CHEM559804
Advanced Research in Biochemistry II
ROBERTS, MARY F
Spring 2020
A substantial independent research project performed under the supervision of a faculty member. Seniors whose projects are judged by the department to be of the highest quality, and who maintain a minimum GPA of 3.70, will be nominated for Scholar of the College recognition.

Credits: 06
Schedule: BY ARRANGEMENT
Room: None
Satisfies Core Requirement: None
Comments: Seniors only.
Arrangement with an individual faculty member and departmental permission is required.
This is a two-semester course and may not be taken for only one semester.

Prerequisites: None
Corequisites: None

CHEM661201
Scientific Communication in Chemistry II
GAO, JIANMIN
Spring 2020
A continuation of CHEM6611. This course seeks to best facilitate the transition of incoming graduate students to successful researchers in chemistry. Specifically, students in this course will practice and improve on various communication skills including scientific presentations, as well as writing articles and proposals. Ethics and social responsibilities of performing chemical research will also be discussed.

Classical Studies Courses: Summer 2019

CLAS106301
Intensive Reading in Latin
KAKAVAS, MARIA
Summer 2019
The goal of this course is to build solid reading skills in the Latin language by providing an intensive and comprehensive introduction to the basics of Latin grammar and syntax. The course meets for twelve weeks and is divided into two sessions. The first session will begin to guide students through the fundamentals of the language using Wheelock's Latin. The second session will complete Wheelock's Latin and proceed to readings in the original from Caesar, Cicero, Catullus, and others.

CLAS220501
Greek History
THATCHER, MARK R
Fall 2019
A study of the history of Greece from the Bronze Age in the second millennium BCE to the preeminence of Alexander of Macedon in the fourth century. The course will focus on such broad topics as the development of Greek social and political institutions, notions of justice, freedom, and Greek identity, relations among Greek city-states and with foreign nations, imperialism, the golden age of Greek literature, and the rise of Macedonian monarchy.
Emphasis will be on the study of the ancient sources: literary, historiographic, archaeological, and epigraphic.

CLAS221601
Art and Archaeology of Homer and Troy
HOFFMAN, GAIL L
Fall 2019
Homer's *Iliad* describes a "Trojan War." Until Schliemann's excavations of a fortified site in Turkey suggested a real Troy and further work in Greece revealed a brilliant Bronze Age civilization, most thought Homer's story pure fiction. This class investigates archaeological sites such as Troy and Mycenae, Bronze Age shipwrecks, a Late Bronze Age "Pompeii," and the artistic evidence for objects and practices described by Homer in order to separate historical truth from elements either invented by the poet or adopted from his own time and reinvented by Hollywood.

CLAS223001
Classical Mythology
EISENFELD, HANNE E
Fall 2019
This course explores the mythology of ancient Greece, Rome, and the Near East within its cultural, political, historical, and religious contexts. You will meet (or renew your acquaintance with) mythical figures like Zeus, Gilgamesh, Medusa, and Helen as they appear in multiple literary genres and other artistic media. In order to analyze and interrogate these myths we will use ancient and modern frameworks for thinking about what mythology is and what it does. What can a myth tell us about the civilization that created, adopted, or adapted it? What do our uses of Classical mythology - and our creations of our own myths - tell us about ourselves?

Credits: 03
Schedule: T TH 3*
Room: STOKES HALL 195S
Satisfies Core Requirement: None
CLAS224201
Roman Religion
ESHLEMAN, KENDRA J
Fall 2019
The Romans lived in a world full of gods; religion affected every part of Roman life, from politics to warfare to entertainment. Christianity took shape within this world, and Roman religion, especially the mystery cults, has often been regarded as a model for the early church. Yet the Roman concept of ?religion? has very little in common with modern, Judeo-Christian-influenced notions. In this class we will explore the theory and practice of religion in the ancient Roman world, as reflected in ancient literary texts, as well as in epigraphic and archaeological evidence. Themes include the nature of Roman worship, from state cult to magic and mysteries, the interplay between religion and politics, and the development of Christianity in its pagan context.

CLAS228001
Beast Literature
POLT, CHRISTOPHER B
Fall 2019
From Mother Goose’s fairy tales to lolcats, we imagine animals often speaking as we do. But what are we saying when we use animals to talk with and about one another? And what does literature featuring articulate animals say about our attitudes towards humans, animals, and the lines we draw between them? This course explores ?beast literature? in its various forms (fable, comedy, the novel, epic, debate poetry, etc), examining its incarnations through ancient Greece and Rome, Medieval Europe, and the modern world.

**Credits:** 03

---

**CLAS330201**  
**Greek Rhetoric**  
**THATCHER, MARK R**  
**Fall 2019**

The class will explore the theory and practice of classical Greek rhetoric. From Homer onward, persuasive speech occupied a central place in Greek political and cultural life, and Greeks were the first Western theorists of how and why verbal persuasion works. We will read works by early Greek orators Gorgias, Antiphon, and Lysias in Greek, along with ancient discussions of rhetorical composition and critiques of rhetoric in English. We will focus on the construction and contexts of Greek oratory and on the social-historical issues illuminated by the speeches themselves.

CLAS332501
Lucretius
POL'T, CHRISTOPHER B
Fall 2019
The Roman poet Lucretius is one of the key figures in the history of Western philosophy, expounding in his work *De Rerum Natura (On the Nature of Things)* upon the primary tenets of Epicurean thought. In this course we will read selections from *De Rerum Natura* in Latin, aiming to acquire a greater knowledge of Latin grammar and vocabulary and to improve facility in reading Latin poetry. We will use Lucretius' poem as a focal point to explore ancient Epicureanism, its views on human ethics and the workings of the physical world, its place within ancient philosophy more broadly, and its continuing relevance for modern thought.

CLAS334201
Livy
ESHLEMAN, KENDRA J
Fall 2019
In the last two decades, the study of the Augustan historian Livy has undergone a renaissance. Once scorned as a dull compiler and apologist for the Augustan regime, Livy is now recognized not only as a masterful stylist but also as a subtle and challenging thinker. In this class, we will focus on his history of early Rome, reading portions of books 1 and 5 in Latin, and other selections from the first pentad in English. Major themes will include women, religion, and political power in the *Ab Urbe Condita*, the relationship between Livy's work and the Augustan principate, Livy's methods as a historian, and the larger, related problems of the character of ancient historiography and our knowledge of early Roman history generally.

CLAS105301
Intermediate Ancient Greek II
ESHLEMAN, KENDRA J
Spring 2020
This course is designed to develop students proficiency in reading Greek literature in the original language through intensive readings from two Greek travel narratives: Book 9 of Homers *Odyssey* (including the story of the Cyclops) and selections from Xenophon's *Anabasis*. We will read the Greek assignments slowly and carefully while reviewing grammar, combined with discussion of the social and cultural contexts of these works.

Cross-listed with: NELC1812
Frequency: Biennially

CLAS220801
Art and Myth in Ancient Greece
HOFFMAN, GAIL L
Spring 2020
An introduction to the visual representation of the Greek gods and goddesses and to the artistic depiction of the primary cycles of Greek legends (e.g., the Trojan War and heroes such as Herakles, Perseus, and Theseus). This course focuses on how specific visual attributes serve to identify mythological characters and how the development of narrative in Greek art helped to relate their stories. Inquiring into the use of mythological imagery to decorate temples, cult statues, and vases used primarily for the symposium (male drinking parties), we will consider the functions of mythological imagery within Greek society.

**CLAS222501**  
**Ancient Medicine**  
**ESHLEMAN, KENDRA J**  
**Spring 2020**  
This course introduces students to the practice and theory of medicine in ancient Greece and Rome, from the archaic world of Homer (eighth century BCE) to late antiquity and early Christian healing practices. Themes will include shifting understandings of health and the body, revolutions in knowledge of human anatomy and physiology, ethical controversies over human and animal dissection, influential theories of pathology, psychology, pharmacology, and nutrition, the intersection of medicine and religion, and ancient ideas about doctors' responsibility, which, via the Hippocratic Oath, are still with us today. Students interested in history and literature will gain a richer sense of the importance of medicine in ancient society, and its connections to religion, magic and philosophy. Students from a medical and scientific background will discover how perceptions of the body have changed over time and from culture to culture.

CLAS224001
Dangerous Women in Classical Literature
EISENFELD, HANNE E
Spring 2020
Demeter sticks a baby in the fire, Amazons cut off one breast and live far away from men, Clytemnestra kills her husband in his bath. In this course we will investigate how Greeks and Romans used stories about female figures - goddesses, monsters, and humans - as a way of talking about a range of conflicts, tensions, and fears. While we focus on the ancient world, we will also look at how these figures are used in later periods and think about which stories we tell about women - and why.

CLAS225401
The Culture of Athenian Democracy
HOFFMAN, GAIL L
Spring 2020
A political and cultural history of Athens during the creation and height of its democracy (circa 480-400 B.C.E.). The course will consider the Persian Wars and their effect on political and constitutional developments in Athens, the workings of the Athenian Democracy under Pericles, and the eventual collapse following the Peloponnesian War. Readings in translation include Thucydides, Plutarch, Aristotle, Xenophon, Plato, and the Greek playwrights (Aeschylus, Sophocles, Euripides, and Aristophanes). Emphasis will be on integrating historical, literary, and archaeological evidence to provide as complete a picture as possible of this dynamic period of ancient history.

### CLAS226201  
The City of Rome  
POLT, CHRISTOPHER B  
Spring 2020

What was a normal day like for ancient Romans? What did they see, hear, and do while going about their lives? How did those things change as Rome shifted from a Republic to an Empire and as their city became caput mundi ("Head of the World")? In this course we will reconstruct the lived experiences of Romans by examining Rome's urban spaces through art, architecture, artifacts, and texts. Along the way, we will explore: public buildings, mundane and monumental; recreation (baths, theaters, arenas); civic infrastructure (aqueducts, sewers, roads); economy and commerce (shopping, harbors, slavery); gender and sexuality (domestic spaces, brothels); religion (temples, sacrifices, funerals); and other topics as appropriate.

**Credits:** 03  
**Schedule:** M W F 11  
**Room:** STOKES HALL 109S  
**Satisfies Core Requirement:** None  
**Comments:** None

CLAS332801
Advanced Latin: Cicero's Philosophical Works
POLT, CHRISTOPHER B
Spring 2020
Readings in Latin of Cicero's De Re Publica, his philosophical dialogue about Roman politics, civics, education, and the place of the Roman state within the Universe. This course will also explore the role of philosophy in Cicero's career, particularly in his final years, and will include readings of other philosophical works by Cicero in English. Enrolled students must be able to read Latin at the advanced level.

CLAS333601
Horace:
SUTHERLAND, ELIZABETH H
Spring 2020
The poet Horace brings a particular satisfaction for the advanced student of Latin. To paraphrase Nietzsche, we cannot even attempt in English what Horace achieves in his Odes. We will translate selections from the Odes, with attention primarily to the impact of his style and technique, but also to his literary and cultural context. We will also survey modern scholarship on Horace and lyric.

Credits: 03
Schedule: M W 1*
Room: STOKES HALL 221S
Satisfies Core Requirement: None
Comments: Open to undergraduate and graduate students; graduate students can expect extra readings in background texts and in modern scholarship.
Prerequisites: None

CLAS334901
Helen
EISENFELD, HANNE E
Spring 2020
Helen of Troy might be the most famous woman of the ancient world, but no one can get her story straight. Was the Trojan War her fault? Did Paris kidnap her? Did she even go to Troy at all? In this course we will read Euripides' Helen and Gorgias' Encomium of Helen, considering these widely divergent representations within the contexts of earlier traditions and in terms of the intellectual, political, and social environments to which those representations respond.

COMM190201
Digital Storytelling
REYNOLDS, PAUL A
Fall 2019
Storytelling is an essential part of every community, organization, and business. However, the channels through which stories are told have evolved. With the advent of the internet, digital media now combines tradition with technology. Narratives can be told in new, multidimensional ways with video, audio, blogs, text, images, and graphics. The purpose of this course is to help you understand why communication professionals and, moreover, civilizations throughout human history create and value stories. You will also learn how to employ a variety of digital technologies to create compelling content. This will be achieved through examining the underlying concepts and technical processes involved in telling stories for delivery on the desktop, the mobile device, or tablet.

COMM218201
Black Popular Culture
VATS, ANJALI S
Fall 2019
In this class, we will critically examine the development of black popular culture from blackface minstrelsy in the 1800s to present day. While we will primarily focus on black popular culture in the United States, we will also consider the work of diasporic authors and artists and the international implications of American media. Readings will draw upon theories and concepts in media studies, cultural studies, and rhetoric to center our discussion of black popular cultural texts such as television shows, films, music, poetry, and fashion. Course evaluation will be based on regular quizzes, two short papers, and a creative project.

**COMM218401**  
**Sports, Media, Culture**  
**SERAZIO, MICHAEL J**  
**Fall 2019**

Sports have long played a vital yet complex role in culture, and this course examines that intersection of sports, the mass media, and society. We will appraise and debate the ways in which sports are functional or problematic in their impact on and relationship to players, fans, journalists, co-cultural groups, and nations. Students will read both scholarly and journalistic reflections, view popular and documentary film, and analyze fan experiences, mediated presentations, and critical social issues. In short, we will go beyond the box score to understand the importance--and deconstruct the hype--that accompanies modern sports.

COMM220201
New Ways of Seeing: Museum Art in Visual Culture
BREEN, MARCUS J
Fall 2019

This course offers students a way to develop critical knowledge and skills in intersecting areas of concern to communication scholarship and research. These areas are: communication and media theory, visual culture, art museum practice, video production and distribution. Students will read and discuss two key texts, using them as a basis for interrogating art theory and practice at BC's McMullen Art Museum. While developing their knowledge of media and communication theory, students will have the opportunity to explore how new media, social media (especially visual/video tools) offers opportunities to explore and elaborate on new ways of seeing art and its role in society.
COMM221301
Fundamentals of Audio I
SCHWARTZ, JUDITH E
Fall 2019
This course is designed to introduce the student to the multifaceted world of sound, in theory and practice. Topics covered include the history of recording techniques, design and use of microphones, and careful listening techniques. The course will present an overview of current audio production software typically used in modern recording studios. Students will work in the audio labs to create professional quality pieces and will take home a portfolio of work at the end of the semester.

COMM222101
Digital Media Field Production
HOWLEY, RICHARD J
Fall 2019
With the ubiquitous nature of video streaming on desktops, mobile phones, and tablets, the influence of video storytelling has never been greater or more pervasive--and the demand for skilled digital storytellers to fill those increasingly ubiquitous screens is stronger than ever. This course offers professional guidance and hands-on experience to develop the skills, techniques, and disciplines necessary for the creation of digital media produced in the field. Students will write and produce their own video programs, becoming familiar with all aspects of production and post production, including producing, performing, directing, single-camera shooting, sound recording, and location lighting, as well as editing, digital effects, and graphics. In the process, students will develop a discerning eye for what makes an effective, professional, aesthetically pleasing video production, while they build a portfolio that can used during job or graduate program interviews.

COMM222201
Studio Television Production
REYNOLDS, PAUL A
Fall 2019
This course is designed to introduce students to the theories, tools, and techniques of television production. The focus of this class is on developing the production skills necessary for creating effective television communication. To pursue this goal, students will combine the information from the course's texts with practical experience in the form of exercises and the creation of their own television programs. While producing and directing their programs, students, working in crews, will learn to operate studio television equipment and develop an understanding of how messages are communicated using "live" or "live-on-tape" production methods.

COMM222501
Introduction to Feminisms
MURPHY, ANNALYSSA G
Fall 2019
This introductory course offers both an overview and a foundation for understanding the various movements that make up what has come to be called the feminist movement in the U.S. Because systems of privilege and disadvantage shape women's and men's identities and social positions in multiple and unique ways, Introduction to Feminisms analyzes gender from an interdisciplinary approach and applies numerous academic disciplinary methods to the study of gender, including history, literature, psychology, and sociology, and explores women's and men's experiences within various cultural contexts, including socioeconomic class, race and ethnicity, religion and spirituality, nations of citizenship, origin, and generation.

Mass Communication Ethics
BREEN, MARCUS J
Fall 2019
This course gives students a greater awareness of the ethical dimension of mass communication. It helps them learn to spot, evaluate, and deal with moral conflicts in our media environment, in the media industry, and between the industry and the media consuming public. It uses norms like truth, social justice, and human dignity to reveal the moral consequence of decisions and performance by practitioners in the news, entertainment, and advertising industries.

COMM226201
Online Communication and Global Society
SIENKIEWICZ, MATTHEW S
Fall 2019
This course offers a critical look at the history of the Internet and the ways in which online communication technologies are shaping our world. Merging conceptual approaches from the disciplines of cultural studies, globalization theory and international relations, the class will consider the role that new media is playing in shaping the art, entertainment, politics and economics of the new century. Case studies will include close looks at websites such Twitter, Facebook, World of Warcraft, Match.com and Alibaba.com, as well as considerations of social movements such as Occupy Wall St. and the the Arab Spring.

COMM227201
New Media and Society
BREEN, MARCUS J
Fall 2019
This course surveys and explores new media and interactive communication technologies from a historical and critical perspective. Course content includes theories that explain contemporary social and economic formations influencing the emergence of the Internet and digital applications, including: convergence of user communities, film and television and mediated communication, post-human approaches, computer games, virtual reality, robotics, social media, militarization, business concerns and public policy debates. The course offers students the opportunity to analyze and reflect on research about the impact of media, especially the implications of digital innovations for society.

COMM337201
Media Theory
SEARS, ANNE
Fall 2019
The mass media wields tremendous power. This course investigates that power across a wide variety of social, cultural, and political dimensions. We will read an assortment of theoretical approaches to mass communication, looking at both the structural constraints in the production process and the interpretive agency of audiences. Our targets for analysis will be similarly wide-ranging, drawn from advertising, journalism, entertainment, and social media.

Critical Theory
LIVON-GROSMAN, ERNESTO
Fall 2019
This course provides a survey of the major strands of contemporary critical theory, a field of inquiry foundationally rooted in the insights of psychoanalysis and Marxism, and dedicated to intervening in authoritarian and oppressive systems of social control. There will be a particular emphasis on questions of discipline and resistance: how do powerful institutions contain unruly energies, and by what means might liberatory impulses find meaningful expression? Our investigation will incorporate feminism, race, queer studies, and affect theory. We will read works by theorists such as Sigmund Freud, Karl Marx, Herbert Marcuse, Louis Althusser, Michel Foucault, Judith Butler, and others.

Credits: 03
Schedule: T TH 10 30*

COMM443701
The Latin American Documentary
LIVON-GROSMAN, ERNESTO
Fall 2019
This course focuses on the Latin American documentary cinema in order to explore the aesthetic and critical trends of its most important films and to expose shared concerns about politics, race and culture. How are those films shaped by always changing social circumstances? What do they tell us about Latin America's past and present political realities? And how do they relate to other documentary practices outside Latin America? We will see films and read texts by Albertina Carri, Nicolasito Guillen Landrian, Eduardo Coutinho, Fernando Solanas, Sara Gomez, Bill Nichols, and Robert Stam among others. This class requires that in addition to critical readings students watch movies outside class time. Class in English, films with English subtitles.

COMM444301
Seeing God and Hearing Ghosts: Spirituality in US Media
PETERSON, KRISTIN M
Fall 2019
This writing intensive course will explore the intimate connections between the development of media technologies and the emergence of religious movements in the U.S. Emphasizing the unique relationship of religion and media in American public life, this course will focus on how the disestablishment of religion creates a competitive marketplace in which religions engage with new media technologies to make meaning, maintain community connections, and reach new members. Students will examine how the development of new media technologies presents both opportunities and challenges to various religious groups in the U.S. Cases to be discussed in the class include: how access to mass printing technologies enables publications and sacred texts from emerging religious groups like the Church of Jesus Christ of Latter-Day Saints, the Nation of Islam, and the Jehovah's Witnesses; how radio waves and photography influenced the popularity of spiritualism after the Civil War; how cable networks provided the opportunity for Evangelical Christians to ascend to the center of American public life; or how social media create space for young Muslim Americans to express their faith in contrast to mainstream media stereotypes.

COMM444501
Comedy as Cultural Critique
INGRAM, BRETT D
Fall 2019
This writing intensive course approaches comedy as a cultural practice that not only offers aesthetic pleasure, but also provokes and thwarts social change, destabilizes and constructs hierarchies of power, and unites and divides communities. Even as it is commonly understood as a source of "mere" entertainment, comedy often serves as a site at which intense debates are staged concerning the "proper" distribution of rights, resources, and respect in society. We will analyze comedic texts and performances (including films, sitcoms, cartoons, and stand-up) not to determine if they are funny but rather, to evaluate how they function as critiques of contemporary social relations. We will pay particular attention to disagreements concerning the limits of free speech and the necessity of politically correct expression, especially as they apply to matters of gender, sexuality, and race in America.

COMM444901
Crisis Communication
FISHMAN, DONALD A
Fall 2019
This course is designed to examine events and situations that potentially threaten the viability of an organization. Attention is devoted to developing an effective crisis communication plan, speaking to multiple stakeholders, decision-making under pressure, and resolving--rather than litigating--organizational problems. Among the studies examined are the Tylenol product tampering incident, the Exxon Valdez accident, the Union Carbide gas leak, the Challenger Space Shuttle disaster, the Three Mile Island accident, and the Pepsi syringe hoax.

Gender Roles and Communication
CUKLANZ, LISA M
Fall 2019
This course is both a writing-intensive seminar and a Women's and Gender Studies minor course. Focus is on the social construction of gender through communication. The early section of the course compares historical and theoretical approaches to representations of gender in communication texts. Then, building on these comparisons, students read about, examine, and analyze texts, focusing particularly on television programming and advertising.

COMM447101
Children and the Media
HOGAN, LINDSAY R
Fall 2019
From film to television to mobile apps, this course examines children's media as an economic, cultural, and political entity and explores the relationships among young people and the contemporary media environment. Students will analyze various scholarly approaches and major debates in the study of children and media while also learning the larger historical contexts of those debates. This course offers a critical/cultural approach that examines the ways in which media industries, institutions, technologies, and texts intersect to produce particular media practices and considers how such practices relate to the production of cultural norms or social power.

COMM447201
Race, Law, and Media
VATS, ANJALI S
Fall 2019
This writing intensive course focuses on the relationship between race, law, and media. We will read seminal texts in critical race theory and cultural studies in order to theorize how concepts such as race, criminality, deviance, property, and originality are articulated in legal contexts, often in ways which make whiteness appear to be natural and right. Then, by way of case studies such as the Scottsboro Boys, the Central Park Five, Korematsu versus United States, Prosecutor versus Charles Taylor, and State versus Zimmerman, we will explore how the media represents race and law.

Advanced Independent Research
INGRAM, BRETT D
Fall 2019
This course is for seniors only.
COMM496201
Senior Research Seminar
INGRAM, BRETT D
Fall 2019
This is an honors-level seminar that focuses on the processes of research and design conceptualization and explication in order to provide students with the capability to design and enact original communication-based research. Students will demonstrate competence with the material through oral presentations, active participation in class, and the completion of a fully-developed and executed research project.

Debate Practicum
KATSULAS, JOHN P
Fall 2019
Advanced discussion of argumentation theory and debate practice with an emphasis on contemporary intercollegiate debate.
COMM558901
Senior Internship Seminar
CASWELL MCCARRON, CHRISTIN
Fall 2019
This course gives senior communication majors an opportunity to pursue a 15-20 hour per week internship in a specific field of Communication. Practical experience will be supplemented by discussions of relevant theoretical constructs. Periodic discussion group seminars will enhance a student's immersion in the industry. Adherence to professional protocol is expected. A field research paper is required as well as supervisor evaluations. This course counts as a 3-credit Communication elective.

Communication Courses: Spring 2020

COMM101001
The Rhetorical Tradition
WELLS, CELESTE C
Spring 2020

This is an introductory course that is designed to examine the classical periods of rhetoric, as well as the Enlightenment and modern periods. The course focuses on pivotal concepts in rhetoric and their application to contemporary discourse. This is a foundation course in the field of communication. It introduces students to perennial issues and concerns in rhetoric and looks at communication as a way of knowing about self and society.

COMM102001
Survey of Mass Communication
HOGAN, LINDSAY R
Spring 2020
This course will introduce you to the basics of the field, including industries, industry trends, regulations, and ethics. It will address historical developments that have shaped the mass media, particularly through the rise of newspaper, book, music, radio, television, film, advertising, and public relations industries. It will consider the influences of new media and their impacts on culture and industry. It will explore topics such as blockbusters, globalization, digital photography, social media, sports, “fake news,” fans and fan cultures, and media violence. Further, it will ask you to consider your position as a media consumer.

COMM105001
Translating Theory to Practice
INGRAM, BRETT D
Spring 2020
As a Communication student at Boston College you have been, and will continue to be, provided with numerous opportunities to learn about communication at both theoretical and practical levels in multiple areas within our discipline (e.g., media, rhetoric, culture, gender, health, interpersonal, family). The objective of this course is to assist in you in discerning how your education in the field of communication will prepare you to ask and eventually answer questions about your life, vocation, and role in the lives of others. Each week, a Communication department faculty member or guest speaker from the professional world will address a topic relevant to students on the precipice of entering the workforce, including (but not limited to): how to discuss academic research in language that resonates with employers in fields such as public advocacy, broadcasting, advertising, public relations, and consulting; whether/how to pursue graduate study; and how to present your self in job applications and interviews.

**COMM106001**  
**Anti-Social Media**  
**SERAZIO, MICHAEL J**  
**Spring 2020**  
Do you ever wonder what toll social media might be taking on your mental health? Do you long to 'break up' with your phone and live in the moment? This one-credit (pass-fail) seminar examines student anxieties about technology habits and experiments with practices of mindfulness. The course orients you to think and act more purposefully as a 'whole person'--in keeping with the Jesuit ideals of attentiveness and character formation--as opposed to one who is screen-dependent. Short readings, fun viewings, meditative journal entries, and small-class discussions will focus on the social, psychological, and emotional consequences of digital experiences (including friendships, learning, privacy, dating, and so on). Students will also set one #goal per month, of their own choosing, to try to live differently with their tech habits--self-examining how that change feels and what insights emerge.
COMM170201
Being Human in a World of Artificial Intelligence: a Secular-Humanist Perspective
BREEN, MARCUS J
Spring 2020
Artificial Intelligence (AI) lends itself to a multidisciplinary investigation of human ingenuity as well as philosophical questions about the meaning of life. Communication, Media and Cultural Studies have explored the question of what does it mean to be human drawing on moral philosophy. AI has intensified this investigation of the human quest for secular, rational knowledge using a variety of texts including science fiction, poetry, television and cinema. Concepts like "The Singularity" have furthered the discussion of perspectives contrasting the secular views of AI's scientific reason, intelligence and knowledge with spirituality and mysticism.

COMM170301
The Rhetoric of Social Inequality in America
WELLS, CELESTE C
Spring 2020
This course looks at the role that rhetoric (i.e., communication and social interaction) plays in creating, maintaining, and forwarding social inequality in America. The course draws upon critical, scholarly work covering inequality of class, race, gender, and sexuality to analyze artifacts in the media (e.g., commercials, television, film, music). Students will consider the ways that rhetoric regarding inequality, meritocracy, capitalism, and the American Dream has been embedded in their communicative experience and impacted their notion of individual and group responsibility as it relates to inequality in order to become more thoughtful about how they perceive and engage the world.

**COMM190201**  
**Digital Storytelling**  
**REYNOLDS, PAUL A**  
**Spring 2020**

Storytelling is an essential part of every community, organization, and business. However, the channels through which stories are told have evolved. With the advent of the internet, digital media now combines tradition with technology. Narratives can be told in new, multidimensional ways with video, audio, blogs, text, images, and graphics. The purpose of this course is to help you understand why communication professionals and, moreover, civilizations throughout human history create and value stories. You will also learn how to employ a variety of digital technologies to create compelling content. This will be achieved through examining the underlying concepts and technical processes involved in telling stories for delivery on the desktop, the mobile device, or tablet.

COMM218001
Masculinity, Sexuality, and Difference
INGRAM, BRETT D
Spring 2020
This course will examine constructions of masculinity and sexuality in Western society from a critical cultural perspective. We will consider the ways in which cultural narratives about "acceptable" masculine behaviors and attitudes catalyze social conflicts, reinforce established power hierarchies, and organize the modes of being available to people of different gender identities and sexual orientations. We will also evaluate the liberating potential of emergent discourses and practices that seek to cultivate greater acceptance of diversity, and promote social healing. There will be a concentrated focus on popular cultural forms (especially television, film, music, sports, and social media) that are particularly influential to contemporary men and boys.

COMM218401
Sports, Media, Culture
KIM, KYOUNG-YIM
Spring 2020
Sports have long played a vital yet complex role in culture, and this course examines that intersection of sports, the mass media, and society. We will appraise and debate the ways in which sports are functional or problematic in their impact on and relationship to players, fans, journalists, co-cultural groups, and nations. Students will read both scholarly and journalistic reflections, view popular and documentary film, and analyze fan experiences, mediated presentations, and critical social issues. In short, we will go beyond the box score to understand the importance--and deconstruct the hype--that accompanies modern sports.

COMM220301
Image as Communication
LIVON-GROSMAN, ERNESTO
Spring 2020
The goal of this course is to study how images are formed while exploring the ways in which they are being used to communicate. Following the critical tradition that treats images as a static representation all the way to recent studies that focus on writing with images in the era of interactive media, we will read critical texts while exploring concrete examples taken from books, political posters, films, and social media. What is the relation between text and image? What are the politics of image making? How do images change through different national and cultural settings? And how does the materiality of images define the way we make sense of them? From Walter Benjamin, John Berger, Johanna Drucker, Noimgandres and Laura Mulvey to Jacques Ranciere and the Otolith Group we will try to answer some of these questions while looking at concrete examples.

COMM222001
Race, Media & Technology
VATS, ANJALI S
Spring 2020
The last fifty years have brought tremendous technological change to the United States and the world. This class will explore how media technologies, such as social media, video games, and even digital cameras, shape and are shaped by cultural understandings of race. Through contemporary and historical readings and engagements with media technologies themselves, we will explore the ways that technology is not just neutral.
COMM222101
Digital Media Field Production
REYNOLDS, PAUL A
Spring 2020
With the ubiquitous nature of video streaming on desktops, mobile phones, and tablets, the influence of video storytelling has never been greater or more pervasive--and the demand for skilled digital storytellers to fill those increasingly ubiquitous screens is stronger than ever. This course offers professional guidance and hands-on experience to develop the skills, techniques, and disciplines necessary for the creation of digital media produced in the field. Students will write and produce their own video programs, becoming familiar with all aspects of production and post production, including producing, performing, directing, single-camera shooting, sound recording, and location lighting, as well as editing, digital effects, and graphics. In the process, students will develop a discerning eye for what makes an effective, professional, aesthetically pleasing video production, while they build a portfolio that can used during job or graduate program interviews.

Studio Television Production
HOWLEY, RICHARD J
Spring 2020
This course is designed to introduce students to the theories, tools, and techniques of television production. The focus of this class is on developing the production skills necessary for creating effective television communication. To pursue this goal, students will combine the information from the course's texts with practical experience in the form of exercises and the creation of their own television programs. While producing and directing their programs, students, working in crews, will learn to operate studio television equipment and develop an understanding of how messages are communicated using "live" or "live-on-tape" production methods.

COMM222501
Introduction to Feminisms
MURPHY, ANNALYSSA G
Spring 2020
This introductory course offers both an overview and a foundation for understanding the various movements that make up what has come to be called the feminist movement in the U.S. Because systems of privilege and disadvantage shape women's and men's identities and social positions in multiple and unique ways, Introduction to Feminisms analyzes gender from an interdisciplinary approach and applies numerous academic disciplinary methods to the study of gender, including history, literature, psychology, and sociology, and explores women's and men's experiences within various cultural contexts, including socioeconomic class, race and ethnicity, religion and spirituality, nations of citizenship, origin, and generation.
COMM222601
Anti-Social Media

COMM223701
Political Communication: Latin America's Public Sphere
LIVON-GROSMAN, ERNESTO
Spring 2020
Through a combination of printed and audiovisual materials this course will study the ways in which Latin America's public sphere becomes the meeting point of the political establishment as well as its counter culture. Centered in the twentieth and twenty-first centuries the course will pay special attention to today's renewed concerned for the relation between art and politics, and in particular to the idea of politics as representation in the Latin American context. How are those representations shaped by always changing social circumstances? What do they tell us about Latin America's past and present political realities? We will watch and analyze multimedia productions, read texts, and discuss visual representations from a variety of Latin American sources. Class and readings in English, audiovisual materials with English subtitles.

COMM224301
Mobilizing for Mobile Media Storytelling World
REYNOLDS, PAUL A
Spring 2020
With the advent of the iPhone in 2007, and Android mobile devices shortly thereafter, came the smartphone media revolution. Once the domain of high cost production studios and controlled distribution through a handful of television networks, digital storytelling is now in the hands of the average citizen. Today, nearly three billion smartphones offer extraordinary access to digital media creation and post production tools, as well as instant content distribution across increasingly faster, global networks. With this kind of once unimaginable access to media creation and distribution comes an urgency to understand this tsunami of digitally crafted and often manipulated communications. In this course, we will examine the various applications and impact of this new world of networked, media-rich, mobile devices, while getting hands-on experience actually crafting digital stories with little more than smartphones for video acquisition. While the cost of smartphone production can be virtually free, to create effective short form digital videos still requires some fundamental skills. To that end, students will learn how to plan, direct, shoot, and edit their own smartphone productions from how-to videos to short commercials, as well as advocacy spots, and political issues and candidate videos.

COMM224401  
**Criticism as Communication**  
MARTIN, ANDREW  
Spring 2020
Critics often get a bad rap these days. Pilloried for nitpicking instead of creating, denounced as "haters" and "spoilers," the critic's important, generative role in contributing to and shaping art and culture is too often overlooked. But criticism (which, of course, includes at least as much appreciation and "passionate re-description" as fault-finding) is essential to a robust artistic culture. In this class, we will read, watch, listen to, and look at works of art across many disciplines and genres (including television, film, music, visual art, and more) and engage with the work of the critics who responded to them. We'll use their examples to produce media criticism, geared for popular, non-academic audiences, of our own, across a variety of formats: writing (in different forms, for different venues), audio (radio segments and podcasting), visual, and more. The purpose of the class is to help us develop well-reasoned and articulated opinions about media, art, and literature, which, as we'll see over the course of the semester, can be, at their best, works of art in their own right. The course will also give students the skills and context to pursue careers as writers and editors at magazines, newspapers, and websites, as well as in other fields that require critical writing and thinking. More broadly, by developing these skills, students will be better equipped to understand, situate, and contribute to the shifting cultural landscape around them.

**Credits:** 03

**COMM225001**  
**Mass Communication Ethics**  
**BREEN, MARCUS J**  
**Spring 2020**  
This course gives students a greater awareness of the ethical dimension of mass communication. It helps them learn to spot, evaluate, and deal with moral conflicts in our media environment, in the media industry, and between the industry and the media consuming public. It uses norms like truth, social justice, and human dignity to reveal the moral consequence of decisions and performance by practitioners in the news, entertainment, and advertising industries.
COMM226401
Global Cultures and Creative Industries
SIENKIEWICZ, MATTHEW S
Spring 2020
This course studies global film, television, publishing and fine art as both opportunities for creative expression and a business ventures forged in the international marketplace. Considering culture both as a complex meaning-making activity and as a commodity of economic exchange, the class offers a unique, multi-perspectival approach to the phenomenon of globalization. Case studies will include Bollywood film, Israeli television dramas, Russian foreign broadcasting, The Harry Potter franchise, and many others.

COMM227201
New Media and Society
BREEN, MARCUS J
Spring 2020
This course surveys and explores new media and interactive communication technologies from a historical and critical perspective. Course content includes theories that explain contemporary social and economic formations influencing the emergence of the Internet and digital applications, including: convergence of user communities, film and television and mediated communication, post-human approaches, computer games, virtual reality, robotics, social media, militarization, business concerns and public policy debates. The course offers students the opportunity to analyze and reflect on research about the impact of media, especially the implications of digital innovations for society.

COMM227801  
Social Media  
PETERSON, KRISTIN M  
Spring 2020  
This course is designed to develop the understanding of social media in a digital era. Students will critically interpret social media practices through various concepts such as social network analysis, big data, privacy, filter bubble, algorithm, machine learning, crowdsourcing, and information sharing behaviors. They will also learn and emulate how social media data are used in academic and industry settings.

Satisfies Core Requirement: None  
Comments: Satisfies one of three elective courses required within the Communication major. Satisfies Critical Issues Course requirement for Class of 2021 and beyond.

Prerequisites: None  
Corequisites: None
COMM228301
Asian Americans in Sport and Society
KIM, KYOUNG-YIM
Spring 2020
In the mid-twentieth century, sport was a bastion of white supremacy, and it embodied such U.S national bodily ideals as white, heterosexual, Christian, muscular, and male. Histories of racial exclusion, racist violence, gendered policing, and sexual regulations positioned African-American men as outside the normative abilities of white men. In this respect, sport was a microcosm of the racial nation, with the language of citizenship and racial resistance coded within black-white discourse; however, this dichotomy failed to account for the long histories of Asian Americans in the United States. Asian-American sporting cultures trouble the current racial synchronicity between sport and nation while illuminating multiple performances of "belonging." This course highlights the diversity of Asian-American communities and aims to decipher how the ordinary practices of sporting cultures can offer extraordinary knowledge about U.S. society.

COMM229102
Persuasion
JANG, SEUNG M
Spring 2020
This course introduces students to the ideas, theories, and evolving practices of persuasion. Students will learn and critically evaluate ideas from psychology, interpersonal/mass communication, and public opinion research. Students will be able to apply these theories into a wide range of persuasion contexts.
Communications Courses - University Catalog - Boston College

COMM229301
Advanced Public Speaking
ROSENTHAL, RITA
Spring 2020
This course is an extension of the basic public speaking course. Emphasis will be placed on writing and delivering speeches in a variety of presentational settings. Students will research, organize, develop, and deliver presentations with emphasis upon the strategic delivery of messages that will be adapted to out of class situations. The role of being a critical audience member is a final goal of the class.

COMM333001
Communication Methods: Social Science
JANG, SEUNG M
Spring 2020
This course is designed to introduce students to social scientific methods in Communication research. Among the topics emphasized are: (1) development of questions and hypotheses, (2) quantitative and/or qualitative data collection methods (e.g., experiments, interviews, and surveys), and (3) data analysis and interpretation (e.g., interpretive and statistical analysis). The objective of the course is to provide students with the resources to interpret, evaluate, and conduct research in Communication from a social science perspective.

COMM333501
Communication Methods: Honors
INGRAM, BRETT D
Spring 2020
This course is an honors introduction to research methods used in communication research. Students will learn how to ethically conduct research; develop a working knowledge of the IRB and associated requirements; learn the process of creating a compelling research question/hypothesis; acquire the skills necessary to gather and analyze data; and write initial scholarship regarding their potential thesis project. Overall, this course will create a strong foundation for students who will conduct their own research. Students will demonstrate their understanding of the material as well as their ability to apply the material through exams, a research project, an oral presentation, and daily participation.

COMM337201  
Media Theory  
SERAZIO, MICHAEL J  
Spring 2020  
The mass media wields tremendous power. This course investigates that power across a wide variety of social, cultural, and political dimensions. We will read an assortment of theoretical approaches to mass communication, looking at both the structural constraints in the production process and the interpretive agency of audiences. Our targets for analysis will be similarly wide-ranging, drawn from advertising, journalism, entertainment, and social media.

COMM442901  
Globalization and the Media  
EROL, ALI E  
Spring 2020  
This class examines the cultural impact of globalization on the traditional centers and peripheries of media production. The course will cover topics such as the shifting definitions of cultural imperialism; the role of the United Nations in regulating cultural products; the latest transnational media mergers; the strategies of global television programmers such as CNN, MTV, or Discovery; the increasing commercialization of media systems around the world; and the role of media in relation to war and terrorism. This writing-intensive seminar is open to juniors and seniors.

COMM443401
Advanced Visual Theory and Aesthetics
BARRY, ANN M
Spring 2020
This course builds on study in Visual Communication Theory, extending into aesthetic principles founded in Eastern and Western visual cultural ideas. Visual design and aesthetics are explored in both our natural appreciation of beauty and through social constructions. Neurological principles provide the foundation for exploring visual persuasion, art appreciation, advertising techniques, political propaganda, and how visual culture creates our mental world.

COMM444301
Seeing God and Hearing Ghosts: Spirituality in US Media
PETerson, KRISTIin M
Spring 2020
This writing intensive course will explore the intimate connections between the development of media technologies and the emergence of religious movements in the U.S. Emphasizing the unique relationship of religion and media in American public life, this course will focus on how the disestablishment of religion creates a competitive marketplace in which religions engage with new media technologies to make meaning, maintain community connections, and reach new members. Students will examine how the development of new media technologies presents both opportunities and challenges to various religious groups in the U.S. Cases to be discussed in the class include: how access to mass printing technologies enables publications and sacred texts from emerging religious groups like the Church of Jesus Christ of Latter-Day Saints, the Nation of Islam, and the Jehovah's Witnesses; how radio waves and photography influenced the popularity of spiritualism after the Civil War; how cable networks provided the opportunity for Evangelical Christians to ascend to the center of American public life; or how social media create space for young Muslim Americans to express their faith in contrast to mainstream media stereotypes.

COMM444801
Television Criticism
SEARS, ANNE
Spring 2020
This course provides students with methods for critically evaluating the cultural and social impact of television. First, students learn some fundamentals of television production and the structure of the media industry. Based on this knowledge, students examine and practice the critical analysis of contemporary television programs. The goal of the course is to make students more informed critics of our television-saturated age.

Crisis Communication
FISHMAN, DONALD A
Spring 2020
This course is designed to examine events and situations that potentially threaten the viability of an organization. Attention is devoted to developing an effective crisis communication plan, speaking to multiple stakeholders, decision-making under pressure, and resolving--rather than litigating--organizational problems. Among the studies examined are the Tylenol product tampering incident, the Exxon Valdez accident, the Union Carbide gas leak, the Challenger Space Shuttle disaster, the Three Mile Island accident, and the Pepsi syringe hoax.

COMM445201
News Media/Democracy
SERAZIO, MICHAEL J
Spring 2020
The press plays an essential role in America and the world. This course aims to equip students to become critical news consumers with both a skilled understanding of how journalism works and political literacy about the big issues of our time. Through classic scholarly reflections as well as contemporary punditry examples, we will tackle the news media critically across three dimensions: learning about its indispensable function in mediating politics and democracy throughout history and today; studying and practicing the craft of opining writing and social advocacy; and evaluating and critiquing the performance of the press across these fronts.

Health/Illness in Relationships  
DUGGAN, ASHLEY P  
Spring 2020

This class integrates communication theories and applications in the contexts of healthcare conversations and decisions, and with organizational and social systems. We consider conversations with health providers, family members, and close friends navigating illness. We address the complexities of communication within broader healthcare structures and the distribution of resources to promote health and address illness. We address disparities in access and communication about quality healthcare such that advances in science, technology, and medicine are unequally distributed. This course considers disparities in substantive ways that require us to consider how relationships are tied to resources, to values, and to larger economic motives. We address communication processes as we unpack each of the complexities in health and illness in relationships.

CSCI110101
Computer Science I
GRIFFITH, WILLIAM
Fall 2019
This course is an introduction to the art and science of computer programming and to some of the fundamental concepts of computer science. Students will write programs in the Python programming language. Good program design methodology will be stressed throughout. There will also be a study of some of the basic notions of computer science, including computer systems organization, files and some algorithms of fundamental importance. Please Note: At the start of the registration period, only a limited number of places are made available for the classes of 2020 and 2021. If you are unable to sign up during the initial registration period, you can put your name on the waiting list by visiting the Computer Science department office in St. Mary's South, 2nd floor.

Credits: 03
Schedule: T TH 9*
Room: FULTON HALL 250
Satisfies Core Requirement: Mathematics
Comments: None
Prerequisites: No formal prerequisite, but some experience with computers is helpful. The class consist of a lecture and a discussion group. When you registered for the lecture you are required to register for one of the corresponding discussion groups.

CSCI110201
Computer Science II
MARQUES SAMARY, MAIRA R
Fall 2019
In this course the student will write programs that employ more sophisticated and efficient means of representing and manipulating information. Part of the course is devoted to a continued study of programming. The principal emphasis, however, is on the study of the fundamental data structures of computer science (lists, stacks, queues, trees, etc.). Both their abstract properties and their implementations in computer programs and the study of the fundamental algorithms for manipulating these structures. Students will use Java for programming.

**CSCI110301**  
**Computer Science I Honors**  
**MULLER, ROBERT**  
**Fall 2019**

This is the honors introductory computer science course. The course is organized around three themes: (1) computation, as a subject of study, (2) coding, as a skill, and (3) computer science, as an introduction to the field. The first half of the course explores computation from a simple mathematical perspective. From this point of view, computing can be understood as a natural extension of basic algebra. Midway through, the course turns to a machine-oriented view, considering storage and processor architecture, mutation and mutation-based repetition idioms. The course explores a number of fundamental algorithms with applications in various disciplines. Good program design methodology is stressed throughout. The course is taught using the OCaml programming language. (OCaml is closely related to the JavaScript and Swift programming languages.) Students will be well prepared for the follow-up course CSCI 1102 Computer Science II. Students who are unsure about the fit should consult with Professor Muller.

**Credits:** 03

**Schedule:** M W F 12

**Room:** LYONS HALL 202
Satisfies Core Requirement: Mathematics

CSCI170101
Privacy, Fairness, and the Digital World
STRAUBING, HOWARD
Fall 2019
These courses give students basic knowledge about computer science, programming, and law to explore the meaning of privacy, the privacy-related challenges posed by computer technology, and possible technical and legal methods of establishing and preserving privacy. Students will discover that, in different contexts, privacy takes on different meanings that sometimes create contradiction. Students will therefore have to wrestle with compromises necessary to accommodate various visions of privacy. No solution will be perfect, and students will experience the challenge and complexity of making modern policy, regulatory, and technical trade offs.

CSCI224401
Randomness and Computation
TASSAROTTI, JOSEPH D
Fall 2019
This course presents the mathematical and computational tools needed to solve problems that involve randomness. For example, an understanding of random variables allows us to efficiently generate the enormous prime numbers needed for information security, and to quantify the expected performance of a machine learning algorithm beyond a small data sample. An understanding of covariance allows high quality compression of audio and video. Topics include combinatorics and counting, random experiments and probability, random variables and distributions, computational modeling of randomness, Bayes' rule, laws of large numbers, vectors and matrices, covariance and principal axes, and Markov chains.

CSCI226701
Technology and Culture
GRIFFITH, WILLIAM
Fall 2019
This interdisciplinary course will first investigate the social, political, psychological, ethical, and spiritual aspects of the Western cultural development with a special emphasis on scientific and technological metaphors and narratives. We will then focus on the contemporary world, examining the impact of our various technological creations on cultural directions, democratic process, the world of work, quality of life, and especially on the emergent meanings for the terms "citizen" and "ethics" in contemporary society. Students will explore technologies in four broad and interrelated domains: (1) computer, media, communications, and information technologies, (2) biotechnology, (3) globalization, and (4) environmental issues.

Credits: 03
Schedule: M 4 30-6 50
Room: FULTON HALL 235
Satisfies Core Requirement: None
Comments: Satisfies Computer Science Requirement. Satisfies CSOM Computer Science Concentration Requirement and CSOM Information Systems Concentration Requirement.
Prerequisites: None
Corequisites: None
Cross-listed with: ISYS2267,PHIL6670,SOCY6670

CSCI227101
Computer Systems
JALALITABAR, MARYAMSADAT
Fall 2019
This course is concerned with machine-level program and data representation on modern computer systems and on some of the trade-offs that must be considered when selecting one representation (or programming paradigm) over another. We consider how various representations can affect the efficiency, reliability, and security of computing systems. This is a hands-on course; programming will be completed in the procedural language C with comparisons to object-oriented languages such as Java.

Credits: 03
Schedule: T TH 12*
Room: GASSON HALL 310
Satisfies Core Requirement: None
CSCI227201
Computer Organization and Lab
JALALITABAR, MARYAMSADAT
Fall 2019
This course studies the internal organization of computers and the processing of machine
instructions. Students will obtain a high-level understanding of how to design a general-purpose
computer, starting with simple logic gates. Topics include computer representation of numbers,
combinational circuit design (decoders, multiplexers), sequential circuit design and analysis,
memory design (registers and main memory), and simple processors including data paths,
instruction formats, and control units. CSCI 2272 includes laboratory-based computer hardware
activities in which the students design and build digital circuits related to the topics of the
course.

CSCI334501
Machine Learning
ALVAREZ, SERGIO
Fall 2019
This course provides an introduction to computational mechanisms that improve their performance based on experience. Machine learning can be used in engineered systems for a wide variety of tasks in personalized information filtering, health care, security, games, computer vision, and human-computer interaction, and can provide computational models of information processing in biological and other complex systems. Supervised and unsupervised learning will be discussed, including sample applications, as well as specific learning paradigms such as decision trees, instance-based learning, neural networks and deep learning, Bayesian approaches, meta-learning, and clustering. General concepts to be described include feature space representations, inductive bias, overfitting, and fundamental tradeoffs.

Credits: 03
Schedule: T TH 9*
Room: FULTON HALL 415
Satisfies Core Requirement: None
Comments: None
Prerequisites: CSCI1102 AND CSCI2244. With permission of the Instructor.
Corequisites: None
Cross-listed with: None

CSCI334901
Natural Language Processing
PRUD'HOMMEAUX, EMILY T
Fall 2019
We will study natural language processing, the subfield of artificial intelligence focused on analyzing, producing, and understanding human language. Using models and algorithms from formal language theory, statistics, and machine learning, we will explore methods for gaining insight into the structure and meaning of text. We will apply these methods to tasks such as information extraction, sentiment analysis, and machine translation.

CSCI335701
Database Systems Implementation
SCIORE, EDWARD
Fall 2019
An introduction to the internals of client-server database systems. A database system is large and sophisticated. By studying its components, one also learns techniques that apply to numerous other large systems. Topics include JDBC drivers, disk and memory management, transaction processing, and efficient query execution. This course will involve substantial programming in Java.

Credits: 03
Schedule: M W F 11
Room: LYONS HALL 202
Satisfies Core Requirement: None
Comments: This course will not cover the use of commercial database systems; students interested in that topic should consider taking CSCI2257.
Prerequisites: CSCI1102.
Corequisites: None
Cross-listed with: None
Frequency: Annually

CSCI336201
Operating Systems
UBAL TENA, RAFAEL
Fall 2019
This course covers the fundamentals of operating systems (OS) design both from a theoretical and a practical perspective. The course is organized in two parts, each involving a separate course project. The first part deals with the system call interface between applications and the OS, the multi-process abstraction of a computing system, and task scheduling algorithms. The associated project involves the implementation of a custom Unix command-line interpreter (shell). The second part of the course covers memory management, multi-threading libraries, and file systems. A real implementation of these features is studied on a miniature, open-source operating system called xv6. The associated project involves an extension of xv6 to support custom features, such as new scheduling policies, kernel-level threads, or file system recovery.

**Credits:** 03

CSCI339001
Topics in CS: Introduction to Network Science
KIM, NAM WOOK
Fall 2019
The course is an introduction to the emerging science of complex networks, complex systems (or system of systems), and their applications. The goal is to investigate complex "connectedness" of modern society and systems, both living and man-made. Topics include the mathematics of networks (e.g., graph theory), communication networks, networked systems, and interdisciplinary applications to biology and sociology. The course will provide an introduction to the fundamental concepts, real-world issues, and open questions in the field. The course is intended to be self-contained, but some background in distributed systems, networking, and algorithms would help.

Credits: 03
Schedule: T TH 12*
Room: MERKERT CENTER 130
Satisfies Core Requirement: None
Comments: The course will be project-based, and all assignments and projects are group-based. DO NOT register this course if you don't like to work on open-ended problems or in a group.
Prerequisites: CSCI1102 AND CSCI2243.
Corequisites: None
Cross-listed with: None
Frequency: Annually

CSCI491101
Readings in Computer Science

CSCI110101
Computer Science I
GRIFFITH, WILLIAM
Spring 2020
This course is an introduction to the art and science of computer programming and to some of the fundamental concepts of computer science. Students will write programs in the Python programming language. Good program design methodology will be stressed throughout. There will also be a study of some of the basic notions of computer science, including computer systems organization, files and some algorithms of fundamental importance. Please Note: At the start of the registration period, only a limited number of places are made available for the classes of 2020 and 2021. If you are unable to sign up during the initial registration period, you can put your name on the waiting list by visiting the Computer Science department office in St. Mary's South, 2nd floor.

**Credits:** 03  
**Schedule:** M W 3*  
**Room:** FULTON HALL 250  
**Satisfies Core Requirement:** Mathematics  
**Comments:** None  
**Prerequisites:** No formal prerequisite, but some experience with computers is helpful. The class consist of a lecture and a discussion group. When you registered for the lecture you are required to register for one of the corresponding discussion groups.  
**Corequisites:** None

**CSCI110201**  
**Computer Science II**  
**BOLOTIN, NAOMI**  
**Spring 2020**

In this course the student will write programs that employ more sophisticated and efficient means of representing and manipulating information. Part of the course is devoted to a continued study of programming. The principal emphasis, however, is on the study of the fundamental data structures of computer science (lists, stacks, queues, trees, etc.). Both their abstract properties and their implementations in computer programs and the study of the fundamental algorithms for manipulating these structures. Students will use Java for programming.

**Credits:** 03  
**Schedule:** T TH 1 30*  
**Room:** FULTON HALL 250  
**Satisfies Core Requirement:** None  
**Comments:** Course restricted to Computer Science B.A. and B.S. Majors

CSCI224401  
Randomness and Computation  
TASSAROTTI, JOSEPH D  
Spring 2020
This course presents the mathematical and computational tools needed to solve problems that involve randomness. For example, an understanding of random variables allows us to efficiently generate the enormous prime numbers needed for information security, and to quantify the expected performance of a machine learning algorithm beyond a small data sample. An understanding of covariance allows high quality compression of audio and video. Topics include combinatorics and counting, random experiments and probability, random variables and distributions, computational modeling of randomness, Bayes' rule, laws of large numbers, vectors and matrices, covariance and principal axes, and Markov chains.

**Credits:** 03  
**Schedule:** M W F 10  
**Room:** FULTON HALL 250  
**Satisfies Core Requirement:** None  
**Comments:** Course restricted to Computer Science B.A. or B.S. Majors  
**Prerequisites:** CSCI2243 Logic and Computation and Calculus.

CSCI225401
Web Application Development
KIM, NAM WOOK
Spring 2020
In this course, students will learn how to design and build interactive web-based applications. We will begin by learning HTML, CSS, and Javascript to create a simple data-driven web page. The course will then cover advanced client-side development including CSS (e.g., Material-UI) and Javascript Frameworks (React + Redux). We will also briefly touch on server-side issues (Node.js and Express), data storages (Web storage, MongoDB), and asynchronous communication between client and server. The course is project-based, involving a series of development assignments and a final project.

CSCI225701  
Database Systems and Applications  
SPANG, JOHN J  
Spring 2020  
This course provides in-depth coverage of database systems and their uses. Topics include database architecture, design strategies, SQL queries, security, performance, and using database tools and scripting languages to create sophisticated forms and applications, including web applications. The goal of the course is to give students the knowledge and skills to use databases effectively in any business situation.

Credits: 03  
Schedule: T TH 4 30*  
Room: FULTON 415

Satisfies Core Requirement: None
Comments: This course is required for Information Systems concentrators.

Technology and Culture
GRIFFITH, WILLIAM
Spring 2020
This interdisciplinary course will first investigate the social, political, psychological, ethical, and spiritual aspects of the Western cultural development with a special emphasis on scientific and technological metaphors and narratives. We will then focus on the contemporary world, examining the impact of our various technological creations on cultural directions, democratic process, the world of work, quality of life, and especially on the emergent meanings for the terms "citizen" and "ethics" in contemporary society. Students will explore technologies in four broad and interrelated domains: (1) computer, media, communications, and information technologies, (2) biotechnology, (3) globalization, and (4) environmental issues.

Credits: 03
Schedule: M 4 30-6 50
Room: FULTON HALL 117
Satisfies Core Requirement: None
Comments: Satisfies Computer Science Requirement. Satisfies CSOM Computer Science Concentration Requirement and CSOM Information Systems Concentration Requirement.

CSCI227101
Computer Systems
JALALITABAR, MARYAMSADAT
Spring 2020
This course is concerned with machine-level program and data representation on modern computer systems and on some of the trade-offs that must be considered when selecting one representation (or programming paradigm) over another. We consider how various representations can affect the efficiency, reliability, and security of computing systems. This is a hands-on course; programming will be completed in the procedural language C with comparisons to object-oriented languages such as Java.

**CSCI227201**  
**Computer Organization and Lab**  
**UBAL TENA, RAFAEL**  
**Spring 2020**  
This course studies the internal organization of computers and the processing of machine instructions. Students will obtain a high-level understanding of how to design a general-purpose computer, starting with simple logic gates. Topics include computer representation of numbers, combinational circuit design (decoders, multiplexers), sequential circuit design and analysis, memory design (registers and main memory), and simple processors including data paths, instruction formats, and control units. CSCI 2272 includes laboratory-based computer hardware activities in which the students design and build digital circuits related to the topics of the course.

Topics in Computer Science: Data Science
ALVAREZ, SERGIO
Spring 2020
This course provides an introduction to concepts and techniques of computational data modeling and inference that can inform rational decision-making based on data. Topics include data preprocessing, exploratory data analysis and visualization, elements of probability and statistical inference, and predictive and descriptive modeling, with an introduction to machine learning concepts and approaches as time allows. Programming in Python will be required. Prospective students should also be comfortable with mathematical notation and reasoning at the college calculus level.

Credits: 03
Schedule: T TH 12*
Room: MERKERT CENTER 130
Satisfies Core Requirement: None
Comments: None
Prerequisites: CSCI1101, or equivalent introduction to CS with programming, and one of MATH 1101 / 1103/ 1105 or an equivalent calculus course.
Corequisites: None
Cross-listed with: None
Frequency: Annually

CSCI334701
Robotics
BISWAS, ANJUM
Spring 2020
This course will introduce the basic principles of mobile robotics history, theory, hardware and control. Topics will include robot components, effectors and actuators, locomotion, sensors, feedback control, control architectures, representation, localization and navigation. This is a project-oriented course and the students will have hands-on experience with a real mobile robot. The students will be required to complete several individual programming assignments and a team design project. A separate 0 credit lab course is required (CSCI3348).
CSCI335601
Software Engineering
MARQUES SAMARY, MAIRA R
Spring 2020
This course covers the basic life cycle of software development: requirements, design, implementation, testing, and production release. Students will learn the theory related to software engineering, but they will also learn hands-on how to create their own software. The main evaluation of the course is a team project that will simulate a small real project. The project will be done using the framework Django (Python), the CSS Framework Bootstrap, among other technologies. The project will be worth 50% of the grade, as well as 2 midterms, an exam, and a peer assessment (how your team members evaluate the work you did).

Corequisites: None
Cross-listed with: None
Frequency: Annually

CSCI336601
Principles of Programming Languages
MULLER, ROBERT
Spring 2020
Starting with a simple language of expressions, the course develops a sequence of progressively more expressive programming languages keeping in mind the conflicting constraints between the expressiveness of the language and the requirement that it be reliably and efficiently implemented. The course focuses on these essential concepts and the run-time behavior of programs. Type systems play an essential role. By understanding the concepts the student will be able to evaluate the advantages and disadvantages of a language for a given application.

**CSCI339001**
Topics in CS: Introduction to Network Science
TSENG, LEWIS
Spring 2020
The course is an introduction to the emerging science of complex networks, complex systems (or system of systems), and their applications. The goal is to investigate complex "connectedness" of modern society and systems, both living and man-made. Topics include the mathematics of networks (e.g., graph theory), communication networks, networked systems, and interdisciplinary applications to biology and sociology. The course will provide an introduction to the fundamental concepts, real-world issues, and open questions in the field. The course is intended to be self-contained, but some background in distributed systems, networking, and algorithms would help.

Credits: 03
Schedule: M W F 2
Room: LYONS HALL 202
Satisfies Core Requirement: None
Comments: The course will be project-based, and all assignments and projects are group-based. DO NOT register this course if you don't like to work on open-ended problems or in a group.
Prerequisites: CSCI1102 AND CSCI2243.
Corequisites: None
Cross-listed with: None
Frequency: Annually

CSCI339601
Topics in Parallel Computing
BENTO AYRES PEREIRA, JOSE
Spring 2020
Everyone should know how to think "Parallel." Even a laptop or cellphone has multiple CPU cores at our disposal these days. In this hands-on, project-oriented class you will learn the main ideas of parallel computing with GPUs. Our focus will be on the CUDA programming language. You will learn about GPU architectures, parallel algorithms, CUDA libraries, and GPU computing applications.

Credits: 03
Schedule: M W 3*
Room: GASSON HALL 310
Satisfies Core Requirement: None
Comments: The prerequisites for this class are C programming language, multivariate calculus, linear algebra, algorithms, and randomness and computation. If you do not have all of these prerequisites and want to take the class, contact the instructor. There is a limited number of spots available.

Freshman Topic Seminars
NUSSBAUM, ADRIENNE J
Fall 2019
The Freshman Topic Seminars give freshmen an opportunity to meet with their faculty advisor once a week to enjoy small group discussions on a topic of research and intellectual interest to the instructor. The Freshman Topic Seminars are limited to 14 students per section, meet once a week for 75 minutes, end before the Thanksgiving break, earn one credit, and are graded pass/fail. The short readings in the Topic Seminars focus on specific topics unique to each section and are designed to allow students to explore new academic areas. A list of current topics can be found at https://www.bc.edu/bc-web/schools/mcas/undergraduate/cornerstone.html.

Earth and Environmental Sciences Courses: Summer 2019

EESC114001
Our Mobile Earth
O'BRIEN, SUZANNE R
Summer 2019
This course will provide you with an introduction to the structure of Earth and the dynamic processes that continuously shape and remodel its surface. During class, we will discuss the formation and evolution of the oceans and continents within the framework of the modern theory of plate tectonics. The locations, causes and effects of earthquakes and volcanoes are presented. The dynamics within Earth which drive the tectonic plates are outlined.

EESC116301
Environmental Issues and Resources
GALLI, KENNETH G
Summer 2019
Hybrid Core Course includes three themes: (1) Intro to Environmental Geology, (2) How to write well and how to write field trip reports, (3) How to use Google Earth to understand Earth Materials and Processes. Learn about the major processes at work inside and on the surface of the earth. Learn to be a careful observer and to write succinct field trip reports, through two field trips and the writing of a field trip report. Each class is designed to examine the facts, historical background, and through in-class exercises, homework and field trips, provide experience in analyzing and solving real world problems associated with environmental issues, resources and sustainability. Demonstrations, videos, readings and several field trips underscore important concepts and applications and the importance of careful observation. Online Google Earth exercises, done remotely, will introduce the power of this geographic application to understand geology.

EESC122201
Conservation Ecology in Ecuador
PISANI GAREAU, TARA
Summer 2019
This is an active learning course on tropical ecology and the conservation of tropical ecosystems which are the most biodiverse on Earth. Ecuador is an ideal country to study these topics. Within a small geographical region (109,483 sq mi) Ecuador has pristine tropical rain forests, tropical dry forests, cloud forests, high elevation grasslands, and coastal mangroves. Additionally, the Galapagos Archipelago off the coast of Ecuador is home to over 4,000 species, 40% of them endemic to the region? this was Charles Darwin?s ?laboratory of evolution.? Ecuador is also a model for conservation with twelve national parks, ten national wildlife refuges, nine ecological reserves, four biological reserves, and one geo-botanical reserve. In this course, students will gain firsthand experience observing species and ecological processes and collecting data within pristine ecosystems. The course will explore and use three main physiographic regions of Ecuador? the central Andean highlands, the eastern alluvial plains of the Amazon, and the Galapagos Islands? as its laboratory.

Earth and Environmental Sciences Courses: Fall 2019

EESC113201
Exploring the Earth
BECKER, RICHARD
Fall 2019
The Earth is a dynamic planet that our species is clearly changing. A great challenge of the twenty-first century is to maintain the Earth's ability to support its growing human population. This course discusses the origin and materials of the Earth and the processes by which it has evolved. It is a first course for Geological Sciences majors and also provides a background for departmental majors and minors. EESC1132 is appropriate as a natural science core course for students interested in the Earth Sciences. The laboratory consists of in-class exercises, analysis of rocks, and a weekend field trip.

EESC113304
Exploring the Earth: Lab
BECKER, RICHARD
Fall 2019
In laboratory, students learn to identify the rocks and minerals that make up the earth and
develop their understanding of how volcanoes, streams, and glaciers shape the landscape. Field
trips will be taken so that students may observe and interpret geological features of New
England for themselves.
EESC115001
Astronomy
KUCHAR, THOMAS A
Fall 2019
Astronomical observations and theories date back to the beginning of recorded history. The development of astronomy is closely tied to the growth of physics, mathematics, philosophy, and theology. Emphasis is on large-scale concepts and on how we know what we know about the stars, our galaxy, and the universe. The course covers these discoveries and ideas from the earliest days of astronomy to many of the recent, exciting advances.

EESC115701
Oceanography
BECKER, RICHARD
Fall 2019
This course is an investigation of the world's ocean as an integrated system driven by geological, chemical, physical, and biological processes. Topics include origin and evolution of the ocean basins, nature of the sea bottom, characteristics of ocean water, causes and effects of ocean currents and circulation, marine ecology and biological productivity in the ocean. An understanding of the ocean's role in the health and evolution of the planet is stressed, with special emphasis on coastal areas. Two and a half hours of lecture and one two-hour laboratory each week.

EESC117001
Rivers and the Environment
SNYDER, NOAH P
Fall 2019
Scientific understanding of rivers is vital to address many of today's environmental challenges. Rivers transport and distribute water, sediment, nutrients, and contaminants throughout the landscape. They provide habitat and migration pathways for countless aquatic species. Rivers supply fresh water, power generation, and recreational opportunities to much of the world's human populations. We will learn about the geological, hydrological, and biological processes that are important to rivers and watersheds, and how knowledge of these processes aids our ability to manage, protect, and restore these systems.

The Living Earth I  
**GALLI, KENNETH G**  
**Fall 2019**  
This core course provides a broad and modern presentation of the major topics and principles of Earth Science. The lectures will cover all the fundamental subjects of geology, with emphasis on earth materials such as minerals, rocks and internal and external Earth processes, with a brief overview of important aspects of Earth history. The labs will involve hands-on work studying minerals, igneous rocks, sedimentary rocks, metamorphic rocks, viscosity, weathering and running water, formation of ripples and sand dunes, plate tectonics, fossils, and earthquakes, in addition to a local field geology trip during lab time. Additional topics may be covered if time allows.

EESC150101
Global Implications of Climate Change
GAREAU, BRIAN J; PISANI GAREAU, TARA
Fall 2019
Climate change is one of the defining issues of our time. Decisive and swift action to mitigate carbon emissions is needed in order to prevent catastrophic events and unhealthy environments for future generations. Societies worldwide will need to adapt to a new environmental reality. However, the causes, effects, and costs of climate change are not equally distributed, which raises questions about responsibility and justice. This course will encourage critical engagement with and personal reflection on these important issues, covering the science behind climate change, the use of different energy sources and their impact on carbon emissions, and the different roles of governments, businesses, religious communities, and individuals for enacting (and preventing) ambitious solutions to climate change.

**Credits:** 03

EESC220101
Environmental Systems: The Human Footprint
KAFKA, ALAN L
Fall 2019
Humans have become an increasingly significant force on Earth system, including the atmosphere, biosphere, and hydrosphere. This course explores the influence of humans on natural systems and how environmental solutions and consequences link to social, political, economic, health, and justice issues. Specifically, we will discuss topics related to population growth, energy, agriculture, urbanization, and environmental justice. This course is part of the Environmental Systems introductory sequence (EESC2201-EESC2208) for Environmental Geoscience majors.
EESC220501
Environmental Systems: Climate Change
SHAKUN, JEREMY D
Fall 2019
The climate system is a complex machine for moving energy around the planet that depends on myriad interactions between air, water, ice, rocks, and life on various time and space scales—and it affects nearly every aspect of the environment we live in. Throughout Earth's 4.5 billion year history, climate has experienced periods both warmer and colder than today, as evidenced by records of environmental change preserved in natural archives. Today, human activity is the largest driver of change in the global climate system. This course provides an introduction to how Earth's climate works, the history of past climate changes, current trends and projected future conditions—all focused on parsing out what is well known to what is deeply uncertain. We will close with a brief survey of the political, economic, and sociological dimensions of climate change to understand how the science fits into a larger framework.

EESC220701
Environmental Systems: Earthquakes

https://www.bc.edu/content/bc-web/academics/sites/university-catalog/courses/arts-sciences/earth-environmental-sciences.html
KAFKA, ALAN L

Fall 2019

Earthquakes are among the most frightening and devastating of natural hazards, often resulting in catastrophic loss of life and property. Earthquakes are also among the most fascinating of natural phenomena. Although the basic global scale characteristics of earthquakes are well understood in the context of the theory of plate tectonics, considered in detail earthquakes are among the most complex and unpredictable of earth processes. This course is part of the Environmental Systems introductory sequence (EESC2201-EESC2208) for Environmental Geoscience majors.

Environmental Systems: Quantitative Methods

BEHN, MARK D

Fall 2019

This course focuses on some mathematical topics that are commonly used in analyses of environmental systems. The primary emphasis in the course will be on statistical methods, especially understanding statistical sampling and the determination of the mean, standard deviation, and confidence intervals of a population. Some commonly used probability distributions including the normal and Poisson distributions will be discussed. Other topics such as line fitting, non-linear models, and feedback systems will be introduced. The course is part of the Environmental Systems introductory sequence (EESC2201-EESC2208) for Environmental Geoscience majors.

EESC330001
Space Weather and Consequences for Modern Human Technology
PRADIPTA, REZY
Fall 2019
Space weather is a highly cross-disciplinary field of science that relates the Sun's activities with changes in the space environment around Earth. In the meantime, exploration and utilization of space are rapidly growing, which enables new technologies beneficial to human lives to emerge and develop. However, space weather poses limitations and threats to many valuable assets and equipment that we have in space. In this course, we address how adverse space weather conditions may disrupt satellites, communication and navigation systems, electric power grids, aviation, and other technologies on Earth. Topics also include solar wind, solar radiation, geomagnetic storms, Earth's upper atmosphere, and the airglow/auroras.

EESC337801
Petrology
BAXTER, ETHAN
Fall 2019
This course is focused on learning the techniques of polarizing light microscopy (PLM) and on petrology and petrography of igneous and metamorphic rocks. Lectures on the petrology of how these rocks form and how they relate to the plate tectonic environments will be integrated with the laboratory (EESC3379). Phase diagrams will be used to help better understand the origin of igneous rocks whereas metamorphic facies reactions will be applied to understanding of progressive and retrograde metamorphic processes.

**EESC446301**
Paleoclimate Dynamics  
SHAKUN, JEREMY D  
Fall 2019
Earth's climate has exhibited rich variability on all space and time scales over its 4.5 billion year history, which provides valuable context for understanding modern climate change. Rather than taking a cursory look at this entire history, this course will more deeply explore such variability by focusing on the examination of three important and unresolved problems: the toggling between glacial and interglacial conditions over the past two million years, the remarkably abrupt climate changes seen throughout the last glacial period, and the relatively stability of climate over the past 10,000 years. Emphasis will be placed on understanding the forcings, feedbacks, and other processes responsible for producing these changes, as well as the mechanisms linking various regions and components of the climate system. Class time will be split into lectures, problem sets, and paper discussions.

Credits: 03  
Schedule: T TH 10 30*  
Room: DEVLIN HALL 201  
Satisfies Core Requirement: None

Earth and Environmental Sciences Courses: Spring 2020

EESC112501
Exploring Earth History
None
Spring 2020
"The earth is not finished, but is now being and will forever be remade." C.R. Van Hise (1898) The objective of this course is to describe the history of the earth and the development of life on Earth during the last 4.6 billion years, especially within North America. Major biological and physical events will be revealed by interpretation of the rock record. The use of animations and demonstrations will enhance your understanding of some major topics.

EESC114601
Origin and Evolution of Life on Earth
STROther, PAUL K
Spring 2020
This course explores current theories about the origins of life, beginning with the original hypothesis of the Russian biochemist A.I. Oparin. Darwin's theory of evolution is emphasized, but many different components of the natural sciences touch upon this topic. The course lectures include the study of the oldest fossils, life in extreme habitats, cellular biology, prebiotic molecules, and the search for life on other planets.

EESC116801
Environmental Geosciences: Earth Processes and Risks
BEHN, MARK D
Spring 2020
This course will explore the dynamic processes operating on and within the earth and how those processes can impact humans. We will explore the nature of natural disasters, including river and coastal flooding, volcanic eruptions, earthquakes, landslides, severe storms, climate changes, and bombardment by rare extraterrestrial objects. Emphasis will be placed on understanding the current science used to predict the occurrences of these disasters, how accurate those predictions are, and the associated mitigation practices.
**EESC117401**  
**Climate Change and Society**  
**SHAKUN, JEREMY D**  
**Spring 2020**  
Global climate change may be one of the biggest issues facing humanity in the twenty-first century. We investigate the scientific basis for global warming forecasts from what is well known to what is deeply uncertain based on theory, models, and the geologic record of earth's climate history. We discuss the political, economic, and social dimensions surrounding the global warming debate, and explore the current and potential impacts of climate change on developed and developing societies. Connections to recent media will be emphasized to give students an up-to-date view on the state of our national conversation on climate change.

**EESC117701**  
**Cosmos**  
**KUCHAR, THOMAS A**  
**Spring 2020**
There are more than a dozen interplanetary probes from numerous countries that are currently collecting data from several planetary bodies in the Solar System. These exploration missions are expanding knowledge of our Solar System, which is mostly built on only about half a century of space exploration. We will discuss these space missions and their scientific goals and results, which are increasingly oriented to answer questions on planetary evolution and the possibility of extraterrestrial biospheres. Throughout this course, the fundamentals of how science works will be emphasized. If weather permits, there might also be outdoor lectures for star-gazing opportunities.

EESC118701
Geoscience and Public Policy
KAFFKA, ALAN L
Spring 2020
In this course, we will explore case studies that demonstrate the role of the earth sciences in addressing problems of public policy. For each case study, students will be introduced to the underlying scientific concepts relevant to the problem being addressed. After this scientific foundation is developed, we will discuss how it needs to be considered as part of the process of making policy decisions. The course will also introduce students to how scientists and public policy makers apply the concepts of probability and statistics in the decision making process.

Credits: 03
Schedule: T TH 6*
EESC150701
EBEL, JOHN E; VALENCIUS, CONEVERY B
Spring 2020
This course explores U.S. energy. From the perspectives of history, culture, technology, engineering, and foreign policy, we ask how we have created and distributed energy in the past, how energy systems function in the present, and how they may evolve. We investigate energy production, distribution, and use--coal, oil, nuclear power, hydropower, wind, and solar power--along with cables, pipelines, and transmission systems. Through hands-on exercises and field trips, students learn how past technological and economic choices shaped current U.S. energy systems, how energy systems affect the environment, and how sustainable energy systems will be in the future.

EESC220101
Environmental Systems: The Human Footprint
KAFKA, ALAN L
Spring 2020
Humans have become an increasingly significant force on Earth system, including the atmosphere, biosphere, and hydrosphere. This course explores the influence of humans on natural systems and how environmental solutions and consequences link to social, political, economic, health, and justice issues. Specifically, we will discuss topics related to population growth, energy, agriculture, urbanization, and environmental justice. This course is part of the Environmental Systems introductory sequence (EESC2201-EESC2208) for Environmental Geoscience majors.
EESC220601
Environmental Systems: Oceans
KINEKE, GAIL C
Spring 2020
The oceans cover 70% of the earth's surface and are home to much of its life. The oceans are critical to the earth's biogeochemical cycling of energy and mass. Ocean currents play a key role in climate through redistribution and exchange of heat with the atmosphere and storage of CO2. Coastal areas, the narrow interface between land and ocean, represent some of the most productive, populated, and vulnerable regions on earth. The course provides an introduction to the ocean's role in earth processes and explores topics and challenges facing a changing planet through case studies and critical and analytical thinking.

EESC333001
Paleobiology
STROTHER, PAUL K
Spring 2020
Paleobiology is the study of evolution based on Paleontology, the fossil record of life through geologic time. The course begins with the origins of life and early evolution during the Precambrian Eon, when all major domains of life were established. The rise of plants and animals, beginning about 500 million years ago, is followed by the study of macroevolution and patterns of evolution through time. Lecture emphasizes paleobiology and environmental evolution; laboratory provides direct observation of fossils including basic morphology and phylogeny. The class may include an extended weekend field trip to Nova Scotia to visit several fossil localities.

EESC446401
Environmental Data Exploration and Analysis
PALEVSKY, HILARY I
Spring 2020

Earth and environmental science increasingly depends on scientific programming to explore and analyze large datasets from in situ and autonomous observations, satellite remote sensing, and numerical model output. In this course, students will learn to use MATLAB to visualize earth system data across broad spatial and temporal scales in maps and time-series plots and apply statistical tools to analyze trends and variability in their datasets. Students will also learn to critically assess datasets and to select and justify appropriate data sources and analytical methods to address scientific questions about earth system processes. Students will practice these skills in a series of data analysis assignments focused on regional and global climate data and will apply them in a team-based final research project.

EESC446701
Glacial and Pleistocene Geology
BECKER, RICHARD
Spring 2020
This course will explore three topics: the physics of glaciers, the glacial deposits of the last ice age, and the history of the Pleistocene epoch. Students will learn how mass and energy fluxes govern the behavior of glaciers; how climate and the physical properties of ice govern the formation and evolution of glacial landscapes; and how we can infer Pleistocene paleoclimate and paleoglaciology from those landscapes. The course will include a field trip. A fundamental goal of the course will be providing students with a systematic understanding of how glacial landforms, glaciology, and climate co-vary across continental-scale landscapes.

EESC449001
Remote Sensing and Image Interpretation
SNYDER, NOAH P
Spring 2020
The course emphasizes methods of geologic and geomorphic interpretation of remotely sensed image data. We will be challenged with a series of images from which each student will draw relevant conclusions about the geology of the area represented, and prepare an interpretive map and cross section. Projects will be based on spatial data in digital format including topographic maps, digital elevation models, aerial photographs, satellite images, subsurface images, and scenes from the seafloor and other planets. We also will discuss: (1) strategies for effective visual communication of data; (2) methods of digital image analysis; and (3) recent scientific literature.

**Coastal Processes**  
**KINEKE, GAIL C**  
**Spring 2020**

This course is a study of the physical and geological processes responsible for the formation and evolution of coastal environments. The course takes a morphodynamic approach by studying the coupled suite of hydrodynamic processes, seafloor morphologies, and sequences of change. Topics to be covered include: classification of coasts, sea level change, shallow water physical oceanography and sediment transport, and coastal environments (barrier islands and beaches, deltas, estuaries). Includes problem sets and field trip(s) to the coast.

EESC559601
Undergraduate Reading and Research in Environmental Geoscience
PISANI GAREAU, TARA
Spring 2020
An independent study of some problem or area of knowledge in environmental geology under the direction of a faculty member. The possibility exists to work with actual problems in Massachusetts using data from state agencies. Also to be used for undergraduate students doing honors theses.

Credits: 03
Schedule: BY ARRANGEMENT
Room: None
Satisfies Core Requirement: None
Comments: None
Prerequisites: Permission of a faculty member.
Corequisites: None
Cross-listed with: None
Frequency: Annually

EESC559701
Undergraduate Reading and Research in Geology
BECKER, RICHARD
Spring 2020
For undergraduates wishing to pursue independent study in the area of geology under the direction of a faculty member. Study can be in an area of knowledgeable interest or on a particular problem.
EESC559801
Undergraduate Reading and Research in Geophysics
HAY, CARLING C
Spring 2020
For undergraduates wishing to pursue independent study in the area of geophysics under the direction of a faculty member. Study can be in an area of knowledgeable interest or on a particular problem.

EESC559901
Advanced Independent Research
BAXTER, ETHAN
Spring 2020
Independent study in Geology, Geophysics, or the Environmental Geosciences under the direction of a faculty member for undergraduate students qualifying for the University's Scholar of the College Program.
EESC666401
Environmental Data Exploration and Analysis
PALEVSKY, HILARY I
Spring 2020
Earth and environmental science increasingly depends on scientific programming to explore and analyze large datasets from in situ and autonomous observations, satellite remote sensing, and numerical model output. In this course, students will learn to use MATLAB to visualize earth system data across broad spatial and temporal scales in maps and time-series plots and apply statistical tools to analyze trends and variability in their datasets. Students will also learn to critically assess datasets and to select and justify appropriate data sources and analytical methods to address scientific questions about earth system processes. Students will practice these skills in a series of data analysis assignments focused on regional and global climate data and will apply them in a team-based final research project.

EESC666701
Glacial and Pleistocene Geology
BECKER, RICHARD
Spring 2020
This course will explore three topics: the physics of glaciers, the glacial deposits of the last ice age, and the history of the Pleistocene epoch. Students will learn how mass and energy fluxes govern the behavior of glaciers; how climate and the physical properties of ice govern the formation and evolution of glacial landscapes; and how we can infer Pleistocene paleoclimate and paleoglaciology from those landscapes. The course will include a field trip. A fundamental goal of the course will be providing students with a systematic understanding of how glacial landforms, glaciology, and climate co-vary across continental-scale landscapes.

EESC669001
Remote Sensing and Image Interpretation
SNYDER, NOAH P
Spring 2020
The course emphasizes methods of geologic and geomorphic interpretation of remotely sensed image data. We will be challenged with a series of images from which each student will draw relevant conclusions about the geology of the area represented, and prepare an interpretive map and cross section. Projects will be based on spatial data in digital format including topographic maps, digital elevation models, aerial photographs, satellite images, subsurface images, and scenes from the seafloor and other planets. We also will discuss: (1) strategies for effective visual communication of data; (2) methods of digital image analysis; and (3) recent scientific literature.

EALC216101
Ghosts and Strange Happenings in Chinese Literature
CHIANG, SING-CHEN L
Fall 2019
Introduction to the East Asian classic Extensive Records for the Era of Great Peace, an encyclopedic collection of classical Chinese "records of anomalies" (zhiguai) about ghosts, immortals, monsters, fantastic lands, and other such "strange-but-true" happenings. Compiled by the court in the tenth century, the collection soon became an influential source of creative inspiration for East Asian writers. Students will learn about the diverse literary, philosophical, and religious traditions that helped shape these fascinating narratives. Special attention will be paid to the historical conditions that the stories reflect, including moral values, gender roles, and sociopolitical issues. No prerequisite. Taught in English.

Course is open to seniors by department permission.
ECON228901
Which is Better? An Economic Comparison of Health Care in France, the U.K., and the U.S.
REGAN, TRACY L
Summer 2019
This course is designed as an introduction to the health care systems of the U.S., the U.K., and France. In 2010, the WHO carried out the first ever analysis of the world's health systems and found that France provided the best overall health care. The U.K. was ranked #18 and the U.S. at #37. This couples with the U.S. spending 17.2% of its GDP in 2016 on health expenditures despite not having particularly good health outcomes (e.g., 38.2% obesity rate, 2015). By comparison, France only spends 11% of its GDP on health expenditures and has an obesity rate of 19.5%. The New York Times recently published a series of articles attempting to understand why the U.S. spends so much more than other (developed) countries and did not note and differences in utilization rates, for example, and instead explained the phenomena by referencing Uwe Reinhardt's famous 2003 paper entitled, "It's the Prices Stupid." In 2011, the BBC was happy to report the better health the English enjoyed relative to the Americans despite similar demographics (and worse weather and food!). This course will introduce students to these three representative health care systems and will seek to understand the disconnect between health care outcomes and spending. The 2010 Affordable Care Act essentially preserved the privatized nature of health care in the U.S. despite nearly every other (developed) country in the world having universal coverage.

Prerequisites: ECON2201.
Corequisites: None
Cross-listed with: None
Frequency: Annually

ECON336101
Monetary Theory and Policy
KAZEMI, HOSSEIN S
Summer 2019
This course is an analysis of how the operation and behavior of financial markets are influenced by monetary policy, the actions taken by the Federal Reserve to promote full employment, price stability, and moderate long-term interest rates. Emphasis is placed on studying the interaction between financial intermediaries (e.g., commercial banks, investment banks, mutual funds, hedge funds, etc.) and a nation's central bank. Students are introduced to the modern theories of the demand for and supply of money, as well as their implications for economic activity, the cost of living, employment, and the conduct of monetary policy. Particular emphasis is given to recent Fed policy, including Quantitative Easing and Quantitative Tightening and the impact of these policies on asset prices and long-term interest rates. Furthermore, through an extensive use of Bloomberg in this class students learn how to analyze the impact of these and other Fed policies on the U.S. economy and financial markets to provide a window into how modern practitioners in the discipline follow and respond to changes in U.S. monetary policy.

Prerequisites: macro theory and econometrics.

---

**ECON150101**  
**Beyond Price: Markets, Cultures, Values**  
**ERBIL, CAN; SESHADRI, KALPANA R**  
**Fall 2019**  
This course is about wealth and values--the condition of our "knowing the price of everything and the value of nothing." Given the glamour and power surrounding money and the super-rich, we examine issues concerning the economy, values, and the dominance of the market over our environment and personal lives. We look at markets, incentives, ecology and ethics through a combination of literature and economics. We also take up specific case studies that will enable us to better understand the relation between business decisions or market interests and their impact on the ordinary lives of working men, women, and children.

ECON170201
Life, Money and Health: The Economics of Healthcare
REGAN, TRACY L
Fall 2019
Is health care a human right? Should firms profit from a person's poor health? Is the private sector more efficient than the public sector in providing care? This class will answer these questions using basic tools of economic analysis like costs vs. benefits, efficiency vs. equity, and private vs. public goods. The supply and demand framework can be used to understand vaccine shortages, the obesity epidemic, and monopoly pricing in pharmaceuticals. Adverse selection and moral hazard can help us understand the ongoing debate regarding the ACA. Other current events like CTE, concierge medicine, and the opioid epidemic will be discussed.

**ECON200001**  
**The State of Affordable Housing in the States**  
**VAN METER, ROBERT H**  
**Fall 2019**

How does housing affect the lives of Americans? Where you live determines your access to schools, quality of healthcare, fresh food, clean air, parks and recreation, affordable credit, and even how long you are likely to live. This course explores concepts of housing policy and planning at the national, state, and local levels. It examines programs and policies used to subsidize housing for millions of Americans and help them gain access to a decent place to live. Topics will be considered from multiple perspectives including housing finance, design, community planning, inequality, operations management, and sustainability. We will explore the historical and economic context of U.S. housing and discuss the barriers that low-income families face that affects their access to decent housing. The course will be divided into three sections: history, policies, and today's issues. Students will explore some of the most recently developed programs and how they fit into effective community revitalization. These programs will be evaluated in class discussions and group presentations.

Real Estate and Urban Action is a class in which students explore the interdisciplinary fields that are engaged in neighborhood revitalization. The course uses the transformation of the failed Columbia Point housing project (Dorchester, MA) into Harbor Point, a successful mixed income neighborhood, as a core teaching case study, highlighting how successful redevelopment addresses the social and economic needs of community residents. Classes include guest lectures from developers, public planning officials, and supportive services experts on the social, cultural, and political factors critical to transforming distressed neighborhoods into safe and economically viable neighborhoods. It is a practical course, in which students gain experience through field trips and interactions with real estate and supportive services professionals, culminating in a team neighborhood transformation proposal.

Math for Economic Analysis

ECON 221101

WATSON, BRUCE D

Fall 2019

Assuming only high school algebra, the course develops all of the main mathematical tools used in modern economics. Students will learn the skills necessary to do well in subsequent economics courses, such as Micro Theory (ECON 2201) and Macro Theory (ECON 2202), as well as advanced electives, such as Game Theory in Economics (ECON 3308) and Financial Economics (ECON 3379). Those who have completed Multivariate Calculus (MATH 2202) should not take this course. Beginning with applications of standard algebra to economics, the course looks at partial and general equilibrium and comparative statics. Topics subsequently explored include introductory linear algebra (matrices and vectors), and applications of univariate (single-variable) calculus to economics. Multivariate calculus is covered next, with applications to consumer theory and the theory of the firm. Finally, unconstrained and constrained optimization is covered, including techniques such as the Lagrange multiplier and Jacobian matrices. Applications and examples are drawn from practical problems in economics and business. Throughout the course, an emphasis is placed on combining intuition with rigor—the math is used to provide a more rigorous analysis of the intuitive understanding students acquired in their principles of economics courses.

Geographic Information Systems for Planning and Decision-Making
COHEN, WILL W
Fall 2019
Large quantities of information are available to describe our social and physical environment with high detail, but making sense of this data requires specialized skill sets. Geographic Information Systems (GIS) is a general approach to analysis and is a powerful set of tools for understanding complex problems or for making a compelling argument about issues grounded in the physical or social environment. It is widely used in the public and private sectors. This course will introduce students to the use of GIS and representation as a means of looking at and representing spatial data. Students will learn how to perform the three broad steps of spatial analysis: (1) collecting and organizing data, (2) analyzing this data for appropriate patterns, and (3) using software to represent data on maps to support decision making.

ECON222912
Economic and Business Forecasting
MC GOWAN, RICHARD
Fall 2019
The theory and practice of applied time series analysis will be explored. First the different segments (trend, seasonality, cyclical, and irregular) of a time series will be analyzed by examining the Autocorrelation functions (ACF) and Partial Autocorrelation functions (PACF). The specifics model to model the various types of time series include linear regression, panel regression, seasonal decomposition, exponential smoothing, ARIMA modeling as well as combining models. This course is offered as an online hybrid course. In addition to the online lectures presented on the Canvas LMS, there are three required on-campus class meetings on Saturday morning September 15, Saturday morning October 6, and Saturday morning December 1. The midterm exam will also be held on campus on Monday evening October 15. Please see the course syllabus for additional details.

Development Economics  
JOGLEKAR, DEEPAK  
Fall 2019  
This course considers what we know about developing countries, and applies economic theory to help us understand the constraints of poverty. We will describe the economies of less developed countries and the lives of the poor, focusing on changes in poverty, inequality, demography, and health. We will consider theories and evidence for why some countries are rich and others poor. We will examine how land, labor, and credit markets function in poor countries and communities, and the consequences for health, education, and child labor. We will consider migration and its consequences and will discuss aid and international institutions.

Environmental Economics and Policy
SWEENEY, RICHARD L
Fall 2019
This course provides an introduction to the economics of environmental policy. We begin by examining market failures from externalities and public goods. We then discuss public policy options to correct these failures, and develop tools to assess the costs and benefits of each approach. With this framework in place, the remainder of the course is spent evaluating past efforts to conserve land and improve air and water quality, before concluding with an extensive discussion about global climate change policy.

Industrialization and Democratization in Korea
HWANG, INGU
Fall 2019
This introductory course surveys the political and economic transformation of South Korea from decolonization through the high growth era to today's global neo-liberal age. It traces how a war-ravaged country became a prosperous and industrialized nation. In exploring this transformation, it also examines the relationship between Korea's industrialization and its democratization: How did U.S. Cold War modernization impact the Korean state's economic strategy and its political development? Why and how did Korean society campaign for social and political justice during the economic high growth era? The course also considers the reconfiguration of South Korea's political economy since the 1990s.

This course is an introduction to game theory. Game theory consists of a coherent set of concepts and analytical tools to examine interactive or strategic situations between people, that is, situations where the well being of one actor depends not only what s/he does but also on what others do. Hence in deciding how best to act, each person needs to consider how others are likely to act as well. Game theory has become a widely used tool of analysis in a wide range of disciplines, including economics, business, political science, law, and international relations.

ECON336101
Monetary Theory and Policy
KAZEMI, HOSSEIN S
Fall 2019
This course is an analysis of how the operation and behavior of financial markets are influenced by monetary policy, the actions taken by the Federal Reserve to promote full employment, price stability, and moderate long-term interest rates. Emphasis is placed on studying the interaction between financial intermediaries (e.g., commercial banks, investment banks, mutual funds, hedge funds, etc.) and a nation's central bank. Students are introduced to the modern theories of the demand for and supply of money, as well as their implications for economic activity, the cost of living, employment, and the conduct of monetary policy. Particular emphasis is given to recent Fed policy, including Quantitative Easing and Quantitative Tightening and the impact of these policies on asset prices and long-term interest rates. Furthermore, through an extensive use of Bloomberg in this class students learn how to analyze the impact of these and other Fed policies on the U.S. economy and financial markets to provide a window into how modern practitioners in the discipline follow and respond to changes in U.S. monetary policy.

Prerequisites: macro theory and econometrics.

ECON337201
International Finance
MC HUGH, CHRISTOPHER

Fall 2019

International financial markets, international trade and balance of payments issues will be studied by using analytical models of the open economy. Topics of particular interests are exchange rate determination, capital flows, trade flows, and other international linkages between economies. The course will apply the analytical tools of international economics to address macroeconomic aspects of current policy issues such as the global impact of the financial crisis, exchange rate policy, sovereign debt crises, and persistent trade deficits and international indebtedness.

Credits: 03

Schedule: M W 8 30*

Room: CAMPION HALL 231

Satisfies Core Requirement: None

Comments: Not open to students who have taken ECON2271 or ECON3376

Prerequisites: ( ECON2202 OR ECON2204 ). ECON2228 is a prerequisite for ECON3372.

ECON337301  
**Impact Evaluation in Developing Countries**  
**CICHELLO, PAUL L**  
**Fall 2019**  
This course reviews advanced econometric techniques and research designs used to estimate the causal effect of programs or policies implemented in developing countries. Fixed effects, difference-in-difference, instrumental variable, and propensity score methods are discussed as are regression discontinuity, natural experiment, and randomized experiment designs. The economic rationale for such programs is also addressed. Topic areas include health, education, service delivery, insurance, and micro-finance.

ECON337401  
**Development Economics and Policy**  
**ANUKRITI, FNU**  
**Fall 2019**  
This course examines development economics and development policy. The purpose is to understand the lives of the poor and the economies of poor countries in order to understand what--if anything--can be done to improve their lives. We will consider what might be holding the poor back including population growth, lack of education, poor health, corruption, and institutional impediments such as poorly developed or tightly constrained markets. This course is appropriate for economics majors as well as for majors in international studies with the appropriate prerequisites.

ECON337601
International Economic Relations
ANDERSON, JAMES
Fall 2019
This course introduces the study of economic relations among countries. It combines material contained in ECON3371 and ECON3372, and substitutes for both those courses. Primarily designed for international studies majors, it is also appropriate for economics and other social science majors, with the proviso that the comprehensive coverage of the course implies that the workload is heavy and expectations for students are high. Topics include the determinants of trade in goods, services, and capital; the economic policies that nations use to influence such trade; the theory and practice of international macroeconomics; and problems of coordinating macroeconomic policies among countries. The course features the usefulness (and limitations) of game theory for explaining international economic interactions.

ECON337901
Financial Economics
IRELAND, PETER N
Fall 2019
This undergraduate elective focuses on financial economics, with specific emphasis on asset pricing and the valuation of risky cash flows. After developing and studying the details of consumer decision-making under uncertainty, it uses that general framework as a basis for understanding both equilibrium and no-arbitrage theories of securities pricing, including the capital asset pricing model (CAPM), the consumption capital asset pricing model (CCAPM), Arrow-Debreu theories, martingale pricing methods, and the arbitrage pricing theory (APT).

ECON338201
Introduction to Computational Investing
LAW, TZUO H
Fall 2019
In this course, students develop skills to automate an investment strategy. The first third of the course covers programming skills (Python), market structure, and portfolio evaluation. The second third covers optimization and commonly used strategies. In the final third, we cross-evaluate student projects and discuss theory behind applications. Students work on a group project after the first third of the course. By the end of the course, successful students are able to write and evaluate fully functional programs on an online trading platform. This is not a course that promotes quantitative investing. It is an immersion to acquire the universally useful skills required to automate investments. The lab session is mandatory. Course offered in the fall only. Sophomores and juniors are highly encouraged to take this course. If the course is full, simply show up in class and the instructor will sort things out. There are no formal requirements.

ECON772001
Math for Economists
IRELAND, PETER N
Fall 2019
"Economics studies the efficient allocation of scarce resources." It follows almost immediately from this definition that while verbal and graphical analyses are often helpful too, economists derive their sharpest and most powerful results by setting up and solving constrained (because resources are "scarce") optimization (because allocations should be "efficient") problems. Hence, this course introduces first-year graduate students to variety of techniques for doing just that: setting up and solving constrained optimization problems. Specific methods covered include those based on the Kuhn-Tucker and envelope theorems, the maximum principle, and dynamic programming. Note that since this is a "math for economists course", its emphasis is not so much on stating and proving theorems but on developing an intuitive understanding of how and why each method works and determining when one particular approach may be easier or more convenient than all others to apply to a specific problem.

**ECON775001**  
*Macroeconomic Theory I*  
SCHIANTARELLI, FABIO  
Fall 2019  
The course covers the standard models of exogenous and endogenous growth, mostly in a deterministic setting: The Solow-Swan model without and with human capital, the Ramsey growth model with infinitely lived optimizing agents, overlapping generation models without and with altruism, fiscal policy, models with human capital, basic AK models of endogenous growth, two sector models of endogenous growth, product variety models and Schumpeterian growth models. We will also review some crucial empirical papers on applied growth, starting from those on the fundamental causes of growth. In the last part of the course we cover the Ramsey model in discrete time with a stochastic technology shock and the choice of investment with adjustment costs and consumption in a stochastic setting.
ECON777001
Statistics
XIAO, ZHIJIE
Fall 2019
The first part of this course deals with topics in probability theory, including random variables, conditional distributions, expectation, and multivariate distributions. The second part presents topics in mathematical statistics, including moment estimation, hypothesis testing, asymptotic theory, and maximum likelihood estimation.

ECON885301
Industrial Organization I
MORTIMER, JULIE H
Fall 2019
In this course, we study imperfect competition among firms, emphasizing empirical work. We learn how to implement empirical methods commonly used in Industrial Organization (IO), and how to read, and ultimately write, papers in empirical IO. Topics covered include demand estimation, entry, auctions, bundling, vertical control and contractual arrangements, retailing and inventories, U.S. merger policy, health markets, and others as time allows. Each topic is organized around recent empirical work. Throughout, we consider the importance of identification in empirical studies.

Game Theory and Applications

EKMEKCI, MEHMET

Fall 2019
In this elective advanced Graduate Class, we will cover many topics and problems that fall under the category game theory with more emphasis on dynamic games and repeated games. Although we will study some topics of dynamic games with complete information, there will be a disproportionate weight on problems with asymmetric information, and problems in which there are elements related to learning. More specifically, we will study Repeated Games, Reputation Games, Bargaining, Experimentation and Information Aggregation. Students should have a strong background in Mathematical tools used in economics, and should have taken an advance undergraduate course in Game Theory, and/or first year Graduate Micro sequence.

ECON170301
The American Divide: The Economics of Inequality
SANZENBACHER, GEOFFREY T
Spring 2020
Concern over inequality in the U.S. has shown itself in movements like Occupy Wall Street, the Fight for a Fifteen Dollar Minimum Wage, and Black Lives Matter. These courses will examine the meaning, causes and consequences of inequality from the perspectives of Philosophy and Economics. Providing a broad picture of the current state of the U.S. economy, and analyzing the role of economic policy in determining opportunities and outcomes, the course will prepare students to develop their own views about how past economic choices shaped current economic realities, and how we might create a more equitable future.

ECON220401
Macroeconomic Theory: Honors Level
MURPHY, ROBERT G
Spring 2020
A more intensive treatment of the same material presented in ECON2202 covering the theory and practice of macroeconomics. Open to anyone who has done well in Principles of Economics. The course focuses on the underlying determinants of economic growth, unemployment, and inflation by developing and analyzing a variety of models. A central feature of the course includes understanding the ability and limitations of macroeconomic policy for stabilizing the business cycle and promoting long-term growth. Multivariate Calculus MATH2202 recommended.

**Real Estate and Urban Action**  
**MCCULLAGH, NEIL P**  
**Spring 2020**  
Real Estate and Urban Action is a class in which students explore the interdisciplinary fields that are engaged in neighborhood revitalization. The course uses the transformation of the failed Columbia Point housing project (Dorchester, MA) into Harbor Point, a successful mixed income neighborhood, as a core teaching case study, highlighting how successful redevelopment addresses the social and economic needs of community residents. Classes include guest lectures from developers, public planning officials, and supportive services experts on the social, cultural, and political factors critical to transforming distressed neighborhoods into safe and economically viable neighborhoods. It is a practical course, in which students gain experience through field trips and interactions with real estate and supportive services professionals, culminating in a team neighborhood transformation proposal.

**Credits:** 03  
**Schedule:** W 3-5 20  
**Room:** STOKES HALL 103N  
**Satisfies Core Requirement:** None
Comments: The only prerequisite is an interest in any facet of real estate and urban action. Given the multidisciplinary tasks required to create viable communities, students from all schools at Boston College are welcomed to participate.

ECON220901
Sports Economics
KONAN, MARTIN K
Spring 2020
This course will develop fundamental economic concepts in the context of the sports industry. Students will apply economic theory to various aspects of both collegiate and professional sports. Topics include (but are not limited to) wage discrimination in sports, alumni giving and collegiate athletics, academics and collegiate athletics, sports rights and broadcasting, sports and gambling, salary caps, revenue sharing, insurance contracts, expansion, and stadium/arena financing.

ECON221101
Math for Economic Analysis
WATSON, BRUCE D
Spring 2020
Assuming only high school algebra, the course develops all of the main mathematical tools used in modern economics. Students will learn the skills necessary to do well in subsequent economics courses, such as Micro Theory (ECON2201) and Macro Theory (ECON2202), as well as advanced electives, such as Game Theory in Economics (ECON3308) and Financial Economics (ECON3379). Those who have completed Multivariate Calculus (MATH2202) should not take this course. Beginning with applications of standard algebra to economics, the course looks at partial and general equilibrium and comparative statics. Topics subsequently explored include introductory linear algebra (matrices and vectors), and applications of univariate (single-variable) calculus to economics. Multivariate calculus is covered next, with applications to consumer theory and the theory of the firm. Finally, unconstrained and constrained optimization is covered, including techniques such as the Lagrange multiplier and Jacobian matrices. Applications and examples are drawn from practical problems in economics and business. Throughout the course, an emphasis is placed on combining intuition with rigor--the math is used to provide a more rigorous analysis of the intuitive understanding students acquired in their principles of economics courses.

ECON221201
Geographic Information Systems for Planning and Decision-Making
COHEN, WILL W
Spring 2020
Large quantities of information are available to describe our social and physical environment with high detail, but making sense of this data requires specialized skill sets. Geographic Information Systems (GIS) is a general approach to analysis and is a powerful set of tools for understanding complex problems or for making a compelling argument about issues grounded in the physical or social environment. It is widely used in the public and private sectors. This course will introduce students to the use of GIS and representation as a means of looking at and representing spatial data. Students will learn how to perform the three broad steps of spatial analysis: (1) collecting and organizing data, (2) analyzing this data for appropriate patterns, and (3) using software to represent data on maps to support decision making.

ECON221301
Economics of Health Policy
RICHARDSON, SAMUEL S
Spring 2020
This course builds on fundamental concepts from Principles to apply economic reasoning to health policy issues. We will develop some tools for thinking critically about health economics data, and then delve into the history and institutional details of health policy in the United States. The rest of the course is devoted to the economics behind a variety of health policy questions: how could policymakers use cost-effectiveness analysis when deciding whether to adopt new health care technology? How can the economics of externalities inform policies around vaccination? Why do we give patents to pharmaceutical companies when we know that monopolies create deadweight loss? Why do economists oppose the tax deduction for employer-sponsored health insurance plans? How did Obamacare's individual health insurance mandate affect insurance markets, and what should we expect now that the mandate has been repealed? How can information asymmetries result in low-quality health care? Why does the United States spend so much more than other countries on health care, and what do we gain from that additional spending?

Economic and Business Forecasting
MC GOWAN, RICHARD
Spring 2020
The theory and practice of applied time series analysis will be explored. First the different segments (trend, seasonality, cyclical, and irregular) of a time series will be analyzed by examining the Autocorrelation functions (ACF) and Partial Autocorrelation functions (PACF). The specifics model to model the various types of time series include linear regression, panel regression, seasonal decomposition, exponential smoothing, ARIMA modeling as well as combining models. This course is offered as an online hybrid course. In addition to the online lectures presented on the Canvas LMS, there are three required on-campus class meetings on Saturday morning September 15, Saturday morning October 6, and Saturday morning December 1. The midterm exam will also be held on campus on Monday evening October 15. Please see the course syllabus for additional details.

ECON227301
Development Economics
JOGLEKAR, DEEPAK
Spring 2020
This course considers what we know about developing countries, and applies economic theory to help us understand the constraints of poverty. We will describe the economies of less developed countries and the lives of the poor, focusing on changes in poverty, inequality, demography, and health. We will consider theories and evidence for why some countries are rich and others poor. We will examine how land, labor, and credit markets function in poor countries and communities, and the consequences for health, education, and child labor. We will consider migration and its consequences and will discuss aid and international institutions.

Credits: 03
Schedule: T TH 12*
Room: O'NEILL LIBRARY 253

ECON330601
Economics of Education
SANKARAN, CHANDINI
Spring 2020
This course combines economic theory, econometric literature, and institutional literature to examine current issues in U.S. education. Topics include: The basic theory of investments in education (human capital theory); disentangling the return to education from the return to innate ability; the role of education in individual mobility and national economic growth; the association between education and individual earnings and reasons why that relationship has changed over time; the role of early childhood education; the main approaches to K-12 school reform (money, choice, educational standards, and teacher selection/training); higher education and higher education policy. We will also discuss teacher assessment methods, computers in education, and the effectiveness of different teaching methods. Prerequisites: micro theory and econometrics.
ECON330801
Game Theory in Economics
SHARUNOVA, VERA
Spring 2020
This course is an introduction to game theory. Game theory consists of a coherent set of
concepts and analytical tools to examine interactive or strategic situations between people, that
is, situations where the well being of one actor depends not only what s/he does but also on
what others do. Hence in deciding how best to act, each person needs to consider how others
are likely to act as well. Game theory has become a widely used tool of analysis in a wide range
of disciplines, including economics, business, political science, law, and international relations.

ECON331201
Evolutionary Economics
COX, DONALD
Spring 2020
This course uses evolutionary biology to better understand the psychology of preferences, a central concept in economics. Why are people risk averse? Impatient? What explains novelty seeking, habits, addictions? What makes parents provide for children? We will use evolutionary thinking to explore these and a host of other diverse topics: violence, adolescent risk taking, sexual behavior, mating preferences, marriage and divorce, rearing and investing in children, extended families, trade and specialization, cooperation and conflict, cults and gangs, religion, and interactions between genetic and cultural forces. This course has an intensive research and writing requirement and enrollment is limited. You should be comfortable using Stata.

Prerequisites: Micro theory and econometrics.

Economies of Inequality
SANZENBACHER, GEOFFREY T

Spring 2020
The course will provide both a theoretical and empirical analysis of economic inequality. This will include analysis and discussion of recent trends in inequality and an examination of the economic causes and consequences of inequality. Specific attention will be paid to the difference between inequality of economic outcomes (e.g., employment status, earnings, and occupation) and inequality of economic opportunity. The course will also touch on economic policy, including discussions of programs designed to combat inequality of outcomes, like welfare and food stamps, as well as those designed to combat inequality of opportunity, like Head Start. Prerequisites: micro theory and econometrics.

**ECON332301**  
**Topics in Monetary Economics**  
**MC HUGH, CHRISTOPHER**  
**Spring 2020**  
This course covers current topics in monetary and macroeconomics with emphasis on monetary policy tools developed and widely implemented or discussed in academic circles in the post-2008 period. Major topics are the new scope and role of banking, the evolution of short term target interest rates, unconventional policy tools notably quantitative easing, asset prices as policy target, macroprudential supervision, communication/forward guidance as policy tool and the conveying of policy to financial markets under constant anticipation. Special topics include negative interest rates, Modern Monetary Theory, helicopter money, price level targeting, nominal GDP targeting, international policy coordination, and repo/reverse repo markets. The course will include both theoretical and empirical analysis. Empirical analysis will focus on the United States but the history and policy of nations including the United Kingdom, Japan, and Eurozone will also be covered. Readings will be drawn largely from central bank and similar policy institute sources.

**Credits:** 03  
**Schedule:** M W 4 30*  
**Room:** GASSON HALL 304

**ECON332401**  
**Money and Financial Markets**  
**KAZEMI, HOSSEIN S**  
**Spring 2020**
This course covers topics such as the significance and multiple functions of money in the economy, the behavior of interest rates, the banking system, financial markets, and the management of financial institutions. This course further covers the Federal Reserve System and the conduct of monetary policy, different asset classes, the foreign exchange market, and the international financial system. There is a heavy emphasis on use of market data and the analysis of economic releases-earnings reports, government policy statements, etc.-to provide a comprehensive introduction to the subject. Moreover, through an extensive use of Bloomberg in this class students learn how to access and analyze data and economic releases to provide a window into how modern practitioners in the discipline analyze financial markets. Prerequisites: macro theory and econometrics

ECON336101
Monetary Theory and Policy
KAZEMI, HOSSEIN S
Spring 2020
This course is an analysis of how the operation and behavior of financial markets are influenced by monetary policy, the actions taken by the Federal Reserve to promote full employment, price stability, and moderate long-term interest rates. Emphasis is placed on studying the interaction between financial intermediaries (e.g., commercial banks, investment banks, mutual funds, hedge funds, etc.) and a nation's central bank. Students are introduced to the modern theories of the demand for and supply of money, as well as their implications for economic activity, the cost of living, employment, and the conduct of monetary policy. Particular emphasis is given to recent Fed policy, including Quantitative Easing and Quantitative Tightening and the impact of these policies on asset prices and long-term interest rates. Furthermore, through an extensive use of Bloomberg in this class students learn how to analyze the impact of these and other Fed policies on the U.S. economy and financial markets to provide a window into how modern practitioners in the discipline follow and respond to changes in U.S. monetary policy.
Prerequisites: macro theory and econometrics.

KIMELMAN, NANCY
Spring 2020
This course allows students the opportunity to apply macroeconomic and microeconomic techniques and models to issues of current importance. Although the choice of topics is based on the interests of the students present, typically the course covers the economic effects of immigration, changes in the minimum wage, negative interest rate policies, fiscal challenges of the federal government, Social Security reform, income inequality, and trade.

Credits: 03
Schedule: T TH 4 30*
Room: O'NEILL LIBRARY 257
Satisfies Core Requirement: None

American Economic Policy
KIMELMAN, NANCY
Spring 2020
This course allows students the opportunity to apply macroeconomic and microeconomic techniques and models to issues of current importance. Although the choice of topics is based on the interests of the students present, typically the course covers the economic effects of immigration, changes in the minimum wage, negative interest rate policies, fiscal challenges of the federal government, Social Security reform, income inequality, and trade.
ECON336901  
**Economics of Sports**  
MURRY, CHARLES T  
**Spring 2020**

Students will gain a deeper understanding of how various markets are organized in sports industries and the economics of decision making in sports contexts. Topics to be covered include price discrimination, dynamic pricing in secondary goods markets, labor market power, the value of player talent, competitive balance, league power and antitrust, and the application of game theory to sports.

ECON337201  
**International Finance**  
VALCHEV, ROSEN Z  
**Spring 2020**
International financial markets, international trade and balance of payments issues will be studied by using analytical models of the open economy. Topics of particular interests are exchange rate determination, capital flows, trade flows, and other international linkages between economies. The course will apply the analytical tools of international economics to address macroeconomic aspects of current policy issues such as the global impact of the financial crisis, exchange rate policy, sovereign debt crises, and persistent trade deficits and international indebtedness.

**Credits:** 03  
**Schedule:** M W 8 30*  
**Room:** O'NEILL LIBRARY 257  
**Satisfies Core Requirement:** None  
**Comments:** Not open to students who have taken ECON2271 or ECON3376  
**Prerequisites:** ( ECON2202 OR ECON2204 ). ECON2228 is a prerequisite for ECON3372.

ECON337501
From Stone Tools to Robots: Economic Growth and Development
GUERRON, PABLO A
Spring 2020
This course introduces students to Economic Growth. Our starting point is the question of why societies did not experience economic growth for most of human history. Indeed, growth is a very recent economic concept dating back to the nineteenth century. We will then study what drives growth. Examples include the introduction of electricity, telephone, and airplanes. In general, we will study how technology, capital accumulation, human capital, and innovation helped humanity to increase its well-being. Finally, we will cover the impact of growth on our lives. For example, how life expectancy has changed over the past century.

ECON337601
International Economic Relations
ANDERSON, JAMES
Spring 2020
This course introduces the study of economic relations among countries. It combines material contained in ECON3371 and ECON3372, and substitutes for both those courses. Primarily designed for international studies majors, it is also appropriate for economics and other social science majors, with the proviso that the comprehensive coverage of the course implies that the workload is heavy and expectations for students are high. Topics include the determinants of trade in goods, services, and capital; the economic policies that nations use to influence such trade; the theory and practice of international macroeconomics; and problems of coordinating macroeconomic policies among countries. The course features the usefulness (and limitations) of game theory for explaining international economic interactions.

**ECON337901**  
**Financial Economics**  
**IRELAND, PETER N**  
**Spring 2020**  
This undergraduate elective focuses on financial economics, with specific emphasis on asset pricing and the valuation of risky cash flows. After developing and studying the details of consumer decision-making under uncertainty, it uses that general framework as a basis for understanding both equilibrium and no-arbitrage theories of securities pricing, including the capital asset pricing model (CAPM), the consumption capital asset pricing model (CCAPM), Arrow-Debreu theories, martingale pricing methods, and the arbitrage pricing theory (APT).

ECON338901
Machine Learning for Economics
ARLASHIN, ANATOLY S
Spring 2020
One of the defining features of the world around us today is the ever-increasing amount of data that describe our daily lives. This "big data" phenomenon, as it became known, has led to developing of new methods, called "machine learning," that allow high-dimensional statistical analysis in ways that were either impossible or infeasible for classical statistical methods, such as regression analysis. The goal of this course is to provide students with an introduction to machine learning in a framework way that makes it applicable to causal economic analysis. While we will cover the necessary theoretical foundations, the emphasis will be placed on application and learning how and when to use these new methods, and what are their pros and cons compared to classical methods of statistical analysis.

ECON339001
Applied Health Economics
RICHARDSON, SAMUEL S
Spring 2020
A perennial health policy debate concerns the proper role of government in the allocation of health care. The first fundamental theorem of welfare economics states that (under certain assumptions) markets result in efficient allocations, so one might expect most economists favor minimal government involvement in allocating health care. We will begin by studying economic theories about why health care markets may be inefficient, along with the empirical evidence regarding those theories. As the course progresses, our emphasis will shift: in groups, students will use publicly-available data to write and present a research paper investigating a policy-relevant health economics question. Prerequisites: micro theory and econometrics.

ECON 808601
Labor Economics II
FOERSTER, HANNO
Spring 2020
With ECON8085, this course prepares students to do research in labor economics. Topics include labor supply and demand, human capital, family economics, discrimination, wage inequality, occupational choice, unemployment, job matching theory, and business cycle behavior of labor markets.
ECON881901
Mechanism Design
YENMEZ, MEHMET B; UNVER, M UTKU
Spring 2020
This course is going to cover some fundamental topics in mechanism and market design as well as some advanced ones. We will start with Bayesian mechanism design and dominant strategy mechanisms. Other topics include dynamic mechanism design, robust mechanism design, and axiomatic mechanism design. We will also consider non-transferable utility settings.

ECON885501
Empirical Methods in Applied Micro
MURRY, CHARLES T
Spring 2020
This is a Ph.D. level course in applied econometrics and computational economics, targeted at students conducting applied research (as opposed to econometricians). Topics include nonparametric regression, model selection, penalized regression, treatment effects, selection, discrete choice, dynamic discrete choice, root-finding, optimization, and partial identification. We will discuss these topics in the context of popular papers across many fields of applied microeconomics.

ECON885601
Experimental Economics
COFFMAN, LUCAS
Spring 2020
This class is an introduction to experimental methods in economics. We will cover all the steps of an experiment from design, measurement, and randomization to practical considerations like cost and power analyses. This is mainly a methods course; the experiments we discuss are chosen to give a broad understanding of experimental methods (e.g., lab, field, and online studies, experiments in developing countries, interventions in organizations, and so on). The course is not intended to provide a foundation of famous experimental results overall or for any one topic. The take-away of the course is to develop the ability to design a confound-free experiment regardless of question or context.

Schedule: F 9-11 30
Room: MALONEY HALL 313
Satisfies Core Requirement: None
ECON887301
Empirical Methods in Macroeconomics and Finance
GUERRON, PABLO A
Spring 2020
We will study econometric models and methods that are useful to conduct substantive empirical research in macroeconomics and finance. We consider the estimation and evaluation of dynamic stochastic general equilibrium models, analysis of linear and nonlinear vector autoregressive models, time series models with regime switches and time-varying coefficients, as well as dynamic factor models. For the most part, we will focus on Bayesian methods of inference, with detailed discussions of suitable Markov-Chain- Monte-Carlo methods.

ECON887401
International Macroeconomics
NOSAL, JAROMIR B
Spring 2020
This course will focus on the construction of models for understanding the international business cycle and analysis of macroeconomic policy in open economies. The first part will focus on the transmission of macroeconomic shocks across countries, from the international real business cycle literature to models with nominal rigidity and financial imperfections. The second part will cover the recent literature on macroeconomic policy in open economies. The third portion of the course will return to model building and shock transmission and focus on the recent literature at the intersection between international trade and macroeconomic theory.

ENGL101001
First Year Writing Seminar
NORWOOD, KELSEY E
Summer 2019
Designed as a workshop in which each student develops a portfolio of personal and academic writing, the seminar follows a semester-long process. Students write and rewrite essays continuously, discuss their works-in-progress in class, and receive feedback during individual and small group conferences with the instructor. Students read a wide range of texts, including various forms of non-fiction prose. In addition to regular conferences, the class meets two hours per week to discuss the writing process, the relationship between reading and writing, conventional and innovative ways of doing research, and evolving drafts of class members.

ENGL214301  
American Literary History III  
PUENTE, LORENZO A  
Summer 2019  
This course provides an introductory overview of literature written in the United States from World War I to the early twenty-first century. We will look at the ways writers of this period have experimented idiosyncratically and in dialogue with one another as modernism turned postmodern, as canons collided and collapsed, as movies and music albums, as well as graphic literature displaced some of literature's more traditional forms. The course is largely conversational but structurally supported with student oral presentations. Required texts may include fiction by William Faulkner, Willa Cather, Toni Morrison, Maxine Hong Kingston, Sherman Alexie, and Junot Diaz, plus graphic literature by Art Spiegelman and Thi Bui. Requirements for the course include an oral presentation, two critical essays, two section exams, and a final exam.

ENGL222101  
Introduction to Creative Writing  
ROBERTS, SUSAN A  
Summer 2019
An introductory course in which students will write both poetry and short fiction and read published examples of each. We will experiment with the formal possibilities of the two genres and look at what links and separates them. The course is workshop-based, with an emphasis on steady production and revision. Through exercises and/or open and directed writing assignments, students will produce a portfolio of short fiction and poetry.

English Courses: Fall 2019

ENGL100901
First Year Writing Seminar/English Language Learners
RAYEESA, UNTARA
Fall 2019
This course, offered in the fall, is part of a year-long sequence of English language support. It may be taken in place of ENGL1010 and fulfills BC's writing core requirement. Similar to ENGL1010, students will gain practice in the writing of academic essays, focusing on a range of English rhetorical styles from narrative to analytic, to research. The composition process from brainstorming, drafting, revision, and editing will be considered. Grammar support for students from linguistically diverse backgrounds is provided throughout the semester. Students in this course will continue with ENGL1079 Literature Core/ELL in the spring.

Credits: 03
Schedule: T TH 10 30*
Room: STOKES HALL 476S
Satisfies Core Requirement: Writing
Comments: Department permission required Limited to 15. Students place into the course after taking a writing assessment.
Prerequisites: None
Corequisites: None
Cross-listed with: None

ENGL101001
First Year Writing Seminar
RUDNER, BONNIE
Fall 2019
Designed as a workshop in which each student develops a portfolio of personal and academic writing, the seminar follows a semester-long process. Students write and rewrite essays continuously, discuss their works-in-progress in class, and receive feedback during individual and small group conferences with the instructor. Students read a wide range of texts, including various forms of non-fiction prose. In addition to regular conferences, the class meets two hours per week to discuss the writing process, the relationship between reading and writing, conventional and innovative ways of doing research, and evolving drafts of class members.

ENGL101061
First Year Writing Seminar
DEROSA, MARLA C
Fall 2019
Designed as a workshop in which each student develops a portfolio of personal and academic writing, the seminar follows a semester-long process. Students write and rewrite essays continuously, discuss their works-in-progress in class, and receive feedback during individual and small group conferences with the instructor. Students read a wide range of texts, including various forms of non-fiction prose. In addition to regular conferences, the class meets two hours per week to discuss the writing process, the relationship between reading and writing, conventional and innovative ways of doing research, and evolving drafts of class members.

ENGL108001
Literature Core
AINSWORTH, TRESEANNE
Fall 2019
In Literature Core, students explore the principal motives which prompt people to read literature: to assemble and assess the shape and values of one's own culture, to discover alternative ways of looking at the world, to gain insight into issues of permanent human importance as well as issues of contemporary urgency, and to enjoy the linguistic and formal satisfactions of literary art. Literature Core will strive to develop the student's capacity to read and write with clarity and engagement, to allow for that dialogue between the past and present we call history, and to provide an introduction to literary genres.

ENGL109301
An Introduction to Modern Irish I
NUGENT, JOSEPH G
Fall 2019
In small classes and at a gentle pace, this course offers beginners an enjoyable introduction to the modern Irish language. No prior knowledge of Irish/Gaelic is required. ENGL1093 presents a superb opportunity to learn a new language, explore Irish/Celtic culture, and investigate the linguistic politics of Ireland. In addition to satisfying the Irish Studies minor requirement, this English Department course satisfies the modern language requirement of the Morrissey College of Arts and Sciences (by completing Intermediate Modern Irish).

ENGL118101
Literature Core: Hungry for Justice
CROW, ANDREA
Fall 2019
Food unites us, but it also drives us apart. Itself a "common good"—a vital resource that we share collectively? food is often the means through which the ways in which we imagine the common good manifests itself: who is invited to the table, what is on it, and how it got there are all a means through which a society makes manifest the values and bonds that knit its members into one body. Yet, at the same time that what we eat connects us to our communities, disparities in food access, differing dietary ethics, and problems in the infrastructure surrounding food production and consumption have catalyzed major conflicts across history. In this course, we will study how literary works register and attempt to mediate these tensions, giving particular attention to how race, gender, class, and national belonging inflect these conflicts. We will consider both the aesthetic and social practices that characterize food writing, examining traditional literary genres like poetry, prose fiction, essays, graphic novels, and film, as well as genres specific to food writing, such as cookbooks and recipe blogs. Additionally, we will use our investigations of this material to consider the role of food in our own community, through a series of field trips which will include going to a farmers? market, visiting a local farm, and touring the inner workings of BC dining services.

**ENGL150301**

**Beyond Price: Markets, Cultures, Values**

**ERBIL, CAN; SESHADRI, KALPANA R**

**Fall 2019**

This course is about wealth and values--the condition of our "knowing the price of everything and the value of nothing." Given the glamour and power surrounding money and the super-rich, we examine issues concerning the economy, values, and the dominance of the market over our environment and personal lives. We look at markets, incentives, ecology and ethics through a combination of literature and economics. We also take up specific case studies that will enable us to better understand the relation between business decisions or market interests and their impact on the ordinary lives of working men, women, and children.

ENGL171201
Roots and Routes: Reading Identity, Migration, and Culture
GRAVER, ELIZABETH
Fall 2019
We will read short stories and essays by twenty-first century writers who have emigrated to the U.S. as children or young adults, as well as portraits of immigrant communities. We will encounter recurrent themes around diaspora, exile, choice, national and transnational identities. Looking closely at language itself, we will think about multilingualism in the twinned contexts of our texts and the students’ own linguistic experiences. Students will perform close literary analysis through informal and formal writing assignments. They will produce a video of an interview that they conduct with an immigrant and go on a field trip into an immigrant community.

Credits: 03
Schedule: T TH 12*
Room: CARNEY HALL 302
Satisfies Core Requirement: Literature
Comments: Core Renewal Course: Enduring Questions. For freshmen only
This paired course (with ENGL1713) welcomes students from diverse cultural and linguistic backgrounds. Native English speakers, advanced English-language learners and OTE students are encouraged to register. Interested students should contact core@bc.edu for permission to enroll.
Prerequisites: With permission of the Instructor.
Corequisites: ENGL1713.
Cross-listed with: None
Frequency: Periodically

ENGL171301
Roots and Routes: Writing Identity, Migration, and Culture
ANDERSON, LYNNE C
Fall 2019

https://www.bc.edu/content/bc-web/academics/sites/university-catalog/courses/arts-sciences/english.html
Building on the themes of culture and identity explored in the paired literature course (ENGL1712), we will write in a variety of genres from creative narratives and shorter spoken word-style pieces to critical essays drawn from interviews and field research. We will delve into the questions of immigration, community, homeland, and choice, and consider what it means to write in a second language. Students will be encouraged to compose fresh, innovative prose and learn to give and receive productive feedback. On occasion, student writers will present their polished work to their peers in the classroom and online.

**ENGL171401**  
**Reading the Fate of Man, the Face of God, and the Malevolence of the Whale in Herman Melville's Moby-Dick**  
**MARTIN, MICHAEL**  
**Fall 2019**  
Moby-Dick (1851), arguably the greatest American novel, raises questions fundamental to human existence: What is fate? freedom? the meaning of life? the world? Can we know it? This course examines how characters, narrative voice, genre, and plotting create an almost biblical text; how depictions of whaling become parables; how historical references reflect contemporary politics; and how fiction can bring us to reflect on our own lives. Like Queequeg's tattoos, it presents a "mystical treatise on the art of attaining truth . . . whose mysteries not even [he] himself could read" while its value resides in simply raising the questions.

ENGL171501  
**Revolutionary Media: How Reading Changes Us**  
CRANE, MARY T  
**Fall 2019**  
As digital media have become more prevalent, studies have shown that they have changed the way we read and that various modes of reading shape our thinking, our feelings, and even our brains in varying ways. We read textbooks differently than we read poems, tweets differently than we read novels. This course centers on the cognitive and social contexts of reading, and will read a range of texts in different media, from 1450 to the present, that deal in some way with the nature of reading itself, including pamphlets, poems, novels, a graphic novel, film, and social media. We will also work on developing strategies for effective reading and writing.

**Credits:** 03

ENGL171701  
**Fictions of Development: Adolescence in Historical Context**  
MCALEAVEY, MAIA M  
**Fall 2019**
How does scientific discourse intersect with literary, historical, and cultural forces? Does it matter that Peter Pan, who refused to grow up, appeared in the same year (1904) as the first major psychological treatise on Adolescence? What might the angsty white teenagers of Rebel Without a Cause (1950) and The Catcher in the Rye (1951) have to do with James Baldwin's tale of coming of age in Harlem, Go Tell It On the Mountain (1953)? More recently, is there any relationship between the idealized teen world of Clueless and the dystopian high school in Never Let Me Go (2005)?

ENGL171801
Reading In/Justice: Literature as Activism from Abolitionism to #BlackLivesMatter
HARRISON-KAHAN, LORI
Fall 2019
This course examines how literature addresses questions of racial, gender, and economic injustice. Topics include slavery, abolition, and civil rights; feminism and gender equality; labor reform; and global human rights. Readings range from poetry, drama, and fiction to journalism, memoir, and new media. Questions will include: Why are some works created for activist purposes considered art while others are not? How do literary works transcend the writer's intentions to take on new meaning in the public sphere? How has the recovery of forgotten works by women and minority writers become an act of socio-political activism?

ENGL171901
Writing In/Justice: The Power of Response
DONOVAN-KRANZ, EILEEN
Fall 2019
In this writing workshop students will question, analyze, and respond to injustice through writing. By responding to readings, to the times we live in, and to their own long-burning questions regarding justice and injustice and the gap between, students will grow as college writers and thinkers. Education, discrimination in its many forms, economic inequality, and other topics determined by student interest will be examined. Texts may include Spiegelman's graphic novel MAUS, Freire's *Pedagogy of the Oppressed*, Coates' open letter to his son, *Between the World and Me*. Projects include letters, editorials, personal narratives, interviews, philosophical ponderings, a multi-genre research project.

ENGL172201
Oppression and Change in Contemporary United States: Writing as Social Action
MATHIEU, PAULA
Fall 2019
In First-Year Writing, students practice strategies for creating and revising writing for various purposes and audiences. This course will explore how writing can help one listen, empathize, explore and discover new ideas and points of view related to contemporary social inequality and change. By exploring oppression based on social class, gender, race and sexual orientation, we will use writing to learn about the causes and expressions of social inequality and justice, do interview-based research to listen to deepen our knowledge of others' experiences, and create projects that envision positive social transformation.

ENGL209701  
Intermediate Modern Irish I  
NUGENT, JOSEPH G  
Fall 2019  
This is a continuing course in modern Irish for those with a basic knowledge of the language. We'll emphasize the ability to read contemporary literature in various genres. Texts from a variety of authors and historical periods allow students to taste different writing styles: contemporary fiction, journalism, literary criticism, historical and cultural texts, while we enjoy Irish-language short films and videos.

ENGL212201
Language in Society
FLEMING, BRYAN C
Fall 2019
This course provides an introduction to the study of language in its social context, including
varieties of language associated with social class, ethnicity, locale, and age; bilingualism; pidgin
and Creole languages; proposals about the relationship of language, thought, and culture; and
the structure and role of discourse in different cultures. Sociolinguistic issues of contemporary
interest, including language and gender, language planning, and language and public policy will
be studied.

ENGL212501
Introduction to Feminisms
MURPHY, ANNALYSSA G
Fall 2019
This introductory course offers both an overview and a foundation for understanding the
various movements that make up what has come to be called the feminist movement in the U.S.
Because systems of privilege and disadvantage shape women's and men's identities and social
positions in multiple and unique ways, Introduction to Feminisms analyzes gender from an
interdisciplinary approach and applies numerous academic disciplinary methods to the study of
gender, including history, literature, psychology, and sociology, and explores women's and
men's experiences within various cultural contexts, including socioeconomic class, race and
ethnicity, religion and spirituality, nations of citizenship, origin, and generation.

Studies in Narrative
KLEIN, CHRISTINA
Fall 2019
This course introduces students to questions that they might bring to the study of narrative works—primarily novels, tales, and non-fictional narratives, though it may also include drama, film, and narrative poems. It aims to introduce the various critical frames through which we construct interpretations. As part of the process of reading, students will be introduced to common critical terms; narrative genres, conventions, and discourses; the construction of the character and the ways of representing consciousness; and the ordering of narrative time. The course will also expose the student to the implications of taking critical positions.

ENGL214101
American Literary History I
LEWIS, PAUL
Fall 2019
American Literary History I follows the development of American literary history from the landing of the *Mayflower* to the tumultuous decade of the 1850s, moving from early writers such as Bradstreet, Rowlandson and Taylor through writers of the Revolution and Early Republic such as Equiano, Franklin, and Rowson to such antebellum writers as Child, Thoreau, Hawthorne, Poe, Douglass, Whitman, and Melville. Course assignments include regular participation in class discussions, mid-semester and final examinations, and either one ten-page or two five-page essay(s). Students considering careers in secondary English education will be given the option of writing about approaches to teaching course texts.

ENGL214201
American Literary History II
REZNICK, SCOTT
Fall 2019
The decades following the Civil War were a time of fundamental change in U.S. society: the demise of the slave system and the rise of segregation; the emergence of industrialism, corporate culture, imperial adventurism, and successive waves of immigration; new roles for women; new patterns in cities and in regional byways; and new ideas imagined for reordering and reinventing democratic society all transformed the contours of daily life. This course examines how a diverse range of U.S. writers sought to capture and address these developments with new literary forms and practices, including the realist and naturalist novels to utopian literature and various forms of social commentary. Stretching, roughly, from 1865 to 1914, course readings will likely include works by Herman Melville, Mark Twain, W. E. B. Du Bois, Booker T. Washington, Rebecca Harding Davis, William Dean Howells, Charlotte Perkins Gilman, and Henry James.

**Credits:** 03

**ENGL215001**  
**African and African Diaspora Literature**  
**FREDERICK, RHONDA**  
**Fall 2019**  
By studying creative writing by African writers and writers of African descent, this course examines how diasporic Africans created viable lives for themselves in the "New World." Questions that define this study include: how were Africans in the diaspora able to negotiate the complex social, political, and cultural spaces they encountered? What ancestral traces have they retained and how do these traces co-exist within New World realities?

ENGL217001
Introduction to British Literature and Culture I
STANTON, ROBERT G
Fall 2019
A survey of British literature from Beowulf to the early eighteenth century. You will be introduced to major cultural themes and both canonical and lesser-known writers; learn the basic history of the English language; and explore topics like the court's influence on Renaissance literature and art, the new Renaissance focus on exploration and discovery, the development of drama before and after the English Revolution, the seventeenth-century emphasis on writing about the self, and the eighteenth-century rise of new modes of social life and communication. Works and authors will include Beowulf, Chaucer, Spenser, Shakespeare, Donne, Milton, Swift, and Pope.

ENGL220201
Beast Literature
POLT, CHRISTOPHER B
Fall 2019
From Mother Goose's fairy tales to lolcats, we imagine animals often speaking as we do. But what are we saying when we use animals to talk with and about one another? And what does literature featuring articulate animals say about our attitudes towards humans, animals, and the lines we draw between them? This course explores beast literature in its various forms (fable, comedy, the novel, epic, debate poetry, etc), examining its incarnations through ancient Greece and Rome, Medieval Europe, and the modern world.
ENGL221201
Introduction to Medical Humanities
TANNER, LAURA E
Fall 2019
This course will use contemporary literature as a springboard to consider the psychological, social, ethical, and experiential dimensions of sickness and health. In addition to exploring questions of illness and the body, we will address topics including disability, aging, pregnancy, pain, medical space, illness and culture, and care giving. Through the analysis of novels, poems, short stories and non-fiction, we will consider the way that bodily experiences, material conditions, and cultural constructions of normalcy shape our understanding of identity in sickness and in health.

**ENGL222001**
**Classical Mythology**
**EISENFELD, HANNE E**

**Fall 2019**
This course explores the mythology of ancient Greece, Rome, and the Near East within its cultural, political, historical, and religious contexts. You will meet (or renew your acquaintance with) mythical figures like Zeus, Gilgamesh, Medusa, and Helen as they appear in multiple literary genres and other artistic media. In order to analyze and interrogate these myths we will use ancient and modern frameworks for thinking about what mythology is and what it does. What can a myth tell us about the civilization that created, adopted, or adapted it? What do our uses of Classical mythology - and our creations of our own myths - tell us about ourselves?

This writing-intensive course offers a practical introduction to the art and craft of writing for performance. Students will engage in numerous writing exercises that highlight the special demands and opportunities of writing for the stage. Emphasis is placed on finding ways to contact and release the theatrical imagination and on mastering the basics of writing a solid dramatic scene. Exemplary plays by established playwrights will be studied as appropriate, but the overwhelming emphasis is on student writing.

**ENGL224601**  
**Introduction to Asian American Literature**  
**SONG, MIN**  
**Fall 2019**  
This course is a broad introduction to Asian American literature, criticism, and culture. This means that we will read at least one book-length work from each of the following ethnic groups: Filipino, Japanese, Chinese, Korean, South Asian, and Vietnamese. Together, the readings provide us with an opportunity to reflect on the long sweep of Asians in America struggling to give expression to their experiences. Discussion will often touch on many sensitive topics, so I wish to emphasize the importance of keeping an open mind, being respectful of others' opinions, and keeping up with the reading.

ENGL227701
Introduction to American Studies
HARRISON-KAHAN, LORI
Fall 2019
This course offers an introduction to the interdisciplinary study of American culture. It is not a survey of American cultural history; rather, we will concentrate on approaches, methods, and themes of interest as we assemble critical skills for making interpretive arguments about aspects of culture in their historical moment. The forms we analyze will include examples from literature, film, painting, music, theater, landscape, and architecture, among others. Members of the American Studies faculty will present guest lectures to highlight various aspects of the field.

ENGL235001
Blackness and the Problem
HOWARD, JONATHAN M
Fall 2019
In The Souls of Black Folk, W.E.B. Du Bois famously observes that to be black is to serially confront a question: "How does it feel to be a problem?" This course undertakes a survey of African American Literature as an ongoing mediation on the "problem" of being black, from the advent of racial slavery through to its contemporary afterlives. Reading broadly across a black literary tradition spanning four centuries and multiple genres, we will consider how black writers represent the "problem" of being black not merely as an unwelcome condition to be overcome but as an ethical orientation to be embraced in refusal of an anti-black world that is itself a problem.

Schedule: T TH 9*
Room: GASSON HALL 201
ENGL300801
Walking Black Boston
FREDERICK, RHONDA
Fall 2019
The city of Boston has many faces, so many that it might best be understood as "Bostons." We will explore this plural city through The Autobiography of Malcolm X (Malcolm Little first experiences differences between middle-class and working-class black people while moving through Roxbury and Boston. As Malcolm X, he preached at a mosque in Dorchester), Danzy Senna's Caucasia (a bildungsroman-of sorts that charts racial ideologies and activism through an interracial marriage, two mixed-raced and differently colored children, and the rhythms of Roxbury and Brookline), and Barbara Neely's Blanche Cleans Up (a mystery novel set in Roxbury, Jamaica Plain, and Brookline). Students will read and interpret these "Bostons" with short supplemental readings on Boston's history, cultures, politics, and social developments. Site visits to locations central to each work supplement our learning. Students will write short critical response papers that respond to our readings and walking tours.

Russian Drama
LIN, TONY H
Fall 2019
A close reading of exemplary Russian plays from neoclassicism to modernism. Employing principles developed by Konstantin Stanislavsky--the transformative Russian director and theater visionary--the course examines how literature in performance affects the audience. The course culminates in the production of a play, which students cast, direct, and design. Plays by Fonvizin, Griboedov, Pushkin, Gogol, Ostrovsky, Turgenev, Chekhov, Blok, Mayakovsky, and other authors. Conducted entirely in English. No knowledge of Russian is required.

ENGL320101
Epic Modernism
GANNON, MATTHEW
Fall 2019
An "epic," the modernist poet Ezra Pound once claimed, is a poem that includes history. This course will consider the ways in which modernist epics--such as those by Eliot, Joyce, and Woolf among others--include history. For these texts, history is not static but malleable: something to be reformed, reordered, and revolutionized through literature by writing and reading against the grain (with important political consequences). We will cover European and American modernist literature--as well as some painting and film--beginning from the turn of the twentieth century, as well as key theoretical works on the history of philosophy.

**ENGL322101**

**Time Travel: Historical Fiction, Alternative Pasts**

**MCALEAVEY, MAIA M**

**Fall 2019**

What is at stake in reimagining history through fiction? In this course, we consider the development of the genre of historical fiction, and investigate four important settings for historical novels: the Middle Ages (Mark Twain's *Connecticut Yankee in King Arthur's Court* and Kazuo Ishiguro's *The Buried Giant*); the Jacobite uprisings in the Scottish Highlands (Scott's *Rob Roy* and Gabaldon's *Outlander*); the French Revolution (Dickens's *A Tale of Two Cities*); and American Slavery (Morrison's *Beloved*, Whitehead's *Underground Railroad*). Topics will include the claims of realism and the powers of fantasy, the relationship of space to time, and the politics of fiction.

ENGL331001
Shakespeare
SOFER, ANDREW
Fall 2019
An introductory lecture/discussion course, placing Shakespeare's drama in the historical and theatrical contexts of his time. Topics will include Shakespeare's professional career; the playhouses for which he wrote; the structure of Elizabethan playing companies; Elizabethan stage conventions such as blank verse, doubling, and cross-dressing; and the textual and performance histories of his plays. Plays will likely include *A Midsummer Night's Dream*, *Hamlet*, *As You Like It*, *Othello*, *Measure For Measure*, and *The Tempest*.

ENGL331601
Incendiary Poetics: Whitman and Ginsberg
ROBERTS, SUSAN A
Fall 2019
Incendiary Voices: Whitman's *Leaves of Grass* and Ginsberg's "Howl." This seminar will focus on the long poems of Walt Whitman and Allen Ginsberg, whose work arguably changed the course of American poetry. We'll look at the structure and content of the poems through close reading, with additional short readings to provide context and demonstrate both how revolutionary were the poems themselves, and the ways they continue to talk to each other about American ideals and exceptionalism. Students will be expected to lead discussions on self-selected topics, and to participate fully in dialogue about the poems, the poets, and their times. Short papers, one longer final paper of 5-7 pages.

ENGL332601
Blackness, Performance, and Freedom
CURSEEN, ALLISON S
Fall 2019
From Henry Box Brown's cargo dramatics to Ellen Craft's incredible performance as a feeble white male traveling with his black servant to Brer Rabbit's feigned fear of the briar patch, artifice, and performance repeatedly serve as the necessary means, if not the conditions of possibility for, fugitive departure and black life. This course asks how masks, masquerades, contacts, and acting enable resistance and escape. We will explore how the radical work of historical black performances continue in contemporary black performances like Danny Glover's Childish Gambino; Beyonce's Sasha Fierce; Ru Paul's Drag Race; and the increasingly popular interest in black speculative and afro futurism (i.e., Random Acts of Flynness and Get Out).

ENGL335101
British Romantic Poetry
RICHARDSON, ALAN
Fall 2019
In this course we will read and discuss the poetry of Burns, Blake, Barbauld, Wordsworth, Coleridge, Byron, Shelley, Hemans, Keats, Clare, and Landon. In addition to reading a few essays in literary criticism and theory by the poets themselves, we will consider a variety of critical perspectives, including formalism (the study of poetic and other literary devices and structures) and other approaches, such as feminism and the New Historicism, that bring out the cultural, social, and historical contexts of the poems.

ENGL340101  
Science Fiction  
KAPLAN-MAXFIELD, THOMAS  
Fall 2019  
This is a course on the genre of literature known as "Science Fiction," "SF," or "scifi." Since this is a genre course, we will spend a bit of time discussing the definition of scifi, how there are many definitions that are not agreed upon, and what that tells us about the type of literature. We'll set the genre within the historical context of Enlightenment Rationalism and Romanticism's response to it, early nineteenth century Industrialism and the rise of machines. Class will consist of a bit of lecture followed mainly by discussions of the stories and books, within the terms set out above. We will read stories from Wells and Verne and novels from Asimov to Butler to see what scifi tells us about ourselves and where we are going. Three papers required plus a midterm and final.

ENGL352701  
General Linguistics  
CONNOLLY, MICHAEL J  
Fall 2019  
An introduction to the history and techniques of the scientific study of language in its structures and operations, including articulatory and acoustic phonology, morphological analysis, historical reconstruction, and syntactic models. This course provides an intensive introduction to the study of what languages are and how they operate. Exercises in the analysis of fragments from various languages supplement the theoretical lectures and readings.

ENGL370101  
Early Modern Love: Human and Divine  
None  
Fall 2019  
Love is one of the predominant themes in sixteenth and seventeenth century literature, in which love is variously described as a fire and a disease, a god and an idol, a misery and an ecstasy. This course will explore the literary forms and genres through which early modern authors depict love for family, friends, one's beloved, and God. We will study early modern understandings of the obstacles to an enduring love and the ways in which people sought to overcome these obstacles. Readings will likely include works by Shakespeare, Spenser, Milton, Donne, Herbert, and women writers of the period.

ENGL401901
Narrative Journalism: Classic and Contemporary
WILSON, CHRISTOPHER P
Fall 2019
This course is designed to introduce students to one of the most important new genres in contemporary writing--to "narrative journalism," fact-based story-telling that applies some of the classic techniques of literary fiction to so-called "long form" and book length treatments. Lately, narrative journalism is getting even more experimental, adapting forms from graphic novels, comics, film and digital storytelling--and we're going to look at many of those new forms. But it turns out that narrative journalism itself has a tradition of its own to draw upon: examples that extend back to famous writers such as George Orwell, John Hersey, Ryszard Kapuscinski, Ernest Hemingway, Margaret Randall, Lincoln Steffens, Mary McCarthy, Stephen Crane, and Joseph Mitchell. This course, then, plans to cut back and forth between classic journalistic writing and contemporary versions (by writers such as Joan Didion, George Packer, Anne Fadiman, and others), paying attention to matters of form and genre, legwork and research, relationships to "subjects" and informants and more. Open to all majors; of special interest to journalism minors; several short papers and a final examination.

ENGL402101  
Unrequited Love  
OHI, KEVIN J  
Fall 2019

In unrequited love, one confronts, in a deprivation as primal, almost, as hunger, the limits of one's power to shape the world, discovers the radically alien nature of others' desires and minds. This course will explore the many complexities of that painful mismatch, and the ways its unresolved contradictions--one is at once singular and replaceable, for instance, trapped in a place at once fated and contingent--leads one to large, intractable literary and aesthetic questions (character, psychology, social embeddedness, ethics). Readings will include texts from many historical periods, fields, and genres: philosophy, psychoanalysis, novels, poems, opera, film, for example.

ENGL402201  
Modern European Novel  
RESTUCCIA, FRANCES  
Fall 2019

A course on major European novelists of the early twentieth century: Proust, Gide, Musil, Rilke, Mann, Kafka, Pessoa. We will read modernist theory and ask: What is modernism? What is modernist temporality? How is interiority reflected? We will put modernist writers into relation with philosophy developing during this period (e.g., Heidegger, Benjamin) as well as with contemporary theory (Marxism, post-structuralism, psychoanalysis), responding in particular to Badiou's sense of modern art in *The Century*. Does modernism's passion for the Real express itself through formalizations pointing to cracks in the Symbolic or in a less circuitous manner? A mid-term and final paper.

Credits: 03  
Schedule: T TH 12*
ENGL402301
Twentieth Century Irish Women Writers
HOWES, MARJORIE E
Fall 2019
This course will explore literary works by Irish women working in a wide range of genres: novels, short stories, poetry, and drama. We will investigate how women writers responded to the important political, social, and economic upheavals of the twentieth century: revolutions and wars, alterations in class structures, and changes in gender relations, sexual mores, and the status of women. We will also examine how our writers responded to, and helped shape, the major literary movements of the time, such as the Irish Revival and Counter-Revival, modernism and postmodernism. Writers to be studied include Augusta Gregory, Elizabeth Bowen, Mary Lavin, Theresa Deevy, Eavan Boland, Edna O?Brien, Paula Meehan, and Emma Donoghoe.

ENGL402401
Infinite Nature and the Early Modern Imagination
SUMMERFIELD, MARGARET
Fall 2019
In her 1666 proto-science fiction work *The Blazing World*, Margaret Cavendish describes nature as "one, infinite, self-moving body, [whose] parts being restless, undergo perpetual changes and transmutations by their infinite compositions and divisions." This dizzying multiplicity of nature evoked a multiplicity of literary responses among Cavendish's contemporaries, as they attempted to evoke nature's beauty, explain natural phenomena, or combat threats against nature. This course explores the ways in which early modern authors described the natural world and understood their place within it. What did the word "nature" mean to an early modern audience, and how was this definition changing in a period marked by early globalization? How did early modern writers understand their responsibility to nature and respond to environmental crises? And can studying the ways in which the early moderns imagined nature help us to understand the roots of our current ecological crises and imagine alternative, more sustainable communities for the future?

**ENGL402501**

**The Widening Gyre: Modern Literature and the Environment**

**MERSKY, MATTHEW**

**Fall 2019**
Can modern literature teach us something about the environment? Can it help us fight climate change? After all, literature is fictional, novels and poetry things that one encounters in an English class, while the environment is something out there in the world. Yet, one of the main purposes of this class will be to challenge the assumption that literature has nothing to do with nature. In this class we will think about how our understanding of nature and the environment is never separate from the ways that nature is represented--whether that representation takes the form of a landscape in a postcard, a diagram in a textbook, or even the oak tree in the backyard. Our particular focus will be on modern literature and our aim in class will be to think about why modern literature is particularly well-suited to help us rethink our ideas about the environment. We will look at how the radical experiments of modern writers such as Ezra Pound, Joseph Conrad, and Virginia Woolf might give us an entirely new way of imagining nature. We'll ask how Franz Kafka's stories help redefine our relationship to animals. And we'll consider how the study of modern cinema and the reproducible image can help us to make sense of the ways that the contemporary media filters our experience of global warming.

**ENGL402601**

**Making Meaning in Victorian Literature and Culture**

**LEASE, MEGAN H**

**Fall 2019**

The nineteenth century produced debates increasingly concerned with the way humans make meaning both from the texts they read and from everyday experiences. These debates contained profound implications for both individual and social life, affecting everything from an individual's perception of his or her relation to God to the rules of etiquette that guided societal expectations. This course will consider these interpretive concerns both theoretically and in relation to Victorian literary texts, engaging with nineteenth-century essays and literary criticism as well as poetry and fiction. Readings may include works by Dickens, Tennyson, Eliot, Charlotte Bronte, Collins, Arnold, Newman, and Wilde.
ENGL402701
Love and Intimacy Since the 1890's
OH, ALICIA
Fall 2019
Feminist critic Elaine Showalter has famously defined the fin-de-siecle as the age of "sexual anarchy" as it witnessed such radical shifts in the dynamics of gender, family, and selfhood that survive in and continue to shape our modern consciousness. Starting with George Meredith's provocative sonnet sequence *Modern Love* (1891), Love and Intimacy Since the 1890's broadly covers texts on romantic love, histories of sexuality, power and desire, and gendered construction of social norms. To enrich our understanding of these issues, we will occasionally consult essays by writers such as Foucault, Barthes, bell hooks, and Laura Kipnis.

ENGL453901
Advanced Creative Nonfiction: Writing About the Past
BERNE, SUZANNE R
Fall 2019
For the purposes of this course, we will define "the past" as at least 50 years ago. We will look into writing about family history, writing about an historical figure, and writing about an era by exploring a particular historic moment. Along the way, we will entertain practical questions involved in writing about the past as well as some of the more difficult philosophical ones. When, for instance, is it permissible to invent "facts"? How can we render "real" people fairly, whether they are relatives or public figures? And is it possible to avoid judging past events by present standards?
ENGL455001
Advanced Nonfiction Workshop: Writing for Magazines
ROTELLA, CARLO
Fall 2019
In this workshop we practice and study the craft of magazine writing. We write and read a variety of articles--features, profiles, reviews, columns, essays, opinion, etc.--and work on professional skills, such as pitching a story. We also consider models provided by accomplished journalists, by reading their work and by having them in for class visits. Writing assignments, workshopping of student prose, and discussion of assigned reading are regular features of the workload. Admission by permission of instructor on the basis of manuscript submission. Please submit up to 8 double-spaced pages of writing to carlo.rotella@bc.edu by April 3.

ENGL457701
Writing Workshop: Poetry
ADAIR, ALLISON C
Fall 2019
The course will provide an introduction to poetry writing as a discipline and craft by encouraging students to practice writing in a variety of modes. Students' own poems, from both open and directed writing assignments, will become the main text for this workshop, in addition to some models provided by the instructor for discussion of prosody and technique. The workshop critiques will focus on strategies for revising early drafts, and a chapbook of finished poems will be due from each student at the end of the semester. No application process.

ENGL457901  
Writing Workshop: Fiction  
MATSON, SUZANNE M  
Fall 2019  
This course provides encouragement, practice, and criticism for students seriously interested in writing short fiction. The workshop format demands self-motivation and universal participation. Since students' stories are texts for class discussion, a generous willingness to respond to others' writing and to expose one's own work to such reactions is an essential prerequisite. Individual conferences with the instructor supplement the workshop discussions. Students are expected to produce a steady stream of new and revised fiction throughout the semester. Narrative preferences from the traditional to the experimental are welcome.

ENGL463701
Capstone: Vision Quest: A Multicultural Approach
MILLER, DOROTHY
Fall 2019
This course will use the Vision Quest, a Native American ritual for finding oneself, as a metaphor for students' four years at Boston College. Relating their own lives to the lives of the characters in the books, who have all gone on some variation of a quest, students will explore the ways their education and experiences at college have influenced their ideas of community, work, spirituality, and relationships, and have prepared them to face the great mystery of life ahead. The main texts include *The Grass Dancer*, *The Life of Pi*, *Song of Solomon*, *The Bonesetter's Daughter*, and *The House on Mango Street*. Films include *Thunderheart*, *The Hunting Ground*, and *The Whale Rider*. Personal reflection papers and class participation are a main component of this course.

**Credits:** 03  
**Schedule:** TH 1 30-3 50  
**Room:** STOKES HALL 211S  
**Satisfies Core Requirement:** Cultural Diversity  
**Comments:** You may take a Capstone class only as a senior or second-semester junior. Capstone classes may not be taken Pass/Fail. You may take only one Capstone class before graduation.

ENGL553901
Seminar: History, Memory, and Culture in American Literature
WILSON, CHRISTOPHER P
Fall 2019
This course focuses on nineteenth, twentieth and twenty-first century fiction, memoir, and experimental nonfiction, examining what writers and critics have had to say about the psychological and narrative dimensions of memory in American literature. Texts considered include Willa Cather's *My Antonia* (a novel made to look like a memoir); Scott Fitzgerald and Ernest Hemingway's modernist fiction; Fae Mae Ng's *Bone* (a book narrated in reverse time); war memoirs by Stephen Crane, Dexter Filkins, or Michael Herr; and Walter Benjamin's, Tillie Olsen's or John Edgar Wideman's blending of ethnic autobiography and experimental fiction.

ENGL601501
Crises of the Nineteenth Century
NAJARIAN, JAMES
Fall 2019
We tend to regard Britain in the nineteenth century, with its economic success and imperial expansion, as a time of stability and prosperity. But its own people regarded it quite differently: as a time of rapid and confusing change in class structure, gender roles, education, literacy, religious faith, and the fabric of the nation. Literature sought to explain and discuss these changes. The course reads a broad swath of these Victorian materials--not just poems and fictions, but letters, autobiographies, diaries, and polemic writing--to investigate this period.

Credits: 03
Schedule: M 4 30-6 55
Room: STOKES HALL 207S
Satisfies Core Requirement: None
Comments: Fulfills the pre-1900 requirement for undergraduates.
ENGL601601
Sound Stories: A Podcasting Project
NUGENT, JOSEPH G
Fall 2019
Novelist, newspaper columnist, playwright, and spectacular satirist, Flann O'Brien was a master literary craftsman. An Irishman, his startling humor and sonorous prose emerge from the same dark space as that of his compatriots, Joyce and Beckett. In this practical, collaborative, and project-driven course, we'll explore and exploit the Burns library holdings of this remarkable modernist/post-modernist. Imagining, scripting and recording your own podcasts, you'll help introduce O'Brien's mordant hilarity to your colleagues, the university, and the world outside.

Credits: 03
Schedule: W 2-4 25
Room: STOKES HALL 207S
Satisfies Core Requirement: None
Comments: Note to Journalism minors: This course satisfies the requirements for an elective with a "critical" requirement.

ENGL601801
Seminar: Intimate Narratives
TANNER, LAURA E
Fall 2019
How does literature invite us into the intimate and sometimes messy emotional dynamics of human relationships? This seminar will explore the depiction of family dynamics and romantic bonds in narratives of the last century, including *To the Lighthouse*, *As I Lay Dying*, *White Noise*, and *Fun Home*. We will consider how intimate relationships are shaped by consumerism, disaster, grief, violence, poverty, race, aging, romantic ideals, and domestic space. In-class presentations will focus on film and television portrayals of family relationships. Final projects will analyze a literary or visual narrative and reimagine its portrayal of intimacy in a short literary or video scene. This seminar is open to juniors and seniors, especially those fascinated by the way that stories probe the depths of human character and shape our assumptions about how we relate to one another.

ENGL667501
The Art and Craft of Literary Translation: A Seminar
SHRAYER, MAXIM
Fall 2019
Literary translation as an art. Discussion of the history and theory of literary translation in the West and in Russia, but mainly practice in translating poetry or artistic prose from Germanic, Romance, Slavic, or Classical Languages, into English.

Credits: 03
Schedule: T TH 3*
Room: LYONS HALL 208
Satisfies Core Requirement: None
Comments: Permission of instructor required for undergraduates and for languages beyond those in the course description.
Conducted entirely in English as a workshop.
Prerequisites: Knowledge of a Classical, Germanic, Romance or Slavic language beyond the intermediate level.
Corequisites: None
Cross-listed with: LING4327,RLRL8899,SLAV4061
Frequency: Periodically

ENGL701601
The Delinquent Minor
CURSEEN, ALLISON S
Fall 2019
Freedom Movements may be run by great men (with begrudgingly-acknowledged support from strong women), but it is the children and child-like--the small and un(der)-developed--that march. Every day children march in lines, in schools, on buses; they traverse neighborhoods, streets, forests, and more. Through the lens of physical movement, this course examines the promise and delinquency of the childish minor in America--especially its relationship to blackness, the feminine, and futurity. Readings may include literature by Nathaniel Hawthorne, Frank Webb, and Gwendolyn Brooks, as well as critical text by Robin Bernstein, Anna Mae Duane, Lee Edelman, and Nazera Wright.

Credits: 03
Schedule: T 7-9 30
Room: STOKES HALL 476S
Satisfies Core Requirement: None
ENGL701701
Atlantic Passages
MITSEIN, REBEKAH K
Fall 2019
In this class we will investigate how New England, Britain, West Africa, and the Caribbean spoke to each other in the seventeenth and eighteenth centuries across the ocean that connects them. How did America's national narrative grow out of the pre-U.S. Atlantic world? How did ideas from the colonies shape Britain's literary heritage? How did these Atlantic passages give rise to the ideas of nationalism and citizenship we value today? The reading list includes Mary Rowlandson, Samuel Richardson, Olaudah Equiano, Phillis Wheatley, Royall Tyler, Charles Brockden Brown, the Salem Witch Trial documents, and the journalism of the Boston inoculation controversy.

ENGL701801
Black Nature
HOWARD, JONATHAN M
Fall 2019
This course interrogates how the "human" has been imagined in the West as both an aspiring independence from and dominion over Nature and white. But beyond uncovering the unspoken whiteness of the "human" and its environmental harm, this course further takes up the alternative visions of human being and nature expressed within black nature writing. By undertaking a broad survey of this literary tradition, we will explore the unique environmental perspectives of those who, once considered no more than livestock, were the nature over which their masters ruled, and thus, could not so easily imagine their humanity apart from it.

**Credits:** 03

**ENGL701901**  
**Shakespeare as Collaborator**  
**CROW, ANDREA**  
**Fall 2019**  
Who wrote Shakespeare's plays? Critics have long recognized that Shakespeare worked with co-authors, whose contributions scholars have attempted to identify and evaluate. Efforts to locate the voice behind each word of the plays are being pursued with a fresh zeal today, as big data analysis offers new methods into teasing out writerly characteristics. This class asks what we can do with the hypotheses derived from these endeavors. How should it change our reading of the *Henry VI* plays if we take Marlowe to be Shakespeare's co-author? What difference does is make if Middleton wrote parts of *Timon of Athens*? And how do recent designations of plays like Arden of Faversham as Shakespeare's work affect our understanding of his attributed body of work as a whole? Designed to be generative for students from across specializations as well as for early modernists, we will use our readings of the plays of Shakespeare and his collaborators to engage with larger questions about the changing figure of the author in literary criticism and how models of collaborative authorship might cause us to ask different formal questions of the works we analyze.

**Credits:** 03  
**Schedule:** TH 7-9 25
ENGL770001
English Language Training for Graduate Level Students: Focus on Speech and Presentation Skills
ANDERSON, LYNNE C
Fall 2019
Designed for graduate students whose first language is not English, this course will emphasize the speech and presentation skills required for success in graduate work. Students will hone their speaking and listening skills through group discussions, presentations, and targeted practice in pronunciation, stress, and intonation through the reading of poetry, tongue twisters, and shadow talking exercises. Participants will gain practice in leading discussions and explore effective teaching practices to fulfill T.A. responsibilities. Students who enroll in the course are expected to attend all classes and complete short writing assignments weekly.

Credits: 00

Frequency: Annually

ENGL771201
Modern, In Theory
LEHMANN, ROBERT S
Fall 2019
This course focuses on modernism's attempts to theorize itself and its position in a wider modernity, as well as more recent attempts to characterize modernism and its afterlives. In the first unit of the course, we will examine a handful of canonical, theoretical works that attempt to answer the question: what is/was modernity? Here, our aim will be to understand how modernism does or does not fit within the political, economic, philosophical, and cultural contexts in which it first appeared. In the second unit, we will turn to some literary and critical texts written during the high-modernist period, texts that attempt to shed light on--or determine the course of--the modernist project. Finally, in the last unit of the course, we will read and discuss recent works that struggle with the legacy of modernism. Texts will include works of philosophy, literature, and visual art by figures such as Baudelaire, Marx, Weber, Conrad, H.D., Eliot, Adorno, Beckett, and others. Assignments will include weekly web posts, a book review on a contemporary work of criticism, and a longer (roughly fifteen-page) paper.

Credits: 03
Schedule: TH 4 30-6 50
Room: STOKES HALL 301N

ENGL775201
Contemporary Literary and Cultural Theory
WALLACE, ELIZABETH
Fall 2019

This course introduces students to the concepts and practices of contemporary cultural and literary theory. Surveying various developments of the field during the last four decades, we will study: Marxist, psychoanalytic, feminist, new historical, structuralist, and poststructuralist approaches to culture. Though our primary focus will be theoretical essays and books, students will also have the opportunity to apply the theories to literary and cultural texts. Possible theorists include: Marx, Althusser, Freud, Lacan, Levi-Strauss, Derrida, Foucault, Butler, and Agamben. The course requires a series of three short critical papers, to be written according to guidelines distributed in class.

Credits: 03
Schedule: T 2-4 25
ENGL776201
Fourth Genre: Contemporary American Literary Nonfiction
TOBIN, LAURENCE
Fall 2019
The "fourth genre" refers to works of nonfiction that contain literary features more commonly associated with fiction, poetry, and drama. We will examine a few pioneers of the form, including Woolf, Thoreau, and Freud, but our study will focus primarily on subgenres of contemporary American creative nonfiction, including immersion journalism; autobiography; graphic memoir; and literary and lyric essay. Readings will include work by creative nonfiction by writers such as Wolfe, Didion, Talese, Dillard, Kincaid, Bechdel, and Slater. Writing assignments will include both academic and creative essays.

ENGL776401
Twentieth-Century Irish Fiction
SMITH, JAMES M
Fall 2019
In this graduate seminar, we will read a selection of Irish novels so as to identify, discuss, and better understand complex cultural phenomena that become manifest in the aftermath of the colonial experience. The underlying premise suggests that Irish novelists participate in debates concerning national identity and, in the process, anticipate the evolution of a postnational society. Paying particular attention to issues of language, gender, place and literary authority, and to representations of religion, history, and identity, the seminar seeks to establish the inevitable heterogeneity related to the post-colonial condition.

Designed as a workshop in which each student develops a portfolio of personal and academic writing, the seminar follows a semester-long process. Students write and rewrite essays continuously, discuss their works-in-progress in class, and receive feedback during individual and small group conferences with the instructor. Students read a wide range of texts, including various forms of non-fiction prose. In addition to regular conferences, the class meets two hours per week to discuss the writing process, the relationship between reading and writing, conventional and innovative ways of doing research, and evolving drafts of class members.

**Credits:** 03  
**Schedule:** M W F 9  
**Room:** STOKES HALL 117N  
**Satisfies Core Requirement:** Writing

ENGL107901

Literature Core for English Language Learners

ANDERSON, LYNNE C

Spring 2020

This course, offered in the spring, is part of a year-long sequence of English language support and follows the First Year Writing Seminar offered in fall. ENGL1079 may be taken in place of ENGL1080 and fulfills BC's literature Core requirement. Similar to ENGL1080, students explore a variety of literary genres including fiction, poetry, and drama with an emphasis on post-1900 American literature to enhance the development of diction and syntax that is contemporary and idiomatic. Support for students from linguistically diverse backgrounds in speaking, reading, and writing is an important component of the course.

Credits: 03
Schedule: T TH 10 30*
Room: STOKES HALL 217N
Satisfies Core Requirement: Literature
Comments: Offered in the spring only Limited to 15 students Department permission required

ENGL108002
Literature Core
HARRISON-KAHAN, LORI
Spring 2020
In Literature Core, students explore the principal motives which prompt people to read literature: to assemble and assess the shape and values of one's own culture, to discover alternative ways of looking at the world, to gain insight into issues of permanent human importance as well as issues of contemporary urgency, and to enjoy the linguistic and formal satisfactions of literary art. Literature Core will strive to develop the student's capacity to read and write with clarity and engagement, to allow for that dialogue between the past and present we call history, and to provide an introduction to literary genres.

MITSEIN, REBEKAH K
Spring 2020
In Literature Core, students explore the principal motives which prompt people to read literature: to assemble and assess the shape and values of one's own culture, to discover alternative ways of looking at the world, to gain insight into issues of permanent human importance as well as issues of contemporary urgency, and to enjoy the linguistic and formal satisfactions of literary art. Literature Core will strive to develop the student's capacity to read and write with clarity and engagement, to allow for that dialogue between the past and present we call history, and to provide an introduction to literary genres.

ENGL109401
An Introduction to Modern Irish II
NUGENT, JOSEPH G
Spring 2020
Following on from ENGL1093, this course offers a continuing introduction to the Irish language for American students. We will continue along our examination of Irish culture and literature through the Irish language. You can look forward to reading contemporary texts, poetry, and drama, and to enlarging your understanding of the cultural heritage out of which the language emerged. Completion of this and Continuing Modern Irish I and II will fulfill the Morrissey College of Arts and Sciences language proficiency requirement.
ENGL111001
First Year Writing Seminar: Power, Race and Inequality in the Criminal Justice System

DEROSA, MARLA C

Spring 2020
This section of the First-Year Writing Seminar is centered around a book called Just Mercy by Bryan Stevenson. The book focuses on Stevenson?s work with the criminal justice system and the organization he founded called the Equal Justice Initiative. The book raises questions about power, race, equality, justice and the common good within the U.S. legal system for which there are no easy answers. Students will identify one of these issues/questions from the book and delve more deeply into that question. Students will start with an oral history/interview of a person who can shed light on their question from a personal or professional perspective. They will then review the academic research literature on the question and research what the media says about the issue. Finally, students will write and present (to a non-academic audience) an informed argument of their own about how to address issues of power and inequality.

ENGL118201
Literature Core: Just Literature: Reading for Good
DONOVAN-KRANZ, EILEEN

Spring 2020

We know that literature can transport us. But so too can literature transform us. Dislocate us. And provide challenges and shifts in thinking. In this course, which meets the goals of the Literature Core at Boston College, as well as the core requirement in Difference, Justice and the Common Good, students will encounter injustice within literary works. In reading treatments of injustice across time and literary genres, students will encounter powerful depictions of structural inequalities and ultimately will imagine and name alternate pathways toward a more just world. Literature in this course will bring readers close to the pain of injustice and inequality; research, writing and discussions of context will prompt greater understanding as well as a vision of transformative compassion and greater equality. We will read short stories, essays, speeches and poems, and authors including Allison Bechdel, Octavia Butler, Art Spiegelman, Bryan Stevenson. Reading selections will influence the style and content of the student work. Student experience and student questions regarding justice, injustice and ethics will provide a skeleton for the coursework.

ENGL171001

Family Matters: Stories of Adoption and Kinship

SMITH, JAMES M

Spring 2020

What makes a family? Why does kinship matter? How can reading stories of adoption inform our response to such questions? In this course students will examine adoption as narrative event (exploring its relationship to the bildungsroman, the rags-to-riches story, memoir), as image (the orphan, the abandoned waif, the unmarried mother), and as metaphor (of dependence and independence, of separation and affiliation, of origins and fresh starts). And because adoption foregrounds fundamental issues of identity (constructed and inherited), we will investigate the role(s) of nation, empire, and religion in regulating childhood and family life.
ENGL172101
Finding the Animal: Beasts and Boundaries in Literature
STANTON, ROBERT G
Spring 2020
What is a human, and who is an animal? Humanism has questionably attributed reason, morality, speech, ritual, and the capacity to imagine future worlds to humans alone. All major philosophies and religions try to separate humans from animals: in Genesis, God distinguishes Adam and Eve from the beasts, then instructs Adam to name them. Humans still grapple with the ethics of eating, wearing, and experimenting on animals, as well as understanding how various mental abilities are represented across species. These courses use comparative psychology and literary study to interrogate the blurry and problematic boundaries between human and non human animals.

ENGL172401
Nature and Power: Reading the American Place
MATSON, SUZANNE M
Spring 2020
Writers since Meriwether Lewis have tried to know the great diversity of American landscape through acts of language. In this course we'll ask how poems, essays, and fiction depict American encounters with nature: As the unknown other to be conquered? As access to a spiritual dimension? As a site of contested claims for use and power? How have these many meanings we've assigned our landscapes shifted in the face of environmental degradation? Our readings, discussion, and writing will focus on how the American psyche has been influenced by both a fear of, and a love of, what is "wild."

ENGL212501
Introduction to Feminisms
MURPHY, ANNALYSSA G
Spring 2020
This introductory course offers both an overview and a foundation for understanding the various movements that make up what has come to be called the feminist movement in the U.S. Because systems of privilege and disadvantage shape women's and men's identities and social positions in multiple and unique ways, Introduction to Feminisms analyzes gender from an interdisciplinary approach and applies numerous academic disciplinary methods to the study of gender, including history, literature, psychology, and sociology, and explores women's and men's experiences within various cultural contexts, including socioeconomic class, race and ethnicity, religion and spirituality, nations of citizenship, origin, and generation.

ENGL213302
Studies in Narrative
HUNT, AERON P
Spring 2020
This course introduces students to questions that they might bring to the study of narrative works—primarily novels, tales, and non-fictional narratives, though it may also include drama, film, and narrative poems. It aims to introduce the various critical frames through which we construct interpretations. As part of the process of reading, students will be introduced to common critical terms; narrative genres, conventions, and discourses; the construction of the character and the ways of representing consciousness; and the ordering of narrative time. The course will also expose the student to the implications of taking critical positions.

ENGL214301
American Literary History III
PUENTE, LORENZO A
Spring 2020
This course provides an introductory overview of literature written in the United States from World War I to the early twenty-first century. We will look at the ways writers of this period have experimented idiosyncratically and in dialogue with one another as modernism turned postmodern, as canons collided and collapsed, as movies and music albums, as well as graphic literature displaced some of literature's more traditional forms. The course is largely conversational but structurally supported with student oral presentations. Required texts may include fiction by William Faulkner, Willa Cather, Toni Morrison, Maxine Hong Kingston, Sherman Alexie, and Junot Diaz, plus graphic literature by Art Spiegelman and Thi Bui. Requirements for the course include an oral presentation, two critical essays, two section exams, and a final exam.

ENGL217101
Introduction to British Literature and Culture II
MCALEAVEY, MAIA M
Spring 2020
This lecture course explores great British writers from 1700 to the present. This period includes (among much else) the great essayists and satirists of the eighteenth century, the Romantic poets and Victorian novelists of the nineteenth, the modernists of the twentieth, and the world writing that follows the break-up of the British empire. We consider these works in light of the cultural context in which they were written.
ENGL220401
Dangerous Women in Classical Literature
EISENFELD, HANNE E
Spring 2020
Demeter sticks a baby in the fire, Amazons cut off one breast and live far away from men, Clytemnestra kills her husband in his bath. In this course we will investigate how Greeks and Romans used stories about female figures - goddesses, monsters, and humans - as a way of talking about a range of conflicts, tensions, and fears. While we focus on the ancient world, we will also look at how these figures are used in later periods and think about which stories we tell about women - and why.

ENGL221001
Madmen, Hysterics, and Criminals: Inventing Deviance
BOWLES, DANIEL J
Spring 2020
In this seminar we address three major questions, guided by a broad selection of readings from German, French, British, and American literature and theory from 1800 to the present: How do we as readers define the abnormal and the deviant? What aesthetic practices does literature employ to represent these threshold experiences, and what is their history? How might we rethink our own notions of normality when faced with their artificiality? Literary, theoretical, and musical texts by Balzac, Bernhard, Buchner, Freud, Genet, Kracht, Plath, Stevenson, and others help us establish a history both of abnormality and our own cultural self-understanding.

Credits: 03
Schedule: M W F 2
Room: DEVLIN HALL 227
Satisfies Core Requirement: Literature
Comments: Conducted in English. Counts toward German major, German minor, and German Studies minor.

ENGL221202
Introduction to Medical Humanities
AINSWORTH, TRESEANNE
Spring 2020
This course will use contemporary literature as a springboard to consider the psychological, social, ethical, and experiential dimensions of sickness and health. In addition to exploring questions of illness and the body, we will address topics including disability, aging, pregnancy, pain, medical space, illness and culture, and care giving. Through the analysis of novels, poems, short stories and non-fiction, we will consider the way that bodily experiences, material conditions, and cultural constructions of normalcy shape our understanding of identity in sickness and in health.

Spring 2020
An introductory course in which students will write both poetry and short fiction and read published examples of each. We will experiment with the formal possibilities of the two genres and look at what links and separates them. The course is workshop-based, with an emphasis on steady production and revision. Through exercises and/or open and directed writing assignments, students will produce a portfolio of short fiction and poetry.

ENGL222801
Twentieth-Century Russian Literature (in Translation)
SHRAYER, MAXIM
Spring 2020
Study of landmarks of Russian literature in light of Russian and Soviet history in the twentieth century. Works by Akhmatova, Babel, Brodsky, Bunin, Venedikt Erofeev, Gladkov, Sologub, Solzhenitsyn, Trifonov and others.

Credits: 03
Schedule: T TH 12*
Room: LYONS HALL 207
ENGL222901
Literature of the Other Europe
LIN, TONY H
Spring 2020
A survey of outstanding and influential works of and about the political and social upheavals of the twentieth century in Central and Southeastern Europe. A study of the often-shared themes of frontier and identity (political and religious), exile, and apocalypse in the works of selected leading writers, such as Witold Gombrowicz (Poland), Bruno Schulz (Poland), Bohumil Hrabal (Czech Republic), Milan Kundera (Czech), Dubravka Ugresic (Croatia), Mesa Selimovic (Bosnia), Muharem Bazdulj (Bosnia), and Emilian Stanev (Bulgaria).

ENGL223701
Studies in Children's Literature: Disney and the Wondertale
RUDNER, BONNIE
Spring 2020
Disney films have remained outside the critical landscape because they have been considered either beneath artistic attention or beyond reproach. The goal of this course will be to explore the issues presented in such Disney films as The Lion King, Aladdin, Prince of Egypt, and Pocahontas. To do this, we will read source material (The Arabian Nights, Hamlet, tales about Pocahontas, Bible stories about Moses, Exodus, etc.) and secondary studies.

ENGL224101
Playwriting I
LOPEZ, MELINDA F
Spring 2020
This writing-intensive course offers a practical introduction to the art and craft of writing for performance. Students will engage in numerous writing exercises that highlight the special demands and opportunities of writing for the stage. Emphasis is placed on finding ways to contact and release the theatrical imagination and on mastering the basics of writing a solid dramatic scene. Exemplary plays by established playwrights will be studied as appropriate, but the overwhelming emphasis is on student writing.

ENGL227701
Introduction to American Studies
REZNICK, SCOTT
Spring 2020
This course offers an introduction to the interdisciplinary study of American culture. It is not a survey of American cultural history; rather, we will concentrate on approaches, methods, and themes of interest as we assemble critical skills for making interpretive arguments about aspects of culture in their historical moment. The forms we analyze will include examples from literature, film, painting, music, theater, landscape, and architecture, among others. Members of the American Studies faculty will present guest lectures to highlight various aspects of the field.

ENGL228201
Knights, Castles, and Dragons
RESLER, MICHAEL
Spring 2020
A study of the masterpieces of the first great blossoming in German literature including The Nibelungenlied, Tristan, and Hartmann von Aue's Erec. Central to the works of this age are (1) the rise of knighthood and (2) the spreading to Germany of the legend of King Arthur and the knights of the Round Table. In addition, older Germanic-heroic influences will be examined in certain of the works. The literature will be discussed in the larger context of its sociological and historical background. The literary traditions of France will be systematically linked to contemporary developments in Germany.

Credits: 03
Schedule: M W F 12
Room: LYONS HALL 207
Satisfies Core Requirement: Literature
Comments: Conducted in English with all texts in English translation. No knowledge of German
ENGL234801
Modern Middle Eastern and Arabic Literature
SALAMEH, FRANCK
Spring 2020
This course examines the complex, multicultural nature of the Middle East by surveying twentieth century literature of Arabic-speaking lands, Israel, and Turkey. Topics include identity, culture, religion, nationalism, conflict, and minority narratives. Of Arabic works, we will read at the writings of Adonis, Darwish, and Qabbani. Of Hebrew works, we will examine the writings of Amichai and Bialik. Of the works written French, English, Kurdish, Syriac, Turkish, and various Middle Eastern dialects, we will survey the writings of Andree Chedid, Mario Levi, Charles Corm, Louis Awad, Said Akl, and Orhan Pamuk.

ENGL247001
Black and Popular: Speculative Fictions by Black Writers
FREDERICK, RHONDA
Spring 2020
This course asks: what do discussions of contemporary social issues look like when depicted in popular literatures written by writers of African descent? What is the benefit of fictionalizing these issues in genre literatures? Students address these questions by examining the forms of "speculative fictions" (specifically thriller, science fiction/fantasy, and mystery/detective) as well as urban romance to determine how each represents concerns of twentieth/twenty-first century black peoples in the U.S., Canada, Jamaica, and Martinique. Our focus on these genres' explorations of race, class, culture, incest, social engineering, and intimate relationships is complemented by socio-historical studies of these issues and countries.

**ENGL300101**  
**Walking Infinite Jest**  
**BOUCHER, CHRISTOPHER G**  
**Spring 2020**

David Foster Wallace describes Enfield, Massachusetts--an important setting in his 1996 novel *Infinite Jest*--as "a kind of arm-shape extending north from Commonwealth Avenue and separating Brighton into Upper and Lower, its elbow nudging East Newton's ribs and its fist sunk into Allston?". Sound familiar? In this course, we'll conduct a Bostonian's reading of Wallace's opus. Students will be required to write weekly critical reading responses, and should be prepared for the course's non-traditional structure: weekly meetings will sometimes be canceled in lieu of weekend on-site meetings in Brighton and Boston.

ENGL301001
Spy Stories
WILT, JUDITH
Spring 2020
The Bible, the \textit{Odyssey}, and an ancient Chinese manual about war all featured spycraft and secret agents; the Spanish Inquisition invented 'waterboarding.' Closer to our own times, we'll read three fictions of 'the secret world': Kipling's \textit{Kim} (1901), an adventure novel set during the nineteenth-century Afghan wars which introduced the term 'The Great Game,' John LeCarre's 1963 Cold War story of moral/political conflict \textit{The Spy who Came In from the Cold}, and David Ignatius's 2017 novel of contemporary American/Chinese cyberspying \textit{The Quantum Spy}. We'll discuss several films as well. Two short reflection papers and a take-home final.

ENGL320201
Disability Studies
DUNSFORD, CLARE M
Spring 2020
Disability and ability are socially constructed categories that provoke questions about how we as a society deal with difference. This course explores representations of disability in fiction, poetry, memoir, and essays. Questions of representation--who gets to tell the story, how disability has been represented historically at different times and in different cultures--will be considered with reference to the work of theorists like Rosemarie Garland Thomson and Tobin Siebers. Readings may include Sophocles' \textit{Philoctetes}, Wordsworth's "The Idiot Boy," \textit{The Curious Incident of the Dog in the Night-time}, and Michael Berube's \textit{Life as We Know It: A Father, A Family, and an Exceptional Child}, among others.
ENGL335301
Contemporary Literatures of Migration
GRAVER, ELIZABETH
Spring 2020
This course will examine fiction and non-fiction by twenty-first century writers who foreground themes of migration and immigration. Topics will include globalism, exile, choice, national and trans-national identities. Looking closely at language itself, we will ask what means for some of these writers to write in a second language. Readings may include work by Edwidge Danticat, Anne Fadiman, Mohsin Hamid, Gary Shteyngart, and Jenny Erpenbeck. Writer Min Jin Lee will visit campus, and we will read her work in depth. Requirements include several essays, weekly reflection posts, and a video interview with an immigrant or refugee.

ENGL336001
Victorian Violence
HUNT, AERON P
Spring 2020
Victorian Britain has a well-known reputation for restraint. But violence was an inescapable part of the experience of Victorian writers and their publics, casting a shadow on their celebrations of the progress of civilization and their championing of the peaceful virtues of hearth and home. This course will examine representations of war, murder, domestic violence, and political violence--on the home front and around the globe--in Victorian fiction, poetry, prose writing, and performance. Authors may include Arnold, Emily Bronte, Carlyle, Conrad, Dickens, Kipling, Morrison, Stevenson, and Tennyson.

ENGL401101  
**Faulkner to Beyonce: New South Aesthetics**
ARDS, ANGELA
Spring 2020
Beyoncé Knowles' 2016 audiovisual project, *Lemonade*, conjures a black Southern experience from multiple places and modes--from memories and sounds of New Orleans pre- and post Hurricane Katrina, to the ancestral wisdom of grandmothers passed down through the generations. The course explores how *Lemonade* flips familiar cultural markers of southern identity into a meditation and manifesto about what it means to be black and Southern now. We will ground our readings and discussions with questions such as these: What type of South is *Lemonade* trying to get us to see and hear? What are the feminist frameworks, from Zora Neale Hurston's *Their Eyes Were Watching God* to filmmaker Julie Dash's *Daughters of the Dust*, that animate *Lemonade*’s vision? And what exactly does it mean to "get in formation"?

**Credits:** 03

ENGL401601
Reporting Civil Rights  
ARDS, ANGELA  
Spring 2020
This course explores first-hand accounts from the front lines of movements to advance social justice, from the abolitionist and anti-lynching campaigns of the nineteenth century and those that toppled Jim Crow, to broader issues such as prisons and poverty, immigration and education. Students will develop their knowledge of civil rights reporting history in the U.S, gain skills and practices, and learn how to apply all three in reporting and writing in core beat areas.

**Credits:** 03  
**Schedule:** TH 4 30-6 50  
**Room:** O’NEILL LIBRARY 254

**Comments:** Note to Journalism minors: this course satisfies the requirement for an elective with a "critical" orientation.
ENGL402501
The Widening Gyre: Modern Literature and the Environment
MERSKY, MATTHEW
Spring 2020
Can modern literature teach us something about the environment? Can it help us fight climate change? After all, literature is fictional, novels and poetry things that one encounters in an English class, while the environment is something out there in the world. Yet, one of the main purposes of this class will be to challenge the assumption that literature has nothing to do with nature. In this class we will think about how our understanding of nature and the environment is never separate from the ways that nature is represented--whether that representation takes the form of a landscape in a postcard, a diagram in a textbook, or even the oak tree in the backyard. Our particular focus will be on modern literature and our aim in class will be to think about why modern literature is particularly well-suited to help us rethink our ideas about the environment. We will look at how the radical experiments of modern writers such as Ezra Pound, Joseph Conrad, and Virginia Woolf might give us an entirely new way of imagining nature. We'll ask how Franz Kafka's stories help redefine our relationship to animals. And we'll consider how the study of modern cinema and the reproducible image can help us to make sense of the ways that the contemporary media filters our experience of global warming.

ENGL402801
Climate Fiction
SONG, MIN
Spring 2020
Climate change is often referred to as a wicked problem, because it has no easy solutions and its dynamics are constantly shifting. It's also wicked because it defies easy explanation. This course turns to fiction, to consider how it might offer a unique way to understand this problem and keep attention on something that is difficult to pay attention to. We will read fiction and watch films alongside scholarly essays and journalism.

ENGL403001
Harpies, Hysterics, and Fallen Women
CROTty, MEGAN A
Spring 2020
Well-behaved women rarely make history. This well-known phrase, coined by historian Laurel Thatcher Ulrich, conjures a variety of unconventional, fierce, and sometimes fearsome women. And while we often see such mold-breakers as an inspiration, they are just as often figured as living, breathing cautionary tales. In this course, we will delve into the complexities of "badly-behaved" women in anglophone and multicultural literature. Focusing on three major categories of troublesome ladies--harpies, hysterics, and fallen women--we will discuss the evolution, function, and effect of such archetypes, particularly as they appear in postcolonial narratives. Texts will include *A Girl is a Half-Formed Thing* (Eimear McBride), *The God of Small Things* (Arundhati Roy), *Wide Sargasso Sea* (Jean Rhys), *Fleabag* (Phoebe Waller-Bridge), and *Derry Girls* (Lisa McGee). We will also read supporting materials by thinkers such as Michel Foucault, Simone de Bouvoir, and Helene Cixous.

ENGL420101  
Science Writing  
SUTTON, SARAH C  
Spring 2020
From driverless cars to gene therapy to cryptocurrency, the latest scientific and technological breakthroughs promise to transform life as we know it. When science moves from the laboratory, to corporate boardrooms, to news headlines, and into our daily lives, writing is involved in every step along the way. In this course, we will read works created by and about scientists, and explore how science circulates through society via social media and blog posts, traditional media, and government policy making. We'll also examine how companies communicate with the public via press releases, the media, and advertisements. In written and oral assignments, students will practice the skills essential for success in writing about science--researching and reporting, interviewing scientists, pitching new ideas, understanding audience expectations, and clearly communicating essential knowledge. Students will have multiple opportunities to conceive, draft, revise, and complete writing projects tailored to diverse audiences. This course aims to help students understand and explore science writing as a career--including opportunities in media, research labs, university news offices, museums, science and technology focused companies, and many other venues.

**ENGL440401**  
**Literary Boston 1790-1860**  
**LEWIS, PAUL**  
**Spring 2020**

Walk the streets of Old Boston in this course that explores familiar and forgotten chapters of literary history. Spend a night at the Federal Street Theatre during the 1790s. Search early Boston magazines for forgotten treasures. Meet the poet buried on Boston Common. Find out why Edgar Allan Poe called members of the Boston literati "Frog-Pondians." And watch the American Renaissance flower. Authors studied will include Judith Sargent Murray, William Charles White, Lydia Maria Child, Charles Sprague, Henry Wadsworth Longfellow, Nathaniel Hawthorne, Henry David Thoreau, and Poe--Bostonians all! Explorations of archival materials will help transport us back in time.
ENGL441202
Writing Workshop: Creative Nonfiction
LEWIS, PAUL
Spring 2020
Over the past few decades, the best nonfiction being written has expanded to include not only such traditional forms as argument and exposition but also the mixed modes of creative nonfiction. As an intermediate-level course, we will build on the work of the First Year Writing Seminar and hone the skills needed in advanced writing electives. Students in this course choose their own topics and explore the range of possibilities now available to the nonfiction writer.

ENGL442401
Middle English Alliterative Poetry
WEISKOTT, ERIC B
Spring 2020
In the fourteenth century, there were two ways of writing poetry in English. Chaucer's rhyming, syllable-counting iambic pentameter exemplifies one tradition. This course makes a survey of the other tradition, known today as alliterative poetry. Among the poems we will read are tales of King Arthur's court, the story of a resurrected corpse discovered in London, and a wild allegorical dream vision starring such characters as Bribery and Truth. We ask how this poetry is formally organized and why medieval English writers chose to use it in a variety of literary genres. No prior knowledge of Middle English required.

ENGL444701
The Poetics of Rap
ADAIIR, ALLISON C
Spring 2020
This course investigates the relationships between rap and traditional poetry, not only in terms of their historical and cultural significance but also for their aesthetic value, as art forms involved in storytelling, music, and performance. Close analysis of poetry from oral and written traditions will offer new insight into rap's dominant--and divisive--issues: free speech, consumerism, criminality, urban identity, regionalism, intellectual property, and the politics of race, gender, and sexuality. Readings include Tricia Rose's *Black Noise* and *The Hip Hop Wars*, Jeff Chang's *Can't Stop Won't Stop*, and Adam Bradley's *Book of Rhymes*, among others. No experience necessary.

**ENGL451801**  
Reading Irish Childhood  
SMITH, JAMES M  
Spring 2020

Why study Irish childhood now? Representations of the child dominate recent Irish culture, from Oscar winning movies, to Pulitzer winning memoirs, and Booker winning novels. The course evaluates this important cultural turn while examining how understandings of the Irish child change over time. We will investigate the relationship between child and nation and ask how nostalgia and memory frame childhood. This course also considers siblings, education, play, adoption, abuse, and institutionalization. Texts include short stories by James Joyce and Kevin Barry, novels by Roddy Doyle, Anne Enright, and Emma Donoghue, memoirs by Frank McCourt and Caitriona Palmer, poetry by Connie Roberts, and films and documentaries including *The Butcher Boy, Philomena, and States of Fear.* Students will participate in the visit to BC by Anne Enright, Kevin Barry, Caitriona Palmer, and Connie Roberts.

**ENGL452901**  
Shakespeare: Later Plays  
CROW, ANDREA  
Spring 2020
Who is behind Shakespeare's plays? In this course, we will take an informed, scholarly approach to this recurrent question. As we examine Shakespeare's later plays, we will consider the diverse forces that have shaped and continue to shape this body of work: the conventions of early modern drama that the plays draw on; the many theatrical agents, from actors to audiences to adaptors, who developed and redeveloped the plays; the influence of the cultural climate of early modern England; and the academic debates that guide not only how Shakespeare is taught, but which plays are attributed to him at all.

ENGL457701  
Writing Workshop: Poetry  
ANDERSON, JOHN M  
Spring 2020

The course will provide an introduction to poetry writing as a discipline and craft by encouraging students to practice writing in a variety of modes. Students' own poems, from both open and directed writing assignments, will become the main text for this workshop, in addition to some models provided by the instructor for discussion of prosody and technique. The workshop critiques will focus on strategies for revising early drafts, and a chapbook of finished poems will be due from each student at the end of the semester. No application process.

**ENGL457902**  
Writing Workshop: Fiction  
BOUCHER, CHRISTOPHER G  
Spring 2020  
This course provides encouragement, practice, and criticism for students seriously interested in writing short fiction. The workshop format demands self-motivation and universal participation. Since students' stories are texts for class discussion, a generous willingness to respond to others' writing and to expose one's own work to such reactions is an essential prerequisite. Individual conferences with the instructor supplement the workshop discussions. Students are expected to produce a steady stream of new and revised fiction throughout the semester. Narrative preferences from the traditional to the experimental are welcome.

ENGL458801
Business Writing
GRAY, TIMOTHY K
Spring 2020
This course will expose students to the type of writing done on the job. Real-life examples will illustrate appropriate writing style, language, and formats for business settings. By the end of the semester, students will be proficient in producing business correspondence, reports, proposals, resumes, and presentations.

Credits: 03
Schedule: M 4 30-6 55
Room: STOKES HALL 476S
Satisifies Core Requirement: None
Comments: For Carroll School of Management students, the course is also available as BCOM6688.

ENGL469601
Dante's "Divine Comedy" in Translation
SHEPARD, LAURIE
Spring 2020
An introduction to and critical reading of the "Divine Comedy" (in English translation), one of the world's greatest epic poems, produced by "the chief imagination of Christendom" (Yeats). Dante's journey through Hell, Purgatory, and Paradise will be analyzed at its multiple levels of interpretation: literal and allegorical, theological, philosophical, political, and literary. Compendium of an entire epoch of European civilization, the "Comedy" will also be interrogated for its responses to the fundamental questions of human existence: God, the Cosmos, the Self, Good and Evil, Right and Wrong, Suffering, and Happiness.

**Credits:** 03  
**Schedule:** TH 3-5 20  
**Room:** DEVLIN HALL 117  
**Satisfies Core Requirement:** None

**ENGL491501**  
**Advanced Fiction Writing Workshop**  
**GRAVER, ELIZABETH**  
**Spring 2020**
This course provides encouragement, practice, and criticism for students who have demonstrated accomplishment in writing fiction. The workshop format demands self-motivation and universal participation. Since students' stories are texts for class discussion, a generous willingness to respond to other's writing and to expose one's own work to such reactions is an essential prerequisite. Individual conferences with the instructor supplement workshop discussions. Students are expected to produce a steady stream of new and revised fiction throughout the semester. Narrative preferences from the traditional to the experimental are welcome. Students should submit up to 8 double-spaced pages of writing (your submission may be part of a larger piece; if so, indicate this on the manuscript), along with a note explaining your interest in the course and a list of previous creative writing or journalism workshops, with instructors, school (if you are a graduate student), and grades. Ideally, the writing sample will be fiction, but if your strongest writing is in nonfiction, poetry or drama, that is also acceptable, although prose is encouraged. Include your e-mail address and class year/program. Materials should be submitted via email to Elizabeth Graver at graver@bc.edu by no later than November 6 at 5 pm. Students will be notified by e-mail prior to preregistration as to whether or not they have been admitted to the course.

Credits: 03
Schedule: M 2-4 25
Room: STOKES HALL 217N
Satisfies Core Requirement: None
Comments: Undergraduate/Graduate Level: Restricted to Sophomores, Juniors, Seniors and Graduate students.
Prerequisites: None

ENGL491701
Advanced Poetry Workshop
MATSON, SUZANNE M
Spring 2020
This is a workshop for those who already have some experience writing poetry, and who wish to work intensively on matters of craft and revision. Students will produce roughly two poems a week, responding to each other's drafts in workshop discussion. Though the bulk of class discussion will be about student writing, some class time will be devoted to a discussion of useful models and what they can teach us about strategy and craft. Short in-class exercises will be given weekly as prompts to begin the writing process. In ongoing consultation with the instructor about which poets might interest them most, students will devise their own reading list of contemporary poets and keep a response journal. In at least two half-hour conferences over the semester, each student will be given individual feedback on a packet of revisions. The final project will be a chapbook of at least twelve revised poems produced over the semester, culled from around 25 drafts produced in and out of class.

**Credits:** 03  
**Schedule:** T 2-4 25  
**Room:** STOKES HALL 207S  
**Satisfies Core Requirement:** None  
**Comments:** Undergraduate/Graduate Level: Restricted to Sophomores, Juniors, Seniors and Graduate students. Admission by permission: Send four of your poems to no later than 11/6/19.  
**Prerequisites:** With permission of the Instructor.  
**Corequisites:** None  
**Cross-listed with:** None  
**Frequency:** Annually

---

**ENGL492601**  
**Trauma in American Literature**  
**TANNER, LAURA E**  
**Spring 2020**  
This course will explore depictions of trauma in American literature of the last century, with a focus ranging from the impact of personal trauma--domestic abuse, grief, extreme poverty, rape, and assault--to the collective effects of slavery, genocide, warfare, and terrorism. Texts may include Hemingway's *A Farewell to Arms*, Faulkner's *Sanctuary*, Alexie's *Indian Killer*, Morrison's *Beloved*, DeLillo's *Falling Man*, Erdrich's *Shadow Tag*, and McCann's *Thirteen Ways of Looking*, as well as short fiction by Baldwin, O'Brien, Klay, Banks, and Naylor, and poetry by Balakian, Trethewey, and Turner. We will also read several essays that consider the relationship between trauma and language and explore what's at stake in reading literature through the lens of trauma.
ENGL500901
Seminar: British Modernism
LEHMAN, ROBERT S
Spring 2020
On or about December 1910, Virginia Woolf famously remarked, "human character changed." Although she might have been off by a few decades (opinions differ), Woolf was no doubt correct in noting the revolution that had occurred in European culture during the early years of the twentieth century. It was the age of the manifesto, the age when literary and political transformations were thought together, the age of "make it new!" In this seminar, we will study some of the great works of literary modernism with an eye toward the ways in which this revolution became our own tradition. Rather than trying to cover all of the novelists, poets, and critics who participated in the modernist experiment--an impossible task, really--we will focus our attention on the works of four paradigmatic figures: Joseph Conrad (1857-1924), Virginia Woolf (1882-1941), T. S. Eliot (1888-1965), and Samuel Beckett (1906-1989).

ENGL551301
American Studies Senior Seminar: Transnational American Studies
KLEIN, CHRISTINA  
Spring 2020  
What happens when ?foreign? people, texts, and ideas enter the United States? What happens when ?American? people, texts, and ideas are consumed by others around the world? What happens when distinctions between ?American? and ?foreign? break down? This course explores diverse topics in American history and culture from a transnational perspective. Topics covered include: immigration, imperialism, wars, borders, cosmopolitanism, and cultural hybridity. Culminates in a substantial research project.

ENGL551701  
Capstone: Love and Indoctrination: A Foundation for the Rest of Your Life  
KAPLAN-MAXFIELD, THOMAS  
Spring 2020  
In our world of political spin and fake news, the surveillance state and social media, the pressure to separate what's real and valuable from what's fake and mere propaganda (another way of saying "lies") is paramount, and critical for figuring out how to live, practically, spiritually, intellectually, and psychologically.  
In George Orwell's 1984, the affair of Winston Smith and Julia threatens the entire structure of Big Brother. Why? What is it about love that threatens large systems based on indoctrination? In this course we will explore and develop working definitions of both love and indoctrination in order to differentiate them.  

Credits: 03  
Schedule: M 4 30-6 50  
Room: STOKES HALL 207S  
Satisfies Core Requirement: None  
Comments: Capstone classes may NOT be taken Pass/Fail. You may take only ONE Capstone class before graduation.

**Frequency:** Periodically  

---

**ENGL554201**  
**Advanced Creative Nonfiction: Experiments in Narrative**  
**ADAIR, ALLISON C**  
**Spring 2020**  
This advanced, cross-genre workshop is designed to push the boundaries both of the imagination and of traditional literary categories. Drawing inspiration from hybrid-experimentalists including Ryszard Kapu?ci?ski, Natasha Trethewey, Theresa Hak Kyung Cha, Italo Calvino, Robert Coover, Simon Schama, and Eula Biss, among others, participants will pursue projects that question the supposed hard lines between fiction/non-fiction, poetry/prose, journalism/personal narrative, and even text/image. Coursework will occasionally take us outside of the classroom--to a robotics lab, an automobile museum, and a stop on the historic Underground Railroad. Assignments will include individual and collaborative exercises as well as extended independent projects developed in consultation with the instructor. Previous workshop experience helpful.

**ENGL600501**  
**Knowing the Other in Early Modern England**  
**CRANE, MARY T**  
**Spring 2020**
In sixteenth and early seventeenth century England, people confronted new ideas, new areas of the world, and new peoples that changed their understanding of knowledge itself: what it was, where it came from, how to determine its truth value. In this course we will read primary sources that reveal how humanist education, the Protestant reformation, new science, expanded trade, and the "discovery" and colonization of the new world transformed what counted as knowledge. We will also read literary works from the period that were shaped by these issues, ranging from Thomas More's *Utopia*, selections from Spenser's *Faerie Queene*, plays by Marlowe, Shakespeare, and Jonson, and poems by Donne and other writers.

Credits: 03  
Schedule: M 4 30-6 50  
Room: STOKES HALL 203S  
Satisfies Core Requirement: None  
Comments: Fulfills the pre-1700 requirement  
Prerequisites: None

ENGL601901  
The New Woman in Victorian Fiction  
MURPHY, JAMES H  
Spring 2020  
The late nineteenth century saw the flowering of the "New Woman" movement in fiction. It coincided to a degree with First-Wave feminism and the struggle for women's suffrage. It had literary debts to contemporary writers such as the Norwegian playwright Henrik Ibsen but also to women writers over the previous century such as George Eliot. This course explores those roots while also attending to the work of some of the seminal New-Woman novelists themselves who came from Irish as well as British backgrounds. They include Olive Schreiner, Sarah Grand, Iota, Mona Caird, and George Egerton.

Credits: 03  
Schedule: W 2-4 25  
Room: STOKES HALL 201N  
Satisfies Core Requirement: None  
Comments: Grad/undergrad, pre-1900 for undergrads.

Corequisites: None
ENGL602001
Philosophy and Art
RESTUCCIA, FRANCES
Spring 2020
This undergraduate/graduate course stands at the intersection of philosophy and art. We will read a rich body of philosophy as well as psychoanalytic theory that engages art theoretically and/or practically--by thinkers such as Kant, Hegel, Heidegger, Benjamin, Derrida, Adorno, Deleuze, Agamben, Badiou as well as Freud, Lacan, Kristeva, Zizek, and Copjec. The particular literature and art they discuss will also be examined. We might, for instance, study Goethe's *Elective Affinities* and Kafka in relation to Benjamin, Proust (Kristeva), Titian and James (Agamben), Kiarostami (Copjec). A mid-term and final paper are required.

Credits: 03
Schedule: TH 4 30-6 50
Room: STOKES HALL 207S
Satisfies Core Requirement: None
Comments: Grad/undergraduate course. Fulfills Theory requirement for M.A. students.
Prerequisites: None

Cross-listed with: None
Frequency: Periodically

ENGL602101
Black and Immigrant
FREDERICK, RHONDA
Spring 2020
This course identifies border security and illegal immigration, "terrorism" prevention, and immigration from Mexico and "Muslim Countries" as central to current debates about U.S. immigration. Literature about black immigration from Barbados, Dominican Republic, Haiti, Jamaica, and from an African region of a future earth offers lenses that complicate what immigration means in/for the U.S. From this perspective, fiction's "imaginable truths" allow us to ask different questions and, importantly, imagine different outcomes. Imaginable truths in black immigrant fiction rethink relationships between immigrants to and citizens of the U.S.
ENGL602201
Seminar: Hamilton and American Culture
HARRISON-KAHAN, LORI
Spring 2020
This interdisciplinary seminar uses Lin-Manuel Miranda's musical Hamilton as a touchstone for studying issues in American culture, including race and immigration. It examines how Hamilton draws from various cultural traditions, including hip hop, Nuyorican poetry, theater and the Broadway musical, and creative retellings of American history. Readings encompass secondary sources (including cultural criticism and Ron Chernow's biography Alexander Hamilton); primary sources (such as Hamilton's letters and other writings); popular responses to Hamilton (including feminist and queer critiques of the musical's gender and sexual politics); and other creative works that re-narrate the origins of America (e.g., Laila Lalami's The Moor's Account).

ENGL602301
Slavery, Politics, and American Literature
REZNICK, SCOTT
Spring 2020
This class examines the literature of US slavery with the goal of understanding the various aesthetic strategies and philosophical frameworks that writers employed as they attempted to address what Herman Melville called "man's foulest crime." "Literature" will be conceived broadly as we examine both canonical and non-canonical texts, writers of diverse backgrounds, and work from an array of genres, including romantic and sentimental novels, slave narratives, poetry, political documents and treatises, oratory, and essays. One of our primary goals will be cultivating the interpretive skills and frameworks needed to engage with such different texts and to understand the unique ways in which they create meaning for their readers, especially when put into conversation with one another. We will therefore closely attend to the historical and political context in which these writers participated and to which they actively responded as they sought to understand and address the paradoxical existence of slavery in a democratic nation ostensibly committed to liberty and equality. Readings will include works by Phillis Wheatley, James Madison, David Walker, Harriet Beecher Stowe, Frederick Douglass, Daniel Webster, Herman Melville, Henry David Thoreau, and Abraham Lincoln (among others).

ENGL700801
Postwar Hollywood: Film Analysis
KLEIN, CHRISTINA
Spring 2020
Focuses on Hollywood cinema of the 1940s-1960s. The first part of the course offers an introduction to the formal analysis of film, in which students develop the skills of close reading cinematic texts. The second part explores different ways of grouping films, including by director (Alfred Hitchcock), genres (the musical), and style (film noir). The third part investigates cultural historical readings of individual films (*The Manchurian Candidate*, *The French Connection)*.

ENGL701201
Reading in Victorian Culture
MCALEAVEY, MAIA M
Spring 2020
Victorian literature was produced amid an explosion of print and consumed in part by newly literate masses. In this course, we will read four major Victorian novels in the serial installments in which they first appeared: Wilkie Collins's *The Woman in White* and Anthony Trollope's *Framley Parsonage* (both of which appeared between 1859 and 1861) and Charles Dickens's *Our Mutual Friend* and Elizabeth Gaskell's *Wives and Daughters* (both serialized from 1864 to 1865). We will analyze their original illustrations and accompanying advertisements. Critical and theoretical frameworks will include reader response and reception theory, literary sociology, and book history.
ENGL702001
Experimental Writing
ROTELLA, CARLO
Spring 2020
Research and the field knowledge doesn't always have to lead to writing the usual scholarly papers and articles. In this workshop-style graduate seminar, we try out alternative forms presented by journalism, the essay, and other traditions: magazine feature, op-ed, interview, explainer piece, reported essay, memoir, obituary, digital forms, and more. Our objective is to expand our writerly repertoires and audiences. We write and workshop every week, and analyze examples of the genres we study. We also have class visits from colleagues who offer their own perspective on the rich variety of forms available to the experimentally ambitious scholarly writer.

ENGL702101
Posthumanisms: Theories and Narratives
SESHADRI, KALPANA R
Spring 2020
This course aims to introduce students to the key thinkers and texts grouped under the rubric of Posthumanism. We shall focus on the dominant strand of posthuman theory, namely: the planet-focused science studies of Bruno Latour, James Lovelock, Karen Barad, Donna Haraway, Katherine Hayles, and Claire Colebrook. Time and inclination permitting we may undertake a small sampling of thinkers of the so-called "Speculative Turn" such as Graham Harman and his cohorts, including the radical views espoused by Ray Brassier, Nick Land, and Eugene Thacker. These thinkers collectively deal with topics such as: the relation between the human and the non-human (animal, thing, machine); information, technology, and materiality; consciousness, complex systems, and the concept of emergence; and the philosophical significance of horror. The presiding philosophers of Posthumanism are Deleuze and Guattari. We shall therefore begin by familiarizing ourselves with the broad outlines of their thought. We shall also read some literary narratives alongside the theories to take a measure of how our reading and interpretive practices reconstruct literary meaning when channeled through these new concepts.

ENGL770101
English Language Training for Graduate Level Students: Focus on Writing
ANDERSON, LYNNE C
Spring 2020
Designed for graduate students whose first language is not English, this course provides writing practice in a range of academic modes including reflection, summary, analysis, and critique. Several sessions will be devoted to e-mail, reference letter, and proposal writing. Early in the semester, students will explore the composition process from brainstorming to drafting to revision to editing. Grammar support for students from linguistically diverse backgrounds is provided throughout the semester. Students who enroll in the course are expected to attend all classes and complete short writing assignments weekly.
ENGL880201
Joyce's *Ulysses*
HOWES, MARJORIE E
Spring 2020
This course will be dedicated to an extended exploration of James Joyce's *Ulysses*, a novel that has often been called the most important literary work of the twentieth century. Most of our time will be devoted to an intensive reading of the novel itself, but we will also read selected critical and historical materials. No prior knowledge of Joyce's works is required, just a willingness to tackle the challenges offered by his most influential masterpiece.

ENGL881901
British Romanticism and Imperial Culture
RICHARDSON, ALAN
Spring 2020
Topics include antislavery poetry, early slave narratives, anti-and pro-slavery polemics; literary Orientalism and other forms of exoticism; anti-imperialist poetry and polemics; Ireland and Scotland as sites for colonial appropriation (including literary appropriation) and emergent nationalist cultures. Attention will be given to literary constructions of the Americas in this era and to the beginnings of Creole literary traditions. Texts may include poems by Chatterton, Rushton, More, Yearsley, Blake, Barbauld, Williams, Wordsworth, Coleridge, Shelley, and Byron; novels by Austen (*Mansfield Park*), Morgan (*Wild Irish Girl*), Scott (*Waverley*), Edgeworth (*Castle Rackrent*); and slave narratives by Equiano and Prince.

**ENGL882501**  
**Composition Theory and the Teaching of Writing**  
**MATHIEU, PAULA**  
**Spring 2020**

This course is designed to (1) prepare graduate students to teach introductory, college-level writing courses; (2) introduce students to central issues, problems, and theories in composition studies; and (3) encourage students to examine the interanimating relationship between critical theory, practical writing experience, and the teaching of Composition/Rhetoric. Though the emphasis is on central, nuts-and-bolts tasks in the teaching of writing (e.g., designing assignments; responding to student essays; selecting texts for discussion; etc.), this is not a prescriptive "how to" course; students are asked to consider pedagogical issues and choices in composition studies from a variety of personal and theoretical perspectives.

**Credits:** 03  
**Schedule:** M 2-4 25  
**Room:** STOKES HALL 207S  
**Satisifies Core Requirement:** None

ENGL888701
Introduction to Advanced Research
STANTON, ROBERT G
Spring 2020
This course will acquaint you with the resources to carry out the central tasks of literary scholarship. Bibliography (studying the production, dissemination, collection, location, and identification of literary artifacts and versions) forms the dynamic basis for scholarship and criticism of all kinds, just as critical sensibility guides our choice of what to look for. You will be guided through the reference works and databases in the Boston College library and elsewhere, discuss the goals, purposes, and future of the field of literary studies, explore the phenomenon of digital humanities, and produce an original project based on archival sources.

ENGL900601
Ph.D. Seminar: Contemporary Literature about the Environment
SONG, MIN
Spring 2020
What can the humanities contribute to environmental discussions that have been led by the natural and social sciences? This course will look at the different ways in which scholars have responded to this question and consider how their work affects the way we read literature. Some concepts we will be focusing on are assemblages, entanglement, posthumanism, and vibrant matter. Readings will be varied, including academic writing, journalism, fiction, poetry, and film.

ENV332101
Building Sustainable Communities
DELSESTO, MATTHEW J; CERMACK, MICHAEL
Summer 2019
This course will investigate contemporary urban environments through the eyes of urban farmers and community innovators who are building more equitable communities and sustainable relationships with the land. Fieldwork, class discussions, environmental media, and workshops with community partners will facilitate our engagement with sustainability narratives and practices. Course themes include the urban planning and racial politics, challenges and opportunities of deindustrialization, the environmental justice movement, youth education, organizational development, and community-based urban transformation.

Environmental Studies Courses: Fall 2019

ENV110001
Environmental Studies Introductory Seminar
KELLY, JENNIFER R
Fall 2019
Environmental studies connects the scientific, political, and cultural aspects of the world's environmental challenges. This twelve-week, one-credit seminar is an orientation and introduction to interdisciplinary scholarship for the cohort of new sophomore Environmental Studies majors each fall. The course will include reading and discussions of classic texts in environmental studies, planning of individual pathways through the major (including selection of thematic or disciplinary concentrations), and several writing assignments. Collaborative and cross-disciplinary work is emphasized throughout. The course ends at Thanksgiving.

ENVS110501
Society and Environmental Transformations
FITZGERALD, JARED
Fall 2019
Where do contemporary environmental problems come from? Why is it so hard to resolve serious global environmental issues? Are environmental problems really social problems? This course will compel students to explore these questions, to devise answers to them, and to learn how to understand environmental problems with sociological analytical tools and methods. Students will explore the historical origins of the contemporary world, revisit the social and environmental changes brought about by the Industrial Revolution, the World Wars, and the liberalization of capitalism, and, through first-hand research, ponder how globalization might be the start of a new environmental transformation for society.

ENVS250101
The State of Affordable Housing in the States
VAN METER, ROBERT H
Fall 2019

How does housing affect the lives of Americans? Where you live determines your access to schools, quality of healthcare, fresh food, clean air, parks and recreation, affordable credit, and even how long you are likely to live. This course explores concepts of housing policy and planning at the national, state, and local levels. It examines programs and policies used to subsidize housing for millions of Americans and help them gain access to a decent place to live. Topics will be considered from multiple perspectives including housing finance, design, community planning, inequality, operations management, and sustainability. We will explore the historical and economic context of U.S. housing and discuss the barriers that low-income families face that affects their access to decent housing. The course will be divided into three sections: history, policies, and today’s issues. Students will explore some of the most recently developed programs and how they fit into effective community revitalization. These programs will be evaluated in class discussions and group presentations.

ENVS334001
Alternative Energy
KRONES, JONATHAN S
Fall 2019
Modern civilization relies upon energy to support nearly all aspects of social and economic activity. Historically, this energy has come from fossil fuels (coal, oil, and natural gas). However, important questions concerning the availability of these energy sources, as well as their social and environmental impacts, have contributed to an increasing interest in the development of alternative sources of energy (solar, wind, geothermal, biomass, tidal and wave). Through an interdisciplinary lens, this course will explore the dynamics of this energy transition with a particular focus on sustainable energy systems and alternative energy resources. Students will be introduced to the technological, economic, political, and environmental dimensions of both conventional and alternative energy resources.

**Credits:** 03

**ENVS334501**  
Environment and Public Health  
**RANALLI, BRENT T**  
**Fall 2019**

This course will provide an introduction to the field of environmental public health. We will cover the basic tools of environmental health science, including toxicology, epidemiology, and risk assessment; the use of health data in the development of environmental policies; and the disproportionate burden of EH problems on vulnerable communities in the U.S. and around the world. Major topics will include air and water pollution, global sanitation and waste, urban design and health, and the use and regulation of chemicals. The course will have a strong emphasis on environmental justice and on the global health impacts of our environmental footprints.

**Credits:** 03  
**Schedule:** T TH 4 30*  
**Room:** DEVLIN HALL 324  
**Satisfies Core Requirement:** None

**ENVS335601**  
**Seminar in Environmental Law**  
**FOWLEY, JEFFRY T**  
**Fall 2019**

Topics to be covered include: (1) the Clean Water Act and the Boston Harbor cleanup; (2) the RCRA hazardous waste regulations; (3) contaminated (brownfield) site cleanups; and (4) the Flint water crisis, so as to understand how environmental protection still can fail and how more still needs to be done. This course will emphasize the practical aspects of environmental law and policy and will include several written exercises. This course will be useful both for pre-law students and also for any student with a serious interest in environmental policy. This seminar is for juniors and seniors, and sophomores with permission of the instructor.

**Credits:** 03  
**Schedule:** M W 6*  
**Room:** DEVLIN HALL 218  
**Satisfies Core Requirement:** None  
**Comments:** Will count as an elective for Environmental Studies majors and minors. Will count toward the Food and Water Sustainability concentration in the Environmental Studies major.

**ENVS336001**  
**Research Methods in Environmental Studies**  
**KELLY, JENNIFER R**  
**Fall 2019**

The course is designed to prepare majors and minors in Environmental Studies to pursue a senior thesis or seminar research project. The course helps students develop a research question from their interest and curiosity in an environmental topic. Students are introduced to qualitative, quantitative, and spatial methods that are used in environmental studies research. Students then design a study to answer their specific research question.
ENVS400501
Political Ecology: Environmental Knowledge, Power, and Conflicts
WORL, JESSICA S
Fall 2019
What are the implications of understanding ecology as explicitly political? How do common assumptions about the nature of nature shape how we interact with and make decisions about the environment? And how do power and difference shape how and who can access, use, and control resources, and to what effect? Political ecology explores the politics underlying resource access, use, control, and management. By adopting political ecology as an explanatory framework for understanding resource conflicts, we begin to unpack how knowledge and power interact to shape resource allocation and conflicts. The course is broken down into three parts. In the first part, we will develop an understanding of the theoretical and conceptual lineages that make up political ecological research. In the second part, we will explore how political ecology interrogates relations of power, knowledge, and practice as fundamental for understanding resource conflicts. In the third part, we will examine key thematic debates (e.g., human-wildlife conflicts, conflict minerals and resource curses, resource rights, climate change and population pressure, poverty and environmental degradation, greenwashing) from both the Global North and South.

Environmental Courses: Spring 2020

ENVS174601
Motivations for Human Cooperation: Evolutionary Perspective
BIJANI, YASMIN
Spring 2020
What motivates us to cooperate? Are we, as many have suggested, driven primarily by self-interest or is there room for altruism? Readings will draw from sociobiology, community ecology, sociology, economics, and political theory to highlight examples of cooperation unfolding in the natural world around us, explain why cooperation among humans is so difficult, and ways in which we have formulated formal and informal "rules" to incentivize human cooperation. Through case studies, we will explore how cooperation occurs between individuals in small groups and organizations, in addition to the role of large institutions in enabling and constraining various types of cooperation. Students will have an opportunity to reflect on theories of cooperation and develop practical frameworks for resolving cooperative dilemmas in an equitable manner.

ENVS331501
Sustainable Agriculture
PISANI GAREAU, TARA

Spring 2020

Over the past 50 years, the industrial agriculture complex has led to amazing increases in grain yields which has met the basic calorie needs of much of the world's population. However, intensive production practices have come at a high environmental and social cost and climate change now presents many new challenges to farmers. A new approach to food production is needed--one that not only restores the ecosystem services on farmland and reduces fossil fuel inputs but also one that supports farm families, builds communities of cooperation, and promotes human health. This course explores the historical basis of agriculture, the concept of sustainability, the agricultural practices that lead to improved ecosystem services, and alternative marketing approaches and cultural relationships. Students will come away from this course with an in-depth understanding of what sustainable agriculture is and how it can be applied to various situations in the world.

ENVS333001
Water Diplomacy and Governance
BIJANI, YASMIN

Spring 2020

The demand for water continues to rise all over the world while supply remains limited and increasingly uncertain due to climate change. If this trend continues, we could start to see 'water wars.' This course will raise students' awareness of the current state of freshwater resources globally and the need for adaptable water governance. It will introduce students to several case studies of transboundary water conflicts around the world while also teaching students the negotiation and mediation skills needed to resolve water disputes. During the course, students will negotiate a resolution for two different conflicts over fictional river basins as a way to apply their substantive knowledge about water governance and to develop their negotiation skills.

ENVS336501
Human-Wildlife Conflicts and Co-existence
KELLY, JENNIFER R
Spring 2020
This course introduces students to a wide spectrum of wild animal issues through an interactive and interdisciplinary lens. The course captures the diversity of both negative and positive interactions between humans and wildlife in rural and urban contexts. To highlight these different encounters, we will look at a range of ecosystems around the world including those in New England and Costa Rica. The course covers: the ecological, social, and economic significance of species; the social and economic impacts of species in our backyards; how species are adapting to smaller spaces; and the increase in human-wildlife interactions. This course ensures that students gain more than a basic understanding of the topics discussed by working with an organization that focuses on wild animals, by encouraging students to reflect on the wild animals they encounter in their own communities, and in bringing their personal experiences to discussion forums. The discussions, service learning, case studies, and examples allow for a deeply rich and applied understanding of the course themes. Human-Wildlife Conflicts and Co-existence provides an academic experience that is engaging, interdisciplinary, applied, personal, and inclusive, not just in terms of its accessibility and variety, but in terms of the multi-species perspectives it uncovers.

ENVS400601
Place-making in a Post-carbon World: Architecture and Landscape for a Sustainable Future
BURNS, JENNIFER L
Spring 2020
Since the rise of steam power in the nineteenth century, the American way of life has been premised upon ever-increasing consumption of fossil fuels in all aspects of our economy, from agriculture and manufacturing, trade and transportation, to communications and computing. In this course, we focus on a single aspect of this carbon-reliant economy, one that centrally and intimately shapes our patterns of life, our energy use, and our expectations of comfort. Focusing on architecture and landscape design, we review the dominant patterns of building and dwelling from before and during the Industrial Revolution in the U.S. We then examine a substantial series of alternative, sustainable strategies for constructing our shelters and their surrounding landscapes.

Environmental Seminar
PISANI GAREAU, TARA
Spring 2020
This seminar is for seniors who are minors in the Environmental Studies Program. With the goal to serve as a bridge between the college experience and the next stage of one's career, students fine-tune their critical writing, research, project coordination, facilitation, and public speaking skills. We investigate, actively discuss, and write about contemporary environmental issues and solutions with the aid of weekly reading assignments and the knowledge and experiences each student brings to class. Students also engage in a semester-long research project, collaborating with a campus or community mentor organization to address a specific environmental problem.

Introduction to Film Art  
ROLINCIIK, KYLIE M  
Fall 2019  
The basic course introduces essential concepts of film techniques, history, and criticism and supplies the background for more advanced work in film studies. It provides some familiarity with the artistic, economic, technological, and social factors that exerted an influence on the development of the medium and the industry to its present influential role in cultures today. Critical reading and historical research lead to active viewing and to precise written and oral evaluations of individual films.

FILM223001  
Introduction to Video Art  
FRIEDMAN, JENIFER G  
Fall 2019
Introduction to Video Art is an Art course examining video as a medium for artistic expression and conceptual inquiry. How can we use video to ask questions about ourselves, our viewers, or our world? Responding to instruction about video, sound, and editing techniques, students produce multiple assignment based video art pieces and a self-designed final project. Class sessions are comprised of screenings, discussions, technical demonstrations, and group critiques of students' projects. Screenings and readings cover a variety of topics, including: past and present video art, experimental/expanded cinema, performance art, art in the age of digital culture, and philosophical and sociological topics. Readings, screenings, and discussions are designed to provide a conceptual basis for students' video art projects, while critiques and writing assignments provide a forum for dialogue.

**Representing the Holocaust**  
**BLOCK, NICHOLAS**  
**Fall 2019**  
This course will examine representations of the Holocaust from around the world in different national contexts. Ghetto diaries, first-hand testimony, and second-generation efforts to piece together the trauma of the past shape the research complex known as Holocaust studies. Students will engage with a wide range of representational sources, including cinematic, literary, and memorialization efforts. Films include the French *Shoah*, the American *Schindler's List*, the East German *The Murderers are Among Us*. Literature in translation includes the American comic *Maus*, the Italian *Survival in Auschwitz*, the Yiddish *Night*. Class time will also introduce historical debates around the Holocaust, including discussions of intentionalism versus functionalism, women as perpetrators and victims, and genocidal comparisons. There will be a field excursion to Boston's local Holocaust monument.

**FILM330301**  
**Advanced Screenwriting**  
**CONROY, MARY K**  
**Fall 2019**  
This course is for students interested in writing for film, applying the knowledge gained in FILM3301 toward their efforts at writing their own screenplays. In the early part of the class, students will select an idea for a film and transform that idea into a story suitable for the screen. From there, in a round-table setting, students will complete a series of exercises to help them focus their stories, eventually moving on to writing a finished first act (28-30 pages) by the semester's end.

**Credits:** 03  
**Schedule:** M 10-1  
**Room:** DEVLIN HALL 013  
**Satisfies Core Requirement:** None  
**Comments:** Limited to 15 students

FILM331001
The Working Cinematographer: On the Set
HEIM, ROBERT
Fall 2019
An advanced course in cinematography. Students rotate crew assignments in the camera, lighting, and grip departments while completing video assignments varying documentary/dramatic, daylight, exterior/interior shooting skills. Visits by local freelancers underscore the collaborative nature of the role of the director of photography. Ideal for future filmmakers or aspiring film/video professionals.

FILM331401
Cinema of the Greater Middle East
BERGER, PAMELA
Fall 2019
Cinema shapes the way we view a culture, but in order for a film to reveal that culture, we must view the film with an understanding of the context in which it was created. In this course we will look at several films from the Greater Middle East and study their artistic aspects as well as the cultures within which they were shot. We will also explore the various points of view of the filmmakers and look into how the scripts and the shooting styles serve to accomplish their goals.

Credits: 03
Schedule: W 3-5 30
Room: DEVLIN HALL 010
Satisfies Core Requirement: Cultural Diversity
Comments: None

FILM331501
Film Noir
LONG, CARTER E
Fall 2019
We will explore the history of the enigmatic Hollywood style from its origins in German Expressionism and Hard Boiled Fiction through its classic era, and finally into its rebirth as revisionist neo-noir in the 1970s. The course will examine how American social and political history factored into noir's sudden appearances, and study theoretical concepts of genre, space, gender, and self-perception. Directors include Wilder, Tourneur, Aldrich, Altman, Polanski, and Lynch.

FILM332501
The Comic Film
LA ROCCA, JOSEPH P
Fall 2019
Laughter is a universal phenomenon seen widely in films from the birth of cinema in Lumiere Brothers pranks on screen in 1895 to the current spoofs and mockumentaries. This class will trace the evolution of comedy in film from the early silent films (Chaplin), through intellectual comedy (Woody Allen), to the most recent comedies on screen today. The survey will analyze the psychological and sociological essence of comedy in its various forms from slapstick and situational comedy to word-plays and clever one-liners.

FILM338101  
Propaganda Film  
MICHALCZYK, JOHN  
Fall 2019
This course introduces the student to various forms of propaganda usage during the twentieth century, primarily during wartime. Using lectures, film, slides, and outside screenings, it will present in a modified chronological order, the mind set and values of governments in crises periods. On a personal level, the course will offer the student the occasion to see several sides of an issue and help in determining his/her own perspective on the situation.

**FILM338301**  
**Film Criticism and Theory**  
**MICHALCZYK, JOHN**  
**Fall 2019**
In essence, we become film critics when we explore our opinions about a film in light of the plot, characterization, dramatic tension, etc. As an art form, film criticism emerged on a large scale following release of the controversial film Birth of a Nation (1915). Today film critiques are found in our daily newspapers and weekly journals. This course will continue the process through the screening and discussion of primarily independent films. Students will read extensive critiques and theory, while developing sharp critical and writing skills.

FILM338901
American Directors Series
CHOPRA, GAUTAM

Fall 2019
This series will concentrate on several directors who have chosen to work on the East Coast rather than in the Hollywood mainstream, such as Martin Scorsese, Spike Lee, Sidney Lumet, Elia Kazan and Woody Allen. Many have roots in New York and use the City not only as a setting for their narratives but as a metaphor for the human condition they explore. This school of Urban Realism has enriched American film with a gritty documentary strain that stands in strong contrast to the polished Hollywood style.

FILM443701
The Latin American Documentary
LIVON-GROSMAN, ERNESTO

Fall 2019
This course focuses on the Latin American documentary cinema in order to explore the aesthetic and critical trends of its most important films and to expose shared concerns about politics, race and culture. How are those films shaped by always changing social circumstances? What do they tell us about Latin America’s past and present political realities? And how do they relate to other documentary practices outside Latin America? We will see films and read texts by Albertina Carri, Nicolasito Guillen Landrian, Eduardo Coutinho, Fernando Solanas, Sara Gomez, Bill Nichols, and Robert Stam among others. This class requires that in addition to critical readings students watch movies outside class time. Class in English, films with English subtitles.

Explores recent films from China, Taiwan, Hong Kong, South Korea, Japan, India, and Southeast Asia. Films will be approached through a variety of critical perspectives, including formalism, auteurism, and historicism. We will watch art films, commercial films, and films that fall between these two categories. We will ask how Asian film industries have been affected by globalization and how national cinemas are becoming increasingly transnational.

FILM170101
Coming of Age: Crisis and Calm Revealed through Film
MICHALCZYK, JOHN
Spring 2020
Coming of age, whether in moments of conflict or peace, remains a central theme in both classic and contemporary films. Film adaptation offers opportunities to study issues confronted from early to late adolescence that affect our adult lives. Viewing moments of crisis and calm through the medium of film has aesthetic value and promotes increased visual and cultural literacy. The films serve as foundational texts, as students engage in understanding the complexities of adapting a singular account of adolescence from printed word to the screen so as to reveal the relevance for our own lives.

**FILM223001**  
**Introduction to Video Art**  
**HOELTERMANN, JANNE**  
**Spring 2020**

Introduction to Video Art is an Art course examining video as a medium for artistic expression and conceptual inquiry. How can we use video to ask questions about ourselves, our viewers, or our world? Responding to instruction about video, sound, and editing techniques, students produce multiple assignment based video art pieces and a self-designed final project. Class sessions are comprised of screenings, discussions, technical demonstrations, and group critiques of students' projects. Screenings and readings cover a variety of topics, including: past and present video art, experimental/expanded cinema, performance art, art in the age of digital culture, and philosophical and sociological topics. Readings, screenings, and discussions are designed to provide a conceptual basis for students' video art projects, while critiques and writing assignments provide a forum for dialogue.

FILM330401
From Script to Screen
ROLINCIK, KYLIE M
Spring 2020
Screenwriting is a visual medium, so the best ideas often come from pictures in the writer's mind. This course focuses on the props, sets, locations, actions, cinematography, editing, and other visual elements that translate words on a page into worlds of light. By looking at scripts and films, we'll analyze the process of reading words as images.
FILM331201
World Cinema
LONG, CARTER E
Spring 2020
This course provides the opportunity for students to explore films from regions other than Europe and North America. Films of Asia, Africa, or the Middle East will serve as a focus for the course. Special attention is given to the social, economic, cultural, and political contexts from which these films arise, both in the country of origin and in the West.

FILM333101
Independent American Film
ROLINCIK
Spring 2020
How might contemporary independent cinema be seen as both an alternative and a response to mainstream Hollywood fare? How has the acquisition of indie studios, such as Miramax and New Line Cinema, transformed the industry? Has the affordability of technology and accessibility of audiences truly created a democratization of film? This course emphasizes critical examination of contemporary American Independent film from the 1980s films of John Cassavetes, Steven Soderbergh, Spike Lee through the 1990s and 2000s with features from Kevin Smith, Allison Anders, Richard Linklater, Quentin Tarantino; shorts from Wes Anderson and Jane Campion; and current festival hits.

**FILM333301**  
**War Is Hell: The Combat Film**  
**MICHALCZYK, JOHN**  
**Spring 2020**

The most common image of combat film is one of "guts and glory." Behind this image, lies a harsh reality of the impact of war on the body and soul of the soldier and civilian. This course will study chronological evolution of war film from racist interpretation of the Civil War in Griffith's *Birth of a Nation*, through World War I and II with Milestone's pacifist *All Quiet on the Western Front*, Spielberg's hyper-realistic *Saving Private Ryan* to more recent times, Vietnam War films, Coppola's surrealistic *Apocalypse Now*, the war in Iraq with *In the Valley of Elah* and *Control Room*.

French Courses: Summer 2019

FREN106501
**Intensive Reading in French**  
**BOLD, STEPHEN**  
**Summer 2019**  
The course objectives are (1) to develop the ability to read French readily and accurately through the study of grammatical structures and vocabulary; (2) to develop techniques for the reading of French-language material; and (3) to provide practice in the translation of French texts in general and of texts related to the students' major fields of study and research. This course may be taken for a grade, for pass/fail, or audited (as a registered auditor). Students desiring a pass/fail grade must file this grading preference with the Graduate School of Arts and Sciences.

FREN337801
Paris Noir: From La Negritude to Le Hip-Hop
JEAN-CHARLES, REGINE M
Summer 2019

Afropeen?Negropolitain?France-antilles?Senegaulois?Franco-africain? Black Frenchmen? The numerous ways of referring to people of African descent in France reflects the complexity of how racial identity is approached, considered and imagined. Indeed, since the Negritude movement of the 1930s people from Africa and the diaspora have been making their mark in Paris. This course explores the idea of Black Paris in various forms of cultural expression including poetry, literature, film, drama, autobiography and music. We will examine how race, national identity, and immigration are important issues addressed by not only writers and filmmakers, but also by hip hop artists, comedians and soccer players.

Credits: 03
Schedule: BY ARRANGEMENT
Room: None
Satisfies Core Requirement: Cultural Diversity
Comments: As a part of the summer class students will also go on field trips to museums, a hip hop performance, restaurants, walking tours of Paris, and a weekend away to Bordeaux which was one of the ports in the trans Atlantic slave trade.
Prerequisites: None

FREN331001
War/Twentieth-Century France
BREINES, JOSEPH

Fall 2019
Our focus this semester will be on the artistic, intellectual, political, and social life of France during the period of the Second World War. We will be reading poetry and short stories published during the Occupation, recent magazine articles on the clandestine press, an anti-war play from the immediate pre-war period, essays published just after the Liberation, and very short selections on the history of the period. We will see a number of recent French films whose stories draw on the dynamics and psychology of resistance and collaboration. We will hear recollections of the Liberation of Paris, interviews with men who joined the Charlemagne division of the German "SS," and songs from the period. While the main focus will be on the Second World War, we will begin the course with two texts (a short story and a poem) written just after the Franco-Prussian War (1870-71).

Credits: 03
Schedule: M W F 12
Room: LYONS HALL 315
Satisfies Core Requirement: None

Comments: Prerequisite: four years of high school French or FREN2209 or FREN2210.

FREN339301
Life at the Limit: Narratives of Transformation
KEARNEY, ANNE D

Fall 2019
This course is conducted in English. This course will consider texts that follow the path of a person making a journey from alienation, loss, or hardship through a turning point. We will read stories of people who, caught in a major life crisis, still manage to keep a deep connection with themselves and the world, people who ultimately survive to share their experience with others in writing. Students will read correspondence between Theo and Vincent Van Gogh, a short story by Fyodor Dostoevsky, excerpts from Les Miserables, a memoir by Primo Levi, and various texts by Albert Camus and several other authors. Satisfies Core Requirement for: Literature
FREN443601
Moliere
BOLD, STEPHEN
Fall 2019
This course will offer an in-depth survey of all aspects of Moliere's work, from his farces to the "grandes comedies" and the "comedies ballets."

Credits: 03

FREN444701
On Friendship
YAMAGUCHI, LIESL
Fall 2019
When a life is stripped down to its defining elements, as in a public record or newspaper notice, a person is often reduced to a network of genealogical relations: parents, spouse, offspring. On the basis of official documents, it would be easy to conclude that bonds of friendship are of little consequence to human societies. Yet, it is difficult to imagine any life in which friendship has not, at some point, played a decisive role. In this course, we will focus on the role of friends and friendship in stories of coming of age, engaging thinkers from Michel de Montaigne to Simone de Beauvoir and Simone Weil. Topics to be covered include the relationship between friendship and love, love and learning; the transformational, and often transitory, role of the "best" friend; friendship and gender; the limits of friendship; and the role of language in shaping categories of affection.

**Credits:** 03  
**Schedule:** T 3-5 20  
**Room:** MCGUINN HALL 400  
**Satisfies Core Requirement:** None  
**Comments:** Conducted in French. Fulfills one of the 4000-level requirements for the French major or minor.

---

**FREN448301**  
**Twentieth-century French Theater**  
**BREINES, JOSEPH**  
**Fall 2019**  
This course will study a number of plays written in French during the twentieth century. Authors will include Cocteau, Anouilh, Giraudoux, Sartre, Beckett and Genet. As many of the plays are remakes of Greek tragedies and legends (the Oedipus Cycle, the Trojan War, for instance) we will be posing questions such as: How does one explain the flurry of remakes at this time in France? How are classical notions of causality (Fate, Destiny) transposed in the modern versions? In what ways do the modern plays self-consciously express their status as remakes? Theoretical writings on theater will also be considered.

FREN227601
Conversational Approach to Contemporary France
BAGES, THIBAUD M
Spring 2020
This course is designed to familiarize students with the political and social features of contemporary France while helping them to develop oral communication skills in French. Using authentic documents (television, videos, films, songs, newspapers, and magazines), we will discuss current events and socio-political issues. Students will develop their vocabulary, increase their knowledge of idiomatic expressions, and further their command of spoken French by engaging in structured dialogues based upon real-life situations.

Credits: 03
Schedule: M W F 12
Room: LYONS HALL 316
Satisfies Core Requirement: None
Comments: Conducted in French. Counts as an elective towards the French major or minor.
FREN330501
Wordplay: From the Stage to the Page
BOLD, STEPHEN
Spring 2020
This course is open to any students interested in expanding their linguistic and cultural horizons while developing their literary skills through writing in French. Guided compositions will help students to gain precision and sophistication in their written French and in their writing in general. Selected poems and plays explore a chosen theme and allow students to learn the basics of literary analysis in each genre. Grammar review is tied to the readings. This course will prepare students for 400-level courses in literature and culture.

Credits: 03

FREN330601
Narrative and Identity: The Story You Tell Yourself
BREINES, JOSEPH
Spring 2020
This course is designed to help students with a good background in French to progress to the next level. Students in this course will continue to solidify their mastery of French grammar through structural exercises tied to readings, discussion, and written analysis of selected short stories, novels, and narrative film. The stories have been chosen and presented to allow students to progress substantially both in their basic reading skills in French and in their awareness of critical aspects of storytelling such as narrative voice, point of view, and plot structure.

**Credits:** 03  
**Schedule:** M W F 12  
**Room:** LYONS HALL 315  
**Satisfies Core Requirement:** None  
**Comments:** Conducted in French  
Fulfills one of the 3000-level requirements for the French major. Satisfies Foreign Language Proficiency core requirement.  
**Prerequisites:** French CCR II (FREN2210). Students with just four years of high school French or CCR I (FREN2209) may enroll with instructor's permission.

**FREN330901**  
**Artists and their Writings**  
**KEARNEY, ANNE D**  
**Spring 2020**  
In this course, students will study French culture through some key artists of the turn of the nineteenth century. The course will explore the rapport between their visual work, their writings (or writings about them) and their lives. The artists studied will be Van Gogh, Gauguin, Matisse, Picasso, Rodin, Camille Claudel, Cezanne. We will look at the evolution of their work in conjunction with their biographies, reading extracts from their letters or pronouncements on art and life.

**Credits:** 03  
**Schedule:** M W F 1  
**Room:** CAMPION HALL 200  
**Satisfies Core Requirement:** None  
**Comments:** Conducted in French  
**Prerequisites:** French CCR II (FREN2210). Students with just four years of high school French or
CCRI (FREN2209) may enroll with instructor's permission.

Corequisites: None

FREN331501
Madmen, Hysterics, and Criminals: Inventing Deviance
BOWLES, DANIEL J
Spring 2020
In this seminar we address three major questions, guided by a broad selection of readings from German, French, British, and American literature and theory from 1800 to the present: How do we as readers define the abnormal and the deviant? What aesthetic practices does literature employ to represent these threshold experiences, and what is their history? How might we rethink our own notions of normality when faced with their artificiality? Literary, theoretical, and musical texts by Balzac, Bernhard, Buchner, Freud, Genet, Kracht, Plath, Stevenson, and others help us establish a history both of abnormality and our own cultural self-understanding.

Credits: 03
Schedule: M W F 2
Room: DEVLIN HALL 227
Satisfies Core Requirement: Literature
Comments: Conducted in English. Counts toward German major, German minor, and German Studies minor.
Prerequisites: None
Corequisites: None
Cross-listed with: ENGL2210, GERM2221

FREN443801
La Fontaine and Perrault
BOLD, STEPHEN
Spring 2020
Jean de La Fontaine and Charles Perrault occupy special places in the history of seventeenth century French literature: though they practiced forms apparently aimed at a young audience (fables and fairy tales) they also played crucial roles in cultural and political debates that divided intellectual of the times. We will rediscover these minor classics with new eyes and multiple perspectives.
FREN444301
Eighteenth-Century French Theater
BREINES, JOSEPH
Spring 2020
This course offers an advanced introduction to theater in eighteenth-century France. We will read some of the major plays of the period by Voltaire, Lesage, Marivaux, Diderot, and Beaumarchais, and essays on theater written at that time, as we consider the ways in which theater was used as a means of disseminating philosophical ideas of the Enlightenment.

Credits: 03
Schedule: M 3-5 20
Room: GASSON HALL 204
Satisfies Core Requirement: None
Comments: Conducted in French.
Prerequisites: Two courses from the following: FREN3305, FREN3306, FREN3307, FREN3308, FREN3309.
Corequisites: None
Cross-listed with: None
Frequency: Periodically

FREN446501
Between Nature and Culture: Caribbean Literature and the Environment
JEAN-CHARLES, REGINE M
Spring 2020
The flora and fauna of tropical landscapes, lushness of the mangroves, the flow of great rivers, the crashing waves of the Atlantic, the heights of mountainous lands, the shock of natural disasters--the natural world is an important site of Caribbean artistic and cultural production. Applying eco-criticism to the field of francophone Caribbean literature, the goal of this class is to examine the ways that fiction explores the relationship between literature and the environment in the Francophone Caribbean context. We will read novels by canonical authors from Haiti, Guadeloupe and Martinique in which nature plays a dominant and transformative role.

**GERM200401**  
Business German  
SONDERMANN, RUTH  
Fall 2019  
An introduction to the language and structure of business in the German-speaking countries, this course will focus on daily business practices, on texts related to business in German, and on cultural differences in the German-speaking business world. A semester's work includes the practice of skills necessary to understand and perform basic business transactions (role-playing); the exploration of business in German in different media, such as television and the Internet; and the praxis-oriented expansion of applying the German language in a professional context. Not suitable for native speakers of German.

**Credits:** 03  
**Schedule:** T TH 10 30*  
**Room:** STOKES HALL 363S  
**Satisfies Core Requirement:** None  
**Comments:** Conducted in German. Counts toward German major, German minor, and German Studies minor.

**GERM210801**  
The Art of German Cinema  
None  
Fall 2019  
An introduction to feature films from Germany and Austria from the 1920s to present. Questions of personal, cultural, gendered, sexual, religious, and national identity give the course thematic coherence. How has the cinematic tradition of Germany developed? Through discussions, sequence analysis, and theoretical readings, students will hone their abilities to read and interpret visual texts. Films screened may include works directed by Riefenstahl, Lang, Sierck, Harlan, Fassbinder, Wenders, Link, Haneke, Akin, Finsterwalder, and Petzold, among others.
GERM220301
Representing the Holocaust
BLOCK, NICHOLAS
Fall 2019
This course examines representations of the Holocaust from different national contexts around the world. Students will engage with a wide range of representational sources, including cinematic, literary, and memorialization efforts. Class time will also introduce historical debates around the Holocaust. There will be a field excursion to Boston's local Holocaust monument.

GERM300301
Goethe und Schiller
RESLER, MICHAEL
Fall 2019
A study of selected dramas and lyrics of Goethe and Schiller. The development on the part of both poets from early Storm and Stress to the later Classicism will be systematically traced. Throughout the course the literature will be linked to the larger cultural context of its age, with particular attention to the philosophical (Herder, Schiller, Winckelmann, and Kant) and musical (Haydn, Mozart, and Beethoven) heritage of Germany in the eighteenth and early nineteenth centuries.

Credits: 03
Schedule: M W F 12
Room: LYONS HALL 207
Satisfies Core Requirement: None
Comments: Conducted in German. Counts toward German major, German minor, and German Studies minor. This course is for students who have completed at least Intermediate German II or the equivalent. Satisfies Foreign Language Proficiency core requirement.

Corequisites: None
Cross-listed with: None
Frequency: Biennially

GERM300601
Trauma and Childhood
BOWLES, DANIEL J
Fall 2019
Contemporary German novels have historically been used as a snapshot of a nation, to take the pulse of a culture and identify its new directions. One trend among the panoply of new work by German, Swiss, and Austrian novelists is a focus on childhood, on growing up or coming of age, often under trying or traumatic circumstances, a kind of modern-day reflection on formation. In this seminar, students embark on their own road trip through these stories, examining topics like German history; the fantastic; justice; sex, drugs, and rock 'n' roll; identity, gender; memory; and others. The objective: to discern and discover ways in which contemporary writing may offer new solutions for past hardships. Authors may include Fritsch, Herrndorf, Klussendorf, Kracht, Vennemann, Weber, and Zeh.

GERM669901
Honors Thesis
RESLER, MICHAEL
Fall 2019
The honors thesis in German Studies is offered to interested students who maintain a cumulative average of at least 3.3 in German. These students may begin a six credit research project that will lead to a 60 to 80 page honors thesis completed during the fall and spring of their senior year. The thesis is a major scholarly enterprise entailing independent research and writing; the final product is an essay embodying the results of original research and substantiating a specific view of the subject matter. Interested students should initiate the preparatory planning during junior year.

GERM200301
Special Topics: Fantastic Tales of Horror
BOWLES, DANIEL J
Spring 2020
Imaginative fairy tales, monstrous spiders, magic snakes, soulless robots, psychological demons—the German literary tradition has a long legacy of fantastic tales that probe the limits of human imagination and inventiveness. Reading key short stories and novellas, students investigate this topic with an eye toward understanding how the literary chimeras of the mind reflect cultural, social, historical, and political anxieties. What does the fantastic tell us about ourselves? By the end of the semester, students will have sharpened their analytical and conversational skills in German with works by Goethe, the Brothers Grimm, Tieck, E.T.A. Hoffmann, Droste-Hulshoff, Keller, Storm, and others.

**Credits:** 03  
**Schedule:** M W F 10

**GERM200501**  
**Germany in Europe today**  
**SONDERMANN, RUTH**  
**Spring 2020**

This course is intended to introduce students to today's Germany in Europe. The European Union and the four freedoms of the EU--free movement of people, goods, services, and capital--will be the chief topic of this course. Other topics will include the new influx of migrants and other demographic changes, the education system, and the opportunities that education offers. Because Germans are very concerned about the effects of environmental change, the course will also address the idea of sustainability, the sharing and caring society, and Fair Trade. This course is a language course offered to students from all majors who are contemplating a semester abroad, an internship, or even working in Germany. We will be listening to podcasts and the news and will read authentic material. You should therefore be quite confident in your German language skills, be able to discuss and present your opinion and write short essays. If you are uncertain about your level, please do not hesitate to contact the instructor.

GERM222101
Madmen, Hysteres, and Criminals: Inventing Deviance
BOWLES, DANIEL J
Spring 2020
In this seminar we address three major questions, guided by a broad selection of readings from German, French, British, and American literature and theory from 1800 to the present: How do we as readers define the abnormal and the deviant? What aesthetic practices does literature employ to represent these threshold experiences, and what is their history? How might we rethink our own notions of normality when faced with their artificiality? Literary, theoretical, and musical texts by Balzac, Bernhard, Buchner, Freud, Genet, Kracht, Plath, Stevenson, and others help us establish a history both of abnormality and our own cultural self-understanding.

Credits: 03
Schedule: M W F 2
Room: DEVLIN HALL 227
Satisfies Core Requirement: Literature
Comments: Conducted in English. Counts toward German major, German minor, and German Studies minor.

GERM223901
Knights, Castles, and Dragons
RESLER, MICHAEL

Spring 2020

A study of the masterpieces of the first great blossoming in German literature including The Nibelungenlied, Tristan, and Hartmann von Aue's Erec. Central to the works of this age are (1) the rise of knighthood and (2) the spreading to Germany of the legend of King Arthur and the knights of the Round Table. In addition, older Germanic-heroic influences will be examined in certain of the works. The literature will be discussed in the larger context of its sociological and historical background. The literary traditions of France will be systematically linked to contemporary developments in Germany.

Credits: 03
Schedule: M W F 12
Room: LYONS HALL 207
Satisfies Core Requirement: Literature
Comments: Conducted in English with all texts in English translation. No knowledge of German is required. Counts toward German major, German minor, and German Studies minor.

Hispanic Studies Courses: Summer 2019

SPAN101501
Elementary Spanish I
FALCONI, SILVANA
Summer 2019
This introductory course is designed for students with no prior Spanish experience as well as those who have had some high school Spanish. Elementary Spanish I provides a strong foundation in speaking, listening comprehension, reading, and writing as well as exploring the products, practices, and perspectives that are unique to Hispanic cultures. This course follows a communicative approach, which springs from the idea that languages are best learned when real-world information becomes the focus of student activities. Students interact in Spanish with the instructor and with classmates. By the end of this course, students should be able to successfully handle in Spanish a significant number of basic communicative tasks.

Credits: 03
Schedule: M T W TH 6-9 15
Room: STOKES HALL 115S
Satisfies Core Requirement: None
Comments: Conducted in Spanish
Prerequisites: This course is for beginners. Students with prior Spanish experience are admitted only after taking the placement test.

Frequency: Annually

SPAN101601
Elementary Spanish II
FALCONI, SILVANA
Summer 2019
Elementary Spanish II is the second course in the first-year Elementary Spanish I and II sequence. It continues to provide a strong foundation in speaking, listening comprehension, reading, and writing as well as exploring the products, practices, and perspectives that are unique to Hispanic cultures. This course follows a communicative approach, which springs from the idea that languages are best learned when student activities involve critical thinking about real-world information. Students interact in Spanish with the instructor and with classmates. By the end of this course, students should be able to successfully handle in Spanish a significant number of communicative and writing tasks in different time frames.

SPAN111501  
**Intermediate Spanish I**  
GELARDO-RODRIGUEZ, TERESA  
Summer 2019

Intermediate Spanish I is the first course in the second-year sequence. It continues to develop and strengthen students' proficiency in the Spanish language as well as to increase their cultural understanding. Emphasis remains on the four skills and on critical thinking. Throughout the course, students develop fluency and accuracy, and focus on communication. They expand their vocabulary and enhance their understanding of essential Spanish grammar concepts. Short literary texts, cultural readings, and audiovisual materials provide opportunities to learn to appreciate cultural differences and impart authentic insight into the Hispanic world.

Intermediate Spanish II
CUNEO, PIA
Summer 2019
Intermediate Spanish II is the second course in the second-year sequence with a continued emphasis on the four skills and on critical thinking. This course focuses on vocabulary building, the examination of some of the finer grammar points, and moving students towards a more complex level of comprehension and expression. Students work with short literary texts, cultural readings, and audiovisual materials. After successful completion of this course, the foreign language requirement will be fulfilled for schools that require a fourth-semester proficiency.

Hispanic Studies Courses: Fall 2019

SPAN101501
Elementary Spanish I
BERRY, BRADLEY C
Fall 2019
This introductory course is designed for students with no prior Spanish experience as well as those who have had some high school Spanish. Elementary Spanish I provides a strong foundation in speaking, listening comprehension, reading, and writing as well as exploring the products, practices, and perspectives that are unique to Hispanic cultures. This course follows a communicative approach, which springs from the idea that languages are best learned when real-world information becomes the focus of student activities. Students interact in Spanish with the instructor and with classmates. By the end of this course, students should be able to successfully handle in Spanish a significant number of basic communicative tasks.

Fall 2019
Intermediate Spanish I is the first course in the second-year sequence. It continues to develop and strengthen students' proficiency in the Spanish language as well as to increase their cultural understanding. Emphasis remains on the four skills and on critical thinking. Throughout the course, students develop fluency and accuracy, and focus on communication. They expand their vocabulary and enhance their understanding of essential Spanish grammar concepts. Short literary texts, cultural readings, and audiovisual materials provide opportunities to learn to appreciate cultural differences and impart authentic insight into the Hispanic world.

Spanish Conversation, Composition, and Reading I
BERNAVA, FERNANDO R
Fall 2019
The main objective of this course is to consolidate students' skills so that upon successful completion of the sequence (CCR1 and CCR2) they will have acquired a proficient level of Spanish. Students will acquire discursive fluency and accuracy by working on the following skills: listening and reading comprehension, writing, speaking, and oral interaction. The course focuses on complex grammar topics and extensive vocabulary, as well as on expanding students' knowledge of cultural and historical aspects of Spanish speaking countries. Likewise, the course will foster students' analytical, critical, and creative skills in the target language through the use of a variety of authentic materials such as literary texts, newspaper texts, and audiovisual materials.

SPAN339201
Advanced Spanish
PENAGOS, ADELA
Fall 2019
This course will allow students to improve their command of the Spanish language at an advanced level. By activating communicative and discursive strategies, they will be able to achieve a fluent use of the oral, as well as of the written language, emphasizing linguistic correction and adequacy. Students will become capable of appropriately interpreting a wide variety of complex texts and produce descriptive, narrative, expositive, and argumentative texts autonomously and efficaciously in the target language. The materials provided throughout the course will incite an approximation to different cultural, political, and social aspects related to current issues of the Spanish-speaking world.

Credits: 03
Schedule: M W F 10
Room: STOKES HALL 361S
Satisfies Core Requirement: None
Comments: Conducted in Spanish. Elective for the Hispanic Studies major and minor. Satisfies Foreign Language Proficiency core requirement.
Prerequisites: SPAN2216. : Spanish CCR II, or a score of 5 on the AP Spanish Language Exam, or proficiency equivalent to students completing SPAN2216, to be determined by the Department.

SPAN339204
Advanced Spanish
MEZA-RIEDEWALD, LETICIA
Fall 2019
This course will allow students to improve their command of the Spanish language at an advanced level. By activating communicative and discursive strategies, they will be able to achieve a fluent use of the oral, as well as of the written language, emphasizing linguistic correction and adequacy. Students will become capable of appropriately interpreting a wide variety of complex texts and produce descriptive, narrative, expositive, and argumentative texts autonomously and efficaciously in the target language. The materials provided throughout the course will incite an approximation to different cultural, political, and social aspects related to current issues of the Spanish-speaking world.

Credits: 03
Schedule: M W F 1
Room: GASSON HALL 308
Satisfies Core Requirement: None
Comments: Conducted in Spanish. Elective for the Hispanic Studies major and minor. Satisfies Foreign Language Proficiency core requirement.
Prerequisites: SPAN2216. Spanish CCR II, or a score of 5 on the AP Spanish Language Exam, or proficiency equivalent to students completing SPAN2216, to be determined by the Department.
Corequisites: None
Cross-listed with: None
Frequency: Annually

SPAN339501
Contextos: Introduction to Literary Analysis in Spanish
CASTANO, MARTHA L
Fall 2019
Contextos introduces students to the analysis of a wide range of Hispanic texts, including genres such as poetry, narrative, drama, essay, and film. Special attention to written work and discussion allows them to become familiar with the concepts and terminology essential for original critical thinking.

SPAN660601
Truth, Memory, History: Interpretations of State Terror in Argentina
SHAMES, DAVID
Fall 2019
How is our understanding of the 1976-1983 military dictatorship in Argentina shaped by both 'objective' historical accounts and 'subjective' interpretations of life under this brutal regime? How do genres such as memoir, allegory, fable, and documentary complicate notions of historical truth? In this course, students will explore these questions by examining the legacies of state terror in Argentina through different literary and film interpretations of this period of political violence. Special attention will be paid to the different genres and forms used in the construction of these texts, the relationships between fiction, memory, truth, and history, and the ways in which interpretations of this period have changed over time. Course materials include fiction by Luisa Valenzuela, Alicia Borinsky, and Julio Cortazar, memoir by Jacobo Timerman, and films by Juan Jose Campanella, Juan Mandelbaum, and Maria Ines Roque.

**Warrior Women of Spain (Nineteenth Through Twenty-First Centuries)**

**TANG, WAN S**

**Fall 2019**

This course examines the portrayal of strong female figures in Spanish literature and film from the nineteenth century to the present. Beginning with the writings of outspoken nineteenth-century authors such as Concepcion Arenal and Emilia Pardo Bazan, we move towards literary and filmic depictions of female involvement in the Spanish Civil War, and feminist narrative of recent decades from authors such as Montserrat Roig and Almudena Grandes. This course focuses on the variety of ways in which literature and film have defied gender stereotypes.

SPAN661601
Latin America through Film and Film through Latin America
DELGADO-VELAZQUEZ, HUMBERT
Fall 2019
This course interrogates the ways in which sociopolitical and aesthetic movements in Latin America inform our understanding of the region's film culture from the twentieth and twenty-first centuries. Focusing on major works of Latin American cinema, students will engage film aesthetics in relation to a wide array of issues such as historical development or cultural identity. Students will learn to identify and problematize the multiple ways in which films create meaning through detailed analysis of the formal properties of cinema. To that end, we will study narrative and audiovisual techniques (camera movement, framing and composition of shots, angles and montage, sound, etc.) against the backdrop of Latin America's political and cultural history. Conducted in Spanish.

**Understanding Latinos: Cultural Productions in Search of Identity**  
**DEPT**  
**Fall 2019**  
This course analyzes the contemporary cultural production of the Latin American diaspora and the Latinx communities in the USA. It provides the historical context needed to adequately engage with present discussions about Latinx and diasporic subjects. Some of to be considered include, but are not limited to issues of identity, race, gender, immigration, citizenship, cultural integration, and human rights. The main objective of the course is to help develop an informed understanding of the roles and impact of Latinx communities in the formation of U.S. society. Course materials will include literature, paintings, media, artistic performances, cultural interventions, and more.

SPAN664801
Literature of Hispanic Migration in the Americas
BECKJORD, SARAH
Fall 2019
Conducted in Spanish. Fulfills pre-1900 requirement in Latin American literature for Hispanic Studies majors. Elective for Hispanic Studies and Latin American Studies Minors. Focusing on works in Spanish by Hispanic and Latino authors written in and about the territory known today as the U.S., we will investigate the topics of language, identity, and imperial competition, as well as belonging, boundaries, migration, and place. Readings will include works spanning the colonial to modern periods, including representative texts in chronicle, fiction, essay, music, and film. Lectures and class discussions will be devoted to close readings of the texts as well as an appreciation for the historical and cultural contexts in which they were produced, as we seek to grapple with questions of language and culture, coloniality and modernity, transculturation and assimilation in an increasingly global world. Satisfies Core requirement for: Cultural Diversity

**Heroic Paradigms of Early Modern Spain**

**RHODES, ELIZABETH**

**Fall 2019**

This course takes a historicist approach to the changing figure of the hero across Spain's imperial age (1492-1650), examining texts of multiple genres. An introduction to the period, it examines the role of the imagination in the production of and representation of history. Parallels with twentieth-century American imperial icons are encouraged: Amadeus de Gaula with Luke Skywalker, the literary shepherds with the hippies, the picaros (and picaras) with sports heroes, saints with rock stars, Baroque poets with inhabitants of the Matrix.

**Machos ibericos: (De)constructing Masculinity in Contemporary Spain**  
**TANG, WAN S**  
**Fall 2019**  
This course critically examines representations of masculinity in Spanish literature, television and film from the nineteenth to twenty-first centuries. Drawing upon sociological, psychoanalytical, and feminist theory, students will focus on the evolution of distinct masculine types that have permeated the Spanish imagination ranging from Zorilla's alpha male don Juan to Almodovar's gender fluid transexuals. Throughout the semester, the class will question the construction and legitimation of certain masculine models as a function of age, social class, race, and national identity.

Dreams of Reason: Literature of the Fantastic in Spanish America
BECKJORD, SARAH
Fall 2019
This course will examine the literary "fantastic" in Latin America, from its origins in the late nineteenth century to the internationally acclaimed works of the twentieth. From early tales of the supernatural and the "marvelous" to the later avant-garde fictions, writers of the fantastic seek new and authentic ways of representing the human condition. We will consider essays by some of the authors concerning the practice of the fantastic as well as comparative works from other traditions.

Hispanic Studies Courses: Spring 2020

SPAN101501
Elementary Spanish I
VARGAS ZULETA, LAURA
Spring 2020
This introductory course is designed for students with no prior Spanish experience as well as those who have had some high school Spanish. Elementary Spanish I provides a strong foundation in speaking, listening comprehension, reading, and writing as well as exploring the products, practices, and perspectives that are unique to Hispanic cultures. This course follows a communicative approach, which springs from the idea that languages are best learned when real-world information becomes the focus of student activities. Students interact in Spanish with the instructor and with classmates. By the end of this course, students should be able to successfully handle in Spanish a significant number of basic communicative tasks.

SPAN111505
Intermediate Spanish I
MIRETE HERNANDEZ, MARTA
Spring 2020
Intermediate Spanish I is the first course in the second-year sequence. It continues to develop and strengthen students' proficiency in the Spanish language as well as to increase their cultural understanding. Emphasis remains on the four skills and on critical thinking. Throughout the course, students develop fluency and accuracy, and focus on communication. They expand their vocabulary and enhance their understanding of essential Spanish grammar concepts. Short literary texts, cultural readings, and audiovisual materials provide opportunities to learn to appreciate cultural differences and impart authentic insight into the Hispanic world.

SPAN221501
Spanish Conversation, Composition, and Reading I
MCINTOSH, SHEILA E
Spring 2020
The main objective of this course is to consolidate students' skills so that upon successful completion of the sequence (CCR1 and CCR2) they will have acquired a proficient level of Spanish. Students will acquire discursive fluency and accuracy by working on the following skills: listening and reading comprehension, writing, speaking, and oral interaction. The course focuses on complex grammar topics and extensive vocabulary, as well as on expanding students' knowledge of cultural and historical aspects of Spanish speaking countries. Likewise, the course will foster students' analytical, critical, and creative skills in the target language through the use of a variety of authentic materials such as literary texts, newspaper texts, and audiovisual materials.

SPAN221606
Spanish Conversation, Composition, and Reading II
PERDOMO, AZLIN
Spring 2020
The main objective of this course is to consolidate students' skills so that upon successful completion of the sequence (CCR1 and CCR2) they will have acquired a proficient level of Spanish. Students will acquire discursive fluency and accuracy by working on the following skills: listening and reading comprehension, writing, speaking, and oral interaction. The course focuses on complex grammar topics and extensive vocabulary, as well as on expanding students' knowledge of cultural and historical aspects of Spanish speaking countries. Likewise, the course will foster students' analytical, critical, and creative skills in the target language through the use of a variety of authentic materials such as literary texts, newspaper texts, and audiovisual materials.

**Credits:** 03  
**Schedule:** M W F 3  
**Room:** STOKES HALL 361S  
**Satisfies Core Requirement:** None  
**Comments:** Conducted in Spanish

Since CCR2 is designed as a continuation of CCR1 we highly recommend it after successful completion of CCR1. Satisfies Foreign Language Proficiency core requirement.

**Prerequisites:** None  
**Corequisites:** None  
**Cross-listed with:** None  
**Frequency:** Annually

---

**SPAN339201**  
**Advanced Spanish**  
**PENAGOS, ADELA**  
**Spring 2020**

This course will allow students to improve their command of the Spanish language at an advanced level. By activating communicative and discursive strategies, they will be able to achieve a fluent use of the oral, as well as of the written language, emphasizing linguistic correction and adequacy. Students will become capable of appropriately interpreting a wide variety of complex texts and produce descriptive, narrative, expository, and argumentative texts autonomously and efficaciously in the target language. The materials provided throughout the course will incite an approximation to different cultural, political, and social aspects related to current issues of the Spanish-speaking world.

Room: STOKES HALL 133S
Satisfies Core Requirement: None
Comments: Conducted in Spanish. Elective for the Hispanic Studies major and minor. Satisfies Foreign Language Proficiency core requirement.
Prerequisites: SPAN2216. : Spanish CCR II, or a score of 5 on the AP Spanish Language Exam, or proficiency equivalent to students completing SPAN2216, to be determined by the Department.
Corequisites: None
Cross-listed with: None
Frequency: Annually
Spring 2020
This course is designed to give the student an opportunity to look at some fundamental philosophical issues regarding human nature and the origins and development of human thought from a fresh perspective. Unamuno's *Tragic Sense of Life* presents a critique of the rationalism of modern European thought by focusing on human life as dream, theater, and struggle. Octavio Paz, in *The Labyrinth of Solitude*, explores the meaning of human existence through the lens, or perhaps the mask, of the Mexican quest for identity at the end of the present century.

**Credits:** 03

SPAN660401  
Tradition, Counterculture, and Genre in Latin American Literature and Film  
SHAMES, DAVID A  
Spring 2020  
How can we rethink the global dimensions of 1960s/1970s counterculture by focusing on its manifestations in Latin American? In this course, students will explore texts from Latin America spanning genres such as Third Cinema, New Journalism and the rock and roll novel, which examine the possibilities and dead ends of different countercultural proposals. We will delve into the cultural and political contexts against which young Latin Americans were rebelling, and analyze themes of rebellition, repression, utopia, and exile in emergent youth culture. Readings include works by Jose Agustin, Cristina Peri Rossi, Gabriel Garcia Marquez, Elena Poniatowska, and Roberto Bolaño.

Credits: 03  
Schedule: M W F 11  
Room: CAMPION HALL 009  
Satisfies Core Requirement: None  
Comments: See Department for further details  
Prerequisites: Contextos (SPAN 3395) or concurrent enrollment in Contextos, or with permission of instructor. This course fulfills post-1900 Latin American requirement for major. It is conducted in Spanish.  
Corequisites: None  
Cross-listed with: None

SPAN661601  
Latin America through Film and Film through Latin America  
DELGADO-VELAZQUEZ, HUMBERT  
Spring 2020
This course interrogates the ways in which sociopolitical and aesthetic movements in Latin America inform our understanding of the region's film culture from the twentieth and twenty-first centuries. Focusing on major works of Latin American cinema, students will engage film aesthetics in relation to a wide array of issues such as historical development or cultural identity. Students will learn to identify and problematize the multiple ways in which films create meaning through detailed analysis of the formal properties of cinema. To that end, we will study narrative and audiovisual techniques (camera movement, framing and composition of shots, angles and montage, sound, etc.) against the backdrop of Latin America's political and cultural history. Conducted in Spanish.

**Credits:** 03  
**Schedule:** TH 3-5 20  
**Room:** LYONS HALL 315  
**Satisfies Core Requirement:** None  
**Comments:** Conducted in Spanish Fulfills post-1900 Latin American requirement for major Open to Seniors and by permission of the instructor

**SPAN662401**  
**Understanding Latinos: Cultural Productions in Search of Identity**  
**DELGADO-VELAZQUEZ, HUMBERT**  
**Spring 2020**  
This course analyzes the contemporary cultural production of the Latin American diaspora and the Latinx communities in the USA. It provides the historical context needed to adequately engage with present discussions about Latinx and diasporic subjects. Some of to be considered include, but are not limited to issues of identity, race, gender, immigration, citizenship, cultural integration, and human rights. The main objective of the course is to help develop an informed understanding of the roles and impact of Latinx communities in the formation of U.S. society. Course materials will include literature, paintings, media, artistic performances, cultural interventions, and more.

**Credits:** 03  
**Schedule:** T TH 10 30*  
**Room:** GASSON HALL 207
SPAN664501
Gender, Class, and Race in Modern Spain
GARCIA GUERRERO, ISAAC
Spring 2020
This course examines evolving notions of gender, class, and race in Spanish culture from the nineteenth century to the present. Drawing on a range of theories, from the ethnographical to the psychoanalytical, we will trace the evolution and representation of women and racial and social minorities in literature and visual culture. We will pay particular attention to how marginalized collectives reshape culture and nationhood. This course fulfills the post-1800 Peninsular requirement for majors.

Credits: 03
Schedule: M W F 2
Room: GASSON HALL 306
Satisfies Core Requirement: None
Comments: Conducted in Spanish. Satisfies the Post-1800 Peninsular distribution requirement
Prerequisites: With permission of the Instructor. Contextos or permission of instructor.
Corequisites: None
Cross-listed with: None

SPAN665501
Writing and Memory in the Andean World
BECKJORD, SARAH
Spring 2020
A survey of textual reconstructions of the Andean World from the histories of colonial times to nineteenth-century fictions of nation and community and twentieth-century debates. Readings will include works by authors such as Inca Garcilaso de la Vega, Guaman Poma de Ayala, Clorinda Matta de Turner, Manuel Gonzalez Prado, Ricardo Palma, and Jos Mara Arguedas.
SPAN667401
Dreams of Reason: Literature of the Fantastic in Spanish America
BECKJORD, SARAH
Spring 2020
This course will examine the literary "fantastic" in Latin America, from its origins in the late nineteenth century to the internationally acclaimed works of the twentieth. From early tales of the supernatural and the "marvelous" to the later avant-garde fictions, writers of the fantastic seek new and authentic ways of representing the human condition. We will consider essays by some of the authors concerning the practice of the fantastic as well as comparative works from other traditions.

Credits: 03
Schedule: T 3-5 20
Room: LYONS HALL 315
Satisfies Core Requirement: None
Comments: Conducted in Spanish. Fulfills post-1900 requirement in Latin American literature for Hispanic Studies Majors. Open to Seniors and by permission of the instructor
Prerequisites: By permission of instructor.

SPAN669201
The Gender Games, from El Cid to Almodovar
RHODES, ELIZABETH
Spring 2020
This course, whose title takes a cue from *The Hunger Games*, analyzes how culture "encourages" individuals to conform to a particular set of gender expectations at a given moment in history. Considering how texts of various genres and media represent what means to be "a man," "a woman," or someone who identifies with both or neither, we will analyze how various art forms respond to established gender norms to support or subvert them, from the Middle Ages through contemporary Spain. Experience with gender analysis helpful but not necessary.

Credits: 03
Schedule: null
Room: None
Satisfies Core Requirement: None
Comments: Conducted in Spanish. Fulfills pre-1800 Peninsular requirement for major.
Prerequisites: SPAN3395 Contextos and one other 6000 level course.
Corequisites: None
Cross-listed with: None
Frequency: Periodically
SPAN669501
Interpersonal Violence: Facts and Fictions in Hispanic Culture
RHODES, ELIZABETH
Spring 2020
This course does not pose Hispanic culture as more violent than any other; rather, it offers cultural and historic reasons to explain why and how certain forms of interpersonal violence manifest in great Hispanic art at particular moments in time. Using anthropological theories of interpersonal violence, the class analyzes a variety of texts, from the Middle Ages through Borges and Almodovar, that represent honor killing, mimetic desire, domestic/interpersonal violence, sexual violence, scapegoating, and "aesthetic" violence, such as terror-producing works. While these theories were designed without gender in mind, we will be emphasizing how gender inflects the production of violence as well as its consumption in the context of each. Class conducted in Spanish.

**HIST111701**  
Atlantic Worlds I, 1500-1800  
**MILLER, KAREN**  
**Summer 2019**
In this course, students examine the significance of developing global relationships, interdependencies, and tensions within and between societies in the Atlantic World between 1500 and 1800. The focus is on responses to religious, economic, and political changes in an increasingly diverse and "dis-integrated" world order of Western Europe, West Africa, and the Americas. As the "known worlds" of the Atlantic expanded, resisted, and attempted to accommodate changes brought about through religion, rights, and revolution over this 300 year period, our tasks are to examine what happened, why they may have happened, and how these changes were significant then and now.

**Credits:** 03

HIST754001
Twentieth Century Europe: Problems and Perspectives
PENDAS, DEVIN O
Summer 2019
Europe has never been a peaceful place. Yet even by low standards of that bloody continent, the twentieth century had a rather bad start. This makes the second half of the twentieth century all the more surprising, as Europe emerged from two world wars into a difficult, divided, but stable postwar period, one marked by integration and prosperity in the West and stagnation and repression in the East. This course will examine the political, cultural, and economic dimensions of Europe's dark century.

HIST781301
Graduate Colloquium: The Civil War Era in History and Memory
DELAHANTY, IAN G
Summer 2019
This course investigates the causes, course, and consequences of the American Civil War. Major topics include the expansion of African American slavery and growth of antislavery sentiment; the political crisis of the 1850s; soldiers' and civilians' experiences in the war; emancipation; and the debate over African Americans' political and social status during Reconstruction. Special attention is given to how public monuments, Hollywood, and historical museums have influenced Americans' memory of the Civil War era.

HIST781401
Modern Europe: Problems and Perspectives
JIMENEZ, FELIX A
Summer 2019
What has the role of Europe been in the modern world? This course will examine the best recent works seeking to integrate European and global history. Our goal will be to understand the place of Europe in the larger world by reading broad surveys and thematic works dealing with contemporary topics of relevance such as humanitarianism, neoliberalism, and migration. We will see how Europe mattered, but also understand the limits of a Eurocentric view of world history.

HIST100501
Asia in the World I
ZHANG, LING
Fall 2019
This Core course surveys the Asian origins of the modern world, from the rise of the Eurasian empire under the Mongols in the thirteenth century to the global colonial context of the Industrial Revolution in the eighteenth century. We will challenge common geographical (mis)conceptions (e.g., "East" versus "West") in historical narratives/uncover their origins and how they have changed. While emphasizing the global conjunctions in history, this approach highlights Asian experiences of the historical forces that integrated yet also divided the world in changing ways: trade routes, migrations, religions, empires, wars, ideologies, and the constraints of a shared ecological environment.

HIST101101
Atlantic Worlds I
STANWOOD, OWEN C
Fall 2019
This course surveys the history of the Atlantic world between the arrival of the Black Death in Europe in the mid-fourteenth century and the French Revolution at the end of the eighteenth century. We will pay particular attention to the ways in which the often violent encounters between people in this region of the world produced new social, cultural, and economic forms. Among these were ideas about gender, race, and the relationship between communities and individuals; notions of equality; and the emergence of a global system of trade.

HIST105501
Globalization I
WARNER, CATHERINE H
Fall 2019
The course explores the world-wide connections that are diminishing the significance of traditional geographical, cultural, and political boundaries. Global connections have increased rapidly in the past half-century, but global convergence has been a powerful force during the eight centuries covered by this survey. The year-long course examines three kinds of globalization: commercial, cultural, and political. While recognizing the Western world's expansiveness as a key force for globalization, the course gives extensive attention to how people from other continents have also been major agents in initiating, promoting, and resisting globalizing forces.

HIST108301
Globalization I
PEARSON, QUENTIN A
Fall 2019
Globalization is a fairly new term for the world-wide connections that are diminishing the significance of traditional geographical, cultural, and political boundaries. Global connections have increased rapidly in the past half-century, but global convergence has been a powerful force during the eight centuries covered by this survey. The year-long course examines three kinds of globalization: commercial, cultural, and political. While recognizing the Western world's expansiveness as a key force for globalization, the course gives extensive attention to how people from other continents have also been major agents in initiating, promoting, and resisting globalizing forces.

HIST109401
Modern History II
DELVAUX, MATTHEW C
Fall 2019
This course covers several centuries of time (1800 and after) and traces the political, social, economic, and cultural changes that created the modern world. Depending on the expertise of the instructor, different parts of the world may serve as focal points for examining the complex historical processes behind modern-day transnational relationships, values, and ideas. As part of the Core Curriculum, this course seeks to broaden students' intellectual horizons by exposing them to new places, periods, and perspectives.

HIST150501
Planet in Peril: The History and Future of Human Impacts on the Planet
SCHOR, JULIET; PARTHASARATHI, PRASANNAN
Fall 2019
The twenty-first century opened with crises of climate, bio-diversity, and eco-system functioning. In this class we address ecological overshoot from the perspectives of sociology and history, emphasizing the role of inequality, the state, inequality, and power. The course combines contemporary analyses with a long historical record of human impact, considering both the familiar and the novel in the realm of ecological challenges. We devote substantial attention not only to causes but to solutions. Topics to be covered include: the Columbian exchange, forests, agriculture, water, climate change, toxics, and population. Solutions include state policy, social movements, individual action, and social innovation.

HIST151101
Science and Technology in American Society
KENALEY, CHRISTOPHER P; JEWETT, ANDREW J
Fall 2019
What roles do science, technology, engineering, and mathematics (STEM) play in advanced, knowledge-dependent societies? This course examines our institutional and cultural relationship to innovation: hopes and fears about STEM, views of science and religion, conceptions of democracy's cultural requirements, the emergence of DIY and geek culture, and more. And it explores ethical questions around STEM, including debates over biotechnology, pharmaceuticals, climate change, and mass extinction. The course gives students the basic technical background to address these questions and an opportunity to imagine a technological application of their own for addressing the complex problems of the twenty-first century.

HIST170401  
The Worlds of Moby-Dick: What Historical Forces Shape a Book's "Greatness"?
QUIGLEY, DAVID  
Fall 2019  
As an Enduring Questions course (linked with ENGL1714), this course explores the historical contexts of Herman Melville's Moby-Dick. First published in 1851 as the United States hurtled toward civil war, the novel reflects the cultural, political, and economic fault lines of nineteenth-century America. We will read a range of texts that illuminate the histories of New Bedford, Manhattan, antebellum America, and the globalizing economy of the era.

HIST170501
Revolutionary Media: How Books Changed History
REINBURG, VIRGINIA
Fall 2019
The printing press changed the course of history in Europe and the Americas. This course centers on the book as a vehicle for the production and spread of ideas during the first three centuries of printing (1450-1800). By paying close attention to the material book and its makers--authors, printers, readers, and owners--we will explore some of the era's great political and cultural upheavals, especially the Reformation, scientific revolution, and revolutions in France, North America, Haiti. Such events appear as more intensely human and local when seen through the lens of printed books, their makers, and their readers.

HIST170601
How Democracies Die: A Historical Postmortem
TUMBLIN, JESSE C
Fall 2019
The historical component of this course will ask why many of history's most successful republics have turned into empires. It will consider several examples of this--Greece, Rome, Britain, France, the United States--across the past two millennia. Students will explore how people have grappled with this "imperial transition" in the past and how they have tried to accelerate or prevent it. Ultimately the class will consider whether this vicious historical cycle--from republic to empire and eventually to collapse--can be stopped, or whether it is hardwired into the principles of popular sovereignty.

HIST171301
Environmental Crisis: How Past Disasters Shape the Present
HEPLER-SMITH, EVAN
Fall 2019
Today's environmental challenges are the product of a history of crisis: industrial accidents, epidemics, extinctions, toxic chemical emissions, economic downturns, natural disasters, famines. This course addresses the global history of the science, technology, and politics of environmental crisis. Who has suffered most from environmental crises, and why? How have communities used arguments about environmental crisis to seek relief and justice—or power and profit—in the wake of disaster? We will learn how environmental crises have shaped and been shaped by specific social, cultural, and political contexts (including our own).

HIST171501
Citizenship, Immigration, and Belonging in the United States: Can Education Save Us?
OLIVEIRA, GABRIELLE; CASTRO SAMAYOA, ANDRES
Fall 2019
Why has the "build the wall" chant become so popular at political rallies throughout our nation? Beyond appeals to erect brick and mortar structures, how have legal policies shaped the mobility across state boundaries? Tracing the history of the (im)migrant paradigm in the United States, we focus on the role of legal, social, and individual factors that continue to politicize (im)migration in the United States. By focusing on migration as a historical and contemporary discourse, we explore a key question in this course: what can education do to address the chronic injustices derived from policing borders? As a student beginning your first year in college, this course is an opportunity to learn about a timely topic to examine how your college years can prepare you to enact change in the world.

**HIST171601**

**Geographies of Imperialism: History of Colonization**

**SHLALA, ELIZABETH H**

**Fall 2019**

The age of empires is past - or is it? In this course, we examine the enduring ideas of empires and their challengers through the present day, using the lenses of history and theology (Christianity and Islam). Beginning with the traditional geographies of maps, we explore how empires colonized not only territories with physical borders, but also bodies and minds, using race, gender, sexuality, ethnicity, education, laws and institutions. Using the British and French empires in the Middle East and North Africa as case studies, we will identify and question how to overcome the boundaries still imposed on people today.

HIST174501
Law and Adolescence: History of Childhood
None
Fall 2019
What differentiates childhood from adolescence? How have societies in the United States and Latin America defined shifting notions of childhood and adolescence, and how does law intersect with rites of passage? These paired courses will familiarize students with markers of mobility and incorporation and develop students' understanding of how legal regimes in Latin America and the United States define parameters of childhood, adolescence, and adulthood. Students will learn to recognize how legal regimes in the Americas define boundaries across the life course and the contradictions in how youths experience the emotional, legal, political, and cultural transition of coming-of-age.

Schedule: null
HIST182201
Core Topics: Europe from the Outside In
MATUS, ZACHARY A
Fall 2019
The story of how Europe emerged as a cultural-political entity is inextricably intertwined with the groups of people it feared, persecuted, and ridiculed. In this course, we will examine the history of Europe from the perspective of Jews, women, Muslims, heretics, the poor and disabled before moving to peoples encountered during European exploration. In so doing we will investigate the deep roots of contemporary hate and prejudice and ask uncomfortable questions about the basis of Western society. Students will learn to work with primary source documents and to question dominant narratives about Western civilization.

HIST183101
Core Topics: Colonial Latin America
SELLERS-GARCIA, SYLVIA M
Fall 2019
Anchored in close readings of primary sources, particularly the first-person accounts of contemporaries, this course considers the history of Latin America from the pre-contact period to roughly 1800. It follows the individual, communal, institutional, and national stories of transformation in order to understand how people in this region became "Latin American."

**HIST184101**  
**Core Topics: When Worlds Collide: From Contact to the Constitution**  
**LYERLY, CYNTHIA L**  
**Fall 2019**  
This course will examine North American history from the perspective of the collision and exchange of cultures and peoples. From the Mississippian Indian civilization at Cahokia to the Illinois, Iroquois, Algonkian, and other Native American peoples, we will see how Indians resisted, adapted, and interacted with French, English, Spanish, and Dutch Europeans. African peoples were another key part of this cultural collision, as hundreds of thousands were brought to North America in the slave trade. The course ends with the consolidation of white European power in the creation of the United States. Major themes in the course are race, power, and religion.

HIST184201
Core Topics: The Atlantic World and Environmental Change, 1450-1800
O'NEILL, KEVIN
Fall 2019
This course will explore the dynamic relationship between human activity and the natural world of the Atlantic (climate, topography, plants, animals, and microorganisms) 1450-1800. Topics will include the consequences of the Columbian Exchange, the creation of plantation societies, energy usage, technological change, and the emerging global economic system. Several core themes will be followed - including climate change, energy regimes, and food security. We will also consider the relationship between environmental change and more traditional historical topics such as the Reformation, the Enlightenment, and the Age of Revolution.

HIST205101
Modern China
MO, YAJUN
Fall 2019
This course will trace the history of China from roughly the year 1800 to the present, including the collapse of the imperial system, the rise of nationalism and new political ideologies, the forging of Chinese identity through war and revolution, and the gradual consolidation of the nation-state. The focus will be on the daily life of ordinary people, and their relationship to the family, the village/city, the environment, and the State; their connections with local, regional, and global economic and cultural networks; and their ethnic identity, religious practice, and gender relations.

HIST220101
Greek History
THATCHER, MARK R
Fall 2019
A study of the history of Greece from the Bronze Age in the second millennium BCE to the preeminence of Alexander of Macedon in the fourth century. The course will focus on such broad topics as the development of Greek social and political institutions, notions of justice, freedom, and Greek identity, relations among Greek city-states and with foreign nations, imperialism, the golden age of Greek literature, and the rise of Macedonian monarchy. Emphasis will be on the study of the ancient sources: literary, historiographic, archaeological, and epigraphic.

U.S. History I
RICHARDSON, HEATHER C
Fall 2019
A survey of the political, social, economic, and intellectual developments that have shaped and influenced the growth of the United States from a colonial appendage to a world power. The course seeks to provide a firm chronological foundation for the study of the American past but seeks to go beyond narrative and to provide analytical insights into the institutions, society, economy, and ideas upon which American civilization is founded. Consideration will be given to continuity, change, and conflict in American society.

HIST240601
This Land is Your Land: U. S. Environmental History
VALENCIUS, CONEVERY B
Fall 2019
How have different environments, places, and resources shaped American history? We will survey main themes and events in the environmental history of the United States. We move from colonial-era differences in land use through contemporary environmental debates. We ask how American communities have used, defined, and fought over places and natural resources, from bison herds to nuclear stockpiles. We investigate intriguing aspects of our local Massachusetts environment: the Emerald Necklace of parks, the brass hoof prints of Harvard Square, even our nearby reservoir. No background in history is necessary to thrive in this class. Students in the sciences are welcome.

HIST241101
U.S. Civil War and Reconstruction
VALENCIUS, CONEVERY B
Fall 2019
A hundred and fifty years ago, one part of the United States declared its independence as a separate nation. It almost succeeded. Why did Southern whites seek to secede and how did other Americans resist? What were the legacies of war, emancipation, and Reconstruction? We will investigate how agriculture, racial slavery, economics, environments, foreign relations, naval war, field tactics, and free and enslaved Americans shaped this wrenching upheaval. Through historical accounts, images, music, and discussion, we will explore the causes of the Civil War of 1861-1865, its military and social course, and its consequences for a bloodied and re-made Union.

**America's War in Vietnam**  
**JACOBS, SETH S**  
**Fall 2019**

This course will examine America's thirty-year military involvement in Southeast Asia, one of the most controversial episodes in U.S. history. Students will read a wide variety of primary and secondary sources, from recently declassified state and Defense Department documents to poetry and short stories. Course readings are selected from various points on the left-right political spectrum, with both "hawks" and "doves" receiving their day in court. Lectures will include the origins of the Cold War; the Eisenhower, Kennedy, Johnson, and Nixon presidencies; antiwar activism and other Vietnam era movements; and American soldiers' experience during and after service in Vietnam.

**HIST248101**  
**African-American History I**  
**MILLER, KAREN**  
**Fall 2019**

This two-semester survey examines the history and culture of African-Americans from the pre-colonial period to the present. The first semester treats the period before the middle passage, the evolution of slave and free society, the development of Black institutions, and the emergence of protest movements through the Civil War's end. During the second semester, the emphases are placed on issues of freedom and equality from Reconstruction, urban migration, and civil rights struggles through current consideration of race, class, and gender conflicts.

**HIST248701**  
**Race and Identity in African American History**  
**MILLER, KAREN**  
**Fall 2019**

This course examines and engages readings that reflect a variety of approaches to questions of racial identity and "American-ness" over time. Textual materials have been selected to illustrate both historical and literary treatments of "race" and "identity" within the context of the United States. How do individuals become conscious of themselves as "racial" beings and as national citizens? How do racial identities comport with other identities? How does racial identity influence or color one's sense of self and relations with others within and outside of one's race? How, ultimately, does race impact the study and writing of history over time?
HIST250201
Introduction to Feminisms
MURPHY, ANNALYSSA G
Fall 2019
This class will introduce students to terms and concepts that ground feminist theory and gender analysis, a range of issues that intersect with gender in various ways (e.g., nationalism and post colonialism, health, labor, sexuality, race, family), and some classic texts in Women's Studies. It will also combine a brief historical overview of the development of the first, second, and third wave of women's movements, with an examination of their critiques by women of color. Finally, we will follow selected stories in the news that bear on the themes of the course.

**HIST270201**  
**Colonial Pasts/Global Presents**  
**KENT, STACIE A**  
**Fall 2019**  
While scholars of globalization often proclaim the novelty of the present, historians have become suspicious that deeper connections exist between global, networked presents, and colonial pasts. In this course we will study a variety of colonial histories form the eighteenth and nineteenth centuries and investigate whether and in what ways that history remains with us today. Our examples will come from Euroamerican colonial empires, and topics will include commodity production and circulation, work regimes, labor migrations, gender and sex, development, science, medicine, and racial epistemologies.

HIST282601
Identity and Inequality in U.S. History
JEWETT, ANDREW J
Fall 2019
This course explores how people have understood group differences in the geographic space now occupied by the United States, with special emphases on race/ethnicity, sex/gender, and religion. We will examine how conceptions of collective identity have changed over time, from the first encounters of European colonizers and native peoples to the latest bombshells from the #MeToo movement. We will also look at national identity, tracing how attempts to discover or construct an American culture have intersected with assertions of sub-national and transnational identities.

HIST282901
American Political Thought from the Constitution to Trump
JEWETT, ANDREW J
Fall 2019
This course explores the shifting categories and frameworks through which Americans have understood their shared political world since the founding period. Topics include the influence on the Constitution of republicanism, Enlightenment thought, and Christianity; the nineteenth-century emergence of liberalism and socialism; the contours of pro-slavery and anti-slavery arguments; the effects of the Civil War and Reconstruction; the political battles of the Gilded Age and Progressive Era; the rise of New Deal liberalism; the influence of the Cold War; the upheavals of the 1960s; and the recent ascendance of conservatism.

HIST284501
Women in U.S. Medicine
TONN, JENNA A
Fall 2019
This course surveys the history of women in U.S. medicine from the colonial period to the present. We will consider both the changing place of women within the medical profession and the development of medical knowledge about women's health and disease. How have women practiced medicine as traditional healers, midwives, nurse, physicians, and caregivers? What is the historical relationship between women medical practitioners and the production of medical knowledge about the female body? We will pay particular attention to the structural inequalities within the American medical profession and healthcare system; intersectional approaches to women's history of medicine; and the important role that practitioners, feminists, and patients have played in challenging race and gender based discrimination in medicine as well as gendered assumptions about the female body.

Understanding the continued underrepresentation of women and minorities in STEM requires looking into the past. From Baconian natural philosophers and Victorian naturalists to the tech bros of Silicon Valley, this course uses historical methods to explore how ideas about sex and gender have influenced scientific research and how scientific communities have stratified along gender lines. Topics will include: women in science; girls, boys, and STEM education; gender and technology; biological theories of sex difference; and gender and science in politics, literature, and popular culture.

HIST288001
Drugs, Chemicals, and Health in Global History
HEPLER-SMITH, EVAN
Fall 2019
We live in a world full of synthetic chemicals: drugs, plastics, pesticides, high-tech materials, and countless other products that have transformed human lives and environments. This course will help you evaluate synthetic products and natural alternatives by uncovering the global history of chemicals and pharmaceuticals, from the nineteenth century through the present day. Have these products brought about "better living through chemistry" or toxic hazards? What makes something "natural" or "synthetic," anyway? Using methods from environmental history and science and technology studies, this course connects histories of chemical innovation and production, the positive and negative health effects of chemical products, and political controversies over chemical toxicity.

Study and Writing of History: Churchill--Reform, Empire, Economy, and War
CRONIN, JAMES
Fall 2019
Winston Churchill, the most famous British politician of the twentieth century, is known mostly for leading his country in the war against Hitler. In his long career he was also a reformer, a controversial finance minister, and a supporter of empire. The course will examine these various aspects and phases of Churchill's career. Churchill's career is extremely well-documented: by himself and by others. Students will use this material to write original papers on this historical figure.

HIST325601
Study and Writing of History: Odd Women to the New Women
ISMAY, PENEOPE G
Fall 2019
In the second half of the nineteenth century in Britain, it was discovered that 30% of women of marriageable age remained unmarried. Contemporary observers were alarmed, dubbing it the "redundant woman problem." They proposed shipping these "odd women" off to male-rich colonies. But in addition to proposals for emigration, a number of women started organizations to train these women in occupations that were respectable and could enable them to live independently. In this class, we will use women's magazines to explore why being single in this period was considered so dangerous and how this problem ultimately produced the "new woman."

HIST336401  
Study and Writing of History: Space before Google Maps: Geography and Power  
PICONE, MARIA DE LOS ANGEL  
Fall 2019  
The omnipresence of Google Maps in our lives has homogenized the way we think about space, or at least the way we find places in space. This course will look at how past societies visualized space and, particularly, what geographical space can tell us about power structures. Through a number of case studies from around the world, we will explore how historians incorporate geographical space to historical analysis, the sources they use, and the methodological questions they raise. After examining case students from the last two centuries, students will produce a research paper on a topic of their choice.

HIST404801
Women and Gender in Modern China
MO, YAJUN
Fall 2019
How have the Chinese defined what it means to be a proper "man" or a "woman"? How have these gender norms and ideologies shaped the life experiences and self-perceptions of individual men and women in modern China? How have they shaped Chinese social, political, economic, and cultural institutions? We will explore these questions by focusing primarily on Chinese women's lives--and the changes in shared social ideas about what women should do and be--from the mid-nineteenth century to the present. The central question animating the course is this: when we foreground gender as a category of analysis, how does history look different?

HIST415001
History of Modern Iran
BANUAZIZI, ALI
Fall 2019
This course will analyze the trends and transformations in the political, social and cultural history of Iran from the late nineteenth century to the present. Particular emphasis will be placed on the following topics: Iran's encounter with the West in the nineteenth century and its impact on the country's economy and society, social and religious movements in the nineteenth century; the causes and consequences of the Constitutional Revolution of 1905-1909, Iran's modernization and political development under the Pahlavis (1925-1979), the causes and consequences of the Iranian Revolution of 1979, and Iran's post-revolutionary experience as an Islamic Republic.

HIST421101
Roman Religion
ESHLEMAN, KENDRA J
Fall 2019
The Romans lived in a world full of gods; religion affected every part of Roman life, from politics to warfare to entertainment. Christianity took shape within this world, and Roman religion, especially the mystery cults, has often been regarded as a model for the early church. Yet the Roman concept of religion has very little in common with modern, Judeo-Christian-influenced notions. In this class we will explore the theory and practice of religion in the ancient Roman world, as reflected in ancient literary texts, as well as in epigraphic and archaeological evidence. Themes include the nature of Roman worship, from state cult to magic and mysteries, the interplay between religion and politics, and the development of Christianity in its pagan context.

HIST422601  
Protest and Revolt in the Early Modern World  
REINBURG, VIRGINIA  
Fall 2019  
This course explores forms of resistance to public authority in the early modern world (c. 1550-1800), in Britain, France, and their American and Caribbean empires. State power in this era was authoritarian and anti-democratic. So protests and revolts were dialogues about power: how it was held, how it could be challenged, how it ought to be used. We will study religious riots, grain riots, tax revolts, anti-monarchical rebellions, and slave revolts, and try to understand how groups fought for their rights and tried to make a better world. Also included will be forms of everyday subversion under hierarchical and racist regimes.

HIST424201
With God at their Side: Religion and World War I
RAFFERTY, OLIVER P
Fall 2019
The aim here is to look at religion as a factor in World War I and the part played by the various Christian Churches in the conflict. This will be examined from the respective viewpoints of all the belligerents. How much did religion figure in the lives of the ordinary combatants? Were there no atheists in the war? Did religious motivation vary among social classes and national groups? What were the peculiar difficulties, for example, in French and Italian religious participation in the war? Although the course will primarily concern itself with Christianity some consideration will be given to Islamic and Jewish perspectives.

A Hard Class with Difficult Books
BOURG, JULIAN E
Fall 2019
If you made it from the course title to this description, then you are curious. And if you are an inquisitive person, then you should take this class: a history of ideas based on some of the most important and influential writings of all time, such as Henry David Thoreau’s Civil Disobedience, Lewis Carroll’s Alice’s Adventures in Wonderland, Franz Kafka’s The Trial, John Hersey’s Hiroshima, and Frantz Fanon’s Black Skin, White Masks. We will read serious books closely, discuss them deeply, and connect them to our lives. Are you up for the challenge? What else is college for?

HIST429501
The End of History
CRONIN, JAMES
Fall 2019
The ending of the Cold War and the collapse of socialism prompted a lively and intense debate about "the end of history." This course will investigate how such a strange notion could have arisen and attracted such serious attention, and whether this debate has any continuing effect on historical understanding and interpretation. More specifically, does it retain any useful meaning more than a decade after the end of the Cold War and in the aftermath of September 11? Major events that led to the idea will provide perspectives with which to assess its relevance to the post-Cold War world.

HIST429801  
The Soviet Experiment  
EATON, NICOLE M  
Fall 2019  
This course follows the rise and fall of the world's most influential socialist experiment. Combining lectures and discussions, the course explores the nature of the socialist revolution, the rapid and brutal transformation of city and countryside, the role of terror and belief in Soviet communism, the tragedy of the Second World War and ultimate victory, the Cold War, the collapse of communist regimes in 1989, and the fate of the Soviet successor states.

HIST437301
Latin America between Fact and Fiction
SELLERS-GARCIA, SYLVIA M
Fall 2019
Departing from Edmundo O'Gorman's notion of Latin America as an "invented" place, this course considers how the region has been imagined, distorted, and revised many times over hundreds of years. Focusing on a handful of moments or episodes from the colonial period to the twentieth century, we will read fiction, witness accounts, primary sources, and historical renderings. Our objective will not be to pin down the "facts," but to see what we can learn by examining diverse versions of the past alongside one another.

HIST440501
Colonial North America
STANWOOD, OWEN C
Fall 2019
This course covers the history of North America during the era of European colonization, roughly 1550-1800. Our focus is the process of colonization itself: the attempts by various Europeans to build new communities and societies. We begin with exploration and analyze the rationale behind colonization. The course will compare Spanish, French, English, Dutch, and Russian colonial projects, examining how colonists dealt with each other, their native and African neighbors, and the North American environment. Our task is to examine how all these peoples created a new world that was neither European nor American, but an odd hybrid of several cultures.

HIST444101
A Nation of Immigrants? U.S. Immigration History to 1924
OH, ARISSA H
Fall 2019
In this course we will study the patterns, drivers, and consequences of migration to and within the United States from the colonial era to 1924. We will examine the rise of immigration and citizenship policies, and how westward expansion, imperial projects, and wars of conquest impacted who came, how they came, and how they lived in U.S. society. Using a broad array of sources, we will consider how these movements shaped--and were shaped by--ideas of race, class, gender, citizenship, and national identity.

HIST446001
Reel Life: America's Workers in History and Film
JOHNSON, MARILYNN
Fall 2019
This course explores the history of working-class America through history and film. Focusing on the twentieth century, we'll look at the changing American workplace and how different groups of workers - immigrants, African Americans, and women - experienced it and organized for change. At the same time, we'll also examine the "production" of history through film, assessing popular representations of workers from Charlie Chaplin's "Modern Times" to recent films about migrant labor and the globalization of work.

HIST448501
History of Medicine and Public Health in the African Diaspora
SUMMERS, MARTIN A
Fall 2019
This course examines the historical relationships between race, medicine, and health care from the era of New World slavery to the age of AIDS. In doing so, we will pay particular attention to the role of ideas of racial difference in the production of medical knowledge, the historical persistence of racial disparities in the delivery of health care, and folk and professional healing within the African American community.
HIST449501
U.S. Foreign Policy I
JACOBS, SETH S
Fall 2019
This course is the first half of a two semester survey of the history of U.S. foreign relations from the Revolutionary War through the present day. Students will examine conflicting interpretations of America’s role in the world and trace how that role has changed as the nation grew from thirteen isolated, parochial communities on the Atlantic coast to the greatest military and economic superpower in history. Important topics include the territorial expansion of the American empire, the development of - and debate over - constitutional powers, and the struggle for American markets in Asia and elsewhere.

HIST480401
Divided Korea
HWANG, INGU
Fall 2019
The Korean Peninsula has remained one of the most internationally contested areas since its division in 1945. This course explores the local and international political conditions that led to the ideological split between the communist North and the capitalist South and its subsequent consolidation into two fiercely opposed regimes over the course of the Cold War and post-Cold eras. Using a combined chronological and thematic approach, this course will address the political, economic, social, and cultural impact of this division on Koreans and on the world.

**HIST482601**  
**A Day in History and Memory: Bloody Sunday, Northern Ireland, 1972-2010**  
**BEINER, GUY**  
**Fall 2019**  
On 30 January 1972, a British paratrooper unit opened fire on a protest march for civil rights in Derry/Londonderry. The events of that fatal day became a foundational moment for the Northern Irish conflict and their repercussions continued to reverberate over subsequent decades. In 2010, following a comprehensive investigation inquiry, UK prime minister David Cameron issued a public apology. This course offers a multi-perspective "cubist" exploration of the charged history and memory of "Bloody Sunday" and its many meanings by examining a range of sources, including state documents, legal reports, media reportage, photography, personal testimonies, poetry, songs, fiction, drama, film, visual art and commemorative practices.

HIST519201
Senior Colloquium: Environmental History
ZHANG, LING
Fall 2019
Since the 1970s, the field of environmental history has evolved through several stages. At every stage, it encountered new theoretical challenges, adopted new methodologies, embraced new research possibilities, and thus allowed itself to expand toward broader horizons. This course leads students to experience various transformations of environmental history by reading several classic texts. We will begin with traditional historical critiques from the perspectives of political economy and political ecology, then move to interdisciplinary inquiries strongly informed by natural science, and end with the recent developments in multi-species ethnography, materiality studies, and post-humanist thinking from social science

HIST528101
Sr. Colloquium: Nazism and Stalinism
EATON, NICOLE M
Fall 2019
This senior colloquium will engage in a comparative study of the politics, society, and cultures of Nazi Germany and the Soviet Union under Stalin. Students will read works on governance, modernization, culture and everyday life, gender and sexuality, wartime encounters, genocide, and historical memory, and will focus on the similarities between the two regimes (the leadership cult, role of the party, mobilization of the masses, and erosion of boundaries between the private and the public) and the differences (the relationship between state and society, dynamics between inclusion and exclusion, and the role of violence in constructing social utopia).

HIST550801  
**Making History Public: Textiles as Text**  
FLEMING, ROBIN  
Fall 2019

Using the McMullen and other New England museums' collections of late-Roman textiles from Egypt, we will research and design a public exhibit, which will show the ways in which these extraordinary artifacts can be used to uncover the history of Late Antiquity's religious beliefs and educational system; ideas about the body, privacy, and death; notions concerning social class, gender, and magic; and the continuation of Classical traditions under Islam. The results of our efforts will be a public exhibition in Stokes Hall in spring 2020.

**Credits:** 03  
**Schedule:** TH 3-5 25  
**Room:** STOKES HALL 103N  
**Satisfies Core Requirement:** None

HIST790101
Colloquium for Master's Degree Students
MATUS, ZACHARY A
Fall 2019
This graduate colloquium is required for first and second year master's degree students in history. In it, we will explore the basics of a career as a professional historian, exploring the concepts of history, historiography and theory, and practicing how to conduct research, write a variety of historical pieces, teach, design courses, and create museum exhibits. We will also look at how to apply the skills used in graduate school to finding a future either in the academy or as an #altac.

Credits: 03

HIST800001
Colloquium: Introduction to Doctoral Studies
PENDAS, DEVIN O
Fall 2019
This graduate colloquium is required for and limited to first-year doctoral students in history. The course will explore a range of theoretical and methodological approaches to the study of the past. Exemplary works from a range of regional historiographies will constitute a significant portion of the course reading. The course aims to introduce entering students to central traditions and debates in the discipline.

HIST821001
Graduate Seminar: Medieval History
FLEMING, ROBIN
Fall 2019
Students in this seminar will write original research papers on some topic in medieval social, economic or political history. The topic will be one upon which the student and professor have agreed, and will be based primarily on original sources. Students will not only be required to write a paper, but to read and critique all papers written in the seminar. The final paper will be a polished and rewritten piece incorporating the critiques of the professor and other graduate students in the seminar.

HIST100601
Asia in the World II
MO, YAJUN
Spring 2020
This course examines Asia in the shaping of the modern world, from competing definitions of empires circa 1800 to the rise of the notion of the twenty-first century as a "Pacific Century." It investigates the definition(s) of Asia as a world region, explores transnational interactions, and emphasizes Asians as historical actors via written, visual, and aural sources. Events are placed in the context of key historical paradigms, including varying definitions of modernity, the rise of the nation-state, the birth of mass politics, new mechanisms of war, the language of self-determination, changing views of gender, shifting types of media/consumption, etc.

HIST105501
Globalization I
DEPT
Spring 2020
The course explores the world-wide connections that are diminishing the significance of traditional geographical, cultural, and political boundaries. Global connections have increased rapidly in the past half-century, but global convergence has been a powerful force during the eight centuries covered by this survey. The year-long course examines three kinds of globalization: commercial, cultural, and political. While recognizing the Western world's expansiveness as a key force for globalization, the course gives extensive attention to how people from other continents have also been major agents in initiating, promoting, and resisting globalizing forces.

HIST109301
Modern History I
DELVAUX, MATTHEW C
Spring 2020
This course covers several centuries of time (prior to 1800) and traces the political, social, economic, and cultural changes that created the modern world. Depending on the expertise of the instructor, different parts of the world may serve as focal points for examining the complex historical processes behind modern-day transnational relationships, values, and ideas. As part of the Core Curriculum, this course seeks to broaden students' intellectual horizons by exposing them to new places, periods, and perspectives.

**HIST151101**

**Science and Technology in American Society**

KENALEY, CHRISTOPHER P; JEWETT, ANDREW J

**Spring 2020**

What roles do science, technology, engineering, and mathematics (STEM) play in advanced, knowledge-dependent societies? This course examines our institutional and cultural relationship to innovation: hopes and fears about STEM, views of science and religion, conceptions of democracy's cultural requirements, the emergence of DIY and geek culture, and more. And it explores ethical questions around STEM, including debates over biotechnology, pharmaceuticals, climate change, and mass extinction. The course gives students the basic technical background to address these questions and an opportunity to imagine a technological application of their own for addressing the complex problems of the twenty-first century.

**Credits:** 03

**Schedule:** M W F 2

**Room:** STOKES HALL 195S

**Satisfies Core Requirement:** History II, Natural Science

HIST151301
EBEL, JOHN E; VALENCIUS, CONEVERY B
Spring 2020
This course explores U.S. energy. From the perspectives of history, culture, technology, engineering, and foreign policy, we ask how we have created and distributed energy in the past, how energy systems function in the present, and how they may evolve. We investigate energy production, distribution, and use—coal, oil, nuclear power, hydropower, wind, and solar power—along with cables, pipelines, and transmission systems. Through hands-on exercises and field trips, students learn how past technological and economic choices shaped current U.S. energy systems, how energy systems affect the environment, and how sustainable energy systems will be in the future.

HIST171001
Nature and Power: Making the Modern World
ZHANG, LING
Spring 2020
How have we humans changed the environment by clearing forests, farming crops, damming rivers, inventing railways, building bombs, and other transformative activities? How have our aesthetics, values, ideologies, and knowledge shaped the ways we interact with the natural world? By comparing historical cases from Asia, Europe, and America during the past four hundred years, this course takes students onto a journey across historical space and time to observe how human relations with the environment gave birth to our modern world.

HIST171701
Shop-Apocalypse: Consumer Culture's Past and the Fate of the Planet
FLEMING, ROBIN; SCHOR, JULIET
Spring 2020
Although we are increasingly aware that our habits of consumption affect the environment, it is hard to imagine that consuming patterns are capable of being changed. In this class, students will learn that practices of consumption are both socially and historically constructed, that they change dramatically over time, and that there are (and always have been) urgent moral issues connected to practices of consumption. We will explore the global, social, and environmental dimensions of consumption, studying things like the 1897 Sears catalog, 1950s television shows, Canada Goose jackets, DIY manuals and makerspaces, and hippy cookbooks of the 1960s.

HIST174501
Law and Adolescence: History of Childhood
ZUNIGO NIETO, CARLOS GERAR
Spring 2020
What differentiates childhood from adolescence? How have societies in the United States and Latin America defined shifting notions of childhood and adolescence, and how does law intersect with rites of passage? These paired courses will familiarize students with markers of mobility and incorporation and develop students' understanding of how legal regimes in Latin America and the United States define parameters of childhood, adolescence, and adulthood. Students will learn to recognize how legal regimes in the Americas define boundaries across the life course and the contradictions in how youths experience the emotional, legal, political, and cultural transition of coming-of-age.

Credits: 03
Schedule: T TH 9*
Room: STOKES HALL 107S

HIST184301
Disease, Inequity, and Power: Epidemics in Modern History
SUMMERS, MARTIN A
Spring 2020
This course uses some of the major disease epidemics over the past 250 years to explore various historical developments in the modern world, all of which have had important political, social, and economic implications for us today. Topics in the course include: smallpox and conquest in the Americas; cholera and industrialization; tuberculosis and (im)migration; yellow fever and imperialism; the Spanish flu and total war; and HIV/AIDS and globalization. Although the course will focus on the U.S. it will occasionally bring in examples from other global regions for the purpose of comparative analysis.

HIST204501
A Material and Cultural History of Food in China
ZHANG, LING
Spring 2020
This course studies historical continuity and changes of dietary traditions and culinary practices in China. We will examine how certain foods gave possibilities to and conditioned China's cultural formation and, in return, how food and ways of eating are culturally, socially, and politically constructed. The course's themes include food and religion in early China, food and Chinese medicine in the early medieval, food exchanges with central Asia, food and urbanization during the "Medieval Economic Revolution," the New World food in late imperial China, regional culinary and cultural diversities, and eating in globalized, modern China.
HIST22501
Ancient Medicine
ESHLEMAN, KENDRA J
Spring 2020
This course introduces students to the practice and theory of medicine in ancient Greece and Rome, from the archaic world of Homer (eighth century BCE) to late antiquity and early Christian healing practices. Themes will include shifting understandings of health and the body, revolutions in knowledge of human anatomy and physiology, ethical controversies over human and animal dissection, influential theories of pathology, psychology, pharmacology, and nutrition, the intersection of medicine and religion, and ancient ideas about doctors' responsibility, which, via the Hippocratic Oath, are still with us today. Students interested in history and literature will gain a richer sense of the importance of medicine in ancient society, and its connections to religion, magic and philosophy. Students from a medical and scientific background will discover how perceptions of the body have changed over time and from culture to culture.

Science before the Scientific Revolution
MATUS, ZACHARY A
Spring 2020
The advent of modern science in the western world was never a necessary outcome of Western intellectual activity. Yet histories of science frequently spin a tale of intellectual progress leading inexorably to scientific thinking (and hint at brighter futures to come). This course examines the technologies and philosophical tools that would give rise to science, but with an eye to their historical contexts and their many non-scientific aspects. We especially will focus on how pre-modern medicine, astronomy, and alchemy relate, or do not, to their modern counterparts.

HIST225701
Rule Britannia: The British Empire from Beowulf to Brexit
TUMBLIN, JESSE C
Spring 2020
At the height of its power, the vast British Empire covered one-fifth of the earth’s land mass—an empire upon which the sun quite literally never set. Studying how this empire was made, then, is a study of the making of globalization. This course will explore the origins, rise, decline, and fall of the British Empire to the present day. Students will uncover the tensions beneath history’s greatest engine of liberty and domination, prosperity and exploitation, progress and destruction.

HIST248201  
African American History II  
MILLER, KAREN  
Spring 2020
The two-semester survey examines the history and culture of African-Americans from the pre-colonial period to the present. The first semester treats the period before the middle passage, the evolution of slave and free society, development of Black institutions, and emergence of the protest movements through the Civil War's end. During the second semester, the emphases are placed on issues of freedom and equality from Reconstruction, urban migration, civil rights struggles through current consideration of race, class, and gender conflicts.

**Focus on Civil Rights: The Montgomery Bus Boycott**

**MILLER, KAREN**

**Spring 2020**

This course dissects the 382-day bus boycott by Montgomery, Alabama's black residents. Though not the first protest of its kind, it introduced two iconic figures to the national stage: Martin Luther King, Jr. and Rosa Parks. Four simple questions provide the foundation for the class, but the answers are unexpectedly complicated: What "law" did Parks violate? Why did Montgomery's black residents rally around Parks' 1955 arrest? How did Rev. King become the boycott's "voice" and "face," even though he was a relative newcomer to the city? How did this lengthy boycott change Montgomery's black community in the short term?

HIST250201
Introduction to Feminisms
MURPHY, ANNALYSSA G
Spring 2020
This class will introduce students to terms and concepts that ground feminist theory and gender analysis, a range of issues that intersect with gender in various ways (e.g., nationalism and post colonialism, health, labor, sexuality, race, family), and some classic texts in Women's Studies. It will also combine a brief historical overview of the development of the first, second, and third wave of women's movements, with an examination of their critiques by women of color. Finally, we will follow selected stories in the news that bear on the themes of the course.

HIST270301
Is All Commerce Capitalism? Global Histories of Production, Exchange, and Power
KENT, STACIE A
Spring 2020
Adam Smith famously wrote of "a certain propensity in human nature...to truck, barter, and exchange." Less than a century later Karl Marx observed that capitalism "cannot exist without constantly revolutionizing...the whole relations of society." This course examines both these propositions, asking what role exchange has played in human societies and in what sense capitalism is revolutionary. We study a global range of ancient, medieval, and modern trade networks, modes of production, and social meanings in and around exchange. We investigate connections trade fostered and where power inhered in the production, distribution, and consumption of goods.

HIST282501  
Sports in U.S. History  
MOGAN, THOMAS  
Spring 2020
Noted author and professor Gerald Early once wrote, "Sports may be among the most powerful human expressions in all history." The above statement lends credence to the notion that sport has become an integral part of the social, cultural and political fabric of the United States. An examination of sport as an important social institution reveals a number of complex social and economic issues that warrant further discussion and evaluation. This course will examine how the institution of sport has reflected broader changes in American society from a historical perspective. Special focus will be placed on the relationship of sport to race, class, and gender; issues of economics, consumerism, urbanization and the media will also be considered. As such, we will be especially concerned with the experience of certain groups and individuals that have been associated with and affected by sports throughout the history of the United States.

HIST284001  
World War I  
TUMBLIN, JESSE C  
Spring 2020
A century on from a war that ravaged populations across the globe, radically altered international politics, and changed the landscape of philosophy and culture, nations and historians are still trying to make sense of what happened. In this course we will explore some of the classic historical problems of the First World War, such as how it started and what its aftermath wrought, but we will also examine the war's deeper impact--how did the memory of the war shape subsequent generations? How has its legacy complicated the development of the Middle East and Asia through the twentieth century? Finally, we will investigate the efforts of the belligerent nations to commemorate the war's 100th anniversary from 2014-2018 as an example of how World War I, then and even now, shapes national identities.

HIST285401
Colonial Korea and its Legacies
HWANG, INGU
Spring 2020
This course explores Korea's experience under Japanese colonial rule (1910-1945) as well as how this experience was remembered and represented in the post-colonial era. Students will explore the three phases of Japanese rule: military rule (1910-1919); cultural rule (1919-1931), and wartime mobilization (1931-1945) and how each of these phases have shaped and continue to shape Korean national identity and politics, socioeconomic development, and memory culture. The course draws on historical and literary texts as well as film and other visual sources. This course combines lecture with active student discussion and presentations.

HIST312001
Study & Writing: The Arabian Nights from Bagdad to Hollywood
SAJDI, DANA
Spring 2020
The seminar will examine the history of the famous Arabic popular oral romance, A Thousand and One Nights (Arabic, alf layla wa layla), from its earliest Indian roots to its passage in Iran, to its incubation in medieval Baghdad, Damascus and Cairo, to its "discovery" by Victorian gentlemen, to its consumption all the way from Hawaii to Japan, to its adaptation to music, dance, film, and painting, to its production as a play here at BC this semester! Underlying the movement of the "Arabian Nights" from a regional Arabic popular romance to world literature is the colonial project. Thus, the history of The Arabian Nights from Baghdad to Hollywood touches on a wide range of important issues, including oral and written cultures, literary transitions to modernity, gender and sexuality, Orientalism, the colonial encounter, and the post-colonial condition. Students will learn how to treat different media of representation as sources for history and to discover in these cultural products clues, myths, and testaments relating to politics, society, and economy.

HIST327001
Study and Writing of History: The Global History of Emotions
ZUNIGA NIETO, CARLOS GERAR
Spring 2020
We live in an era of angry voters and weeping celebrities, and this has rendered the collective shaming of individuals via social media rather ubiquitous. This new era of public emotion has coincided with the emergence of the study of the history of emotions, which has gradually become an established field in the humanities. Drawing on readings across time and space, the course will familiarize students with the methods and results of emotions as a new approach to history. Students will develop an understanding of the history and meanings of homesickness, shame, disgust, nostalgia, anger, anxiety, hate, love, and passion.

HIST328101
Study and Writing of History: Gender and Genocide in Europe
EATON, NICOLE M
Spring 2020
This course introduces students to the practice of history through intensive reading, research, and writing about the ways in which the concept of gender can be used to understand genocide and other mass violence. By focusing on case studies in twentieth-century Europe, students will explore how masculine and feminine roles shape women and men as victims, perpetrators, and bystanders. Through reading historians' interpretations and primary source documents, students will develop an independent research project and produce a 25 page paper based on original research.

HIST336301
History through Memoir of Latin America
SELLERS-GARCIA, SYLVIA M
Spring 2020
This course considers the history of Latin America, from the colonial period to the twentieth century, through memoir. At the heart of the course are two themes: identity and evidence. On the one hand, memoirs reveal how authors construct their individual identities; on the other hand, they reveal how authors imagine and construct the national/imperial identities. Memoirs also raise questions about methodology, in particular, questions relating to evidence. How do authors remember the past? How do they change it when they write about it? To what extent are memoir writers more or less reliable as authors of history?

HIST348501
Study and Writing of History: America in the 1960s
JACOBS, SETH S
Spring 2020
This course aims to introduce one of the most idealistic, dynamic, and turbulent periods in American history. Reviewing the 1960's both chronologically and thematically, it explores the significant political, foreign policy, social, and cultural events and issues that shaped the era, from the 1960 Greensboro sit-ins and presidential campaign to the high tide of women's liberation and American withdrawal from Vietnam in 1973.

HIST402201
Human Rights and Democratic Transitions in Korea
HWANG, INGU
Spring 2020
This course introduces students to the historical evolution of human rights talk, activism, norm, and politics during the democratic transition in Korea. Who appropriated the language of human rights? Why did they do so? How did local causes and issues become global human rights issues or vice versa? How did human rights language, ideas, norms, and practices affect domestic and international politics on socio-economic, political, and cultural issues in Korea? Along with these questions, this course will examine multilateral and contentious interactions between global and local state and non-state actors. In paying attention to the role of human rights, the course discusses a series of crucially interrelated topics on self-determination, economic development, political liberalization, humanitarianism, and global justice during the Cold War and post-Cold War period.

HIST407601
Democracy Movements and Contemporary China
MO, YAJUN
Spring 2020
This course explores the Tian'anmen Movement as event, experience, and memory. It engages students to examine the rapid and often destabilizing shifts in China since the late 1970s—a period conventionally referred to as "the reform era." Using a variety of readings on the movement (including memoirs, official documents, propaganda, media coverage, and cultural productions in music and art), we will trace the effects of China's earlier experiment with revolutionary socialism on the market-driven present, attending to ways in which the past shapes and haunts the contemporary situation.

HIST412301
Gender, Sexuality, and Power in the Ottoman and British Empires
SHLALA, ELIZABETH H
Spring 2020
In this course, we will utilize the concept of gender as an analytical tool within the history of empires. We will cover gender theory, the construction of gender identity (male and female), sexuality, power, politics, and culture. To understand how gender functioned within empire, we will undertake a comparative analysis of two of the greatest empires in the world--the Ottoman Empire and the British Empire. We will investigate the ways that race, religion, and class shape women's and gender imperial history.

HIST413001
Islam and Christendom: Renaissance to Revolution, 1400-1800
BRAUDE, BENJAMIN
Spring 2020
Despite the assumption of an abiding abyss between Islam and the so-called West, the civilizations of Christendom and the Islamic world have developed paradoxically in close albeit, at times, conflicting parallel. This was particularly true in the Mediterranean world during the early modern period. This course demonstrates that the major historical developments from this period such as the Renaissance, Exploration, Expansion, Exploitation, the Reformations, state-building, and the Enlightenment can best be understood if they are set in the widest cultural context. It concentrates on how the intertwining of Christians, Muslims, and Jews shaped this era.

**HIST413401**  
**The Ottoman Empire, 1300-1924**  
**BRAUDE, BENJAMIN**  
**Spring 2020**

The Ottoman Turks founded an empire spanning the three continents of the eastern hemisphere and enduring for nearly three-quarters of a millennium. Despite nomadic origins they established a stable political structure, which grafted the high traditions of Islamic culture onto an ethnically, linguistically, and religiously diverse society. This course explores the evolution of this remarkable enterprise from its origins on the frontiers of Byzantium and Islam through its heyday under Suleyman the Magnificent to its military decline and first steps toward reform.

HIST420201
The Culture of Athenian Democracy
HOFFMAN, GAIL L
Spring 2020
A political and cultural history of Athens during the creation and height of its democracy (circa 480-400 B.C.E.). The course will consider the Persian Wars and their effect on political and constitutional developments in Athens, the workings of the Athenian Democracy under Pericles, and the eventual collapse following the Peloponnesian War. Readings in translation include Thucydides, Plutarch, Aristotle, Xenophon, Plato, and the Greek playwrights (Aeschylus, Sophocles, Euripides, and Aristophanes). Emphasis will be on integrating historical, literary, and archaeological evidence to provide as complete a picture as possible of this dynamic period of ancient history.
Animals
MATUS, ZACHARY A
Spring 2020
Animals--as pets, food, victims, endangered species or exhibits--traditionally have been defined by their relationship to human beings. Those relationships, however, change over time and do not always presuppose the animal's biological reality. Hence people put pigs on trial for murder, kept weasels to control the population of basilisks, and made a dog into a saint. This course examines the history of animals until the cusp of the modern age through four themes: the science of animals, the utility or danger of animals in agrarian life, laws pertaining to animals, and the religious symbolism and power of animals.

HIST423001
The Age of the Renaissance
ROSS, SARAH
Spring 2020
During the late fourteenth century, Europe was attacked by the Four Horsemen of the apocalypse: Disease, War, Famine, and Death. In the face of widespread catastrophe, men and women began to seek stability and truth in new ways, within and beyond the confines of state and church. The sum of the many solutions they found is what we call the Renaissance (1350-1650). This course introduces students to cultural and intellectual developments in Italy and Northern Europe, as well as European encounters with the New World.

**HIST424901**  
**Sex, Sexuality and Gender in the West**  
**CAVALLARI, JASON R**  
**Spring 2020**  
An integral part of the human experience, sex, sexuality and gender have repeatedly been dissected, defined, evaluated, feared and celebrated. In the process, these topics have also become central to questions of identity, history, politics and culture. Through reading and discussion of primary and secondary texts, this course introduces students to the multiple and conflicting roles that sex, sexuality, and gender have played in modern Western societies from the eighteenth century to the present. Topics include the critical examination of gender and its construction; the social control of "deviant" sexualities; notions of sex and the historical construction of sexual identity; sex, sexuality and gender in public discourse; and queer theory in historical practice.

HIST427401
Eighteenth-Century Ireland
O'NEILL, KEVIN
Spring 2020
Ireland experienced dramatic and often violent social, economic, and political changes as its place within the British political system and Atlantic culture emerged. These global changes coincided both with the emergence of a vibrant colonial culture represented by figures such as Jonathan Swift, Richard Brinsley Sheridan, and Edmund Burke, and a persistent indigenous culture, outside the view of Anglo culture. This course will explore the interaction of Anglo and Gaelic Irish and the major historical events of the period: the emergence of the Penal system, colonial nationalism, republicanism, the Revolution of 1798, and the Act of Union.

HIST428101
Film, Media, and Modern Ireland
SAVAGE, ROBERT J
Spring 2020
This course will use a variety of sources, including feature and documentary film, to address the transformation of twentieth century Irish society. Students will work with an array of primary and secondary sources to consider how the development of an indigenous film industry and an electronic media challenged and ultimately undermined a conservative political, cultural, and religious consensus that dominated life in post-independence Ireland.

HIST428901
A Hard Class with Difficult Books
BOURG, JULIAN E
Spring 2020
If you made it from the course title to this description, then you are curious. And if you are an inquisitive person, then you should take this class: a history of ideas based on some of the most important and influential writings of all time, such as Henry David Thoreau’s Civil Disobedience, Lewis Carroll’s Alice’s Adventures in Wonderland, Franz Kafka’s The Trial, John Hersey’s Hiroshima, and Frantz Fanon’s Black Skin, White Masks. We will read serious books closely, discuss them deeply, and connect them to our lives. Are you up for the challenge? What else is college for?

HIST430201
Borders and Frontiers in Modern Latin America
PICONE, MARIA DE LOS ANGEL
Spring 2020
Did you know that Brazil's border with its neighbors is longer than the U.S.-Mexico and U.S.-Canada borders combined? But what do lines on a map mean? This course examines the historical making of frontiers in Latin America. From border negotiations to smuggling, we will trace how people imagined, experienced, and continue to transform border regions south of the Grande River.

**HIST437101**  
The Inquisition in Spain and Spanish America  
SELLERS-GARCIA, SYLVIA M  
Spring 2020  
This lecture and discussion course for advanced students will consider the development of the Spanish Inquisition from its medieval roots to its early nineteenth century demise. Divided roughly between Spain and the Americas, we will consider the following topics: the medieval co-existence of Jews, Muslims, and Christians in Spain; the "re-conquest" of the Iberian peninsula in the fifteenth century and the formation of the inquisition; the theological debates of the sixteenth century that determined the scope of heresy. Our focus will be on using the Inquisition as an insight into early modern culture in both Spain and the Americas.

HIST440201
Natives and Newcomers in Early America
STANWOOD, OWEN C
Spring 2020
During the colonial period, North America transformed from a native place to a cultural melting pot where a variety of American, European, and African peoples vied for control of the continent. This course will examine the transformation of the continent from the perspective of its original inhabitants, viewing the changes in native lives and intercultural relations from the fifteenth to nineteenth centuries. Topics include trade and communication between Indians and Europeans; Indian slavery; transmission of Christianity; conquest and dispossession of native lands; development of political alliances and pan-Indian movements; and Indian policy in the early United States.

HIST441801
American Slavery
LYERLY, CYNTHIA L
Spring 2020
This course explores slavery in North America from the colonial era to emancipation, focusing especially on the lives of the enslaved. We will begin by exploring the enslavement of and experiences of Native Americans, move through the introduction and consolidation of African slavery in the tobacco and rice producing southern colonies, to the reign of King Cotton and its brutalizing effect on enslaved workers. We will study enslaved families, the ways enslaved men and women resisted their enslavers, and the diverse living and working conditions of the enslaved.

Room: STOKES HALL 117S
HIST442201
Race, Riots, and Rodeos: U.S., 1865-1900
RICHARDSON, HEATHER C
Spring 2020
In this course we will study the years from the end of the Civil War to the beginning of the twentieth century. While these decades often seem confusing in texts that treat them topically, they are, in fact, some of the most exciting and coherent years in American history. We will look at Reconstruction, urbanization, cowboys, industrialists, laborers, Indians, immigrants, and so on, to see how Americans made sense of the dramatic changes of the post-Civil War years.

HIST444201
A Nation of Immigrants? U.S. Immigration History since 1924
OH, ARISSA H
Spring 2020
This is the second half of a two-semester lecture course on American immigration. The first half covers the period up to 1924 and the second from 1924 to the present. Each half can be taken independently of the other. This semester we examine the history of Irish, Italian, Jewish, Latino, and Asian Americans since the Immigration Restriction Act of 1924, with particular attention to the overseas origins of migration; patterns of settlement and mobility; questions of ethnicity, race, labor, and class; anti-immigrant sentiment; and government policy. Note: Registration not open to Freshmen

HIST445101
Church and State in America
O'TOOLE, JAMES; ROGERS, ALAN
Spring 2020
This course will explore the intersections of religion and law in American history. After initial lectures and readings about the origins of the American religious "settlement" as expressed in the First Amendment to the Constitution, it will examine both the legal and the religious issues involved in such controversial subjects as abortion, marriage, assisted suicide, and individual religious expression.

HIST445301
Gender in American History
LYERLY, CYNTHIA L
Spring 2020
This course will explore changing and competing conceptions of manhood, womanhood, and
gender relations in American history. Particular attention will be paid to the ways various
constructions of gender have served the interests of a race, ideology, or class in American
history, the relational nature of gender roles, and the ways prevailing gender ideals influenced
men's and women's experiences in America.

HIST448201
Ghana and the U.S.: Historical and Cultural Connections
MILLER, KAREN
Spring 2020
The course examines selected historical and cultural intersections between Ghana, West Africa,
and the United States. We explore "African" and "American" components of African American
identity through course readings, film, and lectures that focus on four connected areas:
slavery/slave trade, civil rights/independence movements, emigration/immigration, and
identity/cultural exchange. Ghana is uniquely situated for such comparative study because of its
recurring presence in the unfolding of African American history, including its roles as inspiration
to Martin Luther King, home to scholar W.E.B. DuBois, haven to African American emigrants, and
producer of the kente cloth many wear.

HIST448401
Gender and Sexuality in African American History
SUMMERS, MARTIN A
Spring 2020
This course examines the intersections of gender and sexuality as both categories of identity and modes of power in the shaping of the historical experiences of African Americans. Through readings and lecture, we will explore three broad and interconnecting themes: how cultural understandings of race have impacted cultural understandings of gender and sexuality (and vice versa); how dominant cultural notions of gender and sexuality have underpinned relations of power between blacks and whites; and how gender and sexuality have shaped relationships within African American communities.

HIST455201
Race, Rights and the Law
ROGERS, ALAN
Spring 2020
This course is organized around a question recently raised by Supreme Court Justice Sonia Sotomayor: What role should the long dark history and the contemporary reality of racism in the United States play in the Court’s decision making? Students will explore the checkered relationship between race, rights - both civil and criminal - and the law, beginning with slavery and culminating with the so-called Ferguson effect. Students will read, discuss and write about major Court decisions, look behind the law for evidence of cultural and political bias, and note how American politicians and jurists have "played the race card."

HIST460101
Capstone: Boston College/Your Life
BURNS, JOHN J
Spring 2020
This seminar will focus on the historical development of Boston College and the continually evolving interaction between its traditions and its students. Students will do archival research on some aspect of Boston College in which they have a personal interest and will record oral histories with faculty, administrators, and alumni who can describe the ambiance and personalities of different periods that have shaped the modern university. All students will write a series of reflective essays on their experience with Boston College traditions and the impact it has had on their own personal views of themselves, their pasts, and their futures.

HIST470201  
Feast or Famine? Food and the Environment  
O'NEILL, KEVIN  
Spring 2020  
Through most of history the primary quest of humans has been to obtain sufficient food for survival. This course will explore the evolving relationships between that quest and the environment. Topics will include: climate change, the domestication of plants and animals, the development of settled agricultural societies, the Columbian exchange of biota, plantation and state sponsored agriculture, and the emergence of agro-business. We will explore the role of both individual crops/commodities such as sugar, chocolate, cod, corn, and the potato, and the environmental systems of which they were part.

HIST474101
Opium Past and Present
KENT, STACIE A
Spring 2020
Amidst the current American opioid epidemic, this course investigates global histories of opium production and consumption from the nineteenth century to the present. We will look at the economics and politics of opium, its role as a cultural marker, and the construction of opium as a political, biological, and healthcare problem. Our study will range from India, China, Central and Southeast Asia to London, Paris, San Francisco, and the American midwest.

HIST482701
Commemoration Fever: Heritage, Remembrance, and Forgetting in Contemporary Ireland
BEINER, GUY
Spring 2020
This course looks at the historical past as it is remembered through political, social, and cultural activities in the present. It critically examines the 'memory boom' in contemporary global culture through a case study of Ireland. In recent years, Ireland and Northern Ireland have been preoccupied with intensive commemoration of key events in their modern history. We will consider what characterizes this obsessive engagement with heritage, what motivates commemorations, and what is left forgotten. We will also wrestle with the dilemmas of how academic historians can relate to such manifestations of public history.
HIST484601
The Holocaust: A Moral History
BERNAUER, JAMES W
Spring 2020
The tragic event that ruptured modern Western morality will be examined from a variety of perspectives. We shall study the testimony of both its victims and its perpetrators. Special attention will be given to consideration of the intellectual and moral factors which motivated resistance or excused indifference. We shall conclude with interpretations of its meaning for contemporary morality and of its theological significance for Christians and Jews.

**HIST528301**  
**The Soviet New Man**  
**EATON, NICOLE M**  
**Spring 2020**

This senior colloquium explores the Soviet Union’s utopian dreams and practical efforts to reshape human bodies, human minds, and human society. Students read about late-nineteenth and early twentieth-century European visions for changing the relationship between individuals and various forms of social community (race, nation, class) and then focus on the Soviet case as one of the most radical attempts to refashion humanity. In order to explore debates about ?nurture? and ?nature? under socialism, readings include works on revolutionary projects of utopian socialism, embryology and eugenics, social hygiene, biopolitics, education, gender, sex, and the family.

HIST529001
Senior Colloquium: Reagan and Thatcher: Together Against the World
CRONIN, JAMES
Spring 2020
Margaret Thatcher came to office in May, 1979; Ronald Reagan in January 1981. They each confronted serious crises at home and abroad. The two leaders shared a similar vision of the world: a strong belief in the market and an equally intense anti-communism. On both counts they represented a break with the prevailing consensus and had to fight hard for their ideas. Their alliance and friendship was a major resource in winning or losing the battles they chose. The course will provide an opportunity for students to examine the context in which these two leaders came to office, their ideas, and their relationship.

HIST540601
Senior Colloquium: Before Jamestown
STANWOOD, OWEN C
Spring 2020
This senior colloquium will focus on North America before the age of permanent European colonies, primarily in the 1500s. After surveying the continent's native American history, we will examine how and why Spain, France, and England came to take interest in the continent, culminating in the formation of outposts in Florida, New Mexico, and Roanoke Island. We will read scholarship from historians and archaeologists as well as selected primary sources, and students will write a substantial paper on this fascinating but understudied epoch of American history.

**HIST752301**  
Colloquium: Historicizing Violence around the World  
BOURG, JULIAN E  
Spring 2020  
Is history just violence? The story of victors over the vanquished? This graduate course in global history examines the vexing problem of writing and reading violence in and across time. Focusing on the nineteenth and twentieth centuries, we will consider practices of symbolic, structural, psychic, and bodily harm as well as ideas that attempt to explain, criticize, and justify them. Sources will include signature historiographical interventions, theoretical texts, and case studies. Our goal will be to weigh the challenges and import of doing justice to the causes, effects, and meanings of violence.

Honors Program Courses: Summer 2019

HONR330101
Twentieth Century and the Tradition I
CONSTAS, CHRISTOPHER
Summer 2019
This is a continuation of the Western Cultural Tradition course into the twentieth century, and it is required of all Honors Program juniors. The course describes what happened to the tradition in the twentieth century, how it got criticized and rethought, and how it absorbed new forms of knowledge and new points of view. The first semester deals with the period up to World War II and focuses on both the excitement engendered by the cultural movement called Modernism and the darker forces that accompanied it.

HONR330102
Twentieth Century and the Tradition I
COHEN, MARTIN
Fall 2019
This is a continuation of the Western Cultural Tradition course into the twentieth century, and it is required of all Honors Program juniors. The course describes what happened to the tradition in the twentieth century, how it got criticized and rethought, and how it absorbed new forms of knowledge and new points of view. The first semester deals with the period up to World War II and focuses on both the excitement engendered by the cultural movement called Modernism and the darker forces that accompanied it.

Autobiographical Novel/Memoir
MICHALCZYK, SUSAN A
Fall 2019
This seminar will focus upon the genre of autobiography, its origins and evolution and the resulting variations that have emerged from the traditional concept, as established with Augustine's *Confessions*. Moving from the fundamentals of the genre, as defined in Gusdorf's essay on the pact between author and reader, our pattern will be a comparative study of texts such as Bronte's *Wuthering Heights*, Svevo's *The Conscience of Zeno*, Goethe's *Sorrows of Young Werther* and Akhmatova's *Requiem* as well as more contemporary texts including Dubus and Munro. In addition to careful analysis of selected texts, we will explore Olney's essays on autobiography.

HONR494001
Do the Virtues have Gender?
BAYLES, MARTHA
Fall 2019
The question of virtue lies at the heart of every civilization. So does the question of gender. Historically in the West, some virtues, such as bodily strength, courage in battle, self-control, rational intellect, and leadership, have been seen as masculine and superior to other virtues seen as feminine, such as modesty, industry, frugality, nurturing, and obedience. Is this view natural, rooted in biological sex; or is it conventional, part of a socially constructed system of gender roles? Further, how does the Western debate over these questions compare with the one currently raging in the Islamic world? These questions will be addressed through a wide range of readings, as well as films and other media, from both traditions.

Honors Program Courses: Spring 2020

HONR330202
Twentieth Century and the Tradition II
COHEN, MARTIN
Spring 2020
The second semester of this course deals with the key cultural issues of the latter half of the century, especially those grouped under the heading of Postmodernity. Here the focus will be on the fundamental critique of the tradition posed by post-structuralist cultural theories, feminism, deconstructionism, the communications revolution, changing views of non-Western cultures, and new perspectives centering on race, ethnicity, and gender. The crucial question to be addressed is whether, and on what terms, it is possible to construct a reliable identity and an adequate basis for moral choice and political action.

Dante: Reflecting on Our Journey
MICHALCZYK, SUSAN A
Spring 2020
The primary text will be Dante's *Commedia: Inferno, Purgatorio, Paradiso*, translated by Hollander. With the understanding that most Honors Program students have had some experience reading Dante's epic poem as freshmen, the seminar will be based upon the text while addressing broader topics such as government, religion, poetry, history and the like. There may be greater exploration of politics, philosophy, psychology, science, social structure within the context of medieval Florence, supported by additional texts, such as the *Vita Nuova, De Monarchia* (Dante's works) and other works by various poets, religious figures from classical times through medieval including contemporary interpretations.

Reading Moby-Dick
MARTIN, MICHAEL
Spring 2020
https://www.bc.edu/content/bc-web/academics/sites/university-catalog/courses/arts-sciences/honors-program.html
Moby-Dick (1851), arguably the greatest American novel, raises questions fundamental to human existence: What is fate? freedom? the meaning of life? the world? Can we know it? This course examines how characters, narrative voice, genre, and plotting create an almost biblical text; how depictions of whaling become parables; how historical references reflect contemporary politics; and how fiction can bring us to reflect on our own lives. Like Queequeg's tattoos, it presents a "mystical treatise on the art of attaining truth whose mysteries not even [he] himself could read" while its value resides in simply raising the questions.

HONR497501  
Humor in the Tradition  
GROSS, ROBERT
Spring 2020
Humor has always been a way to test our beliefs, as well as a way to justify them. Aristophanes ridiculed Socrates, Voltaire mocked Leibniz, and Swift satirized everyone and everything. Humor in the theatre and in the movies has both amused us and challenged us. This seminar will include examples from classical and Renaissance literature, with emphasis on theatre as well as fiction and essays. We continue with examples on screen, including silent classics, and conclude by considering political humor.

ITAL552101
Michelangelo and His World
MORMANDO, FRANCO A; BRAUDE, BENJAMIN
Fall 2019
An interdisciplinary exploration of the life and works of Michelangelo Buonarroti, sculptor, painter, architect and poet, one of the greatest artistic geniuses of Western civilization. Against the historical backdrop of the High Renaissance in Italy, we will study his works, both artistic and literary, examining their roots in the political, philosophical, religious, artistic, and cultural debates of his age as well as in his personal biography.

Credits: 03
Schedule: T 3-5 20
ITAL554101
The Genius of Machiavelli
SHEPARD, LAURIE
Fall 2019
We will read and discuss two of the greatest works by Nicolo Machiavelli, *Il Principe* and *La Mandragola*, as well as several other works (*La Vita di Castruccio Castracani*; Libro VIII of the *Istorie Fiorentine*), as time permits. Our objective is to define the originality of Machiavelli as a reader, thinker, and writer, and to understand the challenge that his ideas posed to traditional political philosophy.

ITAL882501  
**Italian Novel of the Novecento**  
**ACETOSO, MATTIA**  
**Fall 2019**  
The novel is arguably the primary literary form of the Twentieth Century. Italy offered a unique path of experimentation and exploration in this genre, with the psychoanalytical works of Italo Svevo, the magic realism of Dino Buzzati, and the historical works of Elsa Morante, up to the revolution of experimental form led by Italo Calvino. This course analyzes the evolution of the Italian novel, from the late 1900s to the end of the last century, offering a new understanding of this genre through a comparative, interdisciplinary and trans-historical perspective.

ITAL100405
Elementary Italian II
ZACAJ, ALBA
Spring 2020
This course is a continuation of ITAL1003 and further develops the goals of the first semester. Special attention is given to the production of more complex speech, the expression of personal opinion, and a deeper knowledge of contemporary Italian culture. More formal writing exercises and reading of authentic texts aid students in reinforcing language skills. A group final project at the end of the course attempts to bring together the themes and experiences from previous study.

ITAL111401
Intermediate Italian II
O'CONNOR, BRIAN R

Spring 2020

The prime objective of the course is to improve reading and writing skills, to continue building oral proficiency, and to provide a lively and current cultural background of contemporary Italy. A review of the elements of language will be supplemented by the reading of selected texts, oral practice, and individual research, all presented within the context of contemporary Italian society and classic Italian culture. Students will develop their ability to satisfy basic survival needs and to engage in conversation on a fairly complex level.

The course looks at businessmen as they are portrayed in short stories, plays, a novel, and films from the Middle Ages to the present. It takes as a premise the revolutionary nature of the businessman, and literature will serve as the microcosm to explore society's evolving ideas about business. Questions include the role of businessmen in urban development, the arts and philanthropy, business and meritocracy, reputation and the need for privacy/secrecy, price vs. value, the ambivalent symbolism of currency, the commodification of the human body ature, the anxiety of poverty and of wealth, and inherited vs. earned money.

ITAL552601  
Dante's "Divine Comedy" in Translation  
SHEPARD, LAURIE  
Spring 2020  
An introduction to and critical reading of the "Divine Comedy" (in English translation), one of the world's greatest epic poems, produced by "the chief imagination of Christendom" (Yeats). Dante's journey through Hell, Purgatory, and Paradise will be analyzed at its multiple levels of interpretation: literal and allegorical, theological, philosophical, political, and literary. Compendium of an entire epoch of European civilization, the "Comedy" will also be interrogated for its responses to the fundamental questions of human existence: God, the Cosmos, the Self, Good and Evil, Right and Wrong, Suffering, and Happiness.

ITAL558001
Italian Cinema of the New Millennium
ACETOSO, MATTIA
Spring 2020
From the groundbreaking innovations of Neorealism, to the visionary experimentations of the 1960s, Italian cinema has influenced generations of filmmakers worldwide and shaped Italy's image abroad. In the new millennium, after years of creative impasse, revolutionary young directors are participating in an Italian cinematic renaissance. This course explores the accomplishments of the most talented Italian filmmakers of the last twenty years, analyzing their films not only as works of literary and visual art, but also as portraits of contemporary Italian society and culture.

International Studies Courses: Summer 2019

INTL225101
Food, Power, and Politics
NAKAZATO, HIROSHI
Summer 2019
This course will seek to provide an intellectual and analytical-driven framework around the question of food as an integral part of any human experience, but particularly our experience with food through across cultures. We each have a unique opportunity to understand better the role of food in each of our lives as we move through this summer program by examining our own cultural and political assumptions and those of others from a new point of view. We can appreciate the lenses brought by other individuals, cultures and places to the acts of eating and producing food. Finally, we can express the human experience of food in ways that represent our understandings, experiences and vision for a healthy, just and pleasurable relationship to food in ways that can be shared and appreciated by others. In eating and producing food, we exist simultaneously in a deeply personal and communal place, a place of the present, past and future in which we are never more and less than human.

INTL228601
Philosophy of Peace and Hospitality
KEARNEY, RICHARD
Summer 2019
This course will introduce students to the dynamics of conflict and the challenges involved in bringing about reconciliation among groups divided by distrust and enmity. By drawing on recent thinkers and artists who have reflected on the encounter between self and other and upon the risks and challenges involved in opening oneself to the stranger, the course will propose a hermeneutics of hospitality as a means to overcome prejudice based violence and bring about reconciliation among divided groups. The central feature of this hermeneutic will be the art of exchanging narratives between religions, ethnicities, cultures, and persons. Various approaches will be examined including artistic expression, organized dialogue, and community building efforts in order to better understand the way in which the exchange of narratives plays a vital role in reconciliation. Students will also learn to notice the way similar conflict dynamics are present in their own social and political circumstances. They will become better equipped to examine tendencies to exclusion and violence in their own lives, to develop hospitable practices and attitudes that lead to peace, and to engage in effective peacemaking activities back home. This examination takes place in one of Europe’s oldest conflict zones (Croatia & surrounding countries), at the crossroads between the political and religious systems of the east and west (Islam and Christianity, Ottoman and European Monarchies, Communism and Capitalism).

INTL122101
Reflections on Being Abroad
GOZIK, NICK J
Fall 2019
This on-line course is designed for students of all majors who are currently abroad and are committed to reflecting more deeply on their study abroad experience. The course permits students to consider where they are in life, what they hope to gain from their time abroad, and how their current experiences may shape their future personal, academic, and professional trajectories. The course also trains students to observe and document the culture(s) in which they are studying, and in turn to produce an interactive, mixed media presentation, which captures one aspect of their host setting. From the course, students will gain valuable insight and skills which will benefit them well beyond their study abroad experience.

**Credits:** 02  
**Schedule:** BY ARRANGEMENT  
**Room:** None  
**Satisfies Core Requirement:** None  
**Comments:** Students wishing to take this course should contact the Office of International Programs. OIP will register students later in the semester once abroad status has been verified (students must be studying at a BC sponsored program). OIP will keep a spreadsheet of students who wish to take this course. Once a student's abroad status has been verified, he or she will be notified if they have been granted a spot in the course.  
**Prerequisites:** None  
**Corequisites:** Open to students studying abroad during the current semester.

**INTL220001**  
**Where on Earth: Foundations in Global History**  
**SERAPHIM, FRANZISKA; WILLARD, MARA E**  
**Fall 2019**  
Where on Earth...? invites beginning International Studies majors to explore methodologies of thinking globally and historically. A critical geographical perspective on the spatial organization of the world at different scales is crucial to any understanding of what we refer to as "international" or "global." This means tracing the history of social and global inequalities as deeply embedded in processes of modernity, empire, and capitalism, with dire ecological consequences. The meaning of "place" as relationally constituted and therefore subject to change and contestation forms an important building block of our investigations.

INTL226001
International Environmental Science and Policy
MINOTT, NICHOLA D
Fall 2019
This course examines both the science underlying today's international environmental problems and the policy decisions that drive human actions and responses. The natural environment underlies every other human system: economic, political, cultural/religious, etc., and when it is perturbed, every system above it feels the effects. We will study the science behind climate change, deforestation, ocean/wildlife issues, and food security and look at how U.S. domestic laws, international treaties and conventions, international organizations like UNEP, and NGOs shape the way humanity deals with these problems.

Credits: 03
Schedule: T TH 12*
Room: GASSON HALL 201
Satisfies Core Requirement: None
Comments: While no specific science classes are required as prerequisites, students should be familiar with basic scientific methods and principles.

INTL231001
The U.S. Intelligence Community in the Trump Era
CARLE, GLENN L
Fall 2019
What has been the shape and mission of the U.S. Intelligence Community since 9/11, and what will it confront in the Trump era and beyond? Terrorism has defined the U.S. Intelligence Community for twenty years. Now, an irredentist Russia, the explosion of cyber threats, a rising China, and persisting concerns about nuclear proliferation will all challenge the U.S. Intelligence Community, as the Pax Americana recedes and as Donald Trump engages in an historic retreat of the United States from its role as driver of multilateral norms--and undermines the credibility of the Intelligence Community itself. This courses will examine how the U.S. Intelligence Community's mission and structures have changed to meet national security threats, and the challenges it will face during the Trump administration and beyond.

Credits: 03
Schedule: T TH 3*
INTL253301
Global Climate Politics
MINOTT, NICHOLA D
Fall 2019
This course addresses the main pillars of climate governance: mitigation (reducing greenhouse gas emissions); adaptation (coping with the impacts of climate change) and the emerging pillar - loss and damage regulation. It examines how responsibilities, burdens, benefits and risks for addressing climate change should be divided between countries and people. We will discuss issues like: what is the role of justice in UN climate negotiations? How to balance fairness with political effectiveness? Is it possible to sue major emitters (states or businesses) for climate change? What are the responsibilities of rising powers for addressing their emissions? Who should pay for adaptation to climate change? Who are climate refugees and where can they go? This course looks for answers to such questions by examining various conceptual and empirical approaches to climate governance from a justice perspective and linking them to practical solutions, illustrated in case studies from around the world.

HWANG, INGU

Fall 2019
This introductory course surveys the political and economic transformation of South Korea from decolonization through the high growth era to today's global neo-liberal age. It traces how a war-ravaged country became a prosperous and industrialized nation. In exploring this transformation, it also examines the relationship between Korea's industrialization and its democratization: How did U.S. Cold War modernization impact the Korean state's economic strategy and its political development? Why and how did Korean society campaign for social and political justice during the economic high growth era? The course also considers the reconfiguration of South Korea's political economy since the 1990s.

INTL337202
International Finance
MC HUGH, CHRISTOPHER
Fall 2019
International financial markets, international trade and balance of payments issues will be studied by using analytical models of the open economy. Topics of particular interests are exchange rate determination, capital flows, trade flows, and other international linkages between economies. The course will apply the analytical tools of international economics to address macroeconomic aspects of current policy issues such as the global impact of the financial crisis, exchange rate policy, sovereign debt crises, and persistent trade deficits and international indebtedness.
INTL337401
Development Economics and Policy
ANUKRITI, FNU
Fall 2019
This course examines development economics and development policy. The purpose is to understand the lives of the poor and the economies of poor countries in order to understand what--if anything--can be done to improve their lives. We will consider what might be holding the poor back including population growth, lack of education, poor health, corruption, and institutional impediments such as poorly developed or tightly constrained markets. This course is appropriate for economics majors as well as for majors in international studies with the appropriate prerequisites.

INTL351001  
**Globalization**  
**CHRISTENSEN, PAUL T**  
**Fall 2019**  
This course examines the political, economic, social, and cultural implications of the increasingly integrated world system. The course focuses on conflicting assessments of international institutions (IMF, World Bank, WTO) and political governance; the impact of economic integration; and the effects of globalization on state sovereignty, democracy, and social cohesion. Specific case studies will include: globalization and the environment; globalization, gender, and work; globalization and immigration/migration; globalization and the illicit economy, and anti-globalization social movements and activism.

INTL352101
International Law
NAKAZATO, HIROSHI
Fall 2019
This course examines the role of international public law (the "law of nations") in the world today. It takes as its starting point the academic (and practical) debate about the utility of international law in world politics. From there, we consider the philosophical foundations of law, the sources of international law, and the application of international law in different arenas. In particular, the course will focus on how international law deals with a number of issues, including the connection between domestic and international law and the laws on territory, jurisdiction, human rights, and security, as well as other relevant topics.

Fall 2019
The Korean Peninsula has remained one of the most internationally contested areas since its division in 1945. This course explores the local and international political conditions that led to the ideological split between the communist North and the capitalist South and its subsequent consolidation into two fiercely opposed regimes over the course of the Cold War and post-Cold eras. Using a combined chronological and thematic approach, this course will address the political, economic, social, and cultural impact of this division on Koreans and on the world.

International Studies Courses: Spring 2020

INTL122101
Reflections on Being Abroad
GOZIK, NICK J
Spring 2020
This on-line course is designed for students of all majors who are currently abroad and are committed to reflecting more deeply on their study abroad experience. The course permits students to consider where they are in life, what they hope to gain from their time abroad, and how their current experiences may shape their future personal, academic, and professional trajectories. The course also trains students to observe and document the culture(s) in which they are studying, and in turn to produce an interactive, mixed media presentation, which captures one aspect of their host setting. From the course, students will gain valuable insight and skills which will benefit them well beyond their study abroad experience.

Credits: 02
Schedule: BY ARRANGEMENT
Room: None
Satisfies Core Requirement: None
Comments: Students wishing to take this course should contact the Office of International Programs. OIP will register students later in the semester once abroad status has been verified (students must be studying at a BC sponsored program). OIP will keep a spreadsheet of students who wish to take this course. Once a student's abroad status has been verified, he or she will be notified if they have been granted a spot in the course.
Prerequisites: None
Corequisites: Open to students studying abroad during the current semester.

INTL222001
Explorations in Peace and Security Studies
NAKAZATO, HIROSHI
Spring 2020
This course reviews a wide range of theories exploring the causes of conflict, possibilities for the pursuit of peace, and the role of justice in both. Drawing on a wide range of disciplines, it offers an introduction to diverse approaches that can be used to understand peace and conflict. Thematic topics include the ethics of violence and nonviolence; individuals and conflict; social groups and conflict; rationality and conflict; plus peace and justice in theory and practice.

INTL227401
Development Economics
JOGLEKAR, DEEPAK
Spring 2020
This course considers what we know about developing countries, and applies economic theory to help us understand the constraints of poverty. We will describe the economies of less developed countries and the lives of the poor, focusing on changes in poverty, inequality, demography, and health. We will consider theories and evidence for why some countries are rich and others poor. We will examine how land, labor, and credit markets function in poor countries and communities, and the consequences for health, education, and child labor. We will consider migration and its consequences and will discuss aid and international institutions.

Intelligence, Covert Action, and National Policy
CARLE, GLENN L
Spring 2020
The U.S. has engaged in "covert action" since the founding of the Office of Strategic Services (OSS), the CIA's predecessor, and it has often overshadowed the CIA's core mission of intelligence collection. Yet its utility and morality have been vigorously challenged. This course will examine how covert action fits into the U.S. Intelligence Community's mission, what covert action is, why it is used, and will examine a number of covert action missions, such as the Bay of Pigs operation, the overthrow of Chilean president Allende, the overthrow of the Arbenz government in Guatemala, the attempt to overthrow the Sandinista regime, the overthrow of the Mossadegh government in Iran, the efforts to undermine Communism in Eastern Europe, and the invasion of Afghanistan post-9/11.

INTL253101
Politics of Energy and Climate in the U.S. and International Perspective
DEESE, DAVID A
Spring 2020
Why is energy and climate policy fundamentally political, deeply entwined with human, national, and international security, and critical to global stability and well-being? Major course units assess the main actors and institutions in energy; including OPEC and international markets; contrast the primary challenges confronting energy policy in the exporting and importing states; evaluate the implications of climate disruption and the solutions across the sixty largest greenhouse gas emitting states; and analyze how energy and climate politics shapes global security and sustainability. Class members will also conduct a global climate negotiation and study in depth the regional security and political economy of the (Persian) Gulf states.

---

**INTL253301**  
**Global Climate Politics**  
**MINOTT, NICHOLA D**  
**Spring 2020**

This course addresses the main pillars of climate governance: mitigation (reducing greenhouse gas emissions); adaptation (coping with the impacts of climate change) and the emerging pillar - loss and damage regulation. It examines how responsibilities, burdens, benefits and risks for addressing climate change should be divided between countries and people. We will discuss issues like: what is the role of justice in UN climate negotiations? How to balance fairness with political effectiveness? Is it possible to sue major emitters (states or businesses) for climate change? What are the responsibilities of rising powers for addressing their emissions? Who should pay for adaptation to climate change? Who are climate refugees and where can they go?  
This course looks for answers to such questions by examining various conceptual and empirical approaches to climate governance from a justice perspective and linking them to practical solutions, illustrated in case studies from around the world.

INTL253601
Contested Borders between Security and Migration
GRANT, ANDREW N
Spring 2020
The contemporary surge in the securitization of global borders has had a powerful impact on growing flows of international migrants. This course examines the genesis of modern state borders and the sorts of divisions they impose upon the global population. While migrants often move for economic purposes, borders can be open for goods and select populations and closed to others. Drawing from global case studies, the course will explore questions including: How has the function of borders changed over time? Why is it easier for some people to cross borders than others? What might a world of open borders be like?

Credits: 03
Schedule: T TH 1 30*
INTL262501
Religion and Contemporary Terrorism
MCBRIDE, MEGAN K
Spring 2020
Since 9/11 there has been a radical increase in attention to what is casually referred to as religious terrorism. In most cases, the phrase is used to refer to the Islamist terrorism of non-state actors (e.g., Al Qaeda, ISIS, and Boko Haram), but there are other cases (e.g., Anders Breivik’s counterjihad violence and Hezbollah’s anti-Israeli violence) that might also fit the label. This course examines the relationship between religion and contemporary terrorism by looking at a wide variety of cases and asking: Why do we describe some terrorism as religious? How can we meaningfully separate religious terrorism from secular terrorism? Does it matter if we do so? How do stereotypes about religion and race influence our understanding of these movements and events? And do we even need to talk about religion in order to understand these cases?

INTL284001
Global China and the Belt and Road Initiative
GRANT, ANDREW N
Spring 2020
China is increasingly a global player in international development, geopolitics, and soft power influence. This course will examine the history of Global China and its contemporary geographical reach in Asia, Africa, Latin America, Europe, and the United States. Touching upon topics including the South China Sea conflict, infrastructure development occurring under China’s Silk Road inspired Belt and Road Initiative, and the geopolitics of Chinese digital technology, the course explores how China is reorienting global geographies. It asks: What about Chinese development is new or unique? How do other countries view China's rise? Why is China's rise so controversial for some?

INTL285401  
Colonial Korea and its Legacies  
HWANG, INGU  
Spring 2020  
This course explores Korea's experience under Japanese colonial rule (1910-1945) as well as how this experience was remembered and represented in the post-colonial era. Students will explore the three phases of Japanese rule: military rule (1910-1919); cultural rule (1919-1931), and wartime mobilization (1931-1945) and how each of these phases have shaped and continue to shape Korean national identity and politics, socioeconomic development, and memory culture. The course draws on historical and literary texts as well as film and other visual sources. This course combines lecture with active student discussion and presentations.

INTL337201
International Finance
VALCHEV, ROSEN Z
Spring 2020
International financial markets, international trade and balance of payments issues will be studied by using analytical models of the open economy. Topics of particular interests are exchange rate determination, capital flows, trade flows, and other international linkages between economies. The course will apply the analytical tools of international economics to address macroeconomic aspects of current policy issues such as the global impact of the financial crisis, exchange rate policy, sovereign debt crises, and persistent trade deficits and international indebtedness.

Topics of particular interests are exchange rate determination, capital flows, trade flows, and other international linkages between economies. The course will apply the analytical tools of international economics to address macroeconomic aspects of current policy issues such as the global impact of the financial crisis, exchange rate policy, sovereign debt crises, and persistent trade deficits and international indebtedness.
INTL337501
Economic Growth and Development
GUERRON, PABLO A
Spring 2020
This course introduces students to Economic Growth. Our starting point is the question of why societies did not experience economic growth for most of human history. Indeed, growth is a very recent economic concept dating back to the nineteenth century. We will then study what drives growth. Examples include the introduction of electricity, telephone, and airplanes. In general, we will study how technology, capital accumulation, human capital, and innovation helped humanity to increase its well being. Finally we will cover the impact of growth on our lives. For example, how life expectancy has changed over the past century.

INTL337601
International Economic Relations
ANDERSON, JAMES
Spring 2020
This course introduces the study of economic relations among countries. It combines material contained in ECON3371 and ECON3372, and substitutes for both those courses. Primarily designed for international studies majors, it is also appropriate for economics and other social science majors, with the proviso that the comprehensive coverage of the course implies that the workload is heavy and expectations for students are high. Topics include the determinants of trade in goods, services, and capital; the economic policies that nations use to influence such trade; the theory and practice of international macroeconomics; and problems of coordinating macroeconomic policies among countries. The course features the usefulness (and limitations) of game theory for explaining international economic interactions.

INTL351001  
Globalization  
CHRISTENSEN, PAUL T  
Spring 2020  
This course examines the political, economic, social, and cultural implications of the increasingly integrated world system. The course focuses on conflicting assessments of international institutions (IMF, World Bank, WTO) and political governance; the impact of economic integration; and the effects of globalization on state sovereignty, democracy, and social cohesion. Specific case studies will include: globalization and the environment; globalization, gender, and work; globalization and immigration/migration; globalization and the illicit economy, and anti-globalization social movements and activism.

INTL357001
The Arab-Israeli Conflict
KRAUSE, PETER J
Spring 2020
The Arab-Israeli conflict has been at the core of Middle East politics over the past century. But the character and outcomes of this struggle have varied significantly across time and space. This course will address the origins, dynamics, and effects of the Arab-Israeli conflict from the early 1900s to the present using the tools of social science and history. Students will learn and analyze the perspectives and behaviors of state and non-state actors on all sides to gain a greater appreciation for a struggle that continues to drive regional dynamics and U.S. foreign policy in the Middle East.

INTL402201
Human Rights and Democratic Transitions in Korea
HWANG, INGU
Spring 2020
This course introduces students to the historical evolution of human rights talk, activism, norm, and politics during the democratic transition in Korea. Who appropriated the language of human rights? Why did they do so? How did local causes and issues become global human rights issues or vice versa? How did human rights language, ideas, norms, and practices affect domestic and international politics on socio-economic, political, and cultural issues in Korea? Along with these questions, this course will examine multilateral and contentious interactions between global and local state and non-state actors. In paying attention to the role of human rights, the course discusses a series of crucially interrelated topics on self-determination, economic development, political liberalization, humanitarianism, and global justice during the Cold War and post-Cold War period.

Islamic Civilization and Societies Courses: Fall 2019

**ICSP119901**  
Islamic Civilization  
DIPASQUALE, DAVID M  
Fall 2019  
This course introduces the varieties of Islamic civilization from the seventh century to the modern world. It explores not only the tenets of faith and practice, and political, social, theological, and economic history, but also considers Muslim cultural and intellectual contributions, including by women, from Indonesia to Morocco and in the Western world. Students will read primary sources, listen to recordings, and view films. The course will emphasize the variety of experiences of Muslims and their contributions to the world.

Music and Culture in the Middle East
LUCAS, ANN E
Fall 2019
This course explores the relationship between different music traditions of the Middle East and their respective cultural contexts. It addresses issues of music's structure and content vis-a-vis its role in social, political and religious situations in the region; the ways that these forces influence musical aesthetics, while also addressing the role of music in the Middle East historically. The cultural areas covered in this class include the Arab World, Iran, Turkey, and Afghanistan.

ICSP261501  
Islam and Liberal Democracy  
DIPASQUALE, DAVID M  
Fall 2019  
We will take advantage of current geopolitical controversies in order to unearth the theoretical core of the debate between Islam and the West. Materials related to the Islamic heritage will be placed next to arguments made on behalf of the West in relation to certain key issues, such as rights versus duties; religion and freedom; and democracy and progress. Modern, pre-modern, sacred, and secular texts will be studied. How can the secular world defend itself against a critique that begins from a position of faith and emphasizes virtue, God, and justice?

ICSP332801
Islam and the Iberian Peninsula
GOIZUETA, ELIZABETH T
Fall 2019
This course will examine the relationship between cultures in the Euro-Arab context from both historical and contemporary perspectives. It will begin with an examination of the historical influence of Islam in the Iberian Peninsula from the eighth to the fifteenth centuries. During that period, Spain presented an example of religious tolerance and the place where the followers of the three Abrahamic religions lived, arguably, in harmony with one another. Against this background, the course will explore the interactions and mutual influences between the Iberian and the Islamic cultures from the Middle Ages to the present.

ICSP263801
Islamic Political Philosophy
DIPASQUALE, DAVID M

Spring 2020

What is the relationship between philosophy and Islam? Does the divine law (Shari'a) need to be supplemented with purely rational reflections on the nature and purpose of political life? What is the place of toleration and individual rights in the Islamic legal and philosophic tradition? We will explore these and similar questions by focusing on two particularly fertile periods of Islamic thought: the encounter of Islam with Greek philosophy in the classical period and its encounter with the modern secular west in late modernity.

ICSP331001
Women and Gender in Islam
DELONG-BAS, NATANA J
Spring 2020
This course explores women and gender roles in Islamic history, civilization, and societies, beginning with the pre-Islamic period and continuing through the present. The goal is to present women and womens issues as central to the main narrative of Islamic history, rather than as a side story. This course explores questions related to both historical and contemporary religious interpretation and practice, Sunni, Shia and Sufi, as well as the impact of religion and gender constructs on womens access to the public sphere, positions of leadership, and legal status.

ICSP399901
Politics of Modern Middle Eastern Art
ALQASIMI, SULTAN S
Spring 2020
In this course, we shall survey the political underpinnings of Arab art in the twentieth century, and the socio-political conditions that shaped cultural production in the region. Whether it is under the Ba'athist regimes of Syria and Iraq or under Egypt' Pan-Arabism championed by Gamal Abdel Nasser, painting and sculpture in addition to film and performance have been employed by various governments as a tool of soft power to propagate their policies to the public not only in their respective states but throughout the region and beyond. Despite this widespread government patronage of the arts, many artists have chosen to challenge their authorities through subversive movements and practices, which we will address at different moments in the semester. This course, through its focus on creative practices and strategic use of the arts, will attempt to shed light on an often neglected dimension of the modern history of the Arab World and other parts of the Middle East.
ICSP433401
Sogdian and the Silk Road: Linguistic Perspectives
ASHUROV, BARAKATULLO
Spring 2020
The language and culture of Sogdian, the East Iranian language which served for almost a millennium as the *lingua franca* of the Silk Road and served as the medium for the transmission of religious cultures, including Christianity, between the Near East and China.

Introduction to Zoroastrianism
ASHUROV, BARAKATULLO
Spring 2020
The course is an introduction to the history of Zoroastrianism--one of the most significant religious traditions in Antiquity, from its origins to its decline as the principle religion in Sasanian Iran following the Arab conquest. The course covers the central concepts of Zoroastrianism and its place in the context of other ancient Iranian religions.

Jesuit Studies Courses: Summer 2019

JESU715701
In the Footsteps of Leaders
BEAUMIER, CASEY

Summer 2019

This course considers the distinctive methods of Jesuit leadership by situating them in their historical and geographic context. The course begins with ten days of experiential learning in Spain and Rome where students immerse themselves in the key places that became the roots of the Society of Jesus using primary sources to critically examine the decisions and actions of the early Jesuits. The course continues at Boston College with lectures, discussions, and case-study analyses moderated by distinguished leaders of Jesuit apostolates. Students will consider contemporary topics such as the challenges and opportunities experienced by administrators and teachers at secondary and higher-education schools. Coursework features selected readings, workshops, and projects to be completed in small groups. Through this course, students will gain an understanding of the Jesuits' early vision of leadership and of the ways that vision has both changed and remained constant.

Jesuit Studies Courses: Fall 2019

JESU713101
Social Justice in Jesuit Contexts
CASALINI, CRISTIANO

Fall 2019
The Social Apostolate of the Society of Jesus has developed in a variety of ways over the centuries according to the diverse contexts where Jesuits have operated as agents of "social justice." This class offers students both a broad and deep understanding of: (1) How the Society of Jesus developed its mission in support of creating a "preferential option for the poor"; (2) How the Society understood its role to promote liberation from oppression in diverse social environments; (3) What kind of services have been activated by the Society of Jesus in order to fulfill its core values of "the service of faith and promotion of justice"; and (4) How social justice is pursued through pedagogy and practices by Jesuit and Ignatian schools today, given the significant involvement of the Jesuits with formal education on a global scale. The course is designed to foster deep and meaningful conversation among students. It will include individual and collective readings and video-conferences with leaders and teachers of Jesuit schools around the world, deepening students' knowledge of current practices and stimulating dialogue.

Jesuit Studies Courses: Spring 2020

JESU713201
Spiritual Exercises: Contents, Context, and Practice
BEAUMIER, CASEY
Spring 2020
This course explores the dynamic of the Spiritual Exercises, the pathway to God that Ignatius Loyola authored, the fruit of his religious conversion, and seeks to answer the question: How might greater knowledge of the Spiritual Exercises assist both in the formation of souls and a greater sense of mission for the building of God's kingdom? The course examines the key elements of the Spiritual Exercises and how they relate directly and practically to the ministry of spiritual direction. Readings include the careful study of the primary text along with secondary readings that will enable students to more fully understand the important scholarly developments of Jesuits engaged in the Exercises. Through this course, students will gain foundational knowledge and practical experience to encourage further study of and engagement with the charism of the Spiritual Exercises.

**JESU715801**  
**Jesuit Pedagogy**  
**CASALINI, CRISTIANO**  
**Spring 2020**  
This three-credit, graduate-level online course examines the distinctiveness of the Jesuits' approaches to teaching and of their philosophy of education that have propelled their schools to unprecedented success over the centuries. One key to the unprecedented success of Jesuit education has been the tension between the recognizable mark of uniformity that long distinguished the methods, contents, and practices of Jesuit schools and their ability to adapt to different contexts and times. Both aspects—the uniformity and the adaptability—were explicitly supported by the "Ratio studiorum", the Jesuits' foundational plan of studies issued in 1599, which, despite the schools' many variations and complexities, has retained some influence over time. With the "Ratio" discarded, Jesuit schools had to clarify what made them distinctively Jesuit, reconciling their mission with the contemporary world. This three-credit, graduate-level class sketches the developments of Jesuit educational endeavors by focusing on both the permanent and changing traits of its distinctive pedagogy.

Journalism Courses: Fall 2019

JOUR200001
Introduction to Journalism
ARDS, ANGELA
Fall 2019
Organized like a professional newsroom, this course will give students interested in journalism a taste of its various facets, including topic-generation, reporting, interviewing, and editing, for print, broadcast, and online media. It will cover basic newswriting, beat reporting, investigative journalism, feature writing, and writing for the web, and provide an introduction to media law and ethics and the business and history of journalism. Students will produce a feature-length final project and will also work in teams to formulate, report, and write investigative stories. Student should expect to meet deadlines and high standards of grammar, style, punctuation, and factual accuracy.

**JOUR222501**  
**Journalism and New Media**  
**JOHNSTON, MAURA K**  
**Fall 2019**  
The rise of the internet as a news delivery system has changed the face of the news business, for better or worse, in the twenty-first century. This one semester seminar will trace the history of new media's relationship with journalism while preparing students for the leaner online world. Students will learn about practical matters (storytelling for the web, condensing complex narratives into 140-character missives) while grappling with larger concerns affecting the industry and readers (traffic-based journalism, slippery sourcing) as they report and write on the world around them.

JOUR222601  
Writing About Popular Music  
JOHNSTON, MAURA K  
Fall 2019  
Reporting on popular music is a keenly effective way to take a snapshot of culture as it's happening. In this discussion-intensive class, students will get hands-on tips on how to write about music effectively, hone their critical thinking skills, and examine the ways that the business struggles experienced by both music and publishing have affected the way pop writing is disseminated and consumed. Guest speakers from the music writing world will provide further insights on their career paths, their views on where music is now, and the artists and songs that stoke their passion.

JOUR223102
Feature Writing
MARCUS, JON P
Fall 2019
This is a course on contemporary feature writing—literary nonfiction journalistic writing based on solid reporting. The emphasis is on writing stories editors will want to print and readers will want to read. The course will include reading and analyzing well-written newspaper and magazine articles. Students will learn to apply the techniques of drama and fiction to writing objective, factual stories that entertain as well as inform. The course focuses on newspaper features and magazine articles, but the techniques are also applicable to writing nonfiction books.

Investigative Journalism
BERGANTINO, JOSEPH
Fall 2019
Investigative reporting holds the powerful accountable in government, business and large institutions. This course will provide you with an opportunity to both learn about investigative journalism and do in-depth investigative reporting that has the potential to make a difference. Students will learn a variety of reporting techniques while working on semester-long investigative projects that could end up in several major newspapers across Massachusetts. Story subjects will focus on holding government agencies and powerful institutions accountable for a wide-range of problems and systemic failures.

JOUR223401
News Ethics
BERGANTINO, JOSEPH
Fall 2019
This course will focus on the ethical dilemmas that challenge journalists working in print, broadcast, and online media. Topics will include deception, privacy, conflicts of interest, anonymous sources, plagiarism, hidden cameras, undercover reporting, and linking on the web, among others. The method for teaching will be primarily case studies. Students will be expected to do extensive background reading in the general area of each case and be prepared to help lead a class discussion.

JOUR223801
Food Writing
O'CONNOR, JOHN
Fall 2019
This class takes a close look at the practice and tradition of food journalism, introducing students to narrative techniques, elements of reporting, and works that have shaped the genre. Students will learn how to avoid the cliches and traps of food writing and to develop original, persuasive, surprising ideas about food and the culture of eating. Issues of voice, scene, social observation, and dramatic structure are addressed, with additional attention paid to crafting and pitching articles. Readings will include works from early practitioners like A. J. Liebling and M.F.K. Fisher and contemporary writings by Gabrielle Hamilton, Frank Bruni, David Foster Wallace, and others.

**JOUR223901**  
**Travel Writing**  
**O'CONNOR, JOHN**  
**Fall 2019**  
Traveling can be one of life's more rewarding experiences, and for writers it can supply an inexhaustible trove of material. But the appeal of the genre--who wouldn't want to take an all-expenses-paid trip to Fiji's finest eco-resorts?--can also be its biggest crutch. With few exceptions, travel stories today merely recast the excruciating details of five-star hotels, hairy-chested masseurs, and the salutary effects of jalapeno margaritas. This class aims to show students ways to write about travel deeply and intelligently, with the hope of developing clear, informed opinions on the subject they're writing about (and not merely "covering"). Readings will include works by Hunter S. Thompson, Geoff Dyer, Sloane Crosley, and others.

JOUR225101
Mobile Journalism
CONVEY, KEVIN
Fall 2019
News consumption on mobile devices has vastly surpassed that of desktops and laptops, making mobile key to the future of news and the success of any journalist. In this class, we'll examine the impact of this trend, learn about technologies used to produce news on these devices and consider the importance of social media in the mobile domain. Students will write formal reviews of mobile apps and produce two news apps themselves. We'll also explore how to cover news events using mobile technology; how to produce, distribute and promote mobile news stories; and how to work in a mobile newsroom.

JOUR225301
Advanced Nonfiction Workshop: Writing for Magazines
ROTELLA, CARLO
Fall 2019
In this workshop we practice and study the craft of magazine writing. We write and read a variety of articles--features, profiles, reviews, columns, essays, opinion, etc.--and work on professional skills, such as pitching a story. We also consider models provided by accomplished journalists, by reading their work and by having them in for class visits. Writing assignments, workshopping of student prose, and discussion of assigned reading are regular features of the workload. Admission by permission of instructor on the basis of manuscript submission. Please submit up to 8 double-spaced pages of writing to carlo.rotella@bc.edu by April 3.

JOUR229501
Narrative Journalism: Classic and Contemporary
WILSON, CHRISTOPHER P
Fall 2019
This course is designed to introduce students to one of the most important new genres in contemporary writing--to "narrative journalism," fact-based story-telling that applies some of the classic techniques of literary fiction to so-called "long form" and book length treatments. Lately, narrative journalism is getting even more experimental, adapting forms from graphic novels, comics, film and digital storytelling--and we're going to look at many of those new forms. But it turns out that narrative journalism itself has a tradition of its own to draw upon: examples that extend back to famous writers such as George Orwell, John Hersey, Ryszard Kapuscinski, Ernest Hemingway, Margaret Randall, Lincoln Steffens, Mary McCarthy, Stephen Crane, and Joseph Mitchell. This course, then, plans to cut back and forth between classic journalistic writing and contemporary versions (by writers such as Joan Didion, George Packer, Anne Fadiman, and others), paying attention to matters of form and genre, legwork and research, relationships to "subjects" and informants and more. Open to all majors; of special interest to journalism minors; several short papers and a final examination.
JOUR229601
Sound Stories: A Podcasting Project
NUGENT, JOSEPH G
Fall 2019
Novelist, newspaper columnist, playwright, and spectacular satirist, Flann O'Brien was a master literary craftsman. An Irishman, his startling humor and sonorous prose emerge from the same dark space as that of his compatriots, Joyce and Beckett. In this practical, collaborative, and project-driven course, we'll explore and exploit the Burns library holdings of this remarkable modernist/post-modernist. Imagining, scripting and recording your own podcasts, you'll help introduce O'Brien's mordant hilarity to your colleagues, the university, and the world outside.

Journalism Courses: Spring 2020

JOUR200001
Introduction to Journalism
MARCUS, JON P
Spring 2020
Organized like a professional newsroom, this course will give students interested in journalism a taste of its various facets, including topic-generation, reporting, interviewing, and editing, for print, broadcast, and online media. It will cover basic newswriting, beat reporting, investigative journalism, feature writing, and writing for the web, and provide an introduction to media law and ethics and the business and history of journalism. Students will produce a feature-length final project and will also work in teams to formulate, report, and write investigative stories. Student should expect to meet deadlines and high standards of grammar, style, punctuation, and factual accuracy.

Credits: 03  
Schedule: M 6-8 20  
Room: STOKES HALL 301N  
Satisfies Core Requirement: None  
Comments: Note to Journalism minors: This is a REQUIRED course. Students who have taken JOUR223301 "Advanced Journalism" CANNOT take this course.

JOUR221001
The Business of Journalism
DAHL, DAVID K
Spring 2020
This course will help students to become literate in the business of journalism and the changes underway in the profession. Discussing the history of mainstream news organizations and new business models brought by the digital revolution, we consider how questions of audience, revenue, and platform shape the rapidly changing news business. We live in an age of new money, new platforms, and new ways of telling stories, but also an age in which many journalism jobs have disappeared. The opportunities unleashed by these changes are helping to create the most exciting period ever for journalism. We need to know how and why these changes have occurred.

JOUR222501
Journalism and New Media
JOHNSTON, MAURA K
Spring 2020
The rise of the internet as a news delivery system has changed the face of the news business, for better or worse, in the twenty-first century. This one semester seminar will trace the history of new media’s relationship with journalism while preparing students for the leaner online world. Students will learn about practical matters (storytelling for the web, condensing complex narratives into 140-character missives) while grappling with larger concerns affecting the industry and readers (traffic-based journalism, slippery sourcing) as they report and write on the world around them.
JOUR222601
Writing About Popular Music
JOHNSTON, MAURA K
Spring 2020
Reporting on popular music is a keenly effective way to take a snapshot of culture as it's happening. In this discussion-intensive class, students will get hands-on tips on how to write about music effectively, hone their critical thinking skills, and examine the ways that the business struggles experienced by both music and publishing have affected the way pop writing is disseminated and consumed. Guest speakers from the music writing world will provide further insights on their career paths, their views on where music is now, and the artists and songs that stoke their passion.

JOUR223701
The Art of Editing
LESTER, JAMES T
Spring 2020
Writers get all the attention. But where would they be without discerning editors to recognize their talents, provide perspective on their ideas, help shape their work, and, ultimately, publish it? This discussion-based class will focus primarily on editing as it's practiced at magazines such as The New Yorker and The Atlantic. We'll think big and small, about whole publications, individual articles, and critical matters of style; we'll read and discuss published works; we'll invite top editors and writers in to share their secrets with us; and we'll write and edit our own articles.

Advanced Tutorial: Linguistics

CONNOLLY, MICHAEL J

Fall 2019

A course of directed study on topics in linguistics intended solely for students who have exhausted present course offerings or are doing thesis work on advanced topics.

The precise subject matter is determined by arrangement and need.

**Credits:** 01
**Schedule:** BY ARRANGEMENT
**Room:** None
**Satisfies Core Requirement:** None
**Comments:** May be repeated for credit.
**Prerequisites:** None
**Corequisites:** None
**Cross-listed with:** None
**Frequency:** Annually

**LING439002**

Advanced Tutorial: Linguistics

THOMAS, MARGARET

Fall 2019

A course of directed study on topics in linguistics intended solely for students who have exhausted present course offerings or are doing thesis work on advanced topics.

The precise subject matter is determined by arrangement and need.

**Credits:** 03
**Schedule:** BY ARRANGEMENT
LING439101
AB Comprehensive: Linguistics
CONNOLLY, MICHAEL J; LARDIERE, DONNA
Fall 2019
Individually-designed independent research under faculty supervision. Taken in fall or spring of the senior year.

Credits: 01
Schedule: BY ARRANGEMENT
Room: None
Satisfies Core Requirement: None
Comments: Required for Honors candidates in Linguistics
Prerequisites: None
Corequisites: None
Cross-listed with: None
Frequency: Annually

LING888801
Interim Study
CONNOLLY, MICHAEL J
Fall 2019
TBD

Credits: 00
Schedule: BY ARRANGEMENT
Room: None
Satisfies Core Requirement: None
Comments: None
Prerequisites: None
Linguistics Courses: Spring 2020

LING310201
Syntax and Semantics
FOLEY, CLAIRE A
Spring 2020
An introduction to the concepts and operations of modern generative grammar and related models, as well as linguistic theories of meaning.

Credits: 03
Schedule: T TH 3*
Room: LYONS HALL 207
Satisfies Core Requirement: None
Comments: None
Prerequisites: LING3101 or equivalent.
Corequisites: None
Cross-listed with: ENGL3392
Frequency: Annually

LING320601
Old Irish
CONNOLLY, MICHAEL J
Spring 2020
A descriptive and historical examination of the linguistic features of Old Irish among the Celtic and Indo-European languages; the reading of Early Irish texts.

Credits: 03
Schedule: M W F 1
Room: LYONS HALL 208
Satisfies Core Requirement: None
Comments: None
Prerequisites: Previous familiarity with an inflected language or with Modern Irish.
LING332801
The Linguistic Structure of Arabic
MOUHIB, ABDELKRAM
Spring 2020
An analysis of the major features of Modern Standard Arabic with some reference to vernacular dialects and earlier versions of the language: sound system, grammar, structure and meanings of words, syntax, and properties of discourse.

Credits: 03
Schedule: T TH 1 30*
Room: LYONS HALL 208
Satisfies Core Requirement: None
Comments: Prior study of Arabic or Linguistics not required but recommended.
Prerequisites: None
Corequisites: None
Cross-listed with: NELC4153
Frequency: Periodically

LING337801
Second Language Acquisition
LARDIERE, DONNA
Spring 2020
An introduction to what it means to learn, and know, a second or foreign language. The course focuses on research carried out since the development of the "interlanguage hypothesis," addressing in particular the role of the learner's native language; debate about the role of input and interaction; research on the social and psychological factors that bear on second language learning. Emphasis is on the acquisition of second-language morphology, grammar, and vocabulary by adults, with some treatment of child language acquisition.

Credits: 03
Schedule: T TH 10 30*
Room: STOKES HALL 215N
Satisfies Core Requirement: None
LING338001
Topics in Syntax
IOVTCHEVA, SNEJANA P
Spring 2020
An exploration of key topics, including agreement systems and clausal embedding, in the syntax of seemingly disparate languages and language groups such as Celtic, Icelandic, Belfast English, and Chinese.

Credits: 03
Schedule: T TH 12*
Room: CAMPION HALL 303
Satisfies Core Requirement: None
Comments: None
Prerequisites: None
Corequisites: None
Cross-listed with: None
Frequency: Biennially

LING433001
Foreign Language Pedagogy
JAVEL, ANDREA M
Spring 2020
An introduction to foreign-language pedagogy and its basis in the theory of second-language acquisition, linguistic analysis, and psycholinguistic research. A discussion of language teaching and methods within the framework of those fields.
The course offers reviews of the principal literature on second-language acquisition and linguistic theory but focuses on their practical application in the classroom.

Credits: 03
Schedule: W 4 30-6 50
Room: DEVLIN HALL 218
LING433101
Phonology
CONNOLLY, MICHAEL J
Spring 2020
The description and functioning of sounds in language: articulatory, acoustic, and auditory phonetics; the notion of the phoneme and archiphoneme; suprasegmentals; syllability; natural classes and distinctive features; phonological processes, rules, and representations; lexical and autosegmental phonology; phonology and universal grammar. All examined from the theoretical approach of the Prague School (Trubetzkoy, Jakobson), American structuralism, and generative grammar (beginning with Chomsky and Halle), but with consideration of phonology in cognitive and functional linguistic approaches.

Credits: 03
Schedule: M W F 10
Room: LYONS HALL 202
Satisfies Core Requirement: None
Comments: None
Prerequisites: None
Corequisites: None
Cross-listed with: None
Frequency: Periodically

LING433401
Sogdian and the Silk Road: Linguistic Perspectives
ASHUROV, BARAKATULLO
Spring 2020
The language and culture of Sogdian, the East Iranian language which served for almost a millennium as the *lingua franca* of the Silk Road and served as the medium for the transmission of religious cultures, including Christianity, between the Near East and China.
LING439002
Advanced Tutorial: Linguistics
LARDIERE, DONNA
Spring 2020
A course of directed study on topics in linguistics intended solely for students who have exhausted present course offerings or are doing thesis work on advanced topics.

The precise subject matter is determined by arrangement and need.

Credits: 03
Schedule: BY ARRANGEMENT
Room: None
Satisfies Core Requirement: None
Comments: May be repeated for credit.
Prerequisites: None
Corequisites: None
Cross-listed with: None
Frequency: Annually

Mathematics Courses: Summer 2019

MATH100401
Finite Probability and Applications
MULLICAN, CRISTINA E
Summer 2019
This course, for students in the humanities, the social sciences, School of Education, and School of Nursing, is an introduction to finite combinatorics and probability, emphasizing applications. Topics include finite sets and partitions, enumeration, probability, expectation, and random variables.

Credits: 03
Schedule: M W 6-9 15
Room: DEVLIN HALL 112
Satisfies Core Requirement: Mathematics
Comments: Not open to students who have completed their Mathematics Core Curriculum Requirement without permission of the Department Chairperson (except for Psychology majors completing their second mathematics corequisite).
Prerequisites: None
Corequisites: None
Cross-listed with: None
Frequency: Annually

MATH100402
Finite Probability and Applications
MULLICAN, CRISTINA E
Summer 2019
This course, for students in the humanities, the social sciences, School of Education, and School of Nursing, is an introduction to finite combinatorics and probability, emphasizing applications. Topics include finite sets and partitions, enumeration, probability, expectation, and random variables.

Credits: 03
Schedule: T TH 6-9 15
Room: DEVLIN HALL 112
Satisfies Core Requirement: Mathematics
Comments: Not open to students who have completed their Mathematics Core Curriculum Requirement without permission of the Department Chairperson (except for Psychology majors completing their second mathematics corequisite).
MATH100501
Excursions in Advanced Mathematics
CHEUNG, CHI-KEUNG
Summer 2019
In this course, we will explore several areas of advanced mathematics through lectures, classroom discussions, and labs. These include topics such as topology, projective geometry, transformation geometry, computational geometry, chaos, and coding, which are not normally taught in the high school curriculum. Through studying these exciting developments in modern mathematics, students can further develop their critical thinking and problem-solving skills. A good background in high school algebra and geometry is recommended. Instructor Bio: Chi-Keung Cheung received his Ph.D. from University of California-Berkeley, and has been a math professor at BC since 1993. His research interests are in geometric analysis and complex analysis. In recent years, he has also actively participated in training high school and elementary school math teachers.

Credits: 03
Schedule: M T W TH 9-11
Room: GASSON HALL 201
Satisfies Core Requirement: None
Comments: BC Experience course.

MATH103201
Algebraic and Transcendental Functions for OTE
VOIGHT, CHLOE
Summer 2019
TBD
Credits: 03
Schedule: BY ARRANGEMENT
Room: None
Satisfies Core Requirement: None
Comments: None
Prerequisites: None
Corequisites: None
Cross-listed with: None
Frequency: Annually

MATH103301
Introduction to Finite Math for OTE
HADDAD, JULIETTE M
Summer 2019
Introduction to Finite Math for OTE

Credits: 03
Schedule: BY ARRANGEMENT
Room: None
Satisfies Core Requirement: None
Comments: None
Prerequisites: None
Corequisites: None
Cross-listed with: None
Frequency: Annually

MATH103402
Pre-Calculus for OTE
MACADINO, VITTORIA M
Summer 2019
TBD

Credits: 03
Schedule: BY ARRANGEMENT
Room: None
Satisfies Core Requirement: None
Comments: None
Prerequisites: None
Corequisites: None
Cross-listed with: None
Frequency: Annually

MATH103501
Intro to Probability and Statistics for OTE
DOHERTY, AMY L
Summer 2019
TBD

Credits: 03
Schedule: BY ARRANGEMENT
Room: None
Satisfies Core Requirement: None
Comments: None
Prerequisites: None
Corequisites: None

Frequency: Annually
MATH110001
Calculus I
GOLDSTEIN, ELLEN J
Summer 2019
MATH1100 is a first course in the calculus of one variable intended for biology, computer science, economics, management, and premedical students. It is open to others who are qualified and desire a more rigorous mathematics course at the core level. Topics include a brief review of polynomials and trigonometric, exponential, and logarithmic functions, followed by discussion of limits, derivatives, and applications of differential calculus to real-world problem areas. The course concludes with an introduction to integration.

Credits: 03
Schedule: M W 9-12
Room: DEVLIN HALL 112
Satisfies Core Requirement: Mathematics
Comments: MATH1100 is not open to students who have completed a calculus course at the college level. Students contemplating majors in Chemistry, Computer Science/B.S., Environmental Geosciences, Geological Sciences, Mathematics, or Physics should enroll in MATH1102. ADMT1901 section for BCE students only.
Prerequisites: Trigonometry.
Corequisites: MATH1121. (Or MATH1122, etc., depending on which section of MATH1100 taken.).
Cross-listed with: ADMT1901
Frequency: Annually

MATH110002
Calculus I
GERRAUGHTY, LORIN E
Summer 2019
MATH1100 is a first course in the calculus of one variable intended for biology, computer science, economics, management, and premedical students. It is open to others who are qualified and desire a more rigorous mathematics course at the core level. Topics include a brief review of polynomials and trigonometric, exponential, and logarithmic functions, followed by discussion of limits, derivatives, and applications of differential calculus to real-world problem areas. The course concludes with an introduction to integration.

Schedule: ONLINE COURSE

https://www.bc.edu/content/bc-web/academics/sites/university-catalog/courses/arts-sciences/mathematics.html
MATH110003
Calculus I
CENGIZ, MUSTAFA
Summer 2019
MATH1100 is a first course in the calculus of one variable intended for biology, computer science, economics, management, and premedical students. It is open to others who are qualified and desire a more rigorous mathematics course at the core level. Topics include a brief review of polynomials and trigonometric, exponential, and logarithmic functions, followed by discussion of limits, derivatives, and applications of differential calculus to real-world problem areas. The course concludes with an introduction to integration.

Credits: 03
Schedule: T TH 6-9 15
Room: GASSON HALL 206
Satisfies Core Requirement: Mathematics
Comments: MATH1100 is not open to students who have completed a calculus course at the college level. Students contemplating majors in Chemistry, Computer Science/B.S., Environmental Geosciences, Geological Sciences, Mathematics, or Physics should enroll in MATH1102. ADMT1901 section for BCE students only.
Prerequisites: Trigonometry.
Corequisites: MATH1121. ( Or MATH1122, etc., depending on which section of MATH1100 taken.).
Cross-listed with: ADMT1901
Frequency: Annually
MATH1101
Calculus II
MOSS, ERIC; REINOSO, BRAEDEN A
Summer 2019

MATH1101 is a second course in the calculus of one variable intended for biology, computer science, economics, management, and premedical students. It is open to others who are qualified and desire a more rigorous mathematics course at the core level. Topics include an overview of integration, basic techniques for integration, a variety of applications of integration, and an introduction to (systems of) differential equations.

Credits: 03
Schedule: M W 9-12 15
Room: DEVLIN HALL 221
Satisfies Core Requirement: Mathematics
Comments: MATH1101 is not open to students who have completed MATH1103 or MATH1105. Students contemplating majors in Chemistry, Computer Science/B.S., Environmental Geosciences, Geological Sciences, Mathematics or Physics should enroll in either MATH1103 (Spring) or MATH1105 (Fall).
Prerequisites: MATH1100.
Corequisites: MATH1141. (Or MATH1142, etc., depending on section of MATH1101 taken.).
Cross-listed with: None
Frequency: Annually

MATH221001
Linear Algebra
WOLF, JAMISON B
Summer 2019

This course is an introduction to the techniques of linear algebra in Euclidean space. Topics covered include matrices, determinants, systems of linear equations, vectors in n-dimensional space, complex numbers, and eigenvalues. The course is required of mathematics majors and is also suitable for students in the social sciences, natural sciences, and management.

Mathematics Courses: Fall 2019

MATH100201
Functions and Differential Calculus
BELDING, JULIANA V
Fall 2019
This course is intended for students who are required to take Calculus I (either MATH1100 or MATH1102) but whose backgrounds necessitate additional preparation. Topics include the real line and coordinate plane; linear and quadratic functions; higher degree polynomials and rational functions; trigonometry, emphasizing the trigonometric functions; and exponential and logarithmic functions. Note: This course does not satisfy the University Core Requirement in Mathematics. Department permission is required: see the Assistant Chair for Undergraduates.

Credits: 03
Schedule: M W F 10
Room: STOKES HALL 145N
Satisfies Core Requirement: None
Comments: None
Prerequisites: None

MATH100401
Finite Probability and Applications
SOYLU, CIHAN
Fall 2019
This course, for students in the humanities, the social sciences, School of Education, and School of Nursing, is an introduction to finite combinatorics and probability, emphasizing applications. Topics include finite sets and partitions, enumeration, probability, expectation, and random variables.

Credits: 03
Schedule: M W F 10
Room: STOKES HALL 115S
Satisfies Core Requirement: Mathematics
Comments: Not open to students who have completed their Mathematics Core Curriculum Requirement without permission of the Department Chairperson (except for Psychology majors completing their second mathematics corequisite).
Prerequisites: None
Corequisites: None
Cross-listed with: None
Frequency: Annually

MATH100402
Finite Probability and Applications
SOYLU, CIHAN
Fall 2019
This course, for students in the humanities, the social sciences, School of Education, and School of Nursing, is an introduction to finite combinatorics and probability, emphasizing applications. Topics include finite sets and partitions, enumeration, probability, expectation, and random variables.

Credits: 03
Schedule: M W F 12
Room: GASSON HALL 210
Satisfies Core Requirement: Mathematics
Comments: Not open to students who have completed their Mathematics Core Curriculum Requirement without permission of the Department Chairperson (except for Psychology majors completing their second mathematics corequisite).

This course is designed to introduce the student to the spirit, beauty, and vitality of mathematics. The emphasis is on development of ideas rather than problem solving skills. Topics vary, but are typically chosen from diverse areas such as geometry, number theory, computation, and graph theory.

Credits: 03
Schedule: M W F 10
Room: GASSON HALL 309
Satisifies Core Requirement: Mathematics
Comments: Not open to students who have completed their Mathematics Core Curriculum Requirement without permission of the Department Chairperson (except for Psychology majors completing their second mathematics corequisite).

Prerequisites: None
Corequisites: None
Cross-listed with: None
Frequency: Annually

MATH110001
Calculus I
HULSE, THOMAS A
Fall 2019
MATH1100 is a first course in the calculus of one variable intended for biology, computer science, economics, management, and premedical students. It is open to others who are qualified and desire a more rigorous mathematics course at the core level. Topics include a brief review of polynomials and trigonometric, exponential, and logarithmic functions, followed by discussion of limits, derivatives, and applications of differential calculus to real-world problem areas. The course concludes with an introduction to integration.

Credits: 04
Schedule: M W F 1
Room: FULTON HALL 230
Satisfies Core Requirement: Mathematics
Comments: MATH1100 is not open to students who have completed a calculus course at the college level. Students contemplating majors in Chemistry, Computer Science/B.S., Environmental Geosciences, Geological Sciences, Mathematics, or Physics should enroll in MATH1102. ADMT1901 section for BCE students only.
Prerequisites: Trigonometry.
Corequisites: MATH1121. (Or MATH1122, etc., depending on which section of MATH1100 taken.).
Cross-listed with: ADMT1901
Frequency: Annually

MATH110002
Calculus I
HULSE, THOMAS A
Fall 2019
MATH1100 is a first course in the calculus of one variable intended for biology, computer science, economics, management, and premedical students. It is open to others who are qualified and desire a more rigorous mathematics course at the core level. Topics include a brief review of polynomials and trigonometric, exponential, and logarithmic functions, followed by discussion of limits, derivatives, and applications of differential calculus to real-world problem areas. The course concludes with an introduction to integration.

MATH110501
Calculus II-AP (Mathematics/Science Majors)
FRIEDBERG, SOLOMON
Fall 2019
MATH1105 is a second course in the calculus of one variable intended for Chemistry, Computer Science/B.S., Environmental Geosciences, Geological Sciences, Mathematics, and Physics majors. It is designed for students who have completed a year of Calculus in high school at either the AB or BC curriculum level, but who are not yet prepared to advance to MATH2202 Multivariable Calculus. The course first reviews the primary techniques and interesting applications of integration. The remainder of the course provides an introduction to the topics of infinite sequences and series. Other topics may be introduced as time permits.

MATH119001
Fundamentals of Mathematics I  
LEHMANN, BRIAN T  
Fall 2019  
MATH1190-1191 is a course sequence designed for those who plan to teach mathematics in grades K-8. The emphasis is on building conceptual understanding of the mathematics present in the emerging K-8 curriculum and on deepening content knowledge. Number and number systems through the real number system will be studied; functions and the structure of algebra will be developed. Problem solving and reasoning, applications and making connections will be featured.

Credits: 03  
Schedule: M W F 12  
Room: HIGGINS HALL 225  
Satisifies Core Requirement: Mathematics  
Comments: Restricted to Lynch School of Education students.  
Prerequisites: None  
Corequisites: None

MATH2202
Multivariable Calculus
BELDING, JULIANA V
Fall 2019
Topics in this course include vectors in two and three dimensions, analytic geometry of three dimensions, parametric curves, partial derivatives, the gradient, optimization in several variables, multiple integration with change of variables across different coordinate systems, line integrals, and Green’s Theorem.

Credits: 04
Schedule: M W F 1
Room: CARNEY HALL 308
Satisfies Core Requirement: Mathematics
Comments: This course is for students majoring in Chemistry, Computer Science/B.S., Geology, Geophysics, Mathematics and Physics, as well as other students who have completed Calculus II.
Prerequisites: Calculus II.
Corequisites: None

MATH331001
Introduction to Abstract Algebra
KELMER, DUBI
Fall 2019
This course studies four fundamental algebraic structures: groups, including subgroups, cyclic groups, permutation groups, symmetry groups, and Lagrange's Theorem; rings, including subrings, integral domains, and unique factorization domains; polynomials, including a discussion of unique factorization and methods for finding roots; and fields, introducing the basic ideas of field extensions and ruler and compass constructions.

Credits: 03
Schedule: M W F 11
Room: GASSON HALL 205
Satisfies Core Requirement: None
Comments: Students may not take both MATH3310 and MATH3311.
Prerequisites: MATH2210 AND MATH2216.
Corequisites: None
Cross-listed with: None
Frequency: Annually

MATH331101
Algebra I
MADAPUSI PERA, KEERTHI S
Fall 2019
This course, with MATH3312, studies the basic structures of abstract algebra. Topics include
groups, subgroups, factor groups, Lagrange's Theorem, the Sylow Theorems, rings, ideal theory,
integral domains, field extensions, and Galois theory.

Credits: 03
Schedule: M W F 10
Room: GASSON HALL 210
Satisfies Core Requirement: None
Comments: Students may not take both MATH3310 and MATH3311.
Prerequisites: MATH2210 AND MATH2216.
Corequisites: None
Cross-listed with: None
Frequency: Annually

MATH332001
Introduction to Analysis
ZHANG, LIYANG
Fall 2019
This course gives students the theoretical foundations for the topics taught in Calculus. It covers
algebraic and order properties of the real numbers, the least upper bound axiom, limits,
continuity, differentiation, the Riemann integral, sequences, and series. Definitions and proofs
will be stressed throughout the course.

Credits: 03
Schedule: M W F 9
Room: DEVLIN HALL 221
Satisfies Core Requirement: None
Comments: Students may not take both MATH3320 and MATH3321.
Prerequisites: MATH2216 AND MATH2202.
Corequisites: None
Cross-listed with: None
Frequency: Annually

MATH332101
Analysis I
BIRINGER, IAN P
Fall 2019
This course, with MATH3322, studies the basic structure of the real numbers. Topics include the least upper bound principle, compactness of closed intervals (the Heine-Borel theorem), sequences, convergence, the Bolzano-Weierstrass theorem, continuous functions, boundedness and intermediate value theorems, uniform continuity, differentiable functions, the mean value theorem, construction of the Riemann integral, the fundamental theorem of calculus, sequences and series of functions, uniform convergence, the Weierstrass approximation theorem, special functions (exponential and trig), and Fourier series.

Credits: 03
Schedule: M W F 2
Room: DEVLIN HALL 227
Satisfies Core Requirement: None
Comments: Students may not take both MATH3320 and MATH3321.
Prerequisites: MATH2216 AND MATH2202.
Corequisites: None
Cross-listed with: None
Frequency: Annually

MATH441001
Differential Equations
BRIDGEMAN, MARTIN
Fall 2019
This course is a junior-senior elective intended primarily for students interested in applications of mathematics. Topics include first order linear equations, higher order linear equations with constant coefficients, linear systems, qualitative analysis of non-linear systems, and an introduction to stability and bifurcations.

Credits: 03
Schedule: M W F 11
Room: GASSON HALL 309
Satisfies Core Requirement: None
Comments: None
Prerequisites: MATH2202 AND MATH2210.
Corequisites: None

MATH442601
Probability
CHAMBERS, DANIEL W
Fall 2019
This course provides a general introduction to modern probability theory. Topics include probability spaces, discrete and continuous random variables, joint and conditional distributions, mathematical expectation, the central limit theorem, and the weak law of large numbers. Applications to real data will be stressed and we will use the computer to explore many concepts.

MATH442701  
Mathematical Statistics  
CHEUNG, CHI-KEUNG  
Fall 2019  
Topics include sampling distributions, parametric point and interval estimation, hypothesis testing, goodness-of-fit, parametric and nonparametric two-sample analysis. Applications to real data will be stressed and the computer will be used to explore concepts and analyze data.

MATH444501
Combinatorics
GROSS, ROBERT
Fall 2019
This course is an introduction to graph theory and combinatorics, with a strong emphasis on
creative problem-solving techniques and connections with other branches of mathematics.
Topics will center around enumeration, Hamiltonian and Eulerian cycles, extremal graph theory,
planarity, matching, colorability, Ramsey theory, hypergraphs, combinatorial geometry, and
applications of linear algebra, probability, polynomials, and topology to combinatorics.

Credits: 03
Schedule: M W F 2
Room: DEVLIN HALL 221
Satisfies Core Requirement: None
Comments: Not open to students who have completed MATH2245 or MATH2248 or CSCI2245
Prerequisites: MATH2216.
Corequisites: Pre/corequisite MATH2210.
Cross-listed with: None
Frequency: Periodically

MATH445101
Euclidean and Non-Euclidean Geometry
CHEUNG, CHI-KEUNG
Fall 2019
This course surveys the history and foundations of geometry from ancient to modern times.
Topics will be selected from Mesopotamian and Egyptian mathematics, Greek geometry, the
axiomatic method, history of the parallel postulate, the Lobachevskian plane, Hilbert's axioms
for Euclidean geometry, elliptic and projective geometry, the trigonometric formulas, models,
and geometry and the study of physical space.

MATH445301
Euclid's *Elements*
GASTINEAU, STELLA S; FARBER, ETHAN
Fall 2019
This course is a close reading of Euclid's *Elements* in seminar style, with careful attention to axiomatic reasoning and mathematical constructions that build on one another in a sequence of logical arguments. We will also emphasize clear and creative communication on mathematical ideas, with some attention to the cultural background of the *Elements* and its place in a modern education.

MATH446001
Complex Variables
ZHANG, LIYANG
Fall 2019
This course gives an introduction to the theory of functions of a complex variable, a fundamental and central area of mathematics. It is intended for mathematics majors and well-prepared science majors. Topics covered include complex numbers and their properties, analytic functions and the Cauchy-Riemann equations, the logarithm and other elementary functions of a complex variable, integration of complex functions, the Cauchy integral theorem and its consequences, power series representation of analytic functions, and the residue theorem and applications to definite integrals.

Credits: 03
Schedule: M W F 10
MATH446101
Stochastic Processes
WOLF, JAMISON B
Fall 2019
A stochastic process describes the evolution of a system that changes over time in a random manner. This course introduces and studies various properties of some fundamental stochastic processes, including Markov chains in discrete and continuous time, renewal processes, and Brownian motion.

MATH447001
Mathematical Modeling
GARVEY, PAUL R
Fall 2019
This course introduces students to methods of mathematical modeling. The emphasis is on ways to analytically represent and study today's complex modeling problems, with cases from the natural and social sciences. Topics include the model building process, mathematical models of systems, and modeling data to discover properties and hidden characteristics. The calculus of finite differences and solutions to classes of difference equations will serve as the core mathematical theory taught in this course. The dynamics of certain linear and nonlinear models will be explored from various domains (e.g., population models, economic models, Markov models). The course will conclude with an introduction to mathematical graph theory and its application to modeling interacting and interdependent systems and networks.

**MATH447501**  
**History of Mathematics**  
**KEANE, WILLIAM J**  
**Fall 2019**  
This course studies the development of mathematical thought, from ancient times to the twentieth century. Naturally, the subject is much too large for a single semester, so we will concentrate on the major themes and on the contributions of the greatest mathematicians. The emphasis in the course will be on the mathematics. Students will follow the historical arguments and work with the tools and techniques of the period being studied.

MATH880601
Algebra I
FEDORCHUK, MAKSYM
Fall 2019
This course, with MATH8807, will cover the following topics: group theory (group actions, Sylow, nilpotent/solvable, simple groups, Jordan-Holder series, presentations); commutative algebra (uniqueness of factorization, Jordan decomposition, Dedekind rings, class groups, local rings, Spec); finite fields; algebraic numbers; Galois theory; homological algebra; semisimple algebra.

Credits: 03
Schedule: M W F 12
MATH880801
Geometry/Topology I
LI, TAO
Fall 2019
This course, with MATH8809, will cover the following topics: point-set topology, fundamental
group and covering spaces, smooth manifolds, smooth maps, partitions of unity, tangent and
general vector bundles, (co)homology, tensors, differential forms, integration and Stokes' theorem,
and de Rham cohomology.

MATH100405
Finite Probability and Applications
HOOVER, IAN
Spring 2020
This course, for students in the humanities, the social sciences, School of Education, and School of Nursing, is an introduction to finite combinatorics and probability, emphasizing applications. Topics include finite sets and partitions, enumeration, probability, expectation, and random variables.
Credits: 03  
Schedule: M W F 1  
Room: STOKES 107S  
Satisfies Core Requirement: Mathematics  
Comments: Not open to students who have completed their Mathematics Core Curriculum Requirement without permission of the Department Chairperson (except for Psychology majors completing their second mathematics corequisite).  
Prerequisites: None  
Corequisites: None  
Cross-listed with: None

MATH100701  
**Ideas in Mathematics**  
**HULSE, THOMAS A**  
**Spring 2020**

This course is designed to introduce the student to the spirit, beauty, and vitality of mathematics. The emphasis is on development of ideas rather than problem solving skills. Topics vary, but are typically chosen from diverse areas such as geometry, number theory, computation, and graph theory.

**Credits:** 03  
**Schedule:** M W F 9  
**Room:** GASSON 203  
**Satisfies Core Requirement:** Mathematics  
**Comments:** Not open to students who have completed their Mathematics Core Curriculum Requirement without permission of the Department Chairperson (except for Psychology majors completing their second mathematics corequisite).

**Prerequisites:** None  
**Corequisites:** None

MATH110001
Calculus I
REED, ROBERT
Spring 2020
MATH1100 is a first course in the calculus of one variable intended for biology, computer science, economics, management, and premedical students. It is open to others who are qualified and desire a more rigorous mathematics course at the core level. Topics include a brief review of polynomials and trigonometric, exponential, and logarithmic functions, followed by discussion of limits, derivatives, and applications of differential calculus to real-world problem areas. The course concludes with an introduction to integration.

Credits: 04
Schedule: M W F 8
Room: FULTON HALL 230
Satisfies Core Requirement: Mathematics
Comments: MATH1100 is not open to students who have completed a calculus course at the college level. Students contemplating majors in Chemistry, Computer Science/B.S.,
Environmental Geosciences, Geological Sciences, Mathematics, or Physics should enroll in MATH1102. ADMT1901 section for BCE students only.

**Prerequisites:** Trigonometry.

**Corequisites:** MATH1121. (Or MATH1122, etc., depending on which section of MATH1100 taken.).

**Cross-listed with:** ADMT1901

**Frequency:** Annually

MATH119101
Fundamentals of Mathematics II
SALTZ, ADAM R
Spring 2020
As in MATH1190, this course emphasizes building conceptual understanding of the mathematics present in the emerging K-8 curriculum and on deepening the content knowledge. Topics drawn from geometry and measurement, data analysis, statistics, and probability will be developed. Problem solving and reasoning, applications, and making connections will be featured.

Credits: 03
Schedule: M W F 12
Room: STOKES HALL 201N
Satisfies Core Requirement: Mathematics
Comments: Restricted to Lynch School of Education students.
Prerequisites: MATH1190.

MATH229001
Number Theory for Teachers
GOLDSTEIN, ELLEN J
Spring 2020
This course is intended to focus on the wealth of topics that relate specifically to the natural numbers. These will be treated as motivational problems to be used in an activity-oriented approach to mathematics in grades K-9. The course will demonstrate effective ways to use the calculator and computer in mathematics education. Topics include prime number facts and conjectures, magic squares, Pascal's triangle, Fibonacci numbers, modular arithmetic, and mathematical art.

**Credits:** 03  
**Schedule:** M W F 2  
**Room:** CAMPION HALL 200  
**Satisfies Core Requirement:** None

**Frequency:** Biennially

---

**MATH331001**  
**Introduction to Abstract Algebra**  
**SOYLU, CIHAN**  
**Spring 2020**  
This course studies four fundamental algebraic structures: groups, including subgroups, cyclic groups, permutation groups, symmetry groups, and Lagrange's Theorem; rings, including subrings, integral domains, and unique factorization domains; polynomials, including a discussion of unique factorization and methods for finding roots; and fields, introducing the basic ideas of field extensions and ruler and compass constructions.

**Credits:** 03  
**Schedule:** M W F 2  
**Room:** GASSON HALL 204  
**Satisfies Core Requirement:** None  
**Comments:** Students may not take both MATH3310 and MATH3311.  
**Prerequisites:** MATH2210 AND MATH2216.  
**Corequisites:** None  
**Cross-listed with:** None  
**Frequency:** Annually
MATH331201
Algebra II
MADAPUSI PERA, KEERTHI S

Spring 2020
This course, with MATH3311, studies the basic structures of abstract algebra. Topics include groups, subgroups, factor groups, Lagrange's Theorem, the Sylow Theorems, rings, ideal theory, integral domains, field extensions, and Galois theory.

Credits: 03
Schedule: M W F 11
Room: GASSON HALL 205
Satisfies Core Requirement: None
Comments: None
Prerequisites: MATH3311. With the permission of the Assistant Chair for Undergraduates, students who have taken MATH3310 may be allowed to take MATH3312. However, they may need to do additional work on their own in order to make that transition.
Corequisites: None
Cross-listed with: None
Frequency: Annually

MATH332001
Introduction to Analysis
HULSE, THOMAS A

Spring 2020
This course gives students the theoretical foundations for the topics taught in Calculus. It covers algebraic and order properties of the real numbers, the least upper bound axiom, limits, continuity, differentiation, the Riemann integral, sequences, and series. Definitions and proofs will be stressed throughout the course.

Credits: 03
Schedule: M W F 12
Room: GASSON HALL 205
Satisfies Core Requirement: None
Comments: Students may not take both MATH3320 and MATH3321.
Prerequisites: MATH2216 AND MATH2202.
Corequisites: None
Cross-listed with: None
Frequency: Annually
MATH332201
Analysis II
CHAMBERS, DANIEL W
Spring 2020
This course, with MATH3321, studies the basic structure of the real numbers. Topics include the least upper bound principle, compactness of closed intervals (the Heine-Borel theorem), sequences, convergence, the Bolzano-Weierstrass theorem, continuous functions, boundedness and intermediate value theorems, uniform continuity, differentiable functions, the mean value theorem, construction of the Riemann integral, the fundamental theorem of calculus, sequences and series of functions, uniform convergence, the Weierstrass approximation theorem, special functions (exponential and trig), and Fourier series.

MATH441001
Differential Equations
GOLDSTEIN, ELLEN J
Spring 2020
This course is a junior-senior elective intended primarily for students interested in applications of mathematics. Topics include first order linear equations, higher order linear equations with constant coefficients, linear systems, qualitative analysis of non-linear systems, and an introduction to stability and bifurcations.

Credits: 03
Schedule: M W F 11
Room: GASSON 210
Satisfies Core Requirement: None
**MATH441002**

MATH442601
Probability
CHEN, QILE
Spring 2020
This course provides a general introduction to modern probability theory. Topics include probability spaces, discrete and continuous random variables, joint and conditional distributions, mathematical expectation, the central limit theorem, and the weak law of large numbers. Applications to real data will be stressed and we will use the computer to explore many concepts.

Credits: 03
Schedule: M W F 3
MATH442602
Probability
GROSS, ROBERT
Spring 2020
This course provides a general introduction to modern probability theory. Topics include probability spaces, discrete and continuous random variables, joint and conditional distributions, mathematical expectation, the central limit theorem, and the weak law of large numbers. Applications to real data will be stressed and we will use the computer to explore many concepts.

MATH444001  
Dynamical Systems  
MIROLLO, RENATO  
Spring 2020
This course is an introduction to nonlinear dynamics and their applications, emphasizing qualitative methods for differential equations. Topics include fixed and periodic points, stability, linearization, parameterized families and bifurcations, and existence and nonexistence theorems for closed orbits in the plane. The final part of the course is an introduction to chaotic systems and fractals, including the Lorenz system and the quadratic map.

**Credits:** 03

**MATH445501**  
**Mathematical Problem Solving**  
**LEHMANN, BRIAN T**  
**Spring 2020**  
This course is designed to deepen students' mathematical knowledge through solving, explaining and extending challenging and interesting problems. Students will work both individually and in groups on problems chosen from polynomials, trigonometry, analytic geometry, pre-calculus, one-variable calculus, probability and numerical algorithms. The course will emphasize explanations and generalizations rather than formal proofs and abstract properties. Some pedagogical issues, such as composing good problems and expected points of confusion in explaining various topics, will come up, but the primary goal is mathematical insight. The course will be of particular use to future secondary math teachers.

**Credits:** 03  
**Schedule:** M W 3*  
**Room:** CAMPION 302  
**Satisfies Core Requirement:** None

**Corequisites:** None
MATH446001
Complex Variables
FRIEDBERG, SOLOMON
Spring 2020
This course gives an introduction to the theory of functions of a complex variable, a
fundamental and central area of mathematics. It is intended for mathematics majors and well-
prepared science majors. Topics covered include complex numbers and their properties,
analytic functions and the Cauchy-Riemann equations, the logarithm and other elementary
functions of a complex variable, integration of complex functions, the Cauchy integral theorem
and its consequences, power series representation of analytic functions, and the residue
theorem and applications to definite integrals.

MATH447001
Mathematical Modeling
GARVEY, PAUL R
Spring 2020
This course introduces students to methods of mathematical modeling. The emphasis is on ways to analytically represent and study today's complex modeling problems, with cases from the natural and social sciences. Topics include the model building process, mathematical models of systems, and modeling data to discover properties and hidden characteristics. The calculus of finite differences and solutions to classes of difference equations will serve as the core mathematical theory taught in this course. The dynamics of certain linear and nonlinear models will be explored from various domains (e.g., population models, economic models, Markov models). The course will conclude with an introduction to mathematical graph theory and its application to modeling interacting and interdependent systems and networks.

MUSA110001  
Fundamentals of Music Theory  
GAWLICK, BARBARA S  
Summer 2019  
An introductory music theory course designed for students with a strong interest in music. As a Core course it includes speculations on how musical discourse informs our perception and understanding of the world around us. Students learn to acquire skills in music notation and transcription. The following theoretical concepts will be extensively covered: notation of pitch and rhythm, scales, intervals, chords, and harmonic progression. Students leave the course prepared for upper level study in music theory and will begin to question broader issues concerning the meaning and use of music.  

Credits: 03  
Schedule: T TH 1 15-4 45  
Room: LYONS HALL 423  
Satisfies Core Requirement: Arts  
Comments: None

MUSA120001
Introduction to Music
CALLAHAN, DANIEL
Summer 2019
This course will attempt to develop essential and critical listening faculties by employing a chronological survey of the elements, forms, and various types of music that the serious listener is exposed to today. The principal emphasis of the course will be on traditional Western art music from medieval Gregorian Chant to twentieth-century electronic music, but certain excursions into the world of non-Western musics, jazz, and American popular song will be included to diversify and enrich the experience of listening critically to music.

MUSA130001
History of Popular Music
JAMES, DONALD J
Summer 2019
From the blues to country, jazz to rock, our nation's political, social, and economic history has been mirrored and influenced by the styles of popular music developed in our cultural melting pot. This course will provide an overall history of popular music in America, with emphasis upon mainstream popular music since 1954. Its focus will be on the independence and interdependence of black and white musical cultures in America. Students will learn stylistic developments in popular music and acquire interpretive strategies, including methods of aural analysis that will view popular songs as historical texts and as autonomous works of art.

**Music Academic Courses: Fall 2019**

MUSA108001
**Keyboard Skills**
**HATTORI, AYAKO M; MURPHY, EMILY**
**Fall 2019**
Keyboard Skills is a corequisite for each of the following theory courses: MUSA1100 Fundamentals of Music Theory, MUSA2100 Harmony, and MUSA3100 Chromatic Harmony. In weekly 30-minute lessons, students will learn and demonstrate the practical understanding of scales, chord progressions, and the ability to play short compositions on the keyboard. Times to be determined once class begins. Students must be enrolled in MUSA1100, MUSA2100, or MUSA3100 to participate.

MUSA109001
Ear Training/Sight-Singing Lab
BURGO, MICHAEL
Fall 2019
In meetings twice a week students learn to sing melodies by sight through a solfege system of drilling scales and intervals (sight-singing) and learn to notate melodic, rhythmic, and harmonic patterns (ear-training). The course principally helps students pass the Ear Training/Sight Singing requirement for the major but can benefit individuals in singing groups or those who wish to improve their practical musical skills. Preference given to majors and minors. Usually taken concurrently with MUSA2100 Harmony or MUSA3100 Chromatic Harmony.

Harmony
KOSCH, LEAH F
Fall 2019
Harmony will cover the principles of diatonic harmonic progression, four-part writing from a figured bass, and harmonization of chorale melodies. Students will increase their musical vocabulary to include modes and seventh chords, and continue to develop skills in analysis, keyboard harmony, and ear-training. It is recommended that music majors sign up for MUSA1090 Ear Training/Sight-Singing Lab.
MUSA220501
Music of the Classic Period
MCGRANN, JEREMIAH W
Fall 2019
This course will consider the musical trends of the eighteenth and early nineteenth centuries (c. 1750-c. 1815) that are characterized by the movement towards simplicity in melody and a clarification of harmonic language. While music that served as a transitional style from the Baroque period will be the starting point for this course, in large measure, the focus of the course will be on the music of the two great composers who lived and worked in or around Vienna in the period 1780-1800: Haydn and Mozart.

MUSA220901
Music of the Modern Era
GAWLICK, RALF Y
Fall 2019
This is a study of the music of the twentieth century, including concepts, ideas, techniques, compositional materials, and analytical principles of the music, as well as a historical, chronological survey of the composers and compositions of the modern era. The course will include a study of the twentieth-century masters, including: Debussy, Ravel, Stravinsky, and Schoenberg; nationalist composers like Bartok, Britten, and Copland; and the flowering of avant-garde music since 1945, including electronic music. A discussion of the development of Jazz and American Popular Song will be included.

**MUSA230701**  
**Musics of Asia**  
**DINEEN, DOUGLASS**  
**Fall 2019**  
This course offers an approach to Asian culture focusing on music and the performing arts. Case studies from India, Tibet, China, Japan, Korea, and Indonesia highlight the profound richness of musical experience seen throughout Asia while providing the foundation for a broader analysis of music-as-culture. Examining how music is deployed--in religious expression, political and social strategies, identity formation, and entertainment--reveals both continuities in musical uses/meanings and diversity in its cultural, social, and personal dimensions. This course locates contemporary Asian performing arts in their historical contexts, considers the transformations that take place as music flows across borders, and examines the interplay between global information networks and local forms and representations.

**Credits:** 03  
**Schedule:** T TH 12*  
**Room:** STOKES HALL 195S  
**Satisfies Core Requirement:** Cultural Diversity  
**Comments:** Cross-cultural course within the major/minor. The ability to read Western music notation is not required.

MUSA230901
Music and Culture in the Middle East
LUCAS, ANN E
Fall 2019
This course explores the relationship between different music traditions of the Middle East and their respective cultural contexts. It addresses issues of music's structure and content vis-a-vis its role in social, political and religious situations in the region; the ways that these forces influence musical aesthetics, while also addressing the role of music in the Middle East historically. The cultural areas covered in this class include the Arab World, Iran, Turkey, and Afghanistan.

MUSA233001
History of Jazz
MANGIN, TIMOTHY R
Fall 2019
A history of America's music from its origins in African traditions through the contemporary scene. The course will explore its African roots; its consolidation in New Orleans and its spread into the cultural mainstream in the Jazz Age; its transformation into bebop, cool, third stream, funk, and avant-garde trends; and the return to traditionalism. Key figures covered will be Armstrong, Ellington, Parker, and Marsalis, among others.
MUSA241001
The Music Industry
JAMES, DONALD J
Fall 2019
This course examines the music industry--broadly considered--from song publishing in the eighteenth century through the streaming era today. Taking a historical approach, we will place special emphasis on creative and cultural labor and the ways in which those who create and produce music have negotiated transformation in media, technology, and business. While our focus will be primarily on the U.S. popular music industry, we'll periodically consider industry in the Western classical tradition and world musics. Topics will include song publishing, copyright, performance rights, labor unions, the record industry, social networks, and streaming platforms.

MUSA310601  
Counterpoint I  
PARK, BENJAMIN M  
Fall 2019  
In this course we will study the fundamentals of two- and three- part polyphonic styles. Using the principles of species counterpoint, we will acquire a dependable contrapuntal technique to write short compositions, first in two parts and eventually in three. Assignments will include short works in free imitation, strict canon, and invertible counterpoint. Our studies will include a brief survey of the historical origins of Western polyphony and analysis of contrapuntal compositions of the Baroque period.

MUSA312001  
Seminar in Composition  
GAWLICK, RALF Y  
Fall 2019  
The course will be conducted in two parts. One: class will meet once a month. Works in both tonal and twentieth century idioms will be discussed and used as models for student compositions. Two: each student will meet once a week with the instructor for a private studio composition lesson. The student will complete, by the end of the semester, three original compositions: theme and variations, a movement for string quartet, and a song cycle for voice and piano. The purchase of Finale music software, created by Coda Music Technology, Mac or PC version, is required for this course.
MUSA313001
Orchestration
LEE, THOMAS O
Fall 2019
The study of individual instruments of the orchestra and their groupings. Score readings and analytical studies of major orchestra works from the baroque, classical, romantic, and the modern periods. Expert musicians from the Boston area will come to class and perform student works. Monthly trips to Jordan hall at the New England Conservatory of Music for concerts of orchestral music by the New England Conservatory Philharmonic and Symphony Orchestras. This course is essentially a continuation of Seminar in Composition. There will be four composition assignments. A work for woodwind quartet, one for brass quartet, one for percussion instruments, and a final project for chamber orchestra. Your own copy of the music notation software Finale is required for this course.

Senior Seminar
NOONE, MICHAEL J
Fall 2019
For music majors in their senior year (exception only by special permission). Through supervised reading, research, writing, discussion, and performance, this seminar will help majors develop a framework for synthesizing their various courses into a coherent whole, with special emphasis in the area of strongest interest (theory, composition, history, cross-cultural studies, or performance). It will also help prepare students for examinations in listening repertoire and ear-training (see major requirements).

Music Academic Courses: Spring 2020

**MUSA108001**  
Keyboard Skills  
**MURPHY, EMILY; HATTORI, AYAKO M**  
**Spring 2020**  
Keyboard Skills is a corequisite for each of the following theory courses: MUSA1100 Fundamentals of Music Theory, MUSA2100 Harmony, and MUSA3100 Chromatic Harmony. In weekly 30-minute lessons, students will learn and demonstrate the practical understanding of scales, chord progressions, and the ability to play short compositions on the keyboard. Times to be determined once class begins. Students must be enrolled in MUSA1100, MUSA2100, or MUSA3100 to participate.

**MUSA109001**  
Ear Training/Sight-Singing Lab  
**BURGO, MICHAEL**  
**Spring 2020**  
In meetings twice a week students learn to sing melodies by sight through a solfege system of drilling scales and intervals (sight-singing) and learn to notate melodic, rhythmic, and harmonic patterns (ear-training). The course principally helps students pass the Ear Training/Sight Singing requirement for the major but can benefit individuals in singing groups or those who wish to improve their practical musical skills. Preference given to majors and minors. Usually taken concurrently with MUSA2100 Harmony or MUSA3100 Chromatic Harmony.

Fundamentals of Music Theory
PARK, BENJAMIN M
Spring 2020
An introductory music theory course designed for students with a strong interest in music. As a Core course it includes speculations on how musical discourse informs our perception and understanding of the world around us. Students learn to acquire skills in music notation and transcription. The following theoretical concepts will be extensively covered: notation of pitch and rhythm, scales, intervals, chords, and harmonic progression. Students leave the course prepared for upper level study in music theory and will begin to question broader issues concerning the meaning and use of music.

History of Popular Music
MCCOOL, JASON
Spring 2020
From the blues to country, jazz to rock, our nation’s political, social, and economic history has been mirrored and influenced by the styles of popular music developed in our cultural melting pot. This course will provide an overall history of popular music in America, with emphasis upon mainstream popular music since 1954. Its focus will be on the independence and interdependence of black and white musical cultures in America. Students will learn stylistic developments in popular music and acquire interpretive strategies, including methods of aural analysis that will view popular songs as historical texts and as autonomous works of art.

MUSA213001
Education Through Music
GAWLICK, BARBARA S
Spring 2020
This is a course in general education, especially appropriate for majors and minors in education and music. The objectives of this course are to equip prospective teachers with strategies and methods of teaching and integrating music within the PreK-12 curriculum and to develop basic music competencies and understanding to engage a student's artistic, emotional, cognitive, physical, and psychological faculties. These objectives will be addressed through a variety of experiences: assigned readings, writings and research projects on topics of music philosophy and aesthetics, theories of children's musical development/learning, teaching methodologies and materials, hands-on activities, and in-class teaching opportunities.

Spring 2020
A study of the development of Western music from the first stages of musical notation in the Middle Ages through the polyphonic music of the sixteenth century. Both sacred and secular traditions will be considered, including Gregorian chant, the polyphonic Mass and motet, the chanson, and the madrigal of the sixteenth century. Although most of the literature of this period is vocal, a study of the instruments and instrumental literature will be included.

MUSA230301  
Afro-Brazilian Musical Worlds
DINEEN, DOUGLASS

Spring 2020
This course will take students on a deep dive into the rich worlds of Afro-Brazilian music and culture. Unpacking quintessentially Brazilian forms, such as samba and bossa nova, we will discover a complex (and sometimes uncomfortable) combination of African- and European/American-derived elements. Next, we will home in on the music of Candomble. In this Afro-Brazilian religious form, students will discover direct sonic and cultural connections to African practices and trace close links to other communities in the African diaspora. We will also focus on capoeira, a Brazilian art combining music, dance, and martial arts, and on the musics of carnival in Bahia—the source and center of Afro-Brazilian culture. Throughout the semester, we will consider music’s roles in identity formation, in the making of national stories, and in social and cultural resistance to those narratives. Students will experience Afro-Brazilian music culture through listening, study, and embodied engagement (i.e., music making and moving to it). There are no academic or music-skills prerequisites for this course.

MUSA230601
Musics of Africa
MANGIN, TIMOTHY R

Spring 2020
This course is a survey of the musical diversity and cosmopolitanism of one of the world’s most populous continents. Drawing from ethnographic studies of African musics, we will explore some of the political, economic, and historical circumstances out of which certain genres and styles of music emerge and at the ways in which these genres and styles circulate in global music and performance markets.

MUSA230801
Music in the Medieval Islamic World
LUCAS, ANN E
Spring 2020

This course examines the nature of music in the medieval Islamic world and its relationships with cultural factors that shaped the history of the Arabic, Persian, and Turkish speaking worlds after the rise of Islam. The course will cover a period of history from the rise of the Ummayad Caliphate (c. 660), through the Perso-Islamic empires of the thirteenth, fourteenth, and fifteenth centuries. Some aspects of music under the Safavid and Moghul Empires during the sixteenth century will also be addressed. Topics covered in this course include: the place of music in the context of Islamic philosophy, the function of music within the Islamic Caliphate, the use of music in Islamic mysticism, and musical changes that occurred in response to the changing nature of Islamic Empire.

MUSA241001
The Music Industry
JAMES, DONALD J
Spring 2020
This course examines the music industry--broadly considered--from song publishing in the eighteenth century through the streaming era today. Taking a historical approach, we will place special emphasis on creative and cultural labor and the ways in which those who create and produce music have negotiated transformation in media, technology, and business. While our focus will be primarily on the U.S. popular music industry, we'll periodically consider industry in the Western classical tradition and world musics. Topics will include song publishing, copyright, performance rights, labor unions, the record industry, social networks, and streaming platforms.

**MUSA310001**  
**Chromatic Harmony**  
**GAWLICK, RALF Y**  
**Spring 2020**

This course covers the basic principles of chromatic progression. The proper use of secondary dominants, diminished seventh chords, and augmented triads precedes an in-depth study of the harmonization of Bach chorales, the concept of modulation using modal exchange, and the introduction of Neapolitan sixth and augmented sixth chords. We will study via harmonic and form analysis the works of great composers including Bach, Haydn, Mozart, Beethoven, Schubert, Schumann, Chopin, Brahms, Wolf, Mahler, and Wagner.

MUSA311001
Form and Analysis: Methodological Approaches to the Study of Music from Bach to Webern
LEE, THOMAS O
Spring 2020
The focus of this course is in two parts. In part one, we will look at large forms in the Romantic music repertory. We will study Robert Schumann's song cycle "Dichterliebe," and Frederic Chopin's "Preludes, opus 28." In part two, we will study the techniques and methods behind some of the music of the twentieth century. For instance, the music of Arnold Schoenberg, Anton Webern, Milton Babbitt, Steve Reich, and others.

MUSA312001
Seminar in Composition
LEE, THOMAS O
Spring 2020
The course will be conducted in two parts. One: class will meet once a month. Works in both tonal and twentieth century idioms will be discussed and used as models for student compositions. Two: each student will meet once a week with the instructor for a private studio composition lesson. The student will complete, by the end of the semester, three original compositions: theme and variations, a movement for string quartet, and a song cycle for voice and piano. The purchase of Finale music software, created by Coda Music Technology, Mac or PC version, is required for this course.
MUSA312601
Tonal Composition
GAWLICK, RALF Y
Spring 2020
Students enrolled in this course will complete three composition projects: (1) a three-part fugue in the Baroque style of J.S Bach, (2) a Sonata-Allegro first movement in the Classical style of Haydn or Mozart, and (3) a Rondo or Scherzo movement in the Romantic style of Beethoven, Mendelssohn, Schubert, or Schumann. We will examine representative works of these composers in these genres to serve as models for the student compositions.

MUSA327001
Beethoven
MCGRANN, JEREMIAH W
Spring 2020
An introduction to Ludwig van Beethoven (1770-1827), tracing his intellectual development within the culture and society of the Rhenish Enlightenment, his musical enrichment of the High Classicism of Mozart and Haydn (among others), and the heroic style of his best known works to his feelings and expressions of musical and social isolation in his last years, and his problematic identity with the burgeoning romantic movement in Germany. Emphasis will be on the music itself, concentrating on compositions from three genres: piano sonata, string quartet, and symphony. Also covered will be the concerto, his opera *Fidelio*, and the *Missa Solemnis*.

MUSA334201  
**Music and Ecstasy**  
**LUCAS, ANN E**  
**Spring 2020**  
This course examines the many different contexts where music is used to attain an altered state of consciousness. Throughout the world, music is actively used to drastically alter the emotions, perceptions, and actions of listeners in order to transport them into another state of being. This class deals with music's relationship with specific practices of mysticism, shamanism, and magic; it also explores the specific musical structures associated with altered states of consciousness and analyzes general questions of music versus other factors in achieving an altered state of consciousness.

MUSA335001
The Beatles: From "Yesterday" to "Tomorrow Never Knows"
JAMES, DONALD J
Spring 2020
Everyone loves the Beatles. In this class, we explore why that is the case. We will chart the rapidly changing idiom of popular music in the 1960s and outline its interaction with various social, political, and cultural movements, such as "Beatlemania" and psychedelia. The primary source material for this class is the established canon of Beatles songs, albums, and films, which we will supplement with secondary articles, reviews, and interviews. This course will challenge you to listen critically to, and think deeply about, one of the most influential bands in the twentieth century.

Music Performance Courses: Fall 2019

MUSP161501
Irish Fiddle/Experienced Beginner
FALLS KEOHANE, SHEILA E
Fall 2019
For students who have taken a full semester of Beginner Irish Fiddle (MUSP1600) or have at least one year's experience playing the violin. This class will help students continue in the development of violin technique. Students will learn more advanced Irish dance tunes with some beginning ornamentation (bowing and fingerling). Students may take the experienced beginner class for more than one semester until they feel ready to move to the Intermediate level. Violin rentals are possible. A small portable recorder is required. Fall participants may continue in spring semester, but new students may not enroll in spring semester.

MUSP162001
Traditional Irish Dance
HAGGAN, CAITLIN M
Fall 2019
This course will introduce students to the traditional dances of Ireland, including solo step dance footwork and group set and ceili dances. The class will include warm-ups, technique, and choreography, as well as occasional short readings, video viewings, and music listening exercises. Students will gain an understanding of Irish traditional musical rhythms, while physically embodying their intrinsic connection to the dance patterns. An uplifting and invigorating class. All levels welcome.

MUSP167001  
African Music Ensemble  
MANGIN, TIMOTHY R; TOURE, AMADOU L  
Fall 2019  
This ensemble is a hands-on introduction to Senegalese drumming and dancing. Students will learn to play different drums and rhythms from a Senegalese master drummer. Since dance is an integral part of Senegalese drumming, students will also learn basic dance moves and gestures. The instructor is a descendent from a long line of griots (hereditary musicians, dancers, drummers, and praise singers) and will teach the class musical and cultural traditions passed down to him and his family over the centuries. Students will also have the opportunity to learn new compositions by Senegalese drummers. This ensemble requires regular attendance and participation. There are no pre-requisites.

Introduction to Improvisation
KNIFFIN, ERIC L
Fall 2019
Improvisation is a central feature of many Western musical styles. This course offers students the opportunity to learn how to improvise in jazz, blues, and rock. In a hands-on manner, students are introduced to the fundamental concepts of improvising. No prior experience is necessary, and there is no prerequisite, but you should have at least some experience playing an instrument or singing. In addition to extensive in-class performance, accompaniment recordings are provided for practice outside class.

Fall 2019

---
For students who have at least three years experience playing the violin (classical or traditional Irish) or who have taken the Experienced Beginner class (MUSP1615) and who the instructor feels is ready for the intermediate level. Traditional music will be taught with a focus on ornamentation, bowing, and style. Airs and dance music of Ireland will be covered along with music of the ancient Bardic harpers and court musicians. Violin rentals are possible. A small portable recorder is required.

B.C. bOp! Jazz Ensemble
BONAIUTO, SEBASTIAN

Fall 2019
B.C. bOp! is an ensemble dedicated to the highest levels of instrumental and vocal jazz performance. Membership is determined by audition. Instrumentation for B.C. bOp! consists of five saxophones, five trumpets, four trombones, piano, guitar, bass, drums, auxiliary percussion, and a vocal ensemble of four to six mixed voices. B.C. bOp! performs jazz and popular music from the 1940's to the 1990's and appeals to a wide range of musical tastes.

Music Performance Courses: Spring 2020

MUSP161501
Irish Fiddle/Experienced Beginner
FALLS KEOHANE, SHEILA E
Spring 2020
For students who have taken a full semester of Beginner Irish Fiddle (MUSP1600) or have at least one year's experience playing the violin. This class will help students continue in the development of violin technique. Students will learn more advanced Irish dance tunes with some beginning ornamentation (bowing and fingering). Students may take the experienced beginner class for more than one semester until they feel ready to move to the Intermediate level. Violin rentals are possible. A small portable recorder is required. Fall participants may continue in spring semester, but new students may not enroll in spring semester.

MUSP162001
Traditional Irish Dance
HAGGAN, CAITLIN M
Spring 2020
This course will introduce students to the traditional dances of Ireland, including solo step dance footwork and group set and ceili dances. The class will include warm-ups, technique, and choreography, as well as occasional short readings, video viewings, and music listening exercises. Students will gain an understanding of Irish traditional musical rhythms, while physically embodying their intrinsic connection to the dance patterns. An uplifting and invigorating class. All levels welcome.

**MUSP167001**  
**African Music Ensemble**  
**MANGIN, TIMOTHY R; TOURE, AMADOU L**  
**Spring 2020**  
This ensemble is a hands-on introduction to Senegalese drumming and dancing. Students will learn to play different drums and rhythms from a Senegalese master drummer. Since dance is an integral part of Senegalese drumming, students will also learn basic dance moves and gestures. The instructor is a descendent from a long line of griots (hereditary musicians, dancers, drummers, and praise singers) and will teach the class musical and cultural traditions passed down to him and his family over the centuries. Students will also have the opportunity to learn new compositions by Senegalese drummers. This ensemble requires regular attendance and participation. There are no pre-requisites.

**Credits:** 00  
**Schedule:** BY ARRANGEMENT
MUSP175001
Popular Styles Ensemble
KNIFFIN, ERIC L
Spring 2020
Regular participation and coaching in jazz, rock, and fusion styles in small group sessions. Any appropriate instruments are welcome.

MUSP176001
Introduction to Improvisation
KNIFFIN, ERIC L
Spring 2020
Improvisation is a central feature of many Western musical styles. This course offers students the opportunity to learn how to improvise in jazz, blues, and rock. In a hands-on manner, students are introduced to the fundamental concepts of improvising. No prior experience is necessary, and there is no prerequisite, but you should have at least some experience playing an instrument or singing. In addition to extensive in-class performance, accompaniment recordings are provided for practice outside class.
MUSP176601
Intermediate Improvisation
KNIFFIN, ERIC L
Spring 2020
This course focuses, in a hands-on manner, on three elements of improvisational skill in jazz, blues and rock as it advances from the basic concepts of improvisation introduced in Introduction to Improvisation. The course embraces different styles of improvisational music and directs attention to recognizing and responding to these styles in performance situations.

MUSP177001
Gospel Workshop
JACOB, SHANNON D
Spring 2020
This course is a study and performance of the religious music of the Black Experience known as Spirituals and Gospels. One major performance is given each semester. Concerts and performances at local Black churches are also presented with the Voice of Imani Gospel Choir. The Gospel Workshop will provide the lab experience for MUSA2331 (AADS2266) and MUSA2332 (AADS2285). Members of these classes will be required to attend a number of rehearsals and performances of the Gospel Workshop. Members of the classes may sing in the choir but it is not required for the course.

MUSP180001
Symphonic Band
HEALEY, DAVID P
Spring 2020
The Symphonic Band is open to the entire University community. Its members include undergraduate students, graduate students, faculty, staff, alumni, and community members. The ensemble performs largely traditional wind band music as well as large-scale orchestral transcriptions. The Symphonic Band also provides students with the opportunity to perform literature specifically designed for smaller chamber ensembles.

MUSP186001
The Boston College Early Music Ensemble
CHUBET, ANNE-MARIE
Spring 2020
The Boston College Early Music Ensemble is a small string ensemble that specializes in music of the Baroque period, including J.S. Bach, Vivaldi, Telemann, and their contemporaries. Students learn Baroque bow techniques, and have the opportunity to play solo parts in the varied concerto literature of the period. The ensemble performs in late spring both in Gasson Hall and as a part of the Arts Festival.
