A postdoctoral position is immediately available in the laboratory of Dr. Richard Pierce and Dr. Jordan Pober in the Vascular Biology and Therapeutics Program at Yale University through the Department of Pediatrics in New Haven Connecticut. We are seeking postdoctoral fellows with experience in vascular biology. The projects involve in vitro molecular- and cellular-based studies to examine the role of small GTPases regulation of endothelial permeability changes in primary human endothelial cell cultures. Basic knowledge of human cell culture, molecular biology, genetics, RNAseq, expression analyses in cultured human cells, analysis of protein-protein interaction, IF/confocal microscopy and FACS analysis is preferred. It is expected that applicants can work at the bench independently, interpret data, and troubleshoot their experiments. Excellent communication skills are a requirement for this position. Salary based on research experience.

Interested persons should send a CV, a brief statement of research interests, and two letters of recommendation to Richard Pierce, MD at exclusively at the following address: lisa.palmieri@yale.edu or Lisa Palmieri, Department of Pediatrics, 333 Cedar Street, PO Box 208064, New Haven, CT 06520-8064.

Yale University is an Affirmative Action/Equal Opportunity Employer and welcomes applications from women, persons with disabilities, protected veterans, and members of minority groups.
