## INTRODUCTION

The Department of Sociology has two graduate programs: a Master's and a Ph.D. program. The Master's program exists to educate students for whom the M.A. will be the final degree, as well as to train students who will subsequently go on to doctoral work. The Ph.D. program is designed for students who intend to devote themselves to teaching, research, and practice in sociology. It should be emphasized that the M.A. and Ph.D. programs are distinct from each other. Admission to the former does not automatically imply admission to the latter.

The following is a summary of the departmental rules, regulations, and policies which define these programs. The time requirements for completion of courses and qualifying examinations apply to those with no prior graduate training. Adjustments in expectations and requirements will be made when advanced credit is obtained for courses taken elsewhere. Individual cases which may warrant waiving the rules can be discussed and will be handled as flexibly as possible.

For the policies applicable to the Boston College Graduate School of Arts and Sciences as a whole, see <http://www.bc.edu/schools/gsas/policies.html>.

## **ADMISSION TO GRADUATE STUDY**

The Department encourages superior students, regardless of their undergraduate area of specialization, to apply for admission. Application for admission is made directly to the Graduate School of Arts and Sciences (GSAS), following the instructions on the Graduate School of Arts and Sciences website at <http://www.bc.edu/schools/gsas/admissions.html>.

## **THE FACULTY ADVISOR**

Each student must have a faculty advisor at all times. The Director of Graduate Studies will serve as the advisor on formal program requirements for all the incoming Ph.D. students as well as M.A. students. In addition, the Graduate Recruitment Director and the Director of Graduate Studies will assign all incoming students, both M.A. and Ph.D., substantive advisors based on students' declared interests and in consultation with faculty members involved. During their first year in the program, students are then expected to select a substantive advisor of their own choice (in consultation with the Director of Graduate Studies) -- that can be the same person who was assigned as the advisor in the beginning or a different one. As their interests change, students should feel free to change advisors. However, students must notify the Graduate Program Director and the Administrative Staff, so that they can update the records and inform the previous advisor of the change.

Ph.D. students in their third year and beyond should consult with their substantive advisors at least once during each term concerning their progress to date and their plans for the coming term. First and second year Ph.D. students as well as all M.A. students should consult with both their substantive advisors and the Director of Graduate Studies (who serves as their advisor on formal program requirements) at least once during each term concerning their progress to date and their plans for the coming term. A faculty meeting to review the progress of graduate students and to make recommendations will be held annually.

## **INCOMPLETE COURSE GRADES**

Graduate students who are unable to complete course requirements by the end of the semester may request a grade of “Incomplete” from the professor. No additional work can be submitted after the date the university system automatically converts the “Incomplete” grade into an “F,” which occurs on August 1 (for the spring semester) and March 1 (for the fall semester). After that, the student may ask the instructor to change the grade (if warranted) based on credit for work done in the course prior to that time.

## **GRADE POINT AVERAGE**

All students in the Graduate School of Arts and Sciences (GSAS) are required to maintain a minimum cumulative average of 3.0 (see <http://www.bc.edu/schools/gsas/admissions.html>). The grade point average of sociology graduate students will be reviewed each year in the annual evaluation (see below).

## **ANNUAL EVALUATION**

The academic performance of all graduate students in the sociology department, including GPA, Incomplete course grades, and overall progress in the program, will be reviewed each year by May 15. The academic performance of M.A. students and first- and second-year Ph.D. students will be reviewed by the faculty members of the Graduate Studies Committee. The academic performance of all other Ph.D. students will be reviewed in an annual meeting of the faculty held each year at the end of the spring semester. In anticipation of this, each Ph.D. student in his or her third year and above will be required to submit an Annual Evaluation Fact Sheet to the department for review.

### **DEGREE REQUIREMENTS: MASTER OF ARTS IN SOCIOLOGY AND SOCIAL RESEARCH**

The Master's degree is particularly suitable for students planning to subsequently apply to Ph.D. programs in order to prepare for scholarly careers in teaching at colleges and research universities, although it can also be useful for students interested in practicing sociology in an applied setting (e.g., academic administration or policy research). The Master's degree is completed by passing ten courses (30 credit hours), including five required courses, and having Plans of Study approved by the Director of Graduate Studies for every semester spent in the program (Plans of Study are only required for those enrolled in the terminal M.A. program). Students also have an option to complete a Master's Examination, including a Master's Thesis or Paper, but it is not required for degree completion.

### **REQUIRED COURSES**

The core required courses for the M.A. degree are:

- One course in sociological theory (either SOCY7715 or SOCY7716)
- Two graduate-level courses in statistics (some options include SOCY7702, SOCY7703, SOCY7704, SOCY7705, SOCY7706, SOCY7708, SOCY7709).
- A one-semester course, Social Inquiry Research Seminar (SOCY7710): Students should take the Social Inquiry Research Seminar (SOCY7710) the first semester of their first year; note that this seminar also requires students to attend the first-year proseminar which meets weekly in conjunction with the departmental seminar.
- One additional methods course:
  - a) Those who do not plan to write a Master's paper/thesis will select this additional methods course in consultation with the Director of Graduate Studies. This course can be on either qualitative or quantitative methods; with permission of the Director of Graduate Studies, the student may use SOCY5540 Internship in Sociology or an applied course aimed at building career skills (such as a course in writing grant proposals) to fulfill this requirement.
  - b) Those planning to write a Master's paper/thesis (which should include all students obtaining their M.A. as part of their Ph.D. training) should meet this requirement by attending the Empirical Research Seminar (SOCY7711) in the Spring semester of their first year; this seminar will help students develop and refine their M.A. paper/thesis projects. Note that this seminar also requires students to attend the first-year proseminar which meets weekly in conjunction with the departmental seminar.
    - a. Students who choose to write a Master's Thesis or Paper and take a Master's examination are required to take SOCY7761: Second Year Graduate Writing Seminar (students officially register for this biweekly year-long three credit course in the Spring of their second year; in the Fall of their second year, students

working on their Theses/Papers are expected to register for a Research and Readings (R&R) course with their thesis advisors).

### **Overall Requirements for M.A. Coursework**

- Seven courses (21 credit hours) must be regular classroom courses (i.e., not independent study courses such as Readings and Research or Research Practicum). Occasionally, a special course which is listed for administrative reasons as Readings and Research may be run on a classroom basis and thus is considered to be a classroom course.
- Up to three courses (9 credit hours) may be taken in an approved minor field or fields outside Sociology. Exceptions to this rule will be made on a case by case basis.
- Up to two courses (6 credit hours) of graduate work from another institution taken prior to enrollment at BC can be accepted as credit toward the M.A. degree. Approval for transfer of such credit is the responsibility of the Graduate Program Director. Students should apply for transfer credit during their first semester at BC rather than waiting until they are ready to graduate.

### **THE PLANS OF STUDY**

All students working on their terminal M.A. degrees are required to submit an updated plan of study to the Graduate Program Director every semester by the end of the first week of classes. A Plan of Study includes a brief description of the kind of career the student plans to pursue (which can change from one semester to the next as students' interests and aspirations evolve), an outline of the courses he or she already took and plans to take and an explanation how these courses help meet his or her career goals, and an optional statement regarding an M.A. Thesis or Paper. Specifically, those who want to write a Master's paper or thesis must include a statement in their second semester update and specify their thesis advisor (after securing that advisor's agreement to supervise a Master's thesis/paper).

### **THE MASTER'S EXAMINATION**

The Master's Examination is optional; the students have to get an approval of the Director of Graduate Studies if they wish to pursue this option. The request to pursue this option should be made in the beginning of the second semester of study, when submitting the second Plan of Study to the Director of Graduate Studies. The Master's Examination includes two components, a written component and an oral component. The written component is satisfied by the completion of a Master's Thesis or a Master's Paper as described below. Whether the product is designated as a Master's Thesis or Master's Paper is the student's choice. Both should aim toward a standard of sufficiently high quality so as to be accepted for presentation at a professional conference or meeting. The oral component takes the form of a one-hour oral presentation and discussion of the Master's Paper or the Master's Thesis. The oral component will address issues of theory, methodology, policy, and substance raised by the Thesis or Paper.

A **Master's Thesis or Master's Paper** may assume any of the following forms:

- An empirical study involving the analysis of quantitative or qualitative data.
- An original analytic contribution to theoretical literature in sociology.
- A policy analysis pertaining a particular social “issue” or “problem.”

Requirements for both the Thesis and the Paper:

- Establish an examination committee consisting of two members. Members include:
  - A Thesis/Paper Advisor who is selected by the student as Committee Chair (with that faculty member's consent). The Chair must be a member of the Sociology Department.
  - A second member, who is selected by the committee chair in consultation with the student and approved by the Graduate Studies Director. The second member may be any faculty member with a Ph.D., in the Sociology Department, Boston College, or another college or university.
- Develop the analysis in consultation with the committee members and submit the final draft to the committee.
- Conduct an oral defense involving a presentation or discussion with the committee, and including others as appropriate. The final grade for the M.A. Thesis/Paper can be Fail, Pass, or Pass with Distinction.

Additional requirements for Master's Thesis **only**:

- Meet formatting criteria established by the Graduate School of Arts and Sciences, to be found at <http://www.bc.edu/schools/gsas/academics/thesis-guide.html>. See also related forms and the Thesis checklist at <http://www.bc.edu/schools/gsas/currentstudents/studentforms.html>.
- Submit completed copy of Thesis to GSAS, following the guidelines referenced above, by the due date (see end of M.A. section).

The advantage of completing a Master's Paper rather than a Master's Thesis is that there are no special formatting requirements, and that a copy need not be turned into GSAS. The advantage of completing a Master's Thesis is that it is filed in the library, and thus has a more official status as a public document; M.A. students intending to apply to Ph.D. programs may elect to complete a Thesis for this reason. A Thesis is also eligible for competition for external awards for M.A. Theses. Other than these procedural differences, there is no substantive distinction between an M.A. Thesis and an M.A. Paper.

To assist students in producing Master's Theses or Papers, the department offers two faculty-led seminars: SOCY7711 Empirical Research Seminar, to be taken in the Spring semester of the first year in the program, and SOCY7761 Second Year Graduate Writing Seminar, a biweekly year-

long three credit course typically taken during the second year in the program (students officially register for it in the Spring of their second year; in the Fall of their second year, students working on their Theses/Papers are expected to register for an R&R with their thesis advisors). Both seminars are open to all Master's students who received an approval from the Graduate Program Director for their request to write a Master's thesis or paper as well as to all Ph.D. students. These seminars support students in all aspects of research and writing M.A. Theses/Papers. Participation in these seminars is required for everyone working on an M.A. Thesis or Paper.

Students are also encouraged to solidify a close advising relation for the execution of the Master's Thesis or Paper, and to take additional Readings and Research courses with committee members, as needed, to work on their Thesis or Paper.

#### **FINAL STEPS FOR COMPLETING MASTER'S EXAMINATION**

- The Committee Chair should email the Administrative Staff, copying the Graduate Program

Director, with the following information:

- o Title of the work

- o A brief abstract

- o Date of completion

- o Committee members

- o Whether the student completed a Master's Thesis or Master's Paper

- The student will fill out the Master's Comprehensive Form (available in 426), get the appropriate signatures, make a copy for the Administrative Staff, and distribute as indicated on the bottom of the form.

- Students completing a **Master's Thesis** should submit the final copy to GSAS as specified above under Additional Master's Thesis requirements, by the relevant due date (see below).

#### **FINAL STEPS FOR COMPLETING M.A.**

Both Ph.D. and M.A. students who plan to complete their M.A. need to have the administrative staff check their transcripts, in advance, to determine that all course requirements have been met. M.A. students who will leave the program after graduating with their Master's degree should also verify that Student Services has their correct graduation date on Agora Portal by clicking on "Graduation Information – View/Update." If the student plans on graduating sooner than the date given in Agora, the student should email the responsible person at GSAS (currently Associate Dean Hetzner at [hetzner@bc.edu](mailto:hetzner@bc.edu)) and request a date change. If the graduation date is later than the date given on Agora, the student should fill out a Petition for Extension form (found on <http://www.bc.edu/schools/gsas/currentstudents/studentforms.html>), get the appropriate signatures, make a copy for the Administrative Staff, and take it to GSAS.

Doctoral students completing an MA: submit an **MA Comp** form to Student Services, and a **Master's Degree Option** form to MGSAS.

Master's students completing an MA with thesis or paper: submit an **MA Comp** form to Student Services.

Master's students completing an MA without thesis or paper: submit an **Applied Master's Report** to Student Services.

All forms are located in the main office and must be signed by the Director of Graduate Studies.

#### **UNIVERSITY DUE DATES**

**All graduation-related paperwork—the Master's Comprehensive Exam report, Master's Degree Option form, and the formatted Thesis, if appropriate—should be submitted by December 1 in Fall, by August 1 in Summer, and by the date posted on the Academic Calendar (<http://www.bc.edu/offices/stserv/academic/current/calendar/>) in Spring.**

## **DEGREE REQUIREMENTS: DOCTOR OF PHILOSOPHY**

The Doctoral degree is completed by:

- Obtaining a Master's degree in the department, including the completion of ten courses, the completion of a Master's thesis or paper, and passing an oral defense (see Master's degree requirements above; while a Master's thesis or paper is optional for those pursuing a terminal M.A. degree from our program, it is a requirement for Ph.D. students).
- Taking an additional eight courses, or the equivalent credits of independent research, beyond the Master's degree in Sociology, including a third graduate-level Research Methods course. The 54 credits (classes plus independent research) needed for completion of the Ph.D. degree include eight required courses (see below).
- Meeting a one year full-time residency requirement. (Full-time residency is a three course load for two consecutive semesters, exclusive of the Summer session.)
- Passing a Comprehensive Examination, consisting of two area examinations and an approved Doctoral Dissertation proposal.
- Completing a doctoral Dissertation and passing an oral defense.

### **COURSE REQUIREMENTS**

Among the 54 credits (classes plus independent research) needed for completion of the Ph.D. degree, there are eight required courses:

- A two-semester, 6-credit sequence in sociological theory (SOCY7715, SOCY7716). These should be completed by the end of the fourth semester.
- A three-course, 9-credit sequence in research methods: Social Inquiry Research Seminar (SOCY7710) is taken during the first semester of study, Empirical Research Seminar (SOCY7711) is taken during the second semester of study, and Graduate Writing Seminar (SOCY7761), a year-long biweekly three credit course, is taken in the second year of study. (Students officially register for SOCY7761 in the Spring of their second year; in the Fall of their second year, students working on their Theses/Papers are expected to register for a Research and Readings (R&R) course with their thesis advisors while simultaneously attending SOCY7761).
- Two 3-credit graduate-level courses in statistics (some options include SOCY7702, SOCY7703, SOCY7704, SOCY7705, SOCY7706, SOCY7708, SOCY7709). These should be completed by the end of the fourth semester.
- An additional graduate research methods class (for example, in field research, feminist methodology, advanced quantitative techniques, workshop in historical sociology).

It is also recommended that PhD students take at least one, and possibly two, substantive electives during their first year in the program.

In the third year, it is expected that students will complete their 54 credit requirement by enrolling for a significant number of independent research credits through three-credit Readings

and Research (R&R) courses or six-credit Research Practicums (RPs). However, students planning to take a comprehensive examination in Quantitative Methods are expected to take more classes and fewer independent research credits in their third year.

### **SECOND-YEAR MASTER'S THESIS OR MASTER'S PAPER**

In order to assure that Ph.D. students complete high quality research aimed at professional conference paper presentation and publications early in their graduate careers, all Ph.D. students are required to complete and defend a Master's thesis or paper by the end of their fourth semester of graduate studies (see rules for Master's Thesis or Paper above). The administrative guidelines above must be followed to ensure that the M.A. degree is awarded by the university and recorded by the department.

A revised (if necessary) version of the completed Thesis or Paper may be submitted as a component of one of the two Specialty Area Examinations required of all Ph.D. students. (See rules for "Publishable Paper Option" for Specialty Area Examinations.)

All Ph.D. students are expected to have completed and defended their M.A. Thesis or Paper by June 1 of their second year. If the student fails to defend the Thesis/Paper by September 30 of the third year, he or she will be transferred from funded Ph.D. to unfunded M.A. student status in the Spring semester of the third year. The only students exempted from this rule are those whose prior M.A. theses from other graduate programs have been officially accepted as substituting for the BC M.A. Thesis/Paper by the Graduate Program Director (see "Transfer from Other Programs" section below).

### **TRANSFER FROM OTHER PROGRAMS**

Ph.D. students who have already completed an M.A. or taken relevant courses at another university may receive credit for this in a variety of ways. The Graduate Program Director evaluates and approves all transfers of credit.

- Ph.D. students with relatively recent M.A. degrees in sociology may receive credit for some or all prior coursework, as determined by the Graduate Program Director. They may also receive credit for their M.A. degree, as determined by the Graduate Program Director.
- Ph.D. students who have completed an M.A. at another university without doing a Master's Thesis or Paper as part of the degree will be required to complete this work at Boston College.
- Ph.D. students with relatively recent M.A. degrees in fields other than sociology, including interdisciplinary degrees, may receive credit for some prior coursework if they can demonstrate the sociological character of the courses in question. They may also receive credit for their M.A. degree if they can demonstrate the sociological character of the thesis in question. Whether prior coursework and/or the prior M.A. can be applied to the student's BC degree will be evaluated by the Graduate Program Director.

- Although a Ph.D. student with an M.A. degree in another field may be waived out of the M.A. requirement, such a student is nevertheless strongly encouraged to acquire a BC sociology M.A. Such a degree may benefit this student when they are looking for sociology teaching positions. The courses required for the BC sociology M.A. are also required for the Ph.D.—getting an M.A. thus involves no additional coursework. Moreover, if the student elects to submit an article to a journal to fulfill one of their area exams (see section on Comprehensive Examinations below), a preliminary draft of this article can be used to satisfy the M.A. paper requirement, as long as the student subsequently meets with the two readers to get feedback on that paper. In short, acquiring a sociology M.A. involves almost no additional work, provided the student chooses the journal article option for one of their area exams.

### **Research and Scholarship Integrity Program**

In the first year, students – beginning with the cohort incoming in 2015 – must complete both components of the Research and Scholarship Integrity Program. This program is comprised of participation in:

- 1) A General Session, offered on a Saturday twice per academic year (October and March).
- 2) Four lunchtime Seminar Sessions, offered throughout the academic year.

Sessions may be completed in any order. Register for sessions such that completion is recorded on the transcript: <http://www.bc.edu/research/vpr/rsi.html>

## **Comprehensive Examinations**

The Comprehensive Examination consists of three parts: two examinations in specialty areas of the student's choice, and a doctoral Dissertation proposal. Each component is worth 1/3 of the student's total grade. Grades to be assigned for each component are Pass, Pass with Distinction, or Fail. A student must obtain a grade of at least Pass on each component of the examination.

### **Specialty Area Examinations**

Ph.D. Students are expected to pass two specialty area examinations by the end of their sixth semester of study (end of the third year). Specialty area examination may include the following options:

- An approved reading list and take-home examination in an approved area of specialization (for one or both area examinations).
- A paper of publishable quality submitted to a refereed scholarly journal. This option can be used to fulfill only one of the two area exams, except with special permission from the Graduate Program Director.
- A specialty area exam in quantitative methods, involving an oral exam based on a series of brief reports submitted in advance of the oral examination and designed to demonstrate competence in a variety of advanced statistical methods. This option can be used to fulfill only one of the two area exams.

For each specialty area examination, students must have a committee consisting of two members. The membership of the two committees should not overlap. Members include:

- A Chair who is selected by the student (with that faculty member's consent). The Chair must be a member of the Sociology Department.
- A second member, who is selected by the committee chair in consultation with the student. The second member may be any faculty member with a Ph.D., in the Sociology Department, Boston College, or another college or university.

The Graduate Program Director must approve the suggested areas (for oral and take-home examination options) and committee members (for all examination options). Normally, s/he will follow the student's suggestions but, in some cases, s/he might suggest alternatives for the areas or for the committee's second member. The student may petition the Graduate Program Director for permission to have a single faculty member serve on both committees if s/he absolutely cannot find anyone else with the necessary expertise, but the norm is to work with a total of four faculty members on the two committees. Please note: the two specialty area examination committees should be established well ahead of the completion of the exam.

Students are encouraged to take Readings and Research courses with committee members to prepare for their area examinations. In lieu of a final paper, students may request that the examination be used to determine the final grade.

### **Take-Home Examination Option**

Take-home specialty area exams are three-day, take-home exams. They may be taken in any of the subfields recognized as sections by the American Sociological Association (ASA), listed below, in any of the official faculty clusters (described below), or in other areas of sufficient breadth, to be cleared by the Graduate Program Director. The area so defined must have a breadth comparable to those listed, and cannot be a narrowly-defined specialty within one of those areas (e.g., on “Aging and the Life Course,” but not on “Retirement” or “The Social Psychology of Aging”). In picking two areas, the student should avoid picking areas in which there is so much overlap that they might be seen as a single specialty. The BC sociology department also has a special area exam in advanced quantitative methods (see below).

The reading list that serves as the basis for a take-home examination should be approximately comparable to 2 graduate course syllabi, and is developed by the student in consultation with the two committee members. Based on the reading list, the student and committee members develop a list of 5-8 study questions, from which the final two questions will be drawn.

The questions are generally e-mailed to the student by the Chair of the specialty area exam committee or by the Administrative Staff at 9:00 a.m. on an agreed-upon day. The answers should be returned electronically to the person who sent out the original exam by 9 a.m. three days later (e.g., the student receives the exam on Friday morning and returns it by Monday morning). If there is a need to deviate from this time schedule, approval from the Graduate Program Director is necessary. For example, students for whom English is not a native language may be granted extra time. Students are allowed no technical (library assistance, etc.) or intellectual assistance in the writing of their specialty area exams. The written product of the take-home exam should ordinarily be approximately 20 pages, double-spaced (i.e., 2 essays of approximately 10 pages each, not including bibliography).

The Specialty Area Exam Committee will normally grade the area exam within two weeks, and in any event, by a date not more than 30 days from its completion. Upon the grading of the exam, the student and their committee members should schedule a one-hour feedback meeting to discuss the strengths and weaknesses of the exam. The final grade will be determined after that meeting, and will be one of the following: Pass, Pass with Distinction, Revise and Resubmit, or Fail. A grade of at least Pass is required by both readers.

In the event that the student receives a Revise and Resubmit, they will have two weeks to provide a revised version of the exam based on the comments of the Specialty Area Exam Committee on the original version. The Revise and Resubmit version will be given a grade of Pass, Pass with Distinction, or Fail. Upon passing the exam, the student should follow the “Final Steps” instructions below.

### **Publishable Paper Option**

To fulfill one of the specialty area examinations, a student may prepare a paper to be submitted for publication to a refereed sociology journal. Students may also petition the Graduate Program Director to permit a submission to a journal outside the discipline if they can demonstrate the

sociological character of their work. The paper to be submitted should be single-authored. However, with the approval of the student's two-member examination committee, a co-authored paper may be submitted for review, on the condition that the student has had primary responsibility for the research and writing and is listed as first author on the version of the paper being submitted.

Students who opt for the Area Exam paper option may use the second year Master's Thesis or Paper as its basis. If the committee agrees that it is already of publishable quality, it could on rare occasions be submitted as is. However, in most cases the second year paper will require further revision before being submitted for publication.

Following a judgment by the two members of the examination committee that the paper is of sufficiently high quality to be submitted for publication to a refereed journal, a one-hour oral examination will be scheduled to discuss both the paper and the general specialty area within which the paper is situated. Following the oral examination on the paper and specialty area, the student will be awarded a grade of Pass, Pass with Distinction, or Fail. The examination concludes when, following the successful completion of the oral examination, the paper is submitted for publication to the referred journal selected by the student and approved by the examining committee, at which point the student should follow the "Final Steps" instructions below.

### **Quantitative Methods Option**

In the Quantitative Methods examination, students review a variety of different statistical methods and prepare brief reports on each method. The goal is to demonstrate that they understand how to interpret the results of their analysis and understand the relevant statistics. The set of reports generally requires a few months to prepare. The amount of material covered is to be equivalent to two statistics courses beyond the level of SOCY7703. (Some possibilities include SOCY7704 Topics in Multivariate Statistics, SOCY7705 Advanced Statistics, and SOCY7706 Longitudinal Analysis.) Students can decide in consultation with the faculty members teaching graduate statistics courses whether they need to attend particular courses or already have sufficient background to use the methods without additional formal instruction. The general practice is to get a written agreement with the two committee members in advance concerning which statistical methods will be covered. Students are urged to consult with the faculty members teaching graduate statistics courses for help in the selection of the appropriate methods to be included. A one hour oral examination will also be given that will be based on the analysis presented in these reports. Following the oral examination, the committee will award the student with a grade of Pass, Pass with Distinction, or Fail. Upon passing the exam, the student should follow the "Final Steps" instructions below.

### **Final Steps for Specialty Area Examinations**

Once the student receives a passing grade for each specialty area exam, the Committee Chair should also email the Administrative Staff with the student's name, the title of the work, the committee members, the grade, and the completion date.

## **Faculty Clusters**

Faculty clusters are groups of faculty members with common areas of expertise who agree to serve on area examinations on a regular basis. A current list of sociology faculty clusters is maintained on the departmental website. The guidelines for faculty clusters are as follows:

- To be listed as a faculty cluster, a minimum of three Boston College faculty members must agree to serve on area examination committees in a sociological subfield, including assisting in preparing reading lists, on a regular basis. A minimum of two of these faculty members must be members of the Boston College sociology department.
- If the number of faculty affiliated with a cluster falls below three (due to retirement, etc.), an additional affiliated faculty member must be recruited, or the cluster designation will be removed from the departmental website.
- Clusters have the option of developing lists of core readings in their particular subfields. These core reading lists serve as a starting point for Ph.D. students to build their individual area exam reading lists.

**SECTIONS OF THE AMERICAN SOCIOLOGICAL ASSOCIATION (ASA), 10/2012**

Aging and the Life Course	Latino/a Sociology
Alcohol, Drugs, and Tobacco	Law
Animals and Society	Marxist Sociology
Asia and Asian America	Mathematical Sociology
Body and Embodiment	Medical Sociology
Children and Youth	Mental Health
Collective Behavior and Social Movements	Methodology
Communication and Information Technologies	Organizations, Occupations, and Work
Community and Urban Sociology	Peace, War, and Social Conflict
Comparative and Historical Sociology	Political Economy of the World-System
Consumers and Consumption	Political Sociology
Crime, Law, and Deviance	Population
Culture	Race, Gender, and Class
Economic Sociology	Racial and Ethnic Minorities
Education	Rationality and Society
Emotions	Religion
Environment and Technology	Science, Knowledge, and Technology
Ethnomethodology and Conversation Analysis	Sex and Gender
Evolution, Biology and Society	Sexualities
Family	Social Psychology
Global and Transnational Sociology	Sociological Practice and Public Sociology
History of Sociology	Stratification
Human Rights	Teaching and Learning
International Migration	Theory
Labor and Labor Movements	

## **Doctoral Dissertation Proposal**

As part of the Comprehensive Examination, students must complete a Dissertation proposal, and have that proposal approved by a Dissertation committee. To meet this requirement, students must present their proposal in a public presentation open to all members of the department. When committee members agree the proposal is ready for approval, it should be made available to the department, and a presentation date scheduled for two weeks later. At the presentation, the student will discuss his or her topic, describing the theoretical framework and proposed methods. The student will then respond to questions from committee members. The Dissertation proposal should be completed, presented, and graded by the student's committee members by the end of the fourth year. Possible grades for the proposal will be Pass, Fail, and Pass with Distinction.

The composition of the Dissertation committee is subject to the following guidelines:

- The Committee will consist of at least three faculty members, one of whom will be its Chair.
- The Chair, and at least one other member of the Committee, must be full-time faculty members in the Boston College Department of Sociology.
- Three members must be full-time Boston College faculty.
- Additional members from outside Boston College may be added by mutual consent.
- The composition of each Committee must be approved by the Graduate Program Director. S/he will also review any requests for departures from the above rules.

## **Dissertation Formats**

The traditional sociology dissertation is written in the monograph style, with a single overall argument carried throughout the entire document. However, some students may choose to write their dissertations in the "three-article" style popular in economics and other disciplines. The rules for such dissertations are as follows:

- The three-article format of the PhD dissertation requires that a student produce three manuscripts prepared as journal articles as well as introduction and conclusion chapters framing these articles for a total of at least five chapters.
- To utilize this format, as a first step, the student must get the dissertation committee to agree to the three-article format. The student's committee will decide whether or not a three-article format is suitable for the proposed dissertation and acceptable to all members of the committee. There may be many research topics, research questions, and types of data for which this model will not be considered appropriate by the student's committee.
- Next, the student will need to get a dissertation proposal approved just as for a dissertation in the traditional monograph format. Such a proposal should introduce and outline each of the three articles. If, for some reason, at a subsequent point the student decides that the traditional monograph format is more desirable for her or his dissertation, the student can petition the dissertation committee requesting a shift to the traditional monograph format, a request that will be routinely granted. (Students should use the same petition process to shift from a monograph style dissertation to a three-article style dissertation post-proposal.)

- In general, the articles should fit the following set of criteria to qualify for inclusion:
  - The three articles must all be in the same subarea of sociology. The student's committee will make the determination as to how closely linked the articles can be or must be.
  - No articles written prior to entry into our graduate program can be counted.
  - The three articles must fit the criterion of being based primarily on original quantitative or qualitative empirical research. However, with the permission of the dissertation committee, the student may be allowed to include one article that does not fit this criterion as it may not call for original data collection or preparation. Some examples include, but are not limited to: theoretical articles, policy essays, and methodology articles.
  - Students should be urged to submit their articles for publication as early as possible. If an article has been published prior to the defense of the dissertation, the student must obtain the copyright permission from the copyright holder in order to include the article in the dissertation.
- Overall, the corpus of five chapters (which includes the three articles) must be approved by the student's committee as representing a contribution to the field at least comparable to that of a typical monograph style dissertation in our department. The final determination of dissertation acceptance will be based on the quality of the research and the importance of the overall contribution of the work as reflected by the articles as a set.

### **Final Steps for Dissertation Proposal**

Once the student receives a passing grade for the Dissertation proposal, the Committee Chair should email the Administrative Staff with the Student's name, the title of the work, the grade, and the date of its completion.

### **After Completing the Area Exams and Dissertation Proposal**

Once the area examinations and the dissertation proposal have been completed, the student should fill out the Doctoral Comprehensive Examination Report, available in 426, get the appropriate signatures, make a copy of the Administrative Staff, and distribute as indicated at the bottom of the form.

### **Doctoral Dissertation**

No more than eight consecutive years may pass between the beginning of doctoral studies and the awarding of the degree. Within this limit, no more than five years may pass between the completion of the Ph.D. Comprehensives and the oral defense of the Dissertation.

### **The Dissertation Proposal**

The student must gather a Dissertation committee and secure this Committee's approval of the Dissertation proposal as indicated above. Grading of the proposal by the student's committee members and the department-wide presentation of the proposal should normally be completed by the end of the fourth year.

## **Completing the Dissertation**

The Dissertation committee and the student will determine a mutually understood procedure and timetable for reviewing the Dissertation in progress.

- The student and the Dissertation committee will meet periodically to review the Dissertation in progress.
- In no instance will the student be permitted to submit a completed version of the thesis before the Dissertation committee has had ample time for review of significant segments (as specified in the timetable).
- The student must submit what s/he believes to be a completed version of the thesis to the Dissertation committee at least eight weeks prior to the expected date of the oral defense. The expected date of the defense will be decided upon by the student and the Committee.
- The Dissertation committee may request revisions, which could delay the expected date of the oral defense. Such requests for revisions must be made in writing within four weeks after the date of receipt of the draft. When all members of the Committee approve the thesis version, the date of the oral defense may be established.
- Students have the option of appointing, in consultation with the Dissertation Committee Chair, additional readers who have not served on the student's Dissertation committee.
- The oral defense is considered a public meeting to which the Department faculty, students, and any other interested members of the academic community are invited.
- Passing will be determined by a majority vote of the final Oral Committee.
- In order to pass the oral defense, the student may be required to make certain revisions before the final version of the Dissertation is filed with the Graduate Office.

## **Administrative Deadlines**

In addition to the academic requirements above, there are also significant administrative requirements that must be met in order to complete the dissertation and receive the Ph.D. Students are responsible for meeting the following administrative deadlines:

- 9 months in advance of anticipated graduation date: Students must be registered and enrolled (generally in either SOCY9999 Doctoral Continuation or SOCY9981 Dissertation Seminar) in order to graduate. This registration and enrollment should be confirmed well before the beginning of the anticipated graduation term.
- 4 months in advance: Students should verify that Student Services has their correct graduation date on Agora, by clicking on "Graduation Information - View/Update." If the student plans on graduating sooner than the date given in Agora, the student should email the responsible person at GSAS (currently Associate Dean Hetzner at [hetzner@bc.edu](mailto:hetzner@bc.edu)) and request a date change. If the graduation date is later than the date given on Agora, the student should fill out a Petition for Extension form (found on <http://www.bc.edu/schools/gsas/currentstudents/studentforms.html>), get the appropriate signatures, make a copy for the Administrative Staff, and take it to GSAS.

- 3 months in advance: Students should check the GSAS website (<http://www.bc.edu/schools/gsas/academics/disser-guid/disser-cklist.html>) for instructions on completing and submitting the dissertation. Please note that students are now encouraged to submit their dissertations electronically, although they still have the option of submitting them as hard copies. In either case, original signature pages must be submitted to GSAS
- 2 weeks in advance:
  - Provide one copy of the abstract and upon request a dissertation to the Department's Administrative Staff for interested persons.
  - Circulate a copy of the Dissertation abstract to all faculty with an announcement of the date, time and place of the oral defense.
  - Speak with Administrative Staff about reserving a room for the defense.
  - Ask Administrative Staff to reserve any equipment (LDC projector, etc.) that will be used during the defense, or to make arrangements for a speaker phone if one needed.
  - Begin filling out necessary forms (available on <http://www.bc.edu/schools/gsas/currentstudents/studentforms.html>, or from Administrative Staff), and print out on bond paper.

### **Final Steps**

To help students through this final stage, the responsibilities of the Student, Dissertation Chair, the Graduate Program Director, and the Administrative Staff are listed below.

#### **Candidate:**

- To satisfy the administrative deadlines outlined above, keeping in mind university due dates (see below).
- To make sure that the Administrative Staff has signed copies of both the Signature Page form submitted to GSAS, and the 'Final Examination and Public Defense of Doctoral Dissertation' form.
- To complete a wonderful Dissertation with a stimulating discussion in the oral defense.
- To complete any administrative requirements outlined by GSAS on their web page (<http://www.bc.edu/schools/gsas/academics/disser-guid/disser-cklist.html#dissertation>).

#### **Dissertation Chair:**

- To ensure that two copies of the Signature Page (available from the Administrative Staff or on the GSAS website) are brought to the dissertation defense.
- To certify on both copies that the Dissertation has been approved and that the candidate passed the oral defense, and to ensure that all relevant committee members have signed the documents. In addition, the Dissertation Chair should email the Administrative Staff with the student's name, the title of the dissertation, the final grade, and the date of completion.
- To preside over this rite de passage.

**Administrative Staff:**

- To maintain the records in the student file and departmental database verifying that the various requirements for graduation have been met.
- To review the student's electronic transcript with the Dissertation Chair or Graduate Program Director.
- To arrange a place for the scheduled orals to take place and post public announcements.
- To provide forms on request.
- To announce the completed graduation to the department.

**Graduate Program Director:**

- To confirm that all requirements for the Ph.D. have been met.

**University Due Dates**

**The formatted dissertation and the signed Signature Page should be submitted by December 1 in Fall, by August 1 in Summer, and by the date posted on the Academic Calendar (<http://www.bc.edu/offices/stserv/academic/current/calendar>) in Spring.**

## TA ASSIGNMENT GUIDELINES

Priority will be given for TAs to be assigned to the following classes/professors in the following order:

1. Classes with a minimum projected enrollment of 60, or Undergraduate Statistics (SOCY2200) or Graduate Statistics (SOCY7702 and SOCY7703), who will have priority for one TA.
2. Classes with a minimum projected enrollment of 80, who will have priority for two TAs.
3. Faculty members whose combined enrollments (two courses) are largest, or who are teaching Undergraduate Research Methods (SOCY2210), Social Inquiry Research Seminar (SOCY7710) or Undergraduate Social Theory (SOCY2215).
4. Depending on availability, the Department Chair may be assigned an RA.

Under university policy, TAs are supposed to work a maximum average of 20 hours per week. Our departmental norm, however, is for TAs to work an average of approximately 15 hours per week, with some variation around this average. TAs whose primary responsibilities include only grading midterm and final exams might expect to work approximately 12 hours per week. TAs who are responsible for discussion sections (or for taking on other teaching responsibilities) might expect to work closer to 17 hours. Over the course of three years of TA duties, these differences in workloads should average out to about 15 hours per week for any given student. Although leading discussion sections typically requires more time, students may choose such TA assignments because they provide valuable teaching experience, while first-year students may prefer teaching assignments with a lighter workload.

Prior to agreeing to a particular TA assignment, it is the faculty member's responsibility to let the student know about the duties that will be expected of them. It is the student's responsibility to let the faculty member know if he/she is unable perform any of these duties for any reason (e.g., a time conflict with a course the student is taking). Such potential conflicts need to be communicated to the Graduate Program Director *at least* one month before the beginning of the class in question in case alternative arrangements need to be made.

Faculty members are urged to do a significant portion of their own grading, even if their course has one or more TAs.

Instructors and TAs who encounter problems in their working relationship that they cannot resolve between themselves should consult the Graduate Program Director.

**A TIMETABLE FOR COMPLETING PH.D. REQUIREMENTS**

The following timetable for meeting the Ph.D. requirements is intended to provide students with “progress benchmarks” for each of their years of study within the Department. If possible, students are encouraged to complete these requirements earlier than indicated here.

<p><b>FIRST YEAR</b></p> <ul style="list-style-type: none"> <li>• Complete SOCY7710: Social Inquiry Research Seminar and SOCY7711: Empirical Research Seminar.</li> <li>• Complete a minimum of one graduate theory course (SOCY7715 or SOCY7716) and preferably at least one graduate statistics course (however, if you choose SOCY7702 as one of your statistics courses, it is recommended that you take SOCY7703 in the following semester).</li> <li>• Take at least one, or possibly two, substantive electives.</li> <li>• Obtain a total of 18 credits.</li> </ul>	<p><b>SECOND YEAR</b></p> <ul style="list-style-type: none"> <li>• Have two graduate-level statistics courses and two theory courses (SOCY7715 and SOCY7716) completed by the end of the Spring semester.</li> <li>• Take elective courses in the subfields in which you are planning to take your comprehensive exams; if such courses are not available that year, enroll in Readings and Research (R&amp;R) courses to prepare for exams.</li> <li>• Complete or plan to complete the residency requirement.</li> <li>• Enroll in SOCY7761: Second Year Writing Seminar (typically offered in both the Fall and the Spring semester, with biweekly meetings; students officially register for it in the Spring), and at least one additional R&amp;R or other non-classroom course (most students take an R&amp;R with their thesis advisor in the Fall).</li> <li>• Complete Second Year Master’s Thesis or Paper by the end of the Spring semester.</li> <li>• Obtain a total of 18 credits through a combination of coursework and independent research (R&amp;R) courses.</li> </ul>
<p><b>THIRD YEAR</b></p> <ul style="list-style-type: none"> <li>• Obtain the final 18 credits. Most students will enroll in three-credit R&amp;Rs and/or six-credit Research Practicums (RPs). Students planning to take an exam in Quantitative Methods might opt for taking more formal courses and fewer R&amp;R or RP credits. Complete an additional course in research methods by the end of the Spring semester.</li> <li>• Complete Specialty Area Exams by the end of the summer.</li> <li>• Start applying for Dissertation Fellowships.</li> <li>• Constitute Doctoral Dissertation committee.</li> <li>• Join the Dissertation Seminar.</li> </ul>	<p><b>FOURTH YEAR</b></p> <ul style="list-style-type: none"> <li>• Complete public presentation of Doctoral Dissertation Proposal by end of Spring semester.</li> <li>• Continue in Dissertation Seminar.</li> </ul>

**FIFTH/SIXTH YEAR**

- Complete Doctoral Dissertation.
- Complete Oral Defense of the Dissertation.

Students should be in **ongoing communication with their academic advisors** concerning their progress in meeting these benchmarks, and will be **evaluated annually** on this basis.

## TAKING COURSES OUTSIDE BOSTON COLLEGE SOCIOLOGY

The Department encourages M.A. and Ph.D. students to take courses within other departments at Boston College, provided that they are approved by the student's faculty advisor. There is no limit on the number of courses students may take in other departments. However, only graduate-level courses can be counted toward a student's graduate degree.

The Department also encourages M.A. and Ph.D. students to take graduate-level courses at the other universities listed below. There is no limit on the total number of such courses a student may take, provided that they are approved by the student's faculty advisor.

- Boston College is a member of a consortium that includes Boston University, Brandeis, and Tufts. To register for courses through the consortium, students must complete a "Petition for Cross-Registration" form, which can be obtained at Lyons Hall, and bring the completed form to be signed by the instructor of the course. Courses taken within the consortium count as Boston College courses. Students may take only one course per semester at any one consortium school. Summer courses are not eligible for consortium cross-registration.
- Boston College is also a member of the Graduate Consortium in Women's Studies (formerly Radcliffe). Students interested in taking such courses should contact GCWS directly at <http://mit.edu/gcws>.

For further information on cross-registration, see <http://www.bc.edu/schools/cas/sociology/grad/consortium.html>.

## **REQUIREMENTS FOR THE B.A./M.A. PROGRAM IN SOCIOLOGY**

The Department of Sociology and the Graduate School of Arts and Sciences provide qualified students with the opportunity to earn a Master's Degree in Sociology along with a Bachelor's Degree in a combined five-year program. The B.A. degree is awarded with the student's class. The M.A. degree is ordinarily conferred one year later. The admissions requirements are strict: normally, a student must have an overall GPA of at least 3.50, with at least a 3.50 GPA in Sociology courses.

Students interested in this accelerated program should consult with the Director of Graduate Studies in the second semester of the junior year.

## TEACHING SOCIOLOGY

The Department normally funds first, second, and third year doctoral students through Teaching Assistantships, and fourth and fifth year doctoral students through Teaching Fellowships. Whereas TAs are assigned to a professor's course to help with grading and other tasks, TFs are responsible for preparing and teaching their own courses. (TAs assist with one course per semester; TFs generally teach two courses per academic year.) The Graduate Program Director is responsible for making TA assignments; the Chair for assigning TFs. While the curriculum needs may require that students assist in or teach courses that are not their first choice, both the Graduate Program Director and Department Chair try to accommodate student preferences in making these assignments.

### **Support and Evaluation of Graduate Teaching Fellows**

Before serving as Teaching Fellows, all students are required to attend the day-long teaching workshop offered by the department at the end of each spring term.

During a student's first year serving as a Teaching Fellow, that student's faculty advisor, or designated alternative faculty advisor, will support his or her development as a teacher in the following ways:

- Review and provide feedback on the student's course syllabi.
- Observe and provide feedback on the teaching of the student at least once during the academic year.
- Review and provide feedback on the student's course evaluations.

The course evaluations of all Teaching Fellows will also be reviewed by the Department Chair in January of each year. If course evaluations suggest that there might be a serious problem, the Chair will bring this to the attention of both the Teaching Fellow and his or her advisor.

Student teachers are strongly encouraged to avail themselves of departmental and university resources for teaching support, including those offered by the Connors Family Learning Center.

### **Additional Rules and Guidelines for Graduate Student Teachers**

Syllabi for all Core courses being taught by teachers who have never taught them before, (including both new courses and established courses with new teachers), must be submitted to the department Core Liaison and approved at the department and university levels. Syllabi must be submitted the semester before the course is taught.

Syllabi for all non-Core courses being taught by teachers who have never taught them before, (including both new courses and established courses with new teachers), must be reviewed and approved by the Undergraduate Studies Committee. Syllabi must be submitted the semester before the course is taught.

All students teaching courses for the department (whether as Teaching Fellows or as Part-Time faculty) must provide a copy of their syllabus to the Director of Undergraduate Studies, with a copy to the staff assistant, before the beginning of the semester.

Students teaching courses for the department (whether as Teaching Fellows or as Part-Time faculty) must be present for all classes, except in the case of illness or emergency. If the student wishes to plan an absence from a class, he or she should first get written permission from the Department Chair.

If there is concern over possible dereliction of duty by a graduate student teacher, the student will be notified by the Director of Graduate Studies or the Chair that he or she has 24 hours to respond to that concern in writing. The case will be investigated immediately by the Graduate Studies Committee, which will make a recommendation to the Chair as to what remedial action, if any, should be taken.

## ACADEMIC INTEGRITY

The sociology department upholds the Boston College policy on academic integrity (see <http://www.bc.edu/offices/stserv/academic/integrity.html>). The following are examples of violations of academic integrity:

**Plagiarism.** (a) Verbatim copying of material without stating sources; (b) blatant paraphrasing in major portions of a paper or other written work (e.g., Dissertation, book) without identifying sources; (c) having someone else write the work (either on a paid or unpaid basis).

**Cheating on examinations.** (a) use of any source (e.g., notebooks, crib notes, etc.) which is prohibited in that particular examination; (b) copying from another person's examination.

**Falsifying data.** Blatant falsifying of data, such as inventing data or misrepresenting sample size.

Opinions differ among various faculty members regarding the propriety of the same or similar paper (or parts of the same paper) being submitted to more than one course. Graduate students must consult the faculty members involved prior to the submission of such papers.

In the unlikely event that a faculty member accuses a student of a violation of academic integrity, the following review process will take place:

- The individual professor or individual student who is making a formal accusation of cheating will bring the case to the attention of the Graduate School which will have responsibility for adjudicating the case. The Department Chair and Graduate Program Director would also be notified.
- In adjudicating the process, the Graduate School will normally involve the student's principal advisor and other Sociology Department representatives as appropriate.
- The Graduate School has a grievance procedure available if the student feels s/he has been unfairly treated. See <http://www.bc.edu/schools/gsas/policies.html#academic%20grievances>.

## **HARASSMENT**

Students should familiarize themselves with the University Policy on Discriminatory Harassment, both with regard to their roles as student and as teacher. For further information, go to <http://www.bc.edu/offices/diversity/compliance/harassment.html>.

## FUNDING ISSUES

### Tuition Remission and Stipends

Ordinarily, entering Ph.D. students receive five years of university support, provided they remain in good academic standing. The typical five year package includes tuition remission and a stipend for the first three academic years. For those three years, the students are ordinarily asked to serve as a Teaching Assistant for one course per semester. **Teaching Assistant duties should be limited to work related to the course to which they have been assigned.** For the fourth and fifth year funding is typically linked to serving as a Teaching Fellow (i.e., teaching his or her own course) for two courses over the course of a year. **Except in cases of students who are fully funded from external sources, graduate students are expected to complete five years of service to the department in return for their university support.** All Ph.D. students are also encouraged to seek financial support and fellowships from external funding sources, such as educational foundations and various governmental agencies. In addition to sometimes providing a larger amount of financial assistance, being awarded fellowships and research grants may add to the prestige of one's scholarship and help secure employment at the time of graduation. For further information on applying for fellowships and grants, go to <http://www.bc.edu/schools/cas/sociology/grad/funding.html>.

Students who enter with advanced standing due to graduate work completed elsewhere will normally be offered support for fewer than five years. For example, an entering doctoral student with the equivalent of a Master's degree in Sociology from Boston College (30 credits) would usually be offered support for 4 as opposed to 5 years. This would typically include a stipend for serving as a Teaching Assistant for two years followed by two years of support for serving as a Teaching Fellow. If qualified and with the permission of the Department Chair, such students may shift from being TA's to being TF's during their second year.

Dissertation Fellowships are awarded on a competitive basis by the graduate School of Arts and Sciences. Students awarded a Dissertation Fellowship receive the same amount as a TF, and are not eligible for additional BC funding for serving as a TA, TF, or RA (during the academic year) while holding this fellowship.

### Conference/Travel Expenses

The Graduate School of Arts and Sciences provides partial funding for graduate students to travel to **one conference per year** with the authorization of the GSAS Dean. Details and forms are available on line at <http://www.bc.edu/schools/gsas/currentstudents/conference.html>.

## LEAVE OF ABSENCE

Students who wish to take a leave of absence from the graduate program (i.e., to remain in the program without being registered) should in writing request a leave of absence from the Graduate Program Director detailing their reasons for taking a leave and when they intend to return. Once the Director has consented, the students should fill out a Leave of Absence form ([http://www.bc.edu/content/dam/files/offices/stserv/pdf/grad\\_withdrawal\\_loa.pdf](http://www.bc.edu/content/dam/files/offices/stserv/pdf/grad_withdrawal_loa.pdf)), have it signed by the Graduate Program Director, and submit it to the Graduate School of Arts and Sciences. A leave of absence will be granted for one year only. If the leave needs to extend beyond that, the student must request permission from the Graduate Program Director and resubmit the form for each additional year.

Students with approved leaves of absence will remain in the graduate program, although neither enrolled in courses nor registered for doctoral continuation credits. Students who remain unregistered for more than one year without an approved extension of their leave by the Graduate Program Director will be removed from the program, and may reapply in the event that they wish to continue their graduate studies. All applications for readmission to the Ph.D. program should be submitted to the Graduate Program Director, and will be evaluated by the Graduate Studies Committee.
