Undergraduate Programs - University Catalog

With more than a hundred undergraduate majors, concentrations, and minors, Boston College students have the opportunity to complete degrees in diverse and wide-ranging areas of study. In addition to courses taken for majors, minors, and electives, students also engage with the Core Curriculum, allowing students to step out of their comfort zone and fostering the Jesuit ideal of educating the whole person.

Boston College is committed to providing information in a manner that is accessible to all. If you are in need of a printed copy of the material presented in the University Catalog, please contact the Office of Student Services for a printout of the website.

Carroll School of Management, Undergraduate Programs - University Catalog

BOSTON COLLEGE

Founded in 1938, Boston College’s Carroll School of Management educates undergraduate students for careers in the various disciplines of management, as well as graduate students and practitioners who seek deeper insights into a complex global economy. The School has a dual mission: to carry out both top-level teaching and cutting-edge research. It sees this mission as a collaborative effort among faculty, staff, and students, in engagement with alumni and other management practitioners.

A Carroll School education is a lively blend of the liberal arts and the functional areas of management. Undergraduates are introduced to a broad slate of topics related to accounting, economics, finance, information systems, business law, marketing, and other disciplines. But they are also encouraged to branch out and delve into subjects ranging from history and literature to natural science and the fine arts. Academic rigor and close interaction with faculty go hand in hand with this multidisciplinary approach.

Situated within a Jesuit liberal arts university, the Carroll School helps its students cultivate the habits of intellectual discernment along with a commitment to service and the public good. There are numerous opportunities for students to apply their specialized knowledge to a vast array of human, social, and organizational challenges.
In keeping with its philosophy of undergraduate management education, the Carroll School aims to:

- Teach analytical reasoning, problem solving, and communication skills to create effective leaders.
- Inform students of the latest advances in accounting, finance, data analytics, marketing, operations, and many other fields.
- Help students carve out a specialization in one or more fields, making them ready for management practice and leadership upon graduation.
- Provide them with the tools and inspiration to seek out, develop, and experiment with innovative ideas drawn from a wide mix of sources.
- Create a variety of programs that allow students to gain hands-on experience and apply theory to practice. Specialized research and education centers provide many of these opportunities.
- Develop a multicultural and global outlook, attentive to the needs of diverse communities and a fast-changing world.
- Emphasize the ethical responsibilities of managers and business and assist students in the development of their capacity for moral reasoning.
- Inculcate the habits of lifelong learning and self-reflection.

Through the curriculum and other offerings, Carroll School students are taught to value both knowledge and wisdom, both hard skills and broader insights. They emerge from Boston College as capable professionals and thoughtful leaders ready to make a difference in their organizations and in their world.

**Information for First Year Students**

In most ways, the first year in the Carroll School of Management resembles the first year in the Morrissey College of Arts and Sciences. Carroll School
of Management freshmen are expected to focus their study on aspects of the University's Core curriculum (described in the University Policies and Procedures section); the study of courses required in the Management Core, with the exceptions noted below, usually begins in earnest in sophomore year.

All Carroll School freshmen will enroll in PRTO1000 Portico, a 3-credit course, offered in the fall semester, which combines an introduction to business with ethics and attention to globalization.

During freshman year, Carroll students should also complete the Writing Seminar and Literature Core requirements, the Mathematics Core, and Business Statistics (OPER1135). These five courses, or their equivalent via Advanced Placement, along with ISYS1021 Digital Technologies: Strategy and Use, are indispensable in the first year. Note that there is no necessary sequence for the above-mentioned courses; they may be taken in any order, either semester, during the first year.

What other courses should a freshman pursue? Students contemplating study abroad should be aware that some programs require a language proficiency and may want to consider taking a relevant language course(s). However, beginning with the class of 2022, the Carroll School no longer has a language requirement.

Freshmen should also consider enrolling in one of the University's hallmark programs, PULSE and Perspectives, which fulfill both the Philosophy and the Theology Core requirements. Perspectives, with the exception of one sophomore section, is restricted to freshmen; PULSE may be taken at any time except senior year.
Other possibilities for freshman year include the History sequence, Principles of Economics (ECON1101) plus one other Social Science core class, and a pair of science courses.

While the preceding remarks capture a range of possibilities, even greater possibilities await a student possessed of Advanced Placement, transfer, or International Baccalaureate credit. Such students should consult carefully with the Senior Associate Dean and their faculty orientation advisor in crafting a plan of study for first year.

Management Core Courses

Note: There are curricular changes for the Class of 2022 and beyond; please note them below.

- PRTO1000 Portico (freshman, fall)
- OPER1135 Business Statistics (freshman)
- ECON1101 Principles of Economics (freshman or sophomore)*
- ECON1131 Principles of Economics I—Micro (freshman or sophomore)*
- ECON1132 Principles of Economics II—Macro (freshman or sophomore)*
- ISYS1021 Digital Technologies: Strategy and Use (freshman or sophomore)
- ACCT1021 Financial Accounting (sophomore or freshman, fall)
- ACCT1022 Managerial Accounting (sophomore)**
- OPER2235 Modeling and Business Analytics (sophomore)***
- BSLW1021 Introduction to Law (sophomore or junior)
- MGMT1021 Organizational Behavior (sophomore or junior)
- OPER1021 Operations Management (junior)
- MFIN1021 Basic Finance (junior)
- MKTG1021 Principles of Marketing (junior)
- MGMT3099 Strategic Management (senior)
- 4–6 CSOM concentration courses (junior, senior)
- 12 credits of MCAS Electives

With the exception of MGMT3099 Strategic Management, all Management Core courses usually are completed by the end of the junior year. Students who have transferred, who have done a semester or a year abroad, or who have had deficiencies may have to modify their schedules somewhat.

Students pursuing a minor in the Morrissey College of Arts and Sciences or the Lynch School of Education and Human Development may elect to eliminate one of the Carroll School core management courses. Students who complete the pre-medical program requirements (without a major or minor in MCAS) are eligible for this incentive as well. A student pursuing a major in the Morrissey College of Arts and Sciences may elect to eliminate two of the Carroll School core management courses. Selection of the eliminated courses must be done with advising from the Associate Dean's office. No one may eliminate Portico, Financial Accounting, Statistics, or Principles of Economics. Note: Students are not eligible to combine any of the incentives above (i.e., a student with two minors may not eliminate two courses.)

Prerequisites, which are listed in the individual course descriptions, must be followed.

*Students in the Class of 2023 should take ECON1101 Principles of Economics and one other Social Science course. Students in the Class of 2022 and prior should take ECON1131 Principles of Economics I—Micro and ECON1132 Principles of Economics II—Macro.
**Beginning with the class of 2022, Managerial Accounting will no longer be required except for students concentrating in Accounting.**

***All students must complete, either via AP or course work, one course in Calculus or beginning with the class of 2022, Carroll students may take any course approved for Mathematics Core credit. A second Mathematics course must be taken at BC and be chosen from among a “bucket” that includes Modeling for Business Analytics, Calculus II, Multivariable Calculus, Linear Algebra, and Econometric Methods. All Carroll School of Management students must take at least one mathematics course at BC. Beginning with the class of 2022, a student’s second Mathematics course must be OPER2235 Modeling for Business Analytics.***

**Satisfactory Academic Progress**

All students must complete 120 credits for graduation.

To continue enrollment in a full-time program of study, a student must maintain a cumulative grade point average of at least 1.5 as the minimum standard of scholarship and must not fall more than 6 credits behind the total number of credits a student of their status is expected to have completed. For example, a first semester sophomore student must have completed at least 24 credits during the freshman year. Any student who is permitted by the dean to continue enrollment in a full-time undergraduate program is considered to be in good standing.

Failure to maintain good standing either through a low cumulative grade point average or by incurring excessive deficiencies including failures, withdrawals, or unapproved underloads will result in the student's being placed on probation or being required to withdraw, as the Academic Standards Committee or the Dean shall determine.
A student on probation may return to good standing by approved methods (e.g., make-up of credits via approved summer school work; students may make up no more than 10 credits in summer study). A student who incurs additional failures or withdrawals or carries an unapproved underload while on probation may be required to withdraw from the School at the time of the next review.

**Morrissey College of Arts and Sciences Major**

Students who have a very strong interest in an area in Arts and Sciences may complete a major in the Morrissey College of Arts and Sciences by careful use of their electives. For example, it is possible to graduate with a concentration in Finance and a major in Philosophy or History. Students interested in this option should contact the Carroll School of Management Undergraduate Senior Associate Dean and the department chairperson in the Morrissey College of Arts and Sciences as early in their studies as possible.

**Pre-Medical Studies**

Carroll School students are also eligible to pursue a pre-medical course of study in addition to their management curriculum.

**International Study**

Studying and living in another country enables students to broaden their horizons and experience a different culture, and Carroll School of Management students who have a 3.0 GPA or higher are eligible to study abroad during their junior year. During the spring semester of freshman year, the Dean’s Office sponsors an annual program for management students interested in studying abroad; a subsequent fall semester program
for first semester sophomores complements the first-year program. All students interested in international study should visit the Office of International Programs early in their sophomore year and then the Carroll School Undergraduate Assistant Dean, Erica Graf.

The Office of International Programs administers a growing number of programs for Boston College including course-based summer programs for those who desire a shorter abroad experience or cannot go during the regular academic year. Carroll School of Management students may avail themselves of opportunities for study in excellent institutions in the Pacific Rim, continental Europe and the United Kingdom, South America, and Eastern Europe, among others. See elsewhere in this Catalog for a full listing.

**Special Programs**

**Pre-Professional Studies for Law**

Pre-Law students need clear reasoning power, a facility for accurate expression, a mature balance of judgment, and the ability to appreciate the moral, social, and economic problems related to the administration of justice in modern society. The Carroll School of Management offers an ideal opportunity to develop these qualities both through the Liberal Arts Core and specialized management courses, notably those case style courses which place a premium on analytical powers and a capacity in both oral and written expression.

Carroll School students interested in law should contact Salvatore Cipriano, Assistant Director for Career Engagement, in the Career Center, and the University's prelaw advisor.
The Ethics Initiative

In addition to PRTO1000 Portico, many regular Carroll School of Management courses integrate ethical issues in business and management. Elective courses in accounting, marketing, law, and operations are focused on ethical issues specific to those disciplines.

The Winston Center for Leadership and Ethics offers annual lecture, seminar, and workshop programs on ethics and leadership for undergraduate students.

Summer Management Catalyst Program

The Carroll School of Management Summer Management Catalyst Program is an intensive, full-time, 9-week program designed to develop a solid and broad foundation in the functional areas of management for non-management students.

Participants take three full courses and a career practicum that covers a wide range of business management topics, including management, accounting, finance, marketing, ethics, law, Excel, big data, and career skills.

Additional information and application can be found at: www.bc.edu/bc-web/schools/carroll-school/sites/summer-management-catalyst-program.html.

Program Benefits

- Learn how organizations operate and develop management skills to contribute to complex, not-for-profit, business and government entities.
Complete three core management courses in one summer and receive 9 credits through the completion of 3 full courses—ideal for students who find it difficult to fit management courses into their schedule and students interested in completing a Carroll School minor.

Develop career strategies in building your personal brand through sessions on skills assessment, writing resumes and business letters, interviewing skills, effective networking, and employer panels.

Attend a Catalyst-exclusive Career Networking Night with employers from a wide array of industries looking to recruit Catalyst students specifically.

Stand out in the competitive job market for internships or full-time positions with enhanced credentials from the summer program, including Excel and exposure to programming languages.

Carroll School of Management Dean's Office Courses

PRTO1000 Portico (Fall: 3)
This course is required for all Carroll School students and must be taken in the fall semester of their first year at BC. Portico fulfills the Carroll School ethics requirement.

This is the introductory course for Carroll School of Management’s first year students. Topics will include ethics, leadership, globalization, economic development, capitalism, innovation, entrepreneurship, vocational discernment, and the functional areas of business. This will be an interactive 3-credit seminar, serving as one of the five courses in the fall semester and fulfilling the ethics requirement for the Carroll School. The instructor will serve as academic advisor during the student’s first year.

The Department
BCOM1116 Business and Professional Speaking (Fall/Spring: 3)
This course is designed to be an introduction to the theory, composition, delivery, and criticism of speeches. Individual as well as group speaking assignments will be used to help the student become more comfortable and confident in speaking situations. The following areas will be developed: the uses of evidence, the development of clear organizational structure, and the development of a dynamic presentation style. The student will also examine speaking from the audience perspective and learning ways to analyze and evaluate the oral presentations of others.

*Stacy Schwartz*

BCOM3688 Communication for Consultants
The course is designed for juniors and seniors who are planning on consulting (or client facing) careers.
This course explores the communication challenges and opportunities consultants encounter when they work with internal or external clients. Students learn practical business writing and presentation skills specifically related to engagement activities. There is a strong focus on assessing audience needs, analyzing case studies, and determining the value of a communication with a client. Students produce a variety of communications including project proposals, statements of work, instructions, routine project correspondence, progress reports, formal reports, panel presentations and post-implementation reviews. **Students must have demonstrated strong writing skills in English.**

*Rita Owens*

BCOM6688 Business Writing and Communication Skills for Managers (Fall/Spring: 3)
Restricted to CSOM
The course focuses on the type of communication done on the job, especially in corporations. Business assignments are used to illustrate
appropriate writing and communication strategies, protocols, styles, and formats. Students work alone and in collaboration with others around a variety of assignments and tools including traditional paper reports, electronic materials, e-mails, social media, and oral presentations. By the end of the semester, students will be proficient in producing business letters, instructions, reports, proposals, and visual materials.

*Rita Owens*

**PRTO4307 Happiness in Commercial Society (Spring: 3)**
The aim of this course is to introduce students to the interdisciplinary study of human well-being as it applies to the domains of contemporary business and commercial life. The course will include philosophical, psychological, and social scientific inquiries into human flourishing, as well as the nature of meaningful work, the relationship between wealth and happiness, and the application of well-being measures to thriving economic and political institutions.

*Michael Smith*

*Jeremy Evans*

**PRTO4901 Special Topics: The Ethics of Capitalism (Spring: 3)**
This course explores the philosophical basis and moral implications of contemporary commercial life. Along the way, we will consider the role of business in society, the relationship between capitalism and democracy, and the ethics of consumption, among other issues where market values intersect public and private virtues.

*Michael Smith*

*Jeremy Evans*

**UGMG1010 Perspectives on Management (Spring: 3)**
This course, taught by practitioners John Clavin (BC '84) and Jere Doyle (BC '87), provides BC students with an excellent opportunity to explore the
functional disciplines of business from a real-world perspective. Using a combination of lectures, case studies, readings and outside speakers, the course provides students the opportunity to get grounded in each of the CSOM concentrations while gaining outside views on careers in related fields and industries. The course will also provide a framework to explore and discuss cross-functional issues that impact business strategy and execution. This is a highly interactive class that places a premium on both preparation and participation each week. The course is initially open to CSOM sophomores but normally has availability for juniors and seniors across all undergraduate majors

John Clavin
Jeremiah Doyle

UGMG2222 Sophomore Accelerator (Fall/Spring:1)
Restricted to sophomores in the Carroll School of Management
It is a 1-credit pass/fail course consisting of eight 75 minute sessions designed to ensure that you learn the following: how to identify your top skills/interests and how to explore career fields; how to write an effective resume/cover letter; how to introduce yourself to employers and develop a strong "elevator pitch"; how to network effectively and utilize the BC Network. How to interview to get the internship. You will be matched with a BC alumnus to conduct an informational chat. You will learn about interviewing from employers/upperclassmen. You will then conduct a video mock interview with an Eagle Expert employer. You will learn how to use Social Media to your advantage including developing a strong LinkedIn profile. We will teach you how to convert internships into full time offers and also how to dress for success.

Amy Donegan
Kristen Nervo

Co-concentration in Business Analytics
The Business Analytics co-concentration is designed to be a second concentration for Carroll School of Management students, who must choose a primary concentration such as Accounting, Finance, Information Systems, Management and Leadership, Marketing or Operations Management. Up to one class from the co-concentration course list can be counted towards another concentration.

Business Analytics draws upon a portfolio of methods and tools including statistics, forecasting, experimental design, data mining, and modeling to turn data into information and insights. The business analytics field includes descriptive, predictive, and prescriptive analytics. Descriptive analytics help organizations describe what has happened in their operating environment and includes gathering, organizing, tabulating, and communicating historical information: how many online subscribers do we have? Predictive analytics helps organizations understand what to do by uncovering relationships and associations in the available data and uses techniques such as probability and forecasting to reveal the likelihood of outcomes: the number of online subscribers increases when we have banner advertising on search sites. Prescriptive analytics is focused on understanding the causal effects that can be discerned from data sets and strives to predict what will happen, given a particular course of action: if we increase our banner advertising and provide one-click subscribing, how will the number of subscribers change?

The Business Analytics co-concentration builds upon the Carroll School of Management core. The co-concentration is designed to align with a variety of functional disciplines making Business Analytics an excellent complement to other concentrations.

**Objectives of the Undergraduate Co-concentration in Business Analytics**
The objectives of the undergraduate co-concentration are to develop managers who:

- possess a broad and deep understanding of theories and concepts in business analytics
- are adept at data management and analysis
- understand and utilize quantitative techniques for historical analysis, predictive analysis, modeling, and simulation
- are capable of applying analytical skills and knowledge to address management problems across disciplines and industries

**Careers in Business Analytics**

Students with skills in business analytics are in high demand in private industry, government, academia, and not-for-profit organizations in both cutting-edge technology firms and in older, more traditional industries such as financial services, transportation, healthcare, consulting, and transportation. Demand for people with strong analytical skills and the capability to use and analyze big data to make effective decisions is very strong and growing. Salaries for majors in Business Analytics are strong and will likely remain very competitive with all other concentrations in management.

**Business Analytics Co-concentration Requirements**

The following three courses are required for the co-concentration:

- ISYS3340 Data Analytics in Practice (fall, spring)
- OPER6604 Management Science (fall, spring)
- OPER3384 Predictive Analytics (fall, spring)
Select two additional courses:

- OPER3310 Sports Analytics (fall)
- OPER6605 Risk Analysis and Simulation (spring)
- OPER6606 Forecasting Techniques (fall and spring)
- OPER6607 Machine Learning for Business Intelligence (spring)
- OPER6608 Pricing and Revenue Optimization (fall)
- OPER6614 Quality Management (fall)
- ISYS2157 Programming for Management and Analytics (fall and spring) (or CSCI1101)
- ISYS3257 Database Systems and Applications (fall and spring)
- ISYS6621 Social Media, Emerging Technologies, and Digital Business (fall and spring)
- ISYS6625 Geographic Info Systems (fall and spring)
- ISYS6645 Data Visualization (fall and spring)
- MKTG2153 Customer Research and Marketing Decisions (fall and spring)
- MKTG3258 Marketing Analytics for Customer Insights (spring)
- ACCT6640 Dive, Dissect, and Decide with Big Business Data (spring)
- MFIN2270 Data Analytics in Finance (fall, spring)

Co-concentration in Entrepreneurship

Are you interested in revolutionizing markets or joining a firm that does? The entrepreneurship co-concentration provides a strong background for launching and managing high-growth ventures in nascent or high-velocity industries. The curriculum introduces a set of tools and a way of thinking that will help students to navigate the uncertain, ambiguous contexts that often characterize new initiatives in established firms as well as start-ups.
The Entrepreneurship co-concentration is designed to be a second concentration for Carroll School of Management students. Up to one class from the co-concentration course list can be counted towards another concentration.

**Required Courses**

The courses in the co-concentration include the following:

**Required:**

- MGMT2170 Entrepreneurial Management

**Choose one of the following courses:**

- ISYS3315 Special Topics: Managing Digital Innovation
- MFIN2210 Entrepreneurial Finance
- MFIN2212 Venture Capital/Private Equity
- MGMT2139 Social Innovation and Entrepreneurship

**Choose two electives from the following list:**

- BSLW6604 Law for the Entrepreneur
- ISYS3205 TechTrek West
- ISYS3206 TechTrek East
- ISYS3253/MKTG3253 Digital Commerce
- ISYS6621/MKTG6621 Social Media, Emerging Technologies, and Digital Business
- ISYS6640/MKTG6640 Analytics and Business Intelligence
- MGMT2123 Negotiation
- MGMT2139 Social Innovation and Entrepreneurship
Managing for Social Impact and the Public Good

The Managing for Social Impact and the Public Good co-concentration is jointly sponsored by the Business Law and Society, Information Systems, and Marketing departments. It is designed to be a second concentration for Carroll School of Management undergraduate students, who must first choose a primary concentration such as Accounting, Finance, Information Systems, Management and Leadership, Marketing, or Operations Management.

Managing for Social Impact and the Public Good aims to provide Carroll School students with a well-defined, interdisciplinary co-concentration focused on analyzing the multifaceted impacts of today’s global corporations, social enterprises, public sector, and nonprofit organizations.

In successfully completing this co-concentration, students will:

- Develop a theoretical and practical understanding of the extended social impacts of global corporations and why responsible enterprise values and the public good are relevant for all stakeholders
- Learn to apply research and critical thinking to understand the challenges, benefits, and current practices in corporate social responsibility
- Explore the philosophical, ethical, legal, economic, and ecological implications of the decisions made by corporate and public sector global leaders through case studies, readings, and class discussions
Understand the challenges, available tools and innovative models for managing social impacts and balancing stakeholder value in a variety of corporate, nonprofit, and public sector organizations

Develop and articulate a personal vision for integrating moral decision-making, social justice, citizenship and responsible management in their future professional lives

Course Requirements

This co-concentration requires four courses (representing at least 12 credits), two of which are required and two of which are electives. In accordance with the interdisciplinary nature of Managing for Social Impact and the Public Good, students in this co-concentration will select their two electives from a list of courses jointly approved by the Carroll School of Management and participating departments in the Morrissey College of Arts and Sciences. The MCAS elective courses taken for credit toward completing this co-concentration cannot be counted toward fulfilling other Boston College or MCAS course distribution requirements.

The following two Carroll School courses are required:

- ISYS/MGMT3345 Managing for Social Impact (fall/spring)
- BSLW6001 Leading for Social Impact (spring of senior year)

In addition, students must take two approved MCAS elective courses (for a total of at least 6 credits). The list below is representative, not exhaustive:

- ECON2273 Development Economics
- ECON2278 Environmental Economics
- ECON3317 Economics of Inequality
- ECON3358 Industrial Organization: Creation and Strategy
• EESC1174 Climate Change and Society
• EESC1187 Geoscience and Public Policy
• ENGL1011 Writing as Activism
• ENGL4008 Writing as Social Impact
• HIST2430 Business in American Life
• HIST4890 American Environmental History
• PHIL2216 Boston: An Urban Analysis
• PHIL5534 Environmental Ethics
• POLI2301 Policy and Politics in the U.S.
• POLI2415 Models of Politics
• SOCY1072 Inequality in America
• SOCY3348 Environmental Sociology
• SOCY5552 Social Entrepreneurship
• THEO4433 Faith, Service and Solidarity
• THEO5354 Modern Catholic Social Teaching
• THEO5563 Ethics, Religion and International Politics

Declaring the Co-Concentration

Students interested in the co-concentration can declare it at the Undergraduate Dean's office after filling out an interest form in Fulton 460. Students must declare the co-concentration by October 15 of their junior year. After that date we cannot guarantee a spot in the required foundation course.

For questions about the Managing for Social Impact co-concentration, contact Professor Lourdes German at germanl@bc.edu.

Managed By
The objective of the accounting curriculum sequence is to prepare the undergraduate accounting concentration for a career in accounting or a related field. This curriculum is broad in scope and coverage, so it is relevant and useful for a career in public accounting, industry, financial institutions, government, information systems, law, or not-for-profit organizations.

There are four concentrations housed in the Accounting Department: Accounting, Accounting for Finance and Consulting, Accounting and Information Systems, and Corporate Reporting and Analysis. Students will not be allowed to concentrate in more than one of these.

As of the fall of 2018 Accounting for Finance and Consulting will take the place of the Corporate Reporting and Analysis concentration, which will end with the class of 2021. Students presently enrolled in this concentration have the option to continue with it or switch to the Accounting for Finance and Consulting concentration.

Also effective fall 2018, students outside of CSOM will be able to complete one of two minors in accounting. The requirements for a minor are based on a selection of the required and elective courses for the Accounting and the Accounting for Finance and Consulting concentrations.
Concentration in Accounting

This is the primary concentration of the department, and it is intended to prepare students for a professional career in public accounting, industry, financial institutions, government, information systems, law, or not-for-profit organizations. The curriculum is broad in its scope and coverage so it is relevant and useful for a variety of careers. Students intending to pursue a Certified Public Accountant (CPA) designation should choose this concentration.

Objectives

The objectives of the Accounting Concentration are as follows:

(1) Prepare the student to successfully pass the CPA exam. The exam includes four parts, covering auditing and attestation (AUD), business environment and concepts (BEC), financial accounting and reporting (FAR), and regulation (REG). The course requirements for the concentration provide a sound basis for preparing students to successfully pass each section of the exam.

(2) Provide a broad-based understanding of the use of accounting data and information by managers and others for decision-making. Passing the CPA exam and becoming a licensed accountant opens the door for many careers in addition to professional accounting. The CPA designation not only signals a specific set of skills but is also indicative of the dedication and rigorous analytical skills useful in numerous non-accounting pursuits. Although most graduates with an Accounting Concentration begin their careers in public accounting, the long-term career options are diverse, and our graduates now hold key positions in corporate finance, human
resources, marketing, economics, entrepreneurship, government, education, and many other fields.

**Required 15 credits hours in:**

- ACCT1022 Managerial Accounting
- ACCT3301 Financial Accounting Standards and Theory I
- ACCT3302 Financial Accounting Standards and Theory II
- ACCT3307 Managerial Cost and Strategic Analysis
- ACCT4405 Federal Taxation

**And at least 3 credits from one of the following four courses only:**

- ACCT3309 Audit and Other Assurance Services*
- ACCT3351 Financial Statement Analysis
- ACCT6601 Financial Accounting Standards and Theory III
- ACCT6618 Accounting Information Systems

*Auditing* is a requirement to sit for the CPA exam in all states, and a requirement for admission to the Boston College Master of Science in Accounting (MSA) program.

Most states require from eight to eleven accounting classes (24 to 33 accounting credit hours) in order to be qualified as a Certified Public Accountant (CPA). Because the accounting concentration requires only six accounting classes (18 credits), in addition to ACCT1021 Financial Accounting (3 credit hours) included in the CSOM core, a student must take additional accounting classes. **The department offers a number of accounting electives that students can take to satisfy their CPA requirements.**
ACCT3351 Financial Statement Analysis
ACCT3399 Directed Readings and Research
ACCT4409 Advanced Auditing
ACCT6601 Financial Accounting Standards and Theory III
ACCT6615 Advanced Federal Taxation
ACCT6616 Personal Wealth Planning
ACCT6623 Fair Value Accounting and Measurement
ACCT6626 Taxes and Management Decisions
ACCT6634 Ethics and Professionalism in Accounting
ACCT6635 Forensic Accounting
ACCT6640 Dive, Dissect, and Decide with Big Business Data

**Concentration in Accounting for Finance and Consulting**

The Accounting for Finance and Consulting Concentration builds on the CSOM core curriculum and is a great complement to many other concentrations, including finance, marketing and operations management. Students with this concentration can pursue a wide variety of careers in business, including financial analysis, investment banking, consulting, marketing, and management training programs. Skills learned in this concentration position students for greater upward mobility in their career paths since the need for managers with an understanding of financial statements and financial reporting is evergreen. This concentration is designed to teach users of financial statements (rather than preparers of financial statements) how accounting information, shaped by regulation, has advantages and limitations in assessing the economics of an underlying business.

**Objectives**
The objectives of the Accounting for Finance and Consulting Concentrations are as follows:

(1) Expand and deepen your knowledge of external financial reporting and choices that managers make in preparing information for SEC filings. The knowledge is critical for both those who plan to use financial statements to value companies and those whose jobs require an understanding of how business decisions affect financial statements.

(2) Provide an understanding of the accounting data and information managers use for internal decision-making. For students interested in marketing or consulting, this knowledge enables you to accurately assess the true costs of producing a product or service and to identify the relevant information for make-versus-buy decisions. You will develop skills needed to accurately forecast revenues, expenses, and product demand. You will also understand how to set important organizational controls.

(3) Provide students with the financial tools and accounting savvy needed to converse with upper level management about the operation of the firm.

Guidelines and Courses

This concentration requires four courses (12 credit hours: one intermediate accounting course, one required elective in either managerial cost analysis or financial statement analysis, and two other electives from a set of approved electives in accounting, finance, operations, or economics.

Required 3 credit hours in:

- ACCT3321 Intermediate Accounting for Finance and Consulting*
And at least 3 credit hours from one of the following:

- ACCT3307 Managerial Cost Analysis
- ACCT3351 Financial Statement Analysis

And at least 6 credit hours from two of the following:

- ACCT3307 Managerial Cost Analysis OR ACCT3351 Financial Statement Analysis
- ACCT4405 Federal Taxation
- ACCT6601 Financial Accounting Standards and Theory III
- ACCT6618 Accounting Information Systems
- ACCT6623 Fair Value Accounting and Measurement
- ACCT6635 Forensic Accounting
- ACCT6640 Dive, Dissect, and Decide with Big Business Data
- ECON2228 Econometric Methods
- MFIN2235 Investment Banking (fulfills Finance “Bucket” elective)
- MFIN6616 Investment Banking (fulfills Finance “Other” elective)
- OPER3384 Predictive Analytics
- OPER6606 Forecasting Techniques

* Note: ACCT3301 FAST I will be accepted as a substitute for ACCT3321, but then you must also take ACCT3302 FAST II as one of your electives.

** A maximum of one elective can count towards the requirements of two different concentrations.

** Concentration in Accounting and Information Systems

Employers continually emphasize the value of graduates who understand both business and the information system (IS) that supports it. While IS
professionals develop competence in the design and implementation of business information systems, accountants have a broad understanding of the business process and controls and how the systems are used to generate information for decision making. Having the two skill sets is invaluable.

Students fulfilling this concentration will satisfy all of the requirements for the IS concentration and also obtain a background in Accounting. The curriculum entails six courses (five required and one Accounting elective) and is designed for students interested in careers either with the consulting divisions of professional service firms, such as major accounting firms and IS departments of companies, or as IS auditors. Students are advised to see a faculty advisor in selecting an appropriate Accounting elective. This concentration is administered jointly by the Accounting Department and the Information Systems Department.

**Required 15 credit hours in:**

- ACCT3301 Financial Accounting Standards and Theory I
- ACCT6618/ISYS6618 Accounting Information Systems
- ISYS2157 Programming for Management and Analytics (or CSCI1157)
- ISYS3257 Database Systems and Applications
- ISYS4258 Systems Analysis and Design

**And at least 3 credit hours from one of the following:**

- ACCT3302 Financial Accounting Standards and Theory II
- ACCT3307 Managerial Cost and Strategic Analysis
- ACCT3309 Audit and Other Assurance Services
- ACCT3351 Financial Statement Analysis
- ACCT6640 Dive, Dissect and Decide with Big Business Data
Concentration in Corporate Reporting and Analysis

This concentration will end with the Class of 2021. Students presently enrolled will have the option of completing the concentration or switching to the new **Accounting for Finance and Consulting** concentration.

Students who wish to enter the field of finance and would like to develop a deeper and better understanding of the financial statements that underlie most financial decisions are encouraged to pursue the Corporate Reporting and Analysis concentration. Taken together with a Finance concentration, the Corporate Reporting and Analysis concentration provides the course work for finance majors to understand the assumptions and procedures behind the preparation of financial statements and the skill set to better understand and evaluate financial statements.

Unlike the traditional accounting concentrations, the Corporate Reporting and Analysis concentration focuses solely on financial accounting and provides a valuable complement to a finance concentration. Most students who concentrate in Corporate Reporting and Analysis work for investment and commercial banks, mutual funds, and consulting and private equity firms. This concentration requires five courses (15 credit hours): three courses in financial accounting, one elective in accounting, and one elective in economics or statistics.

**Required 9 credit hours in:**

- ACCT3301 Financial Accounting Standards and Theory I
- ACCT3302 Financial Accounting Standards and Theory II
- ACCT3351 Financial Statement Analysis

**And at least 3 credit hours in one of the following:**
• ACCT6601 Financial Accounting Standards and Theory III
• ACCT6623 Fair Value Accounting and Measurement

And at least 3 credit hours in one of the following:

• OPER3384 Predictive Analytics
• OPER6606 Forecasting Techniques
• ECON2228 Econometric Methods
• ECON2229 Economic and Business Forecasting

Accounting for CPAs Minor

This minor is for students who are interested in working in public accounting. Please note: To meet the CPA requirements, students will need several courses beyond the minor.

The objective of the accounting curriculum sequence is to prepare a student for a professional career in public accounting, industry, financial institutions, government, information systems, law, or not-for-profit organizations. The curriculum is broad in its scope and coverage so it is relevant and useful for a variety of careers. Students intending to acquire a Certified Public Accountant (CPA) designation should choose this concentration as a way to start to satisfy the many CPA requirements. For more information, see the discussion of the Accounting Concentration.

Please note: This MCAS minor does not ensure that a student meets all requirements for sitting for the CPA exam. For instance, most states require a significant number of general business classes to sit for the CPA exam. This minor is only meant to give an MCAS student a start on meeting the many requirements.
Required Courses:

- ACCT1021 Intro to Financial Accounting
- ACCT3301 Financial Accounting Standards and Theory I
- ACCT3302 Financial Accounting Standards and Theory II
- ACCT3307 Managerial Cost Analysis
- ACCT3309 Auditing and Other Assurance Services
- ACCT4405 Federal Taxation

Accounting Department Electives

- ACCT1022 Managerial Accounting
- ACCT3309 Audit and Other Assurance Services
- ACCT3399 Directed Readings and Research
- ACCT4409 Advanced Auditing
- ACCT6601 Financial Accounting Standards and Theory III
- ACCT6615 Advanced Federal Taxation
- ACCT6618 Accounting Information Systems
- ACCT6623 Fair Value Accounting
- ACCT6626 Taxes and Management Decisions
- ACCT6634 Ethics and Professionalism in Accounting
- ACCT6635 Forensic Accounting
- ACCT6640 Dive, Dissect and Decide with Big Business Date

Accounting for Finance and Consulting Minor

The Accounting for Finance and Consulting minor leverages the critical thinking and communication skills developed in the MCAS curriculum, providing students with key skills that distinguish them for other new hires in financial services or consulting. It also provides students with an advantage in graduate business programs.
Objectives:

The objectives of the Accounting for Finance and Consulting minor are:

(1) Develop your knowledge of external financial reporting and choices that managers make in preparing information for SEC filings. This knowledge is critical for both those who plan to use financial statements to value companies and those whose jobs require an understanding of how business decisions affect financial statements.

(2) Provide an understanding of the accounting data and information managers use for internal decision-making. For students interested in consulting, this knowledge enables you to accurately assess the true costs of producing a product or service and to identify the relevant information for make-versus-buy decisions. You will develop skills needed to accurately forecast revenues, expenses, and product demand. You will also understand how to set important organizational controls.

(3) Provide students with the financial tools and accounting savvy needed to converse with upper level management about the operations of the firm.

Requires 18 credit hours:

Required Courses:

- ACCT1021 Financial Accounting
- ACCT3321 Intermediate Accounting for Finance and Consulting*

Choose a Track:

Consulting Track
• ACCT1022 Managerial Accounting
• ACCT3307 Managerial Cost Analysis

Finance Track

• MFIN1021 Basic Finance
• ACCT3351 Financial Statement Analysis

Two electives from the following list:

• ACCT1022 Managerial Accounting
• ACCT3307 Managerial Cost and Strategic Analysis
• ACCT3351 Financial Statement Analysis
• ACCT4405 Federal Taxation
• ACCT6601 Financial Accounting Standards and Theory III
• ACCT6623 Fair Value Accounting and Measurement
• ACCT6626 Taxes and Management Decisions
• ACCT6635 Forensics Accounting
• ACCT6640 Dive, Dissect, and Decide with Big Business Data
• OPER3384 Predictive Analytics
• OPER6606 Forecasting Techniques
• ECON2228 Econometric Methods
• MFIN2235 Investment Banking
• MFIN6616 Investment Banking

*ACCT3301 FAST I will be accepted as a substitute for ACCT3321, but then you must also take ACCT3302 (FAST II) as one of your electives.

**Electives may also include both courses from the other track. (I don't see the corresponding asterisk.)
Information for Study Abroad

Given the international scope of the profession, Accounting concentrators are encouraged to study abroad. The Accounting Department may recognize certain Core and elective courses for transfer to BC, depending on the circumstances, but students are encouraged to take accounting courses at Boston College. Prior approval is required. All Accounting concentrators should meet with the department assistant chair, department chair, or administrative assistant to plan their study abroad programs and to obtain definitive course approvals.

CPA Recommendations

The Department recommends that students who intend to practice as Certified Public Accountants (CPAs) check the board of accountancy of the state in which they plan to practice for its specific educational requirements (www.nasba.org). In almost all states, students are now required to complete 150 semester hours of course work to qualify for CPA licensure. In addition, a minimum number of accounting courses with specific topical coverage may be necessary. For more information please refer to the BC Guide to Meeting CPA Requirements available online or in the department office.

Because Boston College students typically graduate with only 120 credit hours (ignoring AP credits and overloads), students may require an extra year of course work in order to meet the 150 credit hours. Boston College offers a Master of Science in Accounting (M.S.) program to meet these additional requirements. For more details on the program, refer to the Boston College M.S. website: www.bc.edu/msa. Students who enter BC with Advanced Placement credits may be able to satisfy the 150-hour requirement in less time. Please contact the Accounting Department in
Fulton 520 or via e-mail at csom.accounting@bc.edu if you have any additional questions.

Business Law and Society - University Catalog

The Department of Business Law and Society in the Carroll School of Management does not offer a major or concentration. The courses taught by the Department of Business Law and Society are designed to give students a basic understanding of legal procedures and the legal environment of business. Undergraduate students in the Carroll School of Management are required to take Law I—Introduction to Law and Legal Process. This course covers the legal system, the sources of law, business ethics, the regulatory environment of business including antitrust and employment law, securities regulation and corporate governance, the international trade environment, and contract law. Elective courses are offered in a variety of topics that may interest students interested in starting their own business, considering law school, or preparing for the Certified Public Accounting examination. A core course and other electives that relate to concentrations are offered at the graduate level.

Managed By

University Catalog
Office of Student Services
Lyons Hall 103
Economics (CSOM) - University Catalog

The Economics major provides a critical examination of how the economic system works in the United States and throughout the world. The introductory course, ECON1101, is a survey of economic problems, policies, and theory, and the required courses in micro theory and macro theory, ECON2201–ECON2202, give a deeper analytical foundation. Electives permit further study in a wide range of fields, including money and banking, international trade and finance, public sector economics, economic development, capital theory, labor economics, industrial organization, environmental economics, law and economics, and econometrics. Students from the Carroll School of Management may choose Economics as an area of concentration. The Economics minor is not available to Carroll School of Management students. The concentration consists of six courses:

- Principles of Economics (ECON1101)
- Microeconomic Theory (ECON2201 or ECON2203)
- Macroeconomic Theory (ECON2202 or ECON2204)
- Business Statistics (OPER1135 or OPER1145)
- And two electives, at least one of which must be an upper level (3xxx) course
- At least one of the Theory courses must be completed by the end of junior year. Exceptions to this requirement may be granted at the discretion of the Director of Undergraduate Studies.
Students with a serious interest in economics are urged to complete the 11-course major in Economics within the Morrissey College of Arts and Sciences. Finally, all Carroll School of Management students, regardless of their area of concentration, are required to take Principles of Economics (ECON1101) and Business Statistics (OPER1135 or OPER1145).

The major in Economics provides a general background that is useful to those planning careers in law, government service, or business, as well as those planning careers as professional economists. Professional economists work as college teachers, as researchers for government agencies, for businesses and consulting firms, and as administrators and managers in a wide range of fields.

Office of Student Services  
Lyons Hall 103
Accessibility to preeminent finance faculty and cutting-edge academic research are key ingredients to providing undergraduate and graduate students with the tools and methods necessary to expand their understanding of finance. Rigorous training at all academic levels prepares students for the quantitative and analytical challenges in both the business and academic fields.

Concentrations and degrees for qualified students include:

- Undergraduate Concentration in Finance
- Master of Science in Finance
- Ph.D. Program in Finance

Our nationally recognized Finance Department, cited by *U.S. News & World Report* as among the top 15 in the country, hosts the Finance Department Seminar Series featuring top scholars from around the world addressing current research and trends in the field. These weekly seminars provide an engaging forum for students, faculty, and practitioners alike. In addition, informal brown bag lunches are hosted throughout the year by the Department.

Members of the Finance Department consistently facilitate meaningful interaction between students and professionals through an alumni
advisement system which supplements faculty advisement in the areas of financial institutions, manufacturing firms, service firms, nonprofit organizations, and government agencies.

## Concentration in Finance

### Finance Concentration Course Requirements

All required finance core courses (1–4) and select elective (5) must be taken in CSOM only.

### Five Prescribed Courses

1. MFIN1021 Fundamentals of Finance (formerly Basic Finance) (prerequisite: ACCT1021)

2. MFIN1127 Corporate Finance (prerequisite: MFIN1021)

3. MFIN1151 Investments (prerequisite: MFIN1021)

4. One elective from the following list* (courses listed below must be taken in CSOM)

   - MFIN2202 Derivatives and Risk Management
   - MFIN2205 Corporate Financial Strategies
   - MFIN2225 Financial Policy
   - MFIN2230 International Finance
   - MFIN2235 Investment Banking
   - MFIN2250 Fixed Income Analysis
   - MFIN2270 Data Analytics in Finance
5. At least 1 elective from any MFIN\(^\) course offered outside of the required courses or another from the set list above.

* Not every course will be offered each semester. Additional courses may be added to set list in the future. Please pay careful attention to prerequisites which are listed in Course Information and Schedule.

\(^\) All MFIN66XX electives require senior status and permission from the Department. This requires that seniors visit with Prof. Elliott Smith in Fulton 330B to seek approval, giving consideration to the student’s successful completion of the required prerequisites.

See Course Information and Schedule for up-to-date course listings.

Regardless of your concentration, we expect finance concentrators to have understanding in the following areas:

- major investment, financing and governance decisions (e.g., capital structure, merger and acquisitions, dividend, board of directors, etc.) of corporations;
- the risk and return trade-offs in investment and know how to evaluate basic financial products (e.g., stocks, bonds and derivatives);
- the role of financial institutions/intermediaries (e.g., investment and commercial banks, asset management companies) in the financial system;
- the role of financial markets in the economy and the need for efficient regulations.

For more information about the concentration in finance, visit the Finance Department's Academics and Study Abroad page.
Minor in Finance

This minor is for non-CSOM students who are interested in learning more finance to be better prepared for careers in financial institutions, service firms, nonprofits, and government agencies.

Required courses:

- ACCT1021 Introduction to Financial Accounting
- MFIN1021 Fundamentals of Finance (formerly Basic Finance) (sophomore or junior year)
- MFIN1127 Corporate Finance (prerequisite: MFIN1021) (junior or senior year)
- MFIN1151 Investments (prerequisite: MFIN1021) (junior or senior year)

One elective from the following list* (courses listed below must be taken in CSOM)

- MFIN2202 Derivatives and Risk Management
- MFIN2205 Corporate Financial Strategies
- MFIN2225 Financial Policy
- MFIN2230 International Finance
- MFIN2235 Investment Banking
- MFIN2250 Fixed Income Analysis
- MFIN2270 Data Analytics in Finance

At least 1 elective from any MFIN\(^\ast\) course offered outside of the required courses or another from the set list above.

* Not every course will be offered each semester. Additional courses may be added to set list in the future. Please pay careful attention to
prerequisites which are listed in Course Information and Schedule.

^ All MFIN66XX electives require senior status and permission from the Department. This requires that seniors visit with Prof. Elliott Smith in Fulton 330B to seek approval, giving consideration to the student's successful completion of the required prerequisites.

See Course Information and Schedule for up-to-date course listings.

Information for Study Abroad

All students wishing to study abroad must first meet with an advisor in the Office of International Programs (OIP).

If accepted into the study abroad program and approved by the Undergraduate Dean's Office (Fulton 315), the student should then contact either the Department Chairperson, Ronnie Sadka (Fulton 560C), or Elliott Smith (Fulton 330B), by e-mail or in person, with all supporting documentation (course description, detailed syllabus, etc.) for elective course approvals.

Any requested finance elective abroad must be equivalent to a finance elective taught at BC.

The Finance Department requires that Financial Accounting (ACCT1021) and Fundamentals of Finance (formerly Basic Finance) (MFIN1021) be taken at Boston College as prerequisites for any finance elective prior to going abroad. All required finance concentration core courses must be taken in CSOM only.
In the rare circumstance where course selection is only available upon arrival at the university, you must e-mail the course syllabus to either the Department Chairperson, Ronnie Sadka, or Elliott Smith before enrolling in the course in order to obtain approval. If the course is deemed a suitable finance elective, the Finance Department will send a confirming e-mail to you approving the course for credit.

All approvals should be obtained prior to going abroad.

No approvals will be granted after the course has been completed.

For more information about study abroad, visit the Finance Department's Academics and Study Abroad page.

General Management - University Catalog

Students choose to concentrate in this area for many reasons, but it is especially attractive to those students who are preparing for the management of a family business or for those who want a broad management background as preparation for law school.

The Undergraduate Associate Dean coordinates the General Management concentration.

Concentration in General Management

Choose two areas and meet the criteria specified by the departments. Usually, this involves one required course and a choice of an elective.

Note: Students who have elected another concentration within the Carroll School of Management as well as the General Management concentration must select areas different from their other CSOM concentration as they pursue General Management.

Accounting

Required courses:
• ACCT3301 Financial Accounting Standards and Theory I
• ACCT3302 Financial Accounting Standards and Theory II

OR

*Required course:*

• ACCT3307 Managerial Cost and Strategic Analysis

*Plus one elective:*

• ACCT3351 Financial Statement Analysis
• ACCT4405 Federal Taxation
• ACCT6618 Accounting Information Systems

**Information Systems**

*Required course:*

• ISYS2157 Programming for Management and Analytics

*Electives (choose one):*

• ISYS3257 Database Systems and Applications
• ISYS4258 Systems Analysis and Design

**Finance**

*Required courses:*

• MFIN1127 Corporate Finance
- MFIN1151 Investments

No electives

Marketing

Required course:

- MKTG2153 Customer Research for Marketing Decisions
  OR
- MKTG4256 Applied Marketing Management

Electives (choose one):

- MKTG2152 Consumer Behavior
- MKTG3153 Retailing
- MKTG3154 Integrated Marketing Communications
- MKTG3156 Special Topics: Launching Digital Marketing
- MKTG3157 Professional Selling and Sales Management
- MKTG3158 Product Planning and Strategy
- MKTG3165 Strategic Brand Management
- MKTG3170 Entrepreneurial Marketing in a Digital World
- MKTG3177 Heritage Marketing
- MKTG/ISYS3205 Tech Trek-West
- MKTG/ISYS3253 Digital Commerce
- MKTG3258 Mktg Analytics for Customer Insights
- MKTG3625 Luxury Marketing
- MKTG6610 Sports Marketing
- MKTG/ISYS6620 Marketing Information Analytics
- MKTG/ISYS6621 Social Media, Emerging Tech., and Digital Business
- MKTG/ISYS6635 New Media Industries
• MKTG/ISYS6640 Analytics and Business Intelligence

**Management and Organization**

*Required course:*

• MGMT2127 Leadership

*Electives:*

• Choose one additional MGMT course other than MGMT1021, MGMT1031, MGMT3099, MGMT3100, or MGMT2127

**Operations Management**

*Required course:*

• OPER3375 Operations Strategy and Consulting

*Electives:*

• OPER2255 Managing Projects
• OPER3310 Sports Analytics
• OPER3332 Supply Chain Management
• OPER3384 Predictive Analytics
• OPER6604 Management Science
• OPER6605 Risk Analysis and Simulation
• OPER6606 Forecasting Techniques
• OPER6607 Machine Learning for Business Intelligence
• OPER6614 Quality Management
Information Systems - University Catalog

Concentration in Information Systems

Information Systems (IS) are the lifeblood of the modern enterprise, making up the single largest portion of capital spending among U.S. corporations. Information Systems have the power to create and restructure industries, empower individuals and firms, and dramatically reduce costs. Many of the world's most successful corporations arrived at their position in large part due to their effective use of such systems. However, when poorly designed and implemented, IS can become a major source of risk, squander shareholder wealth, waste taxpayer money, and destroy firms and careers. As a result, organizations desperately need well-trained information systems specialists and technology-savvy managers. Today's manager simply cannot effectively perform without a solid understanding of the role of information systems in organizations, competition, and society.

The Information Systems concentration focuses on both technology and its effective use in organizations. In this program, students will learn how to plan, develop, and deploy technology-based business solutions, as well as to understand the strategic role of IS in organizations and the influential role of technology in society. The Information Systems concentration is designed for students with an aptitude for logical, analytical thinking and prepares them for positions in a variety of fast-growing professions. The Information Systems concentration is a strong choice as a primary concentration for
CSOM students. Given the increasing influence of IS in all functional areas, it also serves as an excellent second concentration for students whose primary concentration is in another field such as accounting, finance, marketing, or operations.

The Information Systems concentration emphasizes both team and individual work, allowing students to gain the skills and experience to strategize, design, program, and implement computerized information systems. The curriculum emphasizes software development technologies, data management, data communications, electronic commerce, and knowledge management as well as the fundamentals of computer hardware and software systems, high-level software design and programming, project management, emerging technology studies, and the strategic, operational, and responsible use of information systems.

Concentrators will develop the ability to work with others to understand business requirements and to determine the need for and feasibility of information systems change. They will use analytical thinking to simplify complex business tasks and to design efficient and user-friendly computer systems. They will develop communication skills to understand and explain systems requirements, make the case for IS investment, prepare clear documentation, and deliver effective presentations. Concentrators will also develop a strategic perspective on information systems, enabling them to participate in and support the increasingly visible role of information technology in corporate decision making.

Objectives of the Undergraduate Concentration in Information Systems

The objectives of the undergraduate concentration are to develop managers who:
• understand how to analyze the linkages between information technology (IT), innovation, business strategy, and competitive advantage.

• possess the technical skills (related to programming and databases) and managerial concepts needed to effectively plan, develop, and implement IT.

• understand how to promote more effective use of IT in organizations, taking into consideration how IT aligns with an organization's strategic focus, culture, business processes, etc.

• appreciate the broader ethical and societal implications of the burgeoning application of information technologies.

Careers in Information Systems

Careers available to IS concentrators dominate the U.S. Bureau of Labor Statistics' list of fastest growing occupations. IS professionals encompass a broad array of careers, from the highly technical to those which bridge the gap between the people who program information systems and the people who use them. Information Systems concentrators may pursue a variety of careers in business, consulting, and government. Technology careers often give professionals a broad and deep exposure to the firm and its customers, providing exceptional training for future executive leadership. The greatest demand in the IS field will be for professionals who have technical knowledge supported by a solid understanding of the role of information systems in business and organizations.

Courses Required for the Information Systems Concentration

• ISYS2157 Programming for Management and Analytics (or CSCI1101 or ISYS2160)
• ISYS3257 Database Systems and Applications
• ISYS4258 Systems Analysis and Design
• One additional ISYS course of level 1000 or above.

**Information for Study Abroad**

All students wishing to study abroad must first meet with an advisor in the Office of International Programs (OIP).

If accepted into the study abroad program and approved by the Undergraduate Dean's Office (Fulton 315), the student should then contact the Department Chairperson by e-mail or in person, with all supporting documentation (course description, detailed syllabus, etc.) for elective course approvals.

Although there are no particular prerequisites needed in order to qualify for study abroad, the usual course prerequisites still apply. Courses taken abroad can be allowed for concentration or elective credit if the courses are judged equivalent and if the proposed courses constitute a reasonable selection.

University Catalog
Office of Student Services
Lyons Hall 103
How can managers best develop and utilize the human capital in an organization and inspire their employees to thrive? Why do individuals and groups behave the way they do in organizations? What strategies should organizations pursue to grow and be productive? Our Management and Organization Department focuses on how to manage an organization's human resources and effectively develop and implement strategies for all types of organizations.

Through our programs, students develop the critical competencies for organizational success: leadership, communication, design, organizational development, and more.

**Concentration in Management and Leadership**

The Management and Leadership concentration will help develop and enhance your ability to lead and manage people and organizations. These skills are highly desired by virtually all potential employers, making the Management and Leadership concentration beneficial to all Carroll School undergraduates.

Upon completing the concentration, students will (1) demonstrate an appreciation for the fundamentals and complexity of successful leadership;
(2) identify exemplary leadership in themselves and others; and (3) demonstrate skills of effective leadership.

In addition to taking MGMT1021 Organizational Behavior the concentration requires MGMT2127 Leadership and three electives. Two electives in particular are highly recommended for this concentration: MGMT2123 Negotiation and MGMT2137 Managing Diversity.

**Required of all concentrators:**

- MGMT1021 Organizational Behavior
- MGMT2127 Leadership

**Three electives chosen from the following:**

- MGMT2110 Human Resources Management
- MGMT2111 Ethical Leadership Skills
- MGMT2123 Negotiation
- MGMT2132 Managing Change
- MGMT2133 Leading High Performance Teams
- MGMT2137 Managing Diversity
- MGMT2139 Social Innovation and Entrepreneurship
- MGMT2140 International Management
- MGMT2165 Managing in Adversity
- MGMT2170 Entrepreneurial Management
- MGMT2177 Leadership in Action: Lessons From Exploration
- MGMT2260 Leadership and Corporate Accountability
- MGMT2265 Globalization, Culture, and Ethics
- MGMT4901 Independent Study (by permission of instructor)
- MGMT5548/UNCP5548 Capstone: Leadership and Mindfulness
Minor in Management and Leadership for Non-Carroll
School of Management Students

A minor in Management and Leadership is offered to students in the
Morrissey College of Arts and Sciences, Lynch School of Education and
Human Development, and Connell School of Nursing who are interested in
pursuing management careers. This minor focuses on the behavioral side
of management by offering courses designed to increase students’
knowledge of leadership and management and build skills in these areas.
Students must complete six courses offered by the Management and
Organization Department.

The Management and Leadership minor will help students develop and
enhance their ability to lead and manage people and organizations. More
specifically, students will:

(1) develop an appreciation for the fundamentals and complexity of
successful leadership;

(2) identify exemplary leadership in themselves and others; and

(3) demonstrate effective leadership and management skills.

The minor is completed by taking two required courses and four MGMT
electives.

Required courses:

- MGMT1021 Organizational Behavior
- MGMT2127 Leadership
Four additional electives (any MGMT course including MGMT3099 Strategic Management)

The Management and Leadership minor prepares students for managerial roles in corporations, non-profit organizations, and government agencies. The common thread is managing people. In addition, the concentration provides excellent preparation for a career in management consulting, which focuses on diagnosing and solving management problems in client organizations.

For more information, please consult Professor Richard Spinello, in Fulton 430E or e-mail him at spinello@bc.edu to set up an appointment.

Entrepreneurship Co-concentration

Are you interested in an entrepreneurial career where you start or join a firm that revolutionizes markets through innovation? The entrepreneurship co-concentration provides a strong background for launching and managing high-growth ventures in nascent or high-velocity industries. It is an interdisciplinary program that will help engender entrepreneurial thinking and problem solving approaches. The course of study includes a mix of theory and real-world application with an emphasis on teamwork. The curriculum introduces a set of tools and a way of thinking that will help students to navigate the uncertain, ambiguous contexts that often characterize new initiatives in established firms as well as start-ups. The Entrepreneurship co-concentration is designed to be a second concentration for Carroll School of Management students. Up to one class from the co-concentration course list can be counted towards another concentration.

Required Courses
The courses in the co-concentration include the following:

**Required:**

- MGMT2170 Entrepreneurial Management

**Required: one of the following two finance courses:**

- MFIN2210 Entrepreneurial Finance
- MFIN2212 Venture Capital/Private Equity
- MGMT2139 Social Innovation & Entrepreneurship
- ISYS3315 Special Topics: Managing Digital Innovation

**Students must also take two electives from the following list:**

- BSLW6604 Law for the Entrepreneur
- ISYS3205 TechTrek West
- ISYS3206 TechTrek East
- ISYS3253/MKTG3253 Digital Commerce
- ISYS6621/MKTG6621 Social Media and Digital Business
- ISYS6640/MKTG6640 Analytics and Business Intelligence
- MGMT2123 Negotiation
- MGMT2139 Social Innovation and Entrepreneurship
- MKTG3156 Special Topics: Launching Digital Marketing
- MKTG3158 Product Planning and Strategy
- MKTG3170 Entrepreneurial Marketing in a Digital World
- UMG1010 Perspectives on Management

For more information, please visit the [Edmund H. Shea Jr. Center for Entrepreneurship](https://www.bc.edu/content/bc-web/academics/sites/university-catalog/undergraduate/csom/management-organization.html) website.
Information for Study Abroad

Students may take one or two electives abroad to count toward either the Management and Organization concentration or minor. In addition, it is sometimes possible to take the equivalent of MGMT1021 abroad. However, this must be approved prior to finishing the course by the Chairperson of the Management and Organization Department, who will need a detailed copy of the course syllabus, assignments, and readings.

Marketing is the business function that is responsible for setting market strategy and giving strategic direction to other business functions in the firm. It centers around understanding the wants and needs of a firm’s customers, be they consumers or other businesses, and is essential for properly positioning the company within the firm’s target markets.

Marketing offers a number of varied and interesting career paths, from sales, advertising, and product development, to marketing research, retailing, and brand management. A marketing degree is a valuable asset in many business sectors, for large or small companies, for-profit or non-profit firms, products or services, and consumer or business-to-business environments.

In the digital mobile economy, consumers are increasingly armed with more and better information, making them more demanding, less gullible, and less loyal to companies that don’t pay close attention to their needs. Competition is increasingly global and markets mature faster; first mover and market leader advantages can evaporate in a heartbeat. Advances in production and service delivery make it very difficult to compete on quality and production or distribution advantages are difficult to sustain long-term.

This means that the successful company is the one that can respond to changing market demands faster than its competitors. Marketing is one of
the key tools in keeping a company responsive and nimble. It specializes not only in understanding customer needs and motivations, but it also delivers the message to consumers that the company can meet those needs and motivations. This focus on the customer has caused marketing and the marketing concept to become increasingly central in management decisions and marketing is fully integrated with other functional areas in successful leading companies.

Regardless of your specific interests within marketing, Boston College will help you understand the marketing functions and its financial, social, and ethical responsibilities. The marketing program at BC teaches critical thinking, creative problem-solving, and a mix of theory- and skill-based approaches to marketing management and decision making. Marketing represents a unique mixture of quantitative statistics and analysis with a more lateral-thinking and behavioral approaches to management. Recent advances in technology, from social media to supply-chain integration, have revolutionized the way marketing is conducted. As a marketing major, you will develop skills in market analysis and decision making by working on varied marketing projects and programs such as new product launches, pricing and distribution strategies, service innovations, sales force management, and internet marketing campaigns.

**Undergraduate Concentration in Marketing**

Marketing Principles is a prerequisite for all other Marketing courses. Beyond the required core course (MKTG1021/1031 Marketing Principles) students must take four courses for the Marketing concentration. Of these four courses, the two required are as follows:

- MKTG2153 Customer Research for Marketing Decisions
- MKTG4256 Applied Marketing Management
Marketing Research should be taken in the junior year. Applied Marketing Management should be taken in the senior year.

The two additional courses may be taken from any of the following electives:

- MKTG2152 Consumer Behavior
- MKTG3148 Services Marketing
- MKTG3153 Retailing
- MKTG3154 Integrated Marketing Communications
- MKTG3156 Launching Digital Marketing
- MKTG3157 Professional Selling and Sales Management
- MKTG3158 Product Planning and Strategy
- MKTG3165 Strategic Brand Management
- MKTG3170 Entrepreneurial Marketing in a Digital World
- MKTG3175 Marketing Practicum
- MKTG3176 Marketing Planning
- MKTG3177 Heritage Marketing
- MKTG3178 Special Topic: Design Thinking and Strategy
- MKTG3205 Tech Trek-West (cross listed with ISYS3205)
- MKTG3253 Digital Commerce (cross listed with ISYS3253)
- MKTG3258 Marketing Analytics for Customer Insights
- MKTG3340 Analytics and Business Intelligence
- MKTG3625 Luxury Marketing
- MKTG6157 Professional Selling and Sales Management
- MKTG6610 Sports Marketing
- MKTG6620 Marketing Information Analytics (cross listed with ISYS6620)
- MKTG6621 Social Media and Digital Business (cross listed with ISYS6621)
- MKTG6635 New Media Industries (cross listed with ISYS6635)
Students interested in a career in marketing often take more than the minimum four courses in order to enhance career preparation.

Students are cautioned, however, against becoming too narrowly specialized.

MKTG4911 (Independent Study, 3 credits) and MKTG3175 (Marketing Practicum, 2 credits) provide creative learning opportunities and are offered for enrichment purposes only. They do not count toward the Marketing concentration. Marketing Practicum enables a student to earn credits with an unpaid internship overseen by a marketing professor. Independent Study enables a student to focus on a topic of his/her own choice working with a marketing professor.

Marketing Minor

This minor is for non-Carroll School students who are interested in developing quantitative and qualitative marketing knowledge and skills to be better prepared for careers in marketing and advertising.

Required courses:

- ACCT1021 Introduction to Financial Accounting
- MKTG1021 Marketing Principles
- MKTG2153 Customer Research for Marketing Decisions
- MKTG4256 Applied Marketing Management

2 electives:

- Choose two MKTG electives from course list available at [www.bc.edu/marketing](http://www.bc.edu/marketing).
Information for Study Abroad

Only one course from the international university can be considered for concentration credit. Customer Research for Marketing Decisions (MKTG2153) and Applied Marketing Management (MKTG4256) cannot be taken abroad.

All students wishing to study abroad must first meet with an advisor from the Office of International Programs. If accepted into the study abroad program and approved by the Undergraduate Dean's Office, the student should then see the Marketing Study Abroad Coordinator for course approvals before going abroad. When students wish to have a course considered they should e-mail or bring a copy of the syllabus and course description for approval.

All approvals must be obtained prior to going abroad. No approvals will be granted after the course has been completed.

Boston College Marketing Academy

The Marketing Academy is one of Boston College’s most active organizations. It is open to all students at Boston College.

It is the Academy’s goal to educate students about career opportunities, assist students in training for a future professional career, and establish professional contacts in business.

www.bc.edu/marketingacademy

Managed By
Operations Management - University Catalog

The Department offers undergraduate and graduate courses in the areas of operations management and business analytics. An undergraduate concentration is offered in Operations Management, as well as an undergraduate co-concentration in Business Analytics.

Concentration in Operations Management

Operations Management is a broad and multi-dimensional business area. Highly integrative, Operations Management determines how an organization executes its mission and goals. Operations Management is both an art and a science, tying together quantitative analytical skills with cognitive problem solving.

The Operations Management concentration provides students with knowledge of current issues in the Operations Management discipline. Intense competition in fast-paced global environments makes competencies in this field critical in both service and good-producing organizations. This concentration is applicable in many industries and organizations, combining knowledge in business analytics, process design and analysis methods, project management, and operations management issues. The curriculum recognizes environmental, ethical, and social issues. The pedagogy entails
lectures and discussions, case studies, field studies, and analytical modeling.

The Operations Management concentration builds upon the Carroll School of Management core, particularly complementing courses in statistics, organizational management, and economics. Our courses emphasize analysis and decision making and are explicitly designed to deliver the skills and knowledge required to successfully manage people, processes, and systems in today's competitive environment.

The concentration is designed to intersect with other functional disciplines making Operations Management an excellent complement to other concentrations including Accounting, Business Analytics, Finance, Marketing, Information Systems, or Management and Leadership.

Objectives of the Undergraduate Concentration in Operations Management

The objectives of the undergraduate concentration are to develop managers who:

- possess a broad and deep understanding of theories and concepts in Operations Management
- are capable of applying skills and knowledge to address management problems
- understand and utilize quantitative and qualitative analysis in decision making
- appreciate the role of operations in an organization and the interrelationships among functional areas

Careers in Operations Management
Operations managers manage both processes and people, with a highly integrative career path tying together analytical decision making with strategic perspectives and the needs of employees and other stakeholders. Our graduates have successfully attained positions in process management and analysis in major companies such as Accenture, Boston Beer, Deloitte, EY, Fidelity, General Electric, Goldman Sachs, IBM, JPMorgan Chase, and UBS. Students with this concentration may pursue careers in consulting, financial services, healthcare services, retail, transportation, technology, government, manufacturing, and not-for-profit organizations. Students with an operations management concentration are typically hired into positions such as Operations Analyst, Project Team Member, Supply Chain Analyst, Consultant, Process Designer, and Management Trainee, as well as positions on the corporate planning staff.

The demand for managers with these skills is strong and will increase as firms continue to recognize that they compete not only with new products, good marketing, and skillful finance, but also with a high degree of competence in managing their operations. Salaries for majors in Operations are and will likely remain competitive with all other concentrations in management.

**Operations Management Concentration Requirements**

The following two courses are required for the concentration:

- OPER3375 Operations Strategy and Consulting (fall)
- OPER2255 Managing Projects (fall and spring)

Also take two of the following:

- OPER3304/OPER6614 Quality Management (fall)
• OPER3310 Sports Analytics (fall)
• OPER3332 Supply Chain Management (fall)
• OPER3384 Predictive Analytics (fall and spring)
• OPER6604 Management Science (fall/spring)
• OPER6605 Risk Analysis and Simulation Methods (spring)
• OPER6606 Forecasting Techniques (fall, online, and spring)
• OPER6608 Pricing and Revenue Optimization (fall)
• Other Special and Advanced Topic courses as offered.

Co-concentration in Business Analytics

The Business Analytics co-concentration is designed to be a second concentration for Carroll School of Management students, who must choose a primary concentration such as marketing, information systems, operations management, management and leadership, accounting, or finance. Up to one class from the co-concentration course list can be counted towards another concentration.

Business Analytics is the emergent capability for organizations in the twenty-first century. All organizations, regardless of industry, size, or operating environment generate and manage large volumes of data and information that, used well, inform the decision making and competitive capabilities of the enterprise. The emerging area of analytics is focused on using business data to examine what already happened, to determine or predict what will happen, and to explore or model what should happen. Successful managers across functional areas, whether finance, marketing, operations, human resources, or information systems, need to be able to understand and utilize business analytics in order to manage and lead effectively.
Business Analytics draws upon a portfolio of methods and tools including statistics, forecasting, experimental design, data mining, and modeling to turn data into information and insights. The business analytics field includes descriptive, predictive, and prescriptive analytics. Descriptive analytics help organizations describe what has happened in their operating environment and includes gathering, organizing, tabulating, and communicating historical information, e.g., how many online subscribers do we have? Predictive analytics helps organizations understand what to do by uncovering relationships and associations in the available data and uses techniques such as probability and forecasting to reveal the likelihood of outcomes. For example, the number of online subscribers increases when we have banner advertising on search sites. Prescriptive analytics is focused on understanding the causal effects that can be discerned from data sets and strives to predict what will happen, given a particular course of action. For example, if we increase our banner advertising and provide one-click subscribing, how will the number of subscribers change?

The Business Analytics co-concentration builds upon the Carroll School of Management core. The co-concentration is designed to align with a variety of functional disciplines making Business Analytics an excellent complement to other concentrations including Accounting, Operations Management, Finance, Marketing, Information Systems, or Management and Leadership.

**Objectives of the Undergraduate Co-concentration in Business Analytics**

The objectives of the undergraduate co-concentration are to develop managers who:
• possess a broad and deep understanding of theories and concepts in business analytics
• are adept at data management and analysis
• understand and utilize quantitative techniques for historical analysis, predictive analysis, modeling, and simulation
• are capable of applying analytical skills and knowledge to address management problems across disciplines and industries

Careers in Business Analytics

Rather than simply answering questions about what, how, when, and where things have happened, today’s business analysts are able to push the use of data further, find out why things are happening and what will happen if identified trends continue, and model how an organization can use this information to optimize outcomes. Careers that utilize the skills and knowledge of business analytics continue to emerge and grow in all fields and business disciplines. Students with this co-concentration may pursue careers in consulting, financial services, healthcare services, accountancy, technology management, government, manufacturing, and not-for-profit organizations. The demand for managers with these skills is strong and will increase as firms continue to recognize that they compete not only with new products and services, but also with a high degree of competence in managing their data, information, and business intelligence.

Business Analytics Co-concentration Requirements

The following three courses are required:

• ISYS3340 Data Analytics in Practice (fall and spring)
• OPER3384 Predictive Analytics (fall and spring)
• OPER6604 Management Science (fall and spring)
Select two additional courses, excluding any courses taken from above list:

- OPER3304/OPER6614 Quality Management (fall)
- OPER3310 Sports Analytics (fall)
- OPER6605 Risk Analysis and Simulation (spring)
- OPER6606/MFIN6606 Forecasting Techniques (fall, online and spring)
- OPER6607 Machine Learning for Business Intelligence (spring)
- OPER6608 Pricing and Revenue Optimization (fall)
- ISYS2157 Programming for Management and Analytics (fall and spring) (or CSCI1101)
- ISYS3257 Database Systems and Applications (fall and spring)
- ISYS6621 Social Media, Emerging Technologies, and Digital Business (fall and spring)
- ISYS6625 Geographic Information Systems (fall and spring)
- ISYS6645 Data Visualization (fall and spring)
- MKTG2153 Customer Research and Insights for Marketing Decisions (fall and spring)
- MKTG3161 Customer Relationship Management (fall and spring)
- MKTG3258 Marketing Analytics for Customer Insights (spring)
- ACCT6640 Dive, Dissect and Decide with Big Business Data (spring)
- MFIN2270 Data Analytics in Finance (fall)

**Study Abroad**

Although there are no particular prerequisites needed in order to qualify for study abroad, the usual course prerequisites still apply. There is no limit to how many courses taken abroad will be allowed for major credit. If the courses are judged equivalent and if the proposed courses constitute a reasonable selection, major or elective credit will be given.
All students wishing to study abroad must first meet with an advisor from the Office of International Programs (OIP). If accepted into the study abroad program and approved by the Undergraduate Dean's Office, the student should then see Sam Graves, Department Chair, for course approvals before going abroad. When students wish to have a course considered they should e-mail or bring a copy of the syllabus and course description for approval.

Lyons Hall 103
Connell School of Nursing, Undergraduate Programs - University Catalog

BOSTON COLLEGE

Founded in 1947, the Boston College Connell School of Nursing offers a four-year program of study leading to a Bachelor of Science degree with a major in Nursing. At the completion of the program, graduates are eligible to take the national examination for licensure as a registered nurse (R.N.). The program of study is approved by the Massachusetts Board of Registration in Nursing and is accredited by the Commission on Collegiate Nursing Education. Visit www.bc.edu/cson for more information.

The mission of the Boston College William F. Connell School of Nursing is to prepare compassionate, professionally competent nurses whose practice and scholarship are scientifically based and grounded in humanizing the experience of health and illness. In keeping with the Jesuit, Catholic ideals, we focus on formation of the whole person and promotion of social justice. The Connell School of Nursing educates students as reflective life-long learners who use knowledge in service to others. The graduate of the baccalaureate program is prepared as a generalist who promotes, maintains, and restores the health of individuals, families, and communities/populations across the life span.

Nursing courses are designed to include more complex concepts and content at each level. Consequently, students must take courses in a
specific sequence and pass each course before proceeding to the next level. To be eligible for graduation, students must successfully complete the courses that comprise the curriculum, nursing requirements, and electives.

The study of nursing is based on a common intellectual heritage transmitted by a liberal education and the art and science of nursing. (See Core Curriculum under the University Policies section of this catalog.) Students are encouraged to complete their history, philosophy, theology, and English Core courses in their first and second years.

Nursing students use the clinical reasoning process to assess, plan, implement, and evaluate care. Judgments made by the nurse result in selection of interventions and outcomes in concert with the client's choices. Most nursing courses have a theory and a clinical component, and the curriculum includes content on the care of children, childbearing families, and adults of all ages across the continuum of wellness to illness. Faculty members guide student learning in campus laboratories and in a variety of healthcare agencies in the Greater Boston area.

Students should consult the curriculum plan and see their advisors as they plan for registration.

Typical Plan of Study for Class of 2019 and Forward

Note: CSON Undergraduates are obligated to register for a minimum of 12 credits per semester but normally should take 15 credits in almost all semesters to meet all program requirements on time.

Freshman Year

Semester I
- BIOL1300, BIOL1310 Anatomy and Physiology I
- CHEM1161, CHEM1163 Life Science Chemistry
- NURS1010 Professional Development Seminar
- Core or elective
- Core or elective

**Semester II**

- BIOL1320, BIOL1330 Anatomy and Physiology II
- MATH1180 Principles of Statistics for the Health Sciences
- NURS2070 Introduction to Professional Nursing
- Core or elective
- Core or elective

**Sophomore Year**

**Semester I**

- BIOL2200, BIOL2210 Microbiology for Health Professionals
- NURS2120 Nursing Health Assessment Across the Life Span
- NURS2121 Nursing Health Assessment Across the Life Span Clinical Laboratory
- NURS2080 Pathophysiology
- Core or elective

**Semester II**

- NURS2230 Adult Health Nursing Theory I
- NURS2231 Adult Health Nursing Clinical I
- NURS2204 Pharmacology/Nutrition
- NURS3170 Principles of Evidence-based Nursing
- NURS2090 Sophomore Formation Seminar
Core or elective

Junior Year

All students will have a flexible semester in their junior year. The flexibility will allow for study abroad (if approved by the Office of International Programs and their specific program) or other co-curricular activities. Students who are not abroad in their "flex" semester will be scheduled to take at least one clinical course.

This is one example of the flexible junior year schedule below. The Undergraduate Program Office will determine the exact clinical sequence for each junior.

Semester I

- NURS3242 Adult Health Nursing Theory II
- NURS3243 Adult Health Nursing Clinical II
- NURS3244 Childbearing Nursing Theory
- NURS3245 Childbearing Nursing Clinical
- Core or elective

Semester II

- "Flex" Semester

Senior Year

The Undergraduate Program Office will determine the exact clinical sequence for each senior.

Semester I
- NURS4250 Child Health Theory
- NURS4251 Child Health Clinical
- NURS4252 Psychiatric-Mental Health Nursing Theory
- NURS4253 Psychiatric-Mental Health Nursing Clinical Lab
- Core or elective

**Semester II**

- NURS4260 Population Health Nursing Theory
- NURS4261 Population Health Practice in the Community
- NURS4263 Nursing Synthesis Clinical Laboratory
- NURS4270 Transition to Professional Nursing
- Core or elective

The Connell School of Nursing reserves the right to alter any program or policy outlined.

**Satisfactory Academic Progress**

The CSON Academic Standards Advisory Committee meets at the end of each semester to review the records of students with course failures, course deficiencies, low GPAs, or other academic concerns. Decisions about progression in the program are made by this committee in accordance with the policies outlined in the CSON Baccalaureate Program Handbook (on the CSON website) and other relevant university policies.

**Credit and Graduation Requirements**

Students registered for at least 12 credit hours per semester are considered full-time students. Usually 15 credits are carried each semester and a minimum of 117 credits are required for graduation.
Information for First Year Students

During the first year students typically complete two semesters of Anatomy and Physiology with laboratories, Life Science Chemistry with Laboratory, Writing and Literature, Statistics, History I and II, Introduction to Professional Nursing, and Nursing Professional Development Seminar. Electives may be substituted in certain situations (e.g., the student has Advanced Placement credits for Core courses or wishes to continue foreign language study). During orientation, students will meet with faculty members who will assist them with registration for the fall. In September, students will be assigned advisors who will guide them through the Nursing program.

Special Opportunities

Study Abroad

Students in the William F. Connell School of Nursing are encouraged to take advantage of opportunities to study abroad for one semester. Normally, students may study abroad during fall or spring semester of junior year. Most students take electives and can sometimes complete Core courses while they are abroad. Students are free to study abroad in any location approved by the Office of International Programs. A minimum GPA is required for all study abroad programs.

Nursing Synthesis Course

The Nursing Synthesis course in the senior year offers students an advanced nursing practicum where they work with an individually assigned professional nurse preceptor. Students write a proposal in the semester prior to the course indicating their special learning interests.
Independent Study (NURS4911)

Junior or senior nursing students develop a proposal for independent study in an area of nursing in which they wish to obtain further knowledge and/or experience. Guidelines are available on the CSON undergraduate website. Students should consult an academic advisor and/or the Associate Dean of the undergraduate program about their proposal.

Undergraduate Research Fellows Program

Students in excellent academic standing may apply to assist faculty in a faculty-directed research project and gain valuable experience in nursing research.

Minors in the Connell School of Nursing

Nursing students may minor in any Morrissey College Arts and Sciences or Lynch School of Education and Human Development discipline by fulfilling the requirements of those departments.

Minor in Hispanic Studies

Nursing students may minor in Hispanic Studies by completing 18 credits in Spanish/Hispanic Studies that are approved by the Associate Dean. CSON students who wish to declare a CSON Hispanic studies minor should meet with the Associate Dean.

Minor in Psychology

The minor is awarded to CSON students who complete 18 credits in psychology. Courses should include PSYC1110 Introduction to Brain, Mind,
and Behavior and PSYC1111 Introduction to Psychology as a Social Science. Students who received AP credit for PSYC1110 and PSYC1111 may select alternate courses. Courses that may be applied to the minor include the following (or others approved by the undergraduate Associate Dean):

- ADPS1100 Introductory Psychology (Woods College; no credit for ADPS1100 if PSYC1111 was taken)
- APSY1030 Child Growth and Development
- APSY1032 Psychology of Learning
- APSY2041 Adolescent Psychology
- APSY2241 Abnormal Psychology
- FORS5315 Victimology
- FORS5317 Forensic Mental Health
- FORS5318 Forensic Science 1
- PSYC1011 Psychobiology of Mental Disorders
- PSYC1029 Mind and Brain
- PSYC2241 Social Psychology
- PSYC2260 Developmental Psychology
- PSYC2268 Psychological Development through the Life Span
- PSYC2272 Cognitive Psychology
- PSYC2274 Sensation and Perception
- PSYC2285 Behavioral Neuroscience
- PSYC3329 Psychology of Stress
- PSYC3331 Developmental Psychopathology
- PSYC3334 Interpersonal Violence
- PSYC3336 Clinical Psychology
- PSYC3338 Topics in Abnormal Psychology
- PSYC3344 Psychology of Gender
- PSYC3345 Social Motivation
- PSYC3354 Culture, Identity and the Asian-American Experience
- PSYC3366 Social and Emotional Development
- PSYC3367 Psychology of Art
- PSYC3371 Cognitive Neuroscience
- PSYC3372 Affective Neuroscience
- PSYC3377 Psycholinguistics
- PSYC3382 Neurobiology of Stress
- PSYC3383 Neurobiological Basis of Learning
- PSYC3384 Neurophysiology
- PSYC3386 Psychopharmacology
- PSYC3391 Ethical Controversies in Psychology and Neuroscience

Minor in Humanities, Health, and Culture

This is a minor for students who are interested in examining health and health care from new and varied perspectives. Currently, students from pre-med and pre-health professions throughout the Morrissey College of Arts and Sciences and other backgrounds such as law, psychology, public/global health, social work, and journalism are enrolled in the MCAS version of the minor. A special version of the minor has been created for CSON students to accommodate constraints in the B.S. (nursing) schedule. CSON students who are comfortable with significant writing assignments, have room in their schedule to accommodate added classes (especially those who have brought in AP credit and/or fulfilled a majority of their Core in the freshman year), and may wish to engage with a range of academic fields may consider this minor.

Minor Requirements:

- ENGL2212 Introduction to Medical Humanities (Enrollment is based upon acceptance to the minor.)
- BIOL1300 and BIOL1310 Anatomy and Physiology I with Lab
- BIOL1320 and BIOL1330 Anatomy and Physiology II with Lab
- NURS4270 Transitions to Professional Nursing
- A paper/article (minimum 20 pages) approved by the Undergraduate Associate Dean (original, from a course, or extended/adapted from a course) on a topic relevant to the minor to be submitted previous to graduation.
- 2 electives from the approved list:
  - (At least one course should be beyond those used to fulfill the Core requirements and not come from either Nursing or Biology.)

The Humanities, Health, and Culture minor is only open to the Class of 2019 and forward. Applications are available in the early spring semester for first-year students only.

Special Requirements for CSON Students

Health Requirements

In addition to the health and immunization requirements for all undergraduate students, nursing students must have immunity to varicella (chicken pox), hepatitis B, and MMR with an annual screening for tuberculosis (PPD) and flu shot. Other requirements may be required.

Other Clinical Requirements

Nursing students are required to be certified in Cardiopulmonary Resuscitation (CPR) before enrolling in Adult Health I clinical, and must keep this certification current. Nursing students must also undergo the expanded multistate criminal offense background checks that are required by affiliating health care institutions.
General Information

Cooperating Hospitals and Health Agencies

Students in the baccalaureate nursing program have planned learning experiences in teaching hospitals and community agencies in the Boston metropolitan area. The facilities used for these experiences are located in Boston and the surrounding area. Students are responsible for providing their own transportation to and from those facilities. Sites are accessible by public transportation.

Fees

School of Nursing students pay the same tuition, fees, and room and board costs as other colleges' enrollees. In addition, nursing students have the following expenses:

- Standardized examination (NCLEX Assessment Test) $70.00
- Laboratory Fee up to $200.00 (Payable for certain clinical nursing courses)
- Costs for transportation to clinical sites, additional health requirements, and CPR certification

College Credit for Transfer Students

Candidates possessing a bachelor's degree in another field and candidates possessing college credit in either nursing or non-nursing programs apply to the Office of Transfer Admissions, located in Devlin Hall. A maximum of 60 credits will be accepted in transfer. Nursing courses taken at another institution will be evaluated on an individual basis. Students applying for transfer will be asked to submit course syllabi to the School of Nursing for
use in evaluating prior course work. Additional information on transfer credits may be found in the Baccalaureate Program Handbook on the BC website.

Career Opportunities

The field of nursing offers a wide variety of career options, including positions in hospitals, long-term care facilities, community health agencies, clinics, and day care centers for children and the elderly. Nurses are establishing private practices and group practices with other health professionals. Business, industry, and occupational health settings employ nurses.

The baccalaureate program of study prepares its graduates for entry into master's and doctoral degree programs in nursing. With graduate study, advanced practice nurses see clients in primary care, teach students and other health professionals, establish programs of research, provide consultation, serve as health care planners, and participate on governmental committees dealing with health care issues. Many graduates of the Boston College Connell School of Nursing have gone on from clinical careers to become researchers in clinical settings and to serve on faculties of schools of nursing and administrators of clinical and educational institutions.

Managed By

University Catalog
Office of Student Services
Lyons Hall 103
Lynch School of Education and Human Development, Undergraduate Programs - University Catalog

BOSTON COLLEGE

The Lynch School offers undergraduate and graduate programs in education and applied psychology and human development.

The mission of the Lynch School of Education and Human Development is to improve the human condition through education. It pursues this goal through excellence and ethics in teaching, research, and service. It prepares undergraduate and graduate students to serve diverse populations in a variety of professional roles as teachers, administrators, human service providers, psychologists, and researchers.

Through research, the Lynch School seeks to advance knowledge in its respective fields, inform policy, and improve practice. Teachers, scholars, and learners at Lynch engage in collaborative school and community improvement efforts locally, nationally, and internationally. What unites the diverse work conducted within the Lynch School of Education and Human Development is the underlying aspiration to enhance the human condition, to expand the human imagination, and to make the world more just.

The Lynch School is named in honor of Carolyn A. and Peter S. Lynch. Peter Lynch, a Boston College graduate, is one of the country’s best-known financial investors.
Undergraduate Programs

Undergraduate students in the Lynch School may choose to major in Elementary Education, Secondary Education, or Applied Psychology and Human Development. All students entering Lynch School undergraduate programs follow a program of study in selected majors and complete Core requirements and electives needed to fulfill degree requirements.

Elementary Education majors must also complete a second major either in a content area in the Morrissey College of Arts and Sciences or in one of several interdisciplinary majors. Interdisciplinary majors include American Heritages, General Science, Mathematics and Computer Science, and Perspectives on Spanish America.
Secondary Education majors must also major in a state-approved licensure area. These areas include Biology, Chemistry, Geology or Earth Sciences, Physics, English, History, Mathematics, Latin Studies, foreign language, and Classical Humanities.

All education majors complete three pre-practicum experiences (1 day/week for 10 weeks) and one full practicum experience (5 days/week for 14 weeks) in a variety of classrooms where they mediate theory and practice to develop and provide instruction that enhances the life chances of all children. All Elementary and Secondary Education programs lead to endorsement for Initial Licensure in the state of Massachusetts. These programs may change in response to state licensure regulations. All students seeking licensure in Massachusetts must pass all the appropriate Massachusetts Tests for Educator Licensure (MTEL), regardless of in which state students wish to teach.

Graduates from Elementary and Secondary Education programs attain positions in public, private, parochial, and charter schools, other education-related fields, and areas that require strong liberal arts, subject matter, and pedagogical preparation and the ability to collaborate with others.

The major in Applied Psychology and Human Development prepares students for work in human, social, and community services and/or for graduate study in counseling, human development, educational psychology, organizational studies, higher education, and related fields. Coursework in this major curriculum offers a theoretical base in developmental and counseling psychology with a focus on understanding psychological processes in a variety of contexts.

Students in Applied Psychology and Human Development obtain employment in educational, human service, and business settings. A
practicum experience is strongly recommended and provides students with an opportunity to develop important professional skills and explore career opportunities. The 10-course major provides a strong background in the area of developmental psychology and an introduction to the field of counseling. Students choose to concentrate their upper level courses in one of three focus areas: human services, organizational studies, or community advocacy and social policy. The major is specifically designed for students who wish to work in a range of human service and community settings.

Students in the Applied Psychology and Human Development program are required to complete a minor of six courses in one discipline outside of the Lynch School, either in an interdisciplinary minor or major in the Morrissey College of Arts and Sciences or the Carroll School of Management or in a second major or interdisciplinary major in the Lynch School. Graduates receive a Bachelor of Arts or a Bachelor of Science depending on the degree requirements of the second major.

In addition, there is a number of Fifth Year Programs available for academically superior students through which the bachelor's and the master's degrees can be earned in five years. Please refer to the section following the descriptions of majors in the Lynch School of Education for more information about these programs.

**Satisfactory Academic Progress**

Lynch School of Education and Human Development students who are Elementary or Secondary Education majors must successfully complete 120 credits which must include the Core curriculum, the education major, and an appropriate second major. Students who are majoring in Applied Psychology and Human Development must also successfully complete 120 credits, which **must** include the Core curriculum, the Applied Psychology
and Human Development major, and at least one minor in a Morrissey College of Arts and Sciences discipline or an interdisciplinary minor in the Lynch School or the Carroll School.

To continue enrollment in a full-time program of study, a student must maintain a cumulative grade point average of at least 1.667 as the minimum standard of scholarship and must not fall more than 6 credits behind the total number of credits a student of his/her status is expected to have completed (Elementary and Secondary Education majors usually carry 15–17 credits each semester during the first three years and 30 credits during the senior year). For example, a first semester sophomore student must have completed at least 30–32 credits during the freshman year. Any student who is permitted by the Dean to continue enrollment in a full-time undergraduate program is considered to be in good standing.

Failure to maintain good standing either through a low cumulative grade point average or by incurring excessive deficiencies including failures, withdrawals, or unapproved underloads will result in placement on academic probation, possible withdrawal or dismissal, as determined by the Academic Standards Committee or the Dean.

A student on probation may return to good standing by approved methods, e.g., make-up of credits via approved summer school work, raising GPA to acceptable standards, etc. (Students may make up no more than 9 credits in summer study.) A student who incurs additional failures or withdrawals, or carries an unapproved underload while on probation, may be required to withdraw from the institution at the time of the next review.

**Information for First Year Students**
Although students may satisfy Core requirements (42 credits) during any of their four undergraduate years, they are advised to complete most or, if possible, all Core requirements within the first two years. The remaining 78 credits (minimum) are to be fulfilled by courses required in the major(s), minor(s), and elective choices.

All first semester, first year students should select ENGL1010 First Year Writing Seminar or a Core Literature course, APSY1030, Child Growth and Development, First Year ERA, and the course(s) designated by your major department. (Students who place out of Core courses in advance will take different courses selected in collaboration with an advisor.) Major requirements are listed in the sections that follow. If you have not declared a major and are listed as undeclared, follow the course requirements for the Applied Psychology and Human Development major.

The First Year Experience, Reflection, and Action Seminar (First Year ERA), a 3-credit course (1 credits first semester and 2 credit second semester), is also a requirement for all Lynch School students and is taken as a sixth course during first and second semesters, freshman year.

The Bachelor of Arts in Applied Psychology and Human Development degree requires the completion of at least 120 credits, which includes the University Core. Students must achieve at least a cumulative grade point average of 1.667. Furthermore, students majoring in Applied Psychology and Human Development must also complete an approved minor or second major (18 credits).

Students majoring in Elementary Education or Secondary Education must also complete 120 credits, which include the University Core and which are normally distributed over eight semesters of four academic years. Both Elementary and Secondary Education students must also fulfill a second
major. Elementary Education majors may fulfill the second major in either a subject in the Morrissey College of Arts and Sciences or one of the five Lynch School interdisciplinary majors. Secondary Education majors can only fulfill a second major in specific content areas in the Morrissey College of Arts and Sciences. All Teacher Education majors must complete three pre-practica, a full practicum, and an inquiry seminar. Students pursuing teacher licensure programs, however, must maintain a cumulative grade point average of at least 2.5 in order to be eligible to participate in the full practicum (full-time student teaching). Any student who enrolls in a pre-practicum must obtain a Massachusetts Education Personnel Identification (MEPID). Please consult the Office of Practicum Partnerships and Professional Development for more information.

The Associate Dean or the Associate Director of Undergraduate Student Services must approve a program of study in the declared major in the Lynch School before the end of sophomore year. Students majoring in Applied Psychology and Human Development or a teacher licensure program must be accepted officially into the major by the Lynch School.

Students seeking a major leading to teacher licensure must complete and submit a Declaration of Major form and an application for Admission to a Teacher Education Program to the Associate Director (Campion 104). This office reviews applications and accepts qualified applicants prior to the end of the sophomore year. Early application to the program is encouraged. Applied Psychology and Human Development majors need to complete a Declaration of Major form.

The remaining courses required for graduation include additional major courses, minor courses, and electives.

**Online Courses**
Ordinarily, credit for courses taken online is not transferable. In rare cases of extenuating circumstances, e.g., proximity to degree, certain conditions apply. If students have circumstances that might warrant an exception, they should see their Academic Dean.

**Practicum Experiences Leading to Teacher Licensure**

Endorsement for license is a collaborative effort between the Lynch School Director of Practicum Partnerships, the Program Supervisor, and the Supervising Practitioner. The Office of Practicum Partnerships and Professional Development, Campion 102, approves and arranges placements for pre-practica and full-practica leading to licensure only for eligible students enrolled in programs in the Lynch School. Placement for full practicum also requires prospective teacher candidates to complete a successful interview with the Principal/Headmaster and/or potential cooperating teacher from the school in which they plan to fulfill this requirement. The Director of Practicum Partnerships and Professional Development, for appropriate reasons, may choose not to approve a student for the practicum. All students seeking licensure in Massachusetts must pass the appropriate Massachusetts Tests for Educator Licensure (MTEL) regardless of which states students wish to teach in upon graduation.

Pre-practica and full practica are essential components and experiences of the teacher preparation curriculum in the Lynch School. Students must complete three semesters of pre-practicum placements (1 day/week/10 days) before they enter a full-time student teaching placement in Elementary and Secondary Education classrooms. A full description of student teaching policies may be found in the pre-practicum handbook.
available in the Office of Practicum Partnerships and Professional Development in Campion 102.

A full practicum (student teaching) is a full-time, five-days, per week experience that occurs for a minimum of 14 weeks during the senior year. In the Lynch School, a full practicum must meet the teaching standards required by the Massachusetts Department of Education. Student teachers must demonstrate competence according to the standards outlined in the Boston College Candidate Assessment of Performance (BC-CAP).

The semester prior to completing a field placement, students must formally apply and participate in an interview in the Office of Practicum Partnerships and Professional Development before securing a field assignment.

Subject to eligibility, students submit an online application for pre-practicum and practicum experiences. Online applications are available at the Student Teaching page.

All students seeking teacher licensure must complete the full practicum. A cumulative grade point average of 2.5 and successful completion of all major courses are required prior to student teaching for all students in the Elementary program. Students in Secondary Education must complete all major courses in Secondary Education and 4/5 of Morrissey College of Arts and Sciences courses prior to student teaching. No incomplete grades may be outstanding and a minimum of 87 credits must have been completed before placement is approved. A full description of student teaching policies may be found in the pre-practicum handbook available in the Office of Practicum Partnerships and Professional Development in Campion 102. All students will be screened for eligibility and any who fail to meet the standards (academic, health, professional) will be counseled into courses that will complete an appropriate degree program from Boston College.
These students will not be recommended for endorsement for teacher licensure and will not receive the BC Endorsement (a recommendation for licensure). The Commonwealth of Massachusetts issues teacher licenses not the endorsing university. Therefore, students who earn the BC Endorsement submit all licensing documentation directly to the Massachusetts Department of Elementary and Secondary Education. Students will not be allowed to overload courses while student teaching. If, for any reason, a student is unable to complete the full practicum, an extended practicum (additional time in the field) will be required by arrangement of the Director of Practicum Partnerships and Professional Development.

Application deadlines for all pre-practica are May 1 for fall placements and December 1 for spring placements. Application deadlines for all full-practica are March 15 for fall placements and October 15 for spring placements. The Office of Practicum Partnerships and Professional Development will not be able to arrange assignments for late applicants. Applications are submitted online at the Student Teaching page.

The school sites utilized for pre-practica and full-practica are located in Boston and neighboring communities. Students are responsible for their own transportation to and from these facilities.

**Applied Psychology Field Practica**

Applied Psychology and Human Development students should visit the [Applied Psychology and Human Development](https://www.bc.edu/content/bc-web/academics/sites/university-catalog/undergraduate/lynch.html) page for information on practicum experiences for this major and register for APSY2152 or APSY4245 in the semester during which they will complete their field practicum experience.
International and Special Practicum Placement Program for Undergraduate Studies

Lynch School students may participate in the International Programs described in the University Policies and Procedures section of this catalog.

The Lynch School's International and Special Practicum Placement Program offer opportunities for undergraduate coursework in a variety of foreign countries for pre- and full-practicum placements. International settings include classrooms in such countries as Switzerland, Ireland, England, France, Italy, Germany, Spain, and Mexico. For information regarding programs and requirements, contact the Office of Practicum Partnerships and Professional Development in Campion 102.

The Honors Program

Scholarship and academic excellence are traditions at Boston College. To meet the needs of superior students, the Lynch School offers an Honors Program. Students are admitted to the Honors Program by invitation only prior to the beginning or at the end of freshman year, based on prior academic accomplishments and other criteria.

Majors in Education

The undergraduate majors in the Lynch School, with the exception of the major in Applied Psychology and Human Development, are intended to meet the requirements for Initial Licensure as a teacher of the Massachusetts Department of Education. The Lynch School accreditation process and the Interstate Licensure Compact (ICC) facilitate licensure in other states. Licensure requirements are set by each state, however, and
are subject to change. Students seeking licensure in Massachusetts must pass all appropriate tests of the Massachusetts Tests for Educator Licensure. All students must consult with the Office of Practicum Partnerships and Professional Development to review the most recent licensure requirements of Massachusetts and other states.

The Lynch School offers two minors and one concentration for Education majors—Middle School Mathematics Teaching, Leadership in Higher Education and Community Settings, and a Special Education Concentration. The Massachusetts Department of Elementary and Secondary Education is mandating that all teacher candidates complete a specific bilingual course. Please consult the Chair of Teacher Education, Special Education, and Curriculum and Instruction or the Associate Dean of Undergraduates at LSOE for the most current information.

The concentration in Special Education is designed to prepare students to work with a diverse group of special needs learners. In light of a growing national movement for further inclusion of special needs students in regular classrooms, teachers must be able to accommodate special needs students in their classrooms. All education students are strongly urged to consider this important concentration. Detailed information on the concentration in Special Education can be found in the minors section of the Lynch School catalog and on the Lynch School website.

The minor in Middle School Mathematics Teaching is available to Elementary Education majors with a Morrissey College of Arts and Sciences Mathematics major or Mathematics/Computer Science interdisciplinary major, or to Secondary Education majors with a Morrissey College of Arts and Sciences Mathematics major. Teachers of middle school mathematics are in great need in the United States, and all eligible Lynch School students should investigate this option. For more information on the
minor in Middle School Mathematics Teaching, consult the minors section of the Lynch School catalog and the Lynch School website.

The minor in Leadership in Higher Education and Community Settings is open to Lynch School majors in Applied Psychology and Human Development as well as students in the Morrissey College of Arts and Sciences, Carroll School of Management, and Connell School of Nursing. This minor is limited to 15 students per class and requires a specific grade point average of 3.5, a completed application, and a 250-word rationale for pursuing this minor. See the minors section of the Lynch School catalog and the Lynch School website.

Major in Elementary Education

The major in Elementary Education prepares students for teaching children without disabilities and children with mild disabilities in regular classrooms, grades 1–6.

The major requirements for the elementary program include foundation and professional courses. Foundation courses focus on building understanding in areas such as child growth, learning, pedagogy, and development from diverse social, cultural, and historical perspectives. Professional courses integrate theoretical and pedagogical knowledge of subject matter of the elementary classroom that includes reading, language, literature, mathematics, science, and social studies, informed by a pupil-centered perspective.

In addition to the mastery of program content, students are instructed in learning theories, instructional strategies and models, curriculum and school organizational practices, educational technology, inquiry, and effective assessment procedures and instruments.
Students also develop competencies in working with diverse learners including English language learners. Instruction enables teacher candidates to effectively integrate children with disabilities into regular classrooms. Teacher candidates have opportunities to engage in problem-solving and reflective practice, work with parents and communities, and apply knowledge to research projects.

The pre-practicum component begins at the sophomore level and culminates in full-time senior level practicum. Course and practica are carefully linked.

The learning outcomes for Elementary Education majors include:

- **Outcome 1**: The teacher candidate will promote the learning and growth of all students by providing high-quality and coherent instruction, designing and administering authentic and meaningful student assessments, analyzing the student performance and growth data, using the data to improve instruction, providing students with constructive feedback on an ongoing basis, and continuously refining learning objectives.
- **Outcome 2**: The teacher candidate will promote the learning and growth of all students through instructional practices that establish high expectations, create a safe and effective classroom environment, and demonstrate cultural proficiency.
- **Outcome 3**: The teacher candidate will promote the learning and growth of all students through ethical, culturally proficient, skilled, and collaborative practice.
- **Outcome 4**: The teacher candidate will demonstrate an inquiry stance by collecting and reporting data on pupil outcomes for the purpose of assessing, teaching, and modifying instructional practice.
Outcome 5: The teacher candidate will identify policies and practices that contribute to systemic inequities in education and be aware of how his or her own background experiences are influenced by these systems, and recognizes a professional responsibility to promote and practice principles of social justice teaching.

A second major, either interdisciplinary or in a subject discipline in the Morrissey College of Arts and Sciences or Applied Psychology and Human Development in the Lynch School, is required. Students must consult with their program advisors as to the selection and requirements for the major.

**Major in Secondary Education**

The major in Secondary Education prepares students for teaching in secondary schools, grades 8–12. The major in Secondary Education is ideal for those students interested in high school teaching, who want to achieve an in-depth major in a discipline, and who want to apply elective courses to enhance the major and professional course work. Students may prepare to teach in the following disciplines: biology, chemistry, earth science, physics, English, history, mathematics, Latin, Spanish, and French.

Requirements for the secondary major include courses in child and adolescent development; theory and instruction in teaching diverse populations and meeting the special needs of children; teaching reading, writing, and specific subject methods courses; inquiry; and classroom assessment. The program also includes three pre-practicum experiences beginning sophomore year and culminating in a full practicum in the senior year.

Learning outcomes for Secondary Education majors include:
• Outcome 1: The teacher candidate will promote the learning and growth of all students by providing high-quality and coherent instruction, designing and administering authentic and meaningful student assessments, analyzing student performance and growth data, using this data to improve instruction, providing students with constructive feedback on an on-going basis, and continuously refining learning objectives.

• Outcome 2: The teacher candidate will promote the learning and growth of all students through instructional practices that establish high expectations, create a safe and effective classroom environment, and demonstrate cultural proficiency.

• Outcome 3: The teacher candidate will promote the learning and growth of all students through effective partnerships with families, caregivers, community members, and organizations.

• Outcome 4: The teacher candidate will promote the learning and growth of all students through ethical, culturally proficient, skilled, and collaborative practice.

• Outcome 5: The teacher candidate will promote an inquiry stance of critical reflection about personal practice through individual and collaborative inquiry in service of improving pupil academic, emotional, and social learning.

Middle School Licensure

Middle School licensure is available to Elementary and Secondary Education students by application to the Massachusetts Department of Elementary and Secondary Education via an alternate route. A special option is provided for students who plan to minor in Middle School Mathematics Teaching. Students seeking licensure to teach at the middle school level should consult the Office of Practicum Partnerships and Professional Development.
Major in Applied Psychology and Human Development

The major in Applied Psychology and Human Development consists of course offerings in developmental psychology, personality theories, educational psychology, and related fields. It provides a basic foundation for careers in social service and community settings or for graduate study in many fields of psychology, including counseling, developmental or educational psychology, organizational studies, business, and social work. This major prepares students for entry-level employment as support personnel in offices of senior professional psychologists and counselors and in settings such as child/adult residential or day care facilities and alternative educational, community, or business settings. Ten courses or a minimum of 30 credits are required for the major.

The Applied Psychology and Human Development major requires five specified courses and five additional courses selected from one of the following concentrations: Human Services, Organization Studies, and Community, Advocacy and Social Policy. Each concentration includes 2–3 specified courses and/or 2–3 electives.

Learning outcomes for Applied Psychology and Human Development majors include:

- Outcome 1: Understand the processes of human development and learning from infancy into late adolescence or the transition to adulthood.
- Outcome 2: Understand how social and cultural contexts shape developmental and educational processes.
• Outcome 3: Understand how contemporary social problems affect children, families, and communities.
• Outcome 4: Use foundational theories of applied psychology and human development to analyze educational and other real-world settings.
• Outcome 5: Articulate a researchable theoretical argument and apply appropriate research techniques to empirical analysis.
• Outcome 6: Articulate their personal core values and beliefs, how these are informed by critical engagement with theoretical and empirical knowledge in applied psychology and human development, and how these inform their relationships with their families and communities.
• Outcome 7: Develop a specialized understanding of 1 of 3 areas:
  ○ Human Services: Basic knowledge of psychosocial challenges to normal development and of a range of individual and community-level strategies to prevent mental illness and enhance psychosocial well-being and mental health;
  ○ Organizational Studies—Human Resources: Basic knowledge of organizational behavior theories, their applications in human resource management, and the contributions of applied psychology in these contexts.
  ○ Community, Advocacy and Social Policy: Basic knowledge of theories of community psychology and the applications of psychological knowledge to advocacy and social policy for and with children, youth and their families and communities.

The Applied Psychology and Human Development major does not provide for state licensure as a classroom teacher.

Students who are pursuing Applied Psychology and Human Development as their primary major within the Lynch School, regardless of class year, are required to complete coursework in one of the following:
A minor of 18 credits in a single subject discipline in the Morrissey College of Arts and Sciences, in Management and Leadership in the Carroll School of Management, in Leadership in Higher Education and Community Settings in the Lynch School, or in other specific interdisciplinary minors. Please note: the minor in Management and Leadership is limited to 15 students per class and requires a specific grade point average, rationale, and application.

A major or an interdisciplinary minor (e.g., African and African Diaspora Studies, Women's and Gender Studies) in the Morrissey College of Arts and Sciences; or

A second major or interdisciplinary major in the Lynch School.

The minimum number of credits acceptable for most minors is 18, which may include applicable Core courses. The concentration in Special Education (which does not satisfy the required minor for students in Applied Psychology and Human Development), however, requires only 12 credits. This is an excellent option as a second area of concentration for Applied Psychology and Human Development majors interested in special needs settings. The minor in Management and Leadership, offered in collaboration with the Carroll School of Management, is another excellent option for students planning to work in business or industry. The Lynch School also offers an interdisciplinary minor in Leadership in Higher Education and Community Settings. Students who have a second major automatically fulfill the minor requirement. Approved areas of study for both majors and minors are listed under the Morrissey College of Arts and Sciences, with acceptable interdisciplinary majors listed above.

Additional detailed information for Applied Psychology and Human Development majors is available on [Applied Psychology and Human Development page](https://www.bc.edu/content/bc-web/academics/sites/university-catalog/undergraduate/lynch.html#graduation). There is a link at the bottom of this page for details about course requirements. There are also links from this page to a list of
faculty who teach in the program, field practicum courses, supporting fields of study, and study abroad opportunities, as well as information about future career choices. It is strongly recommended that all students pursue a field practicum course which includes ten hours a week of volunteer work in community, business, or human service agencies or programs, and a weekly seminar. Links to existing sites are available on the web and can be discussed with the Coordinator of the Applied Psychology and Human Development Program or the Associate Dean for Undergraduate Students.

**Second Majors and Interdisciplinary Majors for Lynch School Students**

All students in the Lynch School pursuing an Education major leading to licensure are required to complete a second major in the Morrissey College of Arts and Sciences or an interdisciplinary major as outlined below. Applied Psychology and Human Development majors are also required to carry a minor of 18 credits in a single subject discipline in the Morrissey College of Arts and Sciences, a major or an interdisciplinary minor in the Morrissey College of Arts and Sciences, or a second major or interdisciplinary major in the Lynch School. Acceptable interdisciplinary majors are listed below.

**Lynch School Majors**

**Interdisciplinary Majors**

Interdisciplinary majors are based in two or more Morrissey College of Arts and Sciences disciplines that are relevant to teaching in elementary school settings. Each of these majors is available to students in the Lynch School
pursuing Elementary Education and Applied Psychology and Human Development. Students should consult their advisors regarding the specific courses required for these interdisciplinary majors.

**Note:** Secondary Education students **cannot** become licensed to teach in any of these interdisciplinary areas. Secondary licensure requires a Morrissey College of Arts and Sciences major in one of the specific subject disciplines listed under the description of Secondary Education requirements.

Applied Psychology and Human Development majors may choose a second major or one of the interdisciplinary majors listed below in place of their Morrissey College of Arts and Sciences minor requirement.

**American Heritages**

Recommended for students who are interested in the American heritage from literary and historical perspectives. Two tracks are available for students pursuing this major, a cultural track with emphasis in the literary perspective, and a social science track for students interested in historical and sociological perspectives.

**General Science**

Designed for students seeking a broad and general background in science to help them teach in an elementary or special education setting. Nine courses are required from four science departments—Biology, Chemistry, Physics, and Earth and Environmental Sciences (Geosciences).

**Mathematics/Computer Science**
This major is recommended for students who have had four years of high school mathematics and wish to specialize in the area of mathematics and computer science but who are not interested in the traditional Mathematics major because of their intended career objective as elementary, early childhood, or special needs educators. Many students who complete this interdisciplinary major in conjunction with Applied Psychology and Human Development or Elementary Education go on to acquire licensure to teach mathematics at the secondary level by fulfilling master’s degree requirements in Secondary Education through the Fifth Year Program.

**Perspectives on Spanish America**

Recommended for students who may have had at least two years of high school Spanish and wish to develop Spanish language skills, this minor coupled with a background in the historical, sociological, and literary traditions of Hispanic cultures.

**Minors or Concentrations for Lynch School Students**

**Leadership in Higher Education and Community Settings Minor**

This 18-credit minor is designed for students who may have an interest in institutions of higher education, in local and international non-government organizations (NGOs) and/or in community-based organizations and programs.

**Middle School Mathematics Teaching Minor**
A minor in Middle School Mathematics Teaching is available to undergraduates who are either: Elementary Education majors (with an MCAS Mathematics major OR a Mathematics/Computer Science Interdisciplinary major) OR Secondary Education majors (with an MCAS Mathematics major). While the minor does not lead directly to middle school mathematics certification at Boston College (we do not offer middle school certification), it does fulfill the National Council of Teachers of Mathematics requirements for middle school teachers of mathematics. With this minor, acquiring middle school mathematics certification in Massachusetts should not be difficult.

**Special Education Concentration**

The Special Education Concentration is available to Lynch School of Education and Human Development students only. This includes students majoring in Elementary Education, Secondary Education, and Applied Psychology and Human Development who have an interest in special needs education.

**Teaching English Language Learners (TELL) Certificate**

The Lynch School of Education at Boston College offers a certificate program in Teaching English Language Learners (TELL). Candidates should be working toward a licensure in an education field (early childhood, elementary, secondary, reading, etc.). This program is designed to prepare mainstream teachers to work with bilingual learners/English Language Learners in their mainstream classroom settings. The certificate requires two courses and completion of a field experience in a classroom that includes bilingual learners.
Minors in the Carroll School of Management for Lynch School of Education and Human Development Students

There are six minors offered to non-management students: Accounting for CPAs, Accounting for Finance and Consulting, Finance, Management and Leadership, Managing for Social Impact and the Public Good, and, Marketing. Interested students should visit www.bc.edu/csom-minors for more information.

Minors in the Morrissey College of Arts and Sciences for Lynch School of Education and Human Development Students

In addition to a multitude of MCAS department and interdisciplinary minors, open to the Lynch School undergraduates, students may also declare the following minors that were created for Lynch School students by visiting Campion Hall 104:

Educational Theatre Minor

This minor provides drama education and theatre training to LSOE students who hope to include theater as a subject they teach and practice in school settings and/or who want to use creative dramatics and applied theatre techniques as teaching tools in other institutional settings.

Communications Minor

This 18-credit minor introduces students to the field of Communications. Students enroll in four required courses and two electives.
Minors in the Lynch School for Morrissey College of Arts and Sciences, Carroll School of Management, and Connell School of Nursing Students

Applied Psychology and Human Development Minor

This 18-credit minor may interest students who wish to (1) deepen their knowledge of human behavior in the areas of psychology, human development, and learning sciences in preparation for a career in fields such as human capital, consulting, research, consumer behavior, organizational studies, client relations, recruitment, marketing, advertising, counseling, public health, social, community and political advocacy, among others; (2) gain specialized knowledge in certain specific areas of human development and wellness: for example, counseling, training, personal assessment, family crisis assistance, substance abuse interventions, and child/aging/elderly care; or (3) prepare for employment in a government or private sector organizations.

Foundation in Education Minor

This 18-credit minor introduces students to courses in the fields of applied psychology and teacher education.

Inclusive Education Minor

This 18-credit minor is designed to (1) introduce students to the world of disabilities and special education, with an emphasis on special education practice, and (2) enhance the ability of future professionals to meet the
needs of an increasingly diverse population of students in America's schools.

**Leadership in Higher Education and Community Settings Minor**

This 18-credit minor is designed for students who may have an interest in institutions of higher education, in local and international non-government organizations (NGOs) and/or in community-based organizations and programs.

**Declaration of Minor Process**

To declare any of the minors listed above students should complete a Declaration of Minor form in Campion Hall 104.

**Secondary Education Minor**

This minor is open to Morrissey College of Arts and Sciences students who major in one of the following disciplines: English, Mathematics, History, Latin, Classical Humanities, Foreign Language, Biology, Chemistry, Earth and Environmental Science, Physics, and who plan to pursue licensure to teach in high school. The minor is also open to CSOM or CSON students who would like to explore options for pursuing licensure to teach in high school.

**Declaration of Minor Process**

All interested MCAS, CSOM and CSON students interested in the Secondary Education Minor should make an appointment in Campion 104.
This minor requires early planning, an interview, an application and a minimum grade point average of 3.0.

Graduation

For information regarding graduation, visit the Graduation section of Undergraduate Academic Policies.

This includes information on policies regarding such topics as:

- Advanced Standing
- Acceleration

The University awards degrees in May, August, and December of each year, although commencement ceremonies are held only in May.

Fifth Year and Early Admit Programs

For Boston College Juniors

The Fifth Year and Early Admit Programs offer academically outstanding Boston College juniors a unique opportunity to begin graduate study during their undergraduate senior year, allowing them to graduate with a bachelor’s and master's degree in a shortened amount of time.

None of the 120 credits required for the bachelor's degree may be counted toward a Fifth Year Program. In consultation with an advisor, a graduate level course may be added each semester to the student's senior-year schedule.
All undergraduate juniors in the Lynch School of Education, Morrissey College of Arts and Sciences, Connell School of Nursing, and Carroll School of Management are eligible to apply for these programs. (*See additional Early Admit requirements below.)

Fifth Year Programs are available in:

- Early Childhood, Elementary, or Secondary Teaching
- Curriculum and Instruction
- Moderate Special Needs (mild/moderate learning disabilities, developmental disabilities, and behavior disorders)
- Severe Special Needs (including visually impaired, deaf/blindness, and multiple disabilities)
- Higher Education
- Measurement, Evaluation, Statistics, and Assessment
- Applied Developmental and Educational Psychology

There may be limited federal financial assistance for some graduate programs in Severe Special Needs and Secondary Science Teaching.

Early Admit Programs are available in Mental Health Counseling and School Counseling. Given the number of credits required for licensing in Mental Health and School Counseling, both Early Admit Program and students admitted directly into the M.A. programs typically need six years to complete their B.A. and license-eligible M.A. Mental Health degree (60 credits) or School Counseling (48 credits). The main advantages of the Early Admit Program are (1) BC juniors receive early provisional admittance into these M.A. programs, and (2) complete two master's-level courses during senior year.
Students interested in a Fifth Year or Early Admit Program should consult with the Lynch School Office for Graduate Student Services, Campion 135, during the fall semester of their junior year. Without proper advisement and early acceptance into a master's degree program, students will be unable to complete the program in five years.

A special master's degree program in Social Work program is also available for a limited number of students pursuing a B.A. in Applied Psychology and Human Development. Students should consult the Graduate School of Social Work for information on requirements, prerequisites, and application at the beginning of their sophomore year. Students interested in this 3/2 program in Applied Psychology and Human Development/Social Work should apply to the Graduate School of Social Work before the end of their sophomore year. Please contact the Office of Admissions, Graduate School of Social Work, Boston College, McGuinn Hall, Chestnut Hill, Massachusetts 02467, 617-552-4024.

*Students who have completed some psychology-related coursework, have at least a 3.5 GPA, and have completed some type of practical, field-based or helping experience (e.g., residential advisor, camp counselor, hotline operator, youth worker, etc.), either volunteer or paid, are strong candidates for this program.

**Application Process**

- Students must apply by March 1 of their junior year.
- Applicants must meet all [graduate admission requirements](#).
- Download the Application Checklist.
- The application fee is waived for applicants to the Fifth Year and Early Admit Programs.
• Notification of approval to begin the program is usually made in May by the Office of Graduate Admission.
• If students are in a study-abroad program during their junior year but are still interested in one of these programs, they should contact the Office of Graduate Admission at gsoe@bc.edu or (617) 552-4214.

If an applicant is not offered admission into the program, they are welcome to re-apply to the master's program upon completion of their undergraduate degree.

Full Graduate Student Status

Upon successful graduation from the undergraduate program, Fifth Year and Early Admit students will be advanced to full graduate student status if they have maintained good academic standing (including a 3.5 or higher in their two graduate courses). Early admit students will also need to have engaged in field experience as described above. Students should submit their transcripts and documentation of any additional service work if the work was not previously documented in their application for the Fifth Year and Early Admit programs. Upon final admission, the student will receive an official letter of acceptance into the full master's program by the Office of Graduate Admission (gsoe@bc.edu or 617-552-4214).

Managed By

University Catalog
Office of Student Services
Lyons Hall 103
The Morrissey College of Arts and Sciences is the oldest and largest of the undergraduate colleges of the University. It offers either a Bachelor of Arts (B.A.) or Bachelor of Science (B.S.) degree, depending upon the major discipline, and prepares graduates for careers in a broad range of fields, as well as graduate training in both professional and academic disciplines.

In the Morrissey College of Arts and Sciences a student's program consists of required Core courses, intensive study in a major field, and a choice of individual electives reflecting a student's personal interests.

Core—A modern version of the traditional Jesuit Ratio Studiorum, the Core in the Morrissey College of Arts and Sciences provides an introductory exposure to the various disciplines that define a liberally educated individual in today's world as well as to the philosophical and theological ideas that help integrate these different areas of knowledge into a student's own intellectual perspective. All Morrissey College of Arts and Science students must complete the University Core requirements in the Arts, Cultural Diversity, History, Literature, Mathematics, Natural Sciences, Philosophy, Social Sciences, Theology, and Writing, as well as a Foreign Language Proficiency Requirement.
**Major**—All students in the Morrissey College of Arts and Sciences must select a major field of study from the 39 majors offered in the college. Work in the major is not necessarily directly related to career training, but it is meant to develop critical and analytical thinking, professional and presentational skills, and an appreciation for the complexity of an area of study beyond the introductory level. A major generally consists of at least 30 credits (ten to twelve focused courses) in a field, 27 of which are not used to fulfill requirements for another major or minor. Some of these are sequentially organized required courses. Some of the courses are more narrowly focused major electives. A list of majors is available at the [Majors and Minors](https://www.bc.edu/content/bc-web/academics/sites/university-catalog/undergraduate/mcas.html) page.

**Electives**—Electives in the Morrissey College of Arts and Sciences are designed to challenge students to help define their own individual education. Students may use electives to pursue intensive work in another field with a second major or minor; to study fields that bridge traditional disciplines through organized interdisciplinary minors; to pursue professional interests in management, education, or nursing; or to explore their own individualized personal, intellectual, and artistic interests.

Thus, the purpose of the Morrissey College of Arts and Sciences is to produce broadly-educated, as well as highly-skilled graduates.

To ensure a coherent, well-developed program, students must meet with their faculty advisors before registration for each semester. They should also consult with other faculty, students, the Deans, the Pre-medical and Pre-law advisors, the Counseling Office, and the Career Center.

**Scholar of the College**
Scholar of the College is a designation given at Commencement to exceptional students (those with overall GPAs of 3.700 or higher) who have done independent work of the highest quality for a significant part of their senior year under the supervision of scholars in their major fields. The program is administered by the Dean's Office. Students apply through their major departments and ordinarily complete Advanced Independent Research projects within that department. Interdisciplinary projects require the approval of all of the relevant departments, one of which must be the student's major department.

Normally, the Advanced Independent Research that qualifies for Scholar of the College recognition will consist of 12 academic credits, 6 each in the fall and spring of senior year, although occasionally a 3-credit senior thesis in the fall may develop into a 6-credit Advanced Independent Research in the spring. Students who successfully complete Advanced Independent Research projects with grades of A- or better and maintain cumulative GPAs of 3.700 or higher may be nominated for Scholar of the College recognition at Commencement.

To be considered for Scholar of the College recognition, finished projects, along with the evaluations of the faculty advisor and a department-appointed second and independent reader, must be submitted to the Office of the Dean in mid-April. Student should consult the Dean's office for the exact deadline for the current year. The Scholars of the College will be selected from among the nominated student authors. All projects nominated for the McCarthy Prize will be reviewed by a faculty committee appointed by the Dean.

**Departmental Honors**
The designation of departmental honors is reserved for above average students who have demonstrated academic achievement in additional or more difficult courses or by successfully undertaking an approved research project, as determined by each department.

**Departmental Minors**

A departmental minor consists of at least 18 credits (typically six, 3-credit courses). These must include one introductory-level course and at least one upper-level course or seminar. Students choose courses for the minor in consultation with the director of the department's minor program. The following restrictions apply:

- No more than two Core courses may be used toward a minor.
- Core courses that do not count toward a departmental major will not count toward a departmental minor.
- Students may not major and minor in the same department unless that department offers more than one major.
- Students must have at least 15 credits in the minor program that are not used to fulfill requirements for another major or minor.

Minors are available in Arabic Studies, Art History, Biology, Chemistry, Chinese, Classics, Computer Science, Economics, English, Environmental Studies, Film Studies, French, Geological Sciences, German Studies, Hispanic Studies, History, Irish Studies, Italian, Linguistics, Mathematics, Music, Philosophy, Physics, Russian, Sociology, Studio Art, Theatre, and Theology. Information regarding specific requirements is available in the departments.

**Interdisciplinary Programs**
The Morrissey College of Arts and Sciences offers a variety of interdisciplinary programs and minors. Visit the Interdisciplinary Programs and Minors page for more information.

Six-Year Bachelor and Law Degree Program

In order to respond to changing student needs, the Boston College Law School has instituted an accelerated admissions program (3+3 Program). The 3+3 Program allows students to earn an undergraduate degree and a law degree in six years instead of seven.

Under this program, exceptionally well-qualified students from the Morrissey College of Arts and Sciences will be allowed to enter the Boston College Law School after completing their junior year of undergraduate study. During their junior year, students seeking to participate in the 3+3 Program apply to Boston College Law School. If accepted for admission, they begin law school immediately following completion of their junior year. Upon successful completion of the first year of law school with grades of “C” or better, students earn a bachelor’s degree from the Morrissey College of Arts and Sciences. Upon successful completion of the remaining two years of law school, students earn a J.D. from Boston College Law School.

The 3+3 Program is limited to undergraduates in the Morrissey College who have completed at least four full-time semesters in residence in the College. Interested students should contact the pre-Law advisor early in their program of study for more information and advisement.

Fifth Year B.A./M.A.

The Morrissey College of Arts and Sciences—Graduate School offers a five-year B.A./M.A. program in some departments. Application to the
program normally takes place early in the second semester of the junior year. The applicant must complete an application to the master’s degree program in the Graduate School of the Morrissey College of Arts and Sciences, Gasson 108. Admission to the B.A./M.A. program normally requires an overall GPA of 3.333 and a GPA of 3.5 in the major. Although specific B.A./M.A. program requirements will vary across departments, the program limits the number of credits that can be applied towards the master’s degree to 6 credits that may also be applied to the 120 credits required for the undergraduate degree. The undergraduate degree will be conferred upon completion of undergraduate requirements. The master’s degree will be conferred upon completion of degree requirements specified by the department.

Accelerated Bachelor of Arts—Master of Social Work Program

The Morrissey College of Arts and Sciences and the Boston College School of Social Work offer an Accelerated B.A./M.S.W. Program whereby a limited number of Psychology and Sociology majors may begin the Social Work foundation courses during their junior and senior years and receive the B.A. at the end of four years and the M.S.W. after the fifth year. Students must meet all standard requirements for admission to the Boston College School of Social Work and enroll as final-year M.S.W. candidates for their fifth year. Interested students should contact the Director of Admissions of the School of Social Work by spring semester of the sophomore year at the latest. For prerequisites and application information, consult the School of Social Work, McGuinn 118, 617-552-4024.

The School also offers an upper-division introductory course that is not applicable to the M.S.W. degree, SCWK6600 Introduction to Social Work,
which is cross-listed with the Departments of Psychology and Sociology in the Morrissey College of Arts and Sciences.

**Minors in the Lynch School of Education and Human Development for Morrissey College of Arts and Sciences Students**

Arts and Sciences students completing minors in the Lynch School of Education and Human Development must fulfill all major, Core, and elective requirements in the Morrissey College of Arts and Sciences and have completed at least 96 credits in the Morrissey College of Arts and Sciences.

The minor in Secondary Education is open to Morrissey College of Arts and Sciences students in specific majors. See the Lynch School of Education and Human Development section for more information.

**Minors in the Carroll School of Management for Morrissey College of Arts and Sciences Students**

Morrissey College of Arts and Sciences students completing minors in the Carroll School of Management must fulfill all major, Core, and elective requirements in the Morrissey College of Arts and Sciences and have completed at least 96 credits in the Morrissey College of Arts and Sciences.
There are six minors offered to non-management students: Accounting for CPAs, Accounting for Finance and Consulting, Finance, Management and Leadership, Managing for Social Impact and the Public Good, and, Marketing. Interested students should visit www.bc.edu/csom-minors for more information.

**International Study**

The aim of international study is to enable students to become fluent in a foreign language and to better understand a different culture. Students wishing to spend a year or a semester abroad and transfer the credits earned to their Boston College degree must receive approval from a Dean and enroll in a program approved by the College. To qualify for Dean's approval, a student must have at least a 3.0 cumulative average, have completed a significant number of courses in the major and have made substantial progress on Core requirements, have the approval of the Chairperson of the major department, and have adequate proficiency in the language of the country in which he/she plans to study. For students who have not passed the language proficiency requirement, a minimum of one year of college-level language study is required.

Students should begin the application process by contacting the Office of International Programs early in their sophomore year.

**Academic Regulations**

**Satisfactory Academic Progress**

A student in the Morrissey College of Arts and Sciences must complete at least 120 credits to earn the bachelor’s degree 96 of which are Morrissey College credits over 8 fulltime semesters. Particular requirements for
gaining those credits, or compiling those courses, are stated elsewhere in this section. All Morrissey College of Arts and Sciences students must complete the University Core requirements in Arts, Cultural Diversity, History, Literature, Mathematics, Natural Sciences, Philosophy, Social Sciences, Theology, and Writing, as well as the Language Proficiency requirement. For more information, visit the Policies and Procedures section.

To continue enrollment in a full-time program of study, a student must ordinarily maintain a cumulative average of at least 1.667 as the minimum standard of scholarship and must not fall more than 7 credits behind the total number of credits a student of their status is expected to have completed (an average of 15 credits each semester). Any student who is permitted by the deans to continue enrollment in a full-time undergraduate program, with the exception of students on probation, is considered to be in good standing.

Failure to maintain good standing either through a low cumulative average, or by incurring deficiencies including failures, withdrawals, incompletes or unapproved underloads, will result in the student’s being placed on probation, or being required to withdraw, as the Dean shall determine.

During a probationary semester a student must successfully complete at least 12 credits in graded Morrissey College of Arts and Sciences courses and achieve a GPA of 2.0 for those 12 credits. A probationary semester is not considered a full-time semester with respect to the minimum number of regular full-time semesters required for graduation. Consequently, the student’s graduation date will be delayed by at least one semester. Students who make up credits by preapproved summer study and satisfy all other requirements may be able to regain their original graduation date. (International students should consult their dean regarding visa
requirements as they affect probation.) Probation will not be extended to a second consecutive semester nor may a student have more than two probationary semesters in total. A student who fails to meet the conditions of probation will be withdrawn from the Morrissey College of Arts and Sciences.

**Acceleration**

For information regarding acceleration, visit the [Graduation section of Undergraduate Academic Policies](https://www.bc.edu/content/bc-web/academics/sites/university-catalog/undergraduate/mcas.html).

**Procedure of Appeal**

Students with questions of interpretation or petitions for exception from the Morrissey College of Arts and Sciences Regulations, apart from those specified in the University's academic integrity policy, may submit them to the Associate Deans.

A student should always attempt to resolve problems concerning the manner in which grades have been awarded or the academic practices of an instructor by direct contact with the instructor. In the rare case of an unresolved question the student should first refer the matter to the Chairperson or Director of the relevant department or program.

A formal appeal of a course grade, which ought not be entered lightly by a student nor lightly dismissed by an instructor, should be made no later than the sixth week of the following semester. In making a formal appeal, a student files a written statement with the Dean for his or her class. The Dean will then request written responses from both the instructor and Chairperson and submit the case to the Appeals Committee of the Educational Policy Committee. The committee will review the case
thoroughly and make a recommendation on resolution to the Dean of the College. The Dean's decision will be final.

University Catalog
Office of Student Services
Lyons Hall 103
African and African Diaspora Studies, Undergraduate Programs - University Catalog

The African and African Diaspora Studies Program (AADS) considers the history, culture, and politics of Africans on the continent and African-descended peoples in the U.S., the Caribbean, South America, Europe, Asia, and the Middle East. Covering vast historical periods and geographies, AADS acquaints students with the multiplicity and diversity of the African Diaspora and the world in which we all live. Using interdisciplinary and comparative approaches, the program draws on a broad range of methodologies in English, history, sociology, philosophy, theology, communication, and theater.

Central Themes

To get the most out of an AADS minor, students are encouraged to organize their courses around the central themes of globalization, intersectionality, or social justice.

Globalization

Globalization is as old as the trade in African slaves. Patterns of resource extraction, labor, trade, commerce, and travel have shaped the experiences of African-descended peoples and the peoples they have encountered.
Selected courses explore the connections between various geographic regions, cultural traditions, and historical developments that have defined globalization.

**Intersectionality**

Race is defined by various identity categories and social locations such as gender, class, color, ethnicity, region, nation, age, sexuality, political ideals, and spiritual beliefs. Intersectionality reminds us that race is not a monolithic or homogenous category of human experience.

**Social Justice**

The history of African and African-descended peoples has been defined by the struggle for social justice: the fight for human equality and the fight against racism, sexism, homophobia, and class exploitation. In resisting enslavement, segregation, patriarchy, imperialism, and colonialism, and by striving to overturn discrimination in education, housing, healthcare, employment, and religious institutions, African and African Diasporic peoples have undertaken drives for social emancipation that have expanded the meaning of democratic ideals.

**Major Requirements—31 Credits (or More)**

The African and African Diaspora Studies (AADS) major consists of a minimum of 31 credits, equivalent to at least 10 full-semester courses. AADS majors can have a second major as long as the student stays in compliance with the University’s regulation that, in order to earn a major, a student must have at least 27 credits in the major program that are not used to fulfill requirements for another major or minor. In addition to taking AADS1110 Introduction to African Diaspora Studies (3 credits) and
AADS6600 Senior Seminar (4 credits), students pursuing an AADS major need to take 8 additional elective courses, and only two of which can be a 1000-level course. Four of those elective courses must be Black Atlantic courses. Black Atlantic courses are those that have a global framework that puts different geographical regions of the world in conversation with one another within the African Diaspora.

There are two tracks in which AADS majors can concentrate: (1) Intellectual Traditions and Cultural Production or (2) Politics and Social Inquiry. Students in the Intellectual Traditions and Cultural Production track examine Black intellectual traditions, expressive forms, and modes of cultural analysis and cultural criticism primarily (but not exclusively) based on textual analyses. In the Politics and Social Inquiry track students examine the development of institutions, measure inequality, and identify societal patterns utilizing primarily (but not exclusively) historical and social science techniques. While both tracks are rooted in the interdisciplinary study of the African Diaspora, the Intellectual Traditions and Cultural Production track will be for those students most interested in pursuing careers and graduate studies typically associated with the humanities, while the Politics and Social Inquiry track will attract students with more social science curiosities.

AADS majors must take six of their eight elective courses in one track and their remaining two in the other. Students’ elective courses may not fall exclusively in Social Science (Communication, History, Political Science, or Sociology) or Humanities (Art History, English, Music, Philosophy, Romance Languages and Literatures, or Theatre) departments.

**Sample Schedule for Intellectual Traditions and Cultural Production**

**First Year**
• AADS/SOCY1511 Where #BlackLivesMatter meets #MeToo: Violence and Representation in the African Diaspora (6 credits)
• AADS1110 Introduction to African Diaspora Studies (3 credits)

Sophomore Year

• AADS2210/ARTH2210 Festival, Carnival, and Masquerade (3 credits)
• AADS2306/MUSA2306 Music of Africa (3 credits)
• AADS3000/THEO3000 Black Church, Black Protest (3 credits)

Junior Year

• AADS3002/ENGL4017 Black Nature: Race and Ecology (3 credits)
• AADS4481/HIST4481 History of Black Nationalism (3 credits)

Senior Year

• AADS3466/FREN3360 Literature and Culture in Francophone Africa (3 credits)
• AADS5597/SOCY5597 Contemporary Race Theory (3 credits)
• AADS6600 Senior Seminar (4 credits)

Sample Schedule for Politics and Social Inquiry

First Year

• AADS1110 Introduction to African Diaspora Studies (3 credits)
• AADS1155/SOCY1043 Introduction to African American Society (3 credits)

Sophomore Year

• AADS1139/SOCY1039 African World Perspectives (3 credits)
• AADS2442/POLI2442 African Politics (3 credits)
• AADS3302/RLRL3302 Racism: French and American Perspectives (3 credits)

Junior Year

• AADS3416/POLI3416 Race and Ethnicity in Latin America (3 credits)
• AADS4472/COMM4472 Race, Law, and Media (3 credits)

Senior Year

• AADS3466/FREN3360 Literature and Culture in Francophone Africa (3 credits)
• AADS4485/HIST4485 Medicine and Public Health in the African Diaspora (3 credits)
• AADS6600 Senior Seminar (4 credits)

Minor Requirements—18 Credits (or More)

AADS introduces histories, cultures, and experiences of African descended peoples to the broadest range of students; supports serious academic research on Africa and the African Diaspora; gives students opportunities to examine the depth and breadth of African legacies on the continent and in all parts of the world; links local Black communities more closely to Boston College; projects the significance of realities of people of African descent to the intellectual life of Boston College and larger communities; and prepares students to succeed in college and their post-graduate careers.

An AADS minor will consist of a minimum of 19 credits (6 full-semester courses)

Requirements
- AADS1110 Intro to African Diaspora Studies (3 credits)
- AADS6600 Senior Seminar (4 credits)
- 4 electives (12 credits)
  - 2 electives must be Black Atlantic Courses

A Black Atlantic course has a global perspective that puts different geographical regions of the world in conversation with one another within the African Diaspora

**AADS1110 Introduction to African Diaspora Studies** familiarizes students with the major issues and methodologies involved in studying the African Diaspora. **AADS6600 Senior Seminar** is an intensive reading and writing course designed to assist students in synthesizing their minor experience. Minors must pass AADS1100 prior to enrolling in AADS6600.

To affirm and specify our minors’ selected Central Theme, we suggest that their four additional courses reflect a particular thematic focus. Some possible themes are:

- Cities and Urban Life
- Economics of Inequality
- Gender and Sexuality
- Globalization and Development
- Intellectual and Philosophical Traditions
- Migration and Immigration
- Music and the Performing Arts
- Political Systems and Grassroots Protest
- Popular Culture and New Media
- Spirituality and Social Protest
Though suggested, these themes are not required; additionally, students may devise their own thematic focus, in consultation with the AADS Director or their AADS Advisor.

Contact us at 617-552-3238 or visit our website at [www.bc.edu/aads](http://www.bc.edu/aads).

**Core Offerings**

The Program offers several courses that satisfy the Core requirement in Cultural Diversity and one course that satisfies the requirement in Social Sciences.

**Managed By**

University Catalog
Office of Student Services
Lyons Hall 103
Art, Art History, and Film, Undergraduate Programs - University Catalog

The department offers three majors: Art History, Film Studies, and Studio Art. Minors are offered in each area as well. Internships are available in local museums and galleries. For details, inquire at the Art, Art History, and Film Department office.

Major Requirements: Art History

The Art History major offers undergraduate students an opportunity to acquire specialized knowledge and understanding of visual artifacts from prehistory to the present day, from Western and non-Western cultures. As a humanistic discipline, the history of art closely relates the analysis of visual culture to other modes of intellectual inquiry; accordingly, art history students and faculty frequently participate in interdisciplinary programs across the University.

Contributing to the broad foundation that constitutes a liberal arts education, departmental courses prepare students for graduate work leading to professional careers in the arts, including teaching and research, art criticism, museum curatorship, art conservation, museum directorship, and art appraising. They also prepare the student to hold positions in commercial galleries and auction houses.
The skill sets developed in art historical studies, however, do not apply exclusively to the analysis of works of art. The ability to evaluate material evidence, to study the cultural contexts in which it was discovered, to assess critically the various interpretations works of art have elicited, and to fashion clear and persuasive arguments in kind are valuable in any program of study or professional situation. In a world increasingly dominated by images, visual literacy is as indispensable to navigating one’s everyday environment as it is to analyzing products of high culture.

To tailor departmental offerings to suit their specific needs, students majoring in art history plan integrated programs in consultation with their faculty advisors and are encouraged to take courses in history, philosophy, theology, and other fields related to their specialization. For those contemplating graduate study in art history, it is highly recommended that language courses in French and German be taken as early as possible.

For students in the class of 2020, 2021, and 2022:

The Art History major requires a minimum of eleven courses for 33 credits, which must be earned in the following way:

- ARTH1101 and ARTH1102 Introduction to Art History (6 credits)
- ARTH1103 or ARTH1104 Art History Workshop or ARTH1130 Intersection of Science and Painting or any ARTS course (3 credits)

These three courses should normally be completed by the end of the sophomore year.

- Eight additional courses, at least three must have ARTH numbers at or above the 3000 level, at least one at the ARTH4000 level (in addition to
ARTH4401), and no more than three at the ARTH2000 level. At least one course must be chosen from each of the following periods:

- Ancient Art
- Medieval Art
- Renaissance through Eighteenth Century Art
- Nineteenth and Twentieth Century Art
- Non-Western Art

ARTH4401 Seminar in Art Historical Research (3 credits), is required and must be taken during the junior or senior year. This course is counted as one of the required 11 courses discussed above and counts as one of the two required at the 4000 level. Please note: This course is offered only in the fall semester of each year.

Students having earned a score of five on the AP exam may have the option of waiving the ARTH1101 and ARTH1102 requirement, although the same overall number of courses (11) for the major remains unchanged. Students having earned a score of four on the AP exam may waive either ARTH1101 or ARTH1102, but not both.

Students interested in majoring in Art History should contact Aurelia Campbell, Art History Director of Undergraduate Study, Devlin 424, 617-552-6476, aurelia.campbell@bc.edu.

**Art History Major: Non-Western Track**

The Art, Art History, and Film department also offers students the option of choosing a non-Western track for the major. The requirements are identical to the Western track (see above) in terms of the number and level of courses, except for these distribution requirements:
Two courses must be in the area of Islamic art
Two courses in the area of East Asian art
At least one course in another non-Western field, such as African, Pre-Columbian, or ancient Near Eastern art.

Those students choosing this option are encouraged to select Aurelia Campbell or Kyrah Daniels as their advisor.

**For students in the class of 2023 or later:**

Majors in the class of 2020, 2021, and 2022 may follow the new requirements with the approval of the Director of Undergraduate Study or their Art History advisor and the class dean. Interested majors should speak to the Director of Undergraduate Study or their Art History advisor.

The Art History major requires 11 courses (33 credits), which must be earned in the following way:

- ARTH1101 Introduction to Art History I
- ARTH1102 Introduction to Art History II
- ARTH2212 East Asian Art and Architecture OR ARTH2213 Islamic Art and Architecture OR ARTH2215 Sacred Arts of the Black Atlantic
- ARTH2212 East Asian Art and Architecture OR ARTH2213 Islamic Art and Architecture OR ARTH2215 Sacred Arts of the Black Atlantic
- ARTH4314 The Materials of Art and Their Conservation OR any Studio Art (ARTS) course
- Elective 1 (2000 or 3000 level)
- Elective 2 (2000 or 3000 level)
- Elective 3 (3000 or 4000 level)
- Elective 4 (3000 or 4000 level)
- Elective 5 (3000 or 4000 level)
• ARTH4401 Senior Seminar (must be taken in the fall semester of junior or senior year)
• **Optional** thesis: Students sign up for an Independent Study with a faculty advisor in the spring semester of their senior year. Students who write a senior thesis are eligible for departmental honors.

The Art History major can also be completed with a concentration in Museum Studies, which requires a minimum of 12 courses (36 credits) earned in the following way:

- ARTH1101 Introduction to Art History I
- ARTH1102 Introduction to Art History II
- ARTH2212 East Asian Art and Architecture OR ARTH2213 Islamic Art and Architecture OR ARTH2215 Sacred Arts of the Black Atlantic
- ARTH2212 East Asian Art and Architecture OR ARTH2213 Islamic Art and Architecture OR ARTH2215 Sacred Arts of the Black Atlantic
- ARTH4314 The Materials of Art and Their Conservation
- ARTH4370 The Art Museum: History, Philosophy, and Practice
- MGMT1021 Organizational Behavior OR MGMT2127 Leadership OR MGMT2123 Negotiation OR MGMT2133 Leading High Performance Teams OR MGMT2132 Managing Change OR MGMT2265 Globalization, Culture, and Ethics
- Elective 1 (2000 or 3000 level)
- Elective 2 (2000 or 3000 level)
- Elective 3 (3000 or 4000 level)
- Elective 4 (3000 or 4000 level)
- ARTH4401 Senior Seminar (Must be taken in the fall semester of junior or senior year.)

**Major Requirements: Film Studies**
The Film Studies major applies the liberal arts tradition to the present-day culture of images and technologies. Courses in film history, theory, and criticism enable students to become active, selective, and ethical participants in a world progressively more dominated by the media of visual communication.

Research-based studies in American and world cinema explore the mutual influence of the films and their respective diverse cultures and historic periods. Familiarity with several of the great films and filmmakers provides a basis for understanding the relationship between contemporary artists and industrial society. Each student will have an opportunity to apply this theoretical knowledge to the experience of film making and exhibition both through programs in scripting, photography, production, and digital editing, and through an extensive internship program in the Boston area.

Students are encouraged to widen and deepen their understanding of the medium through additional courses in Art History, Studio Art, Theater, and Communication. While this Film Studies major provides a solid foundation for further studies and professional involvement in the industry, it also offers the liberal arts student a broad-based preparation for other career options.

For more information, contact John Michalczyk, Director, Film Studies major Coordinator, Devlin Hall 420, 617-552-3895, john.michalczyk@bc.edu.

For the major in Film Studies there is a requirement of twelve courses, eight of which must be at the 2000 level or above:

- FILM2202 Introduction to Film Art

At least two courses in American Film History:
• FILM2280 Early Years
• FILM2281 Studio Era
• FILM3392 Post-Classical Period
• FILM3389 American Directors Series
• FILM3393 Hollywood’s Golden Age

At least two production courses:

• ARTS1161 Photography I
• ARTS2261 Intermediate Photography
• FILM1171 Filmmaking I
• FILM2273 Filmmaking II
• FILM2274 Digital Non-Linear Editing
• ARTS2276 Art and Digital Technology

Six electives, at least two at the 3000 or 4000 level:

• FILM2277 Russian Cinema
• FILM2282 Political Fiction Cinema
• FILM2283 History of European Cinema
• FILM3391 American Film Genres
• FILM3301 Screenwriter
• FILM3312 World Cinema
• FILM3380 Latin American Cinema
• FILM3381 Propaganda Film
• FILM3382 Documentary Film
• FILM 3383 Film Criticism and Theory

Senior year:

• FILM4400+ Senior Project
Major Requirements: Studio Art

The Studio Art major is designed both for the student artist and the student interested in art. It teaches how to make art and an appreciation of how art is made. The department courses are conceived as an integral part of the university curriculum, and the studio major provides a solid basis for continuing work in graduate school and in art-related fields such as design, art criticism, teaching, conservation, art therapy, publishing, exhibition design, and advertising. The major has a track for Morrissey College of Arts and Sciences students and a second track for Lynch School of Education and Human Development students who are double majors.

The Studio Art major provides students with an opportunity to develop the techniques, visual sensibility, and historical understanding necessary for working with various materials. An exploration of the meanings and ideas generated by the things we make and an awareness of the process of making are essential parts of the program.

An integral part of the Studio Art major's undergraduate education is the senior project. Focused in their area of concentration, senior projects are exhibited on campus at the end of the academic year.

Students intending to major in Studio Art are encouraged to begin the major in their freshman year; the major must be declared before the beginning of a student's junior year. Students must have taken at least four semesters of work relating to the senior project prior to their senior year.

For more information, contact Professor Sheila Gallagher, Studio Art major Coordinator, Devlin Hall 401B, 617-552-0482, sheila.gallagher@bc.edu.
Majors are required to take a minimum of twelve courses for a total of 36 credits, to be distributed as indicated below:

Required introductory course for all majors (suggested after the introductory courses):

- ARTS1103 Issues and Approaches to Studio Art

Two of the following for a total of 6 credits. In consultation with an advisor, one of these classes should set the direction and future course choices and concentration of the major:

- ARTS1101 Drawing I
- ARTS1102 Painting I
- ARTS1104 Design: Seeing is Believing (Core) or ARTS1107 Design 1
- ARTS1141 Ceramics I
- ARTS1150 Painting Plus Collage
- ARTS1155 Introduction to Digital Art
- ARTS1161 Photography I

One of the following:

- ARTH3356 Art Since 1945
- ARTS2211 Ideas in Contemporary Art (formerly Hot Off the Shelf)

Six additional studio art courses:

- (for a total of 18 credits) at the 2000 level or above, of which three courses (9 credits) must be at the 3000 level

Required courses for all senior majors:
• ARTS4498 Senior Project I
• ARTS4473 Senior Project II

Students must have taken at least four semesters of work relating to the senior project prior to their senior year.

In addition to the required courses, the following courses are recommended:

• ARTH1101 Art: Prehistoric to Middle Ages
• ARTH1102 Art: Renaissance to Modern
• ARTH1109 Clues to Seeing
• ARTH2257 Nineteenth-Century Art
• ARTH2258 Modern Art: Nineteenth-Twentieth Century
• ARTH3356 Art Since 1945

Architecture Studies Concentration in the Studio Art Major

Minimum of 11 courses (33 credits) to be selected as follows:

Required courses for the Architecture Studies concentration:

• ARTS1101 Drawing I (Core)
• ARTS1103 Issues and Approaches
• ARTS1125 Innovation Through Design Thinking (also UNAS1025)
• ARTS1155 Introduction to Digital Art (Core), or ARTS2276 Arts and Digital Technology,
• Or ARTS2250 Introduction to Digital Design

Two Architectural History course from this list (six credits), at least one of which must be at the 1000 or 2000 level:
• ARTH1107 History of Architecture (World Architecture)
• ARTS2211 Ideas in Contemporary Art
• ARTH2246 Architecture in East Asia
• ARTH2251 Modern Architecture
• ARTH2267 Salt Box to Skyscraper: American Architecture Seventeenth–Twentieth Centuries
• ARTH3311 Greek Art and Archaeology
• ARTH3314 Egyptian Art and Archaeology
• ARTH3332 The Age of Leonardo, Michelangelo, Raphael and Beyond: Sixteenth-Century Art in Italy
• ARTH3344 Venetian Art and Architecture
• ARTH3347 The Age of the Baroque: Seventeenth-Century Art in Italy
• ARTS3356 Art Since 1945
• ARTH4315The Material Culture of Private Life China
• ARTH4402 Art and Architecture in The Forbidden City

Three additional courses 9 credits) one of which must be at the 3000 level, suggested electives:

• ARTS2250 Introduction to Digital Design
• ARTS2252 Architecture Design I
• ARTS2207 Urban Design for Complexity and Sustainability
• ARTS3335 Advanced Digital Design: Designing Spaces
• ARTS3334 Advanced Mixed-Media
• During the senior year:
  ○ ARTS4498 Senior Project I OR Internship OR Independent Study
  ○ ARTS4473 Senior Project II

Career Discovery
- Summer courses and internships are available, but do not count towards the major/minor credit requirements.
- Summer travel and summer courses are recommended for enrichment. Students should consult with a departmental advisor about these opportunities.

Additional Stipulations for the Studio Art Major

- No more than two independent studies in the field of concentration.
- No more than two courses taken during the junior year abroad or at another institution may count toward the major. Transfer students should work out credits with the department major advisor.
- Courses to be counted in the major must be taken for a grade (no pass/fail grades).

Art History Minor

The minor in Art History will provide the student with an introduction to the art of Western and non-Western cultures. In addition to the two introductory courses (ARTH1101 and ARTH1102), the student will have a choice of two 2000-level courses and at least two 3000-level courses for a total of four upper-level classes covering specific art-historical periods. In these courses, the student will be exposed to the methods of the discipline and will complete a research paper. Students interested in declaring a minor can contact Professor Stephanie Leone, Art History minor Coordinator, Devlin Hall 422, 617-552-6459, stephanie.leone@bc.edu.

Required Courses

- ARTH1101 Introduction to Art History I
- ARTH1102 Introduction to Art History II
- ARTH2212 East Asian Art and Architecture or ARTH2213 Islamic Art and Architecture or ARTH2215 Sacred Arts of the Black Atlantic
- Elective 1
- Elective 2
- Elective 3

At least two of the electives must come from one of the following categories:

- Ancient/Medieval
- Renaissance/Baroque
- Nineteenth/Twentieth Century
- Asian
- African
- Islamic
- Museum Studies

**Film Studies Minor**

The Film Studies minor enables students to develop a basic awareness of film as a contemporary medium of communication. The minor consists of the Introduction to Film Art, one course in history or criticism, one course in production, and three electives in Film Studies which enable a student to design a personalized area of concentration.

Requirements normally include FILM2202 Introduction to Film Art, then one production course, and one course in history or criticism. A selection of three additional courses as electives from the offerings of the film studies program allows the student to pursue individual interests and develop a level of competence in one particular area, such as filmmaking, digital editing, scriptwriting, photography, history of film, or film criticism.
Students interested in the Film Studies minor may contact the Director, Professor John Michalczyk, Film Studies minor Coordinator, Devlin Hall 420, 617-552-3895, john.michalczyk@bc.edu.

**Studio Art Minor**

The minor in Studio Art offers students the opportunity to pursue a course of study in ceramics, design, digital arts, drawing, mixed media, painting, or photography. There are features of the minor program that resemble, in an abbreviated way, successful aspects of our majors' studio art program. The required Senior Minor Projects class, for example, will function analogously to our Senior Project. This curriculum of six courses is designed to encourage an in-depth investigation of one medium, rather than a generalized sampling of many. The course structure aims at having the individual student develop the artistic techniques and conceptual visual sensibility necessary for working as an artist today. It should be noted students will not be permitted to begin the Studio minor after their junior year. Students who are interested in declaring a minor can contact Professor Alston Conley, Studio Art minor Coordinator, Devlin Hall 432, alston.conley@bc.edu.

**Information for First Year Majors**

First Year Art History majors should take ARTH1101 Art from Prehistoric Times to the High Middle Ages with ARTH1103 Art History Workshop. First Year Studio Art majors are advised to select two studio courses from ARTS1101, ARTS1102, ARTS1104, ARTS1107, ARTS1150, ARTS1155, or ARTS1161 before taking ARTS1103. First year Film Studies majors should take FILM2202 Introduction to Film, a required foundation course to ground the student in film language, history, and criticism.
Information for Study Abroad

The Boston College Art, Art History, and Film Department offers study abroad options for Art History, Film Studies, and Studio Art majors. The department assists students with their options under close supervision, as well as providing encouragement.

The Art, Art History, and Film Department believes strongly that study abroad is worthwhile, exposing students to not only other cultures but other forms and traditions of artistic expression. At the same time, it cautions students to consider their growth and development in their specific major and to integrate study abroad with their chosen area of concentration in consultation with their department advisor.

The Art History department advisor is Kenneth Craig, Devlin Hall 424, 617-552-3153, kenneth.craig@bc.edu. The Film Studies department advisor is John Michalczyk, Devlin Hall 434, 617-552-3895, john.michalczyk.1@bc.edu. The Studio Art department advisor is Alston Conley, Devlin 432, 617-552-2237, alston.conley@bc.edu.

University Catalog
Office of Student Services
Lyons Hall 103
Biochemistry, Undergraduate Programs - University Catalog

This interdisciplinary major in Biochemistry, administered jointly by the Chemistry and Biology Departments, provides the student with a broad background in biochemistry and related courses in chemistry and biology. This major is intended for those interested in the more chemical and molecular aspects of the life sciences.

Degree Requirements for B.S. in Biochemistry

- BIOL2000 Molecules and Cells (3 credits)
- BIOL2010 Ecology and Evolution OR BIOL3030 Introduction to Physiology (3 credits)
- BIOL2040 Investigations in Molecular Cell Biology (3 credits)
- One course in cell biology from the following list (3 credits):
  - BIOL3040 Cell Biology
  - BIOL3210 Plant Biology
  - BIOL4140 Microbiology
- One course in genetics or genomics from the following list (3 or 4 credits):
  - BIOL3150 Introduction to Genomics
  - BIOL3190 Genetics and Genomics
- CHEM1109 General Chemistry I and CHEM1111 Laboratory (or CHEM1117 and CHEM1119) (4 credits)
• CHEM1110 General Chemistry II and CHEM1112 Laboratory (or CHEM1118 and CHEM1120) (4 credits)
• CHEM2231 Organic Chemistry I and CHEM2233 Laboratory (or CHEM2241 and CHEM2243) (4 credits)
• CHEM2232 Organic Chemistry II and CHEM2234 Laboratory (or CHEM2242 and CHEM2234) (4 credits)
• CHEM3351 Analytical Chemistry and CHEM3353 Laboratory (4 credits)
• CHEM4473 Physical Chemistry for Biochemistry majors (3 credits)
  CHEM4461–4462 Biochemistry I and II; or BIOL4350 Biological Chemistry and BIOL4400 Molecular Biology (6 credits)
• PHYS2100 Physics I (calculus) and PHYS2050 Laboratory (5 credits)
• PHYS2101 Physics II (calculus) and PHYS2051 Laboratory (5 credits)
• MATH1101 (or MATH1103, or MATH1105) Calculus II (3–4 credits); or MT2202 Multivariable Calculus (4 credits)*
• Two advanced electives (5 credits min.) see current major checklist for available options

Total Credits: 64–65

Note: The Biochemistry major requires all of its majors to take a Boston College calculus course, regardless of AP score. Students can take Calculus 2 (MATH1101, MATH1103 or MATH1105), or Multivariable Calculus (MATH2202).

It doesn’t look like these asterisked sections are referring to any other sections since they removed the course listing.

**Note: Not all electives are offered every year. Also, additional electives may sometimes be announced in this category, depending upon advanced course offerings in the Biology and Chemistry Departments. Please check the Departmental listings for details.
***With Biology or Chemistry Department approval, two semesters of Undergraduate Research may be substituted for one advanced elective.

**Advanced Placement:** Biochemistry majors who have a 5 on the Biology AP exam in their senior year may choose to bypass the 2000 level lecture courses (BIOL2000 and BIOL2010). These students will begin the major with BIOL3040 Cell Biology and take 6 credits of additional biology courses, level 3000 or above.

**Recommended Course Sequencing for Biochemistry Majors**

**Freshman Year**

- General Chemistry and Labs
- BIOL2000 and either BIOL2010 or BIOL3040
- BIOL2040 lab (if possible)

**Sophomore Year**

- Organic Chemistry and Labs
- One course from the cell biology list (or BIOL3030)
- One course from the genetics/genomics list
- BIOL2040 lab (if needed)

**Junior Year**

- Biochemistry sequence

**Senior Year**

- Analytical Chemistry and lab
- Physical Chemistry
- Two advanced electives

Note:

- Calculus is typically completed by the end of the sophomore year.
- Physics can be taken at any time beginning with the sophomore year.
- Students are encouraged to participate in Undergraduate Research, typically beginning in the junior year; other options are available. Students should speak to individual professors regarding research opportunities.

Approvals for Biochemistry Major Courses Taken Abroad; Boston College Summer Courses

With prior Department approval, students may apply one course taken abroad to their biochemistry elective requirement. To be considered as a possible substitute for a Biochemistry major elective, a course must be a second level course with published biochemistry prerequisites and not be an introductory level course or a course intended for professional study (or for non-biochemistry majors).

Note: Biochemistry major required courses offered through the Boston College Summer School will be applied to the Biochemistry major as regular academic-year electives with the same catalog number.

University Catalog
Office of Student Services
Lyons Hall 103
The Biology Department considers a basic understanding of biological systems to be an essential skill in our increasingly technological society and offers a range of courses for both biology majors and non-majors. Courses are designed to promote scientific literacy and a sophisticated understanding of complex biological systems. Our courses introduce students to life at various levels of organization, with topics ranging from the molecular basis of cellular function, to the coordination of organ systems in the physiology of organisms, to the interactions of organisms with each other and the environment. The importance of research and experimentation in biology is stressed throughout the curriculum, which includes both lab courses and research experiences.

The Biology Department offers the following degrees:

**Bachelor of Science (B.S.) in Biology** is a structured program for biology majors who are interested in pursuing those aspects of the field that require a strong background knowledge in physics, chemistry, and mathematics and for students who want to fulfill premedical/predental requirements.

**Bachelor of Arts (B.A.) in Biology** is a flexible program that can prepare students for graduate school in the life sciences or can be integrated with other areas, including law, ethics, history, sociology, computer science, and management. The B.A. provides a solid foundation in biology, but allows
more flexibility in course selection by removing some of the chemistry and quantitative requirements that characterize the B.S. program. Thus, students in the B.A. program can either add more depth and focus around a sub discipline or have more breadth, either within the biology curriculum or by taking advantage of the B.A. elective options. Students should note that, unlike the B.S. program, the B.A. program does not fulfill medical school admission requirements.

The Biology Department offers a **minor in Biology**, a **concentration in Bioinformatics** and also co-sponsors a **Bachelor of Science (B.S.) in Biochemistry** together with the Chemistry Department. The Biochemistry degree is described separately in this Catalog. Requirements for the Biology minor and bioinformatics concentration can be found at the Biology Department website.

**Bachelor of Science (B.S.) and Bachelor of Arts (B.A.) Program Requirements**

- **BIOL2000 Molecules and Cells**
- **BIOL2010 Ecology and Evolution**
- **BIOL2040 Investigations in Molecular Cell Biology**
- One course from Category A: Genes and Genomes
  - **BIOL3150 Introduction to Genomics**
  - **BIOL3190 Modern and Classical Genetics**
- One course from Category B: Organismal and Systems Biology
  - **BIOL3030 Introduction to Physiology**
  - **BIOL3210 Plant Biology**
  - **BIOL4320 Developmental Biology**
  - **BIOL4330 Human Physiology with lab**
  - **BIOL4450 Behavioral Ecology**
BIOL4590 Introduction to Neuroscience

- One course from the Advanced Experience list—a minimum of 2 credits
- For the B.S.: Additional electives numbered 3000 and above to reach a minimum of **30 Biology credits** for ALL Biology courses. A complete listing of Biology courses is available on the departmental website.
- For the B.A.: Additional electives numbered 3000 and above to reach a minimum of **33 credits for ALL Biology courses**. (Nine credits can be from the B.A. elective list available on the departmental website.)

Advanced Experience courses include undergraduate research, research lab courses, and smaller classes involving the primary literature and data analysis. Courses fulfilling this requirement are available on the Biology Department website. Note: While independent undergraduate research courses can be taken over several semesters for credit, only 3 of these credits can be applied toward the 30 required credits for the Biology major (B.A. or B.S.). Students using undergraduate research to fulfill the Advanced Experience requirement and/or to have the 3 credits applied to the Biology major must complete at least two semesters.

**Corequisite Courses for the Bachelor of Science (B.S.) Program**

**Chemistry (15–16 credits)**

- General Chemistry I and II with Labs (CHEM1109–1110, CHEM1111–1112)
- Organic Chemistry I with Lab (CHEM2231–2232)
- Organic Chemistry II with Lab (CHEM2233–2234) or Biological Chemistry (BIOL4350) OR Biochemistry I (CHEM4461)*
Quantitative Requirements: Mathematics, Physics, and Computer Science

- Calculus I (MATH1100)
- Calculus II (MATH1101) OR Biostatistics (BIOL2300-) or EC1151 or MATH3353 or another approved statistics course
- Two additional courses from the following list:
  - PHYS2100 Physics I (calculus) with Lab
  - PHYS2101 Physics II (calculus) with Lab+
  - BIOL2300 Biostatistics (or EC1151 or MATH3353 or another department-approved course in statistics)
  - CSCI1101 Computer Science I
  - CSCI1102 Computer Science II
  - MATH1101 Calculus II
  - Mathematics courses numbered 2000 or higher+

Additional options are noted on the Biology Department website.

*Biol4350 or CHEM4461 cannot be used to satisfy both a corequisite and a biology elective.
+Requires Calculus II

Calculus Placement

- Calculus I requirement is satisfied by completing MATH1100 or with an AP score of 4 or 5 on the AB exam or a score of 3 on the BC exam
- Calculus I and II can be satisfied by completing MATH1101 or with an AP score of 4 or 5 on the BC exam
- Calculus II (or the AP option) and Biostatistics can both be applied to the four course requirement, but each course can only be applied once.
Corequisite Courses for the Bachelor of Arts (B.A.) Program (8–12 Credits)

- General Chemistry I and II with Labs (CHEM1109–1110, CHEM1111–1112)
- Calculus I (MATH1100)

Advanced Placement Programs for the B.A. and B.S. Degrees

Students who received a score of 5 on the AP exam in their senior year of high school and wish to consider advanced placement may enroll in BIOL3040 in place of BIOL2000. Freshmen should enroll in BIOL2010 first semester (there is no AP substitution for BIOL2010), and take BIOL3040 in the second semester, if they wish to continue with the AP substitution for BIOL2000. The AP substitution does not reduce the total number of credits for the major; students will still need a total of 30 credits in biology courses.

Information for First Year Students: Biology Majors and Others Considering a Major in Biology

Biology majors in the regular B.A. and B.S. programs are advised to enroll in BIOL2000 Molecules and Cells and BIOL2010 Ecology and Evolution their freshman year. Freshmen are also advised to enroll in CHEM1109/CHEM1110 General Chemistry (with corequisite Labs) and Calculus I or II, depending on their AP scores. First-term AP students should enroll in BIOL2010 Ecology and Evolution. Second term, students using the AP option will enroll directly in BIOL3040, or they can continue with the regular program by enrolling in BIOL2000 Molecules and Cells. Calculus need not be taken in the freshman year.
Information for Study Abroad and Summer Programs

With Department approval, students may apply ONE course taken either abroad or during an off-campus summer session to their biology elective requirements. To be considered as a possible substitute for a biology elective, a course must be a second level course with published biology prerequisites and not be an introductory level course or a course intended for professional study or for non-biology majors. As an exception, students studying abroad for two full academic semesters may apply two courses taken abroad to the biology elective requirement.

This policy does not apply to Biology Department major elective courses offered through the Boston College Summer School; such courses are applied to the Biology major as regular academic-year electives.

Research Opportunities for Undergraduates

Research is a fundamental aspect of undergraduate training in the sciences, and the Biology Department actively encourages interested majors to take advantage of the undergraduate research programs that are available. There are two distinct options for engaging in research activity.

Option 1: Students do research in the laboratory of a Biology Department faculty member or at an off-site laboratory with departmental approval. Undergraduate research can be taken for course credit over multiple semesters. Two semesters must be completed to fulfill a Biology elective requirement. Only 3 credits of the undergraduate research are applied to the Biology major; all credits are applied to the 120 credits for graduation.

Option 2: The Department offers a number of research lab courses where students build technical skills in the context of an ongoing research project.
These one-semester courses are taught by Biology faculty and focus on their current area of research. Students have full access to dedicated lab space throughout the semester and present their data at the departmental Undergraduate Research Day.

**Biology Senior Thesis**

Students doing undergraduate research may elect to write a Senior Thesis with the approval and support of their faculty research adviser. Students writing a thesis are recognized at Undergraduate Research Day. The student producing the “Best Senior Thesis,” as judged by a faculty committee, is awarded the Balkema Prize.

**Information for Non-majors**

Non-majors may fulfill their Natural Science Core requirements through the introductory major courses (BIOL2000 or BIOL2010) or one of several university Core courses offered for non-majors by the Department. Information about preparation for the allied health professions is available online at [www.bc.edu/premed](http://www.bc.edu/premed).

**Managed By**

University Catalog  
Office of Student Services  
Lyons Hall 103
Chemistry, Undergraduate Programs - University Catalog

The Chemistry Department offers a comprehensive curriculum to students in the Morrissey College of Arts and Sciences who wish to acquire a knowledge of chemistry. The Chemistry Department is approved by the American Chemical Society (ACS) Committee on Professional Training. By electing to supplement the degree requirements for the chemistry major with a year of independent research under the direction of a faculty member, the student qualifies for degree certification by the ACS.

Major Requirements

The major in chemistry consists of ten 1-semester courses as follows: Two semesters of general chemistry with laboratory (CHEM1109–1110 and CHEM1111–1112 or CHEM1117–1118 and CHEM1119–1120), two semesters of organic chemistry with laboratory (CHEM2231–2232 and CHEM2233–2234 or CHEM2241–2242 and CHEM2243 and CHEM2234), one semester of analytical chemistry with laboratory (CHEM3351 and CHEM3353), one semester of inorganic chemistry with laboratory (CHEM3322 and CHEM3324), two semesters of physical chemistry (CHEM4475–4476), one semester of advanced methods with laboratory (CHEM5552 and CHEM5554), and one semester of biochemistry (CHEM4465). In addition, the following are required: Two semesters of physics with laboratory (PHYS2200–2201 or PHYS2100–2101 and
PHYS2050–2051), and two or three semesters of calculus (MATH1102–1103 or MATH1105, and MATH2202 or MATH2203).

The preceding fulfills the Boston College requirements for a B.S. degree in chemistry. For this degree to be certified by the American Chemical Society, two additional chemistry laboratory electives are required, usually CHEM4491–4492 Introduction to Undergraduate Research I and II or CHEM5591–5592 Undergraduate Chemical Research I and II.

The recommended sequence for the Chemistry major is as follows:

**First Year**

CHEM1109–1110 General Chemistry with Laboratory or CHEM1117–1118 Honors Modern Chemistry with Laboratory; two semesters of Physics with Laboratory (PHYS2200–2201 or PHYS2100–2101 with PHYS2050–2051); Calculus (MATH1102–1103 or MATH1105); Core courses.

**Second Year**

CHEM2231–2232 Organic Chemistry or CHEM2241–2242 Honors Organic Chemistry with Laboratory; CHEM3351 Analytical Chemistry with Laboratory; CHEM3322 Introduction to Inorganic Chemistry with Laboratory; MATH2202 or 2203 Multivariable Calculus; elective or Core courses.

**Third Year**

CHEM4475–4476 Physical Chemistry; CHEM5552 Advanced Methods in Chemistry I with CHEM5554 Advanced Methods in Chemistry Laboratory I; elective or Core courses.
Fourth Year

CHEM4465 Introduction to Biochemistry; elective or Core courses.

The ten 1-semester chemistry courses that comprise the chemistry major amount to 37 credits. The five non-chemistry courses amount to 17 or 22 credits, depending on the selection chosen for Calculus.

Information for First Year Majors

Students who intend to be Chemistry or Biochemistry majors must enroll in CHEM1109 General Chemistry and CHEM1111 General Chemistry Laboratory, or CHEM1117 Honors Modern Chemistry and CHEM1119 Honors Modern Chemistry Laboratory. The choice of chemistry or biochemistry as a major requires that certain courses in other disciplines be taken as soon as possible.

Minor Requirements

The minor in chemistry consists of six courses. Two semesters of general chemistry (CHEM1109–1110 or CHEM1117–1118, with associated laboratories) are required as the introductory courses for the minor. Four additional chemistry courses are chosen in consultation with a faculty advisor and approved by the Director of the departmental minor, Professor Lynne O'Connell (Merkert 111, 617-552-3626). Normally, two of the four additional courses would be Organic Chemistry I and II, but other selections might be better choices, depending on the student's objective in attaining the minor. In accordance with MCAS policy, a student must have at least 15 credits in the minor program that are not used to fulfill requirements for another major or minor.
The following courses for non-science majors cannot be used to complete the minor: CHEM1102, CHEM1105, CHEM1106, CHEM1701 or CHEM1163. The following research courses cannot be used to complete the minor: CHEM4491–4492 or CHEM5591–5592.

Information for Study Abroad

Before going abroad, Chemistry majors must have completed the following prerequisites: General Chemistry, CHEM1109–1110 or CHEM1117–1118 and lab; Organic Chemistry, CHEM2231–2232 or CHEM2241–2242 and lab; Analytical Chemistry, CHEM3351 and lab; Inorganic Chemistry, CHEM3322 and lab; Calculus, MATH1102–1103 and MATH2202 or 2203; Physics, PHYS2200–2201 or PHYS2100–2101 and lab. Exceptions must be approved by the department.

In order for a course studied abroad to count for major credit, prior department approval is required for each course. Students must meet with the department study abroad advisor for course approval, advisement, and planning.

Fulfilling the Natural Science Core Requirement

The requirement of two courses in natural science may be fulfilled by any of the following courses: CHEM1102 Intersection of Science and Painting, CHEM1105 Chemistry and Society I, CHEM1106 Chemistry and Society II, CHEM1701 Living in the Material World, CHEM1109 General Chemistry I with lab, or CHEM1110 General Chemistry II with lab. The courses specifically intended for students who are not science majors are CHEM1102, CHEM1105, CHEM1106, and CHEM1701.

Biochemistry Major
Refer to the [Biochemistry](https://www.bc.edu/content/bc-web/academics/sites/university-catalog/undergraduate/mcas/chemistry.html) section for a description of this interdisciplinary major.

University Catalog  
Office of Student Services  
Lyons Hall 103
Classical Studies, Undergraduate Programs - University Catalog

BOSTON COLLEGE

Classical Studies encompasses all the social, material, and intellectual culture of the ancient Greek and Roman worlds, as they can be studied both in the original languages and in English.

The department offers courses under four headings, including (1) elementary and intermediate courses in Latin and Greek, designed to teach a student to read the languages, (2) courses in Greek and Roman literature, history, society, and culture, including Core Literature courses, taught in English and designed to acquaint a student broadly with the world of classical antiquity, (3) advanced reading courses in ancient authors and genres taught in the original languages, and (4) courses in Modern Greek language. Courses related to antiquity are also available in other departments.

Major Requirements

The major includes courses in Latin and/or Greek language and literature, from the elementary to the advanced level, and courses in ancient civilization and culture. Readings in the latter courses are in English. There are no separate majors in Latin or Greek. The program is designed to be flexible in response to the interests and prior experience of individual
students. Requirements, totaling a minimum of ten courses (or 30 credits), fall under three headings:

- Three courses or 9 credits (minimum) in Latin and/or Greek at the advanced level.
- Three courses or 9 credits (minimum) in the area of ancient civilization and culture.
- Four other courses or 12 credits, either in Latin and/or Greek language at any level (excluding only Elementary Latin) or in ancient civilization and culture, in any combination.

Notes

- Students who may think of going on in Classics are strongly advised to study both languages and to take as many advanced courses as possible. They should also discuss their interest with a faculty member at the earliest opportunity.
- Courses in Modern Greek language and culture are also taught within the department, but cannot be counted towards the major.

The Minor in Ancient Civilization

The interdisciplinary minor in Ancient Civilization is designed to make the study of the ancient world available to students without the requirement of learning Latin or Greek. Students learn about the history, literature, art, and culture of antiquity in courses that emphasize the study of primary texts in English translation. As a minor, it naturally looks to students whose main interests lie in other areas, but who are curious about the ancient world and who seek a program that is at once structured and interdisciplinary. It makes a good complement in particular to majors in English, History, Art, Art History, and Film, Philosophy, and Theology but is available to everyone
regardless of major. A list of the courses that are available each semester from the various departments and that count for the minor will be available at registration time. A program consists of six courses under three headings:

- One course in Greek History (CLAS2205) or Greek Civilization (CLAS1186). As a rule one or the other of these courses will be taught each year.
- One course in Roman History (CLAS2206) or Roman Civilization (CLAS2262). Again, as a rule one or the other of these courses will be taught each year.
- Four electives, taught in Classics and other departments, chosen from various offerings in ancient culture, for instance, in the areas of literature, philosophy, religion, history, art, and archaeology.

**Latin Minor**

The Latin minor consists of 6 courses/18 credits:

- courses (12 credits) in Latin above the Elementary level
- 1 of the following courses on Roman culture: City of Rome (CLAS 2262) or Roman History (CLAS 2206)
- 1 elective: either Latin (intermediate or above) or a course on Roman civilization

**Courses for the Latin Minor**

I. 4 courses (12 credits) in Latin above the Elementary level

- CLAS1056 Intermediate Latin I
- CLAS1057 Intermediate Latin II
- CLAS1058 Advanced Intermediate Latin
• CLAS3312 Roman Love Elegy
• CLAS3320 Roman Civil War Literature
• CLAS3325 Lucretius
• CLAS3329 Ovid, *Metamorphoses*
• CLAS3333 Apuleius
• CLAS3335 Ovid
• CLAS3336 Horace
• CLAS3337 Lucan
• CLAS3340 Latin Pastoral Poetry
• CLAS3342 Livy
• CLAS3338 Cicero and Sallust: Catiline
• CLAS3350 Catullus
• CLAS3356 Tacitus
• CLAS3370 Roman Comedy
• CLAS3375 Vergil

II. 1 course on Roman culture: City of Rome (CLAS2262) or Roman History (CLAS2206)

III. 1 elective: either Latin (intermediate or above) or a course on Roman civilization

• Any of the Latin courses above
• Electives:
  ○ CLAS1702 Rome: Art, Regime, & Resistance
  ○ CLAS2210/HIST2207 Roman Spectacles
  ○ CLAS2206 Roman History
  ○ CLAS2230/ENGL2200 Classical Mythology
  ○ CLAS2236/HIST2206 Roman Law & Family
  ○ CLAS2240/ENGL2204 Dangerous Women in Classical Literature
  ○ CLAS2242/THEO2241/HIST4211 Roman Religion
  ○ CLAS2250/HIST2837 Multiculturalism in the Roman Empire
  ○ CLAS2262/ARTH2262 City of Rome
- CLAS2270 Gender and Sexuality in Ancient Rome
- CLAS2280/ENGL 2202 Beast Literature
- CLAS2286/LING3205 History & Structure of Latin
- CLAS2295/ENGL2295 Ancient Comedy
- CLAS2284/LING 2384/THEO2384 Church Latin
- THEO5448 Patristics: Latin and English

**Ancient Greek Minor**

The ancient Greek minor consists of 6 courses/18 credits:

- 4 courses (12 credits) in ancient Greek above the Elementary level
- 1 of the following courses on Greek culture: Greek Civilization (CLAS1186) or Greek History (CLAS2205)
- 1 elective: Either ancient Greek (intermediate or above) or a course on Greek civilization

**Courses for the Ancient Greek Minor**

I. 4 courses (12 credits) in ancient Greek above the Elementary level

- CLAS1052 Intermediate Greek I
- CLAS1053 Intermediate Greek II
- CLAS3302 Greek Rhetoric
- CLAS3315 Homer
- CLAS3330 Aphrodite
- CLAS3331 Sophocles and Aristophanes
- CLAS3345 Sophocles
- CLAS3373 Euripides
- CLAS3382 Herodotus
- CLAS3387 Thucydides
II. 1 course on Greek culture: Greek Civilization (CLAS1186) or Greek History (CLAS2205)

III. 1 elective: either Greek (intermediate or above) or a course on Greek civilization

- Any of the ancient Greek courses above
- CLAS1186 Greek Civilization
- CLAS1701 Death in Ancient Greece, Achilles to Alexander
- CLAS2205/HIST2201 Greek History
- CLAS2207/HIST2202 Greeks and Barbarians
- CLAS2208/ARTH2206 Art and Myth in Ancient Greece
- CLAS2216/ARTH2216 Art and Archaeology of Homer and Troy
- CLAS2230/ENGL2200 Classical Mythology
- CLAS2240/ENGL2204 Dangerous Women in Classical Literature
- CLAS2254/HIST4202 Culture of Athenian Democracy
- CLAS2260/ENGL2111 Greek Drama and Society
- CLAS2280/ENGL2202 Beast Literature
- CLAS2295/ENGL2295 Ancient Comedy
- ARTH3311 Greek Art and Archaeology
- PHIL3332 Political Thought of the Greeks
- PHIL4405 Greek Philosophy
- PHIL5505 The Aristotelian Ethics
- PHIL5528 Skepticism/Stoicism/Neoplatonism
- THEO5425 Patristic Seminar: Intermediate Greek and English
- THEO7803 Graeca

Information for First Year Majors and Non-majors

“Classics” as outlined above is a broad, interdisciplinary field of study. For a first-year student, courses of two types are likely to be of most immediate interest: (1) Core literature courses, in which the reading is entirely in
English, and (2) elementary and intermediate language courses in Latin and Greek.

If you would like to begin a language now or have had only one year of a language in high school, you should choose an elementary course: CLAS1010 Elementary Latin I or CLAS1020 Elementary Greek I. If you have studied a language for two or three years in high school, you may want to choose an intermediate course: CLAS1056 Intermediate Latin I or CLAS1052 Intermediate Ancient Greek I.

Completion of the second semester of Latin or Greek at the intermediate level will fulfill the Morrissey College of Arts and Sciences and Carroll School of Management language proficiency requirement (Beginning with the class of 2022, the Carroll School will no longer have a language requirement.). In addition, the Department offers elective courses in ancient civilization and in Greek and Roman authors. Those in ancient civilization are taught entirely in English. They make excellent choices for freshmen interested in antiquity. Those in Greek and Roman authors require a background in the appropriate language. If you have studied Latin or Greek for three or four years in high school, you may wish to try courses in Greek and Roman authors. For further information, consult the Chair of the Department.

**Information for Study Abroad**

The Classics Department does not have a general set of requirements for study abroad. Students are advised individually, and recommendations are made based on their academic records and the specific program. Students should arrange to meet with the Chair of the Department when planning to study abroad.
Core Offerings

The Department offers several courses that satisfy Core requirements. CLAS2205 Greek History will be offered in fall 2019, and CLAS2208 Art and Myth in Ancient Greece will be offered in spring 2020.

Licensure for Teachers

The Undergraduate Initial License as Teacher of Latin and Classical Humanities 5–12 may be gained by pursuing a Classics major in addition to the Secondary Education major or the minor in Secondary Education. For further information, contact the Chair of the Department.

University Catalog
Office of Student Services
Lyons Hall 103
The Boston College Department of Communication is committed to the intellectual and ethical development of analytical and creative communication skills in our students, with particular emphasis on the effective functioning of circuits of communication, the impact of technological innovation on human beings and institutions, and the power relationships that develop through this interaction.

This program of study has led graduating majors to careers in communication industries and to success in fields related to communication including business, government/politics, international relations and negotiations, social and human services, health and education. Many majors have completed graduate programs in fields including communication, business and law.

Thirty-three credits are required for the major.

For Classes 2019 and 2020

Five Common Requirements (15 credits):

- COMM1010 Rhetorical Tradition
- COMM1020 Survey of Mass Communication
- COMM1030 Public Speaking
• COMM1040 Interpersonal Communication
  ○ (these four courses should be taken before any other courses in the major)
• COMM3330 Communication Methods: Social Science or COMM3340 Communications Methods: Cultural (take one)

One Theory Course (3 credits):

• Any course numbered between COMM3360 and COMM3380
• Theory courses should, ideally, not be taken until after a student has completed Rhetorical Tradition, Survey of Mass Communication, Public Speaking, Interpersonal Communication, and the Communication Methods course.

Two Writing-Intensive Seminars (6 credits):

• Any two courses numbered between COMM4425 and COMM4475
• These are upper-level courses and should not be taken until after a student has completed the five common requirements. Freshmen and sophomores should never register for writing-intensive seminars.

Three Electives (9 credits):

• Electives may be chosen from any three credit class offered by the department.
• A maximum of 6 transfer credits will be accepted by the department toward elective credits.
• One class of 3 credits or more from the Woods College may be counted toward an elective, with permission from the Director of Undergraduate Studies.
• Senior Internship Seminar, a 3-credit Communication elective, may be conducted only once during the senior year and used toward elective
requirements.

One-credit internships and courses may not be combined to total a 3-credit course.

For Classes 2021 and Beyond

Four Common Requirements (12 credits):

- COMM1010 Rhetorical Tradition
- COMM1020 Survey of Mass Communication
- COMM1030 Public Speaking
- COMM3330 Communication Methods: Social Science or COMM3340 Communication Methods: Cultural (take one)

One Critical Issues Course (3 credits): *each course offered periodically*

- Social Media
- Cultural Diversity in the Media
- Online Communication and Global Society
- Gender and Media
- Sports, Media and Culture
- Interpersonal Communication
- Mass Communication Ethics
- Media Violence
- Masculinity, Sexuality and Difference
- Persuasion
- Race at the Millennium

One Theory Course (3 credits):
Any course numbered between COMM3360 and COMM3380

Theory courses should, ideally, not be taken until after a student has completed Rhetorical Tradition, Survey of Mass Communication, Public Speaking and the Communication Methods course.

**Two Writing Intensive Seminars (6 credits):**

- Any two courses numbered between COMM4425 and COMM4475
- These are upper-level courses and should not be taken until after a student has completed the four common requirements. Freshmen and sophomores should never register for writing-intensive seminars.

**Three Electives (9 credits):**

- Electives may be chosen from any three credit class offered by the department.
- A maximum of 6 transfer credits will be accepted by the department toward elective credits.
- One class of 3 credits or more from the Woods College may be counted toward an elective, with permission from the Director of Undergraduate Studies.
- Senior Internship Seminar, a 3-credit elective, may be conducted only once during the senior year and used toward elective requirements.

One-credit internships and courses may not be combined to total a 3-credit course.

**Information for First Year Majors**

Students may declare the Communication major by contacting Kristin Hartnett, Academic Advisor at kristin.hartnett@bc.edu.
The common requirements: Rhetorical Tradition, Survey of Mass Communication, Public Speaking, Communication Methods (and Interpersonal Communication for Classes 2019–2020) are prerequisites for all other Communication classes. Majors should not register for theory, writing intensive or electives until those courses are completed.

Information for Study Abroad

The department strongly advises majors to be on track to complete Rhetorical Tradition, Survey of Mass Communication, Public Speaking and Communication Methods prior to going abroad. All students wishing to study abroad must meet with Professor Christine Caswell, Director of Undergraduate Studies, for permission. A maximum of two electives to the major may be conducted abroad with her permission.

Internship Program

COMM1901 Communication Internship, a 1-credit pass/fail course.

COMM5589 Senior Internship Seminar, a 3-credit course, is open to senior Communication majors. In addition, potential interns must have completed a minimum of six courses in communication including COMM1010 Rhetorical Tradition, COMM1020 Survey of Mass Communication, COMM1030 Public Speaking, COMM1040 Interpersonal Communication, and one of COMM3330 Communication Methods: Social Science or COMM3340 Communication Methods: Critical/Cultural.

For internship applications, please visit our department website. For departmental approval, contact Professor Christine Caswell, Director of Undergraduate Studies.
Honors Program

The honors program in the Department of Communication is targeted towards exceptional communication majors, defined as those whose overall GPA is 3.70 or higher. To be invited to join the honors program, students must have an overall GPA of 3.70 or higher at the conclusion of their freshman year (summer courses will be counted if taken for BC graded credit). Students will be invited to the program in the fall semester of their sophomore year prior to spring registration. The honors program requires enrollment in an honors methods course in sophomore spring and an honors writing course in their junior year. In addition, students in the honors program will complete a thesis in order to officially graduate with department honors. A more complete description of the program is available on the department website or in the Honors Handbook in the department’s main office or contact Professor Celeste Wells, Director of the Communication department Honors Program.

Contacts

Questions about the Communication curriculum, study abroad, academic credit for internships, internship approval, course substitution forms and transfer credits should be directed to Prof. Christine Caswell, Director of Undergraduate Studies, St. Mary's Hall South, Room S375, 617-552-6148, caswellc@bc.edu.

To declare the major and discuss general course of study, please contact Kristin Hartnett, Academic Advisor, St. Mary's Hall South, Room S376, 617-552-2515. kristin.hartnett@bc.edu.

Computer Science, Undergraduate Programs - University Catalog

The Computer Science Department offers major programs in the Morrissey College of Arts and Sciences leading to the degrees of bachelor of arts and bachelor of science as well as minor and concentration programs in Computer Science and Bioinformatics. The Information Systems Department offers a program in Information Systems. Consult their listing under the Carroll School of Management for a program description. For further information, contact the Computer Science Department at St. Mary’s Hall, Second Floor South, 617-552-3975.

Bachelor of Arts in Computer Science

The curriculum for the bachelor of arts degree in Computer Science is based on current recommendations of the Association for Computing Machinery (ACM) for liberal arts institutions. The program is designed both to provide a solid foundation in the fundamentals of computer science and to provide practical, hands-on experience with computing systems, as the current technology job market dictates.

Bachelor of arts students complete a 34-credit computer science component, supplemented by a mathematics component rooted in calculus. For most students, the program requires completion of fourteen 3-credit courses along with one 1-credit lab.
Computer Science Component

The 34 credits required for completion of the bachelor of arts major are grouped into two categories, seven required core courses (totaling 22 credits) and four electives (totaling at least 12 credits). The seven required core courses are the following:

- CSCI1101 Computer Science I or CSCI1103 Computer Science I Honors
- CSCI1102 Computer Science II
- CSCI2243 Logic and Computation
- CSCI2244 Randomness and Computation
- CSCI2271 Computer Systems
- CSCI2272 Computer Organization and Lab
- CSCI3383 Algorithms

All these courses are 3 credits with the exception of CSCI2272, which is 4 credits. The remaining 12 credits will typically be earned from four courses with 3 credits earned through any CSCI courses numbered CSCI2000 or above and at least 9 of the credits earned from courses at the CSCI3000 level or above.

Logic and Computation and Randomness and Computation (CSCI2243 and CSCI2244) provide students with mathematical fundamentals necessary for Computer Science. It is especially important that these be completed no later than the end of junior year, since this material is a prerequisite for the required course Algorithms (CSCI3383). CSCI2243 and CSCI2244 are also required prerequisites for many 3000-level CSCI electives.

Mathematics Component
One semester of calculus at the level of Calculus II or higher is required for completion of the bachelor of arts major. Students will ordinarily complete the calculus requirement with any one of the following courses: MATH1101, MATH1103, MATH1105, or MATH2202. Many students will need to complete a prerequisite calculus course (e.g., MATH1100 before MATH1101, or MATH1102 before MATH1103), so this calculus requirement is often satisfied by enrolling in a two-semester sequence.

**Bachelor of Science in Computer Science**

The curriculum for the bachelor of science major in Computer Science is based on requirements specified by the Computer Science Accreditation Board (CSAB). The program is designed to provide an extensive background in computer science and is well suited for students considering graduate study or students planning to pursue careers in science or engineering.

Bachelor of science students must complete a 38-credit computer science component, supplemented by a mathematics component and a natural science component.

**Computer Science Component**

The bachelor of science major in Computer Science requires a minimum of 38 credits in computer science. The computer science credits are grouped into two categories, seven required CS courses (totaling 23 credits) and five elective courses (totaling at least 15 credits).

The seven required core courses are:
• CSCI1101 Computer Science I or CSCI1103 Computer Science I Honors
• CSCI1102 Computer Science II
• CSCI2243 Logic and Computation
• CSCI2244 Randomness and Computation
• CSCI2271 Computer Systems
• CSCI2272 Computer Organization and Lab
• CSCI3383 Algorithms

All these courses are 3 credits with the exception of CSCI2272, which is 4 credits.

Of the 15 credits of electives, 3 credits must be earned from one course in the social and ethical issues cluster (CSCI2260–2267) and at least 12 credits must be from courses numbered CSCI3000 or above.

Logic and Computation and Randomness and Computation (CSCI2243 and CSCI2244) provide students with mathematical fundamentals necessary for Computer Science. It is especially important that these be completed no later than the end of junior year, since this material is prerequisite for the required course Algorithms (CSCI3383). CSCI2243 and CSCI2244 are also required prerequisites for many 3000-level CSCI electives.

Mathematics Component

At least 12 credits of mathematics are required for completion of the bachelor of science major:

Class of 2020:
• MATH1103 Calculus II (Math/Science majors) or MATH1105 Calculus II–AP (Math/Science majors)
• MATH2202 Multivariable Calculus
• Two MATH electives from among MATH2210 Linear Algebra, MATH2216 Introduction to Abstract Mathematics, or any MATH course 3000 or higher;

*Class of 2021 and future classes:

• MATH1103 Calculus II (Math/Science majors) or MATH1105 Calculus II–AP (Math/Science majors)
• MATH2202 Multivariable Calculus
• MATH2210 Linear Algebra
• Any MATH course 3000 or higher.

Since many students will need to complete MATH1102 before taking MATH1103, this calculus requirement will often be met by enrolling in a two-semester sequence.

**Science Component**

A two-semester sequence in a laboratory science for science majors. The sequences that fulfill this requirement can be chosen from among Biology, Chemistry, Physics or Earth & Environmental Sciences.

**Biology:**

• BIOL2000 Molecules & Cells, BIOL2010 Ecology & Evolution and BIOL2040 Investigations in Molecular Cell Biology Lab, or
• BIOL2000 Molecules & Cells, BIOL3030 Introduction to Physiology and BIOL2040 Investigations in Molecular Cell Biology Lab;
Chemistry:

- CHEM1109/1111/113 General Chemistry I and CHEM1110/1112/1114 General Chemistry II or
- CHEM1117/1119/1121 Honors Modern Chemistry I and CHEM1118/1120/1122 Honors Modern Chemistry II;

Physics:

- PHYS2200/2050 Introductory Physics I (Calculus) and PHYS2201/2051 Introductory Physics II (Calculus);

Earth and Environmental Sciences:

- EESC1132/1133 Exploring the Earth and either
- EESC2220/2221 Earth Materials or
- EESC 2264/2265 Stratigraphy and Sedimentation, or
- Two of the following 2-credit Environmental Systems courses:
  - EESC2202/2212 Ecosystems,
  - EESC2203/2213 Water Resources,
  - EESC2204/2214 The Critical Zone,
  - EESC2205/2215 Climate Change,
  - EESC2206/2216 Oceans,
  - EESC2207/2217 Earthquakes,
  - EESC2208/2218 Quantitative Methods,
  - EECS2209/2219 Ores and Resources
  - Followed by EESC2220/2221 Earth Materials.

Departmental Honors

Junior and senior Computer Science majors with at least a 3.3 GPA in CSCI courses are eligible to join the Departmental Honors Program. In order to
graduate with the Departmental Honors designation, eligible students must maintain at least a 3.3 GPA in CSCI courses and complete a senior thesis. Thesis requirements are to have a thesis proposal approved by a faculty advisor and by the Honors Committee by the end of junior year. Students in the Departmental Honors Program must

1. complete two sections of CSCI4961 Honors Thesis during their senior year with grades of B+ or higher;
2. submit a written honors thesis by the last day of class in the second semester of senior year, and
3. give a 30-minute presentation of their thesis at the end of their senior year.

Students participating in the Honors Program are required to take both sections of CSCI4961 Honors Thesis. One section of CSCI4961 Honors Thesis may count as a CSCI 3000-level elective.

**The Minor Program**

The minor program in Computer Science is designed to provide an introduction to computer science, primarily for mathematics and science majors. It is also suitable for students with a strong secondary interests in computer science and good analytical skills.

Eighteen credits are required for completion of the minor.

The requirements for a Minor in Computer Science are:

1. CSCI1101 Computer Science I or CSCI1103 Computer Science I Honors
2. CSCI1102 Computer Science II
3. Two electives numbered 2000 or higher (only one of: CSCI2257 Database Systems and Applications or CSCI2267 Technology and Culture may count toward this requirement)
4. Two electives numbered 3000 or higher

Students wishing to pursue a minor emphasizing computer science should consider the foundations sequence:

- CSCI2243 Logic and Computation and
- CSCI2244 Randomness and Computation (to be taken after CSCI2243)

Students wishing to pursue application development or applications of computer science in management may wish to consider:

- CSCI2254 Web Application Development and
- CSCI2257 Database Systems and Applications

Students wishing to pursue applications in data science may wish to consider:

- CSCI2244 Randomness and Computation (to be taken after CSCI2243),
- CSCI3346 Data Mining,
- or CSCI3345 Machine Learning

Students wishing to pursue applications in security may wish to consider:

- CSCI2201 Computer Security,
- CSCI2243 Logic and Computation, and
- CSCI3381 Cryptography
Interdisciplinary Concentration in Bioinformatics

The Bioinformatics Concentration is offered to students majoring in Biology, Mathematics, and Computer Science. Please note that courses in this concentration may overlap with major or minor requirements. In addition, a semester of bioinformatics research within a lab can be substituted for either one of the three additional computer science courses or the computational biology course. Students wishing to pursue this option should visit the Biology Department (Higgins 355) for course approval.

Course Requirements (for a Total of Seven Courses)

- BIOL2000 Molecules and Cells or BIOL3150 Introduction to Genomics (fall/spring)
- One of the following statistics courses:
  - BIOL2300 Biostatistics
  - MATH4426 Probability
  - CSCI2244 Randomness and Computation
- BIOL4200 Introduction to Bioinformatics (spring)
- A computational biology course, such as:
  - BIOL6160 Graduate Bioinformatics
  - BIOL4802 Research in Evolutionary Genomics*
  - Undergraduate Research in a Computational Biology lab
- Any three computer science courses at the level of CSCI1101 or above, such as:
  - CSCI1101 Computer Science 1 (recommended)
  - CSCI1102 Computer Science 2 (recommended)
  - CSCI2227 Introduction to Scientific Computation*
  - CSCI3345 Machine Learning*
  - CSCI3346 Data Mining*
  - CSCI3383 Algorithms*
*Prerequisites apply

Information for First Year Majors and Non-majors

The Computer Science majors are for students who enjoy using computers and who wish to gain a deeper understanding of computing technology. Both B.S. and B.A. majors are designed to provide a solid foundation in the fundamentals of computer science. At the same time, they provide practical, hands-on experience, as the current technological job market dictates. Students are prepared for a variety of careers such as software development, network administration, technical support, and systems analysis. In addition, knowledge of computing technology is becoming increasingly important for people entering business, law, and the health care fields.

First Year Computer Science Majors

First year students considering majoring in Computer Science should plan to complete the program's calculus requirement (MATH1101 or higher) during their first year. Most will enroll in MATH1100 in fall semester and continue with MATH1101 in spring semester. Students who either carry advanced mathematics placement or who have completed a year of calculus in high school, should enroll directly in MATH1101–1102 (or a more advanced course) in the fall semester. First year students wishing to double major in Computer Science and Mathematics should take the calculus sequence recommended for the Mathematics major.

Freshmen with some prior programming experience or strong technical skills are encouraged to take CSCI1101 Computer Science I or CSCI1103 Computer Science I Honors or CSCI1102 Computer Science II in their first semester. Those students who have had no programming experience may
consider beginning with an introductory computer course (e.g., CSCI1074) in their first year. First year students who have achieved a score of 4 or higher on the Computer Science A.P. Examination or students entering with significant programming backgrounds, should speak with the Computer Science Chairperson or Undergraduate Program Director about proper course placement (e.g., directly taking CSCI1102).

**First Year Non-majors**

The department periodically offers introductory 3-credit courses in computer science: CSCI1074, CSCI1075, CSCI1101, CSC1103, and CSCI2227.

CSCI1074 is a survey of Computer Science for students who know little about computing. How do computer hardware and software really work? How is information (text, music, images, numbers) represented in computer files, CDs, digital cameras, and iPods; how do computers manipulate this digitally encoded information; and how is it all sent around the Internet? Students will learn the answers to these questions through weekly hands-on computer exercises.

CSCI1075 is a gentle introduction to computer programming for non-majors. Students will learn about computers and computer software by working with a small personal robot. Students will learn the Python programming language, and write Python programs to control their robot's behavior, explore its environment, and perform various tasks. As we get our robots to do more and more, we learn how software is designed and written to solve real problems.

CSCI1101 and CSCI1103 are the introductory programming courses. One of these is required of all Computer Science majors and minors and is a prerequisite for all advanced computer science courses. Therefore,
students who wish to take more than one course in computer science will need to take either CSCI1101 or CSCI1103 at some point. The skills needed to write computer programs come easily to some people and less easily to others. Students who have little or no programming experience and are apprehensive about their ability should consider enrolling in CSCI1074 before enrolling in CSCI1101 or CSCI1103.

CSCI2227 is an introduction to programming with an orientation to scientific applications, using MATLAB as the programming language.

**Transfer Credits and Placement for Computer Science Courses**

The Computer Science Department will accept transfer credits from other schools with documentation (for example, syllabi) sufficient for us to determine course equivalence. Before taking an external course, check BC's academic policies. AP, IB, and GCE scores are used to make placement decisions, but not for course credit. Specifically, students who score a 5 on the Computer Science A exam, or a 4 or 5 on the Computer Science AB exam, or who have significant programming experience should consult with the Chairperson of the Department or Undergraduate Program Director about starting the Computer Science course sequence with CSCI1102.

**Course Availability**

Most introductory courses (e.g., CSCI1101, CSCI1103, and CSCI1102) are available every semester. CSCI1074 and CSCI1075 are offered periodically. All courses that are required for the major are offered at least once each academic year. Most advanced electives are offered only in alternate years; hence, student schedules should be designed carefully.
Course Credit Information

All Computer Science courses are prefixed by the letters CSCI and are registered as courses in the Morrissey College of Arts College of Arts and Sciences. However, some courses are cross-listed with the Information Systems department in the Carroll School of Management.

Managed By

University Catalog
Office of Student Services
Lyons Hall 103
An undergraduate in the Department of Earth and Environmental Sciences will develop a program in one of two majors: Environmental Geoscience or Geological Sciences. Within the requirements discussed below, programs can be designed to meet the interests and objectives of each student. Students may wish to major or to have a concentration in the department for a variety of reasons including: (1) a desire to work professionally in Earth and environmental sciences, (2) a desire to obtain a preparatory foundation for postgraduate work in Earth and/or environmental science, environmental studies, environmental policy, resource management, environmental law, or similar fields, (3) a desire to teach Earth and environmental science in secondary schools, or (4) a general interest in the discipline. Geoscientists study the Earth’s complex systems and the interrelations among the solid Earth, hydrosphere, biosphere, and atmosphere. Students trained in the Earth sciences can look forward to exciting and rewarding careers, as society continues to require ever greater amounts of energy and resources in the twenty-first century, and at the same time, will face increasing environmental problems and concerns. The department provides students with the skills and varied background needed to address these problems. Earth scientists are naturally interdisciplinary and use science to solve real-world problems. Today’s Earth scientist can choose to work in the field in almost any area of the world, including
ultramodern laboratories equipped with the latest scientific and computing equipment. Whether understanding hazards and environmental challenges such as earthquakes, landslides, floods, sea level rise, and climate change, exploring for Earth's energy and mineral resources, or working with governmental agencies or industry to analyze pollution problems, the Earth and environmental sciences provide exciting possibilities for a rewarding career.

**Major Requirements: Environmental Geoscience**

The field of Environmental Geoscience is interdisciplinary and evolving. This bachelor of science program serves as an excellent major for students who wish to concentrate in the scientific aspects of sustainability, including those who might not be looking toward professional careers as scientists. Many Environmental Geoscience students go on to graduate work in environmental law, environmental policy, or sustainability studies. Students majoring in Environmental Geoscience should work out their programs closely with a departmental advisor to insure both breadth and depth in this subject area.

To provide students with training in the interdisciplinary nature of Environmental Geoscience, the major includes an introductory sequence in Environmental Systems (EESC2201–2208), consisting of nine 2-credit courses (plus associated labs, EESC2211–2218). These courses can be taken in any order and do not have prerequisites. They are recommended particularly for first-year students and sophomores. They are usually offered as two-course pairs, with one course meeting for the first half of the semester and another course meeting for the second half of the semester, in the same time slot. Students are welcome to take one or both of the courses in each of these pairs in any given semester. In general, 2–4 Environmental Systems courses are offered each semester. Environmental
Geoscience majors are required to take 12 credits toward this requirement. Students have the option to take our introductory geology course, Exploring the Earth (EESC1132–1133), to fulfill 4 credits.

Students in this major must complete the following course requirements:

(A) 12 credits from EESC2201–2208 (2 credits each, plus laboratories EESC2211–2218) and/or EESC1132–1133 (4 credits)

- Environmental Systems: The Human Footprint (EESC2201)
- Environmental Systems: Ecosystems (EESC2202)
- Environmental Systems: Water Resources (EESC2203)
- Environmental Systems: The Critical Zone (EESC2204)
- Environmental Systems: Climate Change (EESC2205)
- Environmental Systems: Oceans (EESC2206)
- Environmental Systems: Earthquakes (EESC2207)
- Environmental Systems: Quantitative Methods (EESC2208)
- Exploring the Earth (EESC1132/1133)

Note: Some substitutions are possible. Approved substitutions include: EESC1170 for EESC2203, EESC1174 for EESC2205, and EESC1157 for EESC2206.

(B) EESC2220 Earth Materials (+EESC2221, 4 credits)

(C) At least 18 credits of elective courses. All EESC courses count toward this requirement, with the following limitations:

- Up to 3 credits can be from 1000-level courses.
- Up to 6 credits can be from 2000-level courses.
• Up to 6 credits can be from approved non-EESC courses.  
(Approved courses: all ENVS courses, BIOL3210, BIOL4450, BIOL5130, CHEM2231, CHEM4475, CSCI1127, ECON2277, ECON2278, ECON3391, ECON3392, HIST2406, HIST4703, INTL2260, MATH3305, PHIL5515, PHIL5534, PHYS3301, SOCY3346, SOCY3349, SOCY3350, SOCY5562, THEO5429, or other courses, such as field camps, by permission of the Undergraduate Studies Committee.)

• Up to 3 credits of independent study (EESC5596–EESC5598) can count toward this requirement.

(D) Senior research experience (at least 4 credits)

• EESC5582 and EESC5583 Senior Research seminar (2 credits each), or
• EESC5595 Senior Thesis (at least 6 credits)

(E) Three corequisite courses in Natural Sciences and Mathematics (12 credits)

• Calculus II (MATH1101, MATH1103 or MATH1105) and
• Two semesters of Physics with labs (PHYS2200/2050 and PHYS2201/2051), or
• Two semesters of Chemistry (CHEM1109–1110 with labs CHEM1111–1112 or CHEM1117–1118 with labs CHEM1119–1120), or
• Three semesters of Biology (BIOL2000, BIOL2010, and lab BIOL2040)

AP credits cannot substitute for the Physics, Chemistry or Biology corequisite (E) above. Students planning to go on to graduate programs in science are encouraged to take at least four semesters of introductory Physics, Chemistry, and/or Biology.
Information for First-Year Environmental Geoscience Majors

For those students who would like to explore the major in Environmental Geoscience, it is suggested that students take two to four of the Environmental Systems courses (EESC2201–2208, with laboratories EESC2211–2218) and/or Exploring the Earth (EESC1132–1133) during their first year. The laboratory science requirement (E above) should be taken during the first or second year.

Major Requirements: Environmental Geoscience

This major combines elements of traditional Earth and environmental sciences programs and is considered excellent preparation for those working toward graduate school in the geosciences or employment in industry following graduation with a B.S. degree.

(A) Two required courses (8 credits)

- Exploring the Earth (EESC1132) with laboratory EESC1133, 4 credits
- Earth Materials (EESC2220) with laboratory EESC2221, 4 credits

Note: Any pair of Environmental Systems courses (EESC2201–2208, plus labs) can substitute for EESC1132.

(B) At least 11 credits from the following courses

- Stratigraphy and Sedimentation (EESC2264) with laboratory EESC2265, 4 credits
- Structural Geology (EESC3385) with laboratory EESC3386, 4 credits
- Introduction to Geophysics (EESC3391), 3 credits
- Petrology (EESC3378) with laboratory EESC3379, 4 credits
(C) At least 19 credits of elective courses, with the following requirements:

- Electives include all EESC courses and approved interdisciplinary options (below).
- Up to 3 credits toward this requirement may be from a 1000-level course.
- At least 7 credits must be from EESC courses numbered 3000 or above.
- Up to 6 credits from approved non-EESC courses can count toward this requirement (approved courses: MATH3305, PHYS3301, CHEM2231, CHEM4475, or others by permission of the Undergraduate Studies Committee).
- Up to 6 credits from independent study or senior thesis (EESC5595–5599) can count toward this requirement.

(D) Five corequisite courses in Natural Sciences and Mathematics (20 credits)

- Calculus II (MATH1103 or MATH1105)
- Two semesters of Physics with labs (PHYS2200/2050 and PHYS2201/2051)
- Two semesters of Chemistry (CHEM1109–1110 with labs CHEM1111–1112 or CHEM1117–1118 with labs CHEM1119–1120)

AP credits cannot substitute for the Physics and Chemistry corequisite (D) above.

*Note:* All Geological Sciences majors are strongly encouraged to take a geology summer field course, which can count toward requirement C.

**Information for First-Year Geological Sciences Majors**
The following courses are recommended for first-year Geological Sciences majors, if their schedules permit:

- Exploring the Earth I (EESC1132) with laboratory (EESC1133)
- Earth Materials (EESC2220) with laboratory (EESC2221)
- Two semesters of Calculus (MATH1102–1103)
- Two semesters of Chemistry (CHEM1109–1110) with labs (CHEM1111–1112)

**Minor in Geological Sciences**

In addition to the two major programs, a student may choose to minor in Geological Sciences. The minor is designed to be flexible and to allow the interested student to explore an area of interest in the Earth sciences without the formal commitment of a major. Students interested in declaring a minor in the department should contact the Director of Undergraduate Studies (Professor Jeremy Shakun) to ensure they receive advising about course selections.

A minor in the Department of Earth and Environmental Sciences consists of a minimum of six courses in the department structured as follows:

(A) Two required courses (8 credits):

- Exploring the Earth I (EESC1132) with laboratory (EESC1133)
- Earth Materials (EESC2220) with laboratory (EESC2221)

(B) At least 7 additional credits from departmental courses numbered 1000 or higher

(C) At least 3 additional credits from a departmental course numbered 2000 or higher
(D) At least 3 additional credits from a departmental course numbered 3000 or higher

Each student's minor program must be approved in advance by a faculty advisor in the Department of Earth and Environmental Sciences. Students should be aware that many upper-level courses have prerequisites in geoscience, mathematics, physics, or chemistry. Consult this catalog or a departmental advisor, and keep in mind that these prerequisites must be considered in designing a specific minor program. The minor program allows students flexibility in their choice of courses. Minor programs can be designed to emphasize specific areas of concentration within the broad range of subjects in Earth and Environmental Sciences.

**Senior Thesis and the Departmental Honors Program**

Students are encouraged to conduct research with professors in the department. A senior thesis is normally a two-semester project, often also involving work during the summer after your junior year (or before). To do a thesis, students register for Senior Thesis (EESC5595) each semester of the senior year. To achieve Department Honors, majors in the department need to meet the GPA criteria (3.3 in major, 3.2 overall) and provide a thesis proposal to the Undergraduate Studies Committee by the add-drop date in the fall semester. In the spring, the completed thesis, signed by the faculty research advisor, is due to the committee by 5:00 p.m. on April 20, or if that is on a weekend or holiday, 5:00 p.m. on the first regular day of classes thereafter. Students can also write a senior thesis under the Morrissey Arts and Sciences Honors and Scholar of the College programs. Theses that meet these requirements would normally meet the Department Honors requirements. Honors will be awarded upon successful completion of a thesis based on the proposed research project as evaluated by the faculty advisor and approval of the thesis and the candidate’s academic record by
the Undergraduate Studies Committee. In general, all students in the department are urged to fulfill at least one of the elective courses in any major program with a project-oriented research course during their senior year. Students may propose substitutes for particular course requirements by writing to the department Undergraduate Studies Committee.

Fulfilling the Core Requirements

Core courses in the department (numbered EESC1XXX) are designed to give non-science majors an introduction to various aspects of the Earth’s history and dynamics. The course offerings include a wide variety of subjects and approaches that reflect the breadth of the Earth sciences. This variety of courses provides maximum freedom of choice for introductory students. All of these courses presume no prior knowledge beyond high school science and all fulfill the Natural Science Core requirement. They are designed to acquaint students with some exciting aspect of the world we live in while providing a background in the methods of analysis and reasoning common to all science. EESC1125, EESC1132, and EESC1180 are courses that provide insight into the wide scope of geoscience subjects. Other Core offerings (such as EESC1146, EESC1150, EESC1157, EESC1170, EESC1172, EESC1174, EESC1177, and EESC1187) cover more specific sub-fields, such as oceanography, climate change, water resources, astronomy, or evolution. The department participates in the Core Renewal process, offering both Complex Problems (for example, EESC1501, EESC1506) and Emerging Questions (for example, EESC1701, EESC1702) courses for first-year students. Students wishing to find out more about department Core courses should contact the department at 617-552-3640 (Devlin 213) or see the department Director of Undergraduate Studies (Professor Jeremy Shakun, jeremy.shakun@bc.edu).
Information for Study Abroad

The Department of Earth and Environmental Sciences strongly encourages students to take advantage of study abroad opportunities. An Earth scientist can never see too much of our planet. We particularly encourage students to participate in programs that include field-based courses and research experiences. Depending upon the student's major, and the courses available at the foreign school, the department can be quite flexible. We typically allow one elective per semester abroad to count toward major requirements, or two courses in unusual circumstances. Students should work out their plan well in advance with a departmental advisor or the departmental Foreign Study Advisor (Professor Jeremy Shakun, jeremy.shakun@bc.edu).

University Catalog
Office of Student Services
Lyons Hall 103
Economics, Undergraduate Programs - University Catalog

The Economics major provides a critical examination of how the economic system works in the United States and throughout the world. The introductory course, ECON1101, is a survey of economic problems, policies, and theory. The required courses in micro theory and macro theory, ECON2201–ECON2202, give a deeper analytical foundation. The two required courses in quantitative methods, ECON1151 and ECON2228, develop analytical and empirical research skills. Electives permit further study in a wide range of fields, including money and banking, fiscal policy, international trade and finance, law and economics, public sector economics, economic development, capital theory and finance, labor economics, income distribution, financial econometrics, industrial organization, consumer economics, health economics, history of economic thought, transportation economics, environmental economics, urban economics, political economy, financial markets, real estate, and public policy analysis.

The Economics major provides a general background that is useful to those planning careers in law, government service, and business as well as those planning careers as professional economists. Professional economists work as college teachers, as researchers for government agencies, businesses, and consulting firms, and as administrators and managers in a wide range of fields.
The Core

Principles of Economics (ECON1101) is a 4-credit course, with 3 hours of lecture and a 1 hour discussion section. This satisfies one of the two required social science Core courses. Qualifying AP scores on Micro Principles or Macro Principles can be used to satisfy the remaining social science Core course requirement. It is possible to waive this requirement entirely with qualifying AP scores on both Micro Principles and Macro Principles AP exams, but the Department strongly recommends taking Principles of Economics at Boston College for a well-rounded introduction to the U.S. economy and current policy issues. Some Enduring Questions and Complex Problems courses, available to first-year students, are offered by Economics faculty. They satisfy the Social Science core, but they do not count toward Economics major requirements.

Principles of Economics I/Microeconomics and Principles of Economics II/Macroeconomics (ECON1131 and ECON1132) satisfy the Core requirements in the social sciences. They are not open to students in the Class of 2023 and will not be offered after Spring 2020.

Requirements for Class of 2023 and Beyond
Major Requirements: Class of 2023 and Beyond

A minimum of 36 credits, consisting of five required courses and six electives, are required for the economics major. The required courses are: Principles of Economics (ECON1101), Economic Statistics (ECON1151), Microeconomic Theory (ECON2201 or 2203), Macroeconomic Theory (ECON2202 or 2204), and Econometric Methods (ECON2228). At least four of the six electives must be upper-level courses, i.e., 3000-level courses that have a theory prerequisite. In addition, Microeconomic Theory (ECON2201 or 2203), Macroeconomic Theory (ECON2202 or 2204), Statistics (ECON1151) and Econometric Methods (ECON2228) must be completed by sophomore year unless a student starts the major after their first year. All students must have the five required courses completed by the end of junior year. Exceptions to this requirement may be granted at the discretion of the Director of Undergraduate Studies.

All Economics courses counting toward the major and minor are 3-credit courses with the exception of Principles of Economics (ECON1101), Statistics (ECON1151) and Econometric Methods (ECON2228), which are 4-credit courses.

The Economics major is designed to be structured. Students should take ECON1101 before taking economics courses other than Statistics. Consult the Department’s web page (www.bc.edu/economics) for a discussion of the policies pertaining to advanced placement for the Principles and Statistics courses.

- Those who begin the major as freshmen should take Microeconomic Theory, Macroeconomic Theory, Statistics and Econometric Methods in the sophomore year. Students beginning the major as sophomores
should take both Theory classes, Statistics, Econometric Methods, and at least one elective by junior year.

- Statistics should be taken as soon as possible, preferably no later than the first semester of sophomore year. Econometric Methods should be taken in the following semester.

With the exception of ECON2211 Math for Economic Analysis, students should complete at least one Theory course before beginning the electives. Those who start the major late may not have time to follow this sequence precisely. Students who need to take an elective before completing a theory course should register for a 2000-level elective that has only Principles as a prerequisite. It is also possible, with permission of the instructor, to take a 3000-level elective concurrently with its Theory prerequisite.

Economic electives are taught in two formats: the traditional lecture format, with enrollments up to 49, and a smaller writing-intensive format, with enrollments capped at 15 to 25 depending on the size of the writing component. Students are urged to take advantage of the writing-intensive courses and to check with the Department before the registration period to learn which courses will be offered in which format.

Calculus I (MATH1100, MATH1102 (preferred), or the equivalent) is required of all Economics majors prior to taking the Microeconomic Theory and Macroeconomic Theory courses. Any student with a serious interest in economics should take at least one full year of calculus, MATH1100–1101, MATH1102–1103 (preferred), or the equivalent. Candidates for Departmental Honors must take a year of calculus (see below). Students considering graduate work in economics or related fields should take additional mathematics courses: about the same number as required for the minor in mathematics.
Honors Program: Class of 2023

The Honors Program presents highly motivated economics majors with opportunities for more individualized and challenging training in economics. Entrance to the program is ideally in the sophomore year, when students with good Principles grades will be urged to consider the Honors Theory sequence (ECON2203–2204) in place of the standard Theory sequence (ECON2201–2202). However, students who have already completed ECON2201–2202 may still be accepted into the Honors Program. Students considering the Honors Program should arrange to take Statistics as soon as possible and then Econometric Methods (ECON2228). MATH1100–1101, MATH1102–1103 (preferred), or the equivalent are prerequisites for both Honors Theory courses and the Honors Program generally. The honors candidate must complete a 6-credit Senior Honors Thesis (ECON4497–4498) or a 12-credit Advanced Independent Research (ECON6601) in the senior year under the direction of a faculty member. Only ECON4497 is counted toward the 11-course requirement. Honors students take five other electives, at least three of which must be upper-level courses.

The distinction of Honors in Economics may be conferred only upon those students completing a Senior Honors Thesis. A letter grade less than B+ on the Senior Honors Thesis would be considered a deficiency to the conferral of Honors in Economics. A higher letter grade supports the conferral, but does not in itself assure that the distinction shall be conferred. GPA and the rigor of the courses taken will be considered. The conferral is the sole responsibility of the Honors Committee.

Minor Requirements: Class of 2023

The minor in Economics consists of five required courses and two electives, a minimum of 24 credits. The required courses are: Principles of Economics
(ECON1101), Statistics (ECON1151), Microeconomic Theory (ECON2201 or 2203), Macroeconomic Theory (ECON2202 or 2204) and Econometric Methods (ECON2228). At least one of the two electives must be an upper-level (3xxx) course. At least one of the Theory courses must be completed by the end of the junior year. Exceptions to this requirement may be granted at the discretion of the Director of Undergraduate Studies.

Calculus I (MATH1100, MATH1102 [preferred], or the equivalent) is a prerequisite for the Theory courses.

**Economics Concentration for Carroll School of Management Students: Class of 2023**

All Carroll School of Management students, regardless of their area of concentration, are required to take Principles of Economics (ECON1101) and Statistics (OPER1135 or 1145). In addition, CSOM students may choose Economics as an area of concentration. The concentration consists of four courses, i.e., at least 12 additional credits, beyond the two required courses. The four additional courses are Microeconomic Theory (ECON2201 or 2203), Macroeconomic Theory (ECON2202 or 2204), and two electives, at least one of which must be an upper-level (3xxx) course. Students with a serious interest in economics are encouraged to fulfill all the requirements of the Morrissey College of Arts and Sciences major. At least one of the Theory courses must be completed by the end of the junior year. Exceptions to this requirement may be granted at the discretion of the Director of Undergraduate Studies.

**Requirements for Classes of 2020, 2021, and 2022**
Requirements for Classes of 2020, 2021, and 2022

A minimum of 35 credits, consisting of six required courses and five electives, are required for the economics major. The required courses are: Principles of Economics I/Microeconomics and Principles of Economics II/Macroeconomics (ECON1131 and ECON1132), Statistics (ECON1151), Microeconomic Theory (ECON2201 or 2203), Macroeconomic Theory (ECON2202 or 2204), and Econometric Methods (ECON2228). At least three of the five electives must be upper-level courses, i.e., 3000-level courses that have a theory prerequisite. In addition, Microeconomic Theory (ECON2201 or 2203), Macroeconomic Theory (ECON2202 or 2204) and Econometric Methods (ECON2228) must be completed by sophomore year unless a student starts the major after their first year. All students must have the five required courses completed by the end of junior year. Exceptions to this requirement may be granted at the discretion of the Director of Undergraduate Studies.

Students in the classes of 2020, 2021 and 2022 may substitute ECON1101, Principles of Economics, for ECON1131/ECON1132. They must then take six elective courses, four of which must be at the 3000 level.

All Economics courses counting toward the major and minor are 3-credit courses with the exception of Principles of Economics (ECON1101), Statistics (ECON1151) and Econometric Methods (ECON2228), which are 4-credit courses.

The Economics major is designed to be structured. Students should take ECON1131 and ECON1132 before taking economics courses other than Statistics. Consult the Department’s web page (www.bc.edu/economics) for a discussion of the policies pertaining to advanced placement for the Principles and Statistics courses.
• Those who begin the major as freshmen should take Microeconomic Theory, Macroeconomic Theory, Statistics and Econometric Methods by sophomore year. Students beginning the major as sophomores should take both Theory classes, Statistics, Econometric Methods, and an elective by junior year.
• Statistics should be taken as soon as possible, preferably no later than the first semester of sophomore year.

With the exception of ECON2211 Math for Economic Analysis, students should complete at least one Theory course before beginning the electives. Those who start the major late may not have time to follow this sequence precisely. Students who need to take an elective before completing a theory course should register for a 2000-level elective that has only Principles as a prerequisite. It is also possible, with permission of the instructor, to take a 3000-level elective concurrently with its Theory prerequisite.

Economic electives are taught in two formats: the traditional lecture format, with enrollments up to 49, and a smaller writing-intensive format, with enrollments capped at 15 to 25 depending on the size of the writing component. Students are urged to take advantage of the writing-intensive courses and to check with the Department before the registration period to learn which courses will be offered in which format.

Calculus I (MATH1100, MATH1102 (preferred), or the equivalent) is required of all Economics majors prior to taking the Microeconomic Theory and Macroeconomic Theory courses. Any student with a serious interest in economics should take at least one full year of calculus, MATH1100–1101, MATH1102–1103 (preferred), or the equivalent. Candidates for Departmental Honors must take a year of calculus (see below). Students considering graduate work in economics or related fields should take
additional mathematics courses: about the same number as required for the minor in mathematics.

**Honors Program: Classes of 2020, 2021, and 2022**

The Honors Program presents highly motivated economics majors with opportunities for more individualized and challenging training in economics. Entrance to the program is ideally in the sophomore year, when students with good Principles grades will be urged to consider the Honors Theory sequence (ECON2203–2204) in place of the standard Theory sequence (ECON2201–2202). However, students who have already completed ECON2201–2202 may still be accepted into the Honors Program. Students considering the Honors Program should arrange to take Statistics as soon as possible and then Econometric Methods (ECON2228). MATH1100–1101, MATH1102–1103 (preferred), or the equivalent are prerequisites for both Honors Theory courses and the Honors Program generally. The honors candidate must complete a 6-credit Senior Honors Thesis (ECON4497–4498) or a 12-credit Advanced Independent Research (ECON6601) in the senior year under the direction of a faculty member. Honors students take four other electives, at least two of which must be upper-level courses.

The distinction of Honors in Economics may be conferred only upon those students completing a Senior Honors Thesis. A letter grade less than B+ on the Senior Honors Thesis would be considered a deficiency to the conferral of Honors in Economics. A higher letter grade supports the conferral, but does not in itself assure that the distinction shall be conferred. GPA and the rigor of the courses taken will be considered. The conferral is the sole responsibility of the Honors Committee.

**Minor Requirements: Classes of 2020, 2021, and 2022**
The minor in Economics consists of five required courses and two electives, a minimum of 23 credits. The required courses are: Principles of Economics I/Microeconomics and Principles of Economics II/Macroeconomics (ECON1131 and ECON1132), Statistics (ECON1151), Microeconomic Theory (ECON2201 or 2203), and Macroeconomic Theory (ECON2202 or 2204). At least one of the two electives must be an upper-level (3xxx) course. At least one of the Theory courses must be completed by the end of the junior year (exceptions to this requirement may be granted at the discretion of the Director of Undergraduate Studies).

Calculus I (MATH1100, MATH1102 [preferred], or the equivalent) is a prerequisite for the Theory courses.

Students in the classes of 2020, 2021 and 2022 may substitute ECON1101, Principles of Economics, for ECON1131/ECON1132. They must then take three elective courses, two of which must be at the 3000 level.

**Economics Concentration for Carroll School of Management Students: Classes of 2020, 2021, and 2022**

All Carroll School of Management students, regardless of their area of concentration, are required to take Principles of Economics I/Microeconomics and Principles of Economics II/Macroeconomics (ECON1131 and ECON1132) and Statistics (OPER1135 or 1145). In addition, CSOM students may choose Economics as an area of concentration. The concentration consists of four courses, i.e. at least 12 additional credits, beyond the three required courses. The four additional courses are Microeconomic Theory (ECON2201 or 2203), Macroeconomic Theory (ECON2202 or 2204), and two electives, at least one of which must be an upper-level (3xxx) course. Students with a serious interest in economics are encouraged to fulfill all the requirements of the Morrissey
College of Arts and Sciences major. At least one of the Theory courses must be completed by the end of the junior year. Exceptions to this requirement may be granted at the discretion of the Director of Undergraduate Studies.

Students in the classes of 2020, 2021 and 2022 may substitute ECON1101, Principles of Economics, for ECON1131/ECON1132. They must then take three elective courses, two of which must be at the 3000 level.

**Double Major**

Requirements for double majors are the same as those for the major.

**Courses Taken Outside the Department**

The Department requires that at least nine of the courses for the major, and five of the courses for the minor and the CSOM concentration, be taken within the Department. Of the two courses that may be taken outside the Department, the following limit applies: A maximum of two electives for the major and one elective for the minor or CSOM concentration. The Theory courses, Statistics, and Econometric Methods may not be taken outside the Department. Students who transfer from another university may transfer more than three courses towards the major, but must take at least five courses for the major at Boston College. The transferred courses may include the Theory courses. All students who wish to receive credit for courses taken outside the Department must contact the Director of Undergraduate Studies, who will determine if particular courses can be counted towards the major, minor, or CSOM concentration. Note, finally,
that the limits apply in total to all courses taken outside the Department. For example, a student who is studying abroad and has already received credit towards the major for an elective taken in a summer program can only receive credit for one elective taken abroad.

**Economics Internship**

ECON1199 Economics Internship, a 1-credit course, is available for any student who wishes to do an internship with an agency or organization that requires a Boston College connection as a condition for offering the internship opportunity. A student who wishes to enroll in ECON1199 is required to complete an approval form that can be obtained in the Dean's Office of the Morrissey College of Arts and Sciences. The form must be signed by the student's supervisor in the organization or agency providing the internship and by the Department's Director of Undergraduate Studies. After it is signed, it should be sent to the student's class dean. At the end of the internship, the agency or organization supervisor must provide an evaluation to the Director of Undergraduate Studies. The internship is graded on a pass/fail basis. Credits received through internships cannot be applied to the credits required for completing the major, minor, or CSOM concentration. Only one such credit will be counted toward the 120 required for graduation.

**Information for Study Abroad**

There are many excellent economics programs offered through universities overseas. Students are encouraged to ask their faculty advisors and the Office of International Programs for details about the quality of various programs. Schools with strong programs in economics include the London School of Economics and University College London in England; Trinity
College and University College Dublin in Ireland; Pompeu Fabra University, Universidad Complutense, and Universidad Carlos III in Spain; University of Paris Dauphine in France; Bocconi University in Italy; and the University of Melbourne in Australia. Some programs require a full-year commitment, which requires careful planning in order to complete major requirements.

To ensure that students are able to complete the requirements for the major in time for graduation, we prefer students to have five courses completed before studying abroad: Principles of Economics, Statistics, Econometric Methods and Microeconomic and Macroeconomic Theory. Minors and CSOM concentrators should have completed Principles of Economics, Statistics, and at least one Theory course. At a minimum, all students must complete Principles of Economics and one Theory course to be approved for study abroad. To be eligible to transfer back credits for the major, minor, or CSOM concentration, students must earn at least a B- in at least one of the Theory courses before going abroad.

Department policies on study-abroad courses are as follows:

- Up to two of the electives that are required for the Morrissey College of Arts and Sciences Economics major may be taken abroad. Minors and CSOM concentrators are limited to counting one elective from abroad towards their degree requirements.
- The prerequisite restrictions on upper-level and lower-level electives taken at Boston College apply to courses taken abroad.
- Electives previously transferred from outside the Department, such as from a summer program, reduce the number of electives that can be transferred from study abroad.
- Microeconomic and Macroeconomic Theory, Statistics, and Econometric Methods cannot be taken abroad. This means that students interested in studying abroad must carefully plan their courses
for the major. Theory courses and Econometric Methods must be completed by the end of junior year. For example, students who begin the major in sophomore year should take the Principles and Statistics courses and one of the Theory courses in the second semester, and then complete the second Theory course and Econometric Methods junior year in the semester that they are at Boston College. These students should not expect to be approved for study abroad for their entire junior year.

Those students planning to participate in the Department’s Honors program are strongly advised to identify a thesis topic and a faculty supervisor before going abroad. Very tight deadlines during the fall semester of senior year make this advance planning essential.

Students should meet with their advisors to plan their semester or year abroad. Students who are considering doing Ph.D. work in economics should think ahead and plan their programs abroad with particular care.

**Managed By**

University Catalog  
Office of Student Services  
Lyons Hall 103
English, Undergraduate Programs - University Catalog

In an academic milieu fragmented into specialized disciplines, the study of literature continues to offer students a comprehensive point of view from which they can integrate the diversity of human experiences. Language reveals fascinating truths about the human mind and literature records its preoccupations—intellectual, aesthetic, spiritual, psychological, political, social, historical, and ethical.

The study of literature offers deep schooling in human experience. It is also superb training for any field in which understanding of behavior is valued. Students of literature consistently explore language and the forms of expression, valuable in any future work where precise and effective communication is important. English majors and minors can develop these skills to a considerable degree, and non-majors find that taking even a few well-chosen electives beyond the Core requirement can widen their knowledge of literature and sharpen their linguistic abilities.

The English major at Boston College is designed to introduce students to a wide range of expression in the literary traditions of the past and present. It aims to help undergraduate students develop a strengthened ability to work critically and sensitively with texts in poetry and prose, to write with clarity and grace, and to articulate judgments about literature with an awareness of various critical approaches. English majors will become familiar with some of the major developments in the history of literature in the English
language and will have the opportunity to choose from an array of courses covering topics from the medieval period to contemporary cultural studies to a range of transnational literatures.

By the successful completion of the English major at Boston College, students will be able to demonstrate:

- an ability to write clear, coherent, organized, and stylistically correct papers;
- an ability to close-read, interpret, and analyze texts (including poetic texts);
- a knowledge of literary genres and appropriate use of critical terminology;
- a recognition of the historical specificity of literary works and/or other cultural products;
- an awareness that there are a variety of critical approaches to literary and cultural texts.

Information for First Year Majors and Non-majors
The English Department has primary responsibility for two Core requirements—ENGL1010 First Year Writing Seminar, taught entirely by English Department faculty, and ENGL1080 Literature Core, taught largely by English Department faculty. Because Core classes are restricted to first-year students, students should plan to take both courses during the first year.

**ENGL1010 First Year Writing Seminar**

The First Year Writing Seminar helps students use their writing as a source of learning and a form of communication. Designed as a workshop in which each student develops a portfolio of personal and academic writing, the seminar follows a semester-long process. Students write and rewrite essays continuously, discuss their works-in-progress in class, and receive feedback during individual and small group conferences with the instructor. In connection with their writing, students read and discuss a wide range of texts, including various forms of non-fiction prose. In addition to regular conferences, the class meets two hours per week to learn and discuss writing processes and strategies, various genres and rhetorical situations for writing, the evolving drafts of class members, and various forms of conducting and writing research, including an introduction to using the resources at O'Neill Library.

**ENGL1080 Literature Core**

In this part of the Core program, students explore the principal motives which prompt people to read literature—to assemble and assess the shape and values of one's own culture, to discover alternative ways of looking at the world, to gain insight into issues of permanent human importance as well as issues of contemporary urgency, and to enjoy the linguistic and formal satisfactions of literary art.
Literature Core will strive to develop the student's capacity to read and write with clarity and engagement, to allow for that dialogue between the past and present we call history, and to provide an introduction to literary genres.

Courses for English Language Learners

The department offers Core level courses in language and literature for English language learners. These classes require department permission for registration. Interested students should contact the ELL Director, Lynne Anderson, for more information: lynne.anderson@bc.edu.

Major Requirements

Students ordinarily begin the English major in their sophomore year, after completing the First Year Writing Seminar and the Literature Core,. In addition to the two 3-credit Core courses, students take 30 credits (in the form of ten, 3-credit courses) from the Department’s offerings. These must include ENGL2131 Studies in Poetry (3 credits) and ENGL2133 Studies in Narrative (3 credits), usually taken in sequence in the sophomore year. Both courses train students intensively in the close reading of literary texts and in writing with critical awareness about literature.

To provide deeper understanding of the foundations of literary traditions, English majors are also required to take 9 credits in earlier literatures in English, to be distributed in the following manner:

- 3 credits in medieval or early-modern literature (before 1700)
- 3 credits in eighteenth or nineteenth-century literature (between 1700–1900)
- 3 additional credits in either category (e.g., pre–1900)
Students complete the English major by taking 15 credits in elective courses of their choice.

During the sophomore year, historical survey courses such as Introduction to British Literature and Culture I and II and the American Literary History sequence may be useful to fill in students' knowledge of the development of English and American literature. Students who have a special interest in American literature are advised to take American Literary History I as a foundation for later courses. Please note that earlier literatures in languages other than English (such as cross-listed courses offered through other departments) will be counted as major electives and not historical distribution requirements. At this point, students should be in a position to begin making their own choices about how they will complete the major requirements, in discussion with their major advisor. They will have many options from among the 30 or more electives the Department offers each semester in English and American literature, in Irish Studies, in writing, in the different genres, and in particular themes.

Seminars

Seminars are designed for English majors who want to pursue a topic or field in more depth than is possible in larger electives. Beginning with the class of 2022, all majors will be required to take one seminar prior to graduation. The seminar, with its small class size and intensive focus, is designed to foster an intimate learning community where students are encouraged not only to study an issue intensively but also to engage actively in intellectual exchange with a faculty member and a select group of committed peers. These courses are intended mainly for juniors and seniors, and ordinarily, students are advised to have completed both Studies in Poetry and Studies in Narrative and at least one additional elective before taking a seminar. Students should expect to produce a
longer seminar project or research paper (15–20 pages) as well as one or more shorter papers and make at least one oral presentation.

**Individually Designed Major**

For some students with specific interdisciplinary interests, in American Studies for instance, an individually designed sequence of courses under the English major is appropriate. Students who satisfy their major requirements this way may count for English credit up to two courses (6 credits) taken in other departments. This plan must be approved by the chairperson and the student's department advisor by the end of the first semester of junior year.

**English Minor**

The English minor is comprised of six courses (18 credits) beyond the Core requirements in English. These must include:

- Either Studies in Poetry (ENGL2131) or Studies in Narrative (ENGL2133)
- A historical foundations course (pre–1700 or pre–1900)
- Four electives from the department offerings.

Core and Woods College classes may not be counted toward the minor, though additional courses that fulfill the first two requirements may be counted as electives. Students may count up to two courses from study abroad toward the minor, though they must be approved by the department.

For questions about the English minor, or to declare, please contact Trese Ainsworth (ainswor@bc.edu).
English Courses for Non-majors

Students majoring in other subjects have always been welcome in English courses for the diversity of viewpoint and variety of knowledge they often bring with them. From the students' point of view, English courses offer the enjoyment of reading good literature; insight into history, culture, and human character; and a chance to polish skills of reading and writing.

Interdisciplinary and Related Programs

The English Department is connected to a variety of interdisciplinary programs at Boston College.

American Studies Program

American Studies is an interdisciplinary program that brings together faculty from several departments to expose students to a wide range of approaches to American culture past and present. Thematic emphases include the American city; the historical interaction of class, gender, race, and ethnicity; high culture, popular culture, and mass media; crime and deviance; migration, borderlands, and empire.

Minor Requirements

Courses used for fulfilling the minor must come from outside the student's major and from at least two different departments. Eighteen credits are required for the minor. Nine of these credits must be clustered in a common area of concentration chosen by the student in consultation with the director of American Studies. In the fall of the senior year each student must take the elective designated as the American Studies senior seminar for that
year. Also, ENGL2277 Introduction to American Studies, is strongly recommended for minors, but not yet required.

For further information on the American Studies minor and application forms, visit the American Studies website at www.bc.edu/amstudies.

Irish Studies

Irish Studies, an integral part of Boston College's distinguished Irish Programs, offers an interdisciplinary approach to the culture and society of Ireland. Individual courses cover the areas of social, political, and economic history, literature, medieval art, sociology, folk music, and the Irish language. In addition, there are several courses that are jointly taught by faculty from various disciplines. These include a 3-semester sequence of courses integrating the history and literature of Ireland, from the eighteenth to the twentieth centuries.

The minor in Irish Studies requires students to complete 6 courses drawn from more than one discipline and designated as appropriate by the Irish Studies program. (These courses may not be “double counted” towards both a major and minor.) Students should contact Irish Studies at 617-552-3938 to arrange a meeting with the Director for assistance planning their courses. Those completing the Irish Studies minor are eligible for the Maeve O’Reilly Finley Fellowship for graduate study in Ireland. A listing of Irish Studies-approved courses is posted on our website and is also available at Connolly House.

Students pursuing the minor are encouraged to take advantage of the partnership programs that the Irish Studies program and the Office of International Programs have developed with the National Universities of Ireland at Galway and Maynooth, University College Cork, University
College Dublin, Trinity College Dublin, the University of Ulster, and Queen’s University Belfast.

Women's and Gender Studies

Please contact Professor Sharlene Hesse-Biber in the Sociology Department for information regarding Women's Studies.

Secondary Education Majors and Minor

English majors who are also completing Lynch School of Education majors must fulfill more specific major requirements to demonstrate a broad range of knowledge within the discipline. In addition to the First Year Writing Seminar, the Literature Core, Studies in Poetry, and Studies in Narrative, these students must fulfill the following requirements:

- one pre–1700 course
- one pre–1900 course
- one course on Anglophone or Ethnic American Authors
- one course on Women Authors
- one course on the History of Language/Grammar/Linguistics
- one course in Adolescent and Young Adult Literature
- two English electives

To acquire sufficient knowledge across this spectrum, LSOE students should consider taking more general survey courses (e.g., Introduction to British Literature and Culture I and II, American Literary History I, II, and III) to fulfill some requirements.
Students with questions about the ENGL/LSOE requirements should contact Treseanne Ainsworth, in Stokes S493.

**Minor in Secondary Education**

Students in the Morrissey College of Arts and Sciences majoring in English may apply to minor in Education, in order to gain certification for teaching. The program begins in the junior year. Interested students should contact the Coordinator of Secondary Education or the Associate Dean in the Lynch School of Education during the first semester in sophomore year.

The Department recommends that English majors completing a secondary education minor follow the guidelines listed above for course selection as well.

**Linguistics**

The Program in Linguistics, housed in the Department of Slavic and Eastern Languages, offers courses for English majors who want to study English from a linguistic perspective or to examine the nature of language.

**Creative Writing Concentration**

The English Department offers a Creative Writing Concentration that allows certain students to intensify and focus their English majors by taking a series of practice-based writing courses along with their literature courses.

- The creative writing concentrator undertakes a 36-credit English major instead of the usual 30 credits. At least 9 of these credits must be writing workshops in any genre, selected with the help of the student's
concentration advisor.

All concentrators also attend monthly social gatherings to read new work and share news about literary activity on campus. English majors may declare the Creative Writing Concentration up through first semester of junior year, after receiving a grade of A- or better in one of the Department's creative writing workshops. The period for declaring the Concentration runs through the end of add/drop week of each semester. Eligible English majors wishing to declare should see Treseanne Ainsworth in Stokes S493.

**Summer Courses**

A limited number of summer courses maybe be counted toward the English major or minor.

These include summer English courses taught abroad by our faculty through the Office of International Programs, as well as electives taught through the Woods Colleges by our faculty.

Please contact Trese Ainsworth ([ainswor@bc.edu](mailto:ainswor@bc.edu)) for questions about summer courses.

Courses offered through the Woods College during the academic year may not be counted toward the English Core, major or minor.

**Information for Study Abroad**

English majors should complete (at minimum) the required Studies in Poetry and Studies in Narrative prior to study abroad, while minors should
complete at least one of those requirements. Majors will need to have their preliminary application for study abroad approved by the department. Majors may count up to six credits per semester abroad for the major (12 credits maximum); minors may count a total of six credits. These courses may fulfill historical requirements or major electives. All courses taken abroad must be approved by the department in order to be counted toward the major or minor. A course syllabus is required for major/minor approval. This syllabus must include the writing requirements for the course, and courses cannot be approved without this information. Please note that the number of credits awarded per course is determined by the Office of International Programs.

Students may study abroad for either or both semesters but must contact Treseanne Ainsworth, Assistant to the Chairperson, Stokes S493, when planning their study abroad.

**Honors Program**

The English Department offers an honors program for English majors. Students admitted to the program will write an honors thesis senior year, either a critical study or a creative project, for 6 credits total toward the major. Students contemplating an honors thesis are encouraged to take a seminar during their junior year. A description of this program is available on the department website.

**B.A./M.A. Program**
The English Department at Boston College offers a B.A./M.A. Program that allows selected students to earn both a B.A. and an M.A. in English in five years. Enrolled students will start earning graduate credit as a senior, then complete the M.A. in a fifth year of full-time study.

Admission to the program requires a GPA of 3.3 overall and 3.6 in the English major. Students may carry in up to four courses taken in the senior year toward their M.A. degree: two undergraduate seminars and two graduate seminars. The two seminars will also count towards the B.A. degree. The two graduate courses must be taken as overloads. One of the graduate courses taken in the senior year must be either Introduction to Advanced Research or Issues and Methods in American Studies.

The purpose of the program is to allow students a greater opportunity for concentrated study and research training. Students in the B.A./M.A. program must meet all the specific course requirements for the undergraduate major as well as the formal requirements for the M.A., including the completion of Introduction to Advanced Research or its equivalent, demonstrated proficiency in a foreign language, a theory course, and a comprehensive exam.

Students interested in the program should consult the Director of the M.A. Program to discuss whether this version of the M.A. is right for their individual goals. The Director will review the student's academic record and, if appropriate, facilitate the application process. The application fee and GRE requirement will be waived. Once accepted into the B.A./M.A. program students will have the Director of the M.A. Program as their advisor. Students in the program will not be eligible for TF/TA positions or financial aid.

**How to Apply:**
Students must submit applications by March 31 of the junior year. The required application materials are a personal statement, a writing sample, three letters of recommendation, and an official transcript. Please take a look at [www.bc.edu/bc-web/schools/mcas/graduate/admission.html](http://www.bc.edu/bc-web/schools/mcas/graduate/admission.html) for application instructions and e-mail gsasinfo@bc.edu with any questions on how to upload materials.

Do not send any materials to the English Department.

University Catalog  
Office of Student Services  
Lyons Hall 103
Environmental Studies, Undergraduate Programs - University Catalog

Learning Outcomes

The Environmental Studies Program offers an interdisciplinary curriculum to students interested in perspectives on sustainability from faculty and courses across the university. Both a major and a minor are available to qualified students. The goals of the major are to provide students with:

- the knowledge and perspective to cultivate rewarding lives as responsible citizens of the planet;
- a deep understanding of the scientific, political, and cultural aspects of the world's environmental challenges;
- the tools and creativity necessary to envision and implement paths to sustainable solutions; and
- a solid background for environmentally related graduate programs and/or careers in business, education, law, policy, planning, government, or research.

Applying for the Environmental Studies Major

Students are admitted into the Environmental Studies major by application at the end of the freshman year. Acceptance is determined by the Steering Committee of the Environmental Studies Program, which includes faculty drawn from many departments and an associate dean from the Morrissey
College of Arts and Sciences. Criteria for admission include academic achievement and a personal statement.

The deadline for submitting applications is the last day of classes, at the end of your first year. The application form may be found at Apply for the Major page.

**Major Requirements**

The ENVS major consists of a minimum of 43 credits, equivalent to at least 14 full-semester courses, as detailed below. ENVS students may choose more than one major, but at least 27 credits for the ENVS major must not be used to fulfill requirements for another major or minor (i.e., 16 credits can be shared). Note that all Boston College majors require at least 27 unique credits, so the number of credits that can be shared will be fewer for majors that require fewer courses, such as most departmental majors (i.e., if a major requires 30 credits, only 3 can be shared).

**A. Environmental Studies introductory seminar ENVS1100 (1 credit)**

This seminar is offered in the fall semester for the new cohort of ENVS majors (sophomores). It involves readings of classic texts in environmental studies, and it is similar in structure to Cornerstone courses.

**B. Eight credits of Environmental Systems courses: EESC2201 Environmental Systems: The Human Footprint plus three of any of the following courses (and labs EESC2211–2218):**

- EESC2202 Environmental Systems: Ecosystems
- EESC2203 Environmental Systems: Water Resources
- EESC2204 Environmental Systems: The Critical Zone
- EESC2205 Environmental Systems: Climate Change
- EESC2206 Environmental Systems: Oceans
- EESC2207 Environmental Systems: Earthquakes
- EESC2208 Environmental Systems: Quantitative Methods

These are a series of 2-credit half-semester courses that introduce students to the basic concepts of environmental science from a variety of perspectives and professors, with the specific goal of providing students with a foundation for further interdisciplinary study of environmental issues. Students can take one or more of these courses in any given semester. Approved substitutions include: EESC1167 for EESC2201, EESC1170 for EESC2203, EESC1174 or EESC1505 for EESC2205, and EESC1157 for EESC2206.

**C. Six credits of foundation courses in environmental studies:**

ENVS3360 Research Methods in Environmental Studies plus another environmental course in the social sciences or humanities

- ECON2277 Environmental Economics and Policy or ECON2278 Environmental Economics
- HIST2406 This Land is Your Land: U.S. Environmental History
- HIST4703 Environmental Histories of Water
- INTL2260 International Environmental Science and Policy
- SOCY1031 Society and Environmental Transformations
- SOCY2200 Statistics (or a different statistics course)
- SOCY5563 Environmental Sociology I
- ENVS/UNAS2256 Environmental Law and Policy
- PHIL5534 Environmental Ethics
- Core Courses Open Only to First Year Students
  - PHIL1501 Science and Ethics of Climate Change
  - SOCY1501 Global Implications of Climate Change
D. A concentration in a theme or discipline (6 courses, 18 or more credits)

Available themes include Food and Water Sustainability and Climate Change and Societal Adaptation. Available disciplines include Economics, History, Political Science, and Sociology.

Themes

Food and Water Sustainability

This theme focuses on the interrelated challenges of providing water and food for the growing human population on a finite planet with unequal access to resources. Students will gain a firm foundation in hydrology and ecology as well as related historical and cultural perspectives.

- Two fundamentals:
  - EESC3310 Agroecology
  - ENV5S3315 Sustainable Agriculture
  - HIST2505 Feast or Famine, a History of Food and the Environment
- One of:
  - EESC1170 Rivers and the Environment
  - EESC2203 Environmental Systems: Water Resources (in addition to the B requirement above)
  - BIOL2010 Ecology and Evolution
- One of:
  - EESC2297 Environmental Hydrology
  - EESC4400 Geomorphology and Landscape Change
  - EESC4457 Watershed Science
EESC5535 Coastal Processes

Two of:
- ENVS3345 Environment and Public Health
- ENVS3355 Sustainable Cities
- ENVS4407/SOCY4407 Easy Being Green?
- HIST2044 A Material and Cultural History of Food in China
- HIST4254 Century of Famine
- HIST4701 Ecological History of the Atlantic World
- HIST4703 Environmental Histories of Water
- PHIL5534 Environmental Ethics (in addition to the C requirement above)
- SOCY5560 Consumption and Sustainability
- THEO2231 The Bible and Ecology
- THEO5429 Theology and Ecology

Climate Change and Societal Adaptation

This theme gives students a strong foundation in the science, policy and related challenges of global climate change, as societies learn to adapt to changes in sea level, biodiversity, and the availability of energy and water.

One of:
- EESC1174 Climate Change and Society
- EESC1501 Global Implications of Climate Change (for freshmen only)
- EESC1505 Science and Ethics of Climate Change (for freshmen only)
- EESC2205 Environmental Systems: Climate Change (in addition to the B requirement above)

One of: (counts toward requirement C)
○ PHIL1501 Science and Ethics of Climate Change (for freshmen only)
○ SOCY1031 Society and Environmental Transformations
○ HIST2503/SOCY1025 People and Nature
○ SOCY1501 Global Implications of Climate Change (for freshmen only)
○ SOCY1509 Planet in Peril (for freshmen only)

• Two of:
  ○ EESC4400 Geomorphology and Landscape Change
  ○ EESC4440 Global Biogeochemical Cycles
  ○ EESC4457 Watershed Science
  ○ EESC4462 Paleoclimate Dynamics
  ○ EESC4463 Paleoclimate Proxies
  ○ EESC5535 Coastal Processes
  ○ EESC5599 Climate Change Debates

• Three of:
  ○ ECON3391 Economics of Energy and the Environment
  ○ ENVS3340 Alternative Energy
  ○ ENVS3355 Sustainable Cities
  ○ INTL2260 International Environmental Science and Policy (in addition to requirement C)
  ○ PHIL5515 How to Save the World: Ethics of Climate Change
  ○ POLI2531 Energy Politics in U.S., Comparative and Global Perspective
  ○ SOCY5562 Environmental Sociology I

Disciplines

Economics

• Six of fundamentals:
○ ECON1131 Principles of Economics I/Microeconomics
○ ECON1132 Principles of Economics II/Macroeconomics
○ ECON2201 Microeconomic Theory
○ ECON1151 Statistics, or a different statistics course (can also count toward requirement C)
○ ECON2228 Econometrics
○ ECON2277 Environmental Economics and Policy or ECON2278 Environmental Economics (can also count toward requirement C)

• Two of:
  ○ ECON3386 Public Policy Analysis
  ○ ECON3391 Economics of Energy and the Environment
  ○ ECON3392 Quantitative Methods in Environmental Economics

History

• Two of:
  ○ HIST1505 Planet in Peril (for freshmen only): (in addition to the C requirement above)
  ○ HIST1511 Science and Technology in American Society (for freshmen only)
  ○ HIST1704 The Worlds of Moby-Dick
  ○ HIST1708 Nature on Exhibit: From Sea Monsters to Sea World
  ○ HIST2044 Chinese Environmental History
  ○ HIST2045 A Material and Cultural History of Food in China
  ○ HIST2406 This Land is Your Land: U.S. Environmental History (in addition to the C requirement above)
  ○ HIST2411 Civil War and Reconstruction
  ○ HIST2431 Leeches to Lasers: Medicine and Health in the U.S.
  ○ HIST2505 Feast or Famine, a History of Food and the Environment
  ○ Several other environmental history courses TBA
• Four of:
  ▪ HIST4043 Environment, Economy, and Politics in Medieval China
  ▪ HIST4090 Modern South Asia
  ▪ HIST4222 Animals
  ▪ HIST4254 Century of Famine: Nineteenth Century Social Crisis
  ▪ HIST4423 The Plains Indians
  ▪ HIST4701 Ecological History of the Atlantic World
  ▪ HIST4703 Environmental Histories of Water (in addition to the C requirement above)
  ▪ HIST4875 New England: Winthrop to Walden
  ▪ HIST4891 Science and Religion in American History

Political Science

• One of fundamentals:
  ▪ POLI1042 Introduction to Modern Politics
  ▪ POLI1061 Introduction to American Politics
  ▪ POLI1091 Introduction to Comparative Politics

• Two of American politics:
  ▪ POLI2301 Policy and Politics in the U.S.
  ▪ One of POLI2305, POLI2309, POLI2317, POLI2322, POLI2334, POLI2338

• One of Comparative politics:
  ▪ POLI2415 Models of Politics
  ▪ POLI2422 Comparative Social Movements
  ▪ POLI2460 Comparative Politics of Development

• Two of International politics:
  ▪ POLI2531 Energy Politics in U.S., Comparative and Global Perspectives
  ▪ One of POLI3521, POLI2522 or POLI2525
Sociology

- Four of fundamentals:
  - SOCY5562 Environmental Sociology I (counts towards requirement C)
  - SOCY1001 Introductory Sociology
  - SOCY2200 Statistics (in addition to the C requirement above)
  - SOCY2210 Research Methods
- Three of:
  - SOCY1509 Planet in Peril (in addition to requirement C)
  - SOCY1031 Society and Environmental Transformation
  - SOCY3349 Environmental Studies: Selected Topics
  - SOCY3375 American Economic Crisis and Social Change
  - SOCY5560 Consumption and Sustainability
  - SOCY5572 Sociology of Science and Technology

E. At least 6 credits (two or more courses) of environmental studies electives

At least 3 credits must be from courses numbered 3000 and above. Please see our current elective offerings, which include all Earth and Environmental Sciences courses, as well as more than 30 other options.

F. Senior research seminar (ENVS4941–ENVS4942; 4 credits; 2 credits per semester for both semesters)

The senior seminar involves a combination of discussions of key readings in ENVS, guest speakers, team research projects focused on solving real environmental problems, and engagement with communities beyond the BC campus. Alternatively, students can request to fulfill this requirement via a two-semester (6 credits) senior thesis.
Information for First Year Students

First-year students who are considering applying to become Environmental Studies majors should consider taking the following courses:

- Environmental Systems: The Human Footprint (EESC2201 and lab EESC2211), as well as one or more of other the Environmental Systems courses (EESC2202–EESC2208 and labs EESC2212–EESC2218).
- One or more of the foundation courses (requirement C above), several of which also fulfill University Core requirements.

Information for Study Abroad

ENVS majors are encouraged to take advantage of study abroad opportunities. Studying outside of the U.S. provides a global perspective on environmental and sustainability issues and educational opportunities not available at BC. ENVS students are allowed 4 credits per semester abroad to count toward the major (or minor) requirements, or 8 credits in unusual circumstances.

For further information contact ENVS Program Director Tara Pisani Gareau, see the program website at www.bc.edu/envstudies, or stop by the program office in Devlin 213.

Managed By

University Catalog
Office of Student Services
Lyons Hall 103
German Studies, Undergraduate Programs - University Catalog

The German Studies department offers a major and a minor in German language, an interdisciplinary minor in German Studies, and a German business track within these majors and minors. These programs give students an opportunity to learn the language, literature, culture, and history of Germany.

Students who have performed well in German (minimum 3.3 GPA) may apply for the Honors program.

Major in German

The major in German is designed to help students achieve linguistic, literary, and cultural competence and to foster and develop transferable skills of critical thinking, textual analysis, effective writing and communication, and international, cultural discernment. Training in German Studies includes advanced language courses combined with upper-level seminars on topical areas of literature, film, history, music, and culture. Majors complete the program with strong German-language proficiency, expertise in the analysis of texts and cultural artifacts in their historical and cultural context, the ability to produce texts of various genres in German, and the intellectual background for graduate study in German and many other fields, including business, law, political science, international studies,
and medicine. Majors are strongly encouraged to study or work abroad, if possible.

The German major requires 30 credits or ten courses:

- GERM2001–2002 German Composition and Conversation I and II
- GERM3001–3002 History of German Literature I and II
- Six additional courses in German Studies, at or above the 2000 level, two of which may be in English translation

Students with a minimum 3.3 GPA may apply for the Honors program.

**Transfer Credits**

Courses taken abroad must be conducted in German to count toward the German major. Of the 30 credits or ten courses, a minimum of 12 credits or four upper-level courses (above GERM1051) must be taken within the German Studies Department at Boston College.

Planning and fulfilling the major in German requires the final approval of the Director of the major. Students are encouraged to consult with the Director concerning opportunities for study abroad during their junior year at a German or Austrian university. Students must have at least 27 credits in the major program that are not used to fulfill requirements for another major or minor and must earn at least half of those credits at Boston College. Interested students are asked to contact the Director of the major, Professor Michael Resler, Lyons Hall 201C, resler@bc.edu.

**Minor in German**
The minor in German is for students seriously interested in learning German and in creating ties with the German-speaking world while combining their interest in German with other academic and professional goals. The foremost goal of the program is to foster among students an international focus and the accompanying skills, whatever their major may be. Minors are strongly encouraged to study or work abroad, if possible.

The German minor requires 18 credits or six courses:

- GERM2001–2002 German Conversation and Composition I and II
- GERM2003 Special Topics in German Literature and Culture
- Three additional courses in German Studies, at or above the 2000 level, one of which may be in English translation

Planning and fulfilling the minor in German requires the final approval of the Director of the minor. Students are encouraged to consult with the Director concerning opportunities for study abroad during their junior year at a German or Austrian university. Students must have at least 15 credits in the minor program that are not used to fulfill requirements for another major or minor and must earn at least half of those credits at Boston College. Interested students are asked to contact the Director of the minor, Professor Daniel Bowles, Lyons Hall 201F, 617-552-3740.

**Minor in German Studies**

The German Studies minor promotes the interdisciplinary study of German culture beyond the language.

The German Studies minor requires 18 credits or six courses:

- GERM2242/HIST2270 Germany Divided and Reunited
- Two courses in German Studies at or above the 2000 level
- Three electives or 9 credits from at least two other departments

The three non-German departmental courses may be chosen, in consultation with the Director of the minor, from the relevant offerings of at least two other departments. Such courses should focus upon subjects related to German culture. Students must have at least 15 credits in the minor program that are not used to fulfill requirements for another major or minor or a Core requirement.

Students who are already pursuing a double major will not be accepted to the German Studies minor. Planning and fulfilling the interdisciplinary minor in German Studies requires the final approval of the Director of the minor. Students are encouraged to consult with the Director concerning opportunities for study abroad during their junior year at a German or an Austrian university. Interested students are asked to contact the Director of the minor, Professor Daniel Bowles, Lyons Hall 201F, bowlesd@bc.edu.

**German Business Track**

The business track concentration allows German majors or minors to combine a dual interest in business and German in a program of study that prepares them for an international career.

The thriving German economy makes Central and Eastern Europe a strong market for American products and has enabled German companies to open branches in the United States. The Business Track has been developed in conjunction with the Boston College Carroll School of Management.

The German business track requires 6 credits or two courses, counting simultaneously toward the German major or minor:
• GERM2004 Business German
• GERM2005 Germany in Europe Today
• Students can also apply for the one-credit summer German Studies Internship (GERM5501) at the beginning of the previous fall semester. Contact Professor Ursula Mangoubi in Lyons 201G, mangoubi@bc.edu.

Students are encouraged to spend a year or a semester at the Ingolstadt School of Management affiliated with our partner university, the Catholic University of Eichstätt-Ingolstadt, or at the Wirtschaftsuniversität Wien (Vienna University of Economics and Business).

The Director of the business track is Professor Daniel Bowles, Lyons Hall 201F, bowlesd@bc.edu.

Information for Study Abroad

Students are encouraged to study in a German-speaking country, for a year or a semester, with recommended programs in Eichstätt, Berlin, Heidelberg, and Vienna. It is preferable that students study abroad during their junior year. There are also options for summer study abroad. Students should consult German Studies faculty in addition to the Office of International Programs to learn about the requirements for each specific program.

Prior to study abroad, German majors must complete Intermediate German II (GERM1051) or its equivalent. Non-German majors must fulfill the language proficiency level required by their study abroad program.

Nearly all courses taken abroad in German will be accorded major (or minor) credit; however, of the ten courses (30 credits) needed for the
German major, at least half of those courses (15 credits) must be taken with the German Studies Department at Boston College.

Managed By

University Catalog
Office of Student Services
Lyons Hall 103
The Department of History offers the undergraduate student a variety of courses in American, European, African, Asian, Latin American, and Middle Eastern history. With careful planning and the advice of faculty members, students can develop a sequence of courses that will prepare them for the fields of law, government, and foreign service, as well as careers in various international organizations, journalism, business, or teaching at the elementary, secondary, or college levels.

**Major Requirements**

In addition to the two-semester (6-credit) University Core sequence in modern history (selected from courses numbered HIST1001 through HIST1099), a History major is required to complete at least 30 additional credits in history, including the following: a 2-semester (6-credit) sequence in U.S. History (HIST2401–2402); 3 credits of HIST3300 The Study and Writing of History (selected from courses numbered HIST3301 through HIST3599 and preferably taken during sophomore year); at least 6 credits in non-Western history; and at least 12 credits of upper-division electives (numbered 4001–4962). All students who are not writing a senior honors thesis in History must take three of their upper-division credits in the form of a senior colloquium (HIST5001–5499).
Students planning to major in history are strongly encouraged to take the University History Core in their freshman year. Note that a score of 4 or 5 on the Advanced Placement test in European or World History fulfills the 2-semester (6-credit) University Core requirement in history. Students who score 4 or 5 on the A.P. test in American history have fulfilled the two-semester (6-credit) U.S. History requirement and may substitute 6 credits of U.S. History electives (any level) for the HIST2401–2402 sequence.

Of the 30 required credits for the major, students may take a maximum of 12 credits abroad, no more than 6 of which may be upper-division credits. Likewise, students may earn a maximum of 6 credits for the major through summer school. However, at least 18 credits, including HIST3300 The Study and Writing of History and 6 of the upper-division credits, must be taken at Boston College during the regular academic year.

**Minor Requirements**

The History minor requires six courses worth at least 18 credits. It begins with the two Core courses in history and concludes with two upper-division electives (numbered 4001–4962) worth at least 6 credits. In between, students can choose two other courses (worth at least 6 credits) freely from among the Department’s offerings. Because many Core courses emphasize Europe, students minoring in history are strongly encouraged to take at least one course in non-Western history. Advanced placement credit cannot be used to satisfy minor requirements, but students who have fulfilled the History Core through advanced placement may substitute two electives (worth at least 6 credits) in order to complete the required six courses (and 18 credits).

**Information for First-Year Majors and Non-Majors**
The University Core requirement is a two-semester sequence in history from late medieval times to the present. Every student must take two halves of a sequence: one first half class, which covers c. 1500–1800, and one second half class, which covers 1800 to the present. Although students are encouraged to take both halves in the same sequence, switching to a different sequence at midyear is permitted.

History Core courses examine the complex historical processes that lie behind modern-day transnational relationships, values, and ideas. They introduce students to key historical concepts, methods, and controversies and examine how present-day concerns shape our understandings of the past. Covering several centuries of time, all History Core courses trace the political, social, economic, and cultural changes that created the modern world. As part of the Core Curriculum, these courses seek to broaden students’ intellectual horizons by exposing them to new places, periods, and perspectives. Through the History Core, students will learn how to (1) use primary sources to interpret the past, and (2) explain change over time.

Taught by historians who specialize in distinct areas, eras, and approaches, History Core courses vary in their emphases on different parts of the world. The History Core currently includes courses focused on Asian, Atlantic, European, Latin American, and global experiences. Students should read the descriptions of the department’s Core offerings to find the choice that best suits them.

Detailed information on advanced placement and the Core may be found on the department’s website. Students who would like to apply foreign study courses for Core credit must get permission from the Director of the Core, and they are strongly urged to do so before going abroad. In order for a course taken abroad to fulfill the History Core requirement, it must cover the time periods outlined above (c. 1500–1800 for History Core I, and 1800 to
the present for History Core II) and examine more than one country, surveying historical developments in a global or world-regional framework. Similar guidelines apply to summer classes and courses transferred from a previous institution. At least one of the Core courses must be taken at Boston College.

For further information about the History Core, please visit Core Requirements page.

Information for Study Abroad

Many History majors and minors profit greatly from spending part or all of their junior year abroad. History majors may take as many as four courses (12 credits) abroad for major credit (and a maximum of two courses—6 credits—for upper-division credit), although six history courses (18 credits) beyond the Core, including The Study and Writing of History, must be taken at Boston College during the regular academic year. History minors may take as many as two courses (6 credits) abroad for minor credit (including one upper-division course worth 3 credits).

Students seeking major or minor elective credit need only show that they passed a course offered in a history department. Students seeking upper-division credit must arrange this with the Director of Undergraduate Studies after they complete the course. In making their case for upper-division credit, they should present the course syllabus and the paper(s) written for the course. In spite of the limitations on courses accepted for major credit, students who have gotten a good start on Core and major requirements before leaving for study abroad should have no trouble completing them, even if they spend an entire year abroad. Students should complete the Study and Writing of History requirement before studying abroad.
Students who are contemplating a senior honors thesis and who will be abroad during the normal application process in the spring of their junior year are strongly urged to plan ahead. They should try to establish a thesis topic and to identify a faculty member willing to supervise their work before departing and verify that they will be able to be in e-mail contact with their thesis advisor while abroad. They should be aware that the deadline for submission of applications is April 1 of their junior year. For additional information, they should consult with the director of the History Honors Program early in the semester prior to their departure for study abroad.

For additional information on foreign study for history majors, please visit the Foreign Study page.

For more information on the application of these guidelines to the history minor, please visit Minor in History page.

If you have further questions about your study abroad or the History Honors Program, please contact Professor Arissa Oh, Director of Undergraduate Studies, at 617-552-3799 or by e-mail at arissa.oh@bc.edu.

Managed By

University Catalog
Office of Student Services
Lyons Hall 103
The class of 2021 was the last group of first-year students admitted to the Honors Program.

The Structure of the Honors Program

Junior Year

In the junior year, students take a 2-semester, 3-credit seminar titled the Twentieth Century and the Tradition, drawing on literature, visual art, science, philosophy, religion, political theory, historical events such as the Holocaust, globalization, and the development of digital information technology, in order to examine how the twentieth and early twenty first centuries have absorbed, criticized, or reinterpreted the Western cultural tradition. Thus by considering the interplay between the Western cultural tradition and the significant critical currents of our century such as Marxism, psychoanalysis, comparative anthropology, structuralism and post-structuralism, feminism, and the third-world critique of Eurocentric culture, the junior year course aims to equip Honors students to live thoughtfully and responsibly in contemporary culture. (See below for provisions for those Honors Program students studying abroad as juniors.)
Senior Year

In their final year, students may choose either of two ways to finish the Honors curriculum. They may either write a senior thesis—normally a 6-credit enterprise, spread over two semesters—or take two, advanced seminars.

A thesis may be an extended research or analytic paper written either in the student’s major discipline or in the Honors Program; it may also be a creative project involving performance in an artistic medium. Honors students have written on topics as diverse as personalism in the summas of St. Thomas, grace and freedom in Dostoevsky, the role of Buddhism in the works of Jack Kerouac, the political organization of the European Community, the influence of alcoholic fathers on their sons, superconductivity, and original cancer research; they have produced novels, dramas, operas, and electronic performance pieces.

In the integrative, advanced seminars students re-consider texts they may have studied years earlier such as Dante's *The Divine Comedy* or the novels of Dostoevsky with the aim rising above the specialization of their particular majors, to critically comprehend the relationship between contemporary ways of thinking and the cultural values of the tradition.

Honors Program Completion

Students will receive Honors Program designation in the commencement program and on their academic records if they complete the freshman, sophomore, and junior courses, a senior thesis and/or two of the advanced seminars, and have maintained a minimum 3.4 GPA.

Information for Study Abroad
The Honors Program encourages students to study abroad. Depending on the student's situation, the Honors Program will defer part or all of the junior year Twentieth Century and Tradition sequence to senior year. In certain cases (a full year abroad, and a senior thesis in the offing) the Honors Program will drop the requirement altogether.

University Catalog
Office of Student Services
Lyons Hall 103
Interdisciplinary Programs and Minors (MCAS), Undergraduate Programs - University Catalog

In addition to the areas of major study offered by individual departments, a variety of special programs are available. All of them are designed to provide a coherent grouping of courses drawn from various disciplines and focused around a specific theme. Through such programs, a student can integrate or enrich an academic program through completing a minor or developing an independent major.

Independent Major

Under usual circumstances, students are advised to follow the formal educational programs offered by departments. In rare instances, for students with special interests that cannot be satisfied in a regular major, double major, or a combined major and minor, the Educational Policy Committee will approve an interdisciplinary Independent Major. Students who wish to apply for an Independent Major must normally have achieved a minimum 3.5 GPA. The student must plan, with the aid of a faculty advisor, a program of 36 credits (ordinarily twelve courses), thirty of which must be in upper-division courses. These will extend over no more than three departments and will be selected in accordance with a clearly defined unifying principle. This program should be equal in depth and coherence to a typical departmental major and should include a plan for a final project or
paper that demonstrates the intellectual coherence of the Independent Major and for ongoing assessment of the program by the student and the advisor. Each proposed major should be submitted to the Dean's Office before March 1 of the student's sophomore year. The Dean will then present it to the Educational Policy Committee for approval. An Independent Major will ordinarily be the student's only major.

**Interdisciplinary Minors**

An interdisciplinary minor in the Morrissey College of Arts and Sciences must consist of at least 18 credits (typically six, 3-credit courses) and must include either a required introductory course or a concluding seminar or project. (Note: some programs require both.) The minor should aim for a coherent form appropriate to the subject matter and offer courses that give students a definite sense of movement—from a beginning to a middle and an end, from introductory to advanced levels, or from general to specialized treatments.

Students must select at least three of the courses from three different Morrissey College of Arts and Sciences departments. With the approval of the program, students may use one Core course or one course from their major toward the minor (not both). In addition, at least 15 credits used for the minor cannot be used toward any other major or minor. For specific program requirements see the individual program descriptions below. Students carrying a double major are advised not to minor.

Each minor will be administered by a coordinating committee, consisting of a Director appointed by the Dean and at least two additional members who represent departments included in the minor. One important function of this committee is the advising of students enrolled in the minor.
African and African Diaspora Studies

The African and African Diaspora Studies Program (AADS) considers the history, culture, and politics of Africans on the continent and African-descended peoples in the U.S., the Caribbean, South America, Europe, Asia, and the Middle East. Covering vast historical periods and geographies, African and African Diaspora Studies acquaints students with the multiplicity and diversity of the African Diaspora and the world in which we all live. Using interdisciplinary and comparative approaches, the program draws on a broad range of methodologies in English, history, sociology, philosophy, theology, communication, and theatre.

Central Themes

To get the most out of an AADS minor, students are encouraged to organize their courses around the central themes of globalization, intersectionality, or social justice.

**Globalization:** Globalization is as old as the trade in African slaves. Patterns of travel, labor, trade, commerce, and resource extraction have shaped the experiences of African-descended peoples and the peoples they have encountered. Selected courses explore the connections between various geographic regions, cultural traditions, and historical developments that have defined globalization.

**Intersectionality:** Race is defined by various identity categories and social locations such as gender, class, color, ethnicity, region, nation, age, sexuality, political ideals, and spiritual beliefs. Intersectionality reminds us that race is not a monolithic or homogenous category of human experience.
Social Justice: The history of African and African-descended peoples has been defined by the struggle for social justice: the fight for human equality, the fight against racism, sexism, homophobia, and class exploitation. In resisting enslavement, segregation, patriarchy, imperialism, and colonialism, and by striving to overturn discrimination in housing, healthcare, employment, religious institutions, and families, African and African Diasporic peoples have undertaken drives for social emancipation that have expanded the meaning of democratic ideals.

Minor Requirements—18 credits (or more)

Required Courses:

- AADS1110 Introduction to African Diaspora Studies—3 credits
- AADS6600 Senior Seminar (or the equivalent)—4 credits
- Four additional courses (clustered around a theme)—we recommend that minors take at least two courses of 3 or 4 credits before taking AADS6600 Senior Seminar

AADS1110 Introduction to African Diaspora Studies familiarizes students with the major issues and methodologies involved in studying the African Diaspora. AADS6600 Senior Seminar is an intensive reading and writing course designed to assist students in synthesizing their minor experience.

To affirm and specify our minors’ selected Central Theme, we suggest that their four additional courses reflect a particular thematic focus. Some possible themes are:

- Cities and Urban Life
- Economics of Inequality
- Gender and Sexuality
- Globalization and Development
- Intellectual and Philosophical Traditions
- Migration and Immigration
- Music and the Performing Arts
- Political Systems and Grassroots Protest
- Popular Culture and New Media
- Spirituality and Social Protest

Though suggested, these themes are not required; additionally, students may devise their own thematic focus, in consultation with the AADS Director or their AADS Advisor.

Contact the African and African Diaspora Studies Department at 617-552-3238 or visit their website at www.bc.edu/aads.

Core Offerings

The Program offers several courses that satisfy the Core requirement in Cultural Diversity and one course that satisfies the requirement in Social Sciences.

American Studies

American Studies is an interdisciplinary program that brings together faculty from several departments to teach a wide range of approaches to American culture past and present. Thematic emphases include race and ethnicity; gender, sexuality, and culture; the cultures of cities; subcultures and society; popular culture and media; law, politics, and culture; and America and the world.
Participating faculty come from English, history, art history, sociology, African and African diaspora studies, and psychology, among other departments.

Courses used for fulfilling the minor must come from outside the student’s major and from at least two different departments. Eighteen credits are required for the minor. Nine of these credits must be clustered in a common area of concentration chosen by the student in consultation with the director of American Studies. During senior year each student must take the elective designated as the American Studies senior seminar. Also, ENGL2277 Introduction to American Studies is required for all students registering for the minor.

For further information on the American Studies minor, contact Professor Adam Lewis in the English Department, lewisaj@bc.edu, 617-552-3703, or visit the American Studies website at www.bc.edu/amstudies.

Ancient Civilization

The interdisciplinary minor in Ancient Civilization introduces students to the history, literature, art, philosophy, and culture of ancient Greece and Rome. Students explore the world of the Greeks and Romans by reading primary texts in English translation and by studying their art and archaeological remains. Studying the Latin or Greek languages is not required. The minor consists of six courses (18 credits or more), two required and four electives:

- 3 credits in Greek History or Civilization and 3 credits in Roman History or Civilization, drawn from the following list. These courses, offered every other year, serve as a general overview of the field and an introduction to the minor.
  CLAS2205/HIST2201 Greek History OR CLAS1186 Greek Civilization
CLAS2206/HIST2205 Roman History OR CLAS2262/ARTH2262 The City of Rome

- 12 other credits, chosen after consultation with the director, from available offerings in Classics and other departments in the areas of literature, philosophy, religion, art and archaeology, history, and linguistics; however, courses in the Greek and Latin languages do not normally count for the minor.

A list of the courses that are available each semester from the various departments and that can count for the minor will be published at registration time. Interested students should contact Professor Mark Thatcher of the Classical Studies Department, Stokes Hall 245S, 617-552-1807, or visit the Classical Studies website at www.bc.edu/classics.

**Asian Studies**

The [Asian Studies](#) program offers students a rich curriculum in the arts and literatures, history, philosophy, religion, and contemporary affairs of East Asia, South Asia, and Central Asia. It rests on three pillars:

- an emphasis on regional and transnational relations
- the integration of different disciplinary approaches
- language study

Students take a minimum of 18 credits to fulfill the minor, 15 of which may not simultaneously be counted towards the Core or other major/minor requirements. The minor begins with an introductory survey course on *Asia as a world region* from the vantage point of a particular discipline (such as art, literature, history, or philosophy) and concludes with a senior capstone course that approaches a particular topic relevant to the study of Asia from an *interdisciplinary perspective*. Along the way, students have ample
opportunity to hone their interdisciplinary skills and global outlook through a wide range of lower and upper level electives involving different departments. Although no more than an intermediate proficiency in an Asian language is required (the same as the University Core requirement), further language study is encouraged. All minors must meet with the Director when they declare their minor, typically in their sophomore year. They must also meet with the Director prior to choosing the senior capstone course.

Summary of minimum requirements (18 credits):

1. Introductory course on Asia as a world region (3 credits)
2. Intermediate proficiency in an Asian language (3 credits)
3. Two to four electives (6–12 credits) from the list provided
4. Senior capstone course (3 credits)

Students are invited to take full advantage of the Distinguished Lectures Series in Asian Studies as well as other Asian Studies-sponsored campus events and are encouraged to study abroad in Asia. Our faculty provide many different resources related to advising, scholarships, and internship opportunities.

For further information, consult the Asian Studies website, contact the director at asian.studies@bc.edu, and follow us on Facebook.

Catholic Studies

The interdisciplinary minor in Catholic Studies at Boston College seeks to develop an intellectual and academic approach to Catholicism which does justice to the full human reality, integrity, and pluralism within this major world religious tradition. Since Catholicism comprises more than a religious
institution, a set of moral or ritual practices, a body of doctrines, or individual and communal experiences, no one discipline or several disciplines functioning separately can properly understand it from the vantage point of its lived experience as a culture.

The Catholic Studies minor provides students with the opportunity to explore the Catholic intellectual tradition. The minor emphasizes the richness of Catholic philosophical and theological systems, artistic and cultural expressions, historical evolution (including internal and external moments of contestation), and approaches to social analysis, economic systems, and the natural sciences, in order to appreciate the vision and values which emerge from this tradition.

Requirements:

Six approved 3-credit courses or a total of 18 credit hours:

- 18 credit hours selected from the three Catholic Studies clusters: The Catholic Imagination, Catholicism in Time and Space, and Catholic Social Thought.
- Upon petition, electives and other courses may be counted for the minor if the major research paper course is completed on a Catholic topic.
- In many cases, electives and other required courses can be petitioned for inclusion in the Catholic Studies Interdisciplinary minor based on the Catholic content of the course.
- Students are strongly encouraged to take THEO1401 Engaging Catholicism, which will count towards their Christian Theology (CT) credit in Core theology. THEO1401 is a 3-credit course and will count for Core theology credit as well as the “basis course” for the Interdisciplinary Minor in Catholic Studies.
Depending upon enrollment numbers in the minor, a concluding 3-credit research seminar will be offered which will focus on texts dealing either with the enculturation of Catholicism in different geographical/regional locations (e.g., Asia, Latin America, Africa, Oceania, Irish-American, Italian-American, Latino/a, Black, and Amerindian), or a Catholic theme that is approached from several disciplinary perspectives and across historical periods (e.g., Catholic practices of asceticism in art, music, literature, and theology). This seminar will offer the student the opportunity to research, write, and present a senior project that thematically integrates what has been learned in the minor. The seminar is facilitated by a member of the Catholic Studies advisory committee. It is envisioned that the seminar presentations will become an occasion for creating intellectual community among Catholic Studies minors and faculty advisors.

Further information is available from the Co-Director, Professor Charles R. Gallagher, S.J., Department of History, Stokes Hall S353, 617-552-0726, or the Catholic Studies website.

East European Studies

The minor in East European Studies encompasses faculty and courses from across the University and spans the entire region east and southeast of western Europe, from central and eastern Europe to southeastern Europe, Russia, Ukraine, Belarus, the Caucasus, and Siberia. The minor in East European Studies concentrates on the multilingual, multicultural, and multi-religious legacy of Slavic and Eastern European nations and countries. Students who complete the minor will work toward proficiency in a Slavic and/or East European language related to the region and attain valuable knowledge, experience, and professional skills. The Program prepares students for careers in diplomacy, journalism, law, military,
business, government, and social service, as well as graduate, academic, or professional study.

Further information is available from the Director, Professor Maxim D. Shrayer, Slavic and Eastern Languages Department, Lyons 210, (shrayerm@bc.edu). Students may also consult the Program’s website at www.bc.edu/ees.

Environmental Studies

The Environmental Studies minor uses an interdisciplinary approach to understand the science and policy of the Earth’s environmental challenges and is designed to complement any undergraduate major.

The goals of the Environmental Studies minor are to provide undergraduate students with: (1) an awareness of the scientific, political, and cultural aspects of the world’s environmental problems and potential paths toward sustainable solutions; (2) a background for environmentally related careers in business, education, law, policy, or research; and (3) preparation for graduate study.

The ENVS minor requirements include 4 credits of laboratory Environmental Systems science courses (EESC2201–EESC2208), a policy foundation course chosen from a short list of options, a senior seminar (ENVS4943), and at least 10 credits of electives offered from departments across the university. For further information or to register for this program, contact ENVS Program Director Tara Pisani Gareau, see the program website at www.bc.edu/envstudies, or stop by the program office in Devlin 213.

Faith, Peace, and Justice
The Faith, Peace, and Justice minor offers students the opportunity to explore, in an interdisciplinary manner, how their own serious questions about faith, peace, and justice are related to concrete work for peace and justice in our world. The goals of the Faith, Peace, and Justice Program are to (1) help undergraduate students acquire skills in the social scientific analysis of challenges for justice and peace, (2) gain a solid grasp of the ethical and justice principles that pertain to these issues, (3) become agents of social change that know how to formulate public policy or transform unjust structures in order to solve these problems, and (4) implement creative methods for conflict resolution appropriate for their particular issues.

To achieve these goals, each student is required to take the introductory course for the minor, THEO2160/PHIL1160 The Challenge of Justice and, in the second semester of their senior year, UNAS4942 Faith, Peace, and Justice Senior Seminar. In addition, the student selects or develops an area of concentration focused on a particular concern for justice and peace. With the advice and approval of the Faith, Peace, and Justice Director, the student takes a cluster of four elective courses, from at least three different academic disciplines, that addresses the area of concentration. These four elective courses serve as the foundation for the student's writing project in the FPJ Senior Seminar. In total, eighteen credit hours are required for the minor.

For further information or to register for the Faith, Peace, and Justice minor, see the Director, Professor Joshua R. Snyder, Ph.D., Stokes 453N or visit the program website at www.bc.edu/fpj.

German Studies
The interdisciplinary minor in German Studies offers students an introduction to the language and cultures of Germany, Austria, and Switzerland. The foremost goal of the program is to provide participants with an understanding of the history of German-speaking civilization and to acquaint them with Germany's place in today's world.

The interdisciplinary minor in German Studies consists of six upper division courses—GERM 2242 Germany Divided and Reunited (3 credits), two additional courses from the Department of German Studies (6 credits), and three courses from at least two other departments (9 credits). All students minoring in German Studies are strongly encouraged to spend one semester abroad.

Interested students should contact the Director of the Minor, Assistant Professor Daniel Bowles, Department of German Studies, Lyons 201F, 617-552-1594, bowlesd@bc.edu, or consult the German Studies website.

**Global Public Health and the Common Good**

The Undergraduate Minor in Global Public Health and the Common Good at the Schiller Institute for Integrated Science and Society at Boston College provides opportunities for community service, reflection and experiential learning in the United States and abroad. This 6-course minor introduces students from a broad range of backgrounds to key concepts in Global Public Health.

**Minor Objective**

Graduates of the undergraduate minor in Global Public Health will be expected to have acquired a working knowledge of:
• The theory, history, and key issues in Global Public Health;
• Epidemiology: the study of the distribution and determinants of health and disease in populations—the foundational science of public health;
• The social, economic, and environmental determinants of health and disease;
• The contributions of public health to the stability and well-being of modern societies; and
• The moral and ethical foundations of Global Public Health.

**Minor Requirements**

The Global Public Health and the Common Good minor consists of 3 required core courses and a selection of 3 elective courses.

**Core Courses**

• Fundamentals of Global Public Health (NURS1210) – Offered Fall/Spring
• Epidemiology (Course Number TBA) – Offered Fall/Spring
• **One** of the following:
  ○ Ethics in Global Health (Course Number TBA)
  ○ Global Health Law (Course Number TBA)

**Electives**

In addition to the 3 required courses students are also expected to select 3 elective courses from the list below. PLEASE NOTE: Additional electives may be considered subject to the approval of the program director and Associate Deans.

• Two Elective Courses from List A
• One Elective Course from List B
List A

**Connell School of Nursing**

- Population Health Nursing Theory (NURS4260, CSON students only)
- Population Health Practice in the Community (NURS4261, CSON students only)
- Global Healthcare (NURS5350) (Swiss exchange program course)
- Ecuador: Global Health Perspectives (NURS5345)

**Lynch School of Education**

- Psychological Responses to Humanitarian Crises
- Social Issues and Social Policy
- Community Change: Prevention and Promotion
- Building Sustainable Communities
- Psychological Disorders
- Health Psychology

**Morrissey College of Arts and Sciences**

**Biology**

- Sustaining the Biosphere (BIOL1440)
- Biostatistics (BIOL2300)
- Vaccine Development and Public Health (BIOL515001)

**Communications**

- Health Communication (COMM4465)
Earth and Environmental Sciences

- Climate Change and Society (EESC1174)
- Environmental Hydrology (EESC2297)
- Sustainable Agriculture (ENVS3311)
- Environment and Public Health (ENVS3345)

Economics

- Health Economics (ECON3385)
- Applied Health Economics (ECON3390)
- Public Policy and an Aging Society
- Development Economics (ECON2273)
- Economic Development: The Experience of El Salvador (ECON2275)
- Environmental Economics and Policy (ECON2277)
- Environmental Economics (ECON2278)
- Economics of Immigration (ECON3315)
- Economics of Inequality (ECON3317)
- Micro Public Policy Issues (ECON3363)
- Economics of Energy and Development (ECON3391)
- Impact Evaluation in Developing Counties (ECON3373)
- Development Economics and Policy (ECON3374)

Sociology

- Introductory Sociology for Health Care Professionals (SOCY1002)
- Aging and Society (SOCY1096)
- Death and Dying (SOCY1097)
- Sociology of Health and Illness (SOCY1078)
- States, Markets, and Bodies (SOCY1073)
- Sexuality and Society* (SOCY3373)
Theology

- Bioethics and Social Justice (THEO3222)
- Christian Perspectives on Bioethics (THEO)
- HIV/AIDS and Ethics (THEO5498)
- Bioethics and the Law Seminar (LAWS9326)
- HIV/AIDS and Ethics (THEO5498)
- Catholic Healthcare: History, Contexts, Values, and Principles (TMCE8159)
- Global Health and Theological Ethics (TMCE8518)
- Human Genetics and Biotechnologies: Challenges for Science and Religion (TMCE8072)
- Just Sustainability (TMCE7128)
- Theological Bioethics: From the Basics to the Future (TMCE7052)

List B

- Contemporary Issues in Public Health (NURS3210)
- Public Health Practice in the Community (APSY4050)
- An approved field practicum at a local site in the Greater Boston area
- Case Studies in Epidemiology (BIOL2320)

CSON students only must take the following two courses, which will count as electives:

- Population Health Nursing Theory (NURS4260)
- Population Health Practice in the Community (NURS4261).
- One elective from List A or B above

Additional Notes
*Students enrolled in the Global Public Health minor can use no more than one course to satisfy the requirements of both the minor and the University core. The only exception is for CSON students, for whom two population health nursing courses (NURS4260 and 4261) will count as electives.

*Students can use no more than one course to satisfy the requirements of both the Global Public Health minor and their major.

**International Studies**

The International Studies Program offers a flexible and rigorous interdisciplinary undergraduate major and minor in the Morrissey College of Arts and Sciences that develops keen analytical skills and ethical reasoning amidst complex global dynamics.

For more information on the International Studies program, visit the following:

- [International Studies catalog web page](#)
- [International Studies website](#)

**Irish Studies**

Founded in 1978, the Irish Studies Program provides an interdisciplinary approach to the study of Irish culture and society. Our faculty includes internationally recognized scholars whose influential publications and professional commitment distinguish them as leaders in the field of Irish Studies. Undergraduate and graduate courses alike address social and economic history, literature, art, film, music, and the Irish language. The Irish Studies program also offers extensive public programs including a comprehensive lecture, symposia, and renowned music series. Faculty
Students must successfully complete 18 credits in approved Irish Studies courses, which must be drawn from more than one discipline and designated as appropriate by the Irish Studies program advisor. Only one course may be “double counted” toward both a major and minor.

Please contact Irish Studies at 617-552-3938 to arrange curriculum planning assistance. A listing of Irish Studies-approved courses is posted on the Irish Studies Courses web page.

Students pursuing the minor are encouraged to take advantage of partnerships that the Irish Studies program and the Center for International Programs have forged with the National Universities of Ireland at Galway and Maynooth, University College Cork, University College Dublin, Trinity College Dublin, the University of Ulster, and Queen’s University Belfast. It is important to note that only two courses taken abroad in any given semester may be applied to the Irish Studies minor.

Contact: Professor James H Murphy, Director of Irish Studies, james.h.murphy@bc.edu.

Islamic Civilization and Societies

This program emphasizes the interdisciplinary study of the Middle East and Muslim world from the rise of Islam in the seventh century to the present. Through a sequence of courses, it offers preparation in Middle Eastern and Islamic Studies useful to careers in journalism, diplomacy, business, and social service as well as graduate programs of academic and professional
training. Courses cover the social, economic, political, cultural, and religious heritage as well as contemporary developments in their regional and world settings.

Students interested in the program should contact Professor Kathy Bailey, Political Science Department, McGuinn 529, 617-552-4170 or Kathleen.Bailey@bc.edu, or Professor Ali Banuazizi, Political Science Department, McGuinn 513, 617-552-4124, or visit www.bc.edu/ics.

**Jewish Studies**

The Jewish Studies Program seeks to examine the multiple dimensions and complexities of Jewish civilization throughout its broad chronological and geographical range. In so doing, the program contributes to Boston College's efforts to internationalize and enrich its curriculum by creating a space for reflection on an ethnically and religiously diverse campus. Far from being a parochial field, Jewish Studies is a well-established academic discipline, drawing upon almost every area in the humanities and social sciences in order to understand the myriad expressions of Jewish civilization over the course of thousands of years and in every corner of the globe.

The minor in Jewish Studies consists of a total of six 3-credit courses, including one foundation course, four electives selected from at least three departments within the Morrissey College of Arts and Sciences, and a concluding seminar/Capstone course.

Although the minor in Jewish Studies has no specific language requirement, students are encouraged to take as many courses as possible in biblical and modern Hebrew; however, a maximum of 6 credits in Hebrew language may be applied to the minor. Students may participate in Boston College's
study-abroad program at The Hebrew University in Jerusalem. They may also avail themselves of summer programs in Yiddish and Judeo-Spanish.

For additional information or to sign up for the minor in Jewish Studies, contact the program co-director, Professor Donald Fishman, Department of Communications, St. Mary’s Hall 454, fishmand@bc.edu, or contact the other program co-director, Professor John Michalczyk, Devlin Hall 420, 617-552-3895, john.michalczyk@bc.edu. The Jewish Studies Program Office is located in St. Mary’s Hall 454.

**Journalism**

The Journalism minor at Boston College is an interdisciplinary program that brings the liberal arts into direct, ongoing conversation with the wider contemporary world. Open to undergraduates from all majors and schools, the program is designed expressly as a minor in a liberal-arts setting, providing craft skills and a critical understanding of the history and traditions of journalism.

The six-course minor includes the following:

- Introduction to Journalism, to be taken as early as possible during the course of study;
- Four electives, drawn from a mix of “Craft” courses (i.e., investigative journalism, feature writing, podcasting) and “Critical” courses (i.e., media criticism, history of the press, literary journalism); and
- the Senior Seminar, to be taken in the senior year.

Course offerings reflect our shifting technological and media climate while continuing to develop bedrock reportorial and writing skills: identifying and acquiring reliable information; making analytical, ethical, and technical
choices about how best to turn that information into news; and presenting
the news in useful, compelling ways. As the program continues to develop
the possibilities of its Boston location, forging fresh links between the
Boston College campus and the city’s international public culture, students
will also have more and more opportunities to work with the city’s wide array
of talented professional journalists, venture out to do original reporting, and
intern at a variety of media outlets. Interested students should contact
program director, Associate Professor Angela Ards, Department of English,
Stokes S443, 617-552-3712, angela.ards@bc.edu.

Latin American Studies

The Latin American Studies program encompasses faculty and courses
from across the University. With academic advisement from participating
faculty, students can shape the Latin American Studies minor to fit usefully
with their academic major and with the ambitions they hope to pursue after
graduation. Students may earn a minor in Latin American Studies by
completing 18 credits (approximately six courses) from at least three
different academic departments, selected from courses approved for the
program. Proficiency in Spanish or Portuguese that is equivalent to
successful completion of a third-year college language course is required
for the minor (but this course is not counted as one of the above six). With
approval from the Director, two courses with focus on Latin America taken
in a study abroad program can count toward the minor.

Students seeking to earn a minor in Latin American Studies must submit a
proposed plan of study to the Director of the program, usually no later than
the second semester of the sophomore year. The Director, in consultation
with the student and other faculty in the program, will review the proposal,
and notify the student of his/her acceptance into the minor.
For further information contact the Director, Professor Ernesto Livon-Grosman, Department of Romance Languages and Literatures, Lyons 304D, 617-552-2680, or visit the Latin American Studies website.

Managing for Social Impact and the Public Good

The Managing for Social Impact and the Public Good minor is sponsored by both the Carroll School of Management (CSOM) and the Morrissey College of Arts and Sciences (MCAS). It draws upon faculty and courses in both schools and is open to all undergraduates. It is the first interdisciplinary minor jointly sponsored by different schools within the university.

In an interconnected world, we are all stakeholders in how business is conducted. Billions of human lives and our planet’s viability depend on whether leaders in the private and public sectors are guided by the principles of sustainability and social justice. The interdisciplinary minor integrates ethical, social, economic, environmental, and management perspectives in analyzing the role of business in society and the challenges of managing private and public institutions for the good of society, both domestic and global.

The minor is an 18-credit program with two required and four elective courses. The required courses are: Managing for Social Impact (BSLW/ISYS3345 in CSOM), the introductory course to the program, and Leading for Social Impact (BSLW6001 in CSOM) the cumulative seminar course taken in spring of senior year.

Students will select their remaining four elective courses (for a minimum of 12 credits) from approved electives in MCAS, CSOM, and the Lynch School of Education and Human Development. Elective courses are grouped into the following Focus Areas:
Digital Economy, Social innovation, and Citizenship

Today’s global digital economy, in which people, companies, markets, and even machines are constantly connected and communicating, enables innovative social solutions as well as opportunities for rapid growth and expansion of services. Such a setting also presents complex challenges. Expectations about long-term employment, economic security, and personal privacy are shifting with the rise of billion-dollar global firms based on freelance jobs, global social networks, digital media, and data mining. The rights and responsibilities of citizenship, both personal and corporate, are open to debate and radical revision, as are the form of the corporation and the appropriate roles of the public and private sectors in addressing urgent social issues. This focus area prompts students to consider the social impacts of the digital economy on citizenship, equality, personal values, work, privacy, and public policy.

Economic Development, Equality, and Enterprise

Citizens of wealthier nations and communities, as well as managers of multinational corporations and local enterprise, need to examine the degree to which their well-being and profitability may rely on the exploitation of natural resources and fellow human beings. Such judgments are difficult without the skills of ethical reflection, social/political/historical/economic analysis combined with research, discussion, and evaluation. This focus area challenges students to move beyond their taken-for-granted assumptions common to life in an economically developed society and to consider models of economic development and enterprise management that provide not only greater material well-being but also more equity and empowerment for individuals and groups in domestic and international settings who are disadvantaged at present.
Environmental and Economic Sustainability

With more than 13,000 signatories committed to the principles of a sustainable and inclusive global economy, the UN Global Compact is the world’s largest corporate sustainability initiative. Its mission recognizes the significant challenges facing nations, corporations, and communities in the twenty-first century. It is vital that culturally and economically diverse populations come to terms with the pressing need to organize environmentally sustainable economies at the local community level as well as for the benefit of the entire planet. Sustainable enterprise and economic development require managers in the private and public sector to balance the needs of their diverse stakeholders in an ethically informed manner. This focus area will enable students to analyze the difficult questions of social, ethical, and environmental sustainability and development from multiple disciplines in the sciences, humanities, social sciences, and management.

Medical Humanities, Health, and Culture

In the Medical Humanities, Health, and Culture minor, students explore health and health care practices through multiple disciplines, including literature, theology, history, and philosophy, as well as natural and social sciences. From each vantage, humanistic and cultural approaches to health and the body are emphasized. The minor, interdisciplinary in its approach, draws on Boston College's commitment to social justice, ethics, and care for the whole person. This is a useful program for students interested in careers in medicine, health care policy or law, psychology, public or global health, social work, patient advocacy, or health journalism. It is also helpful for students interested in exploring historical, narrative, and cultural contexts for current (and at times competing) ideas about illness, the body, and representation.
The minor is comprised of 18 credits. Courses (not necessarily in sequence) include a **required Introductory course** (ENGL2212), **four electives** from a designated list of approved courses, and a **final advanced elective**, normally taken in the junior or senior year. In addition, minors will be encouraged to take part in reading groups, film series, conferences, and relevant local events.

Students choose electives from at least three different departments. The following thematic clusters will help students to plan a path through the minor:

- Global/Public Health
- Values and Ethics
- Mind and Body
- Health Care Delivery
- Medical narrative, writing and representation

Students interested in learning more or in registering for the minor should contact the Director, Amy Boesky, in Stokes 437 South or e-mail boesky@bc.edu to set up an appointment.

**Psychoanalytic Studies**

The Minor in Psychoanalytic Studies offers the opportunity to obtain a broad understanding of one of the major cultural and intellectual trends of the twentieth century. Minors will gain:

- a basic understanding of the scope and development of psychoanalytic theory—its bearing on the study of art, religion, politics, morality, and society;
knowledge of the historical context of Freud's “discovery” of the unconscious;
first-hand knowledge of a broad range of Freudian texts;
familiarity with major developments in the field of psychoanalysis since Freud's time;
an opportunity to investigate the impact of psychoanalysis on contemporary culture, to assess the degree to which our “therapeutic culture” reflects and/or diverges from Freud's own vision of psychoanalysis and its contributions;
a unique opportunity to view a theory of interpretation in its origins, development, and applications in literature, visual art, social criticism, or individual psychology.

The minor consists of six 3-credit courses, representing a minimum of three departments within the Morrissey College of Arts and Sciences. PHIL4429 Freud and Philosophy is a required course for the minor; it may be taken at any point during the student’s undergraduate program.

For further information on the minor, consult the Director, Professor Vanessa Rumble, Philosophy Department, rumble@bc.edu, or visit the Psychoanalytic Studies website.

Women's and Gender Studies

The Women’s and Gender Studies Program is an interdisciplinary forum for the study of women’s past and present positions in American society and across a diversity of nation-state, international, and global contexts. Drawing from a broad range of theoretical frameworks and empirical scholarship, Women's and Gender Studies analyzes the intersection of gender with differential identity factors such as race, class, religion, culture, and sexuality. Women’s and Gender Studies sheds light on the construction
and maintenance of gender ideologies in different environments and locations and considers gender relations a primary factor in our understanding of women’s and men’s statuses and roles. Multiple perspectives and lenses—literary, historical, sociological, psychological, political, activist, popular culturist—are applied to the study of women’s lived realities, representations, histories, oppressions, coalitions, and movements.

The Women’s and Gender Studies Program offers an interdisciplinary minor that consists of two required courses, Introduction to Feminisms ENGL2125/HIST2502/SOCY2225/COMM2225 and Advanced Topics in Women’s Studies SOCY5593 or COMM4941, plus four additional elective courses, drawn from a broad selection of courses across disciplines.

The following guidelines must be followed:

**Guidelines**

- No more than two electives (6 credits) can be courses within the same department.
  - *Note:* Many courses that count for the minor are cross-listed with other departments. To avoid having to select an alternative course, you can select the department from which you wish to register the course. For example, if you have three additional courses from the Sociology department, one may be cross-referenced with the Communications department; therefore, you would register for it as a COMM course rather than an SOCY course.

- **Only one course can "double count" toward the WGS minor and another requirement** (ex: Core, major, or another minor). Five of the six courses, or 15 out of 18 credits, must only count toward the WGS minor. The Women’s and Gender Studies program does not guarantee
that one of our courses will satisfy any major/minor requirements in other departments. You are responsible for knowing whether or not your respective department will accept a WGS elective for major credit. Please contact gender@bc.edu if you have any questions or concerns.

For more information on the Women’s and Gender Studies Program, visit www.bc.edu/ws or consult the Director of the minor, Professor Sharlene Hesse-Biber, Sociology Department, 617-552-4139, e-mail: hesse@bc.edu.

Office of Student Services
Lyons Hall 103
The International Studies Program offers a flexible and rigorous interdisciplinary undergraduate major and minor in the Morrissey College of Arts and Sciences that develops keen analytical skills and ethical reasoning amidst complex global dynamics. Our faculty is drawn from many departments across the Morrissey College of Arts and Sciences. Students in our major take seven core courses and six courses in one of four concentrations and complete a study abroad program, a rigorous foreign language requirement, and a senior research project. Students in the IS minor complete six courses in one of four concentrations.

** Please note: Details on the IS Program’s curricular requirements and policies are posted on the International Studies website; please check there for the most accurate and up-to-date information.

Applying to Be an International Studies Major

Students are accepted into the International Studies major only through an online application process. Applications are due by February 1 of freshman year. Each year approximately 105 students are accepted into the major. Visit the International Studies website for more information about the process.
Language Requirement

All students completing the IS major, regardless of school, must demonstrate advanced proficiency in one modern foreign language or intermediate proficiency in two modern foreign languages. All students completing the IS minor must demonstrate intermediate proficiency in a modern foreign language. Visit the International Studies website for more about how to meet these requirements.

Major Requirements

The International Studies major requires at least 14 courses, totaling 44 credits. This includes seven classes (23 credits) in the IS core, six classes (18 credits) in one of four concentrations, and a senior seminar (3 credits) or thesis (6 credits). At least 27 of these credits must be applied exclusively to the IS major and cannot fulfill requirements for another major or minor. Courses to meet the language requirements (noted above) are not included, although they confer university credit and meet the university's language requirements. Visit the International Studies website for complete details.

The four concentrations available to IS majors and minors are:

- Cooperation and Conflict
- Ethics and Social Justice
- Political Economy and Development Studies
- Global Cultures

Minor Requirements

The International Studies minor requires 6 courses, totaling 18 credits. Students select one of four concentrations (Cooperation and Conflict; Ethics
and Social Justice; Political Economy and Development Studies; or Global Cultures) in which they take two foundation courses and four electives, offered from at least three different academic departments. Courses to meet the language requirements (noted above) are not included, although they confer university credit and meet the university's language requirements. Visit the International Studies website for complete details.

Information for First Year Students

The responses you give on your IS major application are the most important factor we use to admit students into the major, but grades and courses taken your first semester play a role as well. To prepare for your application, we encourage students to read about the IS Program online and talk with current IS majors; you might consider starting with our Peer Advisors or with members of the new International Studies Student Association. We also encourage freshmen to enroll in one or more classes that take up international issues and/or are taught by an IS faculty member. Your application will ask you to list a faculty member who can give you a reference, so we encourage you to get to know a faculty member, rather than simply list the professor who gave you the best grade of the semester.

There are no specific courses you need to have taken to apply for the IS major, but there are some introductory courses you will need to take to complete it that also count for the University Core requirements (e.g., Principles of Microeconomics and Principles of Macroeconomics). A comparative politics course in the political science department could be a useful way to test the waters. But we encourage freshmen to take the interdisciplinary Core Renewal courses or others that meet University’s Core requirements, even if they don’t count for IS major requirements. The IS major is just one part of your university experience, and we understand that you won’t necessarily focus on that your first semester.
Information for Study Abroad

IS majors are expected to study abroad for a semester, but are not required to do so. Nearly 90% of our majors study abroad for a summer, semester, or year. Those who do not (for economic, personal, or athletic reasons) can take advantage of other opportunities to engage with international students, use their language skills, and meet people and groups from around the world via video links. IS majors can apply up to 8 credits to their IS major if abroad for one semester and up to 12 credits if abroad for two semesters. IS minors can apply a maximum of 8 credits toward their International Studies minor.

Lyons Hall 103
The interdisciplinary major in Islamic Civilization and Societies encompasses faculty and courses from across the university. The program prepares students for careers in diplomacy, journalism, business, government, social service, as well as graduate academic or professional study. Students who complete the major will attain proficiency in Arabic or another language related to the region, along with valuable skills and broader horizons that only an interdisciplinary major can provide.

**Major Requirements**

The major consists of ten required courses (30 credits) plus language proficiency (four semesters of a relevant language or native speaking ability).

**Islamic Civilization and Societies Core: One Course**

Integrative and multidisciplinary, this course is designed as an introduction to the field. It explores rich culture produced in the regions where Islam was the predominant religion during the past 1,400 years. The course is offered in the fall semester, is open to non-majors, and fulfills the Cultural Diversity Core requirement.
Disciplinary Base: Four Courses

Choose a Disciplinary Base in History, Political Science, Theology, Art, Art History, and Film, or Near Eastern Languages and Literatures. Take all required departmental foundation courses and two additional courses in your primary department. Visit the department website at [www.bc.edu/ics](http://www.bc.edu/ics) for the list of approved courses.

Departmental Foundation Courses: Two Courses

- Political Science: POLI1041/1042 Fundamentals of Politics I and II
- Art, Art History, and Film: ARTH1101/1102 Art from Prehistoric Times to High Middle Ages/Art: Renaissance to Modern Times
- History: Two courses from the HIST1001–1094 sequence: HIST1059 Islam and Global Modernities preferred
- Theology: Any of the two-semester University Core requirements: THEO1161–THEO1162 Religious Quest I&II preferred
- Near Eastern Languages and Literatures: Any two of the following: NELC2061 Language and Identity in the Middle East, NELC2062 States and Minorities in the Middle East, NELC2161 Modern Middle Eastern and Arabic Literature, NELC2063 Near Eastern Civilization

Base Discipline Electives: Two Courses

*Political Science:*

- POLI2363 Muslims in U.S. Society and Politics
- POLI2405 Comparative Politics of the Middle East
- POLI2414 Politics and Society in Central Eurasia
- POLI3444 Intellectuals and Politics in the Middle East
- POLI2502 U.S.-Iran Relations since World War II
• POLI3527 Terrorism and Political Violence
• POLI2528 International Relations of The Middle East
• POLI2615 Islam and Liberal Democracy
• POLI2638 Islamic Political Philosophy
• POLI7700 Muslims and American Institutions
• POLI7806 Political Cultures of the Middle East
• POLI7812 State-Church Relations in Modern Europe
• POLI7813 Islam in Europe

History:

• HIST4140 Middle East in the Twentieth Century
• HIST4150 Modern Iran
• HIST4370 Byzantium and Islam
• HIST4131 Rise and Fall of the Ottoman Empire
• HIST4135 History and Historiography of Arab Israeli Conflict
• HIST4122 Odysseys in the Western and Islamic Traditions
• HIST4090 Modern South Asia
• HIST4497 Terror and the American Century

Theology:

• THEO3116 Medieval Religions and Thought
• THEO1225/ICSP2225 Exploring the Religious Worlds of Istanbul and Anatolia
• THEO5351 Faith Elements in Conflict
• THEO5352 Israelis and Palestinians
• THEO5441 Ibn ’Arabi and The Islamic Humanities: Islamic Philosophy and Theology
• THEO5544 Prophetic Tradition and Inspiration: Exploring the Hadith
• THEO5554 Encountering the Qur’an: Contexts and Approaches
THEO5566 Mystical Poetry in the Islamic Humanities

Art, Art History, and Film:

- ARTH2213 Introduction to Islamic Architecture
- ARTH2226 Islamic Spain/al-Andalus: Word, Monument, and Image
- ARTH2280 Masterpieces of Islamic Art
- ARTH3350 The Art of the Object/Islamic Art
- ARTH4409 The Art of the Islamic Book
- ARTH4412 Cairo: City of 1001 Nights
- FILM3314 Cinema of the Greater Middle East

Near Eastern Languages and Literatures:

- NELC1211/1212 Modern Hebrew I and II
- NELC1251/THEO5582 Biblical Hebrew
- NELC1431/1432 Turkish for Scholars I and II
- SLAV2069 Literature of the Other Europe in Translation
- SLAV2067 Gender and War in Eastern Europe
- SLAV2066 Conversion, Islam, and Politics in the Balkans
- NELC4121/4122 Advanced Arabic I and II
- SLAV2071 War and Peace in Yugoslavia
- SLAV2065/SOCY2280 Society/National Identity in the Balkans
- SLAV2062 Exile and Literature
- NELC2063 Near Eastern Civilizations
- NELC2331 Advanced Readings in Persian Texts
- LING3359 The Structure of Biblical Hebrew
- NELC3162 Business Arabic
- NELC4190 Advanced Tutorial Arabic

Electives: Three Courses
Majors choose three elective courses from an approved list found on our website at www.bc.edu/ics. Electives must be distributed among at least two other departments in addition to the disciplinary base.

**Senior Seminar and Research Project/Honors Thesis: Two Courses**

All majors will be required to enroll in a thesis seminar in the fall of their senior year. In the spring term of their senior year, students will complete a senior thesis under the supervision of a faculty member affiliated with the Program.

The Senior Seminar will allow ICS majors to integrate the knowledge, skills, and concepts of their diverse disciplinary bases and to share them in a genuinely cross-disciplinary manner. The course encourages students to make intellectual connections across disciplines and to engage in critical reflection. After exploring common themes, majors will develop a research design, select a methodology, engage in research, and begin writing the thesis.

**Language Requirement: Four Courses**

Students will be expected to attain proficiency (completion of intermediate level) in a relevant language such as Arabic, Hebrew, Turkish, Persian, or Urdu. In some cases, French, Russian, Chinese or other languages relevant to specific research concerns may be accepted for students specializing in the study of Muslims in Africa, Central Asia, China, Europe, or the Americas, subject to approval by the program's director.

Boston College currently offers four years of Arabic language instruction, from Elementary Intensive through Advanced Arabic. Students studying abroad can enroll in even more intensive language programs offered in
Morocco, Kuwait, Egypt, Jordan, and at the School of Oriental and African Studies at the University of London (SOAS) during the regular academic year and in the summer. Our students have also studied during the summer months at Middlebury, Harvard, and Columbia to accelerate their language skills, and several have won U.S. State Department Critical Language Scholarships and Flagship Fellowships to study Arabic in the summer.

Arabic and other relevant languages can be taken through the Boston Area Consortium. Our Consortium partners, B.U., Brandeis, and Tufts in particular, offer additional languages such as Persian, Turkish and advanced levels of Hebrew if majors wish to study a language other than, or in addition to, Arabic.

**Minor Requirements**

Students seeking to earn an Islamic Civilization and Societies minor must submit a proposed plan of study to the Associate Director, listing the courses that will be taken to fulfill the requirements. In general, proposed plans of study for the minor should be submitted no later than the second semester of the sophomore year. The Associate Director will review the proposed plan of study, in consultation with the student and Program Director, and if accepted, the Committee will grant approval for the student.

Fill out and e-mail the proposed plan of study form before scheduling an appointment with the Associate Director. Whenever possible, the Associate Director will arrange for each student to receive continuing academic advisement from a faculty member in the student's academic major who is affiliated with the Islamic Civilization and Societies Program. Students will be expected to consult with the Associate Director at each semester registration period to update their plan of study.
Requirements for the Islamic Civilization and Societies Minor

- Six courses from the approved course list
- Selected courses must be from three different academic departments
- Required multidisciplinary foundation course ICSP1199 (fall semester)
- Two courses in Arabic or an equivalent language, at the intermediate level or above

Requirements for the Arabic Studies Minor

Near Eastern Languages and Literature offers a minor in Arabic Studies, which covers areas of Modern Standard Arabic and Modern Hebrew, Modern Middle Eastern Literature and Cultural History, and Near Eastern Civilizations.

- Six approved one-semester courses
- Two in Modern Standard Arabic, above the intermediate level
- Four in Middle Eastern languages, cultures, literatures and civilizations. May include a language course in Modern (Israeli) Hebrew, courses taught in translation, and Near Eastern Civilizations

For additional information, visit the Slavic and Eastern Languages and Literatures section in this Catalog.

University Catalog
Office of Student Services
Lyons Hall 103
Mathematics, Undergraduate Programs - University Catalog

The Mathematics Department offers two undergraduate degree programs, leading to the Bachelor of Science and to the Bachelor of Arts.

Bachelor of Arts (B.A.)

The Bachelor of Arts program in Mathematics is designed to provide a solid foundation in the main areas of mathematics and mathematical applications. Course work is offered in preparation for careers in the actuarial profession, applied areas of government and industry, and education. Students who succeed in the program make excellent candidates for law school and other professional schools.

Requirements for Mathematics B.A.

The Mathematics B.A. major requires completion of at least 33 credits, including:

- MATH2202 Multivariable Calculus or MATH2203 Multivariable Calculus (Honors)
- MATH2210 Linear Algebra or MATH2211 Linear Algebra (Honors)
- MATH2216 Introduction to Abstract Mathematics
- MATH3310 Introduction to Abstract Algebra
MATH3320 Introduction to Analysis
18 elective credits chosen from MATH courses numbered 4000 or higher

With the approval of the Assistant Chair for Undergraduate Programs, advanced students may omit required courses, substituting 3 credits in MATH courses numbered 4000 or higher for each.

Bachelor of Science (B.S.)

The Bachelor of Science program in Mathematics is designed to give students a rigorous and thorough mathematical experience, one that includes connection to another area of scholarship in which mathematics is an essential tool. In particular, the program is strongly recommended for those who wish to pursue graduate study in mathematics.

Requirements for Mathematics B.S.

The Mathematics B.S. major requires completion of at least 36 credits, including:

- MATH2202 Multivariable Calculus or MATH2203 Multivariable Calculus (Honors)
- MATH2210 Linear Algebra or MATH2211 Linear Algebra (Honors)
- MATH2216 Introduction to Abstract Mathematics
- MATH3311–3312 Algebra I, II
- MATH3321–3322 Analysis I, II
- MATH4460 Complex Variables
- 12 elective credits in mathematics numbered 4000 or above
- 12 credits in natural science, computer science or economics courses (listed below).
With the approval of the Assistant Chair for Undergraduate Programs, advanced students may omit required courses, substituting 3 credits in MATH courses numbered 4000 or higher for each.

Corequisite Science Courses for B.S. in Mathematics

- BIOL2000 Molecules and Cells
- BIOL2010 Ecology and Evolution
- BIOL2020 Organisms and Populations
- BIOL3040 Cell Biology
- BIOL3190 Genetics and Genomics
- BIOL4200 Introduction to Bioinformatics
- CHEM1109 (1117)–1110 (1118) General (Modern) Chemistry I, II
- CHEM3351 Analytical Chemistry
- CHEM4475–4476 Physical Chemistry I, II
- CSCI1101–1102 Computer Science I, II
- Any upper division course for majors in Computer Science
- ECON2228 Econometric Methods
- ECON2229 Forecasting Techniques
- ECON3308 Game Theory in Economics
- ECON3311 Mathematics for Economists
- EESC1132–1134 Exploring the Earth I, II
- EESC3391 Introduction to Geophysics
- EESC4424 Environmental Geophysics
- EESC4455 Exploration Seismology
- PHYS2100/2110–2101/2111 Introduction to Physics (Calculus) I and II
- Any upper division course for majors in Physics

Additional Major Requirement (All Students)
A grade point average of at least 1.67 in the MATH courses used to fulfill the major.

Some students may need to complete (or will benefit from completing) MATH1102 Calculus I (Mathematics/Science majors) and Calculus II (Mathematics/Science majors), (numbered MATH1105 in the fall and MATH1103 in the spring) to prepare for the major. Well-prepared students with a strong Calculus BC program may, and sometimes should, begin directly in MATH2202. Exceptionally strong students may apply for the Honors Section MATH2203, and should contact the Assistant Chair for Undergraduate Programs. More information about Calculus courses and suggestions for choosing the right Calculus course can be found at www.bc.edu/mathadvise.

Each student should consult directly with the Assistant Chair for Undergraduate Programs or a Mathematics Advisor at Orientation to determine the appropriate and recommended Calculus choice for their situation.

**Departmental Honors**

Candidates for either the Bachelor of Arts or the Bachelor of Science who meet the following requirements will be awarded Departmental Honors in Mathematics:

- Completion of the mathematics requirements for the B.S. degree.
- A grade point average of at least 3.3 in all mathematics courses numbered 3000 and above.
- Completion, as one of the required electives, of an honors thesis course MATH4961; or an independent study course MATH4901 under
the direction of a faculty member; or completion, as one of the required electives, of one graduate course at the 8000 level.

Each student's honors program must be approved individually by the Assistant Chair for Undergraduate Programs.

The Minor in Mathematics

The Mathematics Department also offers a program for majors in other disciplines leading to the minor in Mathematics.

Requirements for the Minor in Mathematics

- MATH2202 Multivariable Calculus or MATH2203 Multivariable Calculus (Honors)
- MATH2210 Linear Algebra or MATH2211 Linear Algebra (Honors)
- 12 elective credits, chosen from:
  - MATH2216 Introduction to Abstract Mathematics
  - MATH3310 Introduction to Abstract Algebra
  - MATH3311–3312 Algebra I, II
  - MATH3320 Introduction to Analysis
  - MATH3321–3322 Analysis I, II
  - MATH major courses numbered 4000 or higher

Information for Study Abroad

Normally, Mathematics majors should have completed MATH2202/3, MATH2210/1, and MATH2216 before going abroad. For students going abroad in the second semester of junior year only, you should also complete at least one of MATH3310/MATH3311 or MATH3320/MATH3321 before leaving.
Students usually may take no more than two mathematics courses for credit towards the mathematics major while abroad, although exceptions may be made if the host institution provides suitable offerings. All courses to be used for major credit must be approved beforehand.

There are no restrictions on what type of mathematics course you may take while abroad, but usually each will be counted as an elective. Choices most commonly available include courses in Differential Equations, Numerical Analysis, Graph Theory/Combinatorics, Number Theory, Complex Analysis, Probability and Statistics, Mathematical Modeling, and Operations Research.

Substitutes for the required 3000-level courses in Algebra and Analysis may be available while abroad; however, these titles are generic. Thus it is extremely important that you check with the Department about taking either one of these two courses abroad, to be sure that the level of the course matches your background.

For course approval, contact the Assistant Chair for Undergraduate Programs.

**Choosing Courses and Fulfilling Core Requirements**

All students at Boston College are required to complete one mathematics course as part of the University Core Curriculum. A score of 4 or higher on either the Calculus AB or BC Advanced Placement Exam (once recorded on your transcript by the Admissions Office) exempts you from this Core requirement.

Some schools or major programs, however, may require more than this minimum, or perhaps require a specific Calculus course or courses. Basic
guidelines for students who fall into these categories (or who are seriously thinking about choosing majors in these categories) are as follows:

**Majors in Mathematics, Physics, Chemistry, Computer Science (B.S.), or Geological Sciences**

Enroll in your first semester of freshman year in one of the Calculus courses MATH1102 (Calculus I/Math and Science), MATH1105 (Calculus II-AP/Math and Science), or MATH2202 (Multivariable Calculus). If you have had a solid year of calculus, MATH1105 is usually the most appropriate choice. Well-prepared students with a strong Calculus BC program may, and sometimes should, begin directly in MATH2202. Exceptionally strong students may apply for the Honors Section of MATH2202, and should contact the Assistant Chair for Undergraduate Programs.

**Majors in Biology, Computer Science (B.A.), or Environmental Geoscience and All Premedical students**

Enroll in your first semester of freshman year in one of the Calculus courses MATH1100 (Calculus I), MATH1101 (Calculus II), or MATH2202 (Multivariable Calculus). If you have had a solid year of calculus (the AB curriculum), MATH1101 is usually the most appropriate choice. Particularly well-prepared students should consider MATH2202. If you have a strong interest in mathematics, you should consider choosing a Calculus course from the MATH1102–MATH1105–MATH2202 sequence mentioned above.

**Other Students**

For all other students seeking to fulfill the Core requirement in mathematics, you may take a Core-level mathematics course at any time—it need not be (and sometimes simply cannot be) completed right away in freshman year.
You certainly have the option to elect a Calculus course for the Core requirement, but there often may be more appropriate course selections available to you, such as:

- MATH1004 Finite Probability and Applications
- MATH1007 Ideas in Mathematics
- MATH1180 Principles of Statistics for the Health Sciences (CSON students)
- MATH1190 Fundamentals of Mathematics I (LSOE students in Elementary Education or Human Development)

For more complete information on course selection, please visit the course selection area of the Mathematics Department website at www.bc.edu/mathadvise.

Managed By

University Catalog
Office of Student Services
Lyons Hall 103
Whether students desire a career in music or want to pursue their own love of the art, the Department of Music offers courses in theory and composition, in the history and current trends of both Western and non-Western music, and lessons in performance. All students, regardless of musical background, are welcome in any course unless a prerequisite or permission of instructor is indicated (as for certain theory courses).

The Department offers a variety of courses (MUSA1100, MUSA1200, MUSA1300) that satisfy the University Core requirement in the Arts and that serve as introductions to the various areas of musical knowledge. MUSA1100 Fundamentals of Music Theory focuses on technical aspects of the language of music and serves as a prerequisite to Harmony and further upper level courses in theory and composition, such as Chromatic Harmony, and Counterpoint, as well as Jazz Harmony, Tonal Composition, and the Seminar in Composition. MUSA1200 Introduction to Music offers a broad survey of music history and styles of music, while upper level courses focus on various periods of Western music history (Middle Ages, Renaissance, Baroque, Classical Era, Romantic Era, Modern Era), the historical development of various genres (Opera, Symphony, Keyboard Music, Dance), or the contributions of various individual composers (Monteverdi, Bach, Beethoven, Brahms). MUSA1300 History of Popular Music in the U.S. offers a socio-historical approach to the broad history and context of popular music; upper level cross-cultural courses deal with
popular traditions (such as Irish Folk Music, Music in America, History of Jazz, Hip-Hop, the Beatles) and world music. In world music, MUSA1320 Introduction to Musics of the World, MUSA2303 Afro-Brazilian Music, MUSA2304 Musics of India, MUSA2306 Musics of Africa, MUSA2307 Musics of Asia, and MUSA2309 Music and Culture in the Middle East satisfy the Cultural Diversity requirement of the Core but not the University Core requirement in the Arts.

For the music major, a liberal arts framework offers a broader outlook than that of a conservatory or a school of music. In a liberal arts framework, students encounter historical, theoretical, cultural, ethnographic, and performance perspectives on music. The student majoring in music at Boston College may find employment in teaching, communications, arts administration, liturgical music or may major in music simply to provide a firm discipline for the mind or a source of lifelong enjoyment. Some students plan to go on to graduate school or a conservatory to become professional performers, composers, musicologists, ethnomusicologists, or educators. Within the major, all students receive a common base of knowledge with a specialization at higher levels in such areas as composition, performance, music history, or cross-cultural studies. A grounding, not only in the traditional musical skills of Western art music, but also knowledge of American music and of the traditions of other cultures, is considered indispensable.

**Performance**

The Music Department offers individual instruction in voice and instruments either for credit (MUSP1925—1 credit per semester) or not for credit (MUSP1920, 1910, 1900). Individual Instrumental Instruction, either credit or non-credit, requires an extra fee. In addition, several free, non-credit performance courses offer instruction and/or coaching in various
instruments and ensembles. Private lessons, when taken for credit, require a juried performance at the end of the semester. Students may use up to 3 credits of individual instruction toward graduation.

**Major Requirements**

*(Minimum of 12 courses, 38 credits)*

- **Theory, Analysis, and Composition Courses**: (12 credits total)
  
  *Prerequisite:* MUSA1100 Fundamentals of Music Theory or equivalent  
  *Required of all majors:* MUSA2100 Harmony, MUSA3100 Chromatic Harmony, MUSA3106 Counterpoint  
  *Choice of any one course:* MUSA3110 Form and Analysis, MUSA3114 Jazz Harmony, MUSA3120 Composition Seminar, MUSA3126 Tonal Composition, MUSA3130 Orchestration

- **Historical Courses**: (9 credits total)
  
  *Required of all majors:* MUSA2209 Music of the Modern Era  
  *With permission of the Director of the Undergraduate Program in Music, a composer or genre course may be substituted for a period course.

- **Cross-Cultural Courses**: (6 credits total)
  
  Required of all majors, a choice of one from each of the following two groups:

  - **Group I—Non-Western tradition**  
    1. MUSA1320 Introduction to Musics of the World*  
    2. MUSA2303 Afro-Brazilian Music*  
    3. MUSA2304 Musics of India*
- MUSA2306 Musics of Africa*
- MUSA2307 Musics of Asia*
- MUSA2308 Music in the Medieval Islamic World
- MUSA2309 Music and Culture in the Middle East*

*MUSA1320, MUSA2303, MUSA2304, MUSA2306, MUSA2307, and MUSA2309 also satisfy the Core Cultural Diversity requirement

- **Group II—Western tradition**
  - MUSA2320 Music and America
  - MUSA2330 History of Jazz
  - MUSA2334 Hip Hop in American Culture
  - MUSA2340 Introduction to Irish Folk Music
  - MUSA3350 The Beatles

- **Required Senior Seminar:** (one semester, 3 credits)
The Senior Seminar (MUSA4941) is ordinarily open only to senior music majors. The Seminar entails a series of weekly projects allowing majors to investigate issues in-depth with special emphasis in one of the areas listed above (history, cross-cultural, or performance). The Seminar serves as preparation for a senior project with supervised reading, research, writing, and discussion.

- **Electives:** (6 credits)
The student will choose a minimum of two 3-credit courses in whatever category is appropriate to his or her particular interest, whether it is in music theory and composition, performance, history, or cross-cultural studies. Students with performance emphasis must have three semesters of private instruction for credit. Three semesters of private instruction for credit may be used as an elective only upon completion of the juries at the end of each semester of lessons.

- **Performance Ensemble Experience:** (minimum of two semesters)
Each major must have two semesters of experience in performance in...
some capacity and may choose from any organized performance group at Boston College (such as Boston College Symphony Orchestra, Chamber Music Ensemble, Popular Styles Ensemble, Irish Traditional Music classes, University Chorale, Voices of Imani, Liturgy Arts Group, student a cappella group, BC bOp, Marching Band, Wind Ensemble, etc.), through more informal student groups (by consultation with the Director of the Undergraduate Program in Music), or through private lessons.

- **Cumulative Listening Competency**
  Majors will be asked to identify important works from the Western tradition in a series of Listening Competency exams. Each year of the music major (normally three), a list of works will be given to students that they must be able to identify by the end of the year. A listening test on each of three lists of works will be administered until the student passes.

- **Ear Training/Sight Singing: (2 credits)**
  All majors must pass the minimum competency requirements in Ear Training and Sight-Singing before graduation. The courses MUSA1090 and MUSA2090 Ear-Training and Sight-Singing are 2-credit classes designed and recommended as an aid to passing this test.

### Minor Requirements

**(Minimum of six courses, 18 credits)**

The Music Department has designed a minor in music as an alternative for students who are interested in music, but who do not wish either to make music their career or to go on to graduate studies or who have majors that preclude taking music as a second major. The total number of courses required for the minor in music is six. Those wishing to minor in music should take the following:
• One of the following (3 credits): MUSA1100 Fundamentals of Music Theory (required if they do not have the background in music theory needed before entering MUSA2100 Harmony), or MUSA1200 Introduction to Music or MUSA1300 History of Popular Music. Students who can pass out of MUSA1100 will substitute an upper-level course as an elective.

• Two additional music theory courses (6 credits): MUSA2100 Harmony and MUSA3100 Chromatic Harmony.

• Three historical and cross-cultural electives (9 credits): One period course, one composer or genre course, one cross-cultural course.

The choice of courses should be made in consultation with an advisor from the Music Department. In addition, each student must participate in at least two semesters of credit or non-credit performance experience (either as a member of an ensemble or through private lessons), as approved by the department.

Honors

In order to graduate with departmental honors, a student must maintain a grade point average of 3.5 in the major and 3.3 in the University, pass the Ear-Training and Listening Repertoire requirements with a high score, and produce a final project, recital, or paper deemed worthy of honors. The project must be completed for a grade of A- or better to receive honors. There are various ways to fulfill the project:

• A research paper of no less than 40 pages and a public presentation of approximately 20 minutes on their findings.

• A recital of around 40 minutes (but no less than 30 minutes) with a paper of no less than 15 pages. Non-honors majors may still do a
senior recital for credit as MUSA4600 Senior Recital Preparation but without it being considered for honors.

• A composition or set of compositions of no less than 15 minutes.

**Information for First Year Majors and Non-majors**

Included in the University's Core Curriculum is one course in the Arts (Art, Art History, and Film, Music, or Theatre). MUSA1200 Introduction to Music, MUSA1100 Fundamentals of Music Theory, and MUSA1300 History of Popular Music in the U.S. are the Music Department's Core offerings. They are designed for the non-musician as well as the student who has studied music. Prospective music majors should reference the *Recommended Course of Study* below. Students with advanced musical backgrounds and interests should speak to the Director of the Undergraduate Program in Music, regarding appropriate upper-level courses. The department offers MUSA1320 Introduction to Musics of the World, MUSA2303 Afro-Brazilian Music, MUSA2304 Musics of India, MUSA2306 Musics of Africa, MUSA2307 Musics of Asia, and MUSA2309 Music and Culture in the Middle East as options for the Cultural Diversity requirement of the Core.

**Information for Study Abroad**

**For the Core:** Students who wish to satisfy the Arts Core through Music while abroad should consult with the Director of the Undergraduate Program before their departure. Acceptable courses should be similar in scope and content to those offered at Boston College. Many abroad programs do not offer classes that fit these requirements.

**For the major and minor:** The department requires that the music theory sequence for minors and majors through Chromatic Harmony and the Senior Seminar for majors be taken at Boston College. Music of the Modern
Era and Counterpoint (required of majors) should be taken at Boston College, but exceptions may be possible depending on equivalent courses offered by the host school. Majors may not be abroad first semester senior year in order to take the required Senior Seminar at BC.

Before going abroad, both minors and majors should have completed Chromatic Harmony in theory, and majors, in addition, should have taken a few of the history or cross-cultural courses. Thus, acceptable offerings from abroad tend to lean towards courses in music history or in cross-cultural studies, with some upper-level theory courses acceptable. Usually students complete 6 or 9 credits; however, majors have had as many as 12 credits fulfilled abroad.

Students should contact the Director of the Undergraduate Program in Music, to plan an acceptable course of study for their semester or year abroad. The department recommends the music programs offered at King's College, London, and University College, Cork, Ireland.

**Recommended Course of Study**

**Freshman Year**

All students with a serious interest in music should try as freshmen to take or test out of MUSA1100 Fundamentals of Music Theory. The theory courses (especially MUSA1100 Fundamentals and MUSA2100 Harmony) are essential and necessary indicators of how well a student will be able to succeed in the major. Those who can test out of MUSA1100 and who wish to fulfill the Arts Core requirement with a music course should take MUSA1200 Introduction to Music or MUSA1300 History of Popular Music. Arts Core courses in Art, Art History, and Film or Theatre are also possible.
instead of Music and are recommended for those who wish for a broader understanding of the Arts.

**Sophomore Year**

Harmony and Chromatic Harmony should be taken in sequence along with MUSA1090–2090 Ear Training/Sight Singing Labs. Two history courses in Western Music (selected from Medieval-Renaissance, Baroque Music, Music of the Classical Era, Music of the Romantic Era, Music of the Modern Era, or a composer or genre course) or one history course and one cross-cultural course should be taken. The first year's required Listening Repertoire should be mastered. Some performance experience (Orchestra, Chorale, Band, Chamber Music, non-Western performance, and/or private lessons) should be started and pursued throughout the rest of the major.

**Junior Year**

Counterpoint and a choice of Jazz Harmony, Form and Analysis, or Composition and a second or third history course and/or a cross-cultural course should be taken. The second year of the required Listening Repertoire should be mastered.

**Senior Year**

Any advanced courses in the department relevant to the particular emphasis the student has chosen—performance, composition, history, or cross-cultural—and the Senior Seminar, which will help the student synthesize previous course work. The final year of the required Listening Repertoire should be mastered.

**Recommended Course of Study: Minors**
Students can add music as a minor as late as their junior year, but no later than second semester as the minor requires a minimum of three consecutive semesters in order to complete the theory sequence of the following: Fundamentals, Harmony, and Chromatic Harmony. The history and cross-cultural component may be taken at any time in conjunction with various levels of theory, although some understanding of Fundamentals is recommended for students with little previous, formal background in music.

**Managed By**

University Catalog
Office of Student Services
Lyons Hall 103
To study philosophy is to engage in systematic reflection on the most fundamental questions about ourselves, and our world. Studying philosophy provides the critical skills, the historical understanding, and the vision necessary to meet existential and ethical challenges, and live richer, more self-aware lives. As students prepare to become citizens, professionals, parents, and men and women for others, the study of philosophy is strong preparation for a wide variety of enterprises. Both as a Core requirement and as a major, Philosophy is foundational in helping us appropriate our intellectual and spiritual heritage and develop self-understanding anew.

Philosophy has been central to the educational mission of Boston College since its founding. The prominence of philosophy in the curriculum reflects our Jesuit heritage. From the beginning, Jesuit colleges emphasized the values of authentic Christian humanism, the power of human intelligence, and the mutual compatibility of faith and reason.

The study of philosophy remains among the most relevant and urgent of pursuits. It investigates life's perennial questions—questions of ultimate meaning and value, truth and rationality, being and transcendence. The mission of the Philosophy Department at Boston College is to provide an encouraging and supportive environment for the exploration of these questions, and for the critical examination of philosophical traditions that inform our personal and professional lives. Toward that end, we offer a
broad spectrum of courses with a special focus on the history of philosophy, and fundamental contemporary problems in "practical philosophy."

A Philosophy major is excellent preparation for careers in numerous fields including law, business, and medicine. The study of philosophy teaches highly marketable and highly transferrable skills. Philosophy blends well with other majors because it speaks to issues that are foundational to numerous disciplines and career paths. For students entering fields such as science, medicine, law, public service, economics, finance and management, the Philosophy Department offers specialized tracks within the major to provide focus and direction toward career goals.

**Major Requirements**

All Philosophy Majors must complete a total of 30 credits in Philosophy, as follows:

- Two Core courses in Philosophy (6 credits)
- Eight Philosophy electives (24 credits):
  - 1 course in the History of Philosophy
  - 1 course in Knowledge and Reality
  - 1 course in Ethics and Value
  - 5 free electives

Lists of courses satisfying each of the three distribution requirements (2a-c) can be found on the Philosophy Department website. Students may take up to two cognate courses in other departments for elective credit toward the Philosophy major. The courses must be philosophical in content and/or substantially contribute to the enhancement of the student’s chosen area of study. Cognate courses must be approved by the Director of Undergraduate Studies.
Students wanting focus and direction for their elective choices may select a track within the major. Tracks are satisfied by completing two electives from within the track area, in consultation with the major advisor. The Philosophy Department offers the following major tracks:

**Science, Ethics, and Humanity Track**

- Designed for students preparing for careers in science and medicine

**Law, Public Policy, and Economics Track**

- Designed for students preparing for careers in law, politics, economics, or business/finance

**Philosophy, Religion, and the Arts Track**

- Designed for students preparing for careers in theology, ministry, or the arts

**Philosophy Minor**

All Philosophy Minors must complete a total of 18 credits in Philosophy, as follows:

- Two Core courses in Philosophy (6 credits)
- Four Philosophy electives (12 credits)

No particular course or course distribution is required of minors. Each student will design his or her own minor in consultation with a faculty advisor.

**Core Requirement in Philosophy**
As part of the Core Curriculum at Boston College, all students take a two-semester Philosophy Core sequence. There are several ways to complete the Philosophy Core requirement:

- **PHIL1070–1071 Philosophy of the Person I and II**
  - Fall/Spring: 3 credits per semester. Satisfies Philosophy Core.

- **PHIL1090–1091 Perspectives on Western Culture I and II**
  - Fall/Spring: 6 credits per semester. Satisfies Philosophy Core and Theology Core.

- **PHIL1088–1089 Person and Social Responsibility I and II (PULSE)**
  - Fall/Spring: 6 credits per semester. Satisfies Philosophy Core and Theology Core.

- One of our new **Enduring Questions** courses, available to freshmen only.
  - One 3-credit Philosophy Core course paired with a Core course from another discipline. Satisfies one semester of the two-semester Philosophy Core requirement. Students complete the second semester of Philosophy Core with Philosophy of the Person I or II.

It is strongly recommended that students complete the Philosophy Core requirement by the end of sophomore year. Core courses are foundational, providing skills and background knowledge presupposed by more advanced courses in the college.

**The Honors Program in Philosophy**

The Philosophy Department offers highly qualified students the opportunity to participate in a departmental honors program. Application to the honors program is by invitation only, based on GPA and/or nomination by a member of the faculty. Invitations to apply will be extended by the Director
of Undergraduate studies in the fall of the junior year. Applications are due early in the spring of the junior year.

Accepted students will pursue a year-long research project in the senior year, under the direction of a faculty mentor, culminating in a thesis of approximately 50-75 pages. Honors students participate in a Philosophy Honors Seminar in the fall semester of senior year and complete the project in consultation with a faculty advisor in the spring.

The department arranges seminar meetings and social events to provide intellectual community for honors program participants. The Department also participates in the Scholar of the College Program, details of which can be found in the Morrissey College of Arts and Sciences section.

**Perspectives Program I–IV**

The Perspectives Program at Boston College is a four-year interdisciplinary program centered upon the great books of the Western intellectual tradition. It integrates the humanities and natural sciences in order to help students work out for themselves a set of coherent answers to such questions as the following: Who are we? Where do we come from? Where are we going? The Perspectives Program seeks (1) to educate the whole person, (2) to help students develop skills in practical living and critical thinking, and (3) to form students who are intelligent, responsible, reasonable, attentive, and loving.

Students in the Perspectives Program complete the Philosophy major by completing the following sequence of four Perspectives courses:

- Perspectives I
○ PHIL1090–1091 (THEO1090–1091) **Perspectives on Western Culture I and II**  
○ Fall/Spring: 6 credits per semester. Satisfies 6-credit Philosophy Core and 6-credit Theology Core. Normally open to freshmen only.

- **Perspectives II**  
  ○ UNAS1104–1105/UNAS1106–1107 **Modernism and the Arts I and II**  
  ○ Fall/Spring: 6 credits per semester. Satisfies 6-credit Philosophy Core, 3-credit Fine Arts Core, 3-credit Literature Core.

- **Perspectives III**  
  ○ UNAS1109–1110/UNAS1111–1112 **Horizons of the New Social Sciences I and II**  
  ○ Fall/Spring: 6 credits per semester. Satisfies 6-credit Philosophy Core, 6-credit Social Sciences Core.

- **Perspectives IV**  
  ○ UNAS1119–1120/UNAS1121–1122 **New Scientific Visions I and II**  
  ○ Fall/Spring: 6 credits per semester. Satisfies 6-credit Philosophy Core and **either** 6-credit Natural Science Core **or** 3-credit Mathematics Core, 3-credit Natural Science Core.

Each Perspectives course is a year-long, 12-credit course. Each is designed to fulfill the Core requirements of the relevant departments. While Perspectives I is normally open only to freshmen, Perspectives II, III, and IV are open to students at any rank, and need not be taken in order. Descriptions of Perspectives II, III, and IV are in the University Courses section of the course catalog.

**Perspectives Honors Program**

Philosophy majors in the Perspectives Program may be invited to the Perspectives Honors track in the junior year. Perspectives Honors students
will participate in the Senior Perspectives Honors seminar in the fall semester and register for a Senior Thesis Directed Readings course with an advisor in the spring semester of the senior year. Such a senior thesis will ordinarily consist of original research in the field, in close work with a faculty advisor, culminating in the production of a 50–70 page senior thesis.

The PULSE Program for Service Learning

With its mission to educate Boston College students about social injustice, the PULSE Program for Service Learning educates more than 500 undergraduates each year through the integration of community-based social service and social advocacy fieldwork with the study of theology and philosophy. The PULSE Program offers its signature Core course, "Person and Social Responsibility," in addition to a few elective courses. For a full description of the program, please visit the PULSE website at www.bc.edu/pulse.

Fifth Year B.A./M.A. Program

Undergraduate Philosophy majors may opt to enter a five-year B.A./M.A. program. Application to the program will normally take place during the junior year.

Students admitted to the B.A./M.A. program will follow the curriculum for Philosophy majors, except that two courses taken during the senior year must be eligible for graduate credit. These two courses will count toward both the M.A. and the B.A. The remainder of the M.A. may be completed by taking eight additional graduate courses, submitting an M.A. qualifying paper in the fifth year, and satisfying the M.A. language requirement.
Interested undergraduate Philosophy majors should consult with the Director of the Graduate Program during junior year, and must apply to the Graduate School of the Morrissey College of Arts and Sciences. Expectations are that such applicants will have achieved an overall GPA of at least 3.33 and a major GPA of 3.5 or above. For internal applicants, the application fee is waived and the GRE is not required.

Managed By

University Catalog
Office of Student Services
Lyons Hall 103
The Department of Physics offers a comprehensive program of study leading to the B.S. degree in Physics. This program is designed to prepare students not only for advanced graduate studies in physics or a related field, but also for employment upon graduation in physics and other disciplines related to science and technology. Basic courses give students a solid foundation in the concepts of classical and modern physics and assist them in developing their analytical reasoning and problem-solving skills. Laboratory courses complement this experience with an opportunity to develop experimental skills and a working knowledge of advanced technology. Students are strongly encouraged to further develop all these skills by participating in advanced experimental, analytical, or computational research under the supervision of faculty mentors. The Department of Physics strongly encourages physics majors to engage in research, and we will make every effort to find a suitable research opportunity for all interested students with our faculty members.

**Major Requirements**

The minimum requirements for the B.S. degree with a major in Physics include 45 credits in Physics, as described below, and additional corequisites in Mathematics and other sciences.
Physics Requirements

- PHYS2200 Introductory Physics I (Fall: 4 credits)
- PHYS2201 Introductory Physics II (Spring: 4 credits)
- PHYS2050 Introductory Physics Lab I (Fall: 1 credit)
- PHYS2051 Introductory Physics Lab II (Spring: 1 credit)
- PHYS3100 Vibrations and Waves (Fall: 4 credits)
- PHYS3300 Modern Physics (Spring: 4 credits)
- PHYS3510 Contemporary Electronics Laboratory (Fall: 2 credits)
- PHYS4100 Classical Mechanics (Fall: 4 credits)
- PHYS4200 Electricity and Magnetism (Spring: 3 credits)
- PHYS4400 Quantum Physics I (Fall: 3 credits)
- PHYS4401 Quantum Physics II (Spring: 3 credits)
- PHYS4600 Statistical Mechanics and Thermodynamics (Fall: 4 credits)
- At least 3 credits of a course*, chosen from:
  - PHYS4300 Numerical Methods and Scientific Computing** (Spring: 4 credits)
  - PHYS4951 Senior Thesis*** (Spring: 3 credits)
  - PHYS4350 Experiments in Physics (Spring: 3 credits)

*MCAS Honors Program Thesis or Scholar of the College Thesis when supervised by a Physics faculty member will also meet this requirement.

**Students need a background in computer programming, for example, CSCI2227 Introduction to Scientific Computation.

***Students will need prior agreement from a physics faculty supervisor to enroll in this course.

- At least 6 credits of an advanced (at or above the 4000 level) elective course. Courses vary from year-to-year, but recent offerings include:
  - PHYS4505 Nuclear and Particle Physics (3 credits)
○ PHYS4515 The Physics of Conventional and Alternative Energy (3 credits)
○ PHYS4525 Foundations of Plasmonics (3 credits)
○ PHYS4535 Nanoscale Integrated Science (3 credits)
○ PHYS4545 Introduction to Condensed Matter Physics (3 credits)
○ PHYS4555 Optics (3 credits)
○ PHYS4565 Cosmology and Astrophysics (3 credits)
○ MATH4440 Dynamical Systems (3 credits)

Students should consult with the Undergraduate Program Director regarding current elective offerings.

Corequisites

Students are also required to take the following mathematics courses:

- MATH2202 Multivariable Calculus (4 credits)
- MATH2210 Linear Algebra (3 credits)
- MATH4410 Differential Equations (3 credits)

Students without advanced math placement will need to take introductory calculus courses, such as MATH1103 or MATH1105, which are prerequisites for MATH2202.

Physics majors are also required to take 8 credits of CHEM1109–1110 and associated labs; other science courses, along with their associated labs, may qualify but require prior departmental approval.

Advanced undergraduate Physics majors may, with departmental approval, enroll in first-year graduate courses, such as PHYS7711, 7732, or 7741.
Minor Requirements

The minimum requirements for a minor in Physics include 24 credits in Physics and 8 corequisite credits, as described below:

- PHYS2200 Introductory Physics I (Fall: 4 credits)
- PHYS2201 Introductory Physics II (Spring: 4 credits)
- PHYS2050 Introductory Physics Lab I (Fall: 1 credit)
- PHYS2051 Introductory Physics Lab II (Spring: 1 credit)
- PHYS3100 Vibrations and Waves (Fall: 4 credits)
- PHYS3300 Modern Physics (Spring: 4 credits)

Also required are 6 credits in courses at or above the 4000 level. Students should discuss course selection with the Undergraduate Program Director.

Corequisites*

- MATH1102 Calculus I (4 credits) and MATH1103 Calculus II (4 credits) or
- MATH1105 Calculus II–AP (4 credits) are required

*Students who have been placed by the Mathematics Department at a level above MATH1105 will have satisfied this corequisite.

MATH2202 (4 credits) is required as a prerequisite for some of the upper-level physics courses.

Information for First Year Majors and Non-majors

Physical science, computer science, and mathematics majors planning on taking physics in the freshman year should enroll in PHYS2200 and the
associated lab PHYS2050. Biology majors and premedical students should enroll in PHYS2100 and the associated lab PHYS2050. Depending on high-school background, Physics majors take either the Calculus I–II sequence MATH1102–1103, or calculus II–AP MATH1105 or start with Multivariable Calculus MATH2202. Note that MATH1100–1101 is intended for Biology and Premedical students and is not sufficient calculus preparation for Physics majors.

**Information for Study Abroad**

Before undertaking study abroad, it is strongly recommended that the Physics major complete PHYS2200, PHYS2201 (or PHYS2100, 2101) with labs, PHYS3100, PHYS3300 (also with labs), and the corequisite math courses MATH1102, MATH1103, and MATH2202. The Department typically allows a maximum of four courses taken abroad to count for major credit. Of these four courses, two should be major requirements, plus two Physics electives. The department recommends any program with a solid teaching and research program in physics.

Students who are interested in studying abroad are strongly encouraged to do so during the spring semester of their junior year. While planning their study abroad program, Physics majors should meet with the Undergraduate Program Director. Students should inquire early at the Office of International Programs, and with possible host institutions, to arrange for a course of study appropriate for physics majors.

**Course Offerings**

Courses numbered below 2000 are introductory courses directed primarily towards non-science majors. These courses have no prerequisites and need no mathematics beyond ordinary college entrance requirements. The
courses that satisfy the Natural Science Core requirement are noted in the individual course descriptions. PHYS2100–2101 Introductory Physics I, II (Calculus) or PHYS2200–2201 Introduction to Physics I, II (Calculus) and PHYS2050–2051 Introductory Physics Laboratory I and II are required of all Chemistry and Physics majors; Biology majors should consult the Biology Department regarding Physics requirements. Courses numbered above 3000 are advanced offerings primarily for Physics majors.

University Catalog
Office of Student Services
Lyons Hall 103
An undergraduate major in Political Science provides a foundation for careers in politics, public administration, international service, law, business, and journalism, as well as a foundation for graduate work and teaching in the social sciences.

The Political Science major at Boston College consists of ten courses: two introductory courses; at least one course in each of the four subfields of political science (American Politics; Comparative Politics; International Politics; and Political Theory); and four electives from any of the subfields. Please note that courses not credits are the fundamental building block of our major. In order to complete the major, students must complete 10 political science courses that are each worth at least 3 credits. Thus, for the purposes of the major, three 4-credit political science courses from another institution are counted as three courses (they are not equivalent to four 3-credit courses). The larger number of credits for a single course from another institution may count toward the aggregate credits required for BC graduation, but that course will still count as a single course toward the major’s ten course requirement. (A “double course” transferred from abroad, however, that spans two semesters, and carries 6–8 credits, will be counted as two elective courses for the major.)

The Introductory Sequence
With some exceptions as noted below under **Qualifications, Exceptions, and Special Rules**, all majors should take one of the following introductory courses: Fundamental Concepts of Politics (POLI1041) or How to Rule the World (POLI1021). In addition, students should take a second introductory course, selected from the following: Introduction to Modern Politics (POLI1042); Introduction to American Politics (POLI1061); Introduction to International Politics (POLI1081); or Introduction to Comparative Politics (POLI1091).

NB: It is not essential to take Fundamental Concepts of Politics or How to Rule the World before Introduction to Modern Politics, Introduction to American Politics, Introduction to Comparative Politics, or Introduction to International Politics; nor is it essential to take either or both of the introductory courses in the freshman year. **Many students do not begin their major until the sophomore year, and they have no difficulty finishing it on time.** Students who scored a 4 or 5 on either of the AP exams in Government and Politics (American or Comparative) may place out of the requirement for the second introductory course (but not the first). It will still be necessary to take 10 courses in the major. You will need to have a “Degree Audit Course Substitution and Waiver Form” signed by the Director of Undergraduate Studies in order for this waiver to be reflected on your Degree Audit.

The introductory curriculum in political science is not like that in other majors, such as economics or the natural sciences. Ours does not present a single curriculum that all students are expected to know before moving on to higher-level courses. Rather, the introductory curriculum is designed to expose students to the study of politics in a variety of ways. For example, each faculty member who teaches POLI1041 Fundamental Concepts has his or her own particular style of doing so.
There is, however, some common ground. POLI1041 Fundamental Concepts of Politics and POLI1021 How to Rule the World, are devoted principally to a study of some of the classic texts in political theory. POLI1042 Introduction to Modern Politics, POLI1061 Introduction to American Politics, POLI1081 Introduction to International Politics, and POLI1091 Introduction to Comparative Politics, all emphasize philosophical, conceptual, and analytical foundations for understanding their substantive domains. Critical dialogue—in the classroom and in some cases, in discussion sections—is central to the way these introductory courses are taught.

To summarize: Students are normally required to take two introductory courses: either Fundamental Concepts of Politics (POLI1041) or How to Rule the World (POLI1021); and one additional course from the introductory list: Introduction to Modern Politics (POLI1042); Introduction to American Government (POLI1061); Introduction to International Politics (POLI1081); and (POLI1091) Introduction to Comparative Politics.

- POLI1021, POLI1061 and POLI1091 satisfy the Social Sciences Core and are open to majors and non-majors.
- POLI1041, POLI1042, and POLI1081 satisfy the Social Sciences Core and are major restricted only.

**Beyond the Introductory Sequence**

Students go directly from introductory courses into upper-level electives. These electives do not have to be taken in any particular order. The second digit of course numbers indicate their subfield. Courses with a “3” in that location (e.g., 2300) are in American Politics; courses with a “4” in that location (e.g., 2400) are in Comparative Politics; courses with a “5” in that location (e.g., 2500) are in International Politics; and courses with a “6” in...
that location (e.g., 2600) are in Political Theory. Students must take eight courses beyond the introductory courses, and at least one course must be taken in each of the four subfields: American Politics, Comparative Politics, International Politics, and Political Theory. All courses that do not fulfill the subfield or introductory requirements will be counted as electives in the major. The subfield requirements must be satisfied by courses taken in the department; courses taken abroad or transferred from other institutions may only be used to fulfill introductory or elective requirements. To fulfill the major, at least six courses of the ten courses required must be taken in the Political Science Department in the Morrissey College of Arts and Sciences. No more than four courses in total, then, can be transferred from outside the department, including other U.S. institutions, study abroad programs, or the Woods College of Advancing Studies (WCAS).

There is a considerable variety in our elective offerings, because each faculty member has a rotating set of courses and usually teaches four of these each year. There are approximately 100 courses open to undergraduates over a four-year period. Some of these courses are seminars, which meet once a week, and are usually limited to 15–19 members so that there is much more opportunity for sustained and intense analysis of texts and problems than there is in a conventional lecture/discussion format. With the exception of the special Sophomore Seminars, seminars are open only to juniors and seniors.

The amount of work required in all of our courses is generally high. Clarity of thought and writing are two sides of the same skill, and for this reason, our courses place special emphasis on writing skills. In addition, most courses encourage classroom discussion on a regular basis so that students may be graded on their participation in class as well as on their writing and exams.
Degree Requirements

Fields and Electives

- Two introductory courses: One introductory course must include either Fundamental Concepts of Politics (POLI1041) or How to Rule the World (POLI1021). The other introductory course must include one of the following: Introduction to Modern Politics (POLI1042); Introduction to American Politics (POLI1061); Introduction to International Politics (POLI1081), or Introduction to Comparative Politics (POLI1091).
- At least one course in each of the four subfields of Political Science: American Politics (POLIX300–X398), Comparative Politics (POLIX400–X499), International Politics (POLIX500–X599), and Political Theory (POLIX600–X699), for a total of four subfield courses.
- Four electives from among any courses offered by the department that are not introductory courses. **NB:** POLI1021 (How to Rule the World) may also satisfy the subfield requirement in Political Theory; POLI1061 (Introduction to American Politics) in American Politics; POLI1081 (Introduction to International Politics) in International Politics; and POLI1091 (Introduction to Comparative Politics) in Comparative Politics. They may not, however, satisfy the Introductory requirement and the subfield requirement at the same time.

**Note:** Courses designated as POLIX200–X299 count as electives toward the major but do not fulfill any of the four subfield distributional requirements. Courses numbered POLI7700 and above are graduate courses.

Qualifications, Exceptions, and Special Rules
• Introductory courses do not have to be taken in any particular sequence: thus, students may take one of the “second” Introductory courses before Fundamental Concepts or How to Rule the World.

• Students who join the major after their sophomore year are not required to take Introductory courses. With department permission, they may substitute other elective courses for the standard introductory. Students who have scored at least a 4 on the American Government or Comparative Government AP exams may waive the second introductory course. In either of these cases, students will still need to take ten courses and will need to see the Director of Undergraduate Studies in order to get this waiver recorded on their Degree Audits.

The courses in Political Science offered in the Woods College are separate from the courses offered in the Department and cannot generally be used towards the major. Students who believe they have a compelling reason to use a Woods College course for the major must petition the Department's Director of Undergraduate Studies prior to the start of the class to see whether an exception can be made.

• Students may transfer up to four courses from other institutions, including study abroad programs. But in no case may a student earn a degree in Political Science without taking at least six courses (18 credits) in the Department. Transfer credits and study abroad credits may not be used to satisfy the four subfield distribational requirements.

Please Note: Even after the University has accepted a transfer or a study abroad course for your MCAS requirements, you will still need to see the Director of Undergraduate Studies or one of the Study Abroad Advisors for special forms to move those classes into the appropriate categories on your Degree Audit.
Honors Program

The Department of Political Science has established its own Honors program to encourage and reward high academic achievement among its majors. Admission to the program is by invitation from the Department. Each year approximately 20 Political Science majors who have completed the sophomore year are invited to join the Honors program. Selection is based on academic records within the major and overall. The Honors program seeks to provide additional opportunities for intellectual exchange and friendship among students as well as with the faculty. The Department hopes that the spirit of the Honors program will in turn extend to all our classes.

*Honors Seminar:* The Department offers special Honors Seminars on a variety of topics to members of the program. These are topics not ordinarily available in our course offerings, and they frequently focus on the special interests of faculty in important policy questions or intellectual puzzles. The intention of these seminars is to provide a setting in which students who have shown their lively and nimble engagement with politics can come together with others who share their enthusiasm, for the enjoyment and rewards of shared scholarly exploration. Members of the Honors program must take at least two Honors Seminars over the course of their junior and senior years, in addition to the ten courses otherwise required for the major. Students seeking to complete the Honors program and graduate with Honors must, therefore, take at least 12 Political Science courses in all.

One Honors seminar is given each semester. The seminars are scheduled a year in advance so that students can plan their programs (especially important for students who will be studying abroad for one or two semesters). These seminars are considered electives in the major, so *they do not exempt the student from the requirement of taking one course in
each of four subfields in Political Science. With the permission of the Director of the Honors program, Honors students may substitute one graduate seminar for one of the two required Honors seminars, subject to the approval of the faculty member teaching the seminar.

*Honors Thesis:* As a culmination of the Honors program, members may write an Honors Thesis during their senior year. An Honors Thesis is generally a two-semester project, for which students earn credit for two elective courses in the major (Honors Thesis I and II, designated in the catalog as POLI4961 and POLI4962).

Students participating in the Honors program are eligible for one of three Honors designations when they graduate: Honors, High Honors, and Highest Honors in Political Science. All members of the program who complete at least 12 courses in Political Science, including two Honors Seminars, are eligible to graduate with Honors, if they have sustained a record of academic excellence in the major. Members of the program who choose to write an Honors Thesis, and do so successfully, will be eligible to be considered for High or Highest Honors.

For further information on the Political Science Honors Program, contact the Director of the Honors Program.

**Study Abroad**

Study abroad is an excellent way for Political Science majors to gain a comparative and cross-cultural perspective on politics. Study abroad is encouraged by the Department, so long as students have prepared themselves with a strong academic background and have chosen their study abroad location with care, to assure that the courses taken abroad meet the Department's expectations with respect to quality and content.
Students planning to go abroad will be given a form by the Office of International Programs in Hovey House, which must be filled out in consultation with one of Department's two study abroad advisors, Professor Kenji Hayao and Professor Jennie Purnell. The purpose of this consultation is to make sure that a student is far enough along in the major so that he or she can finish in time to graduate and can successfully integrate the study abroad program with other academic plans. Students who are in the Department's Honors Program, for example, need to plan carefully to coordinate study abroad with the Honors requirements. Information on specific study abroad opportunities can be obtained from the Office of International Programs in Hovey House and by speaking with Professor Hayao or Professor Purnell.

To be eligible for elective course credits toward the Political Science major while studying abroad, a student should have at least a 3.0 GPA generally and in the Political Science major before departing. Students with GPAs below this should contact one of the Department's study abroad advisors about the possibility of being granted a waiver to this requirement.

Political Science majors should be aware that not all study abroad sites available to Boston College students will have courses acceptable toward the major. Some sites lack political science departments or have weak political science offerings. In these cases, students should be careful to consult with one of the department's study abroad advisors or the Director of Undergraduate Studies.

Because gaining foreign-language fluency is one of the main benefits of study abroad, Political Science majors are encouraged to seek study abroad programs in non-English-speaking countries. Students who believe that their foreign-language skills are not advanced enough to take college courses abroad in a foreign language should consider study-abroad
programs in foreign-language countries where universities offer their own students courses in English. Information about such programs can be obtained from the Office of International Programs in Hovey House.

The Department’s study abroad advisor can advise students about which programs and courses abroad will be acceptable. Students are urged to gain approval for specific courses from the Department’s study abroad advisor before departing. A student who seeks approval only after he or she returns from abroad risks not getting Political Science credit for study abroad courses. Always ask first, and if circumstances in the host country change (as they frequently do), e-mail the study abroad advisor or Director of Undergraduate Studies for advice.

The Department will accept no more than two courses per semester from an institution abroad or four courses for an entire year. These courses will count as major electives only. As noted above, the four courses for the field distributional requirement in the Political Science major (one each in American, Comparative, and International Politics and in Political Theory) must be taken at Boston College. No courses taken abroad will be accepted for these distributional requirements. Again, bear in mind that courses not credits are the building blocks of our major. Single courses taken abroad that carry 3 or more credits will be counted as single courses in the major. Thus, for the purposes of the major, three 4-credit political science courses from another institution are counted as three courses (they are not, in other words, treated as equivalent to four 3-credit BC political science courses). Final approval of courses taken abroad requires the signature of the Department's Study Abroad Advisor on the Approval Forms available from the Office of International Programs in Hovey House.

Washington Semester
The university offers semester-long internship programs in cooperation with universities in Washington, D.C. These programs combine academic courses with internship placements in legislative, executive, and interest-group offices in the nation's capital. Students sometimes do a Washington internship semester as an alternative to study abroad. The academic requirements for participation are the same as those for study abroad (i.e., a 3.0 GPA overall and in the major). Students interested in the American University Washington Semester Program should schedule an appointment with the Office of International Programs. For more information, visit www.bc.edu/international.

**Thesis Writing Outside the Honors Program**

With department permission, students who are not members of the Honors Program may still have the opportunity to write a thesis by enrolling in POLI4951–4952 (Thesis I and II). This is an opportunity open to seniors, and the first step is to speak with a faculty member, during your junior year, who might be willing to act as your thesis supervisor. The thesis courses do not satisfy subfield requirements in the major but may be used to satisfy elective requirements.

**Scholar of the College Program**

Scholar of the College is a special designation conferred at Commencement on seniors who have successfully completed particularly creative, scholarly, and ambitious Advanced Independent Research projects during their senior year, while maintaining an overall cumulative grade point average of 3.700 or better. Students interested in this program should consult the University’s website for further information. (In this Department, Scholars projects are done under the course number POLI4921 Advanced Independent Research.)
Awards and Fellowships

Advanced Study Grants

The Boston College Advanced Study Grants were established to encourage, support, and give visible recognition to undergraduates who have that special spark of scholarly initiative and imagination. Students with these qualities should also be thinking of themselves as prospective candidates for national fellowships, such as the Rhodes, Marshall, Fulbright, Goldwater, or Truman. An Advanced Study Grant for a summer project can be an important step along the way. For more information on the ASG program, consult the University’s website.

Advanced Study Grants are for student-designed projects. They are not awarded for projects in which a student proposes to work with a faculty member on the faculty member's research. For such faculty-designed projects, Boston College has Undergraduate Research Fellowships.

Students intending to write an Honors Thesis or Senior Thesis should consider applying in their junior year for Advanced Study Grants for Thesis Research, which fund summer research or skills-acquisition projects in direct support of a senior project that will be undertaken during the student’s senior year.

Undergraduate Research Fellowships Program

The Undergraduate Research Fellowships program enables students of at least sophomore status to gain firsthand experience in scholarly work by participating with a faculty member on a research project. Faculty members select students, and students receive a monetary award based upon the scope and duration of the project. Students do not receive academic credit
for these fellowships. Their value lies in the close mentoring relationship students can form while working with a faculty member. All full-time undergraduates of at least sophomore status are eligible. Fellowships are available for the fall, spring, and summer semesters. For more information on the program and application deadlines, consult the website for the University Fellowships Committee or inquire directly with faculty to express your interest in being involved in their research.

**National Fellowships Competitions**

Boston College students need to be aware, early in their undergraduate careers, of the fellowships and awards given on a competitive basis by national foundations. Fulbright Grants, Marshall Scholarships, Mellon Fellowships, National Science Foundation Fellowships, Rhodes Scholarships, and Truman Scholarships are among the major grants available. Some of these are available to juniors and seniors for undergraduate study. In order to have a realistic chance of competing for one of these awards, students need to plan ahead. Students interested in pursuing any of these opportunities should contact Dr. Jason Cavallari, the Associate Director of the University Fellowships Office. Many of these opportunities are especially for students planning a future in public service, so they are very appropriate for Political Science majors. In recent years, several of the Department's majors have, for instance, been awarded Fulbright Grants and Truman Scholarships. But early planning and preparation are important—the freshman year is not too early.

For further information about national fellowships, consult the [University Fellowships Committee](https://www.bc.edu/content/bc-web/academics/sites/university-catalog/undergraduate/mcas/political-science.html) website.

**Managed By**
Psychology, Undergraduate Programs - University Catalog

BOSTON COLLEGE

Psychology is the scientific study of how and why people think, feel, and behave as they do. Psychology focuses on understanding basic functions such as memory, emotion, visual perception, social interaction, development and learning, and problem solving and creativity, as well as on alterations to these functions in psychopathology, developmental disorders, or neurological disorders. Faculty in our department approach these topics from multiple, converging levels, using assessments of individual behavior, dynamic group interactions, and investigations of the neural processes and computations that give rise to behavior. Our courses embody the philosophy of Boston College’s liberal arts education, providing students the opportunity for intellectual growth and a deeper understanding of the scientific method as applied to the human condition. Our courses also provide the knowledge and tools necessary for students to prepare for graduate training.

The Psychology Department offers three majors: the Psychology Bachelor of Arts (B.A.) major, the Psychology Bachelor of Science (B.S.) major, and the Neuroscience Bachelor of Science (B.S.) major. Starting with the class of 2023 the requirements for the Psychology B.S. major will change, resulting in two distinct sets of requirements for the Psychology B.S. major: one for the classes of 2023 and after and one for the classes of 2022 and before. The Neuroscience B.S. major is new and is open to the classes of 2020 and after, but it cannot be declared until September 1, 2019. All three
degree options introduce students to the broad range of topics that psychologists study, while also allowing students to choose an individualized course of study and focus on some aspects of psychology in greater depth. Each option allows students to gain research experience working in one or more of our psychology labs.

The Psychology B.A. and the Psychology B.S. (classes 2023 and after) majors are particularly suited to students who wish to understand human behavior and mental function. Students will take Psychology courses relevant to social, developmental, biological, and cognitive psychology and will learn how animal models can be used to inform human behavior. Together these courses will provide students with an appreciation for the theories that have been put forth to explain human behavior and for the importance of considering clinical, cultural, social, biological, and developmental factors when trying to understand why humans think, feel, and act as they do. Both degree options introduce students to the broad range of topics that psychologists study, while also allowing students to choose an individualized course of study and focus on some aspects of psychology in greater depth.

The Psychology B.S. (classes of 2023 and after) will be a research-focused track. Students interested in psychology as it relates to other scientific disciplines and/or who are planning to pursue research-focused graduate work (e.g., Ph.D., M.D.) are encouraged to select the B.S. major. B.S. students will take courses in Psychology and choose from elective corequisites in departments including Economics, Computer Science, Biology, Chemistry, and Physics. Together these courses will provide students with an in-depth understanding of the scientific study of the human mind and with opportunities for exposure to hands-on, laboratory science. This major is well-suited for students interested in a research-based approach to psychology. For students who are more likely to pursue
graduate work without a focus on research (e.g., social work, law, Psy.D., Ed.D.) and/or would like greater flexibility in their course schedule, the B.A. may be more appropriate.

The Psychology B.S. (classes of 2022 and before) is particularly suited to students who wish to explore the brain mechanisms of human and animal behavior and mental functioning. Students will take courses from the Psychology, Biology, and Chemistry Departments that are related to evolution, genetics, physiology, neurobiology, and the neural basis of higher cognitive and emotional processes in humans. Together these courses will provide students with a strong foundation in the neurobiological processes that underlie behavior, motivation, and cognition. The Psychology B.S. (classes of 2022 and before) major covers most of the pre-medical requirements.

The Neuroscience B.S. is a new major that may be declared on or after September 1, 2019. It is a research-focused degree for students who are interested in understanding the biological basis of brain function in relation to thought and behavior. The major has co-requisites in Biology and Chemistry as well as elective natural science corequisites, and emphasizes exposure to hands-on, laboratory science. Students will take courses that are related to evolution, genetics, physiology, neurobiology, and the neural basis of higher cognitive and emotional processes in humans. Together these courses will provide students with a strong foundation in the neurobiological processes that underlie behavior, motivation, and cognition. The Neuroscience major covers many of the pre-medical requirements.

Requirements for Psychology B.A. Majors

Students must take a minimum of 33 credits in the Department, including the following required courses:
• PSYC1110 Introduction to Brain, Mind, and Behavior (formerly PSYC1110 Introduction to Psychology as a Natural Science) (3 credits). This course should be taken as soon as possible after entering the major.
• PSYC1111 Introduction to Psychology as a Social Science. This course should be taken as soon as possible after entering the major. PSYC1110 and PSYC1111 can be taken in either order.
• PSYC1120 Introduction to Behavioral Statistics and Research I (3 credits). This course should be taken in the sophomore year, when possible.
• Either PSYC1121 Introduction to Behavioral Statistics and Research II (3 credits) or a Research Practicum (3 credits). This course should be taken in the sophomore year, when possible.
• At least three 2000-level courses, which must include at least one course from three of the following five areas (9 credits each):
  ○ Abnormal: PSYC2234 Abnormal Psychology
  ○ Biological: PSYC2285 Behavioral Neuroscience or PSYC2289 Comparative Psychology: Study of Animal Behavior
  ○ Cognitive: PSYC2272 Cognitive Psychology: Mental Processes and their Neural Substrates or PSYC2274 Sensation and Perception
  ○ Developmental: PSYC2260 Developmental Psychology
  ○ Social and Personality: PSYC2241 Social Psychology or PSYC2242 Personality Theories
• Four additional courses in Psychology, at least three of which must be at the 3000-level or higher and the fourth course at the 2000-level or higher (3 credits each).

Requirements for Psychology B.S. Majors (Classes of 2022 and Before)
Students must take a minimum of 59 credits, including the following required courses:

### 30 Credits within the Department

- **PSYC1110 Introduction to Brain, Mind, and Behavior** (formerly PSYC1110 Introduction to Psychology as a Natural Science) (3 credits) and PSYC1111 Introduction to Psychology as a Social Science (3 credits) should both be taken, in either order, as soon as possible after entering the major, preferably in different semesters.
- **PSYC1120 Introduction to Behavioral Statistics and Research I** (3 credits). This course should be taken in the sophomore year, when possible.
- Either **PSYC1121 Introduction to Behavioral Statistics and Research II** (3 credits) or a Research Practicum (3 credits). This course should be taken in the sophomore year, when possible. The Research Practicum option is recommended for Psychology B.S. majors.
- **PSYC2285 Behavioral Neuroscience** (3 credits)
- Either of the following courses (3 credits):
  - PSYC2272 Cognitive Psychology: Mental Processes and their Neural Substrates
  - PSYC2274 Sensation and Perception
- Any one of the following courses (3 credits):
  - PSYC2234 Abnormal Psychology
  - PSYC2241 Social Psychology
  - PSYC2242 Personality Theories
  - PSYC2260 Developmental Psychology
- Three Psychology neuroscience courses (3 credits each): one from one of the following clusters and two from the other cluster. One of these three courses must be a designated laboratory course from one of these clusters. A Research Practicum may also be used to fulfill this
designated laboratory requirement, but the Research Practicum will not count toward one of these three required neuroscience cluster courses.

- **Cognitive/Affective Neuroscience Cluster:**
  - PSYC3329 Psychophysiology of Stress
  - PSYC3338 Topics in Abnormal Psychology
  - PSYC3341 Psychology of Morality
  - PSYC3360 How Extraterrestrials Think
  - PSYC3362 Mind of a Dog: How Canine Cognition Informs Human Psychology
  - PSYC3371 Cognitive Neuroscience: Exploring Mind and Brain
  - PSYC3372 Affective Neuroscience
  - PSYC3373 Learning and Motivation
  - PSYC3374 Cognitive Aging
  - PSYC3375 Psychology and Neuroscience of Human Memory
  - PSYC3378 Vision
  - PSYC3379 Disorders of Language and Communication
  - PSYC3391 Ethical Controversies in Psychology and Neuroscience
  - PSYC3397 Cognitive and Neural Bases of Person Knowledge
  - PSYC4437 Stress and Behavior
  - PSYC4472 Social Neuroscience
  - PSYC4473 Event-Related Potentials (laboratory course)
  - PSYC4476 Cognitive Neuroscience of Memory
  - PSYC5540 Advanced Topics in Social Psychology
  - PSYC5541 Moral Emotions
  - PSYC5571 Controversies in Cognitive Neuroscience
  - PSYC5574 Neuroscience of Sensation and Perception
  - PSYC5575 Advanced Affective Neuroscience
  - PSYC5576 Methods in Human Brain Mapping (laboratory course)
  - Any one of the following courses in a Cognitive/Affective Neuroscience laboratory (Brownell, Kensinger, Ritchey, Slotnick,
Young). (Only one semester of a thesis or scholar’s project course can be used to satisfy this requirement):

- PSYC4490 Senior Thesis I (laboratory course)
- PSYC4495 Senior Honors Thesis I (laboratory course)
- PSYC4497 Scholars Project Research (laboratory course)

- **Systems Neuroscience Cluster:**
  - PSYC3376 Developmental Neuroscience
  - PSYC3380 Neuroscience of Psychopathology
  - PSYC3381 Psychobiology of Emotional Learning
  - PSYC3382 Neurobiology of Stress
  - PSYC3383 Neurobiological Basis of Learning and Memory
  - PSYC3384 Neurophysiology
  - PSYC3385 Neurobiology of Motivation and Emotion
  - PSYC3386 Psychopharmacology
  - PSYC3388 Neurobiology of Eating and Eating Disorders
  - PSYC3389 Sex and Aggression
  - PSYC3390 Neurobiology of Psychiatric Disorders
  - PSYC5580 Neural Systems and Stress
  - PSYC5581 Neurobiology of Mental Illness
  - PSYC5583 Molecular Basis of Learning and Memory
  - PSYC5585 Brain Systems: Motivation and Emotion
  - Any one of the following courses in a Behavioral Neuroscience laboratory (Christianson, McDannald, Petrovich). (Only one semester of a thesis or scholars project course can be used to satisfy this requirement)
    - PSYC4490 Senior Thesis I (laboratory course)
    - PSYC4495 Senior Honors Thesis I (laboratory course)
    - PSYC4497 Scholars Project Research (laboratory course)

29 Credits outside the Department
Three Biology Courses (9 credits):
  - BIOL2000 Molecules and Cells

Any two of the following Biology courses:
  - BIOL2010 Ecology and Evolution
  - BIOL3030 Introduction to Physiology
  - BIOL3040 Cell Biology
  - BIOL3150 Introduction to Genomics
  - BIOL3190 Genetics and Genomics
  - BIOL4260 Human Anatomy
  - BIOL4320 Developmental Biology
  - BIOL4330 Human Physiology
  - BIOL4350 Biological Chemistry
  - BIOL4590 Introduction to Neuroscience

Two Chemistry courses (8 credits):
  - CHEM1109 General Chemistry I with Lab (CHEM1111)
  - CHEM1110 General Chemistry II with Lab (CHEM1112)

Two Mathematics courses (6 credits):
  - Two courses at the level of MATH1100 or above. MATH1004 Finite Probability and Applications is also accepted. MATH1100 and MATH1101 (Calculus I and II) are highly recommended for those who plan to go on to a doctoral program in neuroscience.

Two of the following courses (6 credits):
  - At least two additional upper-level, one-semester courses from Chemistry, Physics, Biology, or the Psychology Cognitive/Affective Neuroscience or Systems Neuroscience clusters listed above.
  - Students planning on applying to doctoral programs in Neuroscience should consult with their advisor about which of these courses to choose. Biology and Physics courses must be 3000-level or above. Chemistry courses must be 2000-level or above. Important: Whenever an upper-level Biology, Chemistry, or
Physics course that has an associated lab is taken, the student must also take the lab.

- Highly recommended for those who plan to go on to a doctoral program in neuroscience are: CHEM2231 Organic Chemistry I and CHEM2232 Organic Chemistry II, or PHYS2209 Introduction to Physics I and PHYS2210 Introduction to Physics II.

Requirements for Psychology B.S. Majors (Classes of 2023 and After)

Students must take a minimum of 54 credits, including the following required courses:

36 Credits within the department

- Either PSYC1110 Introduction to Brain, Mind, and Behavior (formerly PSYC1110 Introduction to Psychology as a Natural Science) (3 credits)
  or PSYC1029 Mind and Brain (3 credits)
- PSYC1111 Introduction to Psychology as a Social Science (3 credits)
- PSYC1120 Introduction to Behavioral Statistics and Research I (3 credits)
- Any Research Practicum (3 credits)
- At least three 2000-level courses, which must include one course from three of the following five areas (9 credits):
  - Abnormal: PSYC2234 Abnormal Psychology
  - Biological: PSYC2285 Behavioral Neuroscience or PSYC2289 Comparative Psychology: Study of Animal Behavior
  - Cognitive: PSYC2272 Cognitive Psychology: Mental Processes and their Neural Substrates or PSYC2274 Sensation and Perception
  - Developmental: PSYC2260 Developmental Psychology
- Social and Personality: PSYC2241 Social Psychology or PSYC2242 Personality Theories
- Five additional courses in Psychology, at least four of which must be at the 3000-level or higher and the fifth course at the 2000-level or higher (15 credits)

**18 Related Science Credits**

- Two of the following courses (6 or more credits):
  - CSCI1101 Computer Programming I (recommended)
  - MATH1004 Finite Probability and Applications
  - MATH1100 Calculus I
  - MATH2210 Linear Algebra
- 12 additional science credits from the following:
  - Any Biology course at the level of BIOL2000 or above (excluding BIOL2040)
  - Any Computer Science course at the level of CSCI1102 or above
  - Any Math course at the level of MATH1100 or above
  - Any Physics course at the level of PHYS2101 or above
  - CHEM1105 Chemistry and Society I
  - CHEM1106 Chemistry and Society II
  - CHEM1109 General Chemistry I with Lab (CHEM1111)
  - CHEM1110 General Chemistry II with Lab (CHEM1112)
  - ECON2201 (or ECON2203) Microeconomic Theory
  - ECON3305 Market Design
  - ECON3308 Game Theory in Economics
  - ECON3312 Evolutionary Economics
  - LING 2379 Language and Ethnicity
  - LING 3101 General Linguistics
  - LING 3102 Syntax and Semantics
  - LING 3103 Language and Language Types
- LING 3104 Formalism and Functionalism in Linguistics
- LING 3362 Language in Society
- LING 3378 Second Language Acquisition
- Only one of the following Psychology laboratory courses:
  - PSYC2205 Undergraduate Research
  - PSYC4490 Senior Thesis I
  - PSYC4495 Senior Honors Thesis I
  - PSYC4497 Scholars Project Research

For all B.S. students, participation in research in a laboratory setting (e.g., enrolling in Senior Thesis) is strongly recommended.

**Requirements for Neuroscience B.S. Majors**

This major may be declared starting on September 1, 2019.

Students must take a minimum of 57 credits, including the following required courses.

**Foundation (24 Credits)**

- Either PSYC1110 Introduction to Brain, Mind, and Behavior (formerly PSYC1110 Introduction to Psychology as a Natural Science) (3 credits) or PSYC1029 Mind and Brain (3 credits)
- Either PSYC2272 Cognitive Psychology: Mental Processes and their Neural Substrates (3 credits) or PSYC2274 Sensation and Perception (3 credits)
- BIOL2000 Molecules and Cells (3 credits)
- CHEM1109 General Chemistry I with lab (4 credits) or CHEM1117 Honors Modern Chemistry I with lab (4 credits)
- CHEM1110 General Chemistry II with lab (4 credits) or CHEM1118 Honors Modern Chemistry II with lab (4 credits)
- MATH1100 Calculus I (4 credits) or MATH1102 Calculus I (Math and Science Majors) (4 credits)
- PSYC2285 Behavioral Neuroscience (3 credits) or BIOL4590 Introduction to Neuroscience

**Computation (6 Credits)**

- Any one of the following courses:
  - PSYC1120 Introduction to Behavioral Statistics and Research I
  - BIOL2300 Biostatistics
  - ECON1151 Statistics
  - MATH3353 Statistics
  - MATH4427 Mathematical Statistics
  - SOCY2200 Statistics
- Any one of the following courses:
  - PSYC1121 Introduction to Behavioral Statistics and Research II
  - CSCI1101 Computer Science I
  - CSCI1102 Computer Science II
  - CSCI2227 Introduction to Scientific Computation
  - MATH1101 Calculus II, MATH1103 Calculus II (Math and Science Majors) or MATH1105 Calculus II-AP (Math and Science Majors)
  - MATH2210 Linear Algebra
  - A PSYC Research Practicum (cannot be double counted to fulfill Praxis requirement)

**Cognitive Neuroscience (6 Credits)**

- Any two of the following courses:
  - PSYC3338 Topics in Abnormal Psychology
  - PSYC3371 Cognitive Neuroscience: Exploring Mind and Brain
- PSYC3372 Affective Neuroscience
- PSYC3373 Learning and Motivation
- PSYC3374 Cognitive Aging
- PSYC3375 Psychology and Neuroscience of Human Memory
- PSYC3378 Vision
- PSYC3391 Ethical Controversies in Psychology & Neuroscience
- PSYC3397 Cognitive and Neural Bases of Person Knowledge
- PSYC4437 Stress and Behavior
- PSYC4446 Social Neuroscience
- PSYC4476 Cognitive Neuroscience of Memory
- PSYC5570 Advanced Topics in Cognitive Neuroscience
- PSYC5571 Controversies in Cognitive Neuroscience
- PSYC5574 Neuroscience of Sensation and Perception
- PSYC5575 Advanced Affective Neuroscience

**Systems Neuroscience (6 Credits)**

- Any two of the following courses:
  - BIOL4450 Behavioral Ecology
  - PSYC3376 Developmental Neuroscience
  - PSYC3381 Psychobiology of Emotional Learning
  - PSYC3382 Neurobiology of Stress
  - PSYC3383 Neurobiological Basis of Learning and Memory
  - PSYC3384 Neurophysiology
  - PSYC3385 Neurobiology of Motivation and Emotion
  - PSYC3386 Psychopharmacology
  - PSYC3387 Developmental Neuroscience and Behavior
  - PSYC3388 Neurobiology of Eating and Eating Disorders
  - PSYC3389 Sex and Aggression
  - PSYC3390 Neurobiology of Psychiatric Disorders
  - PSYC5585 Brain Systems: Motivation and Emotion
- PSYC5587 Cellular Perspectives on Motivated Behavior
- PSYC5589 Neural Systems and Social Behavior

**Electives (12 Credits)**

- Any four courses from the following:
  - Courses listed in the Cognitive Neuroscience and Systems Neuroscience clusters above. (Courses cannot double-count for both the cluster and elective requirements.)
  - Only one of:
    - BIOL4350 Biological Chemistry
    - CHEM4461 Biochemistry I
    - CHEM4465 Introduction to Biochemistry
  - CSCI3341 Artificial Intelligence
  - CSCI3343 Computer Vision
  - CSCI3345 Machine Learning
  - Up to a limit of six credits from the following courses, except for those explicitly listed above: Biology courses at the 3000 level or above, or Chemistry or Physics courses at the 2000 level or above.

**Praxis (3 credits)**

- Any one of the following courses:
  - PSYC2205 Undergraduate Research*
  - PSYC2206 Independent Study*
  - PSYC4401 Research Practicum in Computational Methods
  - PSYC4470 Research Practicum in Cognition Psychology
  - PSYC4471 Research Practicum in Experimental Psychology
  - PSYC4473 Event-Related Potentials
  - PSYC4477 Research Practicum in Cognitive Neuroscience
  - PSYC4478 Research Practicum in Human Memory
- PSYC4479 Research Practicum in Neurogastronomy
- PSYC4490 Senior Thesis I*
- PSYC4491 Senior Thesis II*
- PSYC4495 Senior Honors Thesis I*
- PSYC4496 Senior Honors Thesis II*
- PSYC4474 Research Practicum in Sensation and Perception
- PSYC4481 Research Practicum in Behavioral Neuroscience
- PSYC5579 Methods in Human Brain Mapping

*Students may conduct research with any faculty member, including those conducting neuroscience research outside of the Psychology Department. Projects should have significant neuroscience components, and course proposals are subject to review by the Director of Undergraduate Studies.

**Advanced Placement**

All majors: A score of four or five on the Psychology A.P. exam may be substituted for either PSYC1110 or PSYC1111, but students making this substitution are required to take an additional upper-level Psychology course (one numbered 2000 or higher) to complete their major.

Psychology B.S. and Neuroscience majors: A score of four or five on the A.P. exams for the natural science and math courses associated with these majors may be substituted for the required courses in those subject areas. Students are not required to take additional upper-level courses to replace these natural science and math substitutions.

**Senior Thesis**

Students in all three majors may choose to write a thesis during the senior year. In most cases, the thesis will involve original, empirical research,
although theoretical papers will also be permitted. Students must obtain the consent of a faculty member to serve as their thesis advisor.

Those who are interested in writing a thesis are encouraged to participate in an Independent Study with a prospective thesis advisor during the junior year to develop a thesis proposal.

Seniors who are engaged in writing a thesis may enroll in PSYC4490 in the fall and/or PSYC4491 in the spring. Only one semester may count as an elective to fulfill a major requirement. Students who plan to write a thesis are advised to complete PSYC1120 Introduction to Behavioral Statistics and Research I and either PSYC1121 Introduction to Behavioral Statistics and Research II or a Research Practicum before their senior year.

Students whose theses are judged to be of exceptional merit will receive a note that their “Senior thesis passed with distinction.” This is kept on file in the Psychology Department but not noted on their transcripts.

Clinical Concentration

The Undergraduate Clinical Concentration is designed for majors with a particular interest in careers in clinical or counseling psychology or clinical social work. The concentration lays a solid foundation in coursework, research, and field experiences to help students decide whether they wish to apply to a graduate program and obtain licensure to practice in a clinical field.

To complete the clinical concentration, students must satisfy their major requirements and some additional course requirements. A complete description of the concentration, along with a listing of the additional required courses, is available at the Academic Opportunities page. Students
should contact the concentration adviser, Karen Rosen, for additional information, if necessary.

This concentration is normally not open to Psychology B.S. or Neuroscience B.S. majors. The department is concerned that the heavier load of the B.S. requirements along with the added requirements of the Clinical Concentration will interfere with students becoming involved in research early in their studies and their undertaking an independent research project in their senior year; however, B.S. majors and Neuroscience majors may petition the Department for permission to pursue the Clinical Concentration by contacting Dr. Michael Moore, the Department's Director of Undergraduate Studies, as early as possible. Note that the clinical concentration is easily compatible with the new Psychology B.S. requirements to be introduced starting with the class of 2023.

**Honors Program**

The Psychology Honors Program offers students in our majors an excellent opportunity to get involved in research. The program is for students with strong academic records who wish to devote a substantial amount of time in their senior year to a senior honors thesis.

Students who are eligible to participate in the Psychology Honors Program receive a letter from the Honors Program Director at the beginning of their junior year. Students who meet or exceed the GPA requirement, in Psychology and overall, will be invited to join the Honors Program. The Honors Program requires a GPA of 3.6. If they are interested in participating in this program, students need to identify a Psychology faculty member who is willing to supervise them in their work. Students then need to complete a preliminary application by November 1 of their junior year. On this application, they need to indicate the issue or topic they would like to
investigate in their honors thesis and the name of a faculty member in the Psychology Department who has agreed to work with them.

By May 15 of their junior year, students need to submit a Thesis Proposal Approval Form to the Psychology Department. Students then begin the process of executing the research plan and continue to work on the research project (including data collection and analysis and completing the final written thesis) throughout the senior year.

The principal requirement of the Honors Program is the successful completion of the Honors Thesis. During their senior year, students should enroll in PSYC4495–4496 Senior Honors Thesis I and II. In addition, students in the Honors Program are required to take one additional upper-level course (5000-level or above). One semester of the Senior Honors Thesis course (PSYC4495) may count toward the major requirements. The second semester of the Senior Honors Thesis course (PSYC4496) and the 5000-level course are taken in addition to the courses required for the majors. Therefore, students in the Honors Program will have completed two courses in Psychology beyond the basic major requirements.

A copy of the thesis accompanied by an Honors Thesis Approval Form must be submitted to the Department by May 1 of the senior year. A presentation of the student's honors thesis at the Psychology Undergraduate Research Conference in May of the senior year will provide all students in the Honors Program the opportunity to share their work with members of the Psychology Department.

Those students, who fulfill all of the Honors Program course requirements, maintain their required GPA in Psychology and overall at the time of graduation, and successfully complete the final written thesis, will be deemed to have completed the Psychology Honors Program successfully.
For further information about the requirements of the Honors Program, distinctions between the MCAS Honors and Psychology Honors Programs, and what to do if you are planning to study abroad, visit the Psychology Department website and/or contact the Director of the Honors Program in the Psychology Department.

**Study Abroad**

Psychology and Neuroscience majors should arrange an appointment with their advisor for permission to study abroad. Students should meet with the Director of Undergraduate Studies for permission to apply courses taken abroad towards meeting major requirements. These decisions about international study are made on a case-by-case basis. Approval should be obtained before the start of the study abroad program.

**Fifth Year M.A. Program**

The Fifth Year M.A. program allows selected students to earn both a B.A. or B.S. in Psychology or in Neuroscience and an M.A. in Psychology in five years. The purpose of the program is to give students a greater opportunity for concentrated study and research training. Such training is excellent preparation for application to a Ph.D. program in any area of psychology. The Fifth Year M.A. program is limited to Boston College undergraduates who are majoring in Psychology or Neuroscience, and the fifth year must follow immediately after the fourth.

The Psychology Department has the following areas of concentration. Visit the Department's website for additional information on these areas.

- Behavioral Neuroscience
- Cognitive Psychology and Cognitive Neuroscience
• Social Psychology
• Developmental Psychology
• Quantitative Psychology

Fifth Year B.A./M.S.W. Program

This program is available only to Psychology B.A. majors.

In cooperation with the Graduate School of Social Work, the Psychology Department offers a dual five-year master’s degree program for those students who have decided upon a career in social work. Students in this program complete their undergraduate requirements including those for the Psychology B.A. major during their first four years. In addition, in their junior year students begin to take Social Work courses. Upon successful completion of all undergraduate requirements, students receive the B.A. after their senior year at which time they are formally enrolled in the Graduate School of Social Work. Upon successful completion of all graduate requirements at the end of the fifth year, students are awarded the M.S.W. Students apply for admission to the five-year program during their sophomore year. Contact faculty advisor Michael Moore in the Psychology Department for more information.

Faculty Advisement

All majors should seek psychology faculty advisement prior to each registration period. Psychology faculty members provide expanded office hours during these periods. Students interested in studying abroad should seek the consent of their advisor. Students who desire to change advisors should contact the Director of Undergraduate Studies.
Majors who do not have an academic advisor (e.g., majors in their first year of study or recent transfer students) should consult with the Director of Undergraduate Studies prior to registration.

**Social Science Core Requirements**

Students may fulfill the Social Science Core requirement with any two Psychology courses with a number between 1010 and 1111 (e.g., PSYC1011, PSYC1021, PSYC1029, PSYC1032, PSYC1072, PSYC1110, and PSYC1111).

Students receiving a four or five on the Psychology AP exam are considered to have fulfilled half of the Social Science Core requirement.

**Prerequisites**

Course prerequisites are listed with each course description. If none is listed, the course has no prerequisites.

**Guide to Psychology Course Numbering**

**PSYC1000–PSYC1009:** Courses that *do not* satisfy the Social Science Core requirement and do not provide credit toward completion of the Psychology major.

**PSYC1010–PSYC1099:** Core courses that satisfy the Social Science Core requirement but *do not* provide credit toward completion of the Psychology major, with the exception of PSYC1029, which counts toward completion of the Psychology B.S. and Neuroscience B.S. majors.

**PSYC1110–PSYC1111:** Courses that satisfy the Social Science Core requirement and also provide credit toward completion of the Psychology and Neuroscience majors.
PSYC2000–PSYC2999: Introductions to primary subdisciplines of psychology, serving as prerequisites to more advanced courses.
PSYC3000–PSYC3999: More advanced and/or specialized courses requiring one or more 2000-level courses as prerequisites.
PSYC4000–PSYC4999: Research practica and advanced seminars in various areas of psychology limited to Psychology and Neuroscience majors.
PSYC5000–PSYC5999: Seminars and Advanced Topics courses open to advanced undergraduates and to graduate students.
PSYC6000 and above: Graduate-level courses.

Lyons Hall 103
Romance Languages and Literatures, Undergraduate Programs - University Catalog

The Department of Romance Languages and Literatures offers both majors and minors in French, Hispanic Studies, and Italian, each of which affords a wide exposure to international culture and literature in the target language. The major offers extensive preparation and guidance for students interested in teaching or in graduate studies and serves as an important foundation for work in many diverse fields such as law, medicine, interpreting, politics, publishing, and international business, to name only a few. The minor is a strong complement to other major programs at Boston College, offering linguistic proficiency as well as the analytic fundamentals of written and visual culture.

Unless otherwise stated, all courses are taught in the target language.

- French Studies
- Hispanic Studies
- Italian Studies
- Study Abroad Guidelines and Policies
- Getting Started
- Core Offerings: Literature and Cultural Diversity
- The Departmental Honors Program
- Undergraduate Research Positions
French Studies

A French Studies major assures exceptional competence in French, allowing students to work extensively and closely with literary and cultural artifacts that language makes possible. Building on their linguistic proficiency consolidated in the language program, majors expand that proficiency to a wide variety of French texts. This training exercises and assures our students' ability to analyze texts and contexts, as well as to conceive, articulate, and defend an original idea.

French Studies minors reap similar benefits, albeit to a lesser extent, by attaining linguistic proficiency and taking at least two 4000-level courses.

Language Courses for the Major and Minor

Students begin the program at the level most appropriate for their linguistic proficiency. Contact Prof. Andrea Javel (andrea.javel@bc.edu) for guidance about placement.

French Studies majors and minors may begin their program with Conversation, Composition and Reading I (FREN2209) or II (FREN2210).

French Studies Major Requirements

30 Credits (ten 3-credit courses), which must include:

- 12 credits (four 3-credit foundation courses) to be chosen from among the following:
  - FREN3305 Wordplay: From the Stage to the Page
  - FREN3306 Narrative and Identity
  - FREN3307 Great Books in French
- FREN3308 Building Fluency: Advanced Language Practice
- FREN3309 Artists and their Writings

- **12 credits (four advanced courses)** in French language, literature, or culture at the 4000 level or above.

- **6 credits (two elective courses)** to be chosen among the following:
  - FREN2209 and FREN2210 French Conversation, Composition and Reading I and II (as entry-level courses only)
  - Additional courses in French Studies at the 3000 or 4000 level
  - Related courses with departmental permission

**Notes and Conditions**

- French Studies majors are required to enroll in at least one advanced course (4000 level or above) each semester of their senior year, regardless of whether they have completed the ten-course requirement for the major.
- 1-credit practicum courses do not count for the major.
- Maximum total transfer credit toward the major from study abroad: 15 credits (five 3-credit courses) for one year of study; 9 credits (three 3-credit courses) for one semester of study. No RLL credit will be granted for courses abroad conducted in English taken during a semester or academic year program.
- Credit toward the French Studies major will be granted for courses taken abroad (1) conducted in French; (2) of the sophistication and level of expectations appropriate for our program; (3) directly related to analysis of French-speaking peoples' cultural production. Students taking courses in other disciplines are encouraged to seek credit for those courses in the appropriate departments.
- French Studies majors who transfer 9 credits (3 three-credit courses) or more from study abroad or elsewhere outside the department must
take their remaining courses towards the major in the department.

- Students who do not study abroad may take up to two courses related to their major program of study outside the Department of Romance Languages and Literatures, with departmental permission.

- Approval for summer courses taught by Boston College faculty, including courses abroad, will be granted on a case-by-case basis by the Director of Undergraduate Studies in consultation with the French Studies section.

**French Studies Minor Requirements**

**18 Credits (six 3-credit courses), which must include:**

- **6 credits (two foundation courses)** to be chosen from among the following:
  - FREN3305 Wordplay: From the Stage to the Page
  - FREN3306 Narrative and Identity
  - FREN3307 Great Books in French
  - FREN3308 Building Fluency: Advanced Language Practice
  - FREN3309 Artists and their Writings

- **3 credits (one advanced course)** at the 4000 or 7000 level

- **9 credits (three elective courses)** to be chosen among the following:
  - FREN2209 and FREN2210 French Conversation, Composition, and Reading I and II (as entry level courses only)
  - Additional courses at the 3000 or 4000 level in French

**Notes and Conditions**

- French Studies minors must enroll in at least one advanced course (4000 level and above) during their senior year, regardless of whether they have completed the six-course requirement for the minor.
• 1-credit practicum courses do not count for the minor.
• Maximum total transfer credit toward a minor from study abroad: 9 credits (three approved 3-credit courses) for one year of study; 6 credits (two approved 3-credit courses) for one semester of study. No RLL credit will be granted for courses abroad conducted in English taken during a semester or academic year program.
• Credit toward the French Studies major will be granted for courses taken abroad (1) conducted in French; (2) of the sophistication and level of expectations appropriate for our program; (3) directly related to analysis of French-speaking peoples’ cultural production. Students taking courses in other disciplines are encouraged to seek credit for those courses in the appropriate departments.
• French Studies minors who transfer 9 credits (three 3-credit courses) or more from study abroad or elsewhere outside the department must take their remaining courses towards the minor in the department.
• All courses for the French minor will normally be in French, though one relevant course taught in English may be counted toward the minor with permission from the French Section.
• Approval for summer courses taught by Boston College faculty, including courses abroad, will be granted on a case-by-case basis by the Director of Undergraduate studies in consultation with the French section.

**Hispanic Studies**

A Hispanic Studies major assures exceptional competence in Spanish, allowing students to work extensively and closely with literary and cultural artifacts that language makes possible. Building on their linguistic proficiency consolidated in the language program, majors expand that proficiency to a wide variety of Hispanic texts. This training exercises and
assures our students' ability to analyze texts and contexts, as well as to conceive, articulate, and defend an original idea.

Hispanic Studies minors reap similar benefits, albeit to a lesser extent, by attaining linguistic proficiency and taking at least two 6000-level courses.

Language Courses for the Major and Minor

Students begin the program at the level most appropriate for their linguistic proficiency. Advanced, heritage, and native speakers of Spanish should seek advisement to determine where to enter the program from Professor Adela Penagos (adela.penagos@bc.edu).

Non-native Spanish speaking majors and minors may begin the program with Conversation, Composition and Reading II (SPAN2216) or Advanced Spanish (SPAN3392). Strong students who have taken Conversation, Composition and Reading II (SPAN2216) are not required to take Advanced Spanish (SPAN3392), but may do so if appropriate.

Note that linguistic proficiency equivalent to Advanced Spanish (SPAN3392) is a prerequisite for Contextos: Introduction to Literary Analysis in Spanish (SPAN3395), and Contextos is a prerequisite for all upper-level courses (SPAN6000 and above).

Hispanic Studies Major Requirements

30 Credits (ten 3-credit courses), which must include:

- 3 credits (one course) in SPAN3395 Contextos
- 12 credits (four advanced courses) at the 6000 level in literature and culture, which must include at least one course in each of the
following categories:
  o Pre-1800 Peninsular literature and culture
  o Pre-1900 Latin American literature and culture
  o Post-1800 Peninsular literature and culture
  o Post-1900 Latin American literature and culture

- **15 credits (five elective courses),** which may be chosen from:
  o SPAN2216 Spanish Conversation, Composition, and Reading II (as entry-level course only)
  o SPAN3392 Advanced Spanish
  o Additional courses at the 3000 or 6000 level in Hispanic Studies
  o Related courses with departmental permission

**Notes and Conditions**

- Hispanic Studies majors are required to enroll in at least one 6000 level course each semester of their senior year, regardless of whether they have completed the ten-course requirement for the major.
- 1-credit practicum courses do not count for the major.
- Maximum total transfer credit toward the major from study abroad: 15 credits (five 3-credit courses) for one year of study; 9 credits (3 three-credit courses) for one semester of study. No RLL credit will be granted for courses abroad conducted in English taken during a semester or academic year program.
- Credit toward the Hispanic Studies major will be granted for courses taken abroad (1) conducted in Spanish; (2) of the sophistication and level of expectations appropriate for our program; (3) directly related to analysis of Spanish-speaking peoples’ cultural production. Students taking courses in other disciplines are encouraged to seek credit for those courses in the appropriate departments.
Hispanic Studies majors who transfer 9 credits (three 3-credit courses) or more from study abroad or elsewhere outside the department must take their remaining courses towards the major in the department.

Students, who have taken SPAN3392 Advanced Spanish, will not receive credit toward the major for language or proficiency-building courses taken abroad.

Students who do not study abroad may take up to two courses related to their major program of study outside the Department of Romance Languages and Literatures, with permission of the Hispanic Studies section.

Approval for summer courses taught by Boston College faculty, including courses abroad, will be granted on a case-by-case basis by the Director of Undergraduate studies in consultation with the Hispanic Studies section.

Hispanic Studies Minor Requirements

18 Credits (six 3-credit courses), which must include:

- 3 credits (one course): SPAN3395 Contextos
- 6 credits (two advanced courses) at the 6000 level in literature and culture
- 9 credits (three elective courses), which can be chosen from:
  - SPAN2216 Spanish Conversation, Composition, and Reading II (as entry-level course only)
  - SPAN3392 Advanced Spanish
  - Additional courses at the 6000 level in Hispanic Studies

Notes and Conditions
• Hispanic Studies minors must enroll in at least one 6000 level course during their senior year, regardless of whether they have completed the six-course requirement for the minor.
• 1-credit practicum courses do not count for the minor.
• Maximum total transfer credit toward the minor from study abroad: 9 credits (three approved 3-credit courses) for one year of study; 6 credits (two approved 3-credit courses) for one semester of study. No RLL credit will be granted for courses abroad conducted in English taken during a semester or academic year program.
• Credit toward the Hispanic Studies major will be granted for courses taken abroad (1) conducted in Spanish; (2) of the sophistication and level of expectations appropriate for our program; (3) directly related to analysis of Spanish-speaking peoples’ cultural production. Students taking courses in other disciplines are encouraged to seek credit for those courses in the appropriate departments.
• Students, who have taken SPAN3392 Advanced Spanish, will not receive credit toward the minor for grammar or proficiency-building courses taken abroad.
• All courses for the Hispanic Studies minor will normally be in Spanish, though one relevant course taught in English may be counted toward the minor with permission from the Hispanic Studies Section.
• Approval for summer courses taught by Boston College faculty, including courses abroad, will be granted on a case-by-case basis by the Director of Undergraduate Studies in consultation with the Hispanic Studies section.

**Italian Studies**

An Italian Studies major assures exceptional competence in Italian, allowing students to work extensively and closely with literary and cultural artifacts that language makes possible. Building on their linguistic proficiency
consolidated in the language program, majors expand that proficiency to a wide variety of Italian texts. This training exercises and assures our students' ability to analyze texts and contexts, as well as to conceive, articulate, and defend an original idea.

Italian Studies minors reap similar benefits, albeit to a lesser extent, by attaining linguistic proficiency and taking at least two advanced courses.

**Language Courses for the Major and Minor**

Students begin the program at the level most appropriate for their linguistic proficiency. For advisement about elementary and intermediate level placement, contact Prof. Brian O'Connor (oconnobc@bc.edu). For advisement at the post-intermediate level, contact Prof. Mattia Acetoso (acetoso@bc.edu).

Italian Studies majors and minors may begin their program with Conversation, Composition and Reading I (ITAL2213) or II (ITAL2214).

**Italian Studies Major Requirements**

30 Credits (ten 3-credit courses), which must include:

- **18 credits (six advanced courses)** in Italian literature or culture (5000 level and above)
- **12 credits (four elective courses)** to be chosen from the following:
  - ITAL2213 and ITAL2214 Italian Conversation, Composition and Reading I and II (as entry-level courses only)
  - Additional courses at the 3000, 5000 or 8000 level.
  - Related courses with departmental permission.
Notes and Conditions

- An Advanced Placement high school course in Italian with an exam score of 4 or 5 will count toward the Italian Studies major as one 3-credit elective.
- Italian Studies majors are required to enroll in at least one advanced course (5000 level and above) each semester of their senior year, regardless of whether they have completed the ten-course requirement for the major.
- 1-credit practicum courses do not count for the major.
- Maximum total transfer credit toward the major from study abroad: 15 credits (five 3-credit courses) for one year of study; 9 credits (three 3-credit courses) for one semester of study. No RLL credit will be granted for courses abroad conducted in English taken during a semester or academic year program.
- Credit toward the Italian Studies major will be granted for courses taken abroad (1) conducted in Italian; (2) of the sophistication and level of expectations appropriate for our program; (3) directly related to analysis of Italian-speaking peoples’ cultural production. Students taking courses in other disciplines are encouraged to seek credit for those courses in the appropriate departments.
- Students who transfer 9 credits (three 3-credit courses) or more from study abroad or elsewhere outside the department must take their remaining courses towards the major in the department.
- Students who do not study abroad may take up to two courses related to their major program of study outside the Department of Romance Languages and Literatures, with departmental permission.
- Approval for summer courses taught by Boston College faculty, including courses abroad, will be granted on a case-by-case basis by the Director of Undergraduate Studies in consultation with the Italian Studies section.
Italian Studies Minor Requirements

18 Credits (six 3-credit courses), which must include:

- **6 credits (two foundation courses):** ITAL2213 and ITAL2214 (Italian Conversation, Composition, and Reading I and II)
- **6 credits (two advanced courses)** in Italian Literature or Culture at the 5000 level or above (courses for undergraduates)
- **6 credits (two elective courses)** in Italian Literature or Culture at the 3000 level or above

Notes and Conditions

- An Advanced Placement high school course in Italian with an exam score of 4 or 5 will count toward the Italian Studies minor as one 3-credit elective.
- Italian Studies minors must enroll in one advanced course (5000 level or above) during their senior year, regardless of whether they have completed the six-course requirement for the minor.
- 1-credit practicum courses do not count for the minor.
- Maximum transfer credit toward a minor from study abroad: 9 credits (three approved 3-credit courses) for one year of study; 6 credits (two approved 3-credit courses) for one semester of study. No RLL credit will be granted for courses abroad conducted in English taken during a semester or academic year program.
- Credit toward the Italian Studies minor will be granted for courses taken abroad (1) conducted in Italian; (2) of the sophistication and level of expectations appropriate for our program; (3) directly related to analysis of Italian-speaking peoples’ cultural production. Students taking courses in other disciplines are encouraged to seek credit for those courses in the appropriate departments.
• All courses for the Italian Studies minor will normally be in Italian, though one relevant course taught in English may be counted toward the minor with permission from the Italian Studies Section.
• Approval for summer courses taught by Boston College faculty, including courses abroad, will be granted on a case-by-case basis by the Director of Undergraduate Studies in consultation with the Italian Studies section.

Study Abroad Guidelines and Policies

Majors and minors in French, Hispanic Studies, and Italian are encouraged to study abroad. Interested students should consult with the appropriate program director in the Office of International Programs.

No RLL credit will be granted for courses taken abroad conducted in English.

In order to earn credit in an RLL major or minor, courses must be in the target language, show a direct relationship to the student's program of study in the department, and have a level of sophistication comparable to departmental offerings. Students are encouraged to seek credit for courses in other disciplines, such as (but not limited to) economics, political science, communications, and history, from appropriate Boston College departments.

Students are urged to consult with the Director of Undergraduate Studies for pre-approval of any courses they would like to transfer into a major or minor in French, Hispanic Studies, or Italian. This should happen before departure or on-site abroad before enrollment. Students who seek approval only after they return from abroad risk not receiving Romance Languages and Literatures credit for courses taken abroad. Upon return, students
should meet with the Director of Undergraduate Studies to obtain the appropriate signed forms.

To schedule an appointment with the Director of Undergraduate Studies, contact the Romance Languages and Literatures Department, Lyons 304, 617-552-3820; rll@bc.edu.

Transfer of Credit from Study Abroad

Romance Languages and Literatures majors may earn credit for up to three courses (9 credits) toward their major in a single semester of study abroad, and credit for up to five courses (15 credits) in a two-semester program. Courses must be related to textual and cultural analysis and must be in the target language. Majors who transfer 9 credits or more (three 3-credit courses) from study abroad into their RL&L major must take their remaining courses in the department.

Romance Languages and Literatures minors may earn credit for up to two courses (6 credits) toward their minor in a single semester of study abroad, and credit for up to three courses (9 credits) in a year-long program. Courses must be related to textual and cultural analysis and must be in the target language.

For more detailed information about foreign study credit transfer, visit the Romance Languages and Literatures Study Abroad web page.

For further information or to declare a major or minor, please contact the Romance Languages and Literatures Department, Lyons 304; rll@bc.edu.

Getting Started
Students who plan to major or minor in Romance Languages and Literatures should consult the Director of Undergraduate Studies to review their qualifications, establish correct placement in the program and organize a course of study suited to their individual needs and objectives.

**Information for First-year Majors and Non-majors**

Students considering a major or minor in Romance Languages and Literatures are welcome to contact the Director of Undergraduate Studies to discuss how the program might relate to and enhance their career and life objectives ([rll@bc.edu](mailto:rll@bc.edu)).

Students who have not already fulfilled the language proficiency requirement through an achievement or advanced placement test should sign up for an appropriate language course. Refer to the requirements for the Morrissey College of Arts and Sciences degree programs found in the Academic Regulations section of this catalog. Placement tests in French and Spanish are available.

The RLL Department offers courses, some taught in the target languages and some in English, that satisfy University Core requirements and also earn credit in the major or minor. Students interested in advancing their major credits at the early stages of their Boston College careers are encouraged to take these Core courses.

**Core Offerings: Literature and Cultural Diversity**

All the courses offered in the Department of Romance Languages and Literatures explore the culture and literature of countries around the world.
where French, Italian, and Spanish are spoken. In addition, the department has created a number of courses for inclusion in the Morrissey College of Arts and Sciences Core, both Literature and Cultural Diversity, which are designed for non-specialists.

**Literature Core**

Core offerings, whether in the target language or in translation, treat texts in their full linguistic, artistic, and cultural contexts. Literature Core courses offer students close exposure to great narrative arts, whether visual or written, under the guidance of a professor sensitive to their original language. Comparative literature courses introduce students to the interplay of artistic forms and themes across national boundaries. In order to achieve an intimate understanding of the texts studied, all Core courses propose close reading and thorough discussion of a limited number of texts.

For a list of courses that satisfy the Literature Core requirement, visit [www.bc.edu/core](http://www.bc.edu/core).

**Cultural Diversity Core**

The curriculum of Romance Languages and Literatures offers courses that treat the cultures of people around the world who speak French, Spanish and Italian, including western Europe as well as Hispanic and Francophone cultures in the Caribbean, South and Central America, Africa, and Asia. Students can choose from a number of courses that focus on these cultures in order to satisfy the Cultural Diversity Core requirement.

For a list of courses that satisfy the Cultural Diversity Core requirement, visit [www.bc.edu/core](http://www.bc.edu/core).
The Departmental Honors Program

The Honors Program offers RLL majors a unique opportunity to conduct research and write a thesis on a topic of their choice, under the guidance of a faculty member in the department. Students admitted into the program will work throughout the senior year with their Thesis Director.

To be eligible, candidates must be declared majors in the Department of Romance Languages and Literatures with a grade point average of 3.4 or higher. No more than 9 credits must remain for completion of the major in their senior year. Candidates must also have exhibited the maturity and self-discipline that long-term independent work requires.

Faculty members will nominate students for the Honors Program in April of their junior year. Nominated students will be invited to meet with the Program Coordinator during the semester preceding their enrollment in the program. The final decision about acceptance into the program will be made during the first week of registration.

- For complete details, please read the RLL Honors Program Guidelines available on the Romance Languages and Literatures website. After consulting the guidelines, interested students should contact their current RLL instructor to inquire about nomination to the program.

Undergraduate Research Positions

Departmental faculty regularly obtain university funding for undergraduate majors and minors to work on research projects with them during a set number of hours per week. Interested students should contact their current professor or the Director of Undergraduate Studies.
Slavic and Eastern Languages and Literatures, Undergraduate Programs - University Catalog

BOSTON COLLEGE

The Department administers undergraduate majors in Linguistics, Russian, and Slavic Studies, as well as minors in Arabic Studies, Chinese, Linguistics, Russian, and East European Studies. Students may also participate in an interdisciplinary minor in interdisciplinary programs in Asian Studies, Jewish Studies, International Studies, and Islamic Civilization and Societies. Departmental honors require successful completion of honors requirements. For information, contact the Department.

The Department maintains listings of related courses from other departments that satisfy various program requirements. Substitutions and exemptions from specific program requirements, as well as the application of courses from other institutions, require express permission from the Chairperson or the Undergraduate Program Director.

Students fulfilling the undergraduate Core requirements in Literature and Cultural Diversity should consider Core offerings taught by members of the Department.

References to the number of credits required correlate with the number of full one-semester courses.
Majors

The Department offers majors in Linguistics, Russian, and Slavic Studies.

Major in Linguistics (31 Credits)

The focus of the Linguistics program does not lie alone in the acquisition of language skills, but rather, in learning to analyze linguistic phenomena with a view toward making significant generalizations about the nature of language.

Students majoring in Linguistics build their programs around a specific area of emphasis. In consultation with the faculty, students design a program of study tailored to the individual's interests and goals. Typical areas of emphasis include philology (the historical and comparative study of ancient languages), psycholinguistics, and language acquisition.

A typical program for this major requires the following:

- LING3101 General Linguistics (3 credits)
- LING3102 Syntax and Semantics (3 credits)
- LING3103 Language and Language Types (3 credits) or LING3104 Formalism and Functionalism in Linguistics (3 credits)
- 3 credits in Philology
- 3 further credits in Philology or in Structure of a Language
• 15 additional credits drawn from departmental offerings, of which two must be upper-division electives
• LING4391 AB Comprehensive: Linguistics (1 credit)

Linguistics majors should additionally develop proficiency in at least one foreign language and competence in at least one other language at levels appropriate to their career plans (e.g., French, German, Spanish, Latin, Greek, Russian).

Also desirable: Exposure to a non-Indo-European language (e.g., Chinese, Arabic, Japanese, Korean, Hebrew)—all of which are taught within the Slavic and Eastern Languages and Literatures Department.

**Major in Russian (30 Credits, Normally Ten One Semester Courses)**

The major in Russian provides rigorous training in Russian language, literature, and culture. The major concentrates on acquiring advanced proficiency in Russian language and on comprehending important aspects of the literature, culture, and civilization of Russia and the former USSR.

The requirements for the major in Russian are as follows:

• 9 credits (normally, 3 one-semester courses) in Russian grammar, composition, and stylistics beyond the intermediate level
• 9 credits (normally, 3 one-semester courses) in Russian literature and culture, including 2 survey courses for classical and modern Russian literature (SLAV2162 and SLAV2173)
• 3 credits in Slavic Civilizations or Russian Civilization and Culture (usually SLAV2169 Slavic Civilizations)
- 6 credits (normally, 2 one-semester courses) in Russian literature, culture, advanced grammar and stylistics, history or politics, of which at least 3 credits must be in Russian literature and culture (consult the Department about the list of available courses)
- 3 credits (normally, a one-semester course) in Russian and Slavic linguistics (The Structure of Russian, Old Church Slavonic, or Old Russian)

The Department also has provisions for a Russian major with a concentration on culture and civilization.

**Major in Slavic Studies (30 Credits)**

The major in Slavic Studies provides broadly based training about Russia and the nations of Eastern Europe and the former Soviet Union. The normal program for this major requires the following:

- 6 credits (normally, two one-semester courses) in a Slavic language at or above the intermediate level
- 3 credits (normally, one one-semester course) in Slavic civilizations (usually SLAV2169 Slavic Civilizations)
- 6 credits (normally, two one-semester courses) in a Slavic literature, including, but not limited to Russian literature
- 6 credits (normally, two one-semester courses) in Slavic history, politics, or linguistics (consult the Department about the list of available courses)
- 9 credits (normally, three one-semester courses) in Russian and Slavic Studies (consult the Department about the list of available courses)

**Minors**
The Department offers departmental minors in Linguistics, Russian, Arabic Studies, and Chinese, as well as interdisciplinary minors in Asian Studies, East European Studies, and Jewish Studies.

**Minor in Linguistics (Departmental)**

This departmental minor requires a minimum of six approved one-semester courses (18 credits)

- LING3101 General Linguistics (3 credits)
- LING3102 Syntax and Semantics (3 credits)
- 3 credits in Philology
- 3 further credits in Philology or in Structure of a Language
- 6 additional credits drawn from departmental Linguistics offerings

**Minor in Russian (Departmental)**

The departmental minor in Russian requires a minimum of 18 credits (normally, 6 approved courses):

- 6 credits (normally, 2 one-semester courses) in Russian at or above the intermediate level
- 6 credits (2 one-semester courses) in Russian literature: one pre-twentieth century and one post-nineteenth century (normally 2 survey courses for classical and modern Russian literature, SLAV2162 and SLAV2173)
- 6 additional credits (normally, 2 one-semester courses) in Russian literature, culture, advanced grammar and stylistics, history or politics (consult the Department about the list of available courses)

**Minor in Arabic Studies (Departmental)**
The departmental minor in Arabic Studies covers areas of Modern Standard Arabic and Modern Hebrew languages, Modern Middle Eastern literature and cultural history, and Near Eastern Civilizations. The minor requires a minimum of 18 credits in approved courses (normally, six one-semester courses):

- 6 credits (normally, two one-semester courses) in Modern Standard Arabic above the first semester of intermediate intensive level
- 12 credits (normally, four one-semester courses) in Middle Eastern languages, cultures, literatures and civilizations (consult the Department about the list of available courses)

**Minor in Chinese (Departmental)**

The departmental minor in Chinese focuses on acquiring modern language proficiency and knowledge of aspects of Chinese culture, literature and civilization. The minor requires a minimum of 18 credits of approved coursework (normally, six one-semester courses):

- 6 credits (normally two one-semester courses) in modern Mandarin Chinese beyond the first semester of intermediate intensive level
- 12 credits (normally, four one-semester courses) in Chinese culture and literature, which may include courses taught in translation, language courses in Classical Chinese and Advanced Chinese, and Introduction to Far Eastern Civilizations (consult the Department about the list of available courses)

**Minor in Asian Studies (Interdisciplinary)**

For information concerning the Asian Studies minor, contact the Director of the interdisciplinary minor in Asian Studies, Sing-chen Lydia
Minor in East European Studies (Interdisciplinary)

The East European Studies interdisciplinary minor requires a minimum of 18 credits in approved course work (normally, six one-semester courses), distributed as follows:

- 3 credits in either Russian Civilization (SLAV2165) or Slavic Civilizations (SLAV2169)
- 3 additional credits in Russian or East European history, culture or politics
- 6 credits in Russian or in another Slavic or East European language at or above the intermediate level
- 6 credits in approved elective course work from related areas such as: art history, economics, sociology, film studies, literature, linguistics or language, philosophy, or theology.

For more information on the minor in East European Studies, contact Professor Maxim D. Shrayer, Director, East European Studies minor, shrayerm@bc.edu.

Minor in Jewish Studies (Interdisciplinary)

The Boston College Jewish Studies program seeks to examine the multiple dimensions and complexities of Jewish culture throughout its broad chronological and geographical range. The interdisciplinary minor in Jewish Studies consists of a total of six 3-credit courses (18 credits), including one foundation course, four electives, and a concluding seminar/Capstone course.
For information concerning the interdisciplinary undergraduate minor in Jewish Studies, visit the [Minor in Jewish Studies](https://www.bc.edu/content/bc-web/academics/sites/university-catalog/undergraduate/mcas/slavic-eastern-languages-literatures.html#majors) program web page.

**Study Abroad**

The Department of Slavic and Eastern Languages and Literatures requires, in general, at least two years of language study, in addition to coursework (tailored to the individual student's program of study) that would provide cultural orientation. Since the Department offers a wide-variety of majors, there is no particular limit as to how many courses taken abroad will be allowed for major credit.

Individual programs of study are arranged according to the types of instruction available and the student's goals and background.

Students majoring in Linguistics may profit from any number of study-abroad opportunities, depending on the specific language(s) they elect to focus on. Students of East Asian languages have participated to great advantage in a variety of different study abroad opportunities in Japan, the People's Republic of China, the Republic of China, Korea, and other nations of Asia.

Junior year is the most popular time to study abroad, but seniors have done so successfully as well. All Slavic and Eastern Languages and Literatures majors must obtain department course approval before going abroad. Students should consult with the relevant faculty members, depending on their language and area of expertise.

**Office of International Programs**
Students taking classes in the Department of Slavic and Eastern Languages and Literatures participate in Boston College's programs and international partnerships in China, Israel, Japan, Korea, Lebanon, Morocco, Nepal, Philippines, Poland, Russia, and other countries.

For complete information on any of these programs and also on unofficial study abroad, visit [www.bc.edu/international](http://www.bc.edu/international).

**Teachers of English to Foreign Students**

The Department of Slavic and Eastern Languages and Literatures offers a number of linguistics courses for training teachers of English to foreign students. The Department of English offers elective and Core-level undergraduate courses of English language and literature for foreign students enrolled at Boston College.

**Managed By**

University Catalog  
Office of Student Services  
Lyons Hall 103
The undergraduate program in Sociology is designed to satisfy the intellectual, career, and civic interests of students who are concerned about what is happening in their society and in their daily personal interactions. The sociological perspective and the technical knowledge and skills developed in this program contribute to personal growth and are useful in a broad range of occupations. The program prepares students for graduate study in sociology, social work, law, urban affairs, governmental administration, criminal justice, industrial organization, education, etc.

Many Sociology courses are part of the University Social Science Core. These courses address a wide range of important sociological themes ranging from the study of major social institutions, such as the family, religion, education, mass media, the workplace, and justice system, to the analysis of global social processes including culture, identity formation, war and peace, deviance and social control, aging, social movements, and inequalities in the areas of race, class, and gender.

Information on Core Courses

Course listings in Course Information and Schedule will indicate which, if any, Core requirements are satisfied by each course.
Major Requirements

Sociology majors are required to take a minimum of 30 credits (generally ten courses) in Sociology. These courses must include the following:

- Either SOCY1001 Introductory Sociology (preferably SOCY1001.01, the section designed for Sociology majors), or SOCY1002 Intro to Sociology for Healthcare Professionals, but not both.
- Statistics (SOCY2200), Social Theory (SOCY2215), and Research Methods (SOCY2210) are also required.
- 18 credits in elective courses, at least 9 credits of which must be in upper level courses (SOCY3000 or higher).

Minor Requirements

Sociology minors are required to take a minimum of 18 credits (generally six courses). These courses must include the following:

- Either SOCY1001 Introductory Sociology (preferably SOCY1001.01, the section designed for Sociology majors), or SOCY1002 Intro to Sociology for Healthcare Professionals, but not both.
- Statistics (SOCY2200), Social Theory (SOCY2215), and Research Methods (SOCY2210) are also required.
- 6 credits in elective courses, at least 3 credits of which must be in courses numbered SOCY3000 or above.

Honors Program

Membership in the undergraduate Honors Program in Sociology is by invitation and is designed to give eligible Sociology majors (3.50 GPA, 3.50 in Sociology) the experience of doing original sociological research that
leads to a Senior Honors Thesis. The program includes a three-course Honors sequence that allows students to work closely with their faculty and other students in the Program. The sequence begins in the second term of the junior year when students read some of the most engaging classics of sociological research. In the first semester of the senior year, students design an original project and in the last semester of the senior year, they gather and analyze the data and write the thesis. For details, consult Professor Sarah Moorman.

Information for Study Abroad

Although the Sociology Department designates no particular prerequisites, it strongly recommends that students have completed at least five courses in Sociology, including all of the required courses (Introductory Sociology or Intro to Sociology for Health Care Professionals, Statistics, Methods, and Theory), prior to going abroad.

Courses taken overseas in a department of Sociology or Anthropology of a BC-approved program will almost always be accepted for credit towards the Sociology major. The department recommends not more than two Sociology courses in any one semester or five Sociology courses in a full year. Courses taken in other departments will not be considered for Sociology credit unless a syllabus and reading list are submitted. All Sociology majors should consult with Professor Eve Spangler, McGuinn 402, when planning their study abroad program. The Sociology Department does not accept overseas courses for Social Science Core credit.

Five Year Master's Degrees with a Sociology Major

Majors in Sociology have the opportunity to earn two degrees over a period of five consecutive years. There are two separate programs:
B.A./M.A. Program

Application normally takes place by February 1 of the second semester of the junior year. The applicant must submit the same admissions materials as are required of all graduate degree applicants. Apply online at the Admission website.

Undergraduates must understand that admission is highly competitive. Normally, a student must have an overall GPA, after five semesters, of at least 3.50 with at least a 3.50 GPA in Sociology courses. For details, consult the Director of Graduate Admissions no later than the first semester of the junior year.

B.A./M.S.W. Program

The choice of this program will provide the Sociology major with an undergraduate B.A. degree in Sociology and with the professional degree of Master of Social Work. The B.A. degree will be awarded with the student's undergraduate class. The master's degree will be awarded one year later. The choice of this program should be made by Sociology majors before April of their sophomore year so that the required course sequence and degree requirements can be fulfilled. For details, consult Professor Sara Moorman and the M.S.W. Program website.

University Catalog
Office of Student Services
Lyons Hall 103
The Boston College Theatre Department—faculty, staff, and students—is committed to theater education that combines art with scholarship and drama study with theater practice. We seek to foster creativity, critical thinking, excellence, and professionalism through the integration of courses, productions, workshops, and other activities. We value theater as a liberal art as well as a performing art, which means that we seek to understand it not only as a means of artistic expression and a form of entertainment, but as a window onto history, a method of inquiry into all things human, and a vehicle for social change. Interested students are invited to join us in this mission regardless of previous experience. Those who do will develop an intellectual frame of reference, a theatrical imagination, and practical skills that prepare them for advanced training in a wide range of disciplines and vocations.

**Major Requirements**

The Theatre Department offers a major in Theatre and students earn a bachelor of arts degree. Students must successfully complete a total of eleven 3-credit courses, five of which constitute the foundation upon which the upper-level courses are built. Ideally, these five courses will be completed by the end of the sophomore year. The required foundation courses are:
• THTR1172 Dramatic Structure and Theatrical Process (fall only). Students unable to register for this class may substitute THTR1170 Introduction to Theater (fall and spring)
• THTR1103 Acting I: Fundamentals of Performance (fall and spring)
• THTR1130 Elements of Stagecraft (spring only; corequisite THTR1017 1-credit lab)
• THTR1140 Elements of Theatrical Design (fall only; corequisite THTR1018 1-credit lab)
• THTR2275 History of Theater I (fall only) OR THTR2285 History of Theater II (spring only)

Students must also complete six 3-credit courses that provide focused training and advanced study. Theatre majors will choose these courses as follows: (1) two upper-level Performance/Production courses (numbered from THTR3300 to THTR3369 or from THTR4400 to THTR4469); (2) three upper-level Dramatic Literature, Criticism, and Theater History courses (numbered from THTR3370 to THTR3389 and from THTR4470 to THTR4489 or History of Theater I or II that is in addition to the one taken previously); and (3) one Theatre Elective chosen from the Theatre Department curriculum according to individual interest. Students may bundle three 1-credit mini-courses together to make one General Theatre Elective.

In addition, Theatre majors must complete a total of four additional Production Lab credits numbered THTR1011 through 1016 and THTR1020 through 1060. These are experiential learning courses that involve practical work backstage or in the shops (1 credit) or as a designer or stage manager (2 credits) on Theatre Department productions. Students register for Labs at the beginning of each semester.

Minor Requirements
The Theatre minor is intended for students with a serious interest in theater who for one reason or another are not able to commit to fulfilling the requirements for the Theatre major. Based on the same principles and structure as the Theatre major, it aims to provide students with a broad-based theater education that balances courses in theater studies and theater practice.

A Theatre minor will complete the following courses and requirements:

- THTR1172 Dramatic Structure and Theatrical Process (fall only) or, in special cases, THTR1170 Introduction to Theater (fall and spring)
- THTR1103 Acting 1: Fundamentals of Performance (fall and spring)
- THTR1140 Elements of Theatrical Design (fall only; corequisite THTR1018 1-credit lab) or THTR1130 Elements of Stagecraft (spring only; corequisite THTR1017 1-credit lab)
- THTR2275 History of Theater I (fall only) or THTR2285 History of Theater II (spring only)
- One upper-level Literature, Criticism, History course (see above)
- One upper-level Production/Performance course (see above)
- Two additional Production Lab credits numbered THTR1011 through 1016 and THTR1020 through 1060.

Students who wish to declare a Theatre minor should contact Professor Luke Jorgensen, Assistant Chairperson, luke.jorgensen@bc.edu, with an e-mail indicating their interest and providing their Eagle ID number.

For students in the Lynch School of Education and Human Development with an interest in the teaching and practice of theater in school and institutional settings, the Theatre Department offers a minor in Educational Theatre. An Educational Theatre minor will complete the following courses and requirements:
- THTR1172 Dramatic Structure and Theatrical Process (fall only) or, in special cases, THTR1170 Introduction to Theater (fall and spring)
- THTR1103 Acting I: Fundamentals of Performance (fall and spring) or THTR1130 Elements of Theater Production I (spring only)
- THTR3378 Creative Dramatics (fall only)
- THTR2268 Theater for Youth (spring only) or THTR3366 Directing I (fall only) or THTR4469 Composition and Performance Workshop (intermittent)
- One upper-level Literature, Criticism, History course (see above) or THTR2275 History of Theater I (fall only) or THTR2285 History of Theater II (spring only)
- One upper-level Production/Performance course (see above) or THTR1130 Elements of Stagecraft (fall only)
- Two 1-credit Production Labs (including at least one Prep Lab)

Lynch School of Education and Human Development students who wish to declare an Educational Theatre minor should contact Professor Luke Jorgensen, Assistant Chairperson, (luke.jorgensen@bc.edu) with an e-mail indicating their interest and providing their Eagle ID number. Contact should also be made with the Assistant Dean in the Lynch School of Education and Human Development.

All courses for the Morrissey College of Arts and Sciences minor in Theatre and the Lynch School of Education and Human Development minor in Educational Theatre need to be chosen from the Theatre Department curriculum. Courses taken abroad, courses taken at other institutions, and Readings and Research/Independent Study courses will only count towards a Theatre minor in rare and exceptional circumstances.

**Mentoring and Advisement**
The Theatre Department faculty place great emphasis on academic advisement and professional mentoring. We are committed to helping students design an academic program that stimulates their curiosity, supports their interests, and advances their abilities. In this interest, we encourage students to pursue professional internships and/or summer training programs that provide practical experience and help to clarify long-range goals. When arranged in advance, internships can earn academic credit and often lead to job offers after graduation. Junior and senior Theatre majors are guided and coached as they prepare for graduate study, advanced training, a full-time professional internship, or early-career job experience.

The Theatre Department Production Program

The Theatre Department maintains an ambitious co-curricular production program that includes four faculty-or-guest directed Mainstage productions and two student-directed, student-designed Workshop productions per academic year. Casting is open to all students and based mainly on audition. The Theatre Department actively encourages students of color to audition for all productions and is firmly committed to a policy of non-traditional (or "color blind") casting, which means that race and ethnicity are not a factor when casting decisions are made. Opportunities abound for students who are interested in design, technical production, and stage management.

Information for Study Abroad

The Theatre Department has no formal affiliation with international programs that focus on theater training or theater study. Students who are considering study abroad are advised to meet with their advisor a full year in advance of their departure in order to plan their academic progress and
discuss the advantages and disadvantages of being off campus for a semester or more as an upperclassman. In general, students can receive credit towards the Theatre major (as appropriate) for no more than one course taken abroad. For more information, please contact Professor Luke Jorgensen, Assistant Chairperson, 617-552-4012, luke.jorgensen@bc.edu.

Lyons Hall 103
Theology, Undergraduate Programs - University Catalog

The undergraduate program in Theology is designed to provide students with the knowledge and skills necessary for a reasoned reflection on their own values, faith, and tradition, as well as on the religious forces that shape our society and world. As a broad liberal arts discipline, theology encourages and guides inquiries into life's most meaningful issues from such diverse perspectives as ethics, biblical studies, history, psychology, social studies, philosophy, and comparative religion. There is a strong, although not exclusive, emphasis on Christianity, especially as manifested in the Roman Catholic tradition.

The major in Theology has proven to be excellent preparation for vocations requiring careful reasoning, close reading, clarity in written expression, the ability to make ethical decisions, and a broad understanding of cultures. It provides a solid background for graduate study in the humanities and for such professional schools as medicine, business, and law. For those wishing to pursue a career in ministry or religious education Theology is, of course, still a prerequisite. Long gone, however, is the time when Theology was considered the exclusive domain of seminarians and the religious. Many students now elect Theology as a second major to balance and to broaden their education and to provide perspective on such first majors as biology, political science, or English literature.
Students who elect to major or minor in Theology are encouraged to meet with the Department's Director of Undergraduate Studies to review their opportunities as well as pertinent departmental policies.

The Theology Department boasts a large, internationally known faculty with expertise in areas as diverse as systematic theology, ethics, biblical studies, church history, liturgy, psychology of religion, and the dialogue between Christianity and other major religious traditions. A prestigious graduate program leads to the Ph.D. degree in several specialties. Nevertheless, the Department as a whole remains fully committed to the teaching of undergraduates and to the education of Theology majors.

Course Offerings

The Department distinguishes four levels of course offerings:

1. Level One/Core (THEO1000–1999)—introductory, designed for the fulfillment of the University's basic Theology requirement
2. Level Two (THEO2000–4999)—undergraduate, more specifically aimed at minors and majors
3. Level Three (THEO5000–5999)—addressed to advanced undergraduates (usually majors) and graduate students who are more theologically proficient
4. Graduate (THEO 6000–7999)—offered exclusively for professionally academic theological formation

Core Options

The Core requirement in theology is six credit hours and may be fulfilled by either of the following options (A or B):
A. Two 3-Credit Courses: One CT and one STT

Students must take one Christian Theology (CT) course and one Sacred Texts and Traditions (STT) course. These need not be taken in any particular order and may even be taken in the same semester.

Christian Theology (CT) Courses

- THEO1401 Engaging Catholicism
- THEO1402 God, Self, and Society

Sacred Texts and Traditions (STT) Courses

- THEO1420 The Everlasting Covenant: The Hebrew Bible
- THEO1421 Inscribing the Word: The New Testament
- THEO1422 The Sacred Page: The Bible
- THEO1430 Buddhism and Christianity in Dialogue
- THEO1431 Islam and Christianity in Dialogue
- THEO1432 Hinduism and Christianity in Dialogue
- THEO1433 Chinese Religions and Christianity in Dialogue
- THEO1434 Judaism and Christianity in Dialogue

Enduring Questions courses offered by the Theology Department (THEO17XX) will be identified as counting as either towards Christian Theology (CT) or Sacred Text and Traditions (STT) requirement. Note: a student may not fulfill their Theology Core with two Enduring Questions courses.

B. 12 Credit Options

A student may take either of these course sequences to fulfill the Theology requirement:
• THEO/PHIL1088–1089 Person and Social Responsibility I and II (for PULSE Program students only)
• THEO/PHIL1090–1091 Perspectives on Western Culture I and II (for first-year students only)

Major Requirements

The major curriculum in Theology incorporates both structure and flexibility, intensive focus and breadth of scope. Majors take a combination of essential, required courses and electives from within and outside the Department of Theology. Programs are designed in consultation with the Director of Undergraduate Studies. Theology majors must choose one of the following curricular tracks:

I. The **Standard Theology Major (30 hours)** is relatively unstructured and flexible, easily tailored to various motivations and goals for theological study and adaptable to the diverse paths and timetables by which students come to the major. It offers a theological enrichment and complement to a student’s BC education, through the following requirements:

1. *Theology Core* (2 courses; 6 credits)
2. *Majors Course:* “Conciliar Traditions” (1 course; 3 credits)
3. *Majors Seminar:* “Key Theologians and Texts” (1 course; 3 credits)
4. *Electives* (6 courses; 18 credits)*

II. The **Honors Theology Major (36 hours)** is designed for Theology as a first major, especially for students with an interest in further study of theology or related fields. Both rigorous and comprehensive, it provides an integrated introduction to the discipline and a broad foundation for further study. With its comprehensive distribution requirements across all areas, it exposes students to the entire breadth of the theological discipline. With
increased credit hours and an optional thesis, it is capacious enough for students to focus on a particular sub-discipline in which to pursue and demonstrate theological excellence. As an Honors Program it would also allow students to be recognized for their achievement, both within and outside the university, thus facilitating admission to the next level of study. Students are expected to maintain a 3.5 GPA within the major.

Requirements:

1. Theology Core (2 courses; 6 credits): Students must fulfill their normal Theology Core requirements with either (A or B):

   A. One semester of Christian Theology:

      - THEO1401 Engaging Catholicism
      - THEO1402 God, Self, and Society
      - CT-themed Enduring Questions/Complex Problems

   And one semester of Sacred Texts and Traditions from the following:

      - THEO1430 Buddhism and Christianity in Dialogue
      - THEO1431 Islam and Christianity in Dialogue
      - THEO1432 Hinduism and Christianity in Dialogue
      - THEO1433 Chinese Religions and Christianity in Dialogue
      - THEO1434 Judaism and Christianity in Dialogue
      - STT-themed Enduring Questions/Complex Problems

   (NOTE: Honors Majors may not fulfill their STT core requirement with THEO1420, THEO1421, or THEO1422)

   B. Perspectives or PULSE.
2. **Scripture Sequence** (2 courses; 6 credits): Students must also complete both THEO1420 The Everlasting Covenant: The Hebrew Bible and THEO1421 Inscribing the Word: The New Testament

3. **Majors Course**: “Conciliar Traditions” (1 course; 3 credits)

4. **Majors Seminar**: “Key Theologians and Texts” (1 course; 3 credits)

5. **Honors Distributions** (3 courses; 9 credits): 1 upper-level course (Level 3 or above) in each of the sub-disciplines *not already covered* by the Theology Core or Scripture Sequence.

6. **Honors Electives** (4 courses; 12 credits), including an *optional* Honors Thesis (6 or 12 credits)*

*2 courses/6 credits from another discipline (including the first major) may also count toward the Standard Theology or Honors Theology majors, provided that they have sufficient theological relevance as determined by the Director of Undergraduate Studies.

The Department's membership in the Boston Theological Interreligious Consortium (BTI) allows advanced Theology majors to cross-register into some 7,000 courses taught by 150 faculty members at eight other BTI schools. Students thus have access to the resources of one of the world's great centers of theological study.

**Minor Requirements (21 Hours)**

The Theology minor consists of the Theology Core requirement plus five 3-credit courses that are Level Two or above.
Information for First Year Majors and Non-majors

Theology is the academic discipline concerned with the realities that are the center of religious faith and with the traditions of belief and worship that inform the life of communities of faith. Historical, biblical, psychological, ethical, pastoral, comparative, philosophical, and doctrinal studies are all included within the scope of Theology at Boston College, which introduces the undergraduate to a mature, critical approach to religious knowledge and experience. There is a strong, but by no means exclusive, emphasis on Christianity, and more specifically, on the Roman Catholic tradition.

The courses offered are grouped in four categories: (1) biblical, (2) historical, (3) ethical and social-scientific, and (4) comparative and systematic or doctrinal. All courses, particularly those taught at the Core level, aim at fulfilling certain goals:

- A liberal arts goal of fostering awareness of the religious roots and background of our culture—for example, by giving students a coherent view of religion and its development, a groundwork for moral decision, and an awareness of their own existence as religious persons
- A specifically theological goal of introducing the materials and methods of one or more approaches to the academic study of religious faith and tradition

A religious or confessional goal, explicit in some—though not all—courses, of exploring a particular tradition from the inside, healing negative encounters with religion, inviting commitment and belief, and the like.

Information for Study Abroad
There are no formal requirements stated by the Theology Department, but it is presumed that students will have completed at least one Core course (or 3 credits of the Core) before going abroad. The Department will allow 6 credits or two courses taken abroad to count toward major credit. A maximum of one Core course (3 credits) may be taken abroad.

The international programs at the University of Durham and Oxford University are both recommended by the Theology Department. All Theology majors should contact the Director of Undergraduate Studies while planning their study abroad program.

**Lonergan Center**

Studies related to the work of the Jesuit theologian and philosopher Bernard Lonergan (1904–1984) have a focus in the Lonergan Center at Boston College. The Center houses a growing collection of Lonergan's published and unpublished writings as well as secondary materials and reference works, and it also serves as a seminar and meeting room. Kerry Cronin is the Associate Director of the Lonergan Center, which is located on the fourth level of Bapst Library and is open during regular hours as posted. Information about the Center or the Lonergan Institute is available at [www.bc.edu/lonergan](http://www.bc.edu/lonergan).

University Courses, Undergraduate Programs - University Catalog

University Capstone Courses

For up-to-date information on Capstone, including the best way to register, the seminars available, their syllabi, and the faculty, please see the Capstone website at www.bc.edu/capstone.

A course for seniors: Reserved for seniors and second-semester juniors only, the Capstone program is designed to cap off college by facing the questions of life after graduation. The Capstone Seminars (UNCP5500–UNCP5599 only) directly address the hopes and anxieties that seniors face but seldom find treated in traditional courses. They invite seniors to discover the patterns underlying their choices up to now. They also relate the life and learning of the past four years to the life and learning ahead. In this way, Capstone Seminars take seriously the struggle to integrate four crucial areas of life: work, relationships, society, and spirituality.

Ask some inevitable questions now, not later.
How did my education prepare me to live? With everything I want to do, what will I have to compromise? How can I balance my career and my family? Can I find work with a higher meaning than my income? How do I wish to live responsibly and affect society?

Special features of the course:
• Faculty from various departments
• Each section limited to 15–19
• Innovative teaching methods
• Interdisciplinary reading
• Some guest speakers from professional life

Capstone Seminars may satisfy major requirements if they are cross-listed in certain departments. Check with the instructor.

**To Register for a Capstone Seminar**

You must be a senior or a second-semester junior to take the course. **Students may take only one Capstone Seminar during their time at Boston College. Capstone Seminars may not be taken Pass/Fail.**

Different Capstone Seminars will be offered each semester. All Seminars are interdisciplinary. You may register for any one of the seminars as a University (UN) course.

In addition, several Capstone seminars are cross-listed, both as University courses with a UNCP number and also as courses in the department of the professor offering the course. If you find a particular Seminar closed, try to register under the cross-listed number (e.g., if UNCP5523 is closed, try to register for the class as THEO2523, and vice versa). A Capstone Seminar can count as an elective for students in all colleges (Morrissey College of Arts and Sciences, Connell School of Nursing, Lynch School of Education, Carroll School of Management). For majors in English, Philosophy, Theology, and certain other departments it might satisfy the major requirements if the seminar is taken under the cross-listing in the department of his/her major. Check with the instructor.
Students should also understand the following rule:

No student may take more than one Capstone seminar during his/her undergraduate years. Thus, you may not take two Capstone courses in one semester or in two different semesters. This is true whether the course is listed under the UNCP department numbers or as a course in a specific department. If a second Capstone course appears on your record, it will be removed. This could make you ineligible for graduation.

Woods College of Advancing Studies, Undergraduate Programs - University Catalog

BOSTON COLLEGE

The James A. Woods, S.J., College of Advancing Studies offers both full and part-time study to undergraduate and graduate students from widely differing backgrounds and preparations who wish to maximize their experiences and master the skills necessary to advance their future.

Boston College fosters in its students rigorous intellectual development coupled with religious, ethical, and personal formation in order to prepare them for citizenship, service, and leadership in a global society.

Within the context of the Boston College environment, James A. Woods, S.J., College of Advancing Studies promotes the care and attention to the human person that is the hallmark of Jesuit education while faculty and students engage in scholarship that enriches the culture and addresses important societal needs.

Undergraduate Programs

The James A. Woods, S.J., College of Advancing Studies offers the atmosphere of a small college within the environment of a large university. The professional staff at the James A. Woods, S.J., College of Advancing Studies has experience helping students arrange a realistic program of
study, one that combines work responsibilities with educational goals. Students receive personal attention while enjoying access to the many resources of Boston College. A flexible admission process coupled with academic advising allows a student to select the most appropriate major based on individual needs. Courses are ordinarily scheduled between the hours of 6:15–9:15 p.m. weekdays, with Saturday and online courses also available.

**Bachelor of Arts Program**

The Bachelor of Arts program prepares students to address and master the challenges of a rapidly changing and increasingly complex world. A broad-based and robust liberal arts curriculum, which includes core requirements, permits students to choose courses and majors reflecting individual interests and varied career objectives. The curriculum offers intensive work and a degree of disciplined mastery in a major area.

**Degree Requirements**

A distinguishing characteristic of liberal arts education is a required core curriculum. The Bachelor of Arts programs require the following core courses:

- 1 Computer course
- 3 English courses
- 1 Fine Arts course
- 2 History courses
- 1 Mathematics course
- 1 Natural Science course
- 3 Philosophy courses comprised of Logic, Ethics, and a Philosophy elective
• 1 Public Speaking course
• 2 Social Science courses
• 3 Theology courses comprised of two sequential Theology courses and one Theology elective

Degree candidates must fulfill all program requirements in addition to earning a minimum of 120 credits. Students are required to achieve a minimum cumulative GPA of 1.67 to be eligible to graduate.

Admission as a transfer student is also available. A minimum of 60 credits must be completed at Boston College to satisfy residency. A maximum of 60 credits may be transferred into a student’s program from regionally accredited institutions. Courses with an earned grade of C will be accepted in transfer; however, courses transferred from schools within Boston College may be accepted with grades of C-. A minimum of three semester hours is required for a transferred course to satisfy program requirements.

For students in the degree program, normally the maximum course load is three per semester. Authorization for one additional course will be given only if a student has completed these three courses, each with a grade of B- or better, in the previous semester.

Undergraduate Admission

Applications for admission may be submitted at any time and are reviewed on a rolling basis during the academic year. The following documentation is required:

• Completed online application form;
• Official transcripts from high school and colleges previously attended;
• Two essays (requirements are found on the application);
- Optional SAT, PSAT, or similar standardized test results if the student graduated from high school less than four years previously;
- Two letters of recommendation (if four years or less from high school, request one from a guidance counselor or, for students whose high school graduation is greater than four years, request one from a teacher, employer, or other personal reference); and
- Demonstrated English Language Proficiency with an IELTS score of 6.5–7.5 or TOEFL score of 90–100.

Fifth Year and Advanced Standing Programs for Boston College Students

Accelerated Program for Boston College Undergraduate Economics Students (Enrolled at the Woods College, Morrissey College of Arts and Sciences, or Carroll School of Management)

Woods College of Advancing Studies is proud to offer Boston College students an option for accelerated completion of the Master of Science in Applied Economics program. This option is available to students with significant previous economics course work, including Economics majors and minors in the Morrissey College of Arts and Sciences as well as to students with Economics concentration in the Carroll School of Management. Students enrolled in the accelerated program will have to complete eight courses in WCAS, which is possible to achieve within one calendar year of entry into the program.

Benefits

- Waiver of application fee
- Waiver of Graduate Record Exam (GRE)
• Preferred admission without the competition of the rest of the applicant pool
• Credit for Microeconomic Theory (ECON2201 or ECON2203) and Macroeconomic Theory (ECON2202 or ECON2204) courses if the courses are completed with a grade of B or better. These credits will count as fulfilling the requirement of taking Applied Microeconomic Theory (ADEC7201) and Applied Macroeconomic Theory (ADEC7200).
• Option to complete the eight remaining course requirements in one additional calendar year

Qualifications

• Anticipated successful completion of a bachelor’s degree in May of senior year
• Overall GPA of 3.30 or above
• Grade of B or better in prerequisite courses: Principles of Microeconomics, Principles of Macroeconomics, Statistics, Calculus I, and Calculus II*
• Submission of all Applied Economics application materials by the end of the semester in which the student will graduate. In order to receive priority consideration for WCAS financial aid, students should apply in the fall semester of their senior year.

*Calculus II course can be taken after the admission into the program.

Accelerated Program for Boston College Undergraduate Students (enrolled at the Woods College, Morrissey College of Arts and Sciences, or Carroll School of Management)

Woods College of Advancing Studies is proud to offer Boston College students an option for accelerated completion of the Master of Science in
Leadership and Administration program. Students enrolled in the accelerated program will have to complete eight courses in WCAS, which is possible to achieve within one calendar year of entry into the program.

Under the terms of this agreement, qualified students are eligible for:

- Waiver of the application fee;
- Waiver of the Graduate Record Exam (GRE);
- Preferred admission without the competition of the rest of the applicant pool;
- Advanced standing for up to two upper-level courses that student has completed at BC; Graduate Program Director to approve.
- Option to complete the eight remaining course requirements in one additional calendar year.

Qualifications:

- Anticipated successful completion of a bachelor's degree from BC in May of senior year
- Overall GPA of 3.30 or above
- Submission of all the application materials by the published Boston College deadline.

Interested students should contact the Program Director of Leadership and Administration at Boston with any further questions.

**Academic Honors**

**Degree with Honors**
For information regarding academic honors printed in the Commencement program, visit the Policies and Procedures: Undergraduate Academic Regulations, Degree with Honors section of the catalog.

Undergraduate Graduation Awards

Awards at commencement recognize a distinguished scholastic record, special accomplishments in various academic fields, and qualities of outstanding character, leadership, and demonstrated loyalty to the college.

Dean's List

The Woods College Dean's List honors students for superior academic performance. The Dean’s List is published at the end of each semester. To be eligible for the Dean’s List, undergraduate students must maintain a minimum cumulative GPA of 3.5.; graduate students must maintain a minimum cumulative GPA of 3.8.

Professional Studies Certificates

The Professional Studies Certificate is an end in itself for some students. For others, it may be applied toward completion of a bachelor’s degree. Whatever one’s ultimate goal, whether to qualify for promotion, initiate a career change, or earn an undergraduate degree, a Professional Studies Certificate can help to achieve that objective. The number of courses required to complete a Professional Studies Certificate varies with the area of study, but in every instance courses must be completed at Boston College.

A Professional Studies Certificate may be obtained in:
• Accounting
• Communication
• Criminal and Social Justice
• Finance
• Human Resources
• Information Systems
• Management
• Marketing
• Sustainability

Certificate requirements include the following:

• Students must receive at least a grade of C for each course credited toward the certificate.
• Certificate requirements should be completed within two years of initial enrollment for non-degree students, and prior to degree completion for students already enrolled in a degree program; courses are permanently retained on the student record.

A request to apply to a certificate program must be made to the James A. Woods, S.J. College of Advancing Studies. A request must also be made to receive a formal certificate upon completion.

**Non-Degree Students**

Non-degree students are individuals interested in taking evening undergraduate courses for academic credit but not in applying for a degree. Non-degree students may enroll in fall, spring, or summer semesters. A brief non-degree application form must be completed and submitted online.

**Visiting Students**
Individuals wishing to attend during the day as special undergraduate students are required to apply for Visiting Student status at the James A. Woods, S.J., College of Advancing Studies. Qualified applicants are admitted to specific courses on an individual basis.

More specific application instructions for those interested in applying for Visiting Student status can be found at the Visiting Students web page.

Summer Session - University Catalog

BOSTON COLLEGE

Boston College Summer Session offers a wide variety of undergraduate courses, which run over two six-week sessions. Our courses are open to anyone with a high-school diploma or the equivalent and no application is required to enroll. We also offer a selection of graduate courses through the Woods College of Advancing Studies master's programs. Most summer classes are 3 credits, unless specifically noted in the course description and meet twice a week for 6 weeks; exceptions noted in individual course descriptions in this catalog.

The Boston College Experience Program

The Boston College Experience provides motivated high school students the opportunity to live and learn as students at Boston College. Through adherence to our Jesuit mission, our programs focus on exposing students to a rich and rewarding college experience through coursework, extracurricular activities, and reflection. Built into the programs are activities that help to prepare students for their college search and the transition into college life. Students will participate in service learning activities, culture, and social outings all while enjoying the beautiful city of Boston over the summer.

For more information about dates, requirements, and costs, please visit the Boston College Experience website at www.bc.edu/bce.
Graduate Programs - University Catalog

Boston College's eight graduate schools offer master's, doctoral, and professional degrees in over ninety disciplines. As scholars at a R1 research institute, Boston College graduate students have the opportunity to engage in the highest level of research activity and intellectual discourse.

Boston College is committed to providing information in a manner that is accessible to all. If you are in need of a printed copy of the material presented in the University Catalog, please contact the Office of Student Services for a printout of the website.

Office of Student Services
Lyons Hall 103
Established in 1929, Boston College Law School is dedicated to the highest standards of academic, ethical, and professional development while fostering a unique spirit of community among its students, faculty, and staff. Boston College Law School is accredited by the American Bar Association, is a member of the Association of American Law Schools, and has a chapter of the Order of the Coif.

The Law School offers two degrees—the three-year Juris Doctor (J.D.) degree, which is the school's primary degree, and the one-year Master of Laws (LL.M.) degree, which is designed for students who already hold a law degree from another school.

- [Juris Doctor (J.D.) Degree](#)
- [Dual Degree Programs](#)
- [Master of Laws (LL.M.) Degree](#)

**Juris Doctor (J.D.) Degree**

**Student Learning Outcomes**

Upon graduation from Boston College Law School, graduates shall have acquired competency in the following:
• Knowledge and understanding of substantive and procedural law;
• Legal analysis and reasoning, legal research, problem-solving, and written and oral communication in the legal context;
• Exercise of proper professional and ethical responsibilities to clients and the legal system;
• Other professional skills needed for competent and ethical participation as a member of the legal profession; and
• A readiness for intellectual and professional engagement, whether in local, national or global settings, that incorporates respect for knowledge and for the dignity of the human person.

Registration for Bar Examination

Upon entering law school, some students know the state(s) in which they intend to practice after graduation. Some states require students to register with the Board of Bar Examiners prior to, or shortly after, beginning law school. For further information, contact the secretary of the state’s Board of Bar Examiners for the state where you intend to practice to determine the standards and requirements for admission to practice.

Auditors

A limited number of applicants, usually members of the bar, who do not wish to study for a degree but who desire to enroll in specific courses may be admitted as auditors. Auditors must prepare regular assignments and participate in classroom discussions. They are not required to take examinations but may elect to do so. Normally, credit will not be certified for auditing. Auditors are charged tuition at the per credit hour rate.

Advanced Standing
An applicant who qualifies for admission and who has satisfactorily completed part of his or her legal education in another ABA-approved law school may be admitted to an upper class with advanced standing. Four completed semesters in residence at Boston College that immediately precede the awarding of the degree will be required. Transfer applicants must submit the application form and fee, the CAS report, a law school transcript, a letter of good standing from his or her law school dean, and a recommendation from a law school professor. Applications are due by July 1 from those wishing to enroll for the fall semester.

Other Graduate Courses and Cross Registration

Law students are permitted to take a maximum of four graduate level courses (12 credits) in other departments during their final two years with the consent of the Associate Dean. Also, students may cross-register for certain courses at Boston University School of Law. A list of courses is made available prior to confirmation of registration. Tuition for dual programs is separately arranged. From time to time individual students have also made special arrangements, with the approval of the Associate Dean for Academic Affairs, for dual study programs with other schools and departments at Boston College or, in some instances, with other universities in the Boston area.

Information

For more detailed information regarding course offerings, applicants should consult the Boston College Law School Bulletin that may be obtained by writing to the Office of Admissions and Financial Aid, Boston College Law School, 885 Centre Street, Newton, MA 02459, or by e-mailing the office at bclawadm@bc.edu.
Course descriptions and scheduling information are also available on the BCLS website at www.bc.edu/law.

Dual Degree Programs

The Law School offers a variety of dual degree programs.

Dual Degree Program in Law and Business Administration

Boston College Law School and the Carroll School of Management offer a dual J.D./M.B.A. program. Students in the program are required to be admitted independently to both schools. Credit for one semester’s courses in the M.B.A. program is given towards the J.D. degree, and, similarly, credit for one semester’s courses in the Law School is given towards the M.B.A. degree. Both degrees can thus be obtained within four academic years, rather than the five required for completing the two degrees separately. Interested students can obtain detailed information from the Admission Offices of both schools.

Dual Degree Program in Law and Social Work

The Boston College School of Social Work and the Law School at Boston College offer a dual J.D./M.S.W. program designed for students interested in serving the combined legal and social welfare needs of individuals, families, groups, and communities. Students may obtain the two degrees in four years, rather than the usual five years.

Dual degree candidates must apply to, and be accepted by, both schools. Interested students can obtain more information from the Admission Offices of both schools.
Dual Degree Program in Law and Education

The dual degree program in Law and Education is designed for students who are interested in serving the combined legal and educational needs of students, families, and communities in our nation. The program reflects the University’s mission to promote social justice and to prepare men and women for service to others. The program is particularly designed to prepare students to meet the needs of individuals who have traditionally not been well-served by the nation’s schools. The program is designed to serve the needs of persons who wish to combine knowledge about education and applied psychology with legal knowledge and skills to better serve their clients and constituencies. The program offers an opportunity to further the University’s goals in promoting interdisciplinary inquiry and integrating the work of service providers.

Students admitted to the program may expect to receive both a master’s degree in Education (M.Ed. or M.A.) and the Juris Doctor (J.D.) degree in approximately three years (sometimes requiring additional summer classes), rather than the four or more years such degrees would normally entail if taken separately.

Students seeking to pursue the J.D./M.Ed. or M.A. dual degree must be duly admitted to their intended Education program and to the Law School. Any student seeking certification, or education or human services licensure must meet all of the requirements in the Lynch School of Education for that certification/licensure.

J.D./M.P.H. Dual Degree Program with Tufts University
School of Medicine
Our program, in partnership with Tufts University School of Medicine, gives students the flexibility to pursue a broad range of career opportunities in the legal, health care, and public health fields, while completing their degrees in four years instead of five years if obtained separately. The Tufts medical school curriculum provides a practical expertise in health policy, data analysis, and health care management, and also includes an applied learning experience in the public health field. The demand for health care law and policy expertise encompasses job opportunities at small and large law firms, government agencies, hospitals and other institutional health care providers, public interest and advocacy organizations, international human rights organizations, and in-house counsel departments.

**J.D./M.A. in Urban and Environmental Policy and Planning with Tufts University**

Land Law and urban and environmental policy and planning open up an array of modern areas of professional practice. In this innovative program, BC students can receive two degrees—a Master of Arts and a Juris Doctor (M.A./J.D.) in just eight semesters. Planning skills (including policy analysis) are critical in guiding development patterns, and law frames the mechanisms and limits of private and governmental roles in this process. Students are immersed in practical skills training; in broad debates and critical thinking about the environment, human settlements, social and environmental justice; corporate responsibility; and public and private land use management—all shaped by constitutional, equitable, and pragmatic principles.

The M.A./J.D. is offered through a collaboration between the Tufts University Department of Urban and Environmental Policy and Planning (UEP) and Boston College Law School. There is currently no graduate program in New England which offers the combined strengths of this program.

In the dual degree program, students meet regularly with the program coordinator and the respective academic advisors from both Schools in planning and implementing an overall course of study that matches the student’s background, interests, and requirements of the program. Advisors at both Schools collaborate, under the auspices of an advisory committee, to ensure that students receive accurate and timely support in the dual degree program. Students are eligible for financial assistance based on current policies at each University.

**J.D./M.A. or J.D./Ph.D. Philosophy Program**

These programs are designed for students who have an interest in legal theory and jurisprudence, and who may eventually wish to go into law teaching in those fields. Students may complete their law degree and master’s in philosophy in four years of joint study, or law and Ph.D. in six years. Students must apply to both the Law School and master’s or Ph.D. program in the Philosophy Department of Boston College.

**Entrance Requirements and Admission**

To join the dual degree program students need to submit separate applications to each program. Students in the Boston College J.D. program can wait until their second year before applying to the Tufts degree program. Each school reviews candidates based on its own requirements and criteria. For detailed information on the requirements for the UEP
master’s degree, contact Tufts Admissions at http://ase.tufts.edu/uep/admissions/WhoComesToUEP.aspx.

Master of Laws (LL.M.) Degree

The LL.M. degree program is designed to expose legal professionals and recent graduates who hold a first degree in law, primarily but not necessarily of foreign origin, to a broad range of subjects in public and private law, including U.S. and international law. The program enables students to explore many cross cutting issues that engage U.S. and international law from courses in the Law School’s extensive curriculum, including both introductory and more advanced courses in their particular fields of interest. The program is intended for students from a variety of legal systems and backgrounds. Because of our strength in the field of global practice, we are equally interested in applicants pursuing careers in private practice, government service, the judiciary, international organizations, non-governmental organizations, and legal scholarship. We are most interested in applicants who have completed their prior legal studies with high rank and who intend to return to their home countries to contribute to the legal profession.

Further information is available on the program’s website at www.bc.edu/llm or from the LL.M. Office, Boston College Law School, 885 Centre Street, Newton, MA 02459. Our e-mail address is bcllm@bc.edu.

Boston College School of Social Work - University Catalog

In keeping with the four-century-old Jesuit tradition of educating students in the service of humanity, Boston College established a School of Social Work (SSW) in March 1936. The SSW offers the Master of Social Work (M.S.W.) and the Doctor of Philosophy in Social Work (Ph.D.) degrees. In addition to providing foundation courses for all students, the Master of Social Work program of study affords each student the opportunity to specialize in a social work practice intervention method. The two areas of specialized practice are Clinical Social Work and Macro Social Work on the master's level. Five advanced Fields-of-Practice are offered: Children, Youth, and Families; Global Practice; Health; Mental Health; and Older Adults and Families. A sixth option offers an individualized Field-of-Practice that may be designed to meet a student's learning objectives. The School also offers a research-oriented Doctoral program that prepares scholars to pursue knowledge that will advance the field of social welfare and social work practice.

- Professional Program: Master of Social Work (M.S.W.)
- Doctor of Philosophy Degree Program
- Combined M.S.W./Ph.D.
- Financial Aid
- For More Information
Professional Program: Master of Social Work (M.S.W.)

Introduction to the Master of Social Work (M.S.W.)

The M.S.W. Program offers students a choice of specialized practice. Students select either Clinical Social Work Practice or Macro Social Work Practice.

Clinical Social Work is the process of working with individuals, families, and groups to help them deal with intrapersonal, interpersonal, and environmental problems. The process utilizes a bio-psychosocial assessment and intervention model to increase an individual’s well-being. Each person, family, or group has a unique story to share, one that is shaped by cherished beliefs, values, and traditions, one that is connected to the larger stories of communities and nations. The complex process of helping others is, fundamentally, one of empowerment. In practicing clinical social work the aim is to strengthen, support, and accompany clients in their healthy efforts to repair their past and build a future that honors their uniqueness and brings into reality their personal dreams. Our challenging, dynamic, and contemporary program of professional formation transforms compassion into therapeutic empathy. We integrate social work's enduring values, theories, and skills with bold and innovative ways of helping others. This fusion of old and new creates an environment where students learn that interventions, guided by evidence-based practice, become powerfully therapeutic when imbedded in a relationship of respect and authentic concern.

Macro Social Work Practice prepares students to develop and foster social innovation by understanding the process of innovation and through skill
development related to assessment, strategic planning, organizational
development, financial management, and administration. Students are
prepared to develop innovative solutions to solve today’s complex
problems, lead organizations that foster these solutions, and mobilize
strategic partners, political resources, and community resources to initiate
and sustain social change.

The M.S.W. Program is accredited by the Council on Social Work Education
and is designed for completion in either two full-time academic years of
concurrent class and field work or in a Three-Year or Four-Year Program.
All degree requirements must be fulfilled within a period of five years.

The M.S.W. curriculum is divided into four overlapping components:
Foundation, Specialized Practice, Field-of-Practice, and Electives. This
configuration allows students to establish a solid foundation in social work
practice, choose either Clinical or Macro Social Work Practice as their area
of specialized practice, and then choose a Field-of-Practice to gain
advanced policy and practice skills in a particular area. The Field-of-
Practice choices are: Children, Youth, and Families; Global Practice; Health;
Mental Health; Older Adults and Families; and an Individualized Option.

**Foundation Courses**

Seven foundation courses provide the basis for the advanced curriculum. In
compliance with Council of Social Work Education (CSWE) Accreditation
Standards, the foundation curriculum includes content on Social Work
competencies: professional and ethical behavior, diversity, human rights
and justice, research, policy, engagement, assessment, intervention, and
evaluation.

The following courses comprise the Foundation curriculum:
• SCWK7701 The Social Welfare System
• SCWK7721 Human Behavior and the Social Environment
• SCWK7723 Diversity and Cross-Cultural Issues
• SCWK7747 Research Methods in Social Work Practice
• SCWK7762 Basic Skills in Clinical Social Work
• SCWK8800 Basic Skills in Macro Practice
• SCWK9921 Field Education I

Specialized Practice Courses

Students select one of two areas of specialized practice to focus their acquisition of practice skills: Clinical Social Work or Macro Social Work. Required Clinical courses include an advanced human behavior course, SCWK7722 Psychosocial Pathology, and two methods courses that focus on clinical assessment, practice theory, and evidenced-based practice interventions for a variety of problem areas and populations utilizing various treatment modalities—individual, family, and group.

The required Clinical courses are as follows:

• SCWK7722 Psychosocial Pathology
• SCWK8855 Clinical Practice with Children and Families: Assessment, Intervention, and Evidenced-Based Practice
• SCWK8856 Clinical Practice with Adults: Assessment, Intervention, and Evidenced-Based Practice
• SCWK9932 Field Education II—Clinical Social Work

Required Macro courses include an advanced human behavior course, SCWK8833 Leadership and Social Transformation, and two methods courses that focus on organizational and leadership analysis, marketing,
resource development and financial management, and the development of social innovation skills necessary to implement and sustain change.

The required Macro courses are as follows:

- SCWK8833 Leadership and Social Transformation
- SCWK8886 Financial Management and Resource Development
- SCWK8889 Social Innovation
- SCWK9942 Field Education II—Macro Social Work

**Fields-of-Practice**

Students entering their final full-time year will choose a Field-of-Practice. Each Field-of-Practice consists of an advanced practice course and one advanced policy course. All Fields-of-Practice require SCWK8841 Program Evaluation and either SCWK9933–9934 Field Education III–IV—Clinical Social Work or SCWK9943–9944 Field Education III–IV—Macro Social Work.

**Children, Youth, and Families**

The Children, Youth, and Families Field-of-Practice prepares students for professional practice with children, adolescents, and families seen across multiple settings. Clinical students will be proficient in practice with child and adolescent mental health intervention, including individual, group, and family modalities. Macro students will develop competence in leadership and administration, including personnel management, grant writing, and financial management within the context of community-based nonprofit organizations and public systems. Required courses include:

**Clinical Social Work**
- SCWK8872 Advanced Clinical Practice with Children, Youth and Families
- SCWK8805 Policy Issues in Family and Children’s Services

Macro Social Work

- SCWK8885 Management of Organizations Serving Children, Youth, and Families
- SCWK8805 Policy Issues in Family and Children’s Services

Global Practice

The Global Practice Field-of-Practice prepares students to become effective international social workers. Students learn how to collaborate with local partners around issues of humanitarian aid, social development, and capacity-building. Guiding principles are human rights, global justice, and diversity. Final year field placements will be managed in partnership with international organizations. Required courses include:

Clinical Social Work and Macro Social Work

- SCWK7797 Frameworks and Tools of Global Practice
- SCWK8806 Global Policy Issues and Implications

Health

The Health Field-of-Practice prepares students for clinical or macro practice in healthcare settings by providing specialized knowledge and skills in assessment, interventions, and health and mental health policy.
Clinical Social Work students, with knowledge of diagnostic assessment and evidenced-based interventions, will focus on treatment with individuals, couples, families, and small groups that are aimed at dealing with the impact of illness on the client system in culturally diverse environments within medical/healthcare settings.

Macro Social Work students, with knowledge of financial management, leadership, and social innovation, will focus on skills in planning, designing, and funding for innovating and sustaining current programs within medical/healthcare settings. Required courses include:

Clinical Social Work

- SCWK8873 Psychosocial Dimensions of Health and Medical Care Practice
- SCWK8817 Health and Mental Health Policy

Macro Social Work

- SCWK8897 Planning for Health and Mental Health Services
- SCWK8817 Health and Mental Health Policy

Mental Health

The Mental Health Field-of-Practice prepares students for clinical or macro practice in mental health settings by providing specialized knowledge and skills in assessment, interventions, and health and mental health policy.

Clinical Social Work students, with knowledge of diagnostic assessment and evidenced-based interventions, will focus on family systems work in
culturally diverse environments within mental health settings and select from a broad range of elective courses in various practice modalities.

Macro Social Work students, with knowledge of financial management, leadership, and social innovation, will focus on skills in planning, designing, and funding for innovating and sustaining current programs within mental health settings. Required courses include:

**Clinical Social Work**

- SCWK8865 Family Therapy
- SCWK8817 Health and Mental Health Policy

**Macro Social Work**

- SCWK8897 Planning for Health and Mental Health Services
- SCWK8817 Health and Mental Health Policy

**Older Adults and Families**

The Older Adults and Families Field-of-Practice prepares social work students for an integrated macro and clinical practice approach to working with older adults, their families, and the social policies and programs that affect their lives. Coursework for the concentration encompasses the entire range of health and mental health services from those provided to older adults as they “age in place” in their homes and communities through policy and advocacy functions of the local, state, and national aging network. Required courses include:

**Clinical Social Work and Macro Social Work**
• SCWK8823 Practice in Health and Mental Health Settings with Older Adults
• SCWK8802 Policy for an Aging Society: Issues and Options

Field Education

Students complete a total of 1200 hours of field education (480 hours in Field Education I and II and 720 hours in Field Education III and IV). Students participate in Field Education 2 days per week in Field Education I and II and 3 days per week in Field Education III and IV.

Electives

Students take five electives to round out their knowledge and skill-building with courses that offer advanced training in a particular area or provide new knowledge and skills in an area of interest to the student. The required Field-of-Practice advanced policy and advanced practice courses may be taken as electives by students from other Fields-of-Practice on a space-available basis. Elective courses are offered pending sufficient enrollment. The following courses may be offered as Elective options:

• SCWK7724 Neurobiology of Stress Reduction and Resilience
• SCWK7725 Families Impacted By Military Service
• SCWK7726 Neuroscience of Human Relationships and Development
• SCWK7727 Substance Use Disorders
• SCWK7728 Global Perspectives on Gender Inequalities
• SCWK7729 Public Health Social Work
• SCWK7733 Working with Lesbian, Gay, Bisexual, Transgender and Questioning Youth, Families and Adults
• SCWK7735 Social Determinants of Health and Mental Health
• SCWK7777 Services to Migrants: A Border Perspective
- SCWK7794 Immigrant and Refugee Issues in the United States
- SCWK8808 Legal Aspects of Social Work
- SCWK8822 Impact of Traumatic Victimization on Child and Adolescent Development
- SCWK8824 Practice in Home and Community Settings with Older Adults
- SCWK8830 Social Work and Spirituality
- SCWK8831 Dying, Grief and Bereavement
- SCWK8835 Veterans’ Health and Mental Health
- SCWK8836 Psychodynamic Theories of Individual Development
- SCWK8837 Social Services with Latino Populations in the U.S.
- SCWK8851 Policy Analysis Research for Social Reform
- SCWK8857 Group Therapy for Children and Adolescents
- SCWK8858 Clinical Practice in Schools
- SCWK8859 Integrating Play in Therapeutic Settings
- SCWK8860 Couples Therapy
- SCWK8862 Cognitive-Behavioral Therapy
- SCWK8864 Group Therapy
- SCWK8867 Internal Family Systems Therapy
- SCWK8868 Dialectical Behavioral Therapy
- SCWK8874 Adult Psychological Trauma
- SCWK8876 Solution-Focused Therapy
- SCWK8877 Narrative Therapy
- SCWK8880 Social Work Practice in Child Welfare
- SCWK8881 School Social Work: Program Development and Educational Policies
- SCWK8883 Creating and Sustaining Social Enterprises
- SCWK8884 Strategic Planning for Public and Nonprofit Organizations
- SCWK8887 Global Child Protection
- SCWK8888 Community Organizing and Political Strategies
- SCWK8890 Philanthropy and Strategic Fundraising
Dual Degree Programs

The Boston College School of Social Work has instituted three dual degree programs with other graduate departments of Boston College and one dual degree program with the undergraduate Morrissey College of Arts and Sciences and the Lynch School of Education and Human Development. A description of the programs is available from the respective admission offices. Candidates must apply to, and be accepted by, each of the relevant schools independently.

Established in 1980, the M.S.W./M.B.A. Program, in cooperation with the Carroll School of Management Graduate Programs, involves three full-time years—one each in the foundation years of both schools, and the third incorporating joint class and field education.

The four-year M.S.W./J.D. Program, inaugurated in 1988 with Boston College Law School, requires a foundation year in each school followed by two years of joint class and field instruction with selected emphasis on such areas as family law and services; child welfare and advocacy; and socio-legal aspects and interventions relating to poverty, homelessness, immigration, etc.

The three-year M.S.W./M.A. (Theology and Ministry), in conjunction with the Boston College’s School of Theology and Ministry, began in 1989. Three options for completing the M.S.W./M.A. include a foundation year in each curriculum with a third year of jointly administered class and field instruction; a program of summer courses taken in STM and a two-year academic program in the SSW; or an integrated program of study with courses taken in STM and the SSW during three years of study. Areas of focus include clinical work in hospitals and prisons, organizational services/administration, and parish social ministry.
In cooperation with the Morrissey College of Arts and Sciences and the Lynch School of Education and Human Development, the Boston College School of Social Work has instituted an Accelerated B.A./M.S.W. Program that enables Psychology, Sociology, and Applied Psychology and Human Development majors to complete the Social Work foundation courses during their junior and senior years. Students receive the B.A. at the end of four years, and then apply for admission to the School of Social Work for a final year of study in the M.S.W. Program. For sophomore prerequisites and application information, undergraduates should call the School of Social Work Associate Dean of Admissions at 617-552-4024.

The School also offers an upper-division introductory course that is not applicable to the M.S.W. degree: SCWK6600 Introduction to Social Work is cross-listed with the departments of Psychology and Sociology in the Morrissey College of Arts and Sciences.

**Doctor of Philosophy Degree Program**

**Introduction to Doctor of Philosophy Degree Program**

The School offers a research-oriented Ph.D. program that prepares scholars committed to pursue knowledge that will advance the field of social welfare and social work practice. Students master a substantive area of scholarship and gain methodological expertise to excel as researchers and teachers in leading academic and social welfare settings throughout the world. Grounded in core values of human dignity and social justice, the program nurtures independence and originality of thought in crafting innovative research and policy agendas for constructive social change.

The School of Social Work doctoral program offers two programs of study: a Ph.D. in Social Work and a Ph.D. in Social Welfare. The Ph.D. in Social
Work is designed for students with an M.S.W. or equivalent degree. The Ph.D. in Social Welfare is designed for students enrolled in the International Doctoral Program with partner Jesuit Universities in Latin America.

Program of Study—Social Work

Research training is at the core of the program. Students acquire expertise in applied social and behavioral science research methodologies that are especially appropriate for investigating critical policy and practice questions. This set of courses emphasizes analytic skills needed to understand, appraise, and advance knowledge in social work. The learning process involves more than classroom instruction. Students are expected to work closely with faculty mentors in their roles as scholars and researchers. Besides required courses, students can select from an array of elective academic courses, independent studies, research internships, and teaching practicums.

A minimum of 51 credit hours are required to complete the degree: 45 credits for academic courses and six credits for the dissertation. Among the 12 elective credits, three elective credits are specified to be an advanced social or behavioral science theory course and nine credits are specified to be a methods course. Students must pass the qualifying exam at the end of year two. For the qualifying exam, students need to produce a publishable paper that meets the requirements for publication in a scholarly journal. Before beginning research on the dissertation, the student must complete all required courses and the publishable paper. Required courses include the following:

- SCWK9950 Professional Development Seminar
- SCWK9951 Survey of Research Methods in Social and Behavioral Science
• SCWK9956 The Dialectics of Social and Behavioral Theory
• SCWK9959 Doctoral Publishable Writing Project
• SCWK9960 Regression Analysis for Social and Behavioral Sciences
• SCWK9964 Introduction to Statistics and Data Analysis
• SCWK9991 Doctoral Teaching Practicum
• SCWK9992 Theories and Methods of Teaching in Professional Education
• SCWK9993 Research Internship
• SCWK9994 Integrative Dissertation Seminar

**Total Credits**

The 51 credits is a minimal requirement. The actual number of courses taken by an individual student varies according to prior educational background and coursework.

**Program of Study—Social Welfare**

Students in the International Doctoral Program in Social Welfare enroll in courses in both Boston College and a partner Jesuit university in Latin America. Students start the program in the partner university taking elective courses in social behavioral science theory and other courses that provide a foundation in a social problem likely to be the focus of the student’s research. In subsequent years, student’s residence alternates between Boston College and the partner university. The International Doctoral Program in Social Welfare encourages and facilitates students to focus their doctoral research on topics and populations drawn from Latin American countries.
The program provides a strong foundation in research and preparation for an academic career through nine required courses and two dissertation direction courses. Students will enroll in a total of four to six courses in the partner university during year one and year three. The remaining four elective courses will be taken during students’ residency at Boston College in year two. Students must also pass a written comprehensive examination and produce a manuscript that is fitting for publication in a peer-reviewed scientific journal. Before beginning research on the dissertation, the student must complete all required courses and pass an oral qualifying examination based upon the publishable paper requirement. Required courses include the following:

- SCWK9951 Survey of Research Methods in Social and Behavioral Science
- SCWK9952 Tools for Scholarship in Social and Behavioral Science
- SCWK9980 History and Philosophy of Social Welfare in the U.S.
- SCWK9954 Models for Social Welfare Intervention Research
- SCWK9959 Doctoral Publishable Writing Project
- SCWK9960 Statistical Analysis for Social and Behavioral Research
- SCWK9961 Introduction to Structural Equation Modeling
- SCWK9992 Theories and Methods of Teaching in Professional Education
- SCWK9994 Integrative Seminar for Doctoral Students

**Total Credits**

The minimal credit requirement is 51 of which 38 credits are taken at Boston College and include required and elective courses and six credits for the dissertation. The remaining elective credits are taken at the partner university and may vary in accordance with the partner university’s
academic offerings. The actual number of courses taken by an individual student varies according to prior educational background and coursework.

**Combined M.S.W./Ph.D.**

The School provides an option whereby those doctoral students without a Master of Social Work degree can engage in a program of study that leads to both the M.S.W. and the Ph.D. degrees. The combined M.S.W./Ph.D. program provides an integrated educational program for exceptionally talented students to embark on their doctoral course work before fully completing all of the requirements for the M.S.W. program.

**Financial Aid**

There are five major sources of funding available for students in the Doctoral Program in social work at Boston College:

- The Boston College Doctoral Fellowship in Social Work is awarded each year on a competitive basis to full-time doctoral students in social work. Full tuition and a stipend are provided for four years as long as the student maintains good academic standing and demonstrates progress toward the Ph.D.
- Two Fellowships are awarded each year on a competitive basis to full-time doctoral students to provide additional financial support to help encourage them to successfully complete their studies.
- Research Assistant positions are provided through faculty research and training grants.
- Teaching Assistant positions are available for some doctoral and M.S.W. courses.
Additional grants and scholarship opportunities are available on an individual basis.

In addition to the financial assistance directly available from Boston College, SSW doctoral students are encouraged to apply for nationally competitive fellowships from private foundations and federal agencies.

For More Information

For a more detailed description of course offerings, the applicant should consult the Boston College School of Social Work Bulletin, which may be obtained by e-mailing swadmit@bc.edu or by writing to the Associate Dean of Enrollment Management, Boston College School of Social Work, McGuinn Hall, Chestnut Hill, MA 02467.

Managed By

University Catalog
Office of Student Services
Lyons Hall 103
Boston College’s Carroll School of Management, Graduate Programs are recognized for offering innovative programs uniquely suited to today’s challenging management environment. The School enrolls approximately 900 students in five highly regarded degree programs: the Master of Business Administration (M.B.A.), emphasizing hands-on, group learning and a global outlook; the Master of Science in Accounting (M.S.) providing students with the advanced quantitative tools and understanding of the important role of accounting in business; the Master of Science in Finance (M.S.), a rigorous ten-course curriculum providing advanced financial skills; the Ph.D. in Management with a concentration in Finance; the Ph.D. in Management with a concentration in Organization Studies; and the Ph.D. in Accounting, offering doctoral-level education for individuals interested in research and teaching. The Carroll School of Management, Graduate Programs have developed many exciting options that enable students to individualize their management education including several dual degree programs. Among those options are the Master of Business Administration/Master of Science in Finance (M.B.A./M.S. in Finance); the Master of Business Administration/Juris Doctor (M.B.A./J.D.); and the Master of Business Administration/Master of Social Work (M.B.A./M.S.W.).

Master of Business Administration

Full-Time M.B.A.

For today’s complex business environment, companies and organizations actively seek individuals who possess both highly developed management skills and advanced training in a specific discipline. An M.B.A. from Boston College offers you the skills and experience you need for an impactful career. Our Full-Time M.B.A. Program combines carefully sequenced courses with a variety of experiential learning components. Summer and academic year internships provide opportunities to apply classroom learning directly to professional practice. The M.B.A. prepares you to become a distinguished leader in business, acquire the tools employers demand from our world-class faculty, and connect with a powerful network of leaders and innovators at Boston College.

Requirements and Schedule

In the first year, students progress through the core curriculum as a cohort, developing a broad foundation of business knowledge and capabilities while forming meaningful connections with classmates. The second year of the program allows you to strengthen your skills in functional disciplines of your choice. Through the pursuit of elective courses, you can ready yourself for success in your desired field.
The Carroll School is committed to instilling a strong sense of community service in its students. In an effort to align this commitment with the Program, all M.B.A. students must fulfill a requirement of 20 hours of service to others through meaningful work as volunteers.

Full-Time M.B.A. students should plan on academic sessions from 8:30 a.m. to 5:00 p.m., Monday through Friday during the first year of study.

Second year elective courses are taught in the late afternoon and evening, and full-time students take their electives with Evening Program students whose participation adds a wider range of knowledge and experience to class discussions and projects. Most classes meet once a week from 7:00 p.m. to 9:30 p.m. during the academic year, with a limited number meeting from 4:30 p.m. to 6:50 p.m.

For current course listings and schedules, visit the Full-Time MBA website.

- ISYS7730 Data Analytics 3: In Practice
- 11 Electives

**Evening Part-Time M.B.A.**

As a working professional, the Part-Time M.B.A. Program at Boston College offers you the flexibility you need to earn your degree while advancing your career. And you benefit from the opportunity to apply what you learn in the Program directly to your work.

As a Part-Time M.B.A. student, you develop managerial, analytical, and practical management skills through the completion of a strong set of core courses that emphasize experiential learning. The program attracts a diverse mix of highly motivated individuals from the vibrant and diverse regional business community, helping you grow your network as you develop and learn new skills.

**Requirements and Schedule**

Students generally take two courses in the fall and spring semesters, but may take additional courses during the summer. Evening students must complete 57 credits of course work as well as 20 hours of community service. Most Evening program classes meet once a week from 7:00 p.m. to 9:30 p.m. during the academic year, with a limited number meeting from 4:30 p.m. to 6:50 p.m. Summer courses meet twice a week from 6:30 p.m. to 9:30 p.m. Evening students typically complete their degrees in four years.

For current course listings and schedules, visit the [Part-Time MBA](https://www.bc.edu/content/bc-web/academics/sites/university-catalog/graduate/csomgp.html#master_of_science_programs) website.

**Part-Time Program Curriculum**
- OPER7704 Economics

- MGMT7710 Strategic Management
- 9 Electives

*Students are required to complete a zero credit online Statistics module (OPER7703 Managerial Statistics) prior to enrolling in OPER7706.

**Advanced Standing and Equivalency for Graduate Degrees (M.B.A.)**

M.B.A. students may be eligible to waive courses based upon prior coursework and/or professional certifications (such as CPA or CFA). Waiver policies vary according to program.

Advanced Standing Credit: Students may waive a class and will also reduce the overall credit requirement for the degree.

Equivalency: Students may waive a class but will be required to replace it with an elective. Equivalency applies to core courses only.

Transfer Credit: Under certain circumstances, students may receive approval to take graduate courses at other AACSB-accredited colleges or

https://www.bc.edu/content/bc-web/academics/sites/university-catalog/graduate/csomgp.html#master_of_science_programs
universities. Grades received for transferred courses are not calculated into the student’s Boston College GPA.

**M.B.A. Part-Time**

All students accepted into the part-time M.B.A. program will be evaluated to determine their eligibility for Advanced Standing Credit. If not included in their application materials, students may be required to provide official transcripts and other relevant course information necessary to facilitate the review of their academic record. Shortly after receipt of their acceptance letter, students will receive notification of their eligibility to waive courses.

- The maximum amount of Advanced Standing Credit that a Part-time M.B.A. student may receive is 15 credits.
- Advanced Standing Credit will only be granted for courses in which the student has earned a grade of “B” or better, at an accredited institution, within the five years prior to enrolling in the Boston College Part-time M.B.A. program.
- The combination of waived credits and transfer credits may never exceed 1/3 of the course requirements for the degree.
- Students who have recognized professional certifications (i.e., CPA, CFA) may receive Advanced Standing Credit. A copy of the exam results will be required.
- Once an accepted student has been notified of eligibility to waive a course(s), he/she must respond with his/her intent to accept the Advanced Standing Credit, in writing, no later than Drop/Add Deadline for the semester in which he/she is enrolling.
- Students may contest waiver decisions within 30 days of the date of the initial decision. Course waivers will not be granted after this date.
- Once a student has accepted Advanced Standing Credit for a course, he/she may not take the course and receive credit.
- Professional experience alone will not make a student eligible to waive a course.
- Current Part-time M.B.A. students, who wish to take a course outside of the Carroll School of Management, must submit their request, in writing, at least 30 days prior to the start of the semester in which the student wishes to enroll in the outside course. Transfer credit will only be granted for courses related to the degree and is subject to approval by the Graduate Programs Office. Students must have completed a minimum of two semesters before they can submit a request to take a course outside of the Carroll School of Management. This includes courses taken through the Jesuit M.B.A. Network.
- Except under extenuating circumstances, students will not be approved for transfer credit if a comparable course is offered in the Carroll School of Management during the same academic year.
- Part-time M.B.A. students may cross register for one course each semester (not including Summer) at Boston University and Tufts, through the Consortium. Students interested in cross-registering for courses through the Consortium must first seek approval from the Graduate Programs Office and complete the necessary cross-registration forms, available through the University’s Office of Student Services (Lyons Hall). Per the Consortium agreement, tuition will be billed through the student’s Boston College account, at the Carroll School of Management’s tuition rate.

**Undergraduate Course Work**

Part-time M.B.A. students who have demonstrated mastery in a core subject area may receive Advanced Standing Credit for up to five courses (15 credits).
Mastery typically entails either an undergraduate major in a core course area or at least two intermediate to advanced undergraduate courses with grades of B or higher.

Students may only receive Advanced Standing Credit for core courses, based upon undergraduate coursework.

**Graduate and Professional Course Work**

Part-time M.B.A. students who have a prior graduate degree in a relevant field or have completed graduate management courses at other AACSB-accredited institutions may receive Advanced Standing Credit for a maximum of five courses (15 credits).

Students may receive Advanced Standing Credit for core courses and elective courses, based upon graduate coursework.

**Full-Time M.B.A. Program**

Students accepted to the full-time M.B.A. program may apply to waive core courses based upon prior course work. If a full-time M.B.A. student is deemed eligible to waive a course, he/she will receive Equivalency. Equivalency requires the student to replace the waived course with an elective; therefore, it does not decrease the credit requirement for the degree. Full-time M.B.A. students who wish to be evaluated for course waiver eligibility must submit a Course Waiver Form. Students may be required to provide official transcripts and other relevant course information necessary to facilitate the review of their academic record. Students enrolled in the full-time M.B.A. program must maintain their full-time status for four continuous semesters (with the exception of students enrolled in
approved dual degree programs outside of the Carroll School of Management).

- Full-time M.B.A. students may receive Equivalency for up to three core courses.
- Equivalency will only be granted for courses in which the student has earned a grade of “B” or better, at an accredited institution, within the five years prior to enrolling in the Boston College Part-time M.B.A. program.
- The combination of waived credits and transfer credits may never exceed 1/3 of the course requirements for the degree.
- Students who have recognized professional certifications (i.e., CPA, CFA) may receive Equivalency. A copy of the exam results will be required.
- Once an accepted student has been notified of eligibility to waive a course(s) and receive Equivalency, he/she must respond, in writing, his/her intent to accept the Equivalency no later than the drop/add deadline for the semester in which he/she is enrolling.
- Students may contest waiver decisions within 30 days of the date of the initial decision. Course waivers will not be granted after this date.
- Once a student has accepted Equivalency for a course, he/she may not take the course and receive credit.
- Professional experience alone will not make a student eligible to waive a course.
- Current full-time M.B.A. students who wish to take a course outside of the Carroll School of Management, must submit their request, in writing, at least 30 days prior to the start of the semester in which the student wishes to enroll in the outside course. Transfer credit will only be granted for courses related to the degree and is subject to approval by the Graduate Programs Office. Students must have completed a minimum of two semesters before they can submit a request to take a
course outside of the Carroll School of Management. This includes courses taken through the Jesuit M.B.A. Network.

- Courses taken outside of Boston College will not reduce the student’s flat-rate M.B.A. tuition for that semester.
- Except under extenuating circumstances, students will not be approved for transfer credit if a comparable course is offered in the Carroll School of Management during the same academic year.
- Full-time M.B.A. students may cross register for one course each semester (not including Summer) at Boston University and Tufts, through the Consortium. Students interested in cross-registering for courses through the Consortium must first seek approval from the Graduate Programs Office and complete the necessary cross-registration forms, available through the University Office of Student Services (Lyons Hall). Per the Consortium agreement, tuition will be billed through the student’s Boston College account, at the Carroll School of Management’s tuition rate.

**Undergraduate Course Work**

Full-Time M.B.A. students who have demonstrated mastery in a core subject may be eligible for equivalency for up to five courses (15 credits).

Mastery typically entails either an undergraduate major in a core course area or at least two intermediate to advanced undergraduate courses with grades of B or higher.

Students may only receive Equivalency for core courses, based upon undergraduate coursework.

**Graduate and Professional Course Work**
Students who have a prior graduate degree in a relevant field or have completed graduate management courses at other AACSB-accredited institutions may be eligible for equivalency.

The CPA and CFA certifications will make a student eligible for equivalency.

Professional experience alone will not make a student eligible to waive a course.

For more information, please contact the Office for Graduate Programs, at (617) 552-3773.

**Master of Science Programs**

**M.S. in Accounting**

The Master of Science in Accounting program at Boston College cultivates students’ analytical abilities and promotes an in-depth understanding of the role of accounting in the world at large. The Master of Science in Accounting prepares students to excel in the pursuit of their CPA and provides a strong foundation for a thriving career. The M.S. in Accounting program is only offered on a full-time basis. Required coursework is determined by faculty through the review of the student’s academic transcript.

**Enrollment Options**

If you earned your undergraduate degree in a subject other than accounting, the Master of Science in Accounting summer program is designed to prepare you for the advanced study of accounting topics by providing a foundational education in core accounting subjects.
If you earned an undergraduate degree in accounting, you can apply to either the Master of Science in Accounting summer or Master of Science in Accounting fall program. Typically, the program can be completed in two semesters, and matriculation options remain flexible if you have accepted an offer from a firm prior to the start of the program.

**Curriculum**

The Master of Science in Accounting Program offers a flexible curriculum that is tailored to your academic background. Courses focus on concepts that can be practically applied to professional accounting practice, and you learn from an accomplished faculty possessing valuable experience in the industry.

Upon completion of the Master of Science in Accounting Program, you will have a thorough understanding of the audit process. You will be proficient with firms’ strategic cost management and management control decisions. You will be proficient with respect to financial statement analysis. And you will gain an in-depth understanding of the role taxes play in business decision making.

Each student receives a personalized course worksheet upon entering the Program that lists the specific courses you need to take to fulfill the Master of Science in Accounting degree. Completion of the Program requires a minimum of ten courses (30 credit hours) and at least six accounting classes, including the three Master of Science in Accounting core courses.

In addition to the academic requirements, all M.S. in Accounting students must complete ten hours of Community Service to fulfill their degree requirements.
Students are responsible for meeting the individual state requirements for taking the CPA exam. In some states, these requirements may result in additional courses.

**M.S. in Finance**

The Master of Science in Finance offers you a comprehensive curriculum grounded in fundamental economic principles to develop specialized knowledge and skills as well as insights into innovative methodologies.

Two scheduling options are available. The full-time option allows you to complete the Master of Science in Finance in one full year of study, while the part-time option offers a part-time curriculum for students who wish to continue their careers.

All Master of Science in Finance candidates must meet certain prerequisite requirements prior to entering the program.

**Curriculum**

The traditional 30-credit M.S. in Finance Program comprises seven core courses and three electives. All M.S. in Finance students first master the sophisticated framework of financial understanding, techniques, and analysis taught in Investments, Corporate Finance, Financial Econometrics, and Management of Financial Institutions, which are the prerequisites for subsequent core courses and all finance electives. Knowledge and skills acquired in the initial courses inform advanced discussions and exploration of innovative methodologies in Derivatives and Risk Management, Advanced Corporate Finance, and Active Portfolio Management. Learning is engineered to be cumulative and reinforcing.
The Quantitative Track 30-credit M.S. in Finance Program comprises eight core courses and two electives. This track is STEM designated and provides M.S. in Finance students with a highly quantitative focus with an emphasis on financial analytics. The STEM designation will enable students graduating from the Quantitative Finance Track to gain vital career experience and bring quantitative skills to workplaces in Corporate Finance, Asset Management, and Investment Banking.

In addition to these 30 credits, all M.S. in Finance students must complete 10 hours of Community Service to fulfill their degree requirements.

The M.S. in Finance Program is designed to meet the varied needs of finance professionals. Most classes meet from 7:00 p.m. to 9:30 p.m. during the academic year, with a limited number meeting from 4:30 p.m. to 6:50 p.m. Summer term courses meet twice a week from 6:30 p.m. to 9:30 p.m.

M.S. in Finance Program Options

Cohort (Accelerated) Option

Students are drawn from across the country and around the world to participate in the Carroll School’s accelerated M.S. in Finance Program, which can be completed in one full year of study. Students take four courses in the fall and spring terms and two courses in the summer term when they may also choose to pursue an internship. Students progress through the program as a cohort. Taking all courses together not only fosters exceptional camaraderie, but also creates a supportive network—one that continues long after the Program comes to an end.

Self-Paced Option
The self-paced option is designed to meet the needs of individuals who wish to continue in their careers while pursuing advanced study. While course enrollment is flexible, self-paced students typically complete the Program in twenty months by taking two courses in the fall, spring, and summer semesters respectively.

**M.S. in Finance Curriculum, Cohort Option**

**Core Courses**

- MFIN8801 Investments
- MFIN8807 Corporate Finance
- MFIN8820 Management of Financial Institutions
- MFIN8852 Financial Econometrics
- MFIN8860 Derivatives & Risk Analytics
- MFIN8881 Advanced Corporate Finance
- MFIN8803 Quantitative Portfolio Management

*Three electives:*

- Any 6600- or 8800-level Finance elective

**M.S. in Finance Curriculum, Quantitative Track (available only as full-time cohort)**

**Core Courses**

- MFIN8801 Investments
- MFIN8807 Corporate Finance
- MFIN8820 Management of Financial Institutions
- MFIN8852 Financial Econometrics

*Four of the five following:*

https://www.bc.edu/content/bc-web/academics/sites/university-catalog/graduate/csomgp.html#master_of_science_programs
- MFIN8XXX Data Analytics (course number TBD)
- MFIN8803 Quantitative Portfolio Management
- MFIN6640 Finance Seminar: Simulation and Optimization in Finance
- MFIN8860 Derivatives and Risk Analytics
- MFIN8880 Fixed Income Analysis

*Two electives:*

- Any 6600- or 8800-level Finance Elective

**M.S. in Finance Curriculum, Self-Paced Option**

**Core Courses**

- MFIN8801 Investments
- MFIN8807 Corporate Finance
- MFIN8820 Management of Financial Institutions
- MFIN8852 Financial Econometrics
- MFIN8860 Derivatives & Risk Management

*One of the following:*

- MFIN8803 Active Portfolio Management
- MFIN8880 Fixed Income Analysis

*One of the following:*

- MFIN8808 Financial Policy
- MFIN8881 Advanced Corporate Finance
- MFIN8821 Corporate Valuation and Restructuring

**Three electives:**
Any 6600- or 8800-level Finance elective

Doctor of Philosophy Programs

Ph.D. in Accounting

Ph.D. students in accounting complete a five-year program that is based on a thorough grounding in fundamental economic principles and rigorous statistical skills. Students will develop an appreciation of the institutional details that characterize accounting research and will concentrate on developing skills in econometrics as well as contracting and capital markets theory.

Course Requirements

Accounting Ph.D. students complete a program of study that begins with coursework in accounting, quantitative methods, economics, and finance. Through seminar courses, students will become fluent on the existing state of research literature, appropriate research methods, and proper management of the publication process.

Course requirements are typically satisfied in the first two years of the program. In additional to doctoral seminars, Ph.D. students will take courses in the departments of finance and economics and are encouraged to explore inter-disciplinary pursuits (visit the Ph.D. in Accounting website for more details).

Comprehensive Examination

A comprehensive examination will be administered at the conclusion of the second year in the program. Satisfactory performance on the exam marks
the transition from coursework to full-time thesis research.

Research

Doctoral students engage early in the research process. The completion of a first-year paper, which can be a replication or an extension of a previous study, provides an early hands-on experience in research design, programming, data-management, and statistical analysis. In addition, students complete a second-year paper based on an original research idea, and submit a research proposal at the end of the third year. The proposal is the precursor to the dissertation: a substantial, significant, and original contribution to the field.

Assistantships

Doctoral Students at the Carroll School are expected to serve as research or teaching assistants throughout their studies. Typically, students will serve as research assistants for the first two years of the program and act as teaching/research assistants in the following years. In exchange, students receive full tuition remission and a stipend.

Ph.D. in Finance

The Ph.D. program in Finance at Boston College is internationally known for a rigorous curriculum that combines theory with applied research and pedagogy. Finance faculty at Boston College are experts in their disciplines and globally acclaimed for their scholarship, research, and mentorship. In our collegial environment, students typically collaborate with one another and with faculty to produce groundbreaking research. The academic program begins with systematic, rigorous training in quantitative methods, economics, and finance. In addition, students complete a major research
project, serve as research and teaching assistants, and write a doctoral dissertation. Graduates of the program are leaders in the field of finance who have the knowledge and analytical skills they need to conduct research and teach at the highest level.

The Ph.D. Program contains five components:

- Course Requirements
- Research Paper
- Comprehensive Examination
- Dissertation
- Research/Teaching Requirements

Each of these requirements is described below. Detailed standards for the Ph.D. candidate are published and provided to all students.

**Course Requirements**

Students complete a program of study that leads to competency in three areas: quantitative methods, economics, and finance. Ph.D. candidates in finance must complete four doctoral courses in quantitative methods, two in microeconomics, four in finance, and one in accounting. These requirements are typically satisfied in the first three years of the program (visit the Ph.D. in Finance website for details). In some cases, coursework completed prior to entering the program may be substituted for required courses.

**Research Paper**
Students are expected to engage in research early in the program. All students work as research assistants for fifteen hours per week for the first two years of the program. By May 31 of their third year, students are required to submit a research paper. A more detailed description of the research paper, its standards and criteria used to evaluate it is available from, maintained, and updated by the Ph.D. Committee.

Comprehensive Examination

Satisfactory performance on a written comprehensive examination marks the student’s transition from coursework to thesis research. The examination is intended to allow the student to demonstrate substantial knowledge of financial economics. The examination is taken within two months of the completion of the first year of the program.

Dissertation

The doctoral dissertation is expected to be a substantial, significant, and original contribution to knowledge. It is prepared under the guidance of a thesis committee of three or more faculty members selected by the candidate in consultation with his or her thesis advisor. Early in the process, the candidate submits a thesis proposal. The proposal is presented in a seminar to which the finance faculty and doctoral students are invited. The purpose of the presentation is to give the student an opportunity to hear the suggestions and comments of members of the Boston College finance community while the research plan is still fluid. A thesis-defense seminar, open to the Boston College community, is held when the research is completed.

Student Support and Research/Teaching Requirement
Doctoral students are offered financial support at a competitive rate. A student in good standing may receive this support for four years. Financial support beyond the fourth year is conditional on the student’s performance and may vary in amount. In return for this support, the student acts as a research assistant for the first two years of the program, then acts as a teaching assistant in the following years of the program. This generous level of support is based on the fact that students are expected to devote their full energies to the program during the entire calendar year, not just the academic year.

Ph.D. in Organization Studies

Designed to prepare students for academic careers, the Ph.D. program in Organization Studies at Boston College is recognized worldwide for its rigorous curriculum and exceptional faculty who are leaders in their fields. The program emphasizes a strong foundation in organizational theory, research methods, and statistics. Students begin the program with a set of complementary courses in micro- and macro-organizational theory, qualitative and quantitative research methods, statistics, and teaching skills. In the third year, students complete a major empirical research project and teach a course of their own. Throughout the Ph.D. program, students pursue research on their own and in collaboration with faculty. All students are encouraged to deliver papers at national and international professional conferences, as well as to submit articles for publication in top-tier research journals. Our graduates emerge as creative, independent scholars who can craft and pursue their own research agendas.

Ph.D. in Management with a Concentration in Organization Studies

Curriculum

Course Requirements
Ph.D. students who have previous education in management take a total of 19 courses during the program; students without management education take two additional M.B.A. courses, for a total of 21 courses. All students begin the organization studies program with a set of complementary courses in micro- and macro-organizational theory, qualitative and quantitative research methods, statistics, and teaching skills. For course details, see Curriculum.

**Comprehensive Examination**

The comprehensive examination is given at the end of the second year. To pass the exam, students must demonstrate a substantial knowledge of theory and methods involved in the study of organizational behavior and theory.

**Research Project and Dissertation**

By the end of the third year, students complete a research paper demonstrating the ability to conduct innovative research in organizational studies. The culmination of the program is the dissertation: a substantial, significant, and original contribution to the body of knowledge in organizational studies that is prepared under the guidance of a dissertation committee of three faculty members.

**Assistantship Requirement**

Doctoral students at the Carroll School are expected to serve as research or teaching assistants throughout their studies. Typically, a student works as a research assistant for 15 hours a week during the first two years of the program, then teaches one course per semester or acts as a research assistant in the third and fourth years. In exchange, the Carroll School
provides financial support for doctoral students in the form of a stipend and tuition remission.

Dual Degree Programs

The Carroll School of Management, Graduate Programs collaborate with other outstanding graduate schools and programs at Boston College to offer over highly regarded dual degree programs. Students are generally able to complete the requirements of a dual degree program in less time than it would take to pursue each program separately. Interested applicants must apply and be admitted to both schools involved with a program. Dual degree programs have varying requirements and, while most take three years to complete, program lengths vary from two to four years of full-time study.

Students interested in dual degree programs must apply and be admitted to both the Carroll School of Management, Graduate Programs and the participating school within the University.

Applicants should contact both admissions offices to learn about admission requirements, deadline dates, and appropriate entrance tests.

Admission Information

Read below for more information on how to apply.

Master of Business Administration

Boston College’s M.B.A. program welcomes applications from graduates of accredited colleges and universities. The Admissions Committee considers
applicants with academic backgrounds from virtually all areas of study, including liberal arts, business administration, social sciences, physical sciences, engineering, and law.

Courses in business administration or management are not required for admission to the M.B.A. program. However, students are expected to be proficient in communication skills and mathematics. In addition, all applicants are required to take either the GMAT or GRE.

The Admissions Committee looks for evidence of sound scholarship and management potential. Work experience and academic excellence are significant criteria in their evaluation. With few exceptions, students enter the program after at least two years of full-time work experience. Leadership and community involvement are also important factors in admissions decisions.

Additional information can be found at [www.bc.edu/mba](http://www.bc.edu/mba).

**Master of Science in Accounting**

The M.S. in Accounting Program welcomes applications from graduates of accredited colleges and universities. The Admissions Committee considers applicants with academic backgrounds from virtually all areas of study, including liberal arts, business administration, social sciences, physical sciences, engineering, and law.

Courses in business administration or management are not required for admission to the M.S. in Accounting Program. All applicants are required to take either the GMAT or GRE.
The Admissions Committee looks for evidence of superior intellectual ability, excellent communication and interpersonal skills, and the potential for a successful career in the accounting profession. Sound undergraduate scholarship, together with internship/work experience and leadership and community involvement, are significant criteria in their evaluation. Work or internship experience is not required to apply to the program; however, it can strengthen a candidate’s application.

Additional information can be found at the M.S. in Accounting website.

Master of Science in Finance

The M.S. in Finance Program welcomes applications from graduates of accredited colleges and universities who have a strong interest in finance. Applicants with undergraduate or graduate degrees in other subject areas are encouraged to apply early so that they will have the opportunity to fulfill prerequisites that may be required. The Admissions Committee focuses on evidence of strong academic and professional success in all aspects of the application. An applicant’s quantitative ability is carefully considered due to the rigorous nature of the curriculum. The Committee also considers leadership and community involvement factors in the admissions process. All applicants are required to take either the GMAT or GRE. Additional information can be found at the M.S. in Finance website.

M.B.A. Dual Degrees: Master of Science in Finance or Master of Science in Accounting

Students should be admitted to both the M.B.A. and M.S. in Finance or M.S. in Accounting programs to enter the Dual Degree program. The M.B.A./M.S. in Finance program is highly analytical, and an applicant’s quantitative skills are weighed heavily in the admission decision. Students are expected to be
proficient in English and mathematics. All applicants are required to take either the GMAT or GRE.

The M.B.A./M.S. in Accounting program is for individuals interested in careers in public accounting, financial analysis, or financial management in a corporate or not-for-profit environment. Students are expected to be proficient in English. All applicants are required to take either the GMAT or GRE.

**Ph.D. in Finance**

Admission to the Ph.D. program in Finance is open to applicants who show evidence of strong intellectual abilities, a commitment to research and teaching, and previous preparation in an analytical field. Students are required to have demonstrated competence and basic knowledge of finance. A student entering the program without such a background may be required to take additional courses. The GMAT or GRE is required for admission.

**Ph.D. in Organization Studies**

Admission to the Ph.D. program in Organization Studies is open to applicants who show evidence of strong intellectual capabilities, a commitment to research and teaching, and previous academic preparation in fields related to management. Students are required to have demonstrated competence in the functional areas of management. Applicants who have not already received an M.B.A. or have not completed the equivalent of the M.B.A. core curriculum prior to entering the program may be required to take additional courses. The GMAT or GRE is required for admission.
Ph.D. in Accounting

Admission to the Ph.D. program in Accounting is open to applicants with outstanding potential for leadership and academic excellence. While notable for their individual achievements, competitive candidates will demonstrate a consistent record of taking initiative in their academic and professional pursuits, and aptitude for conducting research at its highest levels, and a desire to make an impact on the world. Applicants are required to take the GMAT or GRE.

International Students

All applicants who completed their undergraduate course work outside the United States must have the equivalent of an American bachelor’s degree or American master’s degree (equivalency to be determined by the Graduate Dean of the School). In addition, all students whose first language is not English are required to take the Test of English as a Foreign Language (TOEFL) or Pearson Test of English (PTE). This requirement is waived for applicants who have completed a four-year course of study or have been enrolled for the past two years in a college or university in the United States, Canada, Great Britain, Australia, or New Zealand. The minimum required score on the TOEFL is 600 paper-based, 250 computer-based, or 100 on the IBT. The minimum required score on the PTE is 68. An official score report should be sent to Boston College, The Carroll School of Management, Graduate Programs, Cushing Hall, 203, 140 Commonwealth Ave., Chestnut Hill, MA 02467-3808, United States.

Accepted international applicants must provide financial certification for two years for the M.B.A. Program and one year for the M.S. in Finance or M.S. in Accounting Program.
Financial Assistance

See below for more information on financial aid.

Graduate Assistantships and Scholarships

The Carroll School of Management offers a range of graduate assistantships and scholarships to Full-Time M.B.A., M.S. in Finance and dual degree M.B.A./M.S. in Finance students. Assistantships and scholarships are merit-based awards and are made only at the time of admission. These awards range in value and are typically awarded to exceptionally strong candidates. These institutional awards are determined by committee and administered at the point of admission.

NOTE: Applicants must indicate interest in receiving merit-based funding on the application.

Graduate assistantships involve research or administrative duties in exchange for a stipend. Assistantships are generally 6 hours per week assignments.

Assistantships are available to both domestic and international applicants, and can be offered in combination with academic scholarship awards. Scholarships are awarded on the basis of merit and vary in amount.

Merit-based awards are made to new students at the time of admission. Students who receive a scholarship and/or assistantship during the first year of the M.B.A. program and maintain a cumulative grade point average of at least a 3.0 are eligible for consideration for continuing support during the second year, subject to performance evaluation by their supervisor.
The M.S. in Accounting Program offers merit-based scholarships to selected admitted applicants. Awards are made only at the time of admission. Scholarships are available to both domestic and international applicants. All admitted applicants are automatically considered for an award and awardees typically show evidence of superior performance in their application materials.

Ph.D. in Finance candidates, upon completion of any necessary prerequisite courses, receive full tuition remission and an annual stipend for up to four years of full-time study. In return, each candidate works as a research assistant the first two years and as either a research assistant or teaching assistant for the second two years.

**University-Administered Financial Aid**

In addition to the assistantships and scholarships offered through the Carroll School of Management, Graduate Programs, the Office of Student Services offers a variety of programs to help students finance the potential for a successful career in the accounting profession. Sound undergraduate scholarship, together with internship/work experience and leadership and community involvement are significant criteria in their evaluation. Work or internship experience is not required to apply to the program; however, it can strengthen a candidate’s application.

Additional information can be found at the [Graduate and Law Financial Aid](https://www.bc.edu/content/bc-web/academics/sites/university-catalog/graduate/csomgp.html#master_of_science_programs) website.

**Career Development, Accreditation, and More Information**
Career Development

The Office of Graduate Management Career Development supports students in achieving their career goals through placement initiatives, career coaching, recruiting, and other services. In addition, the office serves as a bridge to corporations through its outreach activities and links to Boston College’s worldwide alumni network. Specific services include the following: recruiting program, corporate presentations and informational sessions, interview preparation, resume books, corporate outreach, and other relevant Career Resources.

Accreditation

The Carroll School of Management is accredited by the Association to Advance Collegiate Schools of Business (AACSB). The School is also a member of the Graduate Management Admission Council (GMAC) and the New England Association of Graduate Admission Professionals.

For More Information

Prospective students should direct inquiries for the M.B.A., M.S. in Finance, M.S. in Accounting, or Ph.D. in Finance Program to the Graduate Management Admissions Office at Boston College, Cushing Hall, Room 203, Chestnut Hill, MA 02467-3808; telephone: 617-552-3920; fax: 617-552-8078; www.bc.edu/carroll.

Managed By

University Catalog
Office of Student Services
The William F. Connell School of Nursing offers a Master of Science (M.S.) degree program preparing individuals for advanced nursing practice as nurse practitioners or nurse anesthetists; a Doctor of Nursing Practice (DNP) degree program, preparing individuals for advanced nursing practice as nurse practitioners; and a Doctor of Philosophy (Ph.D.) degree program preparing highly qualified individuals for research and leadership roles in nursing, health care, research, and academic settings.

Accreditation

All nurse practitioner degree programs are nationally accredited by the Commission on Collegiate Nursing Education (CCNE). For additional information, visit the [CCNE website](https://www.ccneaccreditation.org). The Nurse Anesthesia program is accredited by the Council of Accreditation of Nurse Anesthesia Educational Programs.

- [General Information](https://www.bc.edu/content/bc-web/academics/sites/university-catalog/graduate/csongp.html#general_information)
Doctor of Philosophy Degree Program with a Major in Nursing

The Ph.D. Program in Nursing emphasizes knowledge development and research to advance nursing science and improve the health of individuals, families, and communities. For the program objectives, please refer to the student handbook.

The Ph.D. program includes two phases: coursework and dissertation. After finishing the required coursework, the student completes a comprehensive examination. The purpose of the Ph.D. Comprehensive Examination is to demonstrate mastery of the program objectives through written and oral responses to questions related to knowledge development, research methods, substantive knowledge, ethical judgment, and nursing/healthcare issues and health policy. After successful completion of the Ph.D. Comprehensive Examination, the student moves to the dissertation phase, in which she/he develops and conducts original dissertation research. The Ph.D. program and defense of the final dissertation must be completed within eight years of initial enrollment. Policies and procedures are consistent with those of the University.

Consistent with the recommendations of leading professional organizations, full-time doctoral study is highly recommended. Fellowships, scholarships, and other financial resources are available to full-time Ph.D. students through the Connell School of Nursing (CSON), Boston College, professional nursing organizations and governmental agencies (e.g., HRSA, NIH, and NINR). The full-time plan of study allows students to complete required coursework in two years; some students may take longer to complete required coursework or may need to take additional coursework. Most full-time students complete the entire Ph.D. program in four–five
years. Part-time students usually take longer to complete the degree. Nonetheless, the entire Ph.D. program, including dissertation research and defense, must be completed within eight years.

Low student-to-faculty ratios and research mentorship facilitate student success and program completion in a reasonable amount of time. Multiple resources for scholarly development are available within the Connell School of Nursing, the University, our consortium University partners, and through research collaborations with research and clinical academic centers of the Greater Boston area. The Ph.D. program offers a variety of learning opportunities through course work, CSON forums, interdisciplinary colloquia, and collaborations through the Harvard Catalyst, independent study, and research practica. An individualized plan of study is developed according to the student’s educational background, research interests, and stage of development in scholarly activities.

**Program of Study**

A minimum of forty-six (46) credits are required to complete the Ph.D. degree. Additional credits and course work may be needed, depending upon the student’s background, previous graduate training and area of research interest. Substantive content expertise is acquired by taking cognates and elective courses in the area of interest. The research component of the program includes qualitative and quantitative research methods, statistics, research seminars, research practica and experiences, and dissertation development and advisement.

The list of courses in the Ph.D. program of study can be found in the [Ph.D. Student Handbook](https://www.bc.edu/content/bc-web/academics/sites/university-catalog/graduate/csongp.html#doctor_of_nursing_practice_degree_program).
There are three major sources of funding for full-time students in the doctoral program in nursing at Boston College.

1. University Fellowships are awarded to eligible full-time students each year on a competitive basis. Full tuition and a stipend are provided for up to three years as long as the student maintains good academic standing and demonstrates progress toward the Ph.D.
2. Research Assistant positions may be available through faculty research grants.
3. Teaching Assistant positions are available within the Connell School of Nursing.

Additional grants and scholarship opportunities are available on an individual basis. Students are encouraged to apply for a competitive individual National Research Service Award to assist with tuition and to provide a stipend.

Career Opportunities

Graduates of the Ph.D. program often seek positions in academic settings or in health care, industry, government, or other settings where research is conducted. Some Ph.D. graduates continue on to complete post-doctoral fellowships at research centers located at universities, government or health care agencies.

Doctor of Nursing Practice Degree Program

The Doctor of Nursing Practice (DNP) program is a terminal nursing practice degree emphasizing holistic and compassionate care in the preparation of advanced practice nurses. The DNP program prepares
advanced practice nurses with the knowledge and skill for providing comprehensive primary care to patients, families, communities and populations within our complex and ever-changing health care system. With a focus on innovative and effective leadership, evidence-based practice, quality improvement and a systems approach to care, the DNP advanced practice nurse is equipped to become an expert nurse leader in improving health outcomes and systems.

The DNP program builds upon and integrates core course work in Epidemiology, Health Care Policy for Nursing Practice Leaders, Healthcare Information Technology Management, Program Planning and Evaluation for Population Health, Healthcare Quality Management, as well as the three P's (Advanced Physiology and Pathophysiology Across the Life Span, Advanced Health/Physical Assessment Across the Life Span, Pharmacotherapeutics in Advanced Practice Nursing) throughout the curriculum and clinical practicum courses. A focus on the history of nursing science, nursing’s ethical responsibilities, as well as a strong foundation in evidence-based practice, culminates in the development of a student-led, innovative practice improvement or change project (DNP project).

**DNP Areas of Specialization**

**Adult-Gerontology Primary Care Nurse Practitioner**

As an advanced practice nurse, a graduate of this program is able to manage the health care of adolescents, adults, and older adults, providing interventions to promote optimal health across a wide range of settings. Graduates serve as advanced practice nurses in a variety of health care settings including hospitals, clinics, health maintenance organizations, hospices, home care, and community-based medical practices, and they can pursue national certification (through organizations such as the
American Nurses Credentialing Center) as an Adult-Gerontology Primary Care Nurse Practitioner.

**Family Nurse Practitioner**

A graduate of this program is able to deliver primary care to individuals, families, and communities across a broad range of racial/ethnic, socioeconomic, geographic, and age/development strata. Graduates can serve as Family Nurse Practitioners (FNPs) in a variety of health care settings, including ambulatory settings, wellness centers, home health agencies, occupational health sites, senior centers, homeless shelters, and migrant camps. Graduates can pursue national certification (through organizations such as the American Nurses Credentialing Center) as a Family Nurse Practitioner.

**Pediatric Primary Care Nurse Practitioner**

A graduate of this specialty program is able to provide a wide range of primary and secondary health services for children from infancy through adolescence. Graduates can serve as a Pediatric Nurse Practitioner in a variety of health care agencies and community settings. Graduates can pursue national certification (through the American Nurses Credentialing Center or the National Certification Board of Pediatric Nurse Associates and Practitioners) as a Pediatric Primary Care Nurse Practitioner.

**Psychiatric-Mental Health Nurse Practitioner**

A graduate of the Family Psychiatric Mental Health Nurse Practitioner Program is able to conduct psychotherapy with individuals across the life span, groups, and families. Graduates can also function as case managers for persons with psychiatric disorders, provide psychiatric consultation to
primary care providers, serve as Psychiatric-Mental Health Specialists in a variety of settings, including out-patient, partial hospitalization, day treatment, and community-based intervention programs. Graduates are eligible to seek national certification (through organizations such as the American Nurses Credentialing Center) as a Family Psychiatric-Mental Health Nurse Practitioner or Psychiatric-Mental Health Nurse Practitioner, and can apply for prescriptive authority in many states (including Massachusetts).

**Women’s Health Nurse Practitioner**

As a Women’s Health Nurse Practitioner, a graduate from this specialty program is able to provide direct care to meet women’s unique concerns and health needs across the life span. Graduates can also serve as a Women’s Health Nurse Practitioner inside or outside of formal health care agencies and institutions. Graduates can pursue national certification as a Women’s Health Nurse Practitioner offered by national programs such as the National Certification Corporation.

**Program Entry Options**

**Post-Baccalaureate Doctor of Nursing Practice (DNP)**

The Post-Baccalaureate DNP provides a seamless, integrated curriculum to prepare registered nurses to prepare for certification as advance practice nurses. This program, designed for individuals who hold baccalaureate degree in nursing and wish to specialize in one of the following specialty practice areas: Adult-Gerontology Primary Care Nurse Practitioner, Family Nurse Practitioner, Pediatric Primary Care Nurse Practitioner, Psychiatric-Mental Health Nurse Practitioner, and Women’s Health Nurse Practitioner,
can be completed on a full or part-time basis. The program includes 1000 clinical practice hours and 79-82 academic credits.

**Post-Master’s Doctor of Nursing Practice (DNP)**

The Post-Master’s DNP program is designed for currently practicing master's prepared advanced practice nurses who wish to complete a terminal practice degree program. Following a complete portfolio review and building on prior clinical knowledge and experience, students will focus on innovative core class work in healthcare quality, safety, informatics and policy. Building on a foundation of evidence-based practice knowledge, students will develop and lead an innovative practice improvement or change project. The program includes a project associated practicum and a minimum of 30 academic credits.

**RN (ASN) to Doctor to Nursing Practice (DNP)**

The RN to DNP program is designed for the associate degree prepared registered nurse who wishes to become an advanced practice nurse. Following a complete portfolio review, an individualized curriculum of classroom and clinical content will be developed. Students entering by this route will be required to complete bridge course work prior to beginning the DNP curriculum. This program, designed for individuals who hold an associate's degree in nursing, an RN license and the desire to specialize in one of the following specialty practice areas: Adult-Gerontology Primary Care Nurse Practitioner, Family Nurse Practitioner, Pediatric Primary Care Nurse Practitioner, Psychiatric-Mental Health Nurse Practitioner, and Women’s Health Nurse Practitioner, can be completed on a full or part-time basis. One thousand (1000) advanced practice clinical hours are required. Credit hours are dependent on results of the individual portfolio review.
Master of Science Degree Program with a Major in Nursing

The Master of Science degree prepares individuals for advanced practice in nursing. The focus of the programs is on human responses to actual or potential health problems. The approach to clients is multi-faceted and includes the development of advanced competencies in clinical judgment. Graduates go on to provide theory- and evidence-based direct care to individuals, families, and communities. Additional roles of the advanced practice nurse include indirect services such as staff development, consultation, health care management, and participation in research to improve the quality of patient outcomes. Program objectives can be found in the Master's Student Handbook.

Areas of Specialization

Adult-Gerontology Primary Care Nurse Practitioner

As an advanced practice nurse, a graduate of this program is able to manage the health care of adolescents, adults, and older adults, providing interventions to promote optimal health across a wide range of settings. Graduates serve as advanced practice nurses in a variety of health care settings including hospitals, clinics, health maintenance organizations, hospices, home care, and community-based medical practices, and they can pursue national certification (through organizations such as the American Nurses Credentialing Center) as an Adult-Gerontology Primary Care Nurse Practitioner.

Family Nurse Practitioner
A graduate of this program is able to deliver primary care to individuals, families, and communities across a broad range of racial/ethnic, socioeconomic, geographic, and age/development strata. Graduates can serve as Family Nurse Practitioners (FNPs) in a variety of health care settings, including ambulatory settings, wellness centers, home health agencies, occupational health sites, senior centers, homeless shelters, and migrant camps. Graduates can pursue national certification (through organizations such as the American Nurses Credentialing Center) as a Family Nurse Practitioner.

**Pediatric Primary Care Nurse Practitioner**

A graduate of this specialty program is able to provide a wide range of primary and secondary health services for children from infancy through adolescence. Graduates can serve as a Pediatric Nurse Practitioner in a variety of health care agencies and community settings. Graduates can pursue national certification (through the American Nurses Credentialing Center or the National Certification Board of Pediatric Nurse Associates and Practitioners) as a Pediatric Primary Care Nurse Practitioner.

**Psychiatric-Mental Health Nurse Practitioner**

A graduate of the Family Psychiatric Mental Health Nurse Practitioner Program is able to conduct psychotherapy with individuals across the life span, groups, and families. Graduates can also function as case managers for persons with psychiatric disorders, provide psychiatric consultation to primary care providers, serve as Psychiatric-Mental Health Specialists in a variety of settings, including out-patient, partial hospitalization, day treatment, and community-based intervention programs. Graduates are eligible to seek national certification (through organizations such as the American Nurses Credentialing Center) as a Family Psychiatric-Mental
Health Nurse Practitioner or Psychiatric-Mental Health Nurse Practitioner, and can apply for prescriptive authority in many states (including Massachusetts).

**Women's Health Nurse Practitioner**

As a Women's Health Nurse Practitioner, a graduate from this specialty program is able to provide direct care to meet women’s unique concerns and health needs across the life span. Graduates can also serve as a Women’s Health Nurse Practitioner inside or outside of formal health care agencies and institutions. Graduates can pursue national certification as a Women’s Health Nurse Practitioner offered by national programs such as the National Certification Corporation.

**Certified Registered Nurse Anesthetist (CRNA)**

A Certified Registered Nurse Anesthetist (CRNA) in an advanced practice registered nurse (APRN) who practices both autonomously and in collaboration with a variety of health providers on the interprofessional team to deliver high-quality, holistic, evidence-based anesthesia and pain care services. The CRNA cares for patients at all acuity levels across the life span in a variety of settings for procedures including, but not limited to, surgical, obstetrical, diagnostic, therapeutic, and pain management.

**Program Entry Options**

**Certified Registered Nurse Anesthetist (CRNA)**

The Nurse Anesthesia Program is a collaborative effort between the William F. Connell School of Nursing and Anesthesia Associates of Massachusetts. The curriculum design takes advantage of the core courses common to all
master’s degree nursing specialties. In addition, students learn the advanced physiologic and pharmacologic principles specific to nurse anesthesia practice. The Nurse Anesthesia program of study includes 21 credits of core courses, and 49 credits of specialty and theory clinical practicum. Clinical practica take place at the varied facilities where Anesthesia Associates of Massachusetts provide services and give students broad hands-on experience. The 27-month full-time curriculum is accredited by the Council on Accreditation of Nurse Anesthesia Educational Programs; graduates are eligible to sit for the National Certification Examination of the Council on Certification. The Nurse Anesthesia Program was re-accredited in 2015 by the Council on Accreditation (COA) for Nurse Anesthesia Programs. The list of courses can be found in the Master's Student Handbook.

Direct Master's Entry (for Students with Non-Nursing Bachelor’s Degree)

This accelerated 24-month program is designed for individuals who hold baccalaureate or higher degree in fields other than nursing and who wish to become advanced practice nurses in one of the following specialty areas: Adult-Gerontology (Primary Care Nurse Practitioner), Family Nurse Practitioner, Pediatric Primary Care Nurse Practitioner, Psychiatric-Mental Health Nurse Practitioner, and Women’s Health Nurse Practitioner. The Direct Master’s Entry program is comprised of 77 credits.

During the first year of intensive study (late summer, fall, spring and summer semesters), students complete the requirements to sit for the registered nurse examination (NCLEX-RN©) in July–August. The second year of the program prepares students for advanced nursing practice in a specialty area. Although the first year requires full-time study in an accelerated curriculum, the remainder of the program may be completed on
Elective course options within the Connell School of Nursing include: NURS7524 Master’s Research Practicum; NURS7525 Integrative Review of Nursing Research; and graduate level independent study. Additional elective courses are offered in forensic nursing, global health, sexual health and interdisciplinary approaches to palliative care. Other relevant graduate level elective courses are available in other schools or departments at Boston College. Independent Study is recommended for students who have a particular interest that is not addressed in required courses in the curriculum. Other electives are available through the consortium. The list of courses in the Direct Master’s Entry program of study can be found in the Master's Student Handbook.

Non-Degree (Special Student)

The Special Student status is for non-matriculated students with a bachelor’s degree in nursing who are not seeking a degree but are interested in pursuing course work at the graduate level. Persons interested in this option must apply and be admitted as a non-degree student to the Connell School of Nursing, Graduate Programs before registering for courses. Some courses are restricted to matriculated students only; other courses allow enrollment on a space-available basis.

Cooperating Health Agencies

Our programs utilize numerous and diverse practice settings in the city of Boston, the greater metropolitan area and eastern New England. Sites are selected to offer rich experiences for developing advanced competencies in
the nursing specialty. Community agencies include the Boston VNA, mental health centers, general health centers, community health centers, college health clinics, public health departments, visiting nurse associations, health maintenance organizations, nurse practitioners in private practice, and home care agencies. Additional settings include hospice, homeless shelters, schools, prisons and Boston Veterans Administration (VA) health services. Selected major teaching hospitals used include: Massachusetts General Hospital, Beth Israel-Deaconess Medical Center, McLean Hospital, Brigham and Women’s Hospital, Boston Medical Center, and Boston Children’s Hospital.

Admission Requirements

For all admissions requirements, please visit the Connell School of Nursing website at the How to Apply page.

General Information

Read below for more information regarding graduate study at the Connell School of Nursing.

Graduate Academic Policies in the Connell School of Nursing

Academic Integrity

Students are expected to have high standards of integrity in both the academic and clinical settings. CSON adheres to the Boston College policies surrounding academic integrity. This policy may be accessed online at the Policies and Procedures section of this Catalog.
Expected ethical behavior in clinical situations is based on the American Nurses’ Association Code of Ethics for Nurses (ANA, 2001, 2010). Students are expected to protect patients’ confidentiality at all times, and to be honest in any documentation regarding the patient’s condition and their own assessments and interventions. Students are expected to maintain high professional standards, including being physically, intellectually, emotionally, and academically prepared when caring for patients. Unprofessional conduct is considered serious and may result in dismissal from the school.

**Graduate Academic Standing and Progression Policies**

Graduate students are expected to maintain good academic standing at all times and progress through their program of study. Those who are not in good academic standing or are not progressing are subject to review by the Academic Standards and Progression Committee.

All graduate students in the Connell School of Nursing are expected to maintain a GPA of 3.0 in order to remain in good academic standing. The minimum acceptable passing grade for graduate courses is a B- (80). Students will undergo academic review if they have a GPA of less than 3.0 or earn a grade less than a B- (80) in a course. Academic review may result in a student being dismissed from the program or placed on probation with specific recommendations and requirements that must be met in order to continue in the program. These recommendations may include, but are not limited to: (a) completing an individualized remediation plan developed in collaboration with the course faculty and the student’s advisor in order to achieve mastery of the course objectives; (b) repeating courses in which a grade of less than B- (80) was earned; and/or (c) reducing course loads until the GPA is > 3.0. Graduate students are not allowed to repeat a course more than once.
Unsafe clinical practice and/or unprofessional conduct are grounds for failure in a clinical course and may result in immediate removal from the clinical site. Students who demonstrate unsafe or unprofessional conduct in a clinical practice site will undergo academic review and may be dismissed from the program. Students who fail to progress in their program of study and/or who exceed the time limits for the program will also undergo review by the Graduate Academic Standards and Progression Committee.

The Graduate Academic Standards and Progression Meeting is conducted at the end of the Fall and Spring semesters and as needed; the meeting is comprised of faculty who teach in the master’s, DNP or Ph.D. programs, the Teacher of Record for the course(s) in which a deficient grade was achieved, and the student’s academic advisor. The Graduate Associate Dean will convene and conduct the meeting. Students may not attend the meeting but may submit a brief written statement that the Graduate Associate Dean will read or distribute to the meeting members.

Students will be notified as soon as possible that they are subject to academic review and will be given the opportunity to submit a brief statement to the Graduate Associate Dean regarding their academic performance and plans to improve. The Graduate Associate Dean will read or distribute the student’s statement to the meeting members. The meeting members will consider the student’s statement, input from the TOR and the academic advisor, and review any pertinent materials including letters of warning, remediation offered to the student, use of tutoring or advisement sessions at the Connors Learning Center, and any other relevant information.

Academic review may result in recommendations that coursework be repeated, that the student be placed on academic probation, or that the student be dismissed from the program. The Graduate Associate Dean will
notify the student of the outcome of academic review as soon as possible. If the student is dissatisfied with the decision, he/she may submit a written appeal to the Dean. The appeal must be submitted as soon as possible but no later than thirty (30) days after the student has received notification of the outcome from the Graduate Associate Dean. A formal appeal to the Dean consists of a written explanation of the appeal which should include the reasons the student believes the meeting members’ decision was not satisfactory. Within thirty (30) days of receipt of the student’s appeal, the Dean will render a decision. The decision of the Dean is final, and will be communicated in writing to the student and to the Graduate Associate Dean.

Graduate students who are on probation or not in good academic standing are not eligible for teaching assistantships, research assistantships, fellowships and/or any type of merit-based tuition remission award. Renewal of Ph.D. fellowships is contingent upon fellows remaining in good academic standing, passing comprehensive exams, demonstrating scholarly productivity, and making significant progress toward the degree every year.

For the procedure for graduate student grievances and the formal appeals procedure, please refer to the student handbook:

- Master's Student Handbook
- Ph.D. Student's Handbook

**Transfer of Credits**

Matriculated graduate students may request permission to transfer in up to six (6) credits of graduate course work completed at another accredited graduate university prior to matriculation to be applied toward their degree.
Only courses that were completed at a regionally accredited institution within the past five (5) years, have not been applied to a prior degree and in which a student has received a grade of B- or better (80), can be considered for transfer. Currently matriculated students are not permitted to take courses outside of Boston College, other than through the Consortium. Core courses that were taken prior to matriculation may be considered on a case by case basis. Under no circumstances will students be allowed to transfer in more than six (6) credits towards their degree.

To request to have an outside course considered for transfer, the student must provide a copy of the course description for electives and course syllabus for core courses. Electives/cognates may be approved by the faculty advisor. Core courses that were taken prior to matriculation at Boston College must be reviewed for equivalency by the TOR for the core course at Boston College, and approved by the TOR and the graduate associate dean (forms in the appendix and on the CSON web site). If approved, the student must submit a final official transcript documenting a grade of B- or better (80) to the graduate office for processing. The transfer course and credit, but not a grade, will be recorded on the student’s transcript.

**Time to Degree Completion**

Students in the M.S. program have five (5) years from initial enrollment to complete their program of study. Students in the DNP program have eight (8) years from initial enrollment to complete their program of study. Students in the Ph.D. program have eight (8) years from initial enrollment to complete all degree requirements, including defending and submitting the final version of the dissertation.
Graduate students may apply for a leave of absence (LOA) for personal reasons, health reasons or other extenuating circumstances. LOAs are usually granted for one semester; a two semester LOA may be granted under unusual circumstances. Leaves of Absence do not “stop the clock” or extend the program time limits. An exception is made graduate students who require an LOA due to active military service. Students should contact the Graduate Associate Dean. Graduate students who exceed the program time limits or who fail to make progress towards their degree will be reviewed by the Graduate Academic Standards and Progressions Committee and may be subject to dismissal from the program.

Financial Aid

Applicants and students should refer to the Connell School of Nursing web page for Financial Aid resources at the Admission and Aid page. Refer to the Financial Aid section of this Catalog for additional information regarding other financial aid information.

Housing

The Boston College Off-Campus Housing Office offers assistance to graduate students in procuring living arrangements. Please refer to the Off-Campus Housing website.

Transportation

Precepted clinical practica are held in a wide variety of hospitals, clinics, and health-related agencies and are a vital part of the graduate nursing program. Most of the clinical facilities are located in the greater Metropolitan Boston area, although some are located in the suburbs, eastern Massachusetts, southern New Hampshire, and Rhode Island. Students are
responsible for providing their own transportation to and from the clinical facilities.

**Graduate Program Contacts in the Connell School of Nursing**

The Dean of the School of Nursing is responsible for the overall administration of the school.

Susan Gennaro, RN, Ph.D., FAAN
Dean
Office: Maloney 294
Telephone: 617-552-4251

The Associate Deans are responsible for academic and financial administration.

Susan Kelly-Weeder, Ph.D., FNP-BC, FAANP
Associate Dean for Graduate Programs
Office: Maloney 220
Telephone: 617-552-8018

Christopher Grillo
Associate Dean for Finance and Administration
Office: Maloney 294
Telephone: 617-552-8531

The Program Directors are responsible for the direct oversight of their respective APRN programs.

**Graduate Clinical Specialty Program Directors**
Adult-Gerontology Primary Care Program:
Jane Flanagan, Ph.D., RN, ANP-BC
Office: Maloney 353
Telephone: 617-552-8949

Family Primary Care Program:
Susan Kelly-Weeder, Ph.D., FNP-BC, FAANP
Office: Maloney 220
Telephone: 617-552-8018

Pediatric Primary Care Program:
Sherri St. Pierre, M.S., APRN, PNP-BC
Laura White, Ph.D., M.S., RN, CPNP
Office: Maloney 356A
Office: Maloney 361A
Telephone: 617-552-8008
Telephone: 617-552-1630

Psychiatric-Mental Health Program:
Carol Marchetti, Ph.D., RN, PMHNP-BC
Office: Maloney 373A
Telephone: 617-552-2328

Women's Health Program:
Alyssa Harris, Ph.D., RN, WHNP-BC
Office: Maloney 359
Telephone: 617-552-0550

Certified Registered Nurse Anesthetist Program:
Susan Emery, Ph.D., CRNA
Lynch School of Education and Human Development, Graduate Programs - University Catalog

BOSTON COLLEGE

To enhance the human condition, expand the human imagination, and make the world more just—that’s the mission driving the work of our faculty and students.

We put our mission into action through teaching, research, and service—informing policy, improving practice, and preparing students to serve diverse populations in a variety of roles.

And we define education expansively—as an opportunity to shape the future of humanity and our society. Toward that end, the Lynch School employs the Jesuit, Catholic holistic approach to student formation. We educate our students as whole people so they, in turn, can empower others to prosper and lead full lives.

Enhancing the Human Condition

We recognize that people develop and flourish across many interrelated dimensions: cognitively, emotionally, morally, socially, and spiritually. We prepare our students to transform others’ lives across each of these dimensions and at their intersections.
Expanding the Human Imagination

By providing us with new paradigms and new information, universities have the capacity to spur people to think differently, expanding our approaches to problems and potential solutions. Through education, we progress beyond conventional ways for understanding the world and discover unexpected patterns.

Making the World More Just

As a community of scholars and practitioners, we have an obligation to help people realize their aspirations, increase access to societal opportunities, and lift up those who have fewer advantages. We engage in individuals’ lives and build social contexts that promote justice, equality, and a sense of community.

Introduction to Graduate Programs
Consistently ranked among the top 25 schools of education and as the top-ranked Catholic school of education in the country, the Lynch School at Boston College offers 17 master’s programs, six doctoral programs, and five dual-degree programs. Theory, research, and practice are integrated across programs, which also leverage the robust practicum opportunities available in schools, hospitals, mental health centers, and universities in the Boston metropolitan area. The Lynch School’s focus on expanding social justice is a hallmark of our programs and the work of our students and faculty.

**Admission Information**

Information about admission is available on the Lynch School website at [www.bc.edu/lynchschool](http://www.bc.edu/lynchschool). You may also write to: Boston College, The Office of Graduate Admission, Financial Aid, and Student Services, Lynch School of Education and Human Development, Campion Hall 135, 140 Commonwealth Avenue, Chestnut Hill, MA 02467-3813, telephone 617-552-4214, or e-mail gsoe@bc.edu.

The Lynch School admits students without regard to race, ethnicity, religion, age, sex, sexual orientation, marital or parental status, national origin, veteran status, or disability. The Lynch School welcomes the presence of multiple and diverse cultural perspectives in its scholarly community.

Students must be formally admitted to the Lynch School Graduate Programs by a committee composed of faculty and administrators. Students may apply to degree programs or to study as a Non-Degree Student. Consult the Lynch School admissions website for complete information.

Official notification of admission is made by a written announcement from the Lynch School. Students should not presume admission until they
receive this announcement. Admitted students are required to submit a non-refundable deposit of $250 by the date stipulated in the admission letter. The deposit is applied to tuition costs for the first semester of study.

Application Deadlines

All admission deadlines are posted on the Lynch School website at www.bc.edu/lynchschool. In some cases, master’s program applications are considered beyond the deadline. While official deadlines are posted for summer/fall start, some programs may consider a spring start. Non-degree applications are considered for summer, fall, and spring start dates. Call the Office of Graduate Admission, Financial Aid, and Student Services at 617-552-4214 or e-mail gsoe@bc.edu for more information.

Deferral of Admission

Admission may be deferred for up to one year for those accepted to master's degree programs. Deferral of admission to doctoral programs is at the discretion of the admitting faculty. Requests to defer admission must be submitted in writing to the Associate Dean of Graduate Admission and Financial Aid in the Office of Graduate Admission, Financial Aid, and Student Services and must be approved and confirmed by the Lynch School.

The number of acceptances to graduate programs each year is dependent upon the number of deferred students who will be matriculating in a given year. For this reason, the Lynch School requires that students who wish to defer for a semester or a year indicate this at the point of acceptance and return the response form with a deposit of $250.00. This will hold a space in the following year’s class and will be credited toward the first semester of study.
Because of the volume of applications received each year by the Lynch School, there can be no assurances of deferred admission and the above procedure must be followed.

**Admission for International Students**

International Students (non-U.S. citizens who are not permanent U.S. residents) may find information about admission and an online application on the Lynch School website at [www.bc.edu/lynchschool](http://www.bc.edu/lynchschool). Prospective students may also write to: Boston College, Office of Graduate Admission, Financial Aid, and Student Services, Lynch School of Education and Human Development, Campion Hall 135, 140 Commonwealth Ave, Chestnut Hill, MA 02467-3813, telephone 617-552-4214, or e-mail gsoe@bc.edu. All international student applicants for whom English is not their first language, or who do not hold a degree from an English-speaking university, must take the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS) examination and request that their score be forwarded to the Lynch School of Education and Human Development by the Educational Testing Service ([www.ets.org](http://www.ets.org)). The Lynch School of Education and Human Development’s TOEFL code is 3240. Ordinarily, the Lynch School expects a minimum score of 100 on the internet-based TOEFL. Information on exemptions from the TOEFL, as well as additional testing information, is contained in the graduate application materials available on the Lynch School website. Information about these examinations also may be obtained from the Educational Testing Service ([www.ets.org](http://www.ets.org)).

**Non-Degree Status**

Students not seeking a degree, but interested in pursuing course work at the graduate level, may apply for admission as a Non-Degree Student.
While there is no guarantee of later admission to a degree program, many individuals choose Non-Degree Status either to explore the seriousness of their interest in studying for an advanced degree and/or to strengthen their credentials for later application for degree status. Others are interested in taking graduate course work for personal enrichment or professional development. Included among those taking courses are school counselors, teachers, administrators, and psychologists who are taking classes as a means of fulfilling professional development requirements or continuing education units.

Students seeking non-degree student status must submit the online application form on the Lynch School admissions web page.

Although there is no limit on the number of courses Non-Degree Students may take, no more than four courses (12 semester hours), if appropriate, may be applied toward a degree program in the Lynch School. Courses taken as a Non-Degree Student may be applied to a degree program only after official acceptance into a degree program and with the consent of the student’s advisor.

Due to space limitations, all courses may not be available to Non-Degree Students. Practicum coursework associated with teacher licensure or counseling psychology licensure is reserved for matriculated degree students in these programs. Students who wish to become certified or licensed must gain admittance to a graduate degree program in the desired area. Other courses are restricted each semester to maintain class size. Individuals considering Non-Degree Student status may seek advising from the Office of Graduate Admission, Financial Aid, and Student Services. Non-degree students are not eligible for University sponsored sources of financial aid or any financial aid that requires matriculation in a degree program.
Fifth Year/Early Admit Programs

The Fifth Year Program and Early Admit Program offer academically outstanding Boston College juniors a unique opportunity to begin graduate study during their undergraduate senior year, allowing them to graduate with a bachelor’s and a master’s degree in a shortened amount of time. All undergraduate juniors in the Lynch School of Education and Human Development, Morrissey College of Arts and Sciences, Connell School of Nursing, and Carroll School of Management are eligible to apply for these programs.

In consultation with an advisor, students have the ability to take up to two graduate-level courses in their senior year. In addition to the time advantage, there is a considerable savings involved. The two graduate-level courses taken during senior year are covered by undergraduate tuition.

Upon successful completion from the undergraduate program, senior year coursework and the additional graduate-level courses are reviewed and a determination about formal admission into the graduate program is made. Upon final admission, the student is sent an official letter of acceptance to the Lynch School Graduate Program.

Students interested in the Fifth Year/Early Admit Program should contact the Office of Graduate Admission, Financial Aid, and Student Services in Campion Hall 135 or at 617-552-4214. Students can also e-mail gsoe@bc.edu and learn more at the Fifth Year/Early Admit Program page.

Financial Aid

For a full description of University financial aid loan programs, refer to the Policies and Procedures section of this Catalog and the Lynch School
website (www.bc.edu/lynchschool) and select Admissions. Financial aid opportunities occur in several forms, including grants, scholarships, assistantships, fellowships, loans, and work-study. Some of these resources can be obtained directly from Boston College. Others may be obtained through outside sources such as local civic organizations, religious organizations, educational foundations, banks, and Federal low-interest loan programs.

Please note that the University’s Financial Aid Office administers only Federal loan programs, which include Unsubsidized Stafford loans, Perkins loans, and work-study. If you are applying for any of these loan programs through Boston College, consult the Policies and Procedures section.

While most universities primarily fund doctoral students, there is a substantial amount of aid available to master’s students at Boston College in the form of special program scholarships, administrative assistantships, paid internships, grant-funded opportunities, and scholarships for students from historically underrepresented groups. A number of the scholarships, listed below, are intended to support students who are preparing to work with low income children, youth, and families in urban communities. Applicants will be considered for these scholarships at the time of admission. No additional application is required.

**Listing of Named Scholarships: Academic Year 2019–2020**

**Barry Fellowship**
Steven M. and Tammy J. established this fund to support graduate students with financial need enrolled in Lynch School, with preference for students focusing on learning among multi-disabled children. *Two students: one new, one continuing—15 credits.*
Bradley Fellowship
The Bradley Endowed Fellowship supports fifth year master’s students pursuing specialization in moderate special needs education. Preference given to students seeking experience in urban schools with first preference given to those seeking to work in Boston Public Schools (BPS). Three students—21 credits.

Bristing Urban Scholar Fund
Supports fifth year master’s students pursuing specialization in moderate special needs education. Preference given to students seeking experience in urban schools with first preference given to those seeking to work in the Boston Public Schools (BPS). Five students—3–6 credits.

Catholic Educator Award
The Lynch School Catholic Educator Award provides partial tuition assistance to students who are currently working as teachers and/or administrators in Catholic schools. The Catholic Educator Award requires an additional application.

Dreyer Scholarship
The Herman J. Dreyer Fund provides assistance for graduate students enrolled in Lynch School with financial need who have demonstrated academic excellence. Two students: one new, one continuing—12 credits.

Duvnjak Fellowship
The Barbara Benz Duvnjak and Karlo Duvnjak Fund supports graduate students with financial need who have demonstrated academic excellence. One student—12 credits.

Flaherty and Masella Fellowship
The Mary Jane Flaherty and William Masella Fellowship Fund supports
graduate students with financial need enrolled in the Lynch School with a preference for students from New Jersey or New York. One student—6 credits.

Fruscione Fellowship
The Immaculate A. Fruscione Fellowship supports graduate students in the school counseling program. The fellowship will be awarded to graduates who will work for at least three years in an inner-city school following completion of their degree. One student—12 credits.

Hearst Fellowship
The William Randolph Hearst Endowed Fund supports students in teacher education programs. Preference is for students who intend to reside permanently in the U.S. upon completing their studies. One student—6 credits.

Kaneb Catholic Leadership Fellowship
This Fund was established in 1986 through a gift from John A. and Virginia P. Kaneb, Boston College parents. Income from the endowment provides scholarship assistance for students in Catholic leadership in master’s programs in the Lynch School of Education and Human Development.

Keough Memorial Fellowship
The William F. Keough Memorial Fellowship Fund provides scholarship assistance for both undergraduate and graduate students pursuing studies in international education. One student—6–9 credits.

Lam Family Fellowship
William and Mary Lam Family Endowed scholarship support for Lynch School students of Chinese origin. It is the donors’ wish that recipients of the Lam Scholarship return to their home to work in the education field for
one year following graduation. One student—15 credits + stipend = $13,000.

Christine Martin Memorial Scholarship Fund
Support a Lynch School fifth year student during their master’s program. The award is a tuition scholarship. Preference is given to students engaged in volunteer service, especially serving children with disabilities. One student—9–12 credits.

Brenda and Robert Martin Fellowship
Support Lynch School graduate student who is focusing on the education of students with learning differences. One student—6 credits.

Sherman Family Scholarship
Provides financial support to qualified students pursuing graduate degrees through the Department of Counseling, Developmental, and Educational Psychology. One student—9 credits.

Frances D. Stiglin Fellowship
Tara Stiglin DeNuccio created this fund in honor of her mother to provide scholarship assistance for qualified Lynch School graduate students with preference to those studying special needs. One student—9 credits.

Listing of Graduate Student Awards: Academic Year 2019–2020

Mary T. Kinnane Award for Excellence in Higher Education
Given annually to master’s or doctoral degree students in Higher Education. The award, named for Emeritus Professor Kinnane, is given for both academic excellence and the embodiment of the Jesuit ideal of service to others.
Bernard A. Stotsky/Thomas H. Browne Prize
Awarded to a student who has demonstrated excellence in the area of special education at the graduate level.

Donald J. White Teaching Excellence Award
The Donald J. White Teaching Excellence Awards program was established to provide further stimulus toward teaching excellence by graduate Teaching Fellows and Teaching Assistants. It is presented to graduate students who have shown excellence in the teaching of undergraduate students. Each of the winners will receive a cash award and letter of congratulations from the Provost and Dean of Faculties.

Campus School Students and Families Award
Presented to Severe Special Needs graduate students who have distinguished themselves by dedication to the Severe Special Needs population and presented in honor of all those who dedicate themselves to our children at the Campus School with our appreciation, admiration, and validation.

Serena B. Strieby Award
Presented to a talented graduate student in the field of Counseling Psychology.

The (Mary) Kim Fries Award
Awarded to a Curriculum & Instruction doctoral student who exhibits academic achievement, belief in social justice education, and enduring commitment to community.

Kelsey A. Rennebohm Memorial Fellowship
The Center for Human Rights and International Justice at Boston College established the Kelsey A. Rennebohm Memorial Fellowship in 2013. The
fellowship will be awarded each summer in her memory to a Boston College student, undergraduate or graduate, who proposed research or activist scholarship is at the interface of psychology, mental health, gender, social justice, and human rights. The recipient will subsequently give a presentation about his or her work at the university upon return.

*George Madauss Graduate Student Research Award*

The George Madaus Graduate Student Research Award honors a founder of the department and a major figure in educational assessment and evaluation. It is awarded annually to a student in Measurement, Evaluation, Statistics, and Assessment in recognition of outstanding research that contributes to one or more of the following topical areas: advancing the quality of educational and psychological assessments; enhancing the practice of program evaluation; or contributing to reducing the negative impact of test use on students, teachers, and society-at-large.

*Urban Education Funding*

*Donovan Urban Teaching Scholars Program*

Donovan Urban Teaching Scholars is an intensive one-year master’s degree program in teacher preparation. Each year, the program recruits and supports a cohort of up to 30 graduate students. Students in this program:

- Receive tuition remission covering a minimum of 50% to a maximum of 100% of tuition costs for the M.Ed. degree
- Are eligible for the Sharp Urban Teaching Scholarship, which provides financial support to up to 22 highly talented graduate students per year who are from underrepresented groups and are committed to teaching in urban schools. The scholarship is comprised of a $10,000 stipend—half of the stipend is an outright grant and the remaining $5,000 is a forgivable loan. A quarter of the loan amount will be forgiven upon
completion of the master’s degree and the remaining three-quarters is forgiven, up to the full amount, for each year spent teaching in an urban school. Special awards are also available for applicants interested in teaching in urban secondary schools.

Details on the Donovan Urban Teaching Scholarship can be found on the Lynch School website. Please note that the application deadline is also earlier than the normal deadline for teacher education programs.

**Urban Catholic Teacher Corps (UCTC)**

Urban Catholic Teacher Corps is an academically rigorous and experientially rich, Catholic school teacher preparation program that prepares students to be excellent Catholic school teachers who are actively engaged in the ministry of teaching urban students in the Roman Catholic Archdiocese of Boston. Participants live together, actively engaging in an intentional faith-based living and learning community where faith is actively incorporated, individuals are loved and supported, and all experiences and perspectives are shared and respected. All students in this program:

- Receive 100% tuition coverage for the M.Ed. degree in Curriculum and Instruction
- Have all rent and utilities paid for in the required UCTC community housing.
- Receive a $650 pre-tax stipend per month over the two years of program participation to cover living expenses. The Lynch School Catholic Education Award provides partial tuition assistance to students who are currently working in Catholic schools.

There are a separate application and additional requirements for UCTC. Please note that the application deadline is also earlier than the normal deadline for teacher education programs.
**Licensure and Program Accreditation**

Many of the teacher education and administration programs offered by the Lynch School have been designed to comply with current standards leading to initial and professional licensure for educators in the Commonwealth of Massachusetts. Through the University’s accreditation by the Interstate Certification Compact (ICC), a program of study preparing for educator licensure in Massachusetts, will also provide graduates, through reciprocity, with facilitated opportunities for licensure in most other states. Licensure is granted by the state, and requirements for licensure are subject to change by the state. Students seeking licensure in Massachusetts must pass the Massachusetts Tests for Educator Licensure (MTEL). Especially in the case of out-of-state students, it is the responsibility of the student to plan a program that will lead to licensure in a given state. Staff in the Office of Practicum Experiences and Teacher Induction (Campion 102, 617-552-4206) can help with most teacher and administrator licensure questions. Mental health and school counselor licensure questions should be addressed to the Office of Graduate Admission, Financial Aid, and Student Services at 617-552-4214. The teacher education programs at Boston College are accredited by both the Commonwealth of Massachusetts Department of Elementary and Secondary Education (ESE) and nationally by the Teacher Education Accreditation Council (TEAC).

The 60-credit M.A. in Mental Health Counseling fulfills the educational requirements for licensure as a mental health counselor in Massachusetts, and the M.A. in School Counseling meets the educational requirements for licensure in school counseling in Massachusetts. Students seeking school counseling licensure in Massachusetts must pass the Massachusetts Tests for Educator Licensure (MTEL). Students are encouraged to check the requirements for the states in which they eventually hope to obtain licensure.
The School Counseling sequence is designed to meet the professional standards recommended by the Interstate Certification Compact (ICC), Massachusetts Department of Education. This sequence is designed to meet the educational requirements for licensure as a school counselor in the state of Massachusetts. Licensure is granted by the state Department of Education and requirements are subject to change by the state. Students seeking licensure in Massachusetts must pass the Massachusetts Tests for Educator Licensure.

The 60 credit-hour Mental Health Counselor sequence of study reflects the professional standards recommended by the American Counseling Association and the Massachusetts Board of Allied Mental Health and Human Services Professionals. This sequence is designed to meet the pre-master’s educational requirements for licensing as a Mental Health Counselor in the state of Massachusetts. Licensing is granted by the Massachusetts Board of Allied Mental Health and Human Service Professionals and the requirements are subject to change by the state. Students, for all programs, should check the requirements in other states where they may choose to live and work.

The doctoral program in Counseling Psychology is fully accredited by the American Psychological Association.

**International and Special Practicum Placement Program for Graduate Studies**

The Lynch School’s International and Special Practicum Placement Program offers graduate students in the Teacher Education programs classroom opportunities in a variety of foreign countries for full-practicum experiences upon successful completion of the pre-practicum and all prerequisite work. International settings include classrooms in such
countries as Ireland, England, France, Italy, and Spain, subject to current student visa regulations in each country. Placements are also available in San Juan, Puerto Rico, where a visa is not required. In all cases, housing accommodations are the responsibility of the student. For information regarding programs and requirements, contact the Director, Practicum Experiences and Teacher Induction, Campion 102, Lynch School of Education and Human Development, Boston College, 140 Commonwealth Avenue, Chestnut Hill, MA, 02467-3804 or 617-552-4206.

Degree Programs

Through its various graduate programs, the Lynch School offers the M.Ed., M.A., M.S., M.A.T., M.S.T., Ph.D., and Ed.D. degrees. The Lynch School also offers programs leading to a Certificate of Advanced Educational Specialization (C.A.E.S.). Our graduate programs serve a dual purpose:

- **Research:** Preparing students in research-based knowledge of their profession with specialized competence in the evaluation of educational and psychological innovations, and in basic and applied quantitative and qualitative research methodologies.
- **Practice:** Preparing students to apply knowledge in appropriate areas of specialization to practice in both academic and nonacademic settings.

Doctoral Degree Programs

General Requirements for the Degree of Doctor of Philosophy

The Ph.D. is granted for distinction attained in a special field of concentration and demonstrated ability to modify or enlarge a significant subject in a dissertation based upon original research. Doctoral studies are
supervised by the student’s advisor, department chairperson, and the Associate Dean of Students. The Ph.D. is granted in the Lynch School in the following areas:

- Curriculum and Instruction
- Higher Education
- Counseling Psychology
- Applied Developmental and Educational Psychology
- Measurement, Evaluation, Statistics, and Assessment

Upon admission to a doctoral program, the doctoral student will be assigned an academic advisor. The Doctoral Program of Study should be designed by students in consultation with their advisors during the first or second semester of coursework. A formal Program of Study must be filed with the student’s advisor and the Academic Department Office. Programs of Study for all programs are available on the Lynch School’s website at www.bc.edu/lynchschool.

Doctoral students in the Lynch School, in addition to coursework, complete comprehensive exams before being admitted for doctoral candidacy. Doctoral students also complete a doctoral dissertation. Current information on policies and procedures regarding doctoral degree programs is provided online at the Doctoral Policies and Procedures page.

General Requirements for the Degree of Doctor of Education

The Professional School Administrator Program (PSAP) provides an opportunity for full-time administrators to obtain their Massachusetts superintendent licensure and a Doctor of Education (Ed.D.) degree in Educational Leadership. The program is grounded in the core values of the
Lynch School, with coursework focusing on leadership for learning, social justice, diversity, anti-racism, and community building.

The intensive, three-year program is taught by full-time university faculty and knowledgeable, skilled school leaders, with personalized support for students from mentor superintendents.

Certificate of Advanced Educational Specialization (C.A.E.S.)

The C.A.E.S. course of study is designed for currently practicing educators who already have a master’s degree and seek a higher level of specialization in Curriculum and Instruction or professional licensure in administration. For further information on C.A.E.S. programs in Educational Leadership, Special Education, Reading/Literacy, and Curriculum and Instruction, contact Boston College, The Office of Graduate Admission, Financial Aid, and Student Services, Lynch School of Education and Human Development, Campion Hall 135, 140 Commonwealth Avenue, Chestnut Hill, MA 02467-3813, telephone at 617-552-4214, or e-mail gsoe@bc.edu.

Master's Degree Programs

While candidates may apply to master’s programs while still completing an undergraduate degree, candidates must be graduates of an accredited college or university by their program’s start date. The Office of Graduate Admission, Financial Aid and Student Services, Campion 135, provides academic and financial aid services for master’s students throughout their studies in the Lynch School.

Master of Education Degree (M.Ed.)

The Master of Education is awarded in the following areas:
• Elementary Education
• Secondary Education
• Special Education *
• Reading/Literacy Teaching
• Curriculum and Instruction
• Global Perspectives: Teaching, Curriculum, and Learning Environments
• Educational Leadership
• Educational Research, Measurement, and Evaluation

*The M.Ed. program in Special Education includes the following areas of concentration: Moderate Special Needs, Grades Pre-K–8 and Grades 5–12, Students with Severe Special Needs Pre-K–12.

Master of Arts in Teaching and Master of Science in Teaching Degrees (M.A.T./M.S.T.)

M.A.T. and M.S.T. for Initial Licensure

The M.A.T./M.S.T. Initial Licensure programs are designed for students who have graduated with a major in liberal arts or sciences and who wish to prepare for teaching in the secondary school, for experienced teachers in secondary schools who do not yet hold a license, and for recent college graduates already prepared to teach at the secondary level who want to earn an additional area of expertise and/or licensure. These degrees are coordinated with the appropriate Graduate School of the Morrissey College of Arts and Sciences department and require more coursework in Arts and Sciences than the M.Ed. degree in Secondary Teaching. Only one application to the Lynch School is necessary for admission.

Students may prepare in the following disciplines: biology, chemistry, physics, geology, mathematics, history, and English.
Programs are described under the section of this manual on programs in Teacher Education/Special Education and Curriculum and Instruction.

**Master of Arts Degree (M.A.)**

The Master of Arts degree is given in the following areas:

- Higher Education
- International Higher Education
- School Counseling
- Mental Health Counseling
- Applied Developmental and Educational Psychology
- Learning Engineering

**Master of Science Degree (M.S.)**

The Master of Science degree is given in the following area:

- Applied Statistics and Psychometrics

These programs are described in each departmental section of this catalog.

**Course Credit**

A minimum of 30 graduate credits is required for a master’s degree. Specific programs may require more credits. No formal minor is required. All graduate students cannot transfer more than six graduate credits from another institution. Only courses in which a student has received a grade of B or better, and which have not been applied to a prior degree, will be accepted. If approved, the transfer course and credit, but not the grade, will
be recorded on the student’s academic record. Credit received for courses completed more than ten years prior to a student’s admission to his or her current degree program are not acceptable for transfer. A Masters Transfer Request Form should be completed and signed by the student’s academic advisor and then sent, along with an official transcript from the institution, to the Office of Graduate Admission, Financial Aid, and Student Services.

Programs of Study

In the second semester of matriculation, students must complete a Program of Study in consultation with their academic advisor and/or the Associate Director of Student Services in the Office for Graduate Admission, Financial Aid, and Student Services. Program of Study forms are available on the Lynch School website at the Master's Program page. These forms must be approved and filed with the Associate Dean of Students.

Department of Teacher Education/Special Education and Curriculum and Instruction

The Department of Teacher Education/Special Education and Curriculum and Instruction prepares educational leaders for instructional and administrative roles in public and private schools, in institutions of higher education, and in related organizations. The intent is to provide a blend of scholarship, disciplined inquiry, and professional experiences that will develop the sound understanding, practical skills, ethical values, and social responsibilities that are required of competent educators.

Student programs are individualized under the guidance of a faculty advisor, with special consideration given to each student’s career goals and
licensure requirements. The list of specific courses required for each program is available on the Lynch School website under Programs of Study.

Areas of Concentration

 Programs and courses in Teacher Education are designed to prepare educators in the areas of elementary and secondary teaching, early childhood education, special education, and reading. In addition, master’s programs are available in Curriculum and Instruction and Global Perspectives, along with a doctoral program in Curriculum and Instruction. Teacher preparation programs are designed for individuals interested in working in elementary and secondary schools, both public and private, as well as early childhood and special needs programs and facilities. The Lynch School prepares outstanding teachers in both theoretical and practical dimensions of instruction. The doctoral program in Curriculum and Instruction prepares students for college and university teaching, research positions, and/or school leadership positions.

Master’s candidates can include the Teaching English Language Learners (TELL). TELL prepares educators to teach bilingual learners in English-only classrooms, while the certificate requires students to complete EDUC7621 Bilingualism, Second Language and Literacy Development and EDUC6346 Teaching Bilingual Students, as well as requires students to work with English language learners in English-only or Dual-Language classrooms, respectively.

Licensure

Endorsement of candidates for initial Massachusetts teaching licensure is a collaborative effort between the student’s Lynch School supervisor and cooperating teacher. The Lynch School offers graduate programs designed
to prepare students for teaching licensure at the master’s and C.A.E.S. levels. A student seeking licensure must be admitted as a degree candidate. Programs are approved by the Interstate Certification Compact (ICC), allowing students easier access to licensure outside Massachusetts.

The following are licenses available from the state department of Massachusetts through completion of a Lynch School program:

- Early Childhood Teacher
- Elementary Teacher
- Teacher of English, Mathematics, History, Physics, Chemistry, Biology, and Earth Science
- Specialist Teacher of Reading
- Specialist Teacher of Students with Moderate Special Needs (pre K–8, 5–12)
- Specialist Teacher of Students with Severe Special Needs (pre K–12)

Note: Students who plan to seek licensure in states other than Massachusetts should check the licensure requirements in those states. Students seeking licensure in Massachusetts must pass the Massachusetts Tests for Educator Licensure (MTEL).

**Practicum Experiences**

Practicum experiences are an essential part of the curriculum in licensure programs and should be planned with the respective faculty advisor early in the student’s program. Practicum experiences for licensure in Teacher Education are offered at the Initial Licensure level for Massachusetts. Students seeking licensure in Massachusetts also must pass the Massachusetts Tests for Educator Licensure (MTEL).
All field experiences for students enrolled in Lynch School degree programs are arranged through the Office of Practicum Experiences and Teacher Induction (Campion 102). The Director of Practicum Experiences and Teacher Induction must approve all students for the practicum.

The following are prerequisites for students who are applying for practica and clinical experiences:

- GPA of B or better (3.0 or above)
- Satisfactory completion of required pre-practica or waiver from the Director of the Office of Practicum Experiences and Teacher Induction
- Completion of 80 percent of the course work related to required Education courses, including methods courses in the content area and courses required for initial licensure
- Application in the Office of Practicum Experiences and Teacher Induction

A full practicum is characterized by the five professional standards as required by the Massachusetts Department of Education. Student teachers must demonstrate competence in these five standards during their practicum experience: plans curriculum and instruction, delivers effective instruction, manages classroom climate and operation, promotes equity, and meets professional responsibilities.

If, for any reason, a student is unable to complete the full practicum, an extended practicum (additional time in the field) will be required by arrangement of the Director of Practicum Experiences and Teacher Induction.
Placement sites for local field experiences are in Boston and neighboring areas. Students are responsible for providing their own transportation to and from these schools. Transportation to schools often requires that the student have a car; however, some schools are accessible by public transportation. Carpooling is encouraged. If transportation cannot be independently arranged, students will be given preference for locations that are accessible via public transportation.

**Programs in Teacher Education/Special Education and Curriculum and Instruction**

**Master of Education (M.Ed.) in Early Childhood Education**

The master’s degree program in Early Childhood Education focuses on developmentally appropriate practices and critical thinking skills. This program is appropriate for students who wish to be prepared to teach children who are typically developing as well as children with moderate disabilities in a general education, pre-K–2 classroom. Students can enter the program without teaching licensure. The prerequisite for either program is a college degree with an Arts and Sciences major or equivalent. Students who have majored in other areas, such as business or engineering, should consult the Office of Graduate Admission, Financial Aid and Student Services.

At completion of the program, students will be able to demonstrate:

- The teacher candidate will promote the learning and growth of all students by providing high-quality and coherent instruction, designing and administering authentic and meaningful student assessments, analyzing the student performance and growth data, using the data to
improve instruction, providing students with constructive feedback on an ongoing basis, and continuously refining learning objectives.

- The teacher candidate will promote the learning and growth of all student through instructional practices that establish high expectations, create a safe and effective classroom environment, and demonstrate cultural proficiency.
- The teacher candidate will promote the learning and growth of all students through ethical, culturally proficient, skilled and collaborative practice.
- The teacher candidate will demonstrate an inquiry stance by collecting and reporting data on pupil outcomes for the purpose of assessing, teaching, and modifying instructional practice.
- The teacher candidate will identify policies and practices that contribute to systemic inequities in education and be aware of how his or her own background experiences are influenced by these systems, and recognize a professional responsibility to promote and practice principles of social justice teaching.

**Master of Education (M.Ed.) in Elementary Education**

The Elementary Education program leads to licensure in grades 1–6. The program stresses a humanistic approach to teaching that is both developmentally appropriate and intellectually challenging. Graduate students participating in the Elementary Education program will learn to promote student development, how to teach for social justice, and how to reflect on practice to improve instruction. They will be prepared to work with students of a variety of backgrounds creating classroom environments that engage all students.

At completion of the program, students will be able to demonstrate:
The teacher candidate will promote the learning and growth of all students by providing high-quality and coherent instruction, designing and administering authentic and meaningful student assessments, analyzing the student performance and growth data, using the data to improve instruction, providing students with constructive feedback on an ongoing basis, and continuously refining learning objectives.

The teacher candidate will promote the learning and growth of all students through instructional practices that establish high expectations, create a safe and effective classroom environment, demonstrate cultural proficiency, and knowledge about language challenges in academic settings.

The teacher candidate will promote the learning and growth of all students through ethical, cultural proficient, skilled, and collaborative practice.

The teacher candidate will demonstrate an inquiry stance by collecting and reporting data on pupil outcomes for the purpose of assessing, teaching, and modifying instructional practice.

The teacher candidate will identify policies and practices that contribute to systemic inequalities in education and be aware of how his or her own background experiences are influenced by these systems, and recognize a professional responsibility to promote and practice principles of social justice teaching.

The prerequisite for the program is a bachelor’s degree with an Arts and Sciences or interdisciplinary major or equivalent. No prior teaching licensure is required for admission. The program of study includes foundations and professional courses, and practicum experiences. Courses of study are carefully planned with the faculty advisor to ensure that both degree requirements and licensure requirements are fulfilled.
For the applicants seeking a master’s in Elementary Education, undergraduate transcripts will be audited for mathematics courses. It is expected that applicants have completed a two 3-credit mathematics course equivalent in Arts and Sciences. If applicants do not fulfill this requirement, they will be advised to take the needed courses.

**Master's Programs (M.Ed., M.A.T., and M.S.T.) in Secondary Education**

Students in secondary education can pursue either a Master of Education (M.Ed.), a Master of Arts in Teaching (M.A.T.), or a Master of Science in Teaching (M.S.T.). These degree programs lead to (8–12) licensure in one of the following disciplines: English, history, biology, chemistry, geology, physics, or mathematics.

Upon completion of the program in Secondary Education graduates will be able to:

- The teacher candidate will promote the learning and growth of all students by providing high-quality and coherent instruction, designing and administering authentic and meaningful student assessments, analyzing student performance and growth data, using this data to improve instruction, providing students with constructive feedback on an ongoing basis, and continuously refining learning objectives.
- The teacher candidate will promote the learning and growth of all students through instructional practices that establish high expectations, create a safe and effective classroom environment, and demonstrate cultural proficiency.
- The teacher candidate will promote the learning and growth of all students through effective partnerships with families, caregivers, community members, and organizations.
The teacher candidate will promote the learning and growth of all students through ethical, culturally proficient, skilled, and collaborative practice.

The teacher candidate will promote an inquiry stance of critical reflection about personal practice through individual and collaborative inquiry in service of improving pupil academic, emotional, and social learning.

The prerequisite for the program is a bachelor’s degree with a liberal arts major in the field of desired licensure or an equivalent. Students who do not have the prerequisite courses must take discipline area courses before being admitted into a degree program. All prerequisite courses must be taken before taking the practicum. Check with the Office of Graduate Admission, Financial Aid, and Student Services (617-552-4214) if you have questions.

In addition to required courses in the field of education, secondary education master’s degrees require a number of courses taken at the graduate level in the Morrissey College of Arts and Sciences department of specialization. M.Ed. students take a minimum of two graduate courses, and M.A.T./M.S.T. students take five graduate courses in their disciplinary area. Courses of study are carefully planned with a faculty advisor. All of the master’s programs leading to licensure in secondary education include practicum experiences in addition to coursework. M.A.T./M.S.T. applicants file only one application to the Lynch School. All Lynch School admissions requests should be addressed to Boston College, The Office of Graduate Admission, Financial Aid, and Student Services, Lynch School of Education and Human Development, Campion Hall 135, 140 Commonwealth Avenue, Chestnut Hill, MA 02467-3813, telephone 617-552-4214, or e-mail gsoe@bc.edu.
Master of Education (M.Ed.) in Reading and Literacy

The graduate Reading and Literacy licensure program is designed to prepare licensed classroom teachers and resource room specialists for specialized literacy instruction in schools. Literacy specialists provide critical supports in schools by working with both students and teachers to prevent and remediate language and literacy difficulties in children. Eligible applicants must have at least one year of teaching to meet Massachusetts Literacy Specialist licensure standards. The program conforms to the Standards for Reading Professionals of the International Literacy Association.

At completion of the program, students will know:

- In the Reading/Literacy Education licensure program, you will learn about language development and its relation to literacy outcomes, the varied social contexts in which language and literacy development take place, bilingualism and second language acquisition, text selection, and literacy assessment practices. Knowledge in these domains will be applied via targeted practicum experiences. In your practica, the knowledge you build via your Lynch classroom experiences is applied to direct work with mentor reading/literacy specialists, classroom teachers, and students in schools. This synthesis of coursework knowledge and classroom practice is encapsulated in the Inquiry Seminars that are required of all licensure students. In these seminars, students work directly with faculty to make sense of their daily school-based experiences in the contexts of the readings and activities that characterize Lynch School coursework. This cyclical process of teaching, learning, and reflecting is the core of the licensure experience.
The program of study consists of foundation courses, courses in language and literacy, and practica experiences as a teacher of reading. A classroom teaching certificate is normally required for admission into the program. Students should carefully plan programs in consultation with the program advisor to see that degree and licensure requirements are met. Classroom teachers must meet with the practicum director to create a proposal to fulfill practicum requirements while remaining in their own classroom.

**Master of Education (M.Ed.) in Curriculum and Instruction**

The master's degree program in Curriculum and Instruction consists of a planned program with a minimum of 30 graduate credit hours. Four courses in Curriculum and Instruction are required. Programs of study are planned in consultation with a faculty advisor to meet each candidate’s career goals and needs.

This degree program does not lead to licensure, nor are students in this program eligible to apply for supervised practicum experiences. This program is for:

- U.S. students who already possess an initial license and want to enhance learning further in their area of licensure;
- International students who wish to engage with foundational and leading edge thinking and thinkers on curriculum, pedagogy, and educational reform;
- All candidates who want to explore new areas of interest such as policy, teacher leadership, teaching English Language Learners, universal design for learning, assessment, and special education;
- Students interested in Curriculum Design and Instructional Design;
- Private school educators, Boston College students enrolled in the fifth-year program, and educators from areas such as publishing, curriculum design, and instructional technology.
design, and museum education;
- Classroom teachers who wish to become educational leaders in their schools and districts.

At the completion of the program, students will be able to:

- Develop and clarify their philosophy of education, in particular, their beliefs regarding the purposes and processes of effective curricular organization;
- Become familiar with different ways to conceptualize a school curriculum and with major curriculum designers, both past and present;
- Assess their own experiences with educational and curricular change as a means to gain greater insight into educational and institutional change processes writ large;
- Examine approaches to multicultural education, anti-racist education, and inclusion that aim to transform the curriculum;
- Explore the tensions and possibilities that face teachers day-in and day-out in the current social and political context;
- Learn alternative strategies for assessment that provide multiple and authentic measures of student learning;
- Analyze existing curricula in terms of various philosophical orientations;
- Examine implications and applications of learning theories as drawn from teachers in elementary and secondary schools as well as from professionals working in higher education and contexts outside of formal schooling;
- Consider how school curricula and pedagogical practices can be structured to promote social justice and democratic citizenship.

Master of Education (M.Ed.) in Special Education
Master of Education (M.Ed.) in Special Education: Teacher of Students with Moderate Special Needs, Grades Pre-K–8 and Grades 5–12

This program prepares teachers to work with students with mild to moderate disabilities (also known as high incidence disabilities) such as: attention deficit/hyperactivity disorder, specific learning disability, emotional and behavioral disorders, and mild developmental disabilities—including autism spectrum disorders. Based on the program option they select, students will learn about assessment and instructional practices at the elementary or secondary schooling levels, consistent with teacher licensure options in Massachusetts and many other states.

The goal of the program is to prepare teachers to work in a variety of roles including: lead teacher, special education teacher, and learning specialist, as well as to collaborate with general education regular teachers and educators, other services providers and parents. The program leads to initial licensure. Students who have not earned general education licensure will be required to take additional courses. At completion of the program, students will be able to demonstrate:

- How to develop learning goals and experiences responsive to the developmental and learning needs of students with special needs, including ways that are responsive to language, cultural, and family backgrounds;
- How to work collaboratively with students and professional colleagues in a variety of instructional settings;
- How to plan individually-appropriate curriculum through the IEP as well as in inclusive classroom settings;
- How to use formal and informal assessments to plan instruction for pupils in ways that reduce bias and to monitor learning progress;
• How to use evidence-based practices to advance the learning of students with disabilities. Practices will include uses of technology and augmentative and alternative communication;
• How to plan for and work with students and colleagues for successful transition preparation;
• How to use ethical and professional practices that respond to language, cultural, and familial diversity.

Applicants who have completed a regular education preparation program can enter directly into the program. Applicants with no previous regular education preparation program must apply for both regular and special education programs. For this reason, students become licensed in regular and special education. Financial aid is available in the form of paid internship experiences in local school systems and in some private schools.

**Master of Education (M.Ed.) in Special Education: Teacher of Students with Severe Special Needs, Pre-K–12**

The Boston College program in Severe and Multiple Disabilities prepares teachers to work with students who have moderate to severe intellectual disability, autism, and additional disabilities (such as visual impairment, deafness, cerebral palsy, and medical conditions). The program leads to eligibility for the Massachusetts teaching license in Severe Disabilities. Additional specializations in deafblindness or autism are available. No prior teaching license is required for admission. The Program of Study include two routes, one for those who already have a teaching license (in any area) and one for those who do not. The Severe and Multiple Disabilities Program is founded on close linkages between current research and best practices in teaching. Students may be enrolled on a full or part-time basis. At completion of the program, students will be able to demonstrate:
How to teach to the strengths and needs of all students with severe disabilities, including those with additional sensory disabilities;
How to implement evidence-based practices and best practices to apply when assessing and teaching children with severe and multiple disabilities;
How to be fully competent in writing the appropriate sections of the Individualized Education Plan (IEP) and as a participant in associated meetings;
How to select assessment instruments appropriate to each child and to conduct assessments to produce findings that support valued and meaningful instruction;
How to engage parents in the planning and generalization of their child’s educational program;
How to plan, implement, and evaluate comprehensive communication systems in collaboration with others;
How to teach content from the general curriculum as well as functional academics, skills of daily living, prevocational and vocational skills, play and social-emotional competencies to address the needs of the whole child;
How to keep meaningful data on student learning and behavior and to make data-based decisions;
How to create learning environments that promote engagement and learning;
How to promote the learning and growth of all students through ethical, culturally proficient, skilled, and collaborative practice.

For those students employed in approved Intensive Special Needs programs, practicum requirements are individualized and may be completed within the work setting. The program of study expands on and builds upon a prerequisite education foundation through the development of
competencies that are research and field-based and consistent with the highest professional standards of the field.

**M.Ed. in Global Perspectives: Teaching, Curriculum, and Learning Environments**

This program is for teachers who see how the world is changing. They believe deeply in the mission and potential of equitable education and want to be able to prepare their students for the future. The program will explore educational viewpoints across a wide range of cultures and countries. Based on these perspectives, graduates will learn how to design effective curriculum to serve diverse and increasingly globalized student populations and improve the common good. Through conducting a problem-solving form of research involving one or more cycles of actions and reflection—drawing both on international research perspectives and generating solutions in local contexts—graduates will develop valuable collaborative action research skills. The program welcomes the participation of individuals or teams of educators ready to collaborate. Teachers and other educational professionals with a bachelor’s degree and two or more years of professional experience in schools and other educational related settings preferred. The program can be completed totally online. Graduates from the Global Perspectives program will learn to:

- Develop self-knowledge, meaning, and a sense of purpose as an educator;
- Create effective learning environments (through curriculum design and instructional practice) that reflect an increasingly globalized student population;
- Identify, pose, and solve education problems, and assess opportunities;
- Apply action research studies in response to authentic problems encountered in a variety of educational settings;
Contribute to and access a robust collaborative network of educators working to address today's educational challenges.

Teaching English Language Learners (TELL) Certificate Program

For Candidates in a Licensure Program

All students who successfully complete a teacher licensure program in the Lynch School will earn the required Massachusetts Sheltered English Immersion (SEI) Endorsement. This SEI endorsement meets state regulations for working with bilingual learners/English language learners as a core academic teacher in Massachusetts. In addition, however, Lynch offers the option of the Teaching English Language Learners (TELL) Certificate Program, a deeper and more extensive preparation for working with bilingual learners/English Language Learners. For candidates in a licensure program this entails adding one course: EDUC7621 Bilingualism, Second Language and Literacy Development for graduates. All TELL certificate program participants are strongly encouraged to work with ELLs in their full practicum sites.

For Candidates in a Non-Licensure Program

Students who are not enrolled in a teaching licensure program may also complete the TELL certificate program. These students complete EDUC7621 Bilingualism, Second Language and Literacy Development as well as EDUC6346 Teaching Bilingual Students and are required to work with English language learners in an instructional setting. The TELL certificate program for students who are not enrolled in a licensure program is ideal for candidates seeking to work with English language learners abroad or in contexts in the United States where Massachusetts SEI
Teacher Endorsement is not required. For more information please contact Dr. Maria Brisk, brisk@bc.edu, Dr. Mariela Paez, paezma@bc.edu or Dr. Anne Homza, anne.homza@bc.edu.

Donovan Urban Teaching Scholars Program

The Donovan Urban Teaching Scholars program is open to master’s students specifically interested in urban teaching. To qualify for the program, students must be accepted into one of the Master of Education licensure programs in teaching listed above. All Donovan Scholars must complete a teacher education program in Early Childhood, Elementary, Secondary, Reading, Moderate Special Needs, or Severe Special Needs Teaching. A cohort of 30 students is selected each year from students applying to an M.Ed. teacher licensure program and financially supported from the Donovan Scholars program, which carries a half-tuition scholarship.

Certificate of Advanced Educational Specialization (C.A.E.S.)

The C.A.E.S. course of study is designed for currently licensed educators who already have a master’s degree and seek a higher level of specialization in Curriculum and Instruction. For further information on the C.A.E.S. program in Curriculum and Instruction, contact Boston College, The Office of Graduate Admission, Financial Aid, and Student Services, Lynch School of Education and Human Development, Campion Hall 135, 140 Commonwealth Avenue, Chestnut Hill, MA 02467-3813, telephone 617-552-4214, or e-mail gsoe@bc.edu.

Doctoral Program (Ph.D.) in Curriculum and Instruction
The doctoral program in Curriculum and Instruction is for people who hold, or plan to assume, leadership positions in curriculum, instruction, and teacher education in schools, school systems, or other related instructional environments. It is also designed for candidates who are preparing for a career in curriculum and instruction or teacher education at the college, university, or staff development level.

Courses and related program experiences are designed to develop scholarly methods of inquiry in teaching, teacher education, curriculum development and evaluation, and professional development. There is a complementary emphasis on designing and researching effective instruction. Students who plan to work in school settings may pursue programs that will help them develop expertise in several areas of instruction such as mathematics, literacy, technology, science, history, or combinations thereof. Students who plan to work at the post-secondary level may pursue specialties in curriculum or teacher preparation in a specific subject area.

The program of study requires a research core that will familiarize students with quantitative and qualitative research methodology and develop the candidate’s expertise for analyzing and conducting research. Also required are advanced-level core courses in curriculum and teaching theory, research, and practice.

Upon graduation, Ph.D. students in our program should be able to:

- Students will demonstrate knowledge of effective practices regarding college-level teaching and/or professional development with in-service teachers.
- Students will demonstrate the ability to conduct original, empirical and/or conceptual research related to topics in curriculum and
Students will participate in regional, national and/or international conferences in the broad areas of curriculum and instruction.

Students will learn how to create an academic paper at the “publishable” level of quality on a topic related to the student’s area of specialization within the broad field of curriculum and instruction.

Programs of study are carefully planned on an individual basis to help candidates meet their goals related to scholarship, professional, and career paths. Throughout their doctoral programs, candidates work closely with faculty in research and teaching activities related to one of four areas of specialization: Language, Literacy, and Culture; Critical Perspectives on Schooling: Race, Class, Gender, Disabilities Specialization; Leadership, Policy, and Educational Change; and Math, Science, and Technology.

Department of Educational Leadership and Higher Education

The Department of Educational Leadership and Higher Education prepares educational administrators and leaders of educational institutions ranging from pre-schools, to K-12, public, Catholic, charter schools to universities, to post graduate institutions. Graduates are prepared to bring perspectives from sociology, psychology, history, and philosophy, as well as social justice and public policy to their analysis and articulation of educational issues. Course work and field-based learning experiences develop reflective practitioners who integrate theory with practice. Courses in the department encompass these primary themes:

- Social justice
Courses in the various programs of study explore how economic, societal, political, and global forces change the way people think about schooling, educational leadership, and the post-secondary administration. To keep up with the constantly changing world there have been broad shifts in the knowledge and skills required of educational leaders today:

- from technical skills to interpersonal skills
- from command and direction to consensus building and motivating
- from resource allocation to being accountable for learning processes and outcomes
- from campus administrators to coordinator of institutional and community services
- from policy recipient to shaping and informing policy

These shifts have been reflected in courses throughout the Educational Leadership and Higher education programs. The list of specific courses required for each program is available on the Lynch School website under Programs of Study.

Programs in Educational Leadership

Master of Education (M.Ed.) in Educational Leadership & Policy
The Master of Education (M.Ed.) in Educational Leadership and Policy prepares graduates to assume leadership roles both within schools and within the greater community. Prospective applicants are diverse; they include educators, policymakers, religious officials, community-based organizers, and professionals seeking to make meaningful changes in the field of education. Often, applicants have a background in teaching and aspire to expand their leadership beyond the classroom. While teachers work directly with students, educational leaders work to determine the systems serving students.

The program, characterized by discernment and critical reflection, aims to educate the whole person to live a life of meaning and purpose. Drawing on social-justice values and leadership strategies, graduates will inform organizational cultures and processes, boldly improving equitable opportunities for traditionally marginalized students. Graduates, trained in critical inquiry and the use of evidence, will approach student development from a holistic perspective, engaging the whole community to support the whole child. The program can be completed fully online or as a hybrid program.

We serve both students who are seeking a master’s degree as well as students who are looking to obtain additional training but do not require a master’s degree.

The M.Ed. in Educational Leadership & Policy is a program approved and monitored by the Department of Elementary and Secondary Education in Massachusetts (DESE). Formal learning outcomes were developed by the DESE and apply to all students, whether or not they are seeking licensure. They are as follows:
Instructional Leadership: The school leader promotes the learning and growth of all students and the success of all staff by cultivating a shared vision that makes effective teaching and learning the central focus of schooling.

Management and Operations: The school leader promotes the learning and growth of all students and the success of all staff by ensuring a safe, efficient, and effective learning environment, using resources to implement appropriate curriculum, staffing and scheduling.

Family and Community Engagement: The school leader promotes the learning and growth of all students and the success of all staff through effective partnerships with families, community organizations, and other stakeholders that support the mission of the school and district.

Professional Culture: The school leader promotes success for all students by nurturing and sustaining a school culture of reflective practice, high expectations, and continuous learning for staff.

Graduates from the Educational Leadership and Policy program will learn to:

- Practice critical self-reflection and discernment.
- Foster an ethical, mission-driven school or educational environment/organization.
- Create structures that advance organizational and professional learning.
- Observe, assess, and support effective teaching and instructional practices.
- Advance equity and agency across multiple constituencies.

Certificate of Advanced Educational Specialization Degree Program (C.A.E.S.)
The C.A.E.S. course of study is designed for currently practicing educators who already have a master’s degree and who do not plan to pursue a doctoral degree but seek a higher level of specialization or professional licensure in a particular field. For further information on the C.A.E.S. program in Educational Leadership, contact Boston College, The Office of Graduate Admission, Financial Aid, and Student Services, Lynch School of Education and Human Development, Campion Hall 135,140 Commonwealth Avenue, Chestnut Hill, MA 02467-3813, telephone 617-552-4214, or e-mail gsoe@bc.edu.

Doctoral Program (Ed.D.) in Educational Leadership

The Lynch School offers a three-year accelerated doctoral program for practicing school administrators—the Professional School Administrators Program (PSAP). This program provides an opportunity for full-time administrators to obtain their superintendent licensure and a Doctor of Education in educational leadership. The Lynch School of Education partners with the Massachusetts Association of School Superintendents and Teachers21 to prepare future superintendents and school leaders for public, Catholic, charter, and independent schools. The program is grounded in the core values of the Lynch School, with coursework focusing on leadership for social justice, school reform, community building, and leadership for learning. Admission to this program is offered in alternate years and the next cohort will be admitted in 2019.

Students who complete the Ed.D. program (PSAP) are expected to demonstrate:

- Competence in instructional leadership (district level leadership; ethics and equity; culturally proficient leadership; needs of diverse learners;
collaborative; reflective; open to feedback; strong oral and written communication; self-directed; confident).

- Competence in management and operations (planning and implementing change; budget development; human capital analysis; school committee relationships; strategic thinking; teaming skills).
- Competence in family and community engagement (culturally proficient leadership; educational equity audit and diversity planning; professional development implementation; community relationships; crisis communication).
- Competence in professional culture (self-awareness; culturally proficient leadership; team leadership; reflectiveness and self-assessment of leadership).
- Competence in advanced level data collection, analysis, and interpretation of research in the field of educational leadership.

Applicants must be currently practicing in their administrative area. More information is available from Boston College, The Office of Graduate Admission, Financial Aid, and Student Services, Lynch School of Education and Human Development, Campion Hall 135, 140 Commonwealth Avenue, Chestnut Hill, MA 02467-3813, telephone 617-552-4214, or e-mail gsoe@bc.edu.

Programs in Higher Education

Master of Arts (M.A.) in Higher Education

The master’s degree in Higher Education prepares students for entry-level and mid-level positions in student affairs as well as in other professional areas in colleges, universities, and policy organizations. The M.A. program consists of 30 credit hours of required and elective coursework and field
experiences. Most students complete the program in two academic years. Students with substantial professional experience have the opportunity to complete the program full-time in one academic year and one summer. It is also possible to complete the program on a part-time basis. In addition to a core of foundational courses in higher education, the program offers students the opportunity to focus on one of the following concentrations:

- **Student Affairs**: This concentration prepares students to work as professionals in functional areas of student affairs such as student activities, residence life, admissions, service learning, orientation, career services, and academic advising. Students gain an understanding of the foundations of higher education and student affairs and are able to link theory and practice through class projects and field experience placements.

- **Higher Education Administration**: This concentration prepares students to work as professionals in colleges and universities, policy organizations, and advocacy organizations. Students gain an understanding of the foundations of higher education with a focus on law, policy, and administration and are able to link theory and practice through field experience placements.

- **Spirituality, Faith, and Formation**: The top-ranked Catholic graduate school of education in the country, the Lynch School offers the only master’s degree in higher education that prepares students to shape the policies, practices, and intellectual life of Catholic colleges and universities while supporting the continuing formation of diverse students in their own journey of faith and spiritual development. This course of study integrates theories of student development, sociology of religion, institutional culture, leadership formation, policy development, and theological topics in a Catholic higher education setting.
At the completion of the program, students must demonstrate:

- Knowledge of the important issues facing higher education.
- Knowledge of foundational, methodological and concentration content.
- Demonstrated competence in communication skills, cooperation and teamwork, work quality and quantity, and job knowledge as assessed in the Field Experience Performance Review and Development Plan.

Faculty advisors work with students on an individual basis to design programs of study and applied field experiences according to the individual student’s background, interests, and goals.

**Master of Arts (M.A.) in International Higher Education**

Designed to provide students with a deep understanding of and a scholarly perspective on global higher education, this master’s program examines challenges and opportunities in different geographic regions, and explores such cross-cutting topics as leadership and management, economics and finance, and teaching learning, and student affairs in the field—from global and regional standpoints. The M.A. program consists of 30 credit hours of required and elective coursework and field experiences. The program may be completed in one academic year and one summer by students interested in full-time study.

**Doctoral Degree (Ph.D.) in Higher Education**

The doctoral program is designed to prepare experienced practitioners for senior administrative and policy-making posts and careers in teaching/research in the field of higher education. The program has several programmatic foci that permit students to specialize in an area of interest.
Among these are:

- Administration and policy analysis in higher education
- Student development and student affairs
- International and comparative higher education
- Finance and economics of higher education
- Organizational culture and change
- The academic profession

In addition, students may choose other topics which are relevant to the administration of post-secondary education and to research. Upon completing the program, students should demonstrate:

- Knowledge of the important issues facing high education from a multi-disciplinary perspective (history, sociology, philosophy, psychology, economic, and political science).
- Knowledge of theoretical and empirical knowledge in the field.
- Knowledge of managerial and policy-making issues in the field.
- Knowledge of research methodologies and research ethics and applications.

A special feature is the Center for International Higher Education, linking the Lynch School’s Higher Education program with Jesuit colleges and universities worldwide. This initiative, as well as other international efforts, provides a significant global focus to the higher education program.

The doctoral program requires 54 credit hours of coursework, 48 of which must be beyond the 7000 level. At least six credit hours of dissertation direction is needed. The Ph.D. program is organized into several tiers of
study. These include a core of foundational studies in higher education; methodological courses; specialized elective courses in higher education and related fields, including research seminars; and research. In the context of a rigorous selection of courses, students are encouraged to pursue their own specific interests in higher education.

**Department of Counseling, Developmental, and Education Psychology**

The Department of Counseling, Developmental, and Educational Psychology (CDEP) department promotes psychosocial well-being, positive social change, and social justice through innovative and rigorous teaching, research, and professional training in applied and counseling psychology. The department engages in psychological research and its applications to advance more equitable and socially just policies and practices in partnership with diverse local, national and global communities. CDEP programs prepare students to engage in culturally informed research and practice within and across disciplines and settings.

**Programs in Counseling and Counseling Psychology**

Programs in Counseling and Counseling Psychology have, as a mission, the preparation of mental health counselors and school counselors at the master’s level and counseling psychologists at the Ph.D. level for competent professional practice in schools, universities, and a variety of non-school health care delivery settings.

The primary focus of the multi-level program is the facilitation of healthy functioning in clients and a respect for individual and cultural differences. Competencies are developed in psychological theories of personality and
behavior, human development, counseling strategies, and career development. Developmental concepts are integrated with supervised practice through field placements and varied instructional approaches.

The list of specific courses required for each program is available on the Lynch School website under Programs of Study.

**Master of Arts (M.A.) in Mental Health Counseling**

The Lynch School's Master of Arts program in Mental Health Counseling prepares students for careers as mental health counselors and/or to pursue doctoral studies in psychology or other fields. A core component of the Master's in Psychology and Counseling Accreditation Council's (MPCAC)-accredited program, consistent with the University's broader mission and Jesuit tradition, is an emphasis on social justice. Graduates are prepared to serve the mental health needs of individuals, groups, communities, and systems across contexts and cultures, and to promote and advocate for social change.

The program's training emphasizes both academic and applied experiences that incorporate developmental-contextual and multicultural frameworks to understand and promote mental health and well-being in diverse populations. Students receive a broad background in counseling and mental health theories, develop strong counseling skills, engage in reflective scholarship, gain core professional competencies, and master scientifically informed best practices. They graduate ready to practice contemporary counseling.

The Master of Arts degree in Counseling is a two-year program with two tracks:
The 60-credit hour program meets the educational requirements for licensure as a Mental Health Counselor (LMHC) in the Commonwealth of Massachusetts. Graduates of this program are ready for entry-level counseling positions and, with postgraduate supervision and experience, prepared to obtain licensure and advanced skills/specialization. Students in the 60-credit sequence are expected to take one required course during the Summer Session. They may also take additional elective courses during the Summer Session if they wish to reduce their course load during the second year in the program. During the first year of the program students complete a year-long course, Foundations of Counseling I and II, which includes an intensive, counseling skills training lab experience. In the second year, students complete a combined Practicum-Internship experience of between 700 and 900 hours in a community setting while completing academic requirements.

The 48-credit program prepares students for further studies in counseling or fields in which a solid counseling foundation is valuable. Our graduates have gone on to pursue doctoral degrees in psychology and further studies in public policy, law, and business.

Each program requires students to complete a practicum experience.

At completion of the program, students will be able to:

- Demonstrate foundational training in, and foster identification with, the field of counseling.
- Become competent as practitioners and knowledgeable of the ways in which science influences practice and practice influences science.
- Understand the nature of social justice in their professional work and to infuse this perspective into their practice.
Master of Arts (M.A.) in School Counseling

The School Counseling program is a 48-credit hour track that is accredited by the Massachusetts Department of Elementary and Secondary Education and that meets current Massachusetts requirements for initial licensure as a school counselor at the PreK-8 and/or the 5-12 grade levels. The M.A. in School Counseling is also accredited by the Master’s in Psychology and Counseling Accreditation Council (MPCAC) for the period of March 2017 through March 2027. The first year of the program is devoted primarily to course work; however, School Counseling students do spend one day a week at a school in their second semester to meet pre-practicum requirements. The second year of the program consists of a full-year, 600-hour practicum placement and the completion of remaining academic requirements. At completion of the program, students will be able to:

- To demonstrate foundational training in, and foster identification with, the field of psychology generally, and counseling and school counseling, specifically.
- Become competent as practitioners, and knowledgeable of the ways in which science influences practice and how practice can inform scientific investigation.
- Promote social justice in their professional work.

Doctoral Program (Ph.D.) in Counseling Psychology (APA accredited)

The doctoral program in Counseling Psychology, through advanced course work and supervised internships, builds on prior graduate training and professional experience. Using a developmental framework and a scientist-practitioner model of training, the program helps students acquire the following competencies: ability to comprehend and critically analyze current
literature in the field; understanding of major theoretical frameworks for counseling, personality, and career development; skills to combine research and scientific inquiry; knowledge and practice of a variety of assessment techniques; respect for and knowledge of diverse client populations; ability to provide supervision, consultation, and outreach; commitment to the ethical and legal standards of the profession including sensitivity to individual, gender, and cultural differences; and demonstrated competencies with a variety of individual and group counseling approaches in supervised internships.

At the completion of the program:

- Students demonstrate foundational knowledge, and identification with, the field of psychology, generally and counseling psychology, specifically.
- Students demonstrate competency as theorists, researchers, and scholars, who are knowledgeable of the ways in which practice influences science.
- Students demonstrate competency as practitioners and are knowledgeable of the ways in which science influences practice.
- Students demonstrate social justice practices in their professional work.

The doctoral program in Counseling Psychology accepts applications from applicants with a master’s degree prior to applying as well as from applicants who wish to pursue their doctoral education directly after their undergraduate education (Direct Admit). The doctoral program (Ph.D.) in Counseling Psychology is accredited by the American Psychological Association (Office of Program Consultation and Accreditation, 750 First Street, NE, Washington, DC 20002; 202-336-5979) and is designed to qualify candidates for membership in that organization and Division 17
(Counseling Psychology). The program is designed to provide many of the professional pre-doctoral educational requirements for licensure as a Psychologist in the Commonwealth of Massachusetts and for inclusion in the National Register of Health Care Providers. Licensure requirements in Massachusetts include an additional year of post-doctoral supervised experience.

The entering doctoral student who has not completed all of the educational prerequisites for the M.A. in Counseling must complete them during the initial year of enrollment in the doctoral program. Decisions regarding this aspect of the student’s coursework will be based on a review of the student’s background by the assigned advisor and the director of doctoral training.

Once admitted, doctoral students are required to complete courses in each of the following broad areas that fulfill the basic professional training standards: scientific and professional ethics and standards, research design and methodology, statistical methods, psychological measurement, history and systems of psychology, biological bases of behavior, cognitive-affective bases of behavior, social bases of behavior, individual differences, and professional specialization.

The Ph.D. in Counseling Psychology requires a minimum five years of full-time academic study, doctoral comprehensives, and advanced practica, including a year of full-time internship and successful defense of a dissertation. Other departmental requirements for the Ph.D. are discussed above.

Programs in Applied Developmental and Educational Psychology
The theoretical orientation of the programs in Applied Developmental and Educational Psychology is development and learning in sociocultural context. The programs are designed to develop expertise in integrating theory, research, and application to the development of children, adolescents, and adults.

Two degrees are offered: the master’s degree in Applied Developmental and Educational Psychology and the doctoral degree in Applied Developmental and Educational Psychology.

The doctoral program in Applied Developmental and Educational Psychology accepts applications from applicants with a baccalaureate or master’s degree in psychology or a related field. Most applicants have some research experience as well as practice/education experience in the field.

**Master's Programs (M.A.) in Applied Developmental and Educational Psychology**

The M.A. degree focuses on the unique characteristics, crises, and developmental tasks of people at specific periods in their lives, including the social, affective, biological, and cognitive factors that affect development. The program is designed for those pursuing knowledge of theory and research in the area of life span development, and for those practitioners (counselors, nurses, personnel specialists, teachers, social workers) seeking a greater understanding of the populations they serve. The M.A. degree does not lead to licensure. Those possessing a degree in this option are employed in a number of developmentally oriented settings, (e.g., residential care centers, prisons and correction centers, children’s museums and parks, adult and industrial educational facilities, personnel departments, governmental offices, and hospitals). Graduates also serve as educational instructors and/or consultants in these settings.
Learning outcomes for the program:

- Learn to critically analyze and evaluate research, programs, and policies related to developmental and educational psychology;
- Learn to communicate about research and current controversies in the field through collegial discussions in courses and close collaborations with faculty;
- Learn how to apply disciplinary knowledge to real-world situations through field placements and internships.

A listing of specific course requirements may be obtained from the Office of Graduate Admissions, Financial Aid, and Student Services, Campion 135. The program is designed to give maximum flexibility to suit individual needs. Beyond the core requirements, students work with their academic advisor to select an additional set of courses that best fulfills their career goals and areas of interest. Through these courses students can elect to complete Certificates or Specializations, which can be found online at the Certificates page.

**Doctoral Program (Ph.D.) in Applied Developmental and Educational Psychology**

We prepare graduate students to serve diverse populations in a variety of professional roles as teachers and researchers in colleges and universities and as researchers and leaders in applied settings, including schools, government agencies, and health and human services organizations. Faculty situate their work within the mission of the Lynch School, which is to improve human well-being through teaching, research, and service.
The focus of the Applied Developmental and Educational Psychology Program is on development and learning in sociocultural context. Areas of program expertise within the study of child development and child functioning include cognitive and socioemotional development from the preschool years through adolescence. We also have expertise on adult functioning in community settings. Development is examined, in both research and curriculum, across multiple, interactive contexts or levels.

These levels include:

**Individual Functioning**

- Basic Processes
- Individual Differences
- Developmental Disabilities
- Biological Bases of Behavior

**Interpersonal Processes**

- Family Relationships
- Peer Relationships
- Parenting

**Community, Cultural, and Public Policy**

- Schools and Learning Environments
- Poverty
- Race and Ethnicity
- Gender
Upon completion of the Ph.D. program, graduates will be able to:

- Demonstrate knowledge of the major concepts and theories in the field of child development.
- Critically evaluate existing research and integrate research findings across studies.
- Analyze applied and theoretical issues related to child development from different theoretical perspectives and based on prior research findings.
- Develop research questions reflecting basic and applied issues in the areas of education, social policy, and human/community development.
- Use appropriate methodology to design empirical studies addressing research questions.
- Use a variety of quantitative and qualitative techniques for analyzing data.
- Communicate research findings clearly and accurately in publications and presentations for both professional and lay audiences.
- Teach courses in the field and the college and graduate level.

The range of careers available to Applied Developmental and Educational Psychology graduates with a Ph.D. includes university teaching, research, advocacy, consultation, and positions in business, governmental agencies, and human service organizations.

The program guidelines promote active engagement in research with faculty mentors for all students throughout their doctoral program. In addition to this mentored training, the curriculum requires that students take core courses in (1) social, affective, and cognitive development and the contexts of development; (2) qualitative and quantitative research methods and statistics; (3) professional development and teaching preparation; and, (4)
application to practice and policy. In addition, students develop expertise in targeted areas of psychology through selected elective courses and through their research and practice experiences. Finally, students with a particular interest in human rights and social justice can obtain a Certificate through the BC-based Center for Human Rights and International Justice.

**Department of Measurement, Evaluations, Statistics, and Assessment**

Studies in Measurement, Evaluation, Statistics, and Assessment are designed to prepare researchers with specialized competence in testing, assessment, applied statistics, the evaluation of educational programs, and research methodology for the social sciences and human services.

**Master of Education (M.Ed.) in Educational Research Methodology**

The Measurement, Evaluation, Statistics and Assessment (MESA) program at the Lynch School combines the study of research design, statistical methods, and testing and assessment with a research focus on major contemporary education policy issues. The program is designed to prepare students for research and academic careers in education, social sciences, and human services.

Upon completion of the M.Ed., graduates should be able to:

- Understand the theory of research, evaluation, statistics, measurement and assessment methodology.
- Critically analyze published quantitative and qualitative research.
Interpret and report quantitative and qualitative designs, procedures, and results.

Communicate research findings effectively.

The master’s program prepares graduate students with fundamental skills in testing, assessment, the evaluation of educational innovations, and in quantitative and qualitative social science research methods. A minimum of 30 credit hours and satisfactory performance on a comprehensive examination are required for the M.Ed. degree.

**Master of Arts (M.A.) in Learning Engineering**

Interdisciplinary and experiential, this one-year, full-time program prepares you to design engaging and effective learning experiences that are informed by the learning sciences and incorporate cutting-edge technologies. This first-to-market program in a pioneering discipline leverages the expertise of faculty from across the Lynch School of Education and Human Development. Throughout the on-campus program, you’ll complete design challenges, shadow working professionals, take field trips to technology incubators and collaboratories, and intern with local organizations. You’ll graduate with a dynamic portfolio that showcases the depth and breadth of your design work and demonstrates your capabilities in learner-centered design, leadership, and forward-thinking imagination.

Learning engineering is the systematic application of principles and methods from the learning sciences to support and better understand learners and learning. The discipline leverages human-centered design approaches to iteratively develop and improve design solutions that address specific learning needs and opportunities—often using technology.
The program is built around a well-facilitated and increasingly challenging experiential core. Three-credit courses and one-credit modules emphasize the knowledge and skills needed to develop design and leadership capabilities and improve understanding of learning. Our program is designed as a cognitive apprenticeship in which you participate as an active member of a knowledge-building community with teachers, mentors, and peers.

- Hands-on learning through a design studio every semester, opportunities to shadow groups engaged in designing for learners, and internships with local organizations.
- Classes and modules designed specifically to support you as you learn what you need to thrive as a learning engineer. You’ll use what you learn in classes to guide the decisions you make while completing studio projects.
- Reflection—you will continuously reflect on your experiences and the design challenges you face, using those reflections to develop new insights. You’ll track your thinking, record and justify your decisions, continually identify what you learn, and synthesize across your experiences in the Reflective Seminars.

Throughout the program, you’ll develop the expertise and imagination to design learning experiences that dynamically engage learners’ interests, passions, and prior knowledge. You will also acquire interpersonal and leadership skills that will prepare you to thrive as leaders and collaborators.

- How people learn and what influences their engagement. You will be introduced to the theoretical foundations of how people learn, pedagogies and practices for fostering learning, and how to design and use technology to engage learners.
• Learner-centered design and designing for diversity. You’ll master design thinking, design decision-making practices, and how to use what you learn about learning to create engaging and effective designs that address learners in all of their complexity.

• Design for social justice and equity. Across classes, design studio experiences, and reflective activities, you will account for the full range of social, cultural, affective, and cognitive influences on access and learning. Promoting social justice is a pillar of both Boston College’s mission and the mission of the Lynch School of Education and Human Development.

• Vocational discernment and career readiness. You will have opportunities to identify what you enjoy doing as a designer of learning experiences, your personal values and aspirations, what your strengths are, and concrete steps to achieve your goals. You’ll work with and be mentored by practicing learning engineers.

• Leadership skills. Whether you are a team member or a team leader in your first position, you’ll learn valuable skills and knowledge you can use to influence your team, organization, or clients.

Master of Science (M.S.) in Applied Statistics and Psychometrics

The Applied Statistics and Psychometrics program at the Lynch School combines the study of research design, statistical methods, and testing and assessment with a research focus on major contemporary education policy issues. The program is designed to prepare students for research and academic careers in education, social sciences and human services.

Upon completion of the M.S., graduates should be able to:

• Understand the theory of applied statistics and psychometrics.
• Conduct analyses using advanced procedures such as multiple regression, multivariate models, hierarchical linear modeling, causal modeling, and longitudinal analyses.
• Interpret and report quantitative and qualitative designs, procedures, and results.
• Design, conduct, analyze, interpret and report both Classical Test Theory and Item Response Theory analyses.
• Communicate research findings effectively.

The MESA Master of Science meets the need for quantitative specialists to conduct statistical analyses, design quantitative research studies, and develop measurement scales for educational, social, behavioral, and health science research projects. This program meets the increasingly higher expectations of applied research organizations and funding agencies, (e.g., the Institute for Education Sciences and the National Science Foundation), for master’s-level specialists trained in quantitative designs, statistical procedures, and measurement methodology applicable to a wide variety of projects. A minimum of 30 credit hours and satisfactory performance on a comprehensive examination are required for the M.S. degree.

Doctoral Program (Ph.D.) in Measurement, Evaluation, Statistics, and Assessment

This program prepares researchers with specialized competence in testing, assessment, the evaluation of educational innovations, and in quantitative and qualitative social science research methodology.

A student without a master’s degree may apply directly to the doctoral program in Measurement, Evaluation, Statistics, and Assessment; however, note that this Direct Admit option is appropriate only when the applicant has
demonstrated exceptional academic achievement and has acquired relevant research experience.

Emphasis is on the research methodology and data analysis and includes advanced coursework in research design, statistical methods, and testing and assessment as well as seminars in statistical and measurement topics. MESA students have the opportunity to tailor coursework to their particular interests and background. The doctoral degree requires a minimum of 54 credits beyond a master’s and satisfactory completion of comprehensive exams and a dissertation. Students are expected to develop an understanding of modern techniques of test construction and evaluation, design of research and experiments, univariate and multivariate statistical analysis of data, and psychometric theory. Training and experience are provided in the use of specialized computer software for statistical analysis.

Upon completion of the Ph.D., graduates should be able to:

- Understand the theory of research, evaluation, statistics, measurement and assessment methodology.
- Critically analyze published quantitative and qualitative research.
- Construct both cognitive and affective measurement instruments and assessments.
- Conduct original empirical research related to topics in education, evaluation, statistics, measurement, assessment, and policy.
- Interpret and report quantitative and qualitative designs, procedures, and results.
- Communicate research findings effectively.

Since the important issues in these areas require more than technical solutions, the program also attends to non-technical social, ethical, and
legal issues. Care is taken to design programs of study and experience according to the individual student’s needs, interests, and goals. Students may choose an additional concentration in Developmental and Educational Psychology, Educational Policy and Reform, Curriculum and Instruction, Educational Leadership, or other area.

Graduates of the program are qualified for academic positions in university departments of education and social sciences. They also are qualified for research and testing specialist positions in universities, foundations, local education agencies, state and regional educational organizations, and in research and development centers.

Dual Degree Programs

The Lynch School offers five dual degree programs in collaboration with the Boston College Law School, the Carroll School of Management, and the School of Theology and Ministry (STM).

Dual Degree Programs—Law and Education

The dual degree programs in law and education are designed for students interested in serving the combined legal and educational needs of students, families, and communities in our nation. They reflect the University’s mission to promote social justice and to prepare men and women for service to others. The programs prepare students to meet the needs of individuals who have traditionally not been well served by the nation’s schools. The programs are designed to serve the needs of persons who wish to combine knowledge about education and applied psychology with legal knowledge and skills to better serve their clients and constituencies. The programs offer an opportunity to further the University’s goals in
promoting interdisciplinary inquiry and integrating the work of service providers.

Students admitted to the program may expect to receive both a master’s degree in Education (M.Ed. in Curriculum and Instruction or Educational Leadership or M.A. in Higher Education) and the Juris Doctor (J.D.) degrees in approximately three and a half years, or three years and two summers, rather than the four or more years such degrees would normally entail if taken separately. Students must matriculate and spend at least one semester of residence in the Lynch School.

Students seeking to pursue the J.D./M.Ed. or J.D./M.A. dual degree must file separate applications to, and be admitted by, both their intended Education program in the Lynch School and the Boston College Law School. Any student seeking licensure or human services licensure must meet all of the requirements in the Lynch School for that licensure. Students seeking licensure in Massachusetts must pass the Massachusetts Tests for Educator Licensure (MTEL).

All Lynch School admissions requests should be addressed to: Boston College, The Office of Graduate Admission, Financial Aid, and Student Services, Lynch School of Education and Human Development, Campion Hall 135, 140 Commonwealth Avenue, Chestnut Hill, MA 02467-3813, telephone 617-552-4214, or e-mail gsoe@bc.edu. The BC Law School accepts applications from mid-September through March 31 for the class entering in August. Contact them directly for further information at Office of Admissions, BC Law School, 885 Centre Street, Newton Centre, MA 02459, 617-552-8550.

Dual Degree Program—Higher Education and Business Administration (M.A./M.B.A.)
This dual degree program will provide students in higher education with an opportunity for professional training in resource management. The M.B.A./M.A. program will prepare students to assume leadership positions in such areas as financial management, resource planning, and technology management in major universities and policy-making institutions in post-secondary education.

Students admitted to the program may expect to receive both a master’s degree in education (M.A. in Higher Education Administration) and the Master of Business Administration (M.B.A.) degrees in three academic years and two summers. Students seeking to pursue the M.B.A./M.A. dual degree must file separate applications to, and be admitted by, both the Higher Education program in the Lynch School of Education and Human Development and the Carroll School of Management.

All Lynch School admissions requests should be addressed to: Boston College, The Office of Graduate Admission, Financial Aid, and Student Services, Lynch School of Education and Human Development, Campion Hall 135, 140 Commonwealth Avenue, Chestnut Hill, MA 02467-3813, telephone 617-552-4214, or e-mail gsoe@bc.edu. All M.B.A. admissions requests should be addressed to the Office of Graduate Admissions, Carroll School of Management, 140 Commonwealth Avenue, Chestnut Hill, MA 02467-3813, 517-552-3920.

Dual Degree Program—Counseling Psychology/Theology and Ministry (M.A./M.A.)

The dual M.A. in Theology & Ministry/M.A. in Counseling Psychology program was developed by the School of Theology and Ministry and the Lynch School. It is designed for individuals who wish to pursue graduate studies that combine theories and practice in counseling and psychology
with studies in religion and exploration of the pastoral dimensions of caregiving.

It combines the core studies and faculty resources of the existing M.A. in Theology & Ministry (Pastoral Care and Counseling Concentration), and the M.A. in Mental Health Counseling. It prepares students to seek licensing as professional mental health counselors while also providing them with theoretical foundations for integrating pastoral ministry and counseling techniques. Students seeking to pursue the dual M.A./M.A. program must file separate applications to, and be admitted by, both the Lynch School master’s program in Counseling and the School of Theology and Ministry. Any student seeking mental health licensure or school counseling licensure must meet all of the requirements in the Lynch School for that licensure.

All Lynch School admissions requests should be addressed to the Office of Graduate Admissions, Financial Aid, and Student Services, Campion 135, Lynch School, Boston College, Chestnut Hill, MA 02467-3813, 617-552-4214. All Pastoral Ministry admissions requests should be addressed to the School of Theology and Ministry, 140 Commonwealth Avenue, Chestnut Hill, MA 02467-3921, 617-552-6506.

Certificate and Specialization Programs

All Lynch School Certificate and Specialization Programs requests should be addressed to: Boston College, The Office of Graduate Admission, Financial Aid, and Student Services, Lynch School of Education and Human Development, Campion Hall 135, 140 Commonwealth Avenue, Chestnut Hill, MA 02467-3813, telephone 617-552-4214, or e-mail gsoe@bc.edu.

Certificate in Child and Family Mental Health
The Certificate in Child and Family Mental Health and Wellness is designed for students who would like to broaden and deepen their understanding of developmental psychology, and the mental health and wellness of children, adolescents, and families. The courses included in this certificate foster an understanding of children and families from strengths-based, developmental-contextual framework.

Certificate in Human Rights and International Justice

The certificate program is designed to address the increasing complexity of human rights issues in an increasingly globalized world. Certificate students learn to think critically within and across disciplines to grasp more fully contemporary human rights challenges, and to be better prepared to offer thoughtful and effective responses. The certificate program is open to students who are registered in BC’s graduate and professional schools.

Certificate in Social Justice Leadership

The certificate program helps current and aspiring leaders develop and enact a theory of change to boldly advance equity in schools. Through a series of four courses, participants discern organizational impediments to students’ opportunities to learn, then envision and enact a systemic response to confront these barriers. The goal of the program is to provide intensive support to educators committed to deepening their knowledge, skills, and dispositions to ameliorate educational inequities.

Certificate in Educational Policy Development

The certificate program equips current and aspiring leaders in schools and community-based organizations to leverage dramatic organizational change. Through a series of four courses, participants develop a
sophisticated appreciation of how policies shape the cultural norms and
day-to-day practices at both a micro level (e.g., within institutions) and a
macro level (e.g., within a school district, a city, or a state). The goal of the
program is to help leaders develop their repertoire of skills to use policy
levers to creatively and effectively advance organizational goals.

Certificate in International Higher Education

The certificate program in International Higher Education is designed to
provide students with an understanding of and a scholarly perspective on
global higher education, and examines challenges and opportunities in
different geographic regions. It outlines the major trends and issues
affecting this fast-growing field and provides the skills to understand and
analyze policy, practice, and theory. You’ll explore cross-cutting topics as
leadership and management, economics and finance, and teaching
learning, and student affairs in the field—from global and regional
standpoints. Successful completion can be applied to the Master’s in
International Higher education. This Certificate can be completed fully
online.

Certificate in Positive Youth Development

The Certificate in Positive Youth Development equips professionals with an
understanding of the theoretical, empirical, and experiential bases of the
Positive Youth Development (PYD) model. PYD offers an applied
perspective to frame applications (programs and policies) for promoting
positive development among youth living in diverse communities. The
certificate benefits early- and mid-career professional youth development
leaders for careers in agencies, institutions, schools, nonprofits, and
community organizations that serve youth.
Specialization in Autism Spectrum Disorder

The Specialization in Autism Spectrum Disorder assists teachers and other professionals who work with students diagnosed with Autism Spectrum Disorder (ASD) in K–12 schools in understanding the nature of ASD and the educational techniques used to meet their needs. The population of student being diagnosed with ASD has grown dramatically over the past decade. This specialization will benefit special educators and many general education teachers, who are being asked to serve these students at all grade levels.

Certificate in Serving Exceptional Learners in Catholic Schools

The Certificate in Serving Exceptional Learners in Catholic Schools is designed to prepare participants to serve the diverse learning and behavioral needs of their students who are atypical learners. Teachers will sharpen their skills in managing classrooms of diverse learners, connect their practice with new research findings, and learn practical strategies to enhance student learning. Although this certificate does not fully prepare teachers to be special educators, it addresses the key strategies needed for serving these students in Catholic school classrooms.

Certificate for Institutional Research Officer/Analyst

The Certificate in Institutional Research prepares professionals for higher education careers as institutional research officers and analysts where addressing institution-related questions and problems requires: skill in program evaluation, assessment development, general research design,
and applied social science statistics; and familiarity with institutional structures and operations.

**Certificate in Bilingual Education**

The Bilingual Education Certificate (BEC) certificate is designed to prepare BC graduates to work in settings where instruction takes place in two languages. Through targeted coursework, students will become familiar with the foundations of bilingual education, infusing language into content instruction, and teaching reading and language arts in Spanish as well as English. The work undertaken by BEC scholars prepares educators for teaching in both monolingual and bilingual educational settings. You will work with Lynch School faculty with extensive expertise in bilingual teaching and learning. Practicum placements in partner bilingual schools in the greater Boston area provide critical points of practice for teaching. The BEC accompanies the state-level certification associated with elementary and literacy specialist licensure programs.

University Catalog  
Office of Student Services  
Lyons Hall 103
Morrissey College of Arts and Sciences, Graduate Programs - University Catalog

BOSTON COLLEGE

The Graduate School of the Morrissey College of Arts and Sciences (GSMCAS) offers programs of study leading to the degrees of Doctor of Philosophy (Ph.D.), Master of Arts (M.A.), and Master of Science (M.S.). In addition, GSMCAS may admit as Special Students those students not seeking a degree who are interested in pursuing coursework for personal enrichment.

The Graduate School of the Morrissey College of Arts and Sciences also offers several dual degree options. The Master of Arts in Teaching (M.A.T.) and Master of Science in Teaching (M.S.T.) are offered in cooperation with the Lynch School of Education Graduate Programs. The Master of Arts/Juris Doctor (M.A./J.D.) and the Doctor of Philosophy/Juris Doctor (Ph.D./J.D.) are offered in cooperation with the Boston College Law School. The Master of Arts/Master of Business Administration (M.A./M.B.A.), and the Doctor of Philosophy/Master of Business Administration (Ph.D./M.B.A.) are offered in cooperation with the Carroll Graduate School of Management. The Graduate School also offers, through select departments, a Fifth Year Master of Arts (M.A.) and Master of Science (M.S.) program for high-achieving BC undergraduates wishing to pursue an accelerated graduate program.
General Information

The Deans’ Office of the Graduate School of the Morrissey College of Arts and Sciences in Gasson 108 is open from 9:00 a.m. to 5:00 p.m., Monday through Friday, to assist prospective students with general admissions inquiries and current students with any academic or student services needs. Application materials may be obtained either from the department in which students hope to study or from the Graduate Admissions Office.

The course schedule is available online prior to each semester’s registration period at the Course Information and Schedule link at www.bc.edu/courses. The International Student Office, the Office of the Dean for Student Development, and the Graduate Student Association provide non-academic services for students.

- Master's Degree Programs
- Doctoral Degree Programs
- Special Students (Non-degree)
- Admission
- Financial Aid
- Academic Regulations

Master's Degree Programs

Requirements for the Degrees of Master of Arts and Master of Science

Acceptance

Candidates for the Master’s degree must be graduates of an accredited college and normally must have at least 18 semester hours of upper
division work in the proposed area of study. In case of deficiencies, prerequisites may be earned in the graduate school by achieving a minimum grade of B in courses approved for this purpose. Where there is some doubt about a scholastic record, acceptance may be conditional. The candidate will then be evaluated by the department and recommended to the Dean for approval after completing the first semester of coursework or after earning a minimum of six credits.

**Course Credits**

The number of graduate credits required for the degree varies by department. No more than six graduate credits will be accepted in transfer toward fulfillment of course requirements, as described more fully under “Transfer Credit Policies” under Academic Regulations.

**Fifth Year B.A./M.A. and B.S./M.S.**

In cooperation with the Morrissey College of Arts and Sciences, the Graduate School offers five year B.A./M.A. and B.S./M.S. programs in some disciplines. See the Undergraduate Morrissey College of Arts and Sciences for further information.

**Doctoral Degree Programs**

**Requirements for the Degree of Doctor of Philosophy**

The Ph.D. degree is granted only for distinction attained in a special field of concentration and the demonstrated ability to modify or enlarge upon a significant subject in a dissertation based upon original research meeting high standards of scholarship.
Requirements for the doctoral degree are specific to departments and may be found under departmental listings. Detailed statements of requirements and procedures should be requested directly from the department in which the student has an interest.

**Residence**

The philosophy of the residence requirement is that a doctoral student should experience the total environment of the University. Residence for at least two consecutive semesters of one academic year, during which the student is registered as a full-time student at the University, is required. A plan of study that meets this requirement must be arranged by the student with the department. Registration in two courses per semester is considered to fulfill the residency requirement for students holding full-year fellowships and assistantships. The residence requirement may not be satisfied, in whole or in part, by summer session attendance.

**Interdisciplinary Doctoral Program**

Where departmental doctoral programs are unable to satisfy the interests of the student, an interdisciplinary doctoral program remains a possibility. However, students must first be admitted to a departmental program. A student interested in exploring such a possibility should first make an inquiry to the GSMCAS Dean’s Office.

**Special Students (Non-degree)**

Non-degree seeking students, who are interested in pursuing course work at the graduate level, may apply for admission as special students. Many individuals enter departments of GSMCAS as special students—either to
explore the seriousness of their interest in studying for an advanced degree or to strengthen their credentials for possible later application for degree study. Others are simply interested in taking graduate coursework for interest’s sake or for other purposes. Admission as a special student does not guarantee subsequent admission for degree candidacy. Individuals who are admitted as special students and who subsequently wish to apply for admission as degree candidates must file additional application documents and be accepted for degree study. The number of credits one has earned as a special student that may be applied toward the requirements of a degree is determined by the appropriate department in concert with GSMCAS regulations.

Those admitted as special students may take courses only in the department that has recommended their admission. Permission to continue to take courses as a special student beyond the semester for which admission was originally gained must be obtained from the admitting department’s Graduate Program Director.

Admission

Eligibility and Application Information

The Graduate School of the Morrissey College of Arts and Sciences is an academic community whose doors are open to all students without regard to race, ethnic or national origin, religion, color, age, gender, marital or parental status, veteran status, disabilities, or sexual orientation. Opportunities and experiences are offered to all students on an equal basis and in such a way as to recognize and appreciate their individual and cultural differences.
Applicants for admission to the GSMCAS must possess at least a bachelor’s degree from an accredited institution and give evidence of the ability and preparation necessary for the satisfactory pursuit of graduate studies. This evidence consists primarily, but not exclusively, in the distribution of undergraduate courses and the grades received in them. Please consult the your intended department for additional program-specific requirements.

Individuals lacking a bachelor’s degree generally are not admitted to GSMCAS classes. In order to attend graduate classes, persons lacking the bachelor’s degree should apply for authorization either through the Dean of the Woods College of Advancing Studies or, in the case of Boston College undergraduates, through their appropriate dean and with the approval of the chairperson of the given department. Such students will receive only undergraduate credit for the course taken in the GSMCAS, and the course credit will be entered only on their undergraduate record. For regulations governing the simultaneous master’s/bachelor’s degree, students should consult their department.

GSMCAS accepts two classes of applicants—degree students (degree-seeking) and special students (non-degree-seeking).

A completed application to GSMCAS includes the application form, official transcripts as well as any program-specific requirements, e.g., GRE scores, statement of purpose, writing sample, letters of recommendation, etc. For these additional requirements, please consult the requirements of the department to which admission is being sought. All application materials should either be submitted online or sent to the Graduate Admissions Office, Gasson 108.
Applicants for special student status are only required to submit an application form, statement of purpose, and official transcripts. All application materials should either be submitted online or sent to the GSMCAS Admissions Office, Gasson 108.

Degree and special students are not admitted officially until the completed application form with a positive department recommendation has been approved by the Associate Dean of Admissions and Administration. Admission should not be presumed without receipt of official notification from the Associate Dean.

Degree-seeking applicants should consult the department of specialization regarding the specific requirements for the various departmental master’s and doctoral programs.

For the necessary application forms and information, students may either address their requests to the department of interest or to the Graduate Admissions Office, Gasson 108.

Information on the GRE and TOEFL tests may be obtained from the Educational Testing Service, Box 955, Princeton, New Jersey 08540 or at www.gre.org.

All documents submitted by applicants for admission become the property of GSMCAS and are not returnable.

Acceptance

Announcements of acceptance or rejection are usually mailed no later than April 15 for September admissions, but may vary by department. Decisions are made on the basis of departmental recommendations and the fulfillment
of prerequisites. No student should presume admission until he or she has been notified officially of acceptance by the Associate Dean.

Financial Aid

Academic Awards

Stipends and scholarships are available to aid promising students in the pursuit of their studies, including:

- Graduate Assistantships
- Research Assistantships
- Teaching Assistantships
- Teaching Fellowships
- Tuition Scholarships
- University Fellowships

Individuals whose applications are complete will routinely be considered for financial aid by the department in which they hope to study. No separate application is necessary. The scholastic requirements for obtaining these stipend awards or scholarship awards are necessarily more exacting than those for simply securing admission to GSMCAS.

- Graduate students may not receive University financial aid (stipend and/or tuition scholarships) from two schools or departments simultaneously.
- Graduate students who hold fellowships or assistantships may not be employed full-time without Dean’s approval.
Fellowships and Assistantships

University Fellowships

University Fellowships are available in some departments offering the Ph.D. degree. These awards do not require service to the University.

Teaching Fellowships

The Graduate School of the Morrissey College of Arts and Sciences has available a limited number of Teaching Fellowships. These provide a stipend that varies among departments. The Teaching Fellow, in addition to his or her program of studies, is usually responsible for six hours of teaching in the undergraduate colleges.

Assistantships

Graduate Assistantships and Teaching Assistantships

Graduate and Teaching assistantships are assigned by departments. Duties, including the nature and number of hours (though in no case to exceed 20 hours), and stipend amounts vary by department.

Research Assistantships

Research Assistantships are available in some departments. Research Assistantship duties, including the nature and number of hours (though in no case to exceed 20 hours), and stipend amounts vary by department. Summer research opportunities are available on some research projects. For further information, contact the department’s graduate program director.

Tuition Scholarships

https://www.bc.edu/content/bc-web/academics/sites/university-catalog/graduate/gsmcas.html
Tuition scholarships are awarded based on academic achievement and promise. These awards do not require service to the University.

**Procedures for Financial Aid Recipients**

At the opening of each school year, or at whatever other time financial aid may be awarded, recipients of fellowships and assistantships must report to the Human Resources Service Center to complete his/her personnel and tax information forms.

An aid recipient who relinquishes a fellowship, assistantship, or a tuition scholarship must report this matter in writing to the department chairperson and to the dean. These awards may be discontinued at any time during an academic year if either the academic performance or in-service assistance is of an unsatisfactory character. They may also be discontinued for conduct injurious to the reputation of the University.

**Other Sources of Financial Aid**

Students interested in other sources of financial aid, such as work-study funds and various loan programs, should inquire in the Office of Student Services where all such aid is administered. Refer to the earlier section on financial aid in this catalog.

**Academic Regulations**

**Full-Time Enrollment Status**

Full-time enrollment in the Graduate School of the Morrissey College of Arts and Sciences is 9 or more credits.
All students are considered half-time with six credits.

Students completing degree requirements in their final semester may be given exceptions to the school’s minimum credit standard for full-time status by their academic dean.

The credit amounts listed above are used to determine a student’s enrollment status for loan deferments, immunizations, medical insurance requirements, and verifications requested by other organizations.

Graduate schools may also define full-time status by a student’s coursework or role responsibilities as listed below:

- All doctoral candidates in the Graduate School of the Morrissey College of Arts and Sciences are considered full-time students.
- Master’s candidates are considered full-time students if they are registered full-time and/or receiving an assistantship or fellowship through an academic unit, e.g., Graduate Assistants, Teaching Fellows, Teaching Assistants, or Research Assistants.

**Transfer Credit Policies**

Graduate students may request the transfer of not more than six graduate credits. Courses will be considered for transfer if the student has received a grade of B or better and if the course has not been applied to a prior degree. If approved, the transfer course and credit, but not the grade, will be recorded on the student’s academic record. Credit received for courses completed more than ten years prior to a student’s admission to his or her current degree program are not acceptable for transfer. Students are
advised to consult with the procedures and policies of their department or school for exceptions to this policy.

Managed By

University Catalog
Office of Student Services
Lyons Hall 103
Biology, Graduate Programs - University Catalog

The Biology Department offers courses leading to the degree of Doctor of Philosophy. A B.S./M.S. degree is offered to enrolled undergraduate students. The master of science in teaching (M.S.T.) degree is administered through the Lynch School of Education in cooperation with the Biology Department.

Those seeking admission to the graduate program should have a bachelor’s degree and undergraduate coursework in calculus, physics, biochemistry, biology, and chemistry, including organic chemistry. Deficiencies in preparation as noted by the Admissions Committee may be made up in the graduate school.

The minimum curriculum for Ph.D. students consists of six Graduate Core Courses (BIOL6110 Advanced Genetics, BIOL6350 Graduate Biochemistry, BIOL6140 Graduate Molecular Biology, BIOL6150 Advanced Cell Biology, BIOL6160 Graduate Bioinformatics and BIOL6180 Scientific Proposal Writing), two additional Biology-approved Graduate Elective Courses (e.g., BIOL5000+, BIOL 8000+), and a University seminar in Responsible Conduct of Research.

Graduate Research Experience entails three lab rotations during the first year. After each rotation, students present at the Department Data Club. Rotations allow students the opportunity to explore important questions in
different areas of biology and to determine if a particular lab environment is suitable for their thesis research. Students are expected to have joined a permanent lab by the end of this year, with permission of the lab’s P.I.

Students are also required to be a Teaching Assistant for at least two semesters, beginning in their first semester. Depending on the availability of funding from their lab P.I., they may be supported by either a Research Assistantship or a Teaching Assistantship in subsequent semesters.

Throughout the academic year, the Biology Departmental Colloquium hosts distinguished researchers in many areas of biology. Attendance is required of all full-time Ph.D. students at both the Seminar Talk and Department Data Club.

For the M.S.T. degree, course requirements vary depending upon the candidate’s prior teaching experience; however, all master’s programs leading to certification in secondary education include practical experiences in addition to course work. Students seeking certification in Massachusetts are required to pass the Massachusetts Educators Certification Test. For further information on the M.S.T., please refer to the Lynch School of Education and Human Development section, Master’s Programs in Secondary Teaching, or call the Office of Graduate Admissions, Lynch School, at 617-552-4214.

University Catalog
Office of Student Services
Lyons Hall 103
Chemistry, Graduate Programs - University Catalog

The Department of Chemistry offers programs leading to: (1) the Doctor of Philosophy (Ph.D.) degree in chemistry and to (2) the Master of Science in Teaching (M.S.T.) degree in education. The latter is in conjunction with the Lynch School of Education.

Ph.D. Degree Requirements

There is no total credit requirement for the Ph.D. degree. All entering graduate students are required to take the core graduate courses that are designed to provide a reasonable and broad level of proficiency in the various chemistry disciplines, in addition to at least two advanced courses in the student’s chosen focus of research. Core courses may include Mechanistic Organic Chemistry, CHEM5537; Principles of Chemical Biology, CHEM5560; and Physical Chemistry: Principles and Applications, CHEM6676. First year students are required to take a year-long course, Scientific Communication in Chemistry. Advanced course selection will depend on the student’s research areas and are chosen in consultation with their research advisor. Every student is expected to attain a GPA of at least 3.0 at the end of his or her second semester in the Graduate School and to maintain it thereafter. If this standard is not met, the student may be required to withdraw from the graduate program.
At the end of the second year, Ph.D. candidates must pass an oral exam that stresses material from their own research specialty and other related areas. Members of the student’s thesis committee comprise the exam committee. Students who do not pass this exam will be asked to do one of the following: repeat the oral exam (for a final time), complete the requirements for a Master of Science (M.S.) degree, or withdraw from the program. Students choosing to complete the requirements for an M.S. degree must complete a minimum of 18 graduate credits of coursework and a thesis. Students typically accumulate 12 to 18 credits of coursework during the first year of study. The Comprehensive Examination for the M.S. degree is a private, oral defense of the student’s research thesis.

Ph.D. candidates must pass eight cumulative exams in their area from twenty possible. These exams test the students’ development in their major field of interest and critical awareness and understanding of the current literature. Students may also write an original research proposal which when successfully completed counts as two passed cumulative exams. Students are encouraged to start taking cumulative examinations in their first year, but must start taking them in the beginning of their second year.

The M.S. and Ph.D. degrees require a thesis based upon original research, either experimental or theoretical. For the Ph.D. candidate, a thesis project involving a sustained research effort (typically requiring 4–6 years) will begin usually during the second semester of study. An oral defense of the dissertation before a faculty thesis committee and a public presentation complete the degree requirements. Some teaching or equivalent educational experience is required. This requirement may be satisfied by at least one year of service as a teaching assistant or by suitable teaching duties. Arrangements are made with each student for a teaching program best suited to his/her overall program of studies. Waivers of teaching
requirements may be granted under special circumstances with the approval of the Director of Graduate Studies or Department Chairperson.

**M.S.T. Degree**

The Master of Science in Teaching degree program is administered through the Lynch School of Education in cooperation with the Department of Chemistry and requires admission to graduate programs in both the Lynch School of Education and the Department of Chemistry. Although course requirements may vary depending upon the candidate’s prior teaching experience, all master’s programs leading to certification in secondary education include practical experiences in addition to course work. Students seeking certification in Massachusetts are required to pass the Massachusetts Educators Certification Test. For further information on the M.S.T. degree, please refer to the Lynch School of Education Graduate Programs section, Master’s Programs in Secondary Teaching, or call the Office of Graduate Admissions, Lynch School, at 617-552-4214.

**Managed By**

University Catalog
Office of Student Services
Lyons Hall 103
Candidates must complete 30 credits of coursework at the graduate level, of which six may, with departmental permission, consist of a thesis tutorial. In addition, candidates must complete a departmental reading list of Latin and/or Greek authors, must demonstrate the ability to read a modern foreign language (usually French or German), and must pass comprehensive examinations. The examinations will be written and oral. The written portion includes translation from the authors on the reading list and an essay on one of the passages translated. The oral consists of discussion with the faculty about topics in the history and interpretation of Latin and/or Greek literature.

Incoming students can expect to find major Greek and Latin authors and genres taught on a regular basis. In Greek these include Homer, lyric poets, fifth-century dramatists (Aeschylus, Sophocles, Euripides, Aristophanes), the historians Herodotus and Thucydides, Plato, and fourth-century orators. In Latin they include Plautus and Terence, the late republican poets Catullus and Lucretius, Cicero, Augustan poetry (Virgil, Horace, Elegy, and Ovid), the historians Livy and Tacitus, and the novel.

Managed By
Earth and Environmental Sciences, Graduate Programs - University Catalog

BOSTON COLLEGE

Master of Science

The Department offers graduate courses and research programs leading to the M.S. degree in Geology or Geophysics. Students are encouraged to obtain broad backgrounds by taking courses in geology, geophysics, and environmental geosciences along with the other sciences and mathematics. Multidisciplinary preparation is particularly useful for students seeking future employment in industry, government or the private sector.

The Department, with approximately 20 graduate students in residence, is housed in Devlin Hall and has additional research facilities at Weston Observatory. Students enjoy close working relationships with faculty while being able to undertake research using the most modern scientific equipment available. The program stresses a strong background in the earth sciences, as well as the ability to carry out research. It prepares students for successful careers as geoscientists in the environmental and engineering industries, oil and gas exploration or government service, teaching, or for continued studies toward a Ph.D. A particularly beneficial aspect of the M.S. program is the opportunity for students to integrate studies in geology, geophysics, and environmental subjects.
Research in the Department covers a broad range of topics, including:
coastal and estuarine processes, sediment transport, earthquake and
exploration seismology, geomorphology, structural geology and tectonics,
isotope geochemistry and geochronology, global change geochemistry,
groundwater hydrology, sedimentology, biogeochemistry, and environmental
geology and geophysics.

The Department offers financial aid in the form of Teaching and Research
Assistantships.

A summary of the requirements and additional information for graduate
students can be found in the Graduate Student Regulations and Procedures
Handbook (updated annually) on the department website.

Application

Applicants to the Master of Science degree program generally fall into one
of the following categories: (1) students well-prepared in geology or
geophysics with courses in mathematics, physics, chemistry, and/or biology
who are interested in broadening their experience at the M.S. degree level
before employment or doctoral studies elsewhere; (2) students well-
prepared in mathematics or one of the natural sciences other than geology
or geophysics and who wish to use the M.S. degree program to transfer into
the earth sciences.

In addition to the normal application forms, applicants should submit
transcripts, letters of recommendation, a personal statement of the
strengths and weaknesses of their undergraduate education (including
course and non-course experience), and their graduate study interests and
current post-degree plans. Graduate Record Exam (general) scores are
required. Applications from those applying for financial aid and
assistantships for September should be completed by January 10, our recommended application target date. Later applications will be considered for financial aid if funding is available. Such applications may be made at any time, but, to be assured of consideration for September admission, they should be received by May 1.

M.S. Degree Requirements

No fixed curriculum is prescribed for the M.S. degree. Instead, a course and research program that is consistent with the student’s background and professional objectives are developed by the student and his or her faculty advisory committee. The graduate program assumes a basic undergraduate foundation in the geosciences. Students lacking such a background may be required to complete certain subjects at the undergraduate level before or during their graduate program. Master’s candidates in either Geology or Geophysics must complete or have completed two-semester (or equivalent) courses in physics or chemistry, and a two-semester, college-level calculus course.

A minimum of ten graduate-level courses, (numbered 3000 or above), approved by the student’s faculty advisory committee, must be completed in addition to a research thesis for graduation. Graduate level multidisciplinary Earth Systems Seminars are offered annually by the Department on different topics. Beginning graduate students are required to take the Earth Systems Seminar. A maximum of two thesis courses (EESC8801) are allowed for M.S. thesis credit. Normally, no more than one Reading and Research course (EESC7798 or EESC7799) may be applied toward the minimum course requirement. All students are required to maintain at least a 3.0 average in their graduate courses, as well as in all undergraduate courses in the other sciences and mathematics. Passing a comprehensive
oral examination is required of each student. A research thesis approved by two faculty members is also required of all M.S. students.

**Dual Degree Program (M.S.-M.B.A.)**

In conjunction with the Carroll Graduate School of Management at Boston College, the Department of Earth and Environmental Sciences offers interested students the opportunity to participate in the combined M.S.-M.B.A. degree program. Completion of this program leads to the awarding of both degrees. This program is excellent preparation for careers in industrial or financial geoscience management, including areas such as the environmental and petroleum industries, natural hazard assessment, and natural resource evaluation and investment.

The combined M.S.-M.B.A. program normally takes three years for students with a good science background as an undergraduate—about one year less than pursuing these two degrees independently. Students in this program commonly take their first year entirely within the Department of Earth and Environmental Sciences. During the first summer, the student is expected to begin work on a research M.S. thesis that may be combined with an off-campus internship. The second year of the program is taken at the Carroll Graduate School of Management and the third year is split between both programs. Corporate internships are encouraged.

In applying to the program, students have two options. The first and most desirable option is for the student to apply directly to, and be accepted by, both the Graduate School of the Morrissey College of Arts and Sciences and the Carroll Graduate School of Management at the time of their initial application to Boston College. The GRE is required and GMAT tests may be requested. Students may contact the Department of Earth and Environmental Sciences for information and application materials to both
programs (indicate that you are interested in the Dual Degree Program). The deadline for admission to the Department of Earth and Environmental Sciences is January 10 for consideration for financial aid and assistantships, the same as the deadline for M.S. candidates. Applications to the Carroll Graduate School of Management are accepted on a rolling basis.

The second option is for students to apply and be accepted to the M.S. program in the Department of Earth and Environmental Sciences. During the spring of their first year, after consultation with their academic advisor, the student may then choose to apply to the Carroll Graduate School of Management for admission into the dual degree M.S.-M.B.A. program.

Further information on this program and application materials may be obtained from the Department of Earth and Environmental Sciences, Boston College, Chestnut Hill, MA 02467, 617-552-3640, or from Graduate Admissions, Carroll Graduate School of Management, Boston College, Chestnut Hill, MA 02467, 617-552-3920.

**Master of Science in Teaching**

The Master of Science in Teaching (M.S.T.) program is administered through the Lynch School of Education in cooperation with the Department of Earth and Environmental Sciences. It requires admission to both the Lynch School of Education and the Department of Earth and Environmental Sciences. This program, which is designed for prospective teachers, acknowledges variations in prior background and skills.

**M.S.T. Degree Requirements**
The five required courses in the earth sciences include Exploring the Earth and Earth Materials, and the following: (1) No more than four credits from Weather, Climate, and the Environment, Oceanography, or Astronomy; and (2) Eight credits from Petrology, Structural Geology or Advanced Structural Geology, Environmental Geology, Environmental Chemistry, Introduction to Geophysics or graduate courses (numbered 3000 or above). Students who have previously taken these courses may substitute other graduate courses within the Department of Earth and Environmental Sciences, with approval. One semester of full-time residency may be necessary. A comprehensive examination is given to each student at the end of the program. This examination is in two parts—one part is oral in the earth sciences, and the other part is given by the Lynch School of Education.

**Cooperative Program**

The Department is part of a cooperative program with the Department of Earth Sciences at nearby Boston University, as well as the Civil Engineering Department at Tufts University. This program permits degree candidates at Boston College to enroll in courses that are unavailable at Boston College but are available at Boston University or Tufts.

**Weston Observatory**

Weston Observatory is a geophysical research and science education center of the Department of Earth and Environmental Sciences at Boston College. It is located in Weston, Massachusetts about 10 miles west of BC’s Chestnut Hill campus. The Observatory, which has been recording earthquakes since the 1930s, conducts basic research on earthquakes and related processes, provides public information after significant earthquakes occur, contributes to earthquake awareness to help reduce the tragic effects of earthquakes, and educates future generations of geophysicists.
geologists, environmental geoscientists and scientifically literate citizens. Seismic monitoring at Weston Observatory is part of a consortium of institutions that operate networks of seismographs throughout the Northeast United States and around the world. The facilities at Weston Observatory offer students a unique opportunity to work on research projects in geophysics and related research areas. For more information, visit the Observatory website: www.bc.edu/westonobservatory.

Office of Student Services
Lyons Hall 103
The graduate program in economics is designed for full-time students who are seeking a Ph.D. The program trains economists for careers in teaching, research, and the private sector by providing strong backgrounds in economic theory, quantitative research methods, and applied fields. Requirements include course work, comprehensive examinations, a thesis, and a one-year residence requirement. The course requirements consist of a first-year core curriculum and eight electives, for a total of 48 credits. The first-year program consists of core courses in Micro Theory (ECON7740–7741), Macro Theory (ECON7750–7751), Mathematics for Economists (ECON7720), Statistics (ECON7770), and Econometric Methods (ECON7772). The second year is devoted to electives. In addition to the Department’s own electives, students may take courses in the Carroll School of Management’s Ph.D. program in Finance. All courses accepted for the degree are worth three credits, with the exception of the spring courses taken in the second semester of the first year: ECON7741, ECON7751, and ECON7772. These three courses are each worth four credits.

Students are required to pass written comprehensive examinations in micro theory, macro theory, and in two of the following fields: econometrics, economic development, industrial organization, international economics,
international finance and macroeconomics, labor economics, advanced macro and monetary economics, public sector economics, advanced micro theory, and finance. Most exams are based on a two-course sequence on the subject matter. The micro and macro theory comprehensives are offered twice each year in late May and late August. Students take them immediately after the first year and begin to write field comprehensives at the end of the second year.

All students accepted to the program are offered financial aid including tuition remission. Students can expect continued financial support for five years as long as they meet all conditions and achieve satisfactory progress toward the Ph.D. More information about the Ph.D. program and financial aid opportunities can be found at the graduate program menu option at www.bc.edu/economics.

Admission Information

An online application for your convenience is located at the Graduate School of the Morrissey College of Arts and Sciences Admission website. Any questions regarding admission requirements should be directed to gsasinfo@bc.edu. For further information regarding the Ph.D. program, please contact Gail Sullivan at gail.sullivan@bc.edu.

English, Graduate Programs - University Catalog

Master of Arts Program

The Master of Arts in English degree is intended for students who wish to extend and consolidate their knowledge of the field before moving on to work at the Ph.D. level and for students aiming at careers in secondary education, publishing, or related fields that require advanced skills in critical thinking, research, and writing. Candidates pursuing the M.A. degree will be expected to complete courses granting at least 30 hours of graduate credit. Three of these course credits must be in a theory course (ordinarily thought of as a course primarily concerned with the study of texts in literary and/or cultural theory) from among the Department’s regular offerings, and three must be in the Introduction to Advanced Research course (or its equivalent). Students may devote up to six of the required 30 credits to independent work under the supervision of Department faculty, resulting in one or more longer papers. Students wishing to pursue this option should consult with the Program Director early in their graduate careers.

Students must also pass two examinations—a language and a comprehensive examination. The comprehensive exam requires students to demonstrate knowledge about literary periodization and to use close-reading skills. It is three hours in length, is offered in December and May, and must be taken no later than the fall semester of the second year of study.
The language exam is offered at the same time as the comprehensive examination and may be taken at any point in the student’s program. A wide range of languages will be accommodated for this requirement, and it may be waived if (1) the candidate supplies an undergraduate transcript showing two courses beyond beginning level in a foreign language with grades of B or above (taken within three years of entering the M.A. program), (2) the candidate successfully completes a 12-week intensive language course administered by the Graduate School of the Morrissey College of Arts and Sciences at Boston College, or its equivalent, or (3) the candidate has native-level proficiency and completed a university degree using that language.

**Master of Arts Concentration in Irish Literature and Culture**

The Master of Arts in Irish Literature and Culture degree offers English Department candidates the opportunity to design an interdisciplinary course of study drawing from a wide range of fields, including literature, Irish language, history, women’s studies, American studies, fine arts, music, and cultural studies. Candidates seeking the degree must fulfill the course requirements of 30 credits within two years. At least 12 of these must be in Irish literature courses in the English Department, an additional three in an Irish Studies course offered by another University department, and at least six in Irish language. Remaining credits are taken as electives. To complete the degree candidates must pass an oral examination focusing on a specific period, genre, or theme they have chosen in consultation with members of the Irish Studies faculty. Students interested in pursuing the concentration in Irish Literature and Culture should register with Marjorie Howes at the beginning of their second year.

English faculty offering graduate courses in Irish Studies include Professors Marjorie Howes, Joseph Nugent, and James Smith. In addition, the
distinguished visiting scholar holding the Burns Library Chair in Irish Studies will teach graduate courses in the program. For further information about the Irish Studies Program, please see the website at www.bc.edu/irish.

**Master of Arts in Teaching**

The Master of Arts in Teaching (M.A.T.) degree is administered through the Lynch School of Education and Human Development in cooperation with the Department of English. It requires admission to both the Lynch School of Education and Human Development and to the Department of English. Course requirements vary depending upon the candidate’s prior teaching experience; however, all master’s programs leading to certification in secondary education include practical experiences in addition to course work. Students seeking certification in Massachusetts are required to pass the Massachusetts Educators Certification Test. For further information on the M.A.T., please refer to Master’s Programs in Secondary Teaching in the Lynch School of Education and Human Development section of the University Catalog or call the Lynch School’s Office of Graduate Admissions at 617-552-4214.

**Graduate Assistantships and Teaching Fellowships**

Students in the first year of the M.A. program are eligible to receive financial aid in the form of tuition remission. Second year students are eligible for Teaching Fellowships and Teaching Assistantships conferring a stipend.

**Doctor of Philosophy Program**

Normally, no more than four students will be admitted to the doctoral program each year (one additional student is sometimes admitted on an Irish Studies fellowship, and there is additional support for diversity
candidates and other exceptional students). The small number of students makes a flexible program possible, individually shaped to suit the interests and needs of each student.

All students accepted into the program receive stipends and tuition remission. Fellowships are renewed for five years as long as the student is making satisfactory progress toward completion of requirements for the degree.

**Course Requirements**

Three doctoral seminars are to be taken in consecutive semesters over the first two years of the program. The remainder of the student’s program may include other graduate courses in the English Department or related disciplines, small reading groups, or individual tutorials shaped around the candidate’s preparation for examinations. Ideally, students will have taken four to six courses in addition to the doctoral seminars by the end of the second year. A student-initiated pedagogy colloquium accompanies student teaching, and an advanced professionalization colloquium is taken in the third or fourth year.

**Language Requirement**

Students must demonstrate an ability to read two foreign languages or a working knowledge and application of one foreign language and its literature. The first alternative requires successful performance on two translation examinations in which a short text must be translated adequately (with use of a dictionary) in two hours. The second involves submitting a paper in which knowledge of the foreign language is used to work out a literary question or translating a substantial critical or literary text currently unavailable in English. Commonly, enrollment in language courses or in
graduate electives on translation accompanies the completion of the assignment.

Examinations

Each student will direct a course of study toward completion of three examinations—a minor field exam by the end of the second year, a major field exam, and a dissertation prospectus exam.

The minor field examination normally runs one and one-half hours and may focus on an author, historical period, theoretical field, or genre. The major field examination is broader in scope and consists of a two-hour oral examination usually on a period or genre. The dissertation prospectus exam, two and one-half hours long, explores a topical area in which the dissertation is likely to take place. All examinations are graded according to the university scale for graduate examinations.

Prospectus, Dissertation, and Defense

After completing the dissertation prospectus exam, the student writes a prospectus in consultation with his or her dissertation director describing the dissertation topic and including a working bibliography. This prospectus will then be submitted to two additional faculty members who will also approve it. All dissertation committees will have at least three faculty readers (under special circumstances, a faculty member from outside BC may sit on the committee). Submission of the dissertation will be followed by an oral defense. Students are responsible for acquainting themselves with all university requirements, fees, and deadlines pertinent to dissertation submission and graduation. This information can be obtained from the English Department office or from the Graduate School of the Morrissey College of Arts and Sciences Dean’s office.
Teaching

As part of their program, Ph.D. students engage in a carefully organized sequence of teaching experiences. In the second year, students spend one semester assisting in a course taught by a faculty member. In the third and fourth years, students teach four independently taught courses—at least one semester of First-Year Writing Seminar, a self-designed elective in the student’s own field, and two more courses selected to provide the best range of teaching experience for each individual student. Faculty mentoring is a part of every phase of this program.

Graduate Colloquium

A student committee composed of M.A. and Ph.D. candidates organizes and schedules graduate colloquia, at which faculty members, outside speakers, or students lead discussions on literary topics. In alternate years, the spring colloquium will be a full-day graduate conference. All graduate students and faculty are strongly encouraged to attend.

Good Standing

Candidates for the degree are expected to remain in good standing in accordance with department guidelines set out for the timely completion of the degree. Continued financial support and participation in the program depends on maintaining good standing.

Managed By

University Catalog
Office of Student Services
History, Graduate Programs - University Catalog

Boston College's History Department attracts talented graduate students from around the nation and around the world. We offer M.A. and Ph.D. degrees with training in a number of regional and thematic specialties. For the master’s degree in teaching (M.A.T.) program administered by the Lynch School of Education see M.A. Programs on the next page.

Doctor of Philosophy in History

The Ph.D. degree is offered with concentrations in United States, medieval, early modern European, modern European (including British/Irish/British Empire), and Asian history. The department also offers course work in African, Middle Eastern, and Latin American history, as well as a number of global and comparative fields, including imperial history, the history of the Atlantic world, religious history, and international history. During the first semester of full-time study, doctoral students choose a faculty advisor, who oversees the student’s progress in preparing for comprehensive exams and in developing a dissertation topic.

The Ph.D. is a research degree and requires special commitment and skills. While the degree is not granted for routine adherence to certain regulations, or for the successful completion of a specified number of courses, there are certain basic requirements.
Course and Residency Requirements: Students entering directly into the Ph.D. program are required to complete 39 credits, 36 of which are taken prior to comprehensive exams. All students in the Ph.D. program are required to pursue two semesters of full-time study during the first year and must, in the course of their studies, complete at least two seminars and at least two colloquia (one in the major and one in a minor area).

Plan of Study: By the conclusion of the first semester, and after full consultation with their professors and the Director of Graduate Studies, students file a plan of study leading to the comprehensive examination. This plan of study consists of three areas of concentration. Usually faculty require that students take at least some formal coursework in each field and expect students to develop and master a reading list of important books and articles. With the approval of the advisor and the Director of Graduate Studies students may select a discipline related to History or a topic within that cuts across traditional geographical or chronological boundaries. When considered necessary to a student’s program, the department may require advanced-level work in a related discipline, either as a minor field or as supplemental work. This plan of study may be reviewed, evaluated and revised whenever necessary. However, changes must be approved by the faculty advisor and the Director of Graduate Studies.

Language Requirement: Ph.D. candidates, with the exception of medievalists, must pass two language exams. Students concentrating in United States history may substitute competency in a field of particular methodological or theoretical relevance to their program of study for competency in a second foreign language. To do so, students must petition the Graduate Committee for the substitution and explain the nature of the field and its importance to the plan of study, particularly the dissertation. The student’s faculty advisor certifies that the student has acquired the
appropriate skills and knowledge. Medievalists must pass three language exams, one of which must be Latin or Greek.

*The Comprehensive Exam:* The student’s oral comprehensive examination will be conducted by an examining board composed of three faculty members. A written examination may be substituted for an oral exam at the joint discretion of the student and the student’s committee.

*The Dissertation:* Students must have a dissertation topic before taking and passing comprehensive exams. The last six credits earned for the degree, taken after the comprehensive exams, will be focused explicitly on the dissertation. These should include the Dissertation Seminar. Dissertation proposals, written in the Dissertation Seminar, must be approved by the student’s dissertation committee, consisting of three faculty, one of them designated as advisor. Proposals must be completed by the end of the semester following the passing of comprehensive exams and filed with the department. The completed dissertation must be approved by a committee of three readers—the faculty advisor and two other faculty members—and approved by the Director of Graduate Studies. It must also be defended at a public oral defense.

**Master of Arts Programs**

The M.A. degree in History is offered with concentrations in early modern European, Latin American, medieval, modern European (encompassing British, Irish, and continental European), international and global history, and United States history. The department also offers coursework in African, Middle Eastern, and Asian history. The Master of Arts in Teaching (M.A.T.) program for secondary school History teachers is administered by the Lynch School of Education. It requires admission to both the Lynch School of Education and to the Department of History. For further
information on the M.A.T., please refer to the LSOE section on Master’s Programs in Secondary Teaching or call the Lynch School of Education, Graduate Admissions Office, at (617) 552-4214.

Requirements: The M.A. degree in History requires 30 graduate credits, a distribution requirement for each particular program, and an oral comprehensive examination. Students are not allowed to complete the M.A. program by attending only summer sessions, but are required to take a total of at least four courses (12 credits) during the regular academic year.

Plan of Study: All candidates for the M.A. in History are encouraged to pursue an individual course of study developed in conjunction with their faculty advisor and selected by the student during the first year in the program. In making their selection of courses and seminars, students are urged to widen their chronological and cultural horizons while deepening and specifying one special area of concentration.

Students must choose a major and minor field. As many as seven courses (21 credits) can be taken in the major field. Major fields for the M.A. include early modern European, Latin American, medieval, modern European (encompassing British, Irish, and continental European), and United States history.

The minor field is made up of a minimum of three courses (nine credits), at least one of which must be a graduate level course. Minor fields can be chosen from the same list of major fields or can be more conceptual or historiographical. Such fields, for example, could include a field in economic, social, or labor history; or could concern race or gender. We now offer a minor field in archival management or cultural heritage/public history, in cooperation with the Simmons College Graduate School of Library and
Information Science (see our website for further information). Minor fields must be approved by the Director of Graduate Studies.

Students whose prior academic preparation warrants an exception to the above requirements may, with the consent of their faculty advisor, request permission to substitute a different proportion or variety of courses and areas than those generally required. The opportunity for study in a major or minor area is open to the extent that the department offers sufficient courses in the student’s area of interest.

Students may study in departments outside History, and, with the permission of the Graduate Committee, a candidate whose advisor so recommends may earn as many as six credits in Classics, Economics, English, Political Science, Sociology, or other related disciplines. Graduate credits earned in a related discipline will be included in the distribution requirements for the appropriate area.

In addition to the general requirements for the M.A. degree, students in the History program are required to complete a seminar in their major area.

Language Requirement: Master’s candidates must pass a foreign language reading examination, ordinarily in French, German, or Spanish. Another foreign language, when relevant to the research of the student, may be substituted with permission of the Graduate Committee.

Exam and Thesis: Students must take an oral comprehensive examination administered by the student’s advisor and one additional faculty member from the minor area. Students planning to pursue a career in teaching may choose an alternative, teaching-focused comprehensive exam. This would require the student to present and defend a portfolio before their faculty advisor and a professor from the minor field. The portfolio would include,
but not be limited to, a substantial research paper in the major field; two original syllabi designed for courses, one in the major and one in the minor field; and historiographical essays on both the major and minor fields.

Students may complete the Master’s degree with or without a thesis. Those wishing to write a thesis should complete all of the other requirements for the degree and then request permission. The thesis counts for six credits and must be approved by the candidate’s faculty advisor.

Applications to the M.A. and Ph.D. Programs

The deadline for applications to the Ph.D. programs in history is January 2 and the deadline for applications to the M.A. program is February 1. Ph.D. and M.A. applicants must submit GRE general scores (the GRE in History is not required), official undergraduate and graduate transcripts, at least three letters of recommendation, a statement of purpose emphasizing intellectual interests, a writing sample (a paper written for a recent course or one written expressly for the application), and all the application forms.

Funding

The History Department has a highly competitive Ph.D. program, but one which guarantees five years of funding to all incoming Ph.D. students contingent upon satisfactory academic performance and progress towards the degree, as well as satisfactory performance in teaching as evaluated by the faculty of the Department of History.

Students interested in the Doctoral or Master’s programs should write to:

Director of Graduate Studies
History Department

Office of Student Services
Lyons Hall 103
The graduate program in Middle Eastern Studies offers an interdepartmental, interdisciplinary curriculum designed for students who wish to acquire a broad background in Middle Eastern history, cultures, and politics. The program seeks to prepare candidates for a variety of post-graduate opportunities in diplomacy, human rights, government and public service, business, media, non-governmental organizations, and cultural institutions in the United States and abroad. Master's students contribute to the intellectual life of the Boston College community and are encouraged to participate in colloquia and conversations across the University.

The master's program in Middle Eastern Studies (MES) offers two areas of focus: (1) Politics and International Relations and (2) Religion, Culture, and Society. Students have considerable flexibility in designing their programs of study and have access to the resources of all relevant departments, such as Art, Art History, and Film, Music, History, Near Eastern Languages and Literatures, Political Science, Theology, and other departments of the University. In addition to the wide range of courses offered within the MES program, students have the opportunity to utilize the resources of the outstanding network of scholars in the Boston area, including those of our Boston Area Consortium partners at Boston University, Tufts University, and Brandeis University.
The Middle Eastern Studies program admits about 10 students a year, a number small enough to allow for personal attention, close contacts with the faculty, and an environment of collegiality, as well as small class size. Graduate students are encouraged to attend extra-curricular events, such as our Distinguished Lecture Series, alumni networking workshops, and informal discussions. Program faculty, with the assistance of the Office of International Programs, will direct students toward opportunities for language immersion, internships abroad, and other invaluable opportunities for professional development outside the classroom.

Mathematics, Graduate Programs - University Catalog

BOSTON COLLEGE

The Department of Mathematics offers programs leading to: (1) the Doctor of Philosophy (Ph.D.) degree in mathematics; to (2) the Master of Science in Teaching (M.S.T.) degree in education, in conjunction with the Lynch School of Education and Human Development.

Ph.D. Degree Requirements

The requirements for the Ph.D. fall into five categories: coursework, examinations (Preliminary, Language and Comprehensive), teaching, a dissertation, and a residency requirement of two consecutive semesters with full-time registration.

Coursework: Students must complete at least 50 credit hours at the graduate level, including the first-year core curriculum, and receive a grade of B- or higher in at least 44 of these. The first-year program consists of core courses in Algebra (MATH8806, MATH8807), Geometry/Topology (MATH8808, MATH8809), Real Analysis (MATH8810), Complex Analysis (MATH8811), Graduate Teaching Seminar (MATH8890), and Graduate Research Seminar (MATH8892). The second year is devoted to electives. Students with prior comparable coursework may be exempted from one or more of the first-year graduate courses, upon approval of the Assistant Chair for Graduate Programs. Up to 18 credit hours of the coursework
requirement may be waived for students with prior graduate work, upon approval of the Assistant Chair for Graduate Programs.

Examinations: There are three types of examinations: Preliminary, Language, and Comprehensive.

Preliminary: All students must take preliminary exams in two of the three following subjects: Real and Complex Analysis; Algebra; Geometry and Topology. These exams cover the material in the core first-year courses and are typically taken at the end of May following the first year. They may also be taken at the start of the academic year and in mid-year. Preliminary exams are graded as follows: Ph.D. pass, M.A. pass, or fail. Students are strongly encouraged to complete two preliminary examinations at the Ph.D. pass level by the start of their second year. The following two rules apply: (1) Students may re-take each preliminary exam once. (2) Students must pass two preliminary examinations at the Ph.D. pass level by the middle of their second year in order to continue in the program after their second year. Exceptions to these two rules require the approval of the Chair, who will consult the Assistant Chair for Graduate Programs and the student’s instructors before arriving at a decision. Exceptions will be granted when there is clear evidence of potential to complete a degree in a timely way or for special circumstances such as extended illness. A student with advanced preparation may choose to take one or more of the preliminary examinations immediately upon entering Boston College. In such a case, the examination would not count as one of the student’s two attempts, and failure of the examination would have no negative consequences. Students who wish to take an examination upon entrance should notify the Assistant Chair for Graduate Programs in writing by mid-July that they intend to do so.
Language: This exam consists of translating mathematics from French or German into English. The student will select, in consultation with a faculty member, a book or substantial article in the chosen language and will be asked to translate passages from it with the aid of a dictionary.

Doctoral Comprehensive: After passing the preliminary exams at the Ph.D. level, the student requests that a department faculty member (tenured or tenure-track) serves as his/her research advisor. Upon agreement of the faculty member, the student, in consultation with the research advisor, forms a Comprehensive Examination Committee, consisting of the research advisor and at least two other members. Two members must be from Boston College; the chair must be a tenured or tenure-track member of the departmental faculty. Committee composition is subject to departmental approval. The comprehensive exam can be taken any time after the Comprehensive Examination Committee has been chosen. We recommend that it be taken as soon as possible, to allow time for dissertation research. The doctoral comprehensive exam consists of a research topic and one secondary topic, chosen by the student in consultation with the student’s Committee. Typically, these are based on topics courses or independent study completed by the student in the second and third years. The comprehensive exam has both a written and an oral component. In the written part the student is given a week to solve problems or answer questions in the chosen areas. The Committee then reads the student’s work and questions the student about it in the oral exam, which may range into related areas. After the oral exam the Committee grades the entire comprehensive exam as Pass with Distinction, Pass, or Fail. A student who fails the comprehensive exam may take it one additional time but not sooner than the following semester.

Teaching: In addition to their responsibilities as teaching assistants and teaching fellows, students participate in the required Graduate Teaching
Seminar in the fall semester of their first two years. The first-year teaching seminar is for teaching assistants, covering their responsibilities both to their students and their supervisors and providing guidance on leading a classroom for the first time. The second-year teaching seminar is for teaching fellows, providing guidance for teaching their own classes.

Dissertation: Upon satisfactory performance on the Language and Doctoral Comprehensive Examinations, the student is eligible to be admitted to candidacy for the Ph.D. To be admitted, the student formally constitutes a Dissertation Committee which is then approved by the Assistant Chair for Graduate Programs. The Comprehensive Examination Committee will typically become the student's Dissertation Committee; any changes of membership require the department’s approval. At this point the student begins research for the doctoral dissertation. The dissertation must consist of original scholarly work. The Dissertation Committee will read and evaluate the completed dissertation and conduct an oral examination, at which the dissertation is defended in a public meeting. The dissertation is accepted when endorsed on the official title page by the Dissertation Committee after the oral examination. After ensuring that the format of the accepted dissertation conforms to Boston College requirements, the student submits the dissertation to the University.

Qualified students accepted to the program are offered financial aid stipends and tuition remission. It is anticipated that support will be provided for five years of study, given reasonable progress toward the degree and acceptable performance of Teaching Assistant/Fellow duties.

More information about the Ph.D. program can be found at the graduate program menu option at [www.bc.edu/math](http://www.bc.edu/math).

**Master of Arts Degree**
Students enrolled in the Ph.D. program who receive at least an M.A. pass in two of the three preliminary exams and pass at least 30 credits of mathematics graduate courses, including at least five semesters of the first-year graduate courses in Real and Complex Analysis, Algebra, and Geometry/Topology, will receive an M.A. degree. Advanced undergraduate courses may count towards the 30 credits in meeting the M.A. requirements with the permission of the Assistant Chair for Graduate Programs. Students who skip a first-year course because of advanced preparation may substitute more advanced courses in any area, with the permission of the Assistant Chair for Graduate Programs. A student may receive an M.A. and continue on to a Ph.D. provided the student meets the Ph.D. requirements above.

Master of Science in Teaching Program

The Master of Science in Teaching (M.S.T.) program is administered through the Lynch School of Education and Human Development in cooperation with the Department of Mathematics. Application for the program is made to the Lynch School, and students must be accepted by the Lynch School and approved by the Department of Mathematics.

This program is designed either for experienced teachers or for prospective teachers. It is a two-year program that consists of 46 credits, of which 31 are in Education and 15 are in Mathematics. All master’s programs leading to certification in secondary education include practical experiences in addition to coursework. Students seeking certification in Massachusetts are required to pass the Massachusetts Educators Certification Test. Degree candidates draw up an overall plan of study with joint advisement from the Assistant Chair for Graduate Programs in Mathematics and the advisor for the M.S.T. program in the Lynch School. For further information on the M.S.T., refer to the Master’s Programs in Secondary Teaching in the Lynch
School section of the University Catalog or call the Office of Graduate Admissions, Lynch School, at 617-552-4214.

Of the 15 credits which comprise the mathematics component of the M.S.T., candidates are required to complete MATH8810–8811 Real and Complex Analysis, which should be completed in the first year. The other credits must be earned in MATH courses at or above the 4000-level. Because of certification requirements, unless approved equivalents have been taken previously, these required courses should include the following:

- MATH4451 Euclidean and Non-Euclidean Geometry
- MATH4426–4427 Probability and Mathematical Statistics

Some exposure to the use of computers in mathematics that may be accomplished by any Computer Science major course beyond Computer Science I.

Other courses particularly well-suited for this program are MATH4430 Number Theory and MATH4475 History of Mathematics. M.S.T. candidates must also pass an oral comprehensive examination and submit a brief expository paper in some area of mathematics.

University Catalog
Office of Student Services
Lyons Hall 103
Philosophy, Graduate Programs - University Catalog

The Department of Philosophy offers M.A. and Ph.D. programs. These programs provide a strong emphasis on the history of philosophy (ancient, medieval, modern, and contemporary), and a special focus on Continental philosophy from Kant to the present. Faculty also teach and conduct research in metaphysics, philosophy of science, philosophy of religion, ethics, aesthetics, and social and political philosophy. Students have considerable flexibility in designing programs of study and have access to the resources of Political Science, Theology, and other departments. If a desired course is not offered, it may be possible to arrange a Readings and Research course on the desired topic (consult with the appropriate professor). The department also participates in a joint M.A. Program in Philosophy and Theology, and a Law and Philosophy Dual Degree Program (see below).

Admission to the doctoral program is highly selective (about five admitted each year from over 150 applicants). Doctoral studies are funded for five years (four for students who already have an M.A. when they enter the program) in the form of tuition remission, Research Assistantship and Teaching Fellowship, and a University Fellowship in the last year for the writing of the dissertation free of any other duty. Doctoral students are expected to pursue the degree on a full-time basis and to maintain satisfactory progress toward the completion of degree requirements.
The M.A. program may be taken on a full-time (two years) or part-time basis (five years maximum). Financial aid and tuition remission are not normally available for students seeking the M.A.

All applicants must submit the results of the Graduate Record Examination. Students who speak a native language other than English must provide evidence of English proficiency. A score of 100 or higher on the TOEFL iBT test or 7.0 or higher on the IELTS test is required. TOEFL and IELTS scores are considered valid from exams taken a maximum of two years prior to application program deadlines.

For more information on the programs, please consult our website at www.bc.edu/philosophy.

**M.A. Program Requirements**

Requirements for the M.A. are as follows:

- Ten courses (30 credits)
- Proficiency in one foreign language
- Qualifying research paper.

It is possible, though not common, for students to write an M.A. thesis in place of two courses (six credits).

**Ph.D. Program Requirements**

Requirements for the Ph.D. are as follows:

- One year of full-time residence
- Sixteen courses (48 credits)
• Proficiency in logic (tested by course or by examination)
• Proficiency in two foreign languages
• One hour and fifteen minute oral Preliminary comprehensive examination
• Doctoral comprehensive examination
• Dissertation
• Oral defense of the dissertation
• Students entering the program with an M.A. in philosophy may be credited with six courses (18 credits) toward the Ph.D.

The Preliminary comprehensive exam is a one hour and fifteen minute oral examination on a reading list in the history of philosophy, and it is to be taken at the end of the student’s first year. The Doctoral comprehensive exam has two components: writing and oral defense of a qualifying paper; submission and oral defense of a dissertation prospectus. They are to be taken respectively in the first and the second semester of the student’s fourth year (third year, for students entering the program with the M.A. degree in hand).

**Joint M.A. Program in Philosophy and Theology**

This M.A. program is administered jointly between the Philosophy and Theology departments and is structured around distinct concentrations addressing major areas of common concern, such as faith and science, philosophy and religion, foundations in Philosophy and Theology, and Medieval Philosophy and Theology. The degree program has two directors representing each department. Students develop a program of study in discussion with an academic advisor and take courses in the standard graduate programs offered by the Philosophy and Theology departments.

**Law and Philosophy Dual Degree Program**
These programs are designed for students who have an interest in philosophy of law, legal theory and jurisprudence, and who may eventually wish to go into legal practice or teaching in those fields. Students may complete their master’s in philosophy and law degree in four years of joint study or Ph.D. and law degree in seven. Students must apply to both Boston College Law School and master’s or Ph.D. program in Boston College Philosophy Department and be admitted in both.

The Lonergan Institute

Studies related to the work of Jesuit theologian and philosopher Bernard Lonergan (1904–1984) are sponsored by the Lonergan Institute at Boston College. The Institute supports the renowned Lonergan Workshop and other conferences, scholarship assistance, and operates the Lonergan Center, a center for research with an extensive collection of published and unpublished works. For more information, refer to the Research Centers in the About Boston College section of this catalog or to the website: www.bc.edu/lonergan.

Managed By

University Catalog
Office of Student Services
Lyons Hall 103
The Department offers comprehensive programs of study and research leading to the degrees of Doctor of Philosophy (Ph.D.), as well as Master of Science (M.S.) and Master of Science in Teaching (M.S.T.) in conjunction with the Lynch School of Education and Human Development. Courses emphasize a strong foundation in the basic principles of physics, preparing the student to undertake advanced research under the supervision of a faculty advisor. Graduate students are encouraged not only to collaborate closely with their research advisor, but also to draw upon the experience of the entire faculty and other graduate students. Our students are trained primarily to carry out independent research at the Ph.D. level, and our graduates have gone on to successful careers in many areas.

Doctoral Programs

A student enters the doctoral program upon faculty recommendation after passing the Doctoral Comprehensive Examination and the Research Proposal Examination. Upon entering the doctoral program, each student shall select a field of specialization and establish a working relationship with a member of the faculty. With the approval of a faculty member, who normally shall be the principal advisor, the student shall inform the chairperson of his/her major field selection and the chairperson shall appoint a faculty Doctoral Committee consisting of at least two full-time
faculty members to advise and direct the student through the remainder of his or her graduate studies.

Requirements

Required courses for the doctorate are several in the fundamental areas of classical and quantum physics, a graduate seminar, plus four additional courses in distinct areas outside the student’s research specialty chosen from the graduate electives of the department or from other graduate departments with the approval of the chairperson. Two courses in condensed matter physics are strongly recommended as two of these four courses.

Some teaching or equivalent educational experience is required. This requirement may be satisfied by at least one year of service as a teaching assistant or by suitable teaching duties. Arrangements are made with each student for a teaching program best suited to his or her overall program of studies.

Comprehensive Examination

The comprehensive examination is a written exam that covers all of physics that a physics graduate student can be expected to know at the end of one year of formal course work in the curriculum; however, it will stress classical mechanics, electromagnetism, quantum mechanics, and statistical physics. The examination is prepared and administered by a faculty committee, appointed by the Chairperson, and the examination is evaluated by this committee with approval of the faculty of the department.

The examination is offered twice a year, the week before the beginning of each semester. The student must pass one of two possible attempts in
order to continue in the graduate program before the end of their second year. A student, who fails the first attempt, **must** make their second attempt the next time the exam is offered. The **first attempt** would typically be a fall exam taken a week before the beginning of the student’s second fall semester. If unsuccessful, the second try would be a spring exam, one week before the beginning of their second spring semester. Exceptionally well-prepared and qualified students can make the **FIRST Attempt** of the exam either by arriving one week early to take a fall exam or taking a spring exam during their first year. A student choosing to do this who does not pass their first attempt must take the comprehensive examination before the next semester begins.

**Research Proposal Examination**

Within one year of passing the comprehensive examination, a student shall take the Research Proposal Exam (RPE). The purpose of this oral examination is for the student to assimilate work done in an area of research and to define a research project that addresses one or more open important questions in this area. The RPE will be a 40 minute, public presentation followed by 20 minute of questions by the exam committee in private. The proposal should include a detailed explanation for how it proposes to address the open questions and preferably include preliminary results. The topic of the RPE will be chosen by the graduate student’s research advisor and will not necessarily be the student’s ultimate thesis topic. The questions will not be restricted to the RPE topic but will also require the student to demonstrate some breadth. The examination will be evaluated by a committee prepared by the student’s doctoral thesis advisor and will consist of at least two additional department faculty. The student will have at most two opportunities to pass this exam. Those who do not pass the RPE on the first try must make a second attempt within six months of this time. Students will not advance to Ph.D. candidacy without passing
the RPE, and after two unsuccessful attempts will not receive additional TA support from the department.

**Thesis Defense**

Upon the student’s passing performance of the RPE, the Chairperson shall recommend to the dean the appointment of a doctoral thesis committee consisting of the student’s advisor who will chair the committee and at least three tenure track faculty members, with at least two from the physics department. The committee will read and evaluate the completed thesis and conduct an open meeting at which the thesis is defended in an oral examination. The thesis is accepted when endorsed on the official title page by the Doctoral Thesis Committee after the oral examination.

**Admissions Information**

Support for qualified students is available in the form of teaching assistantships. Research assistantships are also available during the summer and academic year, depending on research area and the extent of current funding. Students are required to take the GRE Aptitude Test and Advanced Test and to have the scores submitted as part of their application. Students whose native language is not English must take the TOEFL exam.

**General Information**

Waivers of departmental requirements, if not in violation of graduate school requirements, may be granted by recommendation of the Graduate Affairs Committee with approval of the Chairperson. Students with an advanced level of physics preparation are encouraged to take the Doctoral Comprehensive Examination upon arrival thereby accelerating their progress in the program.
Research Information

The Physics Department is strongly research oriented with faculty involved in both experimental and theoretical areas. The department is one of the strongest in materials and optics research, of both fundamental and applied topics using cutting-edge facilities. Some areas of current interest are in the condensed matter physics areas of superconductivity, photovoltaics, thermoelectrics, nanomaterials, plasmonics, plasmas, topological states, 2D atomic crystals, and other strongly correlated electron systems. Cutting-edge research facilities are available to our graduate students including: Scanning Tunneling Microscopy (STM); thin film growth; Angle Resolved PhotoEmission Spectroscopy (ARPES); Raman and Infrared microscopy; low temperature and high magnetic field Seebeck; thermal and electrical conductivity; Near-Field Scanning Optical Microscopy (NSOM/A-NSOM); x-ray; NMR; materials/nano-materials; (Clean Room) preparation laboratories; graduate and undergraduate computational facilities; and access to the University computing system.

The Department of Physics is constantly enhancing and supplementing these facilities. In addition, the Department has developed strong ties to many outside facilities, including Los Alamos National Laboratory, Argonne National Laboratory, the Institute for Complex Adaptive Matter (ICAM), Brookhaven National Laboratory, the Naval Research Laboratory, and the National High Magnetic Field Laboratory. Boston College’s participation in the Boston Area Graduate School Consortium enables students to cross-register for graduate courses at Boston University, Brandeis University, and Tufts University. Students wishing more detailed information can write to the Physics Department or visit [www.bc.edu/physics](http://www.bc.edu/physics).

Managed By
The department offers advanced study in American Politics, Comparative Politics, International Relations, and Political Philosophy. It displays a distinctive blend of philosophical and practical concerns within a tradition of friendly debate and scholarly exchange. Seminars and courses are supplemented by individual readings and informal gatherings. Both the master’s and doctoral programs are flexible as to fields and courses, and they allow students to study in other Boston College departments. Graduate students in the Graduate School of the Morrissey College of Arts and Sciences are eligible to cross-register for one graduate course per semester during the academic year at Boston University, Tufts University (not at the Fletcher School of Law and Diplomacy) and at Brandeis University with the approval of the Graduate Director or the Master’s Program Director.

Masters of Arts Degree

The master’s program is a two-year program. Students are required to take ten courses (30 credits) with at least one course taken in three of the department’s four fields (American Politics, Comparative Politics, International Politics, and Political Theory). The passing of a written comprehensive examination completes the requirements of the program. A student is allowed to take two or, with permission, three courses in other Boston College departments, and may also receive credit for two courses.
by writing a thesis. If a student chooses to write a thesis, the comprehensive examination is waived. In lieu of a thesis or a comprehensive examination, students also have the option of taking Advanced Directive Study (ADS) with a supervising faculty member. An ADS is a focused final paper project that is based on a paper that a student has already written in a seminar.

**Doctor of Philosophy Degree**

Fourteen courses (42 credits) are required for students entering the program with no previous graduate work. Students generally take three courses a semester. Of the 14 courses, three may be in independent study and two (not more than one a semester) in non-graduate courses. This latter option is usually appropriate only when needed to offset a deficiency in a student’s undergraduate background in a field. Generally, graduate students taking non-graduate courses are required to do additional work beyond the requirements set for undergraduates in those courses.

**Admissions**

An undergraduate major in political science is preferred, but not required. Applicants must demonstrate both past performance of exceptional quality in their academic work and promise of sustained excellence in the future. Three letters of recommendation must be submitted at the time of application, in addition to the transcripts and results of the Graduate Record Examination. The Department requires the general GRE test, a Statement of Purpose, and a sample of scholarly work, such as a term paper.

- Completed applications for the Ph.D. program should be submitted by January 2.
• Completed applications for the M.A. program should be submitted by February 1.

Financial Aid

The Department is usually able to provide financial support to our doctoral students for a period of four to five years, pending satisfactory performance. This financial support to our doctoral students consists of a service stipend and full tuition remission during the period that the doctoral student is funded. The service stipend is compensation for twelve to fifteen hours per week of research assistance or teaching assistance to members of the faculty or teaching assistance in undergraduate courses. Each year the Department also awards a Thomas P. O’Neill, Jr. Fellowship to one student in American politics in honor of the late Speaker of the House.

Lyons Hall 103
Psychology, Graduate Programs - University Catalog

The Psychology Department at Boston College offers two graduate programs, all research-oriented: a doctoral (Ph.D.) program and a Fifth Year M.A. program. Completion of the doctoral program typically requires four to five years of training after the bachelor's degree. Completion of the Fifth Year M.A. program requires one consecutive year beyond the B.A. or B.S.

The Ph.D. program requires that students devote 100 percent of their time and effort to their studies, including summers. Students are admitted whose interests fall within or bridge one or more of our five areas of concentration, listed below. Our program requires adequate preparation, ability, maturity, and motivation to pursue a demanding program of individual research and scholarship. Because of our emphasis on research and on a mentoring relationship with one member of the faculty, a principal criterion for admission to our graduate programs is that a student’s interests be compatible with those of at least one member of the faculty. Each student is admitted to work with a faculty member as his/her advisor.

The Fifth Year M.A. program is limited to students who are majoring in Psychology or Neuroscience at Boston College. The program is designed to allow selected students to earn both a B.A. or B.S. and an M.A. in Psychology in five years. The purpose of the program is to allow students a greater opportunity for concentrated study and research training. Such training is excellent preparation for application to a Ph.D. program in any
area of psychology. Undergraduate Psychology and Neuroscience majors may apply to continue their studies and to earn an M.A. with the equivalent of another, consecutive year of full-time study.

The Psychology Department’s areas of concentration are:

- Behavioral Neuroscience
- Cognitive Neuroscience
- Developmental Psychology
- Quantitative Psychology
- Social Psychology

Visit the department’s website at [www.bc.edu/psychology](http://www.bc.edu/psychology) for additional information on these areas.

**General Information**

Visit the department’s website at [www.bc.edu/psychology](http://www.bc.edu/psychology) and find detailed information about the research interests of individual faculty members, the requirements for completing the program, and the Graduate Program Handbook. For application materials or further information, visit the [Graduate School of the Morrissey College of Arts and Sciences Admission](http://www.bc.edu/psychology) website.

The deadline for applications to the Ph.D. program is December 15. Applications are accepted for fall term admissions only. Applicants should submit:

- Application form
- Official transcripts
- GRE and (optionally) GRE Psychology subject scores
Three letters of recommendation
Statement of research interests
Application Fee

The deadline for applications to the Fifth Year M.A. program is February 1 of the student’s junior year. Applicants should submit:

- Application form
- Official transcripts
- Two letters of recommendation
- Statement of research interests

University Catalog
Office of Student Services
Lyons Hall 103
Romance Languages and Literatures, Graduate Programs - University Catalog

BOSTON COLLEGE

The M.A. Programs

The Department includes the fields of French and Francophone, Italian, and Hispanic (Peninsular and Spanish American) literatures and cultures. The M.A. is granted in French, Hispanic Studies, and Italian. It is designed to prepare students to continue their studies in a Ph.D. program and to develop and strengthen teachers at the secondary school level.

Deadlines and Prerequisites for Admission

The M.A. application is due on February 2. Students applying for admission to graduate degree programs in the Romance literatures must satisfy the following prerequisites: (1) a general coverage of their major literature at the undergraduate level; (2) a formal survey course or a sufficient number of courses more limited in scope; (3) at least four semesters of advanced work in period or general courses in the major literature. There is no GRE requirement for M.A. candidates. For complete information concerning the graduate programs, visit the Master of Arts Degree in French, Hispanic, or Italian Literature and Culture page.
Master of Arts Degree in French, Hispanic, or Italian Literature and Culture

- Thirty-one credits (i.e., ten courses) which includes ten RLL courses and the one-credit Professional and Pedagogical Seminar
- Completion of the Independent Research Project
- Graduate students must take whatever graduate courses are offered in their language section before they will be allowed to take courses in other language sections in the department, outside of the department, or another school within the Graduate Consortium
- In any given semester, if their language section does not offer sufficient graduate courses, students may obtain credit by taking a graduate course in another section of the department or in another Boston College department, or in a graduate seminar taught in the target language at Boston University.
- Graduate students can only earn credit for graduate-level courses (“mixed level” courses open to both graduates and undergraduates are included in this category)
- Distribution Requirement in French: Each French student should endeavor to take at least one course from as many different areas of the curriculum as possible (Early Modern, nineteenth century, twentieth century, Francophone). The fulfillment of the Distribution Requirement is to be overseen and verified by the Faculty Advisor.
- Distribution Requirement in Hispanic Studies: Hispanic Studies students must take a minimum of nine credits in Peninsular Spanish and nine credits in Spanish American Literature
- Distribution Requirement in Italian: Each semester the Italian section faculty offer two 8000-level graduate seminars (and/or 5000-level advanced courses open to graduate students and qualified undergraduates). M.A. students in Italian are required to take both of these 8000-level or 5000-level courses each semester.
- Entering M.A. students in French and Hispanic Studies are strongly encouraged to take FREN7704 Explication de texte, and SPAN9901 Advanced Textual Analysis in Spanish and/or SPAN9904 Topics in Advanced Literary Analysis, respectively, during their first year of graduate study.
- Students wishing to register for Graduate Consortium courses may do so in their second year of study, and must secure permission from their advisor as well as the Graduate Program Director prior to registration.
- Before registering for any and all courses before the start of each new semester, graduate students must have their course selection approved by their advisor, who will sign the appropriate departmental permission form.

**Independent Research Project**

- All M.A. candidates in French, Hispanic Studies, and Italian are required to complete the Independent Research Project (IRP) as part of their degree programs. During the summer between their first and second years, M.A. students write a paper, in the target language, which represents a significant revision or extension of a paper written in a graduate course taken during the first two semesters of study.
- The IRP should be between 20–25 pages in length, including bibliography.
- The IRP deadlines must be strictly adhered to. They are as follows: (1) May 15: IRP topics and outline must be finalized and approved by the IRP director; (2) August 15: first draft of the complete essay must be sent to the IRP director; (3) September 10: no later than this date, students must meet with director to discuss the IRP draft and receive feedback for completion of the final draft; (4) October 10: final draft of the IRP must be submitted to director; (5) November 1: final version of IRP must be submitted to all faculty members in their language section.
• The student who does not meet the November 1 deadline will not be allowed to continue with the IRP and will instead be obliged to take a written, comprehensive exam. This four-hour, Pass/Fail exam will take place in the spring semester (during the week following Spring Break) and will cover all of the student's completed courses.

• Complete information on the Graduate Program is available on the department website: www.bc.edu/rll.

University Catalog
Office of Student Services
Lyons Hall 103
Program Overview

The Department administers three different Master of Arts degree programs — Linguistics, Russian, and Slavic Studies.

A B.A.-M.A. option is available for Boston College undergraduates.

Graduate Admission

For admission to M.A. candidacy in Russian or Slavic Studies, students must be able to demonstrate a working knowledge of the Russian language equivalent at the very least to the proficiency expected at the end of three years (advanced level) of college study. They must also be acquainted with the major facts of Russian literature and history.

Students applying in Linguistics, a program that stresses the interdisciplinary nature of linguistics (i.e., not restricted to Slavic topics), should have a good preparation in languages and some undergraduate level work in linguistics.

Russian, Slavic Studies, and Linguistics programs involve a significant proportion of work in other departments of the University, and candidates in
these areas are expected to meet all prerequisites for such courses and seminars.

Students must also be prepared, in the course of studies, to deal with materials in various languages as required. Students with an undergraduate degree who require preparation for admission to the M.A. program may apply as special students. This mode of application is suited to those who are looking for post-undergraduate courses without enrolling in a formal degree program and for guests from other universities.

Degree Requirements

All M.A. programs require:

- a minimum of thirty credits in prescribed graduate-level course work
- qualifying and special field examinations
- a supervised research paper of publishable quality on an approved topic.

The grades for the qualifying examinations, special-field examinations, and the research paper are reported to the Office of Student Services as a single comprehensive examination grade. Comprehensive examination sectors are in written or oral format, depending on the nature of the subject matter.

The Department has exemption procedures to allow limited substitution of requirements. A student may apply up to six credits of advanced work from other universities or research institutes toward program requirements, provided this work has not been previously applied to an awarded degree.

Course Information
Courses numbered below 3000 do not normally apply for graduate degree credit but are open to interested graduate and special students.

University Catalog
Office of Student Services
Lyons Hall 103
Below is a general description of our M.A. and Ph.D. programs. For more detailed information, see the Guide to Graduate Study on the Resources for Current Students web page.

**Master's Program in Sociology and Social Research**

The M.A. program provides the foundation for advanced graduate level study toward the Ph.D. while also preparing students for careers in the areas of social research, applied sociological analysis, and basic college-level teaching.

*Admissions:* Superior students, regardless of their undergraduate area of specialization, are encouraged to apply. Applicants should submit, in addition to the usual transcripts and letters of reference, a statement of purpose, a writing sample, and any other information that might enhance their candidacy. GREs are required. Apply online at the Graduate School of the Morrissey College of Arts and Sciences Admission website.

*Master’s Degree Requirements:* To receive the master’s degree in Sociology and Social Research, the student must complete 30 credit hours (generally 10 courses). The required courses for all students are the following: a course in methods of social inquiry (SOCY7710) in the first
semester of study, one semester of sociological theory (SOCY7715 or SOCY7716), and two semesters of statistics (e.g., SOCY7703 and SOCY7704). With permission of the Graduate Program Director, students may complete either a Master’s Thesis or a Master’s Paper. Students completing a Thesis or Paper are required to take a course in empirical research (SOCY7711) in the second semester of study and a seminar in writing in their second year (SOCY7761); students not writing a Thesis or Paper are required to take an elective research methods course.

**Doctoral Program**

The Ph.D. program seeks to combine the rigors of scholarly analysis with a commitment to social justice in a wide range of social institutions and settings. It prepares students for careers as researchers and university and college faculty.

*Admissions:* The primary criteria for admission are academic performance and promise of outstanding independent work. Applicants should submit, in addition to the usual transcripts and letters of reference, a statement of purpose, a writing sample, and any other information that might enhance their candidacy. GREs are required. Apply online at the [Graduate School of the Morrissey College of Arts and Sciences Admission](https://www.bc.edu/content/bc-web/academics/sites/university-catalog/graduate/gsmcas/sociology.html) website.

*Ph.D. Degree Requirements:* The doctoral degree is fulfilled by completing a course in methods of social inquiry (SOCY7710) in the first semester of study, two semesters of sociological theory (SOCY7715 and SOCY7716), two semesters of statistics (e.g., SOCY7703 and SOCY7704), an M.A. Thesis or Paper (which entails taking SOCY7711 in the second semester of study and SOCY7761 in the second year of study), plus elective courses (to include at least one additional course in research methods) for a total of 54 credits. Other requirements include meeting a one-year full-time residency
requirement, passing general comprehensive examinations, completing a doctoral dissertation, and passing an oral defense.

Financial Assistance

All candidates accepted to the Ph.D. program who remain in good academic standing are assured of receiving funding for five years (unless they enter with advanced standing due to graduate work completed elsewhere, in which case they will normally be offered support for four years). Financial assistance assumes the form of tuition waivers and living stipends. Stipends are typically tied to work duties, including teaching and research assistantships. No separate applications for financial assistance are necessary.

Office of Student Services
Lyons Hall 103
Boston College offers extensive resources for Catholic and ecumenical study of theology. Embedded in the culturally rich Boston metropolitan area, the combined faculties of the Morrissey College of Arts and Sciences Theology Department and the School of Theology and Ministry make Boston College a premier international center for the study of theology. The library, courses, and faculty resources available to graduate students at Boston College are further expanded by Boston College’s membership in the Boston Theological Interreligious Consortium (BTI), a consortium of theology faculties primarily in the Boston-Newton-Cambridge area, which has as its constituent members the following institutions:

- Boston College’s Department of Theology
- Boston College’s School of Theology and Ministry
- Boston University School of Theology
- Gordon-Conwell Theological Seminary
- Hartford Seminary
- Harvard Divinity School
- Hebrew College
- Holy Cross Greek Orthodox Seminary
- St. John’s Seminary and Theological Institute

This consortium offers complete cross-registration in several hundred courses, the use of library facilities in the nine schools, joint seminars and
programs, and faculty exchange programs.

**Ph.D. Program in Theology**

The doctoral program in theology at Boston College has as its goal the formation of theologians who excel intellectually in the church, the academy, and society. It is confessional in nature and envisions theology as “faith seeking understanding.” Accordingly, the program aims at nourishing a community of faith, scholarly conversation, research, and teaching centered in the study of Christian life and thought, past and present, in ways that contribute to this goal. It recognizes that creative theological discussion and specialized research today require serious and in-depth appropriation of the great philosophical and theological traditions of the past, as well as ecumenical, interdisciplinary, inter-religious, and cross-cultural endeavors.

The program is led by an internationally respected ecumenical faculty. Students are encouraged to explore widely and deeply in a variety of Catholic, Protestant, and Orthodox theological and doctrinal traditions, while also engaging in critical and constructive dialogue with other major religions and cultures.

The program is rigorous in its expectation that students develop a mature grasp of the Christian theological tradition and probe critically the foundations, intelligibility, and relative adequacy of various theological positions. Students are expected to master the tools and techniques of research and to organize and integrate their knowledge in order to make an original contribution to theological discussion. Because the program includes faculty members who are experts in the Hindu, Buddhist, Muslim, and Jewish traditions, it also offers a context in which the issues raised by religious pluralism can be explored, responsibly and in detail, and in which a Christian comparative theology can be pursued seriously.
Successful applicants to the Ph.D. Program will generally have in hand an M.Div., a master’s degree in religion, theology, or philosophy, or an equivalent degree.

**Areas of Specialization**

Students in the doctoral program specialize in one of five major areas: Biblical Studies, Historical Theology/History of Christianity, Systematic Theology, Theological Ethics, or Comparative Theology.

Biblical Studies focuses on the canonical books of the Bible both within their historical and cultural world and in relation to their reception within the Christian and Jewish traditions. All students will acquire a thorough competency in both the Old Testament/Hebrew Bible and the New Testament including competency in Hebrew, Aramaic, and Greek. They may learn other ancient languages and literatures as their research requires and must acquire a reading knowledge of German and either French or Spanish. The comprehensive exams will cover the whole Bible, with emphasis on either the Old Testament/Hebrew Bible or the New Testament, and will include a specialized exam in an area of study pertinent to the student’s dissertation. Students will be expected to pass a general examination on the testament that is not their specialty (which counts as their “minor” area).

The Historical Theology/History of Christianity (HT/HC) area studies past theological reflection on the faith and practice of the Church. The HT/HC area strives to appreciate these theological expressions both within their immediate historical contexts (social, cultural, institutional) and within the broader trajectories of theological development in the Christian tradition. Currently, this area has a strong common interest in early and medieval Christian theology.
**Systematic Theology** is the contemporary intellectual reflection on the content of divine revelation as an interrelated whole. The program fosters the capacity to treat theological material systematically, constructively, and contextually, according to methods that attend to the coherence and interconnectedness of the elements of the Christian tradition, to take responsibility for the tradition’s ongoing development, and to address diverse cultural situations. Special attention is given to the historical development of Christian thought and doctrine, its intellectual cogency, its role and significance within different cultural contexts, its contemporary expressions from different theological perspectives, and newly emergent questions.

**Theological Ethics** includes the ecumenical study of major Christian ethicists and attends to the Biblical foundations, philosophical contributions, socio-political contexts, and theological interpretations of ethics. The program encompasses the historical development of traditions in Christian ethics, including the natural law and virtue ethics. It also includes a strong social ethics component as well as offerings in applied ethics. The exploration of contemporary ethics is set in a critical, historical perspective and encourages attention to the global, multicultural, and public character of the Christian community. Interdisciplinary and intersectional work on contemporary ethical problems is also encouraged.

**Comparative theology** involves faith seeking understanding in constructive dialogue with another religious tradition. Students are expected to acquire significant expertise in a religion other than their own, as well as a solid grounding in a particular area of theology (ethics, biblical studies, historical theology, or systematic theology). Equipped with the methodological tools of the comparative study of religion, as well as a critical self-awareness of theology of religions, students will reflect on a particular theological question or problem in their own religious tradition through constructive engagement.
with analogous ideas or practices in the other tradition. This will prepare them to teach courses in Christian theology and in their non-Christian religious tradition, as well as in interreligious dialogue and comparative theology more generally. As a minor area of study, Comparative Theology may also expand the theological and professional opportunities of students in any other area of the doctoral program.

Language Requirements

Each doctoral student must pass examinations in at least two languages. These test the student’s proficiency in reading languages important for his or her research and must be passed before admission to the comprehensive examinations. Students may take either the departmental translation examinations (offered three times a year) or pass (with a grade of B or better) the 12-week summer intensive language courses offered by the Graduate School of the Morrissey College of Arts and Sciences.

Some areas may require more than a minimum of two languages. For example, students in Systematics are expected to be proficient in Latin as well as two modern languages (normally French and German). Knowledge of various ancient languages may also be required, depending on the student’s dissertation topic. Thus, Greek, Latin, and Hebrew may well be required for students working in the early Christian and/or medieval period. Students in Biblical Studies are expected to demonstrate proficiency in appropriate ancient and modern languages. Students in Comparative Theology are expected to acquire at least an intermediate level of proficiency in a language related to the non-Christian religious tradition they are studying.

Joint M.A. in Philosophy and Theology
If you have questions and interests that lead you into both philosophy and theology, or would like to deepen your understanding of each field by opening it to the other, you might consider pursuing a M.A. in Philosophy and Theology at Boston College.

Drawing on the resources of large major departments and distinguished authorities in each field, and situated at the heart of a prominent Jesuit Catholic university, this program is structured around distinct concentrations that address major areas of common concern to the two fields, and explores their historical, systematic and disciplinary relations. Students develop a program of study in discussion with an academic advisor, and take courses in the standard graduate programs offered by the Philosophy and Theology departments. Concentrations include: Faith, Science and Philosophy; Foundations in Philosophy and Theology; Medieval Philosophy and Theology; and Philosophy and Religions.

This program is designed to address the various interests of students who wish to augment graduate study of philosophy with greater exposure to theology or graduate study of theology with greater exposure to philosophy, consider teaching in private secondary schools, or simply feel in need of intellectual enrichment.

University Catalog  
Office of Student Services  
Lyons Hall 103
School of Theology and Ministry - University Catalog

The Boston College School of Theology and Ministry (STM) is an international theological center that serves the Church’s mission in the world as part of a Catholic and Jesuit university. The school prepares its students for ministries that are as diverse as the composition of the student body—Jesuits and other candidates approved for ordination studies, women and men for lay ecclesial ministries and for service rooted in faith. The STM is committed to the Catholic theological tradition, rigorous academic inquiry, interdisciplinary study, ecumenical and interreligious dialogue, and the engagement of faith and culture. The STM offers graduate programs, including civil and ecclesiastical degrees in theology and ministry that integrate intellectual, spiritual, pastoral, and personal formation and reaches out to larger theological and pastoral communities through STM Crossroads learning resources, the publication of New Testament Abstracts, and timely continuing education programs. For more information, visit the STM website at www.bc.edu/stm.

- Academic Policies and Procedures

Admissions and Financial Aid
Applying to the School of Theology and Ministry is straightforward; however, each program has specific requirements. Be sure to review carefully the requirements for your program of study. Access to the online application can be found through the STM website at [www.bc.edu/stmapply](http://www.bc.edu/stmapply).

**Application Deadlines**

**Fall Admission**

- Ph.D.: January 15
- All other degrees: January 15 (for priority financial aid consideration)

**Summer Admission (M.A. and non-degree programs only)**

- June 15 (for priority financial aid consideration)

**Spring Admission (Except Ph.D. and S.T.D.)**

- December 1 (for priority financial aid consideration)

**Admission Materials**

**Application Form**

The application form to STM must be completed online. In addition to demographic and academic information, applicants should upload their personal statement, resume, and transcripts at the time they submit their application forms.
Applicants are encouraged to submit their application materials as soon as possible and before the posted deadlines. You do not need to wait until you have gathered all of your supporting materials to submit the application form.

Supporting Materials

- **Application Fee**
  A non-refundable fee of $75 is required for every degree and non-degree application submitted. Fee waivers are automatically granted to the following applicants: Jesuits, applicants currently completing a year of service, and current STM students. We do not waive the application fee for other reasons.

- **Personal Statement**
  The personal statement must be uploaded as part of the Application Form. Your statement should be three pages double-spaced and address the following:
  - The academic, professional, and personal development that has motivated you to apply to the STM. Include a sketch of your educational background and interests, any experience you have in ministry and/or religious education, and any other relevant professional and volunteer experience;
  - Your understanding of theological education and/or ministry in the context of the Church’s mission;
  - How you plan to apply your theological education;
  - Given your experience, how you assess your principal strengths for theological education and/or ministry as well as your areas of needed development;
  - For the Ph.D., S.T.D., S.T.L., and Th.M. programs, please provide information outlining your specific area and field of academic interest, a proposed topic(s) for your research and
dissertation/thesis, how your previous academic, professional, and/or pastoral experience has prepared you for studies within that particular field, and the STM faculty member(s) with whom you would like to work;

- **Resume or Curriculum Vitae**
- **Letters of Recommendation**
  Degree applicants are required to submit three recommendations using the online application system. Certificate applicants are required to submit at least one recommendation. Each recommender should be familiar with the applicant’s academic competence. For applicants who have been out of school for a significant amount of time, the recommenders should be familiar with the applicant’s professional competence. For M.Div. and M.A. applicants, one recommender should be familiar with the applicant’s ministerial potential and experience.

- **GRE Scores**
  Scores need to be received directly from ETS. Our GRE code is 2508. All applicants applying to the Ph.D. and S.T.D. degree programs must submit GRE scores—no exceptions will be made. For master’s applicants, the Admissions Office may accept other standardized tests. The admissions committee may also decide to waive this requirement for master’s applicants if they have completed a previous graduate degree.

- **Personal Interview**

  A personal interview is required of master’s applicants. The Admissions Office will contact applicants to set up an interview by Zoom or Skype.

- **Writing Sample**

  A writing sample is required of Ph.D. and S.T.D. applicants only. The writing sample must be uploaded as part of the Application Form. The sample should be an academic paper, usually no less than 10 pages,
not to exceed 25 pages. S.T.D. applicants are also required to submit a copy of their S.T.L. thesis upon its completion.

- **Transcripts**

One copy of each transcript is required from all colleges, universities, seminaries, or theological schools that an applicant has attended. If a college or university will send official transcripts electronically, they can be emailed to [stmadm@bc.edu](mailto:stmadm@bc.edu). Unofficial copies of transcripts may be uploaded by the applicant with the Application Form. If transcripts must be mailed, they can be sent to the address below. If an official transcript is not English, a translation should be provided with the official document. Please alert us if your transcript will be arriving with a different name than the one you are using on your application.

Jesuit Applications

Jesuit scholastic applicants must follow the instructions above. Additionally, international Jesuits should first contact the Assistant Director of Admissions at least five months prior to their planned enrollment to discuss their plans, academic background, and language skills. Jesuits requiring financial assistance should be in touch with the school by February 1, so that names may be submitted to the U.S. Jesuit Conference. After this initial contact, the scholastic’s provincial would write a letter to the rector of the Saint Peter Faber Community. The letter would indicate an intent to mission the student to STM, request housing, and indicate if financial funding is needed. Funding for Jesuits from developing countries is approved by the U.S. Jesuit Conference in Washington D.C., and the request is made by the rector of Saint Peter Faber Community. All Jesuit scholastic applications are reviewed by the Admissions Committee.

In addition, Jesuit applicants are asked to complete a FERPA release form as part of the application process. This form is available on our website and allows us to communicate with the rector of the Saint Peter Faber Community and other religious superiors about your application and, potentially, academic and financial matters while you are a student at Boston College.

Non-Jesuit Religious Applicants

Religious applicants who are not Jesuits must also follow the instructions above. Religious applicants requiring scholarship and parish or convent housing assistance should apply by February 1 for the fall semester. All religious applicants are reviewed by the Admissions Committee. Lastly, if accepted, the Office of Admissions will work with the Office of International
Students and Scholars to process all visa documentation for international applicants.

In addition, non-Jesuit religious applicants are asked to complete a FERPA release form as part of the application process. This form is available on our website and allows us to communicate with your vocation director and/or other religious superiors about your application and, potentially, academic and financial matters while you are a student at Boston College.

**Additional Information**

No materials submitted as part of the application for admission can be returned or forwarded to a third party. The Admissions Committee will not consider an application until it is complete.

The Admissions Committee takes into account all of the material submitted with the application: grade point average (GPA), GRE or other standardized test scores (if applicable), TOEFL (for international students), letters of recommendation, work and/or volunteer experience, and personal statement—where we look for a high level of intellectual, social, and religious maturity.

Acceptance to an STM degree program is not guaranteed and is very competitive. Therefore, estimates of the likelihood of acceptance cannot be given to any applicant.

**Scholarship and Grant Funding**

As an international theological center providing outstanding academic resources and an intimate community for its members, we want to help you finance your studies and make it possible for you to join us. Boston College
School of Theology and Ministry (STM) offers generous funding through several types of financial assistance. When you complete the STM Application, you are automatically considered for all financial assistance for which you may be eligible from the STM.

Tuition scholarships are based on considerations of academic achievement, potential for ministry, demonstrated leadership, and financial need. Funding is generally renewable at the same level in years following the student’s initial award year, assuming the student’s need and academic standing do not change markedly. Prospective students are encouraged to contact the Associate Dean, Enrollment Management for questions regarding the funding of their studies.

**Federal Student Loans**

In addition to scholarship and grant funding, the University participates in the Federal Direct Loan Program. Students can borrow up to the total cost of attendance, minus any funding they are receiving from the STM through the Direct Loan Program. To apply for the Stafford loan, you will need to submit a Free Application for Federal Student Aid (FAFSA), and also complete and submit the Boston College Graduate Financial Aid Application/Validation. Information and forms are available through the Boston College Office of Student Services located in Lyons Hall. Go to [www.bc.edu/gradaid](http://www.bc.edu/gradaid) or call 617-552-3300 for more information. Please note that Federal Stafford loans are only available for U.S. citizens and residents. Please also note that Federal loans are not available to S.T.L. or S.T.D. degree seeking students, certificate seeking students, or non-degree seeking students.

Notification of your funding will occur after a decision is made regarding your admission into the STM.
Please note that if you receive a scholarship after you receive your loan package, your loan package may have to be adjusted. Federal regulations limit the total amount of aid (including student loans) a student can receive. Contact the Boston College Office of Student Services if you have any questions about Federal loans.

**International Student Admission Requirements**

As an international theological center, STM represents the changing landscape of the Catholic Church on the global stage by training priests, lay ministers, and theologians from over forty nations. While we continue to attract and train students from North America and Europe, more and more, the future leadership of the Church is emerging from South America, Africa, India, and Asia. STM is a part of this movement, training some of the first indigenous professors of seminaries, universities, and theological centers in those regions.

We encourage clergy, religious men and women, and lay students from all countries to apply to our programs. Below is important information that you should consider before applying.

**Visa Process**

**When Applying**

Applicants only start securing a visa after they have been accepted to a program. No work on the part of the international applicant needs to be done toward a visa until after they receive a letter of admission, have confirmed intent to enroll, and have proven financial ability for studies. (See next page.)
After Being Accepted

After being accepted, the Admissions Office will send you the Declaration and Certification of Finances form for the I-20 document. Filling out and returning these forms to the STM Admissions Office will start the process of obtaining an F-1, or student, visa to study in the United States, as long as you meet the financial and English language requirements.

International students, who are also Diocesan priests, must obtain priestly Faculties to serve as priests in the Boston Archdiocese. The student’s bishop or major superior must write to the Archbishop of Boston, requesting housing and facilities to function as a priest in the area. A copy of this letter should be sent to STM. Boston College can only issue an I-20, after such facilities have been secured.

Additional Requirements

All applicants for whom English is not their native language must demonstrate proficiency in the English language. This can be demonstrated by an acceptable score on the TOEFL exam (Test of English as a Foreign Language) or by receiving a degree from a college or university at which English is the language of instruction.

An acceptable TOEFL score is 85 on the internet exam. When taking the exam, include STM's institutional code—3971—so that your scores may be sent directly to the school. Students cannot be accepted into any STM program without an acceptable TOEFL score.

TOEFL Registration
CN6152
Princeton, NJ 08541, USA

TOEFL website

The TOEFL score is not required if:

1. You are a citizen of Australia, Canada (except Quebec), Great Britain, Ireland, New Zealand, Guyana, an Anglophone country of Africa, or an English-speaking country of the Caribbean.
2. You earned your prior college or university degree in the U.S. or one of the countries listed above.
3. You are currently enrolled as a full-time student in a U.S. degree-granting program or at an American or English-speaking school in one of the countries listed above and will have completed two academic years of college/university work before beginning your studies at Boston College.

GRE Exam

If you do not already have a graduate degree (a degree beyond the initial first post-secondary degree) you must take the Graduate Record Examination (GRE). All Ph.D. and S.T.D. applicants must submit GRE scores. STM GRE code is 2508.

Educational Testing Service
P.O. Box 6000
Princeton, NJ 08541
www.gre.org

Permission of Superior
All diocesan priests and members of religious orders must submit a letter of approval and financial support from their bishop or major superior. The letter must indicate complete knowledge and support for your studies indicating degree and semester of initial enrollment. The letter must be on official letterhead and signed by your superior or bishop. The letter should be addressed to the Associate Dean, Director of Enrollment Management and must contain contact information.

**Costs**

The United States Government requires all international students to prove that they have the financial means to support themselves while studying in the United States. If you are a member of the clergy or a religious, you need to document by either a bank statement or letter of support from your bishop or congregation that you have funds to live and study in the U.S. The U.S. Embassy will not issue you a visa if you do not have the necessary funds. Any tuition costs not covered by STM scholarship funds must be documented.

**Financial Aid Scholarships**

The cost of higher education in the United States is high. STM awards partial tuition grants to international students, depending on availability, to help ease their financial burden. Students must be enrolled in a degree seeking program. Students must exhibit an exemplary academic record and personal potential. Students should be aware that, even if receiving a tuition grant, they still must obtain support to pay for their living expenses. Unfortunately, Federal loans are not available to those who are not U.S. citizens or permanent residents.
All international students must show that they have sufficient funds or resources to pay for their tuition and living expenses during the course of their studies, whether support comes in the form of scholarships, grants, or support from a religious order or personal bank account. Applicants do not need to supply evidence of sufficient resources with their applications. Once accepted, the admissions office will send a form where one can document resources. No additional funding will be available to international students once they arrive in the United States.

**Housing**

Boston College does not offer on-campus housing for graduate students. International lay students are encouraged to contact the STM admissions office and the Boston College’s Off-Campus Housing Office, if they are interested in learning more about resources to help them locate housing. International diocesan priests and members of religious orders usually find housing with area parishes or religious communities. International religious sisters are encouraged to contact the admissions office if they are in need of housing.

**Graduate Degree Programs**

The School of Theology and Ministry offers graduate students a number of degree-granting programs. Our degree programs prepare students for ministries that are as diverse as the composition of the student body—Jesuits and other candidates approved for ordination studies, women and men for lay ecclesial ministries and for service rooted in faith, and scholars preparing for a career in academia.

**Master of Divinity (M.Div.)**
The School’s most comprehensive program, the three-year M.Div. program offers a course of theological, pastoral, and spiritual formation to prepare students for ordained ministry, professional lay ecclesial ministry, or doctoral studies. M.Div. students at the STM have a demonstrated passion for ministry and service to the world, and often go on to careers in parish ministry, campus ministry, chaplaincy, teaching, and non-profit work.

**Student Learning Outcomes for the M.Div. Program**

Upon completion of the M.Div. Program, students will be able to:

1. Demonstrate an understanding of the Catholic theological tradition.
2. Bring the insights of the Catholic theological tradition into dialogue with contemporary social and religious issues.
3. Integrate theological thinking and ministerial practice.
4. Demonstrate capacities conducive to effective ministry.

**Master of Arts in Theology and Ministry (M.A.)**

The M.A. in Theology and Ministry prepares students for a wide variety of ministries. Designed for students of all ages and career backgrounds, this two-year program (48 credits in the academic year) combines theological study with the pastoral arts. Graduates of the program go on to careers in parish ministry and administration, ministry in Hispanic and/or multicultural communities, campus ministry, religious education, high school religion teaching, spiritual direction, faith-based social service, and hospital chaplaincy, among others.

For the most flexibility, students in the M.A. Theology and Ministry utilize their electives to explore theological and pastoral areas of interest. Those
wishing to do so can choose a specific track in either Hispanic Ministry or Religious Education.

Students can work towards completion of the M.A. Theology and Ministry during the Academic Year, Summer Session, or a combination thereof.

In collaboration with other BC professional schools, the M.A. Theology and Ministry can be combined with an M.S.W., M.B.A., M.A. Counseling Psychology, and M.S. Nursing.

Student Learning Outcomes for the M.A. in Theology and Ministry

Upon completion of the M.A. program, students should be able to:

1. Bring informed theological, biblical, and pastoral resources to interpret and to enhance the life and ministry of faith-based communities and programs of service;
2. Embody the pastoral and spiritual formation that is needed to provide leadership and empowerment to communities of faith through various functions of ministry and service;
3. Develop effective programs of ministry and service that are well grounded in theological and pastoral studies and that enable persons and communities to integrate life and Christian faith in the context of their everyday lives.

Master of Theological Studies (M.T.S.)

The two-year M.T.S. program (48 credits) offers a broad study of theology with the option to specialize in an area of particular interest. With a flexible curriculum and a special focus on scholarship, the M.T.S. is especially
appropriate for students who intend to pursue doctoral studies in theology. The program is also appropriate for students seeking personal reflection and theological development.

**Student Learning Outcomes for the M.T.S. program:**

Upon completion of the M.T.S. program, students should be able to:

1. Demonstrate knowledge of the Bible, its historical contexts and methods of interpretation;
2. Articulate methodologies of moral reasoning in relation to Scripture, Tradition, and experience, demonstrated by literacy in a specific area of interest;
3. Demonstrate knowledge of Christian tradition, articulated in systematic thought on Christology, ecclesiology, or fundamental theology;
4. Demonstrate critical knowledge of the historical development of the Christian church, its institutions, practices and teachings; and
5. Articulate methodologies of pastoral studies and practical theology, and demonstrate a capacity for interdisciplinary and contextual analysis for Christian discipleship.

**Doctor of Philosophy, Theology and Education (Ph.D.)**

The Ph.D. program educates scholars in the interdisciplinary field of religious education. Participants take courses in theology, education, and religious education; faculty members from each of these areas serve on both the comprehensive examination committee and on the dissertation committee. The program is offered in conjunction with the Boston College Theology Department and the Lynch School of Education and Human Development, and the degree is awarded by the Graduate School of the Morrissey College of Arts and Sciences.
Master of Theology (Th.M.)

The Th.M. is a one-year, post-master's degree (24 credits) that is intended to deepen and focus a student's foundational knowledge of theological disciplines and ministerial practice. Th.M. graduates come from various backgrounds and go on to use their experience in a diverse array of professions. Graduates take their Th.M. education and serve as teachers, administrators, medical doctors, advocates for refugees and human rights, and ecumenical ministers, as well as in numerous other capacities. Lay students who have already completed a master of divinity and who are interested in pursuing doctoral work, but believe they need additional course work, might also consider the master of theology.

Student Learning Outcomes for the Th.M. Program

Graduates of the Th.M. program will be able to demonstrate:

- At the completion of the Th.M. in Advanced Theological Study, a student will be able to demonstrate competence in a particular area of theological studies beyond the Master’s level (i.e. at the level of an advanced master's degree). (THM-ATS)
- At the completion of the Th.M. in Ministerial Practice, a student will be able to articulate an advanced theological understanding of and demonstrate competence in a focused area of ministry. (THM-MP)

Ecclesiastical Degrees

The ecclesiastical degrees are part of a three-degree cycle offered by an ecclesiastical faculty and granted in the name of the Holy See. The degrees provide training in advanced theological areas, preparing students to teach
in a seminary or for religious and lay leadership positions in the Catholic Church.

The **Bachelor of Sacred Theology (S.T.B.)** is a first-level, three-year ecclesiastical degree granted in the name of the Holy See through the ecclesiastical faculty of the School of Theology and Ministry (STM) by virtue of its status as an Ecclesiastical Faculty accredited by the Vatican Congregation of Catholic Education. It is offered only in conjunction with the Master of Divinity (M.Div.), a three-year civil degree. Building on the solid theological and practical foundation for ordained and full-time lay ecclesial ministry established by the requirements of the M.Div. degree, the S.T.B. prepares one to pursue the Licentiate of Sacred Theology (S.T.L.), a second-level, research-oriented ecclesiastical degree also offered by the STM.

The **Licentiate in Sacred Theology (S.T.L.)** is the second degree in a three-degree progression of ecclesiastical degrees. The S.T.L. enables students to build upon previous work and focus more on a particular subject or field within a Catholic context. An advanced degree, it provides students with two full years of work above and beyond the S.T.B. or M.Div. Students use the S.T.L. to continue work in Catholic theological studies, prepare for doctoral work, or teach or build competence for working within the Church. Officially, it is “the academic degree which enables one to teach in a major seminary or equivalent school.” The S.T.L. can open many doors for service in the Church, and in a number of official capacities within dioceses, religious communities, and institutions of higher learning.

**Student Learning Outcome for the S.T.L. Program**

At the completion of the degree requirements for the S.T.L., students will be able to demonstrate advanced mastery of a particular area of theological
studies beyond the first cycle Ecclesiastical degree.

The Doctor of Sacred Theology (S.T.D.) is the culminating step in the three-degree ecclesiastical program. The purpose of the S.T.D. program is to create scholars who combine broad knowledge of a certain area, a critical knowledge of theological methodology, and an ability to contribute original research in a chosen field of study. Most students who complete the S.T.D. go on to teach in university faculties, seminaries, and theological centers. They also contribute to Church administration and pastoral work, using their extensive study, training, and expertise as resources for their community. Students interested in the S.T.D. usually have discerned a vocation of working within the Catholic Church or a related environment. As with the S.T.L., the S.T.D. can open many doors for service in the Church, and in a number of official capacities within dioceses, religious communities, and institutions of higher learning.

**Student Learning Outcomes for the S.T.D. Program**

At the end of the S.T.D. program, students will be able to demonstrate the skills necessary

1. To teach at the post-secondary level
2. To engage in scholarly research in preparation for teaching and publication
3. To demonstrate a sufficient level of mastery in a particular discipline, which corresponds to the expectations of the academy of the completion of a terminal degree

**Non-degree Programs**
The School of Theology and Ministry is committed to providing the opportunity for professional development and ongoing formation for today’s Church. Every person interested in exploring the important issues of the Church today can find a workshop, lecture, or course to meet his or her interest—whether professional or personal. Our programs are designed to fit into a variety of schedules, with day, evening, weekend, and online programs during the academic year, as well as one- or two-week courses held during the STM’s Summer Institute.

**Academic Certificate Programs**

**Post-Master’s Certificate in Spiritual Formation**

The Post-Master’s Certificate prepares ministers with a prior master’s degree in theology or a related field to be spiritual mentors for persons and Christian faith communities.

**Theology and Ministry Certificate**

The Theology and Ministry Certificate is an 18-credit program for individuals who wish to study a specialized area of ministry, but not enroll in a full master’s program.

**Religious Education Certificate**

The Religious Education Certificate is an 18-credit program for individuals who wish to study religious education, but not enroll in a full master’s program.

**Hispanic Ministry Certificate**
The Hispanic Ministry Certificate is an 18-credit program designed to prepare students, ministers, and educators who are already working or are interested in doing so in the context of Hispanic communities anywhere in the U.S.

Summer at STM

In addition to individual courses for credit or audit, the M.A. in Theology and Ministry is offered through the summer at STM.

Individual Courses

Special Student

Special Students at Boston College are those students wishing to take one or more classes in the academic year. As a Special Student at STM you may earn academic credit without enrolling in a degree program. Regular tuition applies and up to 12 credit hours maybe taken. Should you later enroll in an STM degree program, the credits you earn will count toward your degree. Special Students may cross-register at other BTI schools, as long as they take one course at STM. Special Students are also allowed to take select courses for audit for one-half of the credit cost.

Minister-in-the-Vicinity

Boston College STM offers a special audit rate for those currently engaged in full-time ministry (ministers, lay ecclesial ministers, priests, rabbis, and others) who live in the vicinity and who hold a theological degree. Minister-in-the-Vicinity students can audit one course per semester at the rate of $100 per credit hour.
Continuing Education

Conferences, Lectures, Workshops, Seminar Series

STM welcomes all as part of our commitment to making contemporary theological discussion accessible to the community. Many events are free of charge and others have a small fee.

Sabbatical

Those who wish to come to Boston College for sabbatical may apply as a Special Student or Minister-in-the-Vicinity and create their own independent sabbatical experience.

STM Online: Crossroads

STM Online: Crossroads, a program of Boston College School of Theology and Ministry, offers non-credit online courses for adult spiritual enrichment and faith formation. With a focus on shared reflection in an online learning community, Crossroads models the kind of conversation and participation that lead to deeper understanding of and personal growth in faith.

Academic Policies and Procedures

Academic Integrity at Boston College

Academic integrity is taken quite seriously at Boston College and by the dean and faculty of the School of Theology and Ministry in particular. STM abides by the University policy on academic integrity to be found in the Policies and Procedures section of this Catalog. The roles and responsibilities of students, faculty, and deans with regard to promoting
academic integrity can be found there as well. STM students are strongly encouraged to become familiar with these policies and procedures, as they are held responsible for this knowledge. Students with questions regarding what constitutes a violation of Boston College’s Academic Integrity Policy, especially with regard to specific courses and assignments, are invited and encouraged to ask these questions of their professors and the Associate Dean for Academic Affairs.

**STM Academic Integrity Procedures**

Each member of the School of Theology and Ministry (STM) community is responsible for supporting a teaching and learning environment that cultivates the necessary habits of heart and mind that are rooted in the Gospel. Because each violation of academic integrity—whether intentional or unintentional—harms our common goal to create an academic culture of honesty, all violations are taken seriously at the STM. Faculty members are responsible for promoting academic integrity in their courses by including a clear statement in their syllabi of the school’s policy and by discussing this policy in class at the beginning of the semester. Faculty are also responsible for promptly reporting violations of academic integrity as they occur. Consistent with the expectations set forth at Boston College, STM students are personally responsible for upholding academic honesty in all aspects of their work and should hold their peers accountable when they suspect that a questionable act of academic dishonesty has taken place, either by directly addressing the violation as it is happening or by informing the appropriate individuals (a trusted faculty member or dean).

Violations of academic integrity include, but are not limited to, plagiarism. Students are responsible for educating themselves about what constitutes plagiarism and the inappropriate use of sources in an academic context. Any reference to the ideas or insights of others, either in direct quotation or
in paraphrase, should be given explicit and clear attribution; to fail to do so is intellectually dishonest. Other instances of academic dishonesty include:

- Unauthorized collaboration on papers, presentations, assignments, and exams
- Unauthorized use of materials and sources in assignments and examinations
- Collusion with the intent to deceive
- Knowingly allowing your work to be used by others in an academically dishonest way
- Submitting the same work for two different courses
- Misrepresenting work that has been purchased or written by someone else as your own
- Lying in order to secure an extension on an assignment, to reschedule an exam, or to manipulate an outcome of a course requirement
- Cheating or copying from another student
- Fabricating stories or otherwise misrepresenting data in conversations related to training in counseling, CPE, and spiritual direction
- Inappropriate use of confidential information and inappropriate use of privileged access to spaces or information

In order to cultivate an academic culture of honesty, faculty are asked to document all instances of academic dishonesty, even if the assignment itself is not graded or the violation did not result in a grading penalty. Violations of academic integrity are taken seriously because of the mission of the STM to prepare students for leadership in teaching and active ministry in the global Church where students will be expected to promote a culture of integrity after leaving the STM.

**STM Review Process**
Cases are reviewed by the Academic Integrity Committee (AIC), which is constituted by (usually four) members of the faculty, one student, and the associate dean for academic affairs (hereafter “academic dean”). The chair of the AIC is a faculty person appointed by the Dean of the STM. All cases are handled with strict confidentiality. When a faculty member determines that a student’s work violates the standards of academic integrity, that faculty member should discuss the violation with the student, ideally in person, or in writing. The violation should be described and documented in a letter and sent to the academic dean along with the following supporting documents:

- Course syllabus with the instructions for the assignment highlighted
- The student’s work
- Evidence that a violation has taken place (e.g., copy of the original publication)

Along with the supporting documentation, the faculty person should clearly state if the violation will or will not incur a grade penalty, and, if so, what the faculty member thinks that penalty should be.

For instances where there is no grade penalty, either because the assignment itself is not graded or because it is a low-weighted assignment, faculty should submit the necessary documentation and a clear explanation for why no penalty was issued in a confidential sealed envelope addressed to the academic dean. The chair of the AIC and the academic dean will meet to determine whether or not a violation has taken place. For these instances where a violation does not incur a grading penalty, an individual meeting between the student and the academic dean may or may not be scheduled. The academic dean will issue a warning letter documenting the violation to the student and to the faculty member. All paperwork associated
with the violation will be archived in the office of the academic dean in a confidential file until the student graduates, at which point it will be destroyed. Such instances are considered to be minor violations or warning violations.

If the faculty member decides that the violation is serious enough to warrant a grade penalty, the following procedure will be followed: The faculty person should meet with the student in person or explain the situation by email. This communication should discuss the nature of the academic integrity violation and also how to avoid such violations in the future. There should be a clear statement about the grade for the work without the violation and the additional penalty that is being imposed for the violation. The penalty for the academic integrity violation should take into account the severity of the violation, the complexity of the assignment, and the weight of the assignment. Grade penalties for students found guilty of academic integrity violations should also consider the degree of premeditation involved. If violations of academic integrity occur towards the end of the semester, faculty should issue the final course grade of “I” until the AIC review process has been completed. The faculty person should document, in a letter addressed to the AIC, the meeting with the student, and the grade and grade penalty for the assignment, and forward this letter and all supporting documentation to the academic dean in a confidential file.

Every violation that incurs a grade penalty will fall under full review by the AIC and the academic dean. Upon receiving a report of an academic integrity violation, the academic dean will notify the student of the allegation and set up a meeting with him or her. The student will receive the report of the academic integrity violation report that has been submitted by the faculty member and the grade penalty for the violation. The student will have the chance to respond to the faculty member's report in an individual meeting with the academic dean, and also be invited to submit his or her
response in writing, so that it can be reviewed by the AIC. While a case is pending, the student may not withdraw from the course or program or change status in a course. The academic dean will serve as a non-voting member of and administrative resource for the AIC, acting as a liaison between the student and the AIC and maintaining the committee's record of notifications and relevant materials. In cases involving students from more than one school or students enrolled in joint or dual degree programs, the academic dean will coordinate the relevant academic integrity committees to participate in the review process.

The academic dean will notify the faculty member who reported the violation and the student(s) that the case is under full review by the AIC. Members of the AIC are held to strict confidentiality and may not discuss any case that is under review, even with the student(s) involved. At its discretion, the AIC as a whole may interview any individual, including the student, with knowledge pertinent to the case.

The AIC will review all cases involving a grade penalty. First, the AIC will determine whether or not a violation of academic integrity has taken place by a simple majority vote. Then, the AIC will assess the reasonableness of the penalty that has been given by the faculty member and either approve or reject the grade penalty. The AIC always reserves the right to make its own recommendation for a grade penalty based on the confidential information that it has about the student’s previous record of violations. Because academic integrity is a serious matter at the STM, instances of multiple violations are handled severely and may even result in dismissal from the School. The AIC may recommend a different grading penalty and/or impose additional administrative penalties, such as university probation, suspension, or expulsion, all of which become part of a student’s academic record and will be reported to graduate/professional schools and
outside agencies. The academic dean is responsible for communicating the decisions of the AIC in writing to both the student and the faculty member.

The academic dean is also responsible for tracking all violations of academic integrity. A complete file of each case will be kept in a confidential file in the academic dean's office until the student leaves the school or graduates. Unless the penalties include an action, which is by its nature public (see examples above), the case will not be reported to outside agencies or institutions.

Appeal of the committee's decision may be made by written request to the Dean of the STM no later than ten days following notice of the committee's decision. The Dean's decision will be final.

**STM Academic Integrity Tutorial**

This online tutorial, developed by STM faculty, students, and administrators (with assistance from offices across the University) reviews different instances where academic integrity is in question and introduces students to the academic culture at the STM. As well, the tutorial serves as an introduction to good research practices and resources in theology and ministry at the graduate level. The tutorial is required of all new STM degree and certificate students in their first semester or summer of study. Students who do not complete the tutorial by the deadline set each semester by the associate dean for academic affairs will not be able to register for courses for the following term. Information regarding the administration of the tutorial will be given at new student orientation and through e-mail from the associate dean for academic affairs.

**University Communication Policies and Student Responsibilities**
The STM follows the policies set forth in the Policies and Procedures section of this Catalog.

**Absences for Religious Reasons**

The STM follows the policy set forth in the Policies and Procedures section of this Catalog.

**Academic Advising**

Students are free to form mentoring relationships with all STM faculty, including but not limited to their assigned advisors, and encouraged to form these relationships particularly with those faculty working in the student’s area of academic or ministerial interest. STM faculty welcome the opportunity to mentor students.

All students are assigned a faculty advisor for the purpose of course selection upon entry into an STM degree program. Students are strongly encouraged to meet with their advisors once per semester to choose courses for the following semester. Consulting the advisor ensures that when it comes time for graduation the student will have fulfilled the requirements of his or her program. Conversely, students who do not consult advisors risk not having fulfilled their requirements and then needing to take extra courses in order to do so before they graduate. Please consult the STM Academic Advising Student Resource Guide for course selection information, advising resources, and tips and tools to make the most out of your advising session.

Faculty advisors are assigned based on the student’s degree program and an equitable distribution of advising among the faculty. Because advising is so important to the student’s academic success, students should feel...
comfortable with their faculty advisors. Students who wish to change their advisor may do so by contacting the Associate Dean for Academic Affairs, requesting and giving the reason for the change, and identifying the faculty person whom the student wishes to have as his or her advisor moving forward. The Associate Dean will handle the matter in a way that is respectful to all parties.

Academic Grievances

I. Preamble

The Academic Grievance Policy of the School of Theology and Ministry provides a procedure for the constructive and timely resolution of serious academic grievances of students against faculty members. An academic grievance is defined as a complaint by a currently enrolled graduate student against a member of the faculty related to a serious academic matter that has had an adverse effect on the student's learning or ability to perform to the best of his/her ability.

Ordinarily, questions related to a course grade are not considered cause for setting in motion an academic grievance, unless the disputed grade is judged to be evidence of a broader issue or concern related to instruction, communication, access, availability, accountability and/or fairness on the part of the professor. If a student's only issue is the grade itself, the matter should be addressed directly with the professor either in person or in writing. It is the professor's prerogative to alter or uphold the grade. In this case, the decision of the professor is final. If a student wishes to dispute a grade based on one of the alleged broader issues named above, a student may use the Academic Grievance Process to do this. The decision-makers in the Academic Grievance Process will consider only how the broader
issues affected the student’s grade; they will not abrogate the professor’s prerogative to evaluate the academic quality of the student’s work.

Resolution of grievances should involve all parties working cooperatively and respectfully to obtain resolutions acceptable to all parties involved. The grievance process first strives for mediated outcomes and only moves to directed outcomes when such efforts at mediation fail. All parties should seek resolutions at the lowest possible administrative level. The grievance should be initiated no later than the end of the sixth week of the semester immediately following the one in which the action giving rise to the complaint occurred—for example, a grievance arising from spring semester must be initiated before the end of the fall semester.

II.

Any student who believes he or she has a grievance should communicate with the faculty member(s) immediately involved as soon as possible after the action being grieved, but by no later than the close of the fall or spring semester immediately following the term in which the action giving rise to the complaint occurred. If communication results in a mutually acceptable solution, the matter shall be considered closed. If either party wishes to have a written statement of the outcome, the parties shall put the solution in writing, sign it, and each retain a copy.

III.

If, however, a resolution acceptable to all parties is not achieved, the student may present the matter in writing in a timely manner—ordinarily, “a timely manner” suggests no more than ten business days; in this case, that means ten business days from the date of the unsuccessful effort to achieve a negotiated resolution—to the chairperson of the department in
which the faculty member(s) resides administratively. The written statement must clearly specify: (a) the nature of the complaint and (b) the remedy requested. The chairperson should proceed in the following manner. If the chairperson is a party to the grievance, the Associate Dean for Academic Affairs shall act in his/her stead:

(A) After consultation with both the student and the faculty member(s) affected, the chairperson should proceed in a timely manner either to mediate the matter personally or assign it for mediation to one or more members of the department.

(B) The chairperson or designated faculty mediator(s) shall then meet formally with the faculty member(s) involved and obtain a written answer to the grievance with a full explanation of the faculty member(s)’ position. After a full investigation, the chairperson or assigned mediator(s) should meet again with the faculty member(s) and student involved, either separately, or jointly, or both, in order to work out a settlement of the problem. If the chairperson or assigned mediator(s) succeeds in resolving the grievance, he/she shall put the agreement in writing, obtain the signatures of all parties to the document, and provide copies of the agreement to all parties involved in the process.

Should the chairperson or assigned mediator not obtain a resolution, the chairperson, after conducting such further proceedings as he/ she may determine to be necessary or desirable in his/her sole discretion, shall prepare a written decision and provide a copy of it to the student and the faculty member(s) involved.

IV.
A student grievant may appeal a decision of the department chairperson to the Dean. The appeal must be made in writing within ten business days of the decision of the department chairperson and must specify clearly: (a) the nature of the grievance; (b) the remedy sought; and (c) the reason or reasons why the proposed resolution emanating from step (III) above is not acceptable. Upon receiving the written appeal, the Dean or the Dean’s designees must meet with the chairperson, faculty member(s) and student involved, separately or jointly, to seek a timely solution to the issues. If such procedures produce a resolution acceptable to all parties involved, it shall be put in writing and copies given to all of the parties.

If no resolution acceptable to all parties is achieved, the Dean or the Dean’s designees shall expeditiously gather all written statements and evidence accumulated up to that point and conduct such review or such further proceedings, including hearings, as the Dean or the Dean’s designees may determine in their sole discretion to be reasonably necessary to reaching an ultimate disposition of the issue(s). In the event of a hearing, the faculty member(s) and student shall each be entitled to bring, for consultative purposes only, an advisor from the School of Theology and Ministry or the wider Boston College community. If the above process achieves a resolution acceptable to all parties, the Dean or the Dean’s designee(s) must put the agreement in writing, obtain the signatures of all parties to the document, and provide copies of the agreement to all of the parties.

If the Dean or the Dean’s designee(s) does not achieve a resolution acceptable to all parties, the Dean shall in ten working days convey his/ her decision and report (or the report of his/her designee(s) as applicable) to the chairperson and the parties involved. The Dean’s decision shall be final.

Attendance
University Policy

Students are responsible for being familiar with and following the attendance policy in the Policies and Procedures section of this Catalog. In addition, each instructor has the right to specify their own, more stringent, attendance policy for a course, provided it is clearly defined in the syllabus.

STM Policy

In order to complete and achieve successfully the objectives of an STM course, students must attend the course meetings in order to engage the professor and fellow students in the teaching and learning dynamic. Unless other arrangements are made with the instructor, a student must withdraw from a course in which he or she has been absent for any reason for 25% or more of class meeting time. If a student with 25% or greater absence rate does not withdraw from the course, the student will be given a failing grade for the course.

Audits

Students enrolled in STM degree and certificate programs may audit courses and will be charged half the per-credit tuition rate. Students will not receive financial aid/tuition remission for audited courses and audited courses will not count toward degree programs (but may be counted toward certificate programs).

Students not enrolled in STM degree or certificate programs can apply through the Admissions Office to audit STM courses for half of the credit rate per course.
The STM has a reduced audit rate for Ministers-in-the-Vicinity. Please contact the Admissions Office for more information. The rate is limited.

Students cannot register to audit courses through their My Services accounts. Students should contact the STM Service Center or the Assistant Director for Financial Aid and Academic Services in order to register to audit a course.

For summer courses, students wishing to switch from credit to audit status must do so within one week of the start of the course.

**Bias-Related Incidents: Reporting**

As a graduate and professional school of Boston College, the School of Theology and Ministry rejects and condemns all forms of harassment, wrongful discrimination, and disrespect that occurs on the basis of race, color, national origin, sex, religion, disability, age, marital or parental status, sexual orientation, military status, or other legally protected status. In order to foster an open and respectful educational environment, the STM is committed to responding to any incident that impedes a student’s ability to learn, coexist peacefully, express ideas, or which impedes any other right listed in the Code of Student Conduct. This includes bias-related incidents that may occur between faculty or staff and students or between students themselves.

Students at the STM are encouraged to report bias-related incidents to Dr. Jennifer Bader, Associate Dean, Academic Affairs or Jacqueline Regan, Associate Dean, Student Affairs and Career Services. Students should also familiarize themselves with Boston College’s Hate Crimes and Bias-Related Incident Protocol for information on the different kinds of incidents, the process for reporting them, and the University’s responses to them.
Students may also report bias-related incidents directly to the Office of Institutional Diversity using the Boston College Bias-Related Incident Report Form or through any of the other support resources at Boston College, such as University Counseling Services or the Office of Dean of Students. Students should also be aware that each member of the faculty and staff may have reporting obligations under our sexual misconduct policy.

For more information concerning the University’s policies surrounding harassment and incidents of bias, refer to the Boston College Notice of Nondiscrimination or visit the Policies and Compliance section of the Office of Institutional Diversity website.

Childbirth and Adoption Accommodation Policy

Boston College recognizes the importance of family issues to its graduate students. Eligibility requirements for this accommodation for students in the School of Theology and Ministry are as follows:

- The student must be the primary caregiver of a newborn child or an adoptive child under the age of 13 newly placed in the home.
- The student must be receiving a service stipend for work done at the School of Theology and Ministry.
- The student must be enrolled in courses full-time.
- The student must be in good academic standing.
- This student accommodation is not an employee medical leave or a leave of absence from the academic program.
- In connection with the birth of a child, a student is eligible for an accommodation extending for a period of up to eight consecutive weeks. A student who is the primary caregiver for an adoptive child under the age of 13 is eligible for an accommodation extending for a
period of up to eight consecutive weeks immediately following the placement of the child in the home.

- During the accommodation period, the student will be relieved of the service requirements that accompany the student’s funding. During the remainder of the semester (before and/or after the accommodation period), the student’s supervisor will assign service duties consistent with the academic and/or administrative nature of the work for which the student was offered the stipend.

- During the accommodation period, the student may attend classes and work on course assignments to the extent possible. The student and the Associate Dean, Academic Affairs should work with the professors in these courses to adjust, to the extent reasonably possible, attendance requirements, assignment deadlines, and exam dates during the accommodation period. The Associate Dean and faculty instructors should work with the student to establish appropriate timetables for completing coursework and exams during the semester in which the accommodation is taken.

- Funding provided by the University, including funding for health insurance, if any, will continue during the accommodation period.

- The accommodation policy will not extend the total number of years of funding available to a student.

- For students with 9-month stipends, funding is for the academic year only.

- A student anticipating a childbirth or adoption accommodation must notify their faculty advisor and submit a written request to the Associate Dean for Academic Affairs or the Associate Dean for Finance and Administration. The Associate Dean will inform the other Associate Deans and the Dean of the STM of all such requests. Requests for accommodation should be made no less than three months before the expected start of the accommodation period in order to allow appropriate arrangements to be made to cover any administrative,
teaching, TAing, or research responsibilities. The STM will work out specific arrangements with students, on a case-by-case basis, within the broad framework of this policy.

- Students funded by government grants or other external sources must follow the policies of their funding agency. If external funding is suspended or reduced during the accommodation period, the university will assume funding responsibility for the accommodation period. Details of the arrangement should be worked out in writing between the student and the Associate Deans for Academic Affairs and Finance and Administration, and reported to the Dean of the STM before the accommodation period begins.

**Comprehensive and Synthesis Exams**

**Doctoral Students: S.T.D.**

Consult the S.T.D. Handbook for more information about policies and procedures for comprehensive examinations. During the semesters in which a student is not registered for coursework but is preparing for and taking comprehensives, a student must be registered in TMST8528 S.T.D. Specialized Research. In accordance with the University policy on grading, comprehensive exams are graded Pass with Distinction, Pass, and Fail.

**Doctoral Students: Ph.D.**

Consult the Ph.D. Prospectus for more information about policies and procedures for comprehensive examinations. During the semesters in which a student is not registered for coursework but is preparing for and taking comprehensives, a student must be registered in TMST9911 Doctoral Continuation. In accordance with the University policy on grading, comprehensive exams are graded Pass with Distinction, Pass, and Fail.
M.Div. Students: Synthesis Exams

Synthesis exams are taken in the third (or for part-time students, the last) year of the M.Div. program. Consult the M.Div. Handbook and the M.Div. Program Director for more information about policies and procedures for the synthesis exams.

M.A. Students: Thesis Projects

For M.A. students, the Thesis Project serves as the comprehensive exam. Students wishing for more information about the Thesis Project should obtain a Thesis Information Packet from the STM Service Center. In accordance with the University policy on grading comprehensive exams, Thesis Projects are graded Pass with Distinction, Pass, and Fail.

Course Loads

For summer course loads, please see the policy on summer courses. M.Div. students may not enroll for more than fifteen (15) credits in any one semester; the Associate Dean for Academic Affairs will monitor compliance with this policy.

Course Numbering

STM course numbers reveal two things about the course: the subject area and the level. The following is a key to STM Course Numbering:

- TMCE: Christian Ethics
- TMHC: History of Christianity
- TMNT: New Testament
- TMOT: Old Testament
- TMPS: Pastoral Studies/Practical Theology
- TMRE: Religious Education
- TMST: Systematic Theology

All courses offered at the BC STM are rigorous, graduate courses appropriate for students in graduate degree programs. They presuppose graduate level academic scholarly work. Students wishing to take a course, but having questions about whether the course will be taught at an appropriate level for their needs should contact the instructor of the course directly.

- NP = No Prerequisites Required (course numbers 7000–7999)
  This course is appropriate for students taking their first graduate course in a theological (sub) discipline or with topics or sources that are new to the students. No Prerequisites are required.
- P = Prerequisites Required (course numbers 8000–8499)
  This course is appropriate for students seeking further study in a theological (sub) discipline or with theological topics or sources. The course has prerequisites, either in terms of general background (e.g., “a year of graduate studies in theology”) and/or course work (e.g., “one course in Christology” or “fundamental moral theology”). The prerequisites are indicated by the professor.
- D = Doctoral Seminar (course numbers 8500 and above)
  This course is a doctoral level seminar. It may also be appropriate for S.T.L. and Th.M. students. Other advanced graduate students may apply. Department permission required.

Cross-Registration
In consultation with their faculty advisors, STM students may cross-register into courses at other universities and schools of theology through the following consortia: The Boston Theological Interreligious Consortium (BTI), the Consortium, and Consortium for Graduate Studies in Gender, Culture, Women, and Sexuality. More information is available in the Policies and Procedures section of this Catalog. Students can register for courses at BTI institutions by visiting the BTI website: www.bostontheological.org. Note that 50% of coursework required for a Boston College degree must be taken at Boston College, and that 50% of coursework for an ecclesiastical degree (S.T.B., S.T.L., S.T.D.) must be taken with the Ecclesiastical Faculty of the STM.

Directed Readings and Research

Directed research may be pursued on a specialized topic not currently covered in the course offerings in the same year, depending on the availability of faculty to work with a student. Ordinarily only one such project may be undertaken in the course of a master’s program. Subject matter and requirements must be worked out with the professor. The agreement must be put in writing on a Readings and Research form, obtainable through the STM Service Center, signed by both the student and faculty member, and approved by the Associate Dean for Academic Affairs.

Doctoral Candidacy and Continuation

The STM follows the policy set forth in the Policies and Procedures section of this Catalog. To register for doctoral continuation, Ph.D. students register for TMST991101 and S.T.D. students register for TMST852801.

Doctoral Dissertation Submission
In order to graduate, your graduation date must match your graduation date listed in My Services. If not, you must contact STM’s Assistant Director for Financial Aid and Academic Services to have this corrected. Follow the instructions below to ensure you have completed all requirements.

**Submitting your Ph.D. Dissertation**

Ph.D. students should consult the office or the website of the Graduate School of the Morrissey College of Arts and Sciences for further instructions on dissertation submission.

**Submitting your S.T.D. Dissertation**

Please review the S.T.D. Handbook for instructions on formatting your dissertation. Submit your dissertation electronically via eTD@BC. See the Help section of the University Libraries website for instructions on how to do this. Please review the **Open Access Policy for S.T.D. Dissertations** section below, detailed in the STM Academic Policies.

**Enrollment Status**

The STM follows the policies set forth in the Policies and Procedures section of this Catalog.

Graduate full-time enrollment is as follows:

School of Theology and Ministry—9 or more credits

All students are considered half-time with 6 credits.
Students completing degree requirements in their final semester may be given exceptions to the school’s minimum credit standard for full-time status by their academic dean.

The credits amounts listed above are used to determine a student’s enrollment status for loan deferments, immunizations, medical insurance requirements, and verifications requested by other organizations.

Graduate students in the School of Theology and Ministry are full time if enrolled in TMST8014, TMST8053, TMST8054, TMST8101, TMST8526, TMST8528, TMST8529, TMST8530, TMST8543, TMST8546, TMST9901, or TMST9911. MTS students can enroll in either TMST8053 (MTS Thesis) or TMST8014 (MTS Reflection Paper) in the last semester and should be considered full-time. Doctoral students are considered full-time if they are Graduate Assistants for academic departments, Teaching Fellows, or Research Assistants.

**Final Examinations**

The STM follows the policies set forth in the Policies and Procedures section of this Catalog.

Policies include information regarding the following:

- Exam schedules
- Students' responsibilities
- Obtaining permission for alternate arrangements if granted permission to do so

**Foreign Language Requirements**
Students should consult individual degree program handbooks/prospectuses for program-specific requirements.

**Good Standing**

A student in one or more of the following situations is considered under academic review:

1. The student’s cumulative grade point average (GPA) falls below 3.0;
2. The student receives a grade of “incomplete” for one-half or more of the courses taken in a single semester;
3. The student has any incompletes that are not resolved by the end of the semester following the one in which the incomplete was obtained; and/or
4. The student has two or more grades that are below what is considered “Passing” for his or her degree program.

If a student is under academic review, the student will be notified in writing by the associate dean for academic affairs. The student will have until the end of semester in which she or he receives this notice in writing to bring his/her GPA up to 3.0, to complete all incompletes, and/or to develop a plan to make up the work not passed. If a student does not do these things, the student loses good academic standing. The associate dean will engage the student’s faculty course selection advisor, the relevant department chair, and the associate dean for student affairs in a discussion as to whether and under what conditions the student may continue in his or her degree or certificate program.

The associate dean for academic affairs will also notify the associate dean for enrollment management of the names of all students who have lost good academic standing. As a result of these conversations, the student may be
prevented from enrolling in further coursework, lose his or her financial aid, be dismissed from the University, or be given further conditions to meet in order to remain enrolled in the STM. The associate dean for academic affairs will communicate this information to the student in writing as soon as possible after the meeting.

**Grading**

The STM follows the grading policies and grading scale set forth in the Policies and Procedures section of this Catalog. In addition, the STM faculty has adopted the following grading guidelines:

The STM’s policy is articulated in relation to individual assignments; the principles, however, apply to the overall grade for a course.

- **A (4.0) (94–100)**

  This is the highest grade awarded for individual assignments, and for a course as a whole. “A” indicates that a student’s work not only meets, but exceeds the requirements specified for an assignment, and does so in an exemplary manner. As such it should be rare and granted for exemplary work. The outstanding quality of the work includes, but is not limited to, evidence of breadth and depth in reading, insightful engagement with primary and secondary sources, and a well-constructed argument that is creative in its analysis and, where appropriate, underscores the pastoral implications of a topic. To receive an “A,” the assignment would be written in a way that is concise and compelling, while also conforming to accepted academic methodologies for the citation of sources.

- **A- (3.67) (90–93)**
This grade indicates that the work significantly exceeds the standards for a “B.” The professor’s comments will identify the area/s in which the assignment significantly exceeds the standards, such as its argument, methodology, range of reading, or its structure/expression.

- **B+ (3.33) (87–89)**

This grade indicates that the work exceeds the standards for a “B.” The professor’s comments will identify both what aspect/-s of the paper went beyond “B” and what would have enhanced the paper’s argument or presentation.

- **B (3.0) (84–86)**

This grade indicates that the assignment satisfies requirements specified for the particular task and does so in a competent manner; as such, the work meets expectations at the graduate level. As such it should be seen as the standard grade for satisfactory completion. “B” confirms that an assignment demonstrates a sound understanding of relevant material, is constructed coherently, and communicates ideas in a clear and accessible manner, while also being properly attentive to the norms governing the citation of references. While the B grade recognizes competency in the area covered by the assignment, the grade also suggests that greater breadth or depth was possible in fulfilling the assignment; this implies, for example, the need for wider or deeper reading, a better sequencing of ideas, or greater attentiveness to written expression in order to enhance clarity.

- **B- (2.67) (80–83)**

This grade indicates that the work approaches the standards for a “B,” but does not fulfill all the requirements of that grade. The professor’s comments
will indicate whether the deficit resides in one particular aspect of the paper—ideas, methodology, works consulted, or its structure/expression—or whether more than one aspect of the paper fell below the standard for a higher grade.

- **C+ (2.33) (77–79)**

This grade indicates that the work significantly fails to meet the standards for a B,” but is more than marginally acceptable. The professor’s comments will identify both what aspect/-s of the paper were insufficient and what would have enhanced the paper’s argument or presentation.

- **C (2.0) (74–76)**

This grade applies to work that is no more than marginally acceptable at the graduate level. The grade makes clear that the work does not rise to the level of competency in the topic covered by the assignment; the deficits could be in any or all of the work’s ideas, research, methodology, or structure/expression. “C” indicates that satisfactory completion of the course will require significant improvement in the areas specified by the professor’s comments.

- **F (0.0)**

An assignment that receives this grade is unsatisfactory in all of the areas that demonstrate competency for a graduate student. There are no other gradations between C and F. All work below C is unsatisfactory.

**Grade Changes**
The STM follows the policies set forth in the Policies and Procedures section of this Catalog.

Graduation

For graduation policies and procedures, please visit the Policies and Procedures section of this Catalog.

Walking in the STM Diploma Ceremony: Students who have completed all their requirements for their degrees on or before the Wednesday just prior to May graduation may participate in the STM diploma ceremony, even if they have not met the university deadlines for graduation (and, thus won’t be actually receiving diplomas). Students who have not completed their requirements by the Wednesday before graduation may not participate in the STM diploma ceremony. Exceptions to this policy are rare and are granted solely at the discretion of the dean of the STM.

Incompletes

A student may, with adequate reason and at the discretion of the instructor, take an incomplete in a course. A formal request form must be obtained at the STM Service Center and signed by the professor and the Associate Dean for Academic Affairs. For approval to be granted, a date for completion must be agreed upon between the student and the professor. Except in extraordinary cases, all such "I" grades will automatically be changed to "F" according to the following University-dictated schedule:

- Spring: August 1
- Fall: March 1
- Summer: October 1
See the STM Good Standing policy for the number of incompletes a student may take in a given semester or summer and remain in good academic standing.

**Leave of Absence and Readmission after a Leave of Absence**

The STM follows the policies set forth in the Policies and Procedures section of this Catalog.

Students are not eligible for STM financial aid or funding while on leave. When they return to the STM, students continue to receive the tuition remission that they were granted upon entrance into their degree program.

Students wishing to take courses at theological institutions outside of Boston College and the BTI while on leave of absence from Boston College are strongly advised to discuss this plan with their faculty advisor, the relevant department chair and the Associate Dean for Academic Affairs to make sure that the courses they are planning to take will transfer into and be counted toward their STM degree program. Please see the Transfer of Credit policy for more information.

In some cases, the Associate Dean may require that the student work out a plan of study for the following semester or for the completion of the degree as a condition of readmission after a leave of absence.

**Masters' Theses**

All M.A. students are required to complete a non-credit thesis in or prior to the last semester of their programs. Students seeking more information
about the thesis should obtain a Thesis Packet on the STM website or from the STM Service Center.

M.T.S. students have the option of using one of their electives to do a 3-credit thesis. Students seeking more information about the thesis should consult the M.T.S. Handbook and/or consult the M.T.S. Program Director. Students should be registered for TMST8053 M.T.S. Thesis.

Th.M. in Advanced Theological Studies students enroll in a 6-credit thesis course during their final semester; these 6 credits are part of the 24 required for the degree. Students seeking more information about the thesis should consult the Th.M. Program Director.

**Online Courses**

Students wishing to take online courses should note the following degree-specific policies:

- M.A.T.M. students doing the M.A. in hybrid mode may take up to 7 courses online toward their degrees (not including Contextual Education). M.A. students not doing the degree in hybrid mode may take up to 4 courses online.
- M.T.S. students may take up to two online courses toward their degree.
- M.Div. students may take up to three online courses toward their degree.
- Th.M. and S.T.L. students may ordinarily not take online courses toward their degrees. By way of exception, the program director may grant permission to those students with a concentration in Spirituality Studies for 1 online course offered in conjunction with the Institute for Advanced Jesuit Studies.
- S.T.D. students may not take online courses toward their degree.
Ph.D. students wanting to take a particular online course should consult their faculty advisors about whether and under what circumstances that course would be appropriate for their degree.

**Open Access Policy for S.T.D. Dissertations**

Upon submission of a completed S.T.D. dissertation in the School of Theology and Ministry, a student may request an embargo for not more than two years without special permission. To request an extension beyond two years, but for no more than five years, a student must submit a written rationale to the Associate Dean for Academic Affairs. Requests for more than five years will be granted only for extraordinary reasons.

**Pass/Fail Option**

Select courses are designated Pass/Fail. All requests for Pass/Fail credit, beyond taking courses designated Pass/Fail, must be approved by the student’s academic advisor and the Associate Dean for Academic Affairs during the registration period. Students should obtain a Pass/Fail form online or from the STM Service Center.

In order to receive a grade of Pass, a student must complete all assignments in the course, is subject to the same attendance policy as all other students in the course, and must earn a final grade in the course of a C or above. A Pass will then be entered as the grade for the course instead of a letter grade.

- M.A. students may take 2 courses P/F beyond those designated as such.
- M.Div. students may take no more than 18 credits on a P/F basis.
- M.T.S. students may take no more than 12 credits on a P/F basis.
- Th.M., S.T.L., and S.T.D. students may not elect to take any courses P/F, with the exception of the Spiritual Direction Practicum.
- Ph.D. students should consult the dean’s office of the Graduate School of the Morrissey College of Arts and Sciences.

**Prerequisites**

For students with little or no background in writing research papers in the humanities, students for whom English is a second language, and others, the Admissions Committee may decide to recommend or require TMST7081 Writing and Research for Theology and Ministry as a condition of admission into a master’s or certificate program.

TMST7081 is not a remedial course and is highly recommended for most students. It can be used for elective credit toward the degree by M.A. and M.Ed. students who have not been required to take it. If the student is required to take this course, however, it must be taken in addition to the credit hours required for the degree.

Four courses (12 credits) in philosophy are prerequisites for the M.Div. degree. These courses can be taken on an undergraduate or graduate level, and they can be taken Pass/Fail. For students who do not have at least 12 credits of philosophy at the time of application to the M.Div. program, these courses may be taken during the first year of the M.Div. All courses must be taken for credit and the courses themselves approved by the M.Div. program director. As prerequisites for the degree, they do not count in the 84 credits required for the M.Div.

**Professional Ethics in Ministry Workshop**
STM's Professional Ethics in Ministry Workshop, required for all STM students, is intended for students as they begin their programs at STM. The workshop considers ministerial ethics in theological, pastoral, and legal perspectives and invites students into an ongoing, school-wide conversation and reflection on the nature of ministerial roles and the power dynamics and ethics that attend them. Students in ministerial degree programs (except for summers-only degrees) with a field education requirement (Contextual Education or Supervised Ministry) must fulfill this requirement before they begin their placements. All other students must complete the requirement before they graduate. Information about when the Professional Ethics in Ministry Workshop is offered is distributed with admission materials. Students who have not fulfilled the requirement in their first year of study will be notified of the next available date to fulfill the requirement by the Associate Dean for Academic Affairs.

Readmission after a Lapse in Enrollment

All students are required to keep their University status current. If a student does not do so, s/he must seek approval from the STM to be re-admitted to the degree program.

Each degree has a term limit—a number of years from the date of matriculation into the degree program by which a student must finish the degree. These term limits are the following:

- M.A. and M.Ed.: 5 years
- M.T.S.: 4 years
- M.Div.: 6 years
- Th.M.: 2 years
- S.T.L.: 4 years
If a student seeks readmission before the term limit expires, s/he must write the Associate Dean for Academic Affairs to request re-admittance before the start of the semester in which the student wishes to return. If granted, all courses taken towards the degree thus far will count toward the degree.

If a student seeks readmission after the term limit has expired, the student must reapply through the Office of Admissions. To begin this process, the student should e-mail the Associate Dean for Enrollment Management. If the student is readmitted to the program, a decision will be made on a case-by-case basis by the Associate Dean for Academic Affairs as to (1) which and how many courses already taken will count toward the degree; and (2) any changes in requirements for graduation with the degree. The decision to re-admit a student will be based on a consideration of the best interests of both the student and the University.

**S.T.L. Thesis Submission**

Before your defense, please consult the S.T.L. Handbook, found on the STM website, and follow the process outlined therein, including what to do with your signature page and instructions on how and where to submit your S.T.L. Thesis.

**STM Style Guide**

The STM faculty has unanimously adopted the STM Style Guide for all written assignments. This style guide is available on the library’s website.

**Summer Courses**

M.A. students as well as students enrolled in Certificate studies may take summer courses at any time during their studies. Enrollment policies are as

https://www.bc.edu/content/bc-web/academics/sites/university-catalog/graduate/stm.html#graduate_degree_programs
follows:

- Students who have not completed a semester or summer at the STM may take up to two on-campus courses (6 credits) per summer, with a maximum of one course (3 credits) per summer session.
- In subsequent summers, students who have and maintain a 3.5 GPA may take up to two on-campus courses (6 credits) per session. This is an intensive schedule and not recommended for all students. Students wanting to take more than one course a session should check with their advisors before registering.
- For students who are primarily summers only, Spiritual Formation and Contextual Education may be taken in addition to the guidelines set above.

Ph.D. students should consult with their academic advisor before enrolling in summer courses.

M.Div. and M.T.S. students are eligible to take summer courses after at least one semester of study during the Academic Year*. Currently enrolled M.Div. and M.T.S. students may take up to two courses (6 credits) per summer, with a maximum of one course (3 credits) per summer session.

For Th.M., S.T.L., S.T.D. students, permission of the program director is required before enrolling in summer courses.

*With permission of the program director, incoming biblical studies students have the option of beginning their language courses in the summer term prior to their first semester, not to exceed a total of 6 credits during that summer term.
For students in all STM degree programs, summer courses in languages are acceptable if they conform to the requirements of the degree program to which they are to be applied; the student should contact the relevant program director to determine such suitability before enrolling in a summer language course.

**Summer Course Registration**

All students must be registered for class before the class begins. Please note: all tuition and housing charges must be paid prior to the first class. Students who have not paid their tuition and housing charges will not be admitted to class until the charges are paid. Persons with questions about this policy should contact the STM’s associate dean for academic affairs.

**Supervised Ministry: Criteria for Enrollment**

Upon beginning their ministerial studies at the STM, students are responsible for knowing and following the guidelines for their respective degree programs regarding supervised ministry requirements. Cultivating a positive working relationship with the appropriate faculty director of supervised ministry is essential to the dynamic and interrelated processes of conscientious self-assessment, enrollment in the supervised ministry course, the appropriate selection of sites and supervisors, the development and implementation of learning goals and objectives, and rigorous, constructive and formative evaluations.

Mindful of the fact that students admitted to ministerial degree programs at the STM are expected to manifest the faith and religious commitment, the personal responsibility, the emotional maturity, the capacity for collaboration and perspective-taking, and the resiliency, resourcefulness and integrity that a program of preparation for professional ministry presupposes, the faculty
members and administrators of the STM take extremely seriously their collective institutional responsibility for guaranteeing that these expectations, among others, are met and verified before any student’s enrollment in a supervised ministry course is approved. Associated with such responsibility is ongoing accountability to those supervised ministry sites and supervisors with whom the STM works in partnership.

In the light of such responsibility, when a faculty director of supervised ministry and/or the associate dean for academic affairs is provided with substantive evidence indicative of a student’s lack of readiness or suitability for undertaking supervised ministry in general or a specialized supervised ministry in particular, it is the responsibility of the directors for supervised ministry and the associate dean for academic affairs to delay or deny enrollment in the supervised ministry course. In obtaining and evaluating such evidence, the faculty directors and the associate dean may consult with other Boston College personnel, who may reveal relevant information as permitted by law. In addition, the appropriate faculty director and/or the associate dean are responsible for providing the student with adequate feedback regarding the reasons for the decision as well as support and guidance regarding subsequent steps. Such advice may include referring the student to appropriate avenues of personal and professional development, inviting the student to apply for supervised ministry at a future time, encouraging the student to consider a change of degree program, or recommending (or in some cases mandating) a leave of absence or withdrawal from the STM.

Syllabi: Incorporated Texts

The following text is incorporated into every STM course syllabus, usually via a link:

https://www.bc.edu/content/bc-web/academics/sites/university-catalog/graduate/stm.html#graduate_degree_programs
For Students with Disabilities: If you have a disability and will be requesting accommodations for this course, please register with the Connors Family Learning Center (learning disabilities and ADHD) or the Disability Services Office (all other disabilities). Advance notice and appropriate documentation are required for accommodations.

Writing Help for All Students: The STM Writing Companions Corner (WCC) offers students one-on-one help with writing research papers, exegeses, reflection papers, and other assignments frequently given by STM faculty. Please watch STM News for more information on signing up for an appointment in the WCC.

Academic Integrity Policy: Plagiarism is the act of taking the words, ideas, data, illustrations, or statements of another person or source, and presenting them as one’s own. Penalties at Boston College range from a grade penalty to dismissal from the University. To avoid plagiarism, any use of another’s words or ideas must be fully cited. If in the original wording, quotation marks or blocked, indented quotations must be used. For more information regarding plagiarism and other violations of academic integrity, please consult the STM website.

Bias Neutral and Inclusive Language: Language is not fixed or static, but is constantly evolving and changing as society’s attitudes and practices change. Be aware of the development of new forms of expression that endeavor to describe persons in non-discriminatory ways that are appropriate, respectful, and just. In accordance with the Chicago Manual of Style and generally accepted contemporary canons of scholarship, the expectation is to use bias neutral language in academic writing. In addition to gender inclusive language, conscientious effort should be made to use appropriate language with reference to race, ethnicity, disability, age, religion, social status, etc.
Taping of Lectures and Presentations

Except in cases where a student has a documented disability that requires an accommodation, presentations and lectures given by faculty, students, or others in the classroom cannot be recorded or distributed for any purpose (including use by enrolled students) without the presenter’s permission. If a class is being recorded, the instructor must inform the class that the class is being recorded (without breaking the confidentiality of a student with a disability).

Students who wish to record a lecture or presentation must ask for and receive the permission of the presenter prior to recording. Recording of lectures of class presentations made with the presenter’s advance consent is authorized solely for the purposes of individual or group study with students enrolled in the same class unless the instructor has explicit written consent for other uses. The recording may not be reproduced or distributed in any manner, including the Internet, without the instructor’s explicit prior written consent.

Time-to-Degree Completion and Extensions

Each degree has its own time limit for graduation from the date of matriculation into the degree program.

- M.A. and M.Ed.: 5 years
- M.T.S.: 4 years
- M.Div.: 6 years
- Th.M.: 2 years
- S.T.L.: 4 years
- S.T.D.: 5 years, with one year extension possible
Students must petition the STM for an extension if they will not complete the degree in the time frame indicated above. Normally, only one extension will be granted per student. Students should send a letter by U.S. mail or e-mail to the Associate Dean for Academic Affairs, detailing (1) the reason the extension is needed and (2) giving a completion date for the degree. The Associate Dean will circulate the petition for extension to the student’s faculty advisor and program director for approval before making a final decision on an extension. The Associate Dean will notify the student as to whether the petition has been approved and the student’s new graduation term.

Transcripts and Transcripts/Diploma Holds

The STM follows the policies set forth in the Policies and Procedures section of this Catalog.

Transfer of Credit

All STM degree students, with the exception of M.Div. students, may transfer a total of six graduate credits from another regionally accredited or ATS accredited university or school of theology, subject to the following criteria:

- At the date of the student’s graduation, his or her transfer credits may be no more than five years old;
- Transfer credits must have been obtained for graduate-level coursework;
- Each transfer course must have been taken for a letter grade and a minimum grade of “B” must have been earned;
- Credit must not have been used in obtaining any other degree; and
• Coursework must be relevant to the student’s degree program.

M.Div. students may transfer in 18 credits to their degree program. All of the above criteria must be met, except that transfer credits may be no more than six years old.

Students may transfer up to 12 credits taken at the STM prior to degree matriculation into an STM degree program. After admission into the degree program, students wishing to do this should contact the Associate Dean for Academic Affairs.

Jesuit scholastics transferring in courses from First Studies will receive a letter from the Director of Jesuit studies in the spring or summer prior to their arrival at STM with instructions on how to transfer in those credits.

All other students (including Jesuits transferring in courses from sources other than First Studies prior to enrollment) should follow this procedure to transfer in credits to STM degrees:

In order to transfer credits into your STM degree program, you will need to submit the following materials to the Academic Administrative Assistant:

• Transcript containing the courses you wish to transfer in (if you submitted the transcript with your admissions application, stop by the admissions office and ask that it be printed out for you; if you did not submit it already, then contact the institution and have them send an official transcript to Karen Smith, Academic Services Specialist, Boston College School of Theology and Ministry, 140 Commonwealth Ave., Chestnut Hill, MA, 02467).
• Syllabi of the courses you wish to transfer.
• An up-to-date program of study/course tracking sheet indicating the courses you’ve taken so far at STM, the courses you are hoping to transfer into the degree, and the requirements that you are proposing that all those courses fulfill (blank forms can be printed from the STM website).

• A completed Transfer of Credits form (to be obtained from the academic services specialist).

Please deliver all of the above documents to the academic services specialist, who will circulate all information for approval to the student’s advisor, department chair, and the associate dean for academic affairs (for Jesuit Scholastics, it will also go to the director of Jesuit Studies). The associate dean will send approved credit transfers to University Student Services, who will complete the transfer process. If courses do not show up in your My Services course history within two weeks, please contact the academic services specialist.

**Withdrawal from a Course**

The STM follows the policies set forth in the Policies and Procedures section of this Catalog.

If you decide to drop a course after the posted add/drop period, you will be responsible for paying whatever portion of the course is not refunded based on the withdrawal date and according to the University’s tuition refund schedule. Please note, if you are receiving tuition remission funding, it will be cancelled for the dropped course and you will be responsible for the payment.

**Withdrawal from Boston College**
The STM follows the policies set forth in the Policies and Procedures section of this Catalog.

Woods College of Advancing Studies, Graduate Programs - University Catalog

BOSTON COLLEGE

The James A. Woods, S.J., College of Advancing Studies offers both full and part-time study to undergraduate and graduate students who want to make a difference with their degree. Woods College actively engages students in maximizing previous work and academic experiences. Our faculty and advisors help direct previous learning toward degree completion and career advancement.

As one of the eight schools that make up Boston College, Woods College fosters in its students rigorous intellectual development coupled with religious, ethical, and personal formation in order to prepare them for citizenship, service, and leadership in a global society. Within the context of the Boston College environment, Woods College promotes the care and attention to the human person that is the hallmark of Jesuit Catholic education. In addition, our faculty and students engage in significant applied scholarship that enriches the culture and addresses important societal needs.

Cura Personalis

The James A. Woods, S.J., College of Advancing Studies offers the atmosphere of a small college within the environment of a large university.
The professional advising staff are ever ready to help students determine a realistic course schedule. They take into account work, family, and other commitments that many of our students face so that they can successfully achieve their educational and life goals. Students receive personal attention while enjoying access to the many resources of Boston College.

**Online Master of Health Administration**

**Program Description**

The Master of Health Administration (MHA) offers an online, competency-based curriculum to students with previous experience in health care. The MHA program is designed to support the career goals of health care managers and supervisors. The program curriculum includes twelve required courses—eleven of which can be completed entirely online. One of the courses is offered online but with an on-site component at Boston College's main campus over a long weekend. This short course allows students to collaborate in person with faculty, peers, and leading health care innovators. The MHA program utilizes an online competency-based education (CBE) format that helps assure that students will develop the necessary skills demanded by health care employers. Each course includes a weekly, live online session (typically on a weeknight, two hours maximum in length) where students engage with faculty and peers.

The MHA courses are offered in an accelerated format, with eight-week terms (six-week during summer terms). Most students choose to take one course every eight weeks and complete the program in two years. Some students with more available time may take two courses every eight weeks in order to progress even faster. Executive Coaching is available as a resource to provide support and guidance, offer career and network
resources, and help with any obstacles and challenges students may encounter.

Applications are accepted on a rolling basis for admission. The MHA program has six starting points each year. All undergraduate majors are welcome, but the program requires a minimum of two years of previous experience in a health care management or supervisory position.

Admission Requirements

Online Application

- Bachelor’s degree from an accredited college/university (minimum 3.0 GPA)
- Official Transcript
- GRE (reporting code 7534) or GMAT (reporting code 44X-HX-74)—Not required, but recommended for students with lower undergraduate GPA
- TOEFL (reporting code 3276) or IELTS scores (if applicable) from within the past two years
- Personal statement
- Two letters of recommendation
- Resume
- At least two years of previous experience in a health care management or supervisory role.

Degree Requirements

Twelve courses are required to complete the Master of Health Administration. There are no electives.

Required Courses
- Introduction to Health Care Systems and Organizations
- Health Policy
- Health Care Quality Management
- Health Care Innovation-Based Strategy: Managing Change
- Management Theory and Organizational Behavior
- Leadership in Health Care
- Health Care Human Resources Management
- Health Care Information Technology
- Health Care Law and Ethics
- Health Analytics for Decision Making and Critiquing and Assessing Evidence
- Health Care Finance
- Health Care Strategic Planning and Marketing
- Tuition for WCAS MHA is $1190 per credit.

Master of Science in Applied Economics

Program Description

The Master of Science in Applied Economics offers a practical and comprehensive curriculum to students interested in acquiring skills related to the analysis and interpretation of data across a variety of fields. Graduates will be equipped to understand the context of data they are analyzing, analyze the data, interpret and present results to decision makers, and make recommendations bolstered by the results of the data analysis. The program provides individuals with extensive training in the tools and methods necessary for understanding complex policy issues, industry trends, and analytic strategies within specialized fields of economics including health care, finance, marketing, and environmental policy. These skills are developed within a curricular framework that emphasizes reflective, people-centered, ethical decision making that
reflects the Jesuit, Ignatian tradition. The program is intended for individuals seeking to begin or advance careers in industry, policy and government, or the financial sector.

The Master of Science in Applied Economics is a ten-course degree program. The program can be completed in a 16-month period, but is designed to be flexible in meeting the needs of students. As a working professional, you may wish to attend full- or part-time. Applications are accepted on a rolling basis for admission in the fall or spring semesters. All undergraduate majors are welcome. Financial aid and career assistance are available.

Admission Requirements

- Bachelor’s degree from an accredited college/university (minimum GPA 3.0)
- GRE (reporting code 7534) or GMAT (reporting code 44X-HX-74)
- Personal Statement
- Two letters of recommendation
- Resume
- Application Fee ($45)
- Brief interview (in person or via video interface)
- Prerequisite courses: Principles of Microeconomics, Principles of Macroeconomics, Statistics, Calculus I and II.*

*Calculus II may be taken concurrently during your first semester of study. This requirement can also be fulfilled by taking ADEC3510 Mathematics for Economists. Note: This course does not count toward the degree.

International Students
In addition to the general requirements listed above, international students should provide the following:

- TOEFL (reporting code 3276) or IELTS scores, unless they have completed their undergraduate degree at a regionally-accredited U.S. institution, or a foreign institution in which English is the medium of instruction.
- Detailed course-by-course transcript evaluation indicating conferral of an undergraduate degree that is equivalent to a U.S. bachelor’s degree from an accredited institution.

Degree Requirements

Ten courses are required to complete the Master of Science in Applied Economics.

Core Requirements

- Applied Microeconomic Theory
- Applied Macroeconomic Theory
- Econometrics
- Data Analysis
- Ethics, Economics and Public Policy

Electives

- Directed Readings and Research
- Health Care Economics
- Advanced Urban and Regional Economics
- Economics of Banking and Insurance
- Financial Economics
- Applied Stress Testing for Economists
• Empirical Health Economics
• Empirical Money and Banking
• Operations Research in Applied Economics
• Development Economics
• Big Data Econometrics
• Private Sector Development and Economic Growth
• Predictive Analytics/Forecasting
• Ethics, Economics and Public Policy
• Law and Economics
• Transfer Pricing
• Measuring Business Cycles, Trends and Growth Cycles
• Economics of Innovation and Entrepreneurship
• Software Tools for Data Analysis
• Market Research and Analysis
• Fundamentals of Private Equity
• Environmental Economics
• Directed Practicum

Scheduling and Cost

Graduate courses are scheduled ordinarily from 6:30 p.m.–9:00 p.m. on week nights and 9 a.m.–12 p.m. and 1 p.m.–3:30 p.m. on Saturdays. Courses meet face-to-face with some offered as hybrids and online. Tuition in the Applied Economics program is $1,172 per credit hour plus the registration fee of $25.

Master of Science in Cybersecurity Policy and Governance

Program Description
The Master of Science in Cybersecurity Policy and Governance provides students with the skills necessary to manage the critical and emerging cybersecurity issues faced by private industry and government. Taught by industry leaders and practitioners, students will learn applied and hands-on ways to identify, assess, and manage cyber risk, and to develop and implement a proactive, comprehensive cybersecurity strategy to effectively defend, mitigate, and recover from a cyber attack. The program prepares practitioners to lead and design a business case for investment to senior executives, boards of directors, and government officials, and to bridge the communication gap between Information Technology (IT) security professionals and key business stakeholders.

Students also will learn to cultivate strategies based on ethical principles informed by company policies and government regulations to protect against and respond to cyber threats. The program emphasizes leadership, critical thinking, analytic problem solving, and strong communication skills preparing practitioners to meet and respond to the varying issues presented by the rapidly changing cyber ecosystem.

The Master of Science in Cybersecurity Policy and Governance is a ten-course degree program that can be completed in a 16-month period, but is designed to be flexible in meeting the needs of our students. The program is intended for business and government professionals, managers, and practitioners, IT professionals, and individuals seeking skills in cybersecurity strategy, leadership, management, and policy to begin or advance careers in private industry or government. As a working professional, you may wish to attend full- or part-time. Applications are accepted on a rolling basis for admission in the fall or spring semesters. Financial aid and career assistance are available.

Admission Requirements:
Online application form
Application fee $60 (to be paid as part of the online application)
Bachelor's degree from accredited college with GPA of 3.0 or higher
Official transcripts from undergraduate institution
Personal statement
Two letters of recommendation
Résumé
Brief interview (in person or by phone)
GRE (reporting code 7534) or GMAT (reporting code 44X-HX-15) scores*
3-5 years of professional experience involving information technology, cybersecurity related issues, business management, communications, privacy, risk management and compliance, and/or law enforcement and national security concerns. Applicants with less than 3 years of professional experience will be considered for admission based on their academic credentials and relevant coursework.**

*A waiver may be granted based upon relevant professional work experience and/or GPA from accredited college. If you believe you qualify for such a waiver, we recommend you submit your application without submitting GRE/GMAT scores. If you have any questions, please contact the Program Director at kevin.powers@bc.edu.

**Applicants who do not meet this requirement also may be considered for admission with the following condition: the completion of an approved course(s) as a non-degree student within the Cybersecurity Program, as approved by the Program Director, with a grade of B or higher. If you have any questions, please contact the Program Director at kevin.powers@bc.edu.

Program Requirements
Ten courses are required to complete the Master of Science in Cybersecurity Policy and Governance. See Admission Requirements for prerequisites, if applicable.

**Core Requirements (6 Courses)**

- ADCY6000 Cyber Ecosystem and Cybersecurity
- ADCY6050 Cybersecurity Policy: Privacy and Legal Requirements
- ADCY6300 Network and Infrastructure Security
- ADCY6350 Incident Response and Management
- ADCY6500 Organizational Effectiveness: Governance, Risk Management, and Compliancy
- Ethical Issues in Cybersecurity and the Ignatian Paradigm

**Sample Electives (4 Courses)**

- International Cybersecurity
- Investigations and Forensics
- Establishing the Business Case and Resource Allocation
- Security in the Cloud
- Establishing the Business Case and Resource Allocation
- ADCY6650 Role of Intelligence: Enabling Proactive Security
- Applied Research Project

**Scheduling and Cost**

Graduate courses are scheduled ordinarily from 6:30–9 p.m. Tuition in the Cybersecurity Policy and Governance program is $1,172 per credit after the registration fee; the registration fee is $25. This fee may be waived for veterans.

**Master of Science in Leadership and Administration**
This program is designed to help you acquire high level management skills and competencies necessary for effective leadership. With a foundation in applied research and data analysis, finance, project management, and Ignatian-based, applied ethics, you will graduate from this program a grounded and confident leader. With four specializations to choose from, this degree is designed to equip you with the skills and knowledge to lead in a variety of professions.

The following courses make up the core of the M.S. in Leadership and Administration Program: the first two courses to be taken are normally Research Methods and Data Analysis (ADGR7703) and Project Management (ADGR7708). These two courses are followed by Accounting and Financial Analysis (ADGR7704), Evolution of Successful Marketing Strategies in the Digital Era (ADGR7777), and Leadership and Decision Making: Ignatian-Based Applied Ethics (ADGR7785). In addition, a final capstone course is required. Students then select one of the following four degree specializations by petitioning the Associate Director: Corporate Communications and Marketing; Executive Leadership and Organizational Development; Human Resources Management; or Project Management. Each specialization may also be obtained as a stand-alone certificate. Specific courses are listed below.

Courses are normally scheduled between 4:30 and 9:45 p.m. during the fall, spring and summer semesters, along with select weekend offerings.

**Graduate Admission Standards**

The M.S. in Leadership and Administration program is open to graduates of regionally accredited liberal arts colleges regardless of undergraduate major. A minimum B average in an undergraduate major is ordinarily required for admission. If a student is admitted with a GPA below 3.0, he or
she must take Research Methods and Data Analysis (ADGR7703) and Project Management (ADGR7708) and earn a B or better to remain in the program. These two courses must be completed in the first semester of study.

NB: Only the course numbered ADGR7703 is acceptable for the Research Methods and Data Analysis requirement. If you have any questions please check with an advisor before registering.

Documentation of proficiency in the areas of computer applications and statistics is also required for acceptance. Evidence of proficiency must be provided in one of two ways:

- Documentation of proficiency

  a. Passing with a C- or better in previous coursework in these areas (e.g., statistics or computer based course) or

  b. Professional experience that is detailed and documented in a letter of recommendation from the student’s workplace (from within the last five years of employment)

- A personal essay and two letters of recommendation must also be submitted.
- The Graduate Record Exam (GRE) is optional (as are the GMAT or MAT). However, these optional test scores can serve to strengthen an application for admission.
- TOEFL (reporting code 3276) or IELTS scores (if applicable) from within the past two years.
- An Interview (in person or via Skype) may be requested.
Course Offerings

Required

- ADGR7703 Research Methods and Data Analysis
- ADGR7704 Accounting and Financial Analysis
- ADGR7708 Project Management
- ADGR7777 Evolution of Successful Marketing Strategies in the Digital Era
- ADGR7785 Leadership and Decision Making: Ignatian-based Applied Ethics
- ADGR9902 Applied Research Project

Students choose from one of four specialized tracks below.

Corporate Communications and Marketing Specialization

- ADGR8028 Public Relations
- ADGR8041 Persuasive Communication
- ADGR8120 Marketing Analytics
- ADGR8006 Communication in a Global Work Environment

Executive Leadership and Organizational Development Specialization

- ADGR8010 Leader as Change Agent
- ADGR8015 Business Strategy
- ADGR8044 Leadership: Theory and Practice
- ADGR8046 Organization Theory and Design

Human Resources Management Specialization

- ADGR8030 Talent Management
- ADGR8053 Employment and Labor Law
- ADGR8055 Human Resource Development
- ADGR8090 Workforce Planning

*Project Management Specialization*

- ADGR Applied Techniques, Software and Reporting
- ADGR Risk Management, Quality Management
- ADGR Stakeholder Management and Procurement
- ADGR Agile Methodologies

*Scheduling and Cost*

Graduate courses are scheduled ordinarily from 4:30–9 p.m. Tuition for the Leadership and Administration program is $870 per credit after the registration fee; the registration fee is $25. This fee may be waived for veterans.

*Master of Science in Sports Administration*

The Master of Science in Sports Administration (MSSA) at Boston College addresses the challenges and opportunities of an industry in rapid growth. Designed to propose new thinking and broaden leadership competencies for those in sports management as well as administrators and coaches, this degree focuses on balancing the needs of the many stakeholders within an athletic system. The Sports Administration master’s degree program focuses on development and cultivation of the individual, team, and organization through the establishment of an intentional culture of trust and commitment which adheres to the broader core values of the institution.
Students will learn how to guide team members into alignment and learn how to embrace and overcome setbacks through a positive focus on teamwork and collaboration. Using the Jesuit principles as the foundation for leadership and decision-making, graduates will learn how to authentically lead and bring out the best in others by espousing core values as guiding principles.

**Graduate Admission Standards**

**Online application form**

- Application fee $45 (to be paid as part of the online application)
- Bachelor’s degree from accredited college with GPA of 3.0 or higher*
- Transcripts from each college or university in which you were enrolled (see transcript requirements for international students).
- GRE (reporting code 7534) or GMAT (reporting code 44X-HX-15) scores**
- Personal Statement
- Two letters of recommendation. (Letters must be sent directly from recommender either through online application portal or directly to Woods College. We will not accept letters that are not in a sealed envelope mailed directly from recommender or emailed directly from recommender).
- Resume
- Brief interview (in person or via Skype)

*Applicants with GPA lower than 3.0 will be reviewed on a case by case basis.

**Waiver may be granted based upon relevant professional work experience and GPA from accredited college.
Course Offerings

- Introduction to Sports Administration
- Sports Law and Compliance
- Sports Communication and Marketing
- Sports Finance
- Sports Leadership and Ignatian-Based Ethics
- Sports Management for College and Professional Athletics
- Sports Analytics
- Coaching for Performance and Student-Athlete Development
- History of Sports
- Applied Research Project or Internship

Scheduling and Cost

Graduate courses are scheduled ordinarily from 4:30–9:00 p.m. Tuition for the Sports Administration program is $1,172 per credit after the registration fee; the registration fee is $25. This fee may be waived for veterans.

Summer Session

Boston College Summer Session offers undergraduate and graduate students the opportunity to enroll in core and elective courses or in special programs not offered by Boston College at any other time of the year.

The Summer Session runs from early May through the first week in August. Most courses grant three credits and are the equivalent of one semester of the regular academic year. Within the same period some intensive three-week courses enable students to take two sequential semesters of a subject. Students may register for either session or both according to individual needs.
Summer Session does not grant degrees. Students who desire credit transferred to their degree programs at Boston College should obtain permission from the Dean of their home school. Students from outside Boston College who wish to transfer their course credit to their home institution should seek permission from the Dean of their home institution. Individuals may register in advance by mail or in person at the Summer Session Office in St. Mary’s Hall South, Ground Floor.

LAWS218101
Constitutional Law: Speech and Religion
GREENFIELD, HAROLD K
Fall 2019
In this course, students will study the First Amendment rights of free speech, religious exercise, and non-establishment of religion. The course will cover the theories of these rights, their original meaning, and how they have evolved over time. Students will also analyze how these rights overlap or conflict. The course will cover the substance of the rights in question as well as the proper claimants; including whether and when corporate entities can bring constitutional claims. Students will gain a sophisticated knowledge of existing law and develop a strong theoretical foundation for evaluating future cases.

LAWS219001
Professional Responsibility
WHITE, BRANDON F  
**Fall 2019**

This course focuses on central issues of professional responsibility faced by most lawyers in the practice of law, whether in the public or private sector. Included may be problems of client confidences, conflicts of interest, behavior in court, obligations to represent unpopular clients, and other restrictions on a lawyer's own speech and actions. Other topics focus on the fundamental moral responsibility of lawyers, analyzed in terms of the rules governing attorney conduct, principles of moral philosophy, and the pressures that create ethical blindness.

Legal Analysis for Practice
MC MORROW, JUDITH A
Fall 2019
This course will further develop and strengthen students' legal analysis and problem-solving skills. Using a practice-oriented approach, the class puts students in the position of new associates at a law firm working with a senior partner (the professor). The course focuses on enhancing fundamental lawyering skills such as reading comprehension, rule mastery, issue spotting, outlining, the mechanics of legal analysis, and strong writing. Throughout the course, students will have multiple opportunities for hands-on practice of these skills through focused drills, group exercises, and workbook activities. The course enhances learning by providing students with individual feedback to learn how to evaluate their work and see a clear pathway for consistent improvement. Evaluation will be based on (1) Good faith completion of a Diagnostic Exam; (2) Timely completion of all quizzes, in-class assignments, and homework assignments; (3) Class Participation; (4) Compliance with Attendance Policy; (5) Midterm Exam; and (6) Final Exam.

LAWS334801  
**Advanced Topics in Civil Rights: Microaggressions**  
WELLS, CATHARINE P  
**Fall 2019**
The Civil Rights Movements of the 1960's and '70's eliminated formal barriers to participation in nearly all American institutions. Nevertheless, it is apparent that informal barriers remain. What are these barriers and how do they inhibit women and minorities from moving forward? Numerous authors have tried to answer this question by describing and documenting certain kinds of race based behavior. These include micro-aggressions ("subtle verbal and non-verbal insults directed toward non-Whites, often done automatically and unconsciously"), implicit bias, denial, stereotyping, stigmatizing, profiling, over-reliance on "old boy networks," etc. In this seminar, we will read descriptions of these phenomena and consider what, if anything, the legal system or society should do about them.

LAWS337801
Roman Law
SULLIVAN, WILLIAM P
Fall 2019
Roman law has a strong claim to the title of the most influential body of legal concepts and reasoning in world history; most countries of the world derive at least part of their legal conceptual terminology from Roman law. The aims of this course are: (1) to sketch the main lines of historical development of this law from antiquity down to the nineteenth century; and (2) to survey some major areas of Roman legal doctrine that bear comparison with the common law.

LAWS339301
Death Penalty
DOWDEN, JAMES P
Fall 2019
This seminar will examine legal issues surrounding the death penalty in America from a variety of perspectives. After a review of the goals of punishment and their relation to capital punishment, the course will explore: constitutional challenges to the imposition of the death penalty, focusing on claims relating to equal protection, due process and cruel and unusual punishment; race; special offenders, including juveniles, the mentally retarded; modes of punishment and ethical issues; and the impact of international law. A major focus of the course will include the procedural issues in trials for capital offenses, as well as post-conviction proceedings with a particular emphasis on federal habeas litigation. Materials for the seminar will include a collection of essays providing diverse views of the death penalty, as well as central Supreme Court case law in this area. Seminar requirements will include a final paper, a presentation on the paper; and class participation.

LAWS396101
Business and Human Rights
TAMIR, IRIT N
Fall 2019
Human rights are traditionally thought of as a set of norms and practices to protect individuals from threats by the state as a result of a state's duty to secure the conditions necessary for people to live a life of dignity. Gradually, obligations under this regime were extended to individual persons, including heads of state, seeking to hold them to account for conduct that rises to the level of international crimes. The 1990s marked an effort to expand these norms to business enterprises, particularly multinational corporations. In 2011, the United Nations Human Rights Council unanimously endorsed the UN Guiding Principles on Business and Human Rights (UNGPs). Key elements of the UNGPs have also been adopted by numerous other international and national standard setting bodies, individual companies and business associations, workers organizations and civil society actors. This course will look at the governance gap prior to the UNGPs and their emerging doctrine, along with the three pillars they present, the state duty to protect, the business responsibility to respect, and access to remedy. In addition, participants will simulate an experience in developing a human rights impact assessment and advocacy strategy for holding corporations accountable. Students will be evaluated on two projects throughout the semester and a final paper along with class participation.

LAWS412001
Advanced Civil Procedure
SPIEGEL, MARK
Fall 2019
Advanced Civil Procedure is an in-depth consideration of advanced topics that commonly arise in more sophisticated forms of civil litigation, but are omitted or only introduced in the basic course. Topics covered include class actions and other forms of aggregate litigation including multi-district federal litigation; pretrial and discovery processes in complex litigation; and discussion of alternative dispute resolution. These topics are critical for prospective litigators in corporate and public interest settings as they comprise a significant part of the issues faced in modern litigation. They are also important for aspiring non-litigators who, as corporate lawyers, tax lawyers, trusts and estates lawyers and intellectual property lawyers practice law in the shadow of civil litigation. Evaluation will be by responses to problems and a take-home examination.

LAWS440301
Employment Law
KOHLER, THOMAS C
Fall 2019
This course addresses the legal regulation of employment of those without any form of collective representation, including executives, hourly and contingent employees. It addresses three major areas: (1) The common law regulation of the employment relationship. This includes formation of the employment relationship; common law exceptions to the at-will rule; privacy and dignitary protections (including electronic media); trade secrets and other intellectual property concerns; restrictions on competition; the use of arbitration as a means to avoid jurisdiction of common law courts. (2) The second area covered is federal regulation of wages and hours pursuant to the terms of the Fair Labor Standards Act (an area of substantial growth and litigation). (3) The law under the Occupational Safety and Health Act. This is a dynamic and controversial area of the law. Consideration of current developments and trends, economic and social, as well as comparative legal approaches, are included.

LAWS441101
American Legal Theory
Wells, Catharine P
Fall 2019
This course will survey the important developments in American legal theory from 1880 to the present time. Coverage will include Legal Formalism, Legal Realism, Sociological Jurisprudence, Legal Process Theory, Theories of Natural Law, Critical Legal Studies, Feminist Legal Theory, and Critical Race Theory. The course does not require previous familiarity with jurisprudence or philosophy of law.
LAWS441202
Intellectual Property Survey
LIU, JOSEPH
Fall 2019
This survey course emphasizes federal copyright, trademark, and patent law and related state trade secret, rights of publicity, and unfair competition law. It is meant to provide students with a general working knowledge of the various intellectual property doctrines, and an understanding of how the individual intellectual property doctrines compare, contrast, and may be used to complement one another. This course is appropriate for the generalist who wants to understand and be able to analyze IP issues, which are ubiquitous in the modern practice of law. It is also appropriate as the first introductory course for students interested in taking a number of IP courses.

Privacy Law will take a practical approach in the context of privacy theory and the evolving global web of privacy and security laws, regulations, industry standards, and best practices. We will explore, from an individual perspective, a corporate perspective, and a law enforcement perspective, the scope and nature of an individual's right to control his or her personal information held by others. We will also consider recent controversies such as those involving big data/AI, facial recognition, encryption, domestic surveillance, ad-targeting, virtual reality, cross-device matching, mobile device geolocation, social networking, video surveillance, haptic security, biometrics, and DNA databases. With the new European General Data Protection Regulation ("GDPR") taking effect in May of 2018 and authorizing fines of up to 4% of annual worldwide revenue, now is a perfect time to develop your privacy compliance expertise!

LAWS443401
Seminar: Labor Market Regulation
HAFIZ, HIBA M
Fall 2019
This seminar will examine the scope and effect of existing public regulation of labor markets--with a primary focus on the National Labor Relations Act, Fair Labor Standards Act, Title VII, the Occupational Safety and Health Act, and the antitrust laws--to assess their strengths and limitations in effectuating workplace protections and combating economic inequality. The seminar will begin with a historical overview of the origins of existing regulation and evaluate their adaptability to current workplace realities. We will focus in particular on the adaptability of existing regulation to the gig economy, subcontracted and outsourced work, temporary work, work provided by independent contractors, and low-wage work. In analyzing the limitations of current protections, the seminar will focus both on substantive rights and obligations imposed by current law as well as the role and ability of labor market institutions--unions, governmental agencies, and corporate forms--in ensuring or undermining those rights and obligations. In tandem with specific statutes, the seminar will focus on proposed reforms generated by Congress (in draft legislation), legal academics, policy experts, and social movements like the Fight for $15.

LAWS443901
European Union Law
PERJU, VLAD

Fall 2019

This course provides a general overview of the legal architecture of the European Union. It introduces students to the complex relationship between the European legal order and the national legal systems of Member States. Students will study the Union's major institutions and decision-making mechanisms as well as substantive legal matters that include fundamental rights, free movement of persons and goods, non-discrimination. This course is a prerequisite for participation in the SIP Dublin but is open to any student interested in the present and future of Europe.

LAWS444401

Local Government Law
FARBMAN, DANIEL S

Fall 2019

This course examines the most pervasive and complex form of public law in the United States - the law of local governments. In examining the doctrine (and lack thereof) defining local government law, the course provides a foundation for the many areas of legal practice that deal with local issues, disputes, and concerns. More broadly, the course asks whether local governments serve or impede broader commitments to equality, democracy, inclusion, and participation. We will focus on issues such as federal and state control of city decision-making, the conflict between central cities and suburbs and among the suburbs themselves, alternatives to city-delivered services and to city taxation as a source of local revenue, and the ways in which racial and ethnic division fracture American metropolitan areas. Above all, this is a course about local democracy. For that reason, among others, active class participation is an integral part of the course and will be expected of every student enrolled in it.

LAWS444901
The Art of Lawyering and the Commercial Lease
RECK, JOEL M
Fall 2019
This course is for second and third year students. It is an exercise in the art of transactional lawyering, using commercial leases in a shopping center as a centerpiece. Through the study of a textbook, cases, statutes, and commercial documents, as well as through drafting and negotiation exercises, everything the student has learned in law school will converge on the problems that fictional clients bring to the class for solution. We will explore the choice of business entity, letters of intent, percentage rent, use restrictions, anti-trust, free speech in the shopping center, restrictions on transfer of interest by landlord and tenant, relationships and contracts with abutters, environmental issues, green leases, defaults and remedies, ethical issues, and bankruptcy. The course grade will be determined 50% by performance on drafting assignments and negotiation exercises and 50% by the extent and quality of class participation. There will be no final exam.

LAWS445101
International Arbitration
O'NEILL, PHILIP D
Fall 2019
The old maxim "where business goes, disputes soon follow" has renewed vitality in an age of globalization. As cross-border commerce follows American business abroad, and offshore foreign investment flows into the U.S., the potential for clashes in the business expectations of the parties increases. Commercial dispute resolution thus becomes an almost inescapable component of today's private international business experience. Course covers the management of the international commercial dispute process, from inception in the contractual drafting through the mechanics of the dispute resolution process to the enforcement stage. Focus of the course will be on international arbitration, with some consideration of alternative dispute resolution techniques. Original case studies and related materials are largely drawn from actual practice. Course is designed for prospective corporate attorneys as well as litigators. Optional paper of 20 pages is available to provide a third credit.

LAWS445901
Semester in Practice Seminar
GOULD, PATRICIA; WYLIE, NORAH
Fall 2019
The SiP Seminar brings together extern students for a weekly discussion of common practice issues and seminar discussions of current issues in the the practice of law, such as changes in the U.S. legal profession, the adversary system, and unmet legal needs. The goal of the seminar is to develop better understanding of the forces that shape a lawyer's professional identity and to learn to become a reflective legal practitioner. This course enables students to bridge the gap between law school and practice. Students keep a daily journal and share their entries weekly with the instructor. Students are required to write a substantial 20-25 page paper on a topic approved by the professor in lieu of an exam. Enrollment by lottery.

Credits: 02
Schedule: W 5-6 50
Prosecutorial Ethics
CASSIDY, R MICHAEL
Fall 2019
This course addresses constraints on prosecutorial power in the United States criminal justice system. Students will study constitutional constraints on prosecutorial discretion under the 5th and 6th Amendment, and particular Model Rules of Professional Conduct that limit or curtail prosecutorial conduct during the investigation and prosecution of crime. Particular topics addressed will include the prosecutor's conduct before the grand jury, charging decisions, plea bargaining, disclosure of exculpatory evidence, trial conduct, contacting and interviewing witnesses, and relations with the media. For additional 1 credit students may write a 15 page research paper on a topic to be agreed upon with professor. There will be an in-class examination.

Wrongful Convictions
BECKMAN, SHARON L
Fall 2019
This seminar gives students the opportunity to study the phenomenon of wrongful convictions, including the causes of, and possible solutions to, the problem and its significance for the criminal justice system. Readings, films, guest speakers, and discussions provide students with a range of perspectives on the issues. The academic experience is enriched by the students' ability to draw on their clinical and externship experiences.

Energy Law and Deregulation
MOSKAL, JOHN F; DUFFY, DENNIS J
Fall 2019
This survey course focuses on the law and public policy of electricity and natural gas, with discussion of both market and environmental regulation. The course will examine the frequent tensions between economic and environmental regulation. There will also be analysis of the Constitutional law applicable to the energy industries, including Commerce Clause and Supremacy Clause limitations upon state energy policies. Class time will also involve review of ongoing political and industry developments. There will be particular focus upon the development and financing of renewable energy resources.

Advanced Legal Writing
MACLEOD, HELEN H
Fall 2019
This course focuses on legal analysis and writing with a particular focus on the audience and purpose of written legal communications. The primary purpose of this course is to assist students in becoming practice ready attorneys. Students will continue to build on the skills gained in their First Year Legal Research and Writing course and need only an interest in bettering their writing skills, including their editing skills. Using hypothetical client problems and a simulated court record, students will write client communications, including client letters and electronic communications, as well as pretrial civil litigation documents, such as legal briefs. Students will spend course time discussing each written assignment, reviewing drafts, and collaborating on in-class exercises.

LAWS448601
Civil Rights Law
STROUD, HERNANDEZ D
Fall 2019
This course comprises an advanced constitutional and statutory study of the noncriminal statutes that Congress has enacted to protect civil rights in the United States. The course will proceed in two parts. First, we will focus on statutes passed during Reconstruction after the Civil War which authorize the enforcement of federal constitutional rights (e.g., police brutality cases), including limitations on the liability of officials and government bodies. Second, beginning with the Civil Rights Act of 1964, we will consider a wide range of substantive civil-rights violations, including due process violations, equal protection violations, denial of free speech, voting and public accommodations and discrimination, excessive force, unlawful searches and seizures, and unlawful prison conditions. Time permitting, the course will also contemplate current federal and/or state action, like Supreme Court litigation, implicating civil rights.

**LAWS448801**  
**International Business Transactions**  
**ROLLAND, SONIA E**  
**Fall 2019**  
This is a course on the globalization of private economic relationships and the global regulation of such activity. In particular, the course will focus on identifying and solving the legal problems affecting cross-border transactions in a global regulatory environment. Students will become familiar with the nature of globalization and the global economy; fundamental patterns of business activity across national boundaries; the international legal framework for regulating such activity; and the unique issues raised by sales of goods, licensing, foreign investment, and dispute resolution. Private and public law aspects of international business transactions will be examined, including conflicts of law, foreign law, and select issues in WTO, NAFTA, and EU law.

LAWS450101
New Frontiers in Environmental Policy
SCANLAN, MELISSA K
Fall 2019
This seminar explores the proposition that successfully coping with today's environmental threats requires deeper challenges to our prevailing system of political economy than mainstream environmentalism in the United States has been willing to mount. It develops the idea that a new American environmentalism is needed and with it new environmental policy and law that go beyond the traditional realm of environmental affairs. Students learn about the nature of the modern corporation and its role in politics and in an increasingly globalized marketplace; consumerism and commercialism and the lifestyles they offer; the overriding priority routinely accorded economic growth; social injustice and its links to environmental prospects; the anthropocentric, materialistic, and contemporocentric values that currently dominate American culture; and the prospects for a new environmental politics. We will interrogate whether it is desirable and possible to transition to a new economic model where the priority is to sustain human and natural communities, and, if so, what new policies and politics might promote such a transition.

LAWS450301
Water Law and Policy
SCANLAN, MELISSA K

Fall 2019

Water is the planet's "blue gold." In this course, students will understand the U.S. laws and policies that have shaped how this valuable resource is shared among competing users, and explore how the law needs to evolve to meet emerging demands. Students learn about the Clean Water Act, riparian and appropriation doctrines, the public trust doctrine, the intersection of water quality and quantity as well as surface and groundwater. We also examine water institutions, transboundary compacts, and federalism. Throughout, we tie the law back to contemporary dilemmas, and the role of science and economics in shaping water law and policy.

LAWS552101

The United States Legal System

SIMONE KANG, SUSAN A

Fall 2019

This course is required of LL.M. students who do not hold a U.S. J.D. degree. The course has several objectives: exposing students to fundamental concepts underlying the U.S. legal system, providing survival skills for the LL.M. year, exposing students to key doctrinal areas, and offering a frame of reference for comparing the U.S. legal system with students' own. The course is divided into three units: (a) an overview of our basic legal institutions, including the adversary system, the Constitution, and the Bill of Rights; (b) a case study in product liability law, as both substantive exposure to private law and an exercise in identifying and manipulating legal doctrine; and (c) an examination of how the structure of the legal profession and different modes of lawyering contribute to the functioning of the U.S. legal system as a whole.

Nonprofit Organizations
MEDVEDOW, ELISABETH J
Fall 2019
This is a course in the law and theory of charities and other not-for-profit organizations. Our primary emphasis is on understanding the state and federal law governing these organizations, together with the rights and responsibilities of their members, officers, and directors. For example, we will explore what is a qualifying "charitable" activity, limits on the commercial and political activities of nonprofits, and rules for executive compensation. Our legal discussion will be informed by an exploration of the purposes of charity, whether it has a unique social mission, and what implications those theories have for the proper governance of the sector. There will be an open-book, in-class 3-hour final exam and occasional ungraded (i.e., fun) in-semester projects.

LAWS667601
International Environmental Law
WIRTH, DAVID

Fall 2019
This course addresses the nature, content, and structure of international environmental law. The course commences with an introduction to international environmental problems, together with basic principles of international law and environmental regulation. Specific topics include global warming, stratospheric ozone depletion, and exports of hazardous substances. Other topics may include marine pollution, transboundary pollution, trade and environment, and development and environment. The course evaluates the role of international and non-governmental organizations; the interrelationship between international legal process and domestic law; and the negotiation, conclusion, and implementation of international environmental agreements. Class meets at the Fletcher School, Graduate School of International Affairs, Tufts University.
LAWS667901
Trusts and Estates
MADOFF, RAY D
Fall 2019
This course explores the basic law surrounding the disposition of property at death: (1) overview of the estate planning process and the policy considerations regarding inheritance law; (2) the process by which property is distributed in the absence of a will (intestacy); (3) the law of wills, examining challenges to the will, formal requirements for the execution of a valid will, revocation, and construction; (4) will substitutes and planning for incapacity; (5) the law of trusts, including revocable and pour-over trusts, and creditor and beneficiary rights; (6) brief coverage of powers of appointment, perpetuities, charitable trusts, and general tax considerations. This course does not address in detail tax-motivated estate planning (see instead Estate and Gift Tax and Estate Planning).

Commercial Law: Secured Transactions
HILLINGER, INGRID M
Fall 2019
This course explores secured financing--transactions in which a creditor, a lender, or a seller takes a security interest in collateral to secure its ability to be repaid. The course focuses principally on secured transactions involving personal property and fixtures (Article 9 of the Uniform Commercial Code). It examines the debtor-secured creditor relationship at state law and in bankruptcy. The course adopts a problem-solving approach. Class time is devoted almost exclusively to analyzing the assigned problem. This is a basic or "primer" course for business law practice. It also provides an intense experience in interpreting statutes.

Telecommunications Law
LYONS, DANIEL A
Fall 2019
This course surveys the basic principles underpinning our nation's telecommunications laws. We will explore the legal and regulatory treatment of several related telecommunications services, including landline telephone, wireless, cable, and internet service, and how technological developments have challenged the existing legal framework. The course will focus on administrative and statutory law, paying special attention to the design and implementation of the Communications Act of 1934. The course will also address the role of antitrust, intellectual property, and constitutional law (particularly the First Amendment) in shaping our nation's telecommunications landscape. Finally, the course will consider the role played by state and federal agencies, such as state public utility commissions and the Federal Communications Commission, in developing and administering telecommunications policy.

LAWS764501  
Election Law  
BROWN, GEORGE D  
Fall 2019  
This course focuses on issues relating to the franchise. The franchise is central to a democratic republic. Voting not only determines who will be in the government, it establishes the legitimacy of any government that flows from accountability to the governed. Thus, a government must establish and protect a franchise that is fairly available and fairly administered. However, this seemingly simple goal masks a wide range of problems. Some examples are redistricting and gerrymandering (both partisan and racial), questions of voter suppression, including voter ID and "purging" of rolls, campaign finance, and bribery of candidates. The course is given in seminar form for 2 credits. The grading instrument is a paper of 25-30 pages in length. Students work closely with the instructor in developing and researching a topic.

LAWS765201  
Healthcare Law and Compliance  
SHAFF, LESLIE P  
Fall 2019
Healthcare Law and Compliance offers the student with a personal or professional interest in the healthcare industry and/or criminal law the opportunity to develop a basic understanding of the legal framework and ethical issues involved in today's healthcare environment. The seminar (2-credit hour once weekly) will use a practical, case-study approach to some of the issues arising in the complex world of healthcare enforcement and compliance. Emphasizing the procedural mechanisms of the False Claims Act and the substantive law of the Anti-Kickback Act, the Stark Laws, the Food and Cosmetic Act, the seminar will explore the following: how prosecutors, defense attorneys, whistleblowers, and compliance officers approach their work; the relationships between regulated industries (pharmaceuticals; hospitals; doctors; medical device companies) and government insurance companies (Medicare; Medicaid); legal and ethical issues arising from the expanding edges of healthcare technology and treatment.

**LAWS772901**  
**Advanced Constitutional Law: The Law of the Presidency and the Trump Administration**  
**BROWN, GEORGE D**  
**Fall 2019**  

Over the years of constitutional development a "Law of the Presidency" has arguably evolved. This course will examine whether we will see a more active role for the courts during the presidency of Donald Trump. President Trump has been involved in several major disputes, attacking both his policy decisions and his personal conduct. The range of issues is wide: separation of powers, federalism, the First Amendment, the Emoluments Clause, national security, immigration, and important federal jurisdiction issues. This is a two-credit course, given in seminar form. The grade is based on a substantial paper of 25-35 pages. The instruction materials are earlier cases and material from cases, articles and bills involving President Trump. These materials will be emailed as the course develops.

LAWS773101
Administrative Law
HAFIZ, HIBA M
Fall 2019
This course will examine the legal framework for the work of administrative agencies. We will explore the sources of authority for agency action under the U.S. Constitution and will examine the accountability of agencies to the legislative and executive branches of government. The course will survey the procedures that agencies must follow when they engage in rulemaking, enforcement, and adjudication. We will study the role of the courts in overseeing agency action. This course is intended to introduce students to regulatory agencies in a variety of substantive fields of law, such as financial, environmental, healthcare, immigration, labor, to name a few.

LAWS773901
Conflict of Laws
WILLIAMS, RYAN C
Fall 2019
Disputes often arise involving transactions, occurrences, or events that touch on the laws of different legal systems--a car crash in Missouri involving residents of California and New York, a contract between a U.S. purchaser and a seller in Italy, a marriage in Nevada between two Canadian citizens who reside in Massachusetts, etc. When such disputes result in litigation, how should a court determine which jurisdiction's laws govern which aspects of the parties' legal rights and responsibilities? This course examines the ways in which courts determine which substantive, procedural, and remedial law should be used to adjudicate disputes involving such multi-jurisdictional contacts. This course will be of special interest to students considering a career in litigation as the problem of conflicting law is endemic in modern litigation, and the ways in which courts resolve these conflicts is not intuitive. Topics covered will include the historical development of principles governing conflicts between the laws of different states within the U.S. legal system and modern approaches to such questions; the role of state and foreign law in federal court adjudication; constitutional limits on choice of law; and the legal effectiveness of judgments issued by courts in a different jurisdiction.

**LAWS774401**  
**Anatomy of a Cross-Border Insolvency**  
**KEACH, ROBERT J**  
**Fall 2019**
The purpose of this course will be to take students through a cross-border case from beginning to end, using Montreal Maine & Atlantic Railway Ltd. ("MMA") as the primary "hypothetical" case, but borrowing from and referring to the other recent cases as well. MMA was a unique case presenting a variety of cross-border issues; the case--precipitated by the tragic derailment at Lac Megantic, Quebec--has been described as a "mass tort, environmental disaster cross-border chapter 11, with a railroad reorganization attached to it." The course will illustrate the difficult legal, political & practical problems faced by practitioners in these cases. As a result of the journey through the case(s), students will be taught concepts of extraterritoriality (& its limits); jurisdiction over foreign persons & entities (& its limits); the doctrine of forum non conveniens in the international context; and comity (& its limits). Students will also learn the basics mechanics of chapter 15 (& its international counterparts) and its critical substantive and procedural components. Through the use of the MMA case study, students will be exposed to how these concepts and issues arise and are dealt with in an actual case, rather than being exposed only to the theoretical problems. Using experiential learning opportunities in the case, students will be placed in the position of the various parties & their counsel, with the attendant need to argue relevant positions and solve the problems it presented.

LAWS774601  
Copyright  
LIU, JOSEPH  
Fall 2019
This course studies the ability of authors, publishers, artists, and others to control the
distribution, sale, copying, and performance of their works. Topics will include the subject
matter of copyright, requirements for copyright, proof of infringement, and remedies. The
course will cover the application of copyright law to music and literature as well as the rapidly
developing use of copyright law to protect high technology products such as computer
programs. Students interested in pursuing careers in high technology law should seriously
consider taking classes in both copyright and patent law.

Family Law
BARROZO, PAULO D
Fall 2019
The practice of family law applies rights and duties to people who are in relationship to one
another, either through love, obligation, or blood. Social norms, customs, and practices are
constantly reimagining how and with whom these relationships are formed. This course looks at
historical and contemporary ways by which families are formed, maintained, dissolved, and
defined by law. The course in particular provides an overview of marriage, divorce, child
custody, parental rights, and adoption.

LAWS774901
Immigration Law
KANSTROOM, DANIEL
Fall 2019
U.S. immigration law involves such technical questions as how to obtain a visa, a "green card," citizenship and who is subject to deportation. It is also "a magic mirror" in which the highest aspirations and the deepest biases of American legal culture and history are reflected. This course explores both aspects of this complex area of law: the technical/legal and the political/philosophical. It involves constitutional law, administrative law, statutory interpretation, among other disciplines. There are traditional lectures, class discussions, in-class exercises, outside speakers, films, and court visits. The three-credit course requires class attendance, participation, and a final exam. More detailed information will be available in the first class. It is a pre- or co-requisite for the Immigration Clinic.

LAWS775201
International Aspects of U.S. Income Taxation
REPETTI, JAMES R
Fall 2019
This course provides an introductory examination of the basic rules and policies bearing upon the taxation of international transactions. The course will cover the major U.S. income tax rules governing the taxation of foreign persons (including corporations) investing and doing business in the United States (inbound transactions) and the taxation of U.S. persons (including corporations) investing and doing business abroad (outbound transactions). The goal of the course is to provide an overview of the structure, issues, and rules pertaining to the U.S. taxation of cross border transactions. The major issues examined include jurisdiction to tax, treaties, source of income, mechanisms for reducing or preventing double taxation of income, transfer pricing, and regimes that prevent deferral of U.S. income tax on certain types of income.

**Labor Law**  
**KOHLER, THOMAS C**  
**Fall 2019**

What do the NFL, Major League Baseball and other professional sport leagues, the entertainment industry, the Writers' Guild, as well as large portions of the health care, hospitality, service and manufacturing industries, to name a few, have in common? Collective bargaining and the law governing that process regulates employment relations in all these industries. This course examines the Nation's basic collective bargaining statute, the National Labor Relations Act, the statute that provides the basic model for public-sector labor relations as well. Among other issues, this course examines the legal framework for bargaining, for dispute resolution through the grievance-arbitration process, the regulation of economic pressure tactics, union organizing and a series of Constitutional issues affecting this area. Current trends are highlighted and existing doctrine is studied in light of its demonstrated or likely impact. Evaluation by examination.
LAWS776901
Health Law
NOBLE, ALICE
Fall 2019
This course will introduce students to patient care issues within the context of the U.S. health care delivery system. The course will cover both legal and policy aspects of: (1) Cost, quality, access, and health care delivery in the U.S.; (2) Medical liability and the provider/patient relationship; (3) Regulation of private health insurance and the impact of health reform; (4) Selected current issues in bioethics.

**LAWS777701**  
**Taxation II**  
**REPETTI, JAMES R**  
**Fall 2019**  
Taxation II explores the taxation of corporations. After a brief review of the other common forms for organizing a business and their distinctive tax treatments, the course focuses on the most important federal income tax issues relating to the organization, operation, liquidation and reorganization of publicly-traded corporations (and other "C" corporations). This includes the relationship between corporations and shareholders and the treatment of dividends and redemptions. The course is important for any student thinking of practicing in the general business area, even if she or he does not intend to become a "tax specialist."

LAWS778001
Tax Policy
OEI, SHU-YI
Fall 2019
This course examines legal, economic, political, and diplomatic considerations relevant to the formulation and implementation of U.S. federal tax policy. The class will be based on readings on three sets of issues: whether to tax consumption, income and/or wealth (and transition issues); how international considerations affect business taxation policy; and whether and how to use the tax system to reduce poverty on the one hand and to provide incentives to business on the other. The course’s coverage of selected tax policy literature is intended to equip students to critically assess the post-U.S. reform tax system (including new tax law provisions that are novel in one or more respects), the effect of U.S. reforms on international tax developments, and current tax policy proposals (including a wealth tax).

**Legal Scholarship Workshop: Regulation and Business**  
**SHNITSER, NATALYA; JONES, RENEE M; MCOY, PATRICIA A**  
**Fall 2019**  
This workshop will feature presentations by five or six invited legal scholars of their works-in-progress concerning law, business, and the regulation of economic activity, broadly construed. Students will meet with one or more BC faculty conveners the week before each presentation to discuss the paper. (The faculty conveners are: Renee Jones, Patricia McCoy, Diane Ring, Shu-Yi Oei, and Natalya Shnitser.) Students will prepare one-page response papers for each work-in-progress presented. Response papers will be shared with the authors. This workshop is designed for students who are interested in publishing during law school and in legal scholarship more generally. It is also well suited for students with an interest in economic regulation, business, and corporate governance. 1 credit, pass/fail.

LAWS778501
International Law
WIRTH, DAVID
Fall 2019
This course is designed to familiarize students with the operation and institutional structure of the international legal system, the law of nations that govern relations among states. The first portion of the course, consisting of somewhat more than half of the semester, will address the principal attributes of the international legal system, including (1) sources of international law; (2) subjects of international law; (3) jurisdiction of states; (4) international adjudication and dispute settlement; and (5) the law of treaties. The remainder of the course, as time permits, will be devoted to special topics, including such subject matter as the law of the sea; the international law of human rights; the use of force in international law; and diplomatic and consular immunity.

LAWS778901
Entertainment Law
BROWN, CHRISTOPHER L; ROSEN, JOSEPH
Fall 2019
Most entertainment law practitioners agree "Entertainment Law" has no set definition, but includes a hybrid of distinct areas of the law, including but not limited to, copyright, trademark, contracts, wills, estate planning, real estate, bankruptcy and intellectual property. Course focuses on the protection of IP and the contractual relationships between various parties in the Entertainment and Music Industry. A major focus will be analysis of the Copyright Act of 1976, as amended, the Digital Millennium Copyright Act, and the protection of IP and contractual rights in TV, film, music, books, etc. The relationship between the artist and his/her manager, agent, lawyer, and record company will be explored in great detail. Course will cover representation of artists and music labels and the problems they encounter. Students will participate in a group exercise where they negotiate a record deal on behalf of either the artist or the record label, and report back their terms to instructors.

LAWS784001
Patent Law
OLSON, DAVID S
Fall 2019
This course covers the major doctrines and policies at work in modern patent law. While current law will be taught in detail (both the 1952 Act and the America Invents Act), the course will also focus on enough history and policy so that students are equipped to deal with, and make predictions about, the rapid changes in patent law that we have witnessed recently and that we will continue to see. The course also has a skills component. Students will learn to review prior art, analyze the validity and novelty of particular patents in the form of claim construction charts, and make oral arguments for summary judgment on issues of validity, novelty, and claim construction in front of patent practitioners in the field.

LAWS786201  
Human Rights and Inequality  
YOUNG, KATHARINE  
Fall 2019  
The law of human rights is global and rests on a vast array of international human rights conventions, customary international law, and borrowed, transplanted, or migrating constitutional or statutory fundamental rights. These two avenues--the international and the domestic--are together examined in this course, using recently advanced techniques of comparative law. Our focus is on how the law of human rights conceives of, and addresses, the problem of inequality. In particular, we will study one set of human rights--the so-called "economic and social rights"--which include the rights to food, housing, health care, education, and water and sanitation. Of immediate interest to the American law student with a global, transnational, or comparative outlook, or to others interested in the changing idea-base of human rights law, law and political economy, law and equality, and law and social change, the course will emphasize the International Covenant on Economic, Social and Cultural Rights and its Optional Protocol, comparative legal developments in South Africa, Colombia, and India, and where and how the United States contributes to this rapidly developing field of law.
LAWS800001
Ninth Circuit Appellate Project
HONG, KARI E
Fall 2019
The Ninth Circuit Court of Appeals permits supervised law students to brief and argue immigration cases brought by indigent clients who would otherwise be without counsel. The Court screens pro se cases and selects those that present important issues that deserve further development by counsel. Past cases have included asylum, withholding, and CAT claims, immigration consequences of criminal convictions, and presented issues of first impression. The Court schedules the opening brief to be filed in September, the reply brief in December, and schedules oral argument before a panel of sitting judges in March of the same academic year. Students will travel to the scheduled court hearing to present oral argument. The Court then issues its decision based on the merits of the individual cases

LAWS811801
Environmental Legal Research
SHEAR, JOAN
Fall 2019
This course is designed as an in-depth look at the legal resources and research techniques used in the practice of environmental law. Strong emphasis on administrative law and the rulemaking process, legislative history, and government documents. Course will also review basic case law and statutory research. Students are exposed to strategies for using these materials competently, effectively, and economically in the research process to enable them to develop research skills necessary to be a successful environmental lawyer. Ungraded exercises allow students to track their progress in learning the materials. Class is completed in the first two-thirds of the semester so that students are able to apply knowledge gained in this class to more easily and effectively research papers for other classes and to journal work.

**LAWS811901**  
**Immigration Law Guided Research**  
**BREDA, KAREN**  
**Fall 2019**  
Immigration Law Research is a two-credit optional companion course to Immigration Law. The course will teach students how to research complex immigration law issues, using specialized secondary sources, administrative agency decisions and regulations, federal constitutional law, statutes, and case law. Students will learn strategies and resources by completing pragmatic research problems. Research techniques and sources will track the course content of Immigration Law. Students will receive an introduction to international and foreign law resources used in immigration law. Weekly ungraded exercises allow students to track their progress in learning the material. Grade will be based upon class participation, two graded assignments and a final, open book, take-home examination.

LAWS812801
Tax Law Research
NEARY, MARY ANN
Fall 2019
Students will master research sources and methods in the area of federal tax, including federal statutory and legislative history research, regulatory process and regulatory publications. Students will master techniques of state-level tax research, including state statutory and regulatory resources. Students will be introduced to international and foreign law tax research sources. Emphasis is placed on the technology and tools used by practitioners, including BloombergLaw, CCH Intelliconnect, IBFD, RIA Checkpoint, BNA Tax Portfolios, LexisNexis, Tax Analysts and Westlaw. Students will receive instructor feedback on short ungraded assignments.

LAWS813002
Advanced Legal Research
BRUCE, AMY
Fall 2019
Advanced Legal Research offers an in-depth, hands-on experience with the process of legal research. Students use a wide range of legal materials and devise practical techniques and strategies for using these materials competently and effectively. The goal of the course is to create self-sufficient legal researchers capable of analyzing and resolving legal problems effectively. Emphasis is placed on the types of legal sources and research not covered in the first year of law school (e.g., treatises, forms sources, administrative law, statutory research, legislative histories and legal practice materials). Both print sources and free and fee-based electronic sources are explored and critiqued. The course covers Westlaw, LexisNexis, BloombergLaw, and other electronic sources.

LAWS813301
Business Law Research for the Transactional Practitioner
BRUCE, AMY
Fall 2019
Business Law Research is a simulation class in which students develop primarily their legal research skills, but also other lawyering skills such as organization and management of legal work, professional ethics, and collaboration. Students will educate themselves on critical research skills for transactional law practice through legal compliance scenarios that apply state, federal, and local law. Students in this class will also develop key business law research skills needed for drafting contracts and working on other important transactional tasks, such as due diligence for business combinations. Most initial research instruction takes place outside the classroom so that students can work on simulations in the classroom and receive guidance from the instructor. There are multiple opportunities for self-evaluation as well as extensive feedback on a regular basis from the instructor.

LAWS823901
Representing Inmates at Prison Disciplinary Hearings
TANNENBAUM, KARI M
Fall 2019
Representing clients at prison disciplinary hearings provides a window into the hidden world of prisons. Massachusetts is one of the only states that allow students to represent clients at these hearings. All students will meet and interview clients in maximum security prisons, conduct discovery and investigation, file motions, cross-examine witnesses, make closing arguments and file appeals when necessary. Because the hearings are relatively short, students will be able to have multiple hearings each term. Legal skills learned: mini trials in 30-60 minute hearings; administrative law; adversarial practice; client interviewing skills; witness interviews; discovery practice; motion practice (written and oral); cross-examination of witnesses; direct examination of client; closing argument; written appeals if necessary.

LAWS826301
BC Innocence Clinic
BECKMAN, SHARON L; WHITMORE, CHARLOTTE H
Fall 2019
Students in BC Innocence clinic work with faculty supervision on post-conviction screening and/or litigation of cases of prisoners who assert their innocence. Case screening involves review of trial transcripts, pre-trial discovery, appellate and post-conviction briefs, and judicial opinions, as well as factual and forensic research, to determine whether scientific testing or other investigative leads could establish a strong likelihood that the prisoner is factually innocent. Students produce a memorandum analyzing the case and making a recommendation as to whether post-conviction litigation should be pursued. Students engaged in litigation research and draft motions for various types of post-conviction relief with supporting memoranda and affidavits. Class component is devoted to case-rounds and development of legal, professional, and ethical skills in the context of post-conviction innocence work. Students spend 10-12 hrs/week outside of class time on casework.

LAWS826701
Community Enterprise Clinic
TREMBLAY, PAUL R
Fall 2019
This course introduces students to transactional legal work on behalf of low- and moderate-income entrepreneurs, small businesses, nonprofit organizations, and first-time home buyers. The fieldwork is based at the Law School's Legal Services LAB located in the Center for Experiential Learning on campus. Students will perform all of the legal work and interact with the clients. Students will be assigned to work with entrepreneurs with business-related legal needs; with emerging, community-based small businesses facing corporate, employment or similar legal issues; with nonprofit organizations or groups seeking assistance to establish a tax-exempt organization; and first-time home buyers. For fieldwork purposes students will be assigned six office hours per week at the clinic, arranged based on the student's schedule. The fieldwork is complemented by a weekly seminar. The weekly seminar will address substantive law, ethical issues, and legal skills.

LAWS827101
Judge and Community Court Seminar
CRATSLEY, JOHN C; BYRNE, CATHERINE K
Fall 2019
This seminar examines through participant observation the functioning of the judicial process in our first-level or community courts. Students undertake this study of judicial performance through clerkship-like fieldwork placements with judges of the Boston Municipal, District, Juvenile, Housing, and Land Courts. Students are available to assist their judges with legal research and writing. Students are expected to observe and assist their judges eight hours/week (one full day or two mornings) for which they receive two clinical (pass-fail) credits. The weekly classroom sessions cover the full range of issues which trial judges encounter on a daily basis, including judicial ethics, sentencing policy, ADR, jury management, and treatment courts. A twenty page paper describing some aspect of the judiciary's work in these courts is required and serves as the basis for the two graded credits.

LAWS830401
BC Defender Program Clinic
TANNENBAUM, KARI M
Fall 2019
The BC Defender program is a full-year criminal defense clinic and a weekly seminar class. Practicing under faculty supervision pursuant to SJC Rule 3:03, BC Defenders represent clients charged with crimes and probation violations in the Boston Municipal Court (Dorchester Division). In the course of representing their clients, students broaden their own life experiences and develop professional skills, including interviewing, counseling, investigation, legal research and writing, collaborating, negotiating, oral advocacy, case organization and management, and trial skills.

LAWS830601
BC Law Prosecution Clinic
SARDA, EVANGELINE
Fall 2019
The Prosecution Program is a one-semester course offered only in the fall. Students enrolled in this clinic work within a local District Attorney's Office 2-3 days each week, handling a variety of misdemeanor and minor felony charges from arraignment to bench trial. Students are responsible for their own cases in court and meet weekly with a faculty supervisor for case preparation and supervision. Students' court experiences provide the basis for a close and critical examination of their role and their impact on the criminal justice system.

LAWS830801
BC Defenders Clinic: Compassionate Release and Parole
HERRMANN, FRANCIS R
Fall 2019
Under the newly enacted Criminal Justice Reform Act, inmates incarcerated at the state prison who are suffering from terminal illnesses or from irreversible physical or cognitive incapacitation may be eligible for medical release ("compassionate release"). Students will help prepare a petition for release and an accompanying medical parole plan with the assistance of a social worker or social work student. Students will advocate with the Department of Corrections and/or in the courts for release. Inmates who have become eligible for parole after serving at least fifteen years in prison appear before the Massachusetts Parole Board often without representation. Students will help prepare such inmates for their parole hearings and will represent them at the hearings.

LAWS831301
Immigration Law Clinic
HOLPER, MARY P
Fall 2019
Students in the Immigration Clinic represent noncitizens in removal proceedings before the Immigration Court, which involves arguing bond motions for detained clients, conducting examination of witnesses, raising evidentiary objections, and arguing points of law. Students represent noncitizens in applications for legal status before the U.S. Citizenship and Immigration Services (CIS) office. Cases vary, but may include asylum and relief based on fear of persecution in the country of removal, waivers of deportation for long-term residents of the U.S., adjustment of status for noncitizens with U.S. citizen or permanent resident family members, visas for victims of violent crimes who have assisted in the prosecution of such crime, relief for noncitizen victims of domestic violence, and visas for juveniles who have been abused, abandoned, or neglected. Students conduct "Know Your Rights" presentations for noncitizens who are detained by the Immigration and Customs Enforcement (ICE).

LAWS831801
Immigration Law Externship
KANSTROOM, DANIEL; FRIEDMAN, HEATHER J
Fall 2019
This externship, co-sponsored by the Boston College Center for Human Rights and International Justice, is connected to Professor Kanstroom’s Immigration Law class as a co-requisite. Students who are in that class may register for an additional 2 or 3 credits (Pass/Fail) to work on asylum, withholding of removal, Convention Against Torture or human trafficking [T Visa] cases. Students will be assigned to work with pro bono attorneys who have taken on such cases through the PAIR Project www.pairproject.org or other similar organizations. Students will meet with clients, and undertake factual and legal investigation, research and writing, etc. They will be supervised by the pro bono attorneys, by Attorney Heather Friedman and Professor Kanstroom. Requirements: 4 hours of case-related work per credit, journals, and attendance at a weekly seminar. To apply, e-mail Tricia Gould, Director of Externship Programs, patricia.gould@bc.edu.

LAWS832901
Juvenile Rights Advocacy Project Clinic
BERRY, JESSICA
Fall 2019
Students will represent, as Attorney or Guardian-ad-Litem, youth involved in the justice system on legal issues related to dependency, status offense, delinquency, or special education cases. There is an emphasis on education law in JRAP cases. JRAP In-House students will be exposed to some of the following: special education advocacy (team meetings, hearings, appeals), school disciplinary proceedings, administrative advocacy with the state Departments of Youth Services (DYS) and Children and Families (DCF), and Juvenile Court advocacy. Cases are primarily in Middlesex County.
LAWS833901
Entrepreneurship and Innovation Clinic
TARRANT, SUSAN M
Fall 2019
The Entrepreneurship and Innovation Clinic ("EIC") is a dynamic clinic that provides free transactional legal services to under-resourced clients in the Greater Boston area on issues relating to new and emerging businesses. This innovative clinic provides students with the hands-on, practical experience needed to navigate the rapidly evolving fields of intellectual property and entrepreneurship. Law students working under the supervision of the clinic director provide a broad range of business law, intellectual property, and transactional services. Clients include micro-entrepreneurs, technology entrepreneurs, social entrepreneurs, artists, authors, filmmakers and musicians, who may be individuals or for-profit businesses in the Greater Boston area who are in need of transactional legal counsel related to starting or operating their business. The EIC is for students interested in learning to work with organizational clients and learning to represent clients in transactions.

Project Entrepreneur  
GENNARI, LAWRENCE H  
Fall 2019

This course is centered on using entrepreneurship to foster the successful reentry of formerly incarcerated individuals back into society, igniting a new beginning for their families, and invoking positive change in their communities. The mission of Project Entrepreneur is to equip formerly incarcerated people in the Greater Boston area with the tools necessary to be successful entrepreneurs through networking and mentorship and the completion of an important "entrepreneurial fundamentals" class focused on business development, operations, sales and marketing, and strategy. Format: First, under the supervision of Professor Gennari, you will concentrate on the development of legal knowledge and counseling skills related to the advising of new businesses. Second, you will meet with the entrepreneurs and would-be business owners, who will become clients of BCLaw's Community Enterprise Clinic for purposes of the class. Third, together with graduate student colleagues from the CSOM and the GSSW, you will coordinate an eight-week course called "Project Entrepreneur" for the enrolled entrepreneurs, which will be focused on the legal and business aspects of creating and managing new ventures. Fourth and finally, you will be part of a multidisciplinary team that will meet throughout the semester, and primarily after each Project Entrepreneur class and as appropriate with the would-be business owners, to work through questions, challenges, and opportunities for the new venture.

LAWS842301
Amicus Brief Clinic
CAREY, THOMAS
Fall 2019
The Amicus Brief Clinic will provide students and faculty an opportunity to weigh in on, and attempt to influence, the development of the law and public policy in the courts. In the Amicus Brief Clinic faculty will identify an important legal issue being considered or soon to be considered by a court. Faculty will then guide a small student team in the process of researching, writing, editing, and submitting an amicus brief to the court for consideration. Although the subject matter and faculty leader of each amicus brief will be different, every Amicus Brief Clinic will include instruction and supervision on legal research and writing as well as the rules relating to submission of amicus briefs.

Advocacy Competitions
DALY, ROSEMARY
Fall 2019
This is the companion class to the national moot court teams. Enrollment and attendance in this class is mandatory for all members of a national team. The goal of the class is to help prepare students for not only for their individual competitions but also for litigation practice. The class is divided into three parts: overview of the moot court experience, appellate written advocacy and oral advocacy. The class will meet formally during the fall semester until October 15. The class will reconvene in the first half of the spring with their team coaches for oral advocacy/moot sessions until the competitions are complete. Students should expect an "incomplete" grade until they have completed their moot court experience (February/March).
LAWS855001
Trial Practice
CHERNOFF, PAUL; WILSON, PAUL
Fall 2019
There are several sections of trial practice, which are taught by adjunct faculty who are judges or practitioners. Each instructor selects his/her own readings and exercises, but the coverage of the sections is quite similar. All require students to prepare and to perform aspects of jury trial - opening and closing arguments, and direct and cross-examination. The course is designed to develop practical skills and to build an appreciation for the relationship between substantive law and strategy and tactics in litigation. This section includes both civil and criminal trial exercises. Students also participate in a mock trial held in a real courtroom. All sections focus on trial advocacy; some also consider some pre-trial skills, such as discovery depositions. All sections have limited enrollments. Evidence is a prerequisite.

Advanced Trial Practice
WARD, AMANDA F; ENCE, TYSON R
Fall 2019
This seminar offers a dynamic view of the litigation process. Students will participate in in-class demonstrations to build skill sets in all stages of trial advocacy. The course will focus on all aspects of a trial including: opening statements, conducting direct and cross examination of witnesses, laying proper evidentiary foundations, raising and arguing objections, refreshing witness recollection, impeaching and rehabilitating witnesses and delivering closing arguments. Students will also learn "soft skills" such as how to use movement in the courtroom, how to use volume, tone and pitch to effectively present a case to a jury, and how to best utilize evidence or other demonstrative aids during trial. The course offers a variable credit option for those students who are selected by the faculty to compete on the school's mock trial competition team as a part of the National Trial Competition.

**LAWS862001**  
**Advising the Entrepreneur**  
**GENNARI, LAWRENCE H; MARR, JEREMY T**  
**Fall 2019**  
An introduction to the complex challenge of advising entrepreneurs who are planning or developing a new business. It has two principal components. First, law students attend classes at the law school devoted to the development of legal knowledge and counseling skills related to the advising of new businesses. Second, law students meet with entrepreneurs and business owners, typically, actual clients of the course instructors who become clients of the Law School's Community Enterprise Clinic for purposes of the class, to develop a plan of legal assistance focused on the legal aspects of the client's emerging business. This advising will take place under the supervision of the course's faculty. Each law student will meet and counsel one or two clients, participate in class discussion of the issues raised by these meetings, complete a drafting exercise, and write a final memorandum concerning the legal issues raised for each client.

Pop-Up Clinic
None
Fall 2019
A "pop-up clinic" will be a temporary clinic (less than 1 year) set to take advantage of unique opportunities for clinical teaching and student learning. Pop-up clinics are not intended to act as "advanced" clinical offerings, but rather to temporarily extend the scope of clinical opportunities into new areas where the Law School does not already provide students with opportunities. An example of a pop-up clinic might include a unique appellate litigation opportunity that falls outside the context of an existing clinic. Like other clinics, pop-up clinics are housed within the Center for Experiential Learning. Pop-up clinics must be approved by the Associate Dean for Experiential Learning.

LAWS890001
Real Estate Development and Finance
LEVINE, HOWARD A
Fall 2019
The course, clinical and practical, explores a lawyer's role and responsibilities, and the myriad of transactional documents and agreements, in residential and commercial real estate transactions from offers through acquisition and loan closing. The course examines, dissects, and teaches how to represent buyers, sellers, and lenders during the due diligence, development and permitting, and the financing phases of a real estate transaction. The course teaches practical lawyering skills such as drafting, negotiation, and problem solving. A variety of ethical issues are reviewed. Commercial leasing transactions, zoning, environmental and due authorization opinion letters, and zoning and environmental law and considerations in sale, lease, and finance transactions are taught. Case studies are presented and negotiation exercises conducted to summarize the areas of real estate law studied and to explain how the legal principles, cases, and issues work in real-life situations.

Dispute Negotiation
CRANE, DANIEL C; WORLEY, SARAH E
Fall 2019
This is an experiential course in which students will be active participants, negotiating cases on a weekly basis. The subject matter of the disputes will include: commercial transactions, gender bias issues, criminal plea bargaining, family law matters, personal injury cases, and other disciplines. Students will be introduced to the art of negotiating, reading body language and micro-messages, interviewing clients and reaching common ground with adversaries. The work will be critiqued as actual student negotiating sessions are taking place, all in an effort to familiarize students with various techniques, strategies, tactics, persuasive skills, and effective demeanor involved in successful negotiations. Although there will be some lectures, the emphasis of the course is "learn by doing."

Civil Litigation Clinic  
MINUSKIN, ALAN D  
Fall 2019  
This civil clinical course allows students the opportunity to practice law under the close supervision of clinical faculty at Boston College Legal Services LAB, which is located in the Center for Experiential Learning on the Law School campus. Students are certified by the Massachusetts Supreme Judicial Court to advise and represent clients in every aspect of civil litigation. Practice areas are family law, housing, and public benefits appeals. Clinical faculty provide thorough feedback about students' work at all stages in order to help them build on their skills and learn from their experiences, including comprehensive feedback at both mid-semester and end of term. Six-credit students are expected to spend an average of 17-22 hours/week on clinic matters; ten-credit students average 30-35 hours/week. Pass/fail and variable credit options can only be exercised at the beginning of the term. Enrollment, by lottery, is limited to 16 students in the fall, and 10 in the spring.

Rappaport Law and Public Policy Seminar
KANSTROOM, DANIEL
Fall 2019
This seminar connects with the Rappaport Center's new initiative to invite three Senior Fellows in Residence to BC Law for one week each. This year's Senior Fellows are: Zephyr Teachout, law professor, author, activist, and former candidate for New York Attorney General and Governor, https://en.wikipedia.org/wiki/Zephyr_Teachout; Brittny Saunders, Deputy Commissioner for Strategic Initiatives at the NYC Human Rights Commission, and a former interim counsel for Mayor Bill de Blasio; and Lance Freeman, a Professor in the Urban Planning program at the Columbia University Graduate School of Architecture, Planning and Preservation. (Dr. Freeman has also worked as a researcher at Mathematica Policy Research, a leading social policy research firm in Washington). The reading group/seminar will meet 11 times during the semester. Students will also be required to attend each Senior Fellow's public lecture. Students will read and prepare to discuss the reading materials for each session prepared by Prof. Kanstroom and the Senior Fellows. For one academic credit, they will write a critical reflection paper of approximately 750 words based on the readings and discussions at the conclusion of each Senior Fellow's week. As an added option, students may also enroll in an Independent Study with Prof. Kanstroom. For each extra credit, students will research and write a 15-page paper on a topic of their choice; supervised by Prof. Kanstroom with input from one or more of the Fellows.

LAWS992502
Mediation
GRAY, ERICKA B
Fall 2019
An introduction to the theory and practice of mediation necessary to understand the mediation process from the perspective of a mediator or as an advocate representing clients in the mediation process. Mediation is an assisted negotiation with the mediator acting as a third party neutral facilitator. Beginning with a review/overview of interest based negotiation, mediation theory, and the role of mediation in the legal system, then course progresses to include a skills training component of simulate cases with students participating as mediators and parties. The mediation process is examined and various skills and techniques of the mediator are taught. Understanding ethical practice and legislating related to mediation is an integral part of the course.

Taxation I (Individual Income Taxation)  
RING, DIANE  
Fall 2019  
Taxation I is the basic introductory course in federal income taxation. In contrast to courses in the first year, it is principally a statutory course, dealing with the Internal Revenue Code and the Regulations. The focus of the course is divided between mastery of the technical tax principles and understanding of the basic policy judgments which are implicit in those principles. For a student who takes no additional tax courses, Taxation I should provide an overall understanding of how the federal income taxation system functions. For students desiring to continue their studies of tax, Taxation I develops the themes which will be recurring in later courses and forms the basis on which the subsequent tax courses build.

LAWS993701
Chinese Law Program
MC MORROW, JUDITH A
Fall 2019
Through partnership with Indiana University-Indianapolis, BC law students enroll in the IU-Indianapolis China Law Program at Renmin University in Beijing, which runs late May-June. Students attend 2 or 4 weeks of classes taught by Chinese professors and visit legal institutions and cultural sites in the Beijing area. Students must commit by March 30. In addition to successful completion of the IU program, students will submit weekly journals to Prof. McMorrow. Students are responsible for the IU-Indianapolis program expense and all related travel and living expenses. Credit is allocated to the fall semester.

LAWS994301
Criminal Procedure
KOH, STEVEN A
Fall 2019
This course explores the constitutional rules that govern the range of actions taken by government officials (primarily law enforcement officers) in the course of investigating criminal activity. We will critically examine the way that courts regulate invasive actions "such as frisks, searches, detentions, arrests, interrogations, and uses of force" through the use of balancing tests that weigh the social benefits of crime prevention and criminal apprehension against the costs of individual liberty and privacy.
LAWS995301
Immigration Externship Seminar
KANSTROOM, DANIEL; FRIEDMAN, HEATHER J
Fall 2019
This is the seminar component to the Immigration Law Externship. Students will be supervised by pro bono attorneys. Weekly attendance and journals are required.

LAWS996901
Environmental Law
PLATER, ZYGMUNT J
Fall 2019
The basic course in environmental law, studying a broad range of environmental cases--from pollution and nuclear issues to parks and wetlands--and focusing upon the legal doctrines, public and private law structures, and litigation techniques that apply to environmental protection controversies. This course studies the ways in which legal rules and procedures have been drawn from every corner of the legal system from tort and constitutional law to statutory and international law to handle environmental challenges of private and public actions. The course also serves as a case study in the implementation of public policy through litigation skills and legislative process.

**Banking Regulation**

**MCCOY, PATRICIA A**

**Fall 2019**

This course examines why the banking industry is one of the most heavily regulated U.S. industries and how federal safety and soundness regulation works from cradle to grave. The course begins by providing a historical overview and analyzing the rationales for government intervention in banking. The remainder of the course examines the techniques used by the government to constrain the risk of bank panics, including entry controls (through chartering), activities restrictions, prohibitions against mixing banking and commerce, minimum capital and other prudential requirements, and limits on risky activities by bank conglomerates. Special attention will be devoted to federal deposit insurance and the FDIC's procedures for resolving insolvent banks. Students will consider how well these rules work and the reforms enacted after the financial crisis of 2008. This course does not cover consumer financial protection or provisions of the Uniform Commercial Code.

Law Practice II
BEHR, JENNIFER S
Spring 2020
In their second semester, all 1L students will be enrolled in this 2-credit course in satisfaction of the requirement in ABA Standard 303(a)(2) for a rigorous writing experience in the first year which is faculty supervised. Building on the research, analysis, and writing experiences in Law Practice I, students will prepare documents, primarily in the context of advocacy, which involve more complex legal problems than those presented in Law Practice I. The emphasis will be on improving clarity, precision, and effectiveness of these communications for a designated audience and purpose in a simulation, with continued attention paid to a lawyer's ethical and professional responsibilities to the client and the legal system. The course involves classroom instruction and discussion, group work, and intensive individual feedback and conferencing.

LAWS218401
Inequality
FARBMAN, DANIEL S
Spring 2020
The relationship between law in the United States and inequality is tortured. On the one hand, we are committed to agreement with Jefferson in the Declaration of Independence and Lincoln at Gettysburg that our national character is founded on the principle that "all men are created equal." Accordingly, we publicly cherish the Fourteenth Amendment's commandment that we are all guaranteed "equal protection" under the law. One heroic narrative suggests that the aspiration toward equality is the defining theme our legal system. In President Obama's narrative, the project of the United States was create a "more perfect"--and thus more equal--union. But this view of our legal system maps awkwardly onto a "real" world riddled with inequalities that break along racial, economic, gender, sexuality, religion, national origin. At the same time that our legal faith embraces equality, the reality of our legal system reproduces and often exacerbates inequality. This course examines the puzzle of inequality in the American law. Together we will engage with a broad range of sources from literature to social science to philosophy to case law and legislation. In considering the role that inequality plays in our legal system we will also be considering the ways in which law, culture, social movements, and politics intersect.

**Professional Responsibility**

**TREMBLAY, PAUL R**

**Spring 2020**

This course focuses on central issues of professional responsibility faced by most lawyers in the practice of law, whether in the public or private sector. Included may be problems of client confidences, conflicts of interest, behavior in court, obligations to represent unpopular clients, and other restrictions on a lawyer's own speech and actions. Other topics focus on the fundamental moral responsibility of lawyers, analyzed in terms of the rules governing attorney conduct, principles of moral philosophy, and the pressures that create ethical blindness.

Professional and Moral Responsibility of Lawyers
COQUILLETTE, DANIEL R
Spring 2020
The first part of this course focuses on central issues of professional responsibility faced by most lawyers in the daily routine of practice, whether in a large firm, a small firm, or a legal services program. Included will be problems of client confidences, conflict of interest, behavior in court, obligations to represent unpopular clients, and other restrictions on a lawyer's own speech and actions. The second part focuses on the fundamental moral responsibility of lawyers, analyzed both in terms of the rules governing attorney conduct and the principles of ethical philosophy. There also will be a discussion of the professional organizations of the bar in a historical context, and their future challenges. Because of the amount and nature of coverage of on the fundamental moral responsibility of lawyers, this class fulfills the Perspectives requirement in addition to the Professional Responsibility requirement.

**Negotiation**  
**RIVERA, ANA M**  
**Spring 2020**  
The goal of this course is to teach you to think about negotiation as an opportunity to solve a problem that exists, or create new value where there is none, or try to make a bad situation a bit better. I hope to enhance your ability to think creatively and synthetically as well as analytically. You will also learn that planning is essential and can sometimes make up for your status as a new legal negotiator. The skills you will learn include analysis, persuasion, creativity, listening, interviewing, counseling, question framing, and the use of law and legal principle. We will also explore the moral and ethical issues implicated in negotiation--honesty, integrity, character, reputation, and personal identity.

LAWS283101
LEAPS Capstone Project
SARDA, EVANGELINE
Spring 2020
The LEAPS Capstone Project develops a cohort of third-year students interested in leadership in public service (defined broadly). Students identify an issue of deep interest and interview with Professor Sarda to enroll. During the semester, students develop individual or joint change projects of their choosing and design to address the identified issue(s). Through weekly meetings with classmates, mentors, and professor, students receive coaching and feedback on their project design, vision, and leadership, and develop skills to manage dynamic situations that involve uncertainty and ambiguity, 180 degree shifts in vision and design, roadblocks and frustrations, and also, successes (to name a few). Benchmarks and deadlines are set throughout the semester to ensure that students develop their projects in a systematic yet dynamic and reflective fashion. Course expectations include attending all meetings, writing journals, and completing assignments related to benchmarks, a final presentation, and a final paper. Student journals reflect upon and document their journey and developing capacities, uncover links between their life mission and their project mission, and develop a philosophy of leadership, of public service, and of professional identity formation. Limited enrollment. By permission only. Contact Professor Sarda at sarda@bc.edu. Variable credit.

**Environmental Law Seminar (Advanced)**  
**PLATER, ZYGMUNT J**  
**Spring 2020**
This seminar is oriented each year toward a significant current focus in environmental protection and land law. Participants study material together within the focal area, and prepare a research paper on a chosen aspect of the year's theme. Individual projects can be chosen throughout the field of land use and environmental law, focusing on doctrine, litigation, policy analysis, or technology. Opportunities for external public presentation of legal analyses are encouraged. For spring 2020, the seminar is focused upon analyzing current federal initiatives to change prior-existing federal environmental protections, and preparing a national blueprint for restoration of lost protections whenever the current administration leaves office. 2 or 3 credits. No prerequisites. Seminar meeting time scheduled to accommodate seminar participants' individual schedules; they are not scheduled in advance.

**LAWS333401**  
**Strategies for Effective Legal Analysis**  
**STOUT, KERIANN**  
**Spring 2020**
This course is designed to provide students with an opportunity to hone critical reasoning, essay writing and test taking skills. This course focuses on the development of legal analysis skills, test performance techniques and a strategic mindset. The course will also provide early preparation for the Bar Exam, specifically the Multistate Bar Exam (MBE), the Multistate Essay Exam (MEE), and the Multistate Performance Test (MPT), which are exams created by The National Conference of Bar Examiners (NCBE). While this course will have a skills approach it will also focus on select topics of law within two substantive subjects tested on the MBE and the MEE. The course will benefit any student who plans to take the bar exam. It will be especially helpful for those seeking to strengthen their legal analysis or legal writing skills. The course will include regular assessments, including an opening test (a "pre-test"), in-class quizzes, a mid-term exam and a final exam. This course is offered on a Pass/Fail Basis only. Students will have to achieve a minimum score on assessments to receive a passing grade. Course materials will be provided by instructor. This course is limited to second semester third-year students who plan to sit for the bar exam in the summer immediately following graduation. This course is not intended to replace the need for a post-graduate full bar review preparation course. Students should plan to also take a full bar review course after graduation.

LAWS334401
American Legal Education
COQUILLETTE, DANIEL R
Spring 2020
This seminar is designed for students who would like to examine carefully the nature of their legal education. We will commence with the English and Continental origins of legal scholarship and teaching, examine the development of formal legal education in America from the founding of the Litchfield and Harvard Law Schools to the rise of Legal Realism, and conclude with the pressing controversies facing America's law schools today. Among the topics covered will be the relationship between formal legal education and the practicing bar, the changing composition of the faculty and the student body, the early pedagogical controversies, the different methods and ends of modern legal instruction and the role played by law schools in fundamental disputes about jurisprudence political ideology, economics, and social reform. A research paper will be required rather than a final examination. Multilithed materials. Course will be taught at Harvard Law School.

LAWS337901
Consumer Bankruptcy
KOHA, DAVID
Spring 2020
This course studies bankruptcy relief for individual debtors under chapter 7 (liquidation) and chapter 13 (rehabilitation). Topics covered include pre-bankruptcy planning, the means test, eligibility, property of the estate, the automatic stay, exemptions, lien avoidance, nondischargeable debts including domestic support and other marital obligations, jurisdiction issues, reaffirmation and redemption rights, the trustees avoiding powers, avoidance actions (preferences and fraudulent transfers), chapter 13 plans, and the bankruptcy discharge. The course adopts a problem-solving approach. The final grade for the course is based on an in-class final exam. Students should take this course if they plan to: (1) practice in a small firm; (2) represent consumers and small business owners; (3) practice domestic relations law; (4) apply for a bankruptcy court clerkship.

LAWS368001
Mindfulness and Contemplative Practices for Lawyers
ANZALONE, FILIPPA M
Spring 2020
Law practice is by nature a demanding profession that requires critical thinking, has lots of deadlines, and requires both cognitive and emotional intelligence. As a result of the demands of their chosen vocation, lawyers, and law students experience higher levels of depression than the general population due to ubiquitous overwork and feelings of being overwhelmed by the constant stresses of their work and its burdens. Setting aside time for reflection and contemplation is hard to come by. The goal of this course is to introduce students to the concept of mindfulness and to explore ways that contemplative practices will enhance and enliven the skills that they will need as lawyers. To be successful and healthy, lawyers need to develop sustainable ways of coping that will help them better withstand the rigorous demands of the legal profession. Throughout the semester, we will be using mindfulness practices for stress reduction, self-awareness, compassion for self and others, focus, resilience, and leadership. This course is practical. By taking it, you will learn about concrete tools to better deal with the problems that you will encounter in the legal profession.

Business and Human Rights
TAMIR, IRIT N
Spring 2020
Human rights are traditionally thought of as a set of norms and practices to protect individuals from threats by the state as a result of a state's duty to secure the conditions necessary for people to live a life of dignity. Gradually, obligations under this regime were extended to individual persons, including heads of state, seeking to hold them to account for conduct that rises to the level of international crimes. The 1990s marked an effort to expand these norms to business enterprises, particularly multinational corporations. In 2011, the United Nations Human Rights Council unanimously endorsed the UN Guiding Principles on Business and Human Rights (UNGPs). Key elements of the UNGPs have also been adopted by numerous other international and national standard setting bodies, individual companies and business associations, workers organizations and civil society actors. This course will look at the governance gap prior to the UNGPs and their emerging doctrine, along with the three pillars they present, the state duty to protect, the business responsibility to respect, and access to remedy. In addition, participants will simulate an experience in developing a human rights impact assessment and advocacy strategy for holding corporations accountable. Students will be evaluated on two projects throughout the semester and a final paper along with class participation.

Advanced Civil Procedure
SPIEGEL, MARK
Spring 2020
Advanced Civil Procedure is an in-depth consideration of advanced topics that commonly arise in more sophisticated forms of civil litigation, but are omitted or only introduced in the basic course. Topics covered include class actions and other forms of aggregate litigation including multi-district federal litigation; pretrial and discovery processes in complex litigation; and discussion of alternative dispute resolution. These topics are critical for prospective litigators in corporate and public interest settings as they comprise a significant part of the issues faced in modern litigation. They are also important for aspiring non-litigators who, as corporate lawyers, tax lawyers, trusts and estates lawyers and intellectual property lawyers practice law in the shadow of civil litigation. Evaluation will be by responses to problems and a take-home examination.

Feminist Legal Theory  
YOUNG, KATHARINE  
Spring 2020  
Since the late twentieth century, women have lent their own distinctive voice to the discussion of jurisprudence and to a number of substantive topics concerning sex, gender, and the law. In this seminar we will explore some of the issues that feminist scholars have raised. The seminar will begin with a historical orientation to feminist legal theory. It will then consider particular areas of law where feminist insight has been particularly strong, such as: (1) Gender equality and the constitution; and (2) Violence against women. Finally, we will consider some more theoretical issues. What is the relationship between feminist theory and other forms of critical theory that have been developed by oppressed groups? What are the problems of essentialism: Does it make sense to speak of "women's" experience, a "women's" viewpoint; or even of "feminist" jurisprudence as a project that represents the interests of "women in general"?

LAWS440301
Employment Law
KOHLER, THOMAS C
Spring 2020
This course addresses the legal regulation of employment of those without any form of collective representation, including executives, hourly and contingent employees. It addresses three major areas: (1) The common law regulation of the employment relationship. This includes formation of the employment relationship; common law exceptions to the at-will rule; privacy and dignitary protections (including electronic media); trade secrets and other intellectual property concerns; restrictions on competition; the use of arbitration as a means to avoid jurisdiction of common law courts. (2) The second area covered is federal regulation of wages and hours pursuant to the terms of the Fair Labor Standards Act (an area of substantial growth and litigation). (3) The law under the Occupational Safety and Health Act. This is a dynamic and controversial area of the law. Consideration of current developments and trends, economic and social, as well as comparative legal approaches, are included.

LAWS440801
Law of Philanthropy
BAGLEY, WILLIAM F
Spring 2020

Millions of individual Americans, as well as foundations and corporations, donate well in excess of $300 billion, each year, in charitable gifts. Even in soft economies, that figure tends to grow annually. Philanthropy has become a key part of the U.S. economy, fully 2.2% of GDP and, increasingly, a discrete and important field of the practice of law. In this course, students will explore the structure of American philanthropy, its legal history, current regulation, case law, and emerging legislation and topics on public policy. The course will introduce students to sophisticated charitable giving techniques used to convey donations and trends in the practice of law and philanthropy. Whether anticipating a practice with active engagement in philanthropy, or, volunteer service as a member of foundation or non-profit boards, this course will provide students with an in-depth orientation to the field. This course requires a paper and not a final exam.

LAWS441202
Intellectual Property Survey
OLSON, DAVID S

Spring 2020

This survey course emphasizes federal copyright, trademark, and patent law and related state trade secret, rights of publicity, and unfair competition law. It is meant to provide students with a general working knowledge of the various intellectual property doctrines, and an understanding of how the individual intellectual property doctrines compare, contrast, and may be used to complement one another. This course is appropriate for the generalist who wants to understand and be able to analyze IP issues, which are ubiquitous in the modern practice of law. It is also appropriate as the first introductory course for students interested in taking a number of IP courses.

LAWS442501
Law of Money
MARTIN, DAVID R
Spring 2020
This course is about the law of payments. It can be relevant for almost all lawyers, because a large part of what lawyers do involves ?moving money.? This not only includes specialists who work for banks, credit card companies, and financial institutions. Corporate lawyers close deals with one party sending money to the other. Private and government litigators settle civil and criminal cases for payment of money?where the two sides do not trust each other. Family lawyers sometimes have to think about the mechanics of alimony and child support payments. And of course there is payment of a lawyer?s own fees. Therefore this is a basic ?primer? course for all lawyers, regardless of prior experience or planned practice area. To understand this topic, we will start with the fundamental concept of money and the rights of sellers, buyers/consumers and banks regarding traditional cash, notes, bank deposits, checks and letters of credit. But the law in this area is also changing rapidly in direct response to new payment-system businesses and consumer transactions arising from the internet and financial technology (?FinTech?). So we will turn to a range of more modern payment systems: wire transfers, credit and debit cards, and electronic banking. Finally, we will use all of these tools to examine emerging legal issues for non-bank mobile payment systems such as Venmo, cryptocurrencies such as Bitcoin, and new types of government-issued money that respond to these technologies.

LAWS443001
Employee Benefits Law
SHNITSER, NATALYA
Spring 2020
Retirement plans, health insurance, and other employee benefit plans are central features of the employer-employee relationship in the United States. The legal regulation of such plans is highly relevant for the practice of corporate, labor, tax, trust, domestic relations, and health care law, and is at the forefront of current policy debates about health and retirement security for U.S. workers. The course will survey the main types of health and retirement plans and examine the rules governing coverage, vesting, funding, fiduciary standards, integration with Social Security, claims administration, remedies, and preemption of state law. It will also consider how the decline of traditional pension plans and the recent healthcare reform impact the existing regulatory scheme for employee benefits in both the private and public sectors.

**LAWS443501**  
**Insurance Law**  
**MCCOY, PATRICIA A**  
**Spring 2020**

Insurance is of pervasive importance on the modern world, whether in the manufacture and sale of a product, in the ownership of a house or a motor vehicle, in the need for life insurance, in the practice of a profession, in serving as an officer or director of a company, in protection against medical expenses or the consequences of personal injury, and, of course, in the litigation of contract and tort claims. Insurance coverage is often a major influence on litigation. No litigator or representative of an enterprise can avoid having an understanding of insurance principles, including the obligation of insurers to treat claimants fairly. This course covers general principles of insurance, the regulation of insurance, various kinds of insurance (property, life, health, liability and motor vehicle), ethical considerations for lawyers, and relationships between insurers.

Start-Up Companies and Venture Capital Finance
QUINN, BRIAN J
Spring 2020
This course deals with the legal and business issues facing start-up companies and the venture capital and other investors who provide financing to them. In particular, the course will focus on the various legal considerations typically encountered by start-up companies, including corporate formation and initial financing, middle and later stage venture capital financing, strategic alliances, employment and equity compensation matters, securities laws compliance, corporate governance and exit strategies. The course will offer an introduction to these topics through the eyes of attorneys who represent start-up companies and may also include guest presentations on various relevant topics. The course may include a written practice exercise designed to expose students to the process of counseling venture backed companies.

LAWS444301
Introduction to Municipal Law Practice
LEVINE, HOWARD A
Spring 2020
Introduction to Municipal Law Practice introduces you to the skills needed to represent a municipal corporation, its Boards, Agencies and Departments, and to represent private clients in their dealings with those Boards, Agencies and Departments. Real Estate is "local" and begins at the City or Town Hall. This course is also an introduction to the practice of real estate transactions, development and finance. The course will be taught through case studies and simulations in which students will learn how to use the substantive law to advise and guide private and municipal clients toward a satisfactory solution in their best interests. Anticipated practice skills include drafting of local legislation (ordinances and by-laws) (e.g., adult entertainment, sign restrictions, historic districts) in light of constitutional issues, preparing for and presenting a zoning application, drafting permits, negotiating with stakeholders and municipal boards, and representing multiple and often conflicting clients as a municipal attorney. The simulations are based on actual cases of the Professor, a former City Solicitor and a current municipal law and real estate practitioner. Particular emphasis is given to awareness of conflicts of interest and ethical issues in local government law. Evaluation: Simulations and final exam.

**Environmental Law, Advanced: Teaching Seminar**

**PLATER, ZYGMUNT J**

**Spring 2020**
The Environmental Law-Teaching Program Seminar. (Professor Plater) (spring semester, with selection in the preceding spring, and preparation starting in fall semester). A seminar providing law students the opportunity to teach a University course in Environmental Law to graduate and undergraduate non-law students. Enrollment limited to eight law students selected from three area law schools -- BC, BU, and Harvard. Teachers are given Boston College faculty status [but unsalaried!]. With the professor's advisory participation, two-person teams of law students teach a spring semester course in Environmental Law and legal process, each team's class enrollment comprising fifteen to thirty-five students from a wide variety of majors. A weekly law school seminar in the spring semester coordinates the research and teaching preparation. (Six preparatory sessions are required during the fall semester.) 3 pass-fail credits, awarded in spring semester; plus option for 1 graded credit in fall or spring semester.

**LAWS446401**  
**Authority and Leadership in Professional Life**  
**SARDA, EVANGELINE**  
**Spring 2020**
This course focuses on the conscious and unconscious group and systemic dynamics that arise from the exercise of authority, leadership, and power. Students learn about leadership and authority dynamics by focusing on boundaries, authority, role, and task, and by studying their own experience and linking this to theory and class reading. Classes are intensely psychodynamic in nature and promote powerful and often emotional interchange as students explore the dynamics of social identity and processes such as splitting, projection, and projective identification. Students experiencing a difficult period in life should speak to the professor before enrolling. Class attendance is required. Grade is based on class attendance, exercises, short papers, journals, and final paper. Attendance at a group relations conference is strongly encouraged; the working title for the March 2020 conference is Intersectionality: Exploring Relatedness and Dividedness in Self and Systems, March 27-29, 2020, Stokes Hall, Boston College (registration fee required). Variable credit offered for attendance at, and reflection paper on, conference experience. Contact Professor Sarda for information (sarda@bc.edu). Limited enrollment.

**Climate Change Law and Policy**  
**SCANLAN, MELISSA K**  
**Spring 2020**

Climate disruption is well underway. The polar ice caps and glaciers are melting; sea levels are rising; oceans are acidifying; catastrophic wildfires and extremes of heat, droughts, and floods are intensifying; extinction rates are accelerating; and the number of climate refugees is steadily rising. According to the world's leading scientists, we need to rapidly shift our global economy off of fossil fuels while simultaneously working to meet international Sustainable Development Goals. The speed and scope of these unprecedented changes call for strong legal and policy leadership and involve a careful examination of the ecological, public health, environmental justice, economic, social, and ethical consequences. This course explores the legal challenges of climate change mitigation, deep decarbonization, and adaptation. Students will understand the sources and impacts of climate change, litigation shaping the U.S. legal response, sustainable business design strategies, and state, national, and international policy solutions.

LAWS489701
Justice and the Global Economy
GARCIA, FRANK J
Spring 2020

We assume (rightly) that justice is intimately connected to law and the work of lawyers, but we don't often look closely at what it means in specific cases and issues for justice to be law's chief aim. In this course, we take a look at what justice might mean across a range of legal topics drawn from international economic law and the global economy. What would it take to construct a just global economy? How can international economic law and institutions be reformed towards this end? How is globalization changing the work of lawyers and the nature of international law, international society, and global justice? This course introduces students to the principal Western approaches to justice and its relationship to law, and applies these and other theories and perspectives to select issues in international economic law and policy, such as trade, foreign investment, economic migration, banking, finance, development, inequality, competition law, global tax competition, and others. This course meets the Perspectives requirement and is a paper course and not an exam course. Students can opt either to research, write, and present a substantial paper (30-45 pages) of publishable quality satisfying the Upper Level Writing Requirement or to write a series of short response papers.

Fiduciary Obligations and the Law
SHNITSER, NATALYA
Spring 2020
Fiduciary obligations arise in a multitude of private relationships, including business organizations, agency, guardianships, trusts, and professional relationships of various kinds. This seminar will consider fiduciary law as a distinctive legal category and explore fiduciary principles across a wide range of legal subjects. Through the study of statutory and common law fiduciaries – including trustees, corporate directors and officers, partners, agents, lawyers, physicians, money managers and advisers – the seminar will explore why fiduciary duties arise and how obligations and remedies vary for different types of fiduciaries. The seminar will also assess the use of fiduciary law in financial regulation, and the challenges of fiduciary governance in a global business environment. Finally, the seminar will consider how fiduciary principles might be applied to public officials and public institutions.

Environmental Corporate Lawyering: Regulatory Compliance
DOLINER, HARLAN M
Spring 2020
Students learn about integrating sustainability and other environmental considerations into mergers, acquisitions, and other transactions; supervising regulatory audits of clients' industrial facilities; and designing internal management systems to enhance clients' value while addressing governmental regulation, liability management, investment strategies, and insurance issues. By engendering skills in working with statutes, regulations, policies, guidance, and related administrative procedures while learning principles of U.S. and foreign environmental law in a context of simulated client counseling, students become empowered to integrate these environmental factors into transactional and advocacy practice, whether or not they go on to concentrate in environmental matters. The teaching style for the course is informal lecture and discussion, supplemented by student simulated client counseling and occasional guest speaker presentations. There are no prerequisites. 3 credits, based on at least one simulated practice group project and a final, take home exam.

LAWS663201
Jurisprudence
FITZGIBBON, SCOTT T
Spring 2020
This course considers the nature of law, the nature of justice, the nature of the political community, and the purposes of private law. Law has been identified by some thinkers as the commands of the sovereign; the political community and its law have been accounted for based on submission to a common commander. Other approaches propose that law in its fullest sense is embedded in a community which is dedicated to justice. This course compares these approaches in a critical manner. It inquires into the nature of justice and freedom, with special attention to Aristotle, Cicero, and thinkers in the Jewish and Christian traditions.

**Law of War, War Crimes, and Genocide**  
**RYAN, ALLAN A**  
**Spring 2020**  
This course examines the development of the law of armed conflict and the prosecution of war crimes, and the legal aspects of genocide. Topics include The Hague and Geneva Conventions, the International Military Tribunals at Nuremberg (1945), and Tokyo (1946), the My Lai massacre in Vietnam (1968), the Rwandan genocide (1994), the Genocide Convention, and the Convention Against Torture. We also consider litigation over the status and rights of detainees at Guantanamo Bay, Cuba, issues presented by drone warfare and targeted assassinations, and new assertions of jurisdiction over war crimes, crimes against humanity and genocide, including The International Criminal Court. Related topics, such as the defense of superior orders and the doctrine of command responsibility, and law and the future of war, will also be considered. Breaking developments will be incorporated into class discussion.

Mergers and Acquisitions
QUINN, BRIAN J
Spring 2020
This course is an introduction to the legal rules and principles governing corporate transactions including mergers and negotiated acquisitions. We will begin with an examination of the deal structures used in most common transactions, focusing on statutory requirements and relevant Federal regulations. We will then turn to questions of the Delaware common law and the fiduciary duties of selling directors in the context of mergers and acquisitions. Finally, we will turn to the merger agreement. In that setting, we will study the structure of the merger agreement and typical provisions negotiated in merger agreements. The object of this final section will be to understand the incentives addressed by each such provision and the legal limits to their use.

Human Rights Interdisciplinary Seminar
KANSTROOM, DANIEL
Spring 2020
The study of human rights defies disciplinary boundaries. This seminar, sponsored by the Center for Human Rights and International Justice (CHRIJ), provides a rare space to examine human rights from an interdisciplinary perspective. The seminar brings together faculty affiliated with the Center, students from across the university, visiting scholars, and guest speakers to examine issues of human rights and international justice. The spring 2020 seminar will begin with an overview and brief historical review of human rights instruments and then explore a series of complexities for those seeking to engage in human rights scholarship, advocacy, and activism. We seek to engage critically with human rights discourse and actions as they intersect with gender, culture/ethnicity, race, class, and other categorizations. More details on the 2020 seminar at https://www.bc.edu/content/bc-web/centers/chrij/academics/seminar.html.

Credits: 03
Schedule: TH 2-4 20
Room: CAMPION HALL 016
Satisfies Core Requirement: None
Comments: Registration by permission only. The Center invites applications from students enrolled in a graduate professional degree in any of Boston College's divisions. Undergraduate seniors will be considered, space permitting. To apply, students must submit a brief statement (no longer than one page, single-spaced) to humanrights@bc.edu with the subject line "Human Rights Interdisciplinary Seminar application." Please include your Eagle ID and academic discipline in the application. The application deadline is Friday, November 5, 2019.
Prerequisites: With permission of the Instructor.

LAWS748201
Law of Toxic Substances
FOWLEY, JEFFRY T
Spring 2020
This course will provide students with an in depth review of the laws and policies regarding the introduction of hazardous substances into the marketplace, the handling and release of such substances, and the storage, treatment and disposal of hazardous wastes. The course also will study the investigation and remediation of chemical releases, including examining both major cleanups at "Superfund" sites and the cleanup and redevelopment of "Brownfield" sites. Students also will review how these environmental issues impact purchase and sale of real property and how due diligence and allocation of liability can be handled in transactions involving contaminated property. The course will focus in particular on the TSCA, RCRA and CERCLA statutes. The course will emphasize the practical aspects of practicing environmental law. During the course students will do three papers/practical exercises in lieu of exams.

**LAWS765401**  
**Federal Health Law, Policy, and Politics**  
**CHIRBA, MARY ANN**  
**Spring 2020**
This course will evaluate; the reasons for the US health care system's high costs & poor outcomes; the Affordable Care Act's methods, successes & failures in expanding access to, & improving the quality & cost of health care; judicial & legislative challenges to the ACA's individual & employer mandates, Medicaid expansion, subsidized coverage & mandated benefits (including no-cost contraceptives); GOP efforts to repair, repeal or replace the ACA; & emerging challenges to the Trump Administration's use of executive orders, suspension of notice and comment rulemaking & incremental legislation to destabilize the ACA & change access to health care and coverage. We will also examine two of the nation's most urgent public health crises; gun violence & the opioid epidemic. Both increase mortality, morbidity & costs. Both illustrate the adverse impact of inconsistent laws & policies for individuals, health care providers, private industry and lobbyists, and state & fed. government. Both demonstrate the increasing importance of litigation in seeking redress for the unsustainable costs & unbearable health burdens that federal policies have shifted to states, municipalities & individuals. Both underscore the importance of law in promoting and impeding public & personal health. The course is NOT intended to instill a particular point of view but only to enable your own views, criticisms and disagreements to be informed by reality, not myth. No need for an interest in practicing health law

LAWS771001
Constitutional Theory
BARROZO, PAULO D
Spring 2020
Great constitutional questions always evoke constitutional theory. This course focuses on the great constitutional questions of our time, from the institutional design of electoral systems to the future of the separation of powers; from the constitutionalization of the economy to the constitutionalization of the environment; from the constitutionalization of the family to the constitutionalization of entertainment; from the clash between information and privacy to the tension between constitutional stability and cultural change. Students read landmark judicial decisions as well as the most fecund constitutional scholarship. Graded on final paper. No knowledge of constitutional doctrine or of legal theory assumed. Students and auditors from across the university are welcome. No pre or co-requisites. Meets the Law School’s Perspectives Requirement.

LAWS772801
Lawyering for the Elected Branches
MOORE, MICHAEL P
Spring 2020
This course will focus on legal issues faced by elected officials at the federal and state levels, the law governing those issues, and the type of work expected of lawyers who work in the executive and legislative branches of government. Each class will focus on an issue faced by elected officials using real world examples, including, for example: ethics; legislative oversight and investigation; interaction with the media; administrative law; appointment and removal; and how to reconcile the acts of running for and serving in office, particularly during campaign season. This class will be skills-based and will require the drafting and revision of multiple, short memoranda; and the oral presentation of legal recommendations in hypothetical situations borne of real world events. Written and oral presentations will constitute 50% of a student's grade; the remainder of the grade will be based upon a research paper (which will be submitted in draft form, reviewed by the professor, and re-submitted in final form).

LAWS773101
Administrative Law
LYONS, DANIEL A
Spring 2020
This course will examine the legal framework for the work of administrative agencies. We will explore the sources of authority for agency action under the U.S. Constitution and will examine the accountability of agencies to the legislative and executive branches of government. The course will survey the procedures that agencies must follow when they engage in rulemaking, enforcement, and adjudication. We will study the role of the courts in overseeing agency action. This course is intended to introduce students to regulatory agencies in a variety of substantive fields of law, such as financial, environmental, healthcare, immigration, labor, to name a few.

LAWS773302
Business Bankruptcy
HILLINGER, INGRID M
Spring 2020
This course explores business reorganization under Chapter 11 of the Bankruptcy Code. It also
touches on Chapter 7 liquidation for business entities. It adopts a problem-solving approach.
Secured Transactions is recommended but not required. Students should take this course if
they plan to practice any type of business law -- transactional as well as commercial litigation.
LAWS774301
Estate Planning
GLOVER, MARK B
Spring 2020
This course provides a practical approach to estate planning, the process by which lawyers work with their clients to provide for the transfer property during life and upon death. Estate planning involves wills as well as trusts to provide for the care of minor children, establish charitable bequests and obtain favorable tax treatment. It also involves planning for succession of businesses and planning for retirement benefits and life insurance. We will be focusing on practical estate planning techniques as well as how an estate planner prepares documents to create a complete estate plan. Estate and Gift Tax is recommended; however, students can also take course with permission of the professor.

This course studies the ability of authors, publishers, artists, and others to control the distribution, sale, copying, and performance of their works. Topics will include the subject matter of copyright, requirements for copyright, proof of infringement, and remedies. The course will cover the application of copyright law to music and literature as well as the rapidly developing use of copyright law to protect high technology products such as computer programs. Students interested in pursuing careers in high technology law should seriously consider taking classes in both copyright and patent law.

LAWS774701  
Family Law  
DONOHUE PRONO, CLAIRE P  
Spring 2020  
The practice of family law applies rights and duties to people who are in relationship to one another, either through love, obligation, or blood. Social norms, customs, and practices are constantly reimagining how and with whom these relationships are formed. This course looks at historical and contemporary ways by which families are formed, maintained, dissolved, and defined by law. The course in particular provides an overview of marriage, divorce, child custody, parental rights, and adoption.

LAWS775701
Labor Law
KOHLER, THOMAS C
Spring 2020
What do the NFL, Major League Baseball and other professional sport leagues, the entertainment industry, the Writers' Guild, as well as large portions of the health care, hospitality, service and manufacturing industries, to name a few, have in common? Collective bargaining and the law governing that process regulates employment relations in all these industries. This course examines the Nation's basic collective bargaining statute, the National Labor Relations Act, the statute that provides the basic model for public-sector labor relations as well. Among other issues, this course examines the legal framework for bargaining, for dispute resolution through the grievance-arbitration process, the regulation of economic pressure tactics, union organizing and a series of Constitutional issues affecting this area. Current trends are highlighted and existing doctrine is studied in light of its demonstrated or likely impact.
Evaluation by examination.
**LAWS775901**  
**Land Use Planning**  
**MADEJA, JAMY B**  
**Spring 2020**  
This course will provide participants with a detailed and national review of the techniques used by local and regional governments to regulate the development of real property. Strong emphasis will be placed on the relationship among land use planning, land use law, and natural resources. We will focus in detail on numerous traditional land use planning controls (zoning, subdivision control, and health regulations) but spend considerable time analyzing the legal issues involved in the use of more innovative land use regulations (transfer of development rights, exactions, impact fees, and development agreements). Participants will become well-versed in all aspects of local, regional, and state land use controls and permitting procedures for residential and non-residential development.

**Securities Regulation**  
**JONES, RENEE M**

https://www.bc.edu/content/bc-web/academics/sites/university-catalog/courses/law.html
Spring 2020
This course provides an overview of the federal regulation of the issuance and trading of stocks and other securities, focusing on the Securities Act of 1933 and the Securities Exchange Act of 1934. We will analyze the regulation of the public offering of securities and discuss the structure and operation of securities trading markets. Topics covered will include the disclosure regime for public companies, exemptions from the securities laws' registration requirements, and liability under the securities laws, including sanctions for fraud and insider trading.

LAWS777702
Taxation II
RING, DIANE
Spring 2020
Taxation II explores the taxation of corporations. After a brief review of the other common forms for organizing a business and their distinctive tax treatments, the course focuses on the most important federal income tax issues relating to the organization, operation, liquidation and reorganization of publicly-traded corporations (and other "C" corporations). This includes the relationship between corporations and shareholders and the treatment of dividends and redemptions. The course is important for any student thinking of practicing in the general business area, even if she or he does not intend to become a "tax specialist."

LAWS777801
Taxation III (Advanced Corporate Tax)
DARBY, JOSEPH B
Spring 2020
Taxation III is the most advanced course in the tax curriculum (note that Taxation I and Taxation II are prerequisites). It deals with both taxable and tax-free corporate acquisition transactions, the treatment of net operating loss carryovers, single corporation reorganizations and an introduction to the consolidated return rules and subchapter S. Students will engage in a variety of projects including some mix of the following: negotiate the terms of an acquisition transaction, prepare drafts for a request for a private letter ruling from the IRS, and draft tax opinions letters.

Legal Scholarship Workshop: Regulation and Business
SHNITSER, NATALYA; MCCOY, PATRICIA A
Spring 2020
This workshop will feature presentations by five or six invited legal scholars of their works-in-progress concerning law, business, and the regulation of economic activity, broadly construed. Students will meet with one or more BC faculty conveners the week before each presentation to discuss the paper. (The faculty conveners are: Renee Jones, Patricia McCoy, Diane Ring, Shu-Yi Oei, and Natalya Shnitser.) Students will prepare one-page response papers for each work-in-progress presented. Response papers will be shared with the authors. This workshop is designed for students who are interested in publishing during law school and in legal scholarship more generally. It is also well suited for students with an interest in economic regulation, business, and corporate governance. 1 credit, pass/fail.

**LAWS779201**  
**Federal Courts**  
**SPIEGEL, MARK**  
**Spring 2020**

The Constitution assures that the separate powers conferred upon each of the branches of the federal government serve as a check and balance to prevent abuse of power by any single branch, and that the aggregate of federal power, while supreme, is limited in scope, thereby serving to bind the union and simultaneously respect state sovereignty. This course will explore these two themes as they relate to the role of federal courts. Among the topics to be covered: separation of powers, federalism, congressional power to curtail federal jurisdiction, the case and controversy requirements as it relates to doctrines of standing, ripeness, and mootness, sovereign immunity, Congressional power to abrogate Eleventh Amendment immunity, Ex Parte Young doctrine, section 1983 litigation, absolute and qualified immunity in suits against state and federal officers, abstention doctrines, inter-system preclusion, and Rooker-Feldman doctrine. Evaluation will be by an in-class exam.

LAWS785001
Introduction to Critical Race Theory
VATS, ANJALI S
Spring 2020
As civil rights gains were rolled back in the 1970s & 1980s, a group of scholars, beginning with the late Derrick Bell, sought to critique the notion of formal equality and colorblindness under law that pervade American conceptions of "equality" and "justice." This course explores the body of theory he pioneered, now called Critical Race Theory (CRT), and some of its many interdisciplinary directions. In it, we will consider the history of race and racial inequality in the United States, in ways which recognize the tendency of both to intersect with other axes of inequality including gender, sexuality, class, and disability. We will also consider the many ways that formal equality under law obscures continuing racial inequality through purported race neutrality. Specifically, we will examine, understand, & theorize how American conceptions of liberalism, with their attendant reliance on individual responsibility and meritocracy, serve as consistent and effective alibis for racial inequality. Finally, we will consider how CRT has been taken up by non-legal disciplines and in popular culture, particularly in ways which allow us to hone strategies for achieving radical equality & social justice by building on the theoretical insights of the past. The major assignment for this writing and discussion driven course will be a substantial, analytic paper which takes the theories that we discuss and applies them to a contemporary or historical problem of formal equality under the law.

LAWS800001
Ninth Circuit Appellate Project
HONG, KARI E
Spring 2020
The Ninth Circuit Court of Appeals permits supervised law students to brief and argue immigration cases brought by indigent clients who would otherwise be without counsel. The Court screens pro se cases and selects those that present important issues that deserve further development by counsel. Past cases have included asylum, withholding, and CAT claims, immigration consequences of criminal convictions, and presented issues of first impression. The Court schedules the opening brief to be filed in September, the reply brief in December, and schedules oral argument before a panel of sitting judges in March of the same academic year. Students will travel to the scheduled court hearing to present oral argument. The Court then issues its decision based on the merits of the individual cases.

LAWS801601
Introduction to Transactional Lawyering
TARRANT, SUSAN M
Spring 2020
This course is designed to acquaint students with some of the legal issues associated with starting up and operating a business or venture, examining the role of a transactional lawyer and learning basic practice skills. The objective is to give first year students an introduction to legal issues that lawyers are likely to encounter in an entrepreneurial setting, how the process works, decisions that need to be made and all of the various legal issues during the life cycle of a start-up. These issues include choice of entity, selection of a company name and trademark, protecting the intellectual property of a new company or venture, financing arrangements, operating issues including employment and general business agreements and exit strategies. The course will use simulation and role-plays to explore the legal issues relevant to transactional lawyering.

**Immigration Practice**  
**HOLPER, MARY P**  
**Spring 2020**

Immigration Practice focuses on the practice of immigration law and in particular the intersection of criminal and immigration law. Students will advocate for hypothetical clients whose cases deal with cutting-edge issues of bond, the intersection of immigration law and crimes, and discretion. In-class hearings include client interview, client counseling, a bond hearing, and a portion of a removal defense case.

LAWS805501
Introduction to Practice in the Criminal Justice System
HUROWITZ, STUART M; BLOOM, ROBERT M
Spring 2020
In this class, students will engage in various aspects of a simulated criminal trial, which will give students the opportunity to develop some of the lawyering skills inherent in criminal practice, including how to interview clients, argue motions, engage in plea negotiations, break down a statute, fact investigation, and plan for a trial. Students will also be confronted with the important ethical issues that face counsel in criminal cases. The course will begin with an overview of the Criminal Justice System, including perspectives from various system mechanisms - police, court system, prisons, defense attorneys and prosecutors. As this is an introductory course, it is necessary to introduce a variety of law school courses including professional responsibility, criminal law and criminal procedure. The goal is to have students become familiar with the criminal justice system, gain experience through simulations and think critically while performing tasks within the practice of criminal law.

LAWS806501
Restorative Justice: Transforming the Law from Within
BARTHOLOMEW, MELISSA W; LISCHINSKY, KAREN
Spring 2020
This course is designed to train students in implementing restorative justice principles & practices in legal practice. Students will learn how to facilitate restorative justice circles & how to incorporate restorative justice into their daily lives through an interdisciplinary framework combining the head & heart with the aim of cultivating compassionate lawyers committed to transforming themselves & the justice system. We will identify practices which nurture & strengthen the inner life & the connection between the inner life & well-being of lawyers & the quality of legal practice. To transform the justice system through restorative justice, future lawyers must be committed to transforming themselves & their way of being in the world. We will explore the roots of restorative justice, contemporary examples of its application in post-conflict settings in the US & the world, & examine its utility in addressing the pressing mass incarceration crisis, the current penal system & mode of punishment in the US. We will practice & apply Critical Race & Systems Theories to sharpen the students' ability to assess themselves, & their future clients, through a systems lens & to examine the impact of racism, sexism, gender discrimination & other systems of oppression on behavior & on the justice system. We anticipate holding at least one class session off-campus at a correctional facility. The grade will be based upon attendance, participation, written assignments, & facilitation skills.

Mobile Apps and Big Data: Legal Contributions
BLODGETT-FORD, SAYOKO J
Spring 2020
The focus of this interactive and experiential course is on the role the attorney can play in the development and launch of mobile applications, particularly apps that will leverage very large databases and real-time data processing. Legal issues and strategies to be covered include: contract issues, term sheet negotiations and drafting, intellectual property and data protection/privacy. While the instructor will draw on experiences at Nintendo of America Inc. and Tetris Online, Inc., the course will not be limited to game-based apps.
LAWS812001
Insurance Law Research
BREDA, KAREN
Spring 2020
This course is designed as an in-depth look at legal research techniques and resources used by lawyers in the insurance field and civil litigation attorneys. Course will cover sources of insurance law and insurance obligations, including contracts, common law doctrines, statutes and regulations. Course will also cover secondary sources, research tools and organizations for both insurance specialists and trial attorneys. Both print and electronic sources will be explored and utilized.

LAWS812701
Intellectual Property Research
SHEAR, JOAN
Spring 2020
This course is designed as an in-depth look at the legal resources and research techniques used in the practice of intellectual property law. Course will cover basic legal research techniques involving the U.S. Constitution, statutes, cases, and regulations and how they relate to IP practice. IP specific research tools and techniques involved in patent and trademark practices will also be included. Students are exposed to practical techniques and strategies for using these materials competently, effectively, and economically in the research process to enable them to develop research skills necessary to be a successful lawyer in an IP practice. Grade will be based on class participation, effort on ungraded research exercises and performance on graded research exercises.

Advanced Legal Research

DAVIS, LAUREL E

Spring 2020

Advanced Legal Research offers an in-depth, hands-on experience with the process of legal research. Students use a wide range of legal materials and devise practical techniques and strategies for using these materials competently and effectively. The goal of the course is to create self-sufficient legal researchers capable of analyzing and resolving legal problems effectively. Emphasis is placed on the types of legal sources and research not covered in the first year of law school (e.g., treatises, forms sources, administrative law, statutory research, legislative histories and legal practice materials). Both print sources and free and fee-based electronic sources are explored and critiqued. The course covers Westlaw, LexisNexis, BloombergLaw, and other electronic sources.

**LAWS813301**  
**Business Law Research for the Transactional Practitioner**  
**BRUCE, AMY**  
**Spring 2020**

Business Law Research is a simulation class in which students develop primarily their legal research skills, but also other lawyering skills such as organization and management of legal work, professional ethics, and collaboration. Students will educate themselves on critical research skills for transactional law practice through legal compliance scenarios that apply state, federal, and local law. Students in this class will also develop key business law research skills needed for drafting contracts and working on other important transactional tasks, such as due diligence for business combinations. Most initial research instruction takes place outside the classroom so that students can work on simulations in the classroom and receive guidance from the instructor. There are multiple opportunities for self-evaluation as well as extensive feedback on a regular basis from the instructor.

LAWS814001
Introduction to Civil Litigation Practice
MINUSKIN, ALAN D
Spring 2020
This course provides an introduction to civil litigation practice, with emphasis on the word "practice." The 1Ls enrolled will bring a basic knowledge of Civil Procedure, plus lifetime perceptions of how civil litigation is conducted, and a personal sense of morals and ethics. The course will provide an understanding of skills involved in litigating a civil case through the stages preceding trial, with an emphasis on the interrelationship of those skills with the litigator's professional responsibilities to clients, colleagues, opponents, judges and others. In addition to discussions and guest presentations by experienced litigators, students will perform litigation skills--client interviews, negotiations, depositions, and courtroom advocacy--based on a hypothetical factual scenario. The combination of teaching techniques will provide insight into the real world of civil litigation while fostering skills that are important for all practitioners to master, whatever field they choose to enter.

LAWS815001
Children's Rights Practice
SHERMAN, FRANCINE T
Spring 2020
Children's Rights Practice is a 1L Elective designed to introduce students to the law and skills needed to represent children involved with state systems. A hypothetical case of a multi-system involved teenage girl will be carried through the semester exposing students to child welfare, delinquency and education law. Student simulations will include interviewing the adolescent client, representing her at a multi-disciplinary meeting, and negotiating a settlement of her education-based claim. In addition to relevant law and policy, guest speakers will discuss child development and how to work with an expert consultant to advance your client's case. Critical issues of professional responsibility, such as client directed representation and how to navigate family relationships while representing the child, will also be studied.

LAWS823901
Representing Inmates at Prison Disciplinary Hearings
TANNENBAUM, KARI M
Spring 2020
Representing clients at prison disciplinary hearings provides a window into the hidden world of prisons. Massachusetts is one of the only states that allow students to represent clients at these hearings. All students will meet and interview clients in maximum security prisons, conduct discovery and investigation, file motions, cross-examine witnesses, make closing arguments and file appeals when necessary. Because the hearings are relatively short, students will be able to have multiple hearings each term. Legal skills learned: mini trials in 30-60 minute hearings; administrative law; adversarial practice; client interviewing skills; witness interviews; discovery practice; motion practice (written and oral); cross-examination of witnesses; direct examination of client; closing argument; written appeals if necessary.

LAWS826301
BC Innocence Clinic
WHITMORE, CHARLOTTE H; BECKMAN, SHARON L
Spring 2020
Students in BC Innocence clinic work with faculty supervision on post-conviction screening and/or litigation of cases of prisoners who assert their innocence. Case screening involves review of trial transcripts, pre-trial discovery, appellate and post-conviction briefs, and judicial opinions, as well as factual and forensic research, to determine whether scientific testing or other investigative leads could establish a strong likelihood that the prisoner is factually innocent. Students produce a memorandum analyzing the case and making a recommendation as to whether post-conviction litigation should be pursued. Students engaged in litigation research and draft motions for various types of post-conviction relief with supporting memoranda and affidavits. Class component is devoted to case-rounds and development of legal, professional, and ethical skills in the context of post-conviction innocence work. Students spend 10-12 hrs/week outside of class time on casework.
LAWS826501
International Human Rights Practicum
UROSA, DANIELA
Spring 2020
This course focuses on appellate submissions to regional and international courts and other legal organizations that address international human rights issues. For spring 2020, students will work on submissions to the Inter-American Court of Human Rights (IACtHR) and the Inter-American Commission on Human Rights (IACHR). The Inter-American System for the protection of human rights (IASHR) is the regional system responsible for monitoring, promoting, and protecting human rights in the countries that are members of the Organization of American States (OAS). Currently, it is one of the strongest regional human rights protection systems in the world. This clinic will include two components. (1) The practicum will provide students with practical experiences in advocacy for the promotion of international protection of human rights through amicus briefs before the IACtHR; drafting of legal reports, protocol proposals, and hearings before the IACHR; and the possibility of submissions to other human rights tribunals around the world. (2) The accompanying seminar will provide an overview on the study of the IASHR, including its normative framework, mechanisms, rights protected and its principal entities. Possible practicum fieldwork at the IACHR (Washington DC) or the IACtHR (San Jose, Costa Rica) during spring break. Previous course work in International Law, International Human Rights, and/or International Legal Research is not required, but may provide an enriched perspective.

**LAWS826701**  
**Community Enterprise Clinic**  
**TREMBLAY, PAUL R**  
**Spring 2020**

This course introduces students to transactional legal work on behalf of low- and moderate-income entrepreneurs, small businesses, nonprofit organizations, and first-time home buyers. The fieldwork is based at the Law School's Legal Services LAB located in the Center for Experiential Learning on campus. Students will perform all of the legal work and interact with the clients. Students will be assigned to work with entrepreneurs with business-related legal needs; with emerging, community-based small businesses facing corporate, employment or similar legal issues; with nonprofit organizations or groups seeking assistance to establish a tax-exempt organization; and first-time home buyers. For fieldwork purposes students will be assigned six office hours per week at the clinic, arranged based on the student's schedule. The fieldwork is complemented by a weekly seminar. The weekly seminar will address substantive law, ethical issues, and legal skills.

**Statutory Interpretation**  
**LAPLANTE, JOSEPH N**  
**Spring 2020**
This two-credit course, taught by the Chief Judge of the U.S. District Court for the District of NH, offers instruction in statutory interpretation, with emphasis on its practice (advocacy in litigation, and judicial opinions), doctrines (textual and substantive canons of construction), and competing theories: textualism, intentionalism, purposivism (legal process theory), pragmatism, and "dynamic statutory interpretation." Despite its theoretical aspects, this is a highly practical course.

**BC Defender Program Clinic**  
**TANNENBAUM, KARI M**  
**Spring 2020**

The BC Defender program is a full-year criminal defense clinic and a weekly seminar class. Practicing under faculty supervision pursuant to SJC Rule 3:03, BC Defenders represent clients charged with crimes and probation violations in the Boston Municipal Court (Dorchester Division). In the course of representing their clients, students broaden their own life experiences and develop professional skills, including interviewing, counseling, investigation, legal research and writing, collaborating, negotiating, oral advocacy, case organization and management, and trial skills.

BC Defenders Clinic: Compassionate Release and Parole
HERRMANN, FRANCIS R
Spring 2020
Under the newly enacted Criminal Justice Reform Act, inmates incarcerated at the state prison who are suffering from terminal illnesses or from irreversible physical or cognitive incapacitation may be eligible for medical release ("compassionate release"). Students will help prepare a petition for release and an accompanying medical parole plan with the assistance of a social worker or social work student. Students will advocate with the Department of Corrections and/or in the courts for release. Inmates who have become eligible for parole after serving at least fifteen years in prison appear before the Massachusetts Parole Board often without representation. Students will help prepare such inmates for their parole hearings and will represent them at the hearings.

LAWS831301
Immigration Law Clinic
HOLPER, MARY P
Spring 2020
Students in the Immigration Clinic represent noncitizens in removal proceedings before the Immigration Court, which involves arguing bond motions for detained clients, conducting examination of witnesses, raising evidentiary objections, and arguing points of law. Students represent noncitizens in applications for legal status before the U.S. Citizenship and Immigration Services (CIS) office. Cases vary, but may include asylum and relief based on fear of persecution in the country of removal, waivers of deportation for long-term residents of the U.S., adjustment of status for noncitizens with U.S. citizen or permanent resident family members, visas for victims of violent crimes who have assisted in the prosecution of such crime, relief for noncitizen victims of domestic violence, and visas for juveniles who have been abused, abandoned, or neglected. Students conduct "Know Your Rights" presentations for noncitizens who are detained by the Immigration and Customs Enforcement (ICE).

Juvenile Rights Advocacy Project Clinic
BERRY, JESSICA
Spring 2020
Students will represent, as Attorney or Guardian-ad-Litem, youth involved in the justice system on legal issues related to dependency, status offense, delinquency, or special education cases. There is an emphasis on education law in JRAP cases. JRAP In-House students will be exposed to some of the following: special education advocacy (team meetings, hearings, appeals), school disciplinary proceedings, administrative advocacy with the state Departments of Youth Services (DYS) and Children and Families (DCF), and Juvenile Court advocacy. Cases are primarily in Middlesex County.

Entrepreneurship and Innovation Clinic
TARRANT, SUSAN M
Spring 2020
The Entrepreneurship and Innovation Clinic ("EIC") is a dynamic clinic that provides free transactional legal services to under-resourced clients in the Greater Boston area on issues relating to new and emerging businesses. This innovative clinic provides students with the hands-on, practical experience needed to navigate the rapidly evolving fields of intellectual property and entrepreneurship. Law students working under the supervision of the clinic director provide a broad range of business law, intellectual property, and transactional services. Clients include micro-entrepreneurs, technology entrepreneurs, social entrepreneurs, artists, authors, filmmakers and musicians, who may be individuals or for-profit businesses in the Greater Boston area who are in need of transactional legal counsel related to starting or operating their business. The EIC is for students interested in learning to work with organizational clients and learning to represent clients in transactions.

Mediation
GRAY, ERICKA B
Spring 2020
An introduction to the theory and practice of mediation necessary to understand the mediation process from the perspective of a mediator or as an advocate representing clients in the mediation process. Mediation is an assisted negotiation with the mediator acting as a third party neutral facilitator. Beginning with a review/overview of interest based negotiation, mediation theory, and the role of mediation in the legal system, then course progresses to include a skills training component of simulate cases with students participating as mediators and parties. The mediation process is examined and various skills and techniques of the mediator are taught. Understanding ethical practice and legislating related to mediation is an integral part of the course.

LAWS842701
Semester in Practice Seminar
BIONDI, JANE
Spring 2020
The SiP Seminar brings together extern students for a weekly discussion of common practice issues and seminar discussions of current issues in the practice of law, such as changes in the U.S. legal profession, the adversary system, and unmet legal needs. The goal of the seminar is to develop better understanding of the forces that shape a lawyer’s professional identity and to learn to become a reflective legal practitioner. This course enables students to bridge the gap between law school and practice. Students keep a daily journal and share their entries weekly with the instructor. Students are required to write a substantial 20-25 page paper on a topic approved by the professor in lieu of an exam. Enrollment by lottery.

Schedule: BY ARRANGEMENT
Semester in Practice--Dublin

Semester in Practice (SIP): Dublin is BC Law's full-time immersion externship program for students who are interested in living and gaining International Legal experience. It will be offered during the spring semester, 2019 and is open to both 2Ls and 3Ls. SIP: Dublin provides students with the opportunity to gain full-time professional experience for an entire semester at a private firm, a corporation, a non-profit or legal services organization. In addition to the placement, students enroll in an accompanying course taught by BC Law faculty. SIP: Dublin requires that students extern at their placement for 35-40 hours/week for 12 weeks. Students receive 10 externship credits (pass/fail) and 3 seminar credits (graded). This course satisfies the Lawyering Skills/Experiential Learning and the Perspectives requirements. The course is limited to 12 students. Throughout the seminar course, students analyze the lawyering process including cross cultural lawyering, legal ethics, professional responsibility, and other topics through readings, discussion, and student presentations. Students are asked to prepare written assignments in which they reflect on their experience and readings, including a final paper in lieu of an exam. The on-site faculty member monitors individual placements to ensure the supervising attorney is providing a significant educational experience including feedback on work product, planned work assignments, and exposure to various aspects of lawyering.

Advanced Evidence: Trial Objections
CARRIS, EUGENIA M
Spring 2020
The goal of this course is for students to understand how the rules of evidence operate in practice by providing them with the experience of trying to admit or to keep out evidence in a mock trial setting. This is done through a problem approach with particular attention paid to laying the foundation for admission of evidence during examination of witnesses. Topics include exceptions to the hearsay rules (admitting business records, prior recollections, etc.); laying foundation for the admissibility of expert and lay opinion; impeaching witnesses through character evidence and prior inconsistent statements; authenticating physical exhibits; and using chalks, demonstrative aids and diagrams. Students will perform weekly in-class simulations.

LAWS847101
Appellate Advocacy
DALY, ROSEMARY
Spring 2020
This course will offer hands-on experience and explore in depth the craft of appellate advocacy. Topics include: the rules and mechanics of the appellate process; formulation of strategies on appeal, use of the appellate record, brief writing; and oral argument. One of the class sessions will be held at the Adams Courthouse, where the students will attend an oral argument and then meet for a post-argument discussion. Students apply what they have learned to the drafting of an appellate brief based on an actual court record. The brief is written in stages and followed by one-on-one critiques. Students also present an oral argument which will be critiqued and may be videotaped. Students will be graded on the basis of their brief, oral argument and class participation.

**Advocacy Competitions**  
**DALY, ROSEMARY**  
**Spring 2020**  
This is the companion class to the national moot court teams. Enrollment and attendance in this class is mandatory for all members of a national team. The goal of the class is to help prepare students for not only for their individual competitions but also for litigation practice. The class is divided into three parts: overview of the moot court experience, appellate written advocacy and oral advocacy. The class will meet formally during the fall semester until October 15. The class will reconvene in the first half of the spring with their team coaches for oral advocacy/moot sessions until the competitions are complete. Students should expect an "incomplete" grade until they have completed their moot court experience (February/March).

Trial Practice
LOCKE, JEFFREY A
Spring 2020
There are several sections of trial practice, which are taught by adjunct faculty who are judges or practitioners. Each instructor selects his/her own readings and exercises, but the coverage of the sections is quite similar. All require students to prepare and to perform aspects of jury trial - opening and closing arguments, and direct and cross-examination. The course is designed to develop practical skills and to build an appreciation for the relationship between substantive law and strategy and tactics in litigation. This section includes both civil and criminal trial exercises. Students also participate in a mock trial held in a real courtroom. All sections focus on trial advocacy; some also consider some pre-trial skills, such as discovery depositions. All sections have limited enrollments. Evidence is a prerequisite.

Introduction to Appellate Judging
GRAINGER, ANDREW R
Spring 2020
This course will provide students with a "view from the bench" by providing the opportunity to assume the role of an appellate judge in oral argument. At each class, on a rotating basis, two students will present oral argument on opposing sides of a legal issue, seeking affirmance or reversal of decisions rendered in recent state and federal cases. The legal issues will generally be taken from first year/first semester required course subjects or involve principles of statutory construction. Students not scheduled for an argument on a particular day will perform the role of an appeals court panel, probe the strengths and weaknesses of each presenting attorney, and deliver a ruling.

LAWS870101  
Administrative Practice
LYONS, DANIEL A; WHY, GEOFFREY G

Spring 2020

This course focuses upon the skills needed to practice law in front of administrative agencies. Much of law school focuses upon statutory interpretation and courtroom practice. But state and federal agencies make far more rules each year than legislatures, and adjudicate far more cases than the judiciary. Agencies develop much of the law that governs our daily life, including many high-profile issues such as immigration, financial reform, and environmental protection. In this course, you will learn about agency rulemaking and adjudication through simulated proceedings, which will culminate in each student filing comments in a live proceeding before a federal or state agency.

International Legal Research
CHEN, XIN

Spring 2020

International Legal Research aims to provide students with in-depth and hands-on experience with the general process and sources of international and foreign legal research. Students will learn to use a variety of specialized legal research tools, both online and in print, to locate and evaluate the major sources of public international law, i.e., treaties, customary international law, and general principles of law. Decisions of international courts and tribunals, and official documents of international organizations (United Nations, European Union, WTO, etc.) will also be examined. The course will also cover special topics in international law, e.g., private international law, international human rights, international trade law and commercial arbitration. Grades will be based on 3 take-home assignments. Recommended for students interested in international legal practice, members of the Jessup Moot Court team, and the staff of the BC ICLR.

Pop-Up Clinic

None

Spring 2020
A "pop-up clinic" will be a temporary clinic (less than 1 year) set to take advantage of unique opportunities for clinical teaching and student learning. Pop-up clinics are not intended to act as "advanced" clinical offerings, but rather to temporarily extend the scope of clinical opportunities into new areas where the Law School does not already provide students with opportunities. An example of a pop-up clinic might include a unique appellate litigation opportunity that falls outside the context of an existing clinic. Like other clinics, pop-up clinics are housed within the Center for Experiential Learning. Pop-up clinics must be approved by the Associate Dean for Experiential Learning.

**LAWS880401**  
**Dynamics of Law, Leadership, and Social Justice: The Public Interest Practitioner as an Agent of Change**  
**SARDA, EVANGELINE**  
**Spring 2020**
This seminar is for those interested in learning through experience about systemic dynamics surrounding leadership, change, and social justice work. Students design a change project & work either in teams or individually (if in a SIP placement). Semester work includes class attendance, exercises, short papers and journals, & culminates in a presentation & final paper. Using their experiences as data and linking experience to theory, students consider how their professional training both assists them in & deters them from achieving social justice goals. Students examine relationships between (and relatedness of) clients & professionals (particularly lawyers) pursuing individual & community goals, systemic barriers to justice, and historical & current efforts by lawyers to partner with communities. Students study their own leadership and group dynamics and link these to larger systemic dynamics that exist in the world. The course is interdisciplinary & open to graduate students in the Law School, Lynch School of Education, the Graduate School of Social Work & others. Attending a group relations conference is strongly encouraged; the working title for the March 2020 BC conference is Intersectionality: Exploring Relatedness and Dividedness in Self and Systems, March 27-29, 2020, Stokes Hall, Boston College (registration fee required). Variable credit offered for attendance at, and reflection paper on, conference experience. Contact Prof. Sarda (sarda@bc.edu) for more information.

LAW883402
Judicial Process: Appeals
MACGOWAN, ERIN R
Spring 2020
Judicial Process is a course which allows a student to sit as law clerks two days per week with Massachusetts Superior Court Judges (Trial Court). Students will be assigned to individual judges. It is expected that the student will perform one day doing assignments and the second day observing. There will opportunity to work with more than one judge. Students will therefore have the opportunity to observe and work directly with different judges and thereby learn from different judicial styles and perspectives. There will be a bi-weekly two hour seminar meetings, which will be used to discuss various topics including the following: selection and discipline of judges; role of the jury; and a critique of the adversary system.

Introduction to Consumer Rights Litigation Practice

MILLER, ELIZABETH A

Spring 2020

In this simulation course, you will use consumer protection laws to help a client who has errors on his credit report and is being harassed by a debt collector. You will learn how to read a credit report, dispute errors and how to use this knowledge to help your client. You will also learn how to communicate with the client, how to avoid ethical conflicts and how to identify claims and evidence needed to prove each claim. You will engage in mediation and discovery, including a deposition of the debt collector’s witness. Finally, you will draft and argue a motion for summary judgment. Method of Evaluation: Assignments.

Dispute Negotiation

CRANE, DANIEL C; WORLEY, SARAH E

Spring 2020

This is an experiential course in which students will be active participants, negotiating cases on a weekly basis. The subject matter of the disputes will include: commercial transactions, gender bias issues, criminal plea bargaining, family law matters, personal injury cases, and other disciplines. Students will be introduced to the art of negotiating, reading body language and micro-messages, interviewing clients and reaching common ground with adversaries. The work will be critiqued as actual student negotiating sessions are taking place, all in an effort to familiarize students with various techniques, strategies, tactics, persuasive skills, and effective demeanor involved in successful negotiations. Although there will be some lectures, the emphasis of the course is "learn by doing."

LAWS897801
Civil Litigation Clinic
MINUSKIN, ALAN D
Spring 2020
This civil clinical course allows students the opportunity to practice law under the close supervision of clinical faculty at Boston College Legal Services LAB, which is located in the Center for Experiential Learning on the Law School campus. Students are certified by the Massachusetts Supreme Judicial Court to advise and represent clients in every aspect of civil litigation. Practice areas are family law, housing, and public benefits appeals. Clinical faculty provide thorough feedback about students' work at all stages in order to help them build on their skills and learn from their experiences, including comprehensive feedback at both mid-semester and end of term. Six-credit students are expected to spend an average of 17-22 hours/week on clinic matters; ten-credit students average 30-35 hours/week. Pass/fail and variable credit options can only be exercised at the beginning of the term. Enrollment, by lottery, is limited to 16 students in the fall, and 10 in the spring.

**LAWS910001**  
**Race, Policing, and the Constitution**  
**HINES, GERALDINE S**  
**Spring 2020**
The well-documented phenomenon of racial profiling and the widely publicized police killings of African-American males have sparked a lively public debate about the viability of legal and policy responses to these issues. In this seminar, we will examine the problem from three points of view. First, we will consider the legal context in which racial profiling came to be a constitutionally permissible mode of operation for police officers. In this part of the seminar, students will examine the role of the Supreme Court's Fourth Amendment jurisprudence in abetting racial profiling. Beginning with the Supreme Court's decision in Terry v. Ohio, 392 U.S. 1 (1968), students will review the cases that have defined the rules of engagement for encounters between the police and the public, paying particular attention to how the application of ostensibly neutral constitutional principles have, over time, validated racial profiling. In the second part of the seminar, students will explore the legal barriers to achieving accountability for racially discriminatory police conduct that results in a deprivation of life or liberty. The last part of the seminar will challenge students to imagine doctrinal changes in the Fourth Amendment jurisprudence that potentially could nullify the legal significance now accorded to racially motivated police conduct.

LAWS910601
Governing in the Facebook Era: Privacy, Propaganda, and Public Good
SWIFT
Spring 2020
This public policy course explores communication and technology innovation in the era of social media from several perspectives. Political communication is a critical component for political leaders at every level, and the use of modern technology has changed the game. We will explore how modern campaigning and protecting the integrity of elections is impacted by the rise of social media and related innovative methods of communication. In the modern era, political leaders also leverage new tools to build their narrative and to communicate as elected officials, and constituents increasingly expect services to be delivered on mobile devices. Yet the explosion of online use has given rise to privacy and security issues which require elected leaders to secure sophisticated expertise to address. We will study the policy, legal, and operational challenges for state and local government in delivering digital services. Lastly, we will explore several policy areas including education, health care, and transportation where technological innovation holds both promise and peril. State and local political bodies must deal with regulating and legislating in arenas of innovation moving at a speed that is beyond what government systems have been designed to handle. Former Governor Jane Swift will draw on her experience in political office as well as an education executive in the private sector.

LAWS915501  
The Cradle to Prison Pipeline  
BLITZMAN, JAY D  
Spring 2020
In 2012, the DOJ's Civil Rights Division formally accused the city of Meridian, Mississippi and the state's departments of youth & human services of operating "a school-to-prison pipeline". While it is rare that such explicit practices are alleged, the reality of the school to prison pipeline is well documented. However, the realities of systemic practices & policies that have fueled what Marian Write Edleman & others have characterized as the cradle to prison pipeline are now being scrutinized. The BBA's Cradle to Prison Pipeline Committee describes the process as the mechanism by which disparities in a wide range of arenas--including economic, health care, mental health, housing, child welfare & juvenile justice factors--"funnel" people of color, the poor, the LGBTQ+ community, & youth with disabilities into the system of mass incarceration. "Unpacking" this phenomena entails examining critical issues of race, class, geographical & educational segregation & implicates consideration of the larger frames that affect families in & out of courtrooms. As Jill Lepore notes in Baby Doe: A Political Tragedy, between 2010-12, 72% of the youth committed to the MA DYS had been involved with DCF & over half of that number has been the subject of abuse & neglect petitions. In exploring this terrain this course will consider the evolution of child welfare & juvenile justice systems, de facto v. de jure segregation & to encourage students to think about ways to chart a different course.

LAWS931301
Modern Conservative Legal Thought
LYONS, DANIEL A; OLSON, DAVID S
Spring 2020
This reading group will consider the application of modern conservative thought to questions of law, regulation, and governance. We will begin with the inquiry: what is conservative thought in the United States in the twenty-first century? We will then consider alternative schools of thought, focusing mostly on progressive thought, but also considering libertarianism as well as critical legal thought. After creating a schema of schools of thought, we will apply these to legal, regulatory, and governance problems. Depending on the pace of the course, we will apply our schemas to topics including the allocation of authority in a democratic republic, constitutional and statutory interpretation, separation of powers, speech rights, association rights, separation of church and state, law and economics, antitrust law, administrative law, and the regulatory state. Enrolled students will have the option to add a two-credit paper that will satisfy the upper-level writing requirement.

Supreme Court Experience
GREENFIELD, HAROLD K
Spring 2020
In this seminar, students will study in depth a number of the important cases of the current Supreme Court Term. All students will be responsible for reading the pertinent briefs and relevant background materials. Each student will also be required to perform a moot argument on at least one case, and class time will be dedicated to these moot arguments as well as to free form discussions. Finally, each student will be required to draft an opinion in at least one of the cases discussed.

Employment Discrimination
BRODIN, MARK S
Spring 2020
Employment Discrimination Law will focus primarily on the landmark Title VII of the Civil Rights Act of 1964, forbidding workplace discrimination because of race, color, religion, gender, or national origin. Like most such legislation, the language leaves enormous discretion in the courts to interpret the prohibitions, define the terms like "discrimination,""because of," etc., and formulate methods of proof and a remedial structure. We will study cases, work through problems, and explore the policy implications of judicial monitoring of workplace decision-making.

LAWS992603
Taxation I (Individual Income Taxation)
REPETTI, JAMES R
Spring 2020
Taxation I is the basic introductory course in federal income taxation. In contrast to courses in the first year, it is principally a statutory course, dealing with the Internal Revenue Code and the Regulations. The focus of the course is divided between mastery of the technical tax principles and understanding of the basic policy judgments which are implicit in those principles. For a student who takes no additional tax courses, Taxation I should provide an overall understanding of how the federal income taxation system functions. For students desiring to continue their studies of tax, Taxation I develops the themes which will be recurring in later courses and forms the basis on which the subsequent tax courses build.

Antitrust Law
HAFIZ, HIBA M
Spring 2020
Antitrust law issues abound in many areas of law, including corporate work, litigation, and even tax law. This course covers basic U.S. antitrust law, as codified in the major federal antitrust statutes, and the body of case law interpreting these statutes. Specific topics to be covered include agreements in restraint of trade, monopolization, vertical and horizontal mergers, price discrimination, and tying. No prior understanding of economics or trade regulation is required. Students will be instructed in the basic economics of competition and monopoly needed to analyze and practice antitrust law.

Neurobiology of Stress and Resilience in the Life Course
BRUECK-CASSOLI, STEPHANIE
Summer 2019
This course examines the ways in which stress poses risk to healthy biological, psychological, and social development. Using life course perspective and ecological systems theory (micro through macro), the course also highlights the characteristics, relationships, and contexts that increase resilience at each life stage (in utero through end of life). Circumstances relevant to social work (including but not limited to prenatal stress, trauma, bullying, violence, poverty and homelessness) are examined through the dual lenses of stress and resilience. Neuroscientific, genetic, and related biological research is emphasized in the course; however, no background in biological sciences is required as a prerequisite.

Room: STOKES HALL 461S
SCWK772501
Families Impacted by Military Service
CANFIELD, JULIE A
Summer 2019
This course explores how families are impacted by military service (FIMS) emphasizing the effects of military culture within which military families function. Stressors such as deployment, and the protective factors associated with military communities will be discussed. Attachment theory will be explored as it pertains to the loss and separation involved in long-term and sometimes repetitive deployment cycles. Substance use, anxiety, avoidance behaviors, and risk-taking behaviors will be discussed in terms of their impact on family life and family system functioning. Resiliency theory will be highlighted in terms of preventing or ameliorating post-deployment difficulties in families impacted by military service.

Frameworks and Tools for Global Practice
MCMAHAN, LYNDSEY D
Summer 2019
An advanced course that prepares students for effective practice in a global context and covers three broad areas: a framework for the rights-based perspective; rights-based programming with reference to vulnerable groups; and building sustainable systems. Students will be exposed to rights-based approaches to social work practice mainly in countries of the global south. Areas of focus include working with vulnerable populations such as children in a variety of settings, gender issues, migration as well as working with various NGOs, governmental and United Nations systems. Emphasis will be placed on working with diverse client populations in each practice setting.
**SCWK779902**  
**Independent Study: Practice Sequence**  
**LOUGHRY, MARYANNE**  
**Summer 2019**  
A course offering the student an opportunity to examine in more depth a subject area that is not included in the school curriculum. The extent of that examination should be equal to the depth that is characteristic of a typical course. The subject must be of significance to the field of social work practice, transcending the distinction between macro and clinical social work.

**Policy Analysis Research for Social Reform**  
**HENRY, BRANDY F**  
**Summer 2019**  
A seminar preparing students for practice-oriented policy analysis research roles. It offers advanced research content of particular use to administrators, planners, advocates, and others interested in participating in policy analysis and development efforts, particularly those related to vulnerable populations. It provides knowledge of and opportunity to apply the following: (1) the logic of inquiry into social policy issues; (2) policy analysis research methods (e.g., population projections, input-output analysis, cost-effectiveness analysis); and (3) writing skills and quantitative reasoning necessary to use data and policy research methods creatively in making effective policy arguments.

Clinical Practice with Children and Families: Assessment, Intervention, and Evidence-Based Practice
SANDOE, ELISABETH M
Summer 2019
An advanced clinical course intended to prepare students for effective practice with children, adolescents, and families. Building on foundation content, the course provides a comprehensive review of child and family development, reviews major theories and research literature concerning the evaluation and treatment of children and families, and examines how clinical social workers may effectively utilize evidence-based treatments to help youth and their families achieve their goals. Students will learn practice techniques of various evidence-based interventions.

SCWK885601
Clinical Practice with Adults: Assessment, Intervention, and Evidence-Based Practice
LINBERG, ANDREW H
Summer 2019
An advanced course focusing on effective interventions with common adult psychosocial disorders. Intervention methods, drawn from current practice evaluation literature, encompass a contemporary eclectic model incorporating cognitive-behavioral, psychodynamic and other relational thinking, practice wisdom, and empirical evidence in determining the most suitable intervention. Special attention is given to recognition of individual and demographic factors influencing clients, as well as their expectations and input concerning the selective invention. Class discussion draws on students' reading and field experience. Through the use of case studies, the course addresses strategies for practice evaluation.

**Group Therapy for Children and Adolescents**  
**ROMANO, CAROLYN**  
**Summer 2019**

This course will prepare students to design and facilitate experiential skills-based groups with both children and adolescents. Building on first-year foundational content this course prepares students to learn how to facilitate skills-based group therapy with youth. Several guiding theories, including (Cognitive Behavior Therapy, Dialectical Behavior Therapy, Solution Focused Therapy, Narrative Therapy, and Motivational Interviewing), will be integrated with multiple experiential activities as vehicles for the engagement in the interventions. Each guiding theory dominates a minimum of two weeks in the syllabus to ensure depth of learning and exploration of possibilities for theory into practice. The experiential activities will include music, adventure, bibliotherapy, art therapy, and technology to assist in the engagement of clients in the learning process and will be utilized throughout the course. Assignments challenge students to develop two innovative original experiential group sessions and demonstrate competence in facilitating both of their group sessions.

SCWK886201  
Cognitive-Behavioral Therapy  
MUNETON CASTANO, JUDY  
Summer 2019  
An advanced practice course that integrates CBT theory, practical assessment tools, and treatment applications with work with children and adults. Lab skills classes will provide students with the opportunity to practice specific techniques. With an emphasis on the extensive literature supporting CBT as an evidence-based model, the course focuses on the CBT assessment and treatment of specific disorders, including anxiety, pain, depression, bipolar disorder, ADHD, substance abuse disorders, and personality disorders. The relevance of Cognitive-Behavioral practice with populations at risk confronting issues of age, race/ethnicity, gender, class, religion, sexual orientation, and disability will be addressed.

Credits: 03  
Schedule: TH 5-8  
Room: HIGGINS HALL 275  
Satisfies Core Requirement: None  
Comments: Elective  
Prerequisites: SCWK7762.
SCWK886401
Group Therapy
SHARP, WILLIAM T
Summer 2019
This course considers many applications of social work group treatment. Through a thoughtful review of selected group therapy literature, analysis of process recordings of group therapy sessions, lectures, class discussion and role-play exercises, students will develop an appreciation of the unique ways in which group treatment can promote individual psychosocial competence. Students will develop skills in the practice of social work treatment.

SCWK886801
Dialectical Behavioral Therapy
NEWMAN, ALISON B
Summer 2019
This course is designed to instruct and prepare students to integrate and apply Dialectical Behavioral Therapy (DBT), a comprehensive and flexible evidence-based treatment. Students will learn to conduct thorough risk assessments, develop crisis management plans, understand borderline personality disorder from the DSM-IV and DBT lenses, create a DBT theory-driven case formulation and treatment plan by stages and targets, observing dialectic dilemmas, balancing acceptance and validation, integrating communication styles, applying commitment strategies, conducting chain/solution analysis, implementing diary cards and collaboratively problem-solving with clients and peers. Students will learn the four DBT modules: Mindfulness, Distress Tolerance, Interpersonal Effectiveness, and Emotion Regulation.

SCWK887401
Adult Psychological Trauma: Assessment and Treatment
EGETO, LEANN
Summer 2019
An advanced clinical course focusing on adults exposed to acute or chronic psychological trauma. Theoretical constructs stress an interactive approach: person, environment, situation. Emphasis is on the interconnections of intrapsychic, interpersonal, cognitive, and behavioral sequelae to catastrophic life events, with attention to socio-economic and cultural factors which influence an individual's differential response to trauma. Various methods are evaluated with the goal of multi-model treatment integration. Clinical presentations on specialized populations (e.g., combat veterans, victims of abusive violence, traumatic loss, disasters, people with AIDS, and the homeless) are used to integrate theory, research designs and strategies, and practice skills.

SCWK887601
Solution-Focused Therapy
TOHN, SUSAN
Summer 2019
An advanced clinical course focusing on time-effective treatments with individuals, families and
groups. The course focuses primarily on Solution-Focused Therapy. Primary concepts include
the paradigm shift from problem to possibility, the role of an active intentional clinician, and the
careful use of language. Emphasis is given to the evaluation as key to the process, which
involves building rapport, identifying a goal, and understanding the client's relationship to that
goal. The course examines pivotal treatment strategies, including language, task setting, and
creating hope in clients through our interventions.

SCWK887701
Narrative Therapy
GADDIS, STEPHEN R
Summer 2019
This course focuses on narrative practice skills that are based on a belief in the power of the
meaning-making systems. The course will examine models, research, and theoretical and clinical
foundations of narrative therapy. Using lecture, discussion, and exercises, students will be
introduced to various narrative therapy practices.
SCWK888701
Global Child Protection
WILLIAMS, TIMOTHY P
Summer 2019
This course introduces the systems in which children, families, groups, organizations, and communities thrive and struggle in international settings. In particular the course focuses on child protection in the context of vulnerable international settings and complex humanitarian emergencies including famine, conflict and displacement. The role of social work and allied professions in such settings is explored with emphasis on the principle of 'do no harm.' The International child protection policies of Governments, United Nations agencies and International Non-Government agencies will be presented and analyzed. Strategies for translating these policies into best practice will include identifying child protection concerns and developing rigorous international child protection programs.

Community Organizing and Political Strategies
TEIXEIRA, SAMANTHA
Summer 2019
An examination of community organization and political strategies for mobilizing support for human services and other interventions that enhance social well-being, especially that of vulnerable populations. The course emphasizes skill development in strategies of community organization and policy change, including neighborhood organizing, committee staffing, lobbying, agenda setting, use of media, and points of intervention in bureaucratic rule making.

Community Engaged Partnership Research
LOMBE, MARGARET
Summer 2019
Social work researchers have opportunities and ethical responsibilities to identify emergent trends in social issues, contribute to the evidence base needed for policy and practice, and to explore the experiences of vulnerable populations in their communities. Responsive community-based research projects will be conceptualized, designed, and implemented in partnership with community groups, community-based organizations, and/or public agencies. This three credit course is structured as a series of in-class sessions covering values, knowledge, and skills related to the process of conceptualizing and implementing community-based research in collaboration with local agencies. The course will prepare students for the Summer Intensive Research Internship.

**Social Work Courses: Fall 2019**

**SCWK660001**  
**Introduction to Social Work**
RYAN, SARAH E  
Fall 2019  
Starting with a discussion of its history and the relevance of values and ethics to its practice, the course takes up the various social work methods of dealing with individuals, groups, and communities and their problems. In addition to a discussion of the theories of human behavior that apply to social work interventions, the course examines the current policies and programs, issues, and trends of the major settings in which social work is practiced.

SCWK660101  
Innovations in Global Practice: Solar Entrepreneurship in Rural India  
YADAMA, GAUTAM N  
Fall 2019  
The purpose of this independent study is to provide students an opportunity to learn more about energy and entrepreneurship and gain hands-on experience working on supplying solar products for the rural poor in India. In collaboration with the BC School of Social Work and the Shea Center for Entrepreneurship, students will study solar entrepreneurship as part of the Solar Urja through Localization for Sustainability (SoULS) initiative at the Indian Institute of Technology Bombay. SoULS provides clean energy access to the poor in rural India by developing a sustainable, localized solar ecosystem. Previously SoULS employed rural community members, primarily tribal women, to assemble and distribute one million solar lamps to local students. Now SoULS is in the process of scaling up to reach 7 million students, in part by establishing a decentralized entrepreneurship model to move beyond solar lamps to offer a suite of solar technology. Students will learn about the significance of energy access for the poor, unique challenges presented by rural poverty, and opportunities for entrepreneurship development in such communities. Students will identify potential solar customers and their energy needs, develop trainings to empower local entrepreneurs and develop business models to sustain local solar technology.

SCWK772101
Human Behavior and the Social Environment
ROMANO, JUSTINE V

Fall 2019
A foundation course emphasizing a systemic perspective in human development and social functioning. Concepts from biology and the behavioral sciences provide the basis for understanding the developmental tasks of individuals, their families, and groups in the context of complex, environmental forces which support or inhibit growth and effective functioning. Attention is given to the variations that occur relative to ethnicity, race, social class, gender, and other differences which mediate the interface of these human systems with their environment.

Neuroscience of Human Relationships and Development
BLACK, JESSICA M
Fall 2019
Following human development from conception to end of life, the course provides students with an introduction to key neurobiological aspects (such as brain development and genetics) of the life course. Special attention is paid to examining the association between neurobiology and the nested layers and relationships in which development unfolds, including family, school, community, and wider society/policy. Concepts important to social work (including but not limited to attachment, trauma, stress, social relationships, emotions, health, and mental health) are addressed within various stages of development. No background in the biological sciences is required.

Public Health Social Work
HAWKINS, SUMMER S
Fall 2019
Public health social work (PHSW) emphasizes health promotion and prevention as well as targeting populations through population-based strategies. The course integrates research on health topics, populations, and settings to learn about the field of PHSW and application of skills to real-world problems. A life course perspective is used to discuss health behaviors and outcomes through all stages of development and across a range of settings. The aim of the course is to provide students a unique perspective on social work from the field of public health by focusing on health promotion, prevention, and reducing disparities at the population-level.

SCWK776201
Basic Skills in Clinical Social Work
MITCHELL, KERRY D
Fall 2019
An overview of interventions emphasizing the multiple roles of a clinical social worker. Emphasis is placed on basic skills of intervention with individuals, families, and groups using the Assessment, Relationship, and Treatment (ART) model. Special attention is given to interviewing skills, data gathering, and psychosocial formulations. Various clinical practice models will be reviewed, including the strengths perspective, brief treatment, supportive treatment, and cognitive behavioral treatment. Students will learn how to conduct and write a psychosocial assessment.

**SCWK779401**  
**Immigrant and Refugee Issues in the United States**  
**OLAYO MENDEZ, JAIME ALEJAN**  
**Fall 2019**  
An overview of the prominent theories, major issues, and controversies in immigration policy is presented. While immigration has become a crucial concern of the American social welfare system as well as an issue of global urgency, immigration controls the fate of growing numbers of asylum seekers. The course will discuss the special needs and problems faced by immigrant and refugee clients and communities; adaptation and coping with a new culture; refugee experience; the impact of relocation on individuals, families, and communities; and a range of world view perspectives including acculturation and assimilation, biculturalism, marginality, and traditional ethnic identities.

Global Policy Issues and Implications
LOUGHRY, MARYANNE
Fall 2019
An advanced policy course that introduces approaches, issues, and competencies of global social work policy interventions. This course focuses on policy analysis in the context of worldwide poverty, underdevelopment, and sustainable development. In the context of social justice, equality, universal human rights, and international collaboration (partnerships), it perceives global systems and their policies as both a challenge for a sustainable planet and for the growth of its interdependent national/local communities.

SCWK882201
The Impact of Traumatic Victimization on Child and Adolescent Development
FITZGERALD, ZANE M
Fall 2019
A course that examines how stress, especially of a violent nature, can impact child and adolescent development. Exploration of selected theories and evidence-based practice will assist students in identifying skills necessary for effective clinical practice with children, adolescents, families, and communities coping with the consequences of traumatic exposure to violence. Students will be encouraged to reflect on the impact of exposure to the injured child and consider how their reactions may identify potential sources of lost empathy or uncover other personal vulnerabilities that might interfere with effective practice.

SCWK882301
Practice in Health and Mental Health Settings with Older Adults
KEARY, SARA A
Fall 2019
An advanced course designed to develop micro and macro practice skills in working with older adults and their families in health and mental health settings. The course explores the biopsychosocial knowledge base required to develop effective interventions with specific foci on the physical and mental health considerations facing older adults and their families. Substance abuse issues and the special challenges of reaching a client population often invisible to service providers are discussed. The role of spirituality in older adults' lives and the challenges of death, dying, and bereavement facing the older adults are also covered.
SCWK883101
Dying, Grief, and Bereavement
FRANCHITTO, JOHN D
Fall 2019
Beginning with an overview of the social phenomena of death and how social attitudes and practices influence the environmental context in which death takes place in contemporary society, the course explores the influence of cultural diversity in the way death is experienced by diverse groups. The tasks of mourning following a person's death and the bereavement process present complex socio-emotional challenges for family and friends throughout the lifespan. Issues in self-reflection and self-care are presented to offer practitioners ways to grow personally and professionally through the process of their clients' losses.

SCWK883601
Psychodynamic Theories of Individual Development
KOVARSKY, MARINA E
Fall 2019
An advanced course that provides an overview of the psychodynamic theories that best explicate individual psychological development over the life cycle from a biopsychosocial perspective, with attention given to sources of development of individual strength and resilience. These theories include drive theory, ego psychology, object relations, self psychology, and intersubjectivity theory. Students will begin to learn to critique and compare theories for their applications to, and usefulness for, social work practice as they reflect particular sets of values and intersect with ethnicity, social class, gender, sexual orientation, religion, age, disability, and other forms of diversity.

SCWK886201
Cognitive-Behavioral Therapy
MITCHELL, KERRY D

Fall 2019

An advanced practice course that integrates CBT theory, practical assessment tools, and treatment applications with work with children and adults. Lab skills classes will provide students with the opportunity to practice specific techniques. With an emphasis on the extensive literature supporting CBT as an evidence-based model, the course focuses on the CBT assessment and treatment of specific disorders, including anxiety, pain, depression, bipolar disorder, ADHD, substance abuse disorders, and personality disorders. The relevance of Cognitive-Behavioral practice with populations at risk confronting issues of age, race/ethnicity, gender, class, religion, sexual orientation, and disability will be addressed.

SCWK886202
Cognitive-Behavioral Therapy
MITCHELL, KERRY D
Fall 2019
An advanced practice course that integrates CBT theory, practical assessment tools, and treatment applications with work with children and adults. Lab skills classes will provide students with the opportunity to practice specific techniques. With an emphasis on the extensive literature supporting CBT as an evidence-based model, the course focuses on the CBT assessment and treatment of specific disorders, including anxiety, pain, depression, bipolar disorder, ADHD, substance abuse disorders, and personality disorders. The relevance of Cognitive-Behavioral practice with populations at risk confronting issues of age, race/ethnicity, gender, class, religion, sexual orientation, and disability will be addressed.

SCWK886401
Group Therapy
COHEN, JOSHUA M
Fall 2019
This course considers many applications of social work group treatment. Through a thoughtful review of selected group therapy literature, analysis of process recordings of group therapy sessions, lectures, class discussion and role-play exercises, students will develop an appreciation of the unique ways in which group treatment can promote individual psychosocial competence. Students will develop skills in the practice of social work treatment.

SCWK886701  
Internal Family Systems Therapy: A Contemporary Approach for Working with Individuals, Couples, Families, and Groups  
WARSH, ROBIN  
Fall 2019  
This advanced clinical course focuses on the Internal Family Systems Model (IFS) into a comprehensive approach that includes guidelines for working with individuals, couples, families, and groups. The IFS Model is a new synthesis of two already existing paradigms: systems thinking and the multiplicity of minds. One major and unique contribution of IFS is the concept that it is the connection of the Self to the Parts that brings healing. The IFS Model offers a non-pathologizing approach to identifying and unburdening the faulty beliefs people carry from childhood trauma and troubling patterns of interaction and replacing them with Self-led resources.

SCWK886801
Dialectical Behavioral Therapy
SCHAEFER, ERIN K
Fall 2019
This course is designed to instruct and prepare students to integrate and apply Dialectical Behavioral Therapy (DBT), a comprehensive and flexible evidence-based treatment. Students will learn to conduct thorough risk assessments, develop crisis management plans, understand borderline personality disorder from the DSM-IV and DBT lenses, create a DBT theory-driven case formulation and treatment plan by stages and targets, observing dialectic dilemmas, balancing acceptance and validation, integrating communication styles, applying commitment strategies, conducting chain/solution analysis, implementing diary cards and collaboratively problem-solving with clients and peers. Students will learn the four DBT modules: Mindfulness, Distress Tolerance, Interpersonal Effectiveness, and Emotion Regulation.

Credits: 03
Schedule: TH 4 30-6 20
Room: CARNEY HALL 308
Satisfies Core Requirement: None
Comments: Elective

Psychosocial Dimensions of Health and Medical Care Practice
ROMANO, JUSTINE V
Fall 2019
An advanced course that utilizes the biopsychosocial model of assessment of individual and family response to illness. In addition, the course will address issues in behavioral and complementary and alternative medicine. The effect of race, ethnicity, gender, sexual orientation and socioeconomic status on health, health care treatments, and health care availability to diverse populations will also be addressed. Finally, the importance of social work contributions to research in health care will be examined.

SCWK887401
Adult Psychological Trauma: Assessment and Treatment
FITZGERALD, ZANE M
Fall 2019
An advanced clinical course focusing on adults exposed to acute or chronic psychological trauma. Theoretical constructs stress an interactive approach: person, environment, situation. Emphasis is on the interconnections of intrapsychic, interpersonal, cognitive, and behavioral sequelae to catastrophic life events, with attention to socio-economic and cultural factors which influence an individual's differential response to trauma. Various methods are evaluated with the goal of multi-model treatment integration. Clinical presentations on specialized populations (e.g., combat veterans, victims of abusive violence, traumatic loss, disasters, people with AIDS, and the homeless) are used to integrate theory, research designs and strategies, and practice skills.

**Credits:** 03  
**Schedule:** TH 4 30-6 20

Solution-Focused Therapy
TOHN, SUSAN
Fall 2019
An advanced clinical course focusing on time-effective treatments with individuals, families and groups. The course focuses primarily on Solution-Focused Therapy. Primary concepts include the paradigm shift from problem to possibility, the role of an active intentional clinician, and the careful use of language. Emphasis is given to the evaluation as key to the process, which involves building rapport, identifying a goal, and understanding the client's relationship to that goal. The course examines pivotal treatment strategies, including language, task setting, and creating hope in clients through our interventions.

SCWK888001
Social Work Practice in Child Welfare
RHEAUME, PAMELA
Fall 2019
An advanced course designed to provide practice knowledge and skills for micro and macro interventions. Throughout the course the issues of poverty, diversity, and services for children of color are considered. Stressing the importance of providing services to children and families so that the family unit is preserved, issues related to family preservation, foster care, family reunification, adoption, legal issues, and emerging trends will be explored. The central focus will be on developing a solid foundation in child welfare policy and practice as a means to promoting a more responsive service delivery system.

School Social Work: Program Development and Educational Policies
KERN, EILEEN L
Fall 2019
An advanced course that provides a comprehensive overview of the history, theory, practice and policy of social work in an educational setting. Beginning with a historical perspective, this course is rooted in school social work principles that emphasize collaborative work with families, and school and community personnel, professional standards, and diverse practice roles. This course provides a comprehensive overview of education policy and the legal rights of students and their families. Special issues in school social work practice related to health, child abuse, school safety and violence, trauma, substance abuse, and high risk behavior are addressed.

SCWK888301
Creating and Sustaining Social Enterprises
HIGGINS, CHARMANE
Fall 2019
This course has the dual goals of understanding the conceptual characteristics of "social enterprise" and the more practical objective of knowing how to create, implement, and sustain a program based on social enterprise principles. These goals are achieved through examining how social enterprise fits with important values, learning key models and considerations, and by creating a complete business plan for an actual social enterprise initiative. Students work in teams gathering essential information, formulating strategy, develop analytic tools, and create financial documents that provide a road map for a new revenue oriented program or service.

Credits: 03

SCWK888401
Strategic Planning for Public and Nonprofit Organizations
LLOYD, JOHN D
Fall 2019
Focusing on the strategic trends and issues which impact the public and nonprofit sectors, this course explores the role of strategic planning as a fundamental tool of public and nonprofit institutions to build high performance organizations, maximize organizational strengths, and enhance community problem-solving. Students will acquire practical skills through case study analysis and the development of a strategic plan.

Credits: 03
Schedule: F 1-2 50
SCWK888501
Management of Organizations Serving Children, Youth, and Families
KAPLAN, JENNIFER B
Fall 2019
An advanced practice course for macro students that emphasizes personnel management skills that promote employee well-being and organizational effectiveness, financial management skills including budgeting and cost analysis, and strategic fund-raising with a focus on revenue sources that support child and family services. Multiple theoretical approaches to leadership are examined, as well as organizational change, the supervisory process and the use of power and authority, and effective application of the diversity model for the inclusive workplace.

Planning for Health and Mental Health Services
PECORARO, MATTHEW J
Fall 2019
A course designed to introduce program planning, strategic planning, proposal writing, and state-of-the-art service delivery models. Significant emphasis will be placed on developing practical skills in the area of proposal development and program design through applying class material to practice through a major planning assignment. Skills to analyze critical issues in mental health and health care delivery, including system design and financing, are emphasized. Critical issues of access to health care, the crisis in health care, and managed care will be discussed and analyzed. Models of service delivery will be critically reviewed.

Frequency: Annually
SCWK995101
Survey of Research Methods in Social and Behavioral Science
BROWN, MELISSA
Fall 2019
The course surveys research methods in the social and behavioral sciences, including theoretical and conceptual approaches to research problem formulation; research design, including experimental, comparative, and survey; sampling; statistical methods; and methods of observation and common techniques of data analysis. The course provides a framework for evaluating social science research codifying methods for gathering scientific evidence, explicating criteria by which to evaluate scientific evidence, and developing techniques for evaluating scientific evidence in the published literature. These tools will be applied to a group of case examples of research in social and behavioral science.

Credits: 03
Schedule: TH 1 30-4
Room: MCGUINN HALL 601
Satisfies Core Requirement: None
Comments: Required for all Doctoral Students
Prerequisites: None

Cross-listed with: None
Frequency: Annually

SCWK995301
Cross-Cultural Issues in Social and Behavioral Research
TRAN, THANH V
Fall 2019
Increasing diversity presents both challenges and opportunities to social and behavioral researchers. This course explores current scholarship relevant to age, gender, immigration, race-ethnicity, and social class and examines how these concepts as processes impact multiple levels of social and behavioral functioning. The multicultural concepts are analyzed in relation to their theoretical and empirical base with the purpose of identifying social and behavioral research methods that are cross-culturally sensitive. Additionally, the course emphasizes methods of establishing and assessing cross-cultural equivalence in measurements of key social and psychological constructs.

Credits: 03
Schedule: TH 9-11 30
Room: CARNEY HALL 007
Satisfies Core Requirement: None
Comments: Required for all Doctoral Students
Prerequisites: With permission of the Department.

SCWK996401
Introduction to Statistics and Data Analysis
TRAN, THANH V
Fall 2019

This course introduces basic statistics and practical applications of data analysis in social work research and evaluation. The course aims to teach students pragmatic tools for assessing basic statistical analyses. Students will learn: (1) descriptive statistics including measures of central tendency and variability; (2) hypothesis testing using chi-square, t-tests, one way ANOVA, correlation, and simple regression; (3) presenting and interpreting statistical results, and (4) using SPSS statistical package for data analysis. Other topics will be covered are data acquisition/management, data cleaning, data transformation, and introduction to SAS and Stata statistical packages. Upon completion of this course, students should be able to think critically about data and apply standard statistical to describe the data and to draw conclusions from such analyses.

SCWK660002
Introduction to Social Work
RYAN, SARAH E
Spring 2020
Starting with a discussion of its history and the relevance of values and ethics to its practice, the course takes up the various social work methods of dealing with individuals, groups, and communities and their problems. In addition to a discussion of the theories of human behavior that apply to social work interventions, the course examines the current policies and programs, issues, and trends of the major settings in which social work is practiced.

Credits: 03
Schedule: W 7-9 30

SCWK660201
Macro Independent Study

WERNER, KELSEY

Spring 2020

An opportunity for Macro students to investigate one aspect of social work practice with groups or communities in-depth. In addition to being of interest to the individual student, the area of investigation must be of substantive import to the field and of clear significance to contemporary community organization and social planning practice. Any student who has successfully completed the first year program of Macro studies is eligible to pursue an independent study in the fall and/or spring semester of the second year.

The Social Welfare System

KEANEY, WILLIAM F

Spring 2020

The course explores current social welfare issues in the context of history and underlying political rationale and societal values. The course is designed to provide students with an understanding of the relationship between contemporary social welfare policy and social work practice. The course focuses on the historical, political, economic and other social conditions that influence policy development in the United States. Models of social welfare are presented and critiqued. Policy issues and programs that impact specific populations are explored with an emphasis on social and economic justice. The course content will be framed through the lens of distributive equity and social justice. Understanding how policy influences practice and how social workers can influence social welfare policy are examined.

Credits: 03
Schedule: W 9-10 50
Room: MCGUINN HALL 400
Satisfies Core Requirement: None
Comments: Prerequisite for all other Policy courses.
Required of all M.S.W. students.

SCWK772401
Neurobiology of Stress and Resilience in the Life Course
BRUECK-CASSOLI, STEPHANIE
Spring 2020
This course examines the ways in which stress poses risk to healthy biological, psychological, and social development. Using life course perspective and ecological systems theory (micro through macro), the course also highlights the characteristics, relationships, and contexts that increase resilience at each life stage (in utero through end of life). Circumstances relevant to social work (including but not limited to prenatal stress, trauma, bullying, violence, poverty and homelessness) are examined through the dual lenses of stress and resilience. Neuroscientific, genetic, and related biological research is emphasized in the course; however, no background in biological sciences is required as a prerequisite.

SCWK773201
Authority and Leadership in Professional Life
SARDA, EVANGELINE
Spring 2020
This course focuses on the conscious and unconscious group and systemic dynamics that arise from the exercise of authority, leadership, and power. Students learn about leadership and authority dynamics by focusing on boundaries, authority, role, and task, and by studying their own experience and linking this to theory and class reading. Classes are intensely psychodynamic in nature and promote powerful and often emotional interchange as students explore the dynamics of social identity and processes such as splitting, projection, and projective identification. Students experiencing a difficult period in life should speak to the professor before enrolling. Class attendance is required. Grade is based on class attendance, exercises, short papers, journals, and final paper. Attendance at a group relations conference is strongly encouraged; the working title for the March 2020 conference is Intersectionality: Exploring Relatedness and Dividedness in Self and Systems, March 27-29, 2020, Stokes Hall, Boston College (registration fee required). Variable credit offered for attendance at, and reflection paper on, conference experience. Contact Professor Sarda for information (sarda@bc.edu). Limited enrollment.

Services to Migrants: A Border Perspective
CALVO VILCHES, MARIA ROCIO; LOUGHRY, MARYANNE  

Spring 2020  
The right to migrate and protective stance of sovereign nations creates an inevitable conflict. Along the U.S. border with Mexico there has arisen a variety of responses by government, religious, and community organizations that seek to address various aspects of migration. This field based study of policy and services will seek understanding of the conflicts, explore the wants and needs of migrants, pursue the social policies that impact migration north from Central America and assess the range of human services and their outcomes in the Nogales AS corridor.

Global Practice Group Independent Study  
None  
Spring 2020  
Among the issues explored in this course are child and family welfare, gender, ethnicity, poverty, employment, housing, health, etc. Special attention is given to social and economic justice and values and ethical issues that may arise in service provision. The class meets for four one-hour academic sessions during the fall semester. Additional meetings may be scheduled as needed. Contact with instructor is maintained during the spring semester through the discussion board and e-mail. The first two assignments will be completed prior to departure for the field placement location and the major assignment completed by the end of the practicum experience.

SCWK880201
Policy for an Aging Society: Issues and Options
JAMES, JACQUELYN
Spring 2020
This advanced policy course provides an opportunity to examine how historical and contemporary forces and demographic change shape the perceived problems of the elderly, the politics of aging, and public policy responses. New questions are being raised about the cost of public and private retirement and health care commitments directed at the old and about the responsibilities of older Americans. The implications of the diversity (ethnic, racial, gender, health and economic status) of current and future cohorts of elders need to be understood to adequately plan service and policy responses to the aging of America.

Legal Aspects of Social Work
APTAKER, DAVID
Spring 2020
An examination of various areas of the law and legal implications of interest to social workers. The course provides a useful study of the framework of the American legal system, the process of litigation, and the constitutional principles of due process and equal protection. The seminar explores the interaction between social workers and lawyers by placing real life social work problems in a legal context. The format is designed to engage students in critical legal thinking and explore the relationship between social policy and the development of the law.

The Impact of Traumatic Victimization on Child and Adolescent Development
FITZGERALD, ZANE M
Spring 2020
A course that examines how stress, especially of a violent nature, can impact child and adolescent development. Exploration of selected theories and evidence-based practice will assist students in identifying skills necessary for effective clinical practice with children, adolescents, families, and communities coping with the consequences of traumatic exposure to violence. Students will be encouraged to reflect on the impact of exposure to the injured child and consider how their reactions may identify potential sources of lost empathy or uncover other personal vulnerabilities that might interfere with effective practice.

Practice in Home and Community Settings with Older Adults  
MATZ, CHRISTINA J  
Spring 2020  
An advanced course that explores the roles of micro and macro-level social workers with older adults in home and community settings. Beginning with a consideration of aging in place, the course addresses the person-in-environment challenges facing older adults living outside of institutional settings. Attention is given to protecting vulnerable adults from abuse and neglect, grandparents raising grandchildren, and older adults with disabilities. The course concludes with a discussion of the legal issues of competency, guardianship, and end-of-life decision-making while considering issues of diversity, including race, ethnic group, sexual orientation, and gender, that affect the appropriateness of services.

Social Work and Spirituality
KLINE, PAUL M
Spring 2020
This course explores spirituality as a core dimension of human development and as a necessary area of concern for social workers including non-religious expressions of spirituality as well as spirituality shaped by religious traditions. We will explore how spirituality contributes to optimal human development and, in particular, the power of spirituality to advance psychosocial competence, coping, and well-being. Although all students will explore common questions and topics students have freedom to responsibly shape their learning experience to advance their specific professional objectives.

SCWK883101
Dying, Grief, and Bereavement
FRANCHITTO, JOHN D
Spring 2020
Beginning with an overview of the social phenomena of death and how social attitudes and practices influence the environmental context in which death takes place in contemporary society, the course explores the influence of cultural diversity in the way death is experienced by diverse groups. The tasks of mourning following a person's death and the bereavement process present complex socio-emotional challenges for family and friends throughout the lifespan. Issues in self-reflection and self-care are presented to offer practitioners ways to grow personally and professionally through the process of their clients' losses.
SCWK883301
Leadership and Social Transformation
LUBARSKY, CARLEY
Spring 2020
An overview of general principles of management, this course provide students with a broad understanding of theories of organizational functioning combined with a focus on leadership for change in organizations. The role of leader-manager is explored in three theoretical perspectives of organizations: the structure of human service organizations and requisite management skills; the human resource perspective and promoting the recruitment and development of people as a vital component of organizational functioning; and organizational change with emphasis on advocating for and sustaining change within human service organizations.

Veterans' Health and Mental Health  
RODOLICO, JOHN M  
Spring 2020  
Social workers who understand issues that are unique to the military can comfortably engage with them and more effectively interact and treat this population. The health of veterans will be discussed in terms of the physical wounds of war such as traumatic brain injuries (TBIs) and other service-connected injuries to the body. The invisible wounds of war will also be discussed in terms of the mental health needs that may surface from the experience of having gone to war. Post-traumatic stress will be explored in depth as both a normal reaction to the situation of going to war and as a complication with the readjustment to civilian life that requires sustained attention to non-threatening information in such places as family, work, and school. The challenges veterans face in the areas of unemployment, substance use, the criminal justice system, and family violence will all be discussed as well as changing macro-level policies around these issues.

Clinical Practice with Adults: Assessment, Intervention, and Evidence-Based Practice
LINBERG, ANDREW H
Spring 2020
An advanced course focusing on effective interventions with common adult psychosocial disorders. Intervention methods, drawn from current practice evaluation literature, encompass a contemporary eclectic model incorporating cognitive-behavioral, psychodynamic and other relational thinking, practice wisdom, and empirical evidence in determining the most suitable intervention. Special attention is given to recognition of individual and demographic factors influencing clients, as well as their expectations and input concerning the selective invention. Class discussion draws on students' reading and field experience. Through the use of case studies, the course addresses strategies for practice evaluation.

SCWK885701
Group Therapy for Children and Adolescents
ROMANO, CAROLYN
Spring 2020
This course will prepare students to design and facilitate experiential skills-based groups with both children and adolescents. Building on first-year foundational content this course prepares students to learn how to facilitate skills-based group therapy with youth. Several guiding theories, including (Cognitive Behavior Therapy, Dialectical Behavior Therapy, Solution Focused Therapy, Narrative Therapy, and Motivational Interviewing), will be integrated with multiple experiential activities as vehicles for the engagement in the interventions. Each guiding theory dominates a minimum of two weeks in the syllabus to ensure depth of learning and exploration of possibilities for theory into practice. The experiential activities will include music, adventure, bibliotherapy, art therapy, and technology to assist in the engagement of clients in the learning process and will be utilized throughout the course. Assignments challenge students to develop two innovative original experiential group sessions and demonstrate competence in facilitating both of their group sessions.

SCWK885801
Clinical Practice in Schools
BAGLEY-JONES, KRISTAN M
Spring 2020
An advanced clinical course that provides a comprehensive overview of the necessary skills to prepare students for effective communication with teachers and school personnel as well as with diverse families on issues related to assessment, building family partnerships, family-based treatment, and multicultural issues. The course reviews assessment and use of state-of-the-art diagnostic testing instruments. Given the relationship between school social work and special education, students will be exposed to the diverse populations served in schools and learn how to engage in practice with children with a variety of issues, including learning, physical, behavioral, developmental, neurological, and emotional disabilities.

SCWK885901  
**Integrating Play in Therapeutic Settings**  
**BAGLEY-JONES, KRISTAN M**  
**Spring 2020**

An advanced clinical course preparing students for effective practice with children, adolescents, and their families through the use of play therapy. Content includes a comprehensive overview of theories informing the practice of play therapy and specific play therapy techniques for effective assessment and intervention consistent with the theoretical perspectives presented. Effective individual, filial, and small group play therapy interventions focus on empirically-validated methods related to attachment problems, generalized anxiety, PTSD, and depression. Incorporated throughout discussion of theory, practice methods, and evaluation is thoughtful attention to the influence of culture, ethnicity, age, gender, and family structure in provision of competent services.

SCWK886201
Cognitive-Behavioral Therapy
MITCHELL, KERRY D
Spring 2020
An advanced practice course that integrates CBT theory, practical assessment tools, and treatment applications with work with children and adults. Lab skills classes will provide students with the opportunity to practice specific techniques. With an emphasis on the extensive literature supporting CBT as an evidence-based model, the course focuses on the CBT assessment and treatment of specific disorders, including anxiety, pain, depression, bipolar disorder, ADHD, substance abuse disorders, and personality disorders. The relevance of Cognitive-Behavioral practice with populations at risk confronting issues of age, race/ethnicity, gender, class, religion, sexual orientation, and disability will be addressed.

SCWK886301
Cross-Cultural Social Work Practice
BRADLEY, SAMUEL L
Spring 2020
A course examining effective intervention with persons of diverse cultural backgrounds. Special attention is given to the need for practitioners to have an approach that supports and enhances the culture and ethnic identity of the client. Using the transactional nature of culture and the dynamics of power as contextual factors shaping people's realities and, consequently, the values and behavioral adaptations they develop, the course focuses on the helping relationship and issues in evaluation and intervention.

**SCWK886701**  
**Internal Family Systems Therapy: A Contemporary Approach for Working with Individuals, Couples, Families, and Groups**  
**LINGREN, KATHLEEN M**  
**Spring 2020**  
This advanced clinical course focuses on the Internal Family Systems Model (IFS) into a comprehensive approach that includes guidelines for working with individuals, couples, families, and groups. The IFS Model is a new synthesis of two already existing paradigms: systems thinking and the multiplicity of minds. One major and unique contribution of IFS is the concept that it is the connection of the Self to the Parts that brings healing. The IFS Model offers a non-pathologizing approach to identifying and unburdening the faulty beliefs people carry from childhood trauma and troubling patterns of interaction and replacing them with Self-led resources.

**Clinical Social Work Independent Study**

None

**Spring 2020**

An opportunity for those in the Clinical Social Work concentration to investigate one aspect of social work practice in-depth. The area of investigation must be of clear significance to contemporary clinical social work practice with individuals, families, or groups. Any clinical social work student may submit (in the prior semester) a proposal for independent study in the fall and/or spring semester of his/her final year.

**SCWK887401**

**Adult Psychological Trauma: Assessment and Treatment**

SHORIN, JAYME A

**Spring 2020**

An advanced clinical course focusing on adults exposed to acute or chronic psychological trauma. Theoretical constructs stress an interactive approach: person, environment, situation. Emphasis is on the interconnections of intrapsychic, interpersonal, cognitive, and behavioral sequelae to catastrophic life events, with attention to socio-economic and cultural factors which influence an individual's differential response to trauma. Various methods are evaluated with the goal of multi-model treatment integration. Clinical presentations on specialized populations (e.g., combat veterans, victims of abusive violence, traumatic loss, disasters, people with AIDS, and the homeless) are used to integrate theory, research designs and strategies, and practice skills.
SCWK888601
Financial Management and Resource Development
ENELAMAH, NGOZI VICTORIA
Spring 2020
This required macro practice course prepares students to develop and manage appropriate resources for creating, supporting, and sustaining effective human service organizations. Managers must understand an organization's financials to exercise fiduciary responsibility. In order to meet the mission, agencies also depend on effective and efficient direct care staff, supervisors, and managers. If there is no money, there is no mission; and if there is not sufficient and motivated staff to perform their functions, human service organizations cannot be successful. This course concentrates on these two core aspects of human services management: understanding organizational finances and human resources management and development.

SCWK888901
Social Innovation
KUMAR, PRAVEEN
Spring 2020
Designed to prepare students with the skills to develop transformational responses to social problems through learning concepts related to innovation, needs assessment, and grant development, this course provides students with knowledge about how to create new, innovative responses to social problems and put these ideas into action. Students study examples of social entrepreneurship, learn how to assess social need, and develop new programmatic responses through grant-writing. Participation in the Social Innovation Lab allows students a first-hand look at innovation in action in existing non-profits and at how the redesign process promotes and supports new thinking.

SCWK889001
Philanthropy and Strategic Fundraising
BURNIEIKA, JOSEPH
Spring 2020
This course will provide an overview of philanthropy and the fundamentals of charitable giving from the perspective of foundations and individuals. The course will also review the various elements for developing a comprehensive fundraising program; to developing a case statement for support, the role of the board, donor identification, cultivation and solicitation. Fundraising is a lot more than writing a grant proposal. In this course students will learn more about other fund development methods, such as managing an annual giving program, donor communications and marketing, and will cover the key issues to launch a successful capital campaign and how to develop and implement a planned giving program. This course will look at foundation and individual charitable giving and the different vehicles for making charitable gifts. Students will learn about the various types of foundations, and look at their effectiveness to address social issues. Students will further explore critical issues in philanthropy, the laws that regulate charities, and understand what is required to make a grant.

SCWK995601
The Dialectics of Social and Behavioral Theory  
LOMBE, MARGARET  
Spring 2020  
In this course, students will read selected original publications of classical and contemporary theorists in psychology, sociology, political science, urban planning and community development, and economics. They will consider how theories which are foundational to different disciplines in the social and behavioral sciences can inform their studies and predict empirical findings. The theories selected for examination in the course will include: theories of identity and stigma, social integration theories, exchange theory, conflict theories, theories of social integration; critical race theory, role theories, rational choice theory, life course theories, role theories, social justice theories, theories of social change and, and epidemiology. The students will use the assumptions of different theories to prepare three papers, each of which will examine a single issue from a different perspective.

SCWK996001  
Regression Analysis for Social and Behavioral Sciences  
SHEN, CE  
Spring 2020  
This course assumes knowledge of basic statistical concepts used in social research including centrality and dispersion, correlation and association, probability and hypothesis testing, as well as experience of using common statistical package such as SPSS, SAS or STATA. The course will focus on regression-based methods for analyzing quantitative social and behavioral science data using STATA. The topics include multiple regression analysis, major regression diagnostics, and logistic regression analysis for categorical dependent variables.

Credits: 03  
Schedule: F 1-3 30  
Room: O'NEILL LIBRARY 245
SCWK996201
Multilevel and Longitudinal Data Analysis
SHEN, CE
Spring 2020
The course assumes knowledge of multiple regression analysis. An advanced statistics course that will cover two related topics: Multilevel data analysis using HLM 6 and panel data analysis using STATA. The first topic will cover two-level models for continuous and dichotomous outcomes, three-level models, and growth curve models. The second topic will cover fixed and random effects models, GEE models, and mixed models.

SCWK996301
Applied Methods in Multicultural Mental Health Research
BETANCOURT, THERESA
Spring 2020
Applied Methods in Multicultural Mental Health Research course prepares doctoral students and post-doctoral fellows to apply culturally-informed methods for research and interventions in low resource settings. Students will be expected to possess a strong formative base of training in research methods. Deepening the discourse, students will work through exercises to link research questions to methods, examine ethical issues in global mental health/social work research, and operationalize their knowledge of culture and measurement psychometrics in designing studies. The course will include a focus on sequencing mixed methods (qualitative and quantitative) for work in diverse cultural settings in LMICs and in the U.S. Students will gain an understanding of research along the spectrum of community-based participatory approach and will learn more on negotiating research relationships especially in working with vulnerable populations and those serving them. This course will highlight the role of implementation science in solving challenges in global mental health and social work and how research can be translated to practice through prevention and culturally-appropriate and scalable interventions and strategies. This course will also provide grant writing training to help students integrate their learning in related theories and methodologies into fundable research proposals.

SCWK997101
Doctoral Group Independent Study
None
Spring 2020
This elective offers students the opportunity for an in-depth examination of a substantive topic that is not comprehensively addressed by other required or elective doctoral courses. The topic is considered from either a theoretical, policy, and/or research perspective. The topic area should have direct and substantial relevance to social work research, social work education, evidence-based practice, and/or social policy analysis. A course syllabus should be submitted to the Doctoral Program Director prior to registration.

Theories and Methods of Teaching in Professional Education
BLACK, JESSICA M
Spring 2020
Effective teaching in social work education requires an understanding of the components of curriculum building and professional practice skills required by the Council on Social Work Education. Based on a strong theoretical base in the principles of adult learning, this course is designed to introduce the student to the theory and methods of professional social work education with a concentrated focus on course design and classroom execution. A broad range of specific teaching techniques are presented along with the means by which to evaluate student performance and learning.

Financial Accounting
TAYLOR, EDWARD
Summer 2019
This course develops an understanding of the basic elements of financial accounting and the role of accounting in society. Students are introduced to financial statements and to the fundamental accounting concepts, procedures, and terminology employed in contemporary financial reporting. The skills necessary to analyze business transactions, to prepare and comprehend financial statements, and to examine a firm's profitability and financial condition are developed. Students are required to use the Internet to conduct a financial statement analysis project.

ACCT663501
Forensic Accounting
PEARSON, TIMOTHY A
Summer 2019
Forensic Accounting is a growing area of practice in which the knowledge, skills, and abilities of accounting are combined with investigative expertise and applied to legal problems. Forensic accountants are often asked to provide litigation support where they are called on to give expert testimony about financial data and accounting activities. In other more proactive engagements, they probe situations using special investigative accounting skills and techniques. Some even see forensic accounting as practiced by skilled accounting specialists becoming part and parcel of most financial audits--an extra quality control step in the auditing process that will help reduce financial statement fraud.

**ACCT770101**  
**Accounting**  
**CROWLEY, MARK D**  
**Summer 2019**  
At the outset, course work will be concerned with the development and use of accounting information to evaluate the status and performance of business enterprises. Attention will be given to the reporting of information for use by persons and institutions outside the enterprise. In the second part of the course, the focus will be on the use of accounting information in managerial decision making. Section number 1 of this course will be offered on-campus and section number 11 will be offered online. Please see the link http://bit.ly/CSOM1 for details about the online section.

This course develops an understanding of the basic elements of financial accounting and the role of accounting in society. Students are introduced to financial statements and to the fundamental accounting concepts, procedures, and terminology employed in contemporary financial reporting. The skills necessary to analyze business transactions, to prepare and comprehend financial statements, and to examine a firm's profitability and financial condition are developed. Students are required to use the Internet to conduct a financial statement analysis project.

ACCT102201
Managerial Accounting
CURLEY, BRAD
Fall 2019
This course explains the usefulness of accounting information for managerial decision-making in the areas of analysis, planning, and control. The fundamentals of managerial accounting, including product costing, cost-volume-profit relationships, cash budgeting and profit planning, and performance evaluation are included. Ethical and international issues of importance to accountants are discussed.

ACCT332101
Intermediate Accounting for Finance and Consulting
CARTER, MARY ELLEN
Fall 2019
This intermediate financial accounting course builds on ACCT1021 to provide, in greater depth, a comprehensive understanding of financial accounting topics important to assessing firm performance. The course is designed to teach users of financial statements (rather than preparers of financial statements) how accounting information, shaped by regulation, has advantages and limitations in assessing the economics of the underlying business. The goal of the course is to provide a better understanding of financial reporting and accounting information as an input to evaluating a firm. With hands-on use of cases and SEC filings, this course is beneficial for students seeking careers that require the use of financial statement information as an input to decision-making.

ACCT663401
Ethics and Professionalism in Accounting
CURLEY, BRAD
Fall 2019
The professional role of the Certified Public Accountant is to protect the investing public, yet the CPA's profit is dependent on controlling costs and managing a portfolio of satisfied corporate clients. These realities lead to a conflict of interest that is at the heart of this course. This course will focus on the nature of professions and professionalism. Specific attention will be paid to the AICPA's code of ethics, economic and regulatory factors affecting the public accounting profession, and various aspects of the current accounting environment.

Credits: 03
Schedule: M 3-5 30

Satisfies Core Requirement: None
Comments: The Department
Prerequisites: ( ACCT3309 OR ACCT8815 ).
Corequisites: None
Forensic Accounting is a growing area of practice in which the knowledge, skills, and abilities of accounting are combined with investigative expertise and applied to legal problems. Forensic accountants are often asked to provide litigation support where they are called on to give expert testimony about financial data and accounting activities. In other more proactive engagements, they probe situations using special investigative accounting skills and techniques. Some even see forensic accounting as practiced by skilled accounting specialists becoming part and parcel of most financial audits--an extra quality control step in the auditing process that will help reduce financial statement fraud.

Advanced Auditing
HUSK, FREDERICK W
Spring 2020
Spend a semester with a big firm audit partner learning the financial statement audit process chronologically from start to finish. The course includes a semester-long 'hands-on' audit case and emphasizes key areas of accounting and auditing judgement, along with managing difficult client situations. You will greatly expand your auditing knowledge and skills beyond the introductory auditing class and be much more prepared for your first few years in the auditing practice of one of the accounting firms. The course is also excellent preparation for the CPA Exam AUD section.

Forensic Accounting is a growing area of practice in which the knowledge, skills, and abilities of accounting are combined with investigative expertise and applied to legal problems. Forensic accountants are often asked to provide litigation support where they are called on to give expert testimony about financial data and accounting activities. In other more proactive engagements, they probe situations using special investigative accounting skills and techniques. Some even see forensic accounting as practiced by skilled accounting specialists becoming part and parcel of most financial audits--an extra quality control step in the auditing process that will help reduce financial statement fraud.

The world of business is deluged by data and there is an increasing demand for individuals who are able to dive into, dissect, and drive decisions with it. This course uses data analytics and research in financial reporting and economics to understand fundamental business issues. You will be introduced to the framework of dealing with big data in a business, and to understand problems and evaluate solutions using data and research findings. You will also acquire practical skills such as exposure to Structure Query Language (SQL) and data visualization tools, and learn to analyze structured and unstructured data to drive decisions. We will apply the newly acquired data skills to understand these core business issues: How should compensation be set? Why is one company's governance structure different from another company's? How do we identify internal control weakness and minimize the risks associated with it? How can we prevent and detect frauds? For external parties such as investors, bankers, auditors, and regulators, how can they protect their interests? We will answer these questions and more using data to understand problems and evaluate solutions.

Empirical Topics in Accounting III
CARTER, MARY ELLEN; SHU, SUSAN
Spring 2020
The objective of this course is to provide students with a sound framework for understanding and assessing the quality of empirical archival research in accounting. The course has two objectives. Part of the course is aimed at facilitating a deeper understanding of the econometric issues facing empirical archival research. This part of the course will survey the common problems and potential solutions. The other part of the course will survey the empirical research on accounting and contracting. Topics will include the role of accounting information in evaluating managers and setting executive compensation, earnings management induced by the use of accounting in contracting, and the relation between accounting and corporate governance.

BSLW880301
Topics: Law for CPAs
NEYLON, JOHN G
Summer 2019
The course focuses on the law of commercial transactions relevant to business professionals, especially accountants. It covers the common law of contracts and comprehensively reviews the Uniform Commercial Code, emphasizing the law of sales, commercial paper, and secured transactions. Agency and major forms of doing business such as partnerships, corporations, and limited liability companies, along with securities regulation are examined. The laws of property, bankruptcy, insurance, wills, trusts and estates, along with accountants' liability round out the course. Leading cases and major statutory laws pertaining to business regulation are discussed.

BSLW102202  
Law II--Business Law  
DEPARTMENT  
Fall 2019  
The course complements BSLW1021, providing broad coverage of topics related to law in business. The content includes many subjects tested on the Business Law portion of the CPA examination including the Uniform Commercial Code law of contracts and sales, negotiable instruments, and secured transactions. The law of agency, various forms of business organizations including general and limited partnerships, corporations, and LLCs, as well as bankruptcy, real property, insurance, wills, trusts and estates, and accountants' liability are discussed.
BSLW110201
Law and Ethics
POWERS, RICHARD E
Fall 2019
This course examines the legal and ethical challenges faced by business people in today's global society, focusing on the interplay of legal and ethical obligations in the business environment, the extent to which they overlap, and the application of moral principles in the absence of legal requirements. While laws provide some guidance on the right course of action, individuals are not strictly constrained by legal principles. The emphasis throughout this course is on assisting students to develop the decision-making skills necessary for their future roles as responsible managers and leaders.

Law and Ethics
POWERS, RICHARD E
**BSLW111301**  
**International Climate Change Law and Ethics**  
**POWERS, RICHARD E**  
**Fall 2019**
Climate change and its attendant consequences present our planet with some of history's greatest challenges. Indeed, the United Nations has observed that climate change is the defining issue of our time, the impact of which has already proven to be global in scope and unprecedented in scale. The displacement of human beings, and in some cases entire societies, is one of many related matters of growing concern. This course will explore the legal and ethical dimensions of climate change through an examination of topics including legal responses to the environmental consequences associated with climate change and the ethical issues related thereto. Sustainability, mitigation, adaptation, allocation, litigation, international treaties, human rights, justice, forced migration, and displacement will be among the topics discussed to assist students in their consideration and evaluation of this critical issue from a legal and ethical perspective.

Real Estate Fundamentals
CHAZEN, EDWARD
Fall 2019
This course serves as an introduction to the field of real estate. The course is structured around several themes that will seem more interconnected by the end of the course than at the start. The course covers an overview of real estate and society; landlord-tenant relationship; numbers and capital in real estate; property development; market research and analysis; housing markets; environmental impact and sustainability; and risk management. The course uses various teaching and learning methods: class lectures; case study discussions; videos of interviews with experts and about illustrative projects; homework exercises and guest lectures.

Real Estate
HICKEY, MAIREAD T
Fall 2019
This course provides students with an introduction to real estate law and its application to real-world situations, including business dealings, campus capital improvement projects and the sharing economy. Through lectures, modified legal case method, group work, and guest speakers, students will study substantive areas of property law, including types of ownership, nonpossessory interests in real estate, leasing, brokerage, conveyancing, financing, constitutional issues, environment liability, and zoning. In addition to learning about the legal process and sources of property law, students will have the opportunity to examine accompanying policy and ethical concerns and develop an understanding of property law's role in the community.

BSLW118501
Topics: Law and Economics
WESNER, THOMAS L
Fall 2019
Can we be optimistic about our future as phrases such as "new normal" and "austerity measures" take hold of our national psyche? Is there reason for hope after the Great Recession has substantially altered the global economic landscape? Through this course, students will utilize an interdisciplinary approach to understanding important legal, business, and economic issues they will soon be called to address as leaders, policymakers, businesspersons, and citizens. Over the course of the semester, students will work to create politically and economically viable solutions to many of the most critical legal, economic, and policy issues facing our nation and world.
How does housing affect the lives of Americans? Where you live determines your access to schools, quality of healthcare, fresh food, clean air, parks and recreation, affordable credit, and even how long you are likely to live. This course explores concepts of housing policy and planning at the national, state, and local levels. It examines programs and policies used to subsidize housing for millions of Americans and help them gain access to a decent place to live. Topics will be considered from multiple perspectives including housing finance, design, community planning, inequality, operations management, and sustainability. We will explore the historical and economic context of U.S. housing and discuss the barriers that low-income families face that affects their access to decent housing. The course will be divided into three sections: history, policies, and today's issues. Students will explore some of the most recently developed programs and how they fit into effective community revitalization. These programs will be evaluated in class discussions and group presentations.

BSLW220601
Real Estate and Urban Action
MCCULLAGH, NEIL P
Fall 2019
Real Estate and Urban Action is a class in which students explore the interdisciplinary fields that are engaged in neighborhood revitalization. The course uses the transformation of the failed Columbia Point housing project (Dorchester, MA) into Harbor Point, a successful mixed income neighborhood, as a core teaching case study, highlighting how successful redevelopment addresses the social and economic needs of community residents. Classes include guest lectures from developers, public planning officials, and supportive services experts on the social, cultural, and political factors critical to transforming distressed neighborhoods into safe and economically viable neighborhoods. It is a practical course, in which students gain experience through field trips and interactions with real estate and supportive services professionals, culminating in a team neighborhood transformation proposal.

Credits: 03
Schedule: W 4 30-6 50
Room: FULTON HALL 210
Satisfies Core Requirement: None
Comments: The only prerequisite is an interest in any facet of real estate and urban action. Given the multidisciplinary tasks required to create viable communities, students from all schools at Boston College are welcomed to participate.

BSLW220701
Urban Design for Complexity and Sustainability
LITTELL, MATTHEW
Fall 2019
The course explores the changing demands on urban environments in the twenty-first century and the newest policies, technologies, and design approaches that are being developed to address them. Topics will include analyses of the factors that shape the physical form of cities, including zoning and regulatory contexts, real estate development patterns, transportation infrastructure, environmental challenges, and aesthetics. The material will be introduced as case studies and surveys, with presentations by design professionals, city officials, and real estate developers. Students will gain literacy in zoning, real estate metrics, planning, and issues related to architectural design and large scale urban design. The semester will conclude with a final project synthesizing many of the topics covered.

**BSLW220801**  
**Urban Action Lab**  
**MCCULLAGH, NEIL P; PERKINS, TAYLOR A**  
**Fall 2019**  

Urban Action Lab is a semester long class that provides students with first hand experience working on projects that advance affordable housing and access to opportunity. Students will develop and pursue research projects in partnership with mission driven organizations from across the City of Boston. Each project is completed in collaboration with a partner organization and are selected based on their potential for high-impact contribution to the organization. Project components include research, evaluation, interviewing, and writing. Students will work in close collaboration with partner agencies, the teaching team, and fellow students. The class will meet once per week and will occasionally require students to attend meetings off campus. Please schedule a meeting with professors to discuss.

BSLW660401
Law for the Entrepreneur
REDER, MARGO
Fall 2019
This course examines the legal issues and challenges created by the migration of business applications to the internet. The intersection of law, business, and technology is explored in depth in this course. Students learn some aspects of entrepreneurship with practical application to business transactions. This course covers business' digital assets, in the form of intellectual property--trademarks, copyrights, patents, and trade secrets. Other topics surveyed include: contracts, licensing agreements, jurisdiction, tax, financing start-ups, privacy, speech, defamation, content control, filtering, information security, and crime. The course introduces students to critical high-tech issues necessary for effective managers of e-commerce enterprises.

Topics: Law for CPAs
KAMERON, MATTHEW A
Fall 2019
The course focuses on the law of commercial transactions relevant to business professionals, especially accountants. It covers the common law of contracts and comprehensively reviews the Uniform Commercial Code, emphasizing the law of sales, commercial paper, and secured transactions. Agency and major forms of doing business such as partnerships, corporations, and limited liability companies, along with securities regulation are examined. The laws of property, bankruptcy, insurance, wills, trusts and estates, along with accountants' liability round out the course. Leading cases and major statutory laws pertaining to business regulation are discussed.

**BSLW114501**  
**Real Estate Development**  
**CHAZEN, EDWARD**  
**Spring 2020**

This course is focused on what real estate development is and what it means to be a real estate developer. Students will gain an understanding of the process of real estate development, including design and construction; how developers engage with the public sector and the surrounding community to obtain approval for a development; how projects are financed; and, other important elements that contribute to completing successful real estate projects. Also learn about the legal aspects of developments; the ways that development is a catalyst for neighborhood improvement and local economic growth; and, trends in sustainable development.

**Credits:** 03  
**Schedule:** M W 1 30*  
**Room:** FULTON HALL 110

*Satisfies Core Requirement:* None  
**Comments:** This course employs various teaching and learning methods: class lectures; videos
of interviews with experts and about illustrative projects; case study discussion; guest lectures; team-based virtual tours of Boston neighborhoods that have been transformed by large-scale real estate development; and, a capstone project of teams preparing a development plan for an actual site in the Boston areas.

Real Estate  
HICKEY, MAIREAD T  
Spring 2020  
This course provides students with an introduction to real estate law and its application to real-world situations, including business dealings, campus capital improvement projects and the sharing economy. Through lectures, modified legal case method, group work, and guest speakers, students will study substantive areas of property law, including types of ownership, nonpossessory interests in real estate, leasing, brokerage, conveyancing, financing, constitutional issues, environment liability, and zoning. In addition to learning about the legal process and sources of property law, students will have the opportunity to examine accompanying policy and ethical concerns and develop an understanding of property law's role in the community.

BSLW117001
Securities Regulation
SPOONER, RACHEL S
Spring 2020
Securities Regulation is the study of how the government regulates financial markets and their participants, whether a start-up seeking capital through a Kickstarter campaign, a multi-national public company disclosing news to its shareholders, or an investment banker advising a company in its IPO. The course focuses upon the key federal statutes that regulate securities and participants in the securities markets: Securities Act of 1933, Securities Exchange Act of 1934, Sarbanes-Oxley, Dodd-Frank Act of 2010, Foreign Corrupt Practices Act, and several criminal statues. The students learn the role of the Securities and Exchange Commission and how the SEC will impact securities markets and their participants. The course covers the multitude of methods for raising capital within the confines of the Securities Act and the J.O.B.S. Act. Students learn how executives of public companies, and their auditors, lawyers, and bankers, decide when and how to make disclosures about the company. The course also examines financial scams and fraud, considering the ethical boundaries of the complex, fast-paced financial world. The class hosts guests ranging from SEC enforcement attorneys, to in-house counsel at a large bank, to defense counsel with specialties in insider trading and white-collar crime, Foreign Corrupt Practices Act, and the Bernie Madoff case. The class is intended for students interested in careers in finance, audit, leadership in public companies, or law.

Real Estate and Urban Action
MCCULLAGH, NEIL P
Spring 2020
Real Estate and Urban Action is a class in which students explore the interdisciplinary fields that are engaged in neighborhood revitalization. The course uses the transformation of the failed Columbia Point housing project (Dorchester, MA) into Harbor Point, a successful mixed income neighborhood, as a core teaching case study, highlighting how successful redevelopment addresses the social and economic needs of community residents. Classes include guest lectures from developers, public planning officials, and supportive services experts on the social, cultural, and political factors critical to transforming distressed neighborhoods into safe and economically viable neighborhoods. It is a practical course, in which students gain experience through field trips and interactions with real estate and supportive services professionals, culminating in a team neighborhood transformation proposal.

Urban Action Lab
MCCULLAGH, NEIL P; PERKINS, TAYLOR A
Spring 2020
Urban Action Lab is a semester long class that provides students with first hand experience working on projects that advance affordable housing and access to opportunity. Students will develop and pursue research projects in partnership with mission driven organizations from across the City of Boston. Each project is completed in collaboration with a partner organization and are selected based on their potential for high-impact contribution to the organization. Project components include research, evaluation, interviewing, and writing. Students will work in close collaboration with partner agencies, the teaching team, and fellow students. The class will meet once per week and will occasionally require students to attend meetings off campus. Please schedule a meeting with professors to discuss.

Real Estate Field Projects
CHAZEN, EDWARD
Spring 2020
This course is a complement to in-class learning and provides an experiential learning component to the real estate education at CSOM. The course consists of teams of 4-5 students each working on a field project for a real estate/developer investor, not-for-profit organization, or government agency. The field projects are "real world" real estate projects that involve extensive data collection/analysis, interviews with a range of experts and others that can influence the conclusions and recommendations of the team, and presentations to management of the sponsoring organization. The field projects typically include development proposals for a property; re-development plans for an existing property; and, real estate market research to assist an investor considering expansion into new geographic markets.

Credits: 03
Schedule: TH 12*
Room: FULTON HALL 240
Satisfies Core Requirement: None
Comments: Each team will work under the supervision of the Instructor, with weekly team meetings to review the work plan, progress toward identified goals and practicing several presentations that form an important part of the learning experience. There will be three field projects planned.

The Business of Journalism
DAHL, DAVID K
Spring 2020
This course will help students to become literate in the business of journalism and the changes underway in the profession. Discussing the history of mainstream news organizations and new business models brought by the digital revolution, we consider how questions of audience, revenue, and platform shape the rapidly changing news business. We live in an age of new money, new platforms, and new ways of telling stories, but also an age in which many journalism jobs have disappeared. The opportunities unleashed by these changes are helping to create the most exciting period ever for journalism. We need to know how and why these changes have occurred.

BCOM368801
Communication for Consultants
OWENS, RITA R
Spring 2020
This course explores the communication challenges and opportunities consultants encounter when they work with internal or external clients. Students learn practical business writing and presentation skills specifically related to engagement activities. There is a strong focus on assessing audience needs, analyzing case studies, and determining the value of a communication with a client. Students produce a variety of communications including project proposals, statements of work, instructions, routine project correspondence, progress reports, formal reports, panel presentations and post-implementation reviews.
Credits: 03  
Schedule: W 1-3 30  
Room: O'NEILL LIBRARY 246  
Satisfies Core Requirement: None  
Comments: The course is designed for juniors and seniors who are planning on consulting (or client facing) careers. Students must have demonstrated strong writing skills in English. 
Prerequisites: None  
Corequisites: None

BCOM668801  
Business Writing and Communication Skills for Managers  
OWENS, RITA R  
Spring 2020  
The course focuses on the type of communication done on the job, especially in corporations. Business assignments are used to illustrate appropriate writing and communication strategies, protocols, styles, and formats. Students work alone and in collaboration with others around a variety of assignments and tools including traditional paper reports, electronic materials, e-mails, social media, and oral presentations. By the end of the semester, students will be proficient in producing business letters, instructions, reports, proposals, and visual materials.

**BCOM885001**  
**Public Speaking**  
**SCHWARTZ, STACY M**  
**Spring 2020**  
This course provides an introduction to basic concepts, theories, and principles of oral communications through the mode of public/in class speech performances. You will gain practical experience in exploring, discovering, and arranging ideas, using evidence and research to support claims, preparing organized outlines, and composing speeches while broadening your view of theoretical considerations in communications. This is an oral presentation class. Each student will present varied styles of public speaking to his/her peers. Our class will also include lectures, discussions, video analysis, and oral exercises to alleviate speech anxiety.

MFIN102201
Fundamentals of Finance
WANG, YU; ZHANG, XIAOLIN
Summer 2019
In this course, you will learn how to value things that cost money and provide value in return (stocks, bonds, projects, mortgage payments...). It will be a useful introduction to finance thought. We will look at the interpretation of financial statements, the time value of money and how it applies to security valuation and capital budgeting. We will also examine the risk/return trade-off and the efficient markets hypothesis. We will also look at the cost of capital, capital structure, working capital management and touch on international finance.

MFIN662501
Private Equity
GASPERONI, JAMES H
Summer 2019
This course is the study of Private Equity as an asset class and its various components. Private Equity involves the investment of capital into companies and assets that are not publicly traded on stock exchanges. The objective of the course is to provide a basic understanding of the Private Equity ecosystem: private equity companies, underlying investments in companies (or assets) and the investors that provide financing for deals. A primary focus of the class will be traditional buyout investments: an area of the capital markets that is growing in both size and opportunity as well as increasing in interest from investors. In addition, the course will consider the similarities and differences between typical buyouts and other private equity styles.

**Management of Financial Institutions**
JAMES, ROBERT F  
Summer 2019  
This course considers banks and other financial institutions as information and deal-making entities. This broad perspective is used to explain how and why changing information and contracting technologies are altering the structure of the financial services industry and financial regulation. Lectures explore the implications of these ongoing changes for the methods financial institution executives should use to measure and manage an institution's risk and return.

MFIN883501  
Real Estate Finance  
CHAZEN, EDWARD  
Summer 2019  
Real Estate Finance is for graduate students to learn the ways that private and public capital sources are used to finance income-producing property. The class covers the following topics: (1) basics of real estate financial analysis and financial statements; (2) how to value income property and terminology unique to real estate; (3) permanent loans; (4) construction loans; (5) equity financing and joint ventures; (6) distressed debt and equity, and workouts; (7) institutional real estate, private equity investing; (8) Real Estate Investment Trusts (REITs); (9) Commercial Mortgage-Backed securities (CMBS); (10) corporate sale-leaseback financing; (11) residential mortgage financing and the sub-prime mortgage crisis; (12) government role in real estate finance and tax credit financing. Teaching methods include lectures, illustrative case studies, Excel-based financial exercises and videos of interviews with industry experts and representative transactions. Grades consist of a mid term exam, one individual case study report, class participation, a team case study presentation, a team presentation of a REIT stock analysis, and a final project preparing an investment memorandum for debt or equity financing of an actual property.
MFIN885201
Financial Econometrics
NARDONE, MARY S
Summer 2019
This course teaches how mathematical techniques and econometrics are used in financial research and decision making. Topics include matrix algebra, differential and integral calculus, simple linear regression, residual analysis, multivariate regression, and the generalized linear model. Students will be introduced to the latest developments in theoretical and empirical modeling.

Fundamental Analysis  
ARGYROPLE, CHRISTOPHER  
Summer 2019  
This course will focus on cash-flow oriented models of the valuation of the firm. Wall Street-style analytical techniques will be utilized, including the production of quarterly earnings forecasts and the development of buy/sell/hold recommendations. Topics include enterprise value, free cash flow, economic value added, risk/reward analysis, and the art of the management interview. Due to the overlap of material, graduate students can only enroll in one of the following classes to count towards their Master's degree in the Carroll School: either MFIN8869 (Fundamental Analysis) or MFIN6665 (Applied Fundamental Analysis).

Data Analytics in Finance
ZHANG, JUBAO
Summer 2019
Data Analytics in Finance focuses on critical skills in programming and computation/analysis of financial data, and more importantly, pragmatic applications in portfolio management and risk management. Theoretical concepts and background for these techniques will be introduced, and the focus is on their applications and hands-on implementation utilizing software packages and programming platforms that are widely used in the financial industry (Python). The course will extensively focus on real-world applications of finance theory.

MFIN220501
Corporate Financial Strategies
HOTCHKISS, EDITH
Fall 2019
This course examines how corporate financial managers create value for stakeholders through a broad range of financial transactions. We will first take an in-depth look at corporate valuation methodologies from both a theoretical and applied perspective. Then, using a combination of case studies, class presentations, and assigned readings, we will focus on applications of these methods in the context of various types of corporate restructurings. Specific applications will include capital structure and financing decisions, M&A and other asset restructuring decisions, and more complex financial transactions including buyouts and distressed restructurings.
