Intermediate Nepali

Academic/ Professional Appointments

2016-present	<p>Dean and Professor, School of Social Work, Boston College, Chestnut Hill, MA (from July 1, 2016)</p> <p>As the Dean, I am responsible for ensuring we continually innovate in social work education, research, and scholarship to prepare highly competent practitioners, and scholars focused on improving the quality of life for the most vulnerable and address social policy challenges confronting our communities, regions, and the country. In this role, I am responsible for shaping the vision and strategic direction of the school in training the next generation professional social work practitioners in the MSW program and future academic scholars in the doctoral program. Another significant aspect of my role is to manage and deploy the financial and human resources of the school so that we are educating a diverse group of practitioners, on the cutting edge of social work practice, to address the most significant social challenges of the day here in the US and abroad. The school under my leadership has strengthened and resourced the Latinx Leadership Initiative (LLI). The Latinx Leadership Initiative was 2020 model program selected by Excelencia in Education. As an Example of Excelencia, LLI stands out nationally as an exemplar of what works for Latino student success in higher education. Similarly, we have now initiated the Black Leadership Initiative to develop a social work practitioners and researchers to respond to the aspirations of our Black communities. Finally, our Equity@Work initiative. The pandemic made many social inequities starkly visible particularly for Black and Latinx people, as well as women. Equity@Work deploys design innovations and engages the nonprofit and corporate work places to address working conditions for our Black and Latinx people.</p>
2014-2016	<p>Assistant Vice Chancellor for International Affairs-India, Washington University in St. Louis (Concluded in June, 2016)</p> <p>Responsibilities included strategic planning implementation of research and educational collaborations with high-value partners in India. Strengthen cross-school collaborations at Washington University to undertake transdisciplinary research and education partnerships in India. Strengthen India-based research and educational collaborations between Washington University and its 28 partner universities around the globe with a particular focus on people, environment, and sustainable development.</p>
2014- present	<p>Advisory Group Member, Implementation Science Network for Clean Cooking, Fogarty International Center, National Institutes of Health</p> <p>Advise and shape a transdisciplinary research agenda with universities and multilateral agencies to build systematic and robust evidence on how to move the very poor to clean cooking and clean energy systems for better health and improved productivity.</p>

2013-2016	Professor, George Warren Brown School of Social Work, Washington University in St. Louis, St. Louis, MO (Concluded in June, 2016; Emeritus Professor from December, 2016).
1996-2012	Associate Professor, George Warren Brown School of Social Work, Washington University, St. Louis, MO
2002-2013	Director of International Programs, George Warren Brown School of Social Work, Washington University, St. Louis, MO Designed, managed, and implemented a successful Social Work Fellowship program in collaboration with the Open Society Foundation in seven countries. This program trained young scholars in social work and social policy fields from six post-Soviet countries (Azerbaijan, Georgia, Kazakhstan, Kyrgyzstan, Tajikistan, Uzbekistan) and Mongolia (2000-13). Several hundred graduates are now in professional positions across this region including some in the US. Developed two innovative programs in India and China. Winter Institute in System Dynamics for Rural Development in India, and Summer Institute in Social Work in China in collaboration with Peking University and Hong Kong Polytechnic University. The China program addressed subjects ranging from social development, migration, mental health, and aging.
2010	Fulbright Specialist grant in Social Work at the Ilia Chavchavadze State University, Republic of Georgia (declined)
2007-2009	Member, US Boren Fellowship National Nominating Panel (Six Members)
2007-2008	International Visiting Scholar, Baku State University, Azerbaijan (supported by Academic Fellowship Program, Open Society Institute, Budapest, Hungary)
1994-2006	Coordinator, Social & Economic Dev. Concentration, George Warren Brown School of Social Work, Washington University, St. Louis, MO
2005	Visiting Faculty, Winter Social Work School (Advanced Social Research Seminar) for Mongolian Social Work Faculty– Jointly organized with Center for Social Development, Mongolia and funded by Higher Education Support Program, Open Society Institute, Budapest (January)
2004	Visiting Faculty, Washington University International and Area Studies Summer Program on Civil Society and Emerging Democracy. Tbilisi, Republic of Georgia (June)
2004	Visiting Faculty, Summer Seminar on Social Work Education and Practice for Baku State University Faculty and Non-Governmental Organizations, Azerbaijan. Baku, Azerbaijan (July)
2004	Visiting Faculty Summer School on Social Work Research, Ulaanbaatar, Mongolia. (Funded by Higher Education Support Program, Open Society Institute, Budapest, Hungary)
2003	Visiting Faculty, Summer Social Work Seminar on social work curriculum for Baku State University Faculty, Baku, Azerbaijan (August)
2002	Visiting Faculty Summer School on Social Development, Jointly Organized by Washington University and Center for Social Development, Ulaanbaatar, Mongolia. (Funded by Higher Education Support Program, Open Society Institute, Budapest, Hungary) (June-July)
2000-2001	Senior American Fulbright Scholar, Kathmandu University, Kathmandu, Nepal
1991-1996	Assistant Professor, George Warren Brown School of Social Work, Washington University, St. Louis, MO
1990-1991	Assistant Professor, University of Nevada, Reno
1988-90	Program Researcher, Catholic Social Services, Cleveland, Ohio, USA
1986-1988	Research Associate, Income Maintenance Project, Mandel School of Applied Social Sciences, Case Western Reserve University, Cleveland, OH, USA
1986	Visiting Research Associate, Chulalongkorn Social Research Institute (CUSRI), Chulalongkorn University, Bangkok, Thailand (Land Titling Project funded by the World Bank), May-August

1985-1986 Research Assistant, Federation for Community Planning, Cleveland, OH

Transdisciplinary Initiatives

Data Analytics for Social Impact (Social Work, Nursing, Education, & Economics) Summer Hawkins (Lead)

The aim is to train a cohort of interdisciplinary thinkers in the use of big data in society. This project will address the growing trends of big data and data science that are in demand by graduate students and employers across sectors, but currently minimally covered in current graduate programs at BC, particularly those in the social and behavioral sciences. While faculty are engaged in these issues within individual schools and departments, we are currently not harnessing the full capacity of collaborations across BC to inform both research and teaching. The project brings together a core group of interdisciplinary faculty through trainings in data analytics.

Systems Approaches for Environmental Health

Boston College School of Social Work (BCSSW), the Schiller Institute for Integrated Science and Society, and NIH's Implementation Science Network (ISN) for Clean Cooking at Fogarty International Center hosted a workshop to advance systems science approaches to understand and intervene in environmental health issues. We convened a small group of researchers in the environmental health field, specifically household air pollution (HAP) and water, sanitation and hygiene (WASH), with systems science experts to explore innovative ways these approaches can improve environmental health research and implementation. Our objective is to produce a manuscript to stimulate further thinking, and potentially future work using systems approaches toward these two major global health problems.

Million Souls Project

Model the dynamics and evaluate the implementation and outcome from deploying seven million solar lamps to rural households across five states in India. Joint project between the Indian Institute of Technology-Bombay and Boston College School of Social Work.

Social, Ecological, and Livelihood Systems Modeling (SEAL)

Model the social, ecological, and livelihood dynamics in rural poor communities of Rajasthan and Andhra Pradesh, India in collaboration with the Foundation for Ecological Security (FES), India. Funding from the Packard Foundation to FES, India. BC School of Social Work and Washington University Social System Design Lab are bringing Community Based System Dynamics expertise to this project.

(Core Member – The Bridge Collaborative)

The Bridge Collaborative, established by partners The Nature Conservancy, PATH, Duke University and IFPRI, is a 7-10 year, paradigm-shifting effort to enable effective results improving the health, well-being and resilience of people and nature.

(Led the Initiative, Funding from Provost and Washington University India Initiative)

Harnessing Big Data for Environment, Livelihoods, and Population Wellbeing in India

This project will advance cross-school collaborations at Washington University to understand and engage in big-data analytics in the context of critical environment, human, and climate challenges on the ground in India. This is only possible because faculty from multiple disciplines across the campus will have the opportunity to convene in India with FES to explore the challenge of harnessing approximately 50 years of data on rainfall, forest ecosystems, surface and ground water resources, household and community data.

(Yadama – Led the initiative)

Environment, energy, population wellbeing, and rural health (ENPOWER^H)

(Leading the Initiative, Funding from Brown School, McDonnell Academy)

The **ENPOWER^H** initiative will focus the efforts of three McDonnell Academy partner universities (Washington University, University of Queensland, and the Tata Institute of Social Sciences) to understand and address development challenges that lie at the crossroads of environment, energy, food-water security, and health critical for sustaining productive livelihoods. This joint effort between our universities reaffirms the Academy's goal to address key global challenges of energy and environment, water and food security, and health. A signature feature of this partnership will be its geography specific emphasis with a clear focus on trans-disciplinary research, education, and problem solving, all of which are mutually reinforcing. Over the next 10 years, **ENPOWER^H** initiative led by the three partner universities will aim to generate systematic research, educational initiatives, and engage in the dissemination and implementation of innovative programs and interventions in India and on campus. The research, education, and practice innovations will be geared toward improving social, economic, health, environment, food and water security foundational to sustainable livelihoods of the rural population, demonstrating an approach to enhance wellbeing of people in impoverished regions

and districts. Our initiative will provide particular attention to gender and economic vulnerability in our pursuit of sustainable environment, food, water, and health outcomes. The program will be place based and early focus will be in specific communities in the States of Andhra Pradesh and Telangana, India.

Funded Projects

(Yadama, Principal Investigator) June, 2020- May, 2023

William T. Grant Foundation, Doris Duke Charitable Foundation, and the Spencer Foundation

The Impact of Upstream Prevention of Homelessness on Youth Educational and Developmental Outcomes in collaboration with the United Way, FamilyAid Boston, and the Boston Public Schools. This project leverages connections with the Boston Public Schools to identify families at high risk of homelessness and intervenes before youth are exposed to the trauma and disruption of eviction. The partnership will use quasi-experimental approaches to (1) evaluate the effectiveness of the EHIP program on youth academic and social emotional outcomes and (2) generate evidence on reliable indicators of the risk of homelessness.

(Hovmand, Principal Investigator, Yadama, co-Investigator) July, 2019-Aug 2020

Fogarty International Center (National Institutes of Health)

Real Option Strategies for Achieving Scale (ROSAS)— Household air pollution (HAP) presents one of the most pressing public health issues currently facing society. About 3 billion people rely on solid fuel combustion for their main cooking and energy needs. Women and children are disproportionately impacted by HAP exposure due to the amount of time spent near domestic hearths. Recent evidence points to the fact that instead of switching to exclusive use of clean fuels, a much more typical pattern was “stacking” where households continued the use of polluting fires and traditional fuels alongside new, cleaner technologies. The health impacts of clean cookstoves cannot be realized through cleaner technology and improved access alone, but will require a better understanding of household behavior within an implementation science framework to achieve better results.

(Yadama, Principal Investigator) July, 2018-May 2020

Fogarty International Center (National Institutes of Health)

System Science Training Workshop for Clean Cooking GEOHealth Researchers and Practitioners in collaboration with Public Health Foundation of India (PHFI).

Social Policy in Law Program – Faculty of Law, Tribhuvan University and the George Warren Brown School of Social Work at Washington University. The Faculty of Law at Tribhuvan University, Nepal and George Warren Brown School of Social Work at Washington University in St. Louis in a partnership broadened legal training to include a social policy focus to address the needs of the disadvantaged and the poor of Nepal. Nepal as a transitional economy and society is undergoing changes in the role of government, a concomitant rise in the pervasiveness of the market, and an expansion in democratic spaces at the grassroots. This project contributes to the consolidation of democracy in Nepal by melding social policy concerns into the emerging legal-political institutional infrastructure.

Other Research and Education Initiatives

Winter Institute in System Dynamics for Rural Development: Engaging Dryland Communities Toward Sustainable Livelihoods and Ecosystems – Andhra Pradesh, India (January 2012, 2013, 2014, 2015) (Gautam N. Yadama, Peter Hovmand, and the Foundation for Ecological Society)

Description: The goal of this institute is for students to work with the Foundation for Ecological Security (FES) and community leaders to effectively utilize system dynamics modeling, participatory group model building methods, and participatory rural appraisal to address rural development problems in India. The institute will emphasize the use of participatory group model building methods and transdisciplinary problem solving for engaging communities and catalyzing change. Students will work with FES staff and local communities in transdisciplinary teams to frame the problem from an endogenous or “feedback” perspective, develop a system dynamics simulation model, and identify and prioritize action steps that can be implemented with local stakeholders. Students are expected to have completed an introductory understanding of system dynamics.

Studying Poverty, Agricultural Risks, and Coping Strategies (SPARCS). Agrawal, Arun, Chatter, Ashwini, & Yadama, Gautam in collaboration with Foundation for Ecological Security, India. (With initial support from Bill & Melinda Gates Foundation)

Designed and Implemented Community Driven System Dynamics for Modeling Urban and Rural Development Problems and Interventions in Collaboration with School of Habitat Studies, Tata Institute of Social Sciences, Mumbai, India (January 3-15, 2011). (Peter Hovmand, Gautam N. Yadama, & Subodh Wagle).

Description: The goal of this institute is to work with graduate students at Tata Institute of Social Sciences (School of Habitat Studies) and the Brown School of Social Work participants to effectively utilize system dynamics modeling and participatory group model building methods to address key urban and rural development problems in India. The institute focused on participatory group model building methods, process design issues and mapping, considerations on how to integrate system dynamics within an existing NGO’s capabilities through capacity building workshops, and cross-cultural aspects of this approach.

Rural-Urban Dynamics of Social Development in China and India, Brown School Summer Institute in China in Collaboration with Hong Kong Polytechnic University and Peking University (July-August 2010). The institute addressed trends in rural and urban development in China and India, policy, and program strategies to address the lives of the poor in rural and urban geographies. Rural and urban economies and societies are closely interlinked in China and in the rest of Asia. The institute particularly focused on social and economic development policies and their urban bias in China and India.

Designed and Implemented Linking People and Nature: Winter Institute on Energy, Environment, and Development in Rajasthan, India (December 2010). This is an interdisciplinary working institute of faculty and students from Washington University, Indian Institute of Technology, and the Tata Institute of Social Sciences, and staff from Foundation for Ecological Security (FES) (45 people in all).

Brown School Summer Institutes in China in Collaboration with Hong Kong Polytechnic University and Peking University (July-August 2007, 2008, 2009, 2010). Organized summer institutes since 2007 in collaboration with Hong Kong Polytechnic University and Peking University. Topics vary from poverty and development, to aging and mental health.

Principal Convener: International symposium on Development and the Nation State. An inaugural Symposium to launch Washington University's Asia Initiative (April 7-9), 2000 at Washington University. Participants: Douglass C. North, Elinor Ostrom, James Scott, Jean Oi, John Bowen, Jack Knight, Andrew Sobel, Devesh Kapur, and Arun Agrawal
