the political, philosophical, religious, artistic, and cultural debates of his age as well as in his personal biography.

HIST423301
Renaissance Women
Leone, Stephanie; Ross, Sarah
Fall 2023
This course examines the myriad forms of excellence women achieved during the Italian Renaissance (1400-1600). Even as Renaissance women labored as wives, mothers, nuns, and servants, they also created notable works of literature and art; patronized major projects; held jobs in the urban trades; shaped religious belief and practice; and even governed states. We will examine the work that Renaissance women did beyond "women's work," and analyze the conditions that shaped their professional no less than their personal lives. Our evidence encompasses both textual and material artifacts, including extraordinary objects housed at the MFA and other local repositories.

HIST426201
Ireland in the Age of Revolution: From United Irishmen to United Kingdom, 1798-1803
Beiner, Guy
Fall 2023
Through close inspection of contemporary documents, contextualized by reading of extensive research bibliography, this course examines the impact and ramifications of the Age of Atlantic Revolutions on Ireland, with reference to the secret society of the United Irishmen, the Great Irish Rebellion of 1798, the passing of the Act of Union and the formation of the United Kingdom of Great Britain and Ireland (1801), and the Rising of Robert Emmet in 1803. We will also consider how these landmark events were subsequently remembered.

HIST426701
Life and Death under Stalin
Eaton, Nicole M
Fall 2023
Stalin's rule (1924-1953) marked the most transformational, dramatic, and violent period in Soviet History. The dramatic shifts in Soviet society led both to the long duration of the regime and to its ultimate collapse. The legacies of Stalin and "Stalinism" are still felt today in Russia and the other states of the former Soviet Union. This course is not so much about Stalin the man, as about the society that he helped create and the people who lived and died because of it. Readings focus on ideology, violence, terror, empire, domesticity, resistance, true belief, and the Second World War.

HIST429401
Holocaust Literature: History, Memory, Legacy
Shrayer, Maxim
Fall 2023
An overview of the history and legacy of the Shoah (Holocaust) followed by an examination of the variety of literary responses by literary witnesses and survivors, as well as by writers removed from the wartime horrors by distance, time, country, and language. Questions of metaphysics, ideology, ethics, aesthetics, memory, and cultural theory as formulated and debated in poetry, fiction, nonfiction, and discursive writings. The readings include works originally written in Russian, Yiddish, Polish, German, Italian, French, and English by Ilya Selvinsky, Vasily Grossman, Ilya Ehrenburg, Avrom Sutzkever, Tadeusz Borowski, Paul Celan, Primo Levi, Theodor Adorno, Elie Wiesel, Vladimir Nabokov, Hannah Arendt, Arthur Miller, W. G. Sebald and others. All the required readings will be in English translation.

**HIST440201**  
**Natives and Newcomers in Early America**  
**Stanwood, Owen C**  
**Fall 2023**  
Fulfills the U.S. requirement for History Majors During the colonial period, North America transformed from a native place to a cultural melting pot where a variety of American, European, and African peoples vied for control of the continent. This course will examine the transformation of the continent from the perspective of its original inhabitants, viewing the changes in native lives and intercultural relations from the fifteenth to nineteenth centuries. Topics include trade and communication between Indians and Europeans; Indian slavery; transmission of Christianity; conquest and dispossession of native lands; development of political alliances and pan-Indian movements; and Indian policy in the early United States.

HIST444001
Housing America
Glass, Michael
Fall 2023
Fulfills the US History requirement for History Majors. In the United States today, there is widespread consensus that decent housing should be a human right. At the same time, our political and economic institutions treat housing as a commodity bought and sold in the marketplace. For most Americans, ability to pay dictates their quality of shelter. Taking this contradiction between right and commodity as a starting point, this seminar examines the policies that made America a nation of homeowners. Because housing is always more than just a place to live, we will explore how homeownership is connected to issues of race, gender, sexuality, family, immigration, citizenship, and inequality.

HIST448501
History of Medicine and Public Health/Afr Am Diaspora
Summers, Martin A
Fall 2023
This course is a comparative study of the complex historical interplay of medicine, ideas of racial difference, and relationships of power in the African diaspora. Through an examination of slavery in the Americas, colonialism in Africa, and race relations in postemancipation United States and Caribbean, this course explores the ways in which racial difference has acquired a particular truth through the production of biomedical knowledge and its deployment in therapeutic practice and public health policy. The course will also examine how people of African descent have used medical knowledge and healing practices to contest their subordinate position in racist societies.

**HIST449501**  
**U.S. Foreign Policy I**  
**Jacobs, Seth S, PHD**  
**Fall 2023**  
Fulfills the US History requirement for History Majors  
This course is the first half of a two semester survey of the history of U.S. foreign relations from the Revolutionary War through the present day. Students will examine conflicting interpretations of America's role in the world and trace how that role has changed as the nation grew from thirteen isolated, parochial communities on the Atlantic coast to the greatest military and economic superpower in history. Important topics include the territorial expansion of the American empire, the development of - and debate over - constitutional powers, and the struggle for American markets in Asia and elsewhere.

**Credits:** 3

HIST455101
American Hate
Lyerly, Cynthia L
Fall 2023
Fulfills the US History requirement for History Majors. Racism is, unfortunately, as American as apple pie and baseball. This course explores the roots of racial hatred and the changes in American racism over time. In addition to studying the ideas that buttress racism, this course will examine case studies of racism in practice, such as the Tuskegee syphilis experiment, convict leasing, segregated recreation, the Trail of Tears and Japanese internment.

HIST470501
In the Eye of the Hurricane: An Environmental History of Latin America
Picone, Maria de los Angeles
Fall 2023
Fulfills the LAMA requirement for History Majors and Minors How did mosquitoes shape empires? How did bananas topple regimes? How did an ocean current change a country's diet? These are some of the questions we will address in this course, weaving together two threads of inquiry. We will study historical ideas about nature, science, extraction, and technology, as they appeared embedded in specific power structures. On the other, we will examine the impact of the physical environment on human history in the form of weather events, crop diseases, or topographies. Discussions will also highlight issues around the commodification of nature, climate change, and environmental justice.

This course, required for seniors doing an honors thesis or an advanced independent research project, will guide thesis writers through the art and mechanics of writing a thesis. In the seminar, students will regularly report on their progress, master citations and bibliographies, learn how to structure and outline a project of this length, and by semester's end will prepare a draft of the introduction and first chapter.

HIST530301  
Senior Colloquium: Global Borderlands  
Picone, Maria de los Angeles  
Fall 2023  
Border regions bring together two seemingly opposing concepts: the definition of dividing line and the looseness of an undefined area. They condense meanings of confrontation and encounter, of division and exchange, of mobility and rigidity. This course will examine studies on border regions, from across the globe since 1750. We will read together works epistemologies of borders as they intersect with nation-making, imperialism, resistance, and the environment.

HIST546101
Senior Colloquium: To the Streets: Social Movements in 20c America
Bonilla, Eddie
Fall 2023
Senior History Major Standing. This course historicizes present-day mobilizations within the labor, Black Lives Matter, abolish ICE, and Stop AAIP movements. Course readings and discussions will track the evolution of these movements since the 1900s, analyze how activists push for societal change, and evaluate the obstacles that stand in their way. Students will also grapple with how historians document these social movements and the new forms of knowledge they produce. By the end of the course, students will have an appreciation of the diverse and sometimes contradictory ways activists have tried to imagine a world free of poverty, colonialism, and white supremacy.

**HIST720101**  
**Colloquium: Early Modern European History**  
**Ross, Sarah**  
**Fall 2023**  
This course is designed to assist graduate students with European history concentrations as they prepare for their comprehensive exams, as well as other students for teaching in the Core and entering into broader scholarly conversations. Each week focuses upon a major topic, from Renaissance humanism to the French Revolution. The selected books and articles provide both reliable information and compelling revisions of standard narratives. Students who engage seriously the material, seminar discussions, weekly book reviews and final review essay will become conversant with central developments in Europe from 1400-1800, as well as important new trends in the historiography.

HIST754401
Graduate Colloquium: Don't Be Afraid of Theory!
Bourg, Julian E
Fall 2023
For some, the word theory inspires anxiety and aversion. Its too abstract! Its too hard! Its not practical! Yet all intellectual work requires lenses: from presuppositions about knowledge to evaluative ideals of better and worse. Beginning with the contrast between traditional and critical ways of seeing, this course will follow the 1970s-1990s rise of theory in the humanities, its alleged demise in the 2000s, and the value of theoretical perspectives in humanistic scholarship today. Topics addressed include post-structuralism, postcoloniality, cultural history, gender/queer studies, new historicism, radical democracy, the new materialism, and recent exciting work in the philosophy of history.

Credits: 3
Room and Schedule: Stokes Hall 376S Tu 04:30PM-06:50PM
HIST779901
Graduate Colloquium: Race and Inequality in Modern America
Glass, Michael
Fall 2023
This colloquium surveys recent scholarship about race and inequality in the modern United States. Together we will examine how racial categories have been constructed, how they have changed over time, how they have structured institutions and identities, and how they have rationalized the unequal distribution of power, resources, rights, and privileges. Topics covered include transnational migration, the rise and fall of Jim Crow, the shifting contours of whiteness, redlining and racist real estate practices, the model minority myth, and mass incarceration.

HIST790101  
**Colloquium for Master's Degree Students**  
**Reinburg, Virginia**  
**Fall 2023**  
This graduate colloquium is required for first year masters students in history. In it, we will explore the basics of a career as a professional historian, exploring the concepts of history, historiography and theory, and practicing how to conduct research, write a variety of historical pieces, teach, design courses, and create museum exhibits. We will also look at how to apply the skills used in graduate school to finding a future either in the academy or on an academic career.

HIST800001
Colloquium: Introduction to Doctoral Studies
Sajdi, Dana
Fall 2023
This graduate colloquium is required for and limited to first-year doctoral students in history. The course will explore a range of theoretical and methodological approaches to the study of the past. Exemplary works from a range of regional historiographies will constitute a significant portion of the course reading. The course aims to introduce entering students to central traditions and debates in the discipline.

HIST821501
Graduate Seminar: Modern European History
Pendas, Devin O
Fall 2023
This course is designed to provide a structured setting within which students of modern European history can conceive and execute major research papers. The classes will focus primarily on historiography. Students will be free to select topics dealing with any aspect of modern European history and they will be encouraged to work in whatever national or regional setting they prefer and for which they have command of the language.

HIST106801
America and the World II
Jacobs, Seth S, PHD
Spring 2024
This class explores the creation of modern America in a global context. We will trace how the
United States, the wealthiest and most powerful global hegemon in history, grew out of
collisions, at home and abroad, of and among people, ideas, institutions, and cultures. The
United States cannot be understood without consideration of its debts to, engagement with,
and all-too-often hostility toward the inhabitants of other nations. We will accordingly pay close
attention to exchanges with Europe, Africa, and especially the Middle East and Asia.

This course is the first half of the History Core. Offered in the spring semester of the academic year. Fulfills the Core History I requirement. This course covers several centuries of time (prior to 1800) and traces the political, social, economic, and cultural changes that created the modern world. Depending on the expertise of the instructor, different parts of the world may serve as focal points for examining the complex historical processes behind modern-day transnational relationships, values, and ideas. As part of the Core Curriculum, this course seeks to broaden students' intellectual horizons by exposing them to new places, periods, and perspectives.

HIST170501
Revolutionary Media: How Books Changed History
Reinburg, Virginia
Spring 2024
This is an Enduring Question course and is open to FRESHMEN only. You must take ENGL1715 with this course. How have books and reading shaped the modern world? The printing press changed the course of history in Europe and the Americas. This course centers on the book as a vehicle for the production and spread of ideas during the first three centuries of printing (1450-1800). By paying close attention to the material book and its makers, authors, printers, readers, and owners we will explore some of the era’s great political and cultural upheavals, especially the Reformation, scientific revolution, and revolutions in France, North America, and Haiti. Such events appear as more intensely human and local when seen through the lens of printed books, their makers, and their readers.

HIST173001
Making American Landscapes: Building and Living in Asian America
Yang, Hongyan
Spring 2024
This is an Enduring Question course and is open to FRESHMEN only. Inherent within the evolution of American landscapes is a history of racial dominance and resistance. For a very long time, the architectural and spatial experiences of Asian American communities were often associated with assimilation, obscuring the tactics they employed to strive to belong in America. This course centers on the built environment and cultural artifacts in the contemplation and commemoration of Asian American history. We will explore the places Asian immigrants and Asian Americans inhabited as well as the sites they built in America and overseas, including Chinatowns, the architecture of the postcolonial Philippines, Japanese internment camps, places of worship, homes, restaurants, and shopping centers. Students will learn about the ramifications of racism and racial inequity as well as the struggles and resilience of Asian American communities through studying various places. This course is open to students regardless of their department/program affiliations and may particularly interest those who hope to pursue careers in community organizations, historic preservation, and writing about Asian American historical sites.

HIST180101
The Age of Revolutions
Stanwood, Owen C
Spring 2024
This course explores the intertwined histories of three revolutions that changed the world: the French, Haitian, and American revolutions. We will learn about old regime societies and states in Europe, empires and colonization, politics, social movements, the slave trade, racism, and the role of ideas in sparking revolutions and carrying them forward into the future. Throughout the course we will examine large scale social, material, and political forces, as well as the individuals and communities that created or resisted revolutionary change.

**Podcasting the Ottomans**  
Sajdi, Dana  
**Spring 2024**  
The Ottoman Empire (1299-1922) connected West Asia, North Africa, and parts of Europe, and was of the largest and longest lasting empires in world history. We will study the history of the Ottoman polity and its multi-religious and multi-ethnic society by taking the Ottoman History Podcast as our main textbook. Students will learn the principles of storytelling and podcasting and will produce a podcast episode in lieu of a final exam.

HIST183301  
Resisting and Rebelling II  
Picone, Maria de los Angeles  
Spring 2024  
Opening with the dramatic slave revolt that resulted in the Haitian independence, this course will examine the numerous instances of rebellion and resistance in Modern Latin America. While these terms might first bring us to struggles for state power, our readings will reveal that rebelling and resisting transcended theoretical articulations of authority in an effort to transform everyday lives. How did rebelling and resisting look like in different places? How did colonial legacies shape uprisings, and how were they resolved? How did global ideological trends, especially during the Cold War, affect resistance in Latin America?

HIST184401  
American Capitalism and Its Critics  
Glass, Michael  
Spring 2024
This course examines the development of capitalism in the United States over the past two centuries. We will begin with classical theorists, and then examine slavery, industrial factories, the labor movement, and mass consumption in 1950s suburbs. We will focus on how Americans have debated economic inequality, with special attention to dynamics of race, gender, and class. Through a close reading of historical texts, we will discuss enduring questions of freedom, wealth, power, democracy, and citizenship. Although the class is focused on the United States, we will compare examples from other regions because capitalism has always been global. As part of the Core Curriculum, this course will introduce you to the discipline of history: how historians approach the study of the past, what types of evidence they use, and how they explain change over time. It will also help you develop foundational skills of reading, note-taking, discussing, and writing that will support your endeavors at Boston College and beyond.

This course introduces students to the practice and theory of medicine in ancient Greece and Rome, from the archaic world of Homer (eighth century BCE) to late antiquity and early Christian healing practices. Themes will include shifting understandings of health and the body, revolutions in knowledge of human anatomy and physiology, ethical controversies over human and animal dissection, influential theories of pathology, psychology, pharmacology, and nutrition, the intersection of medicine and religion, and ancient ideas about doctors' responsibility, which, via the Hippocratic Oath, are still with us today. Students interested in history and literature will gain a richer sense of the importance of medicine in ancient society, and its connections to religion, magic and philosophy. Students from a medical and scientific background will discover how perceptions of the body have changed over time and from culture to culture.

Matus, Zachary A
Spring 2024
The advent of modern science in the western world was never a necessary outcome of Western intellectual activity. Yet histories of science frequently spin a tale of intellectual progress leading inexorably to scientific thinking (and hint at brighter futures to come). This course examines the technologies and philosophical tools that would give rise to science, but with an eye to their historical contexts and their many non-scientific aspects. We especially will focus on how pre-modern medicine, astronomy, and alchemy relate, or do not, to their modern counterparts.

HIST224101
Ireland Since the Famine, 1845 to Present
Young, Rachael A
Spring 2024
This course explores Irish history, culture, and politics from the Irish Famine (1845-1852) to the present day, covering almost two centuries of troubling social and political change. Topics covered will include Irish nationalism and the Gaelic Revival, the Irish Revolution and Civil War, the creation of Northern Ireland and the Irish Republic, the outbreak of The Troubles, the signing of the Good Friday Agreement, the Celtic Tiger, & Brexit. This course will use primary sources, novels and poetry, film, and visual arts to analyze the development of Irish culture and politics over the 19th, 20th, and 21st centuries.

Horrors!
Cavallari, Jason R
Spring 2024
A certain percentage of seats in this course is reserved for each class year (Seniors, Juniors, Sophomores, Freshmen). Although it may appear that seats are available during registration, the seats for your class year may be full. Vampires. Werewolves. Witches. Things that go "bump" in the night. Every society learns to fear someone or something in order to protect us from the unfamiliar, the impermissible, or the Other. From dragons to mad serial killers, history is full of the weird, the dark, and the scary; however, who and what defines weird, dark, and scary changes over time and from place to place.

HIST225101
The Credit Nexus: The Secret History of the Economy in Britain, 1600s-1900s
Ismay, Penelope G
Spring 2024
In his "Wealth of Nations," Adam Smith pointed to the shift from barter to cash as the critical turning point from a feudal to a modern economy in Britain. Unlike barter, cash was capable of facilitating anonymous exchange between strangers, greatly increasing the scope for economic growth. Recently, however, scholars have discovered that the vast majority of economic exchanges in Britain in Smith's era were conducted on the basis of credit rather than cash. And this credit was largely personal, connecting thousands of individuals in networks of trust. This course will examine this new social history of the British economy.

HIST230401
Latinx History
Bonilla, Eddie
Spring 2024
Fulfills US History requirement for History Majors. This course introduces students to the histories and cultures of Latina/o/x communities. The course takes a broad approach to the experiences of Mexican Americans, Puerto Ricans, Dominicans, Cubans, and Central Americans. Students will explore how and why Latinas/os/xs have struggled for the right to belong and what their history can tell us about how the United States has developed as a nation and empire. We will cover themes around relational race formation, gender and sexuality, labor, urbanization, and social movements. Students will analyze materials including music, political platforms, and murals to interrogate the evolution of umbrella terms such as Latinidad.

HIST244101
U.S. Political History since 1968
Glass, Michael
Spring 2024
Fulfills the U.S. History requirement for History Majors. This course explores the significant political developments that shaped the past fifty years of U.S. history, an era notable for declining faith in government, new rights claims by marginalized citizens, growing partisan polarization, and widening inequality. In addition to tracing the transformation of political parties and their ideological coalitions, we will also ask how social, economic, and cultural changes have influenced political life. Topics include the evolution of 1960s social movements, the rise of the religious Right, the War on Drugs and the carceral state, the AIDS crisis, the politics of globalization, the 2008 financial crisis, and the gig economy.

HIST245301
Counterintelligence: An American Social History
Gallagher, Charles R, SJ
Spring 2024
Fulfills US History requirement for History Majors. Counterintelligence is the detecting and apprehension of spies, depriving foreign governments of information, and frustrating hostile foreign intelligence services from collecting information. The course will study the most impactful U.S. counterintelligence operations from the American Revolution to the present. However, this course aims to move beyond the strict political history to engage issues of psychology, gender, ethnicity, ideology, religion, and nationalism. George Washington's use of female spies during the American Revolution, African-American agents in the Civil War, the birth of professional counterintelligence during World War I, U.S. Army surveillance of African-Americans and Jews, plus the Cold War cases such as Alger Hiss and the Rosenbergs will be studied. Modern cases such as the Edward Snowden case and the Steele Dossier will also be assessed.

HIST250901
Catholics and Social Justice
Murphy, Thomas, SJ
Spring 2024
Fulfills the US History requirement for History Majors
This course will focus on two themes the Catholic Church's struggle to both receive and extend social justice within the United States. We will begin with a study of nativism, the Anti-Catholic feeling that the church experienced in America beginning in the colonial period. Attempts to accommodate the nativist objections led the church into entanglements with enslavement and segregation, and into imperialist treatment of Indigenous Americans and other people of color. However, the church's demographics as a body primarily composed of European immigrants led it to embrace modern Catholic Social Teaching and to fight for economic justice and hospitality toward oppressed groups. All these contradictory aspects of the U.S. Catholic record will be explored in this course.

Credits: 3
Room and Schedule: Carney Hall 305 MWF 01:00PM-01:50PM
HIST270201
Colonial Pasts/Global Presents
Kent, Stacie A
Spring 2024
Fulfills the Non-Western Requirement for History Majors. While scholars of globalization often proclaim the novelty of the present, historians have become suspicious that deeper connections exist between global, networked presents, and colonial pasts. In this course we will study a variety of colonial histories form the eighteenth and nineteenth centuries and investigate whether and in what ways that history remains with us today. Our examples will come from Euroamerican colonial empires, and topics will include commodity production and circulation, work regimes, labor migrations, gender and sex, development, science, medicine, and racial epistemologies.

Fulfills US History requirement for History Majors. This course will focus on the history of the Irish Diaspora to America from the beginning of the colonial period to the creation of the Irish Free State in 1922 and the end of the Irish Civil War the following year. The course will begin with consideration of English intervention in Ireland during the Tudor and Stuart periods, with special emphasis on how colonization and conquest in Ireland set templates for the English colonization of what became the original thirteen United States. Attention will then shift to the first wave of Ulster migration to America during the Pre-Revolutionary War period. The focus will next include Irish political refugees to the United States following the failed rebellion of 1798, and then the issue of mass immigration during the Famine of 1845-1850 and beyond. The course will conclude with the interaction between Irish Americans and Irish Nationalism during the period leading to the Easter Uprising and its aftermath. Issues to be addressed will include Irish immigrant involvement in American politics, the devotional revolution in the Roman Catholic Church, the labor movement, the women’s rights movement, Irish American support for radical politics and independence in Ireland itself, and Irish American interaction with other oppressed and marginalized groups in American society.

HIST280501
Luck and Superstition in the History of the U.S.
Grasberger, Anne
Spring 2024
Fulfills U.S. History requirement for History Majors. From the earliest days of the United States, forces beyond the natural and divinely ordained supported and threatened the peoples within and without its expanding territorial bounds. This course will focus on how luck and superstition helped to shape the course of the countrys history, using primary and secondary sources, we will take a critical approach to the twin foci of the course. We will examine how the accusation of superstition has been mobilized against particular groups, as well as what kinds of beliefs and practices came to be labeled superstitious, through different eras in the history of the United States. In addition, we will examine the role of luck in this history through gambling, speculation, and games of chance, methods of influencing or altering fortune, and the influence of the environment. Course themes include religion, nature, environment, race, gender, and risk.

Colonial Korea and its Legacies
Hwang, Ingu
Spring 2024
This course explores Korea's experience under Japanese colonial rule (1910-1945) as well as how this experience was remembered and represented in the post-colonial era. Students will explore the three phases of Japanese rule: military rule (1910-1919); cultural rule (1919-1931), and wartime mobilization (1931-1945) and how each of these phases have shaped and continue to shape Korean national identity and politics, socioeconomic development, and memory culture. The course draws on historical and literary texts as well as film and other visual sources. This course combines lecture with active student discussion and presentations. Fulfills the LAMA requirement for History Majors.

HIST343701
Study and Writing: Murder, You Wrote: Sensational Homicides 19C
Lyerly, Cynthia L
Spring 2024
History Majors Only. Students in this course will write original research papers based on their analysis of the press coverage of a murder from the 1830s to the 1930s. Beginning in the 1830s, the penny press discovered that sensational cases of murder sold newspapers, which changed the way American readers approached these crimes. Sensational murder coverage reveals prevailing views about race, sex, sexuality, evil, violence, and much more. Students will choose a murder covered extensively in the press and will analyze some aspect of aspects of it in a way that contextualizes and historicizes it.

HIST350401
Study and Writing of History: Terrorism in the 1970s
Bourg, Julian E
Spring 2024
History Major Standing Only. For those born after the attacks of September 11, 2001, terrorism has been an unavoidable fact of historical experience. Whether motivated by religious extremism, racism, or other ideologies, random attacks on ordinary people frighten and disturb us. It turns out, however, that what we think of as terrorism really crystallized in the 1970s, a time of hijackings, assassinations, and bombings around the world. In this course, after sharing common readings, students will write a substantial research paper on an aspect of 1970s terrorism chosen in consultation with the professor.

HIST401001
The Samurai and the Cross: Christian Encounters with Japan (1549?1945)
Ucerler, M Antoni J, SJ
Spring 2024
Fulfills the LAMA requirement for History Majors and Minors. This course is an introduction to the dramatic history of Christianity in Japan, from its founding by Francis Xavier during the age of samurai warriors in the 16th century, to the remarkable survival of the Hidden Christians during the Edo period (1603-1868), and the struggle for religious freedom during the early Meiji period (1868-1912). From its establishment by the Jesuits and Portuguese merchants in 1571 until 1945, when the atom bomb was dropped over Urakami Catholic Cathedral, the international port city of Nagasaki has played a central role in this story. How and why Japan first embraced and subsequently rejected this new religion, its culture, and its adherents will be the focus of our study. The course will be held at the Ricci Institute building so that students can work directly with the unique material and visual culture of the period (rare books, manuscripts, maps, artifacts, and artwork) in the Institute's collections that bear witness to these complex intercultural encounters and clashes. We will also make use of rare materials at the Burns Library.

HIST402101
Korean War: Conflict, Security, and Peace
Hwang, Ingu
Spring 2024
The Korean War (1950-1953) began as a civil war but became a global conflict against the backdrop of the emerging Cold War era. Known as "the Forgotten War" in the U.S., this conflict resulted in 5 million deaths and left an indelible imprint on the world. Seven decades later the Korean peninsula remains divided, and the contentious international security mechanisms engendered by this conflict still shape East Asian relations and U.S. foreign policy. Through engagement with recent historical works, this seminar course will explore the origins and legacies of this conflict, security options and limitations, and conditions and visions of peace. This course fulfills the LAMA requirement for History majors.

HIST409001
From the Mughals to Modi: The Making of Modern South Asia
Parthasarathi, Prasannan
Spring 2024
Fulfills LAMA Requirement for History Majors and Minors This course is a survey of the history of the Indian subcontinent from Mughal times to the present. Topics to be covered will include: the decline of the Mughal Empire, the rise of British rule and its impact, the Mutiny and Civilian Revolt of 1857, the invention of a traditional India in the nineteenth century, law and gender in British India, Gandhi and Indian nationalism, independence and partition, and the rise of Hindu nationalism.

HIST412201
Odysseys in the Western and Islamic Traditions
Ross, Sarah; Sajdi, Dana
Spring 2024
Fulfills Non-Western Requirement for History Majors. Bridging the traditional divide between "East" and "West," "Christendom" and "Islamdom" and viewing cultural production as rooted in the human experience, this course focuses upon similar literary and intellectual trajectories across Europe and the Middle East from antiquity to the late eighteenth century. We will examine a series of parallel texts that span the genres of epic, poetry, biography, autobiography and travel narrative. Students will be asked to read these texts in two ways: as an individual perspective (male or female) and as an odyssey—a literary repository of socio-cultural transformation and exchange.

HIST412301
Gender, Sexuality, and Power in the Ottoman and British Empires
Shlala, Elizabeth H
Spring 2024
Fulfills the LAMA requirement for History Majors and Minors. In this course, we will utilize the concept of gender as an analytical tool within the history of empires. We will cover gender theory, the construction of gender identity (male and female), sexuality, power, politics, and culture. To understand how gender functioned within empire, we will undertake a comparative analysis of two of the greatest empires in the world--the Ottoman Empire and the British Empire. We will investigate the ways that race, religion, and class shape women's and gender imperial history.

**HIST413301**  
**Mid-East Nationalisms Compared: Arab-Turkish-Jewish**  
**Braude, Benjamin**  
**Spring 2024**  
Fulfills the Non-Western Requirement for History Majors. Nationalisms in the Middle East developed in a distinctive way. In contrast to Europe, religion was more important than language. In contrast to Africa, they emerged prior to the rise of anti-colonialism. Although nationalisms in the Middle East have spawned conflicts within themselves and with each other, they have displayed remarkable similarities to each other. One consistent similarity is their fraught attempts to distinguish the so-called nation from the religious traditions out of which it emerged. This course will address these questions through comparing Arab, Jewish and Turkish nationalism in the nineteenth and twentieth centuries.

HIST419101
African Landscapes and Localities
Lal, Priya
Spring 2024
This course explores the historical geography of sub-Saharan Africa during the colonial and postcolonial eras. We will examine how a variety of spaces and places on the continent were imagined, represented, and practiced over time, concentrating on five major themes: maps, the city, the countryside, transportation, and borders. Students will learn about political, economic, social, and cultural dynamics in modern Africa while engaging with diverse theories regarding the production of space.

**HIST421201**  
**Ancient Sicily**  
**Thatcher, Mark R**  
**Spring 2024**

Ancient Sicily, the crossroads of the Mediterranean, was a melting pot where Greeks, Romans, Carthaginians, and indigenous peoples came together to create something new. This course explores the history, art, literature, and culture of the Sicilian Greeks (and to some extent non-Greeks) from the 8th to 3rd centuries BCE. We will analyze the primary sources that tell us about ancient Sicily, engage with cutting-edge scholarship on major historical questions, and develop techniques and resources for research in Classics.

HIST422801
French Cinema: From the New Wave to the 1970s
Bourg, Julian E
Spring 2024
The French New Wave film movement of the 1950s and 1960s revolutionized movies around the world. Its experimental, playful style emphasized absurdity and youth, and its spirit anticipated the famous student/worker revolts of May 1968, when the government almost collapsed. During the 1970s, French film became more explicitly political as it grappled with social upheaval, the sexual revolution, and movements such as feminism. This course in film history will present the work of directors from Francois Truffaut and Jean-Luc Godard to Chantal Akerman and Agnes Varda. Students will create their own films over the course of the semester.

HIST423401
Machiavelli Unmasked
Ross, Sarah
Spring 2024
Journalists and political scientists love the adjective Machiavellian, but who was Machiavelli really? And was he actually Machiavellian? This course puts this troublesome figure under the historical microscope, ultimately using his case to understand the social, political, and cultural forces that formed him. We will read The Prince (of course) but also the Discourses on Livy, and The Mandrake Root, and a veritable mountain of Machiavellis (often creepy) personal correspondence. To sharpen our image of his world, we will also dig into frantic diplomatic dispatches and inquisitorial trials that illuminate major social conflicts, including religious and gender politics.

HIST 424201
With God at their Side: Religion and World War I
Rafferty, Oliver P, SJ
Spring 2024
The aim here is to look at religion as a factor in World War I and the part played by the various Christian Churches in the conflict. This will be examined from the respective viewpoints of all the belligerents. How much did religion figure in the lives of the ordinary combatants? Were there no atheists in the war? Did religious motivation vary among social classes and national groups? What were the peculiar difficulties, for example, in French and Italian religious participation in the war? Although the course will primarily concern itself with Christianity some consideration will be given to Islamic and Jewish perspectives.

**HIST424401**  
*Global Political Catholicism*  
*Gallagher, Charles R, SJ*  
**Spring 2024**  
This class asks the question, "What has led to the creation and historical persistence of Catholic mass politics?" It begins its historical perspective in modernity, anchored by the publication of the social encyclical *Rerum Novarum* (1891) and ending with Catholic policy in the Obama Administration. We will look at how political parties, movements, and theologians interacted with the Vatican and the wider church. The European Church's phenomenon of "clerico-fascism" during the World War II era will be investigated. Regionally, we will look at how Catholicism has shaped political activism in China, Latin America, Europe, and the United States.

**HIST425001**  
*Human Rights as History*  
*Pendas, Devin O*  
**Spring 2024**
One of the major developments in world history since World War II has been the rise of a universal human rights culture. This course will explore this development in historical perspective, tracing the origins of the language of human rights back to the eighteenth century and the French Revolution and interrogating its development in the nineteenth and twentieth centuries. We will examine the potential of "human rights" in international politics but also the limitations of human rights claims. We will ask who has rights and when and who the major actors are in pushing rights claims: governments, revolutionaries, and NGOs.

HIST425701
The Irish Adventurer in the Age of Reason & Revolution
Bailey, Michael T
Spring 2024
This course studies the Long Eighteenth-Century (c.1688-1822) from the perspective of the Irish diaspora. How did diasporic Irish people both contribute to and challenge the major events in this Age of Reason and Revolution? Necessarily, this means our class will investigate the entangled histories of colonialism and capitalism, religion and rationalism, slavery and racism, nationalism and universalism, patriarchy and feminism, science and magic, empire and revolution. As we do, we will listen to the echoes of this distant past to ask ourselves why and how these histories matter today in our present moment.

HIST429101
War Crimes Trials
Pendas, Devin O
Spring 2024
The twentieth century has proven to be one of the most murderous in human history. The massive and in many ways unprecedented use of systematic atrocities in this century have provoked an equally unprecedented response—so-called war crimes trials. In reality, this term covers a broad range of legal responses to systematic mass atrocity international trials, domestic trials, and truth and reconciliation commissions. We will consider examples of all of these and the advantages and disadvantages of each approach before concluding with a general consideration of the limits and possibilities of the law in confronting such enormous crimes.

HIST430301
Golazo!: Sports in Latin America
Picone, Maria de los Angeles
Spring 2024
Fulfills LAMA requirement for History Majors and Minors. Sports played a major historical role in Latin America. Elites used organized sporting events as a means to appropriate nature and build a sense of belonging. People also began to see themselves and the world through fútbol (soccer), béisbol (baseball), and other activities. This course looks at how sports shaped life in Latin America, delving into the politics of sports, their impact on gender relations, their underpinning of local and national identities, and their power to bring light to social issues. Through weekly readings and primary sources, we will learn about Latin American political, economic, social, and urban history through the lens of sports, sporting events, and leisure activities.

HIST437301
Mexico between Fact and Fiction
Sellers-Garcia, Sylvia M
Spring 2024
Formerly titled: Latin America Between Fact and Fiction. Fullfills LAMA requirement for History major. Departing from Edmundo O’Gorman's notion of Latin America as an "invented" place, this course considers how the region has been imagined, distorted, and revised many times over hundreds of years. Focusing on a handful of moments or episodes from the colonial period to the twentieth century, we will read fiction, witness accounts, primary sources, and historical renderings. Our objective will not be to pin down the "facts," but to see what we can learn by examining diverse versions of the past alongside one another.

HIST441601
Slavery and Emancipation in the U.S.
Conner, Mycah
Spring 2024
Fullfills the US History Requirement for Majors

This course examines histories of slavery and abolition in the United States from the transatlantic slave trade through the Civil War. It attends to confrontations and transformations across scale and context--rural and urban; north and south; regional and national. Topics include the everyday lives, toil, and strategies of enslaved people, and their battles with slaveholders; the expansion of slavery and the domestic trade; the centrality of slavery and battles over it in American politics and daily life; anti-slavery and vs. abolitionist movements; slavery and gender; slavery and capitalism; the wartime destruction of slavery; the post-war expectations and demands of freedpeople.

HIST442701

Early Medieval Art in Ireland and Britain

Netzer, Nancy D

Spring 2024

The course will examine the development of art in Ireland and Britain in the Early Medieval period and the production of Irish and English missionaries on the Continent. Emphasis will be placed on the following: 1. manuscripts, sculpture, and metalwork of the sixth to ninth century 2. understanding works of art in their historical contexts 3. sources of the works in the Celtic, Germanic and Mediterranean worlds 4. circumstances under which artists and scribes worked 5. the complex problem of defining local styles 6. complexities of dating works of art 7. evidence yielded through excavation of principal archaeological sites 8. de-constructing the scholarship in the field over the last two centuries. 9. placing new archaeological finds in the art historical narrative 10. the role of Irish manuscripts, metalwork, and sculpture in the Celtic Revival and as national monuments 11. misappropriations of Celtic and Anglo-Saxon symbols (i.e. Celtic Cross and Runes) by white supremacists

**HIST447701**  
**Drugs and Money**  
**Kent, Stacie A**  
**Spring 2024**

Amidst the current U.S. opioid epidemic, this course investigates how the pursuit of profit has intersected with constructions of health, illness, and social vice. Where and how have states and societies supported or tolerated widespread narcotic use? By the same token, what social, economic, and political processes transform use into social shame or criminal behavior? The course will look at the centuries-long opium trade between British India and China, the early history of commercial opioids around the world, and compare two U.S. epidemics in their global and local dimensions: crack cocaine in the 1980s and opioids in the 2000s.

**American Madness: History of Mental Illness in the United States**  
**Summers, Martin A**  
**Spring 2024**
Fulfills the US History requirement for History Majors This course explores the history of mental illness in America from the colonial era to the late twentieth century. It examines how ideas about mental illness changed over time; how it was understood by medical professions and laypeople; how ideas about mental illness reflected larger social beliefs about race, gender, and class; and how various strategies for curing mental disease or dealing with the mentally ill have evolved. Topics include: humanitarian reform and the nineteenth-century asylum movement; the history of somatic-based treatments such as hydrotherapy, electroshock treatment, and lobotomy; psychoanalysis; and deinstitutionalization and the community mental health care movement.

The aim is to explore how the Vatican wielded such influence on modern history despite its territorial insignificance. We will look at issues such as: why the Vatican continued to be an important player on the international stage even after the abolition of the Papal States; did it resist modern progressive developments; why in the twentieth century did the Vatican seem to align itself with Fascism; did Pope Pius XII really keep silent in the face of the Holocaust during World War II; and what role did the Vatican play in fall of European Communism.

Video games provide a way for people to explore history beyond the written page. Not only does the visual aspect of those games allow users a multi-sensory engagement with history, but the ability to act in those spaces encourages people to think about history as a space in which people acted and made choices. Using material including the Assassins Creed series as well as a handful of arthouse games, this class first asks students to examine the expression of historical space and agency. The class then has students working in the classroom, in BCs data visualization lab, and in the Hatchery (the makerspace) to learn 3d modeling as well as how to build small, interactive virtual reality (VR) environments with tiny, historically themed games. In so doing, students will engage in the practice of building puzzles and narrative storytelling.

HIST485101
Whales and Whaling in U.S. History
Grasberger, Anne
Spring 2024
Fulfills U.S. History requirement for History Majors. Whales, as animals that could be transformed into energy and other resources, played a significant role in the history of the United States, alongside the hunts and then the industry that pursued them from near shores to the worlds furthest northern and southern seas. This environmental history course will follow the course of whaling in the US from before European arrival to the present. We will discuss the impact of the changing whaling industry on the worlds whales, as well as on the peoples and far-flung geographies inland as well as coastal it touched. Along the way well consider such topics as the question of whale culture, relationships between humans and whales, how whales became energy, how the American pursuit of whaling changed ports around the world, continuing traditions of indigenous whaling, anti-whaling movements and environmentalism, and whalings various memorializations.

HIST519101
Senior Colloquium: The University in the Modern World
Lal, Priya
Spring 2024
This course explores the diverse and changing intellectual, institutional, social, and political cultures of universities across the modern world. Our inquiry will be global and comparative in scope; we will examine a wide range of case studies with particular attention to twentieth-century and non-Western contexts. Themes covered will include student activism, the politics of intellectual labor, the role of higher education in colonial and national development, knowledge production and social movements, the racial and gendered dimensions of university life, and debates about academic obligations and freedoms.

HIST730501
Graduate Colloquium: Archives and Sources
Sellers-Garcia, Sylvia M
Spring 2024
Archives and sources are the foundation of historical work, and yet too easily we take for
granted the means by which sources are delivered into the present and the ways in which
archives shape our historical interpretations. This course will focus on both the theoretical and
the practical dimensions of these two processes. What political, sociological, and cultural factors
influence the way our sources material, oral, textual becomesources? How does a pre-existing
conception of an archive, as well as the organization and accessibility of it, influence the way we
write history drawn from it? How does the researchers background, orientation, identity, and
politics influence how they conceive the archive? This course also places an emphasis on writing,
since we will be encountering a range of methodological and stylistic approaches. In turn, the
writing assignments will ask students to practice writing in different modes, with a particular
emphasis on writing for non-academic audiences.

HIST731801
Graduate Seminar: Oral History: Theory and Practice
Beiner, Guy
Spring 2024
This course offers an in-depth introduction to a flourishing interdisciplinary sub-field of history.
We will learn about the development of oral history, critically examine case studies (with
reference also to oral tradition), and consider the methodological and historiographical
challenges of using oral sources. The course also includes practical training in oral history, with
workshops on such key skills as interviewing, transcribing, archiving and analysis.

HIST821001  
**Graduate Seminar: Medieval History**  
Fleming, Robin  
**Spring 2024**  
Students in this seminar will write original research papers on some topic in medieval social, economic or political history. The topic will be one upon which the student and professor have agreed, and will be based primarily on original sources. Students will not only be required to write a paper, but to read and critique all papers written in the seminar. The final paper will be a polished and rewritten piece incorporating the critiques of the professor and other graduate students in the seminar.

HIST821301  
**Graduate Seminar: Atlantic History**  
Stanwood, Owen C  
**Spring 2024**
This graduate research seminar focuses on the intertwined histories of the Americas, Europe, and Africa during the early modern period (c. 1400-1850). Students will conduct their own original research on a topic of their choosing. Class meetings will be dedicated to workshopping students' writing, learning about key sources and methodologies in Atlantic history, and reading selected works by outside scholars. Students will complete an article-length paper and conduct extensive directed readings.

**HIST822101**  
**Graduate Seminar: U.S. since 1900**  
**Bonilla, Eddie**  
**Spring 2024**  
This seminar will explore selected topics in the political, social, and cultural history of the United States in the twentieth century. We will also investigate the types of sources, archives, and methodologies employed by twentieth century historians. Over the course of the semester, students will pursue in-depth research projects on a topic of their choosing using extensive primary and secondary source materials. The final product should be a substantial scholarly paper suitable for presentation at a professional conference or submission for publication in a scholarly journal.

**Credits:** 3  
**Room and Schedule:** Fulton Hall 310 W 03:00PM-05:20PM

**Student Level:** Graduate
Many schools across the United States teach different versions of survey classes for which instructors have to reach outside their own focuses. To do so, those instructors often search for visualizations of historical change, literary development, and examinations of religious networks, depending on the field and course. In this capstone, graduate students will develop projects within their areas of specializations to produce digestible digital exhibits, visualizations, and more that can be made freely available to scholars across the world. The goal would be to promote the free exchange of high quality information and digital sources available in the public domain. Furthermore, through the capstone, students should understand the process of a project from conception to presentation. They should have developed skills engaging metadata, transcription, the process of digitization, and more. Students can bring their own research data from their dissertation project or from previous coursework, or they can be provided with a historical or literary dataset from the Boston College Libraries to utilize over the semester. There are four phases to the class, beginning with performing an environmental scan and writing a proposal for their project. In Phase II and III, students will implement and carry out their projects. Finally in Phase IV, students will engage in peer consulting and prepare their work for online publication.

**Intermediate Italian I**  
Pagotto, Alessandro
Fall 2023
Conducted in Italian The prime objective of the course is to improve reading and writing skills, to continue building oral proficiency, and to provide a lively and current cultural background of contemporary Italy. A review of the elements of language will be supplemented by the reading of selected texts, oral practice, and individual research, all presented within the context of contemporary Italian society and classic Italian culture. Students will develop their ability to satisfy basic survival needs and to engage in conversation on a fairly complex level.

ITAL221301
Italian Conversation, Composition, and Reading I
Costanzo, Maria Sole
Fall 2023
Conducted in Italian
Elective for major and minor in Italian. Satisfies Foreign Language Proficiency core requirement.
The course topic, "Italian through Fiction and Films", allows development of oral and written
language skills. Centered on the analysis of short stories and films related to contemporary
Italian society, attention will be paid to analytical and lexical enrichment. Other sources (articles
from the Italian Press, audio-visual programs, and the Internet) will provide additional avenues
of interpretation.

ITAL552001
Life in Renaissance Italy
Costanzo, Maria Sole
Fall 2023
Course taught in Italian. What if you could travel in time to the Italian Renaissance? What were
the challenges of everyday life for young people? This course offers an interdisciplinary overview
of the lives of young people in the Italian Renaissance, with a particular focus on fifteenth-
century Florence. Primary sources will include literary texts, works of art, archival documents,
private letters, treatises, and the artifacts of daily life.

ITAL881501
Language and Power in Early Modern Italy (1300-1600)
Costanzo, Maria Sole
Fall 2023
Conducted in Italian. Political power in pre-modern Italy, as elsewhere, was gained, increased, and maintained not through military and economic might alone. Languages - in all its forms - played a significant role as well in acquiring and consolidating the loyalty of the masses, as we shall explore in this course, focusing on the fourteenth through the seventeenth centuries. We will examine the key, recurrent themes of public discourse, such as appeals to territorial pride, destiny, virility, rebirth, and self-sacrifice, as communicated through a wide variety of means of civic expression, including political oratory, social ritual, the fine arts and works of literature.

ITAL882801
Twentieth Century Italian Poetry
Acetoso, Mattia
Fall 2023
Conducted in Italian. In the first half of the last century Italy produced extraordinary poets of worldwide reputation who confronted the fundamental intellectual and psychological challenges of their age. They experimented with a variety of styles and themes, exploring crucial literary, philosophical, and theological issues. This course investigates and analyzes in depth the works of these poets: Eugenio Montale, Giuseppe Ungaretti, Umberto Saba, and Salvatore Quasimodo. Their poems and critical writings will be read in light of both twentieth-century theoretical debates and contemporary Italian life.

ITAL552601
Dante's "Divine Comedy" in Translation
Costanzo, Maria Sole
Spring 2024
Conducted in English. Elective for Italian major or minor. An introduction to and critical reading of the "Divine Comedy" (in English translation), one of the world's greatest epic poems, produced by "the chief imagination of Christendom" (Yeats). Dante's journey through Hell, Purgatory, and Paradise will be analyzed at its multiple levels of interpretation: literal and allegorical, theological, philosophical, political, and literary. Compendium of an entire epoch of European civilization, the "Comedy" will also be interrogated for its responses to the fundamental questions of human existence: God, the Cosmos, the Self, Good and Evil, Right and Wrong, Suffering, and Happiness.

ITAL555501
Italian Culture Through Popular Song
O'Connor, Brian R
Spring 2024
Music has the power to reflect the spirit of a nation and its people; the influences from without and the history within. This course will investigate these phenomenathroughthe mirror of the Italian popular song, from the XIX century to the present. Along the way, we'll listen to and learn about the canzone napoletana, the insulated and nationalistic music of the Fascist regime, the great artists of the Boom years, thecantautoriand music of social upheaval of the 60's and 70's, and the fragmented musical scene of today's Italy. We will also focus on development of language proficiency, both oral and written,throughanalysis of lyrics, cultural readings, conversation in class, creative composition, and ... maybe even some singing! The course is designed for students who have completed ITAL2214ItalianConversation, Composition and Reading, but may be taken simultaneously with that course. Notes: This is a new course. It is an elective, open to majors, minors, and anyone who took CRRI and CCRII.

Credits: 3
Room and Schedule: Stokes Hall 105S MWF 01:00PM-01:50PM
ITAL881301
Dante's "Divina Commedia"
Costanzo, Maria Sole
Spring 2024
Conducted in Italian. A reading of the *Divina Commedia* in its entirety, examined at its multiple levels of meaning, literal and allegorical, theological, political, psychological, and artistic. The course will also introduce the student to the most current schools of interpretation and analytical methodologies, as well as interrogate the poem for its responses to the fundamental questions of human existence: God, the Cosmos, the Self, Good and Evil, Right and Wrong, Love and Hate, Suffering and Happiness.

ITAL882401
Italian Antifascist Culture
Ward, David
Spring 2024
Drawing on literary, cinematic, historical and political texts, the course examines the multi-faceted universe of Italian antifascism, beginning in the early 1920s and stretching into the post World War II years. Special attention will be given to three of the most crucial questions that Italian antifascist intellectuals faced: what and where were the origins of fascism; what would a post-fascist Italy look like; and what was the place of the fascist experience in the Italian national narrative. Among the figures to be studied are: Carlo Levi, Piero Gobetti, Benedetto Croce, Giovanni De Luna, Claudio Pavone, Roberto Rossellini, the Taviani brothers, Cesare Pavese, Giorgio Bassani, Florestano Vancini, Luigi Meneghello, Italo Calvino, and Beppe Fenoglio. Course is taught in Italian.

INTL285601
Contentious History and the Politics of Contemporary Korea
Hwang, Ingu
Summer 2023
This introductory immersion course surveys the contentious intersection between history and politics in contemporary Korea. Students will explore the following questions: What were the critical historical experiences and issues that became part of the public discourse and catalyzed political contestations in local and international/global communities? Why did these issues become contentious and for whom? What actions and counteractions did they inspire? In critically examining these questions, students will address four topics: postcolonial disputes, national division, economic development and social justice, and (post-)democratization protests. To facilitate in-class discussions, students need to engage critically with textual and media sources. They are also required to actively participate in the historical and cultural immersion/excursion programs, including the National Museum of Korean Contemporary History, the DMZ tour, and the Kim Dae-jung Presidential Library and Museum.

International Finance
Moorjani, Sanjay
Summer 2023
Not open to students who have taken ECON2271 or ECON3376 International financial markets, international trade and balance of payments issues will be studied by using analytical models of the open economy. Topics of particular interests are exchange rate determination, capital flows, trade flows, and other international linkages between economies. The course will apply the analytical tools of international economics to address macroeconomic aspects of current policy issues such as the global impact of the financial crisis, exchange rate policy, sovereign debt crises, and persistent trade deficits and international indebtedness.

**Frequency:** Every Fall
INTL220401
Where on Earth: Foundations in Global Culture & Political Geography
Getzoff, Joseph
Fall 2023
Restricted for rising sophomores, International Studies Majors
Where on Earth introduces you to the International Studies Program, offering you different approaches to analyzing geographic and historic phenomena in order to understand our current world. Where on Earth: Foundations in Political Geography and Global Cultures draws from the way that the discipline of Geography and the other social sciences understand the production of politics and culture as both locally and globally contingent that is, no phenomena are discretely produced within the bounds of the nation-state, while simultaneously they reflect localized histories, cultures, and political-economy. We will engage with many themes and topics that explore the structural and interconnected causes of global issues: we will look at histories of colonialism and how they reverberate into the present, at the institutions of borders and nation-states, how economic systems shape our world, how different ideas about race, gender, and class are intertwined with local and global cultural and social forces, developmental policy and debate, the science and politics of climate change, and engage with critical questions of environmental and social justice in an ever changing and globalized world. We will not focus on any one region, instead opting for a global survey of cases that will allow us to critically interrogate the uneven production of space and strive to understand different approaches to addressing global inequality. Students will complete a number of reading reflections and two exams, and work with their peers on collaborative assignments.

Global Cultures and Creative Industries  
Sienkiewicz, Matthew S  
Fall 2023
Satisfies one of three elective courses required within the Communication major. This course studies global film, television, publishing and fine art as both opportunities for creative expression and a business ventures forged in the international marketplace. Considering culture both as a complex meaning-making activity and as a commodity of economic exchange, the class offers a unique, multi-perspectival approach to the phenomenon of globalization. Case studies will include Bollywood film, Israeli television dramas, Russian foreign broadcasting, The Harry Potter franchise, and many others.

**Aspects of Economic Growth**

**Ulusoy, Veysel**

**Fall 2023**

This course aims at providing both the theory and empirics of modern economic growth theories. In addition to Classical and Neoclassical economic growth approaches, current views such as endogenous growth theory will be discussed. Emphasis will be placed on why some countries lag behind others and ways to solve this problem. The factors that are affecting economic growth such as technology, capital accumulation, change in employment, education, human capital, saving, energy consumption, democracy are studied in detail. The course also addresses the role of financial markets and policy formulation of economic growth.

Concepts, Cases, and Contexts of Nationalism
Prodromou, Elizabeth
Fall 2023
The phenomenon of nationalism has changed the course of world history and continues to shape current patterns of international relations. This course explores the foundations of nationalism—its European origins, global dissemination, local expressions; its inclusivist expressions giving pride of place to human dignity, freedom, and equality before the law, and its exclusivist expressions built on ascriptive categories of race and ethnicity; its drivers of violence in ending and reconsolidating empires; and its connections to religion, memory, and heritage. The course covers a broad range of cases, drawing on inter-disciplinary literatures, engagement with guest experts, and contemporary media analyses.

**World Politics: Conflict and Cooperation**  
**Molles, Elitsa V**  
**Fall 2023**

This course examines the principle sources of the behavior of countries in international politics, including the nature of the international system and the decision-making process within states. It examines such issues as the sources of power, the causes and implications of the security dilemma, the dynamics of alliances, the causes of war, international political economy, and the dilemmas of world order.

Research Methods in International Studies  
Getzoff, Joseph  
Fall 2023  
Rigorous, systematic research methods are at the foundation of quality scholarship for students and professors alike, but many students find research methods scary and/or boring to learn. This class will introduce students to a wide array of research methods in an engaging, accessible way. Students will get hands-on training in how to ask good question, generate their own original arguments, define and measure their concepts, and set up and carry out sophisticated research designs. Along the way, students will learn the basics of archival research, interviews, surveys, case studies, and statistical analysis. The course focuses on applied methods using scholarship and examples from political science, international studies, history, psychology, and sociology. The course is designed for students to write the best paper they have ever written. Every week, student assignments are learning and applying one of these skills to their paper project, so that by the end of the semester they have a well-written, original research paper with an engaging question, well framed arguments, and in-depth comparative case study analysis. This is a great course for students thinking about writing a thesis, pursuing a research-focused career, or for those who simply want to supercharge their analytical skills, in this class and in others.

Globalization
Christensen, Paul T
Fall 2023
This course examines the political, economic, social, and cultural implications of the increasingly integrated world system. The course focuses on conflicting assessments of international institutions (IMF, World Bank, WTO) and political governance; the impact of economic integration; and the effects of globalization on state sovereignty, democracy, and social cohesion. Specific case studies will include: globalization and the environment; globalization, gender, and work; globalization and immigration/migration; globalization and the illicit economy, and anti-globalization social movements and activism.

International Law
Nakazato, Hiroshi
Fall 2023
This course examines the role of international public law (the "law of nations") in the world today. It takes as its starting point the academic (and practical) debate about the utility of international law in world politics. From there, we consider the philosophical foundations of law, the sources of international law, and the application of international law in different arenas. In particular, the course will focus on how international law deals with a number of issues, including the connection between domestic and international law and the laws on territory, jurisdiction, human rights, and security, as well as other relevant topics.

INTL361501
Orthodox Christianity in Global Context
Prodromou, Elizabeth
Fall 2023
Orthodox Christianity has emerged as a subject of worldwide interest largely within the current context of Russia's war in Ukraine, yet Orthodox's 2000-year history and global scope extend far beyond the present historical conjuncture. This seminar uses social science and historical approaches, insights from policy experts and faith leaders, to provide a broad introduction to Orthodox Christianity in global context. The seminar explores internal and external factors—geopolitical, institutional, and religious—that help to explain scholarly neglect and policymaking unfamiliarity with an ancient faith tradition and that elucidate Orthodox's responses to issues of pluralism, human rights, war, and peace.

Explorations in Peace and Security Studies
Nakazato, Hiroshi
Spring 2024
This course reviews a wide range of theories exploring the causes of conflict, possibilities for the pursuit of peace, and the role of justice in both. Drawing on a wide range of disciplines, it offers an introduction to diverse approaches that can be used to understand peace and conflict. Thematic topics include the ethics of violence and nonviolence; individuals and conflict; social groups and conflict; rationality and conflict; plus peace and justice in theory and practice.

Geographies of Nature and the Environment  
Getzoff, Joseph  
Spring 2024  
The study of the environment is urgently important in an era of global climatic change. Geography and other social sciences have long offered critical ways to understand the entangled relationship of humans and their physical environment. This course is an introduction to the many ways to think critically about this relationship, drawing from a robust body of scholarly debate. The course will engage with many topics that explore the significance of the environment in relation to human societies: we will look at the construction of nature as a foundational idea in human cultures, the intersection of economies and ecologies, the histories and legacies of colonial environments, political ecology and conflicts over resources, the shaping of the non-human animal, the science and politics of climate change, and engage with critical questions of environmental justice in an ever changing and globalized world. We will not focus on any one region, instead opting for a global survey of cases that will allow us to critically interrogate the meaning of nature and the environment in relation to human societies past, present, and future.

Democratization in the Middle East  
Prodromou, Elizabeth
Spring 2024
This course is an introduction to democratization in the Middle East, using social science literatures on regime type (e.g. democratic, authoritarian, totalitarian, hybrid) to explore how history, geopolitics, and leadership shape comparative experiences of democratization in the region. The course considers democratization patterns shaped by disputes over tradeoffs between security versus pluralism and equality before the state, tensions between economic equity and growth, and competition between religious versus secular forms of nationalism. Through case studies (e.g. Egypt, Turkey, Israel, Palestine, Iran, Syria) and engagement with regional and international scholar-practitioners, the course situates the region within current debates about democracy worldwide.

INTL243601
Comparative Politics of Populism and Migration in Europe
Molles, Elitsa V
Spring 2024
Have all European polities and societies become liberal after post-communist transitions? How have populist parties across the Continent transformed discourses, politics, and individual identities? How do race and exclusion of ethnic, religious, or other minorities figure into Europeans' everyday lives? How has migration uprooted social realities across Europe? The course will answer these questions and more through the lens of identity politics. It will trace and analyze the multiple transformations in Western and Eastern European politics and societies in the contemporary period, through a mix of theoretical texts, current case studies, and non-academic sources.

21st Century Vatican Diplomacy
Martin, Peter G
Spring 2024
The Holy See maintains interests in every corner of the globe and a striking political influence in the world today. Foreign governments value the impact that partnerships with the Holy See produce for common foreign policy priorities. In this course, students will learn how the Holy See engages with other nations and international organizations on global and regional issues. They will explore its foreign policy priorities and the mechanics of such engagement. The course is taught by a former U.S. diplomat to the Holy See from the point of view of the practitioner, focusing on the day-to-day diplomacy of the most recent pontificates. The course begins with a short introduction to the practice of diplomacy with an emphasis on the U.S. Foreign Service.

Why is energy and climate policy fundamentally political, deeply entwined with human, national, and international security, and critical to global stability and well-being? Major course units assess the main actors and institutions in energy; including OPEC and international markets; contrast the primary challenges confronting energy policy in the exporting and importing states; evaluate the implications of climate disruption and the solutions across the sixty largest greenhouse gas emitting states; and analyze how energy and climate politics shapes global security and sustainability. Class members will also conduct a global climate negotiation and study in depth the regional security and political economy of the (Persian) Gulf states.

Colonial Pasts/Global Presents
Kent, Stacie A
Spring 2024
Fulfills the Non-Western Requirement for History Majors. While scholars of globalization often proclaim the novelty of the present, historians have become suspicious that deeper connections exist between global, networked presents, and colonial pasts. In this course we will study a variety of colonial histories form the eighteenth and nineteenth centuries and investigate whether and in what ways that history remains with us today. Our examples will come from Euroamerican colonial empires, and topics will include commodity production and circulation, work regimes, labor migrations, gender and sex, development, science, medicine, and racial epistemologies.

Colonial Korea and its Legacies
Hwang, Ingu
Spring 2024
This course explores Korea's experience under Japanese colonial rule (1910-1945) as well as how this experience was remembered and represented in the post-colonial era. Students will explore the three phases of Japanese rule: military rule (1910-1919); cultural rule (1919-1931), and wartime mobilization (1931-1945) and how each of these phases have shaped and continue to shape Korean national identity and politics, socioeconomic development, and memory culture. The course draws on historical and literary texts as well as film and other visual sources. This course combines lecture with active student discussion and presentations. Fulfills the LAMA requirement for History Majors

INTL334001
Environmental Politics of the Middle East
Getzoff, Joseph
Spring 2024
This course will critically explore the contemporary and historical environmental issues associated with the Middle East and North Africa (MENA) in order to understand the relationship between nature, politics, colonialism, culture, and geography. First, the course will interrogate the geographic label, Middle East, to understand how American and European literature, politics, and culture created different bodies of knowledge and replicated popular discourses that justify intervention in West/Southwest Asia and North Africa. Understanding the Middle East as a geographical construction also allows us to critically think through how environmental issues are interconnected with the global and localized histories of colonialism, imperialism, and empire. Students will read and discuss scholarship on development, postcolonial theory, environmental history, and political ecology. Throughout the semester, students will complete a project on a topic of their choosing, developing it from start to finish with instructor and peer feedback.

Credits: 3
Room and Schedule: 245 Beacon Street Room 230 M 03:00PM-05:25PM
INTL337201
International Finance
Velasquez Javier, Christian Fernando
Spring 2024
Not open to students who have taken ECON2271 or ECON3376 International financial markets, international trade and balance of payments issues will be studied by using analytical models of the open economy. Topics of particular interests are exchange rate determination, capital flows, trade flows, and other international linkages between economies. The course will apply the analytical tools of international economics to address macroeconomic aspects of current policy issues such as the global impact of the financial crisis, exchange rate policy, sovereign debt crises, and persistent trade deficits and international indebtedness.

INTL337401
Development Economics and Policy
Evrenk, Haldun
Spring 2024
This course examines development economics and development policy. The purpose is to understand the lives of the poor and the economies of poor countries in order to understand what—if anything—can be done to improve their lives. We will consider what might be holding the poor back including population growth, lack of education, poor health, corruption, and institutional impediments such as poorly developed or tightly constrained markets. This course is appropriate for economics majors as well as for majors in international studies with the appropriate prerequisites.

**INTL337601**  
**International Economic Relations**  
**Anderson, James**  
**Spring 2024**  
Not open to students who have taken ECON3371 or ECON3372.. This course introduces the study of economic relations among countries. It combines material contained in ECON3371 and ECON3372, and substitutes for both those courses. Primarily designed for international studies majors, it is also appropriate for economics and other social science majors, with the proviso that the comprehensive coverage of the course implies that the workload is heavy and expectations for students are high. Topics include the determinants of trade in goods, services, and capital; the economic policies that nations use to influence such trade; the theory and practice of international macroeconomics; and problems of coordinating macroeconomic policies among countries. The course features the usefulness (and limitations) of game theory for explaining international economic interactions.

INTL353001
Korean War: Conflict, Security, and Peace
Hwang, Ingu
Spring 2024
The Korean War (1950-1953) began as a civil war but became a global conflict against the backdrop of the emerging Cold War era. Known as "the Forgotten War" in the U.S., this conflict resulted in 5 million deaths and left an indelible imprint on the world. Seven decades later the Korean peninsula remains divided, and the contentious international security mechanisms engendered by this conflict still shape East Asian relations and U.S. foreign policy. Through engagement with recent historical works, this seminar course will explore the origins and legacies of this conflict, security options and limitations, and conditions and visions of peace. This course fulfills the LAMA requirement for History majors.

INTL424401
Global Political Catholicism
Gallagher, Charles R, SJ
Spring 2024
This class asks the question, "What has led to the creation and historical persistence of Catholic mass politics?" It begins its historical perspective in modernity, anchored by the publication of the social encyclical Rerum Novarum (1891) and ending with Catholic policy in the Obama Administration. We will look at how political parties, movements, and theologians interacted with the Vatican and the wider church. The European Church's phenomenon of "clerico-fascism" during the World War II era will be investigated. Regionally, we will look at how Catholicism has shaped political activism in China, Latin America, Europe, and the United States.

Drugs and Money
Kent, Stacie A
Spring 2024
Fulfills the LAMA Requirement for History Majors Amidst the current U.S. opioid epidemic, this course investigates how the pursuit of profit has intersected with constructions of health, illness, and social vice. Where and how have states and societies supported or tolerated widespread narcotic use? By the same token, what social, economic, and political processes transform use into social shame or criminal behavior? The course will look at the centuries-long opium trade between British India and China, the early history of commercial opioids around the world, and compare two U.S. epidemics in their global and local dimensions crack cocaine in the 1980s and opioids in the 2000s.

Islamic Civilization and Societies Courses: Fall 2023

ICSP119901  
Islamic Civilization  
DiPasquale, David M  
Fall 2023
This course introduces the varieties of Islamic civilization from the seventh century to the modern world. It explores not only the tenets of faith and practice, and political, social, theological, and economic history, but also considers Muslim cultural and intellectual contributions, including by women, from Indonesia to Morocco and in the Western world. Students will read primary sources, listen to recordings, and view films. The course will emphasize the variety of experiences of Muslims and their contributions to the world.

ICSP261501
Islam and Liberal Democracy
DiPasquale, David M
Fall 2023
We will take advantage of current geopolitical controversies in order to unearth the theoretical core of the debate between Islam and the West. Materials related to the Islamic heritage will be placed next to arguments made on behalf of the West in relation to certain key issues, such as rights versus duties; religion and freedom; and democracy and progress. Modern, pre-modern, sacred, and secular texts will be studied. How can the secular world defend itself against a critique that begins from a position of faith and emphasizes virtue, God, and justice?

Women and Gender in Islam
Delong-Bas, Natana J
Fall 2023
This course explores women and gender roles in Islamic history, civilization, and societies, beginning with the pre-Islamic period and continuing through the present. The goal is to present women and women’s issues as central to the main narrative of Islamic history, rather than as a side story. This course explores questions related to both historical and contemporary religious interpretation and practice, Sunni, Shia and Sufi, as well as the impact of religion and gender constructs on women’s access to the public sphere, positions of leadership, and legal status.

Music and Culture in the Middle East
Lucas, Ann E
Spring 2024
This course explores the relationship between different music traditions of the Middle East and their respective cultural contexts. It addresses issues of music's structure and content vis-à-vis its role in social, political, and religious situations in the region; the ways that these forces influence musical aesthetics, while also addressing the role of music in the Middle East historically. The cultural areas covered in this class include the Arab World, Iran, Turkey, and Afghanistan.

ICSP331701
Contemporary Issues in Islam: Faith, Freedom, and Politics
Akyol, Mustafa
Spring 2024
Despite simplistic depictions of Islam as a monolith, Muslims have always had remarkably diverse interpretations of their religious sources. Moreover, Islamic thought has become even more complex in the modern era, with a wide range of views on both the interpretation of traditional teachings and their applicability in the contemporary world. This course will present an introduction to this diversity within contemporary Islamic thought, focusing on some of the most contested issues: The relationship between religion and the state, the value of freedom of speech and religion, the rights of women and minorities, the various meanings of jihad, theories of Islamic economics, "Islamic views on Christianity and Judaism, or the theological nuances between modernists and conservatives. Students will learn about not just the distinct trends within Islam, but also get a sense of their parallels within other Abrahamic faith traditions.

ICSP501001
THE GREAT BOOKS OF ISLAM
Welle, Jason
Spring 2024
This course surveys some of the literary classics of the Islamic tradition, works that could be counted among the great books of Islam. The texts chosen belong to a strain of Islamic civilization known as adab: classics that offer a variety of perspectives on what it means to be cultivated, learned, virtuous, wise, and pious. The course examines the place of adab in Islam as a whole and in relation to Islam's religious, ethical, and political outlooks. In particular, the question of religious humanism will return throughout the semester: what is the significance of the humanistic venture in Islam for Muslims and non-Muslims alike, and how does this compare to secular notions of humanism? Students will do a close reading of some of the great books of Islam from different centuries and genres, including historical writing, political treatises, belles-lettres, epic poetry, mysticism, autobiography, and the modern novel.

**Debating Religion: Muslims, Christians, and Jews in Dialogue and Dispute**

Decter, Jonathan

Spring 2024
This course is a history of interreligious polemic, disputation, and dialogue among Jews, Christians, and Muslims from antiquity to modernity. The course not only highlights points of difference among the traditions from abstruse theological doctrines, to competing interpretations of scriptural passages, to ad hominem attacks on religious founding figures but also the ways in which the practice of disputation played a formative role in the development of Judaism, Christianity, and Islam. The course focuses specifically on interreligious debates and dialogues, both real and fictional, although we also consider broader polemical themes as expressed in treatises. Finally, the course considers epistemic shifts that allowed for the transition from interreligious disputation to interfaith dialogue in recent decades even as it highlights the lines of continuity between the two.

Jesuit Studies Courses: Summer 2023

JESU715701
In the Footsteps of Leaders
Beaumier, Casey, SJ
Summer 2023
This course considers the historical, spiritual, and pedagogical foundations of Jesuit leadership by situating them in their historical and geographic context. The course begins with two weeks of online coursework, followed by twelve days of experiential learning in Spain and Rome where students immerse themselves in the key places that became the roots of the Society of Jesus using primary sources to critically examine the decisions and actions of the early Jesuits. Students will consider contemporary topics such as the challenges and opportunities experienced by administrators and teachers at secondary and higher education schools. Coursework features selected readings, workshops, presentations, and projects to be completed both individually and in small groups. Through this course, students will gain an understanding of the Jesuits' early vision of apostolic effectiveness and of the ways that vision has remained constant while adapting to various circumstances along the way.

Jesuit Studies Courses: Fall 2023

JESU713101
Social Justice in Jesuit Contexts
Casalini, Cristiano
Fall 2023
This is a Graduate-level on-line course. The Social Apostolate of the Society of Jesus has developed in a variety of ways over the centuries according the diverse contexts where Jesuits have operated as agents of "social justice." This class offers students both a broad and deep understanding of: (1) How the Society of Jesus developed its mission in support of creating a "preferential option for the poor"; (2) How the Society understood its role to promote liberation from oppression in diverse social environments; (3) What kind of services have been activated by the Society of Jesus in order to fulfill its core values of "the service of faith and promotion of justice"; and (4) How social justice is pursued through pedagogy and practices by Jesuit and Ignatian schools today, given the significant involvement of the Jesuits with formal education on a global scale. The course is designed to foster deep and meaningful conversation among students. It will include individual and collective readings and video-conferences with leaders and teachers of Jesuit schools around the world, deepening students' knowledge of current practices and stimulating dialogue.

This is a Graduate-level on-line course. For nearly five centuries, the Society of Jesus has been one of the most successful and, at times, most controversial religious orders in the Catholic Church. A History of the Jesuits offers an introductory survey to this rich and varied past with particular attention, following the Jesuits' suppression in 1773, to various enterprises and enterprisers in the Americas. The course seeks to answer these questions: What have been the characteristics of the Society of Jesus and its associated works? And how and why have those characteristics remained the same or changed? Complementing the other courses in the Certificate program, the course traces the development, expansion, suppression, restoration, and recent developments of the Society of Jesus by closely examining the historical contributions of significant Jesuits.

Jesuit Studies Courses: Spring 2024

JESU715201
The Constitutions of the Society of Jesus
Geger, Barton T, SJ
Spring 2024
This is an online course. St. Ignatius of Loyola (1491-1556) wrote constitutions a large book consisting of rules, principles, and priorities to govern, unify, and inspire the Society of Jesus as a worldwide corporate body of priests and laymen. Some Jesuit writers have suggested that the Constitutions, by regrettable necessity, is a dilution or institutionalization of the highly personal, dynamic relationship with God that Jesuits cultivate when making the month-long retreat known as the Spiritual Exercises. This course argues the opposite: that Ignatius two books comprise an organic unity, so that his spiritual teaching as found in the Exercises cannot be properly understood apart from the Constitutions.

JESU715801
Jesuit Pedagogy
Casalini, Cristiano
Spring 2024
This is an online course. This three-credit, graduate-level online course examines the distinctiveness of the Jesuits' approaches to teaching and of their philosophy of education that have propelled their schools to unprecedented success over the centuries. One key to the unprecedented success of Jesuit education has been the tension between the recognizable mark of uniformity that long distinguished the methods, contents, and practices of Jesuit schools and their ability to adapt to different contexts and times. Both aspects—the uniformity and the adaptability—were explicitly supported by the "Ratio studiorum," the Jesuits' foundational plan of studies issued in 1599, which, despite the schools' many variations and complexities, has retained some influence over time. With the "Ratio" discarded, Jesuit schools had to clarify what made them distinctively Jesuit, reconciling their mission with the contemporary world. This three-credit, graduate-level class sketches the developments of Jesuit educational endeavors by focusing on both the permanent and changing traits of its distinctive pedagogy.

This course may be used to satisfy the Communication major Critical Issues requirement or to satisfy one of three electives required for the Communication major. Sports have long played a vital yet complex role in culture and this course examines that intersection of sports, the mass media, and society. We will appraise and debate the ways in which sports are functional or problematic in their impact on and relationship to players, fans, journalists, co-cultural groups, and nations. Students will read both scholarly and journalistic reflections, view popular and documentary film, and analyze fan experiences, mediated presentations, and critical social issues. In short, we will go beyond the box score to understand the importance and deconstruct the hype that accompanies modern sports.

Writing About Popular Music
Johnston, Maura K
Fall 2023
Note to Journalism minors: this course satisfies the requirement for an elective with a craft orientation. Reporting on popular music is a keenly effective way to take a snapshot of culture as it's happening. In this discussion-intensive class, students will get hands-on tips on how to write about music effectively, hone their critical thinking skills, and examine the ways that the business struggles experienced by both music and publishing have affected the way pop writing is disseminated and consumed. Guest speakers from the music writing world will provide further insights on their career paths, their views on where music is now, and the artists and songs that stoke their passion.

JOUR225301

**Topics in Creative Nonfiction: Writing for Magazines**

Rotella, Carlo

Fall 2023
In this advanced creative nonfiction writing course we practice and study the craft of magazine writing. We will write and read a variety of articles, features, profiles, reviews, columns, essays, etc. and work on professional skills, such as pitching a story and interviewing. We will also consider models provided by accomplished journalists, by reading their work and by having them in for class visits. A variety of writing assignments, workshopping of student prose, and discussion of assigned reading are regular features of the course's workload. Admission to this course is by permission of instructor on the basis of manuscript submission. Please submit up to 8 double-spaced pages of writing, which can be an entire piece, part of a longer piece, or a compilation of shorter ones. You can explain the nature of what you have submitted in an accompanying note, and please also list any writing workshops you have already taken. Be sure to include your name and email address. Materials should be submitted to Carlo Rotella via email (rotellca@bc.edu) before the date on which registration for the next semester begins. Students will be promptly notified by email as to whether they have been admitted to the course. Materials submitted after the first day of registration will still be considered if there are any open seats remaining.

Note to Journalism minors only: this course satisfies the requirement for an elective with a "craft" orientation. The biggest public health crisis during the war on drugs was over legal drugs opioids which have killed over a million Americans. Drug policies, driven by irrationality and fear, have ruined countless lives. Journalists, wittingly or not, were partisans in this war, and often (though not always) ahead of the curve in advocating for change with regards to drugs, and to vice more generally. In this class we take a close look at the practice and tradition of drug journalism at a watershed moment in American history. Readings will include works by Chris Kraus, Hunter S. Thompson, Susan Orlean, Lawrence Osborne, Yvonne Adhiambo Owuor, Geoff Dyer, and others.

**Truth: A Short History**

**Sennott, Charles**

**Fall 2023**

Note to Journalism minors: this course satisfies the requirement for an elective with a "critical" orientation. A term borrowed from digital mapping, ground truth argues that reporting from the ground up is a journalist's highest calling. This course first explores the idea of truth, from ancient Greece and great theologians to contemporary writers. We will then examine the rise of nationalist leaders around the world weaponizing doubt; how discernible facts and the truth itself have come under attack and; and how news organizations can best live up to Edward R Murrow's admonishment to serve without fear or favor. The course will introduce students to an international survey of ground-level reporting that focuses on the role of the journalist as a witness who speaks truth to power.

JOUR200002
Introduction to Journalism
Convey, Kevin
Spring 2024
Senior Journalism minors only - required Journalism course. To be taken in Freshman, Sophomore, or Junior year. Organized like a professional newsroom, this course will give students interested in journalism a taste of its various facets, including topic-generation, reporting, interviewing, and editing, for print, broadcast, and online media. It will cover basic newswriting, beat reporting, investigative journalism, feature writing, and writing for the web, and provide an introduction to media law and ethics and the business and history of journalism. Students will produce a feature-length final project and will also work in teams to formulate, report, and write investigative stories. Students should expect to meet deadlines and high standards of grammar, style, punctuation, and factual accuracy.

JOUR218401
Sports, Media, Culture
Kim, Kyoung-yim
Spring 2024
This course may be used to satisfy the Communication major Critical Issues requirement or to satisfy one of three electives required for the Communication major. Sports have long played a vital yet complex role in culture and this course examines that intersection of sports, the mass media, and society. We will appraise and debate the ways in which sports are functional or problematic in their impact on and relationship to players, fans, journalists, co-cultural groups, and nations. Students will read both scholarly and journalistic reflections, view popular and documentary film, and analyze fan experiences, mediated presentations, and critical social issues. In short, we will go beyond the box score to understand the importance and deconstruct the hype that accompanies modern sports.

Sports and News Broadcasting
Meterparel, Jon
Spring 2024
Note to Journalism minors: this course satisfies the requirement for an elective with a craft"orientation.". This course will focus on developing performance and writing skills for sports and news broadcasting. From play by play to interviewing to writing for news broadcasts, this class will help prepare you for working in the ever-changing broadcasting world. Participants will learn how to present on-air and interview politicians, athletes, and other newsmakers. Industry leaders in broadcasting will be frequent guest lecturers, and we'll also analyze and critique each other's work.

JOUR222501
Journalism and New Media
Johnston, Maura K
Spring 2024
Note to Journalism minors: this course satisfies the requirement for an elective with a craft"orientation." The rise of the internet as a news delivery system has changed the face of the news business, for better or worse, in the 21st century. This one semester seminar will trace the history of new medias relationship with journalism while preparing students for the leaner online world. Students will learn about practical matters (storytelling for the web, condensing complex narratives into 140-character missives) while grappling with larger concerns affecting the industry and readers (traffic-based journalism, slippery sourcing) as they report and write on the world around them.

Writing About Popular Music
Johnston, Maura K
Spring 2024
Note to Journalism minors: this course satisfies the requirement for an elective with a craft"orientation." Reporting on popular music is a keenly effective way to take a snapshot of culture as it's happening. In this discussion-intensive class, students will get hands-on tips on how to write about music effectively, hone their critical thinking skills, and examine the ways that the business struggles experienced by both music and publishing have affected the way pop writing is disseminated and consumed. Guest speakers from the music writing world will provide further insights on their career paths, their views on where music is now, and the artists and songs that stoke their passion.

JOUR223101
Feature Writing
Marcus, Jon P
Spring 2024
Students must already have taken JOUR2000 Introduction to Journalism in order to enroll. Note to Journalism minors: This course satisfies the requirement for an elective with a "craft" orientation. This is a course on contemporary feature writing--literary nonfiction journalistic writing based on solid reporting. The emphasis is on writing stories editors will want to print and readers will want to read. The course will include reading and analyzing well-written newspaper and magazine articles. Students will learn to apply the techniques of drama and fiction to writing objective, factual stories that entertain as well as inform. The course focuses on newspaper features and magazine articles, but the techniques are also applicable to writing nonfiction books.

Food Writing
O'Connor, John
Spring 2024
Note to Journalism minors: this course satisfies the requirement for an elective with a craft"orientation.". This class takes a close look at the practice and tradition of food journalism, introducing students to narrative techniques, elements of reporting, and works that have shaped the genre. Students will learn how to avoid the clichés and traps of food writing and to develop original, persuasive, surprising ideas about food and the culture of eating. Issues of voice, scene, social observation, and dramatic structure are addressed, with additional attention paid to crafting and pitching articles. Readings will include works from early practitioners like A. J. Liebling and M.F.K. Fisher and contemporary writings by Gabrielle Hamilton, Frank Bruni, David Foster Wallace, and others.

JOUR225201
News Media/Democracy
Serazio, Michael J
Spring 2024
Satisfies one of two required writing-intensive courses for Communication majors.

The press plays an essential role in America and the world. This course aims to equip students to become critical news consumers with both a skilled understanding of how journalism works and political literacy about the big issues of our time. Through classic scholarly reflections as well as contemporary punditry examples, we will tackle the news media critically across three dimensions: learning about its indispensable function in mediating politics and democracy throughout history and today; studying and practicing the craft of opining writing and social advocacy; and evaluating and critiquing the performance of the press across these fronts.

JOUR225501  
**Journalism on Drugs**  
O'Connor, John  
Spring 2024  

Note to Journalism minors only: this course satisfies the requirement for an elective with a "craft" orientation. The biggest public health crisis during the war on drugs was over legal drugs opioids which have killed over a million Americans. Drug policies, driven by irrationality and fear, have ruined countless lives. Journalists, wittingly or not, were partisans in this war, and often (though not always) ahead of the curve in advocating for change with regards to drugs, and to vice more generally. In this class we take a close look at the practice and tradition of drug journalism at a watershed moment in American history. Readings will include works by Chris Kraus, Hunter S. Thompson, Susan Orlean, Lawrence Osborne, Yvonne Adhiambo Owuor, Geoff Dyer, and others.

JOUR225601
Truth: A Short History
Sennott, Charles
Spring 2024
Note to Journalism minors: this course satisfies the requirement for an elective with a "critical" orientation. A term borrowed from digital mapping, ground truth argues that reporting from the ground up is a journalists highest calling. This course first explores the idea of truth, from ancient Greece and great theologians to contemporary writers. We will then examine the rise of nationalist leaders around the world weaponizing doubt; how discernible facts and the truth itself have come under attack and; and how news organizations can best live up to Edward R Murrows admonishment to serve without fear or favor. The course will introduce students to an international survey of ground-level reporting that focuses on the role of the journalist as a witness who speaks truth to power.

Note to Journalism minors only: This course satisfies the requirement for an elective with a "critical" orientation. The journalist is offered a unique and personal lens on events that most people can only experience as consumers of media. While many stories are exhilarating to cover, just as many are painful, horrifying, heartbreaking, and extremely difficult to tell. These include such high profile tragedies as the coronavirus pandemic, 9/11, and the Boston Marathon bombing—but also more personal tragedies involving people in our own communities. This course takes a critical look at covering and telling those difficult stories. We will hear from some of the journalists (including but not limited to the instructor) who will share their professional insight into covering the most traumatic stories of their careers, as well as from some of the families and/or victims of these difficult events. Additionally, we will examine the PTSD that often affects journalists and is not limited to first responders and victims. Students should be aware that this course will deal with difficult material including homicide, abduction, suicide, illness, and crime.

JOUR226101
Environmental Journalism: Science, Society, Solutions
Humphries, Courtney
Spring 2024
Note to Journalism minors: this course satisfies the requirement for an elective with a critical orientation. This course allows students to study, and gain practical skills in, the craft of environmental journalism. In the first unit, we will learn techniques for conveying complex scientific information and ideas to readers. In the second unit, students will explore how to write about social, economic, legal, and political aspects of environmental issues, including environmental justice. In the third unit, students will learn techniques of the emerging practice of solutions journalism, including how to report on and evaluate positive stories of solutions without falling prey to hype. Assignments will build toward a final project that integrates these skills into a finished piece.

JOUR226201

**Photojournalism**

**Burns, Christopher G F**

**Spring 2024**

Note to Journalism minors: this course satisfies the requirement for an elective with a craft orientation. This course will provide students with an introduction to producing high-quality photographs and videos as journalism; to considering photography as a form of visual communication, focusing on light, composition, and context; and to understanding the ethics of photojournalism and the implications of photographic truth. Through a number of different class structures, including traditional classroom lectures, group walkabouts, lab time, and independent / team-based classes, we will ask the fundamental question: Are photographs real? Are photographs true? A DSLR camera is suggested but not necessary. A simple smartphone will be more than sufficient.

JOUR494201
Senior Seminar
Nanos, Janelle M
Spring 2024
Senior Journalism minors only; required Journalism capstone course. Limited to 15 students. Permission of the Journalism Department required. This required course for senior Journalism minors is a blend of seminar and workshop. In it, students work at the craft of journalism by covering stories and also step back to analyze the work of professional journalists. Over the semester, each student chooses a particular subject area on which to concentrate and assembles a body of work that could be submitted to a prospective employer or graduate school. This portfolio might include examples of his or her own journalism, as well as critical assessments of stories, publications, and the news industry. Admission by permission of program.

LING310101  
General Linguistics  
Owusu, Augustina  
Fall 2023  
An introduction to linguisticsthe scientific study of human languageand contemporary linguistic theory. Linguists use mathematical systems (often called formal systems) to develop precise theories that help us understand the rich cognitive processes that support our use of language to communicate, to conduct internal monologues, and much more. The course focuses on the major subfields within linguistics: phonetics, phonology, morphology, syntax, and semantics: how do linguists create and manipulate representations of language phenomena, and how do they analyze linguistic data? Our primary data will be from English, but we will also employ data from other languages. No previous exposure to the field is presupposed.

LING332601  
**Morphology**  
**Owusu, Augustina**  
**Fall 2023**  
This is an introductory course to Morphological Theory, the study of the internal structure of words. Morphologists seek to determine the types of knowledge that speakers of a language must possess to use words and form intuitive notions about them. Since words (or their constituents) are stored in the speaker's mental lexicon, morphology also studies the lexicon and how it is structured. The course will investigate the nature and goals of morphology, the fundamental concepts of word structure from a cross-theoretical perspective, and the role of morphology in grammar. The course will also cover inflection, derivation, and linguistic typology. Students will investigate the fundamental concepts of morphology and learn how to analyze and describe the word structures of various languages.

**Credits:** 3  
**Room and Schedule:** Gasson Hall 308 MWF 12:00 Noon-12:50PM

Linguistics Courses: Spring 2024

LING237701
Language and the Study of Africa
Owusu, Augustina
Spring 2024
The goal of this course is to introduce students to a vital part of culture, social structure, and education in Africa through the lens of language. We will look at central concepts as multilingualism, language policy/language of literacy, urban youth languages, and African languages in the diaspora. The course is designed for students with little or no background in linguistics. No previous knowledge of any African languages is required.

LING238001
Invented Languages
Owusu, Augustina
Spring 2024
How does one begin the process of developing a new language? Why would anyone want to engage in such behavior? These are just some of the questions that will be discussed in this course, which draws on the knowledge and methodologies of linguistics to investigate the history of invented languages and the science behind them. The students will explore a variety of already existing invented languages, such as those from the Renaissance designed to improve clarity of thought, those from the 19th century designed to improve international communication, and those from our own time designed to make fictional peoples and alien species found in books and movies seem more real and life-like. Students will gain an appreciation for how our capacity to create new languages has developed in tandem with our scientific understanding of the operation of human languages as they progress through the course. The course will focus heavily on the fundamental design principles for developing new languages, and students will use these to create their own linguistic systems.

**LING335401**  
*Documenting and Preserving Indigenous Languages with Data Science*  
Hartshorne, Joshua K; Le Ferrand, Eric; Prud'hommeaux, Emily T  
**Spring 2024**  
In this hands-on research course, students will learn about linguistic diversity, language endangerment, and methods of preserving, documenting, and analyzing languages. The core of the course is hands-on research in collaboration with an ongoing international effort to understand human linguistic diversity. Students will compile primary linguistic data and analyze it using methods from linguistics, psychology, computer science, and data science. This is an excellent introduction to both data science and linguistic analysis; students who already have advanced skills in those areas will be able to expand those skills.

**Credits:** 3  
**Room and Schedule:** O'Neill Library 246 TuTh 01:30PM-02:45PM  
**Satisfies Core Requirement:** None  
**Prerequisites:** There are no formal prerequisites, but it is recommended that students have taken at least one of the following: Baby Talk (psychology), Disorders of Language & Communication (psychology), Language and Language Types (linguistics), Syntax and Semant...

LING337701
Linguistic Analysis and Field Methods
Thomas, Margaret
Spring 2024
Analysis of a little-studied language through direct interaction with a native speaker: techniques for eliciting, transcribing, and interpreting linguistic data, some going back to the beginnings of Western language science, others employing modern technology. Individually and in small groups, students analyze the sound patterns, words, syntax, and pragmatics of the target language, with some attention to cultural and ethnographic matters. The course also addresses ethical issues involved in archiving linguistic materials, and the debate about language rights. The identity of the target language varies from year to year (e.g., Austronesian, Dravidian, Vietnamese, Quechua).

Credits: 3
Room and Schedule: Gasson Hall 210 TuTh 10:30AM-11:45AM
Satisfies Core Requirement: None
Prerequisites: LING3101/ENGL3527 or And at least one additional linguistics course.

LING433701
Phonetics and Phonology
Owusu, Augustina
Spring 2024
This course offers a comprehensive introduction to the phonetics and phonology of human languages. Phonetics is a field of study that examines the production (articulatory) and perception (acoustic) of sounds across various languages. In comparison, phonology is concerned with understanding how these sounds are classified, differentiated, and arranged into more extensive structures that conform to language-specific patterns.

Mathematics Courses: Summer 2023

MATH100402
Finite Probability and Applications
Yavuz, Cemre
Summer 2023
Not open to students who have completed their Mathematics Core Curriculum Requirement without permission of the Department Chairperson (except for Psychology majors completing their second mathematics corequisite).. This course, for students in the humanities, the social sciences, School of Education, and School of Nursing, is an introduction to finite combinatorics and probability, emphasizing applications. Topics include finite sets and partitions, enumeration, probability, expectation, and random variables.

Credits: 3
Room and Schedule: Stokes Hall 401N MW 06:00PM-09:15PM
Satisfies Core Requirement: Mathematics
Prerequisites: Permission of Department
Corequisites: None

MATH100601
Thinking Like a Mathematician
Belding, Juliana V; Goldstein, Ellen J; Ward, Erika; Zhang, Liyang
Summer 2023
This course is designed for students with a desire to expand their problem-solving skills and strategies. Students will develop a flexible and transferable collection of skills and strategies for tackling unfamiliar problems in Mathematics and beyond, which will be helpful for quantitative aspects of STEM majors. In addition, students will work with select mathematics topics commonly used in General Chemistry, including rational expressions, exponential and logarithmic functions, dimensional analysis, and working with parameters.

**Credits:** 1  
**Room and Schedule:** 8/9 - 8/23; O'Neill Library 253 MTuWThF 12:30PM-02:15PM  
**Satisfies Core Requirement:** None  
**Prerequisites:** Permission of Department  
**Corequisites:** None

MATH110003
Calculus I
MATH1100 is not open to students who have completed a calculus course at the college level. Students contemplating majors in Chemistry, Computer Science/B.S., Environmental Geosciences, Geological Sciences, Mathematics, or Physics should enroll in MATH1102. For further information about selecting your Math courses given your background, please see this link to the BC Math Department. MATH1100 is a first course in the calculus of one variable intended for biology, computer science, economics, management, and premedical students. It is open to others who are qualified and desire a more rigorous mathematics course at the core level. Topics include a brief review of polynomials and trigonometric, exponential, and logarithmic functions, followed by discussion of limits, derivatives, and applications of differential calculus to real-world problem areas. The course concludes with an introduction to integration.

Credits: 3
Room and Schedule: On-line Asynchronous
Satisfies Core Requirement: Mathematics
Prerequisites: None
Corequisites: None

Mathematics Courses: Fall 2023

MATH100201
Functions and Differential Calculus
Goldstein, Ellen J
Fall 2023
This course is intended for students who are required to take Calculus I (either MATH1100 or MATH1102) but whose backgrounds necessitate additional preparation. Topics include the real line and coordinate plane; linear and quadratic functions; higher degree polynomials and rational functions; trigonometry, emphasizing the trigonometric functions; and exponential and logarithmic functions. Note: This course does not satisfy the University Core Requirement in Mathematics. Department permission is required: see the Assistant Chair for Undergraduates.

Credits: 3

Students contemplating majors in Chemistry, Computer Science/B.S., Environmental Geosciences, Geological Sciences, Mathematics, or Physics should enroll in MATH1102. For further information about selecting your Math courses given your background, please see this link to the BC Math Department. MATH1100 is a first course in the calculus of one variable intended for biology, computer science, economics, management, and premedical students. It is open to others who are qualified and desire a more rigorous mathematics course at the core level. Topics include a brief review of polynomials and trigonometric, exponential, and logarithmic functions, followed by discussion of limits, derivatives, and applications of differential calculus to real-world problem areas. The course concludes with an introduction to integration.

Calculus II  
Krumpak, McKee  
Fall 2023
MATH1101 is not open to students who have completed MATH1103 or MATH1105. Students contemplating majors in Chemistry, Computer Science B.A. or B.S., Environmental Geosciences, Geological Sciences, Mathematics or Physics should enroll in either MATH1103 (Spring) or MATH1105 (Fall). For further information about selecting your Math courses given your background, please see this link to the BC Math Department. MATH1101 is a second course in the calculus of one variable intended for students studying life or social sciences, such as biology, neuroscience, economics, management and premedical students. It is open to others who are qualified and desire a more rigorous mathematics course at the core level. There are three main topics: integration (definition of integration, basic techniques for integration, and select applications); an introduction to differential equations (with applications to population modeling and other contexts); an introduction to multivariable functions and partial derivatives (with application to optimization in economics and other contexts).

Credits: 4

MATH11301
Infinite Sequences and Series
Belding, Juliana V
Fall 2023
This weekly discussion section is designed for students to develop the tools and concepts of infinite sequences and series, as found in the Math 1103 curriculum. The focus will be on concepts, computations and applications. This section is open to students in Computer Science and Engineering who've taken Math 1101 and who require this material for their further studies.

MATH119001
Fundamentals of Mathematics I
Goldstein, Ellen J
Fall 2023
Restricted to Lynch School of Education students. MATH1190-1191 is a course sequence designed for those who plan to teach mathematics in grades K-8. The emphasis is on building conceptual understanding of the mathematics present in the emerging K-8 curriculum and on deepening content knowledge. Number and number systems through the real number system will be studied; functions and the structure of algebra will be developed. Problem solving and reasoning, applications and making connections will be featured.

**Credits:** 3  
**Room and Schedule:** Gasson Hall 204 MWF 01:00PM-01:50PM  
**Satisfies Core Requirement:** Mathematics

MATH220201
Multivariable Calculus
Fedorchuk, Maksym
Fall 2023
This course is for students majoring in Chemistry, Computer Science/B.S., Geology, Geophysics, Mathematics and Physics, as well as other students who have completed Calculus II. Topics in this course include vectors in two and three dimensions, analytic geometry of three dimensions, parametric curves, partial derivatives, the gradient, optimization in several variables, multiple integration with change of variables across different coordinate systems, line integrals, and Green's Theorem.

MATH221001
Linear Algebra
Ionov, Andrei
Fall 2023
This course is an introduction to the techniques of linear algebra in Euclidean space. Topics covered include matrices, determinants, systems of linear equations, vectors in n-dimensional space, complex numbers, and eigenvalues. The course is required of mathematics majors and is also suitable for students in the social sciences, natural sciences, and management.

Credits: 3
Room and Schedule: 245 Beacon Street Room 214 MWF 12:00 Noon-12:50PM

MATH221604
Introduction to Abstract Mathematics
Zachos, Ioannis
Fall 2023
This course is designed to develop the student's ability to do abstract mathematics through the
presentation and development of the basic notions of logic and proof. Topics include
elementary set theory, mappings, integers, rings, complex numbers, and polynomials.

Credits: 3
Room and Schedule: Gasson Hall 210 MWF 11:00AM-11:50AM
Satisfies Core Requirement: None
Mathematical Foundations of Data Science
Zhang, Liyang
Fall 2023
Introduction to the mathematical foundations of data science, including calculus, linear algebra and probability. The first part of the course covers linear algebra, including matrices, systems of linear equations, vector spaces, and eigenvalues and eigenvectors. The second part of the course introduces random variables and provides an introduction to calculus based probability. The third part of the course introduces optimization techniques used in data science.
Prerequisite: Math 1101 or Math 1103 or equivalent Calculus 2 background.

Credits: 3

Introduction to Abstract Algebra
Kelmer, Dubi
Fall 2023
Students may not take both MATH3310 and MATH3311.. This course studies four fundamental algebraic structures: groups, including subgroups, cyclic groups, permutation groups, symmetry groups, and Lagrange's Theorem; rings, including sub-rings, integral domains, and unique factorization domains; polynomials, including a discussion of unique factorization and methods for finding roots; and fields, introducing the basic ideas of field extensions and ruler and compass constructions.

Credits: 3
Room and Schedule: Gasson Hall 209 MWF 12:00 Noon-12:50PM
Satisfies Core Requirement: None
Prerequisites: MATH2216 and MATH2210/ADMT2210 or Permission of Department
Corequisites: None
Cross-listed with: None
Frequency: Every Fall, Every Spring
Student Level: Undergraduate
Comments: None
Status: Offered

MATH331101
Algebra I
Han, Zijian; Reeder, Mark
Fall 2023
Students may not take both MATH3310 and MATH3311.. This course, with MATH3312, studies the basic structures of abstract algebra. Topics include groups, subgroups, factor groups, Lagrange's Theorem, the Sylow Theorems, rings, ideal theory, integral domains, field extensions, and Galois theory.

Credits: 3
Room and Schedule: Gasson Hall 205 MWF 11:00AM-11:50AM
Satisfies Core Requirement: None
Prerequisites: MATH2216 and MATH2210/ADMT2210 or Permission of Department
Corequisites: None
Cross-listed with: None
Frequency: Every Fall
Student Level: Undergraduate

Status: Offered
MATH332001
Introduction to Analysis
Madapusi Pera, Keerthi S
Fall 2023
Students may not take both MATH3320 and MATH3321. This course gives students the theoretical foundations for the topics taught in Calculus. It covers algebraic and order properties of the real numbers, the least upper bound axiom, limits, continuity, differentiation, the Riemann integral, sequences, and series. Definitions and proofs will be stressed throughout the course.

Credits: 3
Room and Schedule: Gasson Hall 210 MWF 12:00 Noon-12:50PM
Satisfies Core Requirement: None
Prerequisites: MATH2216 and MATH2202 or Permission of Department
Corequisites: None
Cross-listed with: None
Frequency: Every Fall, Every Spring
Student Level: Undergraduate

Status: Offered

MATH332101
Analysis I
Lindsey, Kathryn A; Lyu, Qingfeng
Fall 2023
Students may not take both MATH3320 and MATH3321. This course, with MATH3322, studies the basic structure of the real numbers. Topics include the least upper bound principle, compactness of closed intervals (the Heine-Borel theorem), sequences, convergence, the Bolzano-Weierstrass theorem, continuous functions, boundedness and intermediate value theorems, uniform continuity, differentiable functions, the mean value theorem, construction of the Riemann integral, the fundamental theorem of calculus, sequences and series of functions, uniform convergence, the Weierstrass approximation theorem, special functions (exponential and trig), and Fourier series.

MATH442601  
**Probability**  
**Gross, Robert**  
**Fall 2023**  
This course provides a general introduction to modern probability theory. Topics include probability spaces, discrete and continuous random variables, joint and conditional distributions, mathematical expectation, the central limit theorem, and the weak law of large numbers. Applications to real data will be stressed, and we will use the computer to explore many concepts.

**Credits:** 3

MATH444501
Combinatorics
Greene, Joshua E
Fall 2023
Not open to students who have completed MATH2245 or MATH2248 or CSCI2245. This course is an introduction to graph theory and combinatorics, with a strong emphasis on creative problem-solving techniques and connections with other branches of mathematics. Topics will center around enumeration, Hamiltonian and Eulerian cycles, extremal graph theory, planarity, matching, colorability, Ramsey theory, hypergraphs, combinatorial geometry, and applications of linear algebra, probability, polynomials, and topology to combinatorics.

Credits: 3
Room and Schedule: Gasson Hall 202 MWF 09:00AM-09:50AM
Satisifies Core Requirement: None
Prerequisites: MATH2216 or Permission of Department

MATH445101
Euclidean and Non-Euclidean Geometry
Meyerhoff, G R
Fall 2023
This course surveys the history and foundations of geometry from ancient to modern times. Topics will be selected from Mesopotamian and Egyptian mathematics, Greek geometry, the axiomatic method, history of the parallel postulate, the Lobachevskian plane, Hilbert’s axioms for Euclidean geometry, elliptic and projective geometry, the trigonometric formulas, models, and geometry and the study of physical space.

MATH445501
Mathematical Problem Solving
Lehmann, Brian T
Fall 2023
This course is designed to deepen students' mathematical knowledge through solving, explaining and extending challenging and interesting problems. Students will work both individually and in groups on problems chosen from polynomials, trigonometry, analytic geometry, pre-calculus, one-variable calculus, probability and numerical algorithms. The course will emphasize explanations and generalizations rather than formal proofs and abstract properties. Some pedagogical issues, such as composing good problems and expected points of confusion in explaining various topics, will come up, but the primary goal is mathematical insight. The course will be of particular use to future secondary math teachers.
Credits: 3
Room and Schedule: Gasson Hall 210 MWF 10:00AM-10:50AM
Satisfies Core Requirement: None
Prerequisites: MATH2210/ADMT2210 and MATH2216 and MATH2202 or Permission of the instructor required for students outside the Lynch School of Education.

MATH446001
Complex Variables
Frechette, Claire
This course gives an introduction to the theory of functions of a complex variable, a fundamental and central area of mathematics. It is intended for mathematics majors and well-prepared science majors. Topics covered include complex numbers and their properties, analytic functions and the Cauchy-Riemann equations, the logarithm and other elementary functions of a complex variable, integration of complex functions, the Cauchy integral theorem and its consequences, power series representation of analytic functions, and the residue theorem and applications to definite integrals.

Credits: 3
Room and Schedule: Gasson Hall 307 MWF 09:00AM-09:50AM
Satisfies Core Requirement: None
Prerequisites: MATH2202 and MATH2210/ADMT2210

MATH887501
Topics in Deep Learning Theory
Grigsby, Julia E
Fall 2023
Topics course in mathematical aspects of machine learning. The course will begin with an introduction to statistical learning theory and some classical supervised and unsupervised learning algorithms, then survey some motivating modern questions in deep learning theory, with an emphasis on how geometry, topology, and combinatorics enter the mathematical picture.

MATH100401
Finite Probability and Applications
Yeh, Kevin
Spring 2024
Not open to students who have completed their Mathematics Core Curriculum Requirement without permission of the Department Chairperson (except for Psychology majors completing their second mathematics corequisite). This course, for students in the humanities, the social sciences, School of Education, and School of Nursing, is an introduction to finite combinatorics and probability, emphasizing applications. Topics include finite sets and partitions, enumeration, probability, expectation, and random variables.

Credits: 3
Room and Schedule: Gasson Hall 205 MWF 01:00PM-01:50PM
Satisfies Core Requirement: Mathematics

MATH100701
Ideas in Mathematics
Ward, Erika
Spring 2024
Not open to students who have completed their Mathematics Core Curriculum Requirement without permission of the Department Chairperson (except for Psychology majors completing their second mathematics corequisite). This course is designed to introduce the student to the spirit, beauty, and vitality of mathematics. The emphasis is on development of ideas rather than problem solving skills. Topics vary, but are typically chosen from diverse areas such as geometry, number theory, computation, and graph theory.

**Credits:** 3

**MATH110001**  
**Calculus I**  
**Zachos, Ioannis**  
**Spring 2024**

MATH1100 is not open to students who have completed a calculus course at the college level. Students contemplating majors in Chemistry, Computer Science/B.S., Environmental Geosciences, Geological Sciences, Mathematics, or Physics should enroll in MATH1102. For further information about selecting your Math courses given your background, please see this link to the BC Math Department. MATH1100 is a first course in the calculus of one variable intended for biology, computer science, economics, management, and premedical students. It is open to others who are qualified and desire a more rigorous mathematics course at the core level. Topics include a brief review of polynomials and trigonometric, exponential, and logarithmic functions, followed by discussion of limits, derivatives, and applications of differential calculus to real-world problem areas. The course concludes with an introduction to integration.

**Credits:** 4  
**Room and Schedule:** Fulton Hall 230 MWF 01:00PM-01:50PM

MATH110022
Calculus I
Gardner, Zachary I
Spring 2024
MATH1100 is not open to students who have completed a calculus course at the college level. Students contemplating majors in Chemistry, Computer Science/B.S., Environmental Geosciences, Geological Sciences, Mathematics, or Physics should enroll in MATH1102. For further information about selecting your Math courses given your background, please see this link to the BC Math Department. MATH1100 is a first course in the calculus of one variable intended for biology, computer science, economics, management, and premedical students. It is open to others who are qualified and desire a more rigorous mathematics course at the core level. Topics include a brief review of polynomials and trigonometric, exponential, and logarithmic functions, followed by discussion of limits, derivatives, and applications of differential calculus to real-world problem areas. The course concludes with an introduction to integration.

**Credits:** 4  
**Room and Schedule:** Stokes Hall 217N MWF 10:00AM-10:50AM  
**Satisfies Core Requirement:** Mathematics  
**Prerequisites:** None

MATH110103
Calculus II
Quinn, Keaton P
Spring 2024
MATH1101 is not open to students who have completed MATH1103 or MATH1105. Students contemplating majors in Chemistry, Computer Science B.A. or B.S., Environmental Geosciences, Geological Sciences, Mathematics or Physics should enroll in either MATH1103 (Spring) or MATH1105 (Fall). For further information about selecting your Math courses given your background, please see this link to the BC Math Department. MATH1101 is a second course in the calculus of one variable intended for students studying life or social sciences, such as biology, neuroscience, economics, management and premedical students. It is open to others who are qualified and desire a more rigorous mathematics course at the core level. There are three main topics: integration (definition of integration, basic techniques for integration, and select applications); an introduction to differential equations (with applications to population modeling and other contexts); an introduction to multivariable functions and partial derivatives (with application to optimization in economics and other contexts).

MATH118001
Principles of Statistics for the Health Sciences
Zhang, Liyang
Spring 2024
This course introduces statistics as a liberal arts discipline and applies the principles of statistics to problems of interest for health sciences professionals. Students will gain an understanding of statistical ideas and methods, acquire the ability to deal critically with numerical arguments and gain an understanding of the impact of statistical ideas on the health sciences, public policy, and other areas of application.

Credits: 3  
Room and Schedule: Campion Hall 303 MWF 11:00AM-11:50AM  
Satisfies Core Requirement: Mathematics  
Prerequisites: Open to Connell School of Nursing students only.

MATH170201
The Making of the Moral Mind: Mathematics
Ash, Avner D
Spring 2024
This is an Enduring Questions course and is open to FRESHMEN only. You must take POLI1034 with this course. This course is devoted to an exploration of how Western mathematics developed out of the new science of algebra in the 17th century and the implications of this development in the formation of modernity. It is a hybrid of two kinds of courses: 1) A basic math course without prerequisites (except for high school algebra and geometry) that gives attention to the history of mathematics. 2) A philosophy course that contemplates the scientific and humanistic implications of the mathematical ideas we study, especially to the formation of morals. The course will concentrate on algebra and number theory, with a digression concerning calculus, as found in the work of the French mathematicians Vite (late 16th century), Descartes, Fermat and Pascal in the 17th century, and the German mathematician Leibniz. We will explore how symbol-creating abstraction worked in the development of algebra and algebraic geometry, and how it led to an ever-growing distance between the mathematical description of the universe and the world of everyday sense perception. We will bring these ideas into our contemporary world by looking at some topics in modern Abstract Algebra and their applications to Number Theory and Public Key Cryptography. Descartes, Pascal and Leibniz were also great philosophers and religious thinkers. Some of their work in those realms will be discussed in the parallel course taught by Ryan Hanley. In our course we will try to understand some of the influences of their mathematical thinking on their philosophical thinking. There are two obvious ways mathematics influences morals: 1) through the development of science and technology and 2) as a paradigm of method and the search for truth. We will discuss these two ways while staying alert for other, more subtle, connections between the mathematical domain and the world of morality. We will continually think about ways in which these seventeenth-century ideas shaped later European thought and continue to shape our thinking today.

MATH221101
Linear Algebra (Honors)
Howard, Benjamin V
Spring 2024
This honors course in Linear Algebra is intended for students with strong preparation and high
motivation. Topics covered include matrices, linear equations, determinants, eigenvectors and
eigenvalues, vector spaces and linear transformations, inner products, and canonical forms. The
course will include significant work with proofs.

Credits: 3
Room and Schedule: Gasson Hall 203 MWF 10:00AM-10:50AM

MATH225001
Mathematical Foundations of Data Science
Zhang, Liyang
Spring 2024
Introduction to the mathematical foundations of data science, including calculus, linear algebra and probability. The first part of the course covers linear algebra, including matrices, systems of linear equations, vector spaces, and eigenvalues and eigenvectors. The second part of the course introduces random variables and provides an introduction to calculus based probability. The third part of the course introduces optimization techniques used in data science.
Prerequisite: Math 1101 or Math 1103 or equivalent Calculus 2 background.

Credits: 3
Room and Schedule: Campion Hall 231 MWF 12:00 Noon-12:50PM
Satisfies Core Requirement: None
Prerequisites: None
Corequisites: None
Cross-listed with: None
Frequency: null

MATH229001
Number Theory for Teachers
Ward, Erika
Spring 2024
This course is intended to focus on the wealth of topics that relate specifically to the natural numbers. These will be treated as motivational problems to be used in an activity-oriented approach to mathematics in grades K-9. The course will demonstrate effective ways to use the calculator and computer in mathematics education. Topics include prime number facts and conjectures, magic squares, Pascal's triangle, Fibonacci numbers, modular arithmetic, and mathematical art.

Credits: 3
Room and Schedule: Gasson Hall 201 MWF 02:00PM-02:50PM
Satisfies Core Requirement: None
Prerequisites: MATH1190 and MATH1191
Corequisites: None
MATH331001
Introduction to Abstract Algebra
Baldwin, John A
Spring 2024
Students may not take both MATH3310 and MATH3311. This course studies four fundamental algebraic structures: groups, including subgroups, cyclic groups, permutation groups, symmetry groups, and Lagrange's Theorem; rings, including sub-rings, integral domains, and unique factorization domains; polynomials, including a discussion of unique factorization and methods for finding roots; and fields, introducing the basic ideas of field extensions and ruler and compass constructions.

Credits: 3
Room and Schedule: Campion Hall 231 MWF 01:00PM-01:50PM
Satisfies Core Requirement: None
Prerequisites: MATH2216 and MATH2210/ADMT2210 or Permission of Department
Corequisites: None
Cross-listed with: None

MATH331201
Algebra II
Reeder, Mark
Spring 2024
This course, with MATH3311, studies the basic structures of abstract algebra. Topics include groups, subgroups, factor groups, Lagrange's Theorem, the Sylow Theorems, rings, ideal theory, integral domains, field extensions, and Galois theory.

**Credits:** 3

**Room and Schedule:** Stokes Hall 295S MWF 12:00 Noon-12:50PM

**Satisfies Core Requirement:** None

**Prerequisites:** MATH3311. With the permission of the Assistant Chair for Undergraduates, students who have taken MATH3310 may be allowed to take MATH3312. However, they may need to do additional work on their own in order to make that transition.

**Corequisites:** None

**Cross-listed with:** None

**Frequency:** Every Spring

**Student Level:** Undergraduate

**Comments:** None

**Status:** Offered

---

**MATH332001**

**Introduction to Analysis**

**Chen, Qile**

**Spring 2024**

Students may not take both MATH3320 and MATH3321. This course gives students the theoretical foundations for the topics taught in Calculus. It covers algebraic and order properties of the real numbers, the least upper bound axiom, limits, continuity, differentiation, the Riemann integral, sequences, and series. Definitions and proofs will be stressed throughout the course.

**Credits:** 3

**Room and Schedule:** Campion Hall 303 MWF 09:00AM-09:50AM

**Satisfies Core Requirement:** None

**Prerequisites:** MATH2216 and MATH2202 or Permission of Department

**Corequisites:** None

**Cross-listed with:** None

**Frequency:** Every Fall, Every Spring

**Student Level:** Undergraduate

**Comments:** None

**Status:** Offered
This course, with MATH3321, studies the basic structure of the real numbers. Topics include the least upper bound principle, compactness of closed intervals (the Heine-Borel theorem), sequences, convergence, the Bolzano-Weierstrass theorem, continuous functions, boundedness and intermediate value theorems, uniform continuity, differentiable functions, the mean value theorem, construction of the Riemann integral, the fundamental theorem of calculus, sequences and series of functions, uniform convergence, the Weierstrass approximation theorem, special functions (exponential and trig), and Fourier series.

**Credits:** 3

**Room and Schedule:** Campion Hall 302 MW 03:00PM-04:15PM

**Satisfies Core Requirement:** None

**Prerequisites:** MATH3321. With the permission of the Assistant Chair for Undergraduate Programs, students who have taken MATH3320 may be allowed to take MATH3322. However, they may need to do additional work on their own in order to make that transition.

**Corequisites:** None

**Cross-listed with:** None

**Frequency:** Every Spring

**Student Level:** Undergraduate

MATH431101

Formal Methods

McTague, Carl S

Spring 2024
Complex programs often have bugs, sometimes with serious consequences. Although testing can help root them out, it is impossible to test all possible behaviors of complex programs. To complement testing, one can construct mathematical proofs that programs are correct. This technique, called formal verification, can be done using a tool for writing and automatically checking such proofs. This course introduces formal verification with one such proof checking system called Coq. Students will write precise specifications of how programs should behave, and then carry out proofs in Coq showing that those specifications are met.

Credits: 3
Room and Schedule: 245 Beacon Street Room 229 MW 04:30PM-05:45PM
Satisfies Core Requirement: None
Prerequisites: CSCI1102 and CSCI2243

Corequisites: None
Cross-listed with: None
Frequency: Every Spring
Student Level: Both
MATH442601
Probability
Wolf, Jamison B
Spring 2024
This course provides a general introduction to modern probability theory. Topics include probability spaces, discrete and continuous random variables, joint and conditional distributions, mathematical expectation, the central limit theorem, and the weak law of large numbers. Applications to real data will be stressed, and we will use the computer to explore many concepts.

Credits: 3
Room and Schedule: Gasson Hall 303 MWF 02:00PM-02:50PM
Satisfies Core Requirement: None

MATH444001  
Dynamical Systems  
Mirollo, Renato  
Spring 2024  
This course is an introduction to nonlinear dynamics and their applications, emphasizing qualitative methods for differential equations. Topics include fixed and periodic points, stability, linearization, parameterized families and bifurcations, and existence and nonexistence theorems for closed orbits in the plane. The final part of the course is an introduction to chaotic systems and fractals, including the Lorenz system and the quadratic map.

Credits: 3  
Room and Schedule: 245 Beacon Street Room 214 MWF 11:00AM-11:50AM  
Satisfies Core Requirement: None

MATH445301
Euclid's Elements
Moss, Eric
Spring 2024
This course is a close reading of Euclid's Elements in seminar style, with careful attention to axiomatic reasoning and mathematical constructions that build on one another in a sequence of logical arguments. We will also emphasize clear and creative communication on mathematical ideas, with some attention to the cultural background of the Elements and its place in a modern education.

Credits: 3

MATH446001
Complex Variables
Treumann, David L
Spring 2024
This course gives an introduction to the theory of functions of a complex variable, a fundamental and central area of mathematics. It is intended for mathematics majors and well-prepared science majors. Topics covered include complex numbers and their properties, analytic functions and the Cauchy-Riemann equations, the logarithm and other elementary functions of a complex variable, integration of complex functions, the Cauchy integral theorem and its consequences, power series representation of analytic functions, and the residue theorem and applications to definite integrals.

Credits: 3
Room and Schedule: Gasson Hall 209 MWF 02:00PM-02:50PM
Satisfies Core Requirement: None
Prerequisites: MATH2202 and MATH2210/ADMT2210
Corequisites: None
MATH447501
History of Mathematics
Gross, Robert
Spring 2024
This course studies the development of mathematical thought, from ancient times to the twentieth century. Naturally, the subject is much too large for a single semester, so we will concentrate on the major themes and on the contributions of the greatest mathematicians. The emphasis in the course will be on the mathematics. Students will follow the historical arguments and work with the tools and techniques of the period being studied.

Credits: 3
Room and Schedule: Gasson Hall 309 MWF 02:00PM-02:50PM
Satisfies Core Requirement: None
Prerequisites: Requires MATH3310 and MATH3320, one of which may be taken concurrently.

MATH880701
Algebra II
Madapusi Pera, Keerthi S
Spring 2024
This course, with MATH8806, will cover the following topics: group theory (group actions, Sylow, nilpotent/solvable, simple groups, Jordan-Holder series, presentations); commutative algebra (uniqueness of factorization, Jordan decomposition, Dedekind rings, class groups, local rings, Spec); finite fields; algebraic numbers; Galois theory; homological algebra; semisimple algebra.

Credits: 3
Room and Schedule: Campion Hall 200 MW 03:00PM-04:15PM
Satisfies Core Requirement: None
Prerequisites: None
Corequisites: None
Cross-listed with: None
Frequency: Every Spring
Student Level: Both
Comments: None

MUSA110001
Fundamentals of Music Theory
Gawlick, Barbara S
Summer 2023
An introductory music theory course designed for students with a strong interest in music. As a Core course it includes speculations on how musical discourse informs our perception and understanding of the world around us. Students learn to acquire skills in music notation and transcription. The following theoretical concepts will be extensively covered: notation of pitch and rhythm, scales, intervals, chords, and harmonic progression. Students leave the course prepared for upper-level study in music theory and will begin to question broader issues concerning the meaning and use of music. Training in Keyboard Skills is required in the accompanying Lab

Credits: 3
Room and Schedule: On-line Asynchronous
Satisfies Core Requirement: Arts
Prerequisites: None

MUSA120001  
**Introduction to Music**  
**Watchorn, Peter**  
**Summer 2023**  
This course will attempt to develop essential and critical listening faculties by employing a chronological survey of the elements, forms, and various types of music that the serious listener is exposed to today. The principal emphasis of the course will be on traditional Western art music from medieval Gregorian Chant to twentieth-century electronic music, but certain excursions into the world of non-Western musics, jazz, and American popular song will be included to diversify and enrich the experience of listening critically to music.

**Credits:** 3  
**Room and Schedule:** On-line Asynchronous

MUSA130001

History of Popular Music
McCool, Jason
Summer 2023
From the blues to country, jazz to rock, our nation's political, social, and economic history has been mirrored and influenced by the styles of popular music developed in our cultural melting pot. This course will provide an overall history of popular music in America, with emphasis upon mainstream popular music since 1954. Its focus will be on the independence and interdependence of black and white musical cultures in America. Students will learn stylistic developments in popular music and acquire interpretive strategies, including methods of aural analysis that will view popular songs as historical texts and as autonomous works of art.

**Music Academic Courses: Fall 2023**

**MUSA109001**

**Ear Training/Sight-Singing Lab**

**Carey, Julia S**

**Fall 2023**

For music majors. In meetings twice a week students learn to sing melodies by sight through a solfege system of drilling scales and intervals (sight-singing) and learn to notate melodic, rhythmic, and harmonic patterns (ear-training). The course principally helps students pass the Ear Training/Sight Singing requirement for the major but can benefit individuals in singing groups or those who wish to improve their practical musical skills. Preference given to majors & minors. Usually taken concurrently with MUSA 2100 Harmony or MUSA 3100 Chromatic Harmony.

**Credits:** 1

**Room and Schedule:** Lyons Hall 409 TuTh 12:00 Noon-12:35PM

MUSA120004
Introduction to Music
Watchorn, Peter
Fall 2023
This course will attempt to develop essential and critical listening faculties by employing a chronological survey of the elements, forms, and various types of music that the serious listener is exposed to today. The principal emphasis of the course will be on traditional Western art music from medieval Gregorian Chant to twentieth-century electronic music, but certain excursions into the world of non-Western musics, jazz, and American popular song will be included to diversify and enrich the experience of listening critically to music.

Credits: 3
Room and Schedule: Lyons Hall 409 TuTh 03:00PM-04:15PM
Satisfies Core Requirement: Arts
Prerequisites: None
Corequisites: None

MUSA130001
History of Popular Music
Daly Berman, Amanda E
Fall 2023
From the blues to country, jazz to rock, our nation's political, social, and economic history has been mirrored and influenced by the styles of popular music developed in our cultural melting pot. This course will provide an overall history of popular music in America, with emphasis upon mainstream popular music since 1954. Its focus will be on the independence and interdependence of black and white musical cultures in America. Students will learn stylistic developments in popular music and acquire interpretive strategies, including methods of aural analysis that will view popular songs as historical texts and as autonomous works of art.

MUSA132001
Introduction to Musics of the World
Daly Berman, Amanda E
Fall 2023
This course provides an introduction to selected musical traditions from around the world, in their cultural contexts. Our main goals are to study the connections between music and other cultural features and institutions, to become familiar with the features of major musical styles from the cultures studied, and with basic concepts in ethnomusicology and comparative musicology. Case studies include Native North and South American; Western, Central, and Southern African; Arabic; Persian; Hindustani; Karnatak; Javanese; and Japanese musics. Musical training and background are not required and are not presumed. Fulfills World Music requirement in Major; fulfills x-cultural requirement in Minor

Aesthetic Exercises: Engagement, Empathy, Ethics
Callahan, Daniel
Fall 2023
In this course you will hone your perceptual and critical faculties on a range of artworks and performances traversing media and frames, from ancient sculpture to contemporary sports. You will explore how differences between media and art forms affect representation, meaning, and reception. You will define and redefine art. You will read aesthetic theorists from Plato to YouTube users. Most importantly, you will lavish attention on your own embodied experience to understand what constitutes aesthetic engagement, with whom or what you empathize in aesthetic experience, and how, if at all, aesthetic exercises better your life and the lives of others.

MUSA220501
Music of the Classic Period
McGrann, Jeremiah W
Fall 2023
This course will consider the musical trends of the eighteenth and early nineteenth centuries (c. 1750-c. 1815) that are characterized by the movement towards simplicity in melody and a clarification of harmonic language. While music that served as a transitional style from the Baroque period will be the starting point for this course, in large measure, the focus of the course will be on the music of the two great composers who lived and worked in or around Vienna in the period 1780-1800: Haydn and Mozart. Fulfills Music Period course in Major and Minor.

MUSA220901  
Music of the Modern Era  
Callahan, Daniel  
Fall 2023  
This is a study of the music of the twentieth century, including concepts, ideas, techniques, compositional materials, and analytical principles of the music, as well as a historical, chronological survey of the composers and compositions of the modern era. The course will include a study of the twentieth-century masters, including: Debussy, Ravel, Stravinsky, and Schoenberg; nationalist composers like Bartok, Britten, and Copland; and the flowering of avant-garde music since 1945, including electronic music. A discussion of the development of Jazz and American Popular Song will be included. Required in the Music Major; fulfills Music Period course in Minor.

MUSA233001
History of Jazz
Mangin, Timothy R
Fall 2023
A history of America's music from its origins in African traditions through the contemporary scene. The course will explore its African roots; its consolidation in New Orleans and its spread into the cultural mainstream in the Jazz Age; its transformation into bebop, cool, third stream, funk, and avant-garde trends; and the return to traditionalism. Key figures covered will be Armstrong, Ellington, Parker, and Marsalis, among others.

**MUSA241201**

**Hamilton and the American Musical**

**McCool, Jason**

**Fall 2023**

Few recent artworks have grabbed hold of the American public consciousness like Hamilton: An American Musical. Lin-Manuel Miranda's show is deeply rooted in the conventions of American music theater, which since the mid-nineteenth century has been a site for exploring racial representation, cultural exchange, and national identity. Fueled by the vibrant musical language of hip hop, rooted in Black resistance, Hamilton also seemed to meet and reflect a volatile moment of racial reckoning in America. In this course, open to music majors and non-majors, students will examine the political, cultural, and musical resonances of Hamilton within these rich historical contexts. Fulfills popular music in Music Major, cross-cultural course in Music Minor.

MUSA310001
Chromatic Harmony
Lee, Thomas O
Fall 2023
This course covers the basic principles of chromatic progression. The proper use of secondary dominants, diminished seventh chords, and augmented triads precedes an in-depth study of the harmonization of Bach chorales, the concept of modulation using modal exchange, and the introduction of Neapolitan sixth and augmented sixth chords. We will study via harmonic and form analysis the works of great composers including Bach, Haydn, Mozart, Beethoven, Schubert, Schumann, Chopin, Brahms, Wolf, Mahler, and Wagner. Training in Keyboard Skills is required in the accompanying Lab.

MUSA311401
Jazz Harmony and Improvisation
Lee, Thomas O
Fall 2023
This music theory course will focus on the study of chord structures, chord substitutions, chord scales, composition, and improvisation as they have been codified by contemporary jazz musicians. The technical innovations in the music of Sonny Rollins, Thelonius Monk, Charlie Parker, and Miles Davis will be analyzed and discussed. Special attention will be placed on learning how to improvise on the great standards of the jazz repertory. Additional studies will include the following: piano lead sheet arrangements; ii-V-I keyboard harmony, reharmonization, and composing original tunes based on chord structures of standards by Berlin, Kern, Gershwin; rhythm changes; and the blues.

Senior Seminar
Noone, Michael J
Fall 2023
For music majors in their senior year (exception only by special permission). Through supervised reading, research, writing, discussion, and performance, this seminar will help majors develop a framework for synthesizing their various courses into a coherent whole, with special emphasis in the area of strongest interest (theory, composition, history, cross-cultural studies, or performance). It will also help prepare students for examinations in listening repertoire and ear-training (see major requirements).

Music Academic Courses: Spring 2024

MUSA109001  
Ear Training/Sight-Singing Lab  
Carey, Julia S  
Spring 2024
For music majors. In meetings twice a week students learn to sing melodies by sight through a solfège system of drilling scales and intervals (sight-singing) and learn to notate melodic, rhythmic, and harmonic patterns (ear-training). The course principally helps students pass the Ear Training/Sight Singing requirement for the major but can benefit individuals in singing groups or those who wish to improve their practical musical skills. Preference given to majors & minors. Usually taken concurrently with MUSA 2100 Harmony or MUSA 3100 Chromatic Harmony.

**MUSA110001**  
**Fundamentals of Music Theory**  
Gawlick, Barbara S  
**Spring 2024**  
An introductory music theory course designed for students with a strong interest in music. As a Core course it includes speculations on how musical discourse informs our perception and understanding of the world around us. Students learn to acquire skills in music notation and transcription. The following theoretical concepts will be extensively covered: notation of pitch and rhythm, scales, intervals, chords, and harmonic progression. Students leave the course prepared for upper-level study in music theory and will begin to question broader issues concerning the meaning and use of music. Training in Keyboard Skills is required in the accompanying Lab.

**Credits:** 3

MUSA120001
Introduction to Music
Restrepo, Margarita
Spring 2024
This course will attempt to develop essential and critical listening faculties by employing a chronological survey of the elements, forms, and various types of music that the serious listener is exposed to today. The principal emphasis of the course will be on traditional Western art music from medieval Gregorian Chant to twentieth-century electronic music, but certain excursions into the world of non-Western musics, jazz, and American popular song will be included to diversify and enrich the experience of listening critically to music.

MUSA130001
History of Popular Music
Daly Berman, Amanda E
Spring 2024
From the blues to country, jazz to rock, our nation's political, social, and economic history has
been mirrored and influenced by the styles of popular music developed in our cultural melting
pot. This course will provide an overall history of popular music in America, with emphasis upon
mainstream popular music since 1954. Its focus will be on the independence and
interdependence of black and white musical cultures in America. Students will learn stylistic
developments in popular music and acquire interpretive strategies, including methods of aural
analysis that will view popular songs as historical texts and as autonomous works of art.

MUSA132001
Introduction to Musics of the World
Daly Berman, Amanda E
Spring 2024
This course provides an introduction to selected musical traditions from around the world, in their cultural contexts. Our main goals are to study the connections between music and other cultural features and institutions, to become familiar with the features of major musical styles from the cultures studied, and with basic concepts in ethnomusicology and comparative musicology. Case studies include Native North and South American; Western, Central, and Southern African; Arabic; Persian; Hindustani; Karnatak; Javanese; and Japanese musics. Musical training and background are not required and are not presumed. Fulfills World Music requirement in Major; fulfills x-cultural requirement in Minor

MUSA140001  
**Music in the Holocaust and the Third Reich**  
**Ludwig, Mark**  
**Spring 2024**  
This course surveys the inspiring legacy of music by composers persecuted by the Nazis. We will study jazz, classical music, and cabaret from 1900-1944 targeted by the Nazi regime. Special focus is placed on the art and music created in Nazi concentration camps. Students will have the opportunity to experience live performances and archival materials and will meet Holocaust survivors, who will share their incredible testimonies with the class. Themes explored: socio-political impact on the arts in climates of intolerance and persecution; music and art as resistance; connections to contemporary forms of music such as rock, rap, reggae, etc.

**Medieval/Renaissance**

**Restrepo, Margarita**

**Spring 2024**

A study of the development of Western Music from the first stages of musical notation in the Middle Ages through the polyphonic music of the sixteenth century. Both sacred and secular traditions will be considered, including Gregorian chant, the polyphonic Mass and motet, the chanson, and the madrigal of the 16th century. Although most of the literature of this period is vocal, a study of the instruments and instrumental literature will be included. Fulfills Music Period course in Major and Minor

MUSA230301
Afro-Brazilian Musical Worlds
Dineen, Douglass
Spring 2024
This course will take students on a deep dive into the rich worlds of Afro-Brazilian music and culture. Unpacking quintessentially Brazilian forms, such as samba and bossa nova, we will discover a complex (and sometimes uncomfortable) combination of African- and European/American-derived elements. Next, we will home in on the music of Candomblé. In this Afro-Brazilian religious form, students will discover direct sonic and cultural connections to African practices and trace close links to other communities in the African diaspora. We will also focus on capoeira, a Brazilian art combining music, dance, and martial arts, and on the musics of carnival in Bahia—the source and center of Afro-Brazilian culture. Throughout the semester, we will consider music's roles in identity formation, in the making of national stories, and in social and cultural resistance to those narratives. Students will experience Afro-Brazilian music culture through listening, study, and embodied engagement (i.e., music making and moving to it). There are no academic or music-skills prerequisites for this course.

MUSA230901  
**Music and Culture in the Middle East**  
**Lucas, Ann E**  
**Spring 2024**  
This course explores the relationship between different music traditions of the Middle East and their respective cultural contexts. It addresses issues of music's structure and content vis-à-vis its role in social, political, and religious situations in the region; the ways that these forces influence musical aesthetics, while also addressing the role of music in the Middle East historically. The cultural areas covered in this class include the Arab World, Iran, Turkey, and Afghanistan.

**Credits:** 3  
**Room and Schedule:** Devlin Hall 112 TuTh 03:00PM-04:15PM

MUSA233401
Hip Hop in American Culture
Mangin, Timothy R
Spring 2024
This course is an historical and ethnomusicological review of hip hop. We will examine the roots of hip hop in African expressive culture, the emergence of the hip hop genre in the United States, and hip hop's impact in other places around the globe. The course requires active listening, readings, and use of multimedia.

MUSA310001
Chromatic Harmony
Gawlick, Ralf Y
Spring 2024
This course covers the basic principles of chromatic progression. The proper use of secondary dominants, diminished seventh chords, and augmented triads precedes an in-depth study of the harmonization of Bach chorales, the concept of modulation using modal exchange, and the introduction of Neapolitan sixth and augmented sixth chords. We will study via harmonic and form analysis the works of great composers including Bach, Haydn, Mozart, Beethoven, Schubert, Schumann, Chopin, Brahms, Wolf, Mahler, and Wagner. Training in Keyboard Skills is required in the accompanying Lab.

Counterpoint I  
Gawlick, Ralf Y  
Spring 2024  
In this course we will study the fundamentals of two- and three-part polyphonic styles. Using the principles of species counterpoint, we will acquire a dependable contrapuntal technique to write short compositions, first in two parts and eventually in three. Assignments will include short works in free imitation, strict canon, and invertible counterpoint. Our studies will include a brief survey of the historical origins of Western polyphony and analysis of contrapuntal compositions of the Baroque period.

MUSA312001  
Seminar in Composition  
Lee, Thomas O  
Spring 2024
The course will be conducted in two parts. One: class will meet once a month. Works in both tonal and twentieth century idioms will be discussed and used as models for student compositions. Two: each student will meet once a week with the instructor for a private studio composition lesson. The student will complete, by the end of the semester, three original compositions: theme and variations, a movement for string quartet, and a song cycle for voice and piano. The purchase of Finale music software, created by Coda Music Technology, Mac or PC version, is required for this course.

MUSA327001
Beethoven
McGrann, Jeremiah W
Spring 2024
An introduction to Ludwig van Beethoven (1770-1827), tracing his intellectual development within the culture and society of the Rhenish Enlightenment, his musical enrichment of the High Classicism of Mozart and Haydn (among others), and the heroic style of his best known works to his feelings and expressions of musical and social isolation in his last years, and his problematic identity with the burgeoning romantic movement in Germany. Emphasis will be on the music itself, concentrating on compositions from three genres: piano sonata, string quartet, and symphony. Also covered will be the concerto, his opera Fidelio, and the Missa Solemnis.

MUSA335001
The Beatles: From "Yesterday" to "Tomorrow Never Knows"
McCool, Jason
Spring 2024
Everyone loves the Beatles. In this class, we explore why that is the case. We will chart the rapidly changing idiom of popular music in the 1960s and outline its interaction with various social, political and cultural movements, such as "Beatlemania" and psychedelia. The primary source material for this class is the established canon of Beatles songs, albums and films, which we will supplement with secondary articles, reviews and interviews. This course will challenge you to listen critically to, and think deeply about, one of the most influential bands in the twentieth century.

MUSP162001
Traditional Irish Dance
Haggan, Caitlin M
Fall 2023
This course will introduce students to the traditional dances of Ireland, including solo step dance footwork and group set and ceilidh dances. The class will include warm-ups, technique, and choreography, as well as occasional short readings, video viewings, and music listening exercises. Students will gain an understanding of Irish traditional musical rhythms, while physically embodying their intrinsic connection to the dance patterns. An uplifting and invigorating class. All levels welcome.

MUSP167001
Waaw Waaw Sabar: BC West African Music Ensemble
Mangin, Timothy R; Toure, Amadou L
Fall 2023
This course specializes in sabar, a drumming and dance style of the Wolof people from Senegal. Performed in many contexts, the sabar is heard at baptisms, weddings, wrestling matches, political and community gatherings, the Black Panther soundtrack, and the urban dance music called mbalax. Students will learn the repertoire performed at these events in weekly classes taught by A. Lamine Toure, a master drummer from one of Senegal's oldest griot families. We welcome musicians, non-musicians, students, faculty, staff, African music fans, and members of the Boston community. We provide the drums. The ensemble is inspired by the Wolof expression "waaw waaw," a positive affirmation meaning "Yes!!", "That's Right," Good Job, and "Excellent." Our classes encourage collective participation, fun, and a deeper understanding of a millennia-old drumming tradition that continues to evolve as new technologies and musical styles emerge.

Introduction to Improvisation
Kniffin, Eric L
Fall 2023
Improvisation is a central feature of many Western musical styles. This course offers students the opportunity to learn how to improvise in jazz, blues and rock. In a hands-on manner, students are introduced to the fundamental concepts of improvising. No prior experience is necessary, and there is no prerequisite, but you should have at least some experience playing an instrument or singing. In addition to extensive in-class performance, accompaniment recordings are provided for practice outside class.

MUSP177001
Gospel Music Workshop
Jacob Dorman, Shannon D
Fall 2023
This class will examine Black gospel music with an emphasis on choral music and oral traditions that capture the Black experience in America from a historical, socio-political and multicultural standpoint. The syllabus and repertoire is reflective of the great faith tradition that is an integral part of black culture; in that it includes the breadth of musical expression in the Black worship experience. Students will analyze the importance of Black gospel music and its vital role in shaping global music trends. Spirituals, traditional gospel, contemporary gospel, as well as religious music of the European tradition will be reviewed closely from a historical and musical standpoint. The class will comprise of equal parts lecture and practicum (Voices of Imani Gospel Choir). The latter half compromising of the practicum (VOI) will help students engage in practical learning of songs explored in the lecture, consequently accomplishing the age-old institution of oral tradition in Black history.

Waaw Waaw Sabar: BC West African Music Ensemble
Mangin, Timothy R; Toure, Amadou L
Spring 2024
This course specializes in sabar, a drumming and dance style of the Wolof people from Senegal. Performed in many contexts, the sabar is heard at baptisms, weddings, wrestling matches, political and community gatherings, the Black Panther soundtrack, and the urban dance music called mbalax. Students will learn the repertoire performed at these events in weekly classes taught by A. Lamine Toure, a master drummer from one of Senegal's oldest griot families. We welcome musicians, non-musicians, students, faculty, staff, African music fans, and members of the Boston community. We provide the drums. The ensemble is inspired by the Wolof expression "waaw waaw," a positive affirmation meaning "Yes!!", "That's Right," Good Job, and "Excellent." Our classes encourage collective participation, fun, and a deeper understanding of a millennia-old drumming tradition that continues to evolve as new technologies and musical styles emerge.

Symphonic Band

Healey, David P

Spring 2024

Performance course. The Symphonic Band is open to the entire University community. Its members include undergraduate students, graduate students, faculty, staff, alumni, and community members. The ensemble performs largely traditional wind band music as well as large-scale orchestral transcriptions. The Symphonic Band also provides students with the opportunity to perform literature specifically designed for smaller chamber ensembles.

MUSP186001
The Boston College Baroque Ensemble
Chubet, Anne-Marie
Spring 2024
Performance Course. The BC Baroque Ensemble is a small string ensemble which often includes solo winds. The ensemble specializes in the works of Bach, Vivaldi and Telemann and also performs music of the Classical and Romantic periods as well as more recent repertoire. String students explore Baroque bow techniques and have an opportunity to play solo parts in the concerto literature of the period. The group performs in the spring in Gasson Hall and at the Boston College Arts Festival. Permission is needed by the instructor to join the group.

MUSP271001
Advanced Improvisation
Kniffin, Eric L
Spring 2024
This course offers the advanced improvisor the opportunity to build higher order skills of improvisation in the jazz and rock idioms. While the course entails extensive instruction in music theory, the focus is on application of theoretical concepts to real-world improvisational contexts. The course outlines advanced concepts in melody-shaping, form/harmony, and musical style.

Musical Theater Cabaret
Albert, Lindsay; Murray, Pamela J
Spring 2024
Performance Course. In this workshop students will learn a solo song and a duet or trio from the Musical Theater or Opera repertoire. These numbers will be staged for a performance that will take place at the end of the semester. Each week, students will be coached on their songs, addressing vocal, musical, and acting aspects. Some performers may incorporate others in their scenes, as well as dialogue or choreography when appropriate. Rehearsals will be on Saturdays during the spring semester, and Saturdays alternating with Sundays during the fall (according to the home football game schedule). Performance for semester TBA. For Auditions—students contact Pamela Murray at Email: murraypp@bc.edu

Language, Memory, and Identity in the Middle East
Mouhib, Abdelkrim
Fall 2023
A broad-based overview of the role which language-choice plays in the construction of national and cultural identity in the Middle East. The role of Modern Standard Arabic (or Fus-ha) in the elaboration of Arab Nationalism, and the role of local dialects in the conceptualization of competing national identities and territorial nationalisms. In particular, in addition to Arab Nationalism and Zionism, also the ideas of Greater Syria, the Egyptian Pharaonic idea, Lebanonism, Mesopotamianism, and the Canaanite movement in Israel.

PHIL122601
Religion, Racial Justice, and Reconciliation in South Africa
Snyder, Joshua R
Summer 2023
The course requirements and evaluations are based on the following: daily journal and reflection pieces; class participation; and a final paper. For the duration of the program, the class will meet from 9:00 am to approximately 1:00 pm in the arranged classroom followed by lunch and an afternoon excursion. We will begin the course in Cape Town and then move to Pretoria for the remainder of the course. We will cover the following topics: key points in the history of South Africa; religious perspectives on apartheid; intellectual and armed conflict; fifty years of American foreign policy toward South Africa; Desmond Tutu and the Truth and Reconciliation Commission; reparations, forgiveness, trauma and healing; economic empowerment, gender, justice and religion; refugees, migrants, and xenophobia; HIV/AIDS; Christians-Jews-Muslims in South Africa; community organizing and economic justice

**Practical Logic**

**Clemente, Matthew J**

**Summer 2023**

A course not in the "new logic" (symbolic, or mathematical, logic) but in the "old logic" (ordinary language logic) invented by Aristotle and used for 2300 years in all the humanities. Includes such topics as definition, contradiction, syllogisms, implied premises, induction, and analogy. The course includes the commonsensical philosophical bases for this logic and also many practical applications to reading, interpreting, evaluating, and inventing arguments, especially in dialogs. Weekly quizzes, extra credit opportunities, and a take-home final exam. Texts: (1) SOCRATIC LOGIC, (2) THE BEST THINGS IN LIFE, (3) SUMMA PHILOSOPHICA (all 3 titles by Peter Kreeft)

**Credits:** 3

PHIL220901
Introduction to Formal Logic
Pope, Michael L
Summer 2023
Logic is the careful study of reasoning. It investigates how critical thinking is successful and, when it's not, what goes wrong. Understanding logic enables one to recognize and craft good arguments in every area of life, from science and technology to political debates and everything in between. This course introduces the composition of arguments and fallacious reasoning, honing students' ability to identify and formulate problems and evaluate solutions. Our goal is to analyze and understand the formal tools that allow us to represent the most salient features of reasoning in the most precise terms.

The course deals with migration as a topic for philosophical and theological reflection. We will consider key concepts related to migration—e.g., citizen, migrant, human rights, nation. We will examine debates over whether limits on migration are justifiable. We will also pay special attention to rights and duties concerning refugees. The course will be take place in Mexico, first in Mexico City and then in Tijuana, just a few miles from the U.S.-Mexico border. We will use the Mexican context—including both Mexican history and present realities—as a way of making concrete the philosophical and theological discussion of migration. For millennia, Mexico has been a place of migration and settlement by different peoples. And each year, hundreds of thousands of people move in and out of Mexico for a variety of reasons. Moreover, the U.S.-Mexico border is an issue of intense debate in both the U.S. and Mexico. Thus Mexico provides an excellent context for thinking about: (1) the big picture of migration as a human phenomenon, (2) the historical forces that have shaped, and continue to shape, patterns of migration, and (3) the contemporary situation of migrants and contemporary policies toward migration. Our goal is to combine philosophical/theological reflection with cultural immersion in a mutually illuminating way. The Mexican context will help make our philosophical/theological discussions of migration more vivid, nuanced, and realistic.

PHIL108801  
Person and Social Responsibility I  
Troxell, Mary S  
Fall 2023
Enrollment limited to freshmen, sophomores, and juniors. The course requirements include ten to twelve hours per week of community service. In light of classic philosophical and theological texts, students in this course address the relationship of self and society, the nature of community, the mystery of suffering and the practical difficulties of developing a just society. PULSE students are challenged to investigate the insights offered by their readings in relationship to their service work. Places in the course are very limited.

Person and Social Responsibility I
Legas, Julia M
Fall 2023
Enrollment limited to freshmen, sophomores, and juniors. The course requirements include ten to twelve hours per week of community service. In light of classic philosophical and theological texts, students in this course address the relationship of self and society, the nature of community, the mystery of suffering and the practical difficulties of developing a just society. PULSE students are challenged to investigate the insights offered by their readings in relationship to their service work. Places in the course are very limited.

PHIL116001
The Challenge of Justice
Wambui, Nelly Wamaitha
Fall 2023
This course introduces the student to the principal understandings of justice that have developed in the Western philosophical and theological traditions. Care is taken to relate the theories to concrete, practical and political problems, and to develop good reasons for choosing one way of justice rather than another. The relationship of justice to the complementary notion of peace will also be examined. Special attention is paid to the contribution of Catholic theology in the contemporary public conversation about justice and peace. Problems discussed may include human rights, hunger and poverty, and ecological justice.

Credits: 3
Room and Schedule: Stokes Hall 461S TuTh 10:30AM-11:45AM

PHIL160101
Perspectives on Art I: Ancient, Modern, and Contemporary Issues
Rumble, Vanessa P
Fall 2023
How does the experience of art contribute to a life of purpose and meaning? What do the various forms of art have in common, and how do they differ? What practices and habits constitute meaningful engagement with art? How have aesthetic values and concepts transformed throughout history? What is the nature of artistic creation, and how is it shaped by shifting understandings of the human person? What role does art play in the formation of the values and principles, now and at other times and places? Over the course of the year, these and other enduring questions about art will be addressed by four connected courses: a year-long philosophy course, paired with a literature course in one semester, and an art course in the other. Approaching shared questions from these different perspectives will disclose not only the limits of each perspective, but also the ways in which each perspective serves to supplement and transform the others. The result will be not only a a wider and deeper understanding of art, but also growth in the capacity for aesthetic experience.

PHIL172101
The Value of Work: A Philosophical Examination
Lott, Micah
Fall 2023
This is an Enduring Questions course and is open to FRESHMEN only. You must take ENGL1728 with this course. "What role and significance does work have in flourishing lives and good societies?" This course pair offers Boston College students the opportunity to reflect on the significance and meaning of the human activity of work an activity that is likely to occupy a large portion of their lives. Around the globe, politicians promise "good jobs," and scholars discuss automation and "the future of work." But what is a good job? What form of value is most central to work as a part of a good life—financial reward? social purpose? personal fulfillment? How do individuals and communities understand and achieve justice and meaning at work?

**Credits:** 3

PHIL172102

The Value of Work: A Philosophical Examination

Lott, Micah

Fall 2023

This is an Enduring Questions course and is open to FRESHMEN only. You must take ENGL1728 with this course. "What role and significance does work have in flourishing lives and good societies?" This course pair offers Boston College students the opportunity to reflect on the significance and meaning of the human activity of work an activity that is likely to occupy a large portion of their lives. Around the globe, politicians promise "good jobs," and scholars discuss automation and "the future of work." But what is a good job? What form of value is most central to work as a part of a good life—financial reward? social purpose? personal fulfillment? How do individuals and communities understand and achieve justice and meaning at work?

**Credits:** 0

PHIL172201
The Formation of Early Christian Thought: A Philosophical Examination
Byers, Sarah C
Fall 2023
How did Greco-Roman philosophy contribute to rational Christian theology? These courses address the enduring question of the relationship between faith and reason. In the early Christian era leading intellectuals attempted to integrate the Jewish and Christian scriptures and traditions with rational philosophy. They employed Greek and Roman philosophy to reflect upon foundational issues in metaphysics, human psychology, epistemology, ethics, and God's action in time. We will examine important concepts, arguments, and theories of ancient pagan philosophers (Plato, Aristotle, Seneca, Epictetus, Plotinus) and trace their adoption and adaptation by leading Christians (Justin Martyr, Origen, Lactantius, Athanasius, Augustine).

**Exploring the Mystery of God: A Philosophical Perspective**

**DeChiara-Quenzer, Deborah**

**Fall 2023**

This is an Enduring Question course and is open to FRESHMAN only. You must also register for the accompanying THEO1726. This course will explore how the Greeks viewed their gods as portrayed through their literature and philosophy. The course will focus on having the students read primary texts. It will begin with the conception of the gods revealed in Homer and Hesiod (Iliad and Theogony), move through the tragedies of Aeschylus and Euripides (Libation Bearers, Eumenides and Bacchae), and end with the philosophical and mystical accounts of the gods/god in Plato, Aristotle, and Plotinus (Republic, Phaedrus, Timaeus, Metaphysics Book XII, Nicomachean Ethics Book X, Enneads).

PHIL215001
Philosophical Perspectives on Science
Stan, Marius C
Fall 2023
This course is an examination of the scientific enterprise with the tools of modern analytic philosophy. Topics include: the structure of a scientific theory; evidence and knowledge in science; the nature of scientific explanations; and the role of values in science. As paradigmatic examples, we will examine major breakthroughs by Archimedes, Newton, Darwin, and Einstein. Open to science and pre-med majors.

PHIL221501
Telling Truths III: The Narratives that Shape Our Lives
Hirsch, Kathleen A
Fall 2023
Telling Truths III is an elective course offered by the PULSE Program for Service Learning. As a PULSE elective, students enrolled in the course serve 4 hours per week (in addition to travel time) of in-person service. As we encounter injustice, conflicting visions of "the good," and different moral scales of behavior, rights and responsibilities, it is essential that we become aware of our own foundational narratives. What "wisdom stories" shape the way you think about yourself in relation to others? What narratives do you carry into encounters with conditions, attitudes and beliefs that are different from yours? In this course, students will have a rare opportunity to bring their weekly experience of service into a time of reflection, and into relation to some of the core narratives of the great spiritual traditions. We will read modern mystics, parables, and creative theologians, including: Anne Lamott, Etty Hillesum, Kendrick Lamar, and Parker Palmer. The conversation will continue as we write in and read from our journals, sharing stories and questions. Several short writing assignments will occur through the course of the term; a final, longer piece of substantive "spiritual reflection" will give students the chance to synthesize the fruits of observation, reading, and reflection. The aim of the course is to expand students' familiarity with the great narratives of grace and forgiveness, suffering and hope, as they engage in service, and to provide a setting in which they can become intentional about adopting narratives that will shape their lives.

**PHIL226301**  
**Modern Jewish Thought**  
**Block, Nicholas**  
**Fall 2023**

This course investigates the impact of modernity on Jewish thought and religion. Highlights include readings from Baruch Spinoza, Moses Mendelssohn, Martin Buber, and Susannah Heschel. Modernity necessitated that Jews renegotiate their identity as they came to be defined along religious, national, and racial lines. The rise of the nation-state led Jews to confront a crucial question: how can they belong to both the Jewish people and as citizens of their countries? How can the modern Jew co-exist with religious law and tradition? We will turn to philosophers and thinkers as they addressed the modern historical phenomena of antisemitism, Zionism, the Holocaust, and feminism. Conducted in English.

PHIL229301
Cultural and Social Structures I
Sweeney, Meghan T
Fall 2023
This course focuses on examining the cultural foundations that underlie the contemporary ways in which people choose to structure literally, figuratively, and symbolically the way they live together. Our study centers on questions about how our cultural and social structures are the concrete expression in politics, city planning, architecture, literature, etc., of what we value and of the things we consider meaningful and important.

PHIL244401
The Vegetative Soul: The Hidden Life of Plants
Vandewall, Holly R
Fall 2023
By weight, more than 80 percent of the living things on the earth are plants, and without them the earth's animals, including humans, would perish within weeks. But philosophy has spent a vanishingly small part of its efforts in considering this form of life, generally relegating plants to the status of minimally alive, but essentially uninteresting. As Michael Pollan notes, "plants are so unlike people that it's very difficult for us to appreciate fully their complexity and sophistication. Yet plants have been evolving much, much longer than we have, have been inventing new strategies for survival and perfecting their designs for so long that to say that one of us is the more 'advanced' really depends on how you define that term, and what 'advances' you value." This class will consider how humans have historically regarded the plant kingdom, what we can learn from the challenging imaginary exercise of attempting to understand how they live, and how we might reconsider the world if we came to regard the plant kingdom not as passive subjects of human actions, but as powerful and vital actors in their own right.

PHIL277001
What Do We Work For? Flourishing, Meaning, and Justice
Lott, Micah
Fall 2023
What Do We Work For? is an elective course offered by the PULSE Program for Service Learning. As a PULSE elective, students enrolled in the course serve 4 hours per week (in addition to travel time) of in-person service. This course examines the concept of work, with a focus on two large questions: (1) What is good work the sort of work to which we might rightly aspire as part of a good life? (2) What does work look like in a good society a society that is just, humane, and vibrant? In addition to the classroom component of this course, all students will serve each week with a community organization whose mission relates to issues of work and labor. Service will be organized through the PULSE office.**In order to register for the course, students need to have already completed their Philosophy and Theology core requirements

PHIL300501
Meaning of Life through Film
Kruger, Matthew C
Fall 2023
This course will explore the meaning of life as a philosophical and theological question through the medium of film. Movies will be paired with readings from theologians and philosophers from various religions and perspectives in order to ask the question of what exactly we are supposed to be doing with our limited time here. We will watch a wide range of films, with works explored from Bergman, Kurosawa, and Varda, to more recent works by Miyazaki, Zhao, and Malick.

**PHIL400101**  
Feminisms and Philosophies of Difference  
McGill, Cherie  
Fall 2023
What does it mean to call oneself (or someone else) a 'feminist'? In attempting an answer to this question, we will consider efforts to reveal, unravel, and remedy the conceptual, psychological, and economic dimensions of the oppression of women. We will discuss a variety of feminisms--liberal, existential, radical--and their differing approaches to such 'feminist' issues as marriage and domestic violence, reproduction and pregnancy, work and sexual harassment, and the science of gender and gender difference. We will examine the relationship of sexism to racism, heterosexism, and class exploitation, and investigate the role of the concept of difference in creating and maintaining structural inequalities.

PHIL404001
Philosophical Hermeneutics on Race and Justice
Anozie, Stanley
Fall 2023
Philosophical Hermeneutics on Race and Justice examines fundamental questions about the nature of justice, retribution, the relationship between justice and fairness, contemporary debates on issues of race, and how race is a factor in peoples experience of injustice, inequality, discrimination, prejudice, structural violence, and various theoretical and practical issues of law, ethics and public policy. Hermeneutics as a philosophical discipline deals with interpretation and understanding of different perspectives on reality and human affairs. For instance, the idea of race and justice in private and public life, its significance in politics and domestic and international affairs, and its contentiousness and changeability over time. As an instrument of human liberation, the discourse on race and justice is rich for intellectual study, especially in using the tools of philosophical hermeneutics to arrive at inner and higher meanings. Students will explore enduring questions of race and justice, as well as contemporary debates over moral and legal responsibility, punishment, civil disobedience and revenge and their relation to race and justice. As part of the semester's work students will analyze theories of justice, theories of race, race as a social construct, racial prejudice, examine specific case studies in relation to race and justice/injustice, research topics of individual interest, evaluate arguments, and defend positions of their own through the fusion of horizons. Emphasis will be placed throughout the course on readings some texts by Hans-Georg Gadamer, Martin Heidegger, Tsenay Serequeberhan, Paulo Freire, Frantz Fanon, and otherscholars; on lively discussions, careful research and writing, the formulation of well-reasoned stances on various hermeneutical and philosophical issues, and clarity in reasoning and argument.

PHIL440501  
**Greek Philosophy**  
**Byers, Sarah C**  
**Fall 2023**  
This course is organized around the central philosophical questions asked and answered by philosophers in the ancient Greek-speaking world. Topics include theories of material bodies, change and time, elemental physics, and entities and their predicates; whether anything immaterial or immutable exists and, if so, its relation to the changing cosmos; the existence and nature of God or gods; the existence and nature of the human soul and its relation to the human body; the criterion of truth and the nature of language; the criterion of ethics; theories of animal and human cognition and motivation. We will consider Plato, Aristotle, and, more briefly, some pre-Socratic and post-Aristotelian authors such as Plutarch, Epictetus, and Plotinus.

**Credits:** 3  
**Room and Schedule:** Gasson Hall 209 TuTh 01:30PM-02:45PM

PHIL444201

German Romanticism and Idealism
Rumble, Vanessa P

Fall 2023
Kant's transcendental idealism has been charged with divorcing the subject of understanding from the subject of moral experience. We shall examine the basis of this claim as well as the attempts by Romantic writers and German Idealists to provide a fresh account of the integrity of human experience. We begin examining Kant's attempt, in *The Critique of Judgment*, to bridge the moral and natural realms through aesthetics. We then trace the progressive emancipation of the imagination in the later development of German Idealism and Romanticism.

Credits: 3

PHIL444501

The Greeks and Their Gods
DeChiara-Quenzer, Deborah

Fall 2023
How did the Greeks view their gods? In this course, we will use Greek literature and philosophy to answer that question. We will read some of the more traditional mythological accounts in Greek literature presented in Hesiod's Theogony, Homer's Iliad and Odyssey, Euripides' Bacchae, and Aeschylus' Eumenides. We will then turn to the distinctive philosophical accounts of the gods given by Plato in works such as Republic II, the Myth of the Charioteer in the Phaedrus, the Demiurge in the Timaeus, and by Aristotle on their nature and contemplation in Metaphysics XII and Nicomachean Ethics X.

PHIL529501
Modern Philosophy
Solere, Jean-Luc
Fall 2023
From the early 17th to the end of the 18th century, reason asserted its autonomy and triumphed in the Age of Enlightenment, but at the same time reflected on its own limits. Through a series of themes and problems, the course presents the major philosophies (roughly, from Descartes to Kant) that have accompanied the development of scientific knowledge, the rise of the modern mind, and the transformation of Western societies. This comprehensive survey covers metaphysics, epistemology, ethics, and political philosophy, paying attention to the interconnection between ideas in these different domains (with for instance the centrality of the notion of law: laws of nature, political laws, moral law). It particularly highlights the logical development in the succession of questions and answers that characterize the evolution of philosophy in the modern times. The course will provide you with the central concepts of modern thought, so as to grasp the bases of today understanding of the world and of ourselves. Analysis of representative texts, class discussions, and writing assignments are designed to develop rigorous argumentation and expression skills. (NB: This course was previously offered as PHIL 4406; you cannot take it if you took PHIL 4406)

PHIL537201
Patristic Greek I
This course is continued in the spring as THEO5373 New Testament Greek II. This two-semester course is designed for the student with no previous knowledge of ancient Greek to develop reading and translating skills in Patristic Greek language by mastering the fundamental principles of Greek grammar and syntax and acquiring a basic reading vocabulary. The student becomes familiar with the meaning of Greek words, their forms and structure, and their customary arrangement in sentences. A secondary goal of this course is to serve as a foundation for further studies in Patristic Greek.

**PHIL539301**

**Two Existentialisms: Atheist & Theist**

**Kreeft, Peter J**

**Fall 2023**

Existentialism concretizes and personalizes philosophical questions that make a great difference to the totality of our lives, such as theism vs. atheism. Course will explore theist (Pascal, Marcel, Dostoyevski, Lewis) and atheist (Sartre, Camus, Beckett, Weisel) alternatives in philosophy, fiction, and autobiography. Quizzes on readings and take home final essay exam or term paper.

PHIL541901
Capstone: A Life Well Lived
DeChiara-Quenzer, Deborah
Fall 2023
Capstone classes may NOT be taken Pass/Fail. You may take only ONE Capstone class before graduation. Seniors only. This course engages students in serious reflection on what it means to have "a life well lived." It is advantageous to do this reflection at this time in your life, as it affords you time and opportunity to shape your life going forward. What kind of life do you hope to live? What will bring you peace and satisfaction--dare we say, even happiness? Students will be asked to examine themselves by looking both backwards and forwards in many dimensions of their lives (education, ethics, relationships, career, etc.) while learning what others have said about having a meaningful life.

PHIL542301
The Ethics of Peace and War
Fried, Charles G
Fall 2023
This course will explore historical, ethical, and political issues concerned with peace and war. We will examine the just war tradition, beginning in the medieval period, as well as recent developments in the field, such as topics in transitional justice. While the main emphasis will be on philosophical justifications for war and visions of just peace, we will also examine religious, historical, literary, and journalistic texts to focus the imagination on the philosophical issues and to connect theoretical frameworks to historical and contemporary events.

**PHIL550001**  
**Philosophy of Law**  
**Berger, Christopher D**  
**Fall 2023**  
This course aims to provide an overview of a number of core debates in contemporary philosophy of law. The primary concern will be to examine the relation between legal validity and the moral normativity of the law, that is, answers to the questions 'What is the law?' and 'Is there a (moral) duty to obey the law?' In addition to these more general questions, we will focus on several more specific questions pertaining to constitutionalism, including 'What is the relationship between a constitution and the rule of law?', 'What is the ground of judicial review?' and 'What connection, if any, is there between questions of legal theory and broader debates in contemporary political philosophy?'

PHIL552901
Metaphysics
Gurtler, Gary, SJ
Fall 2023
The course begins with classical modern philosophers. Their problems concern the relation of mind and body, the possibility of objective knowledge, and cause and effect. Their method is that of science, combining both empirical and logical elements. After these modern thinkers, giving our cultural assumptions, we turn to Ancient and Medieval philosophers. Their problems concern the relation of spirit and matter, the analogy of being and truth, and causal explanation. Their method is one of dialogue. With this different set of problems and method, we will be able to evaluate the relative strengths of these different philosophical positions.

**Capstone: Desire and Discernment**

**Muldoon, Timothy P**

**Fall 2023**

Seniors only. Capstone classes may NOT be taken Pass/Fail. You may take only ONE Capstone class before graduation. First, the course will involve careful reflection on the sifting and pruning of desires. It will introduce philosophical reflection on desire from ancient Greece to modern philosophy, paying particular attention to the Ignatian tradition of discernment of spirits. Second, it will invite particular reflection on our relationships, and the desires that we have for the relationships we seek to cultivate over the course of our lives. Third, it will invite students to reflect on their experiences of work and preparation for a career, asking how their Boston College education has formed them. Fourth, we will reflect on our citizenship within communities: family, local community, society, nation, and world.

**Credits:** 3

PHIL558201
Truth and Pragmatism
Atkins, Richard
Fall 2023
"What is truth?" Pontius Pilate asks Jesus. If Jesus were a pragmatist, he would have replied that truth is the fated end of inquiry—or what would be believed after a sufficiently long and rigorous process of inquiry—or maybe he would reply that truth is what your colleagues will let you get away with. This course examines classical and contemporary versions of the pragmatic theory of truth, beginning with Charles S. Peirce and William James and then moving to Richard Rorty, Cheryl Misak, and Huw Price, among others.

PHIL558401
C.S. Lewis
Kreeft, Peter J
Fall 2023
Lewis wrote poetry, literary criticism, science fiction, fantasy, philosophy, theology, religion, literary history, epics, children's stories, historical novels, short stories, psychology, and politics. He was a rationalist and a romanticist, a classicist and an existentialist, a conservative and a radical, a pagan and a Christian. No writer of our century had more strings to his bow, and no one excels him at once in clarity, moral force, and imagination: the true, the good, and the beautiful. We will consider a sampling of Lewis' fiction and non-fiction.

Philosophical, literary, artistic, and religious traditions are sources for descriptions and evocations of many kinds of profound and humanly compelling feelings that are not reducible to the labeled emotions. There are, for example, feelings of guidance and direction; feelings of discernment and heart-knowing; feelings of reverence and aesthetic contemplation; and feelings of communion. Feelings often play a role in ethical decision-making, as well as in love. Between the aridity of some forms of intellectualism, on the one side, and the facile advice to trust the gut and the immediacy of whatever intuition appears, on the other, there is a powerful realm of human feeling that calls out for rigorous inquiry. To ignore this realm is to overlook one way to cultivate depths of our humanity. Great literature is often a haven for acknowledging this differentiated realm of feeling that philosophy can benefit from considering. The ancient pillars of the Western discourse on Love, Platos Symposium and the Biblical Song of Songs, suggest the vastness and potential goodness of feeling. The tripartite soul as conceived by Plato and Aristotle, in which the rational is assigned the task of supervising, controlling or persuading the spirited and appetitive parts, will be respectfully fathomed as a prelude to considering many refinements, qualifications and challenges to this hierarchy granting dominance to rationality. The era of Shakespeare, Cervantes and Montaigne issues one challenge; the romanticism of Wordsworth, Keats and Blake another; and a burgeoning body of philosophical and literary materials on feeling in the 20th century extends the unfolding of this formidable ancient conception. As the plenitude and variety of feelings are acknowledged, how must ethics be reconceived?

PHIL589901
The Concept of the Tragic in 20th Century Philosophy
Basile, Giovanni Pietro, SJ
Fall 2023
The course aims to explore the notion of the tragic as a philosophical concept. While ancient tragedy is characterized by the compassion aroused by the suffering of the tragic hero and the fear aroused by tragic theology, the idea of a wicked god disappears quite early. In contemporary philosophy, the notion of the tragic will be increasingly linked to the drama of freedom, the finitude and absurdity of the human condition, and the pessimistic worldview. The course will take place in the form of a seminar and will especially deal with the philosophy of the 20th Century. The following authors (and texts) will be read: Unamuno (The Tragic Sense of Life), Scheler (On the Tragic), Camus ("On the Future of Tragedy", The Myth of Sisyphus and The Rebel), Benjamin (The Origin of German Tragic Drama), C. Schmitt (Hamlet or Hecuba: The Intrusion of Time into the Play), Jaspers (Tragedy is not enough), Ricur ("The Wicked God and the Tragic Vision of Existence").

PHIL625001
Hegel's Philosophy of Spirit
Magri, Elisa
Fall 2023
This course is dedicated to Hegel's philosophy of Geist, which is often translated in English as "spirit," "mind," or "collective cultural mindset." However, the full meaning of Geist in Hegel's philosophy comprises a more fine-grained and richer development of affective, psychological, and practical elements. Drawing on Hegel's Phenomenology of Spirit as well as on the sections on the Philosophy of Spirit of Hegel's Encyclopaedia, this course will explore the main philosophical questions that surround the dimension of Geist in both Hegel's philosophy and contemporary debates, including Hegel's departure from transcendental philosophy and the nature-spirit relation, the novelty of Hegel's philosophical anthropology, the problem of recognition, and the quest for absolute knowledge.

PHIL666001
Foundations of Western Law
Kohler, Thomas C
Fall 2023
This seminar will place students into a conversation with some of the key thinkers who have shaped our modern Western legal traditions. In addition to Plato and Aristotle, the readings will be drawn from 17th, 18th, and 19th century English, French and German political philosophers. Themes include: how these authors influenced common and civil law systems; the relation among religion, law and morality and the problem of human knowing; the concepts of "law", "reason", "human nature" and the foundations of rights theory; the shift from the good to legitimacy; the rise of individualism and the problem of community.

PHIL667001
Technology and Culture
Griffith, William
Fall 2023
This interdisciplinary course will first investigate the social, political, psychological, ethical, and spiritual aspects of the Western cultural development with a special emphasis on scientific and technological metaphors and narratives. We will then focus on the contemporary world, examining the impact of our various technological creations on cultural directions, democratic process, the world of work, quality of life, and especially on the emergent meanings for the terms "citizen" and "ethics" in contemporary society. Students will explore technologies in four broad and interrelated domains: (1) computer, media, communications, and information technologies, (2) biotechnology, (3) globalization, and (4) environmental issues.

PHIL723401
Engaged Philosophy: Ethics, Law, Policy
Fried, Charles G
Fall 2023
This course instructs students in combining philosophical inquiry with analysis of contemporary issues and policy questions at the intersections of ethics, political theory, law, and the social sciences. It combines the study of selected works in ethics and political philosophy from the ancient through the contemporary eras with the examination of current events and policy debates. Each semester, the instructor will choose several policy areas, such as prison reform or climate change or the relation of religion to government, to coordinate with the programming, guest lecturers from departments and schools at Boston College, and speaker events hosted by campus centers and institutes, such as the Clough Center for the Study of Constitutional Democracy and the Rappaport Center for Law and Public Policy, for students to attend as part of the course. Faculty members from various departments would be invited for guest lectures on specific topics covered in a given semester. The course will also provide students with an overview of methodologies in philosophy and how these relate to interdisciplinary inquiry by examining how philosophical works raise questions and themes that persist in challenges facing both socio-political life and personal ethics.

PHIL749001
Time, Consciousness, and Being
Solere, Jean-Luc
Fall 2023
The nature of time is one of the trickiest puzzles in philosophy. Is the distinction between present, past and future objective, or is it the result of a subjective perspective on reality? How can we say that time exists if only the present is real and if the present is just a fleeting instant? What is an instant? If time does exist and flow, how does it flow? Is it a continuum, or is it discrete? Would time be flowing if there was no change under way in the world? If there was nobody to observe that change? Is all of reality subjected to time, or only certain categories of being? Is eternity an endless stretch of time? We will examine the main answers to these questions in a wide range of philosophies, from Ancient thought to Arabic and Latin medieval theories to the Cartesian and the Newtonian revolutions, Leibniz, and Kant, and to Bergson and contemporary phenomenological and analytic approaches as well. This class will fulfil the coursework requirement regarding medieval and modern philosophy.

PHIL776401  
Theory of the Passions  
Sweeney, Eileen C  
Fall 2023  
This course will look at how philosophers from Aristotle to Kant have understood the emotions and appetites, their relationship to the body, to reason, and to the moral life. We will read the works of Aristotle, the Stoics, Aquinas, Montaigne, Descartes, Spinoza, Hobbes, Hume, and Kant with an eye both to the way their accounts of the emotions fit into their larger philosophical views and tracing the transformation of the view of human emotional life from Ancient/Medieval period to Modernity.

PHIL779101
Aristotle and Plotinus: On the Soul
Gurtler, Gary, SJ
Fall 2023
This course focuses on theories of sensation and knowledge found in the writings of Aristotle and Plotinus. Understanding Aristotle's position necessitates familiarity with the material in Parva Naturalia to supplement the more restricted discussion of the De Anima. While Plotinus assumes a Platonic soul, he imports much of Aristotle's structure, material from the Stoics, and the medical tradition of Galen and others. These resources allow him to give for the first time in the Western tradition a full theory of consciousness. Plotinus' achievement shows how the insights of his predecessors can be combined in a remarkably fruitful way.

Philosophy Courses: Spring 2024

PHIL107001
Philosophy of the Person I  
Basile, Giovanni Pietro, SJ  
Spring 2024
This course introduces students to philosophical reflection and to its history through the presentation and discussion of the writings of major thinkers from ancient, medieval, modern, and contemporary periods. The course is designed to show how fundamental and enduring questions about the universe and about human beings recur in different historical contexts. Emphasis is given to ethical themes, such as the nature of the human person, the foundation of human rights and corresponding responsibilities, and the problems of social justice.

Credits: 3

PHIL108901
Person and Social Responsibility II
Troxell, Mary S
Spring 2024
Enrollment limited to freshmen, sophomores, and juniors. The course requirements include ten to twelve hours per week of community service. In light of classic philosophical and theological texts, students in this course address the relationship of self and society, the nature of community, the mystery of suffering and the practical difficulties of developing a just society. PULSE students are challenged to investigate the insights offered by their readings in relationship to their service work. Places in the course are very limited.

**Person and Social Responsibility II**

**Hevelone, Suzanne J**

**Spring 2024**

Enrollment limited to freshmen, sophomores, and juniors. The course requirements include ten to twelve hours per week of community service. In light of classic philosophical and theological texts, students in this course address the relationship of self and society, the nature of community, the mystery of suffering and the practical difficulties of developing a just society. PULSE students are challenged to investigate the insights offered by their readings in relationship to their service work. Places in the course are very limited.

Perspectives on Western Culture II/Perspectives II
Floyd, Gregory P
Spring 2024
Freshmen only This course pursues the enduring and foundational questions of life into the modern world. It considers the new and renewed understandings of faith, reason, justice, nature and the human person that emerge in the works of writers such as Machiavelli, Descartes, Luther, Rousseau, and Nietzsche. Modern perspectives will be appraised in light of the pre-modern perspectives encountered in the first semester of the course, allowing students to consider important contemporary questions in more attentive, reflective and responsible ways.

**PHIL116001**  
**The Challenge of Justice**  
**Snyder, Joshua R**  
**Spring 2024**

This course introduces the student to the principal understandings of justice that have developed in the Western philosophical and theological traditions. Care is taken to relate the theories to concrete, practical and political problems, and to develop good reasons for choosing one way of justice rather than another. The relationship of justice to the complementary notion of peace will also be examined. Special attention is paid to the contribution of Catholic theology in the contemporary public conversation about justice and peace. Problems discussed may include human rights, hunger and poverty, and ecological justice.

**Credits:** 3  
**Room and Schedule:** Stokes Hall 217N TuTh 03:00PM-04:15PM  
**Satisfies Core Requirement:** Cultural Diversity

PHIL160201
Perspectives on Art II: Ancient, Modern, and Contemporary Issues
Rumble, Vanessa P
Spring 2024
How does the experience of art contribute to a life of purpose and meaning? What do the various forms of art have in common, and how do they differ? What practices and habits constitute meaningful engagement with art? How have aesthetic values and concepts transformed throughout history? What is the nature of artistic creation, and how is it shaped by shifting understandings of the human person? What role does art play in the formation of the values and principles, now and at other times and places? Over the course of the year, these and other enduring questions about art will be addressed by four connected courses: a year-long philosophy course, paired with a literature course in one semester, and an art course in the other. Approaching shared questions from these different perspectives will disclose not only the limits of each perspective, but also the ways in which each perspective serves to supplement and transform the others. The result will be not only a wider and deeper understanding of art, but also growth in the capacity for aesthetic experience. This is Part II of a yearlong course.

PHIL172301
Faith, Ethics, and the Sciences in the 21st Century
Jarrett, Madeline; Pope, Stephen J; Vandewall, Holly R; Yargo, John
Spring 2024
This is a Complex Problem course and is open to FRESHMEN only. You must take THEO1723 with this course. The rise of modern science has raised and continues to raise a wide range of questions for both religious belief and religiously based morality. The sciences have made it clear that the cosmos is much older and much bigger that the pre-moderns had recognized. The sciences are often taken as challenging traditional views of religion, morality, and the world. Contemporary critics regard religion as either obsolete or a threat to humanity. Why have the modern sciences been taken to carry these implications and need they be taken in this way? Alternatively, can the sciences play a constructive role in how we think about faith, ethics, and human nature? Can contemporary believers fully accept the findings of science? If so, how might doing so influence how believers think about God and God's relation to the world. This course will be team-taught by a philosopher and a theologian who have been researching the relationships between natural science and religious belief. We will explore the implications of modern physics and evolutionary biology for Jewish and Christian understandings of human origins, the good life, and ethical responsibility for ourselves, our communities, and our wider natural world.

PHIL172302
Faith, Ethics, and the Sciences in the 21st Century
Yargo, John
Spring 2024
This is a Complex Problem course and is open to FRESHMEN only. You must take THEO1723 with this course. The rise of modern science has raised and continues to raise a wide range of questions for both religious belief and religiously based morality. The sciences have made it clear that the cosmos is much older and much bigger that the pre-moderns had recognized. The sciences are often taken as challenging traditional views of religion, morality, and the world. Contemporary critics regard religion as either obsolete or a threat to humanity. Why have the modern sciences been taken to carry these implications and need they be taken in this way? Alternatively, can the sciences play a constructive role in how we think about faith, ethics, and human nature? Can contemporary believers fully accept the findings of science? If so, how might doing so influence how believers think about God and God's relation to the world. **Philosophical Perspectives on Science II**

Stan, Marius C

Spring 2024
Continued Course. Part II. This course is an examination of the scientific enterprise with the tools of modern analytic philosophy. Topics include the structure of a scientific theory, evidence and knowledge in science, the nature of scientific explanations, and the role of values in science. As paradigmatic examples, we will explore major breakthroughs by Archimedes, Newton, Darwin, and Einstein. Open to science and pre-med majors.

PHIL223001
Mass Incarceration: Philosophical and Theological Perspectives
McCoy, Marina B
Spring 2024
This course will explore problems of justice in relation to incarceration in the United States with particular attention to attention to race, social class, gender, and immigration status. Students will read authors writing on the philosophy of race, gender, and class in relation to incarceration, the phenomenology of solitary confinement and the concept of "social death," church documents and theological works on incarceration, and works on restorative justice and other models of justice that serves the common good. Catholic Social Justice teachings and discussion will also be a part of the course. The course will also address interconnections between immigration and incarceration. This course will be offered as a PULSE elective, in which students undertake four hours per week of service in the City of Boston at institutions such as Suffolk Country Jail and non-profits that provide transitional services for returning residents or formerly incarcerated individuals or that advocate for prison reform. The PULSE office will vet and coordinate students' placements and serve as a liaison with community partners.

**Perspectives on War, Aggression, and Conflict Resolution I**

**Johnson, Spencer K**

**Spring 2024**

The Faith, Peace, and Justice Program at Boston College sponsors this course as an introduction to the field of Peace Studies. This course asks: Is it ever ethical to go to war? Is it possible to be ethical in war? And, what does ethical conflict resolution look like? This course investigates these questions primarily using the resources of the Christian theological tradition and the social sciences, as well as engaging with philosophy and film. Special attention will be paid to issues in contemporary warfare and the challenges and promises of peacebuilding.

Telling Truths II: Depth Writing as Service
Rizzuto, Alexis A
Spring 2024
This PULSE elective will focus on the power of story-telling to achieve justice and social liberation. We will read theoretical and narrative accounts of the role of story, examine the use of story-telling among marginal populations as a means of participating in their own solutions. We will explore the benefits and liabilities of social media in emerging change movements. Students will engage in story gathering, telling, and analysis, through their PULSE placements and class discussion, producing a collection of original writings. A four-hour per week (plus travel time) service commitment is a requirement for this course.

PHIL314001
The Idea of America
Fried, Charles G
Spring 2024
A systematic exploration of thinking about America, in both its actual history and its possible futures, including traditions of thought that reflect upon the founding principles and the unfolding American experiment. The Declaration of Independence and the Constitution will be studied with an eye to their philosophical content and sources. The course will also examine works of philosophers, artists, writers, and other thinkers who address conflicts over the meaning of founding principles in the course of the nation's history, from the struggle over slavery to America's contemporary role in the world. Because this course intends to apply theoretical understanding to actual events, students will be expected to read contemporary journalism on a regular basis and assess the controversies of today in the light of the nation's philosophical and historical currents.

**PHIL352201**  
**Truth and Beauty Through a Russian Prism: Chekhov and Philosophy**  
**Epstein, Thomas**  
**Spring 2024**  
While an academic philosophical tradition, which this course will survey, exists in Russia, the heart of Russian philosophy is most frequently encountered in political theory, theology, and literature. To many observers, this last category can be summed up in the word Tolstoevsky. However, as this course will demonstrate, Chekhov too was a deeply philosophical writer. This course will explore Chekhov’s chief philosophical concerns, the image of the philosopher and philosophy in his work, and his place as precursor to philosophical approaches of the 20th and 21st centuries.

PHIL400101
Feminisms and Philosophies of Difference
McGill, Cherie
Spring 2024
What does it mean to call oneself (or someone else) a 'feminist'? In attempting an answer to this question, we will consider efforts to reveal, unravel, and remedy the conceptual, psychological, and economic dimensions of the oppression of women. We will discuss a variety of feminisms—liberal, existential, radical—and their differing approaches to such 'feminist' issues as marriage and domestic violence, reproduction and pregnancy, work and sexual harassment, and the science of gender and gender difference. We will examine the relationship of sexism to racism, heterosexism, and class exploitation, and investigate the role of the concept of difference in creating and maintaining structural inequalities.

PHIL421101
Hegel, Kierkegaard, Nietzsche: Art, Religion, and the Question of Meaning
Rumble, Vanessa P
Spring 2024
The aim of this course is to explore G. W. F. Hegel's, Søren Kierkegaard's and Friedrich Nietzsche's accounts of the human condition. All three philosophers grapple with human temporality and human limitations in singular ways. While Descartes and Kant bequeathed to them (and to us) a human subject divorced from itself and from knowledge of what is ultimately real, Hegel, Kierkegaard, and Nietzsche offer this alienated subject a panoply of provocative perspectives and therapies. In addition, each thinker takes up timeless questions regarding the meaning of suffering, the nature of beauty, and the significance of human history, culture and religiosity. In the concluding weeks of the semester, we read Heidegger's The Question Concerning Technology as a way to both contextualize the work of Hegel, Kierkegaard and Nietzsche and to get a glimpse of his own remarkable reframing of human subjectivity. Above all, we look forward to working with philosophers who were determined, above all else, to keep it real.

This course will explore the complicated and urgent problem of refugees and forced migration, in the specific context of East Africa. Our approach will have three dimensions: attention to the social, political and environmental conditions; theoretical analysis from philosophy, theology, and social theory; and active accompaniment of refugees in the form work with them and for them as facilitated by the Jesuit Refugee Services in East Africa. Our central aim will be to generate and practice the mode of responsibility defined by what the Society of Jesus calls accompaniment. Students will be expected to read and discuss a variety of texts, attend invited lectures and workshops, and participate in an overnight retreat prior to the immersion experience in East Africa. There will be examination on the academic materials prior to departure from the United States, organized reflection while in East Africa, and a reflection paper grounded in scholarly research will be due some weeks after our return. We will be in Uganda for one month, beginning in early June.

PHIL442301
Spanish-American Philosophy
Gurtler, Gary, SJ
Spring 2024
This course is designed to give the student an opportunity to look at some fundamental philosophical issues regarding human nature and the origins and development of human thought from a fresh perspective. Unamuno's Tragic Sense of Life presents a critique of the rationalism of modern European thought by focusing on human life as dream, theater, and struggle in line with Don Quijote. Paz's The Labyrinth of Solitude explores the meaning of human existence through the lens, or perhaps the mask, of the Mexican quest for identity. Ortega y Gasset and Zubiri represent the contemporary Spanish interaction with European phenomenology.

PHIL445401
Unheard Voices: Philosophy at the Crossroads of Identity
McGill, Cherie
Spring 2024
What is a just society? What responsibility does each of us have to contribute to a common good? This course starts from the idea that answering these questions requires hearing the voices of those typically unheard, and recognizing the interlocking systems that construct our world. We will attempt to hear voices typically not heard, identify the forces that converge to make voices heard or unheard, and understand the roles that each of us play as silenced and silencer. We will attempt to discern a way forward to a more just society—a way forward that begins from where we are.

PHIL447601
Classical Chinese Philosophy
Jiang, You G, SJ
Spring 2024
This course is an introduction to Classical Chinese Philosophy and designed to introduce students to the major philosophical schools of classical China, including the Confucian, Mohist, Daoist, and Buddhist schools. Through lectures, discussions, and reading of select primary and secondary sources, we will explore the formulations and subsequent transformations of key beliefs, doctrines, practices, and institutions that characterized specific cultural, educational, spiritual, and philosophical traditions.

**The Nature of Science**

**Stan, Marius C**

**Spring 2024**

This course is an examination of the scientific enterprise with the tools of modern analytic philosophy. Topics include: the structure of a scientific theory; evidence and knowledge in science; the role of models in research and theorizing; the nature of scientific explanations; and the place of values in science. Open to advanced undergraduates.

**PHIL456501**
Happiness and Utopia: Thinking about the Ideal Life
Lott, Micah
Spring 2024
This course examines the notion of an ideal human life, understood as living well in ideal circumstances. This notion is at once familiar and puzzling. On the one hand, we all have some conception of living well - i.e., happiness, flourishing, the good life. And we recognize some circumstances as inimical to human flourishing, such as conditions of famine, poverty, oppression, and exploitation. Moreover, we seem to operate with some idea of good circumstances whenever we wish good fortune for our loved ones, or whenever we work to make our societies more supportive of human well-being. But on closer inspection, the notion of ideal circumstances raises a number of questions. What would human life look like in utopian conditions? Would humans still work and labor, or would we pass our lives entirely in leisure? Could our lives still have meaning and purpose, if there were nothing in our circumstances to struggle against? Would we still need virtues like courage and perseverance, with nothing to fear or overcome? And what about death: is it the ultimate non-ideal circumstance that might be overcome in some future utopia? This course considers such questions in relation to the notion of an ideal human life. We will read a range of philosophical texts, from Aristotle to Thomas More to contemporary thinkers. We will also examine film and works of imaginative literature by writers such as H.G. Wells.

Bernard Lonergan (1904-1984) was a philosophical and religious thinker deeply concerned about the philosophical, ethical, social, and religious situation of the twentieth century. That situation was defined by confusion over whether knowledge was possible, what it consisted in, and how to judge between rival accounts. His proposal was to make a beginning by asking what precisely it is to understand. His cognitional theory and its social, metaphysical, ethical, and religious implications are elaborated in his major philosophical work Insight. This course will examine Lonergan's account of human knowing in Insight, an account he calls self-appropriation or making one's self one's own through the discovery and deliberate participation in the structured relations among the activities of one's own consciousness. Topics include: critical and naive realism, commonsense and scientific forms of knowledge, bias and error, ethics, and philosophical considerations of religious transcendence. The course will also engage important philosophical writings after Insight.

Far from being monolithic and repetitive, the Middle Ages were a creative period during which multiple solutions were tried to make sense of the world and of human life. The legacy of Antiquity, the philosophic and scientific knowledge of the time, and religious views were combined in original syntheses. The aim of the course is to provide a picture of this diversity, through a study of the main problems that a wide range of authors (Christian thinkers from St. Augustine to Ockham, but also Islamic and Jewish philosophers) faced. Medieval philosophy was an important step in the development of human thought. Discovering it will be essential to your philosophical education. This course will especially highlight the ideas, in metaphysics, theory of knowledge, and ethics, which medieval thinkers created and transmitted to modern philosophy. In addition, analysis of texts, debates, and writing assignments will help you to develop rigorous argumentation and expression skills. (NB: This course was previously offered as PHIL 4407; you cannot take it if you took PHIL 4407)

**PHIL500701**  
**Mahayana Buddhism: Thought and Practice**  
**Vale, Matthew**  
**Spring 2024**
This course explores Mahayana Buddhist thought, meditation practice, narrative, and ritual practice across Asia. We consider texts ancient and modern. After a basic introduction to Buddhism, we take up topics ranging from meditation, to compassion, nirvana, emptiness, Buddha nature, Zen, and Mahayana Buddhist ethics. Our focus is on fundamental theological questions: What are the causes of suffering? How can meditation and ethical practices illuminate sufferings causes, and put an end to them? What is the state of unconditioned awareness, freedom, and joy that lies beyond suffering? Most importantly, what does this all have to do with me? No background in Buddhism is required.

Hermeneutics of Film
Kearney, Richard
Spring 2024
The course will consist of a number of philosophical readings of classic and contemporary films. Beginning with the work of Stanley Cavell and Gilles Deleuze the seminar will discuss various phenomenological and hermeneutic interpretations of the art of moving images. We will have specific seminars devoted to different genres of films such as Comedies of Romance, film noir, Monster movies, Sci-fi and Anime, Holocaust documentaries and dramas. Each student will be asked to present on a film of their choice.

PHIL537301
Patristic Greek II
Schatkin, Margaret
Spring 2024
This two-semester course is designed for the student with no previous knowledge of ancient Greek to develop reading and translating skills in Patristic Greek language by mastering the fundamental principles of Greek grammar and syntax and acquiring a basic reading vocabulary. The student becomes familiar with the meaning of Greek words, their forms and structure, and their customary arrangement in sentences. A secondary goal of this course is to serve as a foundation for further studies in Patristic Greek.

PHIL541801
Capstone: Working, Playing, Being
Storey, David E
Spring 2024
Capstone classes may NOT be taken Pass/Fail. You may take only ONE Capstone class before graduation. Seniors only. The conventional wisdom is that BC student culture is "work hard, play hard." But what do we mean by "work" and "play" here? How do these implicit meanings reflect broader cultural forces? And do these meanings serve us well? Senior year is an exciting but anxious time, and this seminar is a chance for you to: (a) reflect on how your education has shaped you, and how you have shaped your education and (b) explore your goals, fears, hopes, and expectations around life post-graduation with a small group of peers. We will examine: (1) the meaning of, and relationship between, work and leisure in your own life; (2) how they have developed since your freshman year in light of your education at BC and; (3) how they figure into your vision of a fulfilling life.

PHIL550501
The Aristotelian Ethics
Gurtler, Gary, SJ
Spring 2024
This course has recently been added for the fall. For students interested in Aristotle's Nicomachean Ethics, this course is for you! It consists of a close reading of the whole of the Nicomachean Ethics beginning with ethical virtue (Books II-IX) and ending with happiness (Books I and X). I have found that a student's understanding of Aristotle's ethical concepts is enhanced when he/she considers those concepts in relation to leading figures in Ancient Greek literature. Thus, occasionally we will discuss some of Homer's Iliad and Sophocles' Oedipus Tyrannus to consider how some of the following issues relate to Achilles, Hektor, Paris, Oedipus, and Jocasta. What does it mean to have an ethical virtue (or vice), to engage in involuntary actions, to be responsible, courageous, good-tempered, truthful, temperate, continent, incontinent, and happy? Since the course will be run seminar style, students are expected to participate generously in classroom discussions.

**PHIL550801**  
**Dante's "Divine Comedy" in Translation**  
**Costanzo, Maria Sole**  
**Spring 2024**  
Conducted in English. Elective for Italian major or minor. An introduction to and critical reading of the "Divine Comedy" (in English translation), one of the world's greatest epic poems, produced by "the chief imagination of Christendom" (Yeats). Dante's journey through Hell, Purgatory, and Paradise will be analyzed at its multiple levels of interpretation: literal and allegorical, theological, philosophical, political, and literary. Compendium of an entire epoch of European civilization, the "Comedy" will also be interrogated for its responses to the fundamental questions of human existence: God, the Cosmos, the Self, Good and Evil, Right and Wrong, Suffering, and Happiness.

**Credits:** 3  
**Room and Schedule:** Stokes Hall 401N W 03:00PM-05:20PM
PHIL551801
Philosophy of Imagination
Kearney, Richard
Spring 2024
Readings in the philosophy of imagination from ancient myth to post-modernity. Beginning with Biblical and Greek accounts of images and image-making, this course will explore three main paradigm shifts in the Western history of imagination: (1) the ancient paradigm of the Mirror (Plato to Augustine); (2) the modern paradigm of the Lamp (Kant to Sartre); and (3) the postmodern paradigm of the circular Looking Glass (Lacan to Derrida). The course will conclude with a critical evaluation of the political and ethical functions of imagination in our contemporary civilization of cyber fantasy, simulation, and spectacle.

PHIL552801
Skepticism, Stoicism, and Neo-Platonism
Byers, Sarah C
Spring 2024
Ancient philosophy is the period following Aristotle and stretching into the third century A.D., Hellenistic and Roman Philosophy. A number of philosophical schools flourished: Stoicism, Epicureanism, Skepticism, Middle-Platonism, Neo-Platonism. Some had sophisticated answers to questions in epistemology, ethics, and metaphysics: Does the human mind use mental language? Are we responsible for our thoughts? Is pleasure the goal of life? What kinds of emotions does the wise person have? Can Plato's account of the Forms be enriched by Aristotle's account of God? What is the metaphysical status of Socrates' "daimon"? The primary emphases of the course are Stoicism and the Platonisms.

**PHIL553301**  
**Capstone: Desire and Discernment**  
**Muldoon, Timothy P**  
**Spring 2024**  
Seniors only. Capstone classes may NOT be taken Pass/Fail. You may take only ONE Capstone class before graduation. First, the course will involve careful reflection on the sifting and pruning of desires. It will introduce philosophical reflection on desire from ancient Greece to modern philosophy, paying particular attention to the Ignatian tradition of discernment of spirits. Second, it will invite particular reflection on our relationships, and the desires that we have for the relationships we seek to cultivate over the course of our lives. Third, it will invite students to reflect on their experiences of work and preparation for a career, asking how their Boston College education has formed them. Fourth, we will reflect on our citizenship within communities: family, local community, society, nation, and world.

**Credits:** 3  
**Room and Schedule:** Stokes Hall 361S M 04:30PM-06:50PM  
**Satisfies Core Requirement:** None  
**Prerequisites:** Seniors only.
PHIL555301
Capstone: Poets, Philosophers, and Mapmakers
McNellis, Paul W, SJ
Spring 2024
We go through life with mental maps of reality in various degrees, implicit or explicit. A liberal arts education presupposes such a map of the intelligible world. Is it accurate? What does your map of reality look like? How has it changed since freshman year? The goal of the seminar is to help you see what kind of map you implicitly have now and to begin to ask what you want the map to look like ten years after graduation. How do you develop an open rather than closed map?

PHIL556601
Kant’s Critique of Pure Reason: The Doctrine of Method
Basile, Giovanni Pietro, SJ
Spring 2024

Immanuel Kant's Critique of Pure Reason (CPR) represents one of the most significant texts in the history of philosophy. Kant himself defines it as a "treatise of method" (CPR, B XXII). The second part of the work --The Transcendental Doctrine of the Method-- particularly insists on this aspect. It consists of four sections. The first is The discipline of pure reason that deals with the distinction between the method of the mathematics (construction of concepts) and the method of the logic (analysis of concepts). It also treats of the two main forms of theoretical philosophy: the mere opinion (Meinen) and the knowledge (Wissen). The topic of the second section --The canon of pure reason -- is the elucidation of a specific method (Glauben) for the practical use of reason. How a unified whole of metaphysics can be built up as a system from the connection of the theoretical and the practical use of reason is the theme of third section - The Architectonic of Pure Reason ---, the "art of systems" (KrV A 832/B 860). The last section --The History of Pure Reason --can be seen as the "temporal" counterpart of the "spatial" consideration of the system of pure reason in the Architectonic. In addition, some pre-critical writings that prepared the development of The Transcendental Doctrine of Method will also be considered in the course.

PHIL557701
Contemporary Logic
Atkins, Richard
Spring 2024
An introduction to the powerful ways the logical forms woven into deductive reasoning and language can be analyzed using abstract symbolic structures. The study of these structures is not only relevant for understanding effective reasoning, but also for exploring the Anglo-American analytic philosophical tradition and foundations of mathematics, computer science, and linguistics. Philosophically interesting properties about logical systems will be explored, including the task of proving whether a logical system is complete and consistent. A number of interesting topics of twentieth-century logic will be briefly considered, such as set theory, Russell's paradox, and Goedel's theorems.

PHIL558601
Platonic Dialogues
McCoy, Marina B
Spring 2024
In this fall's Platonic dialogues, we will focus on Plato's moral thought in a series of dialogues: Meno, Protagoras, and Gorgias. Each of these dialogues explores the nature of virtue either as a whole. Our reading of the texts will be a slow and careful reading of these dialogues arguments with a particular emphasis on the relationship between philosophical reasoning, myth narrative, and ethics.

PHIL558801  
Varieties of Feeling - G/UG  
Cohen, Martin  
Spring 2024
Philosophical, literary, artistic, and religious traditions are sources for descriptions and evocations of many kinds of profound and humanly compelling feelings that are not reducible to the labeled emotions. There are, for example, feelings of guidance and direction; feelings of discernment and heart-knowing; feelings of reverence and aesthetic contemplation; and feelings of communion. Feelings often play a role in ethical decision-making, as well as in love. Between the aridity of some forms of intellectualism, on the one side, and the facile advice to trust the gut and the immediacy of whatever intuition appears, on the other, there is a powerful realm of human feeling that calls out for rigorous inquiry. To ignore this realm is to overlook one way to cultivate depths of our humanity. Great literature is often a haven for acknowledging this differentiated realm of feeling that philosophy can benefit from considering. The ancient pillars of the Western discourse on Love, Plato’s Symposium and the Biblical Song of Songs, suggest the vastness and potential goodness of feeling. The tripartite soul as conceived by Plato and Aristotle, in which the rational is assigned the task of supervising, controlling or persuading the spirited and appetitive parts, will be respectfully fathomed as a prelude to considering many refinements, qualifications and challenges to this hierarchy granting dominance to rationality. The era of Shakespeare, Cervantes and Montaigne issues one challenge; the romanticism of Wordsworth, Keats and Blake another; and a burgeoning body of philosophical and literary materials on feeling in the 20th century extends the unfolding of this formidable ancient conception. As the plenitude and variety of feelings are acknowledged, how must ethics be reconceived?

PHIL565001
Law and Interpretation
Fried, Charles G
Spring 2024
This course will examine theories of interpretation (hermeneutics) and the practice of interpretation in law. We will address interpretation as a fundamental feature of human understanding, using religious and literary texts, and then specific schools of legal interpretation, including originalism, strict construction, and the so-called living constitutional approach, using both American constitutional cases (Second Amendment, same-sex marriage, and others) and disputes in scriptural interpretation, such as the debate over the ordination of women. A particular focus will be the question of law at the limit, such as instances of executive law-breaking. Authors will include Aristotle, Aquinas, Gadamer, and Schmitt, as well as Dworkin, Scalia, and Breyer.

**Credits:** 3

**PHIL566501**  
**The Medieval Mind**  
**Kreeft, Peter J**  
**Spring 2024**  
Although this course includes short works by typically medieval philosophers (Boethius, Anselm, and a little of Aquinas) it also uncovers the more general world and lifeview common to the culture of the only age in history ever called "Christendom." in an illuminating contrast to our own in its philosophy, theology, art, architecture, science, language, poetry, and psychology. We appreciate everything best by contrast, so this course is not only about our remote ancestors but also about ourselves.

**Credits:** 3  
**Room and Schedule:** Stokes Hall 109S TuTh 09:00AM-10:15AM  
**Satisfies Core Requirement:** None  
**Prerequisites:** None  
**Corequisites:** None  
**Cross-listed with:** None
Alienation is a concept that refers to both social ills (like fetishism and objectification) and subjective experiences of estrangement and depersonalization. While the concept of alienation in Western philosophy is historically connected to Hegel's and Marx's theories, the phenomenon of alienation plays a larger role in ethics and contemporary social and phenomenological philosophy. After introducing the origins of the concept of alienation in Hegel and Marx, this seminar will center on the phenomenology of alienation in relation to gender, race, technology, and migration.

**Credits:** 3  
**Room and Schedule:** Fulton Hall 423 MW 12:00 Noon-01:15PM

In this course we examine questions in epistemology, ethics and metaphysics using major works of Augustine (354-430 AD/CE), supplemented by works of contemporary philosophers on related themes (Kretzmann, Matthews, MacDonald, VanInwagen). We will aim at depth of understanding and breadth of knowledge, contextualizing Augustine as a philosopher of late antiquity in dialogue with the Hellenistic schools (Stoicism, Skepticism, Neo-Platonism) whose philosophy is still of interest today. Topics include the nature of faith, skepticism, the problem of evil, the nature of God, moral development and conversion, the origin and characteristics of the natural world, including the human soul and body.

PHIL667001  
**Technology and Culture**  
**Griffith, William**  
**Spring 2024**  
This interdisciplinary course will first investigate the social, political, psychological, ethical, and spiritual aspects of the Western cultural development with a special emphasis on scientific and technological metaphors and narratives. We will then focus on the contemporary world, examining the impact of our various technological creations on cultural directions, democratic process, the world of work, quality of life, and especially on the emergent meanings for the terms "citizen" and "ethics" in contemporary society. Students will explore technologies in four broad and interrelated domains: (1) computer, media, communications, and information technologies, (2) biotechnology, (3) globalization, and (4) environmental issues.

**Credits:** 3  
**Room and Schedule:** Fulton Hall 245 M 04:30PM-06:50PM

PHIL777101
Ethics and the Pleasure Principle in Modern Philosophy
Solere, Jean-Luc
Spring 2024
To the exception of Epicurus, ancient and medieval thinkers generally agreed that pleasure is not the highest good; but that the highest good, which must be sought for itself, does in addition provide the highest pleasure, happiness. However, at the beginning of the modern period (16th -17th centuries), Neo-Epicureans and Augustinians paradoxically came to agree on the fact that human beings, prompted by self-love, act only in view of what is pleasurable to them. This view became widespread, and gave rise to heated controversies. Are we incapable of disinterested feelings and actions, of pure love? Virtues might well be the expression of disguised self-interest. This issue affects not only ethics and religious thought, but political philosophy as well. Vices were usually viewed as detrimental to the common good and virtue as a disinterested service to the commonwealth. However, the proponents of the pleasure principle maintained that extreme selfishness is compatible with well-organized societies. As a result of this line of thinking, Mandevilles Fable of the Bees, at the beginning of the 18th century, contended that private vices are beneficial to public prosperity. As a response to that cynical description of humans motivations, Hutcheson highlighted a different type of pleasure, which, he thought, proved that we are capable of non-greedy feelings: aesthetic pleasure. The enjoyment of beauty became, in the 18th century, the object of a new discipline, aesthetics, which culminated in Kants analysis of this disinterested pleasure. At the same time, aesthetic pleasure provided a paradigm for exploring the complex realm of sentiments in which pleasure is reconcilable with altruism, as in Humes ethics. This class will not be only a course on ethics properly speaking, but also an inquiry on the nature of pleasure in itself and its role in psychological life broadly construed (with questions such as: Is there a notion of pleasure encompassing all the pleasures, physical and intellectual? Can we establish qualitative and/or quantitative distinctions between pleasures? Is there a universal standard of pleasure, or is pleasure indefinitely variable according to the individuals? Does happiness consists in continuous pleasures, in a sum of pleasures, in a maximum of pleasure, in a variety of pleasures?, etc.).

PHYS210001
Introduction to Physics I (Calculus)
Engelbrecht, Jan
Summer 2023
PHYS2050 is the laboratory course to supplement the lecture course material. First semester of a two-semester calculus-based introduction to physics primarily for biology majors and premedical students. The development and application of classical physical principles are covered, and students are introduced to more advanced mathematical techniques to extend these applications. Emphasis is placed on problem-solving to better understand the implications of these principles, as well as to develop analytical skills. Topics include classical mechanics, including Newton's laws, energy, rotational motion, hydrostatics and fluid dynamics, oscillations, waves, and gravitation.

Credits: 4
Room and Schedule: MTuTh 04:00PM-07:30PM
Satisfies Core Requirement: Natural Science

Physics Courses: Fall 2023

PHYS110001
Structure of the Universe I
Bedell, Kevin
Fall 2023
An introductory course directed at non-science majors. Physical principles are developed and applied to our space and astrophysical environment. Topics include structure and evolution of the solar system, physics of the sun and planets, space discoveries, creation and structure of stars and galaxies, relativity and cosmology, extraterrestrial life, and astronomical concepts.

Credits: 3
Room and Schedule: Higgins Hall 265 MWF 12:00 Noon-12:50PM

PHYS140001
The Art of Physics
Herczynski, Andrzej
Fall 2023
This core course is a contemporary prologue to classical physics for students seeking to gain an appreciation of the ethos, scope, methods, and tools of physics, and to reflect on its place among the liberal arts. It explores major physics ideas and paradigms in a broader cultural context, providing historical perspectives from the early Greek astronomy through the scientific revolution. Simultaneously, the aim is to develop practical science skills, including the order-of-magnitude estimates, dimensional analysis, understanding of physics laws, and problem solving techniques. Interdisciplinary connections will be emphasized by inclusion of such topics as the concept of time and examples of applications of mathematics and physics to the visual arts. The course can serve as a preparation for, or a companion to more advanced physics classes.

PHYS150001
Foundations of Physics I
Kempa, Krzysztof
Fall 2023
Recommended laboratory (optional): PHYS2050-2051. First semester of a two-semester algebra-based introductory physics course sequence, primarily for non-science majors, that covers the basic principles of physics. Emphasis is placed on problem-solving to demonstrate the implications of these principles, and to develop analytical skills. This course is similar to PHYS2100 in pace and content but with less emphasis on mathematical technique. First semester covers classical mechanics, including Newton's laws, energy, rotational motion, fluids, thermal physics, oscillations, waves, and gravitation.

PHYS210001
Introduction to Physics I (Calculus)
Gallaba, G M Dinuka H
Fall 2023
PHYS2050 is the laboratory course to supplement the lecture course material. First semester of a two-semester calculus-based introduction to physics primarily for biology majors and premedical students. The development and application of classical physical principles are covered, and students are introduced to more advanced mathematical techniques to extend these applications. Emphasis is placed on problem-solving to better understand the implications of these principles, as well as to develop analytical skills. Topics include classical mechanics, including Newton's laws, energy, rotational motion, hydrostatics and fluid dynamics, oscillations, waves, and gravitation.

Credits: 4
Room and Schedule: Higgins Hall 300 MWF 09:00AM-09:50AM
Satisfies Core Requirement: Natural Science
Prerequisites: MATH1100 required. May be taken concurrently. or Permission of Department
Corequisites: None
Cross-listed with: None
Frequency: Every Fall, Periodically in the Summer

PHYS220001
Introductory Physics I (Calculus)
Auner, Alexander
Fall 2023
PHYS2050 is the laboratory course to supplement the lecture course material. First semester of a two-semester calculus-based introduction to physics for those majoring in the physical sciences. Students utilize analytical reasoning combined with mathematical formalism to fully explore the development, consequences and limitations of the classical principles of physics; similar to PHYS2100 in pace and content but at a greater depth appropriate for physical science majors. Class size is limited to promote classroom discussion. Topics cover classical mechanics, including Newton's laws, energy, rotational motion, oscillations, waves, and gravitation.

**Vibrations and Waves**

**Broido, David**

**Fall 2023**

This course is an introduction to the phenomena of vibrations and waves that span most of the areas in physics. The basic subject matter includes the following: mechanical vibrations and waves, free and forced vibrations and resonances, coupled oscillations and normal modes, vibration of continuous systems, propagation of mechanical and electromagnetic waves, phase and group velocity, interference and diffraction. The course also covers the basic concepts in first and second order differential equations, matrices, eigenvalues and eigenvectors and Fourier series.

**Credits:** 4

**Room and Schedule:** Experiment instructions given Mondays at 4PM. Sign up required for two-hr slot to perform experiments.; Higgins Hall 225 TuTh 12:00 Noon-01:15PM; Higgins Hall 250 M 04:00PM-05:00PM

**Classical Mechanics**  
Naughton, Michael J  
**Fall 2023**  
This course studies classical mechanics at the intermediate level and develops analytical skills for later physics courses. It includes: single particle dynamics and oscillations; conservative forces and conservation laws; gravitation and central force motion; Lagrangian and Hamiltonian dynamics; system of particles and rigid body dynamics.

**Credits:** 4  
**Room and Schedule:** Higgins Hall 260 F 03:00PM-03:50PM; Higgins Hall 260 TuTh 12:00 Noon-01:15PM
PHYS440001
Quantum Physics I
Chen, Xiao
Fall 2023
First of a two-semester sequence providing a comprehensive treatment of the principles and applications of non-relativistic quantum mechanics. This semester focuses on basic principles. Topics covered include: historical development of quantum mechanics; the uncertainty principle; the Schrodinger equation and its solution for simple one-dimensional potentials, including constant potentials and the harmonic oscillator; formal presentation of the postulates of quantum mechanics using Dirac notation; commutation relations; basic scattering theory; formulation of Schrodinger equation in three-dimensions, central potentials, orbital angular momentum, and the hydrogen atom; spin angular momentum and the addition of angular momenta.

PHYS454501
Condensed Matter Physics
Bedell, Kevin
Fall 2023
Condensed matter physics concerns all aspects of the physics of "condensed" materials, that is, solids, liquids, gels, and plasma. It is the science behind many technologically-relevant applied and integrated science and engineering fields. This course primarily covers the solid state, starting with crystal lattices and their vibrations (phonons), and descriptions of crystalline metals, semiconductors, insulators, and superconductors. It covers in some detail the electrical, magnetic, optical, and thermal properties of materials, and introduces the student to noncrystalline solids and so-called "soft condensed matter."

PHYS460001
Statistical Mechanics and Thermodynamics
Auner, Alexander
Fall 2023
The results of classical thermodynamics are deduced from a statistical basis, including the concepts of temperature and entropy, and the three laws of thermodynamics. Applications to ideal and real gases. Basic elements of statistical mechanics, including the canonical ensemble, partition function, equipartition theorem and Maxwell velocity distribution. Simple application of Maxwell-Boltzmann, Bose-Einstein, and Fermi-Dirac Statistic.

PHYS495101  
Senior Thesis  
Naughton, Michael J  
Fall 2023  
A semester-long project in the course of which a student carries out an investigation and research of an original nature or formulates a mature synthesis of a topic in physics. The results are presented as a written thesis, which the student will defend in an oral examination. This course is highly recommended for majors considering graduate study in physics.

---

**PHYS771101**  
Classical Mechanics  
**Ran, Ying**  
**Fall 2023**
Kinematics and dynamics, variational principles, Lagrangian and Hamiltonian formulations, canonical transformations, Hamilton-Jacobi theory, small oscillations, rigid body motion, relativistic mechanics.

**Credits:** 3  
**Room and Schedule:** Higgins Hall 260 MWF 11:00AM-11:50AM  
**Satisfies Core Requirement:** None  
**Prerequisites:** None  
**Corequisites:** None  
**Cross-listed with:** None

**PHYS774101**  
**Quantum Mechanics I**  
**Wang, Ziqiang**
Fall 2023
Introduction includes elements of the linear algebra in Dirac notation. Topics include postulates of quantum theory, simple problems in one dimension, classical limit, harmonic oscillator, Heisenberg uncertainty relations, systems with N-degree of freedom, symmetries, rotational invariance and angular momentum, hydrogen atom, and an introduction to spin. Also included is the path integration formulation of quantum theory.

PHYS875001
Particle Physics
Bakshi, Pradip M
Fall 2023
This graduate-level elective course is a survey of Particle Physics (Fundamental Particles and Interactions). The course will cover a brief history, the Standard Model, unification of forces at high energy, role of Group Theory and Symmetries, Supersymmetry, experiments and machines, LHC and the Higgs Boson and future directions. A basic understanding of mechanics, quantum mechanics, electromagnetism, and special relativity is required.

Credits: 3

Solid State Physics I
Zhou, Brian B
Fall 2023
Introduction to the basic concepts of the quantum theory of solids. Drude and Sommerfeld theory, crystal structure and bonding, theory of crystal diffraction, and the reciprocal lattice, Bloch theorem and electronic band structure, nearly free electron approximation and tight binding method, metals, semiconductors and insulators, dynamics of crystal lattice, phonons in metals, semiclassical theory of electrical and thermal transport, introduction to magnetism and superconductivity.

Credits: 3

Physics Courses: Spring 2024

PHYS110101
Structure of the Universe II
Graf, Michael J
Spring 2024
An introductory course directed at non-science majors. Physical principles are developed and applied to our space and astrophysical environment. Topics include structure and evolution of the solar system, physics of the sun and planets, space discoveries, creation and structure of stars and galaxies, relativity and cosmology, extraterrestrial life, and astronomical concepts.

**Credits:** 3

**Room and Schedule:** Higgins Hall 225 MWF 12:00 Noon-12:50PM

**Satisfies Core Requirement:** Natural Science

---

**PHYS150101**

**Foundations of Physics II**

**Naughton, Michael J**

**Spring 2024**

Recommended laboratory (optional): PHYS2050-2051.. Second semester of the two-semester algebra-based introductory physics course sequence primarily for non-science majors. This course is similar to PHYS2101 in pace and content but with less emphasis on mathematical technique. Topics to be covered are fundamentals of electrostatics, simple electrical circuits, magnetism, electromagnetism, electromagnetic oscillations and waves, physical optics, and, if time allows, basic concepts and applications of special relativity and quantum physics.

**Credits:** 3

**Room and Schedule:** Higgins Hall 310 TuTh 01:30PM-02:45PM

**Satisfies Core Requirement:** Natural Science

**Prerequisites:** None

PHYS210101
Introduction to Physics II (Calculus)
Gallaba, G M Dinuka H
Spring 2024
PHYS2051 is the laboratory course to supplement the lecture course material. Second semester of a calculus-based introduction to physics primarily for biology majors and premedical students. The development and application of classical physical principles are covered, and students are introduced to more advanced mathematical techniques to extend these applications. Emphasis is placed on problem-solving to better understand the implications of these principles, as well as to develop analytical skills. Topics are electrostatics, electrical circuits, magnetism, electromagnetism and electromagnetic waves, topics in physical optics, and basic concepts of special relativity and quantum physics.

Credits: 4
Room and Schedule: Higgins Hall 300 MWF 09:00AM-09:50AM
Satisfies Core Requirement: Natural Science
Prerequisites: MATH1101 required. May be taken concurrently

PHYS2051 is the laboratory course to supplement the lecture course material. Second semester of a calculus-based introduction to physics primarily for biology majors and premedical students. The development and application of classical physical principles are covered, and students are introduced to more advanced mathematical techniques to extend these applications. Emphasis is placed on problem-solving to better understand the implications of these principles, as well as to develop analytical skills. Topics are electrostatics, electrical circuits, magnetism, electromagnetism and electromagnetic waves, topics in physical optics, and basic concepts of special relativity and quantum physics.

**Credits:** 0  
**Room and Schedule:** Higgins Hall 263 Tu 03:00PM-03:50PM  
**Satisfies Core Requirement:** Natural Science  
**Prerequisites:** MATH1101 required. May be taken concurrently  
**Corequisites:** None  
**Cross-listed with:** None

PHYS220101
Introductory Physics II (Calculus)
Auner, Alexander
Spring 2024
PHYS2051 is the laboratory course to supplement the lecture course material. Second semester of a calculus-based introduction to physics for those majoring in the physical sciences. Students utilize analytical reasoning combined with mathematical formalism to fully explore the development, consequences and limitations of the classical principles of physics; similar to PHYS2212 in pace and content but at a greater depth appropriate for physical science majors. Class size is limited to promote classroom discussion. Topics include fundamentals of electrostatics, simple electrical circuits, magnetism, electromagnetism and electromagnetic oscillations and waves, and selected topics in physical optics.

Credits: 4
Room and Schedule: Higgins Hall 225 MWF 09:00AM-09:50AM; Higgins Hall 225 Th 03:00PM-03:50PM
Satisfies Core Requirement: Natural Science

PHYS330001
Introduction to Modern Physics
Flebus, Benedetta
Spring 2024
This course is a transition between introductory and advanced physics courses for science majors. The basic subject matter includes the two principal physical theories of the twentieth century--relativity and quantum mechanics. Included are the following: the Lorentz transformation, kinematic consequences of relativity, origin of the quantum theory, one-dimensional quantum mechanics, quantum mechanics of a particle in three dimensions, applications to the hydrogen atom and to more complex atoms, molecules, crystals, metals, and semiconductors.

Credits: 4
Room and Schedule: Experiment instructions Mon 4-4:50 pm Wkly sign up for 2 hr slot experiment; Higgins Hall 250 M 04:00PM-04:50PM; Higgins Hall 265 TuTh 12:00 Noon-01:15PM

PHYS420001
Electricity and Magnetism
Zhou, Brian B
Spring 2024
To provide students with the background in electricity and magnetism necessary to deal with experimental problems in electromagnetism. Part 1 will present the mathematical foundations for the entire treatment of electromagnetism. Part 2 deals with Coulomb's law and the electrostatics based on this law. Part 3 addresses stationary currents and magnetostatics. Part 4 deals with induction and quasi-stationary phenomena, self- and mutual-induction. Part 5 presents a treatment of Maxwell equations and the consequences of these equations, e.g., energy and momentum conservation, Plane waves, reflection, and refraction. Time permitting, we will discuss radiation from moving charges.

PHYS430001
Numerical Methods and Scientific Computing
Engelbrecht, Jan
Spring 2024
This course is intended for students who plan to minor in Scientific Computation. It is also an elective for Physics majors. This course introduces students to a variety of numerical methods and then applies these methods to solve a broad range of scientific problems. These problems include examples from physics as well as several other disciplines, including chemistry, mathematics, economics, and finance. Numerical techniques for solving problems expressed in terms of matrix, differential and integral equations will be developed. Other topics will include statistical sampling and Fourier and Laplace transforms.

Credits: 4
Room and Schedule: Higgins Hall 260 TuTh 09:00AM-11:45AM
PHYS435001
Experiments in Physics I
Ma, Qiong
Spring 2024
The course includes experiments in optics, solid state physics, nuclear physics, spectroscopy, x-ray, and electron diffraction. Students will carry out independent projects aimed at acquiring a sound understanding of both the physical principles involved in each subject area and of the principles and problems of modern experimental physics.

PHYS440101
Quantum Physics II
Chen, Xiao
Spring 2024
Second semester of the PHYS4407-4408 sequence, focusing on applications. Topics covered include: treatment of the many-particle systems, including effects of spin and symmetry of the wave function; many-electron atoms and the periodic table; basic elements of quantum statistics; approximation techniques, including non-degenerate and degenerate perturbation theory and the variational principle; time-dependent perturbation theory and the interaction of electromagnetic radiation with matter.

POLI104101
Fundamental Concepts of Politics
Biasi, Sam
Summer 2023
Restricted to freshmen and sophomores only. This is an introduction to the study of politics through a consideration of some of the basic elements associated with governing: the political association, justice, constitutions, equality, liberty, conflict among citizens and between citizens and governments, conflict among governments. Each of the course instructors uses a different set of readings, drawing on a mix of political philosophy texts, works on international politics, novels, biographies. Emphasis is on interesting and important readings, discussion, and writing.
NOTE: for academic-year students, this course is major restricted.

Credits: 3
Room and Schedule: On-line Asynchronous
Satisfies Core Requirement: Social Science

POLI104201
Introduction to Modern Politics
Parker, Tyler B
Summer 2023
For majors only. Restricted to freshmen and sophomores only. This course examines the politics and government of modern states, identifying what is distinctively modern (e.g., representative government, political parties), including in the survey both democratic and non-democratic nations. We will consider the nation-state itself—the most typical modern political arrangement—as well as efforts to "transcend" the nation (e.g., the European Union, the United Nations). We will examine the kinds of public policies that modern states adapt, and consider their consequences. Although this is not a class in international politics, some attention will be paid to the relations among modern states, including war and its causes.

POLI108101
Introduction to International Politics
Parker, Tyler B
Summer 2023
Course restricted to political science majors only. This course may NOT be taken by any International Studies majors or minors. Class restricted to political science freshmen and sophomores. This course examines the principle sources of the behavior of countries in international politics, including the nature of the international system and the decision-making process within states. It examines such issues as the sources of power, the causes and implications of the security dilemma, the dynamics of alliances, the causes of war, international political economy, and the dilemmas of world order. This course is strongly recommended for students who plan to take upper level international politics courses.

Credits: 3
Room and Schedule: On-line Asynchronous
Satisfies Core Requirement: Social Science

Terrorism, Insurgency, and Political Violence

Krause, Peter J

Summer 2023

Terrorism, insurgency, and political violence are unfortunately all around us. Whether it's the targeting of elected officials in the U.S. or the killing of civilians in Israel, the West Bank, and Gaza, or mass bombings amidst civil wars in Syria, Somalia, and Yemen, violence by and against non-state actors is the most common form of conflict in the 21st century. Are terrorism and political violence inventions from the modern era, or do they have a deeper past? What drives an individual to join an armed group? Why do some groups choose to employ violence, while others do not? Are terrorism and insurgency effective political tactics? Just how significant is the threat of terrorism to you and to others around the world? This course will address these and other questions, while introducing students to relevant analytical frameworks, theories, and cases concerning terrorism, insurgency, and related forms of political violence. In addition to its topical focus, this course could rightly be called a methods course. Students in the class will learn how to improve their analytical thinking, conduct high quality research, and present an effective argument, both orally and in writing. They will learn the potential and pitfalls of theories of political violence through constant analysis and engagement with the history of terrorism and insurgency. By the conclusion of the course, students will emerge not only with a far richer understanding of these issues, but also as more sophisticated consumers, analysts, and producers of knowledge.

Are terrorism and political violence inventions from the modern era, or do they have a deeper past? What drives an individual to join an armed group? Why do some groups choose to employ violence, while others do not? Are terrorism and insurgency effective political tactics? Just how significant is the threat of terrorism to you and to others around the world? This course will address these and other questions, while introducing students to relevant analytical frameworks, theories, and cases concerning terrorism, insurgency, and related forms of political violence. In addition to its topical focus, this course could rightly be called a methods course. Students in the class will learn how to improve their analytical thinking, conduct high quality research, and present an effective argument, both orally and in writing. They will learn the potential and pitfalls of theories of political violence through constant analysis and engagement with the history of terrorism and insurgency. By the conclusion of the course, students will emerge not only with a far richer understanding of these issues, but also as more sophisticated consumers, analysts, and producers of knowledge.

How to Rule the World: Introduction to Political Theory
Bartlett, Robert C
Fall 2023
This introductory course in political theory will be devoted to exploring what may well be the highest political theme: the requirements of great political rule. What must we do in order to govern well? Even more important, what must we know? With these and related questions in mind, you will be asked to read, reflect on, and write carefully about a handful of foundational texts that all deal, in very different ways, with the question of the requirements of great political leadership.

**Shifting Forms: Political Belonging in Song and Film**
**Laurence, Jonathan**
**Fall 2023**
Who is the we in a national hymn or a protest song? Times change, wills triumph, and imagined communities evolve. How do the arts specifically, song and film help define the "public" in a Republic? Likewise, how do the arts mediate the relation between individuals and minority communities, and the relation between those minority communities and the larger social world in which they take shape? Can examining artists specifically, writers and filmmakers and their relation to inherited aesthetic forms help one understand some of the complex negotiations (of feeling, of political conviction, of a sense of belonging) between individuals and larger-scale groupings? What if, for example, our sexualities are not simply confirmed or disparaged by aesthetic representations; what if they are also formed and determined by them? Tracing, on the one hand, the evolution of audio and visual representations of citizenship, political participation and the nation-state since the late 19th century, and, on the other, the film and literature of minority sexual cultures in the United States and Europe in roughly the same period, we will consider who and what makes it into national narratives and national identity in Europe and the United States, and some of the different relations between minority sexual cultures and mainstream and avant-garde practices of literature and film. Examining the relation between aesthetic forms and, on the one hand, changing political institutions, and, on the other, political and sexual identity and affiliation, the courses will lead participants to consider how political institutions and political culture are constantly reshaping one another, reflecting the shifting subjects of our political systems, and how literary texts and films shape the lives of those who read them.

POLI104201
Introduction to Modern Politics
DiPasquale, David M
Fall 2023
For majors only. Restricted to freshmen and sophomores only. This course examines the politics and government of modern states, identifying what is distinctively modern (e.g., representative government, political parties), including in the survey both democratic and non-democratic nations. We will consider the nation-state itself—the most typical modern political arrangement—as well as efforts to "transcend" the nation (e.g., the European Union, the United Nations). We will examine the kinds of public policies that modern states adapt, and consider their consequences. Although this is not a class in international politics, some attention will be paid to the relations among modern states, including war and its causes.

POLI108101
Introduction to International Politics
Crawford, Timothy W
Fall 2023
Course restricted to political science majors only. This course may NOT be taken by any International Studies majors or minors. Class restricted to political science freshmen and sophomores. This course examines the principle sources of the behavior of countries in international politics, including the nature of the international system and the decision-making process within states. It examines such issues as the sources of power, the causes and implications of the security dilemma, the dynamics of alliances, the causes of war, international political economy, and the dilemmas of world order. This course is strongly recommended for students who plan to take upper level international politics courses.

**Introduction to Comparative Politics**
**McGraw, Sean D**
**Fall 2023**
This course is open to majors and non-majors. This course is class restricted to freshmen and sophomores. This course provides an overview of the political science subfield of Comparative Politics. Comparative Politics is the study of domestic politics among the 200 plus countries around the world. The class introduces students to three features of Comparative Politics: (1) comparative research design and the comparative method; (2) major theoretical themes in comparative politics; and (3) sampling of case studies comparing politics in selected countries of the world.

The Politics of the Seventies Film
Kirshner, Jonathan D
Fall 2023
Class restricted to sophomores, juniors, and seniors. Enrolled students are expected to attend a weekly viewing of a film - please register for section .02 of the course for the weekly film ("discussion section"). The 10 years from 1967 to 1976 were an extraordinary time both in the history of American politics and in the history of American film. In the same period that the country was rocked by the Vietnam War, the feminist and civil rights movements, Watergate and economic crisis, the end of Hollywood censorship along with demographic and economic change in the industry ushered in what many call "the last golden age" of American film. In this class we study both film theory and political history to examine these remarkable films and the political context in which they were forged. The goal of the course is to take seriously both the films and their politics.

POLI124401  
**African Politics**  
Woldegebriel, Mesfin  
**Fall 2023**  
The course on African politics is designed to introduce the study of contemporary African politics and government. It addresses some critical stages in African politics, including the legacies of colonial rule, reasons for state weakness in post-independence, and the causes of political violence in several countries. It investigates reasons for political reform, democratic consolidation, and peace development. It examines the failures and successes of African countries in achieving sustainable economic development and the influence of international forces in African politics. It surveys social and political factors such as nationalism, ideology, identity politics, and state and non-state actors in African politics.

The question of virtue lies at the heart of every civilization. So does the question of gender. Historically, some virtues, such as bodily strength, courage in battle, self-control, rational intellect, and leadership, have been considered masculine and superior to other virtues considered feminine, such as modesty, industry, frugality, nurturing, and obedience. Is this correlation of virtues and gender natural, rooted in biological sex; or is it socially constructed? Did it ever have any redeeming aspects, or was it always unjust and oppressive? How does the modern ideal of gender equality affect our understanding of the virtues? These questions will be addressed through a wide range of readings, films, and open-minded class discussion.

POLI230901
The U.S. Congress
Hopkins, David A
Fall 2023

Americans are habitually fierce critics of Congress even as they like (and usually reelect) their own representatives. In this course, we try to explain this paradox by investigating the ways in which the structure and organization of Congress allows members to cultivate personal popularity despite rampant disapproval of the institution in which they serve. Among other topics, the course addresses the nomination and election of congressional candidates, the roles of congressional parties and leaders, and the influence over the legislative process of the committee system, rules and procedures, lobbyists and interest groups, and other branches of government.

The American Presidency
Landy, Marc
Fall 2023
This course analyzes the contemporary presidency with special attention to its constitutional underpinnings and its political evolution. It traces the critical changes and continuities in presidential politics, institutional development, court rulings and statesmanship that have taken place over time. Its focus is presidential leadership and therefore it dwells on the most significant occasions during which great presidential leadership has been exercised and on the men who exercised it. We will pay close attention to current developments.

Religion-State Relations in the Modern Middle East
Alshamary, Marsin
Fall 2023
This course examines the evolving relationship between religious institutions and state institutions in the modern Middle East, from colonialism to the contemporary era. What role did clerics play in the creation of the modern state? How is religion incorporated in the constitution? What tensions exist between political elites and religious elites? When do religious and political elite cooperate and when are they in conflict? The course will also examine the development and varied performance of Islamist parties across the region.

**POLI241201**  
**Political Parties, Voters and Party Systems in Comparative Perspective**  
**Marcresse, Thibaud**  
**Fall 2023**

Do not take this course if you have taken POLI 2412 Political Institutions in the Age of Populism: Parties, Voters, and Elections. This course offers an overview of political institutions such as political parties and elections as democracies face a populist challenge in areas as diverse as Western Europe, Latin America, and Asia. After reviewing the theoretical and historical foundations for party politics and party systems, the course will examine the ways in which political parties reach out to voters in countries with different institutional legacies, in industrialized countries as well as in post-colonial democracies in the Global South, whether through programmatic platforms or political quid pro quos (such as vote buying and patronage). The course will also explore the rise of contemporary populist politics and how this brand of politics challenges traditional party-voter linkages and contributes to the erosion of democratic norms.

POLI242201
Comparative Social Movements
Christensen, Paul T
Fall 2023
This course examines the theoretical and empirical literature on social movements in order to understand their genesis, evolution, and successes and failures. We will start by exploring the international theoretical literature on social movements, in order to identify commonalities and differences in the experiences of social movements in a wide array of locations and historical moments. The course will then turn to a more detailed empirical study of a number of social movements, some international, some national, some regional, and some local, including labor movements, indigenous movements, women's movements, movements based on liberation theology, and national liberation/terrorist movements.

Why do people migrate? How do host states and societies react to an increasingly multicultural and diverse foreign population? What impacts the political, economic and socio-cultural incorporation of Europe's immigrants? This course explores the central debates in immigration studies through a survey of contemporary Western Europe, with cases comprising immigrant populations in both traditional immigrant receivers (e.g., Moroccans in France or Turks in Germany) and "new" immigration countries (e.g. Africans and Latin Americans in Spain or Poles and Nigerians in Ireland). Middle Eastern refugees in Europe will be discussed throughout the semester. Particular emphasis is placed on how the relationship between the immigrant and the receiving state transforms both.

POLI250001
International Politics and Morality
O'Rourke, Lindsey A
Fall 2023
This course is open to graduate students by permission. What determines the conduct of states toward each other in matters of war and peace? To what extent are states moved by considerations of justice, of international norms, and national honor? To what extent are they moved by considerations of national interest understood either as national security, economic advantage, accumulation of power, or glory? And what should determine the conduct of states? This course will address these questions by examining contemporary literature in international politics as well as selections from the classics of political theory and political history. This course fulfills the international politics subfield requirement; this course will meet with POLI2600.

POLI250601
UN and International Security
Crawford, Timothy W
Fall 2023
The course begins with the League of Nations and the origins of the UN and its key structures. Then we examine the UN's role in collective security, arms control and disarmament, and peacekeeping as these activities were practiced during the Cold War and as they have evolved in recent years. We then turn to UN activities that go beyond treating the symptoms of conflict and aim instead to fight its root causes, such as racism and human rights violations. Finally, we close with an exploration of the meaning of UN legitimacy and the future prospects of the Security Council.

POLI252501
Politics and Institutions of International Economics
Deese, David A
Fall 2023
Examines the contending theoretical approaches to the politics of international economic relations through the issue of globalization. Emphasizing the period since World War II, it analyzes the primary political questions and international institutions associated with trade, money and finance, multinational corporations, and development. It concludes with the perennial challenge of leadership and change in international political economy.

POLI254101
Global Governance
Erickson, Jennifer L
Fall 2023
How do states and other actors in the international community manage global challenges? What are the sources of order in international politics? In the absence of world government, questions about how international rules are made, monitored, and enforced are important and widespread. This course provides an overview of the concept and theories of global governance, with a focus on power, institutions, and norms in contemporary international relations. It then examines the processes, actors, and outcomes of global governance in the context of policy areas such as human rights, fragile states, the global economy, and the environment.

POLI254901
United States Foreign Policy 1945 to Present
O’Rourke, Lindsey A
Fall 2023
This course examines the formulation, execution, and consequences of U.S. foreign policy since 1945. What were the underlying patterns and logics guiding U.S. leaders? How did changes in the structure of the international system influence U.S. foreign policy? What caused America’s foreign interventions and wars? Topics covered include: the origins of the Cold War; the development of the post-WWII economic order; the consequences of America’s position in the Western Hemisphere; the strategies of rollback and containment; the evolution of U.S. nuclear doctrine; U.S. interventions in Korea, Iran, Guatemala, Vietnam, the Persian Gulf, Iraq, and Afghanistan; the collapse of the Soviet Union and rise of American unipolarity; as well as the Bush and Obama Doctrines.

**Enlightenment Political Theory**

Hanley, Ryan P

**Fall 2023**

What is 'enlightenment' and what implications does it have for politics? This course will examine several authors both ancient and modern with a focus on their visions of the process by which a human being comes to be enlightened, and how this process ultimately shapes their political activity. Readings to include selections from Plato, the Bible, Augustine, Descartes, Rousseau, Kant and Tocqueville.

**Credits:** 3

This course will study Thucydides' War of the Peloponnesians and Athenians in its entirety. According to Thucydides, the great clash between Sparta and Athens revealed something important about human nature. Our principal task will be to understand his complex account of human beings as they come to sight in warfare, in both speech and deed.

Ambition is the lifeblood of political life. High ambition in particular -- the longing to have great power, to do great deeds, to acquire great honor and even immortal fame -- drives the most interesting political men, from the finest democratic statesmen to the worst ideological tyrants. But, as this suggests, political ambition is a complicated and ambiguous phenomenon. Is it, especially in its love of glory, a mark of greatness of soul or supremely selfish? How does the belief that one knows what should be done, or that one is most fit to rule (and therefore deserves to rule), fit with democratic equality? How does it lead one person to the greatest political actions and another to the most terrible? This course will seek to understand the phenomenon through reading (or viewing) and discussion of works of political philosophy, fiction, and memoir. Among the authors we are likely to read are Plato, Shakespeare, Lincoln, Douglass, Koestler, and Penn Warren.

**POLI261501**  
**Islam and Liberal Democracy**  
**DiPasquale, David M**  
**Fall 2023**  
We will take advantage of current geopolitical controversies in order to unearth the theoretical core of the debate between Islam and the West. Materials related to the Islamic heritage will be placed next to arguments made on behalf of the West in relation to certain key issues, such as rights versus duties; religion and freedom; and democracy and progress. Modern, pre-modern, sacred, and secular texts will be studied. How can the secular world defend itself against a critique that begins from a position of faith and emphasizes virtue, God, and justice?

**POLI340601**  
**Irish Politics 1916 to Present**  
**McGraw, Sean D**  
**Fall 2023**  
Class restricted to sophomores, juniors, and seniors. Ireland, a country rich in history, has undergone dramatic changes in the twentieth century beginning with its fight for independence and culminating in its meteoric rise during the Celtic Tiger years. What explains Ireland's distinctive political trajectory and how does it compare to other European nations? How should we understand the Celtic Tiger, the rapid series of social, economic and political transformations that have occurred within Ireland since the 1990s? This course explores these questions by studying the political actors and institutional settings of Irish politics, the nature of political influence and the shaping of political priorities, and the forces that shape policy outcomes. It will address such critical issues as the legacies of colonialism and civil war, nationalism, democratization, the relationship between the Church and State, the Northern Ireland Troubles and the European Union. While the course focuses on the Republic of Ireland, it will adopt a broad comparative perspective, situating the country both within the wider global context and within the political science literature.

**Credits:** 3  
**Room and Schedule:** Campion Hall 300 TuTh 09:00AM-10:15AM
POLI350501
The Future of War
Erickson, Jennifer L
Fall 2023
This course is class-restricted to juniors and seniors. What is the future of war? This question has persistently occupied scholars, policymakers, and military analysts. Yet, as new technologies emerge, politics shift, and security threats expand, it takes on increasing relevance and urgency in contemporary international politics. This course will explore historical and contemporary questions about the future of war related to why states fight wars, how they fight wars, and how they seek to regulate the conduct of war in light of new technologies.

International Law
Nakazato, Hiroshi
Fall 2023
This course examines the role of international public law (the "law of nations") in the world today. It takes as its starting point the academic (and practical) debate about the utility of international law in world politics. From there, we consider the philosophical foundations of law, the sources of international law, and the application of international law in different arenas. In particular, the course will focus on how international law deals with a number of issues, including the connection between domestic and international law and the laws on territory, jurisdiction, human rights, and security, as well as other relevant topics.

POLI352701
Terrorism, Insurgency, and Political Violence
Krause, Peter J
Fall 2023
Terrorism, insurgency, and political violence are unfortunately all around us. Whether its the targeting of elected officials in the U.S. or the killing of civilians in Israel, the West Bank, and Gaza, or mass bombings amidst civil wars in Syria, Somalia, and Yemen, violence by and against non-state actors is the most common form of conflict in the 21st century. Are terrorism and political violence inventions from the modern era, or do they have a deeper past? What drives an individual to join an armed group? Why do some groups choose to employ violence, while others do not? Are terrorism and insurgency effective political tactics? Just how significant is the threat of terrorism to you and to others around the world? This course will address these and other questions, while introducing students to relevant analytical frameworks, theories, and cases concerning terrorism, insurgency, and related forms of political violence. In addition to its topical focus, this course could rightly be called a methods course. Students in the class will learn how to improve their analytical thinking, conduct high quality research, and present an effective argument, both orally and in writing. They will learn the potential and pitfalls of theories of political violence through constant analysis and engagement with the history of terrorism and insurgency. By the conclusion of the course, students will emerge not only with a far richer understanding of these issues, but also as more sophisticated consumers, analysts, and producers of knowledge.

POLI449701
The Politics of Contemporary India: Democracy and Identity
Marcesse, Thibaud
Fall 2023
Student must have previously taken POLI1091 Introduction to Comparative Politics or a Comparative Politics course. This course is class-restricted to sophomores, juniors, seniors, and graduate students. This course examines the challenges and opportunities of democracy in post-Independence India. How does democracy persist in a society divided along multiple ethnic, religious, and regional cleavages? While India's 1950 constitution made the country officially secular, the rise of majoritarian politics in recent years represents a significant challenge to established norms and institutions. It also comes in the wake of a democratic deepening, with the rise of new parties and a push towards decentralization. To what extent does Hindu nationalism respond to voter demands and ideological preferences? What does the evolution of Indian politics tell us about broader trends in the Global South and beyond?

POLI459301
International Relations of the Middle East
Krause, Peter J
Fall 2023
This course is class-restricted to juniors, seniors, and graduate students. Media coverage of the Middle East increases by the day, but in-depth knowledge of the region and its politics remain in short supply. Why has the Middle East seemingly experienced so much conflict? How do ethnic and religious identities, domestic politics, and the balance of power between nations help explain state behavior in the region? What explains variation in the political situation of Middle Eastern states since the beginning of the Arab Spring? This course will address the international relations of the Middle East from World War I to today, with a focus on recent events involving the civil wars in Syria and Yemen, the Israeli-Palestinian conflict, and the ongoing pullback of the United States from the region. In addition to its topical focus, this course could rightly be called a methods course. Students in the class will learn how to improve their analytical thinking, conduct high quality research, and present an effective argument, both orally and in writing. They will learn the potential and pitfalls of theories of international relations through constant analysis and engagement with the modern history of the Middle East. By the conclusion of the course, students will emerge not only with a far richer understanding of the region and its politics, but also as more sophisticated consumers, analysts, and producers of knowledge.

**Honors Seminar**  
**Kirshner, Jonathan D**  
**Fall 2023**
This course is restricted to Political Science Honors Program seniors first and any remaining seats are open to Political Science Honors Program juniors. This course is by permission only. Thucydides for Today: Over the course of this semester we will read and study with close attention Thucydides great work, The Peloponnesian War. Despite having been written almost 2,500 years ago, Thucydides had much to say about politics, democracy, revolution and war that remain remarkably relevant to this day. Some popular commentators refer to a "Thucydides Trap" in describing contemporary relations between the U.S. and China--but we will do much better than that, exploring continuity (and change) across what Thucydides identified as the timeless wellsprings of human behavior -- honor, interest and fear -- in order to enhance our understanding of contemporary politics.

POLI723201
Quantitative Methods in Political Science
Hopkins, David A
Fall 2023
POLI7232 is a non-subfield graduate course; this course will fulfill an elective course in your political science graduate degree program. This course provides an introduction to quantitative methods commonly employed in the social sciences to make descriptive and causal inferences, with a particular focus on the general linear model used in bivariate and multivariate regression analyses. It requires no previous statistical experience and emphasizes practical applications of the concepts introduced. Students will have the opportunity to conduct an original quantitative analysis to address an empirical research question of their choice.

POLI772701
American Political Development I
Landy, Marc
Fall 2023
This seminar looks at the course of American history from the Federalist period of the 1790's through the end of the nineteenth century for the purpose of understanding subsequent American politics. Its axiom is that contemporary politics cannot be adequately understood without understanding its philosophical and historical underpinnings nor without examining the critical political conflicts and institutional developments that have occurred. Readings consist of original documents and secondary works by historians and political scientists.

POLI780801
Comparative Regime Change
Easter, Gerald M
Fall 2023
The course investigates the wave of collapsed dictatorships in the late twentieth and early
twenty-first centuries. While some regime changes are relatively peaceful, many are violent as
protest politics from below confronts official coercion from above. The class is especially
interested in cases where coercion was tried and failed to keep an authoritarian regime in
power. The course also examines subsequent efforts to build new democratic regimes, which in
some places succeeded, but in other places led to new forms of authoritarianism. Case studies
are drawn from around the world, with a particular focus on the Communist experience.

Political Sciences Courses: Spring 2024

POLI103401
Making the Modern Mind: Morality
Hanley, Ryan P
Spring 2024
This is an Enduring Question course and is open to FRESHMEN only. The seventeenth century and the scientific revolution with which it is famously associated has long been reputed as the birth of modernity: a new way of thinking about human beings and our place in the world. But for all its innovativeness, the seventeenth century yet found itself compelled to grapple with a host of long-standing (indeed ancient) moral questions, including, among others, the nature of the human being, the nature of the sovereign good, and the relationship of method to morality.

This course will examine the answers to these and other central moral questions given by three key contributors to the seventeenth-century scientific and mathematical revolution: Descartes, Pascal, and Leibniz. Focusing especially on Descartes's Discourse on the Method and his Meditations, Pascal's Penses, and Leibniz's metaphysical and moral writings, the course will survey the ways these pioneering thinkers treated such topics as love, faith, virtue, grace, justice, and happiness. Also, as a BC Enduring Questions course, this course is paired with MATH 1702, which will cover the mathematical writings and concepts of Descartes and Pascal and Leibniz (among others). Our hope is that by taking the two courses simultaneously, students will have an opportunity to think through the ways in which the mathematical and scientific developments of the seventeenth century are related to its philosophical and religious concepts, as well as the ways in which these developments and concepts continue to shape our thought today.

POLI104201
Introduction to Modern Politics
Behnegar, Alice P
Spring 2024
For majors only. Restricted to freshmen and sophomores only. This course examines the politics and government of modern states, identifying what is distinctively modern (e.g., representative government, political parties), including in the survey both democratic and non-democratic nations. We will consider the nation-state itself—the most typical modern political arrangement—as well as efforts to "transcend" the nation (e.g., the European Union, the United Nations). We will examine the kinds of public policies that modern states adapt, and consider their consequences. Although this is not a class in international politics, some attention will be paid to the relations among modern states, including war and its causes.

Introduction to American Politics
Landy, Marc
Spring 2024
For majors and non-majors. An overview of contemporary American government and politics focusing on how the institutions envisioned by the Framers of the Constitution (Congress, the judiciary, the executive) function today. Particular emphasis will be placed on how developments since the 1960s have affected the interaction of national, state, and local governmental actors, political participation, the articulation of interests, and policy formulation and implementation. Topics covered will include the media, public interest and advocacy organizations, campaign technologies and consultants, and public policy research institutes (think tanks). Whenever possible, comparisons between the U.S. and other advanced industrial democracies will be explored.

Introduction to International Politics
Ross, Robert S
Spring 2024
Course restricted to political science majors only. This course may NOT be taken by any International Studies majors or minors. Class restricted to political science freshmen and sophomores. This course examines the principle sources of the behavior of countries in international politics, including the nature of the international system and the decision-making process within states. It examines such issues as the sources of power, the causes and implications of the security dilemma, the dynamics of alliances, the causes of war, international political economy, and the dilemmas of world order. This course is strongly recommended for students who plan to take upper level international politics courses.

POLI122801
The Dynamics of West African Politics
Ngimbous, Jacques M
Spring 2024
What are the causes behind the military coups that took place in four West African countries within the past three years? Why have elections not been successful in granting legitimacy to several Sahelian nations? Is there a correlation between institutional weaknesses, trends in collective identities, and strategies used by interest groups that have triggered political violence? This course aims to analyze and propose plausible answers to these questions. The purpose is to provide a framework that could assist in comprehending the political sociology of Francophone West Africa and aid in the pursuit of stable states. This main focus is on the domestic politics of Francophone countries in West Africa from a comparative perspective. Various topics that will be examined include: 'ethnic violence', 'political crises', 'spiritual insecurity', 'hybrid political esotericism', 'military coups', 'contested elections' and 'endemic corruption'--all of which are prominent issues within the West African political sphere. International actors, factors, organizations, and parameters are considered only insofar as they are relevant to local politics and are crucial for the understanding of the primary political dynamics of West Africa.

POLI125501
Identity, Culture, and Conflict Resolution Practices in Africa
Woldegebriel, Mesfin
Spring 2024
The course introduces conflict resolution practices in Africa. It examines the causes of conflicts, the types of disputes, the political economy, the actors, and their relationships to identity and cultural differences. It explores conceptions of identity and cultural differences in Africa, traditional approaches to conflict resolution and modern peace management and resolution techniques, transitional justice, and post-conflict reconstruction. It examines several theories of peace and conflict and case studies from all regions of Africa to develop original insights for the students. Ultimately, students not only understand the causes of conflict and conflict resolution approaches in Africa are not homogenous to all countries but should also explain the conflicts in their way.

POLI126501
Africa in International Politics
Woldegebriel, Mesfin
Spring 2024
This course is an introduction to the international relations of post-colonial Africa. It includes the global politics of pre-colonial Africa, the dynamics of colonialism, and the international relations of de-colonization as background topics. Moreover, the course will examine the politics of post-independence international alignments, the external causes and effects of authoritarian rule, and Africa's role in the global political economy. It concludes by reviewing pressing issues, such as state failure, the "war on terror", China's growing economic and political footprint, and African multilateralism. Students will understand the patterns of international relations in post-colonial Africa and explain and critically weigh available evidence using a range of theories to build their original insights.

POLI127301
Americans, Ugly & Beautiful
Bayles, Martha
Spring 2024
This course is major restricted and class restricted to juniors and seniors; graduate students are welcomed. This course is not about "hard power," meaning coercive military or economic action. Instead, it is about "soft power," meaning attraction, persuasion, the power of example. Despite today's decline, America's image and influence still permeate the world, conveyed through every media platform and taking such different forms as news reports, entertainment, face-to-face interactions, and "public diplomacy" (government efforts to cultivate goodwill among overseas populations). How did these different modes of communication work in the past? How should they work today? What messages should the people of the United States be sending to the 95 percent of humanity who are not American? What messages are we in fact sending? These questions will be explored historically, thematically, and by region.

POLI230501
American Federalism
Landy, Marc
Spring 2024
This course will examine the constitutional foundation, the historical development, and the contemporary character of American Federalism. It will explore the tension between centralization and decentralization as that tension has influenced the course of American politics, government, and contemporary policy debate. Local government is a crucial element of the intergovernmental system and therefore the course encompasses it. In recent years, city government emerged as the most creative and effective aspect of American government, the course explores how and why this has occurred. It examines a variety of aspects of contemporary urban policy innovation as well as the development of city politics.

POLI233401
Political Behavior and Participation
Hopkins, David A
Spring 2024
How do citizens form opinions about politics, and how do these attitudes influence their participation in political life? This course addresses these questions by surveying the most prominent sources of influence on the political orientations of individuals, including personality effects, socialization, interpersonal dynamics, cognitive biases, and the news media. We then apply these findings to the most common forms of political behavior, including party affiliation, electoral participation, activism, and protest, aiming to explain why different citizens support different political candidates and causes—as well as why some members of the public engage extensively in political activity while others remain uninvolved.

American Political Thought I
Hale, Dennis B
Spring 2024
American Political Thought I (colonial period through the Civil War) will begin by examining the "ancient constitution" that English colonists brought with them to the New World, as well as the important new ideas about rights that would form the core of American political experience. We will look also at the very significant religious ideas and practices that shaped colonial life, and how those ideas influenced political thought. We will then examine, in turn, the Revolution; the creation of new constitutions; the debate over the Federal Constitution of 1788, and the difficulties that led to the demand for a new constitution; the formation of the new national government; the beginnings of the party system; conflicts over the powers of the President, courts, and legislature; and the growing conflict over slavery, federalism, and secession. We will end the semester with a study of Abraham Lincoln's contribution to what has been called a "refounding" of the American polity.

American Political Thought II
Kersch, Kenneth I
Spring 2024
Class restricted to sophomores, juniors, and seniors. This course surveys the history of American political thought since the Civil War, with an emphasis on both recurring themes (such as liberal individualism and religiosity) and resurgent conflicts (such as over the scope of government power, and the meaning of democracy and political equality). Topics include Populism, Progressivism, feminism, Social Darwinism, the Social Gospel, New Deal/Great Society liberalism, civil rights, the Beat Generation, Black Power, the student revolts of the 1960s, the sexual revolution of the 1970s, and the 1980s conservative ascendancy.

POLI240401
Populism and the Rise of Anti-Democracy
FitzGibbon, John E
Spring 2024
This course explores the emergence of Populist political movements around the globe and the increased challenge to democracy more generally. While the late 20th century was characterized by the triumph of democracy over alternative forms of government, democracy is facing both new and old challenges around the world. The course investigates the nature of these challenges, what are they, who leads them, and most critically why are they emerging now? Together we will seek to answer these questions so that we can better understand what is happening around the world with politics right now.

POLI240501
Comparative Politics of the Middle East
Bailey, Kathleen T
Spring 2024
The course explores origins of Muslim majority societies and political systems in the Middle East. It covers the formative era of Islamic civilization, and traces the diffusion of the Middle Eastern Islamic paradigm, culminating in the Ottoman system, and explores the social and political disruptions caused by the breakup of Muslim empires and establishment of European economic, political and cultural domination. It addresses how these forces led to the creation of national states and changes in class structure, and explores how the failure of Western forms of modernization and political organization led to demands for the formation of new political communities based on the revival of Islamic principles. Discussions will center Islam's compatibility with liberalism, secularization, modernity, democracy, and terrorism. Recent developments surrounding the "Arab Spring" and its aftermath will be explored. The course includes a crisis simulation exercise.

POLI240701
Introduction to South Asian Politics
Marcesse, Thibaud
Spring 2024
Student must have previously taken POLI1091 Introduction to Comparative Politics or a Comparative Politics course. South Asia is not just home to the world's fastest growing economy (India), it is also a region that continues to face significant security and development challenges, with some of the longest running interstate conflicts (between India and Pakistan for instance), and severe poverty and inequality across countries such as India, Pakistan, Bangladesh, or Sri Lanka. What accounts for the variation in security and development outcomes across and within these countries? Why are some of them better able to ensure peace and security and basic service delivery than others? This course proposes an overview of the politics of South Asia as a regional security complex, starting with the colonial legacies of state building in the region, but also looking at the impact of economic reforms and the changing international environment since the end of the Cold War and the rise of India and China as a global powers.

Revolution, Nationalism, and State Building in the Middle East
Alshamary, Marsin
Spring 2024
Is the Middle East composed of artificial countries? In this course, we will examine the process of state formation in the Middle East. How were national identities cultivated and promoted in ethnically and religiously diverse communities? What rhetoric did revolutionaries use and how did that rhetoric shape state identity? And, looking forward, how has citizenship and belonging been defined by a new wave of revolutions that has swept the region, from the Arab Spring and onwards?

POLI244001
A Continent on the Move: Immigration in Contemporary Europe
Molles, Elitsa V
Spring 2024
Why do people migrate? How do host states and societies react to an increasingly multicultural and diverse foreign population? What impacts the political, economic and socio-cultural incorporation of Europe's immigrants? This course explores the central debates in immigration studies through a survey of contemporary Western Europe, with cases comprising immigrant populations in both traditional immigrant receivers (e.g., Moroccans in France or Turks in Germany) and "new" immigration countries (e.g. Africans and Latin Americans in Spain or Poles and Nigerians in Ireland). Middle Eastern refugees in Europe will be discussed throughout the semester. Particular emphasis is placed on how the relationship between the immigrant and the receiving state transforms both.

POLI245301
Europe and the Muslim World
Laurence, Jonathan
Spring 2024
Colonies, migrations, wars, world cups and terrorism... For over two centuries, the republics, kingdoms and empires of Europe have had a complex and occasionally tormented relationship with Islam and the Muslim world. The exchange of ideas, politics and populations has transformed all parties involved. At times serving as a beacon of freedom and enlightenment, at other times Europe's relationship with its citizens of Muslim origin and its Mediterranean neighbors has been fraught with tensions. This course will examine these relationships through political science and history texts and with the aid of films and novels.

POLI250701  
American Grand Strategy  
Byun, Hyung-Joon  
Spring 2024
This course examines grand strategy—a states theory of how to employ the military instrument to maximize national security—in the context of American diplomatic history. The first part of the course assesses how International Relations (IR) theory informs modern discussions of grand strategy, fleshing out the theoretical underpinnings of ideal-type grand strategies like restraint or deep engagement featured in today's U.S. foreign policy debate. In the second part of the course, we delve into key events in the evolution of American grand strategy since the late 19th century, when the United States began to emerge on the world stage as a great power. We will learn why an extraordinarily powerful state—despite facing no plausible rival in its neighborhood and being geographically insulated from faraway competitors—decided to directly involve its military might in the security affairs of distant regions at several historical junctures. Finally, we will circle back to core issues in today's grand strategy debate. Attention will be paid to the relationship between contrasting grand strategic visions and key issues in post-Cold War U.S. foreign policy, such as NATO's eastward expansion, the wars in Afghanistan and Iraq, and the rise of China.

POLI250801
Cold Wars, Old and New
Byun, Hyung-Joon
Spring 2024
This course investigates how International Relations (IR) theory can illuminate key episodes in the great power politics of the Cold War period, paying close attention to how lessons from this period can inform contemporary debates on the return of great power politics and U.S. foreign policy. Why did hopes for a spheres of influence peace between the two superpowers after World War II come to naught? Why did the United States end up on a collision course with communist China during the early Cold War despite initial interest on both sides for cordial relations? What accounts for the failure of U.S.-led plans to build an integrated European army as a counterweight to Soviet power during the early 1950s? And why did the United States and the Soviet Union continue to engage in costly military competition after the early 1960s despite the emergence of strategic stability? We will analyze these and other important questions through the lens of IR theory, distilling lessons in each session for 21st-century great-power relations. The problems implicated in today’s great-power politics are very difficult, but we can get a handle on them by appreciating how they are not entirely new—people and governments had to tackle similar problems in a relatively recent past.

The Causes of War  
Crawford, Timothy W  
Spring 2024
This course is class-restricted to juniors and seniors. In the first two-thirds of the course we will survey the major strands of theory concerning the causes of war and apply them to the First World War—a monumental human disaster for Europe and a pivotal event in world politics, therefore making it a very important case. The last one-third of the class will focus on contemporary problems of war and peace (e.g., civil wars, ethnic conflict, proliferation of weapons of mass destruction, and terrorism) using theoretical approaches introduced earlier as well as new ones.

**Politics of Energy and Climate in the U.S. and International Perspective**  
Deese, David A  
**Spring 2024**  
Why is energy and climate policy fundamentally political, deeply entwined with human, national, and international security, and critical to global stability and well-being? Major course units assess the main actors and institutions in energy; including OPEC and international markets; contrast the primary challenges confronting energy policy in the exporting and importing states; evaluate the implications of climate disruption and the solutions across the sixty largest greenhouse gas emitting states; and analyze how energy and climate politics shapes global security and sustainability. Class members will also conduct a global climate negotiation and study in depth the regional security and political economy of the (Persian) Gulf states.

The World Wars: Causes, Conduct, and Unintended Consequences
O'Rourke, Lindsey A
Spring 2024
This course examines the origins, military conduct, and societal consequences of World War I and World War II. We will look at each war from the perspective of state leaders designing their state's military strategy and the soldiers fighting for them. What caused the outbreak of each war? What was each state's military strategy and how did it interact with the strategies of other states? Why were so many soldiers willing to risk their lives and kill others on an unprecedented scale of destructiveness? Topics covered include: the social, political, and technological developments necessary to fight wars of this scale; domestic, accidental and interstate explanations for WWI; the military strategies of the major combatants in both wars; the Versailles Treaty and Post-WWI order; individual, economic, and interstate explanations for WWII; the European and Pacific theaters; German mass killings; and Japan's surrender.

POLI255001
Nuclear Weapons and International Relations
O'Rourke, Lindsey A
Spring 2024
How have nuclear weapons influenced international relations (IR)? This course is divided into two main sections. The first section analyzes competing IR theories regarding the strategic utility of nuclear weapons and the causes of proliferation: Under what conditions will nuclear weapons act as an effective deterrent? Can nuclear weapons be used to coerce or blackmail other states? Does nuclear acquisition embolden states to pursue more aggressive foreign policies? How and why do states acquire nuclear weapons? The second portion of the course focuses on various current issues relating to nuclear weapons, including strategic missile defense, nuclear terrorism, global zero, and the Iranian nuclear deal.

POLI261401
Politics and Education
Shell, Susan
Spring 2024
What is an appropriate education for free citizens? That question has become newly controversial at a time when many formally shared assumptions, both political and moral, are in disarray. Is common public education of some sort wise, or necessary? And if so, what sort? Is it even possible under present political conditions? Is leaving education largely to the individual states sufficient to support constructive civic disagreement? Alternatively, if future citizens are to be educated largely home (or privately) what sort of limits, if any, should be placed on parents? Where does religious liberty end and moral intolerance begin? Above all, is all good education necessarily indoctrination of some kind, as a Florida official recently implied? Or are civic education and liberal education dedicated to the search for truth mutually compatible? We will take up such questions this semester through a critical investigation of two seminal philosophic texts on education: John Locke's Some Thoughts Concerning Education, and Jean Jacques Rousseau's Emile, along with some supplementary philosophical and topical writings.

**Status:** Offered
This course is class-restricted to sophomores, juniors, and seniors. This course will introduce undergraduates to some of the main philosophical debates that emerged within the Jewish and Christian communities from approximately the twelfth to the fourteenth centuries. Since these debates were often the result of an attempt to introduce a more heretical reading of Aristotle's natural science into communities that were largely defined by appeals to divine law or ecclesiastical power, the political conditions within which such debates took place will also be considered. Given ongoing concerns regarding social media cancel culture and deplatforming, the class will also address the origins of book burning and philosophical persecution in medieval times. Questions like (but not limited to) the following will be emphasized: what is the status of philosophy in a religious community; who is a prophet; how might a Divine Law both frustrate and promote philosophical speculation; and why would a philosopher defend the teaching of pagan Greek texts in a time of monotheism? The books will include Maimonides' Guide of the Perplexed, Gersonides' The Wars of the Lord, Albo's Book of Roots, Roger Bacon's Opus Maius, Dante's On Monarchy, and Marsilius of Padua's The Defender of the Peace. No prior acquaintance with classical or medieval philosophy is necessary or required.

**POLI263701**

**Introduction to Islamic Law**

DiPasquale, David M

**Spring 2024**
This course is class-restricted to sophomores, juniors, and seniors. Despite the fact that Islam is the fastest growing religion and will likely surpass Christianity as the world's largest before this century's end, its singularly important legal structure remains for the most part unknown in the West. Since the secular separation of Church and State does not apply in many majority-Muslim countries, religious law is at the same time a basis of state law and thus of enormous political importance. What is the status of law in Islam? Why is Shariah Law being viewed increasingly as a necessary addition to (or postcolonial corrective of) Western forms of justice? The course will address these questions from both theoretical and practical points of view by moving throughout the semester between the classic religious and legal texts from the Middle Ages to more modern and contemporary material meant to reflect the great diversity and vibrancy of today's Muslim world. Organized like a first-year course in an Islamic Legal Studies Program, a variety of pedagogical techniques (like in-class Sharia Court debates) will be adopted to heighten the relevance of core themes within the Sunni Islamic tradition. Questions related to the status of women, statecraft and warfare, the role of modern technology, and the application of traditional penalties for apostasy, theft, and wine drinking will be addressed. Also offered are case studies from majority-Muslim countries like Pakistan, Saudi Arabia, and Iran. Primary sacred and legal sources will be assigned along with modern and contemporary studies by Schacht, Coulson, Hallaq, Rabb, and El Shamsy. No prior acquaintance with Islam or the Arabic language is necessary or required.

This seminar will examine the historical and contemporary dynamics of the candidate nomination process in the United States, focusing in particular on the practice of nominating presidential candidates. We will trace the evolution of nomination procedures from the founding of the nation to the present, considering the motivations for, and effects of, several key reforms that fundamentally transformed the practice of choosing presidential nominees. We will then proceed to evaluate the potential implications of further reform of the nomination system in the future. The occurrence of the 2024 presidential primaries over the course of the semester will allow us to apply our understanding of nomination politics to current events as they unfold.

Seminar: International Politics of Rising Powers
Oh, Inhwan
Spring 2024
This course is class-restricted to juniors and seniors. Would China's rise lead to a war with the U.S.? What would be the optimal strategy of the U.S. vis-a-vis China in the 21st century? This seminar offers multiple theoretical perspectives on rising powers and power shifts to help students find their own answers to these pressing questions in U.S. foreign policy. First, it considers the role of both rising powers and power transitions as a potential source of great power war as well as other factors that affect the likelihood of a major war. Second, it investigates these issues from a range of international relations theories, including systemic and mid-range ones, and through historical case studies of continental and maritime power transitions. Lastly, drawing on previous theoretical and empirical examinations, it concludes with an effort to understand ongoing economic and naval power shifts between the U.S. and China, their implications for U.S. foreign policy, and the conditions under which the two powers may arrive at a strategic settlement or war for the remainder of the 21st century.

East Asian Security  
Ross, Robert S  
Spring 2024
This course is class restricted to juniors, seniors, and graduate students only. This class offers an analytical perspective on the strategic conditions of post-Cold War East Asia. It examines the regional political structure, the strategic characteristics of the region’s great power relationship—U.S.-China relations and the rise of China—and the implications of great power relations for the conflicts on the Korean peninsula, in the Taiwan Strait, and in the South China Sea, and the role of alliance relationships in regional diplomacy. From these different perspectives, the class seeks an understanding of the sources of state behavior in East Asia and the prospects for regional stability and instability.

POLI493401
Honors Seminar
Easter, Gerald M
Spring 2024
This course is restricted to Political Science Honors Program seniors and juniors by permission only. Honors Seminar: Pre-Modern Politics. Modern political life is mostly defined by state institutions and national identities. Yet the modern nation-state is a relatively recent political development in human society, comprising less than half of a millennium of human history. Until the modern era, the organization of political power tended to be more personalized and less institutionalized, more situational and less uniform, and more voluntary and less compulsory. Notable exceptions to this trend, however, can be found in early history's ancient empire-states. This class examines the wide variation of pre-modern political forms and practices. It identifies the common dynamics of war, wealth, religion, which drove the political transformation of human society from pre-modern kinship communities to early modern proto-states. Comparative case studies are used to illustrate these processes. The cases are drawn mainly from the peoples of Eurasia and the Americas, where occurred the historic clashes between early modern territorial-based states and pre-modern stateless societies that have since shaped today's world.

POLI772601
Democracy in America
Melnick, Rowell S
Spring 2024
Do not take this course if you have already taken PO392/POLI4392. This seminar will use Alexis de Tocqueville's Democracy in America to examine fundamental issues in the study of American politics. Readings from Democracy in America will be coupled with contemporary political science works. What are Tocqueville's central insights? Was his description of American politics accurate? How has the U.S. changed since he wrote? These are among the questions we will address in the course.

POLI780001
Advanced Directed Study
Dept, Dept
Spring 2024
Advanced Directed Study is a final paper project for eligible second year Master's students. It is a focused and substantial paper, written under the guidance and approval of a supervising faculty member. The project is intended to cultivate expertise in a subject in which the student has formed an interest and has already done some work in. Examples include: further development of a paper from a previous seminar with a case study, primary sources or original research; an extended critical literature review; or, a delegated project in cooperation with a supervising professor's own research.

POLI781101
Civil Society and Democracy
Alshamary, Marsin
Spring 2024
Can civil society create democracy? And if so, through what mechanisms and under what conditions? This seminar will investigate and break down the proposed relationship between civil society and democratization by a careful examination of a variety of global cases, in both the classic comparative politics texts and in emerging research. Through this seminar, students will be encouraged to use their own regional expertise to identify gaps in the literature, to impose scope conditions, and to imagine new tools for measuring and defining what exactly civil society is.

Global Public Goods and Cooperation in International Politics
Deese, David A
Spring 2024
Some of our most urgent challenges, from global warming and international financial crises to nuclear proliferation, global epidemics or disruption of the internet, can be understood as "global public goods." These require international actors to bargain, coordinate and collaborate in reaching effective responses. This seminar investigates the nature of public goods and collective action in order to help understand these pressing challenges, possible responses to them, and how politics both limits and opens opportunities for policy formation. It begins with prevalent theories about the production of public goods, from the local to transnational and global, and analysis of their governance. It then studies in depth three case studies, providing international financial stability, slowing the spread of nuclear weapons worldwide, and mitigating global climate disruption. It concludes by examining the implications of rising socio-economic inequality in major countries worldwide.

PSYC227201  
**Cognitive Psychology: Mental Processes and their Neural Substrates**
MacEvoy, Sean P  
**Summer 2023**

This course introduces the scientific study of mental function from an information processing perspective. The course examines how information is processed and transformed by the mind to control complex human behavior. Specific topics include the history of cognitive psychology, cognitive neuroscience, attention, perception, consciousness, short-term and long-term memory, mental imagery, language, decision-making, and problem solving. Course material will be drawn from work with clinical populations (e.g., people who have sustained brain injury) as well as from work with non-injured populations. Class sessions will be devoted to lecture, discussion, demonstrations, and (if practical) student presentations.

PSYC332201
The Neuroscience of Spirituality: Exploring Religion and the Brain
Black, Jessica M
Summer 2023
The brain is an organ of adaptation and such plasticity allows humans the capacity to build and draw upon faith and reason throughout times of stress and the building of resilience. Brain development throughout all life stages will be examined as we consider the following primary question: What does the field neuroscience help us to understand about faith throughout the life span, and what does it leave out? Contexts that confer stress or build resilience are examined throughout the course as students discover how neuroscience and faith converge or diverge in their contributions to understanding of the human experience and its development throughout life's unique pathways. To engage in this exciting dialogue about larger questions that may integrate these seemingly disparate and often siloed modern and ancient disciplines, students will be exposed to key concepts, definitions and vocabulary in neuroscience and recent advancements in related biological fields such epigenetics. We will then be able to engage in investigating and returning to important questions that may thematically bridge these fields. Through extensive writing, reflection and dialogue students will have the opportunity to deepen their understanding of the relationships among faith, religion, spirituality, and modern science.

PSYC332901
Psychophysiology of Stress
Ivkovic, Vladimir
Summer 2023
This course explores the psychological and physiological factors underlying stress, including basic principles of psychophysiology and fundamental concepts of stress. Topics include emotion, motivation, multitasking, attention, arousal, and distraction. Physiological mechanisms underlying stress will be examined relative to health and abnormal behaviors, such as addictions, mood disorders, and violence. Students will be instructed in methods of stress control, including cognitive behavioral techniques and meditation.

PSYC338901
Motivated Behaviors and the Brain
Shteyn, Rebecca
Summer 2023
Motivated behaviors are critical for the survival of the individual as well as the species. The basic motivated behaviors of 1) reproduction, 2) defense, 3) foraging, and 4) ingestion are innate and are prominent across all species, including humans. The class will discuss how and why these behaviors are necessary for the survival of the species. Throughout the discussion, students will also learn the neural basis underlying both the typical, as well as aberrant, expression of these motivated behaviors. The layout of the course will include discussing the behavior itself, including the evolutionary development of the behavior and the necessity of it, then the underlying neural mechanisms governing these behaviors will be discussed using animal research findings.

Credits: 3
Room and Schedule: On-line Asynchronous
Satisfies Core Requirement: None
PSYC403901
Research Practicum in Child and Adolescent Clinical Psychology
Schneider, Barry H
Summer 2023
This practicum focuses on research inspired by the assumption that faulty interpersonal interactions are at the core of psychological disorders of children and adolescents. Research methods for studying both peer and family relationships are considered as well as standard tools for the identification of participants for clinical research. Students will participate in the analysis of data on interpersonal relationships and adjustment. They will learn to interpret the data and write a manuscript in APA style.

Credits: 3

PSYC417701
Research Practicum in Cognitive Neuroscience
Thakral, Preston P
Summer 2023
This course introduces students to the research process in the cognitive psychology of memory. Research in memory examines how people encode and retrieve information (e.g., personal experiential information and world knowledge). Topics will include implicit memory, explicit memory, semantic memory, and working memory. Class readings will come from journal articles. Students will analyze these articles and lead class discussions. The ultimate goal is to have students propose a novel study and possibly carry out a research project. This will entail reviewing the relevant literature, identifying a novel research question, designing an experiment, interpreting results, and writing up the experiment in publication format.

**Credits:** 3  
**Room and Schedule:** Stokes Hall 103S TuTh 09:00AM-12:15PM  
**Satisfies Core Requirement:** None  
**Prerequisites:** PSYC1120  
**Corequisites:** None  
**Cross-listed with:** None

**Psychology and Neuroscience Courses: Fall 2023**

**PSYC111001**  
**Brain, Mind, & Behavior**  
**Heyman, Gene M**  
**Fall 2023**

This course focuses on basic brain function (how neurons work, brain plasticity, and drug effects) and genetic influences on psychological functions (including attitudes), and introduces students to fundamental features of learning, motivation, appetite, memory, and perception, along with their biological underpinnings. A major course theme is the physical bases of psychological phenomena.

**Credits:** 3  
**Room and Schedule:** Devlin Hall 8 TuTh 12:00 Noon-01:15PM  
**Satisfies Core Requirement:** Natural Science  
**Prerequisites:** None  
**Corequisites:** None  
**Cross-listed with:** None
PSYC111002

PSYC170101
What is Memory, and Why Does it Matter? The Science of Remembering
Kensinger, Elizabeth A
Fall 2023
This is an Enduring Question course and is open to FRESHMAN only. You must also register for the accompanying ENGL1736. We all use our memories daily, making us experts in some aspects of memory. Yet the scientific study of memory has revealed many features and functions that counter our intuitions of how our memories work. We will read the scientific literature that suggests the following possibilities: What if many memories don't exist in a stable form until the moment a person brings them to mind? What if a memory rarely represents the complete truth of how a past event unfolded? What if forgetting is as important to a healthy memory system as remembering? What if memory isn't designed to relive the past, but to make predictions about the future? Through assignments that challenge us to critique the scientific literature, we will shift from relying on our intuitions about memory to understanding the science behind memory. By doing so, we will come to understand our memories and perhaps ourselves in a different way.

**Introduction to Social Work**

**Ryan, Sarah E**

**Fall 2023**

This is a Social Work course available to undergraduate students. Starting with a discussion of its history and the relevance of values and ethics to its practice, the course takes up the various social work methods of dealing with individuals, groups, and communities and their problems. In addition to a discussion of the theories of human behavior that apply to social work interventions, the course examines the current policies and programs, issues, and trends of the major settings in which social work is practiced.

PSYC220501
Undergraduate Research
Brownell, Hiram H
Fall 2023
An opportunity to participate in research projects in the laboratory of a faculty member. Students are typically assigned to assist with a specific experiment contributing to the laboratory's overall goals. This is the most typical type of undergraduate research course experience in our department. Students may work with researchers at other area universities and hospitals. The work must be relevant to psychology/neuroscience. While primary supervision of the research will be provided by the laboratory PI, a Boston College Department of Psychology and Neuroscience faculty member must agree to serve as the instructor of record for the course. Students are encouraged to obtain permission of the instructor before they register for their other courses, so that they may keep open the time slot for the laboratory meetings associated with the laboratory. Registration requires the Syllabus/Contract form on the department's Academic Opportunities page.
