## APPENDIX W. Personal Surveys for Users of Radioactive Materials

Directions:

1) Hands and working areas should be surveyed after each use *or* at the end of each day of use of radioisotopes – whichever is first.
2) Wipe tests are required.
3) Wipes should be counted in an appropriate instrument.
4) Results must be recorded. Negative results may be indicated by:
    - "B" for Background
    - "ND" for None Detected
5) Any results above 2X Background must be addressed.
6) The permit holder must retain this form for records.

| Date | Initials | Isotope Used | Meter Survey Results – Hands, Lab Coat (CPM) | Meter Survey Results – Work Area (CPM) | Wipe Test Results – Use LSC (CPM) | Action for Results 2X Background |
