Corporate Financial Strategies
HOTCHKISS, EDITH
Fall 2019
This course examines how corporate financial managers create value for stakeholders through a broad range of financial transactions. We will first take an in-depth look at corporate valuation methodologies from both a theoretical and applied perspective. Then, using a combination of case studies, class presentations, and assigned readings, we will focus on applications of these methods in the context of various types of corporate restructurings. Specific applications will include capital structure and financing decisions, M&A and other asset restructuring decisions, and more complex financial transactions including buyouts and distressed restructurings.

Real Estate Finance
CHAZEN, EDWARD
Fall 2019
This course focuses on debt and equity financing of income-producing real property, primarily in the U.S. market. The course will look at both the private debt and equity and public securities markets for real estate finance. Teaching methods include lectures, case study discussions, videos, select chapters in the text and relevant articles, practice exercises in Excel and guest speakers. The course considers real estate finance from the perspective of the users of capital (developers and property owners) and the sources of capital (lenders and equity investors). The course also covers the role of the public sector in using tax payer funds to advance public purposes by offering various kinds of subsidies to developers, and evaluating the relative success of such programs. The primary student goals and learning outcomes are to learn how the private and public securities capital markets provide funds to the real estate industry, understand risks unique to real estate and how to structure a financing of commercial real estate, the ability to discuss and present a professional financing request for real estate debt and equity, and appreciate the diverse ways financing can be used to positively influence community and neighborhood improvement.

Entrepreneurial Finance
HESISSION-KUNZ, ANDREW
Fall 2019
This course introduces undergraduate students to entrepreneurial finance with a focus on the strategic financing of rapidly growing ventures. Through a combination of readings, simulations, and analysis of current news and events, students will learn to assess the value drivers of a firm, determine the capital needs and fundability of growth, assess and mitigate corporate risks, and study the strategy of potential exits. We will look at the most common vehicles for funding hyper-growth, including venture capital, angel funding, crowdfunding, and other alternatives. We will study the cost of capital, including terms, for building a balance sheet for growth. This course includes 1 MANDATORY Wednesday afternoon/evening session held April 8 from 4:30 p.m. to 6:50 p.m. Please only sign up for this course if you have no conflicting classes, travel, or other events that evening.

Capital Structure and Financial Decisions
MALENKO, ANDREY
Fall 2019
This course takes as its viewpoint the CFO of a firm. We assume that the CFO's job is to maximize firm value and deal with three types of decisions: (1) which projects to invest in, (2) how to finance that investment, and (3) how to manage the cash flows of the firm. This is an applied course that will primarily use case studies to introduce financial tools needed to make value-enhancing business decisions.

MFIN660612
Forecasting Techniques
MC GOWAN, RICHARD

Fall 2019
The theory and practice of applied time series analysis will be explored. First the different segments (trend, seasonality, cyclical, and irregular) of a time series will be analyzed by examining the Autocorrelation functions (ACF) and Partial Autocorrelation functions (PACF). The specifics model the various types of time series include linear regression, panel regression, seasonal decomposition, exponential smoothing, and ARIMA modeling as well as combining models. PLEASE NOTE: This course is also offered as an online hybrid course with Fr. McGowan, OPER/MFIN6606.12, ECON2229.12. For his sections only: in addition to the online lectures presented on the Canvas LMS, there are three required on-campus class meetings on: Saturday morning February 22, and Saturday May 2. The midterm exam will also be held on campus on Monday evening March 16. Please see the course syllabus for additional details.

Equity Securities Analysis  
AZEVEDO DUARTE SILVA, ERNE  
Fall 2019  
The equities securities analysis and valuation course will teach a highly rigorous approach to equities securities analysis and valuation with a heavy emphasis on in-class discussion and case study analysis. Initially, the course will focus on financial theory that underpins equity security valuation, and then move on to understand how industry structure and a company's competitive advantage influences an investor's decision making and valuation. Financial statement analysis, modeling, and different valuation techniques will be explored in detail. Where appropriate, guest lecturers will be brought in to share their specific expertise and perspectives as an investor. By the end of the course, the goal will be to have every student be able to analyze a company as a potential investment and understand its valuation.

Mergers and Acquisitions
MARCUS, PAUL A
Fall 2019
This course will review the merger and acquisition process from the perspective of buyers and sellers of both private and public companies. Placing emphasis on the valuation of companies as well as the analysis of non-financial factors, the course will endeavor to provide the participants with a practical approach to analyzing and advising clients on the positive and negative aspects of an M&A transaction. Additional topics will include understanding the use of leverage, transaction structure, due diligence, and the concept of fairness. The class will be a combination of lectures and case studies presented in class by the participants.

Finance Seminar: Simulation and Optimization in Finance
HAIDAR, HAISSAM
Fall 2019
This course studies the theory and practice of financial simulation and optimization using quantitative techniques that enable finance professionals to make optimal decisions under uncertainty. While theoretical material and background for these techniques will be introduced, the focus is on their applications and hands-on implementation utilizing software packages and programming platforms that are widely used in the financial industry. Topics include simulation of important probability distributions, random walks, linear and nonlinear optimization, and backtesting. Lectures draw on examples such as asset allocation under different definitions of risk; portfolio risk management; modeling asset price dynamics; trading strategies; index tracking; derivative pricing, hedging, arbitrage; capital budgeting under uncertainty and real options.
MFIN666501
Applied Fundamental Analysis
NAVARATNAM, ARVIND
Fall 2019
The objective of the course is to provide hands-on experience in financial statement analysis in a real-world setting. Students will be exposed to general tools of financial analysis, theoretical concepts, and practical valuation issues. By the end of the course, students should develop a framework for evaluating an investment opportunity by using a firm's financial statements to draw an understanding of their performance and provide a basis for making reasonable valuation estimates, as well as have an understanding of the challenges investor face in determining the earnings power of a company. Due to the overlap of material, graduate students can only enroll in one of the following classes to count towards their Master's degree in the Carroll School: either MFIN8869 (Fundamental Analysis) or MFIN6665 (Applied Fundamental Analysis).

Management of Financial Institutions
WOSEPKA, KENT J
Fall 2019
This course considers banks and other financial institutions as information and deal-making
entities. This broad perspective is used to explain how and why changing information and
contracting technologies are altering the structure of the financial services industry and financial
regulation. Lectures explore the implications of these ongoing changes for the methods
financial institution executives should use to measure and manage an institution's risk and
return.

MFIN882101
Corporate Valuation and Restructure
HOTCHKISS, EDITH
Fall 2019
This course exposes students to a broad range of financial restructuring techniques that can be applied to improve business performance. Case discussion and visitors are used to illustrate how various corporate restructuring approaches can be used to increase firm value and to highlight characteristics of potential candidates for different restructuring techniques. The case analysis provides opportunity to practice the application of standard corporate valuation methods.

**MFIN882401**

**AIM1: Applied Investment Management**

**MARTENS, DAVID J**

**Fall 2019**

This course provides an opportunity for students to utilize both theoretical and practical aspects of the investment management process by competing to actively manage a million dollar portfolio for the University. AIM1 teaches students about institutional portfolio management, asset allocation, risk assessment, investment manager evaluation, and fundamental equity analysis. Students are placed in investment teams to respond to a Request for Proposal (RFP) in which they develop a framework for identifying and evaluating equities and bonds and managing a diversified risk-adjusted portfolio. Winning teams will be selected based on final presentations to a board of professional institutional investors and given the opportunity to manage live accounts in AIM2 during the spring semester.

**Real Estate Finance**

**CHAZEN, EDWARD**

**Fall 2019**
Real Estate Finance is for graduate students to learn the ways that private and public capital sources are used to finance income-producing property. The class covers the following topics: (1) basics of real estate financial analysis and financial statements; (2) how to value income property and terminology unique to real estate; (3) permanent loans; (4) construction loans; (5) equity financing and joint ventures; (6) distressed debt and equity, and workouts; (7) institutional real estate, private equity investing; (8) Real Estate Investment Trusts (REITs); (9) Commercial Mortgage-Backed securities (CMBS); (10) corporate sale-leaseback financing; (11) residential mortgage financing and the sub-prime mortgage crisis; (12) government role in real estate finance and tax credit financing. Teaching methods include lectures, illustrative case studies, Excel-based financial exercises and videos of interviews with industry experts and representative transactions. Grades consist of a mid term exam, one individual case study report, class participation, a team case study presentation, a team presentation of a REIT stock analysis, and a final project preparing an investment memorandum for debt or equity financing of an actual property.

Ph.D. Seminar: Asset Pricing
BALDUZZI, PIERLUIGI
Fall 2019
The course is intended to generate enthusiastic, high quality intellectual activity around the course material. Focuses on the development of skills that will help students become conversant enough with basic theory and the current literature on asset pricing that would permit them to read critically and analyze papers in this area, develop enough expertise in selected empirical methods in finance that they will be able to use these techniques in their research, and to find potential thesis topics.

Data Analytics in Finance
ZHANG, JUBAO
Fall 2019
Data Analytics in Finance focuses on critical skills in programming and computation/analysis of financial data, and more importantly, pragmatic applications in portfolio management and risk management. Theoretical concepts and background for these techniques will be introduced, and the focus is on their applications and hands-on implementation utilizing software packages and programming platforms that are widely used in the financial industry (Python). The course will extensively focus on real-world applications of finance theory.

**Real Estate Finance**  
**CHAZEN, EDWARD**
Spring 2020
This course focuses on debt and equity financing of income-producing real property, primarily in
the U.S. market. The course will look at both the private debt and equity and public securities
markets for real estate finance. Teaching methods include lectures, case study discussions,
videos, select chapters in the text and relevant articles, practice exercises in Excel and guest
speakers. The course considers real estate finance from the perspective of the users of capital
(developers and property owners) and the sources of capital (lenders and equity investors). The
course also covers the role of the public sector in using tax payer funds to advance public
purposes by offering various kinds of subsidies to developers, and evaluating the relative
success of such programs. The primary student goals and learning outcomes are to learn how
the private and public securities capital markets provide funds to the real estate industry,
understand risks unique to real estate and how to structure a financing of commercial real
estate, the ability to discuss and present a professional financing request for real estate debt
and equity, and appreciate the diverse ways financing can be used to positively influence
community and neighborhood improvement.

Entrepreneurial Finance
HESSION-KUNZ, ANDREW
Spring 2020
This course introduces undergraduate students to entrepreneurial finance with a focus on the strategic financing of rapidly growing ventures. Through a combination of readings, simulations, and analysis of current news and events, students will learn to assess the value drivers of a firm, determine the capital needs and fundability of growth, assess and mitigate corporate risks, and study the strategy of potential exits. We will look at the most common vehicles for funding hyper-growth, including venture capital, angel funding, crowdfunding, and other alternatives. We will study the cost of capital, including terms, for building a balance sheet for growth. This course includes 1 MANDATORY Wednesday afternoon/evening session held April 8 from 4:30 p.m. to 6:50 p.m. Please only sign up for this course if you have no conflicting classes, travel, or other events that evening.

Equity Securities Analysis
AZEVEDO DUARTE SILVA, ERNE
Spring 2020
The equities securities analysis and valuation course will teach a highly rigorous approach to equities securities analysis and valuation with a heavy emphasis on in-class discussion and case study analysis. Initially, the course will focus on financial theory that underpins equity security valuation, and then move on to understand how industry structure and a company's competitive advantage influences an investor's decision making and valuation. Financial statement analysis, modeling, and different valuation techniques will be explored in detail. Where appropriate, guest lecturers will be brought in to share their specific expertise and perspectives as an investor. By the end of the course, the goal will be to have every student be able to analyze a company as a potential investment and understand its valuation.

Private Equity
GASPERONI, JAMES H
Spring 2020
This course is the study of Private Equity as an asset class and its various components. Private Equity involves the investment of capital into companies and assets that are not publicly traded on stock exchanges. The objective of the course is to provide a basic understanding of the Private Equity ecosystem: private equity companies, underlying investments in companies (or assets) and the investors that provide financing for deals. A primary focus of the class will be traditional buyout investments: an area of the capital markets that is growing in both size and opportunity as well as increasing in interest from investors. In addition, the course will consider the similarities and differences between typical buyouts and other private equity styles.

Finance Seminar: Simulation and Optimization in Finance
HAIDAR, HAISSAM
Spring 2020
This course studies the theory and practice of financial simulation and optimization using quantitative techniques that enable finance professionals to make optimal decisions under uncertainty. While theoretical material and background for these techniques will be introduced, the focus is on their applications and hands-on implementation utilizing software packages and programming platforms that are widely used in the financial industry. Topics include simulation of important probability distributions, random walks, linear and nonlinear optimization, and backtesting. Lectures draw on examples such as asset allocation under different definitions of risk; portfolio risk management; modeling asset price dynamics; trading strategies; index tracking; derivative pricing, hedging, arbitrage; capital budgeting under uncertainty and real options.

MULLARKEY, COLM D
Spring 2020
This course is reserved for special topics, offering advanced course work in sub-fields of finance. This year, MFIN8860 is an introduction to derivative assets, financial engineering, and risk management. The course covers the pricing of futures and options contracts as well as securities that contain embedded options, risk management strategies using positions in derivative securities, static hedging, and dynamic hedging. Applications from commodity, equity, bond, and mortgage-backed markets are considered.

Data Analytics in Finance
XU, RAN
Spring 2020
Data Analytics in Finance focuses on critical skills in programming and computation/analysis of financial data, and more importantly, pragmatic applications in portfolio management and risk management. Theoretical concepts and background for these techniques will be introduced, and the focus is on their applications and hands-on implementation utilizing software packages and programming platforms that are widely used in the financial industry (Python). The course will extensively focus on real-world applications of finance theory.

Ph.D. Seminar: Advanced Topics in Asset Pricing
ALBUQUERQUE, RUI
Spring 2020
The course covers a variety of asset pricing topics and models. The first part of the course deals with representative agent models in economies with a single risky asset. The second part of the course introduces heterogeneity along the investor side or the asset side. We cover models of learning, asymmetric information, differences in beliefs, market segmentation, idiosyncratic risk, agency conflicts, and others.

Information Systems Courses: Summer 2019

ISYS216002
Intro to Programming using Swift for iOS App Development
GALLAUGHER, JOHN M

Summer 2019

In this fast-paced course, students will learn the Swift programming language and iOS app development skills. Using a "flipped-classroom" approach, the students take lectures in a series of online videos embedded in a web-based course/reference/quiz book, following along with videos as they learn programming concepts and build apps. Although this is a flipped class, expect a challenging course. Class is mandatory (this is NOT an online course) and class time will be used for additional exercises, concept review, and student questions. Students are required to bring a fully-charged Mac laptop to each class with the latest version of Apple's free Xcode software installed (make sure you have access to a Mac that meets these requirements before enrolling). While this course is rigorous, challenging, and covers a broad set of topics at a rapid pace, the course assumes no prior programming experience. Students should be prepared to spend significant time each week on self-directed learning and regular programming projects. This course can be used in place of ISYS 2157 Programming for Management for credit toward the Information Systems concentration.

Credits: 03
Schedule: M T W TH 9-2
Room: None
Satisfies Core Requirement: None
Comments: Section 02 is a "Bootcamp" version of the course which will be taught in Dublin, Ireland. This section (02) compresses the course ISYS 2160 - Special Topics: Swift/iOS App Development into a three week bootcamp that is taken as an experience abroad, hosted at the BC campus offices in Dublin, Ireland. Students will live in dormitories at University College, Dublin. Lodging and group excursions are included in the price of the course, but students are responsible for their travel costs to and from Ireland, as well as for most of their meals. If you plan to enroll, make sure you have a passport that is valid through the end of your time in Ireland. This course will be offered summer 2019.

ISYS665001
FinTech Revolution: Disruptive Technologies, Blockchain, and Future of Finance
KARPOVSKY, ANNA
Summer 2019
FinTech is the intersection of finance, technology, and regulation. The course aims to help students understand FinTech and recognize the challenges and opportunities the FinTech innovations pose. Students gain a basic understanding of the foundations and principles that enabled the rise of FinTech and examine cases for a more in-depth analysis of specific innovations such as blockchain and cryptocurrencies. The course advances students' knowledge of FinTech, much needed skill in the industry, and gives students insight into the applications, limitations, and risks of technological innovations in finance. The main goal of the course is to develop basic vocabulary and to understand the key technical terms related to FinTech technologies.

ISYS770001
Data Analytics 2: Management and Data Skills
SPANG, JOHN J
Summer 2019
Information Technology (IT) systems permeate the strategy, structure, and operations of modern enterprises. IT has become a major generator of business value, especially for organizations that have the right set of resources and capabilities to exploit it. It is essential that managers become fluent with IT so that they can promote innovative strategic initiatives that are increasingly IT dependent. In this course, students will obtain a broad overview of IT fundamentals, key emerging technologies, and IT managerial frameworks. Students will develop their ability to identify new opportunities presented by IT. Section numbers 1 and 2 of this course (when offered) will be delivered on-campus and section numbers 11 and 12 (when offered) will be delivered online. Please see the link bit.ly/CSOM1 for details about the online sections.

**Information Systems Courses: Fall 2019**

**ISYS102101**  
**Digital Technologies: Strategy and Use**  
LI, ZHUOXIN  
**Fall 2019**  
This class was formerly known as Computers in Management. Digital technologies play a vital and varying role in management. In this course we approach the subject in two ways. In one module students learn to use technology as a tool for problem solving by developing increasingly sophisticated models in Excel. The other module provides an introduction to management viewed through the lens of technology. Students examine the role of technology in promoting innovation and organizational competitiveness across a variety of functional areas of the firm (e.g., marketing, finance, operations).

Technology and Culture
GRIFFITH, WILLIAM
Fall 2019
This interdisciplinary course will first investigate the social, political, psychological, ethical, and spiritual aspects of the Western cultural development with a special emphasis on scientific and technological metaphors and narratives. We will then focus on the contemporary world, examining the impact of our various technological creations on cultural directions, democratic process, the world of work, quality of life, and especially on the emergent meanings for the terms "citizen" and "ethics" in contemporary society. Students will explore technologies in four broad and interrelated domains: (1) computer, media, communications, and information technologies, (2) biotechnology, (3) globalization, and (4) environmental issues.

Special Topics: Design Thinking and Strategy
DICKINSON, KRISTINE D
Fall 2019
Design thinking is a human-centered approach to innovation that draws from the designer's toolkit to integrate the needs of people, the possibilities of technology, and the requirements for business success - Tim Brown, CEO of IDEO. Strategic design thinking is an integral driver of innovation and a significant factor in a business' ability to foresee and adapt to customer needs. Companies like Apple, IDEO, and Pixar are all pioneers in the field, and this course will draw directly from their proven methods. Students will learn the various phases of design thinking, and how to apply a customer-centric approach to products and services in a range of industries. Students will delve into topics such as user experience (UX) product design, creative problem-solving, strategic storytelling, and customer-centric business decision making. Course content will include team projects, case studies, and occasional guest lectures from industry experts. The class will be highly focused on practical experimentation and is directly relevant for students interested in product and brand management, marketing strategy, entrepreneurship, and beyond.

TechTrek East  
KANE, GERALD C; DOYLE, JEREMIAH T  
Fall 2019
The Shea Center presents TechTrek East, a 3-credit, field-study course combining class work with a weekend field study in New York City and several local Boston trips. During the trips students will meet with senior executives, entrepreneurs, and venture capitalists in technology industry firms. While focusing on the tech industry, TechTrek is designed to appeal to all majors. Course work and visits will have a managerial focus, highlighting executive, marketing, finance, operations, and R&D functions.

TechTrek Dublin
KANE, GERALD C
Fall 2019
Boston College and the Shea Center for Entrepreneurship present TechTrek Dublin, a course combining classroom learning on the BC campus with a week-long field study to Dublin, Ireland. The course involves some 20 master-class sessions with senior executives, entrepreneurs, and venture partners. Students study tech industry strategy and competition, entrepreneurship, and venture finance, examining how firms go from startup to blue chip. Undergraduate TechTrek Dublin is competitively admitted and is open to all BC undergraduates in all schools, sophomores to seniors. Any undergraduate who has completed a full year (two semesters) of courses at Boston College is eligible to apply for Undergraduate TechTrek Dublin. Applications are posted, and selection takes place early April 2019. Classroom study is in the second half of fall semester, and the field study is held during undergraduate winter break.

Managing Digital Innovation
FICHMAN, ROBERT
Fall 2019
The steady march of Moore's Law has accelerated the introduction of new products, processes, and business models enabled by digital technology. These digital innovations are transforming how we live and work, how companies compete, and the structure of entire industries. This course will provide students with the concepts and frameworks they will need to: (1) understand the nature of digital innovations and the factors affecting their emergence and diffusion, (2) identify and evaluate digital innovation opportunities (and threats), (3) manage the digital innovation process in organizations, and (4) evaluate the effects of digital innovation on business and society.

ISYS334001
Data Analytics in Practice
TEODORESCU, MIKE
Fall 2019
Organizations everywhere are struggling to aggregate, analyze, and monetize the growing deluge of data generated by modern information systems. Business Analytics capitalizes on this data by combining statistical and quantitative analysis, explanatory and predictive modeling, and fact-based management. Managers can explore patterns, predict future trends and develop proactive, knowledge-driven decisions that affect all parts of modern organizations. This course provides students with a familiarity with the capabilities and limitations of emerging analytics techniques, an essential understanding of methods and tools, and a core understanding required to be an intelligent manager, designer, and consumer of analytics models. This course meets twice a week in class. The class format includes lectures covering analytical methods, principles of good practices, as well as examples drawn from case studies and other reading materials covering use cases of these techniques. The course will include a programming component in R and a module on Visualization with examples in Tableau. The course includes a module on ethical use of machine learning techniques. Assignments will include problem sets and discussions of course concepts or relevant articles and/or cases. The goal of the course will be to enable you as managers to make better decisions using data and to communicate effectively with data scientists.

ISYS334501
Managing for Social Impact and the Public Good
FRECHETTE, EDWARD K
Fall 2019
Managing for social impact in the twenty-first century is a multi-faceted challenge. This course will provide students with an interdisciplinary framework for exploring how corporations engage with social impact issues that are outside the conventional definitions of shareholder value and wealth creation. Through a combination of research, reading, class discussion, group projects, and case studies, students will examine and debate the boundaries of corporate social and ethical responsibility for public good. They will learn about the various frameworks and metrics that are in widespread use to measure global and local impacts of large enterprises, including impact investing, public benefit corporations, the Triple and Quadruple Bottom Lines, and the Global Reporting Initiative.

**Credits:** 03  
**Schedule:** TH 4 30-6 50  
**Room:** FULTON HALL 423  
**Satisfies Core Requirement:** None  
**Comments:** Course topics include corporate impacts on sustainability and the environment, economic development and resource allocation, employees and customers, as well as the extended impact of supply chain vendors and partners, impact investing, and the use of technology and social media to manage corporate image and engage with various stakeholder communities. As part of a semester-long team project, students will work together to conduct in-depth research on the multiple social impacts of a selected global enterprise with a Boston-area presence.

**Systems Analysis and Design**  
**WYNER, GEORGE M**  
**Fall 2019**  
The course studies information systems (IS) development including requirements, analysis, design, and implementation phases and workflows. We investigate the roles of systems analysts; serving as intermediaries between users, managers, and implementers; and helping each to understand the needs and problems of others. The student will learn about major methods and tools used in the systems development process. Please note that Database Systems and Applications (ISYS3257/CSCI1157) must be completed prior to taking this course.

**Social Media, Emerging Technologies, and Digital Business**

**SUTTON, LINDSAY A**

**Fall 2019**

The past few years have witnessed the rapid rise of a number of new types of information technologies, such as social media, so-called "sharing economy" platforms, artificial intelligence, blockchain, internet of things, virtual and augmented reality, just to name a few. These new tools both present immense opportunities and pose considerable threats for businesses of all sizes and across industries. This course explores the impact that these tools are having on the competitive environment, as well as the characteristics that companies, leaders, and employees will need to possess in order to thrive in this new environment increasingly defined by digital tools. Additionally, this course both learns about and learns with these information technologies in novel ways.

**Geographic Information Systems for Planning and Decision-Making**

**COHEN, WILL W**

**Fall 2019**
Large quantities of information are available to describe our social and physical environment with high detail, but making sense of this data requires specialized skill sets. Geographic Information Systems (GIS) is a general approach to analysis and is a powerful set of tools for understanding complex problems or for making a compelling argument about issues grounded in the physical or social environment. It is widely used in the public and private sectors. This course will introduce students to the use of GIS and representation as a means of looking at and representing spatial data. Students will learn how to perform the three broad steps of spatial analysis: (1) collecting and organizing data, (2) analyzing this data for appropriate patterns, and (3) using software to represent data on maps to support decision making.

Special Topics: Cybersecurity Strategy and Management
EVENCHIK, LEONARD N

Fall 2019
The challenges and issues of cybersecurity are everywhere, and today, these are not just technical issues, but critically important business issues for all levels of management. The goal of this course is to develop an understanding of cybersecurity principles, procedures, tools and technology from a managerial perspective. The first part of this course is a discussion of why cybersecurity is a difficult and pervasive problem. We then learn about the different types of threats and study the tools and techniques that society, organizations, and individuals have to mitigate them, with a focus on risk management and internal controls. We will also explore a number of new areas of work including cryptocurrency and the security requirements for the Internet of Things (IoT). An important part of the course will be team projects at the end of the term, where students apply the concepts and techniques we have studied to a real-world management problem or challenge.

**Business Applications of Blockchain and Cryptocurrency**  
**COLLEN, BENNETT I**  
**Fall 2019**
The objective of this course is to introduce the business of blockchain—a technology that has the potential to drastically alter the way value is stored, exchanged, shared, and distributed. It is the backbone of the next iteration of the Internet: Web 3.0 or The Internet of Value. This course doesn't require any technical knowledge or prior knowledge of the subject, and is designed to give students a foundational knowledge of blockchain technology and a familiarity with the basic principles that govern blockchain protocols. Students will obtain a fluency in the terms and concepts required to understand how this powerful technology works. Most importantly, students will study real-world applications of the technology, which range far beyond blockchain's original use case (cryptocurrency) and hear from a number of influential guest speakers who are using or investing in blockchain technology at their companies today. Students who complete the course will understand blockchain and cryptocurrency's game-changing potential, be able to separate fact from hype, and be effective leaders in the space.

Data Analytics 2: Management and Data Skills
EVENCHIK, LEONARD N
Fall 2019
Information Technology (IT) systems permeate the strategy, structure, and operations of modern enterprises. IT has become a major generator of business value, especially for organizations that have the right set of resources and capabilities to exploit it. It is essential that managers become fluent with IT so that they can promote innovative strategic initiatives that are increasingly IT dependent. In this course, students will obtain a broad overview of IT fundamentals, key emerging technologies, and IT managerial frameworks. Students will develop their ability to identify new opportunities presented by IT. Section numbers 1 and 2 of this course (when offered) will be delivered on-campus and section numbers 11 and 12 (when offered) will be delivered online. Please see the link bit.ly/CSOM1 for details about the online sections.

Fall 2019
Data has become an ever more powerful source of competitive advantage for modern enterprises. New technologies and business practices have led to an "orders of magnitude" change in the amount of data available for analysis, as well as to techniques, often referred to as analytics or business intelligence, which are now available to derive meaning from that data. It is essential that managers develop a deep understanding of how data can be structured, captured, and queried in order to support operations, decision-making, and strategic insight. This course provides students with a deeper understanding of data by exploring the methods by which data is modeled, databases are designed, and data is queried from those databases, and by developing an understanding of how this capability can be integrated into an organization to obtain a competitive advantage. Topics include entity relationship diagramming, the relational database model, and in depth coverage of SQL, as well as a consideration of managerial best practice as exemplified in current business examples.

Intro to Programming using Swift for iOS App Development

GALLAUGHER, JOHN M

Spring 2020

In this fast-paced course, students will learn the Swift programming language and iOS app development skills. Using a "flipped-classroom" approach, the students take lectures in a series of online videos embedded in a web-based course/reference/quiz book, following along with videos as they learn programming concepts and build apps. Although this is a flipped class, expect a challenging course. Class is mandatory (this is NOT an online course) and class time will be used for additional exercises, concept review, and student questions. Students are required to bring a fully-charged Mac laptop to each class with the latest version of Apple's free Xcode software installed (make sure you have access to a Mac that meets these requirements before enrolling). While this course is rigorous, challenging, and covers a broad set of topics at a rapid pace, the course assumes no prior programming experience. Students should be prepared to spend significant time each week on self-directed learning and regular programming projects. This course can be used in place of ISYS 2157 Programming for Management for credit toward the Information Systems concentration.

Schedule: M 4 30-6 50
Room: FULTON HALL 415

Satisfies Core Requirement: None

Comments: Section 02 is a "Bootcamp" version of the course which will be taught in Dublin, Ireland. This section (02) compresses the course ISYS 2160 - Special Topics: Swift/iOS App Development into a three week bootcamp that is taken as an experience abroad, hosted at the BC campus offices in Dublin, Ireland. Students will live in dormitories at University College, Dublin. Lodging and group excursions are included in the price of the course, but students are responsible for their travel costs to and from Ireland, as well as for most of their meals. If you plan to enroll, make sure you have a passport that is valid through the end of your time in Ireland. This course will be offered summer 2019.

ISYS225501
Managing Projects
COAKLEY, CHARLES E
Spring 2020
This course takes a holistic approach to planning, organizing, and controlling projects. It looks at how projects are uniquely suited to support an organization's strategy in a fast-paced business environment. Topics include project life cycle, algorithms and statistical concepts underlying network planning models, managing risk, and resource allocation. Microsoft Project will be used as to support the planning and monitoring phases of project management. The conceptual part of this course is framed with an eye to the behavioral realities a manager faces and the psychology of managing project teams.

Technology and Culture
GRIFFITH, WILLIAM
Spring 2020
This interdisciplinary course will first investigate the social, political, psychological, ethical, and spiritual aspects of the Western cultural development with a special emphasis on scientific and technological metaphors and narratives. We will then focus on the contemporary world, examining the impact of our various technological creations on cultural directions, democratic process, the world of work, quality of life, and especially on the emergent meanings for the terms "citizen" and "ethics" in contemporary society. Students will explore technologies in four broad and interrelated domains: (1) computer, media, communications, and information technologies, (2) biotechnology, (3) globalization, and (4) environmental issues.

ISYS317801
Special Topics: Design Thinking and Strategy
DICKINSON, KRISTINE D
Spring 2020
Design thinking is a human-centered approach to innovation that draws from the designer's toolkit to integrate the needs of people, the possibilities of technology, and the requirements for business success - Tim Brown, CEO of IDEO. Strategic design thinking is an integral driver of innovation and a significant factor in a business' ability to foresee and adapt to customer needs. Companies like Apple, IDEO, and Pixar are all pioneers in the field, and this course will draw directly from their proven methods. Students will learn the various phases of design thinking, and how to apply a customer-centric approach to products and services in a range of industries. Students will delve into topics such as user experience (UX) product design, creative problem-solving, strategic storytelling, and customer-centric business decision making. Course content will include team projects, case studies, and occasional guest lectures from industry experts. The class will be highly focused on practical experimentation and is directly relevant for students interested in product and brand management, marketing strategy, entrepreneurship, and beyond.

TechTrek West--Undergraduate
KANE, GERALD C; DOYLE, JEREMIAH T
Spring 2020
TechTrek West is a 3-credit, field-study course combining class work the weeks prior to and one week after spring break with a week-long field-study to Silicon Valley. During spring break, students will travel to Silicon Valley to meet with senior executives, entrepreneurs, and venture capitalists in technology industry firms. While focusing on the tech industry, TechTrek is designed to appeal to all majors. Course work and visits will have a managerial focus, highlighting executive, marketing, finance, operations, and R&D functions.

ISYS334001
Data Analytics in Practice
KOKKODIS, MARIOS
Spring 2020
Organizations everywhere are struggling to aggregate, analyze, and monetize the growing deluge of data generated by modern information systems. Business Analytics capitalizes on this data by combining statistical and quantitative analysis, explanatory and predictive modeling, and fact-based management. Managers can explore patterns, predict future trends and develop proactive, knowledge-driven decisions that affect all parts of modern organizations. This course provides students with a familiarity with the capabilities and limitations of emerging analytics techniques, an essential understanding of methods and tools, and a core understanding required to be an intelligent manager, designer, and consumer of analytics models. This course meets twice a week in class. The class format includes lectures covering analytical methods, principles of good practices, as well as examples drawn from case studies and other reading materials covering use cases of these techniques. The course will include a programming component in R and a module on Visualization with examples in Tableau. The course includes a module on ethical use of machine learning techniques. Assignments will include problem sets and discussions of course concepts or relevant articles and/or cases. The goal of the course will be to enable you as managers to make better decisions using data and to communicate effectively with data scientists.

**Managing for Social Impact and the Public Good**  
**GERMAN, LOURDES**  
**Spring 2020**
Managing for social impact in the twenty-first century is a multi-faceted challenge. This course will provide students with an interdisciplinary framework for exploring how corporations engage with social impact issues that are outside the conventional definitions of shareholder value and wealth creation. Through a combination of research, reading, class discussion, group projects, and case studies, students will examine and debate the boundaries of corporate social and ethical responsibility for public good. They will learn about the various frameworks and metrics that are in widespread use to measure global and local impacts of large enterprises, including impact investing, public benefit corporations, the Triple and Quadruple Bottom Lines, and the Global Reporting Initiative.

**Credits:** 03  
**Schedule:** T 4 30-6 50  
**Room:** FULTON HALL 210  
**Satisfies Core Requirement:** None  
**Comments:** Course topics include corporate impacts on sustainability and the environment, economic development and resource allocation, employees and customers, as well as the extended impact of supply chain vendors and partners, impact investing, and the use of technology and social media to manage corporate image and engage with various stakeholder communities. As part of a semester-long team project, students will work together to conduct in-depth research on the multiple social impacts of a selected global enterprise with a Boston-area presence.

**Systems Analysis and Design**  
**STERPE, PETER J**  
**Spring 2020**

The course studies information systems (IS) development including requirements, analysis, design, and implementation phases and workflows. We investigate the roles of systems analysts; serving as intermediaries between users, managers, and implementers; and helping each to understand the needs and problems of others. The student will learn about major methods and tools used in the systems development process. Please note that Database Systems and Applications (ISYS3257/CSCI1157) must be completed prior to taking this course.

**Geographic Information Systems for Planning and Decision-Making**  
**COHEN, WILL W**  
**Spring 2020**  
Large quantities of information are available to describe our social and physical environment with high detail, but making sense of this data requires specialized skill sets. Geographic Information Systems (GIS) is a general approach to analysis and is a powerful set of tools for understanding complex problems or for making a compelling argument about issues grounded in the physical or social environment. It is widely used in the public and private sectors. This course will introduce students to the use of GIS and representation as a means of looking at and representing spatial data. Students will learn how to perform the three broad steps of spatial analysis: (1) collecting and organizing data, (2) analyzing this data for appropriate patterns, and (3) using software to represent data on maps to support decision making.

Data Analytics 2: Management and Data Skills
EVENCHIK, LEONARD N
Spring 2020
Information Technology (IT) systems permeate the strategy, structure, and operations of modern enterprises. IT has become a major generator of business value, especially for organizations that have the right set of resources and capabilities to exploit it. It is essential that managers become fluent with IT so that they can promote innovative strategic initiatives that are increasingly IT dependent. In this course, students will obtain a broad overview of IT fundamentals, key emerging technologies, and IT managerial frameworks. Students will develop their ability to identify new opportunities presented by IT. Section numbers 1 and 2 of this course (when offered) will be delivered on-campus and section numbers 11 and 12 (when offered) will be delivered online. Please see the link bit.ly/CSOM1 for details about the online sections.

Management and Organization Courses: Summer 2019

MGMT102101
Organizational Behavior
REN, YI
Summer 2019
As an introduction to the study of human behavior in organizations, this course aims at increasing an awareness and understanding of individual, interpersonal, group, and organizational events, as well as increasing a student's ability to explain and influence such events. The course deals with concepts that are applicable to institutions of any type; a central thrust of these concepts concerns the way institutions can become more adaptive and effective. The course is designed to help the student understand and influence the groups and organizations to which he/she currently belongs and with which he/she will become involved in a later career. Note: Restrictions only apply to current Boston College students and do not apply to transfer or exchange students.

MGMT226501
Globalization, Culture, and Ethics
KEELEY, RICHARD
Summer 2019
This course helps students learn how to manage responsibly across different countries and cultures. The spread of capitalism and expansion of markets around the globe provoke challenging questions about socially responsible management. Managers must decide whether strategies and ethical principles that make sense in one culture can be applied to others. Central to the course will be the difficult choice between adapting to prevailing cultural norms or initiating a cultural/moral transformation. The course considers a number of cases set in different cultural contexts. There are selected readings about the beliefs, ideals, and values at the core of these different cultures.

**Managing People and Organizations**  
**MACDONALD, JOHN A**  
**Summer 2019**  
This course focuses on the analysis and diagnosis of organizational problems. It attempts to enable students to apply these concepts to real organizational and managerial problems. It also provides opportunities for participation in ongoing work teams while learning about team effectiveness. Finally, students can examine their own behavior and beliefs about organizations to compare, contrast, and integrate them with the theories and observations of others.

MGMT771001
Strategic Management
LOWD, NANCY E
Summer 2019
The strategic management course deals with the overall general management of an organization. It stresses the role of the manager as strategist and coordinator whose function is to integrate the conflicting internal forces that arise from among the various organizational units while simultaneously adapting to the external pressures that originate from a changing environment. Drawing on the knowledge and skills developed in the core curriculum, this course serves as the integrating experience for the M.B.A. program.

MGMT771101
Managing Business in Society
MORRIS, ROBERT J
Summer 2019
This course deals with the complexities of managing corporate sustainability and responsibility (new CSR) in today's dynamic and ever-more difficult world. Emphases include the integration of issues related to business in society, ethics, responsibility, accountability, transparency, governance, and ecological sustainability into corporate strategies and practices. We use a strategic management lens to learn the potential sources of strategic and competitive advantage that can derive from CSR, and explore some of the problems associated with poor responsibility practices.

Special Topics: Managing Across Cultures  
ARAOZ, ZAREEN K  
Summer 2019  
This highly interactive course is essential for future global leaders and those dealing with diverse cultures to develop critical cross-cultural insights and competencies. We will explore the changing global scenario, and see how complex current forces impact beliefs, interactions and communications in different cultures. We will experience differing approaches to management, and beliefs about successfully leading people and teams in various cultures. We will see how differing approaches to time, hierarchy, individualism, independence, supervision, respect, risk-taking, problem-solving, collaboration, and motivation) impact business interactions and outcomes in organizations. We will learn to lead, coach and collaborate more effectively across borders.

Technological Innovation and Disruption  
MACDONALD, JOHN A  
Summer 2019
To be competitive organizations need to drive innovation in their products and services. Organizations need to innovate rapidly and in some cases this involves reinventing the enterprise to compete in disruptive business environments. The course on Technological Innovation looks closely at the company value chain and where technology can be leveraged as a source of innovation. Company vision sets the context for the type of innovation necessary to achieve sustainable competitive growth. During the course we examine the process of building innovative capability across the company value chain, developing and implementing an innovation plan and creating the capacity for sustained innovation as a competitor or disruptor.

Management and Organization Courses: Fall 2019

MGMT102101
Organizational Behavior
GRUBB, ANITZA R
Fall 2019
As an introduction to the study of human behavior in organizations, this course aims at increasing an awareness and understanding of individual, interpersonal, group, and organizational events, as well as increasing a student's ability to explain and influence such events. The course deals with concepts that are applicable to institutions of any type; a central thrust of these concepts concerns the way institutions can become more adaptive and effective. The course is designed to help the student understand and influence the groups and organizations to which he/she currently belongs and with which he/she will become involved in a later career. Note: Restrictions only apply to current Boston College students and do not apply to transfer or exchange students.

**MGMT211001**  
**Human Resources Management**  
**GORDON, JUDITH R**  
**Fall 2019**  
This course surveys the functions, processes, and techniques of human resource management. It examines human resource management from the perspective of human resources systems implemented by managers and human resources professionals. The development of programs to reduce turnover, forecast personnel needs, and create career tracks is critical to the success of companies competing in the international arena. Just as it would be unthinkable for a modern manager to be computer illiterate, it is extremely difficult for a manager to succeed without a solid background in human resources management.

Negotiation
NIELSEN, RICHARD P
Fall 2019
Negotiating is a key process in leadership, conflict resolution, and change management at every level of internal and external management. The purpose of the course is to improve students' abilities to analyze, prepare for, and practice win-lose, win-win, dialogic, and third party negotiating methods as appropriate. Emphasis is on practical application and personal development. Teaching methods used are role playing, discussion of readings, discussion with practitioners, original student projects, and discussion of current events. Students are invited to reflect upon how negotiating and conflict resolution practices help them developmentally change themselves, their organizations, and the world.

**Leadership**  
**CLAIR, JUDITH**  
**Fall 2019**

In today's world, there are many challenges that call for effective leadership. Corporate ethics scandals, an increasingly global and diverse work force, and the need for employees to experience renewed meaning and connection to their work are just a few examples. How we respond to these challenges can profoundly change the world in which we live and work. In this course, we learn about the challenges and opportunities of effective leadership and how leaders, including ourselves, can respond to them.

Special Topics: Social Innovation and Entrepreneurship
FRECHETTE, EDWARD K
Fall 2019
Are you moved by a particular social injustice? It could be homelessness on the streets of Boston. It could be famine in Africa. It could be wage inequality across our country. It could be one of hundreds of issues, but one that is meaningful to you. Social Impact and Entrepreneurship explores the innovative ways government agencies, nonprofit groups, and for-profit organizations are addressing societal challenges. This course will focus on understanding the building blocks of a social venture--starting with the mission and working through the operational plan, the financials, and the evaluation criteria. Students, either individually or in small groups, will create a business plan for an enterprise, grounded in her/his passion for change in a given area. Multiple case studies will be used to illustrate various topics. Open to students from all majors.

MGMT214001
Special Topics: International Management
MARITAN, JAMES G
Fall 2019
The world has changed in fundamental ways over the last several decades, resulting in a more integrated, complex, and global economy. This has created new opportunities as well as new risks. How managers respond to changes in the global business environment have important implications to the firm's competitive position and overall survival. Historically it was primarily large firms that operated internationally; however, nowadays firms of all sizes are internationalizing. Thus, no matter what firm you work for or business you start after graduation, you will benefit from a strong understanding of the global business environment. 

We will explore a broad range of topics important to the success of businesses outside the firm's "home country," including cultural, social, political, and legal differences, international trade and investment policies, and international organizations. We will also look at issues surrounding international market entry options and competitive strategies. And finally, we will close with a review of the ways that business functions need to be adapted when operating across international markets. The course material will be presented via in-class learning, case discussion, and project work.

Globalization, Culture, and Ethics
SPINELLO, RICHARD
Fall 2019
This course helps students learn how to manage responsibly across different countries and cultures. The spread of capitalism and expansion of markets around the globe provoke challenging questions about socially responsible management. Managers must decide whether strategies and ethical principles that make sense in one culture can be applied to others. Central to the course will be the difficult choice between adapting to prevailing cultural norms or initiating a cultural/moral transformation. The course considers a number of cases set in different cultural contexts. There are selected readings about the beliefs, ideals, and values at the core of these different cultures.

Strategic Management
WELCH, JOHN R
Fall 2019
This course provides future leaders and strategists with an understanding of strategic management that will enable them to function effectively in a complex, global economy. Successful strategists need to define goals, analyze the organization and its environment, make choices, and take concerted actions to effect positive change in their organization and society. Using the conceptual tools and analytic frameworks of strategic management, this course provides a perspective that is integrative, yet analytical. This perspective helps students make sense of the global business and societal environments, understand the ambiguities and dilemmas of management, and learn how to take effective action.

MGMT309902
Strategic Management
MONTES, JUAN
Fall 2019
This course provides future leaders and strategists with an understanding of strategic management that will enable them to function effectively in a complex, global economy. Successful strategists need to define goals, analyze the organization and its environment, make choices, and take concerted actions to effect positive change in their organization and society. Using the conceptual tools and analytic frameworks of strategic management, this course provides a perspective that is integrative, yet analytical. This perspective helps students make sense of the global business and societal environments, understand the ambiguities and dilemmas of management, and learn how to take effective action.

Strategic Management: Honors  
WELCH, JOHN R  
Fall 2019  
This course is designed to develop the administrative perspective and general management skills necessary for determining and achieving the strategic objectives of a firm. Through case studies and readings, the course exposes future managers to (1) the use of strategic concepts to achieve corporate objectives and mission in competitive situations through the use of strategic management concepts, including environmental and industry analysis, and (2) the integrative application of knowledge gained from all of the management disciplines to solve actual management dilemmas.

Capstone: Leadership and Mindfulness
WADDOCK, SANDRA A
Fall 2019
No matter what your major, you will participate in groups and organizations that will consistently ask or expect you to lead. The best leader is authentic, has integrity, is self- and other-aware, and acts with this awareness firmly in mind. Good leaders, that is, act mindfully with respect for the people and world around them. This course explores your development as a mindful focusing inward and outward, reflecting on where you have come from and where you are going, what type of world you want to live in, your relationships with others, and how you can be an effective leader.

MGMT770101
Introduction to Strategic Management
SENGUL, METIN
Fall 2019
The course is designed to provide you with a general understanding of how firms formulate and implement strategies to create competitive advantage. Relying exclusively on the case method, it will expose you to some basic strategy concepts, which will lay the foundation for the strategic management core course that you will take later on. The cases chosen for this course will place you in a diversity of managerial situations--large multinational firms and small startups, manufacturing and service industries, growing and mature organizations, U.S. and non-U.S. settings. Discussion of these cases will enable you to learn different analytic techniques, and illustrate (1) the essence of strategy, (2) how to understand the external competitive environment, (3) ways to consider beyond the current business landscape, and (4) the role of top management in strategy implementation.

MGMT771001
Strategic Management
MONTES, JUAN
Fall 2019
The strategic management course deals with the overall general management of an organization. It stresses the role of the manager as strategist and coordinator whose function is to integrate the conflicting internal forces that arise from among the various organizational units while simultaneously adapting to the external pressures that originate from a changing environment. Drawing on the knowledge and skills developed in the core curriculum, this course serves as the integrating experience for the M.B.A. program.

**Managing Business in Society**  
**SMITH, KATHERINE V**  
**Fall 2019**  
This course deals with the complexities of managing corporate sustainability and responsibility (new CSR) in today’s dynamic and ever-more difficult world. Emphases include the integration of issues related to business in society, ethics, responsibility, accountability, transparency, governance, and ecological sustainability into corporate strategies and practices. We use a strategic management lens to learn the potential sources of strategic and competitive advantage that can derive from CSR, and explore some of the problems associated with poor responsibility practices.

Managing People and Organizations
OPAZO, MARIA P
Fall 2019
Among the major facets of organizational management, its human dynamics have consistently proven to be the most challenging to understand, predict, and control. This course introduces the accumulated knowledge about individual, group, and system-wide behavior in organizations, as well as contemporary approaches for both diagnosing and intervening in situations at each of these systems levels. Students will be exposed to theories, concepts, and important literature in the field, with frequent opportunities to integrate and apply this knowledge.

MGMT810401
Nonprofit Management
GRILLO, CHRISTOPHER
Fall 2019
This course provides an opportunity to explore essential management issues in a nonprofit context alongside topics that are somewhat unique to the nonprofit sector, including distinctive funding methods, governance, and staffing structures. Topical areas include Social Entrepreneurship, Venture Philanthropy, Leadership, Strategic Planning, Performance Measurement, Cause Marketing, and Microfinance. In addition to case and article discussion, the course features local, national, and international nonprofit leaders as guest speakers. The course aims to provide future nonprofit managers, volunteers, board members, donors, or supporters with a more nuanced understanding of critical issues and important trends in the nonprofit sector.

**MGMT814301**  
**Technological Innovation and Disruption**  
**MACDONALD, JOHN A**  
**Fall 2019**

To be competitive organizations need to drive innovation in their products and services. Organizations need to innovate rapidly and in some cases this involves reinventing the enterprise to compete in disruptive business environments. The course on Technological Innovation looks closely at the company value chain and where technology can be leveraged as a source of innovation. Company vision sets the context for the type of innovation necessary to achieve sustainable competitive growth. During the course we examine the process of building innovative capability across the company value chain, developing and implementing an innovation plan and creating the capacity for sustained innovation as a competitor or disruptor.

**Qualitative Research Methods**  
**PRATT, MICHAEL G**  
**Fall 2019**

The purpose of this course is to help you better understand qualitative research methods so as to enable you to be a better researcher and reviewer of work that employs these types of methodologies. Given the variety of methods that fall under the rubric of "qualitative methods," some classes will discuss general issues or skills (e.g., gaining access, interviewing, observing) that are applicable to several different methodological approaches, while others will focus more specifically on a particular approach (e.g., ethnography, case studies, grounded theory). Skill development is essential to the course, and there will be opportunities to practice specific methodological techniques and to critique exemplary qualitative research.

**Management and Organization Courses: Spring 2020**

**MGMT102101**  
**Organizational Behavior**  
**GRUBB, ANITZA R**  
**Spring 2020**
As an introduction to the study of human behavior in organizations, this course aims at increasing an awareness and understanding of individual, interpersonal, group, and organizational events, as well as increasing a student's ability to explain and influence such events. The course deals with concepts that are applicable to institutions of any type; a central thrust of these concepts concerns the way institutions can become more adaptive and effective. The course is designed to help the student understand and influence the groups and organizations to which he/she currently belongs and with which he/she will become involved in a later career. Note: Restrictions only apply to current Boston College students and do not apply to transfer or exchange students.

**Organizational Behavior**

**GARRETT, LYNDON E**

**Spring 2020**

As an introduction to the study of human behavior in organizations, this course aims at increasing an awareness and understanding of individual, interpersonal, group, and organizational events, as well as increasing a student's ability to explain and influence such events. The course deals with concepts that are applicable to institutions of any type; a central thrust of these concepts concerns the way institutions can become more adaptive and effective. The course is designed to help the student understand and influence the groups and organizations to which he/she currently belongs and with which he/she will become involved in a later career. Note: Restrictions only apply to current Boston College students and do not apply to transfer or exchange students.

This course focuses on ethics leadership and engagement methods in different types of pre-modern, modern, and postmodern organizational and political-economic contexts. What are our visions of ethical leadership, relationships, and organization? What were we doing when we were at our best in leading meaningful and effective change and problem resolution in our relationships with family and friends and in our work and citizenship lives? What have been the individual, organizational, and environmental obstacles that made it difficult for us to lead meaningfully and effectively? What are different types of methods in trying to intervene and lead ethical change?

Negotiation
NIELSEN, RICHARD P
Spring 2020
Negotiating is a key process in leadership, conflict resolution, and change management at every level of internal and external management. The purpose of the course is to improve students' abilities to analyze, prepare for, and practice win-lose, win-win, dialogic, and third party negotiating methods as appropriate. Emphasis is on practical application and personal development. Teaching methods used are role playing, discussion of readings, discussion with practitioners, original student projects, and discussion of current events. Students are invited to reflect upon how negotiating and conflict resolution practices help them developmentally change themselves, their organizations, and the world.

Leadership
GORDON, JUDITH R
Spring 2020
In today's world, there are many challenges that call for effective leadership. Corporate ethics scandals, an increasingly global and diverse work force, and the need for employees to experience renewed meaning and connection to their work are just a few examples. How we respond to these challenges can profoundly change the world in which we live and work. In this course, we learn about the challenges and opportunities of effective leadership and how leaders, including ourselves, can respond to them.

Special Topics: Social Innovation and Entrepreneurship

FRECHETTE, EDWARD K

Spring 2020

Are you moved by a particular social injustice? It could be homelessness on the streets of Boston. It could be famine in Africa. It could be wage inequality across our country. It could be one of hundreds of issues, but one that is meaningful to you. Social Impact and Entrepreneurship explores the innovative ways government agencies, nonprofit groups, and for-profit organizations are addressing societal challenges. This course will focus on understanding the building blocks of a social venture--starting with the mission and working through the operational plan, the financials, and the evaluation criteria. Students, either individually or in small groups, will create a business plan for an enterprise, grounded in her/his passion for change in a given area. Multiple case studies will be used to illustrate various topics. Open to students from all majors.

The world has changed in fundamental ways over the last several decades, resulting in a more integrated, complex, and global economy. This has created new opportunities as well as new risks. How managers respond to changes in the global business environment have important implications to the firm's competitive position and overall survival. Historically it was primarily large firms that operated internationally; however, nowadays firms of all sizes are internationalizing. Thus, no matter what firm you work for or business you start after graduation, you will benefit from a strong understanding of the global business environment. We will explore a broad range of topics important to the success of businesses outside the firm's "home country," including cultural, social, political, and legal differences, international trade and investment policies, and international organizations. We will also look at issues surrounding international market entry options and competitive strategies. And finally, we will close with a review of the ways that business functions need to be adapted when operating across international markets. The course material will be presented via in-class learning, case discussion, and project work.

Leadership in Action: Lessons from Exploration and Adventure.

MONTES, JUAN; GARRETT, LYNDON E  
Spring 2020
The purpose of the course is to develop your inner strength and self-confidence through a journey. You will undertake a real journey, one where you depart from a place that you might know, Logan Airport in Boston, and arrive in a place that probably you do not know anything about it, like Tanzania. There, our goal will be to climb Mount Kilimanjaro (9,341 ft., almost 6,000 meters above sea level), the highest mountain in Africa. Our expedition will be an intense team experience, aimed to facilitating leadership and character development, a once-in-a-lifetime learning opportunity. This is a real adventure, like the ones that inspired great explorers.

**Globalization, Culture, and Ethics**  
**SPINELLO, RICHARD**  
**Spring 2020**  
This course helps students learn how to manage responsibly across different countries and cultures. The spread of capitalism and expansion of markets around the globe provoke challenging questions about socially responsible management. Managers must decide whether strategies and ethical principles that make sense in one culture can be applied to others. Central to the course will be the difficult choice between adapting to prevailing cultural norms or initiating a cultural/moral transformation. The course considers a number of cases set in different cultural contexts. There are selected readings about the beliefs, ideals, and values at the core of these different cultures.

Strategic Management
SPINELLO, RICHARD
Spring 2020
This course provides future leaders and strategists with an understanding of strategic management that will enable them to function effectively in a complex, global economy. Successful strategists need to define goals, analyze the organization and its environment, make choices, and take concerted actions to effect positive change in their organization and society. Using the conceptual tools and analytic frameworks of strategic management, this course provides a perspective that is integrative, yet analytical. This perspective helps students make sense of the global business and societal environments, understand the ambiguities and dilemmas of management, and learn how to take effective action.

Strategic Analysis
SENGUL, METIN
Spring 2020
This course introduces you to a set of analytical frameworks that enable you to explain performance differences among firms and that provide a structure for strategic decisions to enhance firms' future competitive positions. Building on the foundation laid by the Introduction to Strategic Management course that you took earlier, we will cover strategy both at the business level (introducing tools of industry analysis and competitive positioning) and at the corporate level (examining how decisions regarding corporate scope--horizontal, vertical, and global--create or destroy value in multibusiness firms). We will also study strategy implementation, focusing on the organizational structure, systems and processes that are put in place to manage the corporation. Throughout the course, our viewpoint will be that of the top management team who has responsibility for the long-term health of the entire organization.

MGMT776001
Thinking Strategically: A Global Integrative Simulation
MONTES, JUAN
Spring 2020
This course is about the art of strategy. Courses like marketing, organizational behavior, operations, accounting, and finance help you understand the functional areas of management, but now (and before you finish your first-year MBA), you need to close the knowing and doing gap, and that is the role of the present course. We will use a simulation called Global DNA in which teams compete in planning and executing a multi-year, multinational business strategy in a highly competitive global market. The course utilizes a sophisticated, market-leading simulation platform to create a realistic, hands-on learning experience. Engaging with the complexities of the simulated international business environment will prompt discussions on decision making, team dynamics, strategic planning and tactical execution. Thinking strategically is what C-level managers need to understanding competitive contexts, and make decisions that take into account all the relations and variables inside and outside the organization. A simulation presents a unique opportunity to challenge your managerial and strategic skills, and additionally, it creates a virtual competitive context that is usually fun, demanding and complex. This course culminates with the Diane Weiss Competition in which student teams will compete in a final round of the simulation.

Corporate Strategy
WELCH, JOHN R
Spring 2020
The Strategic Management course focuses on the creation of long-term competitive advantage in companies with a single primary line of business. Corporate Strategy extends those principles to explore strategies of multi-business organizations. The course will take the perspective of the CEO and senior management team whose primary job is to create shareholder value, and addresses questions such as: which businesses should be part of our portfolio? How should we shape that portfolio through M&A and divestitures? How do balance sheet realities, private equity alternatives, and activist investors impact our strategic choices? How do we develop and implement strategy in multi-business companies.

Leading Healthcare Organizations
GIORDANO, KEVIN T
Spring 2020
This course introduces and examines the structure and function of the American healthcare system. Students will focus on key issues across the system by analyzing the organization, economics, and delivery of healthcare, as well as major stakeholders within the industry. By the end of the course students will: 1. Acquire a working knowledge of each of the major components that make up the American healthcare system, and the complex inter-relationships among them. 2. Practice a conceptual framework for understanding pertinent healthcare issues and their potential solutions moving forward.

The DNA of Business: A Simulated Experience
MCDERMOTT, SCOTT F
Summer 2019
Students in this course will serve as senior executives on a C-level management team focused on planning and executing a multi-year, multinational business strategy in a highly competitive market. The course utilizes a sophisticated, market leading simulation platform to create a realistic, engaging, hands-on learning experience. This course adopts a cross-disciplinary, integrated management approach--students will gain insights into multinational operations, product development planning, global markets, financial strategy, and other key management disciplines. Engaging with the complexities of the simulated international business environment will prompt discussions on decision making, management team dynamics, strategic formulation, and tactical execution.

Public Speaking

SCHWARTZ, STACY M

Fall 2019

This course provides an introduction to basic concepts, theories, and principles of oral communications through the mode of public/in class speech performances. You will gain practical experience in exploring, discovering, and arranging ideas, using evidence and research to support claims, preparing organized outlines, and composing speeches while broadening your view of theoretical considerations in communications. This is an oral presentation class. Each student will present varied styles of public speaking to his/her peers. Our class will also include lectures, discussions, video analysis, and oral exercises to alleviate speech anxiety.

Management Elective Courses: Spring 2020

GSOM881601
Advanced Topics: International Consulting Project, Latin America
CORSINI, RUSSELL
Spring 2020
This course is designed for students who may at some point be interested in pursuing careers in international consulting and involves the research and delivery of recommendations to an existing company. The project research is completed in the U.S. during the spring semester through libraries, databases, interviews, and international communications via phone, fax, and e-mail. Students will fly to the Latin American client site in mid-May and deliver their presentation personally at the client's offices.

Marketing Courses: Summer 2019

MKTG102101
Marketing Principles
SAMARAS, XANTHE P
Summer 2019
Marketing is dynamic, changing, creative, challenging and plays a leading role in a firm's strategy and destiny. Intended for those planning a career in Marketing, or will do career activities requiring marketing--doing a business startup, designing new services, online/social media, retail. Marketing owns the customer relationship and defines market-driven strategy. You will learn three skill sets: Target Marketing Skills--segmenting and targeting within markets, Strategic Marketing Skills--positioning vis-a-vis competitors, and Marketing Management Skills--managing the design of products/services, pricing, message and media, distribution channels, and online search/social media.

MKTG770001
Marketing Operations Management
TEOPACO, JOHN L
Summer 2019
This course focuses on the managerial skills, tools, and concepts required to produce a mutually satisfying exchange between consumers and providers of goods, services, and ideas. The material is presented in a three-part sequence. Part one deals with understanding the marketplace. Part two deals with the individual parts of the marketing program such as pricing, promotion, product decisions, and distribution. Part three of the course deals with overall strategy formulation and control of the marketing function. Students in this course will come to understand the critical links between marketing and the other functional areas of management.

Fall 2019
Marketing is dynamic, changing, creative, challenging and plays a leading role in a firm's strategy and destiny. Intended for those planning a career in Marketing, or will do career activities requiring marketing--doing a business startup, designing new services, online/social media, retail. Marketing owns the customer relationship and defines market-driven strategy. You will learn three skill sets: Target Marketing Skills--segmenting and targeting within markets, Strategic Marketing Skills--positioning vis-a-vis competitors, and Marketing Management Skills--managing the design of products/services, pricing, message and media, distribution channels, and online search/social media.

Consumer Behavior
HAGTVEDT, HENRIK
Fall 2019
This course integrates marketing theory with insights from other fields of study, including social psychology, cognitive psychology, evolutionary psychology, and behavioral neuroscience. It analyzes consumer processes such as perception, learning, attitude formation, and decision making. These variables are broadly relevant to marketing challenges, given that the success of products and brands depends on their appeal to consumers. Discussion topics range from art and aesthetics to crisis behavior to new product development.

Customer Research and Insights for Marketing Decisions  
DAGOGO-JACK, SOKIEN TE W  
Fall 2019
Information is vital for solving critical marketing problems and gaining competitive advantage. This course focuses on how to improve marketing decision-making through better research design and methods. Students learn how to identify managerial problems, develop relevant research hypotheses, determine appropriate methods for data collection and analysis, and develop recommendations for marketing solutions. Topics include foundational methods, such as focus groups, survey design, and marketing experiments. Students will gain the ability to identify, collect, and analyze essential marketing data and apply research results to become better marketing decision-makers.

**Services Marketing**  
**SAMARAS, XANTHE P**  
**Fall 2019**  
The service sector of the economy is twice as large as the manufacturing sector. Nearly all new job growth in this country will be in services marketing. Service organizations differ from manufacturing businesses in many important respects and require a distinctive approach to marketing strategy development and execution. Some service businesses to be studied include entertainment, hospitality, travel, retail, telecom, car rental, healthcare, financial and professional services. Service providers include hotel, airline, theme park, car rental and retail personnel, customer service representatives, bankers, doctors, accountants, and lawyers.

MKTG315701
Professional Selling and Sales Management
FALVEY, JOHN J
Fall 2019
Two fundamentals of business: someone must get the goods and services out the door, and someone must get the cash to come in the door. Sales is the function that does the latter. It, and its management, will be covered in this course. We will study the art of persuasion, modern day Rhetoric in actual practice. The discipline will be addressed biologically. We will dissect real industry practitioners when they visit class, and actual sales calls in the field as a research paper. Upon course completion, students will have a complete understanding of both the selling and sales management process.

MKTG316501
Strategic Brand Management
FISHER, JOHN H
Fall 2019
This course teaches students fundamental and leading-edge concepts in brand management. Students learn to develop and articulate brand strategy, how to give strategic brand direction, and how to measure strategic brand progress. They learn how to manage key relationships and functions that surround the brand, e.g., advertising, promotion, public relations, licensing, and product and package design agencies. A capable brand manager has exceptional strategic, quantitative, interpersonal, and presentation skills and must be comfortable with decision-making and leadership. The course will focus on the development and application of these skills in brand management via in-class learning, case discussion, and project work.
MKTG317501
Special Topics: Marketing Practicum
MOJO, JEAN N
Fall 2019
This course is designed for students who have already secured an internship in marketing. Students will synthesize, integrate, and apply practical skills, knowledge and training acquired through their internship. They will gain experience in a professional marketing environment by observing and interfacing with professionals in the field. Students will work under the supervision of their professor and their intern supervisor. The final deliverable for course credit will be an evaluated presentation. This course does not count as a marketing elective in the marketing concentration.

Design thinking is a human-centered approach to innovation that draws from the designer’s toolkit to integrate the needs of people, the possibilities of technology, and the requirements for business success - Tim Brown, CEO of IDEO. Strategic design thinking is an integral driver of innovation and a significant factor in a business’ ability to foresee and adapt to customer needs. Companies like Apple, IDEO, and Pixar are all pioneers in the field, and this course will draw directly from their proven methods. Students will learn the various phases of design thinking, and how to apply a customer-centric approach to products and services in a range of industries. Students will delve into topics such as user experience (UX) product design, creative problem-solving, strategic storytelling, and customer-centric business decision making. Course content will include team projects, case studies, and occasional guest lectures from industry experts. The class will be highly focused on practical experimentation and is directly relevant for students interested in product and brand management, marketing strategy, entrepreneurship, and beyond.

Special Topics: Sports Marketing
LEV, MARK T
Fall 2019
The goal of this course is to provide an understanding of the business practices of the sports industry. Taking a practical approach, students will be asked to create business solutions for sports organizations. The attributes and failures of real examples will be discussed. Students will be expected to take the experience and apply it to creating specific campaigns, programs, and overall marketing plans for a specific sports application. Relationship architecture principles will be discussed at length and expected to be incorporated into the final project.
Social Media, Emerging Technologies, and Digital Business

SUTTON, LINDSAY A

Fall 2019

The past few years have witnessed the rapid rise of a number of new types of information technologies, such as social media, so-called "sharing economy" platforms, artificial intelligence, blockchain, internet of things, virtual and augmented reality, just to name a few. These new tools both present immense opportunities and pose considerable threats for businesses of all sizes and across industries. This course explores the impact that these tools are having on the competitive environment, as well as the characteristics that companies, leaders, and employees will need to possess in order to thrive in this new environment increasingly defined by digital tools. Additionally, this course both learns about and learns with these information technologies in novel ways.

MKTG800301
Product Planning and Strategy
BRIGHT, JAMES P
Fall 2019
This course focuses on the challenge of creating and launching new products and services. It is particularly appropriate for those who are interested in becoming a Product Manager within a larger company, or in starting their own business at some point. The course is built on the concept of learning by doing, as small student teams go through the full process of coming up with their own new product or service ideas, evaluating them, doing market research, and developing launch plans. We also assess a number of current new product ideas, analyze cases from a range of industries, and have one or two outside speakers. There is a heavy emphasis on discussion and practicality.

Pricing Policy and Strategy  
SMITH, GERALD  
Fall 2019  
This course explores pricing strategy and shows how pricing can be managed to achieve profitability. The course is practical and hands-on. It examines current pricing practices used by many companies, and shows how they lead to distortions and problems. It suggests strategic principles that lead to more profitable pricing decisions, including methods for financial analysis that focus on pricing profitability. Other topics include value-based pricing, managing price competition, segmenting markets based on price sensitivity, segmentation pricing strategies, buyer psychology of pricing, and research methods for assessing price sensitivity.

MKTG888001
Digital Marketing and Analytics Field Study
JOHN NEESON
Fall 2019
This B2B course focuses on learning and applying best practice marketing analytical skills in a corporate field marketing context working with real client companies. Student teams are assigned to various projects in companies with a very defined scope. The projects involve rigorous analytical skills drawn from cutting-edge digital and analytical marketing tools and templates to solve key marketing issues and thus driving better outcomes. Examples of projects include segmentation and analysis, sales productivity and marketing alignment, go to market planning, marketing ROI or campaign strategy and analytics. Leading B2B technology, business services, financial services, healthcare and advanced manufacturing companies have used these approaches to impact top and bottom-line performance. Adobe, Microsoft, LogMein, Analog Devices, 3M and PTC are a few of the companies utilizing these approaches. A leading software company, as an example, improved top line growth by 19% while another business services organization improved profitability by 15% both through improved sales and marketing alignment. Some of the highly sought-after skills and knowledge students will take away from the course include: Digital marketing techniques such as lead scoring, Marketing Waterfall analytics, account-based marketing, demand strategy techniques such as intent monitoring, audience-centric campaign planning, content strategy and buyers’ journey alignment, and customer lifecycle and retention.

Marketing Courses: Spring 2020

MKTG102101
Marketing Principles
HUDSON, BRADFORD T
Spring 2020
Marketing is dynamic, changing, creative, challenging and plays a leading role in a firm's strategy and destiny. Intended for those planning a career in Marketing, or will do career activities requiring marketing--doing a business startup, designing new services, online/social media, retail. Marketing owns the customer relationship and defines market-driven strategy. You will learn three skill sets: Target Marketing Skills--segmenting and targeting within markets, Strategic Marketing Skills--positioning vis-a-vis competitors, and Marketing Management Skills--managing the design of products/services, pricing, message and media, distribution channels, and online search/social media.

**Credits:** 03  
**Schedule:** T TH 12*

**MKTG215301**  
**Customer Research and Insights for Marketing Decisions**  
**SALISBURY, LINDA**  
**Spring 2020**

Information is vital for solving critical marketing problems and gaining competitive advantage. This course focuses on how to improve marketing decision-making through better research design and methods. Students learn how to identify managerial problems, develop relevant research hypotheses, determine appropriate methods for data collection and analysis, and develop recommendations for marketing solutions. Topics include foundational methods, such as focus groups, survey design, and marketing experiments. Students will gain the ability to identify, collect, and analyze essential marketing data and apply research results to become better marketing decision-makers.

MKTG311401
Pricing and Demand Analytics
ENGEL, SAMUEL
Spring 2020
Price strategy is one of the most powerful levers you can activate to drive profitability, yet too many firms leave value on the table. This course teaches the concepts and tools relating to costs, customers and competition that will enable you to make complex pricing decisions. In costs, you will learn the fallacies of common pricing approaches and how to analyze the profit impacts of price decisions. In customers, you will learn the psychology of price, how to develop price structures for different market segments, and how to communicate value so customers will pay. In competition, you will learn how to survive (and avoid) a price war, how to negotiate prices and how to manage prices legally and ethically. In addition, the course will introduce demand analytics and the dynamic pricing methods that are increasingly prevalent across airlines, entertainment and the digital economy. Throughout the course, you will practice the skills with hands-on exercises and apply the concepts to real world examples that integrate pricing with broader marketing strategy.

MKTG315301
Retailing
SEIDERS, KATHLEEN
Spring 2020
This class focuses on the necessary concepts and principles of retailing involved in making retail and wholesale decisions. The course looks at retailing from both a consumer perspective (e.g., why does a consumer shop a particular retail outlet?) and a business-to-business perspective (e.g., how does the retailer decide which supplier to use?). Additionally, the course examines the various methods of retailing (e.g., bricks and mortar, bricks and clicks) and how these methods have evolved and will evolve in the future.

MKTG315401
Integrated Marketing Communications
NENKOV, GERGANA Y
Spring 2020
This course concerns the communication function in marketing. It is designed to introduce students to integrated marketing communications (IMC). It aims at relating the elements of the marketing mix (4P?s) to the various aspects of the communications that take place between the firm and its customers. The course builds on a base of strategic marketing planning and consumer behavior and then proceeds to examine the role of the promotional mix (e.g., advertising, direct marketing, sales promotion, Internet and interactive marketing, publicity and public relations) in developing integrated marketing communications programs and helping organizations meet strategic marketing objectives.

**Product Planning and Strategy**  
**BRIGHT, JAMES P**  
**Spring 2020**  
With the growing concern over the success rate of new products, an intense effort is being employed by marketers to establish more effective new product development and management strategies. Using lectures and case studies, this course will focus on the process of conceiving new products, developing an effective organization, and designing and implementing effective marketing strategies and policies over the course of the product life cycle. Class material will provide the student with insight into new product development across a wide variety of industries.

MKTG316501
Strategic Brand Management
FISHER, JOHN H
Spring 2020
This course teaches students fundamental and leading-edge concepts in brand management. Students learn to develop and articulate brand strategy, how to give strategic brand direction, and how to measure strategic brand progress. They learn how to manage key relationships and functions that surround the brand, e.g., advertising, promotion, public relations, licensing, and product and package design agencies. A capable brand manager has exceptional strategic, quantitative, interpersonal, and presentation skills and must be comfortable with decision-making and leadership. The course will focus on the development and application of these skills in brand management via in-class learning, case discussion, and project work.

MKTG317701
Special Topics: Heritage Marketing
HUDSON, BRADFORD T
Spring 2020
This course explores the interaction of marketing and history in the consumer marketplace. Heritage marketing is a strategic approach to capitalize on the historical status of older brands in the present and future. It uses the entire marketing system to develop a strategic position based on heritage, activate powerful dynamics in consumer behavior such as nostalgia, communicate relevant messages, and monetize the past. Business history and archival collections provide the content and inspiration for related communications and new product development. The primary classroom activity will be the analysis and discussion of business case studies from various industries. The pre-requisites are Marketing Principles and any course from the History core sequence.

**Credits:** 03

**MKTG317801**  
**Special Topics: Design Thinking and Strategy**  
**DICKINSON, KRISTINE D**  
**Spring 2020**  
Design thinking is a human-centered approach to innovation that draws from the designer's toolkit to integrate the needs of people, the possibilities of technology, and the requirements for business success - Tim Brown, CEO of IDEO. Strategic design thinking is an integral driver of innovation and a significant factor in a business' ability to foresee and adapt to customer needs. Companies like Apple, IDEO, and Pixar are all pioneers in the field, and this course will draw directly from their proven methods. Students will learn the various phases of design thinking, and how to apply a customer-centric approach to products and services in a range of industries. Students will delve into topics such as user experience (UX) product design, creative problem-solving, strategic storytelling, and customer-centric business decision making. Course content will include team projects, case studies, and occasional guest lectures from industry experts. The class will be highly focused on practical experimentation and is directly relevant for students interested in product and brand management, marketing strategy, entrepreneurship, and beyond.

TechTrek West--Undergraduate
KANE, GERALD C; DOYLE, JEREMIAH T
Spring 2020
TechTrek West is a 3-credit, field-study course combining class work the weeks prior to and one week after spring break with a week-long field-study to Silicon Valley. During spring break, students will travel to Silicon Valley to meet with senior executives, entrepreneurs, and venture capitalists in technology industry firms. While focusing on the tech industry, TechTrek is designed to appeal to all majors. Course work and visits will have a managerial focus, highlighting executive, marketing, finance, operations, and R&D functions.

Professional Selling and Sales Management
FALVEY, JOHN J
Spring 2020
Two fundamentals of business: someone must get the goods and services out the door, and someone must get the cash to come in the door. Sales is the function that does the latter. It, and its management, will be covered in this course. We will study the art of persuasion, modern day Rhetoric in actual practice. The discipline will be addressed biologically. We will dissect real industry practitioners when they visit class, and actual sales calls in the field as a research paper. Upon course completion, students will have a complete understanding of both the selling and sales management process.

New Media Industries
MCNEALY, PAUL-JON
Spring 2020
This course is designed to introduce the changing business models of new media (video game, music, movies, print, advertising, and television) industries. This is achieved by examining in detail the technology enablers and disruptive forces in both the U.S. and worldwide, consumer behaviors and attitudes, and legal and regulatory concerns. A special emphasis will also be placed on media companies whose business models have been heavily influenced or altered by digital distribution.

MKTG770001  
**Marketing Operations Management**  
**KERBS, JON W**  
**Spring 2020**  
This course focuses on the managerial skills, tools, and concepts required to produce a mutually satisfying exchange between consumers and providers of goods, services, and ideas. The material is presented in a three-part sequence. Part one deals with understanding the marketplace. Part two deals with the individual parts of the marketing program such as pricing, promotion, product decisions, and distribution. Part three of the course deals with overall strategy formulation and control of the marketing function. Students in this course will come to understand the critical links between marketing and the other functional areas of management.

Customer Research and Marketing Decisions
ORDABAYEVA, NAILYA
Spring 2020
Information is vital for solving critical marketing problems and gaining competitive advantage. This course focuses on how to improve marketing decision-making through better research design and methods. Students learn how to identify managerial problems, develop relevant research hypotheses, determine appropriate methods for data collection and analysis, and develop recommendations for marketing solutions. Topics include foundational methods, such as focus groups, survey design, and marketing experiments. Students will gain the ability to identify, collect, and analyze essential marketing data and apply research results to becoming better marketing decision-makers.

MKTG800801
Integrated Marketing Communications
NENKOV, GERGANA Y
Spring 2020
This course concerns the communication function in marketing. It is designed to introduce students to integrated marketing communications (IMC). It aims at relating the elements of the marketing mix (4P's) to the various aspects of the communications that take place between the firm and its customers. The course builds on a base of strategic marketing planning and consumer behavior and then proceeds to examine the role of the promotional mix (e.g., advertising, direct marketing, sales promotion, Internet and interactive marketing, publicity and public relations) in developing integrated marketing communications programs and helping organizations meet strategic marketing objectives.
MKTG801001
Business to Business Marketing
TEOPACO, JOHN L
Spring 2020
This course provides an in-depth understanding of the unique aspects of marketing in a business-to-business environment. Its focus centers on the importance of linking customer needs to the development of high value products and services throughout the value chain in a global, electronic environment. The course examines the scope and challenges of business-to-business markets, including building and managing customer relationships and services, buying behavior, distribution channels, marketing research, managing R&D and technical product development, managing the sales process and sales force support, new-product launch, positioning and pricing.

Pricing Policy and Strategy
SMITH, GERALD
Spring 2020

https://www.bc.edu/content/bc-web/academics/sites/university-catalog/courses/management/marketing.html
This course explores pricing strategy and shows how pricing can be managed to achieve profitability. The course is practical and hands-on. It examines current pricing practices used by many companies, and shows how they lead to distortions and problems. It suggests strategic principles that lead to more profitable pricing decisions, including methods for financial analysis that focus on pricing profitability. Other topics include value-based pricing, managing price competition, segmenting markets based on price sensitivity, segmentation pricing strategies, buyer psychology of pricing, and research methods for assessing price sensitivity.

**MKTG801501**  
**Strategic Brand Management**  
**FISHER, JOHN H**  
**Spring 2020**

This course teaches students fundamental and leading-edge concepts in brand management. Students learn to develop and articulate brand strategy, how to give strategic brand direction, and how to measure strategic brand progress. They learn how to manage key relationships and functions that surround the brand, e.g., advertising, promotion, public relations, licensing, and product and package design agencies. A capable brand manager has exceptional strategic, quantitative, interpersonal, and presentation skills and must be comfortable with decision-making and leadership. The course will focus on the development and application of these skills in brand management via in-class learning, case discussion, and project work.

Digital Marketing Skills and Analytics
NEESON, JOHN J
Spring 2020
This B2B course focuses on learning and applying best practice marketing analytical methods in a corporate B2B context. Students learn rigorous analytical approaches drawn from cutting-edge digital and analytical marketing tools, techniques and templates to solve key marketing issues and thus driving better outcomes. Examples include segmentation and analysis, sales productivity and marketing alignment, go to market planning, marketing ROI or campaign strategy and analytics. Leading B2B technology, business services, financial services, healthcare and advanced manufacturing companies use these approaches to impact top and bottom-line performance. These methods are the foundation for sought-after skills and knowledge students will be able use in industry today. Students will walk away with key approaches to modern marketing including: Digital marketing techniques such as lead scoring, Marketing Waterfall analytics, account-based marketing, demand strategy techniques such as intent monitoring, methods for audience-centric campaign planning, content strategy and buyers' journey alignment, and customer lifecycle and retention.

Operations Management Courses: Summer 2019

OPER770315
Managerial Statistics
VANDERWERF, PIETER A
Summer 2019
This course teaches the tools and techniques of statistics most commonly used in business. The major topic areas include: populations, random variables, distributions, and sampling; parameter estimation; hypothesis testing; and simple and multiple regression. All topics are taught by application to actual business problems using original data. The course provides the tools students will need for their functional courses, such as finance and marketing, as well as for core courses in business analytics.

OPER770601
Data Analytics 1: Model Building
VANDERWERF, PIETER A
Summer 2019
This course focuses on the use of quantitative methods to support managerial decisions. Fundamental to this type of decision analysis is a model, which is a representation of reality. A child enjoys a model car or a model train. An engineer uses a model of an airplane wing in a wind tunnel. An architect uses a set of blueprints as a model to illustrate what is to be built. The National Weather Service uses computer models to predict the track of a hurricane. In this course we will see how mathematical models and modern spreadsheet software can be used to support managerial decision analysis. We will pay special attention to the assumptions and limitations of using mathematical models as part of the iterative process of making operational and strategic management decisions. Examples will be used to illustrate this process in real world situations.

Operations Management Courses: Fall 2019

OPER102101
Operations Management
SHAN, XI
Fall 2019
This course is an introduction to operations management. Operations, like accounting, finance, marketing, and human resources, is one of the primary functions of every organization. Operations managers transform human, physical, and technical resources into goods and services. Hence, it is vital that every organization manage this resource conversion effectively and efficiently. How effectively this is accomplished depends upon the linkages between operating decisions and top management (strategic) decisions. The focus of the course is decision-making at the operating level of the firm. A strong emphasis will be placed on the development and use of quantitative models to assist decision making.

OPER225501
Managing Projects
COAKLEY, CHARLES E
Fall 2019
This course takes a holistic approach to planning, organizing, and controlling projects. It looks at how projects are uniquely suited to support an organization's strategy in a fast-paced business environment. Topics include project life cycle, algorithms and statistical concepts underlying network planning models, managing risk, and resource allocation. Microsoft Project will be used as to support the planning and monitoring phases of project management. The conceptual part of this course is framed with an eye to the behavioral realities a manager faces and the psychology of managing project teams.

OPER331001
Sports Analytics
DEPT

Fall 2019
The focus of the course will be the development and use of quantitative analysis, particularly mathematical and statistical models, that are widely used to assist in decision making at all levels in the management of professional sports organizations. Concentration will be on player, team, and organizational performance in baseball, basketball, and football for the purpose of tactical and strategic decisions. If time permits, applications in other sports (e.g., golf) will be discussed, as well as collegiate baseball.

Credits: 03
Schedule: null
Room: None
Satisfies Core Requirement: None
Comments: None
Prerequisites: OPER2235 AND OPER1135. Students taking this course should possess a passion for sports and numbers, working knowledge of basic probability and statistics, strong Excel skills. Students should have successfully completed OPER1135/OPER1145 or a similar statistics
A supply chain consists of all parties involved in fulfilling a customer request, including suppliers, manufacturers, distributors, and retailers. Over the last decade, firms have started focusing on supply chain management as a source of competitive advantage. There’s a realization that no company can do better than its supply chain. This course will provide students with an overview of the concepts, models, and methods that are important for the design and operation of modern, global supply chains. Classes are hands-on, with many opportunities to analyze cases and play simulation games.

Credits: 03

This course examines concepts, principles, and techniques for formulating, implementing, and evaluating operations strategy. It links strategic and tactical operational decisions to creation of a competitive advantage. Topics include operations strategy content and process, service operations, capacity and facilities strategy, supply chain management, process design and technology choice, and quality and productivity improvement. Case studies are used to illustrate concepts covered in the course. In collaboration with a consulting firm, students also learn how to develop and deliver a consulting presentation. These skills are applied to a mock consulting project.

This course provides an overview of the concepts and methods of Management Science. Sometimes referred to as Prescriptive Analytics or Decision Analytics, management science is a subset of the larger field of Business Analytics and focuses on the use of math models to make better business decisions. The primary goal of the course is to help you become a more skilled builder and consumer of models. The course will show you how to use Excel spreadsheets effectively for business analysis and introduce you to some of the more important analytic methods including optimization and simulation. These methods will be applied to problems arising in a variety of functional areas including operations, finance, and marketing.

OPER660612
Forecasting Techniques
MC GOWAN, RICHARD
Fall 2019
The theory and practice of applied time series analysis will be explored. First the different segments (trend, seasonality, cyclical, and irregular) of a time series will be analyzed by examining the Autocorrelation functions (ACF) and Partial Autocorrelation functions (PACF). The specifics model the various types of time series include linear regression, panel regression, seasonal decomposition, exponential smoothing, and ARIMA modeling as well as combining models. PLEASE NOTE: This course is also offered as an online hybrid course with Fr. McGowan, OPER/MFIN6606.12, ECON2229.12. For his sections only: in addition to the online lectures presented on the Canvas LMS, there are three required on-campus class meetings on: Saturday morning February 22, and Saturday May 2. The midterm exam will also be held on campus on Monday evening March 16. Please see the course syllabus for additional details.

**OPER770012**  
**Operations Management**
PARKER, DELVON B

Fall 2019

Operations, like accounting, finance, and marketing, is one of the primary functions of every organization. Operations managers transform human, physical and technical resources into goods and services. Hence, it is vital that every organization manage this resource conversion effectively and efficiently. How effectively this is accomplished depends upon the linkages between operating decisions and top management (strategic) decisions. The focus of the course is decision-making at the operating level of the firm, converting broad policy directives into specific actions within the organization. Strong emphasis will be placed on the development and use of quantitative models to assist in decision making.

OPER770601
Data Analytics 1: Model Building
AMOVIC, BOJAN
Fall 2019
This course focuses on the use of quantitative methods to support managerial decisions. Fundamental to this type of decision analysis is a model, which is a representation of reality. A child enjoys a model car or a model train. An engineer uses a model of an airplane wing in a wind tunnel. An architect uses a set of blueprints as a model to illustrate what is to be built. The National Weather Service uses computer models to predict the track of a hurricane. In this course we will see how mathematical models and modern spreadsheet software can be used to support managerial decision analysis. We will pay special attention to the assumptions and limitations of using mathematical models as part of the iterative process of making operational and strategic management decisions. Examples will be used to illustrate this process in real world situations.

OPER102102
Operations Management
ALEV, ISIL
Spring 2020
This course is an introduction to operations management. Operations, like accounting, finance, marketing, and human resources, is one of the primary functions of every organization. Operations managers transform human, physical, and technical resources into goods and services. Hence, it is vital that every organization manage this resource conversion effectively and efficiently. How effectively this is accomplished depends upon the linkages between operating decisions and top management (strategic) decisions. The focus of the course is decision-making at the operating level of the firm. A strong emphasis will be placed on the development and use of quantitative models to assist decision making.

OPER225501
Managing Projects
COAKLEY, CHARLES E
Spring 2020
This course takes a holistic approach to planning, organizing, and controlling projects. It looks at how projects are uniquely suited to support an organization’s strategy in a fast-paced business environment. Topics include project life cycle, algorithms and statistical concepts underlying network planning models, managing risk, and resource allocation. Microsoft Project will be used as to support the planning and monitoring phases of project management. The conceptual part of this course is framed with an eye to the behavioral realities a manager faces and the psychology of managing project teams.

OPER333201
Supply Chain Management
BEEBE, JONATHAN R
Spring 2020
A supply chain consists of all parties involved in fulfilling a customer request, including suppliers, manufacturers, distributors, and retailers. Over the last decade, firms have started focusing on supply chain management as a source of competitive advantage. There’s a realization that no company can do better than its supply chain. This course will provide students with an overview of the concepts, models, and methods that are important for the design and operation of modern, global supply chains. Classes are hands-on, with many opportunities to analyze cases and play simulation games.

Management Science
NEALE, JOHN J
Spring 2020
This course provides an overview of the concepts and methods of Management Science. Sometimes referred to as Prescriptive Analytics or Decision Analytics, management science is a subset of the larger field of Business Analytics and focuses on the use of math models to make better business decisions. The primary goal of the course is to help you become a more skilled builder and consumer of models. The course will show you how to use Excel spreadsheets effectively for business analysis and introduce you to some of the more important analytic methods including optimization and simulation. These methods will be applied to problems arising in a variety of functional areas including operations, finance, and marketing.

Risk Analysis and Simulation
DEPT
Spring 2020
This class will use cases and readings to learn to evaluate operational risk, develop risk controls, monitor risk, and develop operational resilience in response to disasters. Readings and discussions focusing on industries as diverse as health care, manufacturing, banking, and insurance will serve as background and motivation for learning analytical and data analysis tools essential for modern managers such as Monte Carlo simulation, discrete event simulation, and flexible supply chain development. Competence in Excel and basic statistics will be valuable in this course.

OPER660601
Forecasting Techniques
TOMIC, ALEKSANDAR S
Spring 2020
The theory and practice of applied time series analysis will be explored. First the different segments (trend, seasonality, cyclical, and irregular) of a time series will be analyzed by examining the Autocorrelation functions (ACF) and Partial Autocorrelation functions (PACF). The specifics model the various types of time series include linear regression, panel regression, seasonal decomposition, exponential smoothing, and ARIMA modeling as well as combining models. PLEASE NOTE: This course is also offered as an online hybrid course with Fr. McGowan, OPER/MFIN6606.12, ECON2229.12. For his sections only: in addition to the online lectures presented on the Canvas LMS, there are three required on-campus class meetings on: Saturday morning February 22, and Saturday May 2. The midterm exam will also be held on campus on Monday evening March 16. Please see the course syllabus for additional details.

OPER660701
Machine Learning for Business Intelligence
UNUVAR, MERVE
Spring 2020
Machine learning (ML) has been a popular topic for data scientists and analysts. The goal in ML is to learn from existing data and extract useful information such as patterns, behaviors and trends. We can then use this information to predict future activity. The ability of learning patterns from data and making accurate predictions on new instances makes ML a powerful tool for Business Intelligence since it helps us transform the raw data into better decisions. This course will not dive into the technical details of ML algorithms but rather focus on how to use these algorithms in Business Intelligence applications. We will study business applications including but not limited to customer segmentation, propensity, and churn.

Spring 2020
Operations, like accounting, finance, and marketing, is one of the primary functions of every organization. Operations managers transform human, physical and technical resources into goods and services. Hence, it is vital that every organization manage this resource conversion effectively and efficiently. How effectively this is accomplished depends upon the linkages between operating decisions and top management (strategic) decisions. The focus of the course is decision-making at the operating level of the firm, converting broad policy directives into specific actions within the organization. Strong emphasis will be placed on the development and use of quantitative models to assist in decision making.

**OPER770501**  
**Statistics**  
**TOMIC, ALEKSANDAR S**  
**Spring 2020**

This course focuses on the analytical tools of statistics that are applicable to management practice. The course begins with descriptive statistics and probability and progresses to inferential statistics relative to central tendency and dispersion. In addition to basic concepts of estimation and hypothesis testing, the course includes coverage of topics such as analysis of variance and regression.
OPER770601
Data Analytics 1: Model Building
NUZZO, BENJAMIN B
Spring 2020
This course focuses on the use of quantitative methods to support managerial decisions. Fundamental to this type of decision analysis is a model, which is a representation of reality. A child enjoys a model car or a model train. An engineer uses a model of an airplane wing in a wind tunnel. An architect uses a set of blueprints as a model to illustrate what is to be built. The National Weather Service uses computer models to predict the track of a hurricane. In this course we will see how mathematical models and modern spreadsheet software can be used to support managerial decision analysis. We will pay special attention to the assumptions and limitations of using mathematical models as part of the iterative process of making operational and strategic management decisions. Examples will be used to illustrate this process in real world situations.

OPER772001
Operations Management
PARKER, DELVON B

Spring 2020

This course discusses the resource structure and the execution of activities that produce goods or deliver services. It focuses on the design and integration of the supply chain processes that support a company's business strategy. It offers a blend of the theory and practice of operations management. At the same time, the course shows the role of quantitative techniques in guiding the operations decisions. The pedagogy involves lecture, readings, and discussion of case studies.

PRTO330001
Senior Seminar in Business Ethics
SMITH, MICHAEL J

Fall 2019

The purpose of this course is to provide Portico Teaching Assistants a greater depth of understanding of the philosophical issues covered in Portico, and to offer an introduction to the core pedagogical techniques involved in teaching applied ethics. Participating TA's will study the course material on a second-order level by considering the evolution of their understanding of the course material over their undergraduate career, and by exploring pedagogical best-practices to improve teaching outcomes. The structure of the course will thus run concurrently with that of Portico. While primarily directed towards enriching the experience of the TA's, the course will simultaneously aim to facilitate the goals of Portico itself by providing TA's with additional tools and resources for engaging with their students and creating a more cohesive and impactful classroom community.

PRTO240101
Free Markets, Faith, and the Common Good
CIONI, JOSEPH R
Spring 2020
If sharing our gifts, pursuing justice, and acting on our concern for the poor and marginalized of society are core values of Jesuit-trained students, to what extent is free market capitalism a good "fit" for helping us meet those goals? In this course, we will explore several key moral and philosophical foundations of free market capitalism. These arguments will then be placed in dialogue with central insights contained in Catholic social teaching, especially the principles of human dignity, solidarity, the preferential option for the poor, and the common good.

**Case Competition Cohort**  
**LA COMBE, AMY M**  
**Fall 2019**  
This course is for Sophomore and Juniors in the Carroll School of Management who are interested in learning how to better prepare for strategy and ethics case competitions. The class will meet weekly for one hour with the objective to develop skills in the following areas: be able to effectively analyze an ethics case and a strategy case, determine feasible alternatives, craft a recommendation, implement recommendations, and prepare for judges' questions. The course will also help students with a PowerPoint presentation for case competitions and oral tips for such a competition. The 10-week course will end with an internal case competition where winning groups will be chosen to attend competitions and represent the Carroll School nationally in the spring and subsequent fall (juniors who are abroad in the spring will not be eligible to take the course).

Undergraduate Management Courses: Spring 2020

UGMG101001  
Perspectives on Management  
CLAVIN, JOHN C; DOYLE, JEREMIAH T  
Spring 2020  
This course, taught by practitioners John Clavin (BC '84) and Jere Doyle (BC '87), provides BC students with an excellent opportunity to explore the functional disciplines of business from a real-world perspective. Using a combination of lectures, case studies, readings and outside speakers, the course provides students the opportunity to get grounded in each of the CSOM concentrations while gaining outside views on careers in related fields and industries. The course will also provide a framework to explore and discuss cross-functional issues that impact business strategy and execution. This is a highly interactive class that places a premium on both preparation and participation each week. The course is initially open to CSOM sophomores but normally has availability for juniors and seniors across all undergraduate majors.

Nursing Courses: Summer 2019

NURS426301
Nursing Synthesis Clinical Laboratory
MCNUTT-CLARKE, BETH; HAZE, NANCI J; CULLINAN, DONNA M
Summer 2019
This course provides senior nursing students with an opportunity to synthesize, expand, and refine nursing concepts and clinical reasoning competencies. Through an intensive clinical experience completed in institutional and/or community settings, students focus on the healthcare needs of specific client populations, study in depth the interventions used to restore and/or optimize health, and utilize evidence-based research in practice. Emphasis will be placed on current quality and safety guidelines and standards of care for the specialty area in which the student is practicing.

Credits: 03
Schedule: BY ARRANGEMENT
Room: None
Satisfies Core Requirement: None

NURS534501
Ecuador: Global Health Perspectives
BYRNE, ROSEMARY F
Summer 2019
This course will involve the study of global health from the perspective of the various stakeholders: Populations, governments, Non-Government Organizations (NGOs), health care providers and health educators. Social, political, economic, legal and ethical perspectives will be addressed. This course will be offered in Quito, Ecuador and will include field trips to health care facilities and discussions with local health professionals on current health issues and challenges for the future. Using a case-based approach, students will analyze and develop potential solutions and options for addressing global health care issues and create strategies for improving the health of specific populations.
NURS535001
Global Healthcare: Meeting Challenges and Making Connections
SIMONELLI, MARY C
Summer 2019
This course brings together students and faculty from around the world to discuss and synthesize perspectives on global health, specifically the challenges and common connections experienced across patient centered care, health education, healthcare systems and policy development. The participants will develop a deeper understanding of the particular needs of diverse and underserved populations. Emphasis will be placed on social justice and health of individuals, families, and populations. Through the lens of public health, this course explores assessment of healthcare needs, assurance of a quality healthcare infrastructure, and development of healthcare policy.

NURS639701
Foundations of Nursing Practice
HURLEY, DOREAN L; ST PIERRE, SHERRI B
Summer 2019
This course introduces students to the profession of nursing, nursing roles and ethical and clinical dimension of nursing practice. Students learn the fundamental health assessment techniques, physical examination and basic clinical skills that are integral to the nursing process and the rationals for these techniques. Laboratory and clinical simulation experiences provide opportunities to practice health histories, and demonstrate the physical assessment techniques, basis psychomotor skills, principles of safety and documentation and communication skills necessary for the care of individual patients.

NURS641101
*Nursing Synthesis Practicum*
MCNUTT-CLARKE, BETH; HAZE, NANCI J; CULLINAN, DONNA L
Summer 2019
This course provides nontraditional nursing students with an opportunity to synthesize, expand, and to refine nursing concepts and clinical reasoning competencies. Through an intensive clinical experience based in institutional and/or community settings, students will be able to focus on health care needs of specific client populations, study in-depth the interventions used to restore and/or optimize health, and utilize nursing research in practice.

Role of Advanced Practice Nurses  
KELLY-WEEDE, SUSAN A  

Summer 2019  
Dimensions of advanced practice nursing including its historical development; role theory and implementation; legal and regulatory factors, and role implementation across practice settings will be explored. A focus on organization behavior and systems leadership, excellence in care delivery, practice evidence and care outcomes, relationship-based practice, quality improvement models and patient safety initiatives will be stressed and linked to APN role. National initiatives including the IOM Report as well as financial, political, social, and economic factors that influence care will be studied along with strategies to influence health care delivery systems and innovative practice models.

NURS743001  
Advanced Health Assessment Across the Life Span  
MARSHALL, ALISON O; PADOS, BRITT F; LAPIERRE, KELLIE L  

Summer 2019  
Building on undergraduate course work and previous clinical experience, this course utilizes life span development and health risk appraisal frameworks as the basis for health assessment. Students master health assessment skills for individuals within family, environmental, and cultural contexts. The course provides advanced practice nursing students with planned classroom and clinical laboratory experiences to refine health assessment skills and interviewing techniques. Health promotion, health maintenance, and epidemiological principles are emphasized in relationship to various practice populations.  

Credits: 03  
Schedule: M T W TH 9-12
NURS749201
Basic Principles of Nurse Anesthesia Practice
EMERY, SUSAN A
Summer 2019
This course is an introduction to the clinical application of nurse anesthesia practice. An historical perspective of the nurse anesthetist role will be explored and current anesthesia practice and techniques will also be described. Students will be introduced to anesthesia delivery systems and to concepts of patient safety and advocacy. Specific local and national legal aspects of nurse anesthesia practice will be examined.

Credits: 03
Schedule: T 1-4
Room: DEVLIN HALL 218
Satisfies Core Requirement: None
Comments: None
Prerequisites: NURS7491 AND NURS7490.
Corequisites: NURS7493 AND NURS7494.

NURS749301
Pharmacology of Anesthetics and Accessory Drugs
EMERY, SUSAN A
Summer 2019
This course is a study of the pharmacologic theories as they relate to nurse anesthesia practice. The application of pharmacokinetic and pharmacodynamic principles as they relate to specific anesthetic and adjunct drugs used in anesthetic practice will be explored. Integration of theory into practice will be emphasized through the use of case studies. Ethical, legal and economic considerations of drug selection will also be discussed as the student learns to develop an anesthesia plan of care.

**Credits:** 03

**NURS749401**  
**Physiologic Variables for Nurse Anesthesia II—Card**  
**EMERY, SUSAN A**  
**Summer 2019**  
This course builds on basic concepts of the anatomy, physiology, and pathophysiology of the cardiovascular system and provides in-depth information about the cardiovascular system and anesthesia. The impact of anesthesia on the structure and function of the heart as a pump as well as the characteristics of both systemic and pulmonary circulation will be explored. Measures to evaluate cardiovascular function, including electrocardiography, cardiac output, blood volume and arterial and venous pressures, will be described using clinical examples. Alterations in normal anatomy and physiology and implications for the anesthetic plan for both non-cardiac and cardiac surgery will be discussed.

**Credits:** 03

NURS752001
Research Methods for Advanced Practice Nursing
GOULD, KATHLEEN A; MARCHETTI, CAROL A
Summer 2019
The focus of this course is the formal process of acquiring and evaluating evidence that supports nursing practice. Quantitative and qualitative methods of inquiry are examined. Quality considerations of various research designs are explored. Levels of evidence are identified in relation to existing research outcomes. Evaluation of existing research outcomes as evidence to support clinical practice, demonstrate quality improvement (QI), and advance nursing knowledge is a major emphasis of the course.

Credits: 03
Schedule: T TH 4 30-7 30
Room: HIGGINS HALL 300
Satisfies Core Requirement: None
Comments: Open to upper-division R.N. and B.S. nursing students, and non-matriculated nursing students.

NURS752501
Integrative Review of Nursing Research
TESTA, DENISE B
Summer 2019
The focus of the course is on the use of a systematic and analytic process in the critical analysis and synthesis of empirical nursing research on a topic related to the student's specialty area. Students work independently to develop a publishable integrative review manuscript under guidance of faculty.

Credits: 03
Schedule: M 1-4
Room: DEVLIN HALL 117
**NURS759501**  
_**Nurse Anesthesia III**_  
**TESTA, DENISE B**  
**Summer 2019**  
This course focuses on the delivery of anesthesia care within advanced nursing practice in a broad range of clinical situations for patients with multiple, complex health problems. Through the refinement of assessment and management skills, critical thinking is further developed. With supervision, students assume more overall responsibility for anesthetic management. Through seminar participation students explore the anesthetic management of diverse populations and specialty situations. Likewise, simulation is focused on the management of complex and specialty situations. Concurrent with this semester, students begin a student-directed review of didactic content in advance preparation for the National Certification Exam.

NURS121001
Public Health in a Global Society
ABUELEZAM, NADIA; SABBATH, ERIKA L
Fall 2019
This foundation course presents public health as an interdisciplinary science focused on health promotion and disease prevention at the population level. The course provides an overview of the history of public health, global burden of disease, sub-disciplines of public health, maternal/child health, and nutrition, and emphasizes the collaborative nature of the field through examples in research and practice. An inherent principle in public health is advancing social justice and this course, and the public health sequence more broadly, focuses on at-risk populations, reducing health disparities, and improving health equity at the population level.

NURS208001
Pathophysiology
HURLEY, DOREAN L
Fall 2019
Pathophysiology offers an integrated approach to human disease. The course builds on the underlying concepts of normal function as they apply to the basic processes of pathogenesis. Biological variations of age, gender, and cultural differences are integrated into the course content where applicable. Common acute and chronic health problems are introduced to explore the interrelatedness of a variety of stressors that affect physiological function. Successful completion of Pathophysiology facilitates the student's transition into clinical nursing practice.

NURS212001
Nursing Health Assessment Across the Life Span
KATIGBAK, CARINA
Fall 2019
This course introduces the concepts of health, health promotion, and growth and development across the life span. The interactions of underlying mechanisms such as environment, culture, ethnicity, family, genetics, and gender that are foundational to development and individual health will be explored. Theories and principles that address physical, cognitive, and psychosocial growth and development will guide understanding of the complex healthy human, from birth to geriatrics and death. Principles and theories of health promotion will be analyzed and applied from a nursing perspective to support the individual's desire to increase personal and/or family health potential and well-being.
NURS212002

Fall 2019
This course provides campus and community laboratory experiences in applying the theoretical concepts explored in NURS2120. The focus is on systematic assessment of individual health status associated with maturational changes and influenced by culture and environment. The clinical reasoning framework and communication theory direct the development of nursing assessment skills. There will be four hours of Simulation Laboratory, one hour of seminar, and required media/BB Vista preparation each week.

NURS212201
Nursing Assessment of Health Across the Life Span
KATIGBAK, CARINA; PARK, JINHEE
Fall 2019
This course introduces the concepts of health, health promotion, and growth and development across the lifespan. The interactions of underlying mechanisms such as environment, culture, ethnicity, family, genetics, and gender that are foundational to the development and individual health will be explored. Theories and principles that address physical, cognitive, and psychosocial growth and development will guide understanding of the complex healthy human, from birth to geriatrics and death. Principles and theories of health promotion will be analyzed and applied from a nursing perspective to support the individual's desire to increase personal and/or family health potential and well-being.

NURS220401
Pharmacology and Nutrition Therapies
SLY, JACQUELINE R; TUCKER, SHEILA; WOOD, LISA J
Fall 2019
This course focuses on the study of pharmacodynamic and nutritional principles and therapies used in professional nursing. Using case studies as well as lecture, an integrated approach to patient problems is emphasized. Nutriceuticals, over-the-counter, social, and folk drugs affecting the patient are also considered.

NURS324201
Adult Health Nursing Theory II
SLY, JACQUELINE R
Fall 2019
This course builds on the concepts learned in previous courses including adult health and pharmacology and expands the knowledge base for planning and implementing care of adults with acute health problems and acute exacerbations of chronic health problems. Clinical case studies of acute care emergencies are used to discuss clinical judgment. Emphasis is placed on the selection of evidence-based interventions, evaluation of interventions, and use of evaluative data in refining a plan of care for the adult patient. Discussions focus on the role of the primary nurse in the acute care setting including collaboration, discharge planning, and health teaching.

Credits: 03

NURS324301
Adult Health Nursing II Clinical Laboratory
BARONE, STACEY H
Fall 2019
This course provides clinical experiences with adults who have acute health problems and acute exacerbations of chronic health problems. Students perform the role of the primary nurse with emphasis on the implementation of evidence-based interventions, documentation of patient outcomes, collaboration, and communication. This course builds on knowledge from previous courses and expands the students' understanding of the professional role with a focus on nursing standards of care, safety, quality improvement, and transitional care planning.

**NURS324401**  
**Childbearing Nursing Theory**  
**CAPOTOSTO, MELISSA K**  
**Fall 2019**

The course focuses on concepts associated with the unique responses of families during the childbearing cycle, normal and high risk pregnancies, and normal and abnormal events in women's health. Current multidisciplinary research in women's health with a focus on the childbearing cycle, including genetics and cultural competence, is presented. Evidenced based nursing practice for the childbearing family is discussed. The nursing implications of attending to both the physiologic and the psychosocial needs of the childbearing family are reviewed. Emphasis will be placed on AWHONN and ACOG standards of care.

NURS324501
Clinical Laboratory of Childbearing Theory
CAPOTOSTO, MELISSA K

Fall 2019
Application of childbearing theory to the diagnoses, interventions, and outcomes for the care of families in structured clinical settings. Focus is on prenatal, perinatal, and post-natal activities. Students work collaboratively with the multidisciplinary team in applying evidenced-based practice derived from current multidisciplinary research to the childbearing family. Supervised by nursing faculty, the students are mentored to extend their skills in critical thinking and clinical judgment to meet the physical, psychosocial, cultural, and spiritual needs of their clients and families. Emphasis will be placed on QSEN, AACN Essentials for baccalaureate education, AWHONN and ACOG standards of care.

Credits: 03
Schedule: M 7-3 PM
NURS425001
Child Health Nursing Theory
HAZE, NANCI J
Fall 2019
This course builds on the published *Pediatric Nursing: Scope and Standards of Practice* to discuss the unique responses of children and their families to acute and chronic illness. Emphasis is placed on the child's growth and development in relation to wellness and illness. A family-centered approach is used to address the health teaching, promotion, restoration, and maintenance needs of children and their families. Theoretical principles are presented, and creative, evidence-based nursing intervention strategies to meet the needs of children and their families across the health care continuum are discussed.

NURS425201
Psychiatric Mental Health Nursing Theory
DUNNE, JULIE P
Fall 2019
This course builds upon the standards of practice from APNA-ISPN, AACN, and QSEN to discuss the legal, ethical, and therapeutic role of the psychiatric mental health nurse in caring for individuals with psychiatric disorders across the life span. Current interdisciplinary research on the genetic, neurobiological, and psychosocial theories of depression, psychosis, substance abuse, bipolar illness, eating, anxiety, personality, and cognitive disorders is analyzed. Evidence-based nursing practice, including psychopharmacology and psychosocial treatment modalities such as cognitive-behavioral, interpersonal, group, and milieu therapy is applied from a multicultural perspective. Nursing interventions for families and communities experiencing crisis, grief, and trauma are identified.

NURS425301  
Psychiatric Mental Health Nursing Clinical Laboratory  
DUNNE, JULIE P  
Fall 2019  
Therapeutic communication skills provide a foundation for implementing the nursing role based on the American Psychiatric Nurses Association standards of practice with psychiatric patients/clients in a variety of psychiatric treatment settings. In the clinical experience, students work collaboratively with multidisciplinary teams in applying evidenced-based practice based on current interdisciplinary research to the nursing process. In weekly supervision with clinical faculty, students are mentored to extend their skills in clinical reasoning to meet the psychological, social, cultural, biological, and spiritual needs of persons from varied backgrounds (economic, racial, ethnic, age, and gender) who are in treatment for mental illness.

NURS426001
Population Health Nursing Theory
NGUYEN, TAM H; RYAN, KATHLEEN M
Fall 2019
This course introduces the conceptual and scientific frameworks of population health, emphasizing public health nursing roles. The course integrates health promotion, risk reduction, and disease prevention across the life span in a range of local and global settings, using case examples that nurses, as part of interdisciplinary teams, will encounter. Community assessment and epidemiological methods are introduced. Health disparities and vulnerability are examined through an ecological lens together with traditional and emerging public health issues. Students will learn about bridging population health and clinical care in order to meet the prevention health needs of individuals, families, and populations.

NURS426301  
Nursing Synthesis Clinical Laboratory  
MCNUTT-CLARKE, BETH; KATIGBAK, CARINA; BARONE, STACEY H  
Fall 2019

This course provides senior nursing students with an opportunity to synthesize, expand, and refine nursing concepts and clinical reasoning competencies. Through an intensive clinical experience completed in institutional and/or community settings, students focus on the healthcare needs of specific client populations, study in depth the interventions used to restore and/or optimize health, and utilize evidence-based research in practice. Emphasis will be placed on current quality and safety guidelines and standards of care for the specialty area in which the student is practicing.

Actualizing the Role of Professional Nurse
SIMONELLI, MARY C; ASHLEY, JANE
Fall 2019
Prepares students to transition into the role of the professional nurse. Responsibilities associated with assuming the role of a professional are explored in relation to furthering individual and social good. Contemporary health care policies and economic pressures are examined for their influence on the delivery of quality patient care. Current ethical and legal standards are highlighted and students are encouraged to reflect on how biases and prejudices influence the provision of patient care. Focus is placed on recognizing and addressing injustices in health care access and quality, which is essential to actualizing the role of professional nurse.

NURS427001
Transition to Professional Nursing
SIMONELLI, MARY C; ASHLEY, JANE
Fall 2019
This final didactic course in the program presents the organizational, legal, ethical, and health policy contexts of professional nursing practice for students about to begin their careers. Discussion and assignments will focus on short-term challenges and opportunities associated with transition to practice, such as attaining licensure and finding one's first professional position. The role of the professional nurse in establishing and maintaining safety and health care quality within organizations will be analyzed. The course will strongly emphasize the leadership imperative for nurses across all roles in health care and social justice perspectives on the position of nursing in society.

NURS639801
MSE Adult Health Theory
BOND, STEWART; ASHLEY, JANE
**Fall 2019**

The theoretical basis of nursing care for adult patients with acute health problems or exacerbations of chronic health problems is addressed. Emphasis is placed on the selection of evidenced-based interventions, evaluation of interventions, and use of evaluative data in refining the plan of care for the adult patient. Discussions focus on the role of the primary nurse in the acute care setting including the importance of communication, collaboration, discharge planning, and health teaching. The nurse's role in patient safety and quality improvement is also discussed.

Nursing Practice and Public Health in Community
NGUYEN, TAM H
Fall 2019
This course introduces students to the conceptual and scientific frameworks of population-centered nursing through didactic and clinical experiences focused on community focused care. The course will examine social and economic influences on health care delivery and vulnerability of individuals, families, and populations in community settings. Issues of emerging infectious diseases and disaster preparedness will be addressed. Emphasis is placed on the variety of roles/functions nurses have in population-centered care including that of public health and primary care. Clinical experiences will focus on the role of the nurse with emphasis on current evidence, clinical expertise, health outcomes, and collaboration.

Global Health Challenges and Disparities
ABUELEZAM, NADIA
Fall 2019
Marginalized groups and residents of resource deprived communities often suffer from excessive rates of poor health and mortality. Such health disparities exist within the U.S. and around the world. In order to achieve the goals of "increasing longevity and quality of life" and "eliminating health disparities" (U.S. Public Health Service), health care professionals need to understand health disparities, their casual roots, and how to design and implement effective health-promoting programs and policies. This course provides an introduction to health disparities, measuring indices of health status, and implications for programming and policy. Contemporary global health challenges are addressed as exemplars.

NURS741501
Conceptual Basis for Advanced Practice Nursing
BOND, STEWART; QIU, MEI R
Fall 2019
The focus of this course is the development of knowledge as the basis for advanced practice nursing. Philosophical, conceptual, and theoretical perspectives of leaders and scholars from nursing and related fields are surveyed and critiqued. Opportunities are provided to explore and evaluate key issues such as levels of theory development, the domain of clinical judgement, and language and information technology. Emphasis is on knowledge-based quality improvements within various systems and environments that affect health care. Theories and models related to organizational change and health policy are applied.

Ethical Issues in Advanced Practice Nursing  
GRACE, PAMELA J  
Fall 2019
The focus of this course is to explore the boundaries of Advanced Practice Nurses' (APNs) ethical responsibilities to individuals, groups, and society in an intra- and interdisciplinary, collaborative health care environment. The philosophical and theoretical foundations of ethical practice are critically examined for their ability to enhance decision-making that best serves the interests of current and future patients and meets societal needs. An emphasis is placed on developing the skills needed to address challenges and obstacles to ethical practice in advanced practice roles and settings. Strategies to influence health policy related to various specialty populations are explored.

Role of Advanced Practice Nurses
DWYER, ANDREW A
Fall 2019
Dimensions of advanced practice nursing including its historical development; role theory and implementation; legal and regulatory factors, and role implementation across practice settings will be explored. A focus on organization behavior and systems leadership, excellence in care delivery, practice evidence and care outcomes, relationship-based practice, quality improvement models and patient safety initiatives will be stressed and linked to APN role. National initiatives including the IOM Report as well as financial, political, social, and economic factors that influence care will be studied along with strategies to influence health care delivery systems and innovative practice models.

NURS743701
Advanced Practice Psychiatric Nursing Across the Life Span I
PETRECA, VICTOR G; MARCHETTI, CAROL A
Fall 2019
In this combined didactic and clinical course, students learn to conduct mental health evaluations, to formulate psychiatric and nursing diagnoses, and to plan and implement short-term/initial treatment, case management, referral plans, and client services for adults, children, and families. Clinical placements (20 hours/week) are individualized to match students' interests in a variety of psychiatric-mental health (PMH) settings including mental health outpatient services and forensic practice settings. Faculty and agency preceptors assist students to develop essential evaluation and diagnostic skills and to provide individualized, culturally sensitive nursing care and clinical services to diverse client populations.

**NURS743801**  
**Advanced Practice Theories of Psychotherapy**  
**MARCHETTI, CAROL A**  
**Fall 2019**  
This course is designed to explore major approaches to individual psychotherapy, such as Psychodynamic, Humanistic, Interpersonal, Behavioral, Cognitive, Dialectical Behavioral, Brief, and Multicultural. Commonalities and differences among the processes and techniques are discussed. Selected theorists and their approaches to psychotherapy will be examined as examples of major schools of thought concerning the nature of the psychotherapeutic relationship. Applications across the life span and among diverse populations are critically examined.

NURS745001
Women and Children's Health Advanced Practice Theory
FONTENOT, HOLLY B
Fall 2019
This course focuses on theoretical knowledge for the indirect and direct roles of the advanced practice nurse in health care of women and children. Content will address use, analysis, and synthesis of theories and research with attention to the impact of culture, ethnicity, race, socioeconomic status, and family structures. Psychosocial influences on women's health, parenting, and child development are explored. Students will interpret the roles of the advanced practice nurse in MCH as these affect and are affected by health care and health care delivery systems at the national level.

NURS745301
Women's Health Advanced Practice Nursing I
HARRIS, ALLYSSA L; FONTENOT, HOLLY B
Fall 2019
This course is the first of two courses in the Advanced Practice in Women's Health series. The role of the advanced practice nurse with women across the life span is explored with a focus on wellness promotion and management of common alterations in the sexuality-reproductive pattern, with special concern for cultural, ethnic, and socioeconomic diversity. Theories and research from nursing and other disciplines are synthesized and evaluated through seminars, clinical conferences, clinical experiences (20 hours/week), and course assignments.
Credits: 06

NURS745701
Pediatric Primary Care/Advanced Practice Nursing I
WHITE, LAURA S; MANSFIELD, KATHLEEN J; ST PIERRE, SHERRI B
Fall 2019
This clinical course is the first of two advanced practice specialty nursing courses for preparing pediatric nurse practitioners. This course focuses on health promotion and maintenance and prevention of illness and disability, as well as assessment, diagnosis, and management of common pediatric problems/illnesses. Anatomical, physiological, psychological, cognitive, socioeconomic, and cultural factors affecting a child's growth and development are analyzed. Parenting practices, family life styles, ethical issues, and environmental milieu are also explored. Students engage in precepted clinical practice (20 hours/week) where they apply their cognitive, affective, and psychomotor skills and are guided by critical thinking and clinical decision making.

NURS746201
Primary Care of Adults and Older Adults Theory I
FLANAGAN, JANE M; HOWARD, ELIZABETH P
Fall 2019
First AG health course focusing on primary care of adult and older adults, exploring advanced practice in context of nursing knowledge and concepts from other disciplines. Includes integration of concepts in health promotion, prevention, identification of risk factors that potentially threaten health of adults. Variables include health status, age, development, gender, ethnicity, socio-economics, and cultural characteristics associated with health behaviors across group settings are studied as they impact health and related behaviors. Emphasis on related concepts. Discussions integrate role of APN as leader in health care reform and articulation of nursing contributions to interdisciplinary adult and older health care outcomes.

NURS746301  
Primary Care Adult and Older Adult/Advanced Practice Nursing I  
CONNOLLY, MAUREEN A; TABLOSKI, PATRICIA; LAPIERRE, KELLIE L  
Fall 2019  
This first course in the adult-gerontology health practicum series concentrates on the application of the clinical reasoning process used to assess, diagnose, and treat common primary care and chronic illness problems of the adult population throughout the lifespan. Emphasis is placed on the integration of epidemiologic, genetic, environmental, social-political, and cultural determinants that contribute to alterations in the health status of young, middle, and older adults. Health promotion, evidence-based practice, and holistic health strategies are integrated to promote the optimal level of being and functioning of adults across the life span.

NURS747001
Community and Family Health Advanced Theory I
DWYER, ANDREW A
Fall 2019
This course is the first of a series in theories, relevant to advanced practice nurses in Family and Community Health specialties. It focuses on concepts, theories, and research needed to thrive in the advanced practice role. Emphasis is on health promotion: helping individuals, families, and aggregates to attain optimum levels of wellness. Theories and related research from nursing and other disciplines are integrated, and innovative health promotion programs or practice models are showcased.

NURS747301
Primary Care of Families/Advanced Practice Nursing I
MARSHALL, ALISON O; CULLINAN, DONNA M; BYRNE, ROSEMARY F
Fall 2019
This combined didactic and practicum course focuses on the assessment, diagnosis, and management of selected primary health care problems in individuals and families using critical thinking and diagnostic reasoning. Incorporation of health promotion, health maintenance, and delivery of care strategies as they relate to individuals and families are emphasized. Students practice 20 hours per week in a variety of clinical settings including health departments, health centers, homeless clinics, health maintenance organizations, private practices, and occupational health clinics.
NURS752001
Research Methods for Advanced Practice Nursing
PARK, JINHEE
Fall 2019
The focus of this course is the formal process of acquiring and evaluating evidence that supports nursing practice. Quantitative and qualitative methods of inquiry are examined. Quality considerations of various research designs are explored. Levels of evidence are identified in relation to existing research outcomes. Evaluation of existing research outcomes as evidence to support clinical practice, demonstrate quality improvement (QI), and advance nursing knowledge is a major emphasis of the course.

Credits: 03
Schedule: M 9-11 50
Room: CARNEY HALL 202
Satisfies Core Requirement: None
Comments: Open to upper-division R.N. and B.S. nursing students, and non-matriculated nursing students.

NURS759001
Physiologic Variables for Nurse Anesthesia III
EMERY, SUSAN A; TESTA, DENISE B
Fall 2019
This course builds upon the clinical physiology of the neurological, endocrine, and renal systems. The focus of discussion will be on the anatomy and physiology of the nervous system, including nerve action potential, neuromuscular transmission, the autonomic nervous system, neurotransmitters, and cerebral blood flow. Also, normal physiology of the endocrine and renal system will be studied, including the more commonly seen alterations in these systems. Emphasis will be placed on the anesthetic implications of caring for patients with high risk conditions.

**NURS759101**  
*Nurse Anesthesia I*  
**TESTA, DENISE B; EMERY, SUSAN A**  
**Fall 2019**

This course provides the opportunity for students to integrate theory into practice within the clinical setting. The focus is on the development of diagnostic, therapeutic, and ethical judgments for the patient undergoing surgery and anesthesia. During the first semester of clinical anesthesia practice the emphasis is on the development and implementation of a patient specific plan of anesthesia care for healthy patients undergoing minimally invasive surgical procedures. Synthesis of theoretical knowledge with clinical practice is enhanced by weekly seminars, case presentations, care plan exemplars, and high fidelity simulation.

NURS767201
Advanced Pathophysiology Across the Life Span
READ, CATHERINE E
Fall 2019
This course focuses on the processes that underlie diseases and dysfunctions that affect individuals across the lifespan. The emphasis is on central concepts of pathophysiology, including alterations in cellular communication, genetic mechanisms, homeostasis, cell growth regulation, metabolism, immunity, and inflammation. These concepts are then applied in a systematic survey of diseases within body systems. Current research, clinical examples, and application to advanced nursing practice are incorporated throughout the course.

Credits: 03
Schedule: null
Room: None
Satisfies Core Requirement: None
Comments: None
Prerequisites: With permission of the Instructor. Baccalaureate degree in nursing, enrollment in graduate program in School of Nursing or permission of the instructor.

NURS871301
Healthcare Information Technology
STETTHEIMER, TIMOTHY D
Fall 2019
This course explores the critical role of e-health and information systems in the planning, operation, and management of healthcare organizations. Students will learn how to assess and evaluate health information systems and business requirements in a variety of settings such as health systems, hospitals, and medical practices. Students will develop skills in healthcare technology implementation design that addresses such industry-specific requirements as translating HIPPA and other regulations into specific technology decisions while implementing medical systems (EMR, lab, clinical services, medical database providers, etc.). Students will also learn how to manage multi-institutional relationships as they are expressed in technology implementations, including the many vendor configurations but also cross-provider organization relationships. Specific topics include data and systems integrations, communications protocols, security standards, procurement, and authentication and authorization.

NURS871401  
Nursing Ethics and Professional Responsibility in Advanced Practice  
GRACE, PAMELA J  
Fall 2019  
The course prepares advanced practice nurses for ethics leadership within the broader healthcare arena. Links are made among philosophical/theoretical foundations of nursing, ethical theory, and nursing goals. Skills supportive of the ethical decision making of nurses, peers, and the team are developed with in-class opportunities to practice leading ethics rounds and developing ethics education projects. An emphasis is placed on facilitating the interests of current and future patients and society as a professional obligation. Socially derived injustices and professional responsibility to advocate for just healthcare is highlighted along with strategies to influence institutional and health policy on behalf of individual and social good.

Credits: 03  
Schedule: null
NURS871501
Nursing Leadership in Complex Health Care Settings
REID PONTE, PATRICIA A; KELLY-WEEDER, SUSAN A
Fall 2019
This course prepares graduate nursing students to become leaders in health care. Self-reflection, self-assessment, and values clarification provide the groundwork for a nursing leadership self-development plan. Students will explore a broad range of evidence-based approaches, including leadership and organizational theories, to prepare them to lead in today's complex health care environment including practice, organization, system, academic, and policy arenas. Students will explicate the complexities of health care leadership through the examination of topics such as change management, partnership relationships, innovation, accountability models, organizational culture, diversity and inclusion, conflict management, power, creating trust and psychological safety within teams.

Secondary Analysis of Health-Related Datasets
JURGENS, CORRINE Y
Fall 2019
In this course, students apply concepts from earlier methods and statistics courses to the secondary analysis of large datasets to answer health-related research questions of interest. Students may choose to work with one of the datasets available for use in the course or, with permission, work with a faculty member on one of his/her datasets. Students are expected to: (1) delineate a research question; (2) select an appropriate dataset and analytic approach to answer the question; (3) execute the analysis; (4) discuss the strengths and limitations of the approach and the results; and (5) disseminate findings through publications or presentations.

NURS970101
Epistemology: Historical and Contemporary Influences on Knowledge Development in Nursing
GRACE, PAMELA J
Fall 2019
This course examines the historical and contemporary influences on knowledge development in nursing. The focus is on multiple ways of knowing and developing knowledge. The role of theory, constructs, and concepts in guiding research questions and methods are emphasized. Experience is provided in concept analysis and theory derivation. Multi-disciplinary perspectives and the way in which they inform nursing research are explored.

Credits: 03

NURS971701
Methods of Advanced Scholarly Inquiry
REID PONTE, PATRICIA A
Fall 2019
This is the second of four courses to prepare DNP students to conduct an organization approved, scholarly inquiry project to improve health services and patient outcomes. Students critically evaluate the literature and related information to address a health care problem. Scholarly inquiry approaches are presented to enable students to identify a problem, plan change to improve a process or outcome, or develop innovative solutions related to health care delivery. Upon course completion, there will be a faculty and organization approved DNP project charter, which includes the problem, processes, and expected outcomes.

NURS973001
Advanced Physiology and Pathophysiology across the Lifespan
READ, CATHERINE E
Fall 2019
This course focuses on physiologic and pathophysiologic processes that affect individuals across the lifespan. The emphasis is on central concepts of physiology and pathophysiology, including genetic and epigenetic mechanisms, immunity, inflammation, cell growth regulation, hematopoiesis, and hemostasis. These concepts are then applied in a systematic survey of diseases within body systems. Current research, clinical examples, and application to advanced nursing practice are incorporated throughout the course.
NURS975101
Advanced Qualitative Research Methods
FLANAGAN, JANE M; QIU, MEI R
Fall 2019
Various qualitative approaches to research typically used in nursing and health science will be examined. Topics will include research paradigms, postpositivism, critical, constructivism, participatory, qualitative rigor, ethics, problem identification, research purpose and specific aims, literature review, sampling strategy and techniques, sample, multiple data collection techniques, data management, multiple strategies for data analysis, differentiating data vs. findings, constructing findings that are congruent with the research aims and specific qualitative approaches, and conclusion-drawing. The course will provide students with experience in conducting data analysis from several qualitative approaches, as well as presentation and critique of in-class and homework data analysis activities.

NURS980801
Research Design and Methods I
LEE, CHRISTOPHER S; WOOD, LISA J
Fall 2019
This course provides an overview of scientific approaches relevant to nursing and health care research. Current epistemological and qualitative, quantitative and mixed methods approaches are discussed. The application of both classic and emerging quantitative, qualitative, and mixed methods research approaches for answering questions and generating knowledge relevant to the discipline and practice of nursing are explored. Strengths and limitations of research approaches are examined.

NURS981001
Responsible Conduct of Research: Research Practicum I
VESSEY, JUDITH A
Fall 2019
In this seminar students develop an understanding of the issues and requirements for the responsible conduct of research. This course meets the federal guidelines for graduate training in the responsible conduct of research as outlined in NOT-OD-10-019 "Update on the Requirements for Instruction in the Responsible Conduct of Research."

Credits: 01

NURS981601
Population Health Principles, Program Planning, and Evaluation
HOWARD, ELIZABETH P; RYAN, KATHLEEN M
Fall 2019
The course focuses on care at the aggregate level and examines the multiple determinants of health. The principles of population health and population health management will be explored. Health promotion theories will be analyzed and evaluated. Building on these theories and epidemiologic principles, students will assess and identify health care needs at the population level. Students will design theory-driven, evidence-based interventions to improve population outcomes. Program planning and evaluation in partnership with community stakeholders will be emphasized.

Credits: 03
Schedule: M 9-11 50
Room: CARNEY HALL 303
Satisfies Core Requirement: None
NURS990101
Doctoral Comprehensives
KELLY-WEEDER, SUSAN A
Fall 2019
This course is for students who have not yet passed the Doctoral Comprehensive but prefer not to assume the status of a non-matriculating student for the one or two semesters used for preparation for the comprehensive.

Nursing Courses: Spring 2020

NURS121001
Public Health in a Global Society
ABUELEZAM, NADIA; FRANCKLE, REBECCA L
Spring 2020
This foundation course presents public health as an interdisciplinary science focused on health promotion and disease prevention at the population level. The course provides an overview of the history of public health, global burden of disease, sub-disciplines of public health, maternal/child health, and nutrition, and emphasizes the collaborative nature of the field through examples in research and practice. An inherent principle in public health is advancing social justice and this course, and the public health sequence more broadly, focuses on at-risk populations, reducing health disparities, and improving health equity at the population level.

NURS207001
Introduction to Professional Nursing
GENNARO, SUSAN; ROSS, RICHARD E
Spring 2020
This course provides an introduction to professional nursing, exploring nursing's history and the development of nursing knowledge grounded in theory and evidenced-based practice. The course places the study of socially just nursing practice within the tradition of liberal arts education. Engaging in critical self-reflection, students apply new value-based self-awareness to culturally congruent nursing care. Ethical reasoning processes are applied, utilizing clinical and population-based case studies. Therapeutic communication with individuals across the lifespan is introduced. Nursing education, practice, and professional careers as well as the influence of current health care environmental factors on health and evidenced-based nursing practice are discussed.

Sophomore Formation Seminar  
SIMONELLI, MARY C  
Spring 2020  
This course is required for sophomore undergraduate nursing students and will involve guided review and reflection to reinforce the inherent professional values of altruism, human dignity, integrity, and social justice fundamental to the discipline of nursing. Activities in the weekend long retreat will be guided by the Ignatian formation principles and student's values and beliefs as they relate to professional practice, development as individuals and as members of caregiving teams. The goal is to build a foundation for professional leadership as nursing students become aspiring members of the nursing profession and productive and committed citizens of society at large.

Credits: 01  
Schedule: BY ARRANGEMENT  
Room: None  
Satisfies Core Requirement: None  
Comments: The SCRUBS weekend retreat fulfills the NURS2090 requirement. Attendance at the full retreat is mandatory and an expectation of all sophomore students. Any absences should be discussed as soon as possible with the Teacher of Record (the Associate Dean), who will make decisions regarding activities that will be required to earn credit.

Prerequisites: None  
Corequisites: Must be taken alongside NURS2230, NURS2231, NURS2204, & NURS3170.

NURS220501  
Clinical Pharmacology  
SLY, JACQUELINE R  
Spring 2020
This course focuses on the study of clinical pharmacology across the lifespan and scientific principles underlying its use in professional nursing. Major drug classifications and respective prototypes serve as a foundation for lifelong learning and higher-level understanding of pharmacotherapeutics. Using case studies, discussions focus on the importance of collaboration, patient education, and alternative and complementary therapies, while being mindful of patient social factors. Emphasis is placed on delivering high quality and safe patient care related to medication administration.

Adult Health Nursing Theory I
READ, CATHERINE E; BARONE, STACEY H
Spring 2020
This course focuses on the theoretical basis of the nursing care of adults across the life span with altered states of health. Emphasis is placed on beginning application of the clinical reasoning process with a focus on frequently occurring nursing diagnoses, interventions, and outcomes for adults, in particular older adults. Evidence-based practice and standards of care are integrated throughout the course. The role and responsibilities of the nurse in the acute care setting including those related to quality, safety, ethics, and legal issues are emphasized. Cultural awareness is incorporated throughout the course.

Comparing Health Care Systems through a Global Lens
SIMONELLI, MARY C
Spring 2020
Introduction to the concepts of global health and the critical links between public health and social and economic development. Determinants of health and patterns of disease and health outcomes across the globe are critically examined. The course reviews the determinants of health status in terms of biology, demography, epidemiology, culture, sociology, economics, and politics. Key concerns regarding reproductive health, child survival, nutrition, communicable diseases, and chronic diseases are examined. Health care delivery in developed vs. undeveloped regions of the world is emphasized.

NURS321001
Contemporary Issues in Public Health
HAWKINS, SUMMER S
Spring 2020
This course provides students the opportunity to apply the foundational skills of public health to contemporary public health issues. The course integrates data and research to begin a more in-depth examination of the major burdens of disease and several emerging areas of concern. With a consistent goal of reducing health disparities, the course identifies population-level risk factors as well as evidence-based interventions for health promotion and disease prevention. Principles and concepts learned in 'Public Health in a Global Society' are reinforced through specific health conditions, behaviors, and topics.

NURS324201
Adult Health Nursing Theory II
ASHLEY, JANE; BARONE, STACEY H
Spring 2020
This course builds on the concepts learned in previous courses including adult health and pharmacology and expands the knowledge base for planning and implementing care of adults with acute health problems and acute exacerbations of chronic health problems. Clinical case studies of acute care emergencies are used to discuss clinical judgment. Emphasis is placed on the selection of evidence-based interventions, evaluation of interventions, and use of evaluative data in refining a plan of care for the adult patient. Discussions focus on the role of the primary nurse in the acute care setting including collaboration, discharge planning, and health teaching.

Credits: 03
Schedule: W 1-3 50
Room: CARNEY HALL 009
Satisfies Core Requirement: None
Comments: None

NURS324301
Adult Health Nursing II Clinical Laboratory
BARONE, STACEY H
Spring 2020
This course provides clinical experiences with adults who have acute health problems and acute exacerbations of chronic health problems. Students perform the role of the primary nurse with emphasis on the implementation of evidence-based interventions, documentation of patient outcomes, collaboration, and communication. This course builds on knowledge from previous courses and expands the students' understanding of the professional role with a focus on nursing standards of care, safety, quality improvement, and transitional care planning.

Credits: 03
Schedule: TH 6 30-3 30 AM
Room: None
Satisfies Core Requirement: None
Comments: None

NURS324401
Childbearing Nursing Theory
CAPOTOSTO, MELISSA K
Spring 2020
The course focuses on concepts associated with the unique responses of families during the childbearing cycle, normal and high risk pregnancies, and normal and abnormal events in women's health. Current multidisciplinary research in women's health with a focus on the childbearing cycle, including genetics and cultural competence, is presented. Evidenced based nursing practice for the childbearing family is discussed. The nursing implications of attending to both the physiologic and the psychosocial needs of the childbearing family are reviewed. Emphasis will be placed on AWHONN and ACOG standards of care.

Credits: 03
Schedule: T 9-11 50
Room: CARNEY HALL 009
Satisfies Core Requirement: None
Comments: None

NURS324501
Clinical Laboratory of Childbearing Theory
CAPOTOSTO, MELISSA K
Spring 2020
Application of childbearing theory to the diagnoses, interventions, and outcomes for the care of families in structured clinical settings. Focus is on prenatal, perinatal, and post-natal activities. Students work collaboratively with the multidisciplinary team in applying evidenced-based practice derived from current multidisciplinary research to the childbearing family. Supervised by nursing faculty, the students are mentored to extend their skills in critical thinking and clinical judgment to meet the physical, psychosocial, cultural, and spiritual needs of their clients and families. Emphasis will be placed on QSEN, AACN Essentials for baccalaureate education, AWHONN and ACOG standards of care.

Credits: 03
Schedule: M 7-3 PM
NURS425001
Child Health Nursing Theory
HAZE, NANCI J
Spring 2020
This course builds on the published *Pediatric Nursing: Scope and Standards of Practice* to discuss the unique responses of children and their families to acute and chronic illness. Emphasis is placed on the child's growth and development in relation to wellness and illness. A family-centered approach is used to address the health teaching, promotion, restoration, and maintenance needs of children and their families. Theoretical principles are presented, and creative, evidence-based nursing intervention strategies to meet the needs of children and their families across the health care continuum are discussed.

Credits: 03
Schedule: W 9-11 50
Room: CARNEY 033A
Satisfies Core Requirement: None
Comments: None

NURS425101
Child Health Nursing Clinical Laboratory
HAZE, NANCI J; MANSFIELD, KATHLEEN J
Spring 2020
Based on the published Scope and Standards of Practice, this course provides a variety of clinical settings plus simulation experiences for implementing the nursing role in the care of children and families. Emphasis on clinical reasoning and evidenced-based practice in planning interventions to meet the physical, psychosocial, emotional, and spiritual needs of children and families coping with acute and chronic health problems. Students will care for patients from diverse cultural, ethnic, and social backgrounds, interact collaboratively with family members and the interdisciplinary health team, and take a leadership role in advocating for patients.

NURS425201
Psychiatric Mental Health Nursing Theory
DUNNE, JULIE P
Spring 2020
This course builds upon the standards of practice from APNA-ISPN, AACN, and QSEN to discuss the legal, ethical, and therapeutic role of the psychiatric mental health nurse in caring for individuals with psychiatric disorders across the life span. Current interdisciplinary research on the genetic, neurobiological, and psychosocial theories of depression, psychosis, substance abuse, bipolar illness, eating, anxiety, personality, and cognitive disorders is analyzed. Evidence-based nursing practice, including psychopharmacology and psychosocial treatment modalities such as cognitive-behavioral, interpersonal, group, and milieu therapy is applied from a multicultural perspective. Nursing interventions for families and communities experiencing crisis, grief, and trauma are identified.

Credits: 03
Schedule: M 9-11 50
Room: CARNEY HALL 005

NURS425301
Psychiatric Mental Health Nursing Clinical Laboratory
DUNNE, JULIE P
Spring 2020
Therapeutic communication skills provide a foundation for implementing the nursing role based on the American Psychiatric Nurses Association standards of practice with psychiatric patients/clients in a variety of psychiatric treatment settings. In the clinical experience, students work collaboratively with multidisciplinary teams in applying evidenced-based practice based on current interdisciplinary research to the nursing process. In weekly supervision with clinical faculty, students are mentored to extend their skills in clinical reasoning to meet the psychological, social, cultural, biological, and spiritual needs of persons from varied backgrounds (economic, racial, ethnic, age, and gender) who are in treatment for mental illness.

Credits: 03
Schedule: T OR TH 7-3 OR
Room: None

NURS426001
Population Health Nursing Theory
KATIGBAK, CARINA; RYAN, KATHLEEN M
Spring 2020
This course introduces the conceptual and scientific frameworks of population health, emphasizing public health nursing roles. The course integrates health promotion, risk reduction, and disease prevention across the life span in a range of local and global settings, using case examples that nurses, as part of interdisciplinary teams, will encounter. Community assessment and epidemiological methods are introduced. Health disparities and vulnerability are examined through an ecological lens together with traditional and emerging public health issues. Students will learn about bridging population health and clinical care in order to meet the prevention health needs of individuals, families, and populations.

**Population Health Nursing Theory**  
**KATIGBAK, CARINA; RYAN, KATHLEEN M**  
**Spring 2020**  
This course introduces the conceptual and scientific frameworks of population health, emphasizing public health nursing roles. The course integrates health promotion, risk reduction, and disease prevention across the life span in a range of local and global settings, using case examples that nurses, as part of interdisciplinary teams, will encounter. Community assessment and epidemiological methods are introduced. Health disparities and vulnerability are examined through an ecological lens together with traditional and emerging public health issues. Students will learn about bridging population health and clinical care in order to meet the prevention health needs of individuals, families, and populations.

NURS426101
Population Health Practice in the Community
CULLINAN, DONNA L; BYRNE, ROSEMARY F
Spring 2020
This course focuses on the application of population health, emphasizing public health nursing roles, that include the care of population members in community settings, such as a neighborhood, school, or non-profit organization, locally or globally. Students will gain experience in community engagement, community health assessment, screening, case management, health education, service and program evaluation, and advocacy. Emphasis is placed on the multiple determinants of health and on using interdisciplinary approaches in practice to implement evidence-based interventions aimed at health promotion, risk reduction, and disease prevention.

NURS426301
Nursing Synthesis Clinical Laboratory
MCNUTT-CLARKE, BETH; RYAN, KATHLEEN M; NUGENT, LUANNE
Spring 2020
This course provides senior nursing students with an opportunity to synthesize, expand, and refine nursing concepts and clinical reasoning competencies. Through an intensive clinical experience completed in institutional and/or community settings, students focus on the healthcare needs of specific client populations, study in depth the interventions used to restore and/or optimize health, and utilize evidence-based research in practice. Emphasis will be placed on current quality and safety guidelines and standards of care for the specialty area in which the student is practicing.

**Actualizing the Role of Professional Nurse**  
**SIMONELLI, MARY C; ASHLEY, JANE; HURLEY, DOREAN L**  
**Spring 2020**

Prepares students to transition into the role of the professional nurse. Responsibilities associated with assuming the role of a professional are explored in relation to furthering individual and social good. Contemporary health care policies and economic pressures are examined for their influence on the delivery of quality patient care. Current ethical and legal standards are highlighted and students are encouraged to reflect on how biases and prejudices influence the provision of patient care. Focus is placed on recognizing and addressing injustices in health care access and quality, which is essential to actualizing the role of professional nurse.

NURS427001
Transition to Professional Nursing
SIMONELLI, MARY C; ASHLEY, JANE; HURLEY, DOREAN L
Spring 2020
This final didactic course in the program presents the organizational, legal, ethical, and health policy contexts of professional nursing practice for students about to begin their careers. Discussion and assignments will focus on short-term challenges and opportunities associated with transition to practice, such as attaining licensure and finding one's first professional position. The role of the professional nurse in establishing and maintaining safety and health care quality within organizations will be analyzed. The course will strongly emphasize the leadership imperative for nurses across all roles in health care and social justice perspectives on the position of nursing in society.

Global Healthcare: Meeting Challenges and Making Connections
SIMONELLI, MARY C
Spring 2020
This course brings together students and faculty from around the world to discuss and synthesize perspectives on global health, specifically the challenges and common connections experienced across patient centered care, health education, healthcare systems and policy development. The participants will develop a deeper understanding of the particular needs of diverse and underserved populations. Emphasis will be placed on social justice and health of individuals, families, and populations. Through the lens of public health, this course explores assessment of healthcare needs, assurance of a quality healthcare infrastructure, and development of healthcare policy.

NURS646001
MSE Childbearing Nursing Theory  
CAPOTOSTO, MELISSA K  
Spring 2020  
This course focuses on concepts associated with the unique responses of families during the childbearing cycle; normal and high risk pregnancies and normal and abnormal events in women's health. Current multidisciplinary research in women's health with a focus on the childbearing cycle including genetics and cultural competence is presented. Evidenced based nursing practice for the childbearing family is discussed. The nursing implications of attending to both the physiologic and the psychosocial needs of the childbearing family are reviewed. Emphasis will be placed on AWHONN and ACOG standards of care.

NURS646101  
MSE Childbearing Nursing Clinical  
CAPOTOSTO, MELISSA K  
Spring 2020  
This experience focuses on the application of childbearing theory to the diagnoses, interventions, and outcomes for the care of families in structured clinical settings. Focus is on prenatal, perinatal, and post-natal activities. In the clinical laboratory, students work collaboratively with the multidisciplinary team in applying evidenced-based practice derived from current multidisciplinary research to the childbearing family. Supervised by nursing faculty, the students are mentored to extend their skills in critical thinking and clinical judgment to meet the physical, psychosocial, cultural and spiritual needs of their clients and families. Emphasis will be placed on QSEN, AACN Essentials for Baccalaureate education, AWHONN and ACOG standards of care.

NURS646801
MSE Psychiatric Mental Health Nursing Theory
DUNNE, JULIE P
Spring 2020
This course builds on the standards of practice from APNA-ISPN, AACN, and QSEN to discuss the legal, ethical, and therapeutic role of the psychiatric mental health nurse in caring for individuals with psychiatric disorders across the life span. Current interdisciplinary evidenced based research on the genetic, neurobiological, and psychosocial theories of DSM-5 diagnoses are explored and analyzed. Evidence based nursing practice, including psychopharmacology and psychosocial treatment modalities such as cognitive-behavioral, interpersonal, group, and milieu therapy is applied from a multicultural perspective. Nursing interventions for families and communities experiencing crisis, grief, and trauma are identified.

NURS646901
MSE Psychiatric Nursing Clinical
DUNNE, JULIE P
Spring 2020
Therapeutic communication skills provide a foundation for implementing the nursing role based on the American Psychiatric Nurses Association standards of practice with psychiatric patients/clients in a variety of psychiatric treatment settings. In the clinical experience, students work collaboratively with multidisciplinary teams in applying evidence-based practice based on current interdisciplinary research to the nursing process. In weekly supervision with clinical faculty, students are mentored to extend their skills in clinical reasoning to meet the psychological, social, cultural, biological, and spiritual needs of persons from varied backgrounds (economic, racial, ethnic, age, and gender) who are in treatment for a major mental illness.

NURS647001
MSE Child Health Nursing Theory
HAZE, NANCI J
Spring 2020
This course builds on the published Pediatric Nursing: Scope and Standards of Practice to discuss the unique responses of children and their families to acute and chronic illness. Emphasis is placed on the child's growth and development in relation to wellness and illness. A family-centered approach is used to address the health teaching, promotion, restoration, and maintenance needs of children and their families. Theoretical principles are presented and creative, evidence-based nursing intervention strategies to meet the needs of children and their families across the health care continuum are discussed.

NURS647101
MSE Child Health Nursing Clinical
HAZE, NANCI J; MANSFIELD, KATHLEEN J
Spring 2020
Based on the published Pediatric Nursing: Scope and Standards of Practice, this course provides a variety of clinical settings for students to expand and perfect their skills in implementing the nursing role in the care of children and families. Clinical faculty guide students' clinical reasoning process and use of nursing scholarship and evidence-based practice guidelines in the planning nursing interventions to meet the physical, psychosocial, emotional, and spiritual needs of children and their families who are coping with acute and chronic health problems. Students will care for patients from diverse cultural, ethnic, and social backgrounds; interact collaboratively with family members and the interdisciplinary health team; and take a leadership role in advocating for their patient.

NURS735501
An Aging Society: Interdisciplinary Perspectives on Health Care
LYONS, KAREN S; MAHONEY, ELLEN K
Spring 2020
This course provides a conceptual foundation for interdisciplinary health care delivery to older adults and their families. Emphasis is placed on the exploration of significant individual and societal issues in gerontology to guide and expand perspectives of advanced practice nurses and other health professionals in existing and future health systems. These issues are examined at the global and national level. Collaborative inter-professional practice and research are emphasized as a basis for care and services that support meaningful and purposeful life for older adults and families.

NURS741501  
Conceptual Basis for Advanced Practice Nursing  
BOND, STEWART  
Spring 2020  
The focus of this course is the development of knowledge as the basis for advanced practice nursing. Philosophical, conceptual, and theoretical perspectives of leaders and scholars from nursing and related fields are surveyed and critiqued. Opportunities are provided to explore and evaluate key issues such as levels of theory development, the domain of clinical judgement, and language and information technology. Emphasis is on knowledge-based quality improvements within various systems and environments that affect health care. Theories and models related to organizational change and health policy are applied.

Ethical Issues in Advanced Practice Nursing
ROSS, RICHARD E
Spring 2020
The focus of this course is to explore the boundaries of Advanced Practice Nurses' (APNs) ethical responsibilities to individuals, groups, and society in an intra- and interdisciplinary, collaborative health care environment. The philosophical and theoretical foundations of ethical practice are critically examined for their ability to enhance decision-making that best serves the interests of current and future patients and meets societal needs. An emphasis is placed on developing the skills needed to address challenges and obstacles to ethical practice in advanced practice roles and settings. Strategies to influence health policy related to various specialty populations are explored.

NURS741701
Role of Advanced Practice Nurses
DWYER, ANDREW A
Spring 2020
Dimensions of advanced practice nursing including its historical development; role theory and implementation; legal and regulatory factors, and role implementation across practice settings will be explored. A focus on organization behavior and systems leadership, excellence in care delivery, practice evidence and care outcomes, relationship-based practice, quality improvement models and patient safety initiatives will be stressed and linked to APN role. National initiatives including the IOM Report as well as financial, political, social, and economic factors that influence care will be studied along with strategies to influence health care delivery systems and innovative practice models.

**NURS742001**  
**Advanced Pharmacology Across the Life Span**  
**TABLOSKI, PATRICIA**  
**Spring 2020**

This course is intended to provide the student with an understanding of pharmacology and drug therapy as it relates to advanced practice (general and/or in a clinical specialty). The interrelationships of nursing and drug therapy will be explored through study of pharmacodynamics, dynamics of patient response to medical and nursing therapeutic regimens, and patient teaching as well as the psychosocial, economic, cultural, ethical, and legal factors affecting drug therapy, patient responses, and nursing practice. The role of the nurse practicing in an expanded role in decision-making related to drug therapy is also included.

NURS742601
Advanced Psychopharmacology Across The Life Span
PETRECA, VICTOR G
Spring 2020
This course builds upon the standards of practice from APNA-ISPN, AACN, NONPF and APA. The legal, ethical and therapeutic role of the advanced practice nurse in prescribing psychotropic medications for individuals with psychiatric disorders is examined across the lifespan. The evidence based prescription of psychopharmacological agents according to practice guidelines will be a focus in each class. The course will review neurobiology, the action of central nervous system medications, and the implications for ethno-psychopharmacology. Standardized tools to evaluate treatment efficacy and diagnostic criteria will be identified. Collaborative practice models, indications for referral and monitoring to enhance treatment adherence are reviewed.

NURS743001
Advanced Health Assessment Across the Life Span
CONNOLLY, MAUREEN A; WHITE, LAURA S; MARSHALL, ALISON O
Spring 2020
Building on undergraduate course work and previous clinical experience, this course utilizes life span development and health risk appraisal frameworks as the basis for health assessment. Students master health assessment skills for individuals within family, environmental, and cultural contexts. The course provides advanced practice nursing students with planned classroom and clinical laboratory experiences to refine health assessment skills and interviewing techniques. Health promotion, health maintenance, and epidemiological principles are emphasized in relationship to various practice populations.
Credits: 03  
Schedule: M 9-1 20  
Room: None  
Satisfies Core Requirement: None  
Comments: This course is taken the semester prior to practicum entry.  
Prerequisites: NURS7672 AND NURS7420.  
Corequisites: None  
Cross-listed with: None  
Frequency: Annually

NURS749001  
Physiologic Variables for Nurse Anesthesia I—Respiratory  
EMERY, SUSAN A  
Spring 2020  
This course is an in-depth study of the anatomy, physiology, and pathophysiology of the respiratory system and related anesthesia implications for the whole person. It complements physiologic principles learned in master's core courses. The concepts of ventilation and perfusion as well as oxygen transport will be examined. Assessment of baseline pulmonary function and alterations seen in common disease states will be reviewed. The effect of compromised pulmonary function and implications for the patient and the anesthesia plan will be discussed. The effect of surgery and anesthesia on the respiratory system will be emphasized.

Credits: 03  
Schedule: W 9-11 50  
Room: CARNEY HALL 007  
Satisfies Core Requirement: None  
Comments: None  
Prerequisites: None  
Corequisites: NURS7491 AND NURS7672.  
Cross-listed with: None  
Frequency: Annually

NURS749101  
Chemistry and Physics for Nurse Anesthesia Practice  
EMERY, SUSAN A  
Spring 2020
This course is an in-depth study of principles of chemistry and physics as they relate to nurse anesthesia practice. Aspects of organic and biochemistry, including the chemical structure of compounds and their significance in pharmacology, will be explored. The role of acid-base balance in maintaining the body's internal milieu and cellular integrity will be examined. Laws of physics as they pertain to the nurse anesthesia practice will be illustrated with specific examples. The emphasis will be placed on the assimilation and integration of scientific theory into practice.

Credits: 03
Schedule: M 9-11 50
Room: CARNEY HALL 009
Satisfies Core Requirement: None
Comments: None
Prerequisites: None
Corequisites: NURS7672 AND NURS7490.
Cross-listed with: None
Frequency: Annually

NURS752001
Research Methods for Advanced Practice Nursing
JURGENS, CORRINE Y; QIU, MEI R
Spring 2020
The focus of this course is the formal process of acquiring and evaluating evidence that supports nursing practice. Quantitative and qualitative methods of inquiry are examined. Quality considerations of various research designs are explored. Levels of evidence are identified in relation to existing research outcomes. Evaluation of existing research outcomes as evidence to support clinical practice, demonstrate quality improvement (QI), and advance nursing knowledge is a major emphasis of the course.

Credits: 03
Schedule: M 4 30-7 30
Room: GASSON HALL 306
Satisfies Core Requirement: None
Comments: Open to upper-division R.N. and B.S. nursing students, and non-matriculated nursing students.
Prerequisites: None
Corequisites: None
Cross-listed with: None
Frequency: Biennially

NURS752501
Integrative Review of Nursing Research
FONTENOT, HOLLY B
Spring 2020
The focus of the course is on the use of a systematic and analytic process in the critical analysis and synthesis of empirical nursing research on a topic related to the student's specialty area. Students work independently to develop a publishable integrative review manuscript under guidance of faculty.

Credits: 03
Schedule: BY ARRANGEMENT
Room: None
Satisfies Core Requirement: None
Comments: By Arrangement
Prerequisites: NURS7520. Can be taken concurrently.

Frequency: Annually

NURS753701
Advanced Practice Psychiatric Nursing Across Life Span II
PETRECA, VICTOR G; MARCHETTI, CAROL A
Spring 2020
In this second Family PMHNP course, students build on the theoretical frameworks of NURS7437 to continue to examine major DSM-5 diagnoses that occur in childhood, adolescence, and throughout adulthood. Students apply models of individual, family and group psychotherapy from NURS7438 Advanced Practice Theories of Psychotherapy and NURS7538 Advanced Theories of Family and Group Psychotherapies, and pharmacologic approaches from NURS7420 Advanced Pharmacology and NURS7426 Advanced Psychopharmacology. Crisis management, prevention/health promotion, continuous quality improvement, and allocation of services including case management, collaboration, consultation, and referral are analyzed. In the clinical practicum (minimum 250 hours) students synthesize their diagnostic and clinical reasoning abilities and advance their treatment skills as members of the multidisciplinary team.
NURS753801
Advanced Theories of Family and Group Psychotherapy
MARCHETTI, CAROL A
Spring 2020
This course is designed to explore the major psychotherapeutic approached for families and groups. Emphasis is on the application of theories and models of family and group psychotherapy across the lifespan, among diverse populations, and in traditional and non-traditional settings.

Credits: 03
Schedule: T 1-3 50
Room: CARNEY HALL 033A
Satisfies Core Requirement: None
Comments: None

Cross-listed with: None
Frequency: Annually

NURS755001
Current Issues in Sexual Health Care
FONTENOT, HOLLY B
Spring 2020
Sexual health is a critical component of well-being across the lifespan. Current research reveals that gender and sexual health identity and orientation are key factors in understanding patterns of sexual health behaviors and risks, and experiences of health, wellness, and illness. This course examines current and emerging issues affecting sexual health and strategies to inform clinical practice, including: the nurse-patient relationship and its influence on sexual well-being; health disparities linked to societal stigmas, prejudices, and discrimination; and ways to improve access to quality health care for populations disproportionately at risk for or affected by STIs including HIV/AIDS.

---

**NURS755301**  
**Women's Health Advanced Practice Nursing II**  
**HARRIS, ALLYSSA L; FONTENOT, HOLLY B**  
**Spring 2020**  
This course builds on Women and Children's Health Advanced Practice Theory and Women's Health Advanced Practice Nursing I. It concentrates on the role of the nurse in advanced practice with women across the lifespan, focusing on the development and evaluation of management strategies to promote optimal functioning in women seeking obstetrical and gynecological care as well as the indirect role functions in advanced practice as Clinical Nurse Specialists/Nurse Practitioners. Theories and research from nursing and other disciplines are applied and integrated through seminars, clinical conferences, clinical experiences (20 hours/week), and course assignments.

**Credits:** 06  
**Schedule:** T 9-11 50  
**Room:** CARNEY HALL 007  
**Satisfies Core Requirement:** None  
**Comments:** None
Prerequisites: NURS7672 AND NURS7420 AND NURS7430 AND NURS7450.

Cross-listed with: None
Frequency: Annually

NURS755601
Advanced Clinical Decision-making in Pediatric Primary Care
WHITE, LAURA S
Spring 2020
The purpose of this course is to provide an in-depth focus and understanding of the complexities of contemporary pediatrics and the process of diagnostic reasoning directly related to clinical experience. Emphasis is placed on the new morbidities of pediatrics, current research in child development, and the current policies and expectations of primary care pediatrics. This course will provide content specific to pediatrics, teen, and young adult health and development.

Credits: 03
Schedule: T 1-3 50
Room: CARNEY HALL 303
Satisfies Core Requirement: None
Comments: None
Prerequisites: NURS7430; NURS7420; NURS7672; NURS7447.

Frequency: Annually

NURS755701
Pediatric Primary Care/Advanced Practice Nursing II
ST PIERRE, SHERRI B; MANSFIELD, KATHLEEN J; WHITE, LAURA S
Spring 2020
This course builds on NURS 7457. The focus is on management of children with more complex or chronic health problems. Theories and research from nursing and other disciplines are synthesized, with special consideration of the influences of culture and SES on wellness and health care. Students continue in precepted clinical practice (20 hours/week) to develop advanced skills in differential diagnosis and gain increased comfort in managing psychosocial problems. In consultation with preceptors, students make referrals, develop treatment and teaching plans with clients, document accurately, and further develop confidence and competence in the role of pediatric nurse practitioner.

**NURS756201**  
**Primary Care of Adults and Older Adults Theory II**  
**HOWARD, ELIZABETH P**  
**Spring 2020**

The second course focused on primary care of adult/older adult. Analysis/synthesis of nursing and knowledge to guide evidenced-based interventions/outcomes. Intervention strategies: complementary healing modalities, actions responsive to changing health-care delivery systems are explored in relation to outcome indicators that distinguish the APN role addressing commonly occurring nursing problems. Innovative practice models designed to highlight APN leadership and practice. Evaluation of current knowledge to address nurse sensitive indicators is also explored. Interdisciplinary collaborations discussed, especially relating to development of APN led care models promoting health and life transitions of adults/older adults. Measures used to evaluate effectiveness of the APN outcomes are identified.

**Credits:** 03  
**Schedule:** T 9-11 50

NURS756301
Primary Care Adult and Older Adult/Advanced Practice Nursing II
CONNOLLY, MAUREEN A; LAPIERRE, KELLIE L
Spring 2020
This second course in the adult-gerontology health practicum series builds upon the knowledge gained in NURS7463. The course continues to apply the clinical reasoning process used to assess, diagnose, and treat common primary care problems and chronic illnesses of the adult-gerontology population considering lifespan, frailty, and socio-cultural influences. Through critically appraising current strategies used to promote the optimal level of being and functioning of adults and older adults, students will be encouraged to develop plans that address gaps in care.

NURS757001
Community And Family Health Advanced Theory II
KELLY-WEEDER, SUSAN A; HOWARD, ELIZABETH P
Spring 2020
This course is the second of a series in the theory and advanced practice of community and family health nursing. It focuses on theories, concepts, and research findings in the development and evaluation of nursing interventions and strategies that promote health in aggregates and communities. Health legislation and multiple socioeconomic and environmental factors are analyzed to determine their influence on planning for family health and community well being.

NURS757301
Advanced Practice in Community and Family Health Nursing II
MARSHALL, ALISON O; BYRNE, ROSEMARY F; CULLINAN, DONNA M
Spring 2020
This combined didactic and practicum course continues to integrate the assessment, diagnosis, and management of selected primary health care problems for individuals and families. Building on NURS7473 course content, this course emphasizes management of complex health problems. Students practice 20 hours per week to integrate theory, practice, and research as Family Nurse Practitioners.

Credits: 06

NURS759201
Advanced Principles for Nurse Anesthesia Practice
EMERY, SUSAN A
Spring 2020
This course focuses on selected problems associated with the provision of anesthesia for specialty and emergency surgeries. It explores anesthesia considerations related to the diverse needs of persons across the life span. Special attention is given to the anesthesia needs of the maternity, pediatric, and the aging patient. Content also addresses the specialty areas of acute and chronic pain management and outpatient surgery. Attention is given to patient comfort and safety issues implicit in surgical interventions and anesthesia delivery.

NURS759301
Nurse Anesthesia II
EMERY, SUSAN A
Spring 2020
This course provides the opportunity for students to integrate theory into clinical practice for patients with significant comorbidities undergoing more complex procedures. Anesthetic requirements as dictated by patient assessment, including the surgical procedure are studied in greater depth. Seminar and simulation experiences are sequenced to complement the theoretical content presented in NURS7592, Advanced Principles of Nurse Anesthesia Practice.

NURS871201
Healthcare Quality Management
REID PONTE, PATRICIA A
Spring 2020
This course explores the theoretical foundations and application of quality improvement methods, tools, and strategies needed to increase organizational effectiveness. The course focuses on measurement and accountability in health care delivery systems through the examination and analysis of data, structures, processes, and outcomes. Process improvement theories and models are explored with the goal of preparing students to lead and practice in organizations that advance high reliability principles, patient safety, inter-professional teamwork, and continuous learning.

This course explores the critical role of e-health and information systems in the planning, operation, and management of healthcare organizations. Students will learn how to assess and evaluate health information systems and business requirements in a variety of settings such as health systems, hospitals, and medical practices. Students will develop skills in healthcare technology implementation design that addresses such industry-specific requirements as translating HIPPA and other regulations into specific technology decisions while implementing medical systems (EMR, lab, clinical services, medical database providers, etc.). Students will also learn how to manage multi-institutional relationships as they are expressed in technology implementations, including the many vendor configurations but also cross-provider organization relationships. Specific topics include data and systems integrations, communications protocols, security standards, procurement, and authentication and authorization.

NURS871401
Nursing Ethics and Professional Responsibility in Advanced Practice
None
Spring 2020
The course prepares advanced practice nurses for ethics leadership within the broader healthcare arena. Links are made among philosophical/theoretical foundations of nursing, ethical theory, and nursing goals. Skills supportive of the ethical decision making of nurses, peers, and the team are developed with in-class opportunities to practice leading ethics rounds and developing ethics education projects. An emphasis is placed on facilitating the interests of current and future patients and society as a professional obligation. Socially derived injustices and professional responsibility to advocate for just healthcare is highlighted along with strategies to influence institutional and health policy on behalf of individual and social good.

Credits: 03
Schedule: null
NURS871601
Health Care Policy for Nursing Leaders
O'REILLY-JACOB, MONICA K
Spring 2020
This course prepares nurse leaders and scholars to influence health care and related policies in support of nursing's goals and social justice. The structure and financing of U.S. health care system and roles of government, insurers, providers, and consumers are examined. The relationships among health policy and the social and economic determinants of health are explored through analysis of key issues in health policy. Students engage in strategies to analyze and inform health policy. The course provides the foundation for leadership in interdisciplinary collaborative endeavors to address, through a nursing perspective, health policy issues at the local and national levels.

NURS971201
Integrative Review for Nursing Science
VESSEY, JUDITH A
Spring 2020
This course will engage students in the in-depth review, critique, evaluation, and synthesis of a body of literature. Students will use standardized approaches to systematically search, locate, and evaluate evidence in a focused area. Students will generate an integrative review that synthesizes the findings and identifies directions for future research.

NURS971601  
**Healthcare Policy and Social Justice**  
**O’REILLY-JACOB, MONICA K**  
**Spring 2020**  
This course prepares scholars to influence healthcare and related policies in support of social justice. Theories of social justice and other scholarly perspectives are used to explore the interrelationships among health policy and the social, political, and economic determinants of health. Strategies for developing, initiating, analyzing, and evaluating health policies are proposed using students' areas of focus as a basis. The course provides the foundation for leadership in interdisciplinary collaborative endeavors to address health policy at the regional, national and global levels.

NURS972001
Epidemiology
ABUELEZAM, NADIA
Spring 2020
Epidemiology is the study of the distribution and determinants of health-related states or events (including disease), and its methods are used in the control of diseases and other health problems in diverse populations. This course introduces basic principles and methods of epidemiology and biostatistics. Measures of disease frequency, association and causation, the design and analysis of studies, and the potential issues that may arise in these studies are addressed. This course prepares advanced practice nurses to engage in inter-professional collaboration with the ultimate goal of improving population health.

NURS973001
Advanced Physiology and Pathophysiology across the Lifespan
PADOS, BRITT F; DWYER, ANDREW A
Spring 2020
This course focuses on physiologic and pathophysiologic processes that affect individuals across the lifespan. The emphasis is on central concepts of physiology and pathophysiology, including genetic and epigenetic mechanisms, immunity, inflammation, cell growth regulation, hematopoiesis, and hemostasis. These concepts are then applied in a systematic survey of diseases within body systems. Current research, clinical examples, and application to advanced nursing practice are incorporated throughout the course.

NURS980901
Research Design and Methods II
LEE, CHRISTOPHER S; WOOD, LISA J
Spring 2020
This course examines specific methods utilized in the conduct of research. Areas of focus include recruitment and retention, sampling, data collection, measurement, instrumentation, fidelity, and data coding, management, and analyses. Methods are discussed in terms of quantitative, qualitative, and mixed methods research approaches. Topics also address components of building a research trajectory including research proposals for institutional approval, grand funding, and the dissemination of research findings.

Forensics Courses: Fall 2019

FORS531501
Victimology
BURGESS, ANN W
Fall 2019
This course examines the wide range of victimization experiences from the perspective of the victim, their families, and society. Crimes to be studied include robbery, burglary, carjacking, assault and battery, rape, domestic violence, stalking, homicide, arson, child sexual abuse and exploitation, child pornography crimes, federal crimes, identity theft, terrorism, and internet crimes. Emphasis will be given to exploring the etiology of trauma, motivational issues of offending, response patterns to victimization, secondary trauma effects of victimization, and community and media response. Class format will utilize cases from the forensic practice of the lecturers.

FORS531801
Forensic Science I
BURGESS, ANN W
Fall 2019
Forensic science concepts and principles play a critical role in analyzing crime scene evidence. This course draws on scientific principles and examines cases where there has been a death, including suicide, accidental, and criminal; and cases where there is a survivor, in which there is a legal and/or ethical component. Specifically, the course applies a case method format to forensic science issues including forensic pathology, clinical forensics, crime victims, computer crime, and equivocal death.

**FORS531901**  
**Forensic Science Lab**  
**BURGESS, ANN W**  
**Fall 2019**  
Students will learn and use equipment and techniques from the field of forensics to process and evaluate evidence from mock crime scenes. Students will employ various diagnostic tests and methods from the sciences of serology, pathology, ballistics, molecular biology, physics, and biochemistry to solve a contrived criminal case. The laboratory experience will invite students to utilize an array of scientific techniques and to confront and deliberate the ethical and legal implications surrounding the application of forensic science in a court of law.

Forensics Courses: Spring 2020

FORS220101
Wounded Warriors in Transition
BURGESS, ANN W

Spring 2020
Over 65,000 U.S. troops have been wounded since 2001. Many have suffered "the hidden injuries"--traumatic brain injuries and post-traumatic stress disorder. The purpose of this course is for students to gain an understanding of military culture, catastrophic injuries, and the journey of Wounded Warriors and their family members. The course examines the history and culture of the Armed Services and the developing knowledge of the rehabilitation of Wounded Warriors.

FORS531701
Forensic Mental Health
BURGESS, ANN W

Spring 2020
The course examines the components of human behavior that bring people into a criminal justice setting and analyzes the legal question involved. Content will cover homicide, rape, abduction, cyber crimes, stalking, domestic violence, child abuse, and criminal parenthood from the offender's perspective. Content covered includes forensic and behavioral interviewing, interrogation, role of forensic mental health examiners, case formulation, DSM IV-R diagnosis, criminal investigations and charges, state of mind, duty to warn, memory and recall, malingering, and secondary gain. Forensic cases will form the basis for discussion of each class topic.

Palliative Care Courses: Summer 2019

HLTH770001
Serious Ill, Death, and Dying
DESANTO-MADEYA, SUSAN A
Summer 2019
This course provides an opportunity for examination of personal, professional, and societal beliefs and perspectives on serious illness, death, and dying across the lifespan. Students become aware of and sensitized to personal assumptions, biases, attitudes and reactions to serious illness, death, and dying. Philosophies, principles, and models of palliative and end-of-life care are discussed. Students develop an appreciation for individual and family coping processes throughout serious illness, death, dying, and bereavement. Students explore communication and bio-psycho-social-spiritual strategies that can be used to partner with individuals and families to maximize quality of life throughout serious illness, death, and dying.

Palliative Care Courses: Fall 2019

HLTH741601
Ethical Issues in Advanced Practice Nursing
ROSS, RICHARD E
Fall 2019
The focus of this course is to explore the boundaries of Advanced Practice Nurses' (APNs) ethical responsibilities to individuals, groups, and society in an intra and interdisciplinary, collaborative health care environment. The philosophical and theoretical foundations of ethical practice are critically examined for their ability to enhance decision-making that best serves the interests of current and future patients and meets societal needs. An emphasis is placed on developing the skills needed to address challenges and obstacles to ethical practice in advanced practice roles and settings. Strategies to influence health policy related to various specialty populations are explored.

**HLTH742501**  
**Global Health Challenges and Disparities**  
**ABUELEZAM, NADIA**  
**Fall 2019**

Marginalized groups and residents of resource-deprived communities often suffer from excessive rates of poor health and mortality. Such health disparities exist within the U.S. and around the world. In order to achieve the goals of "increasing longevity and quality of life" and "eliminating health disparities" (U.S. Public Health Service), health care professionals need to understand health disparities, their casual roots, and how to design and implement effective health-promoting programs and policies. This course provides an introduction to health disparities, measuring indices of health status, and implications for programming and policy. Contemporary global health challenges are addressed as exemplars.

HLTH770201
Responding to Suffering in Serious Illness, Death, and Dying
TABLOSKI, PATRICIA
Fall 2019
This course focuses on improving the quality of life and care for individuals and families living with serious illness and at end of life. Emphasis is placed on recognizing and responding to suffering from an interdisciplinary perspective. Barriers and facilitators of effective care during serious illness, death and dying, such as social determinants of health, family dynamics, spiritual and cultural variations, are explored. Evidence-based interventions and strategies to address, manage, and alleviate physical, psychosocial, spiritual, and existential suffering across the lifespan are discussed. Established palliative care standards are utilized to evaluate outcomes within the context of interdisciplinary care.

Palliative Care Courses: Spring 2020

HLTH220601
Principles of Nutrition Across the Life Span
TUCKER, SHEILA
Spring 2020
This course focuses on the principles of normal nutrition as they are applied to individuals and populations across the life span. The content emphasizes the role diet plays in the prevention of disease and promotion of health. Therapeutic and medical nutrition applications are discussed relative to the nurse's role and responsibility in this aspect of patient care. Emphasis is placed on the integration of evidence-informed scientific recommendations into nursing practice.

HLTH770401
Interdisciplinary Leadership in Palliative Care
BOND, STEWART
Spring 2020
This course emphasizes the role of interdisciplinary palliative care leaders in promoting teamwork and collaboration in coordinating care for individuals and families throughout serious illness, death, and dying. The impact of serious illness, death, and dying on the individual, family, community, and healthcare system are analyzed to inform and promote quality palliative care. Resource availability and barriers to care across different settings are examined. Interdisciplinary leadership is explicated with an emphasis on communication, advocacy, ethics, policy development, quality, and safety. Standards of practice, policies, protocols, evidence-based practice and research are applied and evaluated to catalyze palliative care growth and development.

Counseling, Developmental, and Educational Psychology Courses: Summer 2019

APSY215201
Applied Psychology Practicum: Pathways to Purposeful Work and Life
LEWIN-BIZAN, SELVA
Summer 2019
Provides an introduction to the applications of psychological theory within various human and community service contexts. Readings and discussion contribute to critical analyses of how social issues and social problems are situated differently due to gender, race, social class, and diversities of language, ability, sexuality, etc. Students volunteer for 8-10 hours per week at a site selected with the assistance of the instructor and meet in a weekly seminar, keep a journal of their field experience, and complete reading and written assignments that integrate theory and practice.

Credits: 03
Schedule: MAY 14 - JUN 20
Room: None
Satisfies Core Requirement: None
Comments: Preference will be given to Juniors and Seniors who have completed at least 12 credit hours of APHD/EDUC courses prior to the semester of Applied Psychology Practicum (APSY2152) enrollment. Sophomores and students who are minoring in Applied Psychology interested in taking the class will be considered on a case by case basis determined by fit. Interested Sophomores should complete a Field Placement Application form and meet with the Applied Psych Practicum advisor prior to being admitted to the class.

APSY224201
Interpersonal Relations
GUTOWSKI, ELLEN R  
**Summer 2019**
Provides an opportunity to learn a developmental and systems perspective on the nature of family and interpersonal relations. Examines both the nature of interpersonal relations and some of the conditions in contemporary life that are shaping the quality of these relationships. Gives particular emphasis to understanding the self, family life, emotions, and conflicts in field research. Views the concept of interpersonal relations from historical, multicultural, gender, and developmental perspectives.

Building Sustainable Communities
DELSESTO, MATTHEW J; CERMAK, MICHAEL
Summer 2019
This course will investigate contemporary urban environments through the eyes of urban farmers and community innovators who are building more equitable communities and sustainable relationships with the land. Fieldwork, class discussions, environmental media, and workshops with community partners will facilitate our engagement with sustainability narratives and practices. Course themes include the urban planning and racial politics, challenges and opportunities of deindustrialization, the environmental justice movement, youth education, organizational development, and community-based urban transformation.

APSY741801
Applied Child Development
KRUZIK, CLAUDIA L
Summer 2019
This course will help teachers understand principles of learning and cognitive, linguistic, social, and affective development as they apply to classroom practices. Students will focus on the acquisition of strategies that enable them to assess and understand how they and the children they work with are constructors of meaning. This course is designed for individuals beginning their professional development in education who plan to work with children.

APSY741901
Applied Adolescent Development
MEDVIDE, MARY B
Summer 2019
This course is designed to provide students with an overview of the theoretical and empirical knowledge base concerning adolescent development. In particular, four broad areas will be considered: (1) psychological, biological, and cognitive transitions; (2) central developmental tasks of adolescence; (3) primary contextual influences; and (4) prevalent types of problematic functioning that emerge during adolescence. The overarching goals of the course are to provide a solid and broad understanding of how and why adolescents develop in the manner they do, and to extend this developmental understanding into research, application, and practice.

APSY744101
Issues in Counseling Men
MAHALIK, JAMES R
Summer 2019
Examines issues related to counseling men by addressing the influence of socially constructed roles on men, their families, and broader society. Specifically, will examine how men's gender roles impact on their personal development through the life span, and contribute to their health, roles as partners and fathers, and how men approach mental health services. In the final part of the course, issues specific to counseling men from access to services to creating therapeutic environments for men are addressed.

APSY746301
Voice in Research
MEDVIDE, MARY B
Summer 2019
This course is designed for students with prior coursework in research methods. The course will critically examine how the voices of participants (particularly marginalized individuals) are represented in research and how researchers use their voices when disseminating findings to academic and lay audiences. Selected topics include: impact validity, catalytic validity, provocative generalizability, psychopolitical validity, and strong objectivity. Voice will be utilized as a unifying framework to critically analyze the underlying values and assumptions of the research process and the ability of researchers to use their work for social change.

APSY753001
Sport Psychology
MOORE, KRISTINA
Summer 2019
This graduate course explores the science and practice of sport and exercise psychology with two applied themes: sport-based youth development and sport for social justice. Course content will include individual factors such as personality, motivation, anxiety, exercise adherence, and addictive and unhealthy behaviors, as well as social and environmental factors such as group cohesion, coaching efficacy, parental influence, and character development. The course will challenge students to connect principles of sport and exercise psychology to sport-based youth development and sport for peace and social justice. Therefore, aspects of the course will also utilize a sociological/sociocultural lens. Discussions and assignments will explore practical implications for various applied psychology settings including schools, communities, and sport and recreation organizations.
APSY754901
Psychology of Trauma: Cross-Cultural and Social Justice
MATTAR, SANDRA
Summer 2019
The focus of this course is on the biopsychosocial aspects of traumatic stress. The course involves an exploration of psychological sequelae of various types of interpersonal violence, such as physical abuse, sexual assault, and political trauma across diverse populations. Assessment and clinical and community-based interventions concerning traumatic stress will be discussed with attention to cultural and linguistic diversity. The course includes a special emphasis on the examination of social justice and human rights in the context of interpersonal and collective violence.

Ethical and Legal Issues in School Counseling
MACEVOY, JULIE P
Summer 2019
Guided by the ethical codes of the American School Counselor Association (ASCA) and the American Counseling Association (ACA), a wide range of legal and ethical conflicts that school counselors encounter will be discussed. Specific topics will include school counselors' ethical and legal duties as they pertain to confidentiality, suspected child abuse/neglect, mental health referral and treatment, students at risk to themselves and/or others, students involved in the juvenile justice system, bullying, the rights of LGBTQ students, and special education. Knowledge of multicultural school counseling competencies and ethical issues that are related to social justice will be emphasized.

APSY763801
Issues in Short Term Counseling
WALSH-BLAIR, LYNN Y
Summer 2019
This course is designed to introduce students to the techniques and issues related to the practice of short-term therapy. Special attention is given to current trends in health care delivery, including the managed care environment and how to adapt various models to this environment. Students will learn a number of coherent strategies to treat a variety of presentations and populations in a short-term model. They will also gain an understanding of the complexities of providing quality mental health care in today's clinical settings.

Counseling, Developmental, and Educational Psychology Courses: Fall 2019

APSY103001
Child Growth and Development
LASKI, ELIDA V
Fall 2019
First part of a two-course sequence (APSY1030 - APSY1031) designed to introduce students to the multiple dimensions of child development, and the place of education in promoting healthy development for all children. This course acquaints students with multiple processes of child development, including physical, social, cognitive, linguistic, and emotional development from birth through adolescence. Both typical and atypical patterns of development will be examined. Students discuss and analyze classic theories, contemporary issues, and key research in child development in view of their application to educational and other applied settings.

LIANG, BELLE  
Fall 2019  
Youth are the sparks that keep society moving forward. Whereas adolescents have been stereotyped as restless, vulnerable, and self-centered, this course will take a positive youth development (PYD) lens to understanding biological, cognitive, and social transitions of this period in our global present. In contrast to deficit-oriented theories of adolescence, PYD focuses on youths' passions, power, and purposes, and providing them with the resources needed to achieve their potentials. This course will involve both research and "search"--the scholarly study of diverse paths leading from childhood to adulthood and exploration into one's own journey.

APSY203201  
Psychology of Learning  
CANNARELLA, AMANDA M  
Fall 2019
Discusses classic and contemporary theories of learning and of cognitive development and theories of the relation between learning and cognitive development. Also looks at major studies with children. Compares and contrasts theories along key dimensions on which they vary. Addresses issues and questions that include the following: Is the environment or our biological endowment and innate knowledge responsible for our learning; are babies born with a lot of knowledge or must all cognition develop from scratch; does development precede learning (readiness to learn). Also looks at role of motivational factors, and discusses practical applications of theory and research.

Applied Psychology Practicum: Pathways to Purposeful Work and Life
LEWIN-BIZAN, SELVA
Fall 2019
Provides an introduction to the applications of psychological theory within various human and community service contexts. Readings and discussion contribute to critical analyses of how social issues and social problems are situated differently due to gender, race, social class, and diversities of language, ability, sexuality, etc. Students volunteer for 8-10 hours per week at a site selected with the assistance of the instructor and meet in a weekly seminar, keep a journal of their field experience, and complete reading and written assignments that integrate theory and practice.

Credits: 03
Schedule: T 4 30-6 50
Room: CAMPION HALL 009
Satisfies Core Requirement: None
Comments: Preference will be given to Juniors and Seniors who have completed at least 12 credit hours of APHD/EDUC courses prior to the semester of Applied Psychology Practicum (APSY2152) enrollment. Sophomores and students who are minoring in Applied Psychology interested in taking the class will be considered on a case by case basis determined by fit. Interested Sophomores should complete a Field Placement Application form and meet with the Applied Psych Practicum advisor prior to being admitted to the class.

**Gender Roles**
PORTILLO, NELSON

Fall 2019

This course examines biological, social, and psychological factors that interact in contributing to men's and women's gender roles. Within the social domain, particular attention will be given to how culture affects the social construction of gender, and how factors such as racism and homophobia interact with societally prescribed norms for men and women. The second half of the class will focus on the effects of gender roles on mental and physical health, social problems like aggression, and issues in education, work, and relationships including family life.

Contemporary Issues in Applied Psychology and Human Development
LYKES, M BRINTON

Fall 2019

This advanced undergraduate seminar introduces participants to theory and research from critical, cultural, and liberation psychologies as resources for exploring the gendered and racialized politics and procedures that have shaped developmental psychological knowledge and its applications in the U.S. and beyond. We begin with narratives from all too frequently marginalized children and youth living in the majority world/global South and in minoritized communities in the U.S. to amplify their voices towards documenting how their lived experiences and meaning-making processes can inform psychological knowledge construction. Drawing on readings from liberation, cultural and critical psychological theory and research as well as indigenous knowledge(s) and human rights conventions (e.g., the Universal Declaration on the Rights of the Child), we will hone critical and analytic skills to historically situate and deconstruct developmental psychology. Discussions will include the contributions and challenges facing children and youth organizing both locally and globally to decolonize dominant assumptions about "the child" through social analysis of and resistance to the causes of their marginalization and oppression towards transformative social change.

Inside-Out: Perspectives on Crime, Corrections, and Justice
DELSESTO, MATTHEW J
Fall 2019
This Inside-Out course is an opportunity for a group of students from Boston College and the Suffolk County House of Correction to exchange ideas and perceptions about crime, corrections, and justice. It is a chance for all participants to gain a deeper understanding of the United States criminal justice system through the marriage of theoretical knowledge and practical experience achieved in meetings throughout a semester. Topics include causes and definitions of crime, criminal justice institutions, myths and realities of prison life, experiences of crime victims, theories of punishment and rehabilitation, and the relationship between crime and community. Most sessions will meet at the Suffolk County House of Correction.

Cybersecurity Policy: Privacy and Legal Requirements
POWERS, KEVIN R; FICK, KATHERINE J
Fall 2019
Course provides a comprehensive examination of the laws, regulations, and Executive Orders concerning data protection and privacy, including PCI, HIPAA, GLBA, SOX, FISMA, NIST, FISA, CFAA, and their overseas counterparts, and the roles of federal, state, and local regulators and law enforcement officials. The course also examines data protection and national security issues governed by various Federal agencies (e.g., SEC, FTC, FCC, DOE, DOJ, DHS, NSA, Treasury), including suspicious activity reporting (SAR) requirements under the Patriot Act. Additionally, the course addresses intellectual property protection, security classifications, data location requirements, audits, compliancy assessments, and individual, class-action, and shareholder derivative litigation and liability.

Culture, Community, and Change
GOODMAN, LISA A
Fall 2019
This course seeks to help students understand how culture and community influence the lives of children, families, and institutions through society's systemic policies and practices. The focus is upon human development within a multicultural society in a global world. It particularly guides understanding of inequities created by society for populations in a minority, powerless, poor, and underserved status as well as, in contrast, the role privilege plays in setting societal standards and the role of human service professionals. A major orientation of the class is learning how multi-systemic factors, impact the individual, family, and community across the life span.

Positive Youth Development
LERNER, JACQUELINE V
Fall 2019
Applied Developmental Science (ADS) uses research about human development to inform programs and policies pertinent to topics of social importance. Students will integrate readings about and class discussions of ADS theory and research with information about community-based programs. The focus of this class will be a discussion and analysis of the role of developmental research and, in particular from longitudinal research (for example, the 4-H Study of Positive Youth Development), in framing applications (programs and policies) for promoting positive development among youth. In addition to an overview of the theoretical models that are the bases of the PYD perspective, the course will present the work of researchers who have conducted applied developmental studies of adolescents and their ecological settings in order to advance understanding of how individuals and context are involved across the adolescent years in providing a basis for both healthy and problematic development. Faculty: Jacqueline Lerner

APSY645001
Cyber Investigations and Digital Forensics
SWINDON, KEVIN; RUSSELL, TIMOTHY W
Fall 2019
Course covers forensic investigation, case prioritization, and case management, and addresses procedural documentation, standards of evidence, reporting, and disclosure requirements. The digital forensic portion of the course provides an understanding as to disk imaging, file recovery, trace-back techniques, network analytics, evaluation of metadata, malware, and anti-forensics. Additionally, the course covers the out-sourcing of the investigative function, or part thereof, to third parties, and provides specific case studies, including a practical laboratory project.
APSY650001
Organizational Effectiveness: Governance, Risk Management, and Compliancy
ALDRICH, PHILIP
Fall 2019
Technical proficiency is not enough to manage business risk. Every potential or identified threat cannot be mitigated, and organizations must choose where to focus their often limited resources to support business goals. This course focuses on Governance, Risk and Compliance (GRC) as an organizational capability that all organizations require in today's complex world. Topics include understanding the business context of key stakeholders, corporate culture, and organizational risks. Students will understand how GRC capabilities such as enterprise risk management (ERM), compliance management (SOX, ISO, PCI, NIST, etc.) and policy management should work together to build a cohesive strategy within the business context. Students will learn about GRC technology and GRC program management required to support and grow GRC capabilities. Lastly, students will hear from guest lecturers about the roles and responsibilities of the Board of Directors, Risk/Audit Governance Committees, Chief Executives (Chief Information Security Officer (CISO), Chief Risk Officer (CRO), Chief Security Officer (CSO), etc.) and how they rely on GRC capabilities to support the business.

APSY741801
Applied Child Development
MORELLI, GILDA A
Fall 2019
This course will help teachers understand principles of learning and cognitive, linguistic, social, and affective development as they apply to classroom practices. Students will focus on the acquisition of strategies that enable them to assess and understand how they and the children they work with are constructors of meaning. This course is designed for individuals beginning their professional development in education who plan to work with children.

APSY741901
Applied Adolescent Development
SEIDER, SCOTT C
Fall 2019
This course is designed to provide students with an overview of the theoretical and empirical knowledge base concerning adolescent development. In particular, four broad areas will be considered: (1) psychological, biological, and cognitive transitions; (2) central developmental tasks of adolescence; (3) primary contextual influences; and (4) prevalent types of problematic functioning that emerge during adolescence. The overarching goals of the course are to provide a solid and broad understanding of how and why adolescents develop in the manner they do, and to extend this developmental understanding into research, application, and practice.

APSY744401
Theories of Counseling and Personality I
MAHALIK, JAMES R
Fall 2019
First part of a year-long sequence examining personality and counseling theories. To introduce students to major theories of personality in the field of psychology and how theories are applied in constructing counseling and psychotherapy models. Students will focus on humanistic, behavioral, and cognitive personality theories and how they become operationalized in person-centered, behavioral, and cognitive counseling models, respectively. In addition to examining the theoretical foundations, client and counselor dimensions, techniques, and the active ingredients of change for these major models of personality and counseling, students examine how socio-cultural context contributes to client presenting concerns and may be addressed in counseling.

Advanced Practicum: Human Development
MORELLI, GILDA A

Fall 2019
Students meet once a week to discuss their required field work (8-10 hours per week) and to relate their field work to psychological theories, research, and applications. Readings and discussion contribute to critical analyses of how social issues and social problems are situated differently due to gender, race, social class, and diversities of language, ability, sexuality, etc. Participants will explore strategies for translating this knowledge and experience into resources that enable them to identify future career options.

Psychology of Trauma: Cross-Cultural and Social Justice
HANEY, MARGARET A
Fall 2019
The focus of this course is on the biopsychosocial aspects of traumatic stress. The course involves an exploration of psychological sequelae of various types of interpersonal violence, such as physical abuse, sexual assault, and political trauma across diverse populations. Assessment and clinical and community-based interventions concerning traumatic stress will be discussed with attention to cultural and linguistic diversity. The course includes a special emphasis on the examination of social justice and human rights in the context of interpersonal and collective violence.

Participatory Action Research: Gender, Race, Power
LYKES, M BRINTON
Fall 2019
This course introduces students to theoretical and practical issues in the design and implementation of field-based participatory action research, including a review of theories and practices that have contributed to community-based knowledge construction and social change. Ethnographic, narrative, and oral history methodologies are additional resources for understanding and representing the individual and collective stories co-constructed through the research process. Students participate in a series of community-based collaborative workshops and/or have ongoing collaborative work in a site. We reflect collaboratively and contextually on multiple and complex constructions of gender, race, and social class in community-based research.

APSY891701
Cognitive-Affective Bases of Behavior
VASILYEVA, MARINA
Fall 2019
This course discusses theories of human development and examines empirical research on cognitive and affective processes underlying behavior. In addressing the cognitive bases of behavior, it explores key mental processes (e.g., attention, memory, problem solving) and constructs (e.g., schemas, heuristics) that have been instrumental in understanding everyday functioning. The socio-affective bases of behavior addressed in the course include emotions, temperament, and self-concept. The students in this course explore fundamental theoretical questions, such as the role of biology and environment in development, and consider practical applications of current theoretical and empirical knowledge concerning the bases of human behavior.

Credits: 03
Schedule: TH 9-11 20
Room: CAMPION HALL 124
Satisfies Core Requirement: None
Comments: Ph.D. students only. All others must get instructor approval.

APSY984201
Seminar in Counseling Theory
TUMMALA-NARRA, PRATYUSHA
Fall 2019
Deepens students' understanding of psychological theory, and facilitates a life-long journey of integrating theory with practice. Provides knowledge and understanding of traditional and contemporary theories of psychotherapy, and helps students develop a critical perspective that will enable them to evaluate the usefulness of these theories for their clinical work with clients. Class discussions cast a critical eye on the development of the discipline, including its philosophical and contextual roots, and analyze the values inherent in mainstream psychological practice. Considers strengths and limitations of each school, and uses case examples to gain expertise in applying theory to practice.

Credits: 03
Schedule: T 2-4 30
Room: CAMPION HALL 124
Satisfies Core Requirement: None
Comments: Doctoral students in Counseling Psychology only

Counseling, Developmental, and Educational Psychology Courses: Spring 2020

APSY103001
Child Growth and Development
MACEVOY, JULIE P
Spring 2020
First part of a two-course sequence (APSY1030 - APSY1031) designed to introduce students to the multiple dimensions of child development, and the place of education in promoting healthy development for all children. This course acquaints students with multiple processes of child development, including physical, social, cognitive, linguistic, and emotional development from birth through adolescence. Both typical and atypical patterns of development will be examined. Students discuss and analyze classic theories, contemporary issues, and key research in child development in view of their application to educational and other applied settings.

APSY103101
Family, School, and Society
LEWIN-BIZAN, SELVA
Spring 2020
Second part of a two-course sequence (APSY1030-APSY1031) that introduces students to the multiple dimensions of child development, and the place of education in promoting healthy development for all children. This course considers the social and cultural contexts that shape developmental and educational processes. Focuses on understanding the nature of contemporary social problems including racism, sexism, ethnic prejudice, poverty, and violence, as they affect children, families, and schooling. Emphasizes special role of education in linking community resources for an integrated approach to serving children and families.

APSY203201
Psychology of Learning
CANNARELLA, AMANDA M
Spring 2020
Discusses classic and contemporary theories of learning and of cognitive development and theories of the relation between learning and cognitive development. Also looks at major studies with children. Compares and contrasts theories along key dimensions on which they vary. Addresses issues and questions that include the following: Is the environment or our biological endowment and innate knowledge responsible for our learning; are babies born with a lot of knowledge or must all cognition develop from scratch; does development precede learning (readiness to learn). Also looks at role of motivational factors, and discusses practical applications of theory and research.

Applied Psychology Practicum: Pathways to Purposeful Work and Life
LIANG, BELLE
Spring 2020
Provides an introduction to the applications of psychological theory within various human and community service contexts. Readings and discussion contribute to critical analyses of how social issues and social problems are situated differently due to gender, race, social class, and diversities of language, ability, sexuality, etc. Students volunteer for 8-10 hours per week at a site selected with the assistance of the instructor and meet in a weekly seminar, keep a journal of their field experience, and complete reading and written assignments that integrate theory and practice.

Credits: 03
Schedule: T 4 30-6 50
Room: CAMPION HALL 009
Satisfies Core Requirement: None
Comments: Preference will be given to Juniors and Seniors who have completed at least 12 credit hours of APHD/EDUC courses prior to the semester of Applied Psychology Practicum (APSY2152) enrollment. Sophomores and students who are minoring in Applied Psychology interested in taking the class will be considered on a case by case basis determined by fit. Interested Sophomores should complete a Field Placement Application form and meet with the Applied Psych Practicum advisor prior to being admitted to the class.

**APSY324801**  
**Gender Roles**  
**MAHALIK, JAMES R**  
**Spring 2020**
This course examines biological, social, and psychological factors that interact in contributing to men's and women's gender roles. Within the social domain, particular attention will be given to how culture affects the social construction of gender, and how factors such as racism and homophobia interact with societally prescribed norms for men and women. The second half of the class will focus on the effects of gender roles on mental and physical health, social problems like aggression, and issues in education, work, and relationships including family life.

APSY331001  
Contemporary Issues in Applied Psychology and Human Development  
LYKES, M BRINTON  
Spring 2020  
This advanced undergraduate seminar introduces participants to theory and research from critical, cultural, and liberation psychologies as resources for exploring the gendered and racialized politics and procedures that have shaped developmental psychological knowledge and its applications in the U.S. and beyond. We begin with narratives from all too frequently marginalized children and youth living in the majority world/global South and in minoritized communities in the U.S. to amplify their voices towards documenting how their lived experiences and meaning-making processes can inform psychological knowledge construction. Drawing on readings from liberation, cultural and critical psychological theory and research as well as indigenous knowledge(s) and human rights conventions (e.g., the Universal Declaration on the Rights of the Child), we will hone critical and analytic skills to historically situate and deconstruct developmental psychology. Discussions will include the contributions and challenges facing children and youth organizing both locally and globally to decolonize dominant assumptions about "the child" through social analysis of and resistance to the causes of their marginalization and oppression towards transformative social change.

Inside-Out: Perspectives on Crime, Corrections, and Justice
DELSESTO, MATTHEW J
Spring 2020
This Inside-Out course is an opportunity for a group of students from Boston College and the Suffolk County House of Correction to exchange ideas and perceptions about crime, corrections, and justice. It is a chance for all participants to gain a deeper understanding of the United States criminal justice system through the marriage of theoretical knowledge and practical experience achieved in meetings throughout a semester. Topics include causes and definitions of crime, criminal justice institutions, myths and realities of prison life, experiences of crime victims, theories of punishment and rehabilitation, and the relationship between crime and community. Most sessions will meet at the Suffolk County House of Correction.

APSY405001  
Public Health Practice in the Community  
PORTILLO, NELSON  
Spring 2020  
This course puts public health into practice, with an experience of community engagement and public health activity. Students will develop a deeper understanding of applying public health principles and evidence-based practice in a community setting, locally, or globally. Themes stressed in the previous two courses will be reinforced, this time in practice, including: the importance of data and evidence, the interdisciplinary approach to solving public health problems, and a focus on at-risk populations and reducing health disparities.

Cybersecurity Policy: Privacy and Legal Requirements
POWERS, KEVIN R; FICK, KATHERINE J
Spring 2020
Course provides a comprehensive examination of the laws, regulations, and Executive Orders concerning data protection and privacy, including PCI, HIPAA, GLBA, SOX, FISMA, NIST, FISA, CFAA, and their overseas counterparts, and the roles of federal, state, and local regulators and law enforcement officials. The course also examines data protection and national security issues governed by various Federal agencies (e.g., SEC, FTC, FCC, DOE, DOJ, DHS, NSA, Treasury), including suspicious activity reporting (SAR) requirements under the Patriot Act. Additionally, the course addresses intellectual property protection, security classifications, data location requirements, audits, compliancy assessments, and individual, class-action, and shareholder derivative litigation and liability.

APSY634801
Culture, Community, and Change
PORTILLO, NELSON
Spring 2020
This course seeks to help students understand how culture and community influence the lives of children, families, and institutions through society's systemic policies and practices. The focus is upon human development within a multicultural society in a global world. It particularly guides understanding of inequities created by society for populations in a minority, powerless, poor, and underserved status as well as, in contrast, the role privilege plays in setting societal standards and the role of human service professionals. A major orientation of the class is learning how multi-systemic factors, impact the individual, family, and community across the life span.

**Organizational Effectiveness: Governance, Risk Management, and Compliancy**  
**ALDRICH, PHILIP**  
**Spring 2020**
Technical proficiency is not enough to manage business risk. Every potential or identified threat cannot be mitigated, and organizations must choose where to focus their often limited resources to support business goals. This course focuses on Governance, Risk and Compliance (GRC) as an organizational capability that all organizations require in today's complex world. Topics include understanding the business context of key stakeholders, corporate culture, and organizational risks. Students will understand how GRC capabilities such as enterprise risk management (ERM), compliance management (SOX, ISO, PCI, NIST, etc.) and policy management should work together to build a cohesive strategy within the business context. Students will learn about GRC technology and GRC program management required to support and grow GRC capabilities. Lastly, students will hear from guest lecturers about the roles and responsibilities of the Board of Directors, Risk/Audit Governance Committees, Chief Executives (Chief Information Security Officer (CISO), Chief Risk Officer (CRO), Chief Security Officer (CSO), etc.) and how they rely on GRC capabilities to support the business.

**Cybersecurity: Risk and Resiliency**

**WILKINSON, DAVID; ANTONS, KAREN E**

**Spring 2020**
Course provides a comprehensive understanding of the fundamentals of risk management and applies them to the cyber security and digital risk management environments. It addresses methodologies for comparing digital risks and deciding between acceptance, mitigation, risk transfer, and avoidance. The course compares popular methodologies for quantifying, comparing, and categorizing digital risks. It includes specific topics such as Risk and Control Self-Assessment (RCSA), Risk Appetite Statement (RAS), Risk Tolerance metrics, Three Line Defense Model, Risk Register, Third-Party Risk Management, and Factor Analysis of Information Risk (FAIR). Participants attending this course will be introduced to a broad spectrum of risk management principles, learn how to apply them in cyber security and digital environments, and immediately be able to contribute to cyber risk management using a risk management toolbox learned in this course that is applicable across a wide scope of business, government, academia, and beyond.

**APSY695501**  
**Applied Research Project For Non-Profit Organizations**  
**MISATA, KELLEY**  
**Spring 2020**
This course provides students with hands-on experience in the development, delivery, and results analysis of an information and cybersecurity assessment process for local non-profit organizations. The assessment tool that will be used is a prototype based on the NIST Cybersecurity Framework (CSF). Students will explore how NIST CSF maps to other well-known assessment frameworks including NIST SP800-53, NIST SP800-171, COBIT 5, and ISO 27000. Students will review the assessment tool and other research through the lens of the non-profit environment. Students will complete a controlled assessment of a local non-profit, which will help them develop skills in assessing, through the lens of information and cyber security, a business environment. Students will utilize these skills in bridging the gap between technical jargon and non-technical audiences by preparing and presenting their assessment findings to the executive leadership of the assessed non-profit. Students will gain a practical ability to perform an information/cybersecurity risk assessment along with the process of developing and delivering the assessment as a part of the students' learning.

Neurological and Biological Bases of Behavior  
ROWLEY, AMELIA  
Spring 2020  
Health professionals work with many clients where biological and neurological factors play a role in influencing or exacerbating psychological problems. This course will touch on a variety of topics in psychology from a biological perspective that will be helpful in clinical practice. Areas to be covered include the basic structure and function of neurons, basic neuroanatomy, cognitive functions, substance abuse, addictions, and psychopharmacology. Discussion of these topics will be approached from a biopsychosocial approach. Students are encouraged to ask questions throughout the lecture to both clarify material and to work toward application of the material to clinical work.

Applied Child Development
MORELLI, GILDA A
Spring 2020
This course will help teachers understand principles of learning and cognitive, linguistic, social, and affective development as they apply to classroom practices. Students will focus on the acquisition of strategies that enable them to assess and understand how they and the children they work with are constructors of meaning. This course is designed for individuals beginning their professional development in education who plan to work with children.

APSY741901
Applied Adolescent Development
PORTILLO, NELSON
Spring 2020
This course is designed to provide students with an overview of the theoretical and empirical knowledge base concerning adolescent development. In particular, four broad areas will be considered: (1) psychological, biological, and cognitive transitions; (2) central developmental tasks of adolescence; (3) primary contextual influences; and (4) prevalent types of problematic functioning that emerge during adolescence. The overarching goals of the course are to provide a solid and broad understanding of how and why adolescents develop in the manner they do, and to extend this developmental understanding into research, application, and practice.

APSY744501
Theories of Counseling and Personality II
TUMMALA-NARRA, PRATYUSHA
Spring 2020
Second part of a year-long sequence examining personality and counseling theories. Continues introduction to major theories of personality in the field of psychology and how those theories are applied in constructing counseling and psychotherapy models. Focuses on psychoanalytic personality and counseling models as well as critical theory as manifested in the psychology of gender and counseling models that integrate gender into working with clients. Specifically, for each model, students will examine the theoretical foundations developed in its theory of personality, relevant client and counselor dimensions, counseling techniques, and the active ingredients of change that each model uses in bringing about change.

Human Rights Interdisciplinary Seminar
KANSTROOM, DANIEL
Spring 2020
The study of human rights defies disciplinary boundaries. This seminar, sponsored by the Center for Human Rights and International Justice (CHRIJ), provides a rare space to examine human rights from an interdisciplinary perspective. The seminar brings together faculty affiliated with the Center, students from across the university, visiting scholars, and guest speakers to examine issues of human rights and international justice. The spring 2020 seminar will begin with an overview and brief historical review of human rights instruments and then explore a series of complexities for those seeking to engage in human rights scholarship, advocacy, and activism. We seek to engage critically with human rights discourse and actions as they intersect with gender, culture/ethnicity, race, class, and other categorizations. More details on the 2020 seminar at https://www.bc.edu/content/bc-web/centers/chrij/academics/seminar.html.

Credits: 03
Schedule: TH 2-4 20
Room: CAMPION HALL 016
Satisfies Core Requirement: None
Comments: Registration by permission only. The Center invites applications from students enrolled in a graduate professional degree in any of Boston College's divisions. Undergraduate seniors will be considered, space permitting. To apply, students must submit a brief statement (no longer than one page, single-spaced) to humanrights@bc.edu with the subject line "Human Rights Interdisciplinary Seminar application." Please include your Eagle ID and academic discipline in the application. The application deadline is Friday, November 5, 2019.

Prerequisites: With permission of the Instructor.

Advanced Practicum: Human Development
MORELLI, GILDA A
Spring 2020
Students meet once a week to discuss their required field work (8-10 hours per week) and to relate their field work to psychological theories, research, and applications. Readings and discussion contribute to critical analyses of how social issues and social problems are situated differently due to gender, race, social class, and diversities of language, ability, sexuality, etc. Participants will explore strategies for translating this knowledge and experience into resources that enable them to identify future career options.

APSY763801  
Issues in Short Term Counseling  
GREENSTEIN, NETTIE K  
Spring 2020  
This course is designed to introduce students to the techniques and issues related to the practice of short-term therapy. Special attention is given to current trends in health care delivery, including the managed care environment and how to adapt various models to this environment. Students will learn a number of coherent strategies to treat a variety of presentations and populations in a short-term model. They will also gain an understanding of the complexities of providing quality mental health care in today's clinical settings.

APSY764001  
Seminar in Group Counseling and Group Theory  
MATTAR, SANDRA  
Spring 2020  
This course examines both the theory and practice of group counseling. Among the theoretical positions discussed are client centered, behavioral, existential, and rational emotive. Important aspects of group process are also discussed including group leadership, group membership, establishing a group, and maintaining a group. As such the course covers therapist issues, patient selection criteria, group structuring as well as basic therapeutic techniques. The course prepares students to design structured counseling groups, to prepare group counseling materials, and to lead counseling groups of various types.

Credits: 03  
Schedule: M 4 30-6 50  
Room: GASSON HALL 206  
Satisfies Core Requirement: None  
Comments: Limited to 25 students. Sections .01 and .02 will focus across the lifespan with an emphasis on working with adults. Section .04 will focus on working with children and youth.  
Prerequisites: None

APSY774001
Topics in the Psychology of Women
GOODMAN, LISA A
Spring 2020
Explores current theory and research on the psychology of women and implications of this work for psychologists and educators. The first half of course examines and critiques major themes that have emerged in the field over the last three decades and considers ways in which the field of psychology of women has influenced conceptualizations of development, psychopathology, and intervention. The second half considers some of the psychological underpinnings of a set of social and political issues commonly faced by women. The course is designed for developmental and counseling psychology graduate students.

APSY867001
Psychometric Theory II
LI, ZHUSHAN
Spring 2020
This course continues the examination and application of the principles of item response theory and educational measurement introduced in previous courses. The first section of the course will address the use of a variety of item response theory models for dichotomous and polytomous items. The second section of the course will focus on application of the principles of item response theory to a variety of practical situations and problems commonly encountered in educational testing. In the final section of the course, overarching theoretical and practical issues are addressed and future directions in item response theory are discussed.

**APSY885101**  
**Qualitative Research Methods**  
**CASSIDY, MICHAEL**  
**Spring 2020**  
Introduces the foundations and techniques of carrying out qualitative research. Topics include philosophical underpinnings, planning for a qualitative research project, negotiating entry, ethics of conducting research, data collection and analysis, and writing/presenting qualitative research. Requires a research project involving participant observation and/or interviewing.
APSY886101
Multilevel Regression Models
O'DWYER, LAURA
Spring 2020
This course introduces students to multilevel regression modeling (aka hierarchical models or mixed effects models) for analyzing data with a nesting or hierarchical structure. We discuss the appropriate uses of multilevel regression modeling, the statistical models that underpin the approach, and how to construct models to address substantive issues. We consider a variety of types of models, including random intercept, and random slope and intercept models; models for longitudinal data; and models for discrete outcomes. We cover various issues related to the design of multilevel studies, model building and the interpretation of the output from HLM and SPSS software programs.

Credits: 03

Critical Perspectives on the Psychology of Race, Class, and Gender
HELMS, JANET E
Spring 2020
Using social and critical psychological frameworks, introduces multiple strategies for thinking culturally about select psychological constructs and processes (for example, the self, family and community relations, and socio-political oppression). Also pays particular attention to race and class as sociocultural constructs important for the critical analysis of the relationships of culture and psychology. Explores the implications of these constructs for intercultural collaboration, advocacy, and action.

ELHE714301
Mapping Campus Ministry: Culture, Person, and Strategy
O'KEEFE, THERESA A
Summer 2019
The course and conference are an opportunity for those working in Catholic college campus ministry to gain perspective on the enduring cultures in the higher education setting. Through a lens of a Catholic theological anthropology, an interdisciplinary faculty from Boston College will: offer an overview of higher education to help make sense of cultures seen on campuses; an analysis of cultural practices (e.g., hooking up, binge drinking, competition, and high anxiety); suggest a Christian vision of personhood and relationality; and create a space wherein participants can strategize how they might develop a culture of relational personhood on their own campus.

Credits: 01
Schedule: JUL 08 - JUL 11
Room: None
Satisifies Core Requirement: None
Comments: This summer 2019 Conference Week course will meet July 8-11 from 8:45-11:45 a.m. There will also be afternoon workshops (Monday-Wednesday) from 2:00-4:00 p.m. Note: Given the brevity of these summer courses, it is essential that students come prepared to engage in learning the very first day. To facilitate this, each course has 'Pre-Class' work to complete. This generally includes reading and often requires a written essay to be submitted before or on the first day of class. See the summer course webpage: www.bc.edu/bc-web/schools/stm/academics/summer-at-stm.

ELHE740301
Counseling Techniques in Higher Education
WALSH-BLAIR, LYNN Y
Summer 2019
Provides an introduction to theoretically-based counseling skills for professionals in higher education and other education and community settings. The areas of communications skills involving the use of role-playing, observation, and practice components are emphasized. Postsecondary case studies cover a range of counseling issues and are applicable to a wide range of settings involving late adolescents and adults. *Please be aware if you have consulted with the instructor at University Counseling Services. If so, please contact the instructor or ELHE Department Chair to address any concerns about your confidentiality as a UCS client or your ability to register for this course.
Credits: 03
Schedule: M W 4 15-7 15
Room: CAMPION HALL 009

ELHE740601  
Refugees and Migrants in Higher Education  
UNANGST, LISA M; DEWIT, JOHANNES W; ERGIN  
Summer 2019

Forced displacement, as calculated by UNHCR, has now exceeded 68 million people worldwide. The resulting influx of refugees to temporary and semi-permanent “host” countries has prompted higher education institutions and policy actors to innovate pathways to tertiary education. Concurrently, both “old” and “new” immigrant receiving contexts are called to facilitate the tertiary access and attainment of students from a migrant background. This population may include students of the so-called first, second, or third generations. In this intensive two-day course, we probe questions of access and experience among migrant and refugee populations as related to higher education institutions globally. We focus this conversation on the post-1945 period, beginning our dialogue with a brief discussion of global migration trends. We then begin a discussion of approaches to the support of migrant students in key world regions, highlighting comparative data, before turning to refugee student support in both “brick and mortar” as well as online settings. The final portion of the course allows for an integrative discussion of educational equity and policy innovation supporting immigrant and refugee students alike. A final paper of 2000 words will be required for course completion.

Global Learning  
LEASK, BETTY R; DEWIT, JOHANNES W  
Summer 2019
In the last decade approaches to internationalization focused on developing students’ international and intercultural skills for professional practice and citizenship primarily, or even solely, through mobility have been challenged as insufficient in the twenty-first century. Today all students require intercultural skills and international awareness in their professional and personal lives. Approaches to internationalization focused on mobility for the minority are clearly insufficient for this task. In this two-day course participants will explore the implications for policy and practice of challenges to traditional approaches to internationalization. Specifically, what does “global learning for all” mean in practice for what is taught, how it is taught, what is learned and how that learning is evaluated? Further, what do these changes mean for university leaders, for faculty and staff across the university and for their professional development? What are the opportunities and challenges in providing global learning opportunities for all students? These and other related questions will be discussed and debated in the context of latest global trends in the internationalization in higher education and future plans for internationalization, both national and institutional. A final paper of 2000 words including abstract and keywords is required for course completion.

ELHE740801
Summer Institute WES-CIHE
LEASK, BETTY R; DEWIT, JOHANNES W
Summer 2019
This annual symposium offered by World Education Services (WES) and the Center for International Higher Education (CIHE) aims to address questions around the internationalization of higher education and provide a space to discuss implications for institutions worldwide. Over the past decades, international higher education has grown exponentially. The global knowledge economy, the massive movement of students, scholars and academic programs around the world, the IT revolution and its impact on international teaching and learning, have all contributed to a strong feeling of interconnectedness and global citizenship in the higher education community. In many local communities outside of academia, however, an increasing frustration over the lack of benefits from globalization has emerged. This disconnect has resulted in rising nationalism and xenophobia, as manifested in several referenda and elections in the past two years. What does this mean for our policies and strategies for internationalization? What lessons are to be learned from these developments? What are the ethical challenges for international education in this political climate? Students have two options for earning credit: Option 1: Attend the conference and present a paper between at the conference June 19-21. Option 2: Attend the conference and prepare a 1500-2000 word paper on a topic discussed at the conference. The paper will be due two weeks after completion of the conference.

**Catholic Higher Education Administration & Leadership**  
**JAMES, MICHAEL J**  
**Summer 2019**
This course explores contemporary issues, organizational and governance structures and distinct characteristics of successful Mission leadership for administrators at Catholic Colleges and Universities focusing on effective campus policy development, strategic planning, and assessment. Students will engage research, historical literature, Church documents, lectures and group exercises. A unique component to this course is participation in the Institute for Administrators in Catholic Higher Education (IACHE) - a four-day seminar for senior administrators and leaders in Catholic higher education where internationally recognized scholars and practitioners address the challenges and opportunities that Catholic higher education faces on a daily basis.

Transforming the Field of Catholic Education
MELLEY, KRISTIN B
Summer 2019
This course explores the history, purpose, current status, and possible futures of Catholic elementary and secondary schools. Students will become conversant with the body of scholarly literature, theoretical and empirical, that defines the field of Catholic education. Though the primary focus will be on Catholic schools in the United States, the course will explore how we can learn from the experience of other religiously affiliated schools here and abroad, and from the experience of Catholic educators worldwide. Special attention will be devoted to how the Ignatian spirituality and pedagogy can be a resource for educators in Jesuit and non-Jesuit schools.

Public Policy, Politics, and Higher Education
SALKEVER, KATYA P
Summer 2019
This course will examine how policy design, policy contexts, and dynamic processes in higher education work. It focuses on several contemporary public policy issues in higher education such as unequal access to higher education, affirmative action in higher education, federal funding of scientific research, and others.
ELHE770101
Introduction to Educational Leadership and Change
MCNEIL, ALEXANDRA M
Summer 2019
Brings a foundational focus to the work of educational administration, centering on the core work of teaching and learning and exploring how that central work is supported by the cultural, technical, political, and ethical systems of the school. That work is deepened as administrators support learning as meaning making, as involving a learning and civil community, and as involving the search for excellence. Students are asked to research the realities at their work sites using the concepts and metaphors developed in the course and, through discussion and the utilization of case studies, to propose improvements to those realities.

**ELHE772601**  
**Organizational Theory and Learning**  
**CHO, VINCENT**  
**Summer 2019**  
Rather than focusing on traits of the individual leader, this course focuses on the dimensions of organizations and teams that both facilitate and complicate leadership. Examples include managing conflict, developing a shared vision, and differentiating between technical and adaptive change. Students will apply various organizational theories in order to understand group- and system-level patterns in "how groups get things done" (e.g., structures and resources, symbols and values, power and politics). Ultimately, students leave the course better able to plan and evaluate school improvement through the lenses of organizational theory.

ELHE774001
Ethics for District Leaders
SCANLAN, MARTIN K
Summer 2019
The course explores how schools are used as a vehicle of the state to de-culturalize various communities of people throughout the country's history. Students will explore how schools can more appropriately promote respect for valuing diversity as a generative source of the country's vitality and its relationship to the global village. The role of educators is not only to act ethically in the many individual situations of their daily professional lives, but more importantly to see that the institutional structures and processes of the school system are themselves reflections of a system of justice and care.

PSAP Cohort
BRUNELLE, MARYELLEN
Summer 2019
The Professional School Administrator Program (PSAP) provides an opportunity for full-time administrators to obtain their superintendent licensure and a Doctor of Education in educational leadership. The program was developed by Boston College more than three decades ago to provide an opportunity for full-time school administrators to pursue doctoral study. The Lynch School of Education at Boston College partners with the Massachusetts Association of School Superintendents (MASS) and Teachers21 to prepare future superintendents and school leaders for public, Catholic, charter, and independent schools. Boston College's Ed.D. program is an active member of the Carnegie Project on the Education Doctorate, a national effort by 55 institutions to reform and strengthen the education doctorate. The program is grounded in the core values of the Lynch School, with coursework focusing on leadership for social justice, school reform, community building, and leadership for learning. Through a cohort model that emphasizes collaborative learning and support, PSAP aims to create a powerful network of district-level leaders throughout the Commonwealth of Massachusetts and beyond

Global Perspectives on Higher Education Leadership and Management
HAZELKORN, ELLEN S
Summer 2019
This course - which is delivered fully online, but does require some synchronous participation - aims to provide students with an understanding of the multi-dimensional nature of contemporary higher education leadership and management, and to examine these issues from a comparative and international perspective. Strong emphasis is placed on the global context and appreciating how different national contexts and issues impact and affect higher education. Students learn about different issues and experiences directly from leaders, practitioners, and case studies, and are encouraged to draw upon their own experiences - as university administrators, policy makers, faculty or researchers - at the country and institutional level.

Capstone: Adulting
ARNOLD, KAREN
Fall 2019
Most college students in their early 20s feel neither fully adult nor fully competent in the tasks, responsibilities, and behaviors that are traditionally associated with grown-up life. In this class, students will take stock of their journey to adulthood so far and look ahead to what relationships, work, citizenship, and spirituality might look like in post-college life. Readings on the developmental psychology of young adulthood will be paired with popular media, exercises, and reflective writing to help students progress in their own "adulting" as they prepare to negotiate the transition out of college. Students may sign-up for this cross-listed course under UNCP Capstone or through the Lynch School ELHE department.
Higher Education in American Society
JAMES, MICHAEL J
Fall 2019
An introduction to higher education in America, this course focuses on the complex relationships between colleges and universities, and the political and social systems of society. This analysis includes a historical perspective on the evolution of American higher education, and especially the development of the contemporary university since the beginning of the twentieth century. Attention is also paid to the impact of federal and state governments on higher education; the role of research in the university; issues of accountability, autonomy, and academic freedom; the academic profession, student politics and culture; affirmative action issues; and others.

ELHE720201
Global and Comparative Systems in Higher Education
SCHENDEL, REBECCA
Fall 2019
Colleges and universities are part of an international system of post-secondary education. This course offers a perspective on the organization and structure of higher education worldwide, as well as an analysis of central issues affecting academe internationally. Examples from other countries are related to the American context. Among the topics considered are global trends in the expansion and organization of higher education, international study and its impact, the political role of universities, student activism, the role and status of the academic profession, styles of academic leadership in other countries, and others.
ELHE730101  
**Organization and Administration of Higher Education**  
**BOATMAN, ANGELA R**  
**Fall 2019**  
Focuses on how the American university is organized and governed. Examines basic elements as well as structure and process of the American university. Considers such topics as models of governance, locus of control, leadership, and strategic environments for the American university.

**Student Affairs Administration**  
**ROWAN-KENYON, HEATHER T**  
**Fall 2019**
Student affairs professionals in post-secondary institutions contribute to student learning and personal development through a variety of programs and services. This course focuses on the design of campus environments that promote student development and contribute to the academic mission of higher education. Special attention will be given to the history, philosophy, and ethical standards of the student affairs profession, and to the relation of theory to contemporary student affairs practice. In addition, the course will examine how changing forces in the demographic, social, legal, and technological environment of higher education affect fundamental issues in professional practice.

ELHE740301
Counseling Techniques in Higher Education
PISELLI, ALESSANDRO
Fall 2019
Provides an introduction to theoretically-based counseling skills for professionals in higher education and other education and community settings. The areas of communications skills involving the use of role-playing, observation, and practice components are emphasized. Postsecondary case studies cover a range of counseling issues and are applicable to a wide range of settings involving late adolescents and adults. *Please be aware if you have consulted with the instructor at University Counseling Services. If so, please contact the instructor or ELHE Department Chair to address any concerns about your confidentiality as a UCS client or your ability to register for this course.

**Religion and Higher Education**  
JAMES, MICHAEL J  
**Fall 2019**
Faith, religion, and spirituality have become topics of increasing interest for scholars and practitioners in higher education administration and student personnel development. This course explores the historical, sociological, and cultural dynamics between religion and higher education. Topics include secularism, modernity, and challenges to the integration of faith and intellectual life. Additional topics include: religious pluralism; religion in secular higher education; legal issues surrounding religion and higher education; academic freedom; constitutional matters; modernism, post-modernism, post-secularism and the tensions and opportunities that these cultural/intellectual movements pose for religion and higher learning in a modern, democratic, pluralistic society.

ELHE760301
Internationalization of Higher Education
DEWIT, JOHANNES W
Fall 2019
Higher education around the world today is increasingly affected by the forces of internationalization. Professionals working in postsecondary education in the United States and elsewhere must have a clear understanding of the range of opportunities and challenges presented by the evolution of this phenomenon. This course has two main objectives. The first is to introduce students to the central issues relevant to the international dimension of higher education in different national contexts. The second objective is to promote students' understanding of the practical implications of internationalization for their own work in higher education administration and/or policy-making contexts.

ELHE770101
Introduction to Educational Leadership and Change
JOHNSON, LAURI D
Fall 2019
Brings a foundational focus to the work of educational administration, centering on the core work of teaching and learning and exploring how that central work is supported by the cultural, technical, political, and ethical systems of the school. That work is deepened as administrators support learning as meaning making, as involving a learning and civil community, and as involving the search for excellence. Students are asked to research the realities at their work sites using the concepts and metaphors developed in the course and, through discussion and the utilization of case studies, to propose improvements to those realities.

ELHE770401
Ethics and Equity in Education
MILLER, ANDREW F
Fall 2019
The course explores how schools are used as a vehicle of the state to de-culturalize various communities of people throughout the country's history. Students will explore how schools can more appropriately promote respect for valuing diversity as a generative source of the country's vitality and its relationship to the global village. The role of educators is not only to act ethically in the many individual situations of their daily professional lives, but more importantly to see that the institutional structures and processes of the school system are themselves reflections of a system of justice and care.

ELHE770801
Instructional Supervision
NOLIN, ANNA
Fall 2019
Introduces students to many of the contested issues in the field of supervision, such as the relationship between supervision and teacher development, teacher empowerment, teacher alienation, learning theories, school effectiveness, school restructuring, curriculum development, and scientific management. Supervision will be viewed also as a moral, community-nested, artistic, motivating, and collaborative activity. Will stress the need for a restructuring of supervision as an institutional process.
ELHE771101
Using Data and Evidence for School Improvements
CHO, VINCENT
Fall 2019
This course prepares leaders to manage initiatives around continuous improvement and data-informed inquiry. On one hand, students will develop basic research skills that will contribute to evidence-based school improvement, including action research. On the other hand, students will explore the landscape of supports and barriers to using data and other evidence effectively in schools. In particular, students will explore the role of leadership in: the appropriate use and design of assessments; fostering a positive cycle of inquiry among educators; and the effective use of information systems and other technologies.

ELHE772601
Organizational Theory and Learning
GEISER, JILL S
Fall 2019
Rather than focusing on traits of the individual leader, this course focuses on the dimensions of organizations and teams that both facilitate and complicate leadership. Examples include managing conflict, developing a shared vision, and differentiating between technical and adaptive change. Students will apply various organizational theories in order to understand group- and system-level patterns in "how groups get things done" (e.g., structures and resources, symbols and values, power and politics). Ultimately, students leave the course better able to plan and evaluate school improvement through the lenses of organizational theory.

ELHE772701
Family and Community Engagement
PATTERSON, LESLIE M
Fall 2019
This course will explore the theory and practice of family-school-community relationships with a particular focus on the role of school leaders in enacting organizational models, educational programs, and political strategies designed to increase authentic parent and community participation in schools and other educational organizations. Topics include community schools/full service schools, parent involvement models, increasing the involvement of diverse families, grassroots organizing for community development, after school/OST (Out of School Time) programs, and school board-community relations.

Global Perspectives on Teaching and Learning in Higher Education
LEASK, BETTY R
Fall 2019
Whether you are an administrator, policy maker, faculty, or researcher, all professionals in roles related to higher education are educators. To be a positive agent in the education venture is to ensure learning that is meaningful, empowering, and just--for students, colleagues, and external stakeholders. In this course--we strive to understand the contours of learning, teaching, and curriculum with a critical lens and from an international perspective, through an exploration of key trends and relevant issues in higher education institutions and systems around the world.

Applying Research in International Higher Education  
LEASK, BETTY R  
Fall 2019  
This course--provides a framework for a "real world" experience for students interested in international higher education, in combination with an in-depth research project. This combination of practical experience with research gives students an appreciation for the ways that the daily work of different kinds of organizations--higher education institutions, individual programs and offices, policymaking organizations, governmental units, and professional associations--are framed by questions and concerns that require the ability to undertake a significant exploration of information and ideas in order to inform practice.

Practicum in School Principalship  
LIBANO, JOSE A  
Fall 2019  
A 500-hour, field-based experience designed to enable the student to develop the competencies required to be an effective assistant principal/principal. The practicum is supervised jointly by a University representative and a cooperating practitioner. The student is expected to engage in a variety of experiences defined in the state standards for certification and to provide leadership to a major administrative project. The student will maintain a reflective journal of experiences and develop a portfolio that demonstrates the learning and insights gained during the practicum.

Educational Leadership and Higher Education Courses: Fall 2020

ELHE229501
Spirituality, Religion, and College Student Experience
JAMES, MICHAEL J
Spring 2020
Faith, religion, and spirituality have become topics of increasing interest for scholars and practitioners in higher education and student personnel development. This semester-long, upper-level, undergraduate course explores the historic, developmental, sociological, and philosophical dimensions of the college student experience at the intersection of faith life, spirituality, and academic culture. This course approaches themes and readings from an ecumenical and interreligious set of perspectives. Students will engage several major texts as well as articles from scholarly journals and narratives from institutional models that attempt to integrate faith life and spirituality into the prevailing academic and student development culture.

Educational Leadership in Higher Education
UNANGST, LISA M
Spring 2020
This course will be designed to provide undergraduate students with an overview of numerous leadership concepts and theories in order to impart an understanding of how leadership is expressed within organizational contexts, specifically higher educational settings. Furthermore, students will also develop an in-depth understanding of their own personal leadership aptitudes and preferences, providing them with the knowledge and tools to further their leadership abilities as they pursue their careers within specific educational and community settings.

ELHE721001
El Encuentro: Immigration and the Response of Catholic Educators
WYTTENBACH, MELODIE
Spring 2020
A Boston College report states that approximately 60% of Catholics under the age of 18 are Hispanic. This statistic challenges educators to question, how are our Catholic schools responding to demographic changes and the challenge of educating the next generation of American Catholics? Embracing Ignatian pedagogical designs this course aims to provide Catholic school teachers and leaders an opportunity to encounter immigrant children and families through an immersive educational experience. Participants will come together for prayer, reflection, lectures and discussion prior to and following an immersive experience with the Columban Mission Center (February 17-21, 2019) on the U.S.-Mexico border in El Paso, Texas and Juarez, Mexico. Participants will gather two times prior to the border experience and three times afterward, with final gathering being a symposium on Immigration and the response of Catholic educators. This symposium, which will be the culminating authentic assessment for the course, will be hosted and facilitated by participants for Catholic school educators interested in engaging in further dialogue on this topic. The Roche Center for Catholic Education at Boston College will sponsor the one credit course, including the immersion experience, for students enrolled in the program. The course will be capped at 16 students. For more information please email Dr. Melodie Wyttenbach at wyttenba@bc.edu

ELHE730301
Financial Management in Higher Education
ZONA, JOHN J
Spring 2020
This course strives to provide a comprehensive introduction to modern day financial
management theories and techniques in higher education. A specific focus will be placed on real
life context and practical application across a broad range of specialized topics including:
donowment management, fundraising, budgeting, long range planning, debt management,
financial statement analysis, cash management, resource allocation and risk management.
These topics will be examined through the lens of the recent economic downturn, which has
structurally changed the financial and economic landscape of higher education. The tradeoff
between risk and return will serve as a common framework for class discussions.

College Student Experience: Access, Choice, and Persistence
ROWAN-KENYON, HEATHER T
Spring 2020
This course explores the ways in which the higher education community has addressed three
basic questions: Who goes to college? What sorts of experiences do students have in college?
And, as a consequence of their experiences, who do they become by graduation? The course will
familiarize students with the nature and characteristics of the college student population in
American higher education, the variety of research methods used to study college students, and
some of the many effects and outcomes of college student experiences.

ELHE760301
Internationalization of Higher Education
DEWIT, JOHANNES W
Spring 2020
Higher education around the world today is increasingly affected by the forces of internationalization. Professionals working in postsecondary education in the United States and elsewhere must have a clear understanding of the range of opportunities and challenges presented by the evolution of this phenomenon. This course has two main objectives. The first is to introduce students to the central issues relevant to the international dimension of higher education in different national contexts. The second objective is to promote students' understanding of the practical implications of internationalization for their own work in higher education administration and/or policy-making contexts

ELHE770101
Introduction to Educational Leadership and Change
GOUGH, BRIDGET A
Spring 2020
Brings a foundational focus to the work of educational administration, centering on the core work of teaching and learning and exploring how that central work is supported by the cultural, technical, political, and ethical systems of the school. That work is deepened as administrators support learning as meaning making, as involving a learning and civil community, and as involving the search for excellence. Students are asked to research the realities at their work sites using the concepts and metaphors developed in the course and, through discussion and the utilization of case studies, to propose improvements to those realities.

MCEWEN, LORI B
Spring 2020
This course provides an overview of educational policy as it plays out in local practice. Throughout the course, students will develop an understanding of foundational approaches to policy making, interpretation, and implementation as it plays out in education settings. In addition to providing an overview to the field of educational policy, the course investigates the relationship between policy and practice through attention to: (1) policymaking including policy mechanisms, framing, and policy actors; (2) processes of policy interpretation and implementation; and (3) policy as practice and the role of local leaders in developing policy. Throughout the course, we will examine how context shapes the relationship between policy and practice by focusing on sociocultural, organizational, and political influences. The course integrates critical perspectives as well as foundational concepts in our study of policy, highlighting how systems of oppression and power dynamics influence the policy process. During the course, students will have opportunities to apply theories and concepts to their own contexts, engaging in policy analysis and creation through hands-on assignments. The course approaches educational policy as incorporating both formal and informal policies, positioning practitioners as interpreters and implementers of local, state, and federal policies, as well as simultaneously designing and creating policies themselves.

ELHE770401  
Ethics and Equity in Education  
MILLER, ANDREW F  
Spring 2020
The course explores how schools are used as a vehicle of the state to de-culturalize various communities of people throughout the country's history. Students will explore how schools can more appropriately promote respect for valuing diversity as a generative source of the country's vitality and its relationship to the global village. The role of educators is not only to act ethically in the many individual situations of their daily professional lives, but more importantly to see that the institutional structures and processes of the school system are themselves reflections of a system of justice and care.

**ELHE770801**  
**Instructional Supervision**  
**EKWELUM, NNABUGWU C**  
**Spring 2020**  
Introduces students to many of the contested issues in the field of supervision, such as the relationship between supervision and teacher development, teacher empowerment, teacher alienation, learning theories, school effectiveness, school restructuring, curriculum development, and scientific management. Supervision will be viewed also as a moral, community-nested, artistic, motivating, and collaborative activity. Will stress the need for a restructuring of supervision as an institutional process.

ELHE771101
Using Data and Evidence for School Improvements
GRAVES, KENNETH E
Spring 2020
This course prepares leaders to manage initiatives around continuous improvement and data-informed inquiry. On one hand, students will develop basic research skills that will contribute to evidence-based school improvement, including action research. On the other hand, students will explore the landscape of supports and barriers to using data and other evidence effectively in schools. In particular, students will explore the role of leadership in: the appropriate use and design of assessments; fostering a positive cycle of inquiry among educators; and the effective use of information systems and other technologies.

ELHE772601
Organizational Theory and Learning
GEISER, JILL S
Spring 2020
Rather than focusing on traits of the individual leader, this course focuses on the dimensions of organizations and teams that both facilitate and complicate leadership. Examples include managing conflict, developing a shared vision, and differentiating between technical and adaptive change. Students will apply various organizational theories in order to understand group- and system-level patterns in "how groups get things done" (e.g., structures and resources, symbols and values, power and politics). Ultimately, students leave the course better able to plan and evaluate school improvement through the lenses of organizational theory.

ELHE772701
Family and Community Engagement
PATTERSON, LESLIE M
Spring 2020
This course will explore the theory and practice of family-school-community relationships with a particular focus on the role of school leaders in enacting organizational models, educational programs, and political strategies designed to increase authentic parent and community participation in schools and other educational organizations. Topics include community schools/full service schools, parent involvement models, increasing the involvement of diverse families, grassroots organizing for community development, after school/OST (Out of School Time) programs, and school board-community relations.

ELHE776001  
Seminar on Education Reform  
SCANLAN, MARTIN K  
Spring 2020  
This interdisciplinary seminar addresses the role of law in education reform and the relationship between law and social science in efforts to promote educational attainment in the nation's elementary and secondary schools. The primary focus will be contemporary education reform issues, including educator quality, access to meaningful opportunity to learn, curriculum control, and student, teacher, administrator, and parental rights. The focus of the course will be inquiry on the role of law in school reform, the limits of law-based education reform, and the consequences of statutory requirements for scientific evidence-based approaches to education programs.

Global Perspectives on Teaching and Learning in Higher Education
SCANLAN, MARTIN K
Spring 2020
Whether you are an administrator, policy maker, faculty, or researcher, all professionals in roles related to higher education are educators. To be a positive agent in the education venture is to ensure learning that is meaningful, empowering, and just--for students, colleagues, and external stakeholders. In this course--we strive to understand the contours of learning, teaching, and curriculum with a critical lens and from an international perspective, through an exploration of key trends and relevant issues in higher education institutions and systems around the world.

Dissertation Direction
SCANLAN, MARTIN K
Spring 2020
All advanced doctoral students are required to register for six credit hours of dissertation related course work, at least three of which are 988. The other three are usually the Dissertation Seminar for the student's area of concentration. Students are expected to work on their dissertation at least 20 hours per week.

Experience, Reflection, Action Courses: Fall 2019

ERAL110001
First Year Experience, Reflection, and Action
WHITCAVITCH-DEVOY, JULIA
Fall 2019
First Year Experience, Reflection, and Action is a seminar designed to help first year students negotiate the rigors and dilemmas of college life and become more critical citizens. Readings, discussions, and panel presentations will address moral-cognitive decision-making, vocational discernment in the context of Ignatian Pedagogy, local, state, and national trends in Applied Psychology and Human Development and Teacher Education and expose students to the Lynch School and university faculty and student research. Participants will read and critique current research about college student issues and learn to self-reflect critically in order to make more informed choices and decisions.

LREN710101
Introduction to Learning Engineering
KOLODNER, JANET L
Fall 2019
This course introduces the content and skills needed to thrive as systematic designers of learning experiences, environments, and technologies. It focuses on three themes: (i) how people learn--cognitive processes involved in learning and social, cultural, physical, affective, and other influences on those processes; (ii) how to fostering or promote learning--what we know about the help learners need to engage and participate at their best and ultimately to become more knowledgeable and capable; and (iii) designing for learners and analyzing those designs--how to apply what you are learning to the design and analysis of learning experiences, environments, and technologies.

Credits: 03
Schedule: W 1 30-4

The Design Studio is the venue for learning how to practice Learning Engineering. Students will learn practices of design thinking and design decision making in the context of two design projects, each focused on designing learning experiences for a targeted population of learners that foster learning of targeted learning objectives. The Design Studio will be richly-facilitated and orchestrated as a Cognitive Apprenticeship. Students will work in pairs and also spend time as a Knowledge Building Community sharing what they are designing and the complexities they are facing, providing advice to each other, and reflecting on and articulating what they are learning about designing for learners.

LREN712101
Reflective Seminar 1
KOLODNER, JANET L
Fall 2019
This one-credit seminar is designed to help students make sense of and synthesize across the new concepts, skills, and practices they are learning as participants in the M.A. in Learning Engineering Program. Focus will be on how to be designers of engaging and effective learning experiences. Students will also reflect on their experiences to identify their strengths and what brings them joy, to imagine the special expertise they'd like to develop, and to identify the kinds of responsibilities they'd enjoy taking on in the workplace.

Credits: 01

LREN712201
Reflective Seminar 2
None
Fall 2019
This one-credit seminar is designed to help students make sense of and synthesize across the new concepts, skills, and practices they are learning as participants in the MA in Learning Engineering Program. Focus will be on knowing targeted learners and the physical, social, and cultural systems they are part of and keeping those criteria and constraints in mind while designing for learning. Students will continue to reflect on their experiences to identify their strengths and what brings them joy, to imagine the special expertise they'd like to develop, and to identify the kinds of responsibilities they'd enjoy taking on in the workplace.
LREN720101
Games for Learning
SIDMAN, JASON G
Fall 2019
What can we learn from games about engaging learners and fostering learning? How can games be developed specifically to promote learning? What kinds of things can be learned from games? What does it take to foster learning from games? Some educational games that have been designed in research labs can inform about the answers to these questions. As well, there are many computer games around that can teach us about sustaining engagement, particularly important for understanding deeply and mastering capabilities. In this module, students will engage with and read about a variety of games for learning and, hopefully, develop imagination about what different kinds of games and ways of interacting with games afford with respect to learning and come to recognize aspects of game design that are relevant to designing learning experiences. Your project will be the conceptual design of a game to achieve a set of learning goals of your choice.

LREN720201
Modeling and Simulation for Learning
ZHANG, HELEN Z
Fall 2019
Simulations and computational modeling are popular educational activities that can serve as venues for engaging learners in observations and explorations of invisible processes and phenomena, collecting data and evidence, and constructing and iteratively understanding of mechanisms and processes. This module will engage students in exploring interesting questions such as "What are simulation activities good for?", "What about modeling activities?", "What are the affordances of each and when should each be used?", "What makes some simulations better for some situations and learner groups than others?", and "How can you design modeling/simulations to support desirable interactions?".

LREN730101
Principles of Fostering Learning
LASKI, ELIDA V
Fall 2019
This course will introduce students to what the field of psychology has to say about how humans learn. This includes examining the basic cognitive processes involved in learning, and considering how these processes interact with task demands and organization. The course is organized around key principles about learning and cognition which have emerged from empirical work in the fields of cognitive and developmental psychology. Its focus will be to identify practices that can be used to foster learning in different settings and interactions, including approaches such as spaced practice and group discussions.

LREN730201
Cognitive Task Analysis
None
Fall 2019
This course will introduce students to the key conceptual and methodological elements of Cognitive Task Analysis, which can be used to identify the knowledge and skills required for the performance of a complex task. The focus will be on the specification of covert cognitive processes and the integration of those with overt behaviors into a model of task performance. Students will learn knowledge elicitation techniques, such as verbal think aloud protocol, used to uncover the cognitive structures and processes involved in expert performance of a task. Students also will practice generating cognitive models/knowledge representations of tasks relevant to their design area.

Immersive and Augmented Environments for Learning

LACHAPELLE, CATHY P

Spring 2020

In this module, students will engage with a variety of immersive and augmented environments for learning, reading relevant papers, exploring exemplary projects, and applying ideas to the functional design, adaptation, personalization, and use of learning technology. The module includes a ?Design Concept? assignment, where students work in small teams to apply what they are learning to some learning design. Students will work to curate a ?knowledge base? of exemplary projects, including examples both from current practice and from the research literature.

ERME746001
Interpretation and Evaluation of Research
ESCALANTE, DIANNE L
Summer 2019
This course will improve a students' understanding of the empirical research literature in education and psychology. It concentrates on developing the conceptual foundations of empirical research and the practical analytic skills needed by a competent reader and user of research articles. Topics address purpose statements, hypotheses, sampling techniques, sample sizes and power, instrument development, internal and external validity, and typical quantitative research designs. Exercises emphasize the critical evaluation of published research. Each student will develop a research proposal.

Measurement, Evaluation, Statistics, and Assessment Courses: Fall 2019

MESA106001
Classroom Assessment
BROWN, NATHANIEL
Fall 2019
This course emphasizes that assessment entails more than quizzes, unit tests, and standardized multiple-choice measures of student learning. The course explores how assessment is a key component of all aspects of the instructional process including organizing and creating a classroom culture, planning lessons, delivering instruction, and examining how students have grown as result of instruction. The validity of inferences and decisions made based on assessment information is examined within each phase of instruction. The goal is to show students that assessment is an integral part of teaching that should not be separated from daily classroom practices.

---

**MESA746201**  
**Assessment and Test Construction**  
**RUSSELL, MICHAEL K**  

**Fall 2019**

This course addresses the major issues of educational assessment, with emphasis on the characteristics, administration, scoring, and interpretation of both formal and informal assessments, including but not limited to tests of achievement. All forms of assessment are examined including observation, portfolios, performance tasks, and paper-and-pencil tests, including standardized tests. Basic techniques of test construction, item writing, and analysis are included. Standardized norm-referenced tests and statewide testing programs are also examined.

MESA746601
Evaluation Practice and Methods
GATES, EMILY F
Fall 2019
This course introduces the process of conducting evaluations from beginning to end. Evaluation is a form of applied social science research focused on systematically assessing the value—merit, worth, or significance—of interventions. The evaluation process includes defining the intervention to be evaluated and its context; framing the evaluation purposes, questions, and quality criteria; designing the evaluation; collecting and analyzing data; synthesizing findings; and disseminating and supporting use. Students will have opportunities to learn and teach each other about a variety of concepts, methods, and tools that can be used at different points in the process. Taking an interdisciplinary approach to evaluation, this course draws on scholarly articles and examples from multiple fields including education, public health, social services, and international development and addressing evaluation at various scales including program, organizational, and systems-level evaluations. By the end of the course, students will gain knowledge of how to carry out evaluations; apply this knowledge to develop evaluation plans for real-world interventions; and gain skills to critique existing evaluations supporting their development as informed, critical consumers of evaluations.

Credits: 03
Schedule: M 4 30-6 50
Room: CAMPION HALL 010

MESA746801
Introductory Statistics
MONCALEANO, SEBASTIAN
Fall 2019
An introduction to descriptive and inferential statistics. In particular, students will learn descriptive statistics, graphical and numerical representation of information; measures of location, dispersion, position, and dependence; the normal distribution; and exploratory data analysis. Also, students will be introduced to inferential statistics, point and interval estimation, tests of statistical hypotheses, sampling distribution of t, and inferences involving one or more populations, as well as ordinary least squares regression and chi-square analyses. Provides computer instruction on PC and Mac platforms and in the SPSS statistical package.

**MESA866701**  
**General Linear Models**  
**LI, ZHUSHAN**  
**Fall 2019**  
Addresses the construction, interpretation, and application of linear statistical models. Specifically, lectures and computer exercises cover ordinary least squares regression models; matrix algebra operations; parameter estimation techniques; missing data options; power transformations; exploratory versus confirmatory model building; linear-model diagnostics, sources of multicollinearity; diagnostic residual analysis techniques; variance partitioning procedures; dummy, effect, and orthogonal coding procedures; and an introduction to structural equation modeling.

MESA866901
Psychometrics I: Classical Test Theory and Rasch Models
LUDLOW, LARRY H
Fall 2019
Presents a study of theoretical concepts, statistical models, and practical applications in educational and psychological measurement. General topics include the history of measurement, Thurstone and Guttman scales, classical true-score theory, and item response theory. Specific topics include principles of Rasch measurement, parameter estimation procedures, fit statistics, item banking, and computer adaptive testing.

Credits: 03

MESA886401
Survey Methods in Educational and Social Research
HOOPER, MARTIN J
Fall 2019
This course is designed to familiarize students with the strategies, techniques, tactics, and issues in the development and administration of survey instruments. It will emphasize theoretical, measurement and practical considerations in the development of attitudinal instruments. The development and analysis of data resulting from several types of measurement scales will be covered.

MESA994101
Dissertation Seminar in Educational Research, Measurement, and Evaluation
LUDLOW, LARRY H
Fall 2019
This two-semester seminar is designed to assist doctoral candidates in the preparation of a formal doctoral dissertation proposal. All aspects of dissertation development will be discussed (e.g., problem development, human subjects review, final defense). Students will develop and present a series of draft proposals for faculty and student reaction. Depending on the circumstances of the student, an acceptable pre-proposal (Intent) or full dissertation proposal is required for completion of the course.

MESA746001
Interpretation and Evaluation of Research
REYNOLDS, KATHERINE A
Spring 2020
This course will improve a students' understanding of the empirical research literature in education and psychology. It concentrates on developing the conceptual foundations of empirical research and the practical analytic skills needed by a competent reader and user of research articles. Topics address purpose statements, hypotheses, sampling techniques, sample sizes and power, instrument development, internal and external validity, and typical quantitative research designs. Exercises emphasize the critical evaluation of published research. Each student will develop a research proposal.
Credits: 03
Schedule: T 4 30-6 50
Room: CAMPION HALL 200
Satisfies Core Requirement: None
Comments: Mental Health students must take APSY7460.12. Other section do not meet licensing requirements for mental health students.
Prerequisites: None

MESA746201
Assessment and Test Construction
RUSSELL, MICHAEL K
Spring 2020
This course addresses the major issues of educational assessment, with emphasis on the characteristics, administration, scoring, and interpretation of both formal and informal assessments, including but not limited to tests of achievement. All forms of assessment are examined including observation, portfolios, performance tasks, and paper-and-pencil tests, including standardized tests. Basic techniques of test construction, item writing, and analysis are included. Standardized norm-referenced tests and statewide testing programs are also examined.

MESA746701
Evaluation Theory and Research
GATES, EMILY F
Spring 2020
Evaluation as a professional practice and academic discipline is characterized by variation in perspectives on what evaluation is and how it should be practiced. This course introduces students to evaluation theory, key debates, and research on evaluation in order to develop students as critical, responsible evaluators and evaluation scholars. Evaluation theories are models, approaches, or frameworks that prescribe how and why one should conduct evaluation in a particular way. Debates in the evaluation field center on the following issues: role of evaluation in society, particularly around advancing equity, social justice, and human rights; the relationship between theory and practice; role of stakeholder and public interest values in evaluation and the theory and practice of valuing; what constitutes credible evidence and, particularly evidence of outcomes and impact; influence of politics on evaluation and evaluation on policy-making; what are and should be evaluators? professional competencies and responsibilities; and future of evaluation. Research on evaluation involves conceptual and empirical investigations of theories, methods, and practices in order to better understand and improve evaluation. By the end of the course, students will be familiar with evaluation theories, debates, and research on evaluation and, ideally, strengthen their perspective and sense of responsibility within the evaluation field.

MESA746801
Introductory Statistics
MONCALEANO, SEBASTIAN
Spring 2020
An introduction to descriptive and inferential statistics. In particular, students will learn descriptive statistics, graphical and numerical representation of information; measures of location, dispersion, position, and dependence; the normal distribution; and exploratory data analysis. Also, students will be introduced to inferential statistics, point and interval estimation, tests of statistical hypotheses, sampling distribution of t, and inferences involving one or more populations, as well as ordinary least squares regression and chi-square analyses. Provides computer instruction on PC and Mac platforms and in the SPSS statistical package.

MESA756102  
Evaluation and Public Policy  
BRAUN, HENRY I  
Spring 2020  
The course will examine some issues that arise in educational accountability. The purpose is to develop a deeper understanding of the policy issues and a critical appreciation of the relevant methodological strategies. Topics include the establishment and use of state-specific performance standards under NCLB and the quantification of the relative rigor of those standards; the evaluation of school or teacher effectiveness using so-called value-added models; and the policy evaluation of school reform efforts (such as charter schools) using data from large-scale cross-sectional surveys. The latter two topics both involve causal inferences from observational studies.

MESA756501
Large-Scale Assessment: Methods and Practice
MULLIS, INA V
Spring 2020
Examines large scale assessment procedures internationally (TIMSS and PIRLS) and nationally (NAEP and NCLB). Considers technical, operational, and reporting procedures in view of requirements for reliability and validity as well as resource constraints and political issues. Uses examples from the TIMSS and PIRLS international assessments in mathematics, science, and reading to illustrate procedures for instrument development, sampling, data collection, analysis, IRT scaling, and reporting results.

MESA866701
General Linear Models
LUDLOW, LARRY H
Spring 2020
Addresses the construction, interpretation, and application of linear statistical models. Specifically, lectures and computer exercises cover ordinary least squares regression models; matrix algebra operations; parameter estimation techniques; missing data options; power transformations; exploratory versus confirmatory model building; linear-model diagnostics, sources of multicollinearity; diagnostic residual analysis techniques; variance partitioning procedures; dummy, effect, and orthogonal coding procedures; and an introduction to structural equation modeling.
MESA866801
Multivariate Statistical Analysis
LI, ZHUSHAN
Spring 2020
Provides lectures, examples, and student analyses that address multiple group discriminant analysis, classification procedures, principal components and common factor analysis, and multivariate analysis of variance.

MESA867001
Psychometrics II: Item Response Theory
LI, ZHUSHAN
Spring 2020
This course will present an advanced study of theoretical concepts, statistical models, and practical applications in educational and psychological measurement. Topics include item response theory, methods for estimating latent trait and item parameters, models for polytomously scored items, explanatory item response models, and multidimensional item response models. Some practical applications of IRT: DIF assessment, computerized adaptive testing, test equating, linking, scaling.

**MESA872401**  
**Technology-Enhanced Assessment**  
**RUSSELL, MICHAEL K**  
**Spring 2020**  
Computers are widely available in schools and are increasingly used for large-scale testing programs. This course examines cutting-edge applications of computer-based technologies to the technology of testing and assessment. Among the topics explored are validity issues specific to computer-based testing; accessibility, universal design, and computer-based testing; computer adaptive testing; simulation-based and multimedia tests; and computer scoring of writing. The course encourages students to explore ways in which computer-based technologies can be used to enhance assessment and solve challenges to current approaches to student assessment.

MESA886101
Multilevel Regression Models
O'DWYER, LAURA
Spring 2020
This course introduces students to multilevel regression modeling (aka hierarchical models or mixed effects models) for analyzing data with a nesting or hierarchical structure. We discuss the appropriate uses of multilevel regression modeling, the statistical models that underpin the approach, and how to construct models to address substantive issues. We consider a variety of types of models, including random intercept, and random slope and intercept models; models for longitudinal data; and models for discrete outcomes. We cover various issues related to the design of multilevel studies, model building and the interpretation of the output from HLM and SPSS software programs.

Dissertation Seminar in Educational Research, Measurement, and Evaluation  
LUDLOW, LARRY H  
Spring 2020  
This two-semester seminar is designed to assist doctoral candidates in the preparation of a formal doctoral dissertation proposal. All aspects of dissertation development will be discussed (e.g., problem development, human subjects review, final defense). Students will develop and present a series of draft proposals for faculty and student reaction. Depending on the circumstances of the student, an acceptable pre-proposal (Intent) or full dissertation proposal is required for completion of the course.

Teacher Education and Curriculum and Instruction Courses: Summer 2019

EDUC330801
Bilingualism in Schools and Communities
ALVARADO, JASMINE N

Summer 2019
The goal of this course is to prepare students to participate in increasingly multilingual and multicultural environments in order to better serve bilingual students, families, and communities. Building on theory, research, and practice from the fields of bilingualism, second language acquisition, and education, students will learn about the process of language and literacy development in children and adolescents who are exposed to more than one language, and the social and cultural contexts in which this development occurs. Through the use of case studies and school profiles, students will deepen their understanding of issues in bilingualism and bilingual education.

Credits: 03
Schedule: T TH 5 30-8 45

EDUC730101
Teaching, Curriculum, and Learning Environments: Global Perspectives
None
Summer 2019
In an increasingly interdependent world well prepared educators will move beyond nationalist perspectives to deeply examine global perspectives about how to be an effective teacher, what constitutes a valued and engaging curriculum, and how learning occurs across environments. This course will challenge students to move beyond what is familiar to consider and perhaps adopt new perspectives that will benefit the learners they serve

EDUC 730301
Curriculum Theories, Practice, and Design
None
Summer 2019

The overarching objective for Curriculum Theories and Practice is to help course participants develop and clarify their philosophy of education, in particular, their beliefs regarding the purposes and processes of effective and equitable curricular organization. To do so, the class explores varied ways of conceptualizing a school curriculum, drawing on insights from major curriculum designers, both past and present, U.S. and international. So students appreciate the ever-evolving nature of effective teaching practices and related school curricula, they will assess their own experiences with educational and institutional change processes writ large. Aiming to help course participants to thrive in the current, volatile educational and political climate, students will consider various approaches to multicultural education, anti-racist education, and inclusion practices that aim to transform the curriculum, attending to the needs of all students and overtly promoting equitable outcomes. In doing so, students will enact alternative strategies for assessment that provide multiple and authentic measures of student learning. Ultimately the course intends to help students consider how school curricula can be structured to promote social justice.

EDUC 730401
Family and Community Engagement
SCANLAN, MARTIN K
Summer 2019
The purpose of this course is to introduce participants to theories, practices, and empirical research regarding family and community engagement in schools. The focus is on how school leaders--formal and informal--enact organizational models, educational programs, and political strategies that increase authentic relationships with parents and community members. Topics of study will include community schools/full service schools, parent involvement models, involvement of diverse families, grassroots organizing for community development, afterschool and community-based education, and school board-community relations. Direct participation in inquiry into school-community activities conducted on-site in schools and neighborhoods will be requirement of the course.

**EDUC730701**  
**Perspectives on Disabilities and Special Education Practices**  
**NANNEMANN, ALLISON C**  
**Summer 2019**

In the modern world there are many differing perspectives about the significance of disabilities. In this course we examine both "medical model" perspectives on the origin and nature of disabilities, as rooted in the scientific method, and post-modern critical perspectives. Cultural influences on how those perspectives are valued will also be considered. Differing approaches to special education practice--both service delivery systems and interventions--will be critically compared to the thought traditions. The ethics and social value of special education will also be considered.

Supervision in Action
COWNIE, CHARLES T
Summer 2019
This course is designed as an introduction to research-based clinical supervision models in teacher education. Hands-on application-in action includes observational strategies, collaborative assessment logs, and summative reports as resources for ongoing data collection. Course participants acquire and then apply the Massachusetts Department of Education Pre-service Performance Assessment rubric for coaching and evaluating student teachers, integrating the BC Teacher Education themes that emphasize teaching for equity and social justice. This course is restricted to cooperating teachers in BC Partnership Schools who are supervising a BC student teacher in a full-time practica and to new BC Clinical Faculty.

**Instruction of Students with Special Needs and Diverse Learners**
LAPINSKI, SCOTT D

Summer 2019

This course focuses on the education of students with disabilities and other learners from culturally and linguistically diverse backgrounds. The goal of the course is to promote access to the general curriculum for all students through participation in standards-based reform. Universal Design for Learning (UDL) provides the theoretical framework for this course. Through an examination of historical milestones, landmark legislation, systems for classification, approaches to intervention, and the daily life experiences of diverse learners, students acquire knowledge about diversity and the resources, services, and supports available for creating a more just society through education.

Teaching Writing
JONES, RENATA L
Summer 2019
In this course, developing and sustaining a writing curriculum for teachers in K-12 will be practiced and discussed, including a variety of pedagogical approaches to developing a sustained and enjoyable classroom writing culture. The primary emphasis will be on learning through doing--students will write in a variety of genres themselves (poetry, short fiction, memoir, reader response essay) with group discussion on process and implementation in their individual classrooms and based on their own students' needs. Grade is based on a portfolio of finished writing and a strategic plan for implementing writing protocols and ideas in the classroom.

Teaching Narrative Writing to K-8 Students
MACDONALD, ELIZABETH A
Summer 2019
This is a project-based course where groups of participants will collaborate to develop a writing unit in a genre appropriate for their grade level. Using a genre-based pedagogy informed by systemic functional linguistics, participants will learn what and how to teach non-fiction narratives (Personal and procedural recounts, autobiographies, biographies, empathetic autobiographies, and historical recounts) and fictional narratives. Features of the genres demanded in elementary and middle schools will be learned and practiced. The strong emphasis on language development distinguishes this approach from others currently used in schools. The approach to teaching guides teachers in ways of apprenticing students to writing that builds confidence and success.

**Foundations of Bilingual and Dual Language Education**

**PROCTOR, CHARLES P**

**Summer 2019**

Students will be able to walk into any school that offers a bilingual program and/or serves bilingual pupils and identify the type of program in place depending on the specifics of different contexts. In service of this goal, students will explore the following characteristics of language education programs in the U.S specifically: history, models (and key attribute of program types), political contexts, and legal foundations. Students will understand dual language models, design, and implementation, specifically: competencies, knowledge, and skills of dual language teachers, features of instruction and assessment, and implementation.

Teacher Education and Curriculum and Instruction Courses: Fall 2019

EDUC103001
Child Growth and Development
LASKI, ELIDA V
Fall 2019
First part of a two-course sequence (APSY1030 - APSY1031) designed to introduce students to the multiple dimensions of child development, and the place of education in promoting healthy development for all children. This course acquaints students with multiple processes of child development, including physical, social, cognitive, linguistic, and emotional development from birth through adolescence. Both typical and atypical patterns of development will be examined. Students discuss and analyze classic theories, contemporary issues, and key research in child development in view of their application to educational and other applied settings.

First Year Experience, Reflection, and Action  
WHITCAVITCH-DEVOY, JULIA  
Fall 2019
First Year Experience, Reflection, and Action is a seminar designed to help first year students negotiate the rigors and dilemmas of college life and become more critical citizens. Readings, discussions, and panel presentations will address moral-cognitive decision-making, vocational discernment in the context of Ignatian Pedagogy, local, state, and national trends in Applied Psychology and Human Development and Teacher Education and expose students to the Lynch School and university faculty and student research. Participants will read and critique current research about college student issues and learn to self-reflect critically in order to make more informed choices and decisions.

**Learning and Curriculum in the Elementary School**

**HOMZA, ANNE E**

**Fall 2019**

Introduces students to the profession of education and roles of teachers. Provides understanding of contexts in which education is delivered in multicultural settings and opportunity to gain knowledge and experience about interpersonal, observational, and organization skills that underlie teaching. Faculty and students work together throughout course to examine students' commitment to and readiness for career as a teacher. Introduces essentials of curriculum, teaching, and managing classrooms at elementary (K-6) level and links them to major learning theories for children. Views curriculum, instruction, management, and learning theory from perspectives of current school reform movement and social/cultural changes affecting elementary classrooms and schools.

Teaching Language Arts
BRISK, MARIA E
Fall 2019
Focuses on the teaching and learning of language arts in the elementary grades. Students will be exposed to theoretical approaches to both oral and written language development in addition to teaching methods that support development. In the fall semester, content and approaches related to teaching in English/Spanish bilingual programs will be included. Students will have the opportunity to apply their learning through practical lesson development, and implementation in connection to their pre-practicum placement. Student diversity and its implications for teaching language arts will be an integral theme. Students will draw on their experiences in their prepractica to apply and reflect on learning as they mediate theory and practice.

Teaching Reading
DUNN, LORI A

Fall 2019
This course is designed to offer preservice teachers theoretical and practical knowledge and experience into teaching literacy to elementary age students. Emphasis will be placed on the social, political, and cultural context of reading instruction. Students will gain understanding of major theoretical perspectives on literacy development and the myriad strategies for teaching reading in a variety of contexts. Students will also be expected to spend time in a context where they can gain experiences in providing reading instruction in a relevant and productive way.

Teaching the Social Sciences and the Arts
MORALES, MELITA M

Fall 2019
Provides prospective elementary teachers with opportunities to develop social studies and arts curricula for elementary age students and consider a variety of instructional approaches appropriate for this age group. Students will learn how to develop the skills of an historian and select and integrate knowledge appropriate for diverse learners. Curricular topics include evaluating context-appropriate materials, developing critical thinking, using and critiquing primary sources in the classroom, and developing varied learning activities through the use of multiple media.

Teaching Mathematics and Technology
ALBERT, LILLIE
Fall 2019
This course presents methods and materials useful in teaching mathematics to elementary school children. It analyzes mathematics content and pedagogy from both conceptual and practical perspectives. Emphasis is placed on the interconnections among theory, procedures, and applications that form the framework on which specific mathematics lessons are constructed. It examines the elementary mathematics curriculum through technology resources, addressing the different ways in which technology can be used. Activities include laboratory experiences with concrete models and technology as well as inquiry into the role of the teacher in the school community in the epoch of teaching for social justice.

Teaching About the Natural World
MCNEILL, KATHERINE L
Fall 2019
This course is designed to increase confidence, enthusiasm, and knowledge for teaching elementary science. Science can be an essential part of an elementary classroom not only to achieve key science learning goals, but also as a means to engage and motivate students as well as support literacy and mathematics learning. An overarching focus of the course is on the idea that science is a "practice" that includes specific ways of reasoning, communicating, and acting. The course is also designed in partnership with the afterschool program at Gardner Pilot Academy in BPS. For eight weeks during the course, undergraduates will work with elementary students to teach them science and to reflect on how to design more effective science lessons.

Educational Strategies: Children with Special Needs
SCANLON, DAVID
Fall 2019
This course provides instruction to pre-service teachers interested in learning more about instruction, curriculum, and teaching for children with special needs, with a framework highlighting important educational issues pertinent to their professional development and the realities of teaching. The course emphasizes the complexities of teaching children with individual learning profiles in inclusive settings. Students will examine educational readings and instructional practices through the lenses of curriculum, author voice, and academic tension. Class participants will develop a comprehensive understanding of the historical, legal, and political developments influencing current general and special education practices.

Secondary Curriculum and Instruction
FRIEDMAN, AUDREY A
Fall 2019
Provides an introduction to secondary teaching practices as well as an overview of the history and structure of secondary schools. Topics include curriculum theory and development, interdisciplinary teaching, teaching students with diverse learning abilities, application of educational research, assessment, national standards, and alternative models for secondary schools. Focuses on the role of the teacher in secondary education reform. Taught on-site and in conjunction with secondary education teacher candidates' first prepracticum experience, this course offers a unique opportunity for a cohort experience in which preservice teachers work closely with each other, high school faculty, the instructor, and urban students.

Bilingualism in Schools and Communities
PAEZ, MARIELA M
Fall 2019
The goal of this course is to prepare students to participate in increasingly multilingual and multicultural environments in order to better serve bilingual students, families, and communities. Building on theory, research, and practice from the fields of bilingualism, second language acquisition, and education, students will learn about the process of language and literacy development in children and adolescents who are exposed to more than one language, and the social and cultural contexts in which this development occurs. Through the use of case studies and school profiles, students will deepen their understanding of issues in bilingualism and bilingual education.

Inclusive Education Field Observation
SCANLON, DAVID
Fall 2019
Open to undergraduate majors in the Morrissey College of Arts and Sciences, the Inclusive Education Minor is offered in the LSOE. The minor is designed to (1) introduce Morrissey College of Arts and Sciences students to the world of disabilities and special education with an emphasis on special education practice, and (2) enhance the ability of future professionals to meet the needs of increasingly diverse school populations. Classes address the nature and implications of disabilities and effective practices in special education. The minor consists of six-courses and a zero-credit field observation. Appropriate for those considering a career or further studies in education.

EDUC630001
Secondary/Middle School Science Methods
CHERBOW, KEVIN F
Fall 2019
Provides an active, instructional environment for science learning that enables each student to construct knowledge (skill, affective, and cognitive) that, in turn, allows them to be prepared to construct instructional environments meeting the needs of tomorrow's secondary and middle school students. Activities reflect on current research: reform movements of AAAS, NRC, NSTA, inclusive practices, interactions with experienced teachers, firsthand experience with instructional technology, and review and development of curriculum and related instructional materials.

EDUC630201
Secondary and Middle School English Methods
DECELLES, DANIEL G
Fall 2019
Develops knowledge, skills, and dispositions essential for competent understanding, development, and delivery of effective English Language Arts instruction in a diverse classroom. Addresses educational and literary theory, pedagogy, assessment, evaluation, content, curriculum, media literacy, and sensitivity to and respect for adolescents who come from a variety of cultures, abilities, interests, and needs. Provides knowledge of local, state, and national standards and strategies to help students reach those standards. Encourages risk-taking, experimentation, flexibility, application of theory, and innovation. Good teaching demands open-mindedness, critical reading, writing, and thinking, honest reflection, high expectations, ongoing revision, and commitment to social justice.

EDUC630301
Foreign Language Pedagogy
JAVEL, ANDREA M
Fall 2019
An introduction to foreign-language pedagogy and its basis in the theory of second-language acquisition, linguistic analysis, and psycholinguistic research. A discussion of language teaching and methods within the framework of those fields.
The course offers reviews of the principal literature on second-language acquisition and linguistic theory but focuses on their practical application in the classroom.
EDUC630401
Secondary and Middle School Mathematics Methods
ALBERT, LILLIE
Fall 2019
Provides prospective teachers with a repertoire of pedagogical methods, approaches, and strategies for teaching mathematics to middle school and high school students. Considers the teaching of mathematics and the use of technology from both the theoretical and practical perspectives. Includes topics regarding performance-based assessment and culturally relevant practices for teaching mathematics in academically diverse classrooms.

Assessment of Students with Low Incidence and Multiple Disabilities
BRUCE, SUSAN
Fall 2019
This course addresses formal and informal assessment of students with intensive needs. Students will become familiar with assessments driven by both the developmental and functional paradigms. All assessment activities will be founded on the principle that appropriate assessment goes beyond the student to include consideration of the student's multiple contexts. This course also addresses the IEP, the legal mandates behind the process, and the collaborative role of the teacher, as part of the educational team, during the assessment and report writing processes.

Teaching and Learning Strategies for Inclusive Secondary Educators
DEPT
Fall 2019
Designed primarily for elementary and secondary education teacher candidates and practicing educators, this course helps them develop an initial repertoire of skills for teaching students with educational disabilities. The primary emphasis of this course is on the education of students with mild/moderate disabilities in inclusive classrooms. Participants will learn to develop comprehensive instructional plans fully inclusive of students with educational disabilities, utilize an IEP to guide instruction, develop accommodations and modifications appropriate to students and the curriculum, design individual, small, and large group instructions, and evaluate various service delivery options for educating students with special needs.

EDUC713101
Social Justice in Jesuit Contexts
CASALINI, CRISTIANO
Fall 2019
The Social Apostolate of the Society of Jesus has developed in a variety of ways over the centuries according the diverse contexts where Jesuits have operated as agents of "social justice." This class offers students both a broad and deep understanding of: (1) How the Society of Jesus developed its mission in support of creating a "preferential option for the poor"; (2) How the Society understood its role to promote liberation from oppression in diverse social environments; (3) What kind of services have been activated by the Society of Jesus in order to fulfill its core values of "the service of faith and promotion of justice"; and (4) How social justice is pursued through pedagogy and practices by Jesuit and Ignatian schools today, given the significant involvement of the Jesuits with formal education on a global scale. The course is designed to foster deep and meaningful conversation among students. It will include individual and collective readings and video-conferences with leaders and teachers of Jesuit schools around the world, deepening students' knowledge of current practices and stimulating dialogue.

Observing Designs In Use
None
Fall 2019
In this course, students will learn theory and method relevant to examining learning and instruction as it occurs in educational contexts (broadly considered). Students will be supported in collecting and analyzing data related to learning and instruction that is relevant to their interests, with the goal of understanding the interactional implications of various learning designs and how designs might be refined.
EDUC723101
Accessible and Inclusive Design
None
Fall 2019
This survey course focuses on practical considerations regarding inclusive and accessible design. The focus is around guiding principles and key content that learners and designers can apply to their particular area of design. Particular focus is paid to understanding the functional barriers that individuals with disabilities might encounter, how these barriers can be addressed proactively, and why retrofitting designs can be costly and ineffective. After a general introduction to some of the guiding ideas behind inclusion and accessibility, both Universal Design for Learning (UDL) and accessibility are discussed to provide practical paths towards design that is ultimately more effective for all learners.

**EDUC730201**  
**Models and Theories of Instructional Design**  
**JACKSON, RICHARD**  
**Fall 2019**  
Now well into the twenty-first century, schools struggle with the challenge of offering a high quality education for all learners regardless of race, family status, national origin, language, or ability. Increasingly, curriculum is accessed digitally and student work is generated and exhibited using technology tools. The once familiar artifacts of classrooms are rapidly giving way to radically new forms of teaching and learning. Within this context of change, this course reviews the evolution of theories of learning and instruction and then critically examines a range of contemporary models and theoretical frameworks. Learning activities in the course will allow participants to develop their own personalized framework for planning and implementing instruction.

EDUC730301
Curriculum Theories, Practice, and Design
None
Fall 2019
The overarching objective for Curriculum Theories and Practice is to help course participants develop and clarify their philosophy of education, in particular, their beliefs regarding the purposes and processes of effective and equitable curricular organization. To do so, the class explores varied ways of conceptualizing a school curriculum, drawing on insights from major curriculum designers, both past and present, U.S. and international. So students appreciate the ever-evolving nature of effective teaching practices and related school curricula, they will assess their own experiences with educational and institutional change processes writ large. Aiming to help course participants to thrive in the current, volatile educational and political climate, students will consider various approaches to multicultural education, anti-racist education, and inclusion practices that aim to transform the curriculum, attending to the needs of all students and overtly promoting equitable outcomes. In doing so, students will enact alternative strategies for assessment that provide multiple and authentic measures of student learning. Ultimately the course intends to help students consider how school curricula can be structured to promote social justice.

EDUC730701
Perspectives on Disabilities and Special Education Practices
SCANLON, DAVID
Fall 2019
In the modern world there are many differing perspectives about the significance of disabilities. In this course we examine both "medical model" perspectives on the origin and nature of disabilities, as rooted in the scientific method, and post-modern critical perspectives. Cultural influences on how those perspectives are valued will also be considered. Differing approaches to special education practice--both service delivery systems and interventions--will be critically compared to the thought traditions. The ethics and social value of special education will also be considered.

**Designing Learning Environments in a Social and Digital World**

**VALDEZ, KEISHA**

**Fall 2019**

In today's society, what counts as knowledge and expertise has changed considering the global shifts in interconnectivity, social interactions, and technology. Previous models of learning focused on knowledge as a collection of facts within curriculum and learning environments helping individuals obtain those facts. However, today technology can enable all individuals to quickly obtain facts. Instead, expertise requires deep knowledge in which ideas are applied across multiple contexts in particular contexts with people and tools. These shifts in knowledge as well as technological advances have significant implications for how we design curriculum and other learning environments. In this course, we will examine different learning environments as well as various aspects within those environments. For example, we will examine curriculum to evaluate the scaffolds to support student learning, analyze digital learning environments for professional development to support teacher learning and critique video of classroom discourse to examine student interactions and community development. In this course, we will consider the environment both as conceptualized by its designers (the design) and as it is experienced by participants as learning interactions unfold in particular settings (the enactment) to evaluate the effectiveness of those learning environments.
EDUC731001
Action Research I
BRUCE, SUSAN
Fall 2019
Students will learn how to conduct action research, including the development of a positionality statement, writing a researchable question, conducting literature review, identifying relevant data sources (including the use of an educator journal on their own learning), and developing an intervention. Students will review examples of action research studies conducted in and outside their country or origin

EDUC743001
Advanced Graduate Inquiry Seminar
DAVIS, CHERYL J
Fall 2019
This course is designed for the Lynch School Fifth Year Program students who have successfully completed a licensure program at Boston College. It is designed to build on teacher candidates' experiences with inquiry as stance and expand their skills in conducting classroom-based research that leads to pupil achievement and teaching for social justice in their new license area. The hybrid course is online with one class meeting. A case-study approach is used to help teacher candidates mediate the relationships of theory and practice, pose questions for inquiry, learn through reflection and discussion, learn from experiences with students and colleagues, construct critical perspectives about teaching, learning, and schooling, and to improve teaching and learning. The second part of this sequence is EDUC7432 which is taken in conjunction with full-time student teaching (EDUC7420).

Graduate Inquiry Seminar: Two
CUDA, JOSEPHINE
Fall 2019
The primary goal of this capstone seminar is to initiate teacher candidates into the practice of
teacher research or collaborative inquiry for action. Collaborative Inquiry for Action is an
ongoing, collaborative process of systematic and self-critical inquiry by educators about their
own schools and classrooms in order to increase teachers' knowledge, improve students' learning, and contribute to social justice. This final project will be presented at a roundtable presentation at the end of the semester and also satisfies the M.Ed., MAT, MST Comprehensive Examination in Education.

Instruction of Students with Special Needs and Diverse Learners
LAPINSKI, SCOTT D
Fall 2019
This course focuses on the education of students with disabilities and other learners from culturally and linguistically diverse backgrounds. The goal of the course is to promote access to the general curriculum for all students through participation in standards-based reform. Universal Design for Learning (UDL) provides the theoretical framework for this course. Through an examination of historical milestones, landmark legislation, systems for classification, approaches to intervention, and the daily life experiences of diverse learners, students acquire knowledge about diversity and the resources, services, and supports available for creating a more just society through education.

Teaching Reading  
DUNN, LORI A  
Fall 2019  
Offers teacher candidates skills for teaching reading to school age children. Students will gain understanding of reading through a historical, political, theoretical, and practical lens. They will understand the delivery of instruction by learning a balanced approach to teaching reading. They will gain familiarity of how children learn to read by partaking in observations, assessments, and instruction with a school age child. Students will learn a variety of ways to meet the needs of linguistically and culturally diverse learners. They will recognize reading difficulties and learn ways to differentiate instruction for such readers.

Teaching Language Arts
MERLINO, MICHELE M
Fall 2019
Examines the development of written and spoken language and methods of instruction for oral and written language from the preschool years through early adolescence. Students learn strategies for identifying children’s areas of strength and weakness and to plan instruction. Addresses the needs of children from non-English speaking homes. Expects students to spend at least 16 hours distributed across at least eight sessions in a classroom or other setting where they can work with one or more children.

Teaching Narrative Writing to K-8 Students
BRISK, MARIA E
Fall 2019
This is a project-based course where groups of participants will collaborate to develop a writing unit in a genre appropriate for their grade level. Using a genre-based pedagogy informed by systemic functional linguistics, participants will learn what and how to teach non-fiction narratives (Personal and procedural recounts, autobiographies, biographies, empathetic autobiographies, and historical recounts) and fictional narratives. Features of the genres demanded in elementary and middle schools will be learned and practiced. The strong emphasis on language development distinguishes this approach from others currently used in schools. The approach to teaching guides teachers in ways of apprenticing students to writing that builds confidence and success.

Foundations of Bilingual and Dual Language Education
PROCTOR, CHARLES P
Fall 2019
Students will be able to walk into any school that offers a bilingual program and/or serves bilingual pupils and identify the type of program in place depending on the specifics of different contexts. In service of this goal, students will explore the following characteristics of language education programs in the U.S specifically: history, models (and key attribute of program types), political contexts, and legal foundations. Students will understand dual language models, design, and implementation, specifically: competencies, knowledge, and skills of dual language teachers, features of instruction and assessment, and implementation.

Special Topics: Democratic Education
HIGGINS, CHRISTOPHER R
Fall 2019
Is education, as John Dewey claimed, "the fundamental method of social progress and reform"? How does this square with the fact that schools are tasked with the job of initiating the young into existing practices, languages, norms, and beliefs? What is the role of education in a pluralistic democratic republic? What becomes of this civic function in a society driven by a greed and riven by structural inequalities? Is there a public for the public schools? We will consider these questions and more through close reading and discussion of classic and contemporary works in social educational theory. The course presumes no prior background in educational philosophy or social theory, only a willingness to wrestle with primary texts and an interest in thinking together about the perils and possibilities of democratic education and public life

Participatory Action Research: Gender, Race, Power
LYKES, M BRINTON
Fall 2019
This course introduces students to theoretical and practical issues in the design and implementation of field-based participatory action research, including a review of theories and practices that have contributed to community-based knowledge construction and social change. Ethnographic, narrative, and oral history methodologies are additional resources for understanding and representing the individual and collective stories co-constructed through the research process. Students participate in a series of community-based collaborative workshops and/or have ongoing collaborative work in a site. We reflect collaboratively and contextually on multiple and complex constructions of gender, race, and social class in community-based research.

EDUC970901
Research on Teaching
COCHRAN-SMITH, MARILYN
Fall 2019
Introduce Ph.D. students to conceptual and empirical scholarship about teaching and teacher education as well as to contrasting paradigms and methodological approaches upon which this literature is based. Helps students become aware of major substantive areas in the field of research on teaching/teacher education, develop critical perspectives and questions on contrasting paradigms, and raise questions about implications of this research for curriculum and instruction, policy and practice, and teacher education/professional development. Considers issues related to epistemology, methodology, and ethics.

Schedule: T 4 30-6 50
EDUC973701
Contemp Issues: Digital Literacies
WARGO, JON M
Fall 2019
Located at the axis of technology and cultural studies, this seminar explores how contemporary literacy and learning are changing with the advent of new digital networks and communicative resources. Together, we will investigate how children's and youths' digital literacies--their culturally and socially situated meaning making practices mediated by digital tools--emerge in relation to constantly shifting technologies. We will explore how these are then constructed, reconstructed, negotiated, and embodied in multiple semiotic systems across everyday contexts. With a particular focus on power and culture, this course highlights how digital literacies are situated in spaces of learning and how these socio-cultural understandings may illuminate issues of access, surveillance, identity, and privilege. As a community, we will engage, discuss, tinker, challenge, and construct theories and research about how meaning making happens in and around the contexts of 'the digital.' We will bring together our varied experiences and histories of participation to ask questions such as: How are audiences and authorship shifting in light of newly mobile, global, participatory, distributed, and collaborative practices? How are social relationships, discourses, and identities constructed and performed in and through digital literacies? How is knowledge constructed by, for, and with children and young people in digital contexts? Who is able to participate in digital contexts and in what ways?

Educational Change  
SHIRLEY, DENNIS L  
Fall 2019  
This course focuses on the study of change theories and approaches, their application in educational reform, and their impact on teaching and learning. Students examine the history of educational change and consider the forces for and against change in schools and other educational organizations. Each student is expected to conduct a research study of an educational change initiative.

Qualitative Research Methods  
MCQUILLAN, PATRICK J  
Fall 2019  
Introduces the foundations and techniques of carrying out qualitative research. Topics include philosophical underpinnings, planning for a qualitative research project, negotiating entry, ethics of conducting research, data collection and analysis, and writing/presenting qualitative research. Requires a research project involving participant observation and/or interviewing.

EDUC986401
Advanced Qualitative Research
WARGO, JON M
Fall 2019
Building upon the foundation concepts of qualitative research and initial exploration of an introductory course in qualitative methodologies, this course explores the theoretical, methodological, and analytic implications of conducting qualitative research from differing theoretical perspectives. Key readings include texts on social theory, qualitative methodologies, and exemplar qualitative research from various social scientific fields. Students will distinguish between methodology and methods, analyze data, and produce either a report for a specified audience or a research manuscript for possible submission to an educational research journal.

Teacher Education and Curriculum and Instruction Courses: Spring 2020

EDUC103001
Child Growth and Development
MACEVOY, JULIE P
Spring 2020
First part of a two-course sequence (APSY1030 - APSY1031) designed to introduce students to the multiple dimensions of child development, and the place of education in promoting healthy development for all children. This course acquaints students with multiple processes of child development, including physical, social, cognitive, linguistic, and emotional development from birth through adolescence. Both typical and atypical patterns of development will be examined. Students discuss and analyze classic theories, contemporary issues, and key research in child development in view of their application to educational and other applied settings.

Spring 2020
Second part of a two-course sequence (APSY1030-APSY1031) that introduces students to the multiple dimensions of child development, and the place of education in promoting healthy development for all children. This course considers the social and cultural contexts that shape developmental and educational processes. Focuses on understanding the nature of contemporary social problems including racism, sexism, ethnic prejudice, poverty, and violence, as they affect children, families, and schooling. Emphasizes special role of education in linking community resources for an integrated approach to serving children and families.

EDUC112801
Computer Applications for Educators
KINDER, T SCOTT
Spring 2020
The technology which is often available in contemporary classrooms affords opportunities for reaching more students in relevant ways. This course covers fundamental knowledge and skills needed by teachers who wish to use that technology and affords students opportunities to develop their expertise in mainstream and emerging educational technologies. This course includes presentations on hardware (e.g., computers, scanners, digital cameras, video cameras) and software (e.g., interactive, web, productivity) and discussion of how these integrate into classroom instruction. Substantial hands-on project time is provided.

EDUC203901
Learning and Curriculum in the Elementary School
HOMZA, ANNE E
Spring 2020
Introduces students to the profession of education and roles of teachers. Provides understanding of contexts in which education is delivered in multicultural settings and opportunity to gain knowledge and experience about interpersonal, observational, and organization skills that underlie teaching. Faculty and students work together throughout course to examine students' commitment to and readiness for career as a teacher. Introduces essentials of curriculum, teaching, and managing classrooms at elementary (K-6) level and links them to major learning theories for children. Views curriculum, instruction, management, and learning theory from perspectives of current school reform movement and social/cultural changes affecting elementary classrooms and schools.
EDUC210101
Teaching Language Arts
NGUYEN, MINH H
Spring 2020
Focuses on the teaching and learning of language arts in the elementary grades. Students will be exposed to theoretical approaches to both oral and written language development in addition to teaching methods that support development. In the fall semester, content and approaches related to teaching in English/Spanish bilingual programs will be included. Students will have the opportunity to apply their learning through practical lesson development, and implementation in connection to their pre-practicum placement. Student diversity and its implications for teaching language arts will be an integral theme. Students will draw on their experiences in their prepractica to apply and reflect on learning as they mediate theory and practice.

HOMAN, ELIZABETH C

Spring 2020

This course is designed to offer preservice teachers theoretical and practical knowledge and experience into teaching literacy to elementary age students. Emphasis will be placed on the social, political, and cultural context of reading instruction. Students will gain understanding of major theoretical perspectives on literacy development and the myriad strategies for teaching reading in a variety of contexts. Students will also be expected to spend time in a context where they can gain experiences in providing reading instruction in a relevant and productive way.

Teaching the Social Sciences and the Arts
MORALES, MELITA M

Spring 2020

Provides prospective elementary teachers with opportunities to develop social studies and arts curricula for elementary age students and consider a variety of instructional approaches appropriate for this age group. Students will learn how to develop the skills of an historian and select and integrate knowledge appropriate for diverse learners. Curricular topics include evaluating context-appropriate materials, developing critical thinking, using and critiquing primary sources in the classroom, and developing varied learning activities through the use of multiple media.

EDUC210801
Teaching Mathematics and Technology
ALBERT, LILLIE
Spring 2020
This course presents methods and materials useful in teaching mathematics to elementary school children. It analyzes mathematics content and pedagogy from both conceptual and practical perspectives. Emphasis is placed on the interconnections among theory, procedures, and applications that form the framework on which specific mathematics lessons are constructed. It examines the elementary mathematics curriculum through technology resources, addressing the different ways in which technology can be used. Activities include laboratory experiences with concrete models and technology as well as inquiry into the role of the teacher in the school community in the epoch of teaching for social justice.

EDUC210901
Teaching About the Natural World
LOWELL, BENJAMIN R
Spring 2020
This course is designed to increase confidence, enthusiasm, and knowledge for teaching elementary science. Science can be an essential part of an elementary classroom not only to achieve key science learning goals, but also as a means to engage and motivate students as well as support literacy and mathematics learning. An overarching focus of the course is on the idea that science is a "practice" that includes specific ways of reasoning, communicating, and acting. The course is also designed in partnership with the afterschool program at Gardner Pilot Academy in BPS. For eight weeks during the course, undergraduates will work with elementary students to teach them science and to reflect on how to design more effective science lessons.

Secondary Curriculum and Instruction
DECELLES, DANIEL G
Spring 2020
Provides an introduction to secondary teaching practices as well as an overview of the history and structure of secondary schools. Topics include curriculum theory and development, interdisciplinary teaching, teaching students with diverse learning abilities, application of educational research, assessment, national standards, and alternative models for secondary schools. Focuses on the role of the teacher in secondary education reform. Taught on-site and in conjunction with secondary education teacher candidates’ first prepracticum experience, this course offers a unique opportunity for a cohort experience in which preservice teachers work closely with each other, high school faculty, the instructor, and urban students.

EDUC330801
Bilingualism in Schools and Communities
PAEZ, MARIELA M
Spring 2020
The goal of this course is to prepare students to participate in increasingly multilingual and multicultural environments in order to better serve bilingual students, families, and communities. Building on theory, research, and practice from the fields of bilingualism, second language acquisition, and education, students will learn about the process of language and literacy development in children and adolescents who are exposed to more than one language, and the social and cultural contexts in which this development occurs. Through the use of case studies and school profiles, students will deepen their understanding of issues in bilingualism and bilingual education.

**Inclusive Education Field Observation**  
**SCANLON, DAVID**  
**Spring 2020**  
Open to undergraduate majors in the Morrissey College of Arts and Sciences, the Inclusive Education Minor is offered in the LSOE. The minor is designed to (1) introduce Morrissey College of Arts and Sciences students to the world of disabilities and special education with an emphasis on special education practice, and (2) enhance the ability of future professionals to meet the needs of increasingly diverse school populations. Classes address the nature and implications of disabilities and effective practices in special education. The minor consists of six-courses and a zero-credit field observation. Appropriate for those considering a career or further studies in education.

Teachers and Educational Reform
MCQUILLAN, PATRICK J
Spring 2020
Issues of school reform are constantly in the media—high-stakes testing, charter schools, the Common Core. At the heart of these reforms are teachers and the work they do with students in their classrooms. In this course, students look in-depth at the nature of teaching and learning in schools and classrooms. In particular, the course attends to issues and practices linked to current efforts at educational reform, approaching these matters through active inquiry and experiential enactment of such practices. Focused reflection is also a central component of this class.

Developmentally Appropriate Curriculum in Early Childhood Education
CRISTELLO, KAREN M
Spring 2020
This course focuses on the development and implementation of curriculum in early education. The Massachusetts Guidelines for Preschool Learning Experiences and the national standards for developmentally appropriate practices will be utilized throughout the semester. This course will highlight each of the curriculum domains (language/literacy, mathematics, science and technology, social studies, health, and the arts) while demonstrating how to build an integrated curriculum in an early childhood classroom. The importance and value of play in the early years will be emphasized, and strategies will be shared to help teacher candidates document student learning.

Ed Implications/Sensory, Motor, and Health Impairments
MILLER, THOMAS
Spring 2020
This course addresses the impact of physical disabilities on learning. Emphasis is placed on the educational needs of children with cerebral palsy, visual impairment, or hearing loss in combination with intellectual disability. Basic anatomy of the eye and ear are covered along with the common causes of vision and hearing loss. This course prepares teachers to perform functional vision and hearing evaluations and to translate those findings into appropriate classroom accommodations and adaptations. Many children with disabilities have unmet sensory integration needs that influence their behavior and subsequent readiness to learn.

Teaching and Learning Strategies for Moderate Special Needs
SCANLON, DAVID
Spring 2020
This course is intended to help prospective and experienced special education teachers and other educators a repertoire of skills for teaching students with mild/moderate (high incidence) educational disabilities. Participants will accomplish this goal by making connections among their knowledge of disabilities, special education policy and practices, assessments, education theory, and teaching methods. Students will learn how to develop, implement, and monitor individualized education programs, implement research-based effective intervention practices, and collaborate with others to meet the needs of special education students in inclusive and other educational settings. Successful students will have familiarity and competency with a variety of special education procedures and teaching approaches and specific practices. Appropriate for both elementary and secondary level education. Class sessions will routinely include time to practice skills being learned.

Spring 2020
Explores the role of emerging technologies in the context of schools. Course is theoretically grounded in the Project-Based Learning literature. Assignments are hands-on, with emphasis placed on producing tangible artifacts that will serve a practical need. Specifically, students will develop PowerPoint presentations to evaluate educational software and web-based curricular materials. Also, each student will develop a website featuring his or her teaching portfolio. Course appropriate for all computer skill levels.

Teaching Mathematical Problem Solving in Grades 4-12
ALBERT, LILLIE
Spring 2020
Examines complex issues, trends, and research regarding alternative approaches for teaching mathematical problem solving. Topics include the nature of mathematical inquiry; models for collaborative grouping; methods and materials for cultivating problem solving, reasoning, and communication processes; methods of assessing mathematical problem solving; and the impact of Vygotskian Psychology on the teaching and learning of mathematical problem solving.

EDUC715801
Jesuit Pedagogy
CASALINI, CRISTIANO
Spring 2020
This three-credit, graduate-level online course examines the distinctiveness of the Jesuits' approaches to teaching and of their philosophy of education that have propelled their schools to unprecedented success over the centuries. One key to the unprecedented success of Jesuit education has been the tension between the recognizable mark of uniformity that long distinguished the methods, contents, and practices of Jesuit schools and their ability to adapt to different contexts and times. Both aspects—the uniformity and the adaptability—were explicitly supported by the "Ratio studiorum", the Jesuits' foundational plan of studies issued in 1599, which, despite the schools' many variations and complexities, has retained some influence over time. With the "Ratio" discarded, Jesuit schools had to clarify what made them distinctively Jesuit, reconciling their mission with the contemporary world. This three-credit, graduate-level class sketches the developments of Jesuit educational endeavors by focusing on both the permanent and changing traits of its distinctive pedagogy.

Observing Designs In Use
MORALES, MELITA M
Spring 2020
In this course, students will learn theory and method relevant to examining learning and instruction as it occurs in educational contexts (broadly considered). Students will be supported in collecting and analyzing data related to learning and instruction that is relevant to their interests, with the goal of understanding the interactional implications of various learning designs and how designs might be refined.

**Accessible and Inclusive Design**  
**LAPINSKI, SCOTT D**  
**Spring 2020**  
This survey course focuses on practical considerations regarding inclusive and accessible design. The focus is around guiding principles and key content that learners and designers can apply to their particular area of design. Particular focus is paid to understanding the functional barriers that individuals with disabilities might encounter, how these barriers can be addressed proactively, and why retrofitting designs can be costly and ineffective. After a general introduction to some of the guiding ideas behind inclusion and accessibility, both Universal Design for Learning (UDL) and accessibility are discussed to provide practical paths towards design that is ultimately more effective for all learners.

Teaching, Curriculum, and Learning Environments: Global Perspectives  
SHIRLEY, DENNIS L  
Spring 2020  
In an increasingly interdependent world well prepared educators will move beyond nationalist perspectives to deeply examine global perspectives about how to be an effective teacher, what constitutes a valued and engaging curriculum, and how learning occurs across environments. This course will challenge students to move beyond what is familiar to consider and perhaps adopt new perspectives that will benefit the learners they serve.

Family and Community Engagement  
PATTERSON, LESLIE M  
Spring 2020  
The purpose of this course is to introduce participants to theories, practices, and empirical research regarding family and community engagement in schools. The focus is on how school leaders--formal and informal--enact organizational models, educational programs, and political strategies that increase authentic relationships with parents and community members. Topics of study will include community schools/full service schools, parent involvement models, involvement of diverse families, grassroots organizing for community development, afterschool and community-based education, and school board-community relations. Direct participation in inquiry into school-community activities conducted on-site in schools and neighborhoods will be requirement of the course.

EDUC730501
Globalization, Mobility, and Education
JEON, AHRUM
Spring 2020
This course addresses political economic issues related to migration and education. Drawing on the anthropology of globalization and sociology of immigration, the course reviews major theories of immigrant incorporation and exclusion processes in schools, examines case studies of im/migrants, refugees, and displaced persons and their adaptation processes in countries in the Global North and the Global South, and considers educational practices and policies that develop to address mobility in diverse contexts. The course asks how cultural, social, political, and economic factors influence im/migrant incorporation, and how educators can facilitate im/migrant students' opportunities for learning through changes in policies, pedagogies, and curricula.

EDUC730601  
**Language Learner in Global Perspective**  
KIM, DEOKSOON  
**Spring 2020**

This course provides an overview of language learning and the situation of second language learners in schools. First, we review processes of language learning and the challenges language learners face when they must simultaneously learn a language and learn subject matter in that language. We do this from a social-cultural perspective, exploring language learning as embedded in sociohistorically situated activities. We develop and account of how learning language is also learning culture. Second, we study how these processes vary across cultural contexts. Because language learning is woven into social and historical contexts, processes of language learning and schooling vary around the world. The course develops several case studies from different areas of the globe in order to illustrate how language learning and schooling can intersect in different ways.

Instruction of Students with Special Needs and Diverse Learners
JACKSON, RICHARD
Spring 2020
This course focuses on the education of students with disabilities and other learners from culturally and linguistically diverse backgrounds. The goal of the course is to promote access to the general curriculum for all students through participation in standards-based reform. Universal Design for Learning (UDL) provides the theoretical framework for this course. Through an examination of historical milestones, landmark legislation, systems for classification, approaches to intervention, and the daily life experiences of diverse learners, students acquire knowledge about diversity and the resources, services, and supports available for creating a more just society through education.

EDUC746101
Human Rights Interdisciplinary Seminar
KANSTROOM, DANIEL
Spring 2020
The study of human rights defies disciplinary boundaries. This seminar, sponsored by the Center for Human Rights and International Justice (CHRIJ), provides a rare space to examine human rights from an interdisciplinary perspective. The seminar brings together faculty affiliated with the Center, students from across the university, visiting scholars, and guest speakers to examine issues of human rights and international justice. The spring 2020 seminar will begin with an overview and brief historical review of human rights instruments and then explore a series of complexities for those seeking to engage in human rights scholarship, advocacy, and activism. We seek to engage critically with human rights discourse and actions as they intersect with gender, culture/ethnicity, race, class, and other categorizations. More details on the 2020 seminar at https://www.bc.edu/content/bc-web/centers/chrij/academics/seminar.html.

**Credits:** 03  
**Schedule:** TH 2-4 20

**Mathematics and Technology: Teaching, Learning, and Curriculum in the Elementary School**  
**GATES, MIRIAM**  
**Spring 2020**  
This course presents methods and materials useful in teaching mathematics to early childhood and elementary school children and the different ways in which technology can be used in the elementary school classroom. The course will consider the teaching of mathematics and the use of technology from both theoretical and practical perspectives.
EDUC754301
Teaching Language Arts
MERLINO, MICHELE M
Spring 2020
Examines the development of written and spoken language and methods of instruction for oral and written language from the preschool years through early adolescence. Students learn strategies for identifying children's areas of strength and weakness and to plan instruction. Addresses the needs of children from non-English speaking homes. Expects students to spend at least 16 hours distributed across at least eight sessions in a classroom or other setting where they can work with one or more children.

EDUC754703
Teaching Narrative Writing to K-8 Students
HODGSON-DRYSDALE, TRACY L
Spring 2020
This is a project-based course where groups of participants will collaborate to develop a writing unit in a genre appropriate for their grade level. Using a genre-based pedagogy informed by systemic functional linguistics, participants will learn what and how to teach non-fiction narratives (Personal and procedural recounts, autobiographies, biographies, empathetic autobiographies, and historical recounts) and fictional narratives. Features of the genres demanded in elementary and middle schools will be learned and practiced. The strong emphasis on language development distinguishes this approach from others currently used in schools. The approach to teaching guides teachers in ways of apprenticing students to writing that builds confidence and success.

EDUC754802
Teaching Report and Explanation Writing to K-8 Students
MACDONALD, ELIZABETH A
Spring 2020
This is a project-based course where groups of participants will collaborate to develop a writing unit in a genre appropriate for their grade level. Using a genre-based pedagogy informed by systemic functional linguistics, participants will learn what and how to teach reports and explanations in the context of social studies and/or science. Features of the genres demanded in elementary and middle schools will be learned and practiced. The strong emphasis on language development distinguishes this approach from others currently used in schools. The approach to teaching guides teachers in ways of apprenticing students to writing that builds confidence and success.

Clinical Experience
RYAN, AMY; HODGE, ZINA S
Spring 2020
A semester-long, full-time clinical experience for advanced level students working in schools in a professional role. Covers the following graduate licensure programs: Reading, Moderate Special Needs, and Intense Special Needs. Placements are selectively chosen from schools in the Greater Boston area and designated international settings. Apply to the Office of Practicum Experiences and Teacher Induction during the semester preceding the placement by March 15 for fall placements and by October 15 for spring placements.
Credits: 06
Schedule: BY ARRANGEMENT
Room: None
Satisfies Core Requirement: None
Comments: Candidates who intend to complete the specialist practicum in their own classroom or in a paid internship must meet with the Director as soon as possible to ensure that the responsibilities of the position are aligned with the license the candidate is seeking.
Prerequisites: Approval by the Practicum Office, good academic standing, and successful completion of all undergraduate practicum regular education teacher certification requirements.
Corequisites: EDUC7432.
Cross-listed with: None

EDUC761501
Foundations of Bilingual and Dual Language Education
PROCTOR, CHARLES P
Spring 2020
Students will be able to walk into any school that offers a bilingual program and/or serves bilingual pupils and identify the type of program in place depending on the specifics of different contexts. In service of this goal, students will explore the following characteristics of language education programs in the U.S specifically: history, models (and key attribute of program types), political contexts, and legal foundations. Students will understand dual language models, design, and implementation, specifically: competencies, knowledge, and skills of dual language teachers, features of instruction and assessment, and implementation.

**Bilingual Literacy and Literature**

**PROCTOR, CHARLES P**

**Spring 2020**

This course is designed to provide pre- and in-service practitioners exposure to contemporary issues, perspectives, and approaches for literacy instruction in bilingual education settings. These bilingual education settings include transitional and dual language bilingual education programs, and we will explore literacy instruction as it pertains within and across these different program models. At its core, the course is designed to model the types of instructional approaches it espouses. The course will be delivered bilingually, in Spanish and English. As such, the language of instruction of the course, as well as expectations for participation, are fluid and variable. The course targets a range of literacy related topics (see topics grid below) all designed to orient the bilingual educator toward bilingual literacy instruction in contemporary bilingual education contexts.

**EDUC762101**  
**Bilingualism, Second Language, and Literacy Development**  

**TIAN, ZHONGFENG**

**Spring 2020**

Explores first and second language and literacy development of children raised bilingually as well as students acquiring a second language during pre-school, elementary, or secondary school years. Also addresses theories of first and second language acquisition, literacy development in the second language, and factors affecting second language and literacy learning. Participants will assess the development of one aspect of language or language skill of a bilingual individual and draw implications for instruction, parent involvement, and policy.

Developmental Disabilities: Evaluation, Assessment, Family, and Systems
HELM, DAVID
Spring 2020
This course focuses on issues facing professionals who work with people with developmental disabilities, their families, and the system whereby services are offered. It is designed for graduate and post-graduate students interested in learning about interdisciplinary evaluation and teams, in understanding disabilities from the person's and family's perspective, and in acquiring knowledge about the services available in the community. This course will be held at Children's Hospital.

EDUC930101
Design of Learning Environments in the Learning Sciences
MCNEILL, KATHERINE L
Spring 2020
The design of learning environments (e.g., curriculum, technology tools, professional
development, museum exhibits) and individuals' experiences within those environments
significantly impact both teacher and student learning. The learning sciences is an
interdisciplinary field of research that draws from a variety of domains such as cognitive science,
educational psychology, and education to design effective learning and teaching environments.
The goals of the learning sciences are to 1) understand the physical, cognitive and social aspects
of learning environments and 2) use these understandings to design more effective learning
environments. Learning scientists study a variety of environments from formal settings such as
schools to informal settings such as museums, jobs and interactions among peers. In this
course, we will examine different learning environments as well as various aspects within those
environments. For example, we will examine curriculum to evaluate the scaffolds to support
student learning, analyze digital learning environments for professional development to support
teacher learning and critique video of classroom discourse to examine student interactions and
community development. In this course, we will consider the environment both as
conceptualized by its designers (the design) and as it is experienced by participants as learning
interactions unfold in particular settings (the enactment) to evaluate the effectiveness of those
learning environments.
EDUC971101
Historical and Political Contexts of Curriculum
PIAZZA, PETER T
Spring 2020
Introduces Ph.D. students in Curriculum and Instruction to the major curriculum movements in American educational history by examining the history and implementation of curriculum development on the macro and micro levels of schooling. Focuses on key campaigns and controversies in curriculum theory and practice, using primary source materials to place them within the academic, political, economic, and social contexts that have marked their conceptualization, and change inside and outside of schools.

Controversies in Curriculum and Instruction
COCHRAN-SMITH, MARILYN
Spring 2020
Explores contemporary curriculum controversies in American education as well as the ways these are shaped by differing conceptions of teaching, learning, and the purposes of schooling and by the larger social, historical, political, and cultural contexts in which schooling occurs. The course assumes a broad and encompassing definition of curriculum and the aspects of instruction, assessment, and teacher preparation that have major implications for curriculum. Although the focus of the course is on curricular controversies in K-12 education, controversies related to the curriculum of early childhood education, adult learning, and higher education are also relevant.

• Slavic Studies
• Sociology
African and African Diaspora Studies Courses: Summer 2019

AADS447101

Paris Noir: From La Negritude to Le Hip-Hop
JEAN-CHARLES, REGINE M

Summer 2019

Afropeen?Negropolitain?France-antilles?Senegalouis?Franco-africain? Black Frenchmen? The numerous ways of referring to people of African descent in France reflects the complexity of how racial identity is approached, considered and imagined. Indeed, since the Negritude movement of the 1930s people from Africa and the diaspora have been making their mark in Paris. This course explores the idea of Black Paris in various forms of cultural expression including poetry, literature, film, drama, autobiography and music. We will examine how race, national identity, and immigration are important issues addressed by not only writers and filmmakers, but also by hip hop artists, comedians and soccer players.

Credits: 03
Schedule: BY ARRANGEMENT
Room: None
Satisfies Core Requirement: Cultural Diversity
Comments: As a part of the summer class students will also go on field trips to museums, a hip hop performance, restaurants, walking tours of Paris, and a weekend away to Bordeaux which was one of the ports in the trans Atlantic slave trade.
Prerequisites: None

African and African Diaspora Studies Courses: Fall 2019

AADS110401

African-American History I
MILLER, KAREN

Fall 2019
This two-semester survey examines the history and culture of African-Americans from the pre-colonial period to the present. The first semester treats the period before the middle passage, the evolution of slave and free society, the development of Black institutions, and the emergence of protest movements through the Civil War's end. During the second semester, the emphases are placed on issues of freedom and equality from Reconstruction, urban migration, and civil rights struggles through current consideration of race, class, and gender conflicts.

**AADS110801**  
**African and African Diaspora Literature**  
**FREDERICK, RHONDA**  
**Fall 2019**  
By studying creative writing by African writers and writers of African descent, this course examines how diasporic Africans created viable lives for themselves in the "New World." Questions that define this study include: how were Africans in the diaspora able to negotiate the complex social, political, and cultural spaces they encountered? What ancestral traces have they retained and how do these traces co-exist within New World realities?

AADS111001
Introduction to African Diaspora Studies
FREDERICK, RHONDA
Fall 2019
A survey of the African continent and the Diaspora that would include geography, history, politics, economics and literature. The purpose of the course is to introduce students to specific historical, cultural, social and political topics related to Africa and the African Diaspora. Because the scope of the course is so vast, we will explore important issues and themes to give students a desire to further pursue more specific classes in African and African Diaspora Studies. Boston College faculty members will be invited to lecture in their area of expertise specific to Africa and the Diaspora throughout the semester.

AADS111401
When Gods Begin Again: Intro to African and African Diaspora Religions
MCELWAINE, MICHELLE L
Fall 2019
This introductory course examines Indigenous African and African Diaspora religions from an interdisciplinary perspective. We explore Yoruba and other African religions, along with African Christianity, Islam, Haitian Vodou, Cuban Santeria, Brazilian Candomble, Sango Baptist of Trinidad and Tobago, Rastafari and Obeah of Jamaica, Black American conjure, and Oyotunji Village. Important themes of religions in Africa and the Afro-Atlantic Diaspora are addressed, such as: the veneration of God(s), Spirit(s), Ancestors, and the natural world; divination, initiation, sacred space, and healing; the impact of slavery on conversion and continuity; fetish as a colonial construct; globalization, race, gender, and power. Ultimately, this course encourages students to reevaluate their understanding of Africana religions, recognize diverse cultural practices and ritual knowledge systems, and engage with oral, written and audio/visual texts that underscore the values of these traditions.

Managing Diversity  
CLAIR, JUDITH  
Fall 2019  
Students in this course will learn about contemporary empirical and theoretical research on the dynamics of international culture, gender, race, and other special differences in the workplace. They can also increase skills in diagnosing and solving diversity-related conflicts and dilemmas, and develop a capacity to distinguish a monolithic organization from one that treats diversity as a competitive advantage.

Black Popular Culture  
VATS, ANJALI S  
Fall 2019
In this class, we will critically examine the development of black popular culture from blackface minstrelsy in the 1800s to present day. While we will primarily focus on black popular culture in the United States, we will also consider the work of diasporic authors and artists and the international implications of American media. Readings will draw upon theories and concepts in media studies, cultural studies, and rhetoric to center our discussion of black popular cultural texts such as television shows, films, music, poetry, and fashion. Course evaluation will be based on regular quizzes, two short papers, and a creative project.

**Music and Social Justice**  
**JACOB, SHANNON D**  
**Fall 2019**

This course examines influential African American musicians and their artistic endeavors towards the path of social justice, education and awareness. Focus will be on social movements, activism, industry commodity, and the direct correlation between music and society. Students will be encouraged to analyze music through lyrics and song form, while understanding the historical, political, and social climate surrounding these artistic ventures. Genres such as Gospel, Blues, Pop, Hip-hop, and Jazz will be highlighted in its journey towards contemporary music development that is shaped by the economic and technological advancements of the twenty-first century.

AADS224101
Black Feminisms 101: From Harriet Tubman to Beyonce
JEAN-CHARLES, REGINE M
Fall 2019
Black feminists have long explored the question of race versus gender in their politics, theories, and writing. This class takes a closer look at the intersection of race and gender by using Black feminist thought as a lens to examine literature and popular culture. We will read writers and theorists from Africa and the diaspora to provide definitions of Black feminism. We consider how race and gender have been thought about over time.

AAD235001  
Blackness and the Problem  
HOWARD, JONATHAN M  
Fall 2019  
In *The Souls of Black Folk*, W.E.B. Du Bois famously observes that to be black is to serially confront a question: "How does it feel to be a problem?" This course undertakes a survey of African American Literature as an ongoing mediation on the "problem" of being black, from the advent of racial slavery through to its contemporary afterlives. Reading broadly across a black literary tradition spanning four centuries and multiple genres, we will consider how black writers represent the "problem" of being black not merely as an unwelcome condition to be overcome but as an ethical orientation to be embraced in refusal of an anti-black world that is itself a problem.

Race and Identity in African American History
MILLER, KAREN

Fall 2019
This course examines and engages readings that reflect a variety of approaches to questions of racial identity and "American-ness" over time. Textual materials have been selected to illustrate both historical and literary treatments of "race" and "identity" within the context of the United States. How do individuals become conscious of themselves as "racial" beings and as national citizens? How do racial identities comport with other identities? How does racial identity influence or color one's sense of self and relations with others within and outside of one's race? How, ultimately, does race impact the study and writing of history over time?

AADS300801
Walking Black Boston
FREDERICK, RHONDA
Fall 2019
The city of Boston has many faces, so many that it might best be understood as "Bostons." We will explore this plural city through *The Autobiography of Malcolm X* (Malcolm Little first experiences differences between middle-class and working-class black people while moving through Roxbury and Boston. As Malcolm X, he preached at a mosque in Dorchester), Danzy Senna's *Caucasia* (a bildungsroman-of-sorts that charts racial ideologies and activism through an interracial marriage, two mixed-raced and differently colored children, and the rhythms of Roxbury and Brookline), and Barbara Neely's *Blanche Cleans Up* (a mystery novel set in Roxbury, Jamaica Plain, and Brookline). Students will read and interpret these "Bostons" with short supplemental readings on Boston's history, cultures, politics, and social developments. Site visits to locations central to each work supplement our learning. Students will write short critical response papers that respond to our readings and walking tours.

Blackness, Performance, and Freedom
CURSEEN, ALLISON S
Fall 2019
From Henry Box Brown's cargo dramatics to Ellen Craft's incredible performance as a feeble white male traveling with his black servant to Brer Rabbit's feigned fear of the briar patch, artifice, and performance repeatedly serve as the necessary means, if not the conditions of possibility for, fugitive departure and black life. This course asks how masks, masquerades, contacts, and acting enable resistance and escape. We will explore how the radical work of historical black performances continue in contemporary black performances like Danny Glover's Childish Gambino; Beyonce's Sasha Fierce; Ru Paul's Drag Race; and the increasingly popular interest in black speculative and afro futurism (i.e., Random Acts of Flyness and Get Out).

From Black Talent to AADS: Fifty Years of Black Studies at Boston College  
SUMMERS, MARTIN A  
Fall 2019  
The academic year 2019-2020 will mark the fiftieth anniversary of Boston College's African and African Diaspora Studies Program. This course will explore the historical origins and evolution of AADS. It examines the program's roots in the efforts to recruit black students to Boston College and its development within the larger black studies movement. In addition to lectures and readings, students will learn about AADS's history by conducting archival research and interviews of alumni, faculty, and staff. Final group projects include a collective oral history of AADS and a poster exhibit that will coincide with AADS's fiftieth anniversary celebration.

History of Medicine & Public Health/Afr Am Diaspora
SUMMERS, MARTIN A
Fall 2019
This course is a comparative study of the complex historical interplay of medicine, ideas of racial difference, and relationships of power in the African diaspora. Through an examination of slavery in the Americas, colonialism in Africa, and race relations in postemancipation United States and Caribbean, this course explores the ways in which racial difference has acquired a particular truth through the production of biomedical knowledge and its deployment in therapeutic practice and public health policy. The course will also examine how people of African descent have used medical knowledge and healing practices to contest their subordinate position in racist societies.

African and African Diaspora Studies Courses: Spring 2020

AADS110501
African American History II
MILLER, KAREN
Spring 2020
The two-semester survey examines the history and culture of African-Americans from the pre-colonial period to the present. The first semester treats the period before the middle passage, the evolution of slave and free society, development of Black institutions, and emergence of the protest movements through the Civil War's end. During the second semester, the emphases are placed on issues of freedom and equality from Reconstruction, urban migration, civil rights struggles through current consideration of race, class, and gender conflicts.

AADS111401
When Gods Begin Again: Intro to African and African Diaspora Religions
MCELWAINE, MICHELLE L
Spring 2020
This introductory course examines Indigenous African and African Diaspora religions from an interdisciplinary perspective. We explore Yoruba and other African religions, along with African Christianity, Islam, Haitian Vodou, Cuban Santeria, Brazilian Candomble, Sango Baptist of Trinidad and Tobago, Rastafari and Obeah of Jamaica, Black American conjure, and Oyotunji Village. Important themes of religions in Africa and the Afro-Atlantic Diaspora are addressed, such as: the veneration of God(s), Spirit(s), Ancestors, and the natural world; divination, initiation, sacred space, and healing; the impact of slavery on conversion and continuity; fetish as a colonial construct; globalization, race, gender, and power. Ultimately, this course encourages students to reevaluate their understanding of Africana religions, recognize diverse cultural practices and ritual knowledge systems, and engage with oral, written and audio/visual texts that underscore the values of these traditions.

AAD219801
Racial Injustices and Racial Remedies
GARCIA, JORGE L
Spring 2020
This course explores forms of racialized injustice and possible racialized responses. The first part treats discrimination, especially racial discrimination, examining Lippert-Rasmussen's influential philosophical account of what it consists in, its varieties, what makes it wrong (when it is), and how we might remedy it. The course's latter part turns to the current American racial situation, opening with Shelby's rather different understanding of discrimination and institutional, systemic, and structural injustice, proceeding to his important treatments of a number of sites of racial injustice, where he addresses issues of conduct, character, and culture within Black communities, as well as more specific matters of sex, family life, crime, and incarceration. We conclude with Shelby's contention that some types of apparent misbehavior be understood as forms of political dissent. Our goal is to deepen conceptual and normative comprehension of these phenomena, positioning the student more fully to think about, grasp, discuss, engage, and help rectify racial (and other) injustices, therein better equipping her to understand those less advantaged and to respond with informed and reflective compassion to problems that continue to plague society in the United States today.

Black and Popular: Speculative Fictions by Black Writers  
FREDERICK, RHONDA  
Spring 2020  
This course asks: what do discussions of contemporary social issues look like when depicted in popular literatures written by writers of African descent? What is the benefit of fictionalizing these issues in genre literatures? Students address these questions by examining the forms of "speculative fictions" (specifically thriller, science fiction/fantasy, and mystery/detective) as well as urban romance to determine how each represents concerns of twentieth/twenty-first century black peoples in the U.S., Canada, Jamaica, and Martinique. Our focus on these genres' explorations of race, class, culture, incest, social engineering, and intimate relationships is complemented by socio-historical studies of these issues and countries.

AADS248401  
Focus on Civil Rights: The Montgomery Bus Boycott  
MILLER, KAREN  
Spring 2020
This course dissects the 382-day bus boycott by Montgomery, Alabama's black residents. Though not the first protest of its kind, it introduced two iconic figures to the national stage: Martin Luther King, Jr. and Rosa Parks. Four simple questions provide the foundation for the class, but the answers are unexpectedly complicated: What "law" did Parks violate? Why did Montgomery's black residents rally around Parks' 1955 arrest? How did Rev. King become the boycott's "voice" and "face," even though he was a relative newcomer to the city? How did this lengthy boycott change Montgomery's black community in the short term?

AADS448201
Ghana and the U.S.: Historical and Cultural Connections
MILLER, KAREN
Spring 2020
The course examines selected historical and cultural intersections between Ghana, West Africa, and the United States. We explore "African" and "American" components of African American identity through course readings, film, and lectures that focus on four connected areas: slavery/slave trade, civil rights/independence movements, emigration/immigration, and identity/cultural exchange. Ghana is uniquely situated for such comparative study because of its recurring presence in the unfolding of African American history, including its roles as inspiration to Martin Luther King, home to scholar W.E.B. DuBois, haven to African American emigrants, and producer of the kente cloth many wear.

AADS551301
Capstone: Growing Up Ethnic in America
SARR, AKUA
Spring 2020
In this seminar students will read writing that depicts a variety of experiences but suggest that what constitutes an American identity is far from settled. Ethnic difference has a profound effect on personal and social understandings of what it means to be an American. As we discuss the literature, students will be expected to share their own personal narratives of growing up--stories of race, ethnicity, class, gender, faith, and nationality--and what it means to be American. Some of the writers we will read include: Jhumpa Lahiri, Amy Tan, Louise Erdrich, Chang Rae-Lee, Sherman Alexie, Sandra Cisneros, Junot Diaz, Edwidge Danticat, Mat Johnson, and Ta-Nehisi Coates.

AADS552301
Hip-Hop in the African Diaspora
VIDMAR, HANNAH
Spring 2020
This course examines how youth within the African Diaspora use hip-hop to articulate identities and challenge sociopolitical realities. We will critically examine questions of gender, class, language, and intergenerational divides. The approach to this course is interdisciplinary, drawing upon works from Africana studies, music, history, and hip-hop studies. While this is an exploration of hip-hop within the African Diaspora, we will examine musical traditions such as hiplife, Afrobeat, Bongo Flava, rumba, reggae, and Afro-Cuban jazz to better understand hip-hop's transnational history.

AADS602101
Black and Immigrant
FREDERICK, RHONDA
Spring 2020
This course identifies border security and illegal immigration, "terrorism" prevention, and immigration from Mexico and "Muslim Countries" as central to current debates about U.S. immigration. Literature about black immigration from Barbados, Dominican Republic, Haiti, Jamaica, and from an African region of a future earth offers lenses that complicate what immigration means in/for the U.S. From this perspective, fiction's "imaginable truths" allow us to ask different questions and, importantly, imagine different outcomes. Imaginable truths in black immigrant fiction rethink relationships between immigrants to and citizens of the U.S.

AADS660001
Senior Seminar: Theorizing the Diaspora
JEAN-CHARLES, REGINE M
Spring 2020
This course explores the discourses of diaspora by taking into account the origins, various meanings, multiple dimensions, cultural iterations, and restrictive limitations of the term. How does "the practice of diaspora" translate in different forms of cultural work such as music, film and literature? How has diaspora shifted in the age of globalization? How can we use diaspora as an analytical tool for reading from a critical perspective? We will consider closely how diaspora is theorized, practiced, and represented in various forms of cultural production. Therefore we will be taking an interdisciplinary approach reading across genre, medium, and disciplines.

Art History Courses: Summer 2019

ARTH110202
Art: Renaissance to Modern Times
ORWIG, TIMOTHY T
Summer 2019
This is the fundamental course for understanding the visual arts: painting, sculpture, and architecture. The major monuments in the history of art will be discussed in their historical and cultural context beginning with the Renaissance in Europe down to the art of our own time. The emphasis will be on style, materiality, and meaning in art. The class meets for two slide lectures per week. Assignments will include museum visits and study of significant works of art in Greater Boston.

ARTH110901
Clues to Seeing
BOOKBINDER, JUDITH A
Fall 2019
Everyone looks, not everyone sees. This course aims to develop students' ability to see the visual clues and cues that artists use in their works to communicate meaning. First students learn to see and read artists' visual vocabulary. Then students use skills to uncover underlying meaning in works of art from various times and places to reveal understandings about the contexts in which artworks were created. In addition to developing skills to analyze any artwork and insights into a few cultural moments, students take away a heightened ability to see and understand all aspects of visual experience.
ARTH221001
Festival, Carnival, and Masquerade
DANIELS, KYRAH M
Fall 2019
In acts of mourning and in times of celebration, in solemn rites of passage and in elaborate performance, we decorate our faces and adorn our bodies. This course introduces students to the diversity of African and African Diaspora ritual arts traditions. We take a comparative approach to study traditions of masquerade in initiation ceremonies, street festivals, carnivals, and funerary rites of the Black Atlantic. Employing a material culture approach, we explore particularly "festive" sites such as the sacred city of Ile-Ife, Nigeria, which hosts festivals nearly 360 days of the year, a Caribbean carnival-capital in Jacmel, Haiti, and New Orleans traditions of Mardi Gras Indians and jazz funerals. Students will gain concrete skills in visual art analysis, research, and writing, becoming versed in the fields of art history, religion, anthropology, and museum studies. By the end of this course, students will gain familiarity with various definitions of parade, masquerade, funeral, and carnival, and analyze the role of masks and art implements in private ritual ceremony as well as public festival. In this way, students will develop a deeper understanding of the intricate relationship between sacred arts and religious ceremony.

ARTH221201
East Asian Art and Architecture
CAMPBELL, AURELIA
Fall 2019
This course surveys the visual and material culture of China, Korea, and Japan from Neolithic to present times. We will address a wide range of topics, including ancient tombs, Buddhist icons, landscape paintings, imperial palaces, tea culture, and contemporary art. Particular attention will be paid not only to the physical forms of these objects and buildings, but also to their makers, users, and audiences, as well their historical, religious, and social functions. Students will be introduced to various art historical methodologies and will deepen their knowledge about one aspect of East Asian art and architectural history through a substantial research project.

ARTH221301
Introduction to Islamic Architecture
WILLIAMS, GREGORY
Fall 2019
This class surveys the religious and secular building traditions in the Islamic lands on three continents over 1400 years, i.e. from the Dome of the Rock in Jerusalem (692 CE) to I.M. Pei's recent Museum of Islamic Art in Doha, Qatar. Stops along the way include the Great Mosque of Cordoba in Spain; the Friday Mosque of Isfahan, Iran; the Alhambra in Granada, Spain; the Taj Mahal in Agra, India; and the Great Mosque of Xi'an, China. Topics to be considered include the development of the mosque and its constituent parts, including the mihrab, minbar, and minaret; regional variations; the development of the madrasa (theological college), the mausoleum, and the multi-functional complex; Islamic palaces; stucco, brick, and tile decoration; muqarnas; and Islamic architecture today.
ARTH221601
Art and Archaeology of Homer and Troy
HOFFMAN, GAIL L
Fall 2019
Homer's Iliad describes a "Trojan War." Until Schliemann's excavations of a fortified site in Turkey suggested a real Troy and further work in Greece revealed a brilliant Bronze Age civilization, most thought Homer's story pure fiction. This class investigates archaeological sites such as Troy and Mycenae, Bronze Age shipwrecks, a Late Bronze Age "Pompeii," and the artistic evidence for objects and practices described by Homer in order to separate historical truth from elements either invented by the poet or adopted from his own time and reinvented by Hollywood.

ARTH222101
Mysteries and Visions: Early Medieval Art
BERGER, PAMELA
Fall 2019
This course will illuminate the art of the so-called Dark Ages, from about 200 A.D. to around the year 1000 A.D. We will begin with the art of the waning classical world where, in addition to the burgeoning imagery of early Christianity, one finds the magico-religious art of the mystery cults of Cybele, Mithras, and Isis. We will look at the art of Byzantium, as well as that of Celtic-Early Christian Ireland, and go on to a study of the Carolingian renaissance. The last part of the course will be devoted to the apocalyptic millennial art of tenth century Spain.

**ARTH223101**  
**Early Renaissance Art in Italy**  
**LEONE, STEPHANIE**  
**Fall 2019**  
Why was art made in the Renaissance? What did it mean to its original audience? This course studies connections between art, society and culture in Italy in the fourteenth and fifteenth centuries, a period of fertile artistic innovation. We will explore the prominent artistic centers of Florence, Siena, Rome, and Venice; powerful patrons like the Medici family; and renowned artists, such as Giotto, Brunelleschi, Donatello and Botticelli.

ARTH225701
Nineteenth Century Art
WUNSCH, OLIVER M
Fall 2019
An introduction to European and American art of the late eighteenth century to 1900. We will investigate the connections between art and contemporary developments, from the Industrial Revolution to globalization. The course will cover such artistic movements as Neoclassicism, Romanticism, Realism, Impressionism, and Post-Impressionism. Artists will include David, Goya, Turner, Monet, Van Gogh, and Rodin. We will look at their materials and techniques, and we will consider how they represented the issues animating their time: gender, race, class, technology, and power.

ARTH226301  
American Icons: Nineteenth-Century Images of National Identity  
BOOKBINDER, JUDITH A  
Fall 2019  
The nineteenth century was a time of turmoil and change in America. From the taming or destruction of the wilderness, to the exploitation of natural resources, the fate of Indians, the expansion of slavery, and the spread of industry, painters, sculptors, photographers, and architects created iconic works that spawned public debates about the frontier, industrialization, and the environment that sometimes percolated and sometimes raged throughout society. By depicting European-American perceptions of Native Americans, African-Americans before and after the Civil War, and women in public and private life, artists escalated the debate over who is an American.
ARTH226701
From Salt-Box to Skyscraper: Architecture in America Seventeenth to Twentieth Centuries

None

Fall 2019
This course will trace the development of American architecture from colonial times to the present. Particular attention will be paid to monuments in New England, with field trips to important buildings in the Boston area. In addition to studying stylistic changes, the class will consider the significance of changes in building technology and social needs for the history of architecture. This course will make extensive use of a networked archive of scanned photographs. The Digital Archive of American Architecture (http://www.bc.edu/bc_org/avp/cas/fnart/fa267/) is available on BCInfo.

**ARTH228501**  
**History of Photography**  
**ANDERSON, ASHER**  
**Fall 2019**  
This course looks at the evolution of vision and practice through a selected survey of the history, technology, and aesthetics of photography from the earliest experiments in the medium to the present day. We will focus primarily on the photographic practice in Europe and the U.S. In this course, we will investigate the social cultural, and political implications of the revolution of photography, paying critical attention to its manipulations within the contexts of entertainment, advertising, the state, science, journalism, modern and postmodern art. We will also carefully explore our relationships with the proliferation of mass media imagery today.

ARTH334201  
Age of Rembrandt  
CRAIG, KENNETH M  
Fall 2019  
In the seventeenth century the prosperous Dutch middle class became passionate art collectors. Wealthy merchants and tradesmen, and even butchers and bakers, bought art of the highest quality and displayed it proudly in their homes and shops. The artists living in the Netherlands responded by producing wonderful genre pictures, landscapes, still lifes and portraits as well as religious and mythological pictures for this, the first free market in the history of art. Among the artists we will study are Rembrandt, Jan Vermeer, Frans Hals.

ARTH334601
Architecture of East Asia
CAMPBELL, AURELIA
Fall 2019
This course explores a diverse range of architecture in China, Japan, and Korea from ancient to contemporary times. We will investigate the major architectural types in East Asia--including cities, temples, palaces, gardens, and houses--as well as individual monuments, such as Japan's Himeji Castle and the "Bird's Nest" Olympic stadium in Beijing. In addition to examining the architectural histories of these sites, we will discuss thematic uses related to design, space, landscape, ritual, memory, and modernity. Students will also develop a deepened understanding of one aspect of East Asian architectural history through an in-depth research project on a well-conceived topic.

ARTH431401
The Materials of Art and their Conservation
NEWMAN, RICHARD
Fall 2019
Preservation of a (traditional) work of art requires understanding the materials of which it is made up, their condition, determining a course of treatment, then carrying out a treatment. In this seminar, means by which the materials of art can be understood (historical documents and examination in a conservation lab) will be explored. A major focus will be on how conservators determine the 'state of preservation' that is the desired outcome of a particular treatment (which is rarely how the work of art looked when it was newly created). Other topics are conservation controversies (including cleaning of the Sistine Chapel), 'authenticity' (and authentication) of works of art, and preservation of art that may include highly perishable materials, digital media, or performance. Although some of the subjects are technical, no background in college science is required.

ARTH437001  
The Art Museum: History, Philosophy, and Practice  
NETZER, NANCY D  
Fall 2019  
A study of the emergence of museums tracing their development from private collections of the classical and medieval periods to their present form as public institutions. Topics include: the museum's function in its social context; the role of museums in creating culture; how practices of visual and material culture are linked to constructing meaning; the constituency of museums and their educational mission; philosophy of installation and care of collections. The course will meet in the McMullen Museum; field trips to local museums.

ARTh440201
Art and Architecture of the Forbidden City
CAMPBELL, AURELIA
Fall 2019
The Forbidden City palace in Beijing constituted the center of Chinese imperial power from the year 1420, when it was constructed, until the early twentieth century. Now home to the Palace Museum, the Forbidden City attracts millions of tourists annually. In addition to examining the Forbidden City's magnificent halls, temples, gardens, and art objects, produced exclusively for the members of the Ming and Qing imperial courts, students in this course will discuss the shifting roles of the Forbidden City--as a monument, a symbolic form, a social space, a political entity, and a center of cultural production--over a period of approximately six centuries, including the Mao and post-Mao eras.

ARTH440501
Vienna 1900
BOOKBINDER, JUDITH A
Fall 2019
An analysis of the interdisciplinary crossfire that is Vienna 1900, concentrating on the interaction of aesthetics, culture, music, politics, philosophy, and psychology. Special emphasis on how the issues raised by the painting (Klimt, Kokoschka, Schiele) and architecture (Loos, Hoffmann, Wagner, Olbrich) of the period intersect with other domains, e.g., the philosophy of Wittgenstein, the music of Schoenberg and Strauss, the psychoanalysis of Freud, and the writings of Karl Kraus and Hugo von Hofmannsthal.

Art History Courses: Spring 2020

ARTH110101
Art: Prehistoric to Middle Ages
HARA, MARI Y
Spring 2020
A fundamental course for understanding the visual arts in the Western World: painting, sculpture, and architecture. Major monuments in the history of art will be discussed in historical and cultural context beginning with Paleolithic cave art through the art of the medieval period. This course will examine some of the ancient material from an archaeological perspective, but its main emphasis will be on style and meaning in art. Assignments will include museum visits and the study of significant works of art in Greater Boston.

ARTH110201
Art: Renaissance to Modern Times
CRAIG, KENNETH M; HARA, MARI Y
Spring 2020
This is the fundamental course for understanding the visual arts: painting, sculpture, and architecture. The major monuments in the history of art will be discussed in their historical and cultural context beginning with the Renaissance in Europe down to the art of our own time. The emphasis will be on style, materiality, and meaning in art. The class meets for two slide lectures per week. Assignments will include museum visits and study of significant works of art in Greater Boston.

ARTH113001
Intersection of Science and Painting
MC FADDEN, DAVID L
Spring 2020
In this course, material is drawn from physics, chemistry, and mineralogy to give the non-science student a scientific understanding of light, color, and colorants used in painting, as well as an introduction to the methods of scientific analysis that can be brought to bear on conservation and restoration of paintings, on investigating hypotheses in art history, and on establishing authenticity of artwork.

ARTH220601
Art and Myth in Ancient Greece
HOFFMAN, GAIL L
Spring 2020
An introduction to the visual representation of the Greek gods and goddesses and to the artistic depiction of the primary cycles of Greek legends (e.g., the Trojan War and heroes such as Herakles, Perseus, and Theseus). This course focuses on how specific visual attributes serve to identify mythological characters and how the development of narrative in Greek art helped to relate their stories. Inquiring into the use of mythological imagery to decorate temples, cult statues, and vases used primarily for the symposium (male drinking parties), we will consider the functions of mythological imagery within Greek society.

This class surveys the religious and secular building traditions in the Islamic lands on three continents over 1400 years, i.e. from the Dome of the Rock in Jerusalem (692 CE) to I.M. Pei's recent Museum of Islamic Art in Doha, Qatar. Stops along the way include the Great Mosque of Cordoba in Spain; the Friday Mosque of Isfahan, Iran; the Alhambra in Granada, Spain; the Taj Mahal in Agra, India; and the Great Mosque of Xi'an, China. Topics to be considered include the development of the mosque and its constituent parts, including the mihrab, minbar, and minaret; regional variations; the development of the madrasa (theological college), the mausoleum, and the multi-functional complex; Islamic palaces; stucco, brick, and tile decoration; muqarnas; and Islamic architecture today.

**ARTH222201**  
**Imagination and Imagery: Later Medieval Art**  
**BERGER, PAMELA**  
**Spring 2020**

This course will look at the symbolism and the multiplicity of meanings in works of art from the Romanesque and Gothic worlds. We will study the various artistic styles of architecture, sculpture, and painting of the period, all the while treating the art in its intellectual and social context. We will pay particular attention to the new ways medieval men and women envisioned space and time, as well as God and nature.

ARTH223201
Northern Renaissance Art
CRAIG, KENNETH M
Spring 2020
Painting in the Netherlands and in Germany in the fifteenth and sixteenth centuries. Emphasis will be on the style and the meaning of the great works of the masters of Northern Renaissance art such as Jan van Eyck, Hieronymus Bosch, Pieter Bruegel, and Albrecht Durer. We will discuss how the Renaissance in Northern Europe is different from the Italian Renaissance and what influences it absorbed from the Italians. We will consider the importance of printed pictures in this era when books and broadsheets assumed such a crucial role.

ARTH224101
Modern & Contemporary Chinese Art, 1911 to present
CAMPBELL, AURELIA
Spring 2020
After the fall of the Qing dynasty in 1911 Chinese artists were confronted with the great challenge of expressing radically new concepts of modernity, national identity, and selfhood in visual terms. By the mid-twentieth century their attention had shifted to the problem of how best to represent the ideologies of the Communist party. Today, contemporary artists and architects respond to new social issues, such as political censorship, environmental destruction, and urban displacement. By covering a wide range of topics--including advertisements of the modern Shanghai woman, Socialist realist sculpture, Mao-era propaganda posters, and the politically-charged works of Ai Weiwei--this course introduces students to this extremely dynamic period in Chinese art history.
ARTH225101
Modern Architecture
ORWIG, TIMOTHY T
Spring 2020
This course charts the development of modern architecture from late eighteenth-century revival styles to modernism, post-modernism, and deconstructivist architecture. We examine the work of F.L. Wright, Gropius, Mies van der Rohe, LeCorbusier, Aalto, Louis Kahn, Venturi, and Gehry, among others, and explore how their work embodies social, political, and economic issues.

ARTH226201
The City of Rome
POLT, CHRISTOPHER B
Spring 2020
What was a normal day like for ancient Romans? What did they see, hear, and do while going about their lives? How did those things change as Rome shifted from a Republic to an Empire and as their city became caput mundi ("Head of the World")? In this course we will reconstruct the lived experiences of Romans by examining Rome's urban spaces through art, architecture, artifacts, and texts. Along the way, we will explore: public buildings, mundane and monumental; recreation (baths, theaters, arenas); civic infrastructure (aqueducts, sewers, roads); economy and commerce (shopping, harbors, slavery); gender and sexuality (domestic spaces, brothels); religion (temples, sacrifices, funerals); and other topics as appropriate.

ARTh226701  
From Salt-Box to Skyscraper: Architecture in America Seventeenth to Twentieth Centuries  
ORWIG, TIMOTHY T  
Spring 2020  
This course will trace the development of American architecture from colonial times to the present. Particular attention will be paid to monuments in New England, with field trips to important buildings in the Boston area. In addition to studying stylistic changes, the class will consider the significance of changes in building technology and social needs for the history of architecture. This course will make extensive use of a networked archive of scanned photographs. The Digital Archive of American Architecture (http://www.bc.edu/bc_org/avp/cas/fnart/fa267/) is available on BCInfo.

ARTH227401  
Buddhist Arts of Asia  
CAMPBELL, AURELIA  
Spring 2020  
In the early centuries AD, Buddhism spread eastward from its origins in India across Central Asia to China, Korea, and Japan. As it spread, it profoundly impacted the visual cultures of these regions. Students in this course will be introduced to the major styles and types of Buddhist art and architecture, as well as to the fundamental role it played in religious practice. Topics to be explored include the origins of the anthropomorphic Buddha image, pictorial narratives of the Buddha's life, the sacred architecture of mandalas, and visual representations of hells and paradises. Students will also deepen their knowledge about one aspect of Buddhist art or architecture through an in-depth research project on a well-conceived topic.

ARTH300901  
Artists and their Writings  
KEARNEY, ANNE D  
Spring 2020  
In this course, students will study French culture through some key artists of the turn of the nineteenth century. The course will explore the rapport between their visual work, their writings (or writings about them) and their lives. The artists studied will be Van Gogh, Gauguin, Matisse, Picasso, Rodin, Camille Claudel, Cezanne. We will look at the evolution of their work in conjunction with their biographies, reading extracts from their letters or pronouncements on art and life.
**ARTH333201**
**Italian High Renaissance Art**
**LEONE, STEPHANIE**
**Spring 2020**
The course studies the High Renaissance, of brief duration (1500-1520), but whose artists, Leonardo, Michelangelo, and Raphael, attained a level of creative accomplishment that served as a model for years to come. We explore the development of style, artistic rivalry, relationships between patrons and artists, the creation of Renaissance Rome, and competing artistic developments in Venice. This year, we focus especially on Leonardo in celebration of the 500th anniversary of his death. We also trace the development of art after Raphael's death in 1520, to understand how artists reacted to the challenge of the High Renaissance.

Contemporary Photography
ANDERSON, ASHER
Spring 2020
The course will trace the development of photography from the 1960s--when its status in the art world was fundamentally changed by the rise of conceptualism--to the present. The course will address themes including the relationship between photography and performance art, the culture wars, identity politics, environmental concerns, globalization, digital media, and how photography has been shaped by the art market. Although the course will focus on fine art photography, we will also consider commercial and journalistic work.

Politics of Modern Middle Eastern Art
ALQASIMI, SULTAN S

Spring 2020
In this course, we shall survey the political underpinnings of Arab art in the twentieth century, and the socio-political conditions that shaped cultural production in the region. Whether it is under the Ba'athist regimes of Syria and Iraq or under Egypt' Pan-Arabism championed by Gamal Abdel Nasser, painting and sculpture in addition to film and performance have been employed by various governments as a tool of soft power to propagate their policies to the public not only in their respective states but throughout the region and beyond. Despite this widespread government patronage of the arts, many artists have chosen to challenge their authorities through subversive movements and practices, which we will address at different moments in the semester. This course, through its focus on creative practices and strategic use of the arts, will attempt to shed light on an often neglected dimension of the modern history of the Arab World and other parts of the Middle East.

ARTH440201
Art and Architecture of the Forbidden City
CAMPBELL, AURELIA

Spring 2020
The Forbidden City palace in Beijing constituted the center of Chinese imperial power from the year 1420, when it was constructed, until the early twentieth century. Now home to the Palace Museum, the Forbidden City attracts millions of tourists annually. In addition to examining the Forbidden City’s magnificent halls, temples, gardens, and art objects, produced exclusively for the members of the Ming and Qing imperial courts, students in this course will discuss the shifting roles of the Forbidden City--as a monument, a symbolic form, a social space, a political entity, and a center of cultural production--over a period of approximately six centuries, including the Mao and post-Mao eras.

Biology Courses: Summer 2019

BIOL130001
Anatomy and Physiology 1
NELSON, LISA M
Summer 2019
This course lays the foundation for the understanding of human anatomy and physiology. The first portion of the course covers cellular and molecular aspects of eukaryotic cell function: basic chemistry, macromolecules, cell structure, membrane transport, metabolism, gene expression, cell cycle control, and genetics. The course continues with the study of several organ systems. Beginning with the Integument, which is followed by the Skeletal and Muscular Systems, and ending this first semester with the Nervous System. The cellular and molecular basis for the functions of these systems is an integral element of this portion of the course.

BIOL132001
Anatomy and Physiology 2
NELSON, LISA M
Summer 2019
This course is a continuation of BIOL1300/1310, with a primary emphasis on the physiology of the major body systems. Systems studied in this course include the sensory, endocrine, cardiovascular, lymphatic, immune, respiratory, digestive, urinary, and reproductive systems. While the physiological functions under normal conditions are emphasized, relevant disease or dysfunctional conditions are also discussed.
BIOL133001
Anatomy and Physiology Lab 2

BIOL148001
Pathogens and Plagues
DUNN, MARY K
Summer 2019
Much of biological discovery has been centered around human disease and our quest for health and longevity. From the earliest observations regarding the human body, to the discovery of germs and the eventual technology guiding current treatments, human beings have sought to understand the physiological and cellular parameters associated with health. This course will examine human disease and epidemics through the lens of pathogens, society and environmental influence. Students will learn basic concepts of cell structure, genetics, and evolution in the context of infectious diseases such as The Black Death, Tuberculosis, Influenza and AIDS. Not open to students who have completed BIOL1702

BIOL215001
Pathophysiology
DIBENEDETTO, LYNN M
Summer 2019
This course provides an intermediate study of human pathological processes and their effects on homeostasis. Emphasis is on interrelationships among organ systems in deviations from homeostasis and the cellular compensatory mechanisms the body employs to maintain health. During the course students will learn the mechanisms of pathogenesis at the molecular, cellular, organ and system level in practical contexts, participating in discussions and presentations using cases studies relating pathophysiological mechanisms to a wide spectrum of signs and symptoms. Students completing this course should be able to demonstrate an understanding of the pathology affecting the nervous, cardiovascular, respiratory, renal, and digestive systems. Students should have completed courses in human anatomy, physiology or the equivalent.

Biostatistics
DACOSTA, JEFFREY M
Summer 2019
This course will introduce biology students to the basic statistical techniques that are used in conducting biological and medical research. The course is divided into four parts: (1) descriptive statistics (averages, variability); (2) probability and probability distributions (basic probability theory and the binomial, poison, and normal distributions); (3) statistical inference (parametric and non-parametric tests); and (4) relationships between variables (simple and multiple regression). Students will become familiar with a standard statistical analysis software package and will critique actual research papers.

BIOL303001
Introduction to Physiology
KENALEY, CHRISTOPHER P
Summer 2019
This course will offer a comprehensive exploration of fundamental life systems with a primary emphasis on human physiology. The chemical and physical processes common to all living organisms, including hemodynamics, respiration, circulation, acid/base regulation, synaptic transmission, kidney and muscle function will be discussed. Also included are related topics on development of the organism and functional aspects of the immune system in host defense strategies.
BIOL304001
Cell Biology
BURGESS, DAVID R
Summer 2019
This course is designed to provide students with a strong foundation in the molecular biology of the cell. Topics covered in the course include cellular biochemistry, regulation of gene expression, subcellular organization, regulation of the cell cycle, membrane trafficking, cell-substrate interactions, cytoskeleton, cancer, and cell signaling. It serves as excellent preparation for more advanced courses in cell biology, molecular biology, developmental biology, and genetics.

BIOL 888001
Interim Study
None
Summer 2019
Required for Master's candidates who have completed all course requirements but have not taken comprehensive examinations. Also for Master's students (only) who have taken up to six credits of Thesis Seminar, but have not yet finished writing their thesis.

Credits: 00
Schedule: BY ARRANGEMENT
Room: None
Satisfies Core Requirement: None
BIOL991101
Doctoral Continuation
None
Summer 2019
All students who have been admitted to candidacy for the Ph.D. degree are required to register and to pay the fee for doctoral continuation during each semester of their candidacy. Doctoral Continuation requires a commitment of at least 20 hours per week working on the dissertation.

 Credits: 00
 Schedule: BY ARRANGEMENT

Biology Courses: Fall 2019

BIOL110001
General Biology
ANNUNZIATO, ANTHONY T; SEYFRIED, THOMAS N
Fall 2019
Designed for non-science majors who desire an introduction to cell and molecular biology, this course is also suggested for students who may be interested in the Biology major but lack sufficient preparation to enroll directly into BIOL 2000. Topics include the chemistry of life; biological membranes; cellular metabolism; cell structure; cell division; DNA replication/RNA transcription; protein synthesis; genetics/evolution. Lectures include discussions of the scientific method and current applications of biological investigations. Note: this course does not fulfill any requirement for the biology major, biochemistry major, or the pre-medical program.

Credits: 03  
Schedule: M W F 11  
Room: HIGGINS HALL 300  
Satisfies Core Requirement: Natural Science  
Comments: This course does not fulfill any requirement for the biology major, biochemistry major, or the pre-medical program.  
Prerequisites: None  
Corequisites: None  
Cross-listed with: None  
Frequency: Annually

BIOL121001  
Teaching the Biosphere  
HAKE, LAURA E  
Fall 2019  
TBD  
Credits: 03  
Schedule: BY ARRANGEMENT  
Room: None  
Satisfies Core Requirement: None  
Comments: None  
Prerequisites: None  
Corequisites: None  
Cross-listed with: None  
Frequency: Annually

BIOL130001  
Anatomy and Physiology 1
NELSON, LISA M

Fall 2019

This course lays the foundation for the understanding of human anatomy and physiology. The first portion of the course covers cellular and molecular aspects of eukaryotic cell function: basic chemistry, macromolecules, cell structure, membrane transport, metabolism, gene expression, cell cycle control, and genetics. The course continues with the study of several organ systems. Beginning with the Integument, which is followed by the Skeletal and Muscular Systems, and ending this first semester with the Nervous System. The cellular and molecular basis for the functions of these systems is an integral element of this portion of the course.

Credits: 03
Schedule: T TH 9*
Room: HIGGINS HALL 300
Satisfies Core Requirement: None
Comments: Does not satisfy the Natural Sciences Core requirement. This course is restricted to School of Nursing students. Other students may be admitted only during the course drop/add period on a seat-available basis.
Prerequisites: None
Corequisites: None
Cross-listed with: None
Frequency: Annually

BIOL131001
Anatomy and Physiology Lab 1

EBERHARD, JEREMY J

Fall 2019

Laboratory exercises intended to familiarize students with the various structures and principles discussed in BIOL1300 through the use of anatomical models, physiological experiments, and limited dissection.

Credits: 01
Schedule: M 9-11
Room: HIGGINS HALL 375
Satisfies Core Requirement: None
Comments: Lab fee required. This course is restricted to School of Nursing students. Other students may be admitted only during the course drop/add period on a seat-available basis.
Prerequisites: None
Corequisites: BIOL1300.
BIOL131002
Anatomy and Physiology Lab 1
EBERHARD, JEREMY J
Fall 2019
Laboratory exercises intended to familiarize students with the various structures and principles discussed in BIOL1300 through the use of anatomical models, physiological experiments, and limited dissection.

Credits: 01
Schedule: M 11-1
Room: HIGGINS HALL 375
Satisfies Core Requirement: None
Comments: Lab fee required. This course is restricted to School of Nursing students. Other students may be admitted only during the course drop/add period on a seat-available basis.
Prerequisites: None

**BIOL150301**  
**Science and Technology in American Society**  
**KENALEY, CHRISTOPHER P; JEWETT, ANDREW J**  
**Fall 2019**  
What roles do science, technology, engineering, and mathematics (STEM) play in advanced, knowledge-dependent societies? This course examines our institutional and cultural relationship to innovation: hopes and fears about STEM, views of science and religion, conceptions of democracy's cultural requirements, the emergence of DIY and geek culture, and more. And it explores ethical questions around STEM, including debates over biotechnology, pharmaceuticals, climate change, and mass extinction. The course gives students the basic technical background to address these questions and an opportunity to imagine a technological application of their own for addressing the complex problems of the twenty-first century.
Credits: 03
Schedule: null
Room: None
Satisfies Core Requirement: History II, Natural Science
Comments: Core Renewal Course: Complex Problems. For freshmen only. Students must also register for a lab section (HIST1512 or BIOL1502). Satisfies History Core II requirement only
Prerequisites: None
Corequisites: HIST1512 or BIOL1502.
Cross-listed with: HIST1511
Frequency: Periodically

BIOL200001
Molecules and Cells
TAGHIAN, DANIELLE; CHILES, THOMAS
Fall 2019
Foundational course required for Biology majors that introduces students to living systems at the molecular and cellular level of organization. Topics introduced in this course include basic cellular biochemistry, gene regulation, cellular organization and metabolism, and cell signaling and genetics.
Credits: 03
Schedule: M W F 12
Room: FULTON HALL 511
Satisfies Core Requirement: Natural Science
Comments: None
Prerequisites: CHEM1109. May be taken concurrently or equivalent or permission of the department.
Corequisites: None
Cross-listed with: None
Frequency: Annually

BIOL204001
Investigations in Molecular Cell Biology Lab
WARNER, DOUGLAS M; JENSEN, KARI

Fall 2019

A 3-credit laboratory course designed to introduce students to the core techniques and experimental strategies of modern molecular cell biology within the context of an original research investigation. Students will learn to construct testable hypotheses, design experiments, and critically analyze experimental results. During the course of their investigations, students will gain proficiency in microbial cell culture, molecular cloning, genetic analysis, and molecular characterization. Students will also gain proficiency in scientific communication and the use of biological databases.

BIOL220001
Microbiology for Health Professionals
DUNN, MARY K
Fall 2019
This course is a study of the basic physiological and biochemical activities of bacteria and viruses. Emphasis will be placed on virulence factors and the mechanism by which a variety of microorganisms and viruses establish an infection. The use of anti-viral drugs and antibiotics, the host immune response to microbial infection, and the effectiveness of various vaccination strategies will also be discussed.

Credits: 03
Schedule: M W F 1
Room: HIGGINS HALL 310
Satisfies Core Requirement: None
Comments: Does not satisfy the Natural Sciences Core Requirement. Intended only for School of Nursing students.
Prerequisites: BIOL1300. BIOL1300-1320.
BIOL221001
Microbiology for Health Professionals Laboratory
KALE, CLAUDIA S
Fall 2019
Exercises in this laboratory course deal with aseptic techniques, microbial cultivation and growth characteristics, staining and bacterial isolation techniques, differential biochemical tests, identification of unknown bacterial species, and testing effectiveness of antimicrobial agents.

Credits: 01
Schedule: F 11-1
Room: HIGGINS HALL 380
Satisfies Core Requirement: None

BIOL224001
Race, Disease, and Disparities
BURGESS, DAVID R
Fall 2019
This course will focus on issues of race and health in America and address the question: Is race a biological construct? Underrepresented minorities face huge health disparities in America, and we will also address the question: Is there a biological basis for differing health disparities in different diseases among different races? The course will also cover the issues of health and training in the sciences for underrepresented minorities in the United States and current policy initiatives to address these disparities. Discussions will cover such issues as: the current health and science educational disparities in the sciences for minorities; current initiatives aimed at closing the disparity gaps as proposed by government agencies, non-profit organizations, scientific societies, and philanthropies; and why these issues are of general importance to science and society. The biologic, social, and cultural dietary causes of diseases leading to health disparities will be considered.

Credits: 03
Schedule: T TH 10 30*
Room: HIGGINS HALL 265
Satisfies Core Requirement: Cultural Diversity
Comments: None

BIOL230001
Biostatistics
DACOSTA, JEFFREY M
Fall 2019
This course will introduce biology students to the basic statistical techniques that are used in conducting biological and medical research. The course is divided into four parts: (1) descriptive statistics (averages, variability); (2) probability and probability distributions (basic probability theory and the binomial, poison, and normal distributions); (3) statistical inference (parametric and non-parametric tests); and (4) relationships between variables (simple and multiple regression). Students will become familiar with a standard statistical analysis software package and will critique actual research papers.

---

**BIOL303001**  
**Introduction to Physiology**  
**KENALEY, CHRISTOPHER P**  
**Fall 2019**  
This course will offer a comprehensive exploration of fundamental life systems with a primary emphasis on human physiology. The chemical and physical processes common to all living organisms, including hemodynamics, respiration, circulation, acid/base regulation, synaptic transmission, kidney and muscle function will be discussed. Also included are related topics on development of the organism and functional aspects of the immune system in host defense strategies.

**Credits:** 03  
**Schedule:** M W F 9  
**Room:** MCGUINN HALL 121  
**Satisfies Core Requirement:** None  
**Comments:** This course is intended for Biology, Psychology, and Biochemistry majors and students in the pre-medical program seeking a broad overview of human physiology.  
**Prerequisites:** BIOL2000.  
**Corequisites:** None
BIOL304001
Cell Biology
BURGESS, DAVID R
Fall 2019
This course is designed to provide students with a strong foundation in the molecular biology of the cell. Topics covered in the course include cellular biochemistry, regulation of gene expression, subcellular organization, regulation of the cell cycle, membrane trafficking, cell-substrate interactions, cytoskeleton, cancer, and cell signaling. It serves as excellent preparation for more advanced courses in cell biology, molecular biology, developmental biology, and genetics.

BIOL312001
Genetics Discussion
DUNN, REBECCA K
Fall 2019
Discussion session to accompany BIOL3190 Modern Classical Genetics. Discussion of lecture topics and problem-solving activities in small groups.

Credits: 00
Schedule: M 2
Room: HIGGINS HALL 275
Satisfies Core Requirement: None
Comments: None
Prerequisites: None
BIOL312002
Genetics Discussion
DUNN, REBECCA K
Fall 2019
Discussion session to accompany BIOL3190 Modern Classical Genetics. Discussion of lecture topics and problem-solving activities in small groups.

Credits: 00
Schedule: M 3
Room: HIGGINS HALL 275
Satisfies Core Requirement: None
Comments: None
Prerequisites: None
Corequisites: BIOL3190. BIOL3190.
Cross-listed with: None
Frequency: Annually

BIOL312003
Genetics Discussion
DUNN, REBECCA K
Fall 2019
Discussion session to accompany BIOL3190 Modern Classical Genetics. Discussion of lecture topics and problem-solving activities in small groups.

Credits: 00
Schedule: W 2
Room: HIGGINS HALL 275
Satisfies Core Requirement: None
Comments: None
Prerequisites: None
Corequisites: BIOL3190. BIOL3190.
Cross-listed with: None
Frequency: Annually
BIOL312004
Genetics Discussion
DUNN, REBECCA K
Fall 2019
Discussion session to accompany BIOL3190 Modern Classical Genetics. Discussion of lecture topics and problem-solving activities in small groups.

Credits: 00
Schedule: M 6
Room: HIGGINS HALL 275
Satisifies Core Requirement: None
Comments: None
Prerequisites: None
Corequisites: BIOL3190. BIOL3190.
Cross-listed with: None

BIOL312006
Genetics Discussion
DUNN, REBECCA K
Fall 2019
Discussion session to accompany BIOL3190 Modern Classical Genetics. Discussion of lecture topics and problem-solving activities in small groups.

Credits: 00
Schedule: TH 8
Room: HIGGINS HALL 275
Satisfies Core Requirement: None
Comments: None
Prerequisites: None
Corequisites: BIOL3190. BIOL3190.
Frequency: Annually

BIOL312007
Genetics Discussion
DUNN, REBECCA K
Fall 2019
Discussion session to accompany BIOL3190 Modern Classical Genetics. Discussion of lecture topics and problem-solving activities in small groups.

Credits: 00
Schedule: T 9
Room: HIGGINS HALL 275
Satisfies Core Requirement: None
Comments: None
Prerequisites: None
Corequisites: BIOL3190. BIOL3190.
Frequency: Annually

BIOL312008
Genetics Discussion
DUNN, REBECCA K
Fall 2019
Discussion session to accompany BIOL3190 Modern Classical Genetics. Discussion of lecture topics and problem-solving activities in small groups.
Credits: 00
Schedule: TH 9
Room: HIGGINS HALL 275
Satisifies Core Requirement: None
Comments: None
Prerequisites: None
Corequisites: BIOL3190. BIOL3190.
Cross-listed with: None
Frequency: Annually

BIOL319001
Modern and Classical Genetics
DUNN, REBECCA K
Fall 2019
Classic and modern genetics: transmission genetics, genotype-phenotype relationships, genetic variation, genetic mapping, population genetics, genomic concepts, genomic aspects of genetic methods.
Credits: 04
Schedule: M W F 11
Room: MCGUINN HALL 121
Satisifies Core Requirement: None
Comments: None
Prerequisites: BIOL2000.
Corequisites: BIOL3120.
Cross-listed with: None
Frequency: Annually

BIOL402001
Advanced Cell Biology
MCMENAMIN, SARAH K
Fall 2019
This course is designed to build upon BIOL3040 to allow students to explore more advanced areas in cell biology. Topics will include how different types of lipids, proteins, and carbohydrates affect cell function, with focuses on the endomembrane system and trafficking, cell signaling pathways, cell-cell and cell-substrate interactions, autophagy, and metabolism. Reading materials will consist of primary research articles and reviews. Each class will include both lectures and student presentations/discussions.

**Credits:** 03  
**Schedule:** T TH 10 30*  
**Room:** HIGGINS HALL 225  
**Satisfies Core Requirement:** None  
**Comments:** None  
**Prerequisites:** BIOL3040. With permission of the Instructor. Open to Juniors and Seniors only.  
**Corequisites:** None  
**Cross-listed with:** None  
**Frequency:** Annually

---

**BIOL406001**  
**Research in Microbial Ecology**  
**OLINS, HEATHER C**  
**Fall 2019**

As we become more and more aware of the myriad roles that microbes play in everything from global biogeochemical cycles to human health and disease, we realize the importance of understanding how biotic and abiotic factors affect different microbial communities. In this course we will study microbial communities through a combination of lab-based experiments, local field work, and computational analyses of genetic sequence data (bioinformatics). Students will work in teams to come up with and test novel hypotheses throughout the semester related to these fundamental microbial ecology questions: Who is there? What are they doing? Why are they doing it? Our research will focus on carbon (in particular methane) cycling in freshwater wetlands near campus. However, students will also likely have the opportunity to investigate other ecosystems of their choice. In addition to generating new data, students will read and discuss papers from the primary literature and will investigate data from other microbial communities available in public databases.

**Credits:** 03  
**Schedule:** M W 10-12 50  
**Room:** HIGGINS HALL 470  
**Satisfies Core Requirement:** None
BIOL409001
Virology
EBERHARD, JEREMY J
Fall 2019
This course will consider eukaryotic DNA and RNA viruses that are important in human disease. Basic principles of virus structure, host cell entry and the molecular biology of virus life cycles will be considered in the context of infectious disease. Viruses to be examined include Influenza, cancer-related viruses such as the Human Papilloma Virus, HIV, and emerging viruses such as Ebola and the hantaviruses. The host immune response to viral infection and the effectiveness of various vaccination strategies will also be discussed.

Credits: 03
Schedule: T TH 9*
Room: HIGGINS HALL 265

BIOL420001
Introduction to Bioinformatics
CLOTE, PETER G
Fall 2019
Bioinformatics is an emerging field at the intersection of biology, mathematics, and computer science. It harnesses the power and speed of computers to analyze the molecules essential for life. This introductory course requires that students have a basic understanding of molecular biology, genetics, and the Internet, but it does not require extensive background in mathematics or programming. Students will learn bioinformatic tools from the public domain, public databases, and simple programming tasks in PYTHON.
BIOL426001
Human Anatomy
DIBENEDETTO, LYNN M
Fall 2019
In this course, students will explore and compare the form and function of representative members of the five vertebrate classes. Evolutionary similarities and differences in form and function will be investigated, as will both the selective pressures, and non-selective constraints that have contributed to vertebrate structure. The course will conceptually integrate vertebrate anatomy with developmental biology, evolutionary biology, and ecology, and will provide skills valuable to careers in a range of biological disciplines, including molecular cell biology, medicine, evolutionary biology, and ecology.

Credits: 04
Schedule: M W 3*
Room: HIGGINS HALL 300
Satisfies Core Requirement: None
Comments: None
Prerequisites: BIOL2000.
Corequisites: BIOL4270.
Cross-listed with: None
Frequency: Annually

BIOL427001
Human Anatomy Lab
DIBENEDETTO, LYNN M
Fall 2019
Laboratory to accompany BIOL4260. This course provides hands-on experience with the form and function of major vertebrate groups, including cartilaginous fishes, bony fishes, amphibians, reptiles, birds, and mammals. The focus will be on understanding evolutionary relationships and origins in different vertebrate groups. Exercises will include investigations of models, skeletons, and preserved organisms. One component of the class will involve a research project in which students compare and contrast the form and function of a specific anatomical trait of their choosing.

Credits: 00  
Schedule: T 11-1  
Room: HIGGINS HALL 375  
Satisfies Core Requirement: None  
Comments: Lab fee required.  
Prerequisites: BIOL2000.  
Corequisites: BIOL4260.  
Cross-listed with: None  
Frequency: Annually

BIOL427002  
Human Anatomy Lab  
DIBENEDETTO, LYNN M  
Fall 2019  
Laboratory to accompany BIOL4260. This course provides hands-on experience with the form and function of major vertebrate groups, including cartilaginous fishes, bony fishes, amphibians, reptiles, birds, and mammals. The focus will be on understanding evolutionary relationships and origins in different vertebrate groups. Exercises will include investigations of models, skeletons, and preserved organisms. One component of the class will involve a research project in which students compare and contrast the form and function of a specific anatomical trait of their choosing.

---

**BIOL432001**  
**Developmental Biology**  
**HAKE, LAURA E**  
**Fall 2019**  
Developmental biology is in the midst of a far-reaching revolution that profoundly affects many related disciplines, including evolutionary biology, morphology, and genetics. The new tools and strategies of molecular biology have begun to link genetics and embryology and to reveal an incredible picture of how cells, tissues, and organisms differentiate and develop. This course describes both organismal and molecular approaches, which lead to a detailed understanding of (1) how it is that cells containing the same genetic complement can reproducibly develop into drastically different tissues and organs, and (2) the basis and role of pattern information in this process.

**Credits:** 03  
**Schedule:** T TH 1 30*  
**Room:** HIGGINS HALL 225  
**Satisfies Core Requirement:** None  
**Comments:** None  
**Prerequisites:** BIOL2040. And additional coursework in molecular cell biology (such as BIOL3040, BIOL4140, BIOL4400).
BIOL435001
Biological Chemistry
FOLKER, ERIC S
Fall 2019
This course is designed to introduce biology and biochemistry majors to the subject with an emphasis on understanding the biochemical principals that are crucial to biological function at the molecular, cellular, and organismal levels. The material includes: (1) the structure and chemistry of biomolecules, including amino acids, proteins, lipids, carbohydrates, and nucleic acids; (2) the key metabolic pathways and enzymology involved in the synthesis/degradation of carbohydrates; and (3) the cycling of energy through biological systems. Reference will be made to alterations in biochemical structures, processes, and pathways that relate to specific diseases.

Credits: 03
Schedule: M W F 10
Room: HIGGINS HALL 300
Satisfies Core Requirement: None
Comments: Students cannot get credit for BIOL4350 if they have already completed CHEM4461 Biochemistry 1. This course, together with BIOL4400, satisfies the one year requirement of basic biochemistry for the biochemistry major.

Prerequisites: CHEM2231 AND BIOL2000.
Corequisites: None
Cross-listed with: None
Frequency: Annually

BIOL452001
Molecular and Cell Physiology of Exercise
TAGHIAN, DANIELLE
Fall 2019
The principal aim of this course is to explore the molecular and physiological changes that occur in humans through various forms of aerobic and anaerobic exercise. The role of nutrition as an energy source will be discussed in detail, with particular emphasis on cellular metabolism. Energy transfer in the body and during rest and physical activity will be explored. A detailed study of the physiology of pulmonary, cardiovascular, nervous, muscular, and endocrine systems will underscore the interrelationships of these systems during exercise. The practical application of diet and exercise as it pertains to weight maintenance and disease control will render a practical application to the course. Current research in the field will be presented weekly through student presentations.

**Credits:** 03  
**Schedule:** M W F 10  
**Room:** HIGGINS HALL 310  
**Satisfies Core Requirement:** None  
**Comments:** None  
**Prerequisites:** BIOL2000. And additional course work in molecular or cell biology. BIOL3030 and BIOL4350 recommended.  
**Corequisites:** None  
**Cross-listed with:** None  
**Frequency:** Annually

---

**BIOL457001**  
**Principles of Immunology**  
**KALE, CLAUDIA S**  
**Fall 2019**  
An introductory survey of the immune system, this course will examine the development and deployment of immunity from a molecular and cellular perspective. Topics will include innate versus adaptive immunity, B and T cell activation, antibodies and antigens, and immunological memory. Modern experimental techniques and the immune system's roles in infectious disease, cancer and autoimmune disease will also be discussed.

**Credits:** 03  
**Schedule:** T TH 1 30*  
**Room:** HIGGINS HALL 263  
**Satisfies Core Requirement:** None  
**Comments:** None  
**Prerequisites:** BIOL2040. And additional coursework in molecular cell biology (such as BIOL3040, BIOL4140, BIOL4400).
**Course: Introduction to Neuroscience**

**BIOL459001**

**NYSTUEN, ARNE M**

**Fall 2019**

This class will cover molecular neuroscience and neuroanatomy in clinical and pharmaceutical context. Anatomy topics will include the structure, function, and pathology for the brain and associated nerves and vasculature. Sensory and motor systems will be discussed with special attention to the visual system, where genetic disease and current therapeutic strategies will be discussed in depth. We will cover pathology associated with neurodegenerative disease and the current clinical trials within this disease group.

**Credits:** 03

**Schedule:** T TH 9*

**Room:** DEVLIN HALL 008

**Satisfies Core Requirement:** None

**Comments:** None

**Prerequisites:** BIOL2000 and additional coursework in molecular cell biology or genetics.

**Corequisites:** None

**Cross-listed with:** None

**Frequency:** Annually

---

**Course: Research in Evolutionary Genomics**

**BIOL480201**

**DACOSTA, JEFFREY M**

**Fall 2019**
This course will provide hands-on training in the collection and analysis of genome-scale data from non-model organisms. Students will learn good laboratory practices while preparing samples for next-generation DNA sequencing, which will be run in the department's core sequencing facility. Students will also learn basic Linux/Unix computational skills and several bioinformatics tools that will be applied in managing and analyzing the massive amounts of data generated by this sequencing technology. Through data analyses and reviews of the primary literature, students will gain exposure to modern methods in phylogenetics and population genetics. This course is recommended for students interested in advanced topics in genomics, bioinformatics, and evolution. BIOL3150 and BIOL4200 recommended.

**Credits:** 03  
**Schedule:** T TH 12-3  
**Room:** HIGGINS HALL 470  
**Satisfies Core Requirement:** None  
**Comments:** None  
**Prerequisites:** BIOL2010 AND BIOL2040.

---

**BIOL481001**  
**Research in Molecular Microbiology Lab**  
**WARNER, DOUGLAS M**  
**Fall 2019**  
An advanced project laboratory course for hands-on training in the experimental techniques of molecular microbiology under faculty supervision. The course will focus on the extraction of genetic material and cloning of genes from a variety of different organisms in order to analyze functional homology of the methionine pathway. Methods taught include: DNA extraction, DNA sequencing, polymerase chain reaction, and the use databases for research and analysis.

**Credits:** 03  
**Schedule:** M W 1-4  
**Room:** HIGGINS HALL 475  
**Satisfies Core Requirement:** None  
**Comments:** Satisfies the advanced experience requirement for the Biology Major.  
**Prerequisites:** BIOL2040.  
**Corequisites:** None
Cross-listed with: None
Frequency: Annually

BIOL483001
Research in Molecular Biology Lab
FOFANA, ISMAEL B
Fall 2019
An advanced project laboratory course for hands-on training in the experimental techniques of molecular biology under faculty supervision. In addition to formal lab training and discussions, students will have access to the lab outside class hours to work on projects intended to produce publication quality data. The research project will focus on environmentally-mediated gene expression in the organism Pseudomonas fluorescens. Methods taught include: DNA cloning techniques, DNA sequencing, polymerase chain reaction, and the use of national databases for research and analysis. It is ideal for students who desire a solid introduction to hypothesis-driven research in molecular biology through practical training.

Credits: 03
Schedule: T TH 2-5
Room: HIGGINS HALL 570
Satisfies Core Requirement: None
Comments: Satisfies the advanced experience requirement for the Biology major. Lab Fee required.
Prerequisites: BIOL2040.
Corequisites: None
Cross-listed with: None
Frequency: Annually

BIOL489001
Investigations in Cellular Re-Programming
CONNOLLY, TIMOTHY J
Fall 2019
Induced pluripotent stem cells, iPSCs, are cells that can be generated from adult cells such as skin fibroblasts. Once generated, iPSCs can be directed to differentiate into any cell and offer exciting models for disease research. This laboratory course will teach students the techniques used to reprogram adult murine fibroblasts into pluripotent stem cells and their subsequent differentiation into cardiac and neuronal lineages. Resulting cell lines will be characterized using molecular and cell biology techniques and students will work to create novel cellular disease models to progress particular disease research.

**Credits:** 03  
**Schedule:** T TH 1 30-4 30  
**Room:** HIGGINS HALL 575  
**Satisfies Core Requirement:** None  
**Comments:** This will be an advanced lab course for Biology and Biochemistry students. The course will be graded.  
**Prerequisites:** BIOL2040.

Undergraduate Research Investigations
KIRCHNER, DANIEL A
Fall 2019
TBD
BIOL507501
Emerging Therapeutics
NYSTUEN, ARNE M
Fall 2019
This course will focus on novel therapeutic technologies. The first gene therapy has been approved in the U.S. following decades of development. Furthermore, many more gene and cell therapies are in development. The process of therapeutic development will be covered. New technologies will be discussed as well as the results of preclinical and clinical trials. Topics will be presented by the instructor and students and discussions will follow. Students will select their topics for presentation with direction and final approval from the instructor. We will develop presentation skills throughout the course.

Credits: 02
Schedule: M 4 30-6 30
Room: HIGGINS HALL 465
Satisfies Core Requirement: None
Comments: None
Corequisites: None
Cross-listed with: None
Frequency: Annually

BIOL515001
Vaccine Development and Public Health
FOFANA, ISMAEL B
Fall 2019
Despite more than three decades of research, the development of an efficacious HIV/AIDS vaccine remains elusive. Nonetheless, the quality of knowledge generated by HIV researchers is impressive. It is no surprise that potent Ebola virus and Zika virus vaccine candidates have been developed in a short time span. This class will discuss the difficulties and successes encountered with vaccine development (AIDS, tuberculosis, malaria, small-pox, measles, poliomyelitis, tetanus, Ebola, and Zika). At a time when questions have been raised about the link between childhood vaccination regimens and autism, we will discuss the ethics, economics, problems, and benefits of modern day vaccination.

**Credits:** 03  
**Schedule:** T TH 10 30*  
**Room:** CAMPION HALL 204  
**Satisfies Core Requirement:** None  
**Comments:** None  
**Prerequisites:** BIOL2000. And additional course work in molecular cell biology or biochemistry. BIOL4570 is recommended.  
**Corequisites:** None  
**Cross-listed with:** None  
**Frequency:** Annually

---

**BIOL527001**  
**Neurobiology of Disease**  
**KIRSCHNER, DANIEL A**  
**Fall 2019**  
This course will delve into the effects of neurological and neurodegenerative diseases such as Alzheimer's disease, Parkinson's disease, and Multiple Sclerosis, on human behavior and CNS physiology and anatomy. The course will draw on current primary and review literature for background readings as well as Web conferencing to connect personally with the authors who have performed and published the cutting edge research. This will allow the students a deeper understanding of the particular disease, as well as the process of scientific research and current laboratory techniques available to study the molecular and cellular underpinnings of these diseases.

**Credits:** 03  
**Schedule:** null  
**Room:** None  
**Satisfies Core Requirement:** None  
**Comments:** None
BIOL537001
Literature for Neurological Diseases
KIRCHNER, DANIEL A
Fall 2019
Focusing on neurological diseases such as Alzheimer's disease, Parkinson's disease, multiple sclerosis, Guillain-Barre syndrome, and leukodystrophies, we will use sources from the primary and review literature to explore fundamental scientific research in these diseases, and creative non-fiction and memoirs to understand the personal, ethical, sociological, and scientific/medical issues pertaining to these diseases.

Credits: 03
Schedule: M W 3*
Room: HIGGINS HALL 260
Satisfies Core Requirement: None
Comments: Satisfies the advanced experience requirement for the Biology major.
Prerequisites: BIOL4350 or CHEM4461 or CHEM4465.
Corequisites: None
Cross-listed with: None
Frequency: Annually

BIOL538001
Topics in Biomechanics
KENALEY, CHRISTOPHER P
Fall 2019
This course will explore the physical principles underlying biological processes and mechanisms including movement, feeding, architecture, and transport. Drawing on physics and mechanical engineering, the course will explore how organisms swim, fly, walk, and consume resources, how they respond to moving fluids, and the relationship between their size and design of mechanical systems. Underlying all these topics will be hands-on investigations of how biological materials (e.g., wood, muscle, bone, skin, etc.) influence the mechanical behavior of complex life forms. The course will prepare students for more in-depth explorations of other related disciplines including ergonomics, orthopedics, kinesiology, and sports medicine.
Credits: 03
Schedule: M W 2
Room: HIGGINS HALL 225
Satisfies Core Requirement: None
Comments: None
Prerequisites: BIOL3030. Familiarity with basic Newtonian physics and mechanics is recommended.
Corequisites: None
Cross-listed with: None
Frequency: Annually

BIOL538101
Biomechanics Laboratory
KENALEY, CHRISTOPHER P
Fall 2019
TBD

Schedule: F 1
Room: HIGGINS HALL 535
Satisfies Core Requirement: None
Comments: None
Prerequisites: None
Corequisites: BIOL5380.
Cross-listed with: None
Frequency: Annually

BIOL538102
Biomechanics Laboratory
KENALEY, CHRISTOPHER P
Fall 2019
TBD

Credits: 00
Schedule: F 2
Room: HIGGINS HALL 535
Satisfies Core Requirement: None
BIOL542001
Cancer As A Metabolic Disease
SEYFRIED, THOMAS N
Fall 2019
This seminar will review evidence showing that impaired cellular energy metabolism is the defining characteristic of nearly all cancers regardless of cellular or tissue origin. In contrast to normal cells, which derive most of their usable energy from oxidative phosphorylation, nearly all cancer cells become dependent on non-oxidative substrate level phosphorylations to meet energy demands. Evidence will be discussed supporting a general hypothesis that all hallmarks of cancer including genomic instability and metastasis can be linked to impaired mitochondrial function. A view of cancer as a metabolic disease will impact approaches to cancer management and prevention.

Credits: 03
Schedule: T TH 9*
Room: HIGGINS HALL 552
Satisfies Core Requirement: None
Comments: Satisfies the advanced experience requirement for the Biology major.
Prerequisites: BIOL2040 AND ( BIOL3040 OR BIOL4400 OR BIOL4350 OR BIOL4140 OR CHEM4461 ). OR permission of the instructor.
Corequisites: None
Cross-listed with: None
Frequency: Annually

BIOL545001
Advanced Lab in Cell Imaging
JUDSON, BRET
Fall 2019
This course will survey the various visualization techniques and instruments used by scientists and biomedical researchers: light microscopy, confocal, electron microscopy, super-resolution, and image processing. Students will discuss the experimental use of these techniques and instruments as described in the primary literature. The laboratory component will focus on becoming familiar with the instrumentation that we have available at Boston College. The course will culminate in individual projects of the students choosing utilizing equipment that we have in the laboratory.

**Credits:** 02
**Schedule:** T TH 4-6
**Room:** HIGGINS HALL 552
**Satisfies Core Requirement:** None
**Comments:** This course satisfies the advanced experience requirement for biology majors.
**Prerequisites:** BIOL2040. And additional coursework in cell and/or molecular biology.
**Corequisites:** None
**Cross-listed with:** None
**Frequency:** Annually

---

**BIOL570001**
**Biology of the Nucleus**
**ANNUNZIATO, ANTHONY T**

**Fall 2019**
This course provides an in-depth treatment of the molecular biology of DNA and RNA, with particular emphasis on the control and organization of the genetic material of eukaryotic organisms. Topics include chromatin structure and function, histone modifications, DNA replication, gene activation and silencing, DNA methylation, and RNA interference. Emphasis is on experimental design, and analysis of the primary literature.

**Credits:** 03
**Schedule:** T TH 1 30*
**Room:** HIGGINS HALL 465
**Satisfies Core Requirement:** None
**Comments:** Satisfies the advanced experience requirement for the Biology major.
**Prerequisites:** ( CHEM4461 OR CHEM4462 OR BIOL4400 OR BIOL4350 ). OR with permission of the instructor.
**Corequisites:** None
**Cross-listed with:** None
**Frequency:** Annually
BIOL611001
Advanced Genetics
VAN OPIJNEN, TIM
Fall 2019
This course is designed for graduate students who have successfully completed an undergraduate genetics course. Topics cover the fundamental principles of genetics and the methods and technology of genetic research applied to the study of a variety of model systems.

Credits: 02
Schedule: M 8-10
Room: HIGGINS HALL 465

BIOL701001
Graduate Research Experience
HOFFMAN, CHARLES
Fall 2019
This seven-week research experience is designed to provide first year students with both technical and intellectual preparation to work in a faculty member's laboratory. Projects are assigned by the faculty advisor. To help develop communication skills, at the end of the seven week period, students give a 10-12 minute talk to the department describing their research.

Credits: 01
Schedule: BY ARRANGEMENT
Room: None
Satisfies Core Requirement: None
Comments: 3 rotations (2 in the fall and 1 in the spring) are required for 1st years. A 4th is optional.
2 rotations are required for 1st year Ph.D. students with master's degrees.
Prerequisites: None
Corequisites: None
Cross-listed with: None
Frequency: Annually

BIOL701002
Graduate Research Experience

BIOL132001
Anatomy and Physiology 2
NELSON, LISA M
Spring 2020
This course is a continuation of BIOL1300/1310, with a primary emphasis on the physiology of the major body systems. Systems studied in this course include the sensory, endocrine, cardiovascular, lymphatic, immune, respiratory, digestive, urinary, and reproductive systems. While the physiological functions under normal conditions are emphasized, relevant disease or dysfunctional conditions are also discussed.

BIOL144001
Sustaining the Biosphere
HAKE, LAURA E
Spring 2020
Environmental problems and their solutions occur at the intersection of natural systems and the human systems that manipulate the natural world. The course will provide students with an integrated understanding of human systems that affect nature. Topics will include climate, air and water pollution, economics and urbanization, food and agriculture, population growth, biodiversity, waste management, and health and toxicology. Sustainability, personal responsibility, and a proactive approach to involvement in solutions to current environmental crises will be emphasized. This course is designed for students who are not majoring in biology or biochemistry.

Credits: 03
Schedule: M W 1
Room: HIGGINS HALL 310
Satisfies Core Requirement: Natural Science
Comments: Students must also register for the Sustaining the Biosphere Discussion Section (BIOL 1501).
Prerequisites: None
Corequisites: BIOL1501.
Cross-listed with: None
Frequency: Annually

BIOL150101
Sustaining the Biosphere Discussion
HAKE, LAURA E
Spring 2020

BIOL150301
Science and Technology in American Society
KENALEY, CHRISTOPHER P; JEWETT, ANDREW J

Spring 2020

What roles do science, technology, engineering, and mathematics (STEM) play in advanced, knowledge-dependent societies? This course examines our institutional and cultural relationship to innovation: hopes and fears about STEM, views of science and religion, conceptions of democracy’s cultural requirements, the emergence of DIY and geek culture, and more. And it explores ethical questions around STEM, including debates over biotechnology, pharmaceuticals, climate change, and mass extinction. The course gives students the basic technical background to address these questions and an opportunity to imagine a technological application of their own for addressing the complex problems of the twenty-first century.

Credits: 03
Schedule: M W F 2
Room: STOKES HALL 195S
Satisfies Core Requirement: History II,Natural Science
Comments: Core Renewal Course: Complex Problems. For freshmen only.
Students must also register for a lab section (HIST1512 or BIOL1502). Satisfies History Core II requirement only
Prerequisites: None
Corequisites: HIST1512 or BIOL1502.
Cross-listed with: HIST1511
Frequency: Periodically

BIOL170501
In the Beginning: Scientific Explorations of Our Origins
MEYER, MICHELLE M

Spring 2020
This course will examine scientific evidence regarding the origins of life on earth and human evolution. The goals of this course are: (1) to understand how the scientific process may be applied to questions for which no direct observation can be made, (2) to recognize scientific hypotheses developed to explain both the origin of life and the origins of humankind, and (3) to comprehend evidence supporting or refuting these hypotheses. This course will utilize both historic and modern texts to explore how the scientific understanding our origins has changed over time.

Credits: 03
Schedule: T TH 10 30*
Room: STOKES HALL 107S
Satisfies Core Requirement: Natural Science
Comments: Core Renewal: Enduring Questions
For Freshmen Only
Prerequisites: None
Corequisites: THEO1704.
Cross-listed with: None
Frequency: Periodically

BIOL200001
Molecules and Cells
WARNER, DOUGLAS M
Spring 2020
Foundational course required for Biology majors that introduces students to living systems at the molecular and cellular level of organization. Topics introduced in this course include basic cellular biochemistry, gene regulation, cellular organization and metabolism, and cell signaling and genetics.

Credits: 03
Schedule: M W F 11
Room: MCGUINN 121
Satisfies Core Requirement: Natural Science
Comments: None
Prerequisites: CHEM1109. May be taken concurrently or equivalent or permission of the department.
Corequisites: None
Cross-listed with: None
Frequency: Annually

BIOL200002
Molecules and Cells
KALE, CLAUDIA S
Spring 2020
Foundational course required for Biology majors that introduces students to living systems at the molecular and cellular level of organization. Topics introduced in this course include basic cellular biochemistry, gene regulation, cellular organization and metabolism, and cell signaling and genetics.
BIOL201001
Ecology and Evolution
DACOSTA, JEFFREY M
Spring 2020
Foundational course required for Biology majors with a focus on the ecology and resilience of living systems across all levels of spatial scales. Topics introduced in this course include evolution, population dynamics, behavioral ecology, ecosystems, co-evolution, and human ecology.

Credits: 03
Schedule: M W F 1
Room: MCGUINN HALL 121
Satisfies Core Requirement: Natural Science
Comments: None

**BIOL204001**  
**Investigations in Molecular Cell Biology Lab**  
**WARNER, DOUGLAS M; JENSEN, KARI**  
**Spring 2020**

A 3-credit laboratory course designed to introduce students to the core techniques and experimental strategies of modern molecular cell biology within the context of an original research investigation. Students will learn to construct testable hypotheses, design experiments, and critically analyze experimental results. During the course of their investigations, students will gain proficiency in microbial cell culture, molecular cloning, genetic analysis, and molecular characterization. Students will also gain proficiency in scientific communication and the use of biological databases.

**Credits:** 03  
**Schedule:** M W 12  
**Room:** HIGGINS HALL 263  
**Satisfies Core Requirement:** None  
**Comments:** Lab fee required.  
**Prerequisites:** BIOL2000 AND CHEM1111.  
**Corequisites:** None  
**Cross-listed with:** None  
**Frequency:** Annually
BIOL204002
Investigations in Molecular Cell Biology Lab
WARNER, DOUGLAS M; JENSEN, KARI
Spring 2020
A 3-credit laboratory course designed to introduce students to the core techniques and experimental strategies of modern molecular cell biology within the context of an original research investigation. Students will learn to construct testable hypotheses, design experiments, and critically analyze experimental results. During the course of their investigations, students will gain proficiency in microbial cell culture, molecular cloning, genetic analysis, and molecular characterization. Students will also gain proficiency in scientific communication and the use of biological databases.

BIOL303001
**Introduction to Physiology**  
KENALEY, CHRISTOPHER P  
Spring 2020  
This course will offer a comprehensive exploration of fundamental life systems with a primary emphasis on human physiology. The chemical and physical processes common to all living organisms, including hemodynamics, respiration, circulation, acid/base regulation, synaptic transmission, kidney and muscle function will be discussed. Also included are related topics on development of the organism and functional aspects of the immune system in host defense strategies.

**Credits:** 03  
**Schedule:** M W F 12  
**Room:** MCGUINN HALL 121  
**Satisfies Core Requirement:** None  
**Comments:** This course is intended for Biology, Psychology, and Biochemistry majors and students in the pre-medical program seeking a broad overview of human physiology.  
**Prerequisites:** BIOL2000.

**Cell Biology**  
KALE, CLAUDIA S  
Spring 2020  
This course is designed to provide students with a strong foundation in the molecular biology of the cell. Topics covered in the course include cellular biochemistry, regulation of gene expression, subcellular organization, regulation of the cell cycle, membrane trafficking, cell-substrate interactions, cytoskeleton, cancer, and cell signaling. It serves as excellent preparation for more advanced courses in cell biology, molecular biology, developmental biology, and genetics.

**Credits:** 03  
**Schedule:** T TH 9*  
**Room:** HIGGINS 225  
**Satisfies Core Requirement:** None  
**Comments:** None  
**Prerequisites:** BIOL2000.

BIOL319001
Modern and Classical Genetics
DUNN, REBECCA K
Spring 2020
Classic and modern genetics: transmission genetics, genotype-phenotype relationships, genetic variation, genetic mapping, population genetics, genomic concepts, genomic aspects of genetic methods.
Credits: 04
Schedule: T TH 1 30*
Room: HIGGINS HALL 300
BIOL403001
Deep Sea Biology
OLINS, HEATHER C
Spring 2020
Roughly 80% of habitable space on this planet is in the ocean below 1000 meters where sunlight never reaches. In this course we will dive into this rarely visited habitat that occupies the majority of our biosphere. We will take an interdisciplinary approach, as studying the deep requires the integration of geology, chemistry, ecology, physiology, and engineering. We will investigate fundamental aspects of biology such as how organisms adapt to challenges posed by their environment. Students will also gain an appreciation for how much of the planet remains unexplored and learn how scientists study the inaccessible ecosystems of the deep.

Credits: 03
Schedule: M W 3*
Room: HIGGINS HALL 263
Satisfies Core Requirement: None
Comments: None
Prerequisites: BIOL2010.
Corequisites: None
Cross-listed with: None
Frequency: Annually

BIOL411001
Ornithology
DACOSTA, JEFFREY M
Spring 2020
This course will review the evolution, functional morphology, physiology, ecology, and behavior of birds. Topics covered include dinosaur ancestry, adaptations for flight, breeding behaviors, migration, and conservation. Students will also review the biodiversity and natural history of extant birds and learn to identify common local birds using morphology and vocalizations.
BIOL414001
Microbiology
MOMENI, BABAK
Spring 2020
This course provides a foundation in molecular cell biology for biology majors, focusing on bacteria, viruses, immunology, and host/microbe relationships. Bacterial structure and function are addressed in terms of physiology, genetics, and biochemistry. Gene expression, replication, and transmission are examined in a variety of eukaryotic viruses. A review of the innate and adaptive phases of the immune response is presented with an emphasis on pathogen recognition, cellular communication, and lymphocyte development. The course concludes with selected topics on pathogenesis, epidemiology, and microbial ecology.

BIOL425001  
**Population Genetics**  
**CLOTE, PETER G**  
**Spring 2020**
In molecular evolution, random events such as pointwise DNA mutations and chromosomal rearrangement events (inversion, reciprocal translocation) create genetic variation in a diploid population that undergoes selection of the fittest to survive. This course describes mathematical models, both deterministic and stochastic, that provide a theoretical foundation for understanding modern genetics. The types of questions we'll address include the following. In a large population, how do haplogype frequencies change both in the presence and absence of selection and restricted migration? What is linkage disequilibrium and how is it measured? In situations of a population bottleneck, caused for instance by limited environmental resources, what is the probability that a particular allele will become fixed in the population, and what is the expected time until fixation? What is the coalescent? In addition, some original research papers will be presented.

Credits: 03
Schedule: M W F 10
Room: HIGGINS HALL 310

BIOL433001
Human Physiology
DIBENEDETTO, LYNN M
Spring 2020
This course will examine the normal functions of a living human organism including its physical and chemical processes. An integrative approach will be used to explore the physiological processes of the nervous, respiratory, cardiovascular, renal, gastrointestinal, and endocrine systems and the relationships between them. In the computer based laboratory, which is a corequisite, students will investigate the functions of intact, living human organisms through real-time, hands-on data acquisition and analysis of the neuromuscular, cardiovascular, and respiratory systems using clinical measurements including EMG, EEG, cardiac electrophysiology, and spirometry.

BIOL435001  
Biological Chemistry  
MEYER, MICHELLE M  
Spring 2020
This course is designed to introduce biology and biochemistry majors to the subject with an emphasis on understanding the biochemical principals that are crucial to biological function at the molecular, cellular, and organismal levels. The material includes: (1) the structure and chemistry of biomolecules, including amino acids, proteins, lipids, carbohydrates, and nucleic acids; (2) the key metabolic pathways and enzymology involved in the synthesis/degradation of carbohydrates; and (3) the cycling of energy through biological systems. Reference will be made to alterations in biochemical structures, processes, and pathways that relate to specific diseases.

**Credits:** 03  
**Schedule:** T TH 9*  
**Room:** HIGGINS HALL 300  
**Satisfies Core Requirement:** None  
**Comments:** Students cannot get credit for BIOL4350 if they have already completed CHEM4461 Biochemistry 1. This course, together with BIOL4400, satisfies the one year requirement of basic biochemistry for the biochemistry major.

**Prerequisites:** CHEM2231 AND BIOL2000.

**Corequisites:** None

**Cross-listed with:** None

**Frequency:** Annually

---

**BIOL440001**  
**Molecular Biology**  
**ANNUNZIATO, ANTHONY T; DUNN, REBECCA K**  
**Spring 2020**

This course will explore the structure, function, synthesis, and interaction of nucleic acids and proteins. The mechanisms involved in maintaining cellular genetic and epigenetic information, and in reading this "code" to generate specific patterns of gene expression, will be studied in detail. Topics include classic and newly-developed techniques for studying macromolecules; biotechnology; the functional organization of chromosomes; protein folding and modifications; DNA replication, repair, and supercoiling; RNA synthesis and processing; translation and the levels of gene regulation. Literature from the foundational investigations that led to our understanding of these processes and the current research in these areas will be presented.

**Credits:** 03  
**Schedule:** M W F 12  
**Room:** HIGGINS HALL 310  
**Satisfies Core Requirement:** None  
**Comments:** This course, together with BIOL4350, satisfies the one year requirement of basic
biochemistry for the biochemistry major.

---

**BIOL451001**  
**Cancer Biology**  
**TAGHIAN, DANIELLE**  
**Spring 2020**  
The onset of cancer occurs through a multi-step process that is accompanied by the deregulation of fundamental cellular processes, including cell cycle control, apoptosis, and angiogenesis. This course will provide an overview of the molecular and cellular changes associated with these processes and with the initiation, progression, and metastasis of tumors. Topics covered will include tumorigenesis, tumor viruses, oncogenes, tumor suppressor genes, genomic instability, and the current treatments for cancer. The class will draw on textbook and primary literature readings to enrich the current view of this complex disease.

**Credits:** 03

**NYSTUEN, ARNE M**  
**Spring 2020**
This class will cover molecular neuroscience and neuroanatomy in clinical and pharmaceutical context. Anatomy topics will include the structure, function, and pathology for the brain and associated nerves and vasculature. Sensory and motor systems will be discussed with special attention to the visual system, where genetic disease and current therapeutic strategies will be discussed in depth. We will cover pathology associated with neurodegenerative disease and the current clinical trials within this disease group.

**Credits:** 03  
**Schedule:** T TH 9*  
**Room:** HIGGINS HALL 310  
**Satisifies Core Requirement:** None  
**Comments:** None  
**Prerequisites:** BIOL2000 and additional coursework in molecular cell biology or genetics.  
**Corequisites:** None

**BIOL483001**  
**Research in Molecular Biology Lab**  
**FOFANA, ISMAEL B**  
**Spring 2020**

An advanced project laboratory course for hands-on training in the experimental techniques of molecular biology under faculty supervision. In addition to formal lab training and discussions, students will have access to the lab outside class hours to work on projects intended to produce publication quality data. The research project will focus on environmentally-mediated gene expression in the organism Pseudomonas fluorescens. Methods taught include: DNA cloning techniques, DNA sequencing, polymerase chain reaction, and the use of national databases for research and analysis. It is ideal for students who desire a solid introduction to hypothesis-driven research in molecular biology through practical training.

**Credits:** 03  
**Schedule:** T TH 10-1  
**Room:** HIGGINS HALL 570  
**Satisifies Core Requirement:** None  
**Comments:** Satisfies the advanced experience requirement for the Biology major. Lab Fee required.  
**Prerequisites:** BIOL2040.  
**Corequisites:** None
BIOL483002
Research in Molecular Biology Lab
FOFANA, ISMAEL B
Spring 2020
An advanced project laboratory course for hands-on training in the experimental techniques of molecular biology under faculty supervision. In addition to formal lab training and discussions, students will have access to the lab outside class hours to work on projects intended to produce publication quality data. The research project will focus on environmentally-mediated gene expression in the organism Pseudomonas fluorescens. Methods taught include: DNA cloning techniques, DNA sequencing, polymerase chain reaction, and the use of national databases for research and analysis. It is ideal for students who desire a solid introduction to hypothesis-driven research in molecular biology through practical training.

BIOL487002
Research in Molecular Genetics Lab
HOFFMAN, CHARLES
Spring 2020
The fission yeast Schizosaccharomyces pombe is an important model organism for the study of intracellular processes such as cell cycle control, transcription, DNA replication, chromosome maintenance, and signal transduction. This laboratory will involve original molecular genetic research using S. pombe that involves concepts related to forward genetics and gene manipulation. This course is recommended for students interested in pursuing graduate studies or careers in biomedical research.

BIOL501001
Nobel Prize Winning Research in Medicine or Physiology
BURGESS, DAVID R
Spring 2020
In this course we will discuss primary research literature in the fields of cell and developmental biology that have led to the award of the Nobel Prize. Each student will select a primary paper cited by the Nobel Foundation as justification for the award together with a supportive current review on the topic and present the background information to the class. The primary paper will be discussed at the following class period, with all students having defined responsibilities for discussion of the figures and data.

Credits: 02
Schedule: M 3-4 50
Room: STOKES HALL 103S
Satisfies Core Requirement: None
Comments: None
Prerequisites: BIOL3040. With permission of the Instructor.
Corequisites: None
Cross-listed with: None
Frequency: Annually

BIOL506001
Recombinant DNA Technology
HOFFMAN, CHARLES
Spring 2020
This course will describe the theory and practice of recombinant DNA technology and its application within molecular biology research. Topics will include the cloning of genes from various organisms, plasmid construction, transcriptional and translational gene fusions, nucleic acid probes, site-directed mutagenesis, polymerase chain reaction, and transgenic animals. The goal of the course is to make the research-oriented student aware of the wealth of experimental approaches available through this technology.
BIOL507101
Microbial Community Ecology
MOMENI, BABAK
Spring 2020
Polymicrobial communities can cause harmful infections as pathogens or facilitate food digestion as resident microbiota. They also have industrial applications for waste remediation or biofuel production. We will examine examples of microbial communities with implications in health, environment, or industry. The course surveys relevant ecological theories and covers current tools and methodologies used for characterization and analysis of microbial communities.

Credits: 02
Schedule: TH 1-3
Room: HIGGINS 552
Satisfies Core Requirement: None
Comments: None
Prerequisites: BIOL2010. BIOL 2010 and 2014; BIOL 414 and a statistics course recommended.
Corequisites: None
Cross-listed with: None
Frequency: Annually
This course will focus on novel therapeutic technologies. The first gene therapy has been approved in the U.S. following decades of development. Furthermore, many more gene and cell therapies are in development. The process of therapeutic development will be covered. New technologies will be discussed as well as the results of preclinical and clinical trials. Topics will be presented by the instructor and students and discussions will follow. Students will select their topics for presentation with direction and final approval from the instructor. We will develop presentation skills throughout the course.

**Credits:** 02  
**Schedule:** M 4 30-6 30  
**Room:** HIGGINS HALL 465  
**Satisfies Core Requirement:** None  
**Comments:** None  
**Prerequisites:** BIOL2000. Additional course work in molecular cell biology. Biochemistry and Physiology recommended.  
**Corequisites:** None  
**Cross-listed with:** None  
**Frequency:** Annually

---

**BIOL510001**  
**Microbiome and Human Disease**  
ALTINDIS, EMRAH  
Spring 2020
For thousands of years, humans have thought of themselves as single autonomous organisms. With new sequencing technologies and experiments, we are learning that the human microbiome and commensal organisms are an important aspect of host biology, and change the idea of who we really are. Recent data suggest that we are more than Homo sapiens, but a symbiotic-organism that is surrounded with trillions of microorganisms in all surfaces. Recent studies suggest that the human microbiome and commensal microbes have important roles in human health and disease. Indeed, the gut microbiota aid in normal digestion, metabolism of nutrients and drugs, and development of the gut and immune system. Reduced bacterial diversity, as well as alterations in the microbiota composition, have been associated not only with gastrointestinal disease, but also obesity, diabetes, and metabolic syndrome. Direct evidence now suggests that transfer of the microbiome can play a role in host phenotypes, homeostasis, behavior, and disease pathogenesis. Using current scientific literature and reviews, we will investigate the role of the microbiome in human health and disease. Students will make short presentations of the papers, and the class will discuss the methodology and findings of the papers.

**Credits:** 02  
**Schedule:** W 9-10 50  
**Room:** HIGGINS HALL 552  
**Satisfies Core Requirement:** None  
**Comments:** None  
**Prerequisites:** BIOL2000. BIOL2000 Molecules and Cells and additional course work in molecular cell biology. Microbiology and/or Immunology strongly recommended.  
**Corequisites:** None  
**Cross-listed with:** None  
**Frequency:** Annually

---

**BIOL513001**  
**Environmental Disruptors of Development**  
**HAKE, LAURA E**  
**Spring 2020**
More than 100,000 chemicals are manufactured and may end up as environmental pollutants. Some have toxic effects at high concentrations and protection plans are already in place. However, embryonic, fetal, or neonatal exposure to low "safe" levels of numerous pollutants can (1) induce subtle changes in developmental programs regulated by steroid hormones; (2) increase the reproductive, immune, metabolic, or cognitive disorders; and (3) increase the risk of adult-onset disorders (breast cancer, prostrate cancer, diabetes, reduced fertility). This course will examine experiments regarding Environmental Endocrine Disruptors and consider how this work is important in the development of regulatory policy.

Credits: 03
Schedule: T TH 10 30*
Room: HIGGINS HALL 225
Satisfies Core Requirement: None
Comments: Satisfies the advanced experience requirement for the Biology major.
Prerequisites: At least two of the following courses: BIOL3040, BIOL5060, BIOL4170, BIOL4510, BIOL4140, BIOL4350, BIOL4400 or instructor permission.
Corequisites: None
Cross-listed with: None
Frequency: Annually

BIOL523001
Immunity and Infectious Disease
WILLIAMS, KENNETH C
Spring 2020
This course will focus on immune cells, the immune system's response to viral and bacterial infection and the pathogenesis resulting from these responses. Topics will include questions of self and non-self in immune responses, the role of mucosal immunity and gut flora in immune responses and pathogenesis, AIDS pathogenesis, vaccines, and cutting edge technological approaches to immune therapy. Reading materials will consist of a basic immunology text, classical primary papers, and research reports.

Credits: 03
Schedule: T TH 10 30*
Room: HIGGINS 465
Satisfies Core Requirement: None
Comments: Satisfies the advanced experience requirement for the Biology major.
Prerequisites: ( BIOL4570 OR BIOL4140 ). Or instructor permission.
Corequisites: None
BIOL543001
Genomics and Personalized Medicine
CONNOLLY, TIMOTHY J
Spring 2020
Personalized medicine is based on the idea that each person's unique genome sequence can be used to predict risk of acquiring specific diseases, allowing for more informed choices about health. The students will be exposed to the scientific concepts and technologies empowering personalized medicine. Through lecture, research paper reading and discussion, students will understand how human genomic information has impacted current topics in biomedical research. Students will write a research paper focused on how genomic information has advanced understanding of a human disease and how translation of genomic information will impact treatment or disease detection in the future.

Credits: 03
Schedule: M W 3*
Room: HIGGINS HALL 260
Satisfies Core Requirement: None
Comments: Satisfies the advanced experience requirement for the Biology major.
Prerequisites: BIOL2040. And a genetics or genomics course. Additional coursework in biochemistry and molecular biology is strongly recommended.
Corequisites: None
Cross-listed with: None
Frequency: Annually

BIOL545001
Advanced Lab in Cell Imaging
JUDSON, BRETT
Spring 2020
This course will survey the various visualization techniques and instruments used by scientists and biomedical researchers: light microscopy, confocal, electron microscopy, super-resolution, and image processing. Students will discuss the experimental use of these techniques and instruments as described in the primary literature. The laboratory component will focus on becoming familiar with the instrumentation that we have available at Boston College. The course will culminate in individual projects of the students choosing utilizing equipment that we have in the laboratory.

Credits: 02
Schedule: T TH 4-6
Room: HIGGINS 552
Satisifies Core Requirement: None
Comments: This course satisfies the advanced experience requirement for biology majors.
Prerequisites: BIOL2040. And additional coursework in cell and/or molecular biology.
Corequisites: None
Cross-listed with: None
Frequency: Annually

BIOL546001
Topics in Microbial Pathogenesis
GUBBELS, JOHANNES M
Spring 2020
In this course we will discuss primary research literature on various aspects of pathogenesis i.e., the microbial an/or immunological mechanism by which pathogens (prions, viruses, (myco)bacteria, protozoa, worms) cause disease. Each student will select a primary paper from a high impact journal together with a supportive review and present the background information to the class. The primary paper will be discussed at the following class period, with all students having defined responsibilities for discussion of the figures and data.

Credits: 03
Schedule: M W 11*
Room: HIGGINS HALL 552
Satisifies Core Requirement: None
Comments: Satisfies the advanced experience requirement for the Biology major.
Prerequisites: BIOL2040. And additional coursework in immunology, microbes, molecular/cell biology, undergraduate research, or other demonstrable experience in reading primary research literature.
Corequisites: None
BIOL605001
Mechanisms of Growth and Regeneration
LOSICK-YANG, VICKI P
Spring 2020
The goal of this course is to provide an overview of the mechanisms that control tissue homeostasis and regeneration in health and disease. Topics will include regulation of stem cells and their niche, dedifferentiation, and cell growth. We will also discuss the advantages and disadvantages of different model organisms including planaria, axolotl, drosophila, zebrafish, and mice. This seminar will be structured like a scientific journal club with students presenting and leading a discussion on a paper in the assigned weekly topic. Each student will present at least 2 papers during the course of the semester.

BIOL614001
Graduate Molecular Biology
ANNUNZIATO, ANTHONY T
Spring 2020
This course concentrates on gene expression, chromatin dynamics, and cell-cycle control in eukaryotic cells. Topics include transcriptional and posttranscriptional regulatory mechanisms, DNA replication and methylation, RNA interference, microarray analysis, and the generation and use of transgenic organisms. The course is designed for graduate students who have successfully completed undergraduate biochemistry and molecular cell biology courses.

Credits: 02
Schedule: T 1-3
BIOL618001
Scientific Proposal Writing
WILLIAMS, KENNETH C; GUBBELS, JOHANNES M
Spring 2020
The purpose of the course is to develop students skills in research proposal writing, presentation, and critical evaluation. To meet these goals graduate students will be guided in the preparation and defense of an original research proposal in a field of their choice with no direct connection to their thesis topic.

Credits: 02
Schedule: BY ARRANGEMENT

BIOL701003
Graduate Research Experience
HOFFMAN, CHARLES
Spring 2020
This seven-week research experience is designed to provide first year students with both technical and intellectual preparation to work in a faculty member's laboratory. Projects are assigned by the faculty advisor. To help develop communication skills, at the end of the seven week period, students give a 10-12 minute talk to the department describing their research.
Credits: 01
Schedule: BY ARRANGEMENT
Room: None
Satisfies Core Requirement: None
Comments: 3 rotations (2 in the fall and 1 in the spring) are required for 1st years. A 4th is optional.
2 rotations are required for 1st year Ph.D. students with master's degrees.
Prerequisites: None
Corequisites: None
Cross-listed with: None

Capstone Courses: Fall 2019

UNCP550101
Capstone: Authenticity and Personal Development
BRACHER, ELIZABETH R; DACEY, JOHN S
Fall 2019
The path to becoming a more authentic person is twofold: coming to know who you are and who you are not as well as sharing this information with others. As you progress along this path, you become more authentic and are rewarded for doing so. Why should you want to be more authentic? Misrepresenting yourself costs energy. More importantly, people just seem to know intuitively who is authentic and who is not. If you are, you will be seen as more trustworthy, more deserving of love, more skilled as a leader, and more likable. This course will help you to better recognize and improve on the areas of personal development called for in every Capstone course: your education up to now and in the future; your relationships; your role in society; your vocational callings and choice of career; and your spirituality. Assignments include group projects, personal projects, and lots of small and large group discussions.

UNCP550201
Capstone: Personal Self, Public World
SWEENEY, MEGHAN T
Fall 2019
The project of being and becoming takes place not only within our own thinking, feeling, and decision-making, but it is deeply impacted and shaped by the values, policies, beliefs, and practices of the worlds in which we live. Our own social locations within these contexts -- contexts that may reflect both privilege and oppression -- contribute to forming our complex self-understandings. This Capstone course seeks to explore the four major Capstone areas -- work/career; relationships/family; citizenship; spirituality -- through the stories of characters who are exploring these areas in the contexts of their own varied identities (for example, racial, ethnic, gendered, or sexual). Through considering the lives of the people we meet -- those whose lives may be similar to our own, and those whose lives may differ in significant ways -- we are invited to explore and interrogate our own lives -- past, present, and future.

**UNCP550501**  
**Capstone: Life and Career Planning**  
**CAPALBO, ROBERT F**  
**Fall 2019**  
This course provides an overview of life and career planning in the context of (1) career, (2) personal relationships, (3) spirituality, and (4) ethical decision making. Students are asked to develop autobiographical responses to a series of questions about their lives to find themes related to possible careers and relationship issues. Readings, cases, exercises, and guest lecturers will amplify those personal themes and common issues in life as we enter the twenty-first century. The integration of spirituality and ethical decision making into one's life will be addressed by readings on ethical perspectives and the students' written reflections.

Capstone: The Balancing Act  
OLIVIERI, SCOTT D  
Fall 2019
College students have many competing demands: academics, friends, family, faith, service, and work all need attention. This just in--after college, it gets worse! This course begins with students reflecting on their commitments and choices up to now. Students will then establish personal priorities and learn strategies to become engaged in their future long-term commitments to career and community, while attending to family, friends, faith, personal well-being, and leisure. Readings will explore the changes ahead for young professionals balancing family, graduate school, and/or careers. The final assignment will be developing a personal road map to a full, meaningful, and balanced life.

**UNCP552801**  
**Capstone: Holistic Living**  
**SPECTOR, RACHEL E**  
**Fall 2019**  
This seminar will examine spirituality, community, personal and family relationships, and education through the lenses of cross-cultural holistic health and healing practices. Selected readings, films, and field visits will assist you to visualize the relationships of health to the holistic aspects of your life and that of the multicultural communities in which you will live and work. Through this study, the course will provide insight into the nature of health, the comparisons of health and healing practices cross culturally, and the consequences of health-related choices.

**Capstone: Desire and Discernment**

**MULDOON, TIMOTHY P**

**Fall 2019**

This course aims to help students review the process of their education and preview the process of making long-term commitments by taking a long, loving look at how we experience desire and how we act upon those desires to construct a life well lived. The course will first expose students to spiritual practices of discernment, rooted in the Ignatian and Benedictine spiritual traditions. Second, it will involve careful thinking about stories of discernment which involve the sorting and pruning of desire. Discussions will reflect on these stories, in order to help each other consider what they mean for our own lives.

**Capstone: Vision Quest: A Multicultural Approach**

**MILLER, DOROTHY**

**Fall 2019**
This course will use the Vision Quest, a Native American ritual for finding oneself, as a metaphor for students' four years at Boston College. Relating their own lives to the lives of the characters in the books, who have all gone on some variation of a quest, students will explore the ways their education and experiences at college have influenced their ideas of community, work, spirituality, and relationships, and have prepared them to face the great mystery of life ahead. The main texts include *The Grass Dancer*, *The Life of Pi*, *Song of Solomon*, *The Bonesetter's Daughter*, and *The House on Mango Street*. Films include *Thunderheart*, *The Hunting Ground*, and *The Whale Rider*. Personal reflection papers and class participation are a main component of this course.

**Capstone: Leadership and Mindfulness**  
**WADDOCK, SANDRA A**  
**Fall 2019**  
No matter what your major, you will participate in groups and organizations that will consistently ask or expect you to lead. The best leader is authentic, has integrity, is self- and other-aware, and acts with this awareness firmly in mind. Good leaders, that is, act mindfully with respect for the people and world around them. This course explores your development as a mindful focusing inward and outward, reflecting on where you have come from and where you are going, what type of world you want to live in, your relationships with others, and how you can be an effective leader.

**Credits:** 03

**Capstone: Science for Social Justice**

FRIEDMAN, AUDREY A

**Fall 2019**

There are several foci including a strong focus on vocational discernment with the goal of having students reflect on their commitment to social justice and how they can improve the lives of others; students will review the pathways causing them to arrive at this point in their academic lives; students will explore next steps deciding about their commitment to self, others, career, society, and spirituality; students will participate in field experiences which help them understand the inequities inherent in their disciplines; and explore the moral, cognitive, and ethical issues in their disciplines that have implications for acting for social justice.

UNCP556201

**Capstone: Finding and Following Life’s Calling**

HARRINGTON, J BRADLEY

**Fall 2019**
We live in changing times. Major social trends are impacting us as individuals, employees, family members, and citizens. These changes call on us to play a much more pro-active role in managing our lives (where possible) and to respond to the unexpected "callings" we hear. Doing this effectively requires an in-depth self-understanding coupled with a heartfelt desire to live a life of meaning. This course will help students develop a clearer sense of identity through a rigorous self-assessment process. It will help each answer the questions: Who am I? How can I make a difference in the world?

UNCP557001
Capstone: Adulting
ARNOLD, KAREN
Fall 2019
Most college students in their early 20s feel neither fully adult nor fully competent in the tasks, responsibilities, and behaviors that are traditionally associated with grown-up life. In this class, students will take stock of their journey to adulthood so far and look ahead to what relationships, work, citizenship, and spirituality might look like in post-college life. Readings on the developmental psychology of young adulthood will be paired with popular media, exercises, and reflective writing to help students progress in their own "adulting" as they prepare to negotiate the transition out of college. Students may sign-up for this cross-listed course under UNCP Capstone or through the Lynch School ELHE department.

Capstone Courses: Spring 2020

UNCP550001
**Capstone: One Life, Many Lives**
WEISS, JAMES M
Spring 2020
This course gives you the chance to review what you have made of your education and preview your long-term life commitments to work, relationships, community, and spirituality. We read fiction, psychology, sociology, and wisdom figures to find the deeper continuity underlying our many experiences. Students lead discussions, conduct interviews of working people, and cap off their Capstone by writing their own autobiography.

**Credits:** 03
**Schedule:** TH 4 30-6 50
**Room:** STOKES HALL 121N
**Satisfies Core Requirement:** None
**Comments:** Capstone classes cannot be taken Pass/Fail. You may take only one Capstone class before graduation. This Capstone is designed for students who have engaged in service projects during college and want to reflect on that as they plan their future lives. The service projects may have been through BC (Pulse, 4Boston, Arrupe, service trips, etc.) or on their own in Boston, the U.S., or abroad. Please contact Fr. Weiss to enroll: weissj@bc.edu or 617 552 3897.

**Capstone: Life and Career Planning**
CAPALBO, ROBERT F
Spring 2020
This course provides an overview of life and career planning in the context of (1) career, (2) personal relationships, (3) spirituality, and (4) ethical decision making. Students are asked to develop autobiographical responses to a series of questions about their lives to find themes related to possible careers and relationship issues. Readings, cases, exercises, and guest lecturers will amplify those personal themes and common issues in life as we enter the twenty-first century. The integration of spirituality and ethical decision making into one's life will be addressed by readings on ethical perspectives and the students' written reflections.

Capstone: Growing Up Ethnic in America
SARR, AKUA
Spring 2020
In this seminar students will read writing that depicts a variety of experiences but suggest that what constitutes an American identity is far from settled. Ethnic difference has a profound effect on personal and social understandings of what it means to be an American. As we discuss the literature, students will be expected to share their own personal narratives of growing up--stories of race, ethnicity, class, gender, faith, and nationality--and what it means to be American. Some of the writers we will read include: Jhumpa Lahiri, Amy Tan, Louise Erdrich, Chang Rae-Lee, Sherman Alexie, Sandra Cisneros, Junot Diaz, Edwidge Danticat, Mat Johnson, and Ta-Nehisi Coates.

UNCP551501
Capstone: Exploring Art, Exploring Self
RUTLEDGE, DUSTIN L
Spring 2020
This course presents art as a means of personal development, encouraging students to appreciate not only art but also the capacities and self-knowledge art can stimulate. We will explore art by experiencing it, sharing it, discussing it, and writing about it. Artworks will represent various levels and periods (e.g., fine art, popular art, contemporary art, past art) and forms (e.g., photography, music, dance, writing, sculpture, painting, theatre). How can exploring art show us who we are? Artistic engagement will help us understand our experiences and goals, in education, relationships, spirituality, career, and society, preparing us to flourish.
Capstone: Love and Indoctrination: A Foundation for the Rest of Your Life
KAPLAN-MAXFIELD, THOMAS
Spring 2020

In our world of political spin and fake news, the surveillance state and social media, the pressure to separate what's real and valuable from what's fake and mere propaganda (another way of saying "lies") is paramount, and critical for figuring out how to live, practically, spiritually, intellectually, and psychologically.

In George Orwell's 1984, the affair of Winston Smith and Julia threatens the entire structure of Big Brother. Why? What is it about love that threatens large systems based on indoctrination? In this course we will explore and develop working definitions of both love and indoctrination in order to differentiate them.

Capstone: Boston College/Your Life  
BURNS, JOHN J  
Spring 2020  
This seminar will focus on the historical development of Boston College and the continually evolving interaction between its traditions and its students. Students will do archival research on some aspect of Boston College in which they have a personal interest and will record oral histories with faculty, administrators, and alumni who can describe the ambiance and personalities of different periods that have shaped the modern university. All students will write a series of reflective essays on their experience with Boston College traditions and the impact it has had on their own personal views of themselves, their pasts, and their futures.

Capstone: Poets, Philosophers, and Mapmakers
MCNELLIS, PAUL W
Spring 2020
We go through life with mental maps of reality in various degrees, implicit or explicit. A liberal arts education presupposes such a map of the intelligible world. Is it accurate? What does your map of reality look like? How has it changed since freshman year? The goal of the seminar is to help you see what kind of map you implicitly have now and to begin to ask what you want the map to look like ten years after graduation. How do you develop an open rather than closed map?

Capstone: How We Decide
LAMOUREUX, JEFFREY A
Spring 2020
Why did I eat at "White Mountain" at 11 p.m. last night? And how can my friends convince me to go to Cityside when I know I should be studying? In this seminar, we will focus on how the mind and brain function to produce the decisions we ourselves make. The class is open to students from all majors, and there is no science prerequisite. Throughout the semester, we will reflect on our own past decisions, and consider alternative decision making strategies for the future.

CHEM201301
Organic Chemistry Lab I (summer)
ATKINSON, KAREN E
Summer 2019
Students will acquire fundamental organic separation and purification techniques. Reactions that are studied in class will be performed in the laboratory. Compounds are analyzed using a variety of methods including spectroscopy.

Credits: 01
Schedule: M T TH 12 30-4 30
Room: MERKERT CENTER 021
Satisfies Core Requirement: None
Comments: This course will only be offered during the summer session.
Prerequisites: None
Corequisites: None
Cross-listed with: None
Frequency: Annually

CHEM201401
Organic Chemistry Lab II (summer)
ATKINSON, KAREN E
Summer 2019
Students will acquire fundamental organic separation and purification techniques. Reactions that are studied in class will be performed in the laboratory. Compounds are analyzed using a variety of methods including spectroscopy.

Credits: 01
Schedule: M T TH 12 30-4 30
Room: MERKERT CENTER 021
Satisfies Core Requirement: None
Comments: This course will only be offered during the summer session.
Prerequisites: None
Corequisites: None
Cross-listed with: None
Frequency: Annually

CHEM335101
Analytical Chemistry
METZ, KENNETH R
Summer 2019
Designed primarily for sophomore and junior students, this course is an introduction to the principles and practice of analytical chemistry, including the statistical analysis of data and widely-used chemical methods and instrumental approaches such as chromatography, spectrophotometry, and electrochemistry. In the laboratory, the aims are for students to develop good analytical technique and to acquire accurate, precise data.

Credits: 04
Schedule: M W TH F 4-6
Room: MERKERT CENTER 130
Satisfies Core Requirement: None
Comments: None
Prerequisites: CHEM1110 AND CHEM1109.
Corequisites: CHEM3355 AND CHEM3353.
Cross-listed with: None
Frequency: Annually

CHEM335301
Analytical Chemistry Laboratory
METZ, KENNETH R
Summer 2019
Laboratory required of all students enrolled in CHEM3351. One four-hour period per week.

Credits: 00
Schedule: M W F 11-3
Room: MERKERT CENTER 120
Satisfies Core Requirement: None
Comments: Lab fee required
Prerequisites: None
Corequisites: CHEM3351.
Cross-listed with: None
Frequency: Annually

CHEM779905
Readings and Research I
TSUNG, CHIA-KUANG  
Summer 2019  
A course required of Ph.D. matriculants for each semester of research.  

Credits: 03  
Schedule: BY ARRANGEMENT  
Room: None  
Satisfies Core Requirement: None  
Comments: Lab fee required.  
Prerequisites: None  
Corequisites: None  
Cross-listed with: None  
Frequency: Annually

CHEM779906  
Readings and Research I  
CHATTERJEE, ABHISHEK  
Summer 2019  
A course required of Ph.D. matriculants for each semester of research.  

Credits: 03  
Schedule: BY ARRANGEMENT  
Room: None  
Satisfies Core Requirement: None  
Comments: Lab fee required.  
Prerequisites: None  
Corequisites: None  
Cross-listed with: None  
Frequency: Annually

CHEM880006  
Readings and Research II  
CHATTERJEE, ABHISHEK  
Summer 2019  
A course required of Ph.D. matriculants for each semester of research.  

Credits: 03  
Schedule: BY ARRANGEMENT
CHEM888801
Interim Study
None
Summer 2019

CHEM999901
Doctoral Continuation
None
Summer 2019
All students who have been admitted to candidacy for the Ph.D. degree are required to register and pay the fee for doctoral continuation during each semester of their candidacy. Doctoral Continuation requires a commitment of at least 20 hours per week working on the dissertation.

Credits: 00
Schedule: BY ARRANGEMENT
Room: None
Satisfies Core Requirement: None
Comments: None
Chemistry Courses: Fall 2019

CHEM110501  
Chemistry and Society I  
ARMSTRONG, WILLIAM  
Fall 2019

This is a two-semester sequence with the emphasis during the first semester placed on basic chemical principles and their application to environmental issues. Topics covered include air and water pollution, global warming, ozone depletion, hazardous waste, and energy use and alternative energy sources. The goal of the course is to develop a knowledge base from which one can make intelligent decisions about local global environmental issues as well as formulate solutions to the ever-increasingly complex problems of today's technological society.

Credits: 03  
Schedule: T TH 3*  
Room: FULTON HALL 511  
Satisfies Core Requirement: Natural Science  
Comments: For non-science majors or for those who do not require a lab science course  
Prerequisites: None  
Corequisites: None  
Cross-listed with: None  
Frequency: Annually

CHEM110901  
General Chemistry I  
WOLFMAN, NEIL M; HAEFFNER, JAN F  
Fall 2019
This course is intended for students whose major interest is science or medicine. It offers a rigorous introduction to the principles of chemistry with special emphasis on quantitative relationships and chemical equilibrium and the structures of atoms, molecules, and crystals. The properties of the more common elements and compounds are considered against a background of these principles and the periodic table.

**Credits:** 03  
**Schedule:** M W F 9  
**Room:** DEVLIN HALL 008  
**Satisfies Core Requirement:** Natural Science  
**Comments:** None  
**Prerequisites:** One year of high school chemistry.  
**Corequisites:** CHEM1111 AND CHEM1113.  
**Cross-listed with:** None  
**Frequency:** Annually
General Chemistry I  
FOX, DANIEL J  
Fall 2019  
This course is intended for students whose major interest is science or medicine. It offers a rigorous introduction to the principles of chemistry with special emphasis on quantitative relationships and chemical equilibrium and the structures of atoms, molecules, and crystals. The properties of the more common elements and compounds are considered against a background of these principles and the periodic table.

Credits: 03  
Schedule: M W F 2  
Room: MERKERT CENTER 127  
Satisfies Core Requirement: Natural Science  
Comments: None  
Prerequisites: One year of high school chemistry.  
Corequisites: CHEM1111 AND CHEM1113.  
Cross-listed with: None  
Frequency: Annually

---

CHEM110904  
General Chemistry I  
DEAK, HOLLY L  
Fall 2019  
This course is intended for students whose major interest is science or medicine. It offers a rigorous introduction to the principles of chemistry with special emphasis on quantitative relationships and chemical equilibrium and the structures of atoms, molecules, and crystals. The properties of the more common elements and compounds are considered against a background of these principles and the periodic table.

Frequency: Annually

CHEM111101
General Chemistry Laboratory I
NIU, JIA
Fall 2019
Laboratory required of all students enrolled in CHEM1109. One three-hour period per week. Experiments reflect and apply the principles learned in the lecture course. Computers are used to both acquire and analyze data. The semester concludes with a group project where students are required to design their own experiments to solve a problem.

Credits: 01
Schedule: M 10-12 50
Room: MERKERT CENTER 116
Satisfies Core Requirement: None
Comments: Lab fee required
Prerequisites: None
Corequisites: CHEM1109, CHEM1109.
CHEM111102
General Chemistry Laboratory I
CHATTERJEE, ABHISHEK
Fall 2019
Laboratory required of all students enrolled in CHEM1109. One three-hour period per week. Experiments reflect and apply the principles learned in the lecture course. Computers are used to both acquire and analyze data. The semester concludes with a group project where students are required to design their own experiments to solve a problem.

Credits: 01
Schedule: T 9-11 50
Room: MERKERT CENTER 116
Satisfies Core Requirement: None
Comments: Lab fee required
Prerequisites: None
Corequisites: CHEM1109, CHEM1109.

CHEM111701  
Honors Modern Chemistry I  
TSUNG, CHIA-KUANG  
Fall 2019  
This course is intended for students from any major (including undecided) with a strong foundation and interest in chemistry. CHEM1117 begins with the theoretical description of atomic and molecular structure and with examples of modern experimental techniques for visualizing and manipulating individual atoms and molecules. The laws of thermodynamics and kinetics are studied to understand why chemical reactions occur at all, why it is that once reactions start they can't go all the way to completion, and how molecules act as catalysts to speed up reactions without being consumed themselves.
**CHEM111901**  
Honors Modern Chemistry Laboratory I  
YOUNG, ALLISON P  

**Fall 2019**  
Laboratory required for all students enrolled in CHEM1117. This laboratory course stresses discovery-based experiments. It uses state-of-the-art instrumentation to illustrate the principles discussed in CHEM1117-1118 and introduces students to techniques used in modern chemical research. One three-hour period per week.

**Credits:** 01  
**Schedule:** M 1-4  
**Room:** MERKERT CENTER 120  
**Satisfies Core Requirement:** None  
**Comments:** Lab fee required  
**Prerequisites:** None  
**Corequisites:** CHEM1117.  
**Cross-listed with:** None  
**Frequency:** Annually
Credits: 01  
Schedule: M 5 30-8 30  
Room: MERKERT CENTER 120  
Satisfies Core Requirement: None  
Comments: Lab fee required  
Prerequisites: None  
Corequisites: CHEM1117.  
Cross-listed with: None  
Frequency: Annually

CHEM112101  
Honors Modern Chemistry Discussion I  
LI, YANG  
Fall 2019  
Required of all students in CHEM1117. Discussion of lecture topics and problem-solving methods in small groups.

Credits: 00  
Schedule: T 6  
Room: MERKERT CENTER 129  
Satisfies Core Requirement: None  
Comments: None  
Prerequisites: None  
Corequisites: CHEM1117.  
Cross-listed with: None  
Frequency: Annually

CHEM112102  
Honors Modern Chemistry Discussion I  
LI, YANG  
Fall 2019  
Required of all students in CHEM1117. Discussion of lecture topics and problem-solving methods in small groups.

Credits: 00  
Schedule: W 6  
Room: MERKERT CENTER 129
Satisifies Core Requirement: None
Comments: None
Prerequisites: None
Corequisites: CHEM1117.
Cross-listed with: None
Frequency: Annually

CHEM112701
Gateway: General Chemistry Discussion I
FICARETTA, ELISE D
Fall 2019
Required of all students in Gateway General Chemistry. Discussion will offer a comprehensive review of the material presented in lecture, with a focus on the key mathematical and chemical concepts needed for problem-solving, in a small group setting.

Credits: 01
Schedule: T 4 30
Room: HIGGINS HALL 265
Satisifies Core Requirement: None
Comments: None
Prerequisites: None
Corequisites: CHEM1109.
Cross-listed with: None
Frequency: Annually

CHEM112702
Gateway: General Chemistry Discussion I
FICARETTA, ELISE D
Fall 2019
Required of all students in Gateway General Chemistry. Discussion will offer a comprehensive review of the material presented in lecture, with a focus on the key mathematical and chemical concepts needed for problem-solving, in a small group setting.

Credits: 01
Schedule: T 5 30
Room: HIGGINS HALL 265
Satisifies Core Requirement: None
CHEM116101
Life Science Chemistry
ARMSTRONG, WILLIAM
Fall 2019
This course first introduces basic chemical principles in preparation for a discussion of the chemistry of living systems that forms the major part of the course. Organic chemical concepts will be introduced as necessary, and applications will be made wherever possible to physiological processes and disease states that can be understood in terms of their underlying chemistry.

Credits: 03
Schedule: T TH 10 30*
Room: FULTON HALL 511
Satisfies Core Requirement: None
Comments: None
Prerequisites: None
Corequisites: CHEM1165 AND CHEM1163.
Cross-listed with: None
Frequency: Annually

CHEM116302
Life Science Chemistry Laboratory
MC FADDEN, DAVID L
Fall 2019
A laboratory course that includes experiments illustrating chemical principles and the properties of compounds consistent with CHEM1161.

Credits: 01
Schedule: W 9-11 45
Room: MERKERT CENTER 018
Satisfies Core Requirement: None

Comments: None
Prerequisites: None
Corequisites: CHEM1109.
Cross-listed with: None
Frequency: Annually
Comments: Lab fee required.
Prerequisites: None
Corequisites: CHEM1161.
Cross-listed with: None
Frequency: Annually

CHEM116303
Life Science Chemistry Laboratory
MC FADDEN, DAVID L
Fall 2019
A laboratory course that includes experiments illustrating chemical principles and the properties of compounds consistent with CHEM1161.

Credits: 01
Schedule: F 9-11 45
Room: MERKERT CENTER 018
Satisfies Core Requirement: None
Comments: Lab fee required.
Prerequisites: None
Corequisites: CHEM1161.
Cross-listed with: None
Frequency: Annually

CHEM116501
Life Science Chemistry Discussion
WANG, AILUN
Fall 2019
Required of all students in CHEM1161. Discussion of lecture topics and problem-solving methods in small groups.

Credits: 00
Schedule: T 2
Room: MERKERT CENTER 129
Satisfies Core Requirement: None
Comments: None
Prerequisites: None
Corequisites: CHEM1161.
CHEM116502
Life Science Chemistry Discussion
WANG, AILUN
Fall 2019
Required of all students in CHEM1161. Discussion of lecture topics and problem-solving methods in small groups.

Credits: 00
Schedule: M 5
Room: MERKERT CENTER 129
Satisfies Core Requirement: None
Comments: None
Prerequisites: None
Corequisites: CHEM1161.
Cross-listed with: None
Frequency: Annually

---

CHEM116503
Life Science Chemistry Discussion
WANG, AILUN
Fall 2019
Required of all students in CHEM1161. Discussion of lecture topics and problem-solving methods in small groups.

Credits: 00
Schedule: M 6
Room: MERKERT CENTER 130
Satisfies Core Requirement: None
Comments: None
Prerequisites: None
Corequisites: CHEM1161.
Cross-listed with: None
Frequency: Annually
CHEM116504
Life Science Chemistry Discussion
WANG, AILUN

Fall 2019
Required of all students in CHEM1161. Discussion of lecture topics and problem-solving methods in small groups.

Credits: 00
Schedule: TH 2
Room: MERKERT CENTER 129
Satisfies Core Requirement: None
Comments: None
Prerequisites: None
Corequisites: CHEM1161.
Cross-listed with: None
Frequency: Annually

CHEM223101
Organic Chemistry I
ZHANG, XIAO-XIANG

Fall 2019
An introduction to the chemistry, properties, and uses of organic compounds. The correlation of structure with properties, reaction mechanisms, and the modern approach to structural and synthetic problems are stressed throughout. In the laboratory, the aim is acquisition of sound experimental techniques through the synthesis of selected compounds.

Credits: 03
Schedule: M W F 9
Room: MERKERT CENTER 127
Satisfies Core Requirement: None
Comments: None
Prerequisites: CHEM1110. CHEM2231 is a prerequisite for CHEM2232.
Corequisites: CHEM2233 AND CHEM2235.
Cross-listed with: None
Frequency: Annually

CHEM223102
Organic Chemistry I  
DEAK, HOLLY L  
Fall 2019  
An introduction to the chemistry, properties, and uses of organic compounds. The correlation of structure with properties, reaction mechanisms, and the modern approach to structural and synthetic problems are stressed throughout. In the laboratory, the aim is acquisition of sound experimental techniques through the synthesis of selected compounds.  

Credits: 03  
Schedule: M W F 10  
Room: MERKERT CENTER 127  
Satisfies Core Requirement: None  
Comments: None  
Prerequisites: CHEM1110. CHEM2231 is a prerequisite for CHEM2232.  
Corequisites: CHEM2233 AND CHEM2235.  
Cross-listed with: None  
Frequency: Annually

--------------------

CHEM223103  
Organic Chemistry I  
SNAPPER, MARC  
Fall 2019  
An introduction to the chemistry, properties, and uses of organic compounds. The correlation of structure with properties, reaction mechanisms, and the modern approach to structural and synthetic problems are stressed throughout. In the laboratory, the aim is acquisition of sound experimental techniques through the synthesis of selected compounds.  

Credits: 03  
Schedule: M W F 11  
Room: MERKERT CENTER 127  
Satisfies Core Requirement: None  
Comments: None  
Prerequisites: CHEM1110. CHEM2231 is a prerequisite for CHEM2232.  
Corequisites: CHEM2233 AND CHEM2235.  
Cross-listed with: None  
Frequency: Annually

--------------------
CHEM223301
Organic Chemistry Laboratory I
SNAPPER, MARC
Fall 2019
Laboratory required of all students enrolled in CHEM2231. One four-hour period per week. Students acquire fundamental organic lab techniques in the context of principles learned in the lecture course. The semester concludes with a group project where students are required to design their own experiments to solve a problem.

Credits: 01
Schedule: M 12-3 50
Room: MERKERT CENTER 018
Satisfies Core Requirement: None
Comments: Lab fee required
Prerequisites: None
Corequisites: CHEM2231.
Cross-listed with: None
Frequency: Annually

CHEM223302
Organic Chemistry Laboratory I
BYERS, JEFFERY
Fall 2019
Laboratory required of all students enrolled in CHEM2231. One four-hour period per week. Students acquire fundamental organic lab techniques in the context of principles learned in the lecture course. The semester concludes with a group project where students are required to design their own experiments to solve a problem.

Credits: 01
Schedule: T 12-3 50
Room: MERKERT CENTER 018
Satisfies Core Requirement: None
Comments: Lab fee required
Prerequisites: None
Corequisites: CHEM2231.
Cross-listed with: None
Frequency: Annually
CHEM223303
Organic Chemistry Laboratory I
WASA, MASAYUKI
Fall 2019
Laboratory required of all students enrolled in CHEM2231. One four-hour period per week. Students acquire fundamental organic lab techniques in the context of principles learned in the lecture course. The semester concludes with a group project where students are required to design their own experiments to solve a problem.

Credits: 01
Schedule: W 12 15-4 05
Room: MERKERT CENTER 018
Satisfies Core Requirement: None
Comments: Lab fee required
Prerequisites: None
Corequisites: CHEM2231.
Cross-listed with: None
Frequency: Annually

CHEM223304
Organic Chemistry Laboratory I
MORKEN, JAMES P
Fall 2019
Laboratory required of all students enrolled in CHEM2231. One four-hour period per week. Students acquire fundamental organic lab techniques in the context of principles learned in the lecture course. The semester concludes with a group project where students are required to design their own experiments to solve a problem.

Credits: 01
Schedule: TH 12-3 50
Room: MERKERT CENTER 018
Satisfies Core Requirement: None
Comments: Lab fee required
Prerequisites: None
Corequisites: CHEM2231.
Cross-listed with: None
Frequency: Annually
CHEM223305
Organic Chemistry Laboratory I
ZHANG, XIAO-XIANG
Fall 2019
Laboratory required of all students enrolled in CHEM2231. One four-hour period per week. Students acquire fundamental organic lab techniques in the context of principles learned in the lecture course. The semester concludes with a group project where students are required to design their own experiments to solve a problem.

Credits: 01
Schedule: F 1-4 50
Room: MERKERT CENTER 018
Satisfies Core Requirement: None
Comments: Lab fee required
Prerequisites: None
Corequisites: CHEM2231.
Cross-listed with: None
Frequency: Annually

CHEM223306
Organic Chemistry Laboratory I
YOUNG, ALLISON P
Fall 2019
Laboratory required of all students enrolled in CHEM2231. One four-hour period per week. Students acquire fundamental organic lab techniques in the context of principles learned in the lecture course. The semester concludes with a group project where students are required to design their own experiments to solve a problem.

Credits: 01
Schedule: M 5-8 50
Room: MERKERT CENTER 018
Satisfies Core Requirement: None
Comments: Lab fee required
Prerequisites: None
Corequisites: CHEM2231.
Cross-listed with: None
Frequency: Annually
CHEM223307
Organic Chemistry Laboratory I
NIJJAR, AMARJIT K
Fall 2019
Laboratory required of all students enrolled in CHEM2231. One four-hour period per week. Students acquire fundamental organic lab techniques in the context of principles learned in the lecture course. The semester concludes with a group project where students are required to design their own experiments to solve a problem.

Credits: 01
Schedule: T 5-8 50
Room: MERKERT CENTER 018
Satisfies Core Requirement: None
Comments: Lab fee required
Prerequisites: None
Corequisites: CHEM2231.
Cross-listed with: None
Frequency: Annually

CHEM223308
Organic Chemistry Laboratory I
JAYASUNDERA, THUSITHA
Fall 2019
Laboratory required of all students enrolled in CHEM2231. One four-hour period per week. Students acquire fundamental organic lab techniques in the context of principles learned in the lecture course. The semester concludes with a group project where students are required to design their own experiments to solve a problem.

Credits: 01
Schedule: W 5-8 50
Room: MERKERT CENTER 018
Satisfies Core Requirement: None
Comments: Lab fee required
Prerequisites: None
Corequisites: CHEM2231.
Cross-listed with: None
Frequency: Annually
CHEM223309
Organic Chemistry Laboratory I
NIJjar, Amarjit K
Fall 2019
Laboratory required of all students enrolled in CHEM2231. One four-hour period per week. Students acquire fundamental organic lab techniques in the context of principles learned in the lecture course. The semester concludes with a group project where students are required to design their own experiments to solve a problem.

Credits: 01
Schedule: TH 5-8 50
Room: MERKERT CENTER 018
Satisfies Core Requirement: None
Comments: Lab fee required
Prerequisites: None
Corequisites: CHEM2231.
Cross-listed with: None
Frequency: Annually

CHEM223501
Organic Chemistry Discussion I
Parvin, Lucas S
Fall 2019
Required of all students in CHEM2231. Discussion of organic synthesis design, spectroscopic analysis, reaction mechanisms, and other lecture topics in small groups.

Credits: 00
Schedule: M 3
Room: MERKERT CENTER 127
Satisfies Core Requirement: None
Comments: None
Prerequisites: None
Corequisites: CHEM2231.
Cross-listed with: None
Frequency: Annually

CHEM223502
Organic Chemistry Discussion I  
CONGER, RYAN P  
Fall 2019  
Required of all students in CHEM2231. Discussion of organic synthesis design, spectroscopic analysis, reaction mechanisms, and other lecture topics in small groups.

Credits: 00  
Schedule: M 4  
Room: MERKERT CENTER 127  
Satisfies Core Requirement: None  
Comments: None  
Prerequisites: None  
Corequisites: CHEM2231.  
Cross-listed with: None  
Frequency: Annually

---

CHEM223503  
Organic Chemistry Discussion I  
CONGER, RYAN P  
Fall 2019  
Required of all students in CHEM2231. Discussion of organic synthesis design, spectroscopic analysis, reaction mechanisms, and other lecture topics in small groups.

Credits: 00  
Schedule: M 5  
Room: MERKERT CENTER 127  
Satisfies Core Requirement: None  
Comments: None

CHEM223504  
Organic Chemistry Discussion I  
DEPT  
Fall 2019
CHEM223505
Organic Chemistry Discussion I
KATIVHU, ELTON T
Fall 2019
Required of all students in CHEM2231. Discussion of organic synthesis design, spectroscopic analysis, reaction mechanisms, and other lecture topics in small groups.

Credits: 00
Schedule: T 5
Room: MERKERT CENTER 127
Satisfies Core Requirement: None
Comments: None
Prerequisites: None
Corequisites: CHEM2231.
Cross-listed with: None
Frequency: Annually

CHEM223506
Organic Chemistry Discussion I
None
Fall 2019
Required of all students in CHEM2231. Discussion of organic synthesis design, spectroscopic analysis, reaction mechanisms, and other lecture topics in small groups.

Credits: 00
Schedule: M 6
Room: MERKERT CENTER 127
Satisfies Core Requirement: None
Comments: None
Prerequisites: None
Corequisites: CHEM2231.
Cross-listed with: None
Frequency: Annually
CHEM223507
Organic Chemistry Discussion I
BENTLEY, SIERRA K
Fall 2019
Required of all students in CHEM2231. Discussion of organic synthesis design, spectroscopic analysis, reaction mechanisms, and other lecture topics in small groups.

Credits: 00
Schedule: W 3
Room: MERKERT CENTER 127
Satisfies Core Requirement: None
Comments: None
Prerequisites: None
Corequisites: CHEM2231.
Cross-listed with: None
Frequency: Annually

CHEM223508
Organic Chemistry Discussion I
PARVIN, LUCAS S
Fall 2019
Required of all students in CHEM2231. Discussion of organic synthesis design, spectroscopic analysis, reaction mechanisms, and other lecture topics in small groups.

Credits: 00
Schedule: W 4
Room: MERKERT CENTER 127
CHEM223509
Organic Chemistry Discussion I
PARVIN, LUCAS S
Fall 2019
Required of all students in CHEM2231. Discussion of organic synthesis design, spectroscopic analysis, reaction mechanisms, and other lecture topics in small groups.

Credits: 00
Schedule: W 5
Room: MERKERT CENTER 127
Satisfies Core Requirement: None
Comments: None
Prerequisites: None
Corequisites: CHEM2231.
Cross-listed with: None
Frequency: Annually

CHEM223510
Organic Chemistry Discussion I
DEPT
Fall 2019
Required of all students in CHEM2231. Discussion of organic synthesis design, spectroscopic analysis, reaction mechanisms, and other lecture topics in small groups.

Credits: 00
Schedule: W 6
Room: MERKERT CENTER 127
Satisfies Core Requirement: None
Comments: None
Prerequisites: None
Corequisites: CHEM2231.
Cross-listed with: None
Frequency: Annually

CHEM223511
Organic Chemistry Discussion I
ZHANG, XUNTONG
Fall 2019
Required of all students in CHEM2231. Discussion of organic synthesis design, spectroscopic analysis, reaction mechanisms, and other lecture topics in small groups.

Credits: 00
Schedule: TH 3
Room: CAMPION HALL 204
Satisfies Core Requirement: None
Comments: None
Prerequisites: None
Corequisites: CHEM2231.
Cross-listed with: None
Frequency: Annually

CHEM223512
Organic Chemistry Discussion I
ZHANG, XUNTONG
Fall 2019
Required of all students in CHEM2231. Discussion of organic synthesis design, spectroscopic analysis, reaction mechanisms, and other lecture topics in small groups.

Credits: 00
Schedule: TH 4
Room: CAMPION HALL 204
Satisfies Core Requirement: None
Comments: None
Prerequisites: None
Corequisites: CHEM2231.
Cross-listed with: None
Frequency: Annually
CHEM223513
Organic Chemistry Discussion I
WONG, ALEXANDER
Fall 2019
Required of all students in CHEM2231. Discussion of organic synthesis design, spectroscopic analysis, reaction mechanisms, and other lecture topics in small groups.

Credits: 00
Schedule: F 1
Room: CAMPION HALL 204
Satisfies Core Requirement: None
Comments: None
Prerequisites: None
Corequisites: CHEM2231.
Cross-listed with: None
Frequency: Annually

CHEM223514
Organic Chemistry Discussion I
WONG, ALEXANDER
Fall 2019
Required of all students in CHEM2231. Discussion of organic synthesis design, spectroscopic analysis, reaction mechanisms, and other lecture topics in small groups.

Credits: 00
Schedule: F 2
Room: MERKERT CENTER 130
Satisfies Core Requirement: None
Comments: None
Prerequisites: None
Corequisites: CHEM2231.
Cross-listed with: None
Frequency: Annually

CHEM223515
Organic Chemistry Discussion I
PARVIN, LUCAS S
Fall 2019
Required of all students in CHEM2231. Discussion of organic synthesis design, spectroscopic analysis, reaction mechanisms, and other lecture topics in small groups.

Credits: 00
Schedule: M 2
Room: MERKERT CENTER 130
Satisfies Core Requirement: None
Comments: None
Prerequisites: None
Corequisites: CHEM2231.
Cross-listed with: None
Frequency: Annually

CHEM223516
Organic Chemistry Discussion I
BENTLEY, SIERRA K
Fall 2019
Required of all students in CHEM2231. Discussion of organic synthesis design, spectroscopic analysis, reaction mechanisms, and other lecture topics in small groups.

Credits: 00
Schedule: W 2
Room: CAMPION HALL 231
Satisfies Core Requirement: None
Comments: None
Prerequisites: None
Corequisites: CHEM2231.

Frequency: Annually

CHEM223701
Gateway: Organic Chemistry Discussion I
KATIVHU, ELTON T; DEAK, HOLLY L
Fall 2019
Required of all students in Gateway Organic Chemistry. Discussion will offer a fairly comprehensive review of the material presented in lecture, with a focus on the key concepts needed for problem-solving in a small group setting.

**Credits:** 01  
**Schedule:** W 2  
**Room:** CARNEY HALL 305  
**Satisfies Core Requirement:** None  
**Comments:** Department Permission required.  
**Prerequisites:** None  
**Corequisites:** CHEM2231.  
**Cross-listed with:** None  
**Frequency:** Annually

---

**CHEM224101**  
**Honors Organic Chemistry I**  
**BYERS, JEFFERY; LIU, SHIH-YUAN**  
**Fall 2019**  
This course is a continuation of the CHEM1117-1118 honors sequence and will concentrate on the structure, bonding, and reactivity of organic compounds. Particular emphasis will be placed on stereochemistry, conformational analysis, reaction mechanisms, principles of organic synthesis, and modern spectroscopic methods.

**Credits:** 03  
**Schedule:** T TH 9*  
**Room:** MERKERT CENTER 129  
**Satisfies Core Requirement:** None  
**Comments:** Registration with instructor's approval only.  
**Prerequisites:** CHEM1117 AND CHEM1120 AND CHEM1118 AND CHEM1119. With permission of the Instructor.  
**Corequisites:** CHEM2243 AND CHEM2245.  
**Cross-listed with:** None  
**Frequency:** Annually

---

**CHEM224301**  
**Honors Organic Chemistry I Laboratory**  
**YOUNG, ALLISON P**
Fall 2019
Laboratory course required for students enrolled in Honors Organic Chemistry (CHEM2241). Students will be instructed in experimental techniques relevant to research in contemporary organic chemistry. It will solidify concepts that are taught in lecture and provide a forum for discovery-based learning in organic chemistry.

Credits: 01
Schedule: W 12 15-4
Room: MERKERT CENTER 021
Satisfies Core Requirement: None
Comments: Lab fee required.
Prerequisites: None
Corequisites: CHEM2241.
Cross-listed with: None
Frequency: Annually

CHEM224302
Honors Organic Chemistry I Laboratory
YOUNG, ALLISON P
Fall 2019
Laboratory course required for students enrolled in Honors Organic Chemistry (CHEM2241). Students will be instructed in experimental techniques relevant to research in contemporary organic chemistry. It will solidify concepts that are taught in lecture and provide a forum for discovery-based learning in organic chemistry.

Credits: 01
Schedule: TH 12-4
Room: MERKERT CENTER 021
Satisfies Core Requirement: None
Comments: Lab fee required.
Prerequisites: None
Corequisites: CHEM2241.
Cross-listed with: None
Frequency: Annually

CHEM224501
Honors Organic Chemistry Discussion I
BYRNE, KEVIN T
Fall 2019
Required of all students in CHEM2241. Discussion of organic synthesis design, spectroscopic analysis, reaction mechanisms, and other lecture topics in small groups.

Credits: 00
Schedule: M 6
Room: MERKERT CENTER 129
Satisfies Core Requirement: None
Comments: None
Prerequisites: None
Corequisites: CHEM2241.
Cross-listed with: None
Frequency: Annually

CHEM224502
Honors Organic Chemistry Discussion I
BYRNE, KEVIN T
Fall 2019
Required of all students in CHEM2241. Discussion of organic synthesis design, spectroscopic analysis, reaction mechanisms, and other lecture topics in small groups.

Credits: 00
Schedule: T 6
Room: None
Satisfies Core Requirement: None
Comments: None
Prerequisites: None
Corequisites: CHEM2241.
Cross-listed with: None
Frequency: Annually

CHEM224701
Honors Organic Pre-Lab
MORKEN, JAMES P
Fall 2019
This 50 minute lecture will discuss the principles and theories behind the experiments performed in the laboratory course.

**Credits:** 00  
**Schedule:** M 10  
**Room:** CAMPION HALL 204  
**Satisfies Core Requirement:** None  
**Comments:** None  
**Prerequisites:** None  
**Corequisites:** CHEM2243.  
**Cross-listed with:** None  
**Frequency:** Annually

---

**CHEM335101**  
**Analytical Chemistry**  
**METZ, KENNETH R**  
**Fall 2019**  
Designed primarily for sophomore and junior students, this course is an introduction to the principles and practice of analytical chemistry, including the statistical analysis of data and widely-used chemical methods and instrumental approaches such as chromatography, spectrophotometry, and electrochemistry. In the laboratory, the aims are for students to develop good analytical technique and to acquire accurate, precise data.

**Credits:** 04  
**Schedule:** M W F 11  
**Room:** HIGGINS HALL 310  
**Satisfies Core Requirement:** None  
**Comments:** None  
**Prerequisites:** CHEM1110 AND CHEM1109.  
**Corequisites:** CHEM3355 AND CHEM3353.  
**Cross-listed with:** None  
**Frequency:** Annually

---

**CHEM335301**  
**Analytical Chemistry Laboratory**  
**METZ, KENNETH R**  
**Fall 2019**
Laboratory required of all students enrolled in CHEM3351. One four-hour period per week.

Credits: 00
Schedule: W 1-5
Room: MERKERT CENTER 120
Satisfies Core Requirement: None
Comments: Lab fee required
Prerequisites: None
Corequisites: CHEM3351.
Cross-listed with: None
Frequency: Annually

CHEM335302
Analytical Chemistry Laboratory
METZ, KENNETH R
Fall 2019
Laboratory required of all students enrolled in CHEM3351. One four-hour period per week.

Credits: 00
Schedule: W 5-9
Room: MERKERT CENTER 120
Satisfies Core Requirement: None
Comments: Lab fee required
Prerequisites: None
Corequisites: CHEM3351.
Cross-listed with: None
Frequency: Annually

CHEM335303
Analytical Chemistry Laboratory
METZ, KENNETH R
Fall 2019
Laboratory required of all students enrolled in CHEM3351. One four-hour period per week.

Credits: 00
Schedule: TH 1-5
Room: MERKERT CENTER 120
Satisfies Core Requirement: None
Comments: Lab fee required
Prerequisites: None
Corequisites: CHEM3351.
Cross-listed with: None
Frequency: Annually

CHEM335304
Analytical Chemistry Laboratory
METZ, KENNETH R
Fall 2019
Laboratory required of all students enrolled in CHEM3351. One four-hour period per week.

Credits: 00
Schedule: F 1-5
Room: MERKERT CENTER 120
Satisfies Core Requirement: None
Comments: Lab fee required
Prerequisites: None
Corequisites: CHEM3351.
Cross-listed with: None
Frequency: Annually

CHEM335501
Analytical Chemistry Discussion
LO, WEI SHANG
Fall 2019
Required of all students in CHEM3351. Discussion of lecture topics and problem-solving methods in small groups.

Credits: 00
Schedule: T 3
Room: MERKERT CENTER 127
Satisfies Core Requirement: None

Fall 2019
Students may engage in a research project that is limited in scope under the supervision of a faculty member.
CHEM446101
Biochemistry I
CHATTERJEE, ABHISHEK
Fall 2019
This course is a two-semester introductory-level course in biochemistry. Topics in the first semester concentrate on protein structure and function, bioenergetics, kinetics and mechanisms of enzyme reactions, intermediary metabolism, control of metabolic pathways, and photosynthesis. Topics in the second semester concentrate on the structure of nucleic acids, recombinant DNA technology, mechanisms of gene rearrangements, DNA replication, RNA synthesis and splicing, protein synthesis, control of gene expression, membrane transport, and hormone action. Experimental methods will also be discussed as they relate to course topics.

Credits: 03
Schedule: T TH 9*
Room: MERKERT CENTER 127
Satisfies Core Requirement: None
Comments: None
Prerequisites: CHEM2232 AND CHEM2231 AND BIOL2000. OR equivalent.
Corequisites: CHEM4463.
Cross-listed with: None
Frequency: Annually
Required of all students in CHEM4461. Discussion of lecture topics and problem-solving methods in small groups.

Credits: 00
Schedule: W 6
Room: MERKERT CENTER 130
Satisfies Core Requirement: None
Comments: None
Prerequisites: None
Corequisites: CHEM4461. CHEM4461.
Cross-listed with: None
Frequency: Annually

CHEM446302
Biochemistry Discussion I
TROYAN, RACHEL L
Fall 2019
Required of all students in CHEM4461. Discussion of lecture topics and problem-solving methods in small groups.

Credits: 00
Schedule: T 6
Room: HIGGINS HALL 225
Satisfies Core Requirement: None
Comments: None
Prerequisites: None
Corequisites: CHEM4461. CHEM4461.

CHEM446303
Biochemistry Discussion I
JEWEL, DELILAH
Fall 2019
Required of all students in CHEM4461. Discussion of lecture topics and problem-solving methods in small groups.
CHEM446501
Biochemistry (Chemistry Majors)
GAO, JIANMIN
Fall 2019
This course is an accelerated one-semester survey of the basic principles of biochemistry emphasizing a broad understanding of the chemical events in living systems. Although the course is an introduction to biochemistry, prior proficiency in general and organic chemistry is required. Topics will include structure and function of biological molecules, including proteins, enzymes, nucleic acids and biological membranes. Also covered in the course will be bioenergetics, metabolism and photosynthesis. Experimental methods will also be discussed as they relate to course topics. This course fulfills the biochemistry requirement for the Chemistry major. Non-chemistry majors are requested to consult with the instructor before registering for this course.

Credits: 03
Schedule: T TH 9*
Room: CAMPION HALL 302
Satisfies Core Requirement: None
Comments: None
Prerequisites: CHEM2232 AND CHEM2231. Non-chemistry majors are requested to consult with the instructor before registering for this course.
Corequisites: CHEM4466.

CHEM447301

Physical Chemistry (Biochemistry Majors)
HAEFFNER, JAN F

Fall 2019
This course is an introduction to physical chemistry. The following topics are covered: thermodynamics, transport properties, chemical kinetics, quantum mechanics, and spectroscopy. Applications to biochemical systems are emphasized.

**Credits:** 03  
**Schedule:** M W F 10  
**Room:** MERKERT CENTER 130  
**Satisfies Core Requirement:** None  
**Comments:** None  
**Prerequisites:** CHEM2232 AND MATH1101.  
**Corequisites:** CHEM4474. PHYS2100-2101 (or equivalent) are pre- or co-requisites.  
**Cross-listed with:** None  
**Frequency:** Annually

---

**CHEM447501**  
**Physical Chemistry I**  
**MC FADDEN, DAVID L**  
**Fall 2019**  
This course deals with the foundations and applications of thermodynamics and reaction kinetics. Topics include: (1) classical thermodynamics, including the Laws of Thermodynamics, Helmholtz and Gibbs energies, chemical potential, and thermodynamic descriptions of phase equilibria and chemical equilibrium; (2) kinetic theory of gases; (3) chemical reaction rate laws and mechanisms.

**Credits:** 03  
**Schedule:** T TH 10 30*  
**Room:** MERKERT CENTER 129  
**Satisfies Core Requirement:** None  
**Comments:** None  
**Prerequisites:** None  
**Corequisites:** CHEM4477. MATH2202 and PHYS2100-2101/2200-2201 are pre- or co-requisites.  
**Cross-listed with:** None  
**Frequency:** Annually

CHEM553901
Principles and Applications of NMR Spectroscopy
JAYASUNDERA, THUSITHA
Fall 2019
Nuclear Magnetic Resonance is the bread and butter for all organic chemists. Although executing simple NMR experiments and interpreting the resulting spectra can seem trivial, the theory behind this highly versatile instrumentation method is rich, complex, and exciting. In this course, NMR theory relating to small molecules will be covered in lecture while concurrently running simple experiments in the lab to see the theoretical concepts illustrated in real life (no chemicals; dry lab with standard samples). Next, we will move on to the numerous applications of NMR in biochemistry, i.e., its application to large macromolecules such as proteins and nucleic acids. At this point, a computational project on NMR relaxation in biomolecules will introduce students to two software packages, making the subject matter more interactive and interesting. All items covered in class are designed to prepare students for graduate studies or a chemistry/biochemistry-related career in industry.

Credits: 03
Schedule: T 6-8 30
Room: MERKERT CENTER 130
Satisfies Core Requirement: None
Comments: None
Prerequisites: Organic Chemistry is recommended as a prerequisite.
Corequisites: None
Cross-listed with: None
Frequency: Annually

CHEM555301
Advanced Methods in Chemistry II
METZ, KENNETH R
Fall 2019
Designed for senior-level students, this course includes discussions of the principles, methods, and applications of sophisticated techniques in modern chemistry, such as magnetic resonance, mass spectrometry, x-ray diffraction, computer interfacing, and molecular modeling. The accompanying laboratory includes experiments with these methods.

Credits: 03
Schedule: W 7-9
Room: MERKERT CENTER 001
Satisfies Core Requirement: None
Comments: None
Prerequisites: CHEM3351.
Corequisites: CHEM5555.
Cross-listed with: None
Frequency: Periodically

CHEM555501
Advanced Methods in Chemistry Laboratory II
METZ, KENNETH R
Fall 2019
Laboratory required of all students enrolled in CHEM5553. One four-hour period per week.

Credits: 00
Schedule: T 12-4
Room: MERKERT CENTER 001
Satisfies Core Requirement: None
Comments: None
Prerequisites: None
Corequisites: CHEM5553.
Cross-listed with: None
Frequency: Periodically

CHEM556001
Principles of Chemical Biology
NIU, JIA
Fall 2019
An introduction to the chemistry of biological macromolecules, including proteins, nucleic acids, and carbohydrates. Students will learn the structure and nomenclature of the monomer building blocks as well as the macromolecules. Chemical principles that define secondary and tertiary biomolecular structure as well as state-of-the-art chemical (or chemical-biological) synthetic procedures will be presented. Examples of specific types of binding interactions, catalysis, or recognition processes as viewed from a chemical perspective will be discussed.

Credits: 03
Schedule: T TH 9*
Room: CAMPION HALL 204
Satisfies Core Requirement: None
Comments: None
Prerequisites: CHEM2232 or equivalent.
Corequisites: None
Cross-listed with: None
Frequency: Annually

CHEM556701
Chemical Biology: Structure and Function
WEERAPANA, ERANTHIE
Fall 2019
A major component of chemical biology is the application of chemical tools to the study of biological systems. This course will provide an overview of techniques such as genome sequencing, mass spectrometry-based proteomics, fluorescence imaging and unnatural amino-acid incorporation into proteins, with emphasis on examples drawn from the current literature. There will also be a focus on the mechanism of action of drugs, incorporating aspects of both the chemistry and biology of drug design.

Credits: 03
Schedule: T TH 12*
Room: MERKERT CENTER 129
Satisfies Core Requirement: None
Comments: None
Prerequisites: CHEM2231-2232, and CHEM4473 or CHEM4475-4476, or with permission of the instructor.
Corequisites: None
Cross-listed with: None
Frequency: Periodically

CHEM559101
Undergraduate Chemical Research I
ARMSTRONG, WILLIAM
Fall 2019
The essential feature of this course is an independent research project performed under the supervision of a faculty member. The individual work will be preceded by a series of lectures and demonstrations on the use of the library and several essential laboratory techniques.

Credits: 03
Schedule: BY ARRANGEMENT
Room: None
Satisfies Core Requirement: None
Comments: Course is intended for seniors. Continuation to CHEM5592 requires permission of the adviser.
Prerequisites: With permission of the Instructor. With permission of the Department.
Corequisites: None

MORKEN, JAMES P
Fall 2019
The essential feature of this course is an independent research project performed under the supervision of a faculty member. The individual work will be preceded by a series of lectures and demonstrations on the use of the library and several essential laboratory techniques.

Credits: 03
Schedule: BY ARRANGEMENT
Room: None
Satisfies Core Requirement: None
Comments: Course is intended for seniors. Continuation to CHEM5592 requires permission of the adviser.
Prerequisites: With permission of the Instructor. With permission of the Department.

CHEM661101
Scientific Communication in Chemistry I
BYERS, JEFFERY; WANG, DUNWEI
Fall 2019
This course seeks to best facilitate the transition of incoming graduate students to successful researchers in chemistry. Specifically, students in this course will practice and improve on various communication skills including scientific presentations, as well as writing articles and proposals. Ethics and social responsibilities of performing chemical research will also be discussed.
CHEM664001
Computational Chemistry: Model, Method, and Mechanism
HAEFFNER, JAN F
Fall 2019
The goal of the course is to develop skills in using computational chemistry software in the Linux operating system environment and to get a basic understanding of the underlying theory and algorithms which these computer programs are built upon. Topics covered include Linux commands and shell script programming, as well as Python script programming, basic understanding of statistical thermodynamics, potential energy surface, stationary points, conformational space, molecular mechanics, quantum chemistry (Schrodinger equation, Huckel method, LCAO-concept, Hartree-Fock and post Hartree-Fock methods, density functional theory). Computer programs such as Gaussian, Jaguar, Gamess, MacroModel and Tinker will be used during the course.

Credits: 03
Schedule: M W F 2
Room: MERKERT CENTER 129
Satisfies Core Requirement: None
Comments: This course is intended for graduate students and will be graded pass/fail.
Prerequisites: CHEM4475 AND CHEM4476 AND CHEM2232 AND CHEM2231 AND MATH2202. Or equivalent.
Corequisites: None
Cross-listed with: None
Frequency: Annually
MOHANTY, UDAYAN

Fall 2019

Building upon the foundations of Physical Chemistry I and II, this course introduces phenomena at the interface between a solid and an electrolyte. It starts with a discussion on the Debye-Hückel theory of electrolytes, followed by studies on ions near charged surface and then moves on to applications to capacitance near the surface/electrolyte interface. The Marcus electron transfer reaction theory is discussed next. With the background information introduced, the course examines applications to the semiconductor/liquid interfaces, with a focus on the potential applications of such systems for energy conversion and storage. Modern characterization techniques such as transient open-circuit-decay, diffusion equation, and titration methods will be studied, in combination with linear potential sweep and cyclic voltammetry as well as electrochemical impedance spectroscopy. The general concepts of photoelectrochemistry and batteries will be introduced within the context of solar energy harvesting and storage.

Credits: 03
Schedule: T TH 10 30*
Room: MCGUINN HALL 526
Satisfies Core Requirement: None
Comments: None
Prerequisites: CHEM4475 AND MATH2202 AND CHEM4476.
Corequisites: None
Cross-listed with: None
Frequency: Periodically

CHEM667601
Physical Chemistry: Principles and Applications

The course will cover modern methods in quantum mechanics, statistical mechanics, and dynamics, with applications to solid state, liquids, and biophysics. In quantum mechanics, topics will include particle in a box, time-independent perturbation theory, time-dependent perturbation theory, tunneling, and applications. In statistical mechanics, topics will include canonical partition function with applications to Bose and Fermi systems, solid-state physics, liquids, and biophysics. In dynamics, topics will include Fick's Law, regression hypothesis, time-correlation functions, and applications.
CHEM779901
Readings and Research I
ROBERTS, MARY F
Fall 2019
A course required of Ph.D. matriculants for each semester of research.

Credits: 03
Schedule: BY ARRANGEMENT
Room: None
Satisfies Core Requirement: None
Comments: Lab fee required.
Prerequisites: None
Corequisites: None
Cross-listed with: None
Frequency: Annually

CHEM779902
Readings and Research I
HOVEYDA, AMIR H
Fall 2019
A course required of Ph.D. matriculants for each semester of research.

Credits: 03
Schedule: BY ARRANGEMENT
CHEM779903
Readings and Research I
WEERAPANA, ERANTHIE
Fall 2019

CHEM880201
Thesis Direction
ROBERTS, MARY F
Fall 2019
A non-credit course for those who have received six credits for Thesis Seminar but who have not finished their thesis. This course must be registered for and the continuation fee paid each semester until the thesis is completed.
CHEM880501
Departmental Seminar I
DEPT
Fall 2019
This is a series of research seminars by leading scientists, both from within the department and from other institutions, that are presented on a regular (usually weekly) basis.

Credits: 01
Schedule: TH 4-6
Room: MERKERT CENTER 127
Satisfies Core Requirement: None
Comments: None
Prerequisites: None

CHEM999801
Doctoral Cumulative Examinations
None 
Fall 2019
This course consists of a series of cumulative written examinations that test the student's development in his or her major field of interest (organic, inorganic, analytical, physical, biochemistry) and critical awareness and understanding of the current literature. Six of sixteen exams must be passed over a two-year period.

Credits: 01  
Schedule: W 7-10

Chemistry Courses: Spring 2020

CHEM110201  
Intersection of Science and Painting  
MC FADDEN, DAVID L  
Spring 2020  
In this course, material is drawn from physics, chemistry, and mineralogy to give the non-science student a scientific understanding of light, color, and colorants used in painting, as well as an introduction to the methods of scientific analysis that can be brought to bear on conservation and restoration of paintings, on investigating hypotheses in art history, and on establishing authenticity of artwork.

Credits: 03  
Schedule: T TH 10 30*  
Room: CAMPION HALL 204  
Satisfies Core Requirement: Natural Science  
Comments: None  
Prerequisites: None  
Corequisites: None  
Cross-listed with: ARTH1130  
Frequency: Annually
CHEM110601
Chemistry and Society II
ARMSTRONG, WILLIAM
Spring 2020
This is a two-semester sequence. The second semester focuses on the basic principles of organic chemistry and topics covered include the chemistry of life, nutrition, medicine, and agriculture. The goal of the course is to develop a knowledge base from which one can make intelligent decisions about local global environmental issues as well as formulate solutions to the ever-increasingly complex problems of today's technological society.

Credits: 03
Schedule: T TH 3*
Room: FULTON HALL 511
Satisfies Core Requirement: Natural Science
Comments: For non-science majors or for those who do not require a lab science course.
Prerequisites: None
Corequisites: None
Cross-listed with: None
Frequency: Annually

CHEM110801
Chemistry and Food
FOX, DANIEL J
Spring 2020
In this course, chemical principles will be used to better understand the foods we eat. Topics to be explored include the chemical composition of foods and how that composition relates to nutrition, allergic responses, and flavor. The chemical reactions and physical changes that take place during food preparation will be explored, with a particular emphasis on how different ingredients impact the end result.

Credits: 03
Schedule: null
Room: None
Satisfies Core Requirement: None
Comments: None
Prerequisites: None
Corequisites: None
Cross-listed with: None
Frequency: Periodically

CHEM111001
General Chemistry II
WAEGELE, MATTHIAS
Spring 2020
This course is intended for students whose major interest is science or medicine. It offers a rigorous introduction to the principles of chemistry with special emphasis on quantitative relationships, chemical equilibrium, and the structures of atoms, molecules, and crystals. The properties of the more common elements and compounds are considered against a background of these principles and the periodic table.

Credits: 03
Schedule: M W F 9
Room: DEVLIN HALL 008
Satisfies Core Requirement: Natural Science
Comments: None
Prerequisites: CHEM1109.
Corequisites: CHEM1111 AND CHEM1112 AND CHEM1113 AND CHEM1114.
Cross-listed with: None
Frequency: Annually

CHEM111002
General Chemistry II
FOX, DANIEL J
Spring 2020
This course is intended for students whose major interest is science or medicine. It offers a rigorous introduction to the principles of chemistry with special emphasis on quantitative relationships, chemical equilibrium, and the structures of atoms, molecules, and crystals. The properties of the more common elements and compounds are considered against a background of these principles and the periodic table.

Credits: 03
Schedule: M W F 1
Room: MERKERT CENTER 127
Satisfies Core Requirement: Natural Science
Comments: None
Prerequisites: CHEM1109.
Corequisites: CHEM1111 AND CHEM1112 AND CHEM1113 AND CHEM1114.
Cross-listed with: None
Frequency: Annually

CHEM111003
General Chemistry II
HAEFFNER, JAN F
Spring 2020
This course is intended for students whose major interest is science or medicine. It offers a rigorous introduction to the principles of chemistry with special emphasis on quantitative relationships, chemical equilibrium, and the structures of atoms, molecules, and crystals. The properties of the more common elements and compounds are considered against a background of these principles and the periodic table.
Credits: 03
Schedule: M W F 2
Room: MERKERT CENTER 127
Satisfies Core Requirement: Natural Science
Comments: None
Prerequisites: CHEM1109.
Corequisites: CHEM1111 AND CHEM1112 AND CHEM1113 AND CHEM1114.
Cross-listed with: None
Frequency: Annually

CHEM111004
General Chemistry II
YOUNG, ALLISON P
Spring 2020
This course is intended for students whose major interest is science or medicine. It offers a rigorous introduction to the principles of chemistry with special emphasis on quantitative relationships, chemical equilibrium, and the structures of atoms, molecules, and crystals. The properties of the more common elements and compounds are considered against a background of these principles and the periodic table.
CHEM111005
General Chemistry II
FOX, DANIEL J
Spring 2020
This course is intended for students whose major interest is science or medicine. It offers a rigorous introduction to the principles of chemistry with special emphasis on quantitative relationships, chemical equilibrium, and the structures of atoms, molecules, and crystals. The properties of the more common elements and compounds are considered against a background of these principles and the periodic table.

CHEM111201
General Chemistry Laboratory II
GAO, JIANMIN
Spring 2020
Laboratory required of all students enrolled in CHEM1110. One three-hour period per week. Experiments reflect and apply the principles learned in the lecture course. Computers are used to both acquire and analyze data. The semester concludes with a group project where students are required to design their own experiments to solve a problem.

**Credits:** 01

**Schedule:** M 10-12 50

**Room:** MERKERT CENTER 116

**Satisfies Core Requirement:** Natural Science

**Comments:** Lab fee required

**Prerequisites:** CHEM1111.

**Corequisites:** CHEM1110.

**Cross-listed with:** None

**Frequency:** Annually

CHEM111411
General Chemistry Discussion II
TYROL, CHET C
Spring 2020
Required of all students in CHEM1110. Discussion of lecture topics and problem-solving methods in small groups.

Credits: 00
Schedule: TH 3
Room: MERKERT CENTER 129
Satisfies Core Requirement: None
Comments: None
Prerequisites: None
Corequisites: CHEM1110. CHEM1110.
Cross-listed with: None
Frequency: Annually

CHEM111412
General Chemistry Discussion II
DEPARTMENT
Spring 2020
Required of all students in CHEM1110. Discussion of lecture topics and problem-solving methods in small groups.

Credits: 00
Schedule: F 12
Room: MERKERT CENTER 129
Satisfies Core Requirement: None
Comments: None
Prerequisites: None
Corequisites: CHEM1110. CHEM1110.
Cross-listed with: None
Frequency: Annually
CHEM111413
General Chemistry Discussion II
NG, SHAWN V
Spring 2020
Required of all students in CHEM1110. Discussion of lecture topics and problem-solving methods in small groups.

Credits: 00
Schedule: M 4
Room: MERKERT CENTER 129
Satisfies Core Requirement: None
Comments: None
Prerequisites: None
Corequisites: CHEM1110. CHEM1110.
Cross-listed with: None
Frequency: Annually

CHEM111414
General Chemistry Discussion II
None
Spring 2020
Required of all students in CHEM1110. Discussion of lecture topics and problem-solving methods in small groups.

Credits: 00
Schedule: M 5
Room: CAMPION HALL 204
Satisfies Core Requirement: None
Comments: None
Prerequisites: None
Corequisites: CHEM1110. CHEM1110.
Cross-listed with: None
Frequency: Annually

CHEM111415
General Chemistry Discussion II
NG, SHAWN V
Spring 2020
Required of all students in CHEM1110. Discussion of lecture topics and problem-solving methods in small groups.

Credits: 00
Schedule: W 1
Room: MERKERT CENTER 129
Satisfies Core Requirement: None
Comments: None
Prerequisites: None
Corequisites: CHEM1110. CHEM1110.
Cross-listed with: None
Frequency: Annually

CHEM111416
General Chemistry Discussion II
BENSALAH, ADAM T
Spring 2020
Required of all students in CHEM1110. Discussion of lecture topics and problem-solving methods in small groups.

Credits: 00
Schedule: W 2
Room: MERKERT CENTER 129
Satisfies Core Requirement: None
Comments: None
Prerequisites: None
Corequisites: CHEM1110. CHEM1110.
Cross-listed with: None
Frequency: Annually

CHEM111417
General Chemistry Discussion II
None
Spring 2020
Required of all students in CHEM1110. Discussion of lecture topics and problem-solving methods in small groups.
CHEM111418
General Chemistry Discussion II
XU, NINGXIN
Spring 2020
Required of all students in CHEM1110. Discussion of lecture topics and problem-solving methods in small groups.

Credits: 00
Schedule: F 1
Room: MERKERT CENTER 129
Satisfies Core Requirement: None
Comments: None
Prerequisites: None
Corequisites: CHEM1110. CHEM1110.
Cross-listed with: None
Frequency: Annually

CHEM111419
General Chemistry Discussion II
KATIVHU, ELTON T
Spring 2020
Required of all students in CHEM1110. Discussion of lecture topics and problem-solving methods in small groups.

Credits: 00
Schedule: M 9
Room: MERKERT CENTER 130
Satisifies Core Requirement: None  
Comments: None  
Prerequisites: None  
Corequisites: CHEM1110. CHEM1110.  
Cross-listed with: None  
Frequency: Annually  

CHEM11420  
General Chemistry Discussion II  
GIARDINO, GAVIN J  
Spring 2020  
Required of all students in CHEM1110. Discussion of lecture topics and problem-solving methods in small groups.  

Credits: 00  
Schedule: W 10  
Room: MERKERT CENTER 129  
Satisifies Core Requirement: None  
Comments: None  
Prerequisites: None  
Corequisites: CHEM1110. CHEM1110.  
Cross-listed with: None  
Frequency: Annually  

CHEM11421  
General Chemistry Discussion II  
KATIVHU, ELTON T  
Spring 2020  
Required of all students in CHEM1110. Discussion of lecture topics and problem-solving methods in small groups.  

Credits: 00  
Schedule: M 11  
Room: MERKERT CENTER 129  
Satisifies Core Requirement: None  
Comments: None  
Prerequisites: None
Corequisites: CHEM1110. CHEM1110.
Cross-listed with: None
Frequency: Annually

CHEM111422
General Chemistry Discussion II
BENTLEY, SIERRA K
Spring 2020
Required of all students in CHEM1110. Discussion of lecture topics and problem-solving methods in small groups.

Credits: 00
Schedule: W 11
Room: MERKERT CENTER 129
Satisfies Core Requirement: None
Comments: None
Prerequisites: None
Corequisites: CHEM1110. CHEM1110.
Cross-listed with: None
Frequency: Annually

CHEM111423
General Chemistry Discussion II
XU, NINGXIN
Spring 2020
Required of all students in CHEM1110. Discussion of lecture topics and problem-solving methods in small groups.

Credits: 00
Schedule: W 1
Room: CAMPION HALL 204
Satisfies Core Requirement: None
Comments: None
Prerequisites: None
Corequisites: CHEM1110. CHEM1110.
Cross-listed with: None
Frequency: Annually
CHEM111424
General Chemistry Discussion II
XU, NINGXIN
Spring 2020
Required of all students in CHEM1110. Discussion of lecture topics and problem-solving methods in small groups.

Credits: 00
Schedule: F 10
Room: MERKERT CENTER 129
Satisfies Core Requirement: None
Comments: None
Prerequisites: None
Corequisites: CHEM1110. CHEM1110.
Cross-listed with: None
Frequency: Annually

CHEM111425
General Chemistry Discussion II
NG, SHAWN V
Spring 2020
Required of all students in CHEM1110. Discussion of lecture topics and problem-solving methods in small groups.

Credits: 00
Schedule: F 11
Room: MERKERT CENTER 129
Satisfies Core Requirement: None
Comments: None
Prerequisites: None
Corequisites: CHEM1110. CHEM1110.
Cross-listed with: None
Frequency: Annually

CHEM111426
General Chemistry Discussion II
TYROL, CHET C

https://www.bc.edu/content/bc-web/academics/sites/university-catalog/courses/arts-sciences/chemistry.html
Spring 2020
Required of all students in CHEM1110. Discussion of lecture topics and problem-solving methods in small groups.

Credits: 00
Schedule: F 2
Room: MERKERT CENTER 129
Satisfies Core Requirement: None
Comments: None
Prerequisites: None
Corequisites: CHEM1110, CHEM1110.
Cross-listed with: None
Frequency: Annually

CHEM11801
Honors Modern Chemistry II
WASA, MASAYUKI
Spring 2020
This is the second part of a one-year course that serves as the Honors alternative to the two-semester General Chemistry CHEM1109-1110. This course will build upon the chemical fundamentals that were covered in the first semester to introduce organic chemistry as well as its physical basis. Topics to be covered include the structure and reactivity of organic compounds.

Credits: 03
Schedule: T TH 9*
Room: MERKERT CENTER 130
Satisfies Core Requirement: Natural Science
Comments: Department permission required.
Prerequisites: CHEM1117.
Corequisites: CHEM1122 AND CHEM1120.
Cross-listed with: None
Frequency: Annually

CHEM12001
Honors Modern Chemistry Laboratory II
YOUNG, ALLISON P
Spring 2020
Laboratory required for all students enrolled in CHEM1118. This laboratory course stresses discovery-based experiments. It uses state-of-the-art instrumentation to illustrate the principles discussed in CHEM1117-1118 and introduces students to techniques used in modern chemical research. One three-hour period per week.

Credits: 01
Schedule: M 1-4
Room: MERKERT CENTER 120
Satisfies Core Requirement: None
Comments: Lab fee required
Prerequisites: None
Corequisites: CHEM1118.
Cross-listed with: None
Frequency: Annually

CHEM112002
Honors Modern Chemistry Laboratory II
YOUNG, ALLISON P
Spring 2020
Laboratory required for all students enrolled in CHEM1118. This laboratory course stresses discovery-based experiments. It uses state-of-the-art instrumentation to illustrate the principles discussed in CHEM1117-1118 and introduces students to techniques used in modern chemical research. One three-hour period per week.

Credits: 01
Schedule: M 5 30-8 30
Room: MERKERT CENTER 120
Satisfies Core Requirement: None
Comments: Lab fee required
Prerequisites: None
Corequisites: CHEM1118.
Cross-listed with: None
Frequency: Annually

CHEM112201
Honors Modern Chemistry Discussion II
CONGER, RYAN P
Spring 2020
Required of all students in CHEM1118. Discussion of lecture topics and problem-solving methods in small groups.

Credits: 00
Schedule: T 6
Room: MERKERT CENTER 129
Satisfies Core Requirement: None
Comments: None
Prerequisites: None
Corequisites: CHEM1118.
Cross-listed with: None
Frequency: Annually

CHEM112202
Honors Modern Chemistry Discussion II
CONGER, RYAN P
Spring 2020
Required of all students in CHEM1118. Discussion of lecture topics and problem-solving methods in small groups.

Credits: 00
Schedule: W 6
Room: MERKERT CENTER 129
Satisfies Core Requirement: None
Comments: None
Prerequisites: None
Corequisites: CHEM1118.
Cross-listed with: None
Frequency: Annually

CHEM112801
Gateway: General Chemistry Discussion II
BYRNE, KEVIN T
Spring 2020
Required of all students in Gateway General Chemistry. Discussion will offer a comprehensive review of the material presented in lecture, with a focus on the key mathematical and chemical concepts needed for problem-solving, in a small group setting.

Credits: 01
Schedule: T 4 30
Room: HIGGINS HALL 265
Satisfies Core Requirement: None
Comments: Department permission required.
Prerequisites: None
Corequisites: CHEM1110.
Cross-listed with: None
Frequency: Annually

---

CHEM112802
Gateway: General Chemistry Discussion II
BYRNE, KEVIN T
Spring 2020
Required of all students in Gateway General Chemistry. Discussion will offer a comprehensive review of the material presented in lecture, with a focus on the key mathematical and chemical concepts needed for problem-solving, in a small group setting.

Credits: 01
Schedule: T 5 30
Room: HIGGINS HALL 265
Satisfies Core Requirement: None
Comments: Department permission required.
Prerequisites: None
Corequisites: CHEM1110.
Cross-listed with: None
Frequency: Annually

CHEM223201
Organic Chemistry II
MORKEN, JAMES P
Spring 2020
An introduction to the chemistry, properties, and uses of organic compounds. The correlation of structure with properties and reaction mechanisms and the modern approach to structural and synthetic problems are stressed throughout. In the laboratory, the aim is acquisition of sound experimental techniques through the synthesis of selected compounds.

**Credits:** 03

**Schedule:** M W F 9

**Room:** MERKERT CENTER 127

**Satisfies Core Requirement:** None

**Comments:** None

**Prerequisites:** CHEM2231.

**Corequisites:** CHEM2234. CHEM2236.

**Cross-listed with:** None

**Frequency:** Annually

---

**CHEM223202**

**Organic Chemistry II**

**DEAK, HOLLY L**

**Spring 2020**

CHEM223401
Organic Chemistry Laboratory II
SNAPPER, MARC
Spring 2020
Laboratory required of all students enrolled in CHEM2232. One four-hour period per week. Having acquired the necessary lab skills in Organic Chem Lab I, students now can carry out reaction chemistry in the laboratory that is being taught in the lecture course.

Credits: 01
Schedule: M 12-3 50
Room: MERKERT CENTER 018
Satisfies Core Requirement: None
Comments: Lab fee required
Prerequisites: CHEM2233.
Corequisites: CHEM2232.
Cross-listed with: None
Frequency: Annually

CHEM223402
Organic Chemistry Laboratory II
BYERS, JEFFERY
Spring 2020
Laboratory required of all students enrolled in CHEM2232. One four-hour period per week. Having acquired the necessary lab skills in Organic Chem Lab I, students now can carry out reaction chemistry in the laboratory that is being taught in the lecture course.

Credits: 01
Schedule: T 12-3 50
Room: MERKERT CENTER 018
Satisfies Core Requirement: None
Comments: Lab fee required
Prerequisites: CHEM2233.
Corequisites: CHEM2232.
Cross-listed with: None
Frequency: Annually

CHEM223403
Organic Chemistry Laboratory II
WASA, MASAYUKI
Spring 2020
Laboratory required of all students enrolled in CHEM2232. One four-hour period per week. Having acquired the necessary lab skills in Organic Chem Lab I, students now can carry out reaction chemistry in the laboratory that is being taught in the lecture course.

Credits: 01
Schedule: W 12-3 50
Room: MERKERT CENTER 018
Satisfies Core Requirement: None
Comments: Lab fee required

---

CHEM223601  
**Organic Chemistry Discussion II**  
**WILHELMSEN, CHRISTOPHER A**  
**Spring 2020**
Required of all students in CHEM2232. Discussion of organic synthesis design, spectroscopic analysis, reaction mechanisms, and other lecture topics in small groups.

Credits: 00
Schedule: M 3
Room: MERKERT CENTER 127
Satisfies Core Requirement: None
Comments: None
Prerequisites: None
Corequisites: CHEM2232.
Cross-listed with: None
Frequency: Annually

CHEM223602
Organic Chemistry Discussion II
QIN, CAN
Spring 2020
Required of all students in CHEM2232. Discussion of organic synthesis design, spectroscopic analysis, reaction mechanisms, and other lecture topics in small groups.

Credits: 00
Schedule: M 4
Room: MERKERT CENTER 127
Satisfies Core Requirement: None
Comments: None
Prerequisites: None
Corequisites: CHEM2232.
Cross-listed with: None
Frequency: Annually

CHEM223603
Organic Chemistry Discussion II
QIN, CAN
Spring 2020
Required of all students in CHEM2232. Discussion of organic synthesis design, spectroscopic analysis, reaction mechanisms, and other lecture topics in small groups.
CHEM223604
Organic Chemistry Discussion II
None
Spring 2020
Required of all students in CHEM2232. Discussion of organic synthesis design, spectroscopic analysis, reaction mechanisms, and other lecture topics in small groups.

Credits: 00
Schedule: M 6
Room: MERKERT CENTER 127
Satisfies Core Requirement: None
Comments: None
Prerequisites: None
Corequisites: CHEM2232.
Cross-listed with: None
Frequency: Annually

CHEM223605
Organic Chemistry Discussion II
KONG, ZIYIN
Spring 2020
Required of all students in CHEM2232. Discussion of organic synthesis design, spectroscopic analysis, reaction mechanisms, and other lecture topics in small groups.

Credits: 00
Schedule: T 5
Room: MERKERT CENTER 127
CHEM223606
Organic Chemistry Discussion II
None
Spring 2020
Required of all students in CHEM2232. Discussion of organic synthesis design, spectroscopic analysis, reaction mechanisms, and other lecture topics in small groups.
Credits: 00
Schedule: T 6
Room: MERKERT CENTER 127
Satisfies Core Requirement: None
Comments: None
Prerequisites: None
Corequisites: CHEM2232.
Cross-listed with: None
Frequency: Annually

CHEM223607
Organic Chemistry Discussion II
HACKNEY, MEAGAN E
Spring 2020
Required of all students in CHEM2232. Discussion of organic synthesis design, spectroscopic analysis, reaction mechanisms, and other lecture topics in small groups.
Credits: 00
Schedule: W 3
Room: MERKERT CENTER 127
Satisfies Core Requirement: None
Comments: None
Prerequisites: None
Corequisites: CHEM2232.
Cross-listed with: None
Frequency: Annually

CHEM223608
Organic Chemistry Discussion II
NAMIREMBE, SHEILA
Spring 2020
Required of all students in CHEM2232. Discussion of organic synthesis design, spectroscopic analysis, reaction mechanisms, and other lecture topics in small groups.

Credits: 00
Schedule: W 4
Room: MERKERT CENTER 127
Satisfies Core Requirement: None
Comments: None
Prerequisites: None
Corequisites: CHEM2232.
Cross-listed with: None
Frequency: Annually

CHEM223609
Organic Chemistry Discussion II
NAMIREMBE, SHEILA
Spring 2020
Required of all students in CHEM2232. Discussion of organic synthesis design, spectroscopic analysis, reaction mechanisms, and other lecture topics in small groups.

Credits: 00
Schedule: W 5
Room: MERKERT CENTER 127
Satisfies Core Requirement: None
Comments: None
Prerequisites: None
Corequisites: CHEM2232.
Cross-listed with: None
Frequency: Annually
CHEM223610
Organic Chemistry Discussion II
None
Spring 2020
Required of all students in CHEM2232. Discussion of organic synthesis design, spectroscopic analysis, reaction mechanisms, and other lecture topics in small groups.

Credits: 00
Schedule: W 6
Room: MERKERT CENTER 127
Satisfies Core Requirement: None
Comments: None
Prerequisites: None
Corequisites: CHEM2232.
Cross-listed with: None
Frequency: Annually

CHEM223611
Organic Chemistry Discussion II
ZHANG, XUNTONG
Spring 2020
Required of all students in CHEM2232. Discussion of organic synthesis design, spectroscopic analysis, reaction mechanisms, and other lecture topics in small groups.

Credits: 00
Schedule: TH 3
Room: CAMPION HALL 204
Satisfies Core Requirement: None
Comments: None
Prerequisites: None
Corequisites: CHEM2232.
Cross-listed with: None
Frequency: Annually

CHEM223612
Organic Chemistry Discussion II
ZHANG, XUNTONG
Spring 2020
Required of all students in CHEM2232. Discussion of organic synthesis design, spectroscopic analysis, reaction mechanisms, and other lecture topics in small groups.

Credits: 00
Schedule: TH 4
Room: CAMPION HALL 204
Satisfies Core Requirement: None
Comments: None
Prerequisites: None
Corequisites: CHEM2232.
Cross-listed with: None
Frequency: Annually

CHEM223613
Organic Chemistry Discussion II
WONG, ALEXANDER
Spring 2020
Required of all students in CHEM2232. Discussion of organic synthesis design, spectroscopic analysis, reaction mechanisms, and other lecture topics in small groups.

Credits: 00
Schedule: F 1
Room: CAMPION HALL 204
Satisfies Core Requirement: None
Comments: None
Prerequisites: None
Corequisites: CHEM2232.
Cross-listed with: None
Frequency: Annually

CHEM223614
Organic Chemistry Discussion II
WONG, ALEXANDER
Spring 2020
Required of all students in CHEM2232. Discussion of organic synthesis design, spectroscopic analysis, reaction mechanisms, and other lecture topics in small groups.
CHEM223615
Organic Chemistry Discussion II
WILHELMSEN, CHRISTOPHER A
Spring 2020
Required of all students in CHEM2232. Discussion of organic synthesis design, spectroscopic analysis, reaction mechanisms, and other lecture topics in small groups.

Credits: 00
Schedule: M 2
Room: MERKERT CENTER 130
Satisfies Core Requirement: None
Comments: None
Prerequisites: None
Corequisites: CHEM2232.
Cross-listed with: None
Frequency: Annually

CHEM223616
Organic Chemistry Discussion II
KONG, ZIYIN
Spring 2020
Required of all students in CHEM2232. Discussion of organic synthesis design, spectroscopic analysis, reaction mechanisms, and other lecture topics in small groups.

Credits: 00
Schedule: W 2
Room: CAMPION HALL 010
CHEM223801
Gateway: Organic Chemistry Discussion II
HACKY, MEAGAN E
Spring 2020
Required of all students in Gateway Organic Chemistry. Discussion will offer a fairly comprehensive review of the material presented in lecture, with a focus on the key concepts needed for problem-solving in a small group setting.

Credits: 01
Schedule: W 2
Room: MERKERT CENTER 130
Satisfies Core Requirement: None
Comments: Department permission required.
Prerequisites: None
Corequisites: CHEM1110.
Cross-listed with: None
Frequency: Annually

CHEM224201
Honors Organic Chemistry II
CHATTERJEE, ABHISHEK
Spring 2020
This course is a continuation of the CHEM1117-1118 honors sequence and will concentrate on the structure, bonding, and reactivity of organic compounds. Particular emphasis will be placed on stereochemistry, conformational analysis, reaction mechanisms, principles of organic synthesis, and modern spectroscopic methods.

Credits: 03
Schedule: T TH 9*
Room: MERKERT CENTER 129
Satisfies Core Requirement: None  
Comments: Registration with instructor's approval only.  
Prerequisites: CHEM2241.  
Corequisites: CHEM2234 AND CHEM2246.  
Cross-listed with: None  
Frequency: Annually

CHEM224601  
Honors Organic Chemistry Discussion II  
IFICARETTA, ELISE D  
Spring 2020  
Required of all students in CHEM2242. Discussion of organic synthesis design, spectroscopic analysis, reaction mechanisms, and other lecture topics in small groups.  
Credits: 00  
Schedule: M 6  
Room: MERKERT CENTER 129  
Satisfies Core Requirement: None  
Comments: None  
Prerequisites: None  
Corequisites: CHEM2242.  
Cross-listed with: None  
Frequency: Annually

CHEM224602  
Honors Organic Chemistry Discussion II  
IFICARETTA, ELISE D  
Spring 2020  
Required of all students in CHEM2242. Discussion of organic synthesis design, spectroscopic analysis, reaction mechanisms, and other lecture topics in small groups.  
Credits: 00  
Schedule: T 6  
Room: None  
Satisfies Core Requirement: None  
Comments: None  
Prerequisites: None
Corequisites: CHEM2242.
Cross-listed with: None
Frequency: Annually

CHEM332201
Introduction to Inorganic Chemistry
FOX, DANIEL J
Spring 2020
This course offers an introduction to inorganic chemistry. Topics include: applications of group theory to describe structure and bonding, coordination chemistry, organometallic chemistry, bioinorganic chemistry, crystal packing, and semiconducting and superconducting materials.

Credits: 03
Schedule: M W F 11
Room: MERKERT CENTER 130
Satisfies Core Requirement: None
Comments: Though not required, one year of Organic Chemistry (CHEM2231-2232 or CHEM1118 and CHEM2241) is recommended as a prerequisite for this course.
Prerequisites: CHEM1110 AND CHEM1109.
Corequisites: CHEM3324.
Cross-listed with: None
Frequency: Annually

---

CHEM332301
Inorganic Chemistry Discussion
GALLIN, CONNOR
Spring 2020
Required of all students in CHEM3322. Discussion of lecture topics in small groups.

Credits: 00
Schedule: M 5
Room: MERKERT CENTER 129
Satisfies Core Requirement: None
Comments: None
Prerequisites: None
Corequisites: None
**CHEM332302**  
**Inorganic Chemistry Discussion**  
**GALLIN, CONNOR**  
**Spring 2020**  
Required of all students in CHEM3322. Discussion of lecture topics in small groups.

**Credits:** 00  
**Schedule:** W 5  
**Room:** CARNEY HALL 007  
**Satisfies Core Requirement:** None  
**Comments:** None  
**Prerequisites:** None  
**Corequisites:** None  
**Cross-listed with:** None  
**Frequency:** Annually

---

**CHEM332401**  
**Inorganic Chemistry Laboratory**  
**FOX, DANIEL J**  
**Spring 2020**  
Laboratory required of all students enrolled in CHEM3322. One four-hour period per week.

**Credits:** 01  
**Schedule:** W 12-4  
**Room:** MERKERT CENTER 120  
**Satisfies Core Requirement:** None  
**Comments:** Lab fee required.  
**Prerequisites:** None  
**Corequisites:** CHEM3322.  
**Cross-listed with:** None  
**Frequency:** Annually

---

**CHEM332402**  
**Inorganic Chemistry Laboratory**
FOX, DANIEL J
Spring 2020
Laboratory required of all students enrolled in CHEM3322. One four-hour period per week.

Credits: 01
Schedule: TH 12-4
Room: MERKERT CENTER 120
Satisfies Core Requirement: None
Comments: Lab fee required.
Prerequisites: None
Corequisites: CHEM3322.
Cross-listed with: None
Frequency: Annually

CHEM339702
Research Module
HAEFFNER, JAN F
Spring 2020
Students may engage in a research project that is limited in scope under the supervision of a faculty member.

Credits: 01
Schedule: BY ARRANGEMENT
Room: None
Satisfies Core Requirement: None
Comments: None
Prerequisites: With permission of the Department.
Corequisites: None
Cross-listed with: None
Frequency: Annually

CHEM339703
Research Module
WEERAPANA, ERANTHIE
Spring 2020
Students may engage in a research project that is limited in scope under the supervision of a faculty member.
Credits: 01
Schedule: BY ARRANGEMENT
Room: None
Satisfies Core Requirement: None
Comments: None
Prerequisites: With permission of the Department.
Corequisites: None
Cross-listed with: None
Frequency: Annually

CHEM339705
Research Module
LIU, SHIH-YUAN
Spring 2020
Students may engage in a research project that is limited in scope under the supervision of a faculty member.

Credits: 01
Schedule: BY ARRANGEMENT
Room: None
Satisfies Core Requirement: None
Comments: None
Prerequisites: With permission of the Department.
Corequisites: None
Cross-listed with: None
Frequency: Annually

CHEM339708
Research Module
CHATTERJEE, ABHISHEK
Spring 2020
Students may engage in a research project that is limited in scope under the supervision of a faculty member.

Credits: 01
Schedule: BY ARRANGEMENT
Room: None
CHEM339711
Research Module
WAEGELE, MATTHIAS
Spring 2020
Students may engage in a research project that is limited in scope under the supervision of a faculty member.

Credits: 01
Schedule: BY ARRANGEMENT
Room: None
Satisfies Core Requirement: None
Comments: None
Prerequisites: With permission of the Department.
Corequisites: None
Cross-listed with: None
Frequency: Annually

CHEM339712
Research Module
ZHANG, XIAO-XIANG
Spring 2020
Students may engage in a research project that is limited in scope under the supervision of a faculty member.

Credits: 01
Schedule: BY ARRANGEMENT
Room: None
Satisfies Core Requirement: None
Comments: None
Prerequisites: With permission of the Department.
Corequisites: None  
Cross-listed with: None

CHEM446201  
Biochemistry II  
NIU, JIA  
Spring 2020  
This course is a two-semester introductory-level course in biochemistry. Topics in the first semester concentrate on protein structure and function, bioenergetics, kinetics and mechanisms of enzyme reactions, intermediary metabolism, control of metabolic pathways, and photosynthesis. Topics in the second semester concentrate on the structure of nucleic acids, recombinant DNA technology, mechanisms of gene rearrangements, DNA replication, RNA synthesis and splicing, protein synthesis, control of gene expression, membrane transport, and hormone action. Experimental methods will also be discussed as they relate to course topics.

Credits: 03  
Schedule: T TH 9*  
Room: MERKERT CENTER 127  
Satisfies Core Requirement: None  
Comments: None  
Prerequisites: CHEM2232 AND CHEM4461. OR equivalent.  
Corequisites: CHEM4464.  
Cross-listed with: None  
Frequency: Annually

---

CHEM446401  
Biochemistry Discussion II  
SU, QIWEN  
Spring 2020  
Required of all students in CHEM4462. Discussion of lecture topics and problem-solving methods, in small groups.

Credits: 00  
Schedule: W 6  
Room: MERKERT CENTER 130  
Satisfies Core Requirement: None
CHEM446402
Biochemistry Discussion II
SU, QIWEN
Spring 2020
Required of all students in CHEM4462. Discussion of lecture topics and problem-solving methods, in small groups.

Credits: 00
Schedule: T 6
Room: HIGGINS HALL 225
Satisfies Core Requirement: None
Comments: None
Prerequisites: None
Corequisites: CHEM4462.
Cross-listed with: None
Frequency: Annually

CHEM446403
Biochemistry Discussion II
None
Spring 2020
Required of all students in CHEM4462. Discussion of lecture topics and problem-solving methods, in small groups.

Credits: 00
Schedule: W 7
Room: MERKERT CENTER 129
Satisfies Core Requirement: None
Comments: None
Prerequisites: None
Corequisites: CHEM4462.
CHEM447301
Physical Chemistry (Biochemistry Majors)
HAEFFNER, JAN F
Spring 2020
This course is an introduction to physical chemistry. The following topics are covered: thermodynamics, transport properties, chemical kinetics, quantum mechanics, and spectroscopy. Applications to biochemical systems are emphasized.

Credits: 03
Schedule: M W F 11
Room: HIGGINS HALL 310
Satisfies Core Requirement: None
Comments: None
Prerequisites: CHEM2232 AND MATH1101.
Corequisites: CHEM4474. PHYS2100-2101 (or equivalent) are pre- or co-requisites.
Cross-listed with: None
Frequency: Annually

CHEM447401
Phys Chem/Biochem Maj Discussion
LI, YANG
Spring 2020
Required of all students in CHEM4473. Discussion of lecture topics and problem-solving methods in small groups.

Credits: 00
Schedule: M 6
Room: MERKERT CENTER 130
Satisfies Core Requirement: None
Comments: None
Prerequisites: None
Corequisites: CHEM4473.
Cross-listed with: None
Frequency: Annually
CHEM447601
Physical Chemistry II
MOHANTY, UDAYAN
Spring 2020
This course is an introduction to the principles of reaction kinetics, kinetic molecular theory, and quantum mechanics of atoms and molecules. Chemistry graduate students may register for this course only if they are advised to do so by the department.

Credits: 03
Schedule: T TH 10 30*
Room: MERKERT CENTER 130
Satisfies Core Requirement: None
Comments: CHEM4475 is not a prerequisite for CHEM4476.
Prerequisites: None
Corequisites: CHEM4478. MATH2202 and PHYS2100-2101/2200-2201 are pre- or co-requisites.
Cross-listed with: None
Frequency: Annually

CHEM447801
Physical Chemistry Discussion II
WANG, AILUN
Spring 2020
Required of all students in CHEM4476. Discussion of lecture topics and problem-solving methods, in small groups.

Credits: 00
Schedule: M 6
Room: CAMPION HALL 204
Satisfies Core Requirement: None
Comments: None
Prerequisites: None
Corequisites: CHEM4476.
Cross-listed with: None
Frequency: Annually

CHEM449201
Introduction to Undergraduate Research II
DAVIDOVITS, PAUL
Spring 2020
Sophomores or juniors who show exceptional ability may engage in an independent research project under the supervision of a faculty member. The experimental work will be preceded by library research on the project and training in essential laboratory techniques.

Credits: 03
Schedule: BY ARRANGEMENT
Room: None
Satisfies Core Requirement: None
Comments: CHEM5591-5592 or CHEM5593-5594 cannot be taken concurrently.
Prerequisites: CHEM1109 AND CHEM1110. With permission of the Instructor. With permission of the Department.
Corequisites: None
Cross-listed with: None
Frequency: Annually

CHEM449202
Introduction to Undergraduate Research II
MC LAUGHLIN, LARRY
Spring 2020
Sophomores or juniors who show exceptional ability may engage in an independent research project under the supervision of a faculty member. The experimental work will be preceded by library research on the project and training in essential laboratory techniques.

Credits: 03
Schedule: BY ARRANGEMENT
Room: None
Satisfies Core Requirement: None
Comments: CHEM5591-5592 or CHEM5593-5594 cannot be taken concurrently.
Prerequisites: CHEM1109 AND CHEM1110. With permission of the Instructor. With permission of the Department.
Corequisites: None
Cross-listed with: None
Frequency: Annually

CHEM449203
Introduction to Undergraduate Research II
LIU, SHIH-YUAN
Spring 2020
Sophomores or juniors who show exceptional ability may engage in an independent research project under the supervision of a faculty member. The experimental work will be preceded by library research on the project and training in essential laboratory techniques.

Credits: 03
Schedule: BY ARRANGEMENT
Room: None
Satisfies Core Requirement: None
Comments: CHEM5591-5592 or CHEM5593-5594 cannot be taken concurrently.
Prerequisites: CHEM1109 AND CHEM1110. With permission of the Instructor. With permission of the Department.
Corequisites: None
Cross-listed with: None
Frequency: Annually

CHEM449204
Introduction to Undergraduate Research II
MORKEN, JAMES P
Spring 2020
Sophomores or juniors who show exceptional ability may engage in an independent research project under the supervision of a faculty member. The experimental work will be preceded by library research on the project and training in essential laboratory techniques.

Credits: 03
Schedule: BY ARRANGEMENT
Room: None
Satisfies Core Requirement: None
Comments: CHEM5591-5592 or CHEM5593-5594 cannot be taken concurrently.
Prerequisites: CHEM1109 AND CHEM1110. With permission of the Instructor. With permission of the Department.
Corequisites: None
Cross-listed with: None
Frequency: Annually
CHEM449205
Introduction to Undergraduate Research II
CHATTERJEE, ABHISHEK
Spring 2020
Sophomores or juniors who show exceptional ability may engage in an independent research project under the supervision of a faculty member. The experimental work will be preceded by library research on the project and training in essential laboratory techniques.

Credits: 03
Schedule: BY ARRANGEMENT
Room: None
Satisfies Core Requirement: None
Comments: CHEM5591-5592 or CHEM5593-5594 cannot be taken concurrently.
Prerequisites: CHEM1109 AND CHEM1110. With permission of the Instructor. With permission of the Department.
Corequisites: None
Cross-listed with: None
Frequency: Annually

CHEM449206
Introduction to Undergraduate Research II
HOVEYDA, AMIR H
Spring 2020
Sophomores or juniors who show exceptional ability may engage in an independent research project under the supervision of a faculty member. The experimental work will be preceded by library research on the project and training in essential laboratory techniques.

Credits: 03
Schedule: BY ARRANGEMENT
Room: None
Satisfies Core Requirement: None
Comments: CHEM5591-5592 or CHEM5593-5594 cannot be taken concurrently.
Prerequisites: CHEM1109 AND CHEM1110. With permission of the Instructor. With permission of the Department.
Corequisites: None
Cross-listed with: None
Frequency: Annually
CHEM449207
Introduction to Undergraduate Research II
MOHANTY, UDAYAN
Spring 2020
Sophomores or juniors who show exceptional ability may engage in an independent research project under the supervision of a faculty member. The experimental work will be preceded by library research on the project and training in essential laboratory techniques.

Credits: 03
Schedule: BY ARRANGEMENT
Room: None
Satisfies Core Requirement: None
Comments: CHEM5591-5592 or CHEM5593-5594 cannot be taken concurrently.
Prerequisites: CHEM1109 AND CHEM1110. With permission of the Instructor. With permission of the Department.
Corequisites: None
Cross-listed with: None
Frequency: Annually

CHEM449208
Introduction to Undergraduate Research II
NIU, JIA
Spring 2020
Sophomores or juniors who show exceptional ability may engage in an independent research project under the supervision of a faculty member. The experimental work will be preceded by library research on the project and training in essential laboratory techniques.

Credits: 03
Schedule: BY ARRANGEMENT
Room: None
Satisfies Core Requirement: None
Comments: CHEM5591-5592 or CHEM5593-5594 cannot be taken concurrently.
Prerequisites: CHEM1109 AND CHEM1110. With permission of the Instructor. With permission of the Department.
Corequisites: None
Cross-listed with: None
Frequency: Annually
CHEM449209
Introduction to Undergraduate Research II
WASA, MASAYUKI
Spring 2020
Sophomores or juniors who show exceptional ability may engage in an independent research project under the supervision of a faculty member. The experimental work will be preceded by library research on the project and training in essential laboratory techniques.

Credits: 03
Schedule: BY ARRANGEMENT
Room: None
Satisfies Core Requirement: None
Comments: CHEM5591-5592 or CHEM5593-5594 cannot be taken concurrently.
Prerequisites: CHEM1109 AND CHEM1110. With permission of the Instructor. With permission of the Department.

Cross-listed with: None
Frequency: Annually

CHEM449220
Introduction to Undergraduate Research II
HAEFFNER, JAN F
Spring 2020
Sophomores or juniors who show exceptional ability may engage in an independent research project under the supervision of a faculty member. The experimental work will be preceded by library research on the project and training in essential laboratory techniques.

Credits: 03
Schedule: BY ARRANGEMENT
Room: None
Satisfies Core Requirement: None
Comments: CHEM5591-5592 or CHEM5593-5594 cannot be taken concurrently.
Prerequisites: CHEM1109 AND CHEM1110. With permission of the Instructor. With permission of the Department.
Corequisites: None
Cross-listed with: None
Frequency: Annually
CHEM552301
Organometallic Chemistry
ZHANG, XIAO-XIANG
Spring 2020
This course will present concepts of organometallic chemistry, e.g., the chemistry of compounds that have bonds between metals and carbon. Organotransition metal chemistry will be emphasized. Among the areas to be covered will be structure and bonding in organotransition metal complexes, ligand systems, catalysis, polymerizations, common reactions, and applications in organic synthesis.

Credits: 03
Schedule: T TH 9*
Room: CAMPION HALL 302
Satisfies Core Requirement: None
Comments: The course is intended for graduate students and advanced undergraduates who have completed or are currently enrolled in organic and inorganic chemistry courses.
Prerequisites: None
Corequisites: None
Cross-listed with: None
Frequency: Periodically

CHEM552501
Small Molecule X-Ray Crystallography
LI, BO
Spring 2020
The objective of the course is to provide detailed theoretical and practical instructions on small molecule X-ray crystallography. Topics include geometry and structure of crystalline solids, internal and external symmetry properties as a consequence of atomic types and bonding possibilities: lattice types and space groups, x-ray diffraction, and optical techniques. Students will get practical experience on sample preparation, operation of the instrumentation, data acquisition, structure solution, and refinement.

Credits: 03
Schedule: T TH 5*
Room: MCGUINN HALL 526
Satisfies Core Requirement: None
Comments: This course is open to advanced undergraduate and graduate students.
Prerequisites: CHEM3322.
CHEM554401
Modern Methods in Organic Synthesis II
SNAPPER, MARC
Spring 2020
Survey and analysis of contemporary strategies employed in the synthesis of medicinally significant natural and unnatural products. Examines the creativity and logic of approaches toward medicinally important compounds. Topics will include novel strategies toward synthetic problems and landmark total syntheses as well as issues in the current chemical literature.

Credits: 03
Schedule: T TH 10 30*
Room: MERKERT CENTER 129
Satisfies Core Requirement: None
Comments: None
Prerequisites: CHEM5531.
Corequisites: None
Cross-listed with: None
Frequency: Annually

CHEM555201
Advanced Methods in Chemistry I
METZ, KENNETH R
Spring 2020
This course discusses the principles, methods, and applications of instrumental techniques such as calorimetry, chromatography, lasers, and optical spectroscopy in modern chemistry, along with techniques for the analysis and interpretation of experimental data. It is intended mainly for third year students. The accompanying laboratory includes experiments with these methods and emphasizes experimental design, data interpretation, and the presentation of results in written and oral formats.

Credits: 04
Schedule: TH 6-8
Room: MERKERT CENTER 130
CHEM555401
Advanced Methods in Chemistry Laboratory I
METZ, KENNETH R
Spring 2020
Laboratory required of all students enrolled in CHEM5552. Two four-hour periods per week.

Credits: 00
Schedule: T TH 12-4
Room: MERKERT CENTER 001
Satisfies Core Requirement: None
Comments: None
Prerequisites: None
Corequisites: CHEM5552.
Cross-listed with: None
Frequency: Annually

CHEM555402
Advanced Methods in Chemistry Laboratory I
METZ, KENNETH R
Spring 2020
Laboratory required of all students enrolled in CHEM5552. Two four-hour periods per week.

Credits: 00
Schedule: W F 12-4
Room: MERKERT CENTER 001
Satisfies Core Requirement: None
Comments: None
Prerequisites: None
Corequisites: CHEM5552.
Cross-listed with: None
Frequency: Annually

CHEM558201
Advanced Topics in Biochemistry
WEERAPANA, ERANTHIE
Spring 2020
This course will focus on the chemistry and biology of pharmaceutical drugs and the drug development process. Topics covered will include the steps in the drug discovery pipeline, mechanisms of action of common pharmaceuticals, and chemical biology technologies for assessing drug efficacy and off-target toxicity.

Credits: 03
Schedule: T TH 12*
Room: MERKERT CENTER 129
Satisfies Core Requirement: None
Comments: None
Prerequisites: CHEM4461-2 are pre-requisites for undergraduates. CHEM5560 is a pre-requisite for graduate students.
Corequisites: None
Cross-listed with: None
Frequency: Periodically

CHEM559201
Undergraduate Chemical Research II
ARMSTRONG, WILLIAM
Spring 2020
The essential feature of this course is an independent research project performed under the supervision of a faculty member. The individual work will be preceded by a series of lectures and demonstrations on the use of the library and several essential laboratory techniques.

Credits: 03
Schedule: BY ARRANGEMENT
Room: None
Satisfies Core Requirement: None
Comments: Course is intended for seniors.
Prerequisites: With permission of the Instructor. With permission of the Department.
CHEM559202
Undergraduate Chemical Research II
MORKEN, JAMES P
Spring 2020
The essential feature of this course is an independent research project performed under the supervision of a faculty member. The individual work will be preceded by a series of lectures and demonstrations on the use of the library and several essential laboratory techniques.

CHEM559206  
Undergraduate Chemical Research II  
MC LAUGHLIN, LARRY  
Spring 2020  
The essential feature of this course is an independent research project performed under the supervision of a faculty member. The individual work will be preceded by a series of lectures and demonstrations on the use of the library and several essential laboratory techniques.

Credits: 03  
Schedule: BY ARRANGEMENT  
Room: None  
Satisfies Core Requirement: None  
Comments: Course is intended for seniors.  
Prerequisites: With permission of the Instructor. With permission of the Department.  
Corequisites: None  
Cross-listed with: None  
Frequency: Annually

CHEM559207  
Undergraduate Chemical Research II  
WASA, MASAYUKI  
Spring 2020  
The essential feature of this course is an independent research project performed under the supervision of a faculty member. The individual work will be preceded by a series of lectures and demonstrations on the use of the library and several essential laboratory techniques.

Credits: 03  
Schedule: BY ARRANGEMENT  
Room: None  
Satisfies Core Requirement: None  
Comments: Course is intended for seniors.  
Prerequisites: With permission of the Instructor. With permission of the Department.
