**FINANCE DEPARTMENT REGISTRATION**

As we prepare for registration, the Finance Department is committed to addressing every student’s need and situation as best as possible and in as timely a manner as possible. Since finance classes are in very high demand and registration time slots are randomly assigned by the University, the Department administrators in Fulton 330 manage the official waitlist for all finance classes once they have closed. As sections fill up, the department does its due diligence by checking degree audits to, for example, ensure pre-requisites are met and avoid duplicate registration.

Students are encouraged to stop by the Finance Department to be placed on the official waitlist once their pick time has passed and the class is closed. We remind students to register for any open section of a class at their pick time if the class is needed. Finance professors do not keep separate waitlists; the official waitlist is kept by the finance department administrators.

The Finance Department’s doors are always open to any student who has questions about courses or registration. Our hours are M-F from 9-5pm in Fulton 330. Students are also welcome to email the finance department (findept@bc.edu) with any questions.

New Course: Business Applications of Blockchain and Cryptocurrency
The objective of this course is to introduce the business of blockchain - a technology that has the potential to drastically alter the way value is stored, exchanged, shared and distributed. It is the backbone of the next iteration of the Internet: “Web 3.0” or “The Internet of Value”. This course doesn't require any technical knowledge or prior knowledge of the subject, and is designed to give students a foundational knowledge of blockchain technology and a familiarity with the basic principles that govern blockchain protocols. Students will obtain a fluency in the terms and concepts required to understand how this powerful technology works. Most importantly, students will study real-word applications of the technology, which will range far beyond blockchain’s original use case (cryptocurrency) and hear from a number of influential guest speakers who are using or investing in blockchain technology at their companies today. Students who complete the course will understand blockchain and cryptocurrency’s game-changing potential, be able to separate fact from hype, and be effective leaders in the space. Taught by Bennett Collen, BC grad and founder of blockchain startup, Cognate. Questions? Reach out to samir@bc.edu.
