### Lynch School of Education Themes

Programs in Teacher Education at Boston College have five unifying themes. Although no single course in teacher education addresses all the themes in depth, each Teacher Candidate will have explored and reflected on all the themes prior to and during the full practicum. The Department of Elementary & Secondary Education (ESE) Professional Standards for Teachers as well as the Boston College themes are aligned to all practicum requirements and to the BC-Candidate Assessment of Performance (BC-CAP).

1. **The 5 unifying themes are:**

   **Promoting social justice:** At B.C. we see teaching as an activity with political dimensions, and we see all educators as responsible for challenging inequities in the social order and working with others to establish a more just society.

   **Constructing knowledge:** At B.C. we regard all teachers and students as active agents in their own learning, who draw on prior knowledge and experience to construct new knowledge in interaction with texts, materials, and other learners.

   **Inquiring into practice:** At B.C. the curriculum is intended to bridge the gap between research and practice by fostering critical reflection and by treating classrooms and schools as sites for teacher research and other forms of practitioner inquiry.

   **Meeting the needs of diverse learners:** At B.C. we believe that one of the central challenges of teaching is meeting the needs of all learners; especially as the school population becomes more diverse in race, culture, ethnicity, language background, and ability/disability.

   **Collaborating with others:** At B.C. prospective teachers are encouraged to collaborate with each of the stakeholders in the educational process (other teachers, administrators, human services professionals, parents, community members) and with fellow students and professors.
2. The Massachusetts Department of Elementary & Secondary Education (ESE) Professional Standards for Teachers (PST):

Effective January 2014, ESE identified the following Four Professional Standards for Teachers. All course work and field experiences are aligned to the PSTs in ways that are developmentally appropriate in terms of introduction to, practice with, and demonstration of each Standard and performance indicator. Standards 5 and 6 have been added, with ESE approval, to reflect B.C. themes and mission and are essential components of the BC-CAP during the full practicum experience.

1. Curriculum, Planning & Assessment: Promotes the learning and growth of all students by providing high quality and coherent instruction, designing and administering authentic and meaningful student assessments, analyzing student performance and growth data, using this data to improve instruction, providing students with constructive feedback on an on-going basis, and continuously refining learning objectives.

2. Teaching All Students: Promotes the learning and growth of all students through instructional practices that establish high expectation, create a safe and effective classroom environment, and demonstrate cultural proficiency.

3. Family and Community Engagement: Promotes the learning and growth of all students through effective partnerships with families, caregivers, community members, and organizations.

4. Professional Culture

5. Demonstrates an Inquiry Stance in a Daily Practice

Full descriptions of the PSTs and effectiveness indicators are available at: http://www.doe.mass.edu/lawsregs/603cmr7.html?section=08
