RN REFRESHER CERTIFICATE PROGRAM

*Are you a Registered Nurse seeking to re-enter the workforce?*
*An employed RN needing to update skills or change specialties?*
*An international nurse wanting to learn about US nursing practices?*

**THURSDAY, AUG 6, 2020, 10:00 AM - LIVE ONLINE**
**THURSDAY, SEPT. 3, 2020, 10:00 AM - LIVE ONLINE**
**THURSDAY, JAN. 7, 2021, 10:00 AM**
**THURSDAY, MAY 20, 2021, 10:00 AM**

Meet with the Assistant Dean to learn all about the RN Refresher Certificate Program. Topics will include an overview of the content and format of each of the required courses, scheduling of the classes, and costs. During this time, you will meet other nurses who are facing similar career changes and discuss how the RN Refresher Certificate fits into a strategy to re-enter the workforce, change specialties, prepare for licensure, or update clinical skills. Learn about rolling admissions, online resources, and benefits.

CLINICAL RESEARCH CERTIFICATE PROGRAM

*Are you interested in a career in Clinical Research?*
*Currently in Clinical Research and want to develop your career path?*
*Want to put your science background to use in a new field?*

**WEDNESDAY, SEPT. 2, 2020, 6:00 PM - LIVE ONLINE**
**WEDNESDAY, JAN. 27, 2021, 6:00 PM**
**WEDNESDAY, APR. 7, 2021, 6:00 PM**

Learn about course offerings, occupational roles within Clinical Research, and future job opportunities. Topics of discussion are governed by the interests of the group and may include current trends in the clinical research market and strategies for success in the certificate program.

As Boston College continues to monitor the COVID-19 public health crisis, changes may take place regarding the scheduling and venue for continuing education classes. Until live classes resume on campus, many of our classes will be conducted live via Zoom or other online platforms. Please check our website bc.edu/ce for the latest updates or call our office for clarification.

Clinical Research Certificate

The field of Clinical Research is rapidly expanding and offers many career opportunities. This program will give you an understanding of the landscape of Clinical Research, including the duties of the following roles: Clinical Research Associate (CRA), Clinical Research Coordinator (CRC), data specialist, subject recruiter, research billing officer, compliance administrator, and other specialties.

IS THIS PROGRAM FOR YOU?
These multidisciplinary courses have been designed for professionals interested in moving into the field of pharmaceutical/clinical research. Hospitals and pharmaceutical companies seek out nurses and people with a science background for these roles because they have a scientific knowledge base, good interpersonal skills, and experience working with other health care providers. This program is beneficial for a professional seeking to advance or change specialties, receive training to enter the field of Clinical Research, obtain a broader understanding of the industry, or prepare for the certification exam.

These courses are designed to provide a thorough overview of clinical research conduct, the drug development process, the roles of the Clinical Research Associate and Clinical Research Coordinator, and other key roles in the conduct of clinical research. These courses include a strong emphasis on understanding the ethical underpinnings of clinical research and the history of how the field has evolved. Industry experts will guide you to a better understanding of safety requirements, ethical issues, and good clinical practices.

**INDIVIDUAL TOPICS**

**Medical Spanish Certificate**

Today’s medical professionals must adapt to meet the challenges that come with the growing cultural diversity in the population. The reality for many health care professionals is that Spanish is the first language of a large percentage of the population served.

These challenges are linguistic and cultural at their roots. This often requires that health care providers learn to communicate clearly and effectively with patients and their relatives in a second language. Miscommunication and misunderstanding of critical information can impact everyday patient care, including matters of life and death. The ability to speak basic Spanish reduces the need for providers to enlist the services of an interpreter for common communication tasks and assists health care professionals in providing culturally sensitive care.
