GENERAL INFORMATION FOR ALL GRADUATE STUDENTS

Introduction
The first section of the graduate handbook contains information applicable to all graduate programs. This is followed by one section that specifically addresses curricula and policies that are relevant to students in the master’s program. Additional program information is also available on the Boston College web site at www.bc.edu/nursing. The Associate Dean of Graduate Programs and the Graduate Programs Office staff are also available to answer graduate students’ questions. The student handbook reflects current policies and procedures; however, procedures may be revised and updated during the year as necessary. Please check with the Graduate office for the most up-to-date policies and procedures.

HISTORY OF THE CONNELL SCHOOL OF NURSING
Boston College inaugurated the School of Nursing in response to the need for a Catholic collegiate school of nursing in the Greater Boston area. With the cooperation of His Excellency, Most Reverend Richard J. Cushing, Archbishop of Boston, a program was offered in February 1947 leading to the degree of Bachelor of Science in nursing for registered nurses. In September 1947, a basic collegiate program of five years leading to the degree of Bachelor of Science was introduced for high school graduates. Beginning in September 1950, a four calendar-year basic collegiate program was initiated, and in 1957 this was shortened to four academic years. In the spring of 1960 the School of Nursing moved from downtown Boston to the Chestnut Hill campus and occupied its own building, the gift of His Eminence Richard Cardinal Cushing. In 2001-2002, the school received a generous gift from the late William F. Connell and the school is now known as the Connell School of Nursing.

HISTORY OF GRADUATE PROGRAMS IN NURSING
Boston College began offering graduate courses in 1952. In the spring of 1956, nursing sought to bring its program into conformity with the standards of the profession, and proposed a master’s degree in nursing with a minor in education. Boston College began awarding the Master of Science degree in nursing in 1958. The PhD program, approved by the board of trustees in September 1986, began in fall 1988. Ten students were admitted in the program's initial year; the program expanded to 30 students at the end of three years. In the 1993-94 academic year, there was a general reorganization of graduate arts and sciences and the schools of nursing and education assumed administration of the graduate programs in their respective areas. This organizational change strengthened the already vigorous and vital graduate programs in the Connell School of Nursing.

BOSTON COLLEGE CONNELL SCHOOL OF NURSING MISSION STATEMENT
The mission of the Boston College Connell School of Nursing is to prepare compassionate, professionally competent nurses whose practice and scholarship are scientifically based and grounded in humanizing the experience of health and illness. In keeping with the University’s Jesuit, Catholic ideals, we focus on formation of the whole person and promotion of social justice. The Connell School of Nursing educates students as reflective lifelong learners who use knowledge in service to others. The faculty develops and disseminates knowledge for the advancement of professional nursing practice and the improvement of health and health care for a diverse global society.
The graduate of the baccalaureate program is prepared as a generalist who promotes, maintains, and restores the health of individuals, families, and communities/populations across the lifespan through evidence-based practice. The graduate of the master’s program is prepared as an advanced generalist nurse with disciplinary knowledge and skill to improve the delivery of care through leadership, mentorship, and evidence-based practice. The graduate of the doctorate in nursing practice program is prepared for the advanced practice role and is eligible for national certification in a specialty area. The graduate of the PhD program is prepared to engage in and contribute to theoretically driven research and scholarship that address significant problems in nursing and health care and to influence policy.

**BOSTON COLLEGE CONNELL SCHOOL OF NURSING PHILOSOPHY**

Nursing is the art and science of human caring. The recipients of nursing care are individuals, families, aggregates of people, and communities/populations who are sick and well; culturally and linguistically diverse; within all socioeconomic strata; and at all stages in the life cycle. The study of nursing is based on a common intellectual heritage transmitted by a liberal education and the art and science of nursing. Nursing focuses on the life processes and patterns of the individual in the context of the family and the community and also the health needs of the population. Nursing recognizes the contribution of cultural diversity and social environments to the health/illness beliefs, practices, and behavioral responses of individuals and groups.

Nursing education prepares students for the appropriate level of knowledge and skills by building on the liberal arts and sciences. Nursing curricula are logically ordered to provide core knowledge and the application of that knowledge. The preparation for holistic nursing care requires a holistic approach in education, and education is most effective when it involves active participation by the learner. Students are supported in developing clinical skills as well as the ability to think and act ethically. Students are active participants in shaping the learning environment within the Connell School of Nursing.

The Boston College Connell School of Nursing instills the values of service to others, truth through scholarly inquiry, and justice through promoting equal access to care for all people. Service, scholarship, and justice in caring include all people in the global community, particularly the underserved. The faculty believes that promoting the physical, psychological, and spiritual aspects of health are essential to understanding the human dimension of holistic nursing care. Nurses engage in partnerships with individuals and groups to promote and optimize wellness. The nurse respects the uniqueness of the person and the individual’s right to choose and actively participate in decisions about health care. Nursing promotes self-determination by empowering clients and advocating for those who cannot do so independently.
Organizational Structure of the Connell School of Nursing

The **Dean** of the Connell School of Nursing is responsible for the overall administration of the school.

Susan Gennaro, RN, PhD, FAAN  
Dean  
Office: Maloney 294  
Telephone: 617-552-4251

The **Associate Deans** are responsible for the academic, research and financial administration.

Susan Kelly-Weeder, PhD, RN, FNP-BC, FAANP  
Associate Dean for Graduate Programs  
Office: Maloney 220  
Telephone: 617-552-8018

M. Colleen Simonelli, PhD, RN, RNC  
Associate Dean for Undergraduate Programs  
Office: Maloney 218  
Telephone: 617-552-4926

Christopher Lee, PhD, RN, FAHA, FAAN, FHFSA  
Associate Dean for Research  
Office: Maloney 226  
Telephone: 617-552-1804

Christopher Grillo, M.Ed, MBA  
Associate Dean for Finance & Administration  
Office: Maloney 294  
Telephone: 617-552-8531

**Graduate Clinical Specialty Program Directors**

Susan Emery, PhD, CRNA  
CRNA Nurse Anesthetist Program  
Office: Maloney 234  
Telephone: 617-552-6844

Jane Flanagan, PhD, RN, ANP-BC  
Adult-Gerontology Primary Care Program  
Office: Maloney 353  
Telephone: 617-552-8949

Kellie LaPierre, DNP, GNP-C  
Adult-Gerontology Primary Care Program  
Office: Maloney 370  
Telephone: 617-552-4270

Susan Kelly-Weeder, Ph.D., FNP-BC, FAANP  
Family Primary Care Program  
Office: Maloney 220  
Telephone: 617-552-8018

Laura White, Ph.D., MS, RN, CPNP  
Pediatric Primary Care Program  
Office: Maloney 361A  
Telephone: 617-552-1630

Carol Marchetti, PhD, RN, PMHNP-BC  
Psychiatric-Mental Health Program  
Office: Maloney 373A  
Telephone: 617-552-2328

Allyssa Harris, Ph.D, RN, WHNP-BC  
Women’s Health Program  
Office: Maloney 359  
Telephone: 617-552-0550
Faculty

Faculty may be full-time or part-time. Most full-time faculty teach in more than one level of the program. Faculty schedules for each semester are posted in their course syllabi and on their office doors. Each faculty member has a designated assistant. Faculty may be contacted via phone and voicemail, email, or through their assistants. Teachers of Record (TOR) are faculty who are responsible for coordinating faculty and student activities within a course. Their areas of responsibility include the course syllabus, compiling exams, and computing grades.

COMMUNICATIONS

There are a variety of mechanisms for enhancing timely and effective communication within the Connell School of Nursing. Each faculty member and staff member has voicemail and email. Each faculty or staff person at BC can be reached via email. Email addresses may be obtained by searching the directory on Agora (https://services.bc.edu/directorysearch/search/displayInput.action).

The graduate office uses BC email for all communications. Upon admission, every student receives a BC email address. Students must activate their BC email address in order to receive important announcements. All students are responsible for checking their BC email routinely. Visit http://g.bc.edu to log in to your BC email account. You can arrange to forward your BC email to another email account by visiting www.bc.edu/offices/help/comm-collab/email.html.

Resources

Information about activities and resources for graduate students across the university is located at the Graduate Student Life website: http://www.bc.edu/offices/gsc/

FINANCIAL AID

FINANCIAL AWARDS

Financial awards are contingent upon compliance with all academic standards and regulations. A limited number of Connell School of Nursing partial scholarships are available in the form of tuition remission and endowment scholarships. Graduate students may not receive university financial aid (stipend and/or tuition scholarships) from two schools or departments simultaneously without the Dean’s approval.

See the CSON website (https://www.bc.edu/content/bc-web/schools/cson/admission-aid/tuition-aid.html) for additional information about external sources of scholarships and financial aid.

TEACHING ASSISTANTSHIPS (TA)

Teaching assistants are graduate students enrolled in the Connell School of Nursing. The graduate school has a limited number of teaching assistantships available each semester. The teaching assistant (TA), in addition to her or his program of studies, is usually responsible for either 7 1/2 or 15 hours per week of teaching/instructional activities in the undergraduate or graduate program performed under the supervision of the course faculty and/or teacher of record. TAs are compensated with a stipend. The Graduate Programs Office will send out applications for TA positions each summer.
**RESEARCH ASSISTANTSHIPS (RA)**
Research assistantships may be available through faculty grants. The nature and number of hours involved are determined by the faculty member holding the grant. Assistantships provide limited tuition remission or a stipend that varies among projects. Students who wish to be considered for these opportunities should contact the Office for Nursing Research.

**TUITION REMISSION (TR)**
The Graduate Programs Office provides partial tuition remission awards on the basis of merit, need or service learning activities.

**ENDOWMENT SCHOLARSHIPS**
Through generous funding from private endowments, the Connell School of Nursing is able to offer small partial tuition scholarships to the most qualified students who meet the criteria for the specific endowment scholarship. The Graduate Programs Office will distribute applications for endowment scholarships.

**PROCEDURES FOR FINANCIAL AID RECIPIENTS**
An aid recipient who wishes to relinquish an assistantship or a tuition scholarship must report this matter in writing to the Associate Dean of Graduate Programs. These awards may be discontinued at any time during an academic year if either the academic performance or in-service assistance is unsatisfactory. They may also be discontinued for unprofessional conduct or conduct injurious to the reputation of the University.

**OTHER SOURCES OF FINANCIAL AID**
Students interested in other sources of financial aid, such as work-study funds and various loan programs, should inquire at the University Financial Aid Office where all such aid is administered. Students receiving loans are expected to meet their ethical, legal and professional responsibilities in repayment of these loans. Another useful website for scholarship information is [www.discovernursing.com](http://www.discovernursing.com). Information about university-wide teaching or graduate assistantships is available through the Murray Graduate Center website: [www.bc.edu/gsc](http://www.bc.edu/gsc).

**UNIVERSITY RESOURCES**

**THE LIBRARIES**
The Boston College Libraries offer a wealth of resources and services to support the teaching and research activities of the University. The book collections exceed 2 million volumes, and approximately 21,000 serial titles are currently received. Special collections for nursing are housed in the Mary Pekarski Nursing Archives in Burns Library and include: nursing ethics, nursing history, and the recently acquired collections of the North American Nursing Diagnosis Association (NANDA) and the American Association of Nursing Attorneys.

Membership in two academic consortia, the Boston Library Consortium and the Boston Theological Institute, adds still greater dimensions to the resources of the Boston College Libraries, providing Boston College faculty and graduate students who have special research needs access to the millions of volumes and other services of the member institutions. Through membership in New England Library Information Network (NELINET), there is online access to publishing, cataloging, and interlibrary loan location from the OCLC, Inc. database, which contains over 36 million records from the Library of Congress and from more than 25,000 contributing institutions worldwide.
Boston College Libraries is a member of the Association of Research Libraries (ARL). Boston College was among the first schools in the country to offer an online public computer catalog of its collections. The libraries' computerized system provides instant access to information on library holdings, as well as supporting book circulation and acquisitions' procedures. Students may browse the catalog using video display terminals in all the libraries, and may access the catalog via computer from their homes or offices at www.bc.edu/libraries. In addition, the libraries offer computer searching of hundreds of commercial databases in the humanities, sciences, business, and social sciences through an in-house CD-ROM network, through access to outside databases, and through the library computerized system. Access to an increasing number of full-text journals is also available online.

Information on use of the libraries is contained in the Guide to the Boston College Libraries, on the Boston College website, and other brochures available in the libraries. There is a reference librarian assigned to each discipline. Wanda Anderson (617-552-4457) is the reference librarian for nursing. Students should arrange for orientation to the library resources through the many library offerings provided.

GRADUATE STUDENT CENTER
The John Courtney Murray, S.J. Graduate Center is a facility established to meet the needs of graduate students. It is located across Beacon Street at 292 Hammond Street. The graduate center provides opportunities to gather for discussion, reflection, presentations, meals, and social functions. It offers a computer lab with PCs and Macs, study rooms with network stations, network activated jacks and wireless network connections for laptop computers, dining facilities, and an administrative staff to act as advocates for all graduate students. The Murray Graduate Center also serves as a coordinating center for graduate student groups such as the Graduate Student Association, Graduate International Student Association, and the Graduate AHANA Student Association. To reserve space for graduate events or for more information please see the graduate center website (www.bc.edu/gsc) or call 617-552-1851.

STUDENT LOUNGES
Students are free to use student lounges in any Boston College buildings. Students may wish to book study rooms in O’Neill Library or in the Murray Graduate Student Center for small group study.

The Kennedy Resource Center (KRC) in the Connell School of Nursing, Maloney Hall, 243 and 244, houses audiovisual programs and computer-assisted instruction.

The simulation laboratory in Maloney Hall is a state-of-the-art facility in which students may learn and practice a variety of nursing skills. This may be used by students as part of their coursework. The nursing student lounge is located on the 2nd floor of Maloney Hall and is available for use by all undergraduate and graduate students. The lounge houses a printer, 2 small refrigerators and a microwave, as well as student lockers. The Hillside Café is conveniently located on the 1st floor of Maloney Hall.

WIRELESS NETWORK
The wireless network at Boston College provides laptop users with the flexibility to access the network from many points on campus including libraries, classrooms, dining halls, and even outdoor common areas. The Connell School of Nursing is equipped with a wireless network.
The Connors Learning Center is responsible for providing free tutoring to the student body at large, support services to students with learning disabilities or attention deficit disorder, and instructional support for graduate students and faculty. They can assist students who need help in improving their writing skills. Please contact 617-552-8055.

AHANA STUDENT PROGRAMS
The goal of this office is to promote the optimal academic achievement of African-American, Hispanic, Asian and Native-American (AHANA) students at Boston College, especially those identified as being at potential academic disadvantage. The services available include tutorial assistance, academic advisement, individual and group counseling tracking of academic performance, and career counseling. In addition to these services, the office assists AHANA student organizations in developing and implementing cultural programs. Contact the Graduate AHANA Association’s Murray Graduate Center at 617-552-1663.

CAREER CENTER
The Career Center provides comprehensive resources and information concerning all aspects of career planning and job hunting. Its services are available to graduate and undergraduate students in all schools and concentrations, as well as to alumni.

For the job hunter, the Career Center provides group and individual assistance in resume writing, interview preparation, and job hunting strategies. They also offer an on-campus-recruiting program, current job listings and a credentials service.

Graduate students are encouraged to visit the Career Center at 38 Commonwealth Avenue, where they can pick up the Center’s monthly publications. The Career Center is open on Tuesday and Wednesday evenings until 7:30 p.m. during the academic year for the convenience of graduate students and alumni.

CHAPLAINS
The Chaplains’ Office strives to deepen the faith of Boston College students by offering opportunities to discover, grow, express and celebrate the religious dimensions of their lives in personally relevant ways. In addition, it works to foster justice by developing social awareness and to build a sense of community as a Christian value in the whole University. Chaplains from a variety of faiths are available. Offices are located in McElroy Commons, Room 215, 617-552-3475.

UNIVERSITY COUNSELING SERVICES (UCS)
University Counseling Services provides counseling and psychological services to the students of Boston College. The goal of UCS is to enable students to develop fully and to make the most of their educational experience. Services available include individual counseling and psychotherapy, group counseling, consultation, evaluation and referral. Students wishing to make an appointment may contact the UCS office at 617-552-3100 or visit the office in Gasson Hall 001 during regular office hours of Monday through Friday 8:45AM-4:45PM.

OFFICE OF THE VICE PRESIDENT OF STUDENT AFFAIRS
The Office of the Vice President of Student Affairs (VPSA) coordinates the planning, implementation and evaluation of programs and services for graduate student development. This includes overseeing students’ clubs and organizations, programming, the Graduate Student Association, alcohol and
drug education, off-campus and commuting student affairs, and international student services. The dean and assistants are also responsible for coordinating policies and procedures concerning student conduct and discipline, and the judicial process. Graduate students can visit the Director of Graduate Life, Dr. Carole Hughes, at the John Courtney Murray, S.J. Graduate Center on 292 Hammond Street or contact via 617-552-1855 or gsc@bc.edu.

SERVICES FOR STUDENTS WITH DISABILITIES
Students with disabilities applying to Boston College are strongly encouraged to make their disability known voluntarily to the Admissions Office. This information will not affect the decision on admission; rather, it will give the University the opportunity to offer specific assistance and support through programs and services provided by different departments on campus. For more information regarding services for students with disabilities contact Paulette Durrett, Assistant Dean for Students with Disabilities, 617-552-3470. For more information regarding services for students with learning disabilities, contact Dr. Kathleen Duggan, Director, Connors Family Learning Center, O'Neill Library, 617-552-8093. Any student who wishes to request reasonable accommodations due to a documented disability should notify the faculty within the first two (2) weeks of a course.

GRADUATE STUDENT ASSOCIATION
The Graduate Student Association (GSA) of Boston College is an autonomous organization that serves students in the Graduate Schools of Arts and Sciences, Nursing, Social Work, the Lynch Graduate School of Education and the Carroll Graduate School of Management.

The GSA exists to provide academic support to students in the form of conference grants and special group funding, to host social, cultural and academic programs for graduates, and to inform the graduate community of matters of interest to them. The GSA also advocates for graduate student interests within the University community. The GSA nominates graduate students to serve on a variety of committees, including the University Academic Council, the University Committee on Alcohol and Drug Abuse, the Graduate Educational Policy Committee, and the new student center committee.

The GSA is funded by the activity fee charged to every graduate student at registration and is governed by the GSA Student Council, composed of student representation from each academic department. The council and staff work together to strengthen the collective voice of graduate students. The GSA publishes an annual Graduate Students Achievement Profile online, that lists all graduate students who have published or presented papers, won awards, or otherwise been acknowledged for their work.

The GSA has its offices in the John Courtney Murray, S.J. Graduate Center located at 292 Hammond Street across Beacon Street from McElroy Commons. Its amenities include study rooms, a computer lab, DVD lending library, kitchen, deck and patio space, and complimentary coffee and tea. Throughout the year, the center hosts programs organized by the Office of Graduate Student Life and graduate student groups. Contact gsa@bc.edu for more information.

GRADUATE NURSES ASSOCIATION (GNA)
The Graduate Nurses Association (GNA) meets regularly in the Connell School of Nursing to provide a forum for concerns and interests of graduate students. Periodically it sponsors coffee hours or luncheons so that graduate students can interact with each other and with faculty on an informal basis. The GNA also is involved in a variety of projects to help fund various groups in the
community. The GNA office can be reached at bcgradnurses@gmail.com. The GNA has membership in the GSA and two members of the GNA are appointed to represent graduate nursing students at GSA meetings and activities.

HEALTH SERVICES
The primary goal of University Health Services is to provide confidential medical/nursing care and educational programs to safeguard the physical well-being and mental health of the student body. It is located on the ground floor of 2150 Commonwealth Ave. on the Chestnut Hill Campus; the phone number is 617-552-3225. The entrance is on St. Thomas More Rd. The services include a walk-in clinic as well as medical, surgical, gynecological, orthopedic, nutrition, physical therapy, allergy, and immunization clinics. The in-patient infirmary is open 24 hours a day when school is in session.

The health/infirmary fee for medical care on campus is not a substitute for a health insurance policy. Massachusetts law requires that all university students registered for 75 percent of a full-time course load be covered by an accident and sickness insurance policy so that protection may be assured in case of hospitalization or other costly outside medical services. Insurance information is available at University Health Services Office in Cushing Hall or online at www.bc.edu/offices/uhs.

Academic Policies & Procedures

ACADEMIC AND PROFESSIONAL INTEGRITY
Students are expected to have high standards of integrity in both the academic and clinical settings. The Connell School of Nursing adheres to the Boston College policies surrounding academic integrity. This policy is outlined in the Boston College catalog. The catalog may be accessed online at http://www.bc.edu/offices/stserv/academic/univcat.html.

Expected ethical behavior in clinical situations is based on the American Nurses' Association Code of Ethics for Nurses (ANA, 2001, 2010). Students are expected to protect patients' confidentiality at all times, and to be honest in any documentation regarding the patient's condition and their own assessments and interventions. Students are expected to maintain high professional standards, including being physically, intellectually, emotionally, and academically prepared when caring for patients. Unprofessional conduct is considered serious and may result in dismissal from the school.

RESEARCH INTEGRITY AND RESPONSIBLE CONDUCT OF SCIENCE
Scientific integrity, the conscious adherence to a set of ethical principles, is the hallmark of all scholarly disciplines, including nursing. Boston College is guided by the ethical principles regarding all research involving human subjects. Graduate students in the Connell School of Nursing who plan to conduct research with humans or material of human origins must submit their research proposals to the Boston College Institutional Review Board (BCIRB) for review and approval prior to carrying out the project. See the website: https://www.bc.edu/bc-web/research/sites/vice-provost-for-research/research-protections.html.

THE CONSORTIUM
Graduate students in the Connell School of Nursing may cross register for one course each semester (fall/spring) at Boston University, Brandeis, or Tufts. Cross registration materials are available in Lyons Hall/Student Services. Prior approval by the host institution is necessary. The student should consult with the appropriate BC consortium liaison at the host school about cross registration. Before registering for courses in the consortium, students are required to seek approval from their academic
advisor and the Associate Dean for Graduate Programs. Cross registration is not available during the summer sessions.

The Graduate Consortium in Women's Studies is an inter-institutional enterprise established to advance the field of women's studies and enlarge the scope of graduate education through new models of team teaching and interdisciplinary study. Faculty and students are drawn from nine member schools: Boston College, Boston University, Brandeis University, Harvard University, Massachusetts Institute of Technology, Northeastern University, Simmons University, Tufts University and the University of Massachusetts Boston. Graduate students enrolled in degree programs at Boston College may with the permission of their department apply to participate in this program. For more information go to http://mit.edu/gcws.

COURTEOUS CELL PHONE USE
Out of respect for faculty and fellow students, please turn off your cell phones in class. If you need to be available in case of personal or professional emergencies, please adhere to the following guidelines:

• Put your phone on a vibrate setting
• Sit near the door
• If you receive a call, immediately exit the classroom and answer the call well out of earshot of classrooms and offices.

Students should not use cell phones in the clinical setting.

CLASS ATTENDANCE
Students are expected to attend class. Students who are absent from class or clinical practica will be evaluated by the faculty as to their ability to meet course objectives. Students are expected to notify faculty prior to a scheduled session if they will be absent or tardy.

A student who is absent from class is responsible for the class content as well as for knowledge of any announcements that may have been given. In the case of an anticipated prolonged absence for illness or injury, the student obtains a leave of absence form from the Graduate Programs Office. The Associate Dean of Graduate Programs will notify the student's professors of the leave of absence.

If a student misses too many classes or clinical days, they may not be able to satisfactorily complete the course. In such cases the student could discuss withdrawing from the course with the professor and their academic advisor. All withdrawal requests must be approved and signed by the Associate Dean of Graduate Programs.

If classes are cancelled due to a severe snowstorm, power failure, or some other emergency, notification will be broadcast on radio and television between 6:30 and 8:30 a.m. Stations announcing this information are WBZ (1030 AM), WRKO (680 AM), and WBMX (98.5 FM) on radio, as well as Channel 4 (WBZ-TV) and Channel 5 (WCVB-TV) on television. Notification is also available by calling 617-552-4636. Students who miss classes or clinical experience for religious reasons should discuss this with the faculty member in advance so alternative arrangements can be made.
STUDENT ABSENCES FOR RELIGIOUS REASONS
Any student who is unable, because of her/his religious beliefs, to attend classes or to participate in any examination, study, or work requirement on a particular day shall be excused from any such examination, or study or work requirement, and shall be provided with an opportunity to make up such examination, study or work requirement that may have been missed because of such absence on any particular day. However, such makeup examination or work shall not create an unreasonable burden upon the University or the faculty.

EXAMS AND QUIZZES
Students are responsible for taking all tests, quizzes, and examinations when they are given and have no inherent right as students to be given a make-up examination. Therefore, students should pay special attention to the announced dates and double check the time, date, and place of all examinations.

If a student anticipates missing an exam, they should contact the professor in advance and ask if she or he will discuss options. Any arrangements must be worked out between the faculty member and the student.

LOST WORK
It is the student's responsibility to see that the faculty member receives the work submitted. Students should always make a copy of a paper or project before submitting it, especially if mailing it or leaving it at a department office. If a student does not receive the graded work back on time or if there is any doubt as to whether it has been received, it is prudent to check with the faculty member immediately.

GRADING
In each course in which she or he registers for graduate credit, the student will receive one of the following grades at the end of the semester: A, A-, B+, B, B-, C, or F. The minimum acceptable passing grade for a graduate course is a B- (80). Graduate students will undergo academic review if they have earned a grade less than B- (80) in a course. Academic credit is granted for courses in which a student receives a grade of A, A-, B+, B, B-, or C. No credit is granted for a course in which a student receives a grade of F. Please also see ACADEMIC STANDING.

The following scale is used in graduate courses in the Connell School of Nursing:

<table>
<thead>
<tr>
<th>Grade</th>
<th>Percentage</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>94-100 %</td>
</tr>
<tr>
<td>A-</td>

INCOMPLETE GRADES
All required work in any course must be completed by the date set by the course faculty member. A student who has not completed the research or written work for a course, may, with adequate reason and at the discretion of the faculty member, receive an “I” (incomplete). All of the course requirements for an incomplete course must be completed, and the “I” grade resolved, within the
deadlines set forth by the university (March 1 for fall courses; August 1 for spring courses; October 1 for summer courses). After these deadlines, the “I” grade will permanently convert to an “F” grade. Any exceptions must be approved by the Associate Dean for Graduate Programs.

All courses must be successfully completed and all incomplete course grades must be resolved in order for students to be eligible to complete the clinical practicum sequence. Students must successfully complete any pre-requisite course (and all of the requirements within that course) before being allowed to enroll in a subsequent course for which the incomplete course was a prerequisite. Students may not enroll in a graduate course while they have an “I” (incomplete) in a prerequisite course.

LATE PAPERS/RESEARCH PROJECTS AND EXAMINATIONS
Students are responsible for submitting all work for a course to the faculty member by the specified deadline and taking examinations at their scheduled time and location (except as arranged in advance for specific learning needs). Professors are not obliged to accept any work beyond the deadline or to grant extensions. Any requests for extensions must be made prior to the original due date. All arrangements for submission of the work must be negotiated directly between the faculty member and the student. Students who anticipate a conflict with a scheduled examination should notify the teacher of record as soon as possible prior to the scheduled exam. Faculty members are not obliged to provide early or late exams. Make-up examinations will be given at the discretion of the faculty and only under extreme circumstances. Students who do not show up for a scheduled examination without prior notification to the teacher of record will receive a grade of “0” for the exam.

ACADEMIC EVALUATION DISPUTES
Students have the right to know the components of a course on which the final grade will be based, to be graded fairly, and to understand why a particular grade was given. The faculty member has the right to determine which course components will be graded and the weight that will be given to each, the right to determine the grading scale to be employed, and has a responsibility to grade students consistently on that scale. She/he is also expected to provide a syllabus for each course, specifying dates for assignments and examinations, and the weight given to each course component in determining the final grade, as well as objectives for the course. If the student feels, in light of the above, that a grade is unfair, the student should first make an appointment to see the professor, bring a copy of the paper or exam in question, and request that she or he explain why and how the grade was determined. If, after discussing the grade with the faculty member, the student still feels the grade is unfair, the student may appeal.

GRADUATE ACADEMIC STANDINGS AND PROGRESSION POLICIES
Graduate students are expected to maintain good academic standing at all times and progress through their program of study. Those who are not in good academic standing or are not progressing are subject to review by the Academic Standards and Progression Committee. The graduate academic standards and progression policy is summarized below:

All graduate students in the Connell School of Nursing are expected to maintain a GPA of 3.0 in order to remain in good academic standing. The minimum acceptable passing grade for graduate courses is a B- (80). Students will undergo academic review if they have a GPA of less than 3.0 or earn a grade less than a B- (80) in a course. Academic review may result in a student being dismissed from the program or placed on probation with specific recommendations and requirements that must be met in order to continue in the program. These recommendations may include, but are not
limited to: (a) completing an individualized remediation plan developed in collaboration with the course faculty and the student’s advisor in order to achieve mastery of the course objectives; (b) repeating courses in which a grade of less than B- (80) was earned; and/or (c) reducing course loads until the GPA is > 3.0.

Graduate students are not allowed to repeat a course more than once.

Unsafe clinical practice and/or unprofessional conduct are grounds for failure in any clinical course and may result in immediate removal from the clinical site. Students who demonstrate unsafe clinical practice or unprofessional conduct in clinical, classroom settings, and/or interactions with BC faculty or staff, will undergo academic review and may be dismissed from the program. Students who fail to progress in their program of study and/or who exceed the time limits for the program will also undergo review by the Graduate Academic Standards and Progression Committee.

The Academic Standards Advisory Committee meets at the end of the Fall and Spring semesters and as needed; the Committee is comprised of faculty who teach in the graduate programs. The Associate Dean of Graduate Programs will convene and conduct the meeting. Students may not attend the meeting but may submit a brief written statement that the Associate Dean of Graduate Programs will read or distribute to the Committee members.

Students will be notified as soon as possible that they are subject to academic review and will be given the opportunity to submit a brief statement to the Associate Dean of Graduate Programs regarding their academic performance and plans to improve. The Associate Dean of Graduate Programs will read or distribute the student’s statement to the Committee members. The Committee will consider the student’s statement, input from the Teacher of Record and the academic advisor, and review any pertinent materials including letters of warning, remediation offered to the student, use of tutoring or advisement sessions at the Connors Learning Center, and any other relevant information.

Academic review may result in recommendations that coursework be repeated, that the student be placed on academic probation, or that the student be dismissed from the program. The Associate Dean of Graduate Programs will notify the student of the outcome of academic review as soon as possible. If the student is dissatisfied with the decision, he / she may submit a written appeal to the Dean. The appeal must be submitted as soon as possible but no later than thirty (30) days after the student has received notification of the outcome from the Associate Dean of Graduate Programs. A formal appeal to the Dean consists of a written explanation of the appeal which should include the reasons the student believes the Committee’s decision was not satisfactory. Within thirty (30) days of receipt of the student’s appeal, the Dean will render a decision. The decision of the Dean is final, and will be communicated in writing to the student and to the Associate Dean of Graduate Programs.

Graduate students who are on probation or not in good academic standing are not eligible for teaching assistantships, research assistantships, fellowships and/or any type of merit-based tuition remission award.

GRADUATE STUDENT GRIEVANCES
This grievance procedure provides a process for constructively resolving serious academic, supervisory or administrative grievances that undergraduate and graduate students may have with faculty, preceptors, staff or administrators. Its purpose is to resolve in a fair manner any grievances
arising from grading, other evaluation or supervisory practices, and appeals that students may want to initiate if they are dissatisfied with decisions made by the committees that direct their degree program or the Academic Standards Advisory Committee of the Connell School.

In the case of academic integrity proceedings, separate University policies provide for appeal of Connell School Academic Integrity Committee decisions to the Dean of the School no later than 10 days after a student is informed of the Committee’s decision, with the Dean’s decision on such matters being final.

All parties involved in a matter under this grievance procedure should display a cooperative manner. Resolutions should be attempted between the parties involved and mediated rather than directed. Outcomes should be sought at the lowest possible administrative level. Confidentiality of the student(s) and faculty members(s) involved should be maintained at all times. In the event that the Chair, or the student’s advisor, preceptor, Dean or Associate Dean is a party to the grievance, that person should recuse him/herself from considering the matter, and the appropriate administrator at the next highest administrative level will replace that person.

If a student believes that he or she has been evaluated unfairly or has another serious grievance, the student should discuss the matter with the faculty member or preceptor (and teacher of record for the course, if applicable) as soon as possible after the evaluation has been received or the grievance arises. This discussion should provide an opportunity for further dialogue and clarification between faculty and student about the guidelines that were applied, the criteria that were used, and any related issues. If such a discussion results in a mutually acceptable resolution, the matter will be considered closed. If either party wishes to have a written statement of the outcome, the parties will put the resolution in writing, sign it, and each retain a copy, no later than two weeks after the mutually acceptable resolution has been reached.

If, however, a mutually acceptable disposition cannot be achieved, the student may present the matter in writing to the Connell School of Nursing Department Chair (henceforth referred to as “the Chair”). The student's written statement to the Chair must be submitted no later than two weeks from the date of the final meeting with the faculty member or preceptor and clearly specify the nature of the complaint and the remedy requested.

The Chair will review the matter by meeting individually with each party involved and reviewing any written materials related to the grievance. The Chair will meet again with involved parties, either separately or jointly or both, in an attempt to resolve the matter. If a settlement is reached by the parties, it is to be put in writing and signed by the Chair and each of the parties, with each to retain a copy. If no response and/or signature is received from the student within two weeks after a summary of the settlement is sent, this will be considered an acceptance by the student of the settlement outlined by the Chair. If no resolution is reached, the Chair will prepare a written summary of events relevant to the grievance and provide a copy of it to the student and the faculty member or other individuals involved. If the student is dissatisfied with the outcome of the discussions and process at the Chair level, the student may initiate a formal appeal. The student must initiate the appeal as early as possible, but not later than thirty (30) days after receiving the Chair’s summary.

In the event that the grievance concerns treatment or evaluation in a practicum, the student should follow this same procedure, discussing the matter first with his or her preceptor and/or clinical
instructor. If this discussion does not lead to resolution, the matter should be brought to the Connell School of Nursing Chair who will follow the guidelines described above.

**FORMAL APPEALS**

A formal appeal consists of a written explanation of the grievance sent to the relevant academic Associate Dean for the student’s program (Graduate or Undergraduate): it should include the reasons the student believes the faculty member’s or preceptor’s evaluation or administrator or Academic Standards Advisory Committee decision was arbitrary, unethical, or based on extrinsic error, and the reasons why previous discussions were not satisfactory. The Associate Dean may request that the faculty member, the Chair and any other individual involved provide the Associate Dean with a written evaluation of the merit of the appeal and a summary of the attempts to resolve the grievance.

The Associate Dean will then convene an ad hoc committee composed of three members of the elected Grievance Committee. The ad hoc committee will conduct an independent review of the grievance, which will include discussing the grievance with the student, the Chair and other individuals involved. Within thirty (30) days of receiving the formal appeal, the ad hoc committee will provide a statement of the committee’s resolution of the matter to the student, the Chair, the person(s) against whom the grievance was brought, and the relevant Associate Dean.

If the student is dissatisfied with the conclusions of the ad hoc committee, the student may submit a formal written appeal to the Dean. The appeal must be submitted as soon as possible but no later than thirty (30) days after the student has received the conclusions of the ad hoc committee. A formal appeal to the Dean consists of a written explanation of the appeal, which should include the reasons the student believes the faculty member’s or preceptor’s evaluation was arbitrary, unethical, or based on extrinsic error, and the reasons previous attempts at resolution were not satisfactory. The summary prepared by the Chair prior to the Grievance Committee’s involvement, as well as the statement of the Grievance committee’s resolution will be forwarded to the Dean for the Dean’s consideration in the review of the student’s appeal.

Within thirty (30) days of receipt of the student’s appeal, the Dean will render a decision. The decision of the Dean is final, and will be communicated to the student in writing, with copies to the person(s) against whom the grievance was brought, the Chair, and relevant Associate Dean. If a student’s grievance relates to the student’s legal rights under any law or regulation, the grievance will be addressed in accordance with the applicable legal requirements. In such cases, the faculty member or administrator responding to the grievance should consult with the Associate Dean of Finance and Administration who will facilitate communication with the Office of the General Counsel.

**TRANSFER OF CREDIT/S**

Matriculated graduate students may request permission to transfer in up to 6 credits of graduate course work completed at another regionally accredited graduate university prior to matriculation to be applied toward their degree. Only courses completed within the past five years, that were not applied to a prior degree and in which the student earned a grade of B- (80) or better, can be considered for transfer. Matriculated students are not permitted to take courses outside of Boston College, other than through the Consortium. Core courses that were taken prior to matriculation may be considered on a case by case basis. Students will not be allowed to transfer in more than six (6) credits towards their degree.
To request to have an outside course considered for transfer, the student must provide a copy of the course description for electives and course syllabus for core courses to the Graduate Programs Office. Electives / cognates may be approved by the faculty advisor. Core courses that were taken prior to matriculation at Boston College must be reviewed for equivalency by the TOR for the core course at Boston College, and approved by the TOR and the Associate Dean of Graduate Programs (forms in the appendix and on the CSON web site.) If approved, the student must submit a final official transcript documenting a grade of B or better to the graduate office for processing. The transfer course and credit, but not a grade, will be recorded on the student's transcript after the student has successfully completed one full semester at Boston College.

**POLICY REGARDING FAILING TO REGISTER**
Matriculated degree-seeking students who are not registered must request a leave of absence or withdrawal form and return it to the Graduate Programs Office (Maloney 219D). Failure to do so may result in the university deactivating the student’s enrollment and dismissing him/her.

**TIME LIMITS**
Students in the MS program have 5 years from initial enrollment to complete their program of study. Students in the DNP and PhD program have 8 years from initial enrollment to complete all degree requirements, including defending and submitting the final version of the dissertation.

Graduate students may apply for a leave of absence (LOA) for personal reasons, health reasons or other extenuating circumstances. LOAs are usually granted for 1 semester; a 2 semester LOA may be granted under unusual circumstances. *Leaves of Absence do not “stop the clock” or extend the program time limits.* The only exception is for graduate students who require an LOA due to active military service. Some accommodations to program time limits may be made for active military service. Students should contact the Associate Dean of Graduate Programs. Graduate students who exceed the program time limits or who fail to make progress towards their degree will be reviewed by the Graduate Academic Standards and Progressions Committee and may be subject to dismissal from the program.

**LEAVE OF ABSENCE (LOA)**
Students enrolled in degree program who do not register for course work, doctoral advisement, or doctoral continuation in any given semester must request a leave of absence for that semester. Leaves of absence are not normally granted for more than one semester at a time. Students may obtain the leave of absence form from the Graduate Program Office or the Connell School of Nursing website and submit this form to that office for the Associate Dean of Graduate Programs' approval. Leave time will normally be considered a portion of the total time limit for the degree unless due to active military service. Students must meet any conditions specified for return from a leave of absence. Students who are on leave of absence must still follow procedures and deadlines for initiating the placement process for clinical practica; clinical placements will be on a space available basis. Students must notify the graduate office by March 1 prior to the academic year they wish to return.

**Mental Health Leave of Absence**
When a student takes a leave of absence from Boston College for mental health reasons, the student is expected to get the appropriate treatment to deal with the condition that led to the leave. Before the Associate Dean of Graduate Programs can make a decision regarding readmission, we require that the student's mental health treatment professional provide sufficient information to Boston College for the purpose of assessing the student's readiness to return and take on the rigors of his/her
academic program. For more information, please contact Dr. Craig Burns, Director of University Counseling at 617-552-3310.

ACADEMIC ADVISEMENT
It is the student's responsibility to take advantage of the advisement process. Each student is assigned to a faculty advisor. Students are expected to meet with their advisors on a regular basis, keep their advisors informed about their academic progress and seek assistance with problems in a timely manner. Advisor information is available on the student portal.

PLAN OF STUDY
Each student must have a plan of study on file. These are completed with the Graduate Programs Office and/or with the specialty program director/advisor. Students are responsible for reviewing and updating their plans of study. In addition to providing guidance to students in progressing through the curriculum, the plans of study are used for course enrollment management and to schedule clinical placements (see clinical practica section).

SUMMER SESSIONS
The Connell School of Nursing usually offers graduate courses* during Summer Session I and Summer Session II.
*Courses with fewer than 10 students enrolled may be cancelled.

WITHDRAWAL FROM A COURSE
Students who withdraw from a course after the registration period but before the last three weeks of class will have a grade of “W” recorded in their permanent record. The last date for withdrawal from a course is specified on the academic calendar each semester. Students are not permitted to drop courses during the last three weeks of classes or during the exam period; students who are still registered at this point will receive a final grade. Students may withdraw from a course or change from credit to audit up to three weeks prior to examinations and may receive a partial tuition refund on withdrawals submitted during the three weeks following registration. Students who change from credit to audit receive no refund. Graduate students are not allowed to repeat a course more than once.

WITHDRAWAL FROM BOSTON COLLEGE
Students in good standing who wish to withdraw from Boston College are required to file a withdrawal form in the graduate office. In the case of students who are dismissed for academic or disciplinary reasons, the appropriate administrator will complete this form.

GRADUATION
The University awards degrees in May, August and December; commencement ceremonies are held only in May.

MAY GRADUATION
Graduate degrees are awarded at the annual May commencement. Students who plan to graduate in May should file a graduation form (online) by the deadline stated in the academic calendar (usually early in February). Diplomas are distributed to individual students at the Connell School of Nursing ceremony immediately following the completion of the overall university commencement exercises. Diplomas will be mailed to students unable to attend commencement. Diplomas or transcripts will
not be awarded or issued until all degree credits have been recorded on the student's permanent record and all accounts and fees have been paid.

AUGUST AND DECEMBER GRADUATIONS
Graduate students who have completed all degree requirements by August 30 or December 31 are eligible to receive their degree as of those dates. The procedure is the same as for May graduation. Since there are no commencement exercises in December or August, the names of those receiving degrees will be included in the Boston College program for the following May commencement. Those students who would like to participate in the May ceremonies must notify the graduate office.

GRADUATE PROFESSIONAL STANDARDS AND PATIENT SAFETY POLICIES
Should a student become aware of a risk to patient safety, the student MUST IMMEDIATELY report this to his/her preceptor, the clinical coordinator, and program administration. There are NO exceptions to this policy.

Unsafe clinical practice and/or unprofessional conduct are grounds for failure in any clinical course and may result in immediate removal from the clinical site. Students who demonstrate unsafe or unprofessional conduct in a clinical laboratory or clinical practice site will undergo review by the Graduate Academic Standards Advisory Committee and may be dismissed from the program. Students may also be immediately removed from the clinical site, undergo review by the Graduate Academic Standards Advisory Committee and/or be dismissed from the program under the following conditions:

1. Clinical performance endangering patient safety;
2. Use of drugs / alcohol rendering the student unfit for safe and competent clinical performance and endangering patient safety;
3. Physical health and/or mentor health problems rendering the student unfit for safe and competent clinical performance and endangering patient safety;
4. Unprofessional behavior in the clinical setting; and /or
5. Behavior that violates the ANA Code of Ethics for Nurses.
OVERVIEW OF THE
MASTER’S PROGRAM

The master's program prepares graduates for advanced nursing practice as nurse practitioners, clinical nurse specialists and nurse anesthetists. Advanced nursing practice encompasses the direct care role and other role components of research, teaching, consultation, collaboration, management, and leadership. The direct care role reflects independent, autonomous evidence-based actions at the expert level. Overall role development as an advanced practice nurse is based on nursing knowledge and the utilization of knowledge from other disciplines.

The American Nurses Association's definition of advanced nursing practice provides a general framework for the master's program curriculum:

_Nurses in advanced practice have a graduate degree in nursing. They conduct comprehensive health assessments. They demonstrate a high level of autonomy and expert skill in the diagnosis and treatment of complex responses of individuals, families and communities to actual or potential health problems. They formulate clinical decisions to manage acute and chronic illness and promote wellness. Nurses in advanced practice integrate education, research, management and consultation into their clinical role and function in collegial relationships with nursing peers, physicians, professionals and others who influence the health environment (American Nurses Association, 1991, 2003, 2004)._  

Advanced nursing practice is concerned with the recognition and treatment of complex human responses in health and illness within a specific patient population. Theory and research are viewed as integral to advanced practice. Clinical judgment is a decision making process that uses diagnostic, therapeutic and ethical reasoning to identify and respond to patients' needs. This process is used to isolate problems and implement research-based and theory-based nursing interventions to achieve desired patient outcomes.

Specialization occurs through the acquisition of in-depth knowledge about life processes as well as identification of responses and phenomena occurring in a particular patient population. The application and use of theory and research are essential elements of advanced practice. Master's students select their area of specialization at the time they apply. Advanced practice nursing specialty programs are currently offered in the areas of: adult-gerontology primary care nurse practitioner, family nurse practitioner, pediatric primary care nurse practitioner, women's health nurse practitioner, family psychiatric-mental health nurse practitioner, clinical nurse specialist (currently not admitting students) and CRNA / nurse anesthetist. Specialization is augmented by courses in research and evidence-based practice and by support courses and electives.
**Master's Program Objectives**

1. Implement a philosophy of nursing congruent with the Judeo-Christian values that support the intrinsic worth of each human being.
2. Synthesize theory, research, and values within a conceptual framework to guide advanced practice nursing in a specialized area.
3. Integrate knowledge from science and the humanities to generate diagnostic, therapeutic, and ethical nursing & healthcare.
4. Develop organizational and systems leadership skills to promote critical decision making supporting high quality and safe patient care.
5. Apply methods, instruments and performance measures and standards for quality improvement within an organization.
6. Use evidence-based research findings to inform clinical practice, promote change and disseminate new knowledge.
7. Utilize technology to deliver, enhance, communicate, integrate, and coordinate care.
8. Intervene at the system level through policy development and advocacy strategies to influence health and health care.
9. Collaborate, consult and coordinate continuity of care with clients and other health professionals regarding prevention and strategies that improve the health of individuals, families, and populations in a diverse and global society.
10. Synthesizes information and experiences to promote personal and professional growth and commitment to lifelong learning.

**Accreditation & Certification**

The Connell School of Nursing accredited by the Commission on Collegiate Nursing Education (CCNE).

Graduates of the Master’s program are eligible to apply to take the certification examinations offered by the credentialing bodies of their specialty.

**Curricular Overview of the Master’s Program**

Students may enter the master’s program through a number of different routes of entry (e.g., traditional, direct master’s entry, RN-MS, etc.) and may enroll in one of six clinical specialty tracks (adult-gerontology primary care NP, CRNA / nurse anesthetist, family NP, family psychiatric-mental health NP, pediatric primary care NP, women’s health NP). Therefore, there are several different plans of study available. Examples of program-specific plans of study are included in this section. Students are responsible for reviewing and updating their plans of study every year and whenever changes are made.
The MS curriculum is designed around three components: (a) core content considered basic to advanced practice nursing regardless of specialty area; (b) support courses (electives and required prerequisites); and (c) specialty courses (theory and practicum courses). Core courses provide a foundation for the study of patient responses and therapeutics within each clinical specialty area used by nurses to effectively intervene and resolve patient problems. The clinical specialty courses consist of a two-semester sequence (fall-spring) and include a total of 18 credits taken over the two-semester sequence. The support courses are cognates, electives, or other required prerequisite courses that support the student’s development as an advanced practice nurse in his/her area of specialization.

(A) CORE COURSES
Core courses provide content that is generic and central to all the areas of advanced nursing practice; this knowledge is then applied within the course of each specialty.

NURS 7415 Conceptual Basis for Advanced Practice Nursing (3 cr.)
This core course discusses the theoretical foundations of advanced practice nursing.

NURS 7416 Ethical Issues in Advanced Practice Nursing (3 cr.)
This core course focuses on the ethical responsibilities of the advanced practice nurse and current ethical issues in health care.

NURS 7417 Role of Advanced Practice Nurses (3 cr.)
This core course focuses on the role of the advanced practice nurse within complex health care systems.

NURS 7420 Advanced Pharmacology Across the Life Span (3)
This core course provides the advanced practice nurse with an understanding of pharmacology and pharmacotherapeutics as they relate to the advanced practice nurse, including prescribing.

NURS 7430 Advanced Health Assessment Across the Life Span (3 cr.)
This core course is designed to provide advanced practice nursing students with planned classroom and laboratory experiences to refine health assessment skills.

NURS 7520 Research Methods for Advanced Practice Nursing (3 cr.)
This core course provides essential understanding of research concepts and methodology as a basis for utilizing research in practice and connecting theory and research in nursing practice.

NURS 7672 Advanced Pathophysiology Across the Life Span (3 cr.)
This core course is a study of physiologic theories applicable to nursing. It focuses on normal and abnormal life processes with application to exemplar cases.

(B) SUPPORT COURSES / ELECTIVES / COGNATES
In addition to core coursework, master’s students are also required to complete elective coursework. Elective courses must be at the graduate level. Elective courses should be selected to contribute to the student’s professional development as an advanced practice nurse in his/her chosen area of specialization, with minimal redundancy of other course content. Most traditional and RN/MS students take two electives. Family psychiatric-mental health students are required to take NURS
Advanced Psychopharmacology as one of their two electives, leaving only one true elective. Students in the nurse anesthesia program take NURS 7525 Integrative Review of Nursing Research and have no other electives. Students who enter through the direct master’s entry program are only required to take one elective; family psychiatric-mental health students who enter through the direct master’s entry program are required take NURS 7426 Advanced Psychopharmacology in lieu of an elective.

Students may choose to take electives through the Connell School of Nursing, through other schools within Boston College (including the Lynch School of Education and the Graduate School of Social Work), or they may complete elective coursework through the University consortium. Students should consult with their academic advisors regarding appropriate elective coursework. The following nursing courses are frequently offered within the Connell School of Nursing and are often used to fulfill the elective requirement(s):

**Nursing Research Elective Courses**
NURS 7524 Masters Research Practicum (3 cr.)
NURS 7525 Integrative Review of Nursing Research (3 cr.)

**Palliative Care Courses**
HLTH7700 Serious Illness, Death, and Dying (3 cr.)
HLTH7702 Responding to Suffering in Serious Illness, Death and Dying (3 cr.)
HLTH7704 Interdisciplinary Leadership in Palliative Care (3 cr.)

**Forensic Nursing Courses**
FORS 5315 Victimology (3 cr.)
FORS 5317 Forensic Mental Health (3 cr.)
FORS 5318 Forensic Science I (3 cr.)
FORS 5319 Forensic Science Lab: 75 hours (1 cr.) (optional)

**Other Nursing Electives**
NURS 5350 Global Health Challenges and Disparities (3 cr.)
NURS 7101 Independent Study in Nursing (3 cr.)
NURS 7426 Advanced Psychopharmacology Across the Life Span (3 cr.)

(C) **SPECIALTY COURSES**
The clinical specialty courses focus on the phenomena and responses of concern for specific patient populations and on development in the role of the advanced practice nurse in the designated clinical specialty. Students develop caseloads of patients and manage health care for varying amounts of time, depending on the clinical specialty, population, and setting.

In the first semester of these specialty courses, the focus is on application of advanced health assessment strategies and understanding of life processes, functional health patterns and human responses to the lived experience. In the second semester courses, intervention becomes more central and the direct care and patient management role is further developed and expanded. Indirect role components are developed. Emphasis is placed on understanding and critiquing the theory and research base behind life processes, human responses, and therapeutic interventions. In each clinical specialty track, students analyze patient care delivery systems for their impact on patient care, nursing and health care delivery, and develop strategies to improve care delivery in that setting. The
generic sequence for the clinical year and the clinical year sequences for each of the clinical specialty tracks are shown below.

**Generic Clinical Year Sequence**  (Total credits: 18)

**Fall Semester**
- Advanced Specialty Theory I  (3 cr.)
- Advanced Specialty Practice I  (6 cr.)

**Spring Semester**
- Advanced Specialty Theory II  (3 cr.)
- Advanced Specialty Practice II  (6 cr.)

**Adult Gerontology Primary Care Nurse Practitioner Program**

**Fall:**
- NURS 7462  Primary Care of Adults and Older Adults Theory I (3 cr.)
- NURS 7463  Primary Care Adult and Older Adult/Advanced Practice Nursing I (6 cr.)

**Spring:**
- NURS 7562  Primary Care of Adults and Older Adults Theory II (3 cr.)
- NURS 7563  Primary Care of Adult and Older Adult/Advanced Practice Nursing II (6 cr.)

**Family Nurse Practitioner Program**

**Fall:**
- NURS 7470  Community and Family Health Advanced Theory I (3 cr.)
- NURS 7473  Primary Care of Families/Advanced Practice Nursing I (6 cr.)

**Spring:**
- NURS 7570  Community and Family Health Advanced Theory II (3 cr.)
- NURS 7573  Primary Care of Families/Advanced Practice Nursing II (6 cr.)

**Family Psychiatric Mental Health Nurse Practitioner Program**

**Fall:**
- NURS 7438  Advanced Practice Theories of Psychotherapy (3 cr.)
- NURS 7437  Advanced Practice Psychiatric Nursing Across the Life Span I (6 cr.)

**Spring:**
- NURS 7538  Advanced Theories of Family & Group Psychotherapy (3 cr.)
- NURS 7537  Advanced Practice Psychiatric Nursing Across the Life Span II (6 cr.)

**Pediatric Primary Care Nurse Practitioner Program**

**Fall:**
- NURS 7450  Women & Children's Health Advanced Practice Theory (3 cr.)
- NURS 7457  Pediatric Primary Care/Advanced Practice Nursing I (6 cr.)

**Spring:**
- NURS 7556  Advanced Clinical Decision-making in Pediatric Primary Care (3)
- NURS 7557  Pediatric Primary Care/Advanced Practice Nursing II (6 cr.)
Women’s Health Nurse Practitioner Program

Fall:
NURS 7450  Women & Children’s Health Advanced Practice Theory (3 cr.)
NURS 7453  Women’s Health Advanced Practice Nursing I (6 cr.)

Spring:
NURS 7550  Current Issues in Sexual Health Care Across the Lifespan
NURS 7553  Women’s Health Advanced Practice Nursing II (6 cr.)
Traditional MS Nurse Practitioner (NP) Program

Unlike some of the other MS programs (e.g., Direct MSE, CRNA), the traditional MS NP program does not have a set plan of study. Although some courses are pre-requisites for later courses, there is some flexibility in when students take courses and in whether they study on a part-time or full-time basis. NURS 7420 Advanced Pharmacology Across the Life Span must be completed prior to or concurrent with the first clinical specialty practice course. In addition, NURS 7430 Advanced Health Assessment Across the Life Span, should be taken in the spring semester or summer session just prior to enrollment in the first clinical specialty practice course. Students are assigned a clinical placement year at the time of admission. Students should contact the graduate office to develop a plan of study tailored to their specific needs and to discuss the availability of clinical seats should they wish to accelerate or decelerate their plan of study. Students are admitted directly into the clinical specialty program to which they applied. Students who wish to change specialties must contact the graduate office and both program directors, apply and be accepted into the desired specialty program. Acceptance is not guaranteed and may slow completion of the degree.

Curriculum for the Traditional MS NP Program (Total = 45 credits)

Accelerated Direct Master’s Entry (MSE) Program

The MSE program is an accelerated program designed for individuals who have a baccalaureate or master’s degree in another field and who are not already nurses. In this program, students complete extensive pre-requisite courses prior to acceptance and enrollment. They study and complete generalist nursing requirements on an intensive full-time basis during the first 11 months of the program. After passing the NCLEX-RN exam and receiving a license as a registered nurse, they then proceed into the master’s level coursework in their specialty program. In order to progress to the second year (master’s level), students must be in good academic standing and be licensed as registered nurses.

Applicants are reviewed and accepted into the clinical specialty program to which they apply and are assigned a clinical placement year at that time. Students who wish to slow down and attend part-time during the second year should contact the graduate office to find out when a clinical seat would be available. Students who wish to change special programs must contact the graduate office and the two program directors, apply and be accepted into the desired specialty program. Acceptance is not guaranteed and may slow completion of the degree as the clinical year is assigned on a space available basis. MSE program students are not eligible to apply to the nurse anesthesia program because admission to this program requires a minimum of one year of experience as a registered nurse in an intensive care setting.

**CRNA / Nurse Anesthetist Program**

The CRNA / nurse anesthetist program is a collaborative effort between the Connell School of Nursing and Anesthesia Associates of Massachusetts. The curriculum takes advantage of the core courses common to all advanced practice nursing specialties and combines these with the advanced physiologic and pharmacologic principles specific to nurse anesthesia practice.

**CRNA Program – Plan of Study (Total 70 credits effective for class of 2018)**

CRNA students participate in clinical practica at a variety of off-campus clinical sites and in on-campus clinical simulation activities; this provides students with a broad range of hands-on experiences. Clinical placements may be located outside of the Boston area. Students are responsible for providing their own transportation and all costs pertaining to that transportation.

There is no part-time plan of study in the CRNA Nurse Anesthetist Program. The 70 credit curriculum must be taken in sequence and completed over 27 months of full-time study. Beginning with incoming students in 2016 the curriculum will include 70 credits. The program received a full 10 year accreditation by the Council of Accreditation of Nurse Anesthesia Educational Programs in 2016. CRNA students should refer to the CRNA Student Handbook for additional policies and procedures that apply to them and their participation in the CRNA / Nurse Anesthetist Program.
Clinical Practice

The Clinical Placement Office is responsible for collecting and documenting all graduate students’ required immunizations and other requirements and sending appropriate records to each clinical site. The Clinical Placement Office is also responsible for notifying students about (and ensuring compliance with) requirements that are unique to their agencies. The standard requirements include:

- Personal Health Insurance, either private or through BC
- An Immunization and Health Verification Form signed by a health care provider
- Proof of immunity for MMR, Varicella and Hepatitis B; Hepatitis B - 3 vaccines and Titer, MMR - 2 vaccines and Titer, Varicella - 2 vaccines or Titer
- A negative PPD within one year (summer prior to clinical year) or appropriate follow-up if PPD is positive
- Other immunizations required for all BC students: Tdap (with booster), polio, meningitis (or signed waiver), flu
- All graduate students are required to submit updated documentation for expired immunizations
- RN license for the state(s) in which you will have clinical; this is due as soon as you have the RN license and can then apply for malpractice insurance.
- Malpractice Insurance (coverage as an NP student $1 million / $6 million)
- CPR certification within the year not to expire before June of the current year
- CORI record release (Clinical Placement Office Maloney Hall 222 – student must bring picture ID)
- Copy of Resume/Curriculum Vitae
- All students entering the clinical year must complete the On-Line Clinical Application process https://htmldbprod.bc.edu/clinicalapp

In addition, certain sites may require a two-step PPD or PPD within 60 days of the start date. Individual sites may have additional requirements.

Students are not allowed to attend any clinical activities and are not allowed in clinical agencies / sites until all clinical requirements have been met and documented with the Clinical Placement Office. It is the student’s responsibility to make sure that all requirements are met prior to the announced deadline. The Clinical Placement Office will notify students who are not in compliance with these requirements. In the event that a student is still not compliant with these requirements
after notification, the TOR for the clinical practicum and the Associate Dean of Graduate Programs will be notified. At this point, clinical faculty will need to follow up and the student(s) should not be allowed in clinical areas until all requirements are met.

**CLINICAL PLACEMENTS & PRECEPTORS**

All advanced practice specialty programs require that students complete a minimum number of hours of precepted and supervised clinical practice in their area of specialization in order to demonstrate competence. The minimum number of clinical hours varies by clinical specialty. The specialty program directors and faculty are knowledgeable about credentialing organizations’ requirements regarding the numbers of precepted and supervised clinical hours that must be completed and the variety of clinical sites in which clinical practica should occur, in order for a student to demonstrate competence and qualify to sit for the certification examination in his/her specialty. As such, the program director or designated faculty member assigns clinical placements based upon the program requirements, the requirements of credentialing organizations, and the students’ learning needs. The Assistant Director of Clinical Placement and his/her staff assist specialty program directors with arranging placements and ensuring that clinical site contracts and preceptor documentation are in place and verified prior to clinical placements.

Students should not attempt to arrange their own clinical experiences, nor should they make changes to their clinical placements. Students are encouraged to bring ideas for new clinical sites to the program director. Sites and preceptors must be reviewed and approved by the program director and the Clinical Placement Office. Clinical placements that are not approved and arranged in accordance with school policies cannot be counted towards the minimum clinical hours required for credentialing. In order to avoid potential conflicts of interest, clinical preceptors should not be family members or family friends of students they are asked to precept. Similarly, students should not engage in personal relationships with preceptors and clinical supervisors in order to avoid the perception of conflict of interest and bias. Clinical placements may be located outside of the Boston area. Students are responsible for providing their own transportation and all costs pertaining to that transportation.

Students are assigned a clinical year at the time of admission. Students who wish to change their clinical year will be accommodated when possible on a space-available basis. Scheduling of clinical practica may vary from year to year. Students must have up-to-date immunizations, malpractice insurance, background checks and complete all other pre-clinical requirements prior to participating in any clinical placements. In the clinical setting, students should clearly identify themselves with a name badge as a Master’s student in the Boston College Connell School of Nursing.

Students must complete their assigned clinical hours within the academic semesters. In the event a student needs to complete clinical hours during school breaks, they need to contact the Graduate Programs Office as soon as possible.

**CLINICAL HOURS DURING INTERNATIONAL SERVICE LEARNING TRIPS AND EXPERIENCES**

Graduate nursing students who wish to participate in international service learning trips and experiences and have those hours count towards the required supervised and precepted clinical hours for their specialty program should contact their specialty program director. Clinical hours from international service trips and experiences must be pre-approved by the specialty Program Director, Assistant Director of Clinical Placement and Associate Dean of Graduate Programs. The ability to
count these experiences towards the minimum number of clinical hours required to sit for certification exams varies by specialty and depends upon many factors, including the credentials of the supervising faculty and preceptors. In addition, international clinical experiences must:

- be supervised by a BC faculty member
- be precepted by an approved BC preceptor
- include a 1:1 ratio if the preceptor is seeing patients or 1:2 if not seeing patients
- include direct patient care
- record and document clinical hours accurately

LIABILITY INSURANCE
Students who are registered nurses (RNs) must arrange for their own individual malpractice liability insurance as advanced practice nursing students. Nurse anesthesia students will obtain student nurse anesthetist liability insurance through the American Association of Nurse Anesthetists when instructed to do so by the program director. Master's students must provide evidence of individual liability insurance and RN licensure prior to enrollment in a course with an advanced practice (APRN) clinical component.

IMMUNIZATION/HEALTH REQUIREMENTS
Commonwealth of Massachusetts law requires all graduate nursing students to show evidence of satisfactory immunization against measles, mumps, rubella, tetanus, diphtheria, varicella, and hepatitis B. Students are also required to have the meningitis vaccine or sign a waiver if they decide not to be immunized against meningitis. Students who fail to provide adequate documentation of immunizations will not be permitted to register and attend classes. The only exceptions permitted are when immunization requirements conflict with personal religious belief or when a physician documents that immunizations should not be given due to pre-existing medical problems. The Connell School of Nursing also requires certified evidence of good health and an annual TB test completed just prior to enrollment in a clinical practicum course. More frequent testing for TB may be required by specific clinical agencies. Some clinical sites may require drug testing.

EXPANDED NATIONAL BACKGROUND CHECKS (ENBC)
Hospitals and health care agencies that are used by the Connell School of Nursing for clinical experiences require that all students and faculty undergo expanded national criminal background checks before they can be at that agency. The mechanism for this is called a ENBC or iCORI check. All master's students must have on file in the graduate office permission for Boston College to obtain ENBC checks and permission for the actual ENBC requests. Failure to have these on file could prevent a student from participating in a clinical practicum. A background check that comes back positive (i.e., shows a misdemeanor or felony) may prevent the student from participating in a clinical practicum.

Clinical agencies may refuse to take students with positive criminal histories. This could potentially delay or prevent completion of the program. Students are encouraged to contact the Clinical Placement Office (csoncp@bc.edu). Some school systems and other health care agencies may also require fingerprinting. Some organizations require that fingerprinting be completed through their designated fingerprinting agency. Students will need to complete the requirements of the specific agency where they will be placed for clinical practica. Flexibility may be required as requirements change over time.
SAFE, COMPETENT AND PROFESSIONAL CLINICAL PRACTICE

Graduate students from the Connell School of Nursing who are engaged in clinical practica courses and other types of supervised clinical training experiences are expected to perform and practice in a manner that is at all times safe, competent, and consistent with the Nurse Practice Act and the ANA Nurses’ Code of Ethics. Unsafe or incompetent clinical practice and/or unprofessional conduct are grounds for failure in any clinical course and may result in immediate removal from the clinical site. Students who demonstrate unsafe or unprofessional conduct in a clinical practice site will undergo academic review and may be placed on probation or dismissed from the program (please see ACADEMIC PROGRESSION AND REVIEW).

DOCUMENTATION OF SUPERVISED CLINICAL EXPERIENCES

It is the student’s responsibility to maintain written documentation regarding supervised clinical experiences and practica. Specific requirements for clinical documentation are determined by the program director. In general, at a minimum, this documentation should include dates, hours, preceptor, agency, population focus, age group seen and activities. Although clinical logs are signed off at the time of the master’s comprehensive examination, it is the student’s responsibility to continue to document any additional hours that are completed after the comprehensive examination and obtain the appropriate supervisor’s sign-off. Students should maintain their own educational, immunization, and training records in a portfolio after graduation. The graduate office is limited in the number and type of student records it can retain and for how long these records may be kept. There may be circumstances in the future (e.g., DNP program, moving to new state, change in credentialing requirements) when students may need detailed documentation of supervised clinical practica and the graduate office may not have these records.

BLOOD-BORNE PATHOGENS

Every clinical student in the Connell School of Nursing is required to complete yearly training in Standard Precautions, Prevention of Blood Borne Pathogens and Prevention of Tuberculosis. The training modules are located on the Centralized Clinical Placement website of the Massachusetts Department of Higher Education. This website is updated yearly. Completing training modules is a professional responsibility and required for participation in clinical nursing courses.

Students who are exposed to blood or bodily fluids will immediately notify their on-site clinical instructor or preceptor and they will follow the protocols for Occupational Exposure to Blood-Borne Pathogens in place at their clinical site. If the agency does not have a protocol for occupational exposures, then the student should be directed to the nearest emergency room for treatment. At the earliest reasonable time, but no later than 24 hours, the student and faculty will notify the appropriate academic Associate Dean in the Connell School of Nursing.

The Connell School of Nursing will document student exposures according to OSHA Requirements as they apply.

TUBERCULOSIS

Connell School of Nursing graduate students are not routinely assigned to care for patients with active tuberculosis or suspected tuberculosis because they have not been fit-tested for a respirator mask.
Students who have been inadvertently exposed to tuberculosis should be directed to the University Health Services OR to their primary health care provider. The student and faculty will notify the appropriate academic associate dean in the Connell School of Nursing.

Current policies consistent with existing OSHA and CDC guidelines will be posted in the simulation laboratory.

If a student, while engaged in clinical practice activities, has an exposure to potentially infected body fluid from a client, the student should do the following:

a. Immediately remove soiled clothing and wash the exposed area with soap and water.
b. Notify faculty member.
c. Report to nearest emergency room on site at the agency or as directed by the University Health Service within 1-2 hours
d. Identify self as student with a possible HIV/HBV exposure
e. Give close attention to filling out the Incident Report for the agency, the Connell School of Nursing and University Health Services. A copy of the agency report form must be forwarded to the Associate Dean of Graduate Programs within 72 hours of the exposure.

Boston College will assume the financial responsibility, if necessary, for emergency assessment and interventions through the first 72 hours after an exposure incident. No member of the Boston College community, either student or faculty member, shall be denied medical evaluation and counseling. The Connell School of Nursing will keep a confidential record of medical treatment and evaluation according to OSHA standards.

REASONABLE ACCOMMODATIONS FOR QUALIFIED INDIVIDUALS WITH DISABILITIES IN CLINICAL COURSES

** Adapted from the model technical standards in Marks and Ailey, White Paper on Inclusion of Students with Disabilities in Nursing Educational Programs for the California Committee on Employment of People with Disabilities (CCEPD), and the web-published technical standards of the University of Pennsylvania School of Nursing and the New York University College of Nursing.

The Connell School of Nursing is committed to providing educational opportunities to otherwise qualified students with disabilities and/or learning differences. Such students will be provided with opportunities equal to those provided to non-disabled students to achieve desired educational outcomes. A “qualified individual” with a disability is one who, with or without reasonable accommodations, meets the Connell School of Nursing’s academic requirements and Technical Standards. Students with disabilities are not required to disclose their disability to the Connell School of Nursing. However, students wishing to request reasonable accommodations must register with Boston College’s Connors Family Learning Center (CFLC) and/or Disability Services Office (DSO) to initiate the process.

Section 504 of the Rehabilitation Act of 1973 and the Americans with Disabilities Act define a person with a disability as someone who: (1) has a physical or mental impairment that substantially limits one or more major life activities; OR (2) has a record of such an impairment; OR (3) is regarded as having such an impairment. Students are encouraged to meet with a CFLC and DSO representative
when unsure if a condition qualifies as a disability. Please note that limitations created by short-term illnesses are not normally covered by these guidelines.

The CFLC or DSO determine qualified disability status and assist students in obtaining appropriate accommodations and services. Decisions regarding reasonable accommodations are made on a case by case basis taking into consideration each student's disability-related needs, disability documentation and program requirements. While the process for requesting reasonable accommodations may be started at any time, reasonable accommodations may not be implemented retroactively. It is therefore important that students allow ample time for their accommodation requests to be processed. While the Connell School of Nursing will make every effort to work with students with disabilities to accommodate their learning difference or disability-related needs, the Connell School of Nursing is not required to provide accommodations that fundamentally alter or waive essential program requirements.

This information is intended to facilitate discussions between the Graduate Program Office and other school officials, faculty, and students as a list of capabilities believed to be necessary to participate and succeed in a clinical education with or without reasonable accommodations. If you believe you may have a qualifying disability or are concerned that you require reasonable accommodations to meet any of these technical standards, you may contact DSO, CFLC, or the Associate Dean for further information. Clinical or lab faculty may also come forward to the Associate Dean’s office to indicate concerns regarding these technical standards for participation in clinical placements that will then be discussed with the student with appropriate steps taken.
## Technical Standards Competency Domains

<table>
<thead>
<tr>
<th>Domain</th>
<th>Standards</th>
<th>Examples</th>
</tr>
</thead>
</table>
| Communication               | 1. Able to communicate sensitively and effectively in interactions with clients (patients/persons, families and/or communities)  
2. Able to communicate effectively with the healthcare team (patients, their supports, other professional and non-professional team members). | • Accurately and clearly conveys information to and interprets information from patients and the health care team in spoken and written English.  
• Accurately elicits and interprets information from medical history and other data sources to adequately and effectively evaluate a client’s or patient’s condition.  
• Uses and comprehends standard professional nursing and medical terminology when using and/or documenting in a patient’s print or electronic record.  
• Conveys appropriate information to patients and the health care team and teaches, directs and counsels a wide variety of individuals |
| Psychomotor                 | 1. Able to move in and around care settings, handle equipment safely and participate in the physical care of patients in clinical placement settings | • Possesses sufficient proprioception (position, pressure, movement, stereognosis, and vibration), physical strength and mobility to carry out physical assessments and other nursing procedures  
• Demonstrates sufficient manual dexterity and fine and gross muscular coordination to provide safe general care and specific treatments  
• Demonstrates an appropriate and timely response to emergency situations, including any circumstance requiring immediate and rapid resolution.  
• Navigates patients’ rooms, work spaces, and treatment areas with appropriate precision and speed to carry out the nursing process during the delivery of general nursing care or in emergency situations.  
• Has the endurance to complete all required tasks during a clinical practice day of a customary or contracted length |
| Data gathering and interpretation | 1. Able to observe patient conditions and responses to health and illness  
2. Able to assess and monitor health needs | • Accurately obtains and interprets information from comprehensive assessment of patient status and responses such as assessing respiratory and cardiac function, blood pressure, blood sugar, neurological status, etc.  
• Accurately obtains and interprets information regarding a patient’s environment  
• Synthesizes objective and subjective findings and diagnostic studies in order to formulate nursing diagnoses |
| Critical thinking | 1. Able to think critically, solve problems and make decisions needed to care for persons, families and/or communities across the health continuum in various settings | • Synthesizes and critically interprets data on ongoing basis to carry out the nursing process (i.e. assessment, diagnosis, goals, plan of care, and evaluation)  
• Retrieves and critically appraises reference material to use in a patient’s nursing plan of care  
• Uses information from written documents, demonstrations, and patient records to carry out the phases of the nursing process  
• Accurately follows course syllabi, assignment directions, patient care protocols and corrective learning plans developed by faculty or health care agency staff |
| | 2. Able to accomplish the learning objectives of each course in their specific program as well as the terminal objectives of the program by the time of graduation |  

| Behavior and social interaction | 1. Able to demonstrate concern for others, integrity, ethical conduct, accountability, interest and motivation | • Conforms to all requirements set forth by the Connell School of Nursing’s health care agency’s affiliation agreements as well as any additional regulations and practices specific to a particular clinical settings.  
• Conforms to Connell School of Nursing attendance and clinical dress code/professional appearance requirements for on-campus clinical simulation and off-campus clinical learning session.  
• Maintains effective, appropriate, and empathic communication and relationships with clients/patients, students, faculty, staff and other professionals under all circumstances.  
• Makes appropriate judgments regarding safe, confidential, and respectful care and interactions with patients.  
• Functions calmly and effectively under stress and adapts to changing environments inherent in clinical practice.  
• Integrates constructive criticism from instructors and clinical agency personnel into performance  
• Correctly judges when a nursing intervention requires additional assistance from clinical faculty or clinical agency staff |
| | 2. Possesses interpersonal skills necessary for interactions with diverse populations of individuals, families and communities in the course of the clinical education program |  
| | 3. Possesses interpersonal skills for professional interactions with members of the healthcare team in the course of the clinical education program |  

**Master's Comprehensive Examinations**

At the end of the MS program all students must pass a comprehensive exam, which gives students the opportunity to demonstrate the integration and application of core content with specialty knowledge and skills. This examination also serves as a program outcome measure for the master's degree program.

The exact content and format for the comprehensive examination may vary across specialty programs; these are determined by the program director and faculty of each specialty program. Students should consult the program director of their specialty program to learn the timing and format of the comprehensive examination.

Students must be in good academic standing in order to take comprehensive examinations. The following grading scale is used for the comprehensive examination:

- Pass with Distinction (PWD)
- Pass (P)
- Fail (F)

A candidate who fails the master's comprehensive examination may repeat the examination only once.
Board of Registration in Nursing Regulation Policies

Admission

The undergraduate admission process at Boston College is highly selective. In selecting students, the University Admission Committee adopts a holistic review of applications for admission, ensuring that all aspects of candidates’ applications are carefully considered. While academic preparation is the most important factor considered, admission decisions are made by assessing a wide range of criteria including but not limited to: academic performance, the rigor of applicants’ secondary school or college coursework, performance on standardized tests, writing ability, leadership, recommendations, potential for future success, co-curricular involvement, work experience, and when appropriate, the ability to succeed despite facing significant obstacles or hardships. Students are required to submit the “Common Application” with writing supplement, standardized test scores, and an official high/secondary school transcript.

While there are no minimum cut-offs for undergraduate admission consideration, the typical enrolled student profile includes grades in the range of A/A-, high school class rank comfortably within the Top 10%, and standardized test scores ranging between 1380-1500 on the SAT or 32-34 on the ACT. For international students who do not speak English as their primary language, the recommended minimum English language proficiency scores are 100 on the TOEFL and 7.5 on the IELTS.

Boston College does not set its level of selectivity; the size and quality of the applicant pool does. Therefore, decisions are only made after all applications in each round of the applicant pool have been fully evaluated. This ensures that decisions are equitable and consistent within the context of our highly competitive pool.
For the entering class of 2023 overall, just 27% of more than 35,000 applicants were admitted to the university. Admission selectivity varies between each of the four undergraduate divisions: Morrissey College of Arts & Sciences, Carroll School of Management, Lynch School of Education & Human Development and the Connell School of Nursing. The Connell School of Nursing (CSON) is the most selective, admitting just 23% of its applicants this year.

The faculty of CSON have developed technical standards competency domains that they believe to be necessary for participation and success in clinical education with or without reasonable accommodations. The Director of Undergraduate Admission, the Office of Admission Nursing liaison, and the Dean of the Connell School of Nursing are in frequent communication to ensure that the academic quality and preparation of incoming students meets the Faculty’s expectations and standards.

Progression

ACADEMIC STANDARDS, POLICIES & RESOURCES

The CSON Academic Standards Advisory Committee composed of the professors responsible for the NURS courses in the BS (nursing) program meets at the end of each semester to review the records of students with course failures, course deficiencies, low GPAs, or other academic concerns. This Committee makes recommendations about progression in the program in accordance with the policies described below and other relevant university policies. Final progressions decisions are made and implemented by the Associate Dean.

GOOD ACADEMIC STANDING/WARNING STATUS

In order to remain in good academic standing, all CSON undergraduates must maintain a cumulative grade point average (GPA) of 2.0 in NURS courses and a 1.67 overall cumulative GPA. If either GPA falls below the relevant minimum standard, the student will be placed on warning status for one semester during which the GPA must be brought up to the minimum. A student on warning status or leave of absence for more than one semester may be dismissed from the School of Nursing. A student who does not follow the School of
Nursing curriculum for two semesters will be dismissed from the School of Nursing. Furthermore, a student who fails to demonstrate performance consistent with the safe and ethical practice of professional nursing will be subject to review and possible dismissal from the School of Nursing. Students must achieve a minimum GPA of 2.0 (C) in the 15 science and mathematics credits taken in the first year. This average, weighted by credits, is based on grades in BIOL1300, 1310, 1320, 1330 (Anatomy & Physiology lectures and labs), CHEM1161, 1163 (Life Science Chemistry with lab), and MATH1180 (Statistics). This requirement, based on lengthy experience with student progressions, is intended to minimize failures in sophomore and higher-level nursing courses where the minimum passing grade is C-. The records of students who have not met the 2.0 science GPA requirement (or who have withdrawn from any of the science or mathematics courses) will be reviewed at the December & May meetings of the Academic Standards Advisory Committee. Students will then be notified of progression decisions by the Associate Dean. Students must achieve a grade of C- or higher in all required nursing courses in the program (i.e., courses with a NURS course number, beginning with NURS 2070). If a student does not meet the minimum of a C- in any NURS course, (s)he will be required to retake it before advancing in the curriculum, will be placed on warning status and will normally be unable to progress until the deficit is remediated. At Boston College a grade of B or better is normally required of students reattempting a course after a failure or a withdrawal to avert a failure. A student may repeat a nursing course only once after withdrawing from it or not achieving a C- in it. Students will be dismissed from the School of Nursing after 2 nursing (NURS) course failures and/or withdrawals to prevent failures in NURS courses.

DEFICIENCIES

CSON undergraduate students are expected to successfully complete 30 credits by the beginning of the second year, 60 credits by the beginning of the third year, and 90 credits by the beginning of the fourth year. A total of 117 credits, including all core and nursing courses, is required for graduation. If a student withdraws from a course, fails a course, or underloads (i.e., takes fewer than 15 credits per semester), the student incurs a deficiency. Deficiencies should be made up as soon as possible. In some cases, a deficiency involving science or nursing courses will prevent a student from moving on in the curriculum. A deficiency may be remediated by taking courses in the summer at Boston College or another accredited 4-year college approved by the Associate Dean. (See guidelines for Summer Courses, page 39.) STUDENT ATHLETES

CSON professors make every effort to accommodate the needs of student athletes. It is the student’s responsibility to discuss practice, game, and travel schedules with their professors.
before the beginning of each semester. In the case of conflicts, academic obligations must come first. If you are a student with a documented disability seeking accommodations, please contact Kathy Duggan at 617-552-8093, at the Connors Family Learning Center regarding ADHD and learning disabilities, or Rory Stein, Assistant Dean for Students with Disabilities at 617-552-3470, in the Disability Services Office regarding all other types of disabilities. According to course syllabi, students seeking test or exam related accommodations must provide their professors with appropriate documentation from CFLC or DSO within the first TWO weeks of the semester. Later notification may not allow sufficient time for arrangements. Tests and exams will be taken on the originally scheduled exam date unless the Professor/Teacher of Record gives explicit permission for a student to sit for them on another day. CSON faculty and other BC professors will provide reasonable accommodations as soon as possible after the student establishes his or her need for an accommodation and the relevant office communicates with the course professor. Retroactive accommodations, such as revisions to grades or opportunities to retake tests or exams or resubmit assignments after declaration and documentation of a qualifying disability, will not be provided. The Americans with Disabilities Act (ADA) defines retroactive accommodations as “... accommodation[s] ... when the student has already incurred absences, performed poorly on tests, or otherwise failed to meet the academic expectations of the course.” It is the student’s prerogative whether or not to request accommodations. In any given semester, a student may choose to request accommodations for no courses, some of their courses or all of their courses. However, students are encouraged to provide documentation to CFLC and/or DSO for evaluation as early as possible in their time at BC and should inform professors of their intentions to request any accommodations specified in their letter from CFLC and/or DSO at the beginning of the semester whenever possible. Students should also bear in mind specific considerations related to clinical courses on page 30 under the “Clinical Laboratory/Reasonable Accommodations for Qualified Individuals with Disabilities in Clinical Courses” section of this handbook.

Attendance

CLASS ATTENDANCE

Students are expected to attend classes regularly, take tests, and submit papers and other work at the times specified by the professors on the course syllabi. A student who is repeatedly absent from class or clinical placements will be evaluated by the Teacher of
Record for the course to determine whether (s)he can achieve the course objectives and should continue in the course. Students are expected to notify faculty prior to a scheduled clinical laboratory session or scheduled examination if they will be absent or tardy. Students may not leave class or lab early to attend another course. (For example, if Adult Health I Clinical Lab ends at 2pm, students should not register for another course that starts at 2pm.) Please consult each course syllabus for attendance-related policies. Note that professors may consider the quality and quantity of the student’s participation in class in calculating course grades.

Professors will provide reasonable notice of tests and examinations based on content covered in class lectures and discussions, as well as other assigned material. A student who is absent from class on the day of a previously announced examination, including the final examination, does not have an automatic right to make up assessments. The professor involved is free to decide whether make-up tests or assignments will be allowed. A student who is absent from class is responsible for obtaining class materials and information about announced tests, papers, or other assignments.

LATE PAPERS / PROJECTS Students are responsible for submitting all written work for a course to the instructor by the published deadline in the syllabus. These deadlines tend to be taken very seriously in universities. Professors are not obliged to grant extensions or accept any work submitted beyond announced deadlines. If a student has a legitimate reason for being unable to submit work on time, he or she may request that the Associate Dean contact their professors with a letter or e-mail of explanation, but all arrangements must be negotiated directly between the student and professor. Normally, barring health or personal emergencies, extension requests should be received no less than 24 hours prior to the given assignment or exam date. Without 24 hours’ notice, the extensions will not be granted.

COURSE EXTENSIONS If any assignments will be submitted after the final examination in a course is taken, a formal extension is required from the professor. Instructors are under no obligation to grant such extensions. The professor submits an “I” (Incomplete) for the course grade, which is automatically changed to an “F” on March 1 for the fall, August 1 for the spring, and October 1 for the summer unless the professor has removed the “Incomplete” notation by entering a specific grade.

LOST WORK Students are responsible for ensuring that their instructors receive assignments (on paper or electronically) on time. Students should learn to use the learning management system (Canvas) assignment upload features, verify e-mail addresses, and always make a copy of a paper or project before it is submitted, especially if it is mailed or left at an office rather than handed to an individual.

CLINICAL ATTENDANCE
Students are expected to attend their clinical placements each week. Please see the general absence policy on pages 19. Each clinical course has different policies and procedures in regards to makeup of missed clinical hours, which are outlined in the respective course syllabus. CSON’s contracts with clinical agencies prohibit students from being in settings outside of contracted days and times. Students may NOT negotiate with their clinical instructors to come in early, stay late, or shadow for a day in any setting outside of the assigned clinical dates/times. If a student expects to miss more than one clinical due to a health or personal/family emergency, it is imperative that they notify the Undergraduate Program Office immediately. Students should note that missing more than 2 clinical days in any particular course, even if the absences are excused and/or remediated may lead to the student being considered to have not met learning objectives for that course and be required to repeat it.

**Course Exemption**

Students who apply for and are accepted for transfer to the Connell School of Nursing after completion of their freshman year will be exempt from NURS1010 Freshman Nursing Professional Seminar as this course is specifically geared to first semester freshman in their transition to college. A waiver form will be sent to student services and “waived” will appear on the student’s degree audit. The only other exemption possible in CSON is for the same transfer students specified above for MATH1180. The Math department has designated this course as “Freshmen only” thus students entering CSON after freshman year will need to enroll in a University approved math core (or meet the criteria for exemption based on Advanced Placement - see that criteria) and a Statistics course to satisfy both the university and CSON requirements. Upon completion of the above courses, the UG dean will complete a course substitution form to reflect completion of the Math core.

**Advanced Placement**

ADVANCED PLACEMENT

Following university policy, students who have achieved acceptable scores on specific College Board Advanced Placement and some other types of examinations are eligible to
receive recognition that waives specific core requirements and allows students to use free electives to meet credit requirements normally filled by core courses. Details are available at:

http://www.bc.edu/admission/undergrad/process/freshman/advanced-placement.html

Please note that although AP Biology, Chemistry, Statistics and Calculus are useful preparation for the nursing-related science course sequence, because of differences in content covered in these courses/examinations relative to nursing requirements, high scores on these examinations do not waive any of the science and mathematics courses required of first-year CSON undergraduate students. 13 ELECTIVES Beyond required nursing major courses and the Core Curriculum, the current School of Nursing curriculum requires students to complete at least three elective courses in any field(s) of interest to them. Students who have received Advanced Placement standing to address specific Core Curriculum requirements will complete additional electives to reach the 117 credits required for graduation from the Connell School of Nursing.

**Transfer**

**TRANSFER OUT OF CSON TO MCAS/LSOE/CSOM**

Students may decide or be required to transfer out of CSON to the Morrissey College of Arts and Sciences (MCAS), Lynch School of Education (LSOE), or the Carroll School of Management (CSOM). Each school has different criteria for transfer and different program requirements. Furthermore, internal transfer places may be severely restricted and no guarantees can be provided about acceptance, particularly to the other professional schools. Students should also note that there are often credit, GPA, and subject requirements for transfer as well. Students are only normally permitted one change of school or college through their undergraduate careers at Boston College. First-year students who decide not to enroll in the nursing-related science courses at Orientation will not be given a spot in the nursing clinical course sequence that begins in the sophomore year. They will be required to sign a form “waiving” (or giving up) their right to a place in the second year of the BS (nursing) program at orientation. They should note that until a transfer is official, their home school is CSON and their advisor of record will be the Undergraduate Program Office for the rest of the first year. That being said, these students are urged to seek academic
advising in their intended school as soon as possible to make informed course choices. They will have the entire academic year to find a school (MCAS, LSOE or CSOM), make an internal transfer application and be accepted to another program. Any such students who have not completed the internal transfer process by July 1st immediately following their first year will be asked to leave Boston College.

POLICY ON TRANSFER OF CREDITS FOR COURSES FROM OTHER ACADEMIC INSTITUTIONS

Credits for coursework taken outside of Boston College by students transferring to the University from other colleges/universities are approved by: 1) the Admissions Office for non-nursing courses completed before matriculating at Boston College; 2) the appropriate BC department as well as the Associate Dean for core courses; or 3) the Associate Dean for electives, and all nursing courses and nursing-specific science courses (e.g., Anatomy & Physiology, Microbiology, Statistics, and Life Science Chemistry). For nursing courses, the Associate Dean reviews course syllabi and confers with course faculty as needed to determine equivalence to Boston College courses prior to acceptance of the credits. All nursing-related science courses taken outside of Boston College after enrollment at CSON to meet program requirements (such as microbiology courses in the summer before the sophomore year) will count towards the student’s overall GPA and are never taken for enrichment purposes. Approval from the Associate Dean must be granted before the student enrolls. Nursing courses taken abroad in Boston College-approved programs can potentially be used in place of specific required nursing courses. The Associate Dean works with the Office of International Programs when such a course substitution is proposed. The Associate Dean and Boston College faculty teaching the equivalent CSON course review the syllabus and supporting materials to determine equivalence in content, contact hours, type and degree of supervision, assignments and grading criteria. Boston College policy determines the maximum number of credits allowed for transfer and the university’s policies on credit and grade translation apply.

GRADUATE COURSES AS AN UNDERGRADUATE

Undergraduate students who have a 3.0 cumulative GPA may take graduate courses from the list available on the Undergraduate Program website. Students may apply up to two courses taken as undergraduates towards graduate program requirements in the future if the course credits earned are beyond the 117 required for the B.S. degree. [Many graduate
programs, including CSON’s, allow students to transfer a maximum of two graduate-level courses taken before formally enrolling.

**Educational Mobility**

**POLICY ON TRANSFER OF CREDITS FOR COURSES FROM OTHER ACADEMIC INSTITUTIONS**

Credits for coursework taken outside of Boston College by students transferring to the University from other colleges/universities are approved by: 1) the Admissions Office for non-nursing courses completed before matriculating at Boston College; 2) the appropriate BC department as well as the Associate Dean for core courses; or 3) the Associate Dean for electives, and all nursing courses and nursing-specific science courses (e.g., Anatomy & Physiology, Microbiology, Statistics, and Life Science Chemistry). For nursing courses, the Associate Dean reviews course syllabi and confers with course faculty as needed to determine equivalence to Boston College courses prior to acceptance of the credits. All nursing-related science courses taken outside of Boston College after enrollment at CSON to meet program requirements (such as microbiology courses in the summer before the sophomore year) will count towards the student’s overall GPA and are never taken for enrichment purposes. Approval from the Associate Dean must be granted before the student enrolls. Nursing courses taken abroad in Boston College-approved programs can potentially be used in place of specific required nursing courses. The Associate Dean works with the Office of International Programs when such a course substitution is proposed. The Associate Dean and Boston College faculty teaching the equivalent CSON course review the syllabus and supporting materials to determine equivalence in content, contact hours, type and degree of supervision, assignments and grading criteria. Boston College policy determines the maximum number of credits allowed for transfer and the university’s policies on credit and grade translation apply.

**Withdrawal**

**ALTERNATIVE GRADUATION PLANS**
Nearly all CSON undergraduate students graduate in the May ceremonies following eight (8) semesters of full-time enrollment. However, due to course failures/withdrawals and/or leaves of absence for personal or health reasons, graduation dates may move to August or December of the originally forecasted graduation year or to a subsequent year. There are also special circumstances under which CSON undergraduates can finish the BS (nursing) degree within 7 semesters of attendance.

WITHDRAWAL FROM A COURSE

If a student wishes to withdraw from a course after the drop/add period is over, s/he must request approval from the Associate Dean. When a student withdraws from a course, a “W” will appear on the official transcript, but no grade is averaged into the GPA and no credit is given. The decision to withdraw should be considered carefully with the student’s academic advisor and the Undergraduate Program Office. A withdrawal may create a credit or course deficiency and affect a student’s academic progression, so a low passing grade may be preferable to a withdrawal under some circumstances. Withdrawals must be completed before the posted deadline each semester. After the deadline, withdrawals will be approved only in the most exceptional circumstances.

LEAVES OF ABSENCE

Undergraduate nursing students in satisfactory academic standing (minimum 1.67 cumulative GPA and 2.0 GPA in nursing courses) may take a leave of absence. If a student takes a leave of absence after the end of the drop/add period but before the deadline for course withdrawals, a grade of “W” will be listed on the 40 transcript for all courses they were enrolled in that semester. A number of University policies apply to the process. Students considering a leave of absence are urged to discuss options with their advisor and/or the Undergraduate Program Office as early as possible. The student must complete a leave of absence form available at http://www.bc.edu/content/dam/files/offices/stserv/pdf/leaveofabsence.pdf, discuss plans with his/her advisor or the Associate Dean, and obtain approval from the Associate Dean. Although readmission is normally guaranteed, returns from leaves of absence for health as opposed to personal reasons have special conditions involving submission of documentation before and after the leave to University Health Services or Counseling and the Associate Dean may also specify conditions for reentry. The student must apply for readmission from a leave at least four months before any semester when (s)he will be enrolled in any clinical
courses (i.e. from the second semester of sophomore year onward) through the Undergraduate Program Office. Please note that the Bachelor of Science (nursing) program is designed for eight (8) semesters of continuous enrollment and Boston College does not allow part-time studies for undergraduates in day school programs. While some delays in program completion and extensions to plans of study can be allowed, repeated leaves (particularly more than two) will interfere with building skills and knowledge in the manner intended by the curriculum and may be grounds for dismissal from the program. After two semesters of not following the nursing curriculum (see the general template on page 11), students will be dismissed from the BS (nursing) program.

Readmission

SHORT-TERM ABSENCES FROM CLASS AND/OR CAMPUS

Students may be excused from class for reasons including, but not limited to, illness, death/critical illness of a family member, personal emergency, or religious observance according to BC policy (http://www.bc.edu/offices/stserv/academic/univcat/undergrad_catalog/policies_procedures.htm#religious). Students will NOT be excused for non emergency absences that have not been authorized in advance and/or for reasons including but not limited to medical/dental appointments, job interviews or employment obligations, and personal or family events or celebrations. Students who will be absent from campus because of illness or other circumstances should notify the Undergraduate Program Office immediately. At Boston College, an undergraduate student’s 19 Undergraduate Program Office normally serves as the intermediary between students and all faculty (inside and outside their school) regarding absences related to illness or personal issues to ensure fairness and consistency and protect student privacy. Students may choose to contact and/or disclose information to their professors individually as they see fit; however, students should note that some or all of their professors both inside and outside CSON may insist on confirmation from the Undergraduate Program Office. Students should consider their health and personal life information (including the nature of any health conditions and specific treatments) as private. They should think carefully before disclosing specific details of reasons for their absences to faculty or staff—in most cases the specifics are irrelevant to the granting of accommodations, extensions or excused absences. Normally, sharing information to the Undergraduate Program Office leads to the Associate Dean or Assistant Director communicating with that student’s professors and clinical faculty inside and outside the
School to request flexibility and/or accommodations to enable the student to complete any course requirements in an appropriate time frame. It is particularly important to inform the Undergraduate Program Office as soon as possible in situations where obligations in multiple courses need to be coordinated. However, please note that it is ultimately the student’s responsibility to make arrangements for makeup assignments/tests/exams with individual professors. The Undergraduate Program Office reserves the right to ask for confirmation from a healthcare provider that the student was seen and (if relevant) the time period that was judged appropriate for return to class or to request corroboration of information regarding personal circumstances for which an excused absence has been requested. The onus is normally on the student to arrange for this information to be transmitted to the Undergraduate Program Office. A prolonged absence (normally, approaching or exceeding 2 weeks) may ultimately necessitate the student going on a leave of absence from Boston College for the semester (see page 39, Leaves of Absence). Course withdrawals and leave of absence requests require approval by the Associate Dean.

Graduation

Beyond required nursing major courses and the Core Curriculum, the current School of Nursing curriculum requires students to complete at least three elective courses in any field(s) of interest to them. Students who have received Advanced Placement standing to address specific Core Curriculum requirements will complete additional electives to reach the 117 credits required for graduation from the Connell School of Nursing.

ALTERNATIVE (ACCELERATED/DEFERRED) GRADUATION

Please Note: The information in the next section will be relevant to a very small number of students and is provided for reference only. Students and their advisors are encouraged to contact the Undergraduate Program Office for clarifications as needed. ALTERNATIVE GRADUATION PLANS Nearly all CSON undergraduate students graduate in the May ceremonies following eight (8) semesters of full-time enrollment. However, due to course failures/withdrawals and/or leaves of absence for personal or health reasons, graduation dates may move to August or December of the originally forecasted graduation year or to a subsequent year. There are also special circumstances under which CSON undergraduates can finish the BS (nursing) degree within 7 semesters of attendance. These circumstances are explained in the next two sections. a) ACCELERATED GRADUATION DECEMBER
GRADUATION Because no AP examinations in sciences or mathematics meet CSON requirements and there are no AP equivalencies for the Theology and Philosophy core, a maximum of 18 credits of core equivalence can be granted in the BS (nursing) degree through advanced placement. Therefore, CSON undergraduate nursing students admitted as freshmen do not qualify for Advanced Standing Graduation as described on the BC website. (http://www.bc.edu/admission/undergrad/process/freshman/advanced-placement.html). However, with sufficient planning of core courses, taking core and elective classes in summer sessions or as overloads, and with advance permission from the Undergraduate Office to move through the required clinical courses at an accelerated pace, students who can complete all program requirements by the end of their 7th semester will be allowed to graduate in December of their original graduation year. It is critical that students inform the Undergraduate Program Office of their interest in this plan no later than the pre-registration period for fall semester of their junior year (i.e. by second semester of sophomore year). This arrangement is subject to the availability of space in clinical courses and the Undergraduate Program Office reserves the right to limit the number of students allowed to take this path. IMPORTANT: Please note effective Spring 2018, there are financial penalties imposed on students who use overloads (greater than 15 credits in a semester) or summer classes at universities other than BC to meet credit requirements within 7 semesters. There will be financial aid considerations to be kept in mind as well. Students exploring this option are urged to consult the Undergraduate Office as early as possible. Students who complete graduation requirements in December can attend a Graduation Mass in December and may attend commencement ceremonies the following May. They may only participate in senior week activities in the May following graduation. Please contact the Offices of Student Involvement and Residential Life for more information. December graduates can apply for licensure immediately after their degrees are granted.

b) DEFERRED GRADUATION

AUGUST GRADUATION Students who have up to six (6) credits of incomplete coursework or unfulfilled program requirements at the end of their final spring semester may walk and participate in the May commencement ceremonies. They complete degree requirements over the Summer session immediately after May graduation. However, such students receive their degrees and normally become licensure-eligible in August.

DECEMBER GRADUATION Students who, after the Spring semester of their senior year, have more than six (6) credits of program requirements outstanding or require courses that are not offered in the Summer semester will normally enroll in an additional semester of at least twelve (12) credits the following fall and graduate in December. Students who complete graduation requirements in December can attend a December Graduation Mass and may participate in commencement ceremonies the following May. They may only participate in Senior Week activities the following May. Please contact the Offices of Student Involvement
and Residential Life for more information. December graduates can apply for licensure immediately after their degrees are granted.

NURSING THEORY/CLINICAL COURSES

Students are guaranteed access to all required nursing and nursing-related science courses to permit graduation within 8 semesters. Access to specific clinical sequences or sections and to any specific courses outside of CSON not required for the nursing major is subject to availability of space and is not guaranteed. In the first and second year, students take a common sequence of nursing and nursing-related science classes and will choose cores and electives. In the junior and senior years, the Undergraduate Program Office determines the exact clinical sequence for each student with specific consideration to the scheduling needs of student athletes, ROTC members, students who are studying abroad, and students with a special plan of study. Rising seniors who apply and are accepted for the population health trips (Chile, Dominican Republic, Haiti, and Nicaragua) will be randomly assigned a corresponding nursing course to take along population health (I.E. Pedi, Psych, Synthesis). A limited number of placements for each clinical course is available each semester. Therefore, not all students in the same class year will be in the same clinical sequence over the four semesters of junior and senior year. However, all students will be able to enroll in all the necessary nursing classes in order to graduate on time. Before the registration period for each semester, juniors and seniors will be told exactly which nursing theory and clinical courses to enroll in. While we make extensive efforts to accommodate student needs and interests and cocurricular commitments, no promises can be made regarding special requests. PLEASE NOTE: The Undergraduate Program Office has the right to change a student’s clinical sequence at any time leading up to the start of each semester. The Undergraduate Program Office will work with students in scheduling new core or electives courses in the rare instance a change in the clinical sequence occurs.

Student Rights and Grievances

ACADEMIC EVALUATION DISPUTES/ GRIEVANCES

Instructors are expected to provide a syllabus specifying due dates for assignments and examinations and the weight given to each course component in determining the final grade. The instructor has the right to determine which course components will be graded
and the weight that will be given to each, and is responsible for grading students consistently. Students who believe that they have been graded unfairly should first meet with the instructor, bring a copy of the paper or exam in question, and request an explanation for the grade. Students who have discussed the grade with the instructor and still feel that the grade was unfair may appeal to the Teacher of Record and/or the Chairperson. If this discussion does not produce a resolution the student finds satisfactory, a formal appeal may be filed with the Associate Dean. The detailed grievance procedure is posted on the CSON website under Current Student Resources for Current Students/Undergraduate.
