In this course we will examine how large scale renewable energy projects actually get financed and built, using the structures of modern non-recourse project finance. We will examine the economics of large-scale green power production, and how it fits into the U.S. and global energy industries. Through a mixture of lectures and real-life examples students will get to see how renewable energy project finance works in actual deals that mix finance, public policy, legal, engineering, and environmental issues. The skills developed in analyzing non-recourse cash flow-based finance will be generally applicable to students interested not just in green energy, but also more widely in private equity and infrastructure investing. The course is designed to introduce students to the theory and practice of project finance in the energy and renewables sector, complementing academic finance theory with the practical aspects of financing capital intensive energy projects.

MFIN70101
Economics

HOLDERNESS, CLIFFORD G

Fall 2020
The course is intended to introduce the students to basic economic concepts such as supply and demand, market equilibrium, efficiency, opportunity costs, sunk costs, different market structures, gross domestic product (GDP), money, inflation, unemployment, and monetary policy. The course will be divided into two parts: (1) Microeconomics where the focus is on individual economic agents. In this part consumer demand, firm supply, market structure, equilibrium, efficiency, opportunity costs, and sunk costs are covered. (2) Macroeconomics where the focus is the economy as a whole. In this part the topics are GDP, growth, money, inflation, and unemployment.

Financial Management KOSTOVETSKY, LEONARD

Fall 2020

Comments: None
Status: CLOSED
This course deals primarily with a firm’s investment and financing decisions. Topics treated intensively include valuation and risk, capital budgeting, financial leverage, capital structure, and working capital management. Also discussed are financial statistical analysis and tools of planning and control. Some attention is given to financial institutions and their role in supplying funds to businesses and non-profit organizations. Section number 1 of this course will be offered on-campus and section number 12 will be offered online. Please see the link bit.ly/CSOM1 for details about the online section.

Investments JAMES, ROBERT F  
Fall 2020  
In a competitive market, investors allocate funds among financial securities in response to perceived values and subjective attitudes toward risk. This course addresses the issues that seem to determine the relative values of financial instruments and the techniques available to assist the investor in making risk/return tradeoff. The course will include the development and implementation of various pricing models of financial assets. Section numbers 1 and 2 will be offered on-campus and section number 11 will be offered online. Please see the link bit.ly/CSOM1 for details about the online section.

| **MFIN882401** | AIM: Applied Investment Management MARTENS, DAVID J  
**Fall 2020**  
This course provides an opportunity for students to utilize both theoretical and practical aspects of the investment management process by competing to actively manage a million dollar portfolio for the University. AIM1 teaches students about institutional portfolio management, asset allocation, risk assessment, investment manager evaluation, and fundamental equity analysis. Students are placed in investment teams to respond to a Request for Proposal ("RFP") in which they develop a framework for identifying and evaluating equities and bonds and managing a diversified risk-adjusted portfolio. Winning teams will be selected based on final presentations to a board of professional institutional investors and given the opportunity to manage live accounts in AIM2 during the spring semester.

| **MFIN883501** | Real Estate Finance CHAZEN, EDWARD  
**Fall 2020**  
Real Estate Finance is for graduate students to learn the ways that private and public capital sources are used to finance income-producing property. The class covers the following topics:  
1. basics of real estate financial analysis and financial statements;  
2. how to value income property and terminology unique to real estate;  
3. permanent loans;  
4. construction loans;  
5. equity financing and joint ventures;  
6. distressed debt and equity, and workouts;  
7. institutional real estate, private equity investing;  
8. Real Estate Investment Trusts (REITs);  
9. Commercial Mortgage-Backed securities (CMBS);  
10. corporate sale-leaseback financing;  
11. residential mortgage financing and the sub-prime mortgage crisis;  
12. government role in real estate finance and tax credit financing. Teaching methods include lectures, illustrative case studies, Excel-based financial exercises and videos of interviews with industry experts and representative transactions. Grades consist of a midterm exam, one individual case study report, class participation, a team case study presentation, a team presentation of a REIT stock analysis, and a final project preparing an investment memorandum for debt or equity financing of an actual property.

Ph.D. Seminar: Asset Pricing BALDUZZI, PIERLUIGI
Fall 2020
The course is intended to generate enthusiastic, high quality intellectual activity around the course material. Focuses on the development of skills that will help students become conversant enough with basic theory and the current literature on asset pricing that would permit them to read critically and analyze papers in this area, develop enough expertise in selected empirical methods in finance that they will be able to use these techniques in their research, and to find potential thesis topics.

**MFIN887001**
Data Analytics in Finance REUTER, JONATHAN M
Fall 2020
Data Analytics in Finance focuses on critical skills in programming and computation/analysis of financial data, and more importantly, pragmatic applications in portfolio management and risk management. Theoretical concepts and background for these techniques will be introduced, and the focus is on their applications and hands-on implementation utilizing software packages and programming platforms that are widely used in the industry (Python). The course will extensively focus on real-world applications of finance theory.

Entrepreneurial Finance HESSION-KUNZ, ANDREW
Spring 2021
This course introduces undergraduate students to entrepreneurial finance with a focus on the strategic financing of rapidly growing ventures. Through a combination of readings, simulations, and analysis of current news and events, students will learn to assess the value drivers of a firm, determine the capital needs and fundability of growth, assess and mitigate corporate risks, and study the strategy of potential exits. We will look at the most common vehicles for funding hyper-growth, including venture capital, angel funding, crowdfunding, and other alternatives. We will study the cost of capital, including terms, for building a balance sheet for growth.

MFIN226001
Active Portfolio Management ZIEFF, WILLIAM E
Spring 2021
The course provides an introduction to portfolio management with focus on quantitative investment process and methods. The course balances theoretical foundations with practical applications. Primary topics include asset allocation, portfolio construction including optimization, risk modeling, and risk measurement and management. Instruction will combine lectures, case discussions, and workshops, providing opportunities for students to apply quantitative methods to real world problems in several of the explored areas. The course combines investment ideas with analytics, so prior study in any or all of the following areas will make the course more enjoyable: probability/statistics (e.g., normal distributions, regression analysis), linear algebra (e.g., matrix algebra), and introductory calculus (e.g., derivatives). In addition, workshops will include use of both Microsoft Excel and Python (e.g., Jupyter Notebooks). Basic competency in each is a minimum requirement, and of course, the greater your skills, the better.

**Equity Securities Analysis AZEVEDO DUARTE SILVA, ERNE**  
**Spring 2021**

The equities securities analysis and valuation course will teach a highly rigorous approach to equities securities analysis and valuation with a heavy emphasis on in-class discussion and case study analysis. Initially, the course will focus on financial theory that underpins equity security valuation, and then move on to understand how industry structure and a company's competitive advantage influences an investor's
decision making and valuation. Financial statement analysis, modeling, and different valuation techniques will be explored in detail. Where appropriate, guest lecturers will be brought in to share their specific expertise and perspectives as an investor. By the end of the course, the goal will be to have every student be able to analyze a company as a potential investment and understand its valuation.

Private Equity GASPERONI, JAMES H
Spring 2021
This course is the study of Private Equity as an asset class and its various components. Private Equity involves the investment of capital into companies and assets that are not publicly traded on stock exchanges. The objective of the course is to provide a basic understanding of the Private Equity ecosystem: private equity companies, underlying investments in companies (or assets) and the investors that provide financing for deals. A primary focus of the course will be traditional buyout investments: an area of the capital markets that is growing in both size and opportunity as well as increasing in interest from investors. In addition, the course will consider the similarities and differences between typical buyouts and other private equity styles.

Spring 2021
This course studies the theory and practice of financial simulation and optimization using quantitative techniques that enable finance professionals to make optimal decisions under uncertainty. While theoretical material and background for these techniques will be introduced, the focus is on their applications and hands-on implementation utilizing software packages and programming platforms that are widely used in the financial industry. Topics include simulation of important probability distributions, random walks, linear and nonlinear optimization, and backtesting. Lectures draw on examples such as asset allocation under different definitions of risk; portfolio risk management; modeling asset price dynamics; trading strategies; index tracking; derivative pricing, hedging, arbitrage; and capital budgeting under uncertainty and real options.

MFIN770101
Economics ROMUALDO, DOMINGOS A
Spring 2021
The course is intended to introduce the students to basic economic concepts such as supply and demand, market equilibrium, efficiency, opportunity costs, sunk costs, different market structures, gross domestic product (GDP), money, inflation, unemployment, and monetary policy. The course will be divided into two parts: (1) Microeconomics where the focus is on individual economic agents. In this part consumer demand, firm supply, market structure, equilibrium, efficiency, opportunity costs, sunk costs, different market structures, gross domestic product (GDP), money, inflation, and unemployment. (2) Macroeconomics where the focus is the economy as a whole. In this part the topics are GDP, growth, money, inflation, and unemployment.

MFIN770401
Financial Management D'ACUNTO, FRANCESCO
Spring 2021
This course deals primarily with a firm's investment and financing decisions. Topics treated intensively include valuation and risk, capital budgeting, financial leverage, capital structure, and working capital management. Also discussed are financial statistical analysis and tools of planning and control. Some attention is given to financial institutions and their role in supplying funds to businesses and non-profit organizations. Section number 1 of this course will be offered on-campus and section number 12 will be offered online. Please see the link bit.ly/CSOM1 for details about the online section.

MFIN880101
Investments JAMES, ROBERT F
Spring 2021
In a competitive market, investors allocate funds among financial securities in response to perceived values and subjective attitudes toward risk. This course addresses the issues that seem to determine the relative values of financial instruments and the techniques available to assist the investor in making risk/return tradeoff. The course will include the development and implementation of various pricing models of financial assets. Section numbers 1 and 2 will be offered on-campus and section number 11 will be offered online. Please see the link bit.ly/CSOM1 for details about the online section.

**Management of Financial Institutions JAMES, ROBERT F**
Spring 2021
This course considers banks and other financial institutions as information and deal-making entities. This broad perspective is used to explain how and why changing information and contracting technologies are altering the structure of the financial services industry and financial regulation. Lectures explore the implications of these ongoing changes for the methods financial institution executives should use to measure and manage an institution’s risk and return.

**Credits: 03**

**AIM2: Applied Portfolio Management MARTENS, DAVID J**
Spring 2021
Students in AIM2 will actively manage a million dollar portfolio for the University during the spring semester. Teams will implement strategies that they formulated during the fall semester. Students are expected to fundamentally analyze stocks, develop buy/sell recommendations, and monitor company news that may result in material changes to target prices. This hands-on learning builds competency in the areas of portfolio management, investment research, sales and marketing, back-office operations, portfolio accounting, custody platforms, trading, and settlement procedures.

**MFIN884001**
**International Finance ALBUQUERQUE, RUI**
Spring 2021
This course introduces students to identifying and managing currency risk by providing a description of the international financial markets, their products, and applications. The course presents an overview of international money markets, bond markets, the foreign exchange spot and forward markets, and foreign exchange derivative markets. The course sets to identify nominal international risk factors that firms might be exposed to and discusses several of the recent international banking and currency crises. Students are introduced to a variety of financial tools or derivative products that can be used to hedge part or all of the exposure to these risk factors; foreign currency futures, options, forward contracts, and swaps.

Information Systems Courses: Summer 2020  
ISYS216002  
Intro to Programming using Swift for iOS App Development GALLAUGHER, JOHN M  
Summer 2020  
In this fast-paced course, students will learn the Swift programming language and iOS app development skills. Using a "flipped-classroom" approach, the students take lectures in a series of online videos embedded in a web-based course/reference/quiz book, following along with videos as they learn programming concepts and build apps. Although this is a flipped class, expect a challenging course. Class is mandatory (this is NOT an online course) and class time will be used for additional exercises, concept review, and student questions. Students are required to bring a fully-charged Mac laptop to each class with the latest version of Apple's free Xcode software installed (make sure you have access to a Mac that meets these requirements before enrolling). While this course is rigorous, challenging, and covers a broad set of topics at a rapid pace, the course assumes no prior programming experience. Students should be prepared to spend significant time each week on self-directed learning and regular programming projects.  
This course can be used in place of ISYS 2157 Programming for Management for credit toward the Information Systems concentration.

FinTech Revolution: Disruptive Technologies, Blockchain, and Future of Finance KARPOVSKY, ANNA
Summer 2020
FinTech is the intersection of finance, technology, and regulation. The course aims to help students understand FinTech and recognize the challenges and opportunities the FinTech innovations pose. Students gain a basic understanding of the foundations and principles that enabled the rise of FinTech and examine cases for a more in-depth analysis of specific innovations such as blockchain and cryptocurrencies. The course advances students' knowledge of FinTech, much needed skill in the industry, and gives students insight into the applications, limitations, and risks of technological innovations in finance. The main goal of the course is to develop basic vocabulary and to understand the key technical terms related to FinTech technologies.

Data Analytics 2: Management and Data Skills SPANG, JOHN J
Summer 2020
Information Technology (IT) systems permeate the strategy, structure, and operations of modern enterprises. It has become a major generator of business value, especially for organizations that have the right set of resources and capabilities to exploit it. IT is essential that managers become fluent with IT so that they can promote innovative strategic initiatives that are increasingly IT dependent. In this course, students will obtain a broad overview of IT fundamentals, key emerging technologies, and IT managerial frameworks. Students will develop their ability to identify new opportunities presented by IT. Section numbers 1 and 2 of this course (when offered) will be delivered on-campus and section numbers 11 and 12 (when offered) will be delivered online. Please see the link bit.ly/CSOM1 for details about the online sections.

Data Analytics 3: In Practice KARPOVSKY, ANNA
Summer 2020
Modern information systems now generate massive volumes of data. Organizations everywhere struggle to aggregate, analyze, and monetize the growing deluge of data. Business Analytics capitalizes on this data by combining statistical and quantitative analysis, explanatory and predictive modeling, and fact-based management. Managers can explore patterns, predict future trends and develop proactive, knowledge-driven decisions that affect all parts of modern organizations. This course provides students with a pragmatic familiarity with the capabilities and limitations of emerging analytics techniques, an introduction to the R statistical computing software, an overview of methods and tools, and a core understanding required to be an intelligent manager, designer, and consumer of analytics models.

Digital Technologies: Strategy and Use LI, ZHUOXIN
Fall 2020
This class was formerly known as Computers in Management. Digital technologies play a vital and varying role in management. In this course we approach the subject in two ways. In one module students learn to use technology as a tool for problem solving by developing increasingly sophisticated models in Excel. The other module provides an introduction to management viewed through the lens of technology. Students examine the role of technology in promoting innovation and organizational competitiveness across a variety of functional areas of the firm (e.g., marketing, finance, operations).

Intro to Programming using Swift for iOS App Development GALLAUGHER, JOHN M
Fall 2020
In this fast-paced course, students will learn the Swift programming language and iOS app development skills. Using a "flipped-classroom" approach, the students take lectures in a series of online videos embedded in a web-based course/reference/quiz book, following along with videos as they learn programming concepts and build apps. Although this is a flipped class, expect a challenging course. Class is mandatory (this is NOT an online course) and class time will be used for additional exercises, concept review, and student questions. Students are required to bring a fully-charged Mac laptop to each class with the latest version of Apple's free Xcode software installed (make sure you have access to a Mac that meets these requirements before enrolling). While this course is rigorous, challenging, and covers a broad set of topics at a rapid pace, the course assumes no prior programming experience. Students should be prepared to spend significant time each week on self-directed learning and regular programming projects. This course can be used in place of ISYS 2157 Programming for Management for credit toward the Information Systems concentration.

Technology and Culture GRIFFITH, WILLIAM
Fall 2020
This interdisciplinary course will first investigate the social, political, psychological, ethical, and spiritual aspects of the Western cultural development with a special emphasis on scientific and technological metaphors and narratives. We will then focus on the contemporary world, examining the impact of our various technological creations on cultural directions, democratic process, the world of work, quality of life, and especially on the emergent meanings for the terms "citizen" and "ethics" in contemporary society. Students will explore technologies in four broad and interrelated domains: (1) computer, media, communications, and information technologies, (2) biotechnology, (3) globalization, and (4) environmental issues.

Design Thinking and Strategy DICKINSON, KRISTINE D
Fall 2020
"Design thinking is a human-centered approach to innovation that draws from the designer's toolkit to integrate the needs of people, the possibilities of technology, and the requirements for business success." - Tim Brown, CEO of IDEO. Strategic design thinking is an integral driver of innovation and a significant factor in a business' ability to foresee and adapt to customer needs. Companies like Apple, IDEO, and Pixar are all pioneers in the field, and this course will draw directly from their proven methods. Students will learn the various phases of design thinking, and how to apply a customer-centric approach to products and services in a range of industries. Students will delve into topics such as user experience (UX) product design, creative problem-solving, strategic storytelling, and customer-centric business decision making. Course content will include team projects, case studies, and occasional guest lectures from industry experts. The class will be highly focused on practical experimentation and is directly relevant for students interested in product and brand management, marketing strategy, entrepreneurship, and beyond.

TechTrek East KANE, GERALD C; DOYLE, JEREMIAH T
Fall 2020
The Shea Center presents TechTrek East, a 3-credit, field-study course combining class work with a weekend field study in New York City and several local Boston trips. During the trips students will meet with senior executives, entrepreneurs, and venture capitalists in technology industry firms. While focusing on the tech industry, TechTrek is designed to appeal to all majors. Course work and visits will have a managerial focus, highlighting executive, marketing, finance, operations, and R&D functions.

Managing Digital Innovation FICHMAN, ROBERT

Fall 2020

The steady march of Moore's Law has accelerated the introduction of new products, processes, and business models enabled by digital technology. These digital innovations are transforming how we live and work, how companies compete, and the structure of entire industries. This course will provide students with the concepts and frameworks they will need to: (1) understand the nature of digital innovations and the factors affecting their emergence and diffusion, (2) identify and evaluate digital innovation opportunities (and threats), (3) manage the digital innovation process in organizations, and (4) evaluate the effects of digital innovation on business and society.

Data Analytics in Practice II KOKKODIS, MARIOS

Fall 2020

This course is a continuation of Data Analytics in Practice (ISYS334001). Having Python at its core, the course covers advanced data manipulation and modeling techniques, including random forest, gradient boosting, and deep and shallow neural networks. By using data from real business applications, students learn to use advanced modeling techniques that inform practical managerial decisions. This course meets twice a week in class. The class format includes (1) lectures that cover analytical methods and principles of good practices and (2) application of these methods to real data using Python. The goal of the course is for students to develop a deeper understanding of the nuances of analytical models and to get exposed to state-of-the-art, advanced algorithms that can inform managerial decisions.

ISYS336001

Machine Learning and Artificial Intelligence RANSBOTHAM, SAMUEL

Fall 2020

Machine Learning and Artificial Intelligence won't replace managers in the near term, but managers who use ML and AI will replace those who don't. Organizations now have too much data and not enough time for managers to consume in spreadsheets. Instead, the future of work involves managers working with machines to design algorithms that, for example, segment customers, forecast sales, schedule preventative maintenance, or predict markets. This course addresses both the technical and managerial aspects of these applications. Technically, the course applies a variety of classifiers, networks, and trees to machine learning contexts. Students then evaluate and tune these models in supervised and unsupervised scenarios. Examples will use R; students need to have a basic understanding of

Social Media, Emerging Technologies, and Digital Business SUTTON, LINDSAY A
Fall 2020
The past few years have witnessed the rapid rise of a number of new types of information technologies, such as social media, so-called "sharing economy" platforms, artificial intelligence, blockchain, internet of things, virtual and augmented reality, just to name a few. These new tools both present immense opportunities and pose considerable threats for businesses of all sizes and across industries. This course explores the impact that these tools are having on the competitive environment, as well as the characteristics that companies, leaders, and employees will need to possess in order to thrive in this new environment increasingly defined by digital tools. Additionally, this course both learns about and learns with these information technologies in novel ways.

ISYS662501
Geographic Information Systems for Planning and Decision-Making COHEN, WILL W
Fall 2020
Large quantities of information are available to describe our social and physical environment with high detail, but making sense of this data requires specialized skill sets. Geographic Information Systems (GIS) is a general approach to analysis and is a powerful set of tools for understanding complex problems or for making a compelling argument about issues grounded in the physical or social environment. It is widely used in the public and private sectors. This course will introduce students to the use of GIS and representation as a means of looking at and representing spatial data. Students will learn how to perform the three broad steps of spatial analysis: (1) collecting and organizing data, (2) analyzing this data for appropriate patterns, and (3) using software to represent data on maps to support decision making.

Credits: 03
ISYS664101
Special Topics: Cybersecurity Strategy and Management EVENCHIK, LEONARD N
Fall 2020
The challenges and issues of cybersecurity are everywhere, and today, these are not just technical issues, but critically important business issues for all levels of management. The goal of this course is to develop an understanding of cybersecurity principles, procedures, tools and technology from a managerial perspective. The first part of this course is a discussion of why cybersecurity is a difficult and pervasive problem. We then learn about the different types of threats and study the tools and techniques that society, organizations, and individuals have to mitigate them, with a focus on risk management and internal controls. We will also explore a number of new areas of work including cryptocurrency and the security requirements for the Internet of Things (IoT). An important part of the course will be team projects at the end of the term, where students apply the concepts and techniques we have studied to a real-world management problem or challenge.

ISYS665501
Business Applications of Blockchain and Cryptocurrency COLLEN, BENNETT I
Fall 2020
The objective of this course is to introduce the business of blockchain—a technology that has the potential to drastically alter the way value is stored, exchanged, shared, and distributed. It is the backbone of the next iteration of the Internet: Web 3.0 or The Internet of Value. This course does not require any technical knowledge or prior knowledge of the subject, and is designed to give students a foundational knowledge of blockchain technology and a familiarity with the basic principles that govern blockchain protocols. Students will obtain a fluency in the terms and concepts required to understand how this powerful technology works. Most importantly, students will study real-world applications of the technology, which range far beyond blockchain's original use case (cryptocurrency) and hear from a number of influential guest speakers who are using or investing in blockchain technology at their companies today. Students who complete the course will understand blockchain and cryptocurrency's game-changing potential, be able to separate fact from hype, and be effective leaders in the space.

ISYS770012
Data Analytics 2: Management and Data Skills WYNER, GEORGE M
Fall 2020
Data has become an ever more powerful source of competitive advantage for modern enterprises. New technologies and business practices have led to an "orders of magnitude" change in the amount of data available for analysis, as well as to techniques, often referred to as analytics or business intelligence, which are now available to derive meaning from that data. It is essential that managers develop a deep understanding of how data can be structured,
captured, and queried in order to support operations, decision-making, and strategic insight. This course provides students with a deeper understanding of data by exploring the methods by which data is modeled, databases are designed, and data is queried from those databases, and by developing an understanding of how this capability can be integrated into an organization to obtain a competitive advantage. Topics include entity relationship diagramming, the relational database model, and in depth coverage of SQL, as well as a consideration of managerial best practice as exemplified in current business examples.

### ISYS216001
Intro to Programming using Swift for iOS App Development

**GALLAGHER, JOHN M.**

**Spring 2021**

In this fast-paced course, students will learn the Swift programming language and iOS app development skills. Using a "flipped-classroom" approach, the students take lectures in a series of online videos embedded in a web-based course/reference/quiz book, following along with videos as they learn programming concepts and build apps. Although this is a flipped class, expect a challenging course. Class is mandatory (this is NOT an online course) and class time will be used for additional exercises, concept review, and student questions.

While this course is rigorous, challenging, and covers a broad set of topics at a rapid pace, the course assumes no prior programming experience. Students should be prepared to spend significant time each week on self-directed learning and regular programming projects. This course can be used in place of ISYS 2157 Programming for Management for credit toward the Information Systems concentration.

### ISYS225501
Managing Projects

**COAKLEY, CHARLES E.**

**Spring 2021**

This course takes a holistic approach to planning, organizing, and controlling projects. It looks at how projects are uniquely suited to support an organization's strategy in a fast-paced business environment. Topics include project life cycle, algorithms and statistical concepts underlying network planning models, managing risk, and resource allocation. Microsoft Project will be used as to support the planning and monitoring phases of project management. The conceptual part of this course is framed with an eye to the behavioral realities a manager faces and the psychology of managing project teams.

### ISYS317801
Design Thinking and Strategy

**DICKINSON, KRISTINE D.**

**Spring 2021**

"Design thinking is a human-centered approach to innovation that draws from the designer’s toolkit to integrate the needs of people, the possibilities of technology, and the requirements for business success." - Tim Brown, CEO of IDEO. Strategic design thinking is an integral driver of innovation and a significant factor in a business’ ability to foresee and adapt to customer needs. Companies like Apple, IDEO, and Pixar are all pioneers in the field, and this course will draw directly from their proven methods. Students will learn the various phases of design thinking, and how to apply a customer-centric approach to products and services in a range of industries. Students will delve into topics such as user experience (UX) product design, creative problem-solving, strategic storytelling, and customer-centric business decision making. Course content will include team projects, case studies, and occasional guest lectures from industry experts. The class will be highly focused on practical experimentation and is directly relevant for students interested in product and brand management, marketing strategy, entrepreneurship, and beyond.

### ISYS320501
TechTrek West--Undergraduate

**KANE, GERALD C; DOYLE, JEREMIAH T.**

**Spring 2021**

Enrollment is limited. Admission is competitive, and applications are available at www.bc.edu/techtrek. Interested students can contact the instructor for application details. TechTrek West is a 3 credit, field-study course combining class work and due to the COVID situation one hour Zoom meetings with entrepreneurs, venture capitalists, and other executives throughout the semester. The class focuses on how to develop an entrepreneurial mindset, which is critical for numerous fields both in the wake of COVID and with the increasing digitalization of work and society. TechTrek is designed to appeal to all majors. The class will meet in a cohort model, with students attending in-person classes every other week and an average of 1-2 Zoom meetings each week outside of class time. Course work and visits will have an entrepreneurial focus, helping students identify and explore their own interests in relation to the increasing digitalization of the business environment. Applications are available at www.bc.edu/techtrek, and students will be admitted on a rolling basis during registration.

ISYS334001
Data Analytics in Practice TEODORESCU, MIKE
Spring 2021
Organizations everywhere struggle to aggregate, analyze, and monetize the growing deluge of data generated by modern information systems. Data analytics capitalizes on this data by processing, transforming it, and subsequently applying statistical and quantitative analysis and explanatory and predictive modeling. Managers can explore patterns, predict future trends, and develop proactive, knowledge-driven decisions that affect all parts of modern organizations.
This course will familiarize you with the capabilities and limitations of emerging analytics techniques, essential knowledge about data analytics programming and tools, and a core understanding required to be an intelligent manager and consumer of analytics. Upon completion of this course, you will be able to: perform basic data analytics tasks including: data profiling and feature engineering, data collection, transformation, and use of API, text transformation, data visualization, predictive modeling; understand biases in data and be a savvy consumer of analytics; justify decisions on the basis of analytics and identify opportunities; define problems that analytics can solve and provide data-driven solutions; use the ideas, concepts, and terminology of analytics appropriately to communicate with both business and data professionals. ISYS425801
Systems Analysis and Design STERPE, PETER J
Spring 2021
The course studies information systems (IS) development including requirements, analysis, design, and implementation phases and workflows. We investigate the roles of systems analysts; serving as intermediaries between users, managers, and implementers; and helping each to understand the needs and problems of others. The student will learn about major methods and tools used in the systems development process. Please note that Database Systems and Applications (ISYS3257/CSCI1157) must be completed prior to taking this course.
Credits: 03
Room and Schedule: FULTON HALL 230,M W 3*;
The past few years have witnessed the rapid rise of a number of new types of information technologies, such as social media, so-called “sharing economy” platforms, artificial intelligence, blockchain, Internet of Things (IoT). An important part of the course will be team projects called “sharing economy” member. Student develops a paper with publication potential.

This course will review the strategies, goals, and methodologies for designing, implementing, and evaluating appropriate internal controls and audit trails in integrated accounting systems. This course also examines the effect the Internet has had on business and its financial implications with regard to accounting information systems.

The challenges and issues of cybersecurity are everywhere, and today, these are not just technical issues, but critically important business issues for all levels of management. The goal of this course is to develop an understanding of cybersecurity principles, procedures, tools and technology from a managerial perspective. The first part of this course is a discussion of why cybersecurity is a difficult and pervasive problem. We then learn about the different types of threats and study the tools and techniques that society, organizations, and individuals have to mitigate them, with a focus on risk management and internal controls. We will also explore a number of new areas of work including cryptocurrency and the security requirements for the Internet of Things (IoT). An important part of the course will be team projects
at the end of the term, where students apply the concepts and techniques we have studied to a real-world management problem or challenge.

**Business Applications of Blockchain and Cryptocurrency** COLLEN, BENNETT I  
**Spring 2021**

The objective of this course is to introduce the business of blockchain—a technology that has the potential to drastically alter the way value is stored, exchanged, shared, and distributed. It is the backbone of the next iteration of the Internet: Web 3.0 or The Internet of Value. This course does not require any technical knowledge or prior knowledge of the subject, and is designed to give students a foundational knowledge of blockchain technology and a familiarity with the basic principles that govern blockchain protocols. Students will obtain a fluency in the terms and concepts required to understand how this powerful technology works. Most importantly, students will study real-world applications of the technology, which range far beyond blockchain’s original use case (cryptocurrency) and hear from a number of influential guest speakers who are using or investing in blockchain technology at their companies today. Students who complete the course will understand blockchain and cryptocurrency’s game-changing potential, be able to separate fact from hype, and be effective leaders in the space.

**Data Analytics 2: Management and Data Skills** EVENCHIK, LEONARD N  
**Spring 2021**

Information Technology (IT) systems permeate the strategy, structure, and operations of modern enterprises. IT has become a major generator of business value, especially for organizations that have the right set of resources and capabilities to exploit it. It is essential that managers become fluent with IT so that they can promote innovative strategic initiatives that are increasingly IT dependent. In this course, students will obtain a broad overview of IT fundamentals, key emerging technologies, and IT managerial frameworks. Students will develop their ability to identify new opportunities presented by IT. Section numbers 1 and 2 of this course (when offered) will be delivered online. Please see the link bit.ly/CSOM1 for details about the online sections.

Digital Transformation KANE, GERALD C
Spring 2021
Many legacy organizations are seeking to modernize their digital infrastructure to adapt to an increasingly digital competitive environment. Yet, oftentimes the technology is only half the battle, and effective digital transformation requires fundamental changes to culture, organizational structure, leadership style, talent models, and the like. This course provides a conceptual managerial overview of key digital technologies in today’s business environment (e.g. cloud computing, machine learning, blockchain, enterprise social media, cybersecurity) as well as the organizational changes necessary to take advantage of them. This class also makes use of many of these tools in the classroom to enable an innovative interactive educational experience that will give students hands-on experience working within a more digitally enabled environment.

MGMT102101
Organizational Behavior GRUBB, ANITZA R
Fall 2020
As an introduction to the study of human behavior in organizations, this course aims at increasing an awareness and understanding of individual, interpersonal, group, and organizational events, as well as increasing a student's ability to explain and influence such events. The course deals with concepts that are applicable to institutions of any type; a central thrust of these concepts concerns the way institutions can become more adaptive and effective. The course is designed to help the student understand and influence the groups and organizations to which he/she currently belongs and with which he/she will become involved in a later career. Note: Restrictions only apply to current Boston College students and do not apply to transfer or exchange students.

Technological Innovation and Disruption MACDONALD, JOHN A
Summer 2020
To be competitive organizations need to drive innovation in their products and services. Organizations need to innovate rapidly and in some cases this involves reinventing the enterprise to compete in disruptive business environments. The course on Technological Innovation looks closely at the company value chain and where technology can be leveraged as a source of innovation. Company vision sets the context for the type of innovation necessary to achieve sustainable competitive growth. During the course we examine the process of building innovative capability across the company value chain, developing and implementing an innovation plan and creating the capacity for sustained innovation as a competitor or disruptor.

Strategic Management LOWD, NANCY E
Summer 2020
The strategic management course deals with the overall general management of an organization. It stresses the role of the manager as strategist and coordinator whose function is to integrate the conflicting internal forces that arise from among the various organizational units while simultaneously adapting to the external pressures that originate from a changing environment. Drawing on the knowledge and skills developed in the core curriculum, this course serves as the integrating experience for the M.B.A. program.

In today's world, there are many challenges that call for effective leadership. Corporate ethics scandals, an increasingly global and diverse work force, and the need for employees to experience renewed meaning and connection to their work are just a few examples. How we respond to these challenges can profoundly change the world in which we live and work. In this course, we learn about the challenges and opportunities of effective leadership and how leaders, including ourselves, can respond to them.

In today's world, there are many challenges that call for effective leadership. Corporate ethics scandals, an increasingly global and diverse work force, and the need for employees to experience renewed meaning and connection to their work are just a few examples. How we respond to these challenges can profoundly change the world in which we live and work. In this course, we learn about the challenges and opportunities of effective leadership and how leaders, including ourselves, can respond to them.

Leading High Performance Teams PAYNE, MINDY A
Fall 2020
This course examines the dynamics of groups--such as teams--within organizations. One of the key questions we will investigate is what makes some teams more effective than others. Students will learn and practice high performance team fundamentals, intervening to problem solve and understand the consequences of interpersonal conflicts. The course emphasizes a diagnostic and reflection approach within varied team settings and includes an independent field analysis project relating to an actual team within an organization.

Social Impact and Entrepreneurship FRECHETTE, EDWARD K
Fall 2020
Are you moved by a particular social injustice? It could be homelessness on the streets of Boston. It could be famine in Africa. It could be wage inequality across our country. It could be one of hundreds of issues, but one that is meaningful to you. Social Impact and Entrepreneurship explores the innovative ways government agencies, nonprofit groups, and for-profit organizations are addressing societal challenges. This course will focus on understanding the building blocks of a social venture--starting with the mission and working through the operational plan, the financials, and the evaluation criteria. Students, either individually or in small groups, will create a business plan for an enterprise, grounded in her/his passion for change in a given area. Multiple case studies will be used to illustrate various topics. Open to students from all majors.

MGMT214001
Special Topics: International Management MARITAN, JAMES G
Fall 2020
The world has changed in fundamental ways over the last several decades, resulting in a more integrated, complex, and global economy. This has created new opportunities as well as new risks. How managers respond to changes in the global business environment have important implications to the firm's competitive position and overall survival. Historically it was primarily large firms that operated internationally; however, nowadays firms of all sizes are internationalizing. Thus, no matter what firm you work for or business you start after graduation, you will benefit from a strong understanding of the global business environment. We will explore a broad range of topics important to the success of businesses outside the firm's "home country," including cultural, social, political, and legal differences, international trade and investment policies, and international organizations. We will also look at issues surrounding international market entry options and competitive strategies. And finally, we will close with a review of the ways that business functions need to be adapted when operating across international markets. The course material will be presented via in-class learning, case discussion, and project work.

MGMT214301
Idea Work: Making Things That Matter ROUSE, ELIZABETH D
Fall 2020
Any change, innovation, or new thing begins with an idea. While one person might come up with an initial idea, the idea, and the thing it consequently turns into, has the potential to become better when built upon by other people. The purpose of this course is to learn how to effectively develop and work with ideas to innovate and enact change in the context of organizations and beyond. Building from research on organizational creativity, innovation, collaboration, and entrepreneurship, students will learn frameworks for understanding the influence of individuals, social processes, and context on creativity and innovation and apply these frameworks throughout the course. Students will practice the key skills of idea work—generating, connecting, communicating, evaluating, and reshaping ideas—so that they can make things that matter.

Entrepreneurial Management SHAW, DOUGLAS J
Fall 2020
Entrepreneurial opportunities often exist when industries are created or transformed by new technologies, new business models, or new product categories. This course introduces conceptual frameworks and tools that help students to identify, evaluate, launch, and grow innovative ventures that have the potential to revolutionize markets. We will discuss cases set in a range of industries including: car sharing, aviation, electronic publishing, fashion, file storage, streaming media, consulting, and food services. This course requires strong qualitative and quantitative analysis skills. There are no official prerequisites. However, to evaluate the drivers of venture profitability and to analyze business models, you will need a basic understanding of income statements and cash flows.

MGMT771001
Strategic Management KIERNER, AGNIESZKA D
Fall 2020
The strategic management course deals with the overall general management of an organization. It stresses the role of the manager as strategist and coordinator whose function is to integrate the conflicting internal forces that arise from among the various organizational units while simultaneously adapting to the external pressures that originate from a changing environment. Drawing on the knowledge and skills developed in the core curriculum, this course serves as the integrating experience for the M.B.A. program.

MGMT771101
Managing Business in Society SMITH, KATHERINE V
Fall 2020
This course deals with the complexities of managing corporate sustainability and responsibility (new CSR) in today's dynamic and ever-more difficult world. Emphases include the integration of issues related to business in society, ethics, responsibility, accountability, transparency, governance, and ecological sustainability into corporate strategies and practices. We use a strategic management lens to learn the potential sources of strategic and competitive advantage that can derive from CSR, and explore some of the problems associated with poor responsibility practices.

MGMT771202
Managing People and Organizations OPAZO, MARIA P
Fall 2020
Among the major facets of organizational management, its human dynamics have consistently proven to be the most challenging to understand, predict, and control. This course introduces the accumulated knowledge about individual, group, and system-wide behavior in organizations, as well as contemporary approaches for both diagnosing and intervening in situations at each of these systems levels. Students will be exposed to theories, concepts, and important literature in the field, with frequent opportunities to integrate and apply this knowledge.

Topics include theory construction; the development of causal models; the problems of the reliability and validity of measures, survey research, questionnaire design, sampling design, interviewing techniques, data collection,
Management and Organization Courses: Spring 2021

MGMT102101
Organizational Behavior GRUBB, ANITZA R
Spring 2021
As an introduction to the study of human behavior in organizations, this course aims at increasing an awareness and understanding of individual, interpersonal, group, and organizational events, as well as increasing a student's ability to explain and influence such events. The course deals with concepts that are applicable to institutions of any type; a central thrust of these concepts concerns the way institutions can become more adaptive and effective. The course is designed to help the student understand and influence the groups and organizations to which he/she currently belongs and with which he/she will become involved in a later career. Note: Restrictions only apply to current Boston College students and do not apply to transfer or exchange students.

Spring 2021
As an introduction to the study of human behavior in organizations, this course aims at increasing an awareness and understanding of individual, interpersonal, group, and organizational events, as well as increasing a student's ability to explain and influence such events. The course deals with concepts that are applicable to institutions of any type; a central thrust of these concepts concerns the way institutions can become more adaptive and effective. The course is designed to help the student understand and influence the groups and organizations to which he/she currently belongs and with which he/she will become involved in a later career. Note: Restrictions only apply to current Boston College students and do not apply to transfer or exchange students.

Ethical Leadership Skills NIELSEN, RICHARD P
Spring 2021
This course focuses on ethics leadership and engagement methods in different types of pre-modern, modern, and postmodern organizational and political-economic contexts. What are our visions of ethical leadership, relationships, and organization? What were we doing when we were at our best in leading meaningful and effective change and problem resolution in our relationships with family and friends and in our work and citizenship lives? What have been the individual, organizational, and environmental obstacles that made it difficult for us to lead meaningfully and effectively? What are different types of methods in trying to intervene and lead ethical change?

Negotiation NIELSEN, RICHARD P
Spring 2021
Negotiating is a key process in leadership, conflict resolution, and change management at every level of internal and external management. The purpose of the course is to improve students' abilities to analyze, prepare for, and practice win-lose, win-win, dialogic, and third party negotiating methods as appropriate. Emphasis is on practical application and personal development. Teaching methods used are role playing, discussion of readings, discussion with practitioners, original student projects, and discussion of current events. Students are invited to reflect upon how negotiating and conflict resolution practices help them developmentally change themselves, their organizations, and the world.

Leadership LEDUC, STEVEN M
Spring 2021
In today's world, there are many challenges that call for effective leadership. Corporate ethics scandals, an increasingly global and diverse work force, and the need for employees to experience renewed meaning and connection to their work are just a few examples. How do we respond to these challenges can profoundly change the world in which we live and work. In this course, we learn about the challenges and opportunities of effective leadership and how leaders, including ourselves, can respond to them.

**Idea Work: Making Things That Matter**

**MGMT213901**

**Idea Work: Making Things That Matter ROUSE, ELIZABETH D**

**Spring 2021**

Any change, innovation, or new thing begins with an idea. While one person might come up with an initial idea, the idea, and the thing it consequently turns into, has the potential to become better when built upon by other people. The purpose of this course is to learn how to effectively develop and work with ideas to innovate and enact change in the context of organizations and beyond. Building from research on organizational creativity, innovation, collaboration, and entrepreneurship, students will learn frameworks for understanding the influence of individuals, social processes, and context on creativity and innovation and apply these frameworks throughout the course. Students will practice the key skills of idea work—generating, connecting, communicating, evaluating, and reshaping ideas—so that they can make things that matter.

**Social Impact and Entrepreneurship**

**MGMT213901**

**Social Impact and Entrepreneurship FRECHETTE, EDWARD K**

**Spring 2021**

Are you moved by a particular social injustice? It could be homelessness on the streets of Boston. It could be famine in Africa. It could be wage inequality across our country. It could be one of hundreds of issues, but one that is meaningful to you. Social Impact and Entrepreneurship explores the innovative ways government agencies, nonprofit groups, and for-profit organizations are addressing societal challenges. This course will focus on understanding the building blocks of a social venture--starting with the mission and working through the operational plan, the financials, and the evaluation criteria. Students, either individually or in small groups, will create a business plan for an enterprise, grounded in her/his passion for change in a given area. Multiple case studies will be used to illustrate various topics. Open to students from all majors.

Entrepreneurial Management SHAW, DOUGLAS J
Spring 2021
Entrepreneurial opportunities often exist when industries are created or transformed by new technologies, new business models, or new product categories. This course introduces conceptual frameworks and tools that help students to identify, evaluate, launch, and grow innovative ventures that have the potential to revolutionize markets. We will discuss cases set in a range of industries including: car sharing, aviation, electronic publishing, fashion, file storage, streaming media, consulting, and food services. This course requires strong qualitative and quantitative analysis skills. There are no official prerequisites. However, to evaluate the drivers of venture profitability and to analyze business models, you will need a basic understanding of income statements and cash flows.

MGMT217501
Thinking Strategically Integrative Strategy Simulation MONTES, JUAN
Spring 2021
This course prepares students to make executive-level decisions by participating and competing in business simulation. The course utilizes a sophisticated, market simulation platform calls "Global DNA" to create a realistic, hands-on learning experience. The course allows students to manage a company and see the results of specific functional and team decisions, integrating all management areas: marketing, organizational behavior, operations, accounting, and finance. The course is based around the concept of experiential learning, and student teams have a high degree of freedom to follow different strategies. The competitive nature of the simulation shows and compares the results of each company in every round, with a high level of detail (i.e., sales and production reports, financial information), teaching teams to effectively analyze quantitative business information. Students learn to think strategically by incorporating the potential scenarios of what other teams can do during the simulation in their own decisions.

Leadership and Corporate Accountability SPINELLO, RICHARD
Spring 2021
This course is designed to provide an overview of the economic, legal, and ethical responsibilities of companies and their leaders. Through a series of case studies, it will demonstrate the acute challenges of ensuring that a company's conduct conforms to prevailing cultural norms or initiating a cultural/moral transformation. The course considers a number of cases set in different cultural contexts. There are selected readings about the beliefs, ideals, and values at the core of these different cultures.

Strategic Management MONTES, JUAN
Spring 2021
This course provides future leaders and strategists with an understanding of strategic management that will enable them to function effectively in a complex, global economy. Successful strategists need to define goals, analyze the organization and its environment, make choices, and take concerted actions to effect positive change in their organization and society. Using the conceptual tools and analytic frameworks of strategic management, this course provides a perspective that is integrative, yet analytical. This perspective helps students make sense of the global business and societal environments, understand the ambiguities and dilemmas of management, and learn how to take effective action.

Managing People and Organizations DANFORTH, STUART G

Spring 2021

This course provides future leaders and strategists with an understanding of strategic management that will enable them to function effectively in a complex, global economy. Successful strategists need to define goals, analyze the organization and its environment, make choices, and take concerted actions to effect positive change in their organization and society. Using the conceptual tools and analytic frameworks of strategic management, this course provides a perspective that is integrative, yet analytical. This perspective helps students make sense of the global business and societal environments, understand the ambiguities and dilemmas of management, and learn how to take effective action.

**Credits:** 03
**Room and Schedule:** T TH 1 30*; ONLINE; SYNCHRONOUS;

This course focuses on the analysis and diagnosis of organizational problems. It attempts to enable students to apply these concepts to real organizational and managerial problems. It also provides opportunities for participation in ongoing work teams while learning about team effectiveness. Finally, students can examine their own behavior and beliefs about organizations to compare, contrast, and integrate them with the theories and observations of others.

MGMT771001
Strategic Management LOWD, NANCY E
Spring 2021
The strategic management course deals with the overall general management of an organization. It stresses the role of the manager as strategist and coordinator whose function is to integrate the conflicting internal forces that arise from among the various organizational units while simultaneously adapting to the external pressures that originate from a changing environment. Drawing on the knowledge and skills developed in the core curriculum, this course serves as the integrating experience for the M.B.A. program.

Strategic Analysis YU, TIEYING
Spring 2021
This course introduces you to a set of analytical frameworks that enable you to explain performance differences among firms and that provide a structure for strategic decisions to enhance firms’ future competitive positions. Building on the foundation laid by the Introduction to Strategic Management course that you took earlier, we will cover strategy both at the business level (introducing tools of industry analysis and competitive positioning) and at the corporate level (examining how decisions regarding corporate scope—horizontal, vertical, and global—create or destroy value in multibusiness firms). We will also study strategy implementation, focusing on the organizational structure, systems and processes that are put in place to manage the corporation. Throughout the course, our viewpoint will be that of the top management team who has responsibility for the long-term health of the entire organization.

Thinking Strategically: A Global Integrative Simulation MONTES, JUAN
Spring 2021
This course is about the art of strategy. Courses like marketing, organizational behavior, operations, accounting, and finance help you understand the functional areas of management, but now (and before you finish your first-year MBA), you need to close the knowing and doing gap, and that is the role of the present course. We will use a simulation called Global DNA in which teams compete in planning and executing a multi-year, multinational business strategy in a highly competitive global market. The course utilizes a sophisticated, market-leading simulation platform to create a realistic, hands-on learning experience. Engaging with the complexities of the simulated international business environment will prompt discussions on decision making, team dynamics, strategic planning and tactical execution. Thinking strategically is what C-level managers need to understand competitive contexts, and make decisions that take into account all the relations and variables inside and outside the organization. A simulation presents a unique opportunity to challenge your managerial and strategic skills, and additionally, it creates a virtual competitive context that is usually fun, demanding and complex. This course culminates with the Diane Weiss Competition in which student teams will compete in a final round of the simulation.

MKTG102101 Marketing Principles SAMARAS, XANTHE P
Summer 2020
Marketing is dynamic, changing, creative, challenging and plays a leading role in a firm's strategy and destiny. Intended for those planning a career in Marketing, or will do career activities requiring marketing--doing a business startup, designing new services, online/social media, retail. Marketing owns the customer relationship and defines market-driven strategy. You will learn three skill sets: Target Marketing Skills--segmenting and targeting within markets, Strategic Marketing Skills--positioning vis-a-vis competitors, and Marketing Management Skills--managing the design of products/services, pricing, message and media, distribution channels, and online search/social media.

Prerequisites: ACCT1021. Corequisites: None Cross-listed with: None Frequency: Annually
Student Level: UNDERGRAD ELECT
Comments: This course is a prerequisite for all other marketing courses.
Status: OPEN

MKTG770001 Marketing Operations Management TEOPACO, JOHN L
Summer 2020
This course focuses on the managerial skills, tools, and concepts required to produce a mutually satisfying exchange between consumers and providers of goods, services, and ideas. The material is presented in a three-part sequence. Part one deals with understanding the marketplace. Part two deals with the individual parts of the marketing program such as pricing, promotion, product decisions, and distribution. Part three of the course deals with overall strategy formulation and control of the
market function. Students in this course will come to understand the critical links between marketing and the other functional areas of management.

MKTG311401
Pricing and Demand Analytics ENGEL, SAMUEL
Fall 2020

How do companies decide what prices to set for a COVID vaccine? A new model Tesla? Investment fees for a Fidelity mutual fund? A Disney+ subscription? A new financial planning service by Charles Schwab? A new Apple iPhone? Or the Amazon cloud? There are ethical questions about pricing, like Uber's surge prices that fluctuate with demand, or congestion pricing on highways or to enter cities. And there is puzzling pricing, like why Taylor Swift or Bob Seger sell their concert tickets for way more in the open market. Pricing is one of the most fascinating, and most important skills for anyone entering a management career--in finance, marketing, sales, accounting, retailing, e-commerce, or business analytics. In this course you will learn about value-based pricing based on the value customers perceive, the psychology of pricing ($9.99 versus $10), segmented pricing (for different segments in the marketplace), using cost accounting to estimate customer cost-to-serve and customer profitability, and how to set prices for really new products (like new innovations). In addition, you will learn demand analytics and dynamic pricing used by airlines, destination theme parks like Disney, and the digital economy. The instructor is a leader in pricing innovation for an aviation pricing consulting firm.

Services Marketing SAMARAS, XANTHE P
Fall 2020

The service sector of the economy is twice as large as the manufacturing sector. Nearly all new job growth in this country will be in services marketing. Service organizations differ from manufacturing businesses in many important respects and require a distinctive approach to marketing strategy development and execution. Some service businesses to be studied include entertainment, hospitality, travel, retail, telecom, car rental, healthcare, financial and professional services. Service providers include hotels, airlines, restaurants, car rental, retail personnel, customer service representatives, banks and doctors, accountants, and lawyers.

Multichannel Retailing SEIDERS, KATHLEEN  
Fall 2020  
This class focuses on the necessary concepts and principles of retailing involved in making retail and wholesale decisions. The course looks at retailing from both a consumer perspective (e.g., why does a consumer shop at a particular retail outlet?) and a business-to-business perspective (e.g., how does the retailer decide which supplier to use?). Additionally, the course examines the various methods of retailing (e.g., bricks and mortar, bricks and clicks) and how these methods have evolved and will evolve in the future.

Digital Marketing O'HERN, MATTHEW S  
Fall 2020  
In today's digital economy, successful companies must develop new ways to attract, connect with, and delight their customers. This has prompted a decisive shift away from traditional media strategies toward novel, digitally-enabled strategies that can help firms achieve their financial objectives. In this course you will learn about a variety of digital marketing tools and platforms that companies use to differentiate themselves from their competition and will allow you to build a set of digital assets that you can use to demonstrate your digital marketing acumen to prospective employers.

Professional Selling and Sales Management BROWN, JASON T  
Fall 2020  
Two fundamentals of business: someone must get the goods and services out the door, and someone must get the cash to come in the door. Sales is the function that does the latter. It, and its management, will be covered in this course. We will study the art of persuasion, modern day Rhetoric in actual practice. The discipline will be addressed biologically. We will dissect real industry practitioners when they visit class, and actual sales calls in the field as a research paper. Upon course completion, students will have a complete understanding of both the selling and sales management process.

Sales Analytics LUO, SONGJUN  
Fall 2020  
Like most business decision-makers, sales leaders can no longer afford to make decisions relying on their experience and gut-feelings alone. Effective sales-related business decisions are increasingly made by utilizing the appropriate decision frameworks combining insights drawn from data with the sales leaders' experience. In a world where ever-growing volume of data is available, sales leaders need to know how to harness the power of data and analytics to optimize their sales force and to stay ahead. In this class, students will learn to leverage the power of analytics to solve critical sales-related business problems. Specifically, students will learn: (1) business problems faced by sales leaders in building and managing a sales force; (2) decision frameworks and analytical methodologies that are used in the areas of sales, strategy design, and sales force management; (3) skills for applying the appropriate approaches for solving given sales-related problems.

Strategic Brand Management FISHER, JOHN H  
Fall 2020  
This course teaches students fundamental and leading-edge concepts in brand management. Students learn to develop and articulate brand strategy, how to give strategic brand direction, and how to measure strategic brand progress. They learn how to manage key relationships and functions that surround the brand, e.g., advertising, promotion, public relations, licensing, and product and package design agencies. A capable brand manager has exceptional strategic, quantitative, interpersonal, and presentation skills and must be comfortable with decision-making and leadership. The course will focus on the development and application of these skills in brand management via in-class learning, case discussion, and project work.

Special Topics: Heritage Marketing HUDSON, BRADFORD T  
Fall 2020  
This course explores the interaction of marketing and history in the consumer marketplace. Heritage marketing is a strategic approach to capitalize on the historical status of older brands in the present and future. It uses the entire marketing system to activate powerful dynamics in consumer behavior such as nostalgia, communicate relevant messages, and monetize the past. Business history and archival collections provide the content and inspiration for related communications and new product development. The primary classroom activity will be the analysis and discussion of business case studies from various industries. The pre-requisites are Marketing Principles and any course from the History core sequence.

Design Thinking and Strategy DICKINSON, KRISTINE D  
Fall 2020  
"Design thinking is a human-centered approach to innovation that draws from the designer's toolkit to integrate the needs of people, the possibilities of technology, and the requirements for business success." -Tim Brown, CEO of IDEO. Strategic design thinking is an integral driver of innovation and a significant factor in a business’ ability to foresee and adapt to customer needs. Companies like Apple, IDEO, and Pixar are all pioneers in the field, and this course will draw directly from their proven methods. Students will learn the various phases of design thinking, and how to apply a customer-centric approach to products and services in a range of industries. Students will delve into topics such as user experience (UX) product design, creative problem-solving, strategic storytelling, and customer-centric business decision making. Course
This integrating course emphasizes the importance of strategy formulation as the basis for sound marketing management and decision making. The course stresses the application of marketing concepts and principles through case analysis and class discussion of cases, problems, and current marketing readings. Attention is placed on identifying and evaluating marketing strategies and problems and developing explicit recommendations for action.

Strategic Selling and Persuasion WESTMAN, JOHN C
Fall 2020
What does it take to be a highly successful professional salesperson? This course answers this question and guides the student to explore and understand successful sales behaviors. This course is practical, high energy, low-stress, collaborative, and uses real-world, real-time situations based on student interests and experiences. Students will develop their competence in professional selling theory and approaches, presentation skills, and sales techniques. Course topics include the selling process, the buying process, creating value in buyer-seller relationships, prospecting, sales call planning, communicating the message, negotiating for win-win solutions, closing the sale, as well as technologies that improve selling effectiveness.

This course focuses on the managerial skills, tools, and concepts required to produce a mutually satisfying exchange between consumers and providers of goods, services, and ideas. The material is presented in a three-part sequence. Part one deals with understanding the marketplace. Part two deals with the individual parts of the marketing program such as pricing, promotion, product decisions, and distribution. Part three of the course deals with overall strategy formulation and control of the marketing function. Students in this course will come to understand the critical links between marketing and the other functional areas of management.

Product Planning and Strategy BRIGHT, JAMES P
Fall 2020
This course focuses on the challenge of creating and launching new products and services. It is particularly appropriate for those who are interested in becoming a Product Manager within a larger company, or in starting their own business at some point. The course is built on the concept of learning by doing, as small student teams go through the full process of coming up with their own new product or service ideas, evaluating them, doing market research, and developing launch plans. We also assess a number of current new product ideas, analyze cases from a range of industries, and have one or two outside speakers. There is a heavy emphasis on discussion and practicality.

Consumer Behavior HAGTVEDT, HENRIK
Fall 2020
This course integrates marketing theory with insights from other fields of study, including social psychology, cognitive psychology, evolutionary psychology, and behavioral neuroscience. It analyzes consumer processes such as perception, learning, attitude formation, and decision making. These variables are broadly relevant to marketing challenges, given that the success of products and brands depends on their appeal to consumers. Discussion topics range from art and aesthetics to crisis behavior to new product development.

### Marketing Courses: Spring 2021

#### MKTG102102
**Marketing Principles BRASEL, STEVAN ADAM**
**Spring 2021**
Marketing is dynamic, changing, creative, challenging and plays a leading role in a firm's strategy and destiny. Intended for those planning a career in Marketing, or will do career activities requiring marketing--doing a business startup, designing new services, online/social media, retail. Marketing owns the customer relationship and defines market-driven strategy. You will learn three skill sets: Targeting Marketing Skills--segmenting and targeting within markets, Strategic Marketing Skills--positioning vis-a-vis competitors, and Marketing Management Skills--managing the design of products/services, pricing, message and media, distribution channels, and online search/social media.

MKTG314801
Pricing and Demand Analytics
ENGEL, SAMUEL
Spring 2021
How do companies decide what prices to set for a COVID vaccine? A new model Tesla? Investment fees for a Fidelity mutual fund? A Disney+ subscription? A new financial planning service by Charles Schwab? A new Apple iPhone? Or the Amazon cloud? There are ethical questions about pricing, like Uber’s surge prices that fluctuate with demand, or congestion pricing on highways or to enter cities. And there is puzzling pricing, like why Taylor Swift or Bruce Springsteen sell their concert tickets at lower prices even though Stub-Hub sells them for way more in the open market. Pricing is one of the most fascinating, and most important skills for anyone entering a management career—in finance, marketing, sales, accounting, retailing, e-commerce, or business analytics. In this course you will learn about value-based pricing based on the value customers perceive, the psychology of pricing ($9.99 versus $10), segmented pricing (for different segments in the marketplace), using cost accounting to estimate customer cost-to-serve and customer profitability, and how to set prices for really new products (like new innovations). In addition, you will learn demand analytics and dynamic pricing used by airlines, destination theme parks like Disney, and the digital economy. The instructor is a leader in pricing innovation for an aviation pricing consulting firm.

Services Marketing
SAMARAS, XANTHE P
Spring 2021
The service sector of the economy is twice as large as the manufacturing sector. Nearly all new job growth in this country will be in services marketing. Service organizations differ from manufacturing businesses in many important respects and require a distinctive approach to marketing strategy development and execution. Some service businesses to be studied include entertainment, hospitality, travel, retail, telecom, car rental, healthcare, financial and professional services. Service providers include hotel, airline, theme park, car rental and retail personnel, customer service representatives, bankers, doctors, accountants, and lawyers.

MKTG315301
Multichannel Retailing SEIDERS, KATHLEEN
Spring 2021
This class focuses on the necessary concepts and principles of retailing involved in making retail and wholesale decisions. The course looks at retailing from both a consumer perspective (e.g., why does a consumer shop a particular retail outlet?) and a business-to-business perspective (e.g., how does the retailer decide which supplier to use?). Additionally, the course examines the various methods of retailing (e.g., bricks and mortar, bricks and clicks) and how these methods have evolved and will evolve in the future.

Integrated Marketing Communications NENKOV, GERGANA Y
Spring 2021
This course concerns the communication function in marketing. It is designed to introduce students to integrated marketing communications (IMC). It aims at relating the elements of the marketing mix (4P's) to the various aspects of the communications that take place between the firm and its customers. The course builds on a base of strategic marketing planning and consumer behavior and then proceeds to examine the role of the promotion mix (e.g., advertising, direct marketing, sales promotion, Internet and interactive marketing, publicity and public relations) in developing integrated marketing communications programs and helping organizations meet strategic marketing objectives.

Digital Marketing O'HERN, MATTHEW S
Spring 2021
In today's digital economy, successful companies must develop new ways to attract, connect with, and delight their customers. This has prompted a decisive shift away from traditional media strategies toward novel, digitally-enabled strategies that can help firms achieve their financial objectives. In this course you will learn about a number of different aspects of digital marketing including content marketing, website optimization, social media marketing, paid search, and search engine optimization. Perhaps more importantly, this course will help you develop a strong understanding of the digital marketing tools and platforms that companies use to differentiate themselves from their competition and will allow you to build a set of digital assets that you can use to demonstrate your digital marketing acumen to prospective employers.

Special Topics: Heritage Marketing HUDSON, BRADFORD T
Spring 2021
This course explores the interaction of marketing and history in the consumer marketplace. Heritage marketing is a strategic approach to capitalize on the historical status of older brands in the present and future. It uses the entire marketing system to develop a strategic position based on heritage, activate powerful dynamics in consumer behavior such as nostalgia, communicate relevant messages, and monetize the past. Business history and archival collections provide the content and inspiration for related communications and new product development. The primary classroom activity will be the analysis and discussion of business case studies from various industries. The pre-requisites are Marketing Principles and any course from the History core sequence.

Design Thinking and Strategy DICKINSON, KRISTINE D
Spring 2021
"Design thinking is a human-centered approach to innovation that draws from the designer's toolkit to integrate the needs of people, the possibilities of technology, and the requirements for business success." - Tim Brown, CEO of IDEO. Strategic design thinking is an integral driver of innovation and a significant factor in a business' ability to foresee and adapt to customer needs. Companies like Apple, IDEO, and Pixar are all pioneers in the field, and this course will draw directly from their proven methods. Students will learn the various phases of design thinking, and how to apply a customer-centric approach to products and services in a range of industries. Students will delve into topics such as user experience (UX) product design, creative problem-solving, strategic storytelling, and customer-centric business decision making. Course content will include team projects, case studies, and occasional guest lectures from industry experts. The class will be highly focused on practical experimentation and is directly relevant for students interested in product and brand management, marketing strategy, entrepreneurship, and beyond.

MKTG425605
Applied Marketing Management HUDDSON, BRADFORD T
Spring 2021
This integrating course emphasizes the importance of strategy formulation as the basis for sound marketing management and decision making. The course stresses the application of marketing concepts and principles through case analysis and class discussion of cases, problems, and current marketing readings. Attention is placed on identifying and evaluating marketing strategies and problems and developing explicit recommendations for action.

What does it take to be a highly successful professional salesperson? This course focuses on the managerial skills, tools, and concepts required to produce a mutually satisfying exchange between consumers and providers of goods, services, and ideas. The material is presented in a three-part sequence. Part one deals with understanding the marketplace. Part two deals with the individual parts of the marketing program such as pricing, promotion, product decisions, and distribution. Part three of the course deals with overall strategy formulation and control of the marketing function. Students in this course will come to understand the critical links between marketing and the other functional areas of management.

Strategic Selling and Persuasion WESTMAN, JOHN C
Spring 2021
What does it take to be a highly successful professional salesperson? This course answers this question and guides the student to explore and understand successful sales behaviors. This course is practical, high energy, low-stress, collaborative, and uses real-world, real-time situations based on student interests and experiences. Students will develop their competence in professional selling theory and approaches, presentation skills, and sales techniques. Course topics include the selling process, the buying process, creating value in buyer-seller relationships, prospecting, sales call planning, communicating the message, negotiating for win-win solutions, closing the sale, as well as technologies that improve selling effectiveness.

**MKTG663501**
New Media Industries MCNEALY, PAUL-JON
Spring 2021
This course is designed to introduce the changing business models of new media (video games, music, TV and film, and journalism) industries. This is achieved by examining in detail the technology enablers and disruptive forces in both the U.S. and around the world, consumer behaviors, as well as legal and regulatory concerns. A special emphasis will also be placed on media companies whose business models have been heavily influenced or altered by digital distribution. This class will be a combination of in-class and Zoom sessions during class time, and will have an emphasis on influential guest speakers from various industries.

Customer Research and Marketing Decisions BECK, JONATHAN
Spring 2021
Information is vital for solving critical marketing problems and gaining competitive advantage. This course focuses on how to improve marketing decision-making through better research design and methods. Students learn how to identify managerial problems, develop relevant research hypotheses, determine appropriate methods for data collection and analysis, and develop recommendations for marketing solutions.
Topics include foundational methods, such as focus groups, survey design, and marketing experiments. Students will gain the ability to identify, collect, and analyze essential marketing data and apply research results to becoming better marketing decision-makers.

**MKTG800801**

**Integrated Marketing Communications NENKOV, GERGANA Y**

**Spring 2021**

This course concerns the communication function in marketing. It is designed to introduce students to integrated marketing communications (IMC). It aims at relating the elements of the marketing mix (4Ps) to the various aspects of the communications that take place between the firm and its customers. The course builds on a base of strategic marketing planning and consumer behavior, and then proceeds to examine the role of the promotional mix (e.g., advertising, direct marketing, sales promotion, Internet and interactive marketing, publicity and public relations) in developing integrated marketing communications programs and helping organizations meet strategic marketing objectives.

**Credits:** 03

**MKTG800802**

**Entrepreneurial Marketing Strategy NEESON, JOHN J**

**Spring 2021**

This course focuses on how to develop an integrated marketing plan for a new company. The class will teach techniques and skills for developing a marketing strategy for a startup, including prioritizing market segments, positioning and messaging approaches, sales model and capacity planning for marketing, and developing an integrated marketing model to help scale the new endeavor. Startups are unique, requiring an agile marketing approach, the ability to scale quickly, and the requirement to build a new category or quickly enter an existing one. Classes will incorporate a combination of lectures, projects, guest speakers, and the development of a marketing plan for a new or early stage startup.

**Strategic Pricing Management SMITH, GERALD**

**Spring 2021**

This course explores pricing strategy and shows how pricing can be managed to achieve profitability. The course is practical and hands-on. It examines current pricing practices used by many companies, and shows how they lead to distortions and problems. It suggests strategic principles that lead to more profitable pricing decisions, including methods for financial analysis that focus on pricing profitability. Other topics include value-based pricing, managing price competition, segmenting markets based on price sensitivity, segmentation pricing strategies, buyer psychology of pricing, and research methods for assessing price sensitivity.

</table>
This course is about becoming. It encourages students to reflect on the type of person they are becoming and the type of person they want to become. First part considers "what does it mean to be generous?" and questions that consider a life that includes both money and much more. In use: reflections, reading quizzes, interview, first-post-graduation-year budget, and final paper.

PRTO240101
Free Markets, Faith, and the Common Good CIONI, JOSEPH R
Spring 2021
If sharing our gifts, pursuing justice, and acting on our concern for the poor and marginalized of society are core values of Jesuit-trained students, to what extent is free market capitalism a good "fit" for helping us meet those goals? In this course, we will explore several key moral and philosophical foundations of free market capitalism. These arguments will then be placed in dialogue with central insights contained in Catholic social teaching, especially the principles of human dignity, solidarity, the preferential option for the poor, and the common good.

Happiness in a Commercial Society SMITH, MICHAEL J; EVANS, JEREMY A
Spring 2021
The aim of this course is to introduce students to the interdisciplinary study of human well-being as it applies to the domains of contemporary business and commerce. The course will include philosophical, psychological, and social scientific inquiries into human flourishing, as well as the nature of meaningful work, the relationship between wealth and happiness, and the application of well-being measures to thriving economic and political institutions.

UGMG222209
Career Accelerator DOWNEY, ALICIA M
Fall 2020
This course is for Sophomore and Juniors in the Carroll School of Management who are interested in learning how to better prepare for strategy and ethics case competitions.

The class will meet weekly for one hour with the objective to develop skills in the following areas: be able to effectively analyze an ethics case and a strategy case, determine feasible alternatives, craft a recommendation, implement recommendations, and prepare for judges' questions. The course will also help students with PowerPoint presentations and oral tips for such a competition.

The 10-week course will end with an internal case competition where winning groups will be chosen to attend competitions and represent the Carroll School nationally in the spring and subsequent fall (juniors who are abroad in the spring will not be eligible to take the course).

UGMG101001
Perspectives on Management CLAVIN, JOHN C; DOYLE, JEREMIAH T
Spring 2021
This course, taught by practitioners John Clavin (BC '84) and Jere Doyle (BC '87), provides BC students with an excellent opportunity to explore the functional disciplines of business from a real-world perspective. Using a combination of lectures, case studies, readings and outside speakers, the course provides students the opportunity to get grounded in each of the CSOM concentrations while gaining outside views on careers in related fields and industries. The course will also provide a framework to explore and discuss cross-functional issues that impact business strategy and execution. This is a highly interactive class that places a premium on both preparation and participation each week. The course is initially open to CSOM sophomores but normally has availability for juniors and seniors across all undergraduate majors.

Connell School of Nursing

Nursing Courses: Summer 2020

NURS324401
Childbearing Nursing Theory SIMONELLI, MARY C
Summer 2020
The course focuses on concepts associated with the unique responses of families during the childbearing cycle, normal and high risk pregnancies, and normal and abnormal events in women's health. Current multidisciplinary research in women's health with a focus on the childbearing cycle, including genetics and cultural competence, is presented. Emphasized based nursing practice for the childbearing family is discussed. The nursing implications of attending to both the physiologic and the psychosocial needs of the childbearing family are reviewed. Emphasis will be placed on AWHONN and ACOG standards of care.

Nursing Synthesis Clinical Laboratory
MCNUTT-CLARKE, BETH; HAZE, NANCY; CULLINAN, DONNA L
Summer 2020
This course provides senior nursing students with an opportunity to synthesize, expand, and refine nursing concepts and clinical reasoning competencies. Through an intensive clinical experience completed in institutional and/or community settings, students focus on the healthcare needs of specific client populations, study in depth the interventions used to restore and/or optimize health, and utilize evidence-based research in practice. Emphasis will be placed on current quality and safety guidelines and standards of care for the specialty area in which the student is practicing. 
Credits: 03

Ecuador: Global Health Perspectives BYRNE, ROSEMARY F
Summer 2020
This course will involve the study of global health from the perspective of the various stakeholders: Populations, governments, Non-Government Organizations (NGOs), health care providers and health educators. Social, political, economic, legal and ethical perspectives will be addressed. This course will be offered in Quito, Ecuador and will include field trips to health care facilities and discussions with local health professionals on current health issues and challenges for the future. Using a case-based approach, students will analyze and develop potential solutions and options for addressing global health care issues and create strategies for improving the health of specific populations.

Global Healthcare: Meeting Challenges and Making Connections SIMONELLI, MARY C
Summer 2020
This course brings together students and faculty from around the world to discuss and synthesize perspectives on global health, specifically the challenges and common connections experienced across patient centered care, health education, healthcare systems and policy development. The participants will develop a deeper understanding of the particular needs of diverse and underserved populations. Emphasis will be placed on social justice and health of individuals, families, and populations. Through the lens of public health, this course explores assessment of healthcare needs, assurance of a quality healthcare infrastructure, and development of healthcare policy.

Role of Advanced Practice Nurses O'REILLY-JACOB, MONICA K
Summer 2020
Dimensions of advanced practice nursing including its historical development; role theory and implementation; legal and regulatory factors, and role implementation across practice settings will be explored. A focus on organization behavior and systems leadership, excellence in care delivery, practice evidence and care outcomes, relationship-based practice, quality improvement models and patient safety initiatives will be stressed and linked to APN role. National initiatives including the IOM Report as well as financial, political, social, and economic factors that influence care will be studied along with strategies to influence care delivery systems and innovative practice models.

NURS743001
Advanced Health Assessment Across the Life Span HOWLETT, MARY SUSAN; REPSHA, CHRISTINE; PADOS, BRITT F
Summer 2020
Building on undergraduate course work and previous clinical experience, this course utilizes life span development and health risk appraisal frameworks as the basis for health assessment. Students master health assessment skills for individuals within family, environmental, and cultural contexts. The course provides advanced practice nursing students with planned classroom and clinical laboratory experiences to refine health assessment skills and interviewing techniques. Health promotion, health maintenance, and epidemiological principles are emphasized in relationship to various practice populations.

Physiologic Variables for Nurse Anesthesia II--Card EMER, SUSAN A
Summer 2020
This course builds on basic concepts of the anatomy, physiology, and pathophysiology of the cardiovascular system and provides in-depth information about the
cardiovascular system and anesthesia. The impact of anesthesia on the structure and function of the heart as a pump as well as the characteristics of both systemic and pulmonary circulation will be explored. Measures to evaluate cardiovascular function, including electrocardiography, cardiac output, blood volume and arterial and venous pressures, will be described using clinical examples. Alterations in normal anatomy and physiology and implications for the anesthetic plan for both non-cardiac and cardiac surgery will be discussed.

Research Methods for Advanced Practice Nursing GOULD, KATHLEEN A; MARCHETTI, CAROL A
Summer 2020
The focus of this course is the formal process of acquiring and evaluating evidence that supports nursing practice. Quantitative and qualitative methods of inquiry are examined. Quality considerations of various research designs are explored. Levels of evidence are identified in relation to existing research outcomes. Evaluation of existing research outcomes as evidence to support clinical practice, demonstrate quality improvement (QI), and advance nursing knowledge is a major emphasis of the course.

NURS759501
Nurse Anesthesia III THOMAS, ALLAN C
Summer 2020
This course focuses on the delivery of anesthesia care within advanced nursing practice in a broad range of clinical situations for patients with multiple, complex health problems. Through the refinement of assessment and management skills, critical thinking is further developed. With supervision, students assume more overall responsibility for anesthetic management. Through seminar participation students explore the anesthetic management of diverse populations and specialty situations. Likewise, simulation is focused on the management of complex and specialty situations. Concurrent with this semester, students begin a student-directed review of didactic content in advance preparation for the National Certification Exam.

Direct Entry Adult Health I HURLEY, JOREAN L; REPSHA, CHRISTINE L
Summer 2020
This course focuses on the nursing care of adults and older adults. Students are introduced to the roles and responsibilities of professional nursing. Relevant theories from nursing and other disciplines, research, and evidence-based guidelines related to the care of adults and older adults and families are examined. Person/family-centered approaches to promote, restore, and maintain health are emphasized. The biopsychosocial, cultural, legal, and ethical factors influencing the health and care of adults and older adults and their families are explored. Laboratory instruction includes fundamental health assessment, physical examination, and basic clinical skills.

NURS871401
Nursing Ethics and Professional Responsibility in Advanced Practice GRACE, PAMELA J; UVEGES, MELISSA K
Summer 2020
The course prepares advanced practice nurses for ethics leadership within the broader healthcare arena. Links are made among philosophical/theoretical foundations of nursing, ethical theory, and nursing goals. Skills supportive of the ethical decision making of nurses, peers, and the team are developed with in-class opportunities to practice leading ethics rounds and developing ethics education projects. An emphasis is placed on facilitating the interests of current and future patients and society as a professional obligation. Socially derived injustices and professional responsibility to advocate for just healthcare is highlighted along with strategies to influence institutional and health policy on behalf of individual and social good.

Methods of Advanced Scholarly Inquiry LLY
REID PONTE, PATRICIA A; KELLY-WEEDER, SUSAN A
Summer 2020
This is the second of four courses to prepare DNP students to conduct an organization approved, scholarly inquiry project to improve health services and patient outcomes. Students critically evaluate the literature and related information to address a health care problem. Scholarly inquiry approaches are presented to enable students to identify a problem, plan change to improve a process or outcome, or develop innovative solutions related to health care delivery. Upon course completion, there will be a faculty and organization approved DNP project charter, which includes the problem, processes, and expected outcomes.

NURS973201
Advanced Health/Physical Assessment across the Life Span LAPIERRE, KELLIE L
Summer 2020
This course uses a holistic approach and risk appraisal frameworks as a basis for health assessment across the lifespan. Building on knowledge of basic health assessment, the APRN student performs comprehensive health histories and physical and mental health examinations. Students will incorporate subjective and objective data to evaluate healthy individuals and those with acute and/or chronic disease. The course utilizes learning laboratory experiences, high-low fidelity simulation, and standardized patients to facilitate students’ learning. Health promotion, health maintenance and harm reduction concepts are emphasized and applied, taking into consideration life circumstances and cultural, ethnic, and developmental variations.

NURS112001
Public Health in a Global Society FRANCKLE, REBECCA L; SABBATH, ERIKA L
Fall 2020
This foundation course presents public health as an interdisciplinary science focused on health promotion and disease prevention at the population level. The course provides an overview of the history of public health, global burden of disease, sub-disciplines of public health, maternal/child health, and nutrition, and emphasizes the collaborative nature of the field through examples in research and practice.
Credits: 02
Room and Schedule: GASSON HALL 207, W 5-6; Satisfies Core

This course provides campus and community laboratory experiences in applying the theoretical concepts explored in NURS2120. The focus is on systematic assessment of individual health status associated with maturational changes and influenced by culture and environment. The clinical reasoning framework and communication theory direct the development of nursing assessment skills. There will be four hours of Simulation Laboratory, one hour of seminar, and required media/BB Vista preparation each week.

**Nursing Assessment of Health Across the Life Span**

**PARK, JINHEE; TIGBAK, CARINA**

**Fall 2020**

This course introduces the concepts of health, health promotion, and growth and development across the lifespan. The interactions of underlying mechanisms such as environment, culture, ethnicity, family, genetics, and gender that are foundational to the development and individual health will be explored. Theories and principles that address physical, cognitive, and psychosocial growth and development will guide understanding of the complex healthy human, from birth to geriatrics and death. Principles and theories of health promotion will be analyzed and applied from a nursing perspective to support the individual's desire to increase personal and/or family health potential and well-being.

NURS317001
Principles of Evidence-Based Nursing
LEE, CHRISTOPHER S; HORRELL, LINDSEY N
Fall 2020
This course seeks to develop an applied understanding of evidence-based practice as it relates to the science of nursing. Through exploring components of the research process, an appreciation of the various types of evidence used by nurses and an understanding of the importance of evidenced-based research to improve clinical practice will be fostered. The ethical considerations related to evidence-based practice will be discussed. At the conclusion of the course, students are prepared to be to be critical consumers of research used in evidence-based practice.

NURS324201
Adult Health Nursing Theory II
SLY, JACQUELINE R; REPSHA, CHRISTINE L
Fall 2020
This course builds on the concepts learned in previous courses including adult health and pharmacology and expands the knowledge base for planning and implementing care of adults with acute health problems and acute exacerbations of chronic health problems. Clinical case studies of acute care emergencies are used to discuss clinical judgment. Emphasis is placed on the selection of evidence-based interventions, evaluation of interventions, and use of evaluative data in refining a plan of care for the adult patient. Discussions focus on the role of the primary nurse in the acute care setting including collaboration, discharge planning, and health teaching.

NURS324401
Childbearing Nursing Theory
CAPOTOSTO, MELISSA K
Fall 2020
The course focuses on concepts associated with the unique responses of families during the childbearing cycle, normal and high risk pregnancies, and normal and abnormal events in women's health. Current multidisciplinary research in women's health with a focus on the childbearing cycle, including genetics and cultural competence, is presented. Evidenced based nursing practice for the childbearing family is discussed. The nursing implications of attending to both the physiologic and the psychosocial needs of the childbearing family are reviewed.
Emphasis will be placed on AWHONN and ACOG standards of care.

### NURS24501
**Clinical Laboratory of Childbearing Theory**
**CAPOTOSTO, MELISSA K**
**Fall 2020**

Application of childbearing theory to the diagnoses, interventions, and outcomes for the care of families in structured clinical settings. Focus is on prenatal, perinatal, and post-natal activities. Students work collaboratively with the multidisciplinary team in applying evidenced-based practice derived from current multidisciplinary research to the childbearing family. Supervised by nursing faculty, the students are mentored to extend their skills in critical thinking and clinical judgment to meet the physical, psychosocial, cultural, and spiritual needs of their clients and families. Emphasis will be placed on QSEN, AACN Essentials for baccalaureate education, AWHONN and ACOG standards of care.

**Credits:** 03

### NURS25002
**Child Health Nursing Theory**
**HAZE, NANCY J**
**Fall 2020**

This course builds on the published Pediatric Nursing: Scope and Standards of Practice to discuss the unique responses of children and their families to acute and chronic illness. Emphasis is placed on the child’s growth and development in relation to wellness and illness. A family-centered approach is used to address the health teaching, promotion, restoration, and maintenance needs of children and their families. Theoretical principles are presented, and creative, evidence-based nursing intervention strategies to meet the needs of children and their families across the health care continuum are discussed.

**Credits:** 03

**Room and Schedule:** CARNEY HALL 033A, W 9-10 50;

### NURS25201
**Psychiatric Mental Health Nursing Theory**
**DUNNE, JULIE J**
**Fall 2020**

This course builds upon the standards of practice from APNA-ISPN, AACN, and QSEN to discuss the legal, ethical, and therapeutic role of the psychiatric mental health nurse in caring for individuals with psychiatric disorders across the life span. Current interdisciplinary research on the genetic, neurobiological, and psychosocial theories of depression, psychosis, substance abuse, bipolar illness, eating, anxiety, personality,
### NURS425301
**Psychiatric Mental Health Nursing Clinical Laboratory DUNNE, JULIE P**
**Fall 2020**

This course introduces the conceptual and scientific frameworks of population health, emphasizing public health nursing roles. The course integrates health promotion, risk reduction, and disease prevention across the lifespan in a range of local and global settings, using case examples that nurses, as part of interdisciplinary teams, will encounter. Community assessment and epidemiological methods are introduced. Health disparities and vulnerability are examined through an ecological lens together with traditional and emerging public health issues. Students will learn about bridging population health and clinical care in order to meet the prevention health needs of individuals, families, and populations.

**Credits:** 03

### NURS4263102
**Actualizing the Role of Professional Nurse SIMONELLI, MARY C; MAHONEY, ELLEN K**
**Fall 2020**

This course prepares students to transition into the role of the professional nurse. Responsibilities associated with assuming the role of a professional are explored in relation to furthering individual and social good. Contemporary health care policies and economic pressures are examined for their influence on the delivery of quality patient care. Current ethical and legal standards are highlighted and students are encouraged to reflect on how biases and prejudices influence the provision of patient care. Focus is placed on recognizing and addressing injustices in health care access and quality, which is essential to actualizing the role of professional nurse.

NURS741501
Conceptual Basis for Advanced Practice Nursing Bond, Steewart
Fall 2020
The focus of this course is the development of knowledge as the basis for advanced practice nursing. Philosophical, conceptual, and theoretical perspectives of leaders and scholars from nursing and related fields are surveyed and critiqued. Opportunities are provided to explore and evaluate key issues such as levels of theory development, the domain of clinical judgement, and language and information technology. Emphasis is on knowledge-based quality improvements within various systems and environments that affect health care. Theories and models related to organizational change and health policy are applied.
Credits: 03

NURS741601
Ethical Issues in Advanced Practice Nursing UVEGES, MELISSA K
Fall 2020
The focus of this course is to explore the boundaries of Advanced Practice Nurses’ (APNs) ethical responsibilities to individuals, groups, and society in an intra- and interdisciplinary, collaborative health care environment. The philosophical and theoretical foundations of ethical practice are critically examined for their ability to enhance decision-making that best serves the interests of current and future patients and meets societal needs. An emphasis is placed on developing the skills needed to address challenges and obstacles to ethical practice in advanced practice roles and settings. Strategies to influence health policy related to various specialty populations are explored.

NURS743701
Advanced Practice Psychiatric Nursing Across the Life Span I MARCHETTI, CAROL A; PETRECA, VICTOR G
Fall 2020
In this combined didactic and clinical course, students learn to conduct mental health evaluations, to formulate psychiatric and nursing diagnoses, and to plan and implement short-term/initial treatment, case management, referral plans, and client services for adults, children, and families. Clinical placements (20 hours/week) are individualized to match students' interests in a variety of psychiatric-mental health (PMH) settings including mental health outpatient services and forensic settings. Faculty and agency preceptors assist students to develop essential evaluation and diagnostic skills and to provide individualized, culturally sensitive nursing care and clinical services to diverse client populations.
Credits: 06
Room and Schedule: CARNEY HALL 305,T 9-11 50;
Satisfies Core Requirement: None
Prerequisites: NUR7420 AND NURS7672 AND NURS7430.

NURS743801
Advanced Practice Theories of Psychotherapy MARCHETTI, CAROL A
Fall 2020
This course is designed to explore major approaches to individual psychotherapy, such as Psychodynamic, Humanistic, Interpersonal, Behavioral, Cognitive, Dialectical Behavioral, Brief, and Multicultural. Commonalities and differences among the processes and techniques are discussed. Selected theorists and their approaches to psychotherapy will be examined as examples of major schools of thought concerning the nature of the psychotherapeutic relationship. Applications across the life span and among diverse populations are critically examined.

NURS745001
Women and Children's Health Advanced Practice Theory ST PIERRE, SHERRI B
Fall 2020
This course focuses on theoretical knowledge for the indirect and direct roles of the advanced practice nurse in health care of women and children. Content will address use, analysis, and synthesis of theories and research with attention to the impact of culture, ethnicity, race, socioeconomic status, and family structures. Psychosocial influences on women's health, parenting, and child development are explored. Students will interpret the roles of the advanced practice nurse in MCH as these affect and are affected by health care and health care delivery systems at the national level.

NURS745201
Women's Health Advanced Practice Nursing I HARRIS, ALLYSSA L; MURPHY-SWENSON, ERIN E
Fall 2020
This course is the first of two courses in the Advanced Practice in Women's Health series. The role of the advanced practice nurse with women across the life span is explored with a focus on wellness promotion and management of common alterations in the sexuality-reproductive pattern, with special concern for cultural, ethnic, and socioeconomic diversity. Theories and research from nursing and other disciplines are synthesized and evaluated through seminars, clinical conferences, clinical experiences (20 hours/week), and course assignments.
Credits: 06
Room and Schedule: CARNEY HALL 303,T 9-11 50;
Satisfies Core Requirement: None

NURS745701
Pediatric Primary Care/Advanced Practice Nursing I WHITE, LAURA S; ST PIERRE, SHERRI B
Fall 2020
This clinical course is the first of two advanced practice specialty nursing courses for preparing pediatric nurse practitioners. This course focuses on health promotion and maintenance and prevention of illness and disability, as well as assessment, diagnosis, and management of common pediatric problems/illnesses. Anatomical, physiological, psychological, cognitive, socioeconomic, and cultural factors affecting a child's growth and development are analyzed. Parenting practices, family life styles, ethical issues, and environmental milieu are also explored. Students engage in preceptor clinical practice (20 hours/week) where they apply their cognitive, affective, and psychomotor skills and are guided by critical thinking and clinical decision making.
Credits: 06

NURS746001
Primary Care of Adults and Older Adults Theory I HOWARD, ELIZABETH P
Fall 2020
First AG health course focusing on primary care of adult and older adults, exploring advanced practice in context of nursing knowledge and concepts from other disciplines. Includes integration of concepts in health promotion, prevention, identification of risk factors that potentially threaten health of adults. Variables include health status, age, development, gender, ethnicity, socio-economics, and cultural characteristics associated with health behaviors across group settings are studied as they impact health and related behaviors. Emphasis on related concepts. Discussions integrate role of APN as leader in health care reform and articulation of nursing contributions to interdisciplinary adult and older health care outcomes.
Credits: 03
Room and Schedule: T 1-3 50; ONLINE; SYNCHRONOUS;
Satisfies Core Requirement: None
Prerequisites: NURS7412 AND NURS7417. Or concurrently.

NURS746301
Primary Care Adult and Older Adult/Advanced Practice Nursing I CONNOLLY, MAUREEN A; HOWARD, ELIZABETH P; FLANAGAN, JANE M
Fall 2020
This first course in the adult-gerontology health practicum series concentrates on the application of the clinical reasoning process used to assess, diagnose, and treat common primary care and chronic illness problems of the adult population throughout the lifespan. Emphasis is placed on the integration of epidemiologic, genetic, environmental, social-political, and cultural determinants that contribute to alterations in the health status of young, middle, and older adults. Health promotion, evidence-based practice, and holistic health strategies are integrated to promote the optimal level of being and functioning of adults across the life span.
Credits: 06
Room and Schedule: FULTON HALL 115,T 9-11 50;

NURS747001
Community and Family Health Advanced Theory I DWYER, ANDREW A
Fall 2020
This course is the first of a series in theories, relevant to advanced practice nurses in Family and Community Health specialties. It focuses on concepts, theories, and research needed to thrive in the advanced practice role. Emphasis is on health promotion: helping individuals, families, and aggregates to attain optimum levels of wellness. Theories and related research from nursing and other disciplines are integrated, and innovative health promotion programs or practice models are showcased.

NURS747301
Primary Care of Families/Advanced Practice Nursing I
MARSHALL, ALISON O; CULLINAN, DONNA L; UNDERWOOD, PATRICIA
Fall 2020
This combined didactic and practicum course focuses on the assessment, diagnosis, and management of selected primary health care problems in individuals and families using critical thinking and diagnostic reasoning. Incorporation of health promotion, maintenance, and delivery of care strategies as they relate to individuals and families are emphasized. Students practice 20 hours per week in a variety of clinical settings including health departments, health centers, homeless clinics, health maintenance organizations, private practices, and occupational health clinics.

Credits: 06
Room and Schedule: CARNEY HALL 005,T 9-11 50;
Satisfies Core Requirement: None
Prerequisites: NURS7430 AND NURS7420 AND NURS7672.

NURS759001
Physiologic Variables for Nurse Anesthesia III EMERY, SUSAN A
Fall 2020
This course builds upon the clinical physiology of the neurological, endocrine, and renal systems. The focus of discussion will be on the anatomy and physiology of the nervous system, including nerve action potential, neuromuscular transmission, the autonomic nervous system, neurotransmitters, and cerebral blood flow. Also, normal physiology of the endocrine and renal system will be studied, including the more commonly seen alterations in these systems. Emphasis will be placed on the anesthetic implications of caring for patients with high risk conditions.

Credits: 03
Room and Schedule: CARNEY HALL 007,M 1-3 50;
Satisfies Core Requirement: None
Prerequisites: NURS7490 AND NURS7415 AND NURS7494.

NURS759101
Nurse Anesthesia I THOMAS, ALLAN C
Fall 2020
This course provides the opportunity for students to integrate theory into practice within the clinical setting. The focus is on the development of diagnostic, therapeutic, and ethical judgments for the patient undergoing surgery and anesthesia. During the first semester of clinical anesthesia practice the emphasis is on the development and implementation of a patient specific plan of anesthesia care for healthy patients undergoing minimally invasive surgical procedures. Synthesis of theoretical knowledge with clinical practice is enhanced by weekly seminars, case presentations, critical care exemplars, and high fidelity simulation.

Credits: 05
Room and Schedule: M 7 AM;CARNEY 007;CARNEY HALL 007,M 8;
Satisfies Core Requirement: None
Prerequisites: NURS7491 AND NURS7492 AND NURS7493 AND NURS7494 AND NURS7490 AND NURS7415.

NURS800301
Direct Entry Adult Health II
REPSHA, CHRISTINE L; BOND, STEWART
Fall 2020
This course focuses on the nursing care of adults and older adults experiencing complex health problems. Relevant theories from nursing and other disciplines, research, and evidence-based guidelines are applied. Person/family-centered approaches to promote, restore, and maintain health are emphasized. Students develop and revise plans of care considering biopsychosocial, cultural, legal, and ethical factors influencing the health and care of adults and older adults with complex health problems and their families. Students will examine the nurse’s role in safety and quality improvement.

NURS800401
Direct Entry Adult Health Nursing Clinical HURLEY, DOREAN L; MCNUTT-CLARKE, BETH
Fall 2020
This clinical course focuses on the application of knowledge and implementation of professional nursing practice in caring for adults and older adults with acute and chronic conditions and their families. Students will learn and practice advanced psychomotor skills in simulated settings. Through interdisciplinary collaboration, students implement evidence-based practice to provide high-quality, safe, cost-sensitive care. Students extend their skills in therapeutic communication, critical thinking, and clinical decision making to meet the biopsychosocial and cultural needs of adults and older adults from diverse backgrounds. Students demonstrate leadership in providing patient education, advocacy, and transitional care.

NURS800601
Direct Entry Psychiatric Mental Health Nursing Clinical DUNNE, JULIE P
Fall 2020
This clinical course focuses on the application of knowledge and implementation of professional nursing practice in caring for individuals with psychiatric illness and mental health needs. The primary focus is promoting mental health and wellness across the lifespan in a variety of settings. Through interprofessional collaboration, students will develop skills in healthcare technology implementation design that addresses such industry-specific requirements as translating HIPAA and other regulations into specific technology decision-making processes while implementing medical systems (EMR, lab, clinical services, medical database providers, etc.). Students will also learn how to manage multi-institutional relationships as they are expressed in technology implementations, including the many vendor configurations but also cross-provider organization relationships. Specific topics include data and systems integrations, communications protocols, security standards, procurement, and authentication and authorization.

NURS871501
Nursing Leadership in Complex Health Care Settings REID PONTE, PATRICIA A
Fall 2020
This course prepares graduate nursing students to become leaders in health care. Self-reflection, self-assessment, and values clarification provide the groundwork for a nursing leadership self-development plan. Students will explore a broad range of evidence-based approaches, including leadership and organizational theories, to prepare them to lead in today's complex health care environment including practice, organization, system, academic, and policy arenas. Students will explain the complexities of health care leadership through the examination of topics such as change management, partnership relationships, innovation, accountability models, organizational culture, diversity and inclusion, conflict management, power, creating trust and psychological safety within teams.
Credits: 03
Room and Schedule: ONLINE COURSE; ASYNCHRONOUS;
NURS871002
Nursing Leadership in Complex Health Care Settings O'REILLY-JACOB, MONICA K; KELLY-WEEDER, SUSAN A
Fall 2020
This course prepares graduate nursing students to become leaders in health care. Self-reflection, self-assessment, and values clarification provide the groundwork for a nursing leadership self-development plan. Students will explore a broad range of evidence-based approaches, including leadership and organizational theories, to prepare them to lead in today’s complex health care environment including practice, organization, system, academic, and policy arenas. Students will explicate the complexities of health care leadership through the examination of topics such as change management, partnership relationships, innovation, accountability models, organizational culture, diversity and inclusion, conflict management, power, creating trust and psychological safety within teams.

NURS887501
Secondary Analysis of Health-Related Datasets QIU, MEI R
Fall 2020
In this course, students apply concepts from earlier methods and statistics courses to the secondary analysis of large datasets to answer health-related research questions of interest. Students may choose to work with one of the datasets available for use in the course or, with permission, work with a faculty member on one of his/her datasets. Students are expected to:
1. delineate a research question;
2. select an appropriate dataset and analytic approach to answer the question;
3. execute the analysis;
4. discuss the strengths and limitations of the approach and the results; and
5. disseminate findings through publications or presentations.

<td>NURS980601</td>
<td>Philosophical Inquiry for Knowledge Development in Nursing</td>
<td>FLANAGAN, JANE M</td>
<td>Fall 2020</td>
<td>Movements in the history and philosophy of science are reviewed for appreciating nursing’s epistemological development. Contemporary understandings of philosophy and science and their influences on knowledge development and nursing are examined. A focus is on understanding the relationship of the epistemological foundations of nursing to those of the health and social sciences. The course aims to develop scholars who can critically evaluate scientific initiatives and their relevance for nursing practice and emerging societal needs. Emphasis is on integrating knowledge of movements in philosophy of science and nursing epistemology with themes developed in Strategies for Knowledge Development in Nursing.</td>

<td>Strategies for Knowledge Development in Nursing</td>
<td>LYONS, KAREN S</td>
<td>Fall 2020</td>
<td>In conjunction with Philosophical Inquiry for Knowledge Development in Nursing, this course provides an in-depth exploration of theory and knowledge development for nursing purposes and interdisciplinary collaborations. Students will gain an understanding of the various ways by which important disciplinary questions arise, are formulated, and pursued. Select theoretical frameworks and concepts are critiqued for their clarity, logic and utility for disciplinary knowledge development. A particular focus is placed on application to the student's area of interest and in formulating salient, researchable questions.</td>

NURS983701
Psychiatric-Mental Health Advanced Practice Nursing Across the Lifespan I
MARCHETTI, CAROL A; PETRECA, VICTOR G
Fall 2020
The first of three in the Psychiatric-Mental Health Advanced Practice Nursing series, this course focuses on promoting optimal mental health treatment for populations in diverse settings through practice, leadership, and advocacy that is evidence-based, reflective, and ethical. Students examine neurobiological, psychosocial, developmental, and nursing frameworks to conduct mental health evaluations and risk assessments; formulate diagnosis; and implement evidence-based, patient-centered care across the lifespan. Societal influences on mental health, such as race, ethnicity, gender, poverty and violence are explored; and factors related to mental health promotion and treatment are identified.

NURS983801
Individual Psychotherapy for Advanced Practice Nursing MARCHETTI, CAROL A
Fall 2020
This course examines major approaches to individual psychotherapy, including psychodynamic, humanistic, interpersonal, behavioral, cognitive, dialectical behavioral, brief, and multicultural perspectives. Commonalities and differences among the processes and techniques are explored. Selected theorists and their approaches to psychotherapy will be evaluated as examples of major schools of thought concerning the nature of the psychotherapeutic relationship. Applications among diverse individuals and populations across the lifespan are critically examined.

Women's Health/Gender-Related Advanced Practice Nursing I
Fall 2020
The first of three in the Women's Health/Gender-Related Advanced Practice Nursing series, this course focuses on health promotion, prevention, and management of common alterations in sexual and reproductive health, while accounting for individual differences. Health disparities associated with gender, race/ethnicity, and socioeconomic status are examined and remediation strategies explored. Theoretical, evidence-based, and cost-effective clinical approaches to common women's health and gender-specific primary care problems are emphasized.

Nursing Courses: Spring 2021

NURS121001
Public Health in a Global Society EDMONDS, JOYCE K; FRANCKLE, REBECCA L
Spring 2021
This foundation course presents public health as an interdisciplinary science focused on health promotion and disease prevention at the population level. The course provides an overview of the history of public health, global burden of disease, sub-disciplines of public health, maternal/child health, and nutrition, and emphasizes the collaborative nature of the field through examples in research and practice. An inherent principle in public health is advancing social justice and this course and the public health sequence more broadly, focuses on at-risk populations, reducing health disparities, and improving health equity at the population level.

NURS207001
Introduction to Professional Nursing HURLEY, DOREAN L; GENNARO, SUSAN; PADOS, BRITT F
Spring 2021
This course provides an introduction to professional nursing, exploring nursing's history and the development of nursing knowledge grounded in theory and evidenced-based practice. The course places the study of socially just nursing practice within the tradition of liberal arts education. Engaging in critical self-reflection, students apply new value-based self-awareness to culturally congruent nursing care. Ethical reasoning processes are applied, utilizing clinical and population-based case studies. Therapeutic communication with individuals across the lifespan is introduced. Nursing education, practice, and professional careers as well as the influence of current health care environmental factors on health and evidenced-based nursing practice are discussed.

Sophomore Formation Seminar SIMONELLI, MARY C
Spring 2021
This course is required for sophomore undergraduate nursing students and will involve
guided review and reflection to reinforce the inherent professional values of altruism,
human dignity, integrity, and social justice fundamental to the discipline of nursing.
Activities in the weekend long retreat will be guided by the Ignatian formation
principles and student's values and beliefs as they relate to professional practice,
development as individuals and as members of caregiving teams. The goal is to build
a foundation for professional leadership as nursing students become aspiring members
of the nursing profession and productive and committed citizens of society at large.
Credits: 0
Room and Schedule: BY ARRANGEMENT; Satisfies Core Requirement: None
Prerequisites: None
Corequisites: Must be taken alongside NURS2230, NURS2231, NURS2204, and
NURS3170.

Clinical Pharmacology SLY, JACQUELINE R
Spring 2021
This course focuses on the study of clinical pharmacology across the lifespan and
scientific principles underlying its use in professional nursing. Major drug classifications
and respective prototypes serve as a foundation for lifelong learning and higher-level
understanding of pharmacotherapeutics. Using case studies, discussions focus on the
importance of collaboration, patient education, and alternative and complementary
therapies, while being mindful of patient social factors. Emphasis is placed on
delivering high quality and safe patient care related to medication administration.

NURS223102
Adult Health Nursing I Clinical Laboratory NUGENT, LUANNE; SULLIVAN, EILEEN A
Spring 2021
The weekly hospital clinical focuses on fostering skill in the planning and
implementation of care of adults, including older adult, with an altered health status.
Emphasis is placed on integrating the components of the nursing process, utilizing
evidenced based nursing practice, standards of quality and safety, and principles of
cultural awareness. The weekly college laboratory sessions focus on developing
competency in basic nursing skills and related documentation.
Credits: 0
Room and Schedule: T 2 15-3 45;
Satisfies Core Requirement: None
Prerequisites: NURS2120 AND NURS2121 AND NURS2070 AND NURS2080.
Corequisites: NURS2230. Cross-listed with: None

NURS301601
Comparing Health Care Systems through a Global Lens SIMONELLI, MARY C
Spring 2021
Introduction to the concepts of global health and the critical links between public health and social and economic development. Determinants of health and patterns of disease and health outcomes across the globe are critically examined. The course reviews the determinants of health status in terms of biology, demography, epidemiology, culture, sociology, economics, and politics. Key concerns regarding reproductive health, child survival, nutrition, communicable diseases, and chronic diseases are examined. Health care delivery in developed vs. undeveloped regions of the world is emphasized.

NURS317001...
NURS321001
Contemporary Issues in Public Health HAWKINS, SUMMER S
Spring 2021
This course provides students the opportunity to apply the foundational skills of public health to contemporary public health issues. The course integrates data and research to begin a more in-depth examination of the major burdens of disease and several emerging areas of concern.
With a consistent goal of reducing health disparities, the course identifies population-level risk factors as well as evidence-based interventions for health promotion and disease prevention. Principles and concepts learned in 'Public Health in a Global Society' are reinforced through specific health conditions, behaviors, and topics.

NURS324201
Adult Health Nursing Theory II ASHLEY, JANE; BARONE, STACEY H
Spring 2021
This course builds on the concepts learned in previous courses including adult health and pharmacology and expands the knowledge base for planning and implementing care of adults with acute health problems and acute exacerbations of chronic health problems. Clinical case studies of acute care emergencies are used to discuss clinical judgment. Emphasis is placed on the selection of evidence-based interventions, evaluation of interventions, and use of evaluative data in refining a plan of care for the adult patient. Discussions focus on the role of the primary nurse in the acute care setting including collaboration, discharge planning, and health teaching.
Credits: 03
Room and Schedule: CARNEY 202, W 1-3 50; Satisfies Core Requirement: None
Prerequisites: NURS2231 AND NURS2320 AND NURS2204.

NURS324301
Adult Health Nursing II Clinical Laboratory BARONE, STACEY H; ASHLEY, JANE
Spring 2021
This course provides clinical experiences with adults who have acute health problems and acute exacerbations of chronic health problems. Students perform the role of the primary nurse with emphasis on the implementation of evidence-based interventions, documentation of patient outcomes, collaboration, and communication. This course builds on knowledge from previous courses and expands the students' understanding of the professional role with a focus on nursing standards of care, safety, quality improvement, and transitional care planning.
Credits: 03

NURS324401
Childbearing Nursing Theory CAPOTOSTO, MELISSA K
Spring 2021
The course focuses on concepts associated with the unique responses of families during the childbearing cycle, normal and high risk pregnancies, and normal and abnormal events in women's health. Current multidisciplinary research in women's health with a focus on the childbearing cycle, including genetics and cultural competence, is presented. Evidence-based nursing practice for the childbearing family is discussed. The nursing implications of attending to both the physiologic and the psychosocial needs of the childbearing family are reviewed. Emphasis will be placed on AWHONN and ACOG standards of care.
Credits: 03
Room and Schedule: FULTON HALL 511, F 10-11 50; Satisfies Core Requirement: None

NURS324501
Clinical Laboratory of Childbearing Theory CAPOTOSTO, MELISSA K
Spring 2021
Application of childbearing theory to the diagnoses, interventions, and outcomes for the care of families in structured clinical settings. Focus is on prenatal, perinatal, and post-natal activities.
Students work collaboratively with the multidisciplinary team in applying evidence-based practice derived from current multidisciplinary research to the childbearing family. Supervised by nursing faculty, the students are mentored to extend their skills in critical thinking and clinical judgment to meet the physical, psychosocial, cultural, and spiritual needs of their clients and families. Emphasis will be placed on QSEN, AACN Essentials for baccalaureate education, AWHONN and ACOG standards of care.
Credits: 03
Room and Schedule: M 7-3PM; M 3-11PM; Satisfies Core Requirement: None

NURS425001
Child Health Nursing Theory HAZE, NANCI J
Spring 2021
Based on the published Pediatric Nursing: Scope and Standards of Practice to discuss the unique responses of children and their families to acute and chronic illness. Emphasis is placed on the child's growth and development in relation to wellness and illness. A family-centered approach is used to address the health teaching, promotion, restoration, and maintenance needs of children and their families. Theoretical principles are presented, and creative, evidence-based nursing intervention strategies to meet the needs of children and their families across the health care continuum are discussed.

NURS425201
Psychiatric Mental Health Nursing Theory DUNNE, JULIE P
Spring 2021
This course builds upon the standards of practice from APNA-ISPN, AAN, and QSEN to discuss the legal, ethical, and therapeutic role of the psychiatric mental health nurse in caring for individuals with psychiatric disorders across the life span. Current interdisciplinary research on the genetic, neurobiological, and psychosocial theories of depression, psychosis, substance abuse, bipolar illness, eating, anxiety, personality, and cognitive disorders is analyzed. Evidence-based nursing practice, including psychopharmacology and psychosocial treatment modalities such as cognitive-behavioral, interpersonal, group, and milieu therapy is applied from a multicultural perspective. Nursing interventions for families and communities experiencing crisis, grief, and trauma are identified.

NURS426002
Population Health Nursing Theory HORRELL, LINDSEY N
Spring 2021
This course introduces the conceptual and scientific frameworks of population health, emphasizing public health nursing roles. The course integrates health promotion, risk reduction, and disease prevention across the life span in a range of local and global settings, using case examples that nurses, as part of interdisciplinary teams, will encounter. Community assessment and epidemiological methods are introduced. Health disparities and vulnerability are examined through an ecological lens together with traditional and emerging public health issues. Students will learn about bridging population health and clinical care in order to meet the prevention health needs of individuals, families, and populations.

NURS426401
Actualizing the Role of Professional Nurse SIMONELLI, MARY C; ASHLEY, JANE; HURLEY, DOREAN L
Spring 2021
Prepares students to transition into the role of the professional nurse. Responsibilities associated with assuming the role of a professional are explored in relation to furthering individual and social good. Contemporary health care policies and economic pressures are examined for their influence on the delivery of quality patient care. Current ethical and legal standards are highlighted and students are encouraged to reflect on how biases and prejudices influence the provision of patient care. Focus is placed on recognizing and addressing injustices in health care access and quality, which is essential to actualizing the role of professional nurse.

Global Healthcare: Meeting Challenges and Making Connections SIMONELLI, MARY C
Spring 2021
This course brings together students and faculty from around the world to discuss and synthesize perspectives on global health, specifically the challenges and common connections experienced across patient centered care, health education, healthcare systems and policy development. The participants will develop a deeper understanding of the particular needs of diverse and underserved populations. Emphasis will be placed on social justice and health of individuals, families, and populations. Through the lens of public health, this course explores assessment of healthcare needs, assurance of a quality healthcare infrastructure, and development of healthcare policy.

An Aging Society: Interdisciplinary Perspectives on Health Care LYONS, KAREN S
Spring 2021
This course provides a conceptual foundation for interdisciplinary health care delivery to older adults and their families. Emphasis is placed on the exploration of significant individual and societal issues in gerontology to guide and expand perspectives of advanced practice nurses and other health professionals in existing and future health systems. These issues are examined at the global and national level. Collaborative inter-professional practice and research are emphasized as a basis for care and services that support meaningful and purposeful life for older adults and families.

Conceptual Basis for Advanced Practice Nursing BOND, STEWART
Spring 2021
The focus of this course is the development of knowledge as the basis for advanced practice nursing. Philosophical, conceptual, and theoretical perspectives of leaders and scholars from nursing and related fields are surveyed and critiqued. Opportunities are provided to explore and evaluate key issues such as levels of theory development, the domain of clinical judgement, and language and information technology. Emphasis is on knowledge-based quality improvements within various systems and environments that affect health care. Theories and models related to organizational change and health policy are applied.

Advanced Pharmacology Across the Life Span WOOD, LISA J; LAPIERRE, KELLIE L
Spring 2021
This course is intended to provide the student with an understanding of pharmacology and drug therapy as it relates to advanced practice (general and/or in a clinical specialty). The interrelationships of nursing and drug therapy will be explored through study of pharmacodynamics, dynamics of patient response to medical and nursing therapeutic regimens, and patient teaching as well as the psychosocial, economic, cultural, ethical, and legal factors affecting drug therapy, patient responses, and nursing practice. The role of the nurse practicing in an expanded role in decision-making related to drug therapy is also included.

NURS742601
Advanced Psychopharmacology Across The Life Span PETRECA, VICTOR G
Spring 2021
This course builds upon the standards of practice from APNA-ISPAN, AACN, NONPF, and APA. The legal, ethical, and therapeutic role of the advanced practice nurse in prescribing psychotropic medications for individuals with psychiatric disorders is examined across the lifespan. The evidence based prescription of psychopharmacological agents according to practice guidelines will be a focus in each class. The course will review neurobiology, the action of central nervous system medications, and the implications for ethno-psychopharmacology. Standardized tools to evaluate treatment efficacy and diagnostic criteria will be identified. Collaborative practice models, indications for referral, and monitoring to enhance treatment adherence are reviewed.

Advanced Health Assessment Across the Life Span CONNOLLY, MAUREEN A; WHITE, LAURA S
Spring 2021
Building on undergraduate course work and previous clinical experience, this course utilizes life span development and health risk appraisal frameworks as the basis for health assessment.
Students master health assessment skills for individuals within family, environmental, and cultural contexts. The course provides advanced practice nursing students with planned classroom and clinical laboratory experiences to refine health assessment skills and interviewing techniques. Health promotion, health maintenance, and epidemiological principles are emphasized in relationship to various practice populations.

Physiologic Variables for Nurse Anesthesia I--Respiratory VITALE, CAITLIN M
Spring 2021
This course is an in-depth study of the anatomy, physiology, and pathophysiology of the respiratory system and related anesthesia implications for the whole person. It complements physiologic principles learned in master's core courses. The concepts of ventilation and perfusion as well as oxygen transport will be examined. Assessment of baseline pulmonary function and alterations seen in common disease states will be reviewed. The effect of compromised pulmonary function and implications for the patient and the anesthesia plan will be discussed. The effect of surgery and anesthesia on the respiratory system will be emphasized.

NURS755001
Current Issues in Sexual Health Care WHITE, BRADLEY
Spring 2021
Sexual health is a critical component of well-being across the lifespan. Current research reveals that gender and sexual health identity and orientation are key factors in understanding patterns of sexual health behaviors and risks, and experiences of health, wellness, and illness. This course examines current and emerging issues affecting sexual health and strategies to inform clinical practice, including: the nurse-patient relationship and its influence on sexual well-being; health disparities linked to societal stigmas, prejudices, and discrimination; and ways to improve access to quality health care for populations disproportionately at risk for or affected by STIs including HIV/AIDS.

Credits: 03
Room and Schedule: CARNEY HALL 202, T 4 30-7 30; HYBRID;
Satisfies Core Requirement: None
Prerequisites: With permission of the Instructor. Matriculation in a graduate program in CSON or permission of the instructor.
Corequisites: None Cross-listed with: None Frequency: Annually Student Level: GRADUATE Comments: None Status: CLOSED

NURS755301
Women’s Health Advanced Practice Nurse Practitioner II HARRIS, ALLYSSA L; MURPHY-SWENSON, ERIN E; CAPOTOSTO, MELISSA K
Spring 2021
This course builds on Women and Children’s Health Advanced Practice Theory and Research. The focus is on advanced practice with women throughout the lifespan, focusing on the development and evaluation of management strategies to promote optimal functioning in women facing obstetrical and gynecological care as well as the indirect role functions in advanced practice as Clinical Nurse Specialists/Nurse Practitioners. Theories and research from nursing and other disciplines are applied and integrated through seminars, clinical conferences, clinical experiences (20 hours/week), and course assignments.

Credits: 06
Room and Schedule: CARNEY HALL 007, T 9-11 50;
Satisfies Core Requirement: None
Prerequisites: NURS762 AND NURS7420 AND NURS7430 AND NURS7450.
Corequisites: None Cross-listed with: None Frequency: Annually Student Level: GRADUATE Comments: None Status: OPEN

NURS755601
Advanced Clinical Decision-making in Pediatric Primary Care WHITE, LAURA S
Spring 2021
The purpose of this course is to provide an in-depth focus and understanding of the complexities of contemporary pediatrics and the process of diagnostic reasoning directly related to clinical experience. Emphasis is placed on the new morbidities of pediatrics, current research in child development, and the current policies and expectations of primary care pediatrics. This course will provide content specific to pediatrics, teen, and young adult health and development.

Credits: 03
Room and Schedule: CARNEY HALL 305; T 1-3 50;
Satisfies Core Requirement: None
Prerequisites: NURS7430; NURS7420; NURS7672; NURS7447.
Corequisites: NURS7557. Cross-listed with: None Frequency: Annually Student Level: GRADUATE Comments: None Status: OPEN

NURS755701
Pediatric Primary Care/Advanced Practice Nursing II ST PIERRE, SHERRI B; WHITE, LAURA S
Spring 2021
This course builds on NURS 7457. The focus is on management of children with more complex or chronic health problems. Theories and research from nursing and other disciplines are synthesized, with special consideration of the influences of culture and SES on wellness and health care. Students continue in precepted clinical practice (20 hours/week) to develop advanced skills in differential diagnosis and gain increased comfort in managing psychosocial problems. In consultation with preceptors, students make referrals, develop treatment and teaching plans with clients, document accurately, and further develop confidence and competence in the role of pediatric nurse practitioner.

Credits: 06
Room and Schedule: CARNEY HALL 202, T 9-11 50;
Satisfies Core Requirement: None
Prerequisites: NURS762 AND NURS7420 AND NURS7430 AND NURS7450 AND NURS7457.
Corequisites: None Cross-listed with: None Frequency: Annually Student Level: GRADUATE Comments: None Status: CLOSED

NURS756201
Primary Care of Adults and Older Adults Theory II HOWARD, ELIZABETH P
Spring 2021
This second course focuses on primary care of adult/older adult. Analysis/synthesis of nursing and knowledge to guide evidenced-based interventions/outcome. Intervention strategies, complementary healing modalities, actions responsive to changing healthcare delivery systems are explored in relation to outcome indicators that distinguish the APN role addressing commonly occurring nursing problems. Innovative practice models designed to highlight APN leadership and practice. Evaluation of current knowledge to address nurse sensitive indicators is also explored. Interdisciplinary collaborations discussed, especially relating to development of APN led care models promoting health and life transitions of adults/older adults. Measures used to evaluate effectiveness of the APN outcomes are identified.

Credits: 03
Room and Schedule: T 1-3 50; ONLINE; SYNCHRONOUS;
Satisfies Core Requirement: None
Prerequisites: NURS7462.
Corequisites: NURS7415 AND NURS7417.

NURS756301
Primary Care Adult and Older Adult/Advanced Practice Nursing II LAPOIERRE, KELLEI L; CONNOLLY, MAUREEN A; HOWARD, ELIZABETH P
Spring 2021
This second course in the adult-gerontology health practicum series builds upon the knowledge gained in NURS7463. The course continues to apply the clinical reasoning process used to assess, diagnose, and treat common primary care problems and chronic illnesses of the adult-gerontology population considering lifespan, frailty, and socio-cultural influences. Through critically appraising current strategies used to promote the optimal level of being and functioning of adults and older adults, students will be encouraged to develop plans that address gaps in care.

Credits: 06
Room and Schedule: CARNEY HALL 305; T 9-11 50;
Satisfies Core Requirement: None
Prerequisites: NURS7430 AND NURS7450 AND NURS7463 AND NURS7672.
Corequisites: NURS7562. Cross-listed with: None Frequency: Annually Student Level: GRADUATE Comments: None Status: OPEN

NURS757001
Community And Family Health Advanced Theory II MARSHALL, ALISON O
Spring 2021
This course is the second of a series in the theory and advanced practice of community and family health nursing. It focuses on theories, concepts, and research findings in the development and evaluation of nursing interventions and strategies that promote health in aggregates and communities. Health legislation and multiple socioeconomic and environmental factors are analyzed to determine their influence on planning for family health and community wellness.

Credits: 03
Room and Schedule: YAWKEY ATHLETIC CENTER 426; T 1-3 50;
Satisfies Core Requirement: None
Prerequisites: None
Corequisites: NURS7415, NURS7416, NURS7417; NURS7520.
Cross-listed with: None Frequency: Annually Student Level: GRADUATE Comments: None Status: OPEN

NURS757301
Advanced Practice in Community and Family Health Nursing II MARSHALL, ALISON O; CULLINAN, DONNA L
Spring 2021
This combined didactic and practicum course continues to integrate the assessment, diagnosis, and management of selected primary care health problems for individuals and families. Building on NURS7473 course content, this course emphasizes management of complex health problems. Students practice 20 hours per week to integrate theory, practice, and research as Family Nurse Practitioners.
NURS759201
Advanced Principles for Nurse Anesthesia Practice EMERY, SUSAN A
Spring 2021
This course focuses on selected problems associated with the provision of anesthesia for specialty and emergency surgeries. It explores anesthesia considerations related to the diverse needs of persons across the life span. Special attention is given to the anesthesia needs of the maternity, pediatric, and the aging patient. Content also addresses the specialty areas of acute and chronic pain management and outpatient surgery. Attention is given to patient comfort and safety issues implicit in surgical interventions and anesthesia delivery.
Credits: 03
Room and Schedule: MALONEY HALL 365,M 1-3 50; Satisfies Core Requirement: None
Prerequisites: NURS7492 AND NURS7590 AND NURS7591.
Corequisites: NURS7593. Cross-listed with: None Frequency: Annually

NURS759301
Nurse Anesthesia II THOMAS, ALLAN C
Spring 2021
This course provides the opportunity for students to integrate theory into clinical practice for patients with significant comorbidities undergoing more complex procedures. Anesthetic requirements as dictated by patient assessment, including the surgical procedure are studied in greater depth. Seminar and simulation experiences are sequenced to complement the theoretical content presented in NURS7592, Advanced Principles of Nurse Anesthesia Practice.
Credits: 05
Room and Schedule: CARNEY HALL 007,M 10-12; Satisfies Core Requirement: None Prerequisites: NURS7590 AND NURS7591.
Corequisites: NURS7592. Cross-listed with: None Frequency: Annually
Student Level: GRADUATE Comments: None
Status: CLOSED

NURS767201
Advanced Pathophysiology Across the Life Span DWYER, ANDREW A
Spring 2021
This course focuses on the processes that underlie diseases and dysfunctions that affect individuals across the lifespan. The emphasis is on central concepts of pathophysiology, including alterations in cellular communication, genetic mechanisms, homeostasis, cell growth regulation, metabolism, immunity, and inflammation. These concepts are then applied in a systematic survey of diseases within body systems. Current research, clinical examples, and application to advanced nursing practice are incorporated throughout the course.
Credits: 03
Room and Schedule: DEVLIN HALL 008,M 4 30-7 30; Satisfies Core Requirement: None
Prerequisites: With permission of the Instructor. Baccalaureate degree in nursing, enrollment in graduate program in School of Nursing or permission of the instructor.
Corequisites: None Cross-listed with: None Frequency: Annually
Student Level: GRADUATE Comments: None

NURS769301
Nurse Anesthesia V VITALE, CAITLIN M
Spring 2021
This course provides the opportunity for students to complete the competencies required to sit for the National Certification Examination. Critical thinking in complex situations is emphasized as students take more responsibility for anesthetic management. Students continue with both group and independent study one day per week at the college.
Credits: 05
Room and Schedule: CARNEY HALL 202,M 9-11 50; CARNEY HALL 202,W 9-11 50; Satisfies Core Requirement: None
Prerequisites: NURS7691.
Corequisites: None Cross-listed with: None Frequency: Annually

NURS800701
Direct Entry Child Health Nursing Theory HAZE, NANCY K
Spring 2021
This course focuses on the nursing care of children with acute and chronic conditions and their families. The primary focus is on child growth and development in relation to wellness and illness. Relevant theories from nursing and other disciplines, research, and evidenced-based guidelines related to the care of children and families are examined. Person/family-centered approaches to promote, restore, and maintain health are emphasized. Biopsychosocial, cultural, legal, and ethical factors influencing the health and care of children and families are explored.
Credits: 03
Room and Schedule: DEVLIN HALL 008,F 12-2 50; Satisfies Core Requirement: None
Prerequisites: NURS8002 AND NURS8003 AND NURS8004 AND NURS8006 AND NURS8001 AND NURS8005.
Corequisites: NURS8008 AND NURS8009 AND NURS8010.

NURS800801
Direct Entry Child Health Nursing Clinical HAZE, NANCY J; MANSFIELD, KATHLEEN J
Spring 2021
This course focuses on the application of knowledge and implementation of professional nursing practice in caring for children and families. A primary focus is promoting wellness and family-centered care for children with acute illness and chronic conditions. Through interprofessional collaboration, students implement evidence-based practice to provide high quality, safe, cost-sensitive care. Students extend their skills in therapeutic communication, critical thinking, and clinical decision-making to meet the biopsychosocial and cultural needs of children and families from diverse backgrounds. Students demonstrate leadership in providing patient education, advocacy, and transitional care for children and families.

### NURS871201

**Healthcare Quality Management**

**REID PONTE, PATRICIA A**

**Spring 2021**

This course explores the theoretical foundations and application of quality improvement methods, tools, and strategies needed to increase organizational effectiveness. The course focuses on measurement and accountability in health care delivery systems through the examination and analysis of data, structures, processes, and outcomes. Process improvement theories and models are explored with the goal of preparing students to lead and practice in organizations that advance high reliability principles, patient safety, inter-professional teamwork, and continuous learning.

**Healthcare Information Technology**

**STETTHEIMER, TIMOTHY D**

**Spring 2021**

This course explores the critical role of e-health and information systems in the planning, operation, and management of healthcare organizations. Students will learn how to assess and evaluate health information systems and business requirements in a variety of settings such as health systems, hospitals, and medical practices. Students will develop skills in healthcare technology implementation design that addresses such industry-specific requirements as translating HIPAA and other regulations into specific technology decisions while implementing medical systems (EMR, lab, clinical services, medical database providers, etc.). Students will also learn how to manage multi-institutional relationships as they are expressed in technology implementations, including the many vendor configurations but also cross-provider organization relationships. Specific topics include data and systems integrations, communications protocols, security standards, procurement, and authentication and authorization.

NURS871401
Nursing Ethics and Professional Responsibility in Advanced Practice
ROSS, RICHARD E
Spring 2021
The course prepares advanced practice nurses for ethics leadership within the broader healthcare arena. Links are made among philosophical/theoretical foundations of nursing, ethical theory, and nursing goals. Skills supportive of the ethical decision making of nurses, peers, and the team are developed with in-class opportunities to practice leading ethics rounds and developing ethics education projects. An emphasis is placed on facilitating the interests of current and future patients and society as a professional obligation. Socially derived injustices and professional responsibility to advocate for just healthcare is highlighted along with strategies to influence institutional and health policy on behalf of individual and social good.

NURS871501
Nursing Leadership in Complex Health Care Settings
O'REILLY-JACOB, MONICA K
Spring 2021
This course prepares graduate nursing students to become leaders in health care. Self-reflection, self-assessment, and values clarification provide the groundwork for a nursing leadership self-development plan. Students will explore a broad range of evidence-based approaches, including leadership and organizational theories, to prepare them to lead in today's complex health care environment including practice, organization, system, academic, and policy arenas. Students will explicate the complexities of health care leadership through the examination of topics such as change management, partnership relationships, innovation, accountability models, organizational culture, diversity and inclusion, conflict management, power, creating trust and psychological safety within teams.

NURS871602
Health Care Policy for Nursing Leaders
O'REILLY-JACOB, MONICA K; RYAN, KATHLEEN M
Spring 2021
This course prepares nurse leaders and scholars to influence health care and related policies in support of nursing's goals and social justice. The structure and financing of U.S. health care system and roles of government, insurers, providers, and consumers are examined. The relationships among health policy and the social and economic determinants of health are explored through analysis of key issues in health policy. Students engage in strategies to analyze and inform health policy. The course provides the foundation for leadership in interdisciplinary collaborative endeavors to address, through a nursing perspective, health policy issues at the local and national levels.

NURS971701
Methods of Advanced Scholarly Inquiry
JURGENS, CORMIN Y; REID PONTE, PATRICIA A
Spring 2021
This is the second of four courses to prepare DNP students to conduct an organization approved, scholarly inquiry project to improve health services and patient outcomes. Students critically evaluate the literature and related information to address a health care problem. Scholarly inquiry approaches are presented to enable students to identify a problem, plan change to improve a process or outcome, or develop innovative solutions related to health care delivery. Upon course completion, there will be a faculty and organizational approved DNP project charter, which includes the problem, processes, and expected outcomes.

### NURS973101
**Pharmacotherapeutics in Advanced Practice Nursing**

**WOOD, LISA J; LAPIERRE, KELLIE L**

**Spring 2021**

This course will provide the advanced practice nursing student with the fundamental pharmacologic principles necessary to support pharmacotherapeutic decision making in collaboration with patients across the lifespan. The interrelationship of physical, psychosocial, cultural, pharmacogenomic, economic, ethical, and legal factors will be explored. The student will develop evidence-based, cost effective interventions to promote optimal person-centered drug therapy. Application of these principles to various real world clinical situations and individual responses will be emphasized.

**Research Design and Methods II**

**WOOD, LISA J**

**Spring 2021**

This course examines specific methods utilized in the conduct of research. Areas of focus include recruitment and retention, sampling, data collection, measurement, instrumentation, fidelity, and data coding, management, and analyses. Methods are discussed in terms of quantitative, qualitative, and mixed methods research approaches. Topics also address components of building a research trajectory including research proposals for institutional approval, grand funding, and the dissemination of research findings.

### NURS981901
**Gerontology Primary Care Advanced Practice Nursing**

**LAPOIERRE, KELLIE L**

**Spring 2021**

The first of three in the Adult-Gerontology Primary Care Advanced Practice Nursing series, this course focuses on the promotion of optimal physical, mental, and social health of individuals across the adult-gerontology age spectrum through evidence-based, ethical, reflective practice, leadership, and advocacy. Students utilize patient-centered theoretical, evidence-based, cost-effective, high quality, and safe clinical approaches to the health promotion, disease prevention, and common adult and age-related primary care problems. Emphasis is on assessment, diagnosis, and management of common primary care problems. Primary health conditions are addressed within the context of biopsychosocial, developmental, cognitive, socioeconomic, and cultural factors.

- **Credits:** 06
- **Room and Schedule:** CARNEY HALL 303, M 1-3 50
- **Satisfies Core Requirement:** None
### NURS982501
**Family Primary Care Advanced Practice Nursing I**

**KELLY-WEEDER, SUSAN A**

**Spring 2021**

The first of three in the Family Primary Care Advanced Practice Nursing series, this course focuses on health promotion and management of common alterations in individual and family health across the lifespan. Special attention is given to understanding the health effects of disparities associated with gender, race/ethnicity, and socioeconomic status. Emphasis is on utilizing theoretical, evidence-based, cost-effective, high quality, and safe approaches to health promotion for individuals and families across the lifespan. Assessment, diagnosis, and management of common primary care problems are addressed within the context of biopsychosocial, developmental, socioeconomic, and cultural factors. Strategies to promote family health are explored.

### NURS983301
**Pediatric Primary Care Advanced Practice Nursing II**

**ST PIerre, Sherri B; WHITE, LAURA S**

**Spring 2021**

The second of three in the Pediatric Primary Care Advanced Practice Nursing series, this course focuses on management of chronic conditions in pediatric populations. Critical analysis of data, integration of theory, evidence-based, and cost-effective approaches to care coordination are emphasized. The broader health care system, interprofessional collaboration, and influences of neurodevelopment, culture, and social determinants of health are also considered. The leadership role of the Pediatric Advanced Practice Nurse in identifying and addressing barriers to optimal care is integrated throughout the course.

**Credits:** 06

### NURS983601
**Advanced Psychopharmacology Throughout the Lifespan**

**PETRECA, VICTOR G**

**Spring 2021**

This course examines the legal, ethical, and therapeutic role of the psychiatric-mental health nurse practitioner (PMHNP) in prescribing psychotropic medications for individuals with psychiatric disorders across the lifespan. The neurobiology, action of medications that affect the central nervous system, and implications for ethnopsychopharmacology will be explored. Standardized tools to evaluate diagnostic criteria and treatment efficacy will be analyzed. Evidence-based practice principles, collaborative practice models, indications for referral, and monitoring to enhance treatment adherence will be integrated throughout the course.

**Credits:** 03

**Room and Schedule:** CARNEY HALL 009, M 4 30-7 30; Satisfies Core Requirement: None

**Corequisites:** NURS9730 AND NURS9731 AND NURS9732.

### NURS983901
**Psychiatric-Mental Health Advanced Practice Nursing Across the Lifespan II**

**MARCHETTI, CAROL A; PETRECA, VICTOR G**

**Spring 2021**

The second of three in the Psychiatric-Mental Health (PMH) Advanced Practice Nursing (APN) series, this course prepares students for the PMH APN role. Knowledge of theoretical frameworks from NURS9837 is applied to assessment, diagnosis, and management of PMH problems. Students hone clinical judgment and communication skills to foster effective therapeutic alliances with patients/families, and facilitate interprofessional collaboration, consultation, and referrals. Topics in crisis management, mental illness prevention, mental health promotion, quality improvement, and case management for diverse populations are explored. A 375-hour supervised practicum provides opportunities for students to develop skills to treat people in diverse PMH clinical settings.

Forensics Courses: Fall 2020
FORS531501
Victimology BURGESS, ANN W
Fall 2020
This course examines the wide range of victimization experiences from the perspective of the victim, their families, and society. Crimes to be studied include robbery, burglary, carjacking, assault and battery, rape, domestic violence, stalking, homicide, arson, child sexual abuse and exploitation, child pornography crimes, federal crimes, identity theft, terrorism, and internet crimes. Emphasis will be given to exploring the etiology of trauma, motivational issues of offending, response patterns to victimization, secondary trauma effects of victimization, and community and media response. Class format will utilize cases from the forensic practice of the lecturers.

FORS531801
Forensic Science I BURGESS, ANN W
Fall 2020
Forensic science concepts and principles play a critical role in analyzing crime scene evidence. This course draws on scientific principles and examines cases where there has been a death, including suicide, accidental, and criminal; and cases where there is a survivor, in which there is a legal and/or ethical component. Specifically, the course applies a case method format to forensic science issues including forensic pathology, clinical forensics, crime victims, computer crime, and equivocal death.

Palliative Care Courses: Summer 2020

HLTH770001!
Serious Ill, Death, and Dying TABLOSKI, PATRICIA
Summer 2020
This course provides an opportunity for examination of personal, professional, and societal beliefs and perspectives on serious illness, death, and dying across the lifespan. Students become aware of and sensitized to personal assumptions, biases, attitudes and reactions to serious illness, death, and dying. Philosophies, principles, and models of palliative end-of-life care are discussed. Students develop an appreciation for individual and family coping processes throughout serious illness, death, dying, and bereavement. Students explore communication and bio-psycho-social-spiritual strategies that can be used to partner with individuals and families to maximize quality of life throughout serious illness, death, and dying.

Examining Diversity in Nursing and Health Care ABUELEZAM, NADIA; MAGNY-NORMILUS, CHERLIE
Summer 2020
This course is designed to help students develop foundational insights regarding diversity as an all-inclusive concept with complex intersections. It will focus on the professional nurse as a multifaceted cultural being with a network of identities and group affiliations that serve as both resources and barriers in the development of effective and meaningful patient/family-provider interactions. The primary goals of this course involve identifying sources of difference, deconstructing sociopolitical hierarchies, and recognizing the strengths and challenges inherent in diverse societies. The course will emphasize inclusive leadership strategies for transforming care delivery systems across multiple health care contexts.

Palliative Care Courses: Fall 2020

HLTH741601
Ethical Issues in Advanced Practice Nursing ROSS, RICHARD E
Fall 2020
The focus of this course is to explore the boundaries of Advanced Practice Nurses’ (APNs) ethical responsibilities to individuals, groups, and society in an intra and interdisciplinary, collaborative health care environment. The philosophical and theoretical foundations of ethical practice are critically examined for their ability to enhance decision-making that best serves the interests of current and future patients and meets societal needs. An emphasis is placed on developing the skills needed to address challenges and obstacles to ethical practice in advanced practice roles and settings. Strategies to influence health policy related to various specialty populations are explored.
Credits: 03
Room and Schedule: M 9-11 50;ONLINE;SYNCHRONOUS;

HLTH770201
Responding to Suffering in Serious Illness, Death, and Dying DEPARTMENT
Fall 2020
This course focuses on improving the quality of life and care for individuals and families living with serious illness and at end of life. Emphasis is placed on recognizing and responding to suffering from an interdisciplinary perspective. Barriers and facilitators of effective care during serious illness, death and dying, such as social determinants of health, family dynamics, spiritual and cultural variations, are explored. Evidence-based interventions and strategies to address, manage, and alleviate physical, psychosocial, spiritual, and existential suffering across the lifespan are discussed. Established palliative care standards are utilized to evaluate outcomes within the context of interdisciplinary care.

### APSY224201
**Interpersonal Relations**
**EBY, WHITNEY**
**Summer 2020**

Provides an opportunity to learn a developmental and systems perspective on the nature of family and interpersonal relations. Examines both nature of interpersonal relations and some of the conditions in contemporary life that are shaping the quality of these relationships. Gives particular emphasis to understanding the self, family life, emotions, and conflicts in field research. Views the concept of interpersonal relations from historical, multicultural, gender, and developmental perspectives.

### APSY332201
**Religion and the Brain: An Introduction to Neurotheology**
**BLACK, JESSICA M**
**Summer 2020**

The brain is an organ of adaptation and such plasticity allows humans the capacity to build and draw upon faith and reason throughout times of stress and the building of resilience. Brain development throughout all life stages will be examined as we consider the following primary question: What does the field neuroscience help us to understand about faith throughout the life span, and what does it leave out? Contexts that confer stress or build resilience are examined throughout the course as students discover how neuroscience and faith converge or diverge in their contributions to understanding of the human experience and its development throughout life’s unique pathways. To engage in this exciting dialogue about larger questions that may integrate these seemingly disparate and often slided modern and ancient disciplines, students will be exposed to key concepts, definitions and vocabulary in neuroscience and recent advancements in related biological fields such epigenetics. We will then be able to engage in investigating and returning to important questions that may thematically bridge these fields. Through extensive writing, reflection and dialogue students will have the opportunity to deepen their understanding of the relationships among faith, religion, spirituality, and modern science.

**Credits:** 03

### APSY337801
**Inside-Out: Perspectives on Crime, Corrections, and Justice**
**DELSESTO, MATTHEW J**
**Summer 2020**

This Inside-Out course is an opportunity for a group of students from Boston College and the Suffolk County House of Correction to exchange ideas and perceptions about crime, corrections, and justice. It is a chance for all participants to gain a deeper understanding of the United States criminal justice system through the marriage of theoretical knowledge and practical experience achieved in meetings throughout a semester. Topics include causes and definitions of crime, criminal justice institutions, myths and realities of prison life, experiences of crime victims, theories of punishment and rehabilitation, and the relationship between crime and community. Most sessions will meet at the Suffolk County House of Correction.

Readings and Research in Counseling Men MAHALIK, JAMES R
Summer 2020
Examines issues related to counseling men by addressing the influence of socially constructed roles on men, their families, and broader society. Specifically, will examine how men's gender roles impact on their personal development through the life span, and contribute to their health, roles as partners and fathers, and how men approach mental health services. In the final part of the course, issues specific to counseling men from access to services to creating therapeutic environments for men are addressed.

Preparing the Whole Person for Global Citizenship LIANG, BELLE
Summer 2020
This course is for graduate students and upper-level undergraduates who are interested in the fields of education and psychology. The course will focus on the development of individuals and their role as global citizens. We will explore the whole person development of adolescents and emerging adults in the digital age—one marked by a participatory culture. We explore these questions while foregrounding the different strategies and methodologies of counseling, developmental, and educational psychology.

Applied Adolescent Development SEPULVEDA, JONATHAN A
Summer 2020
This course is designed to provide students with an overview of the theoretical and empirical knowledge base concerning adolescent development. In particular, four broad areas will be considered: (1) psychological, biological, and cognitive transitions; (2) central developmental tasks of adolescence; (3) primary contextual influences; and (4) prevalent types of problematic functioning that emerge during adolescence. The overarching goals of the course are to provide a solid and broad understanding of how and why adolescents develop in the manner they do, and to extend this developmental understanding into research, application, and practice.

APSTY746001
Interpretation and Evaluation of Research LITTFENBERG-TOBIAJ, JOSHUA
Summer 2020
This course will improve a student's understanding of the empirical research literature in education and psychology. It concentrates on developing the conceptual foundations of empirical research and the practical analytic skills needed by a competent reader and user of research articles. Topics address purpose statements, hypotheses, sampling techniques, sample sizes and power, instrument development, internal and external validity, and typical quantitative research designs. Exercises emphasize the critical evaluation of published research. Each student will develop a research proposal.

Issues in Short Term Counseling WALSH-BLAIR, LYNN Y  
Summer 2020  
This course is designed to introduce students to the techniques and issues related to the practice of short-term therapy. Special attention is given to current trends in health care delivery, including the managed care environment and how to adapt various models to this environment. Students will learn a number of coherent strategies to treat a variety of presentations and populations in a short-term model. They will also gain an understanding of the complexities of providing quality mental health care in today's clinical settings.

Biological Bases of Behavior DECANDIA, CARMELA J
Summer 2020
This course reviews a variety of topics within the biological bases of behavior, employing a neuroanatomical starting point. Students learn neuroanatomy in some detail; moreover, course explores basic mechanisms of the nervous system, basic psychopharmacology, and sensation and perception. Also examines cognitive functions associated with different regions of the brain as well as neurodevelopmental, psychiatric, and neurological disorders. In addition, students will have opportunity to read some of the more contemporary writings in the field of neuroscience.

Counseling, Developmental, and Educational Psychology Courses: Fall 2020

**APSY103001**  
Child Growth and Development LASKI, ELIDA V  
Fall 2020  
First part of a two-course sequence (APSY1030 - APSY1031) designed to introduce students to the multiple dimensions of child development, and the place of education in promoting healthy development for all children. This course acquaints students with multiple processes of child development, including physical, social, cognitive, linguistic, and emotional development from birth through adolescence. Both typical and atypical patterns of development will be examined. Students discuss and analyze classic theories, contemporary issues, and key research in child development in view of their application to educational and other applied settings.

**APSY103101**  
Family, School, and Society MACEVOY, JULIE P  
Fall 2020  
Second part of a two-course sequence (APSY1030-APSY1031) that introduces students to the multiple dimensions of child development, and the place of education in promoting healthy development for all children. This course considers the social and cultural contexts that shape developmental and educational processes. Focuses on understanding the nature of contemporary social problems including racism, sexism, ethnic prejudice, poverty, and violence, as they affect children, families, and schooling. Emphasizes special role of education in linking community resources for an integrated approach to serving children and families.

APSY203201
Psychology of Learning HOPMAN, RACHEL J
Fall 2020
Discusses classic and contemporary theories of learning and of cognitive development and theories of the relation between learning and cognitive development. Also looks at major studies with children. Compares and contrasts theories along key dimensions on which they vary. Addresses issues and questions that include the following: Is the environment or our biological endowment and innate knowledge responsible for our learning; are babies born with a lot of knowledge or must all cognition develop from scratch; does development precede learning (readiness to learn). Also looks at role of motivational factors, and discusses practical applications of theory and research.

APSY224301
Social Oppression and Transformation GOODMAN, LISA A
Fall 2020
This course engages the topic of social oppression and transformation from social and psychological perspectives. Using research, scholarship, and creative work from psychology, education, sociology, history, and popular culture, students will explore institutional, ideological, interpersonal, and individual aspects of oppression across four social locations—social class, gender, race, and sexual orientation. For each location, students will start with their own stories of privilege and oppression; move to an empathetic engagement with the stories of others; broaden to understand the way that structural dynamics shape those stories; and finally, dive into specific social issues, including family poverty, violence against women, mass incarceration, and LGBTQ homelessness. Throughout the course, students will have the opportunity to study and reflect on change and transformation, including ways in which to incorporate learning from this course into personal and professional lives.
APSY324301  Counseling Theories
KIM, OH MYO; GONZALEZ, LAURA D
Fall 2020
The purpose of this course is to learn about the major counseling theories including basic concepts, advantages and limitations, techniques, and the counseling process. There is also a focus on personal exploration aimed at helping students adopt their own personal theory of counseling. Issues of multiculturalism and client diversity will be integrated into all course content.

APSY331001  Contemporary Issues in Applied Psychology and Human Development HENRY, DAPHNE A
Fall 2020
This advanced undergraduate seminar introduces students to theory and research that contextualizes the development of children of color. This course will use a theoretically-grounded scientific approach to investigate the multiple factors shaping the development and developmental contexts of racially- and ethnically-diverse children. We will explore these influences from an interdisciplinary perspective grounded in developmental psychology but drawing from scholarship in sociology, economics, and education. By adopting an interdisciplinary perspective, we can critically assess the complex influences--both proximal and direct as well as distal and indirect--shaping the development of children of color. Participants in this course will learn about multiple domains of child and youth development, socio-historical factors and policy issues that impact children and families of color, and the specific contextual challenges and developmental assets that confer risk or support resilience among diverse children.

APSY337801  Inside-Out: Perspectives on Crime, Corrections, and Justice DELSESTO, MATTHEW J
Fall 2020
This Inside-Out course is an opportunity for a group of students from Boston College and the Suffolk County House of Correction to exchange ideas and perceptions about crime, corrections, and justice. It is a chance for all participants to gain a deeper understanding of the United States criminal justice system through the marriage of theoretical knowledge and practical experience achieved in meetings throughout a semester. Topics include causes and definitions of crime, criminal justice institutions, myths and realities of prison life, experiences of crime victims, theories of punishment and rehabilitation, and the relationship between crime and community. Most sessions will meet at the Suffolk County House of Correction.

APSY415101
Health Psychology LAI, BETTY S
Fall 2020
Health psychology is the study of how psychology and health interact and influence: health promotion and health risk behaviors, the treatment individuals receive for medical problems, how people cope with stress and pain, and how people behave when they are ill. This course will review these issues across the life course, with special attention to approaches which influence health promoting behaviors and the treatment of illnesses.

Positive Youth Development LERNER, JACQUELINE V
Fall 2020
Applied Developmental Science (ADS) uses research about human development to inform programs and policies pertinent to topics of social importance. Students will integrate readings about and class discussions of ADS theory and research with information about community- based programs. The focus of this class will be a discussion and analysis of the role of developmental research and, in particular from longitudinal research (for example, the 4-H Study of Positive Youth Development), in framing applications (programs and policies) for promoting positive development among youth. In addition to an overview of the theoretical models that are the bases of the PYD perspective, the course will present the work of researchers who have conducted applied developmental studies of adolescents and their ecological settings in order to advance understanding of how individuals and context are involved across the adolescent years in providing a basis for both healthy and problematic development.

APSY650001
Organizational Effectiveness: Governance, Risk Management, and Compliance ALDRICH, PHILIP
Fall 2020
Technical proficiency is not enough to manage business risk. Every potential or identified threat cannot be mitigated, and organizations must choose where to focus their often limited resources to support business goals. This course focuses on Governance, Risk and Compliance (GRC) as an organizational capability that all organizations require in today’s complex world.
Topics include understanding the business context of key stakeholders, corporate culture, and organizational risks. Students will understand how GRC capabilities such as enterprise risk management (ERM), compliance management (SOX, ISO, PCI, NIST, etc.) and policy management should work together to build a cohesive strategy within the business context. Students will learn about GRC technology and GRC program management required to support and grow GRC capabilities. Lastly, students will hear from guest lecturers about the roles and responsibilities of the Board of Directors, Risk/Audit Governance Committees, Chief Executives (Chief Information Security Officer (CISO), Chief Risk Officer (CRO), Chief Security Officer (CSO), etc.) and how they rely on GRC capabilities to support the business.

APSY741901
Applied Adolescent Development SEIDER, SCOTT C
Fall 2020
This course is designed to provide students with an overview of the theoretical and empirical knowledge base concerning adolescent development. In particular, four broad areas will be considered: (1) psychological, biological, and cognitive transitions; (2) central developmental tasks of adolescence; (3) primary contextual influences; and (4) prevalent types of problematic functioning that emerge during adolescence. The overarching goals of the course are to provide a solid and broad understanding of how and why adolescents develop in the manner they do, and to extend this developmental understanding into research, application, and practice.
Satisfies Core Requirement: None Prerequisites: prereq undergraduates junior/senior status. Corequisites: None

Theories of Counseling and Personality I MAHALIK, JAMES R
Fall 2020
First part of a year-long sequence examining personality and counseling theories. To introduce students to major theories of personality in the field of psychology and how theories are applied in constructing counseling and psychotherapy models. Students will focus on humanistic, behavioral, and cognitive personality theories and how they become operationalized in person-centered, behavioral, and cognitive counseling models, respectively. In addition to examining the theoretical foundations, client and counselor dimensions, techniques, and the active ingredients of change for these major models of personality and counseling, students examine how socio-cultural context contributes to client presenting concerns and may be addressed in counseling.

Status: OPEN

APSY747401 Advanced Practicum: Human Development MORELLI, GILDA A  Fall 2020
Students meet once a week to discuss their required field work (8-10 hours per week) and to relate their field work to psychological theories, research, and applications. Readings and discussion contribute to critical analyses of how social issues and social problems are situated differently due to gender, race, social class, and diversities of language, ability, sexuality, etc. Participants will explore strategies for translating this knowledge and experience into resources that enable them to identify future career options.

Participatory Action Research: Gender, Race, Power LYKES, M BRINTON
Fall 2020
This graduate seminar introduces students to theoretical and practical issues in the design and implementation of community- and school-based participatory and action research, including a review of theories and practices that have contributed to community-based knowledge construction and social change policies and processes. Ethnographic, narrative, oral history, and visual methodologies are additional resources required.
for understanding and representing the individual and collective stories co-constructed through the research process. Students participate in a community-based collaborative undoing racism workshop and have opportunities for ongoing collaborative work on a site. We reflect collaboratively and contextually on multiple and complex constructions of "gender," "race," and social class in and through these research processes. OPEN TO ALL Ph.D. STUDENTS. MASTER'S LEVEL STUDENTS REQUIRE PERMISSION OF THE INSTRUCTOR.

APSY981701
Cognitive-Affective Bases of Behavior VASILYEVERA, MARINA
Fall 2020
This course discusses theories of human development and examines empirical research on cognitive and affective processes underlying behavior. In addressing the cognitive bases of behavior, it explores key mental processes (e.g., attention, memory, problem solving) and constructs (e.g., schemas, heuristics) that have been instrumental in understanding everyday functioning. The socio-affective bases of behavior addressed in the course include emotions, temperament, and self-concept. The students in this course explore fundamental theoretical questions, such as the role of biology and environment in development, and consider practical applications of current theoretical and empirical knowledge concerning the bases of human behavior.

Seminar in Counseling Theory TUMMALA-NARRA, PRATYUSH
Fall 2020
Deepens students' understanding of psychological theory, and facilitates a life-long journey of integrating theory with practice. Provides knowledge and understanding of traditional and contemporary theories of psychotherapy, and helps students develop a critical perspective that will enable them to evaluate the usefulness of these theories for their clinical work with clients. Class discussions cast a critical eye on the development of the discipline, including its philosophical and contextual roots, and analyze the values inherent in mainstream psychological practice. Considers strengths and limitations of each school, and uses case examples to gain expertise in applying theory to practice.

### APSY103001

**Child Growth and Development LASKI, ELIDA V**

Spring 2021

First part of a two-course sequence (APSY1030 - APSY1031) designed to introduce students to the multiple dimensions of child development, and the place of education in promoting healthy development for all children. This course acquaints students with multiple processes of child development, including physical, social, cognitive, linguistic, and emotional development from birth through adolescence. Both typical and atypical patterns of development will be examined. Students discuss and analyze classic theories, contemporary issues, and key research in child development in view of their application to educational and other applied settings.

**Credits:** 03

**Room and Schedule:** T TH 9*-ONLINE; SYNCHRONOUS; Satisfies Core Requirement

---

### APSY103010

**Family, School, and Society MORELLI, GILDA A**

Spring 2021

Second part of a two-course sequence (APSY1030-APSY1031) that introduces students to the multiple dimensions of child development, and the place of education in promoting healthy development for all children. This course considers the social and cultural contexts that shape developmental and educational processes. Focuses on understanding the nature of contemporary social problems including racism, sexism, ethnic prejudice, poverty, and violence, as they affect children, families, and schooling. Emphasizes special role of education in linking community resources for an integrated approach to serving children and families.

**Credits:** 03

**Room and Schedule:** M W 10*-ONLINE; SYNCHRONOUS; Satisfies Core Requirement

---

### APSY103012

**Family, School, and Society MACEVOY, JULIE P**

Spring 2021

APSY203203
Psychology of Learning VASYLEV, MARINA
Spring 2021
Discusses classic and contemporary theories of learning and of cognitive development and theories of the relation between learning and cognitive development. Also looks at major studies with children. Compares and contrasts theories along key dimensions on which they vary. Addresses issues and questions that include the following: Is the environment or our biological endowment and innate knowledge responsible for our learning; are babies born with a lot of knowledge or must all cognition develop from scratch; does development precede learning (readiness to learn). Also looks at role of motivational factors, and discusses practical applications of theory and research.
Credits: 00

APSY215202
Applied Psychology Practicum: Pathways to Purposeful Work and Life MILOT, ALYSSA S
Spring 2021
Provides an introduction to the applications of psychological theory within various human and community service contexts. Readings and discussion contribute to critical analyses of how social issues and social problems are situated differently due to gender, race, social class, and diversities of language, ability, sexuality, etc. Students volunteer for 8-10 hours per week at a site selected with the assistance of the instructor and meet in a weekly seminar, keep a journal of their field experience, and complete reading and written assignments that integrate theory and practice.
Credits: 03
Room and Schedule: CAMPION 200, T TH 4 30-5 50;HYBRID;

Mental Illness: Social and Clinical Perspectives GOODMAN, LISA A
Spring 2021
Provides overview of theoretical models and phenomenology currently defining the field of abnormal psychology, focusing particularly on socio-cultural contributions to conceptualizations of mental illness and distress. First half of course reviews and critiques current constructions of the nature of mental illness, as well as classification, assessment, and treatment of mental illness. Second half highlights specific forms of mental illness, with attention to the causes and subjective experience of psychopathology.

APSY224301
Social Oppression and Transformation SEIDER, SCOTT C
Spring 2021
This course engages the topic of social oppression and transformation from social and psychological perspectives. Using research, scholarship, and creative work from psychology, education, sociology, history, and popular culture, students will explore institutional, ideological, interpersonal, and individual aspects of oppression across four social locations—social class, gender, race, and sexual orientation. For each location, students will start with their own stories of privilege and oppression; move to an empathic engagement with the stories of others; broaden to understand the way that structural dynamics shape those stories; and finally, dive into specific social issues, including family poverty, violence against women, mass incarceration, and LGBTQ homelessness. Throughout the course, students will have the opportunity to study and reflect on change and transformation, including ways in which to incorporate learning from this course into personal and professional lives.

Spirituality, Religion, and College Student Experience JAMES, MICHAEL J
Spring 2021
Faith, religion, and spirituality have become topics of increasing interest for scholars and practitioners in higher education and student personnel development. This semester-long, upper-level, undergraduate course explores the historic, developmental, sociological, and philosophical dimensions of the college student experience at the intersection of faith life, spirituality, and academic culture. This course approaches themes and readings from an ecumenical and interreligious set of perspectives. Students will engage several major texts as well as articles from scholarly journals and narratives from institutional models that attempt to integrate faith life and spirituality into the prevailing academic and student development culture.

Counselling Theories SHEPPARD
The purpose of this course is to learn about the major counseling theories including basic concepts, advantages and limitations, techniques, and the counseling process. There is also a focus on personal exploration aimed at helping students adopt their own personal theory of counseling. Issues of multiculturalism and client diversity will be integrated into all course content.

**Gender Roles MAHALIK, JAMES R**
**Spring 2021**
This course examines biological, social, and psychological factors that interact in contributing to men's and women's gender roles. Within the social domain, particular attention will be given to how culture affects the social construction of gender, and how factors such as race and homophobia interact with socially prescribed norms for men and women. The second half of the class will focus on the effects of gender roles on mental and physical health, social problems like aggression, and issues in education, work, and relationships including family life.

**Contemporary Issues in Applied Psychology and Human Development HENRY, DAPHNE A**
**Spring 2021**
This advanced undergraduate seminar introduces students to theory and research that contextualizes the development of children of color. This course will use a theoretically-grounded, scientific approach to investigate the multiple factors shaping the development and developmental contexts of racially- and ethnically-diverse children. We will explore these influences from an interdisciplinary perspective grounded in developmental psychology but drawing from scholarship in sociology, economics, and education. By adopting an interdisciplinary perspective, we can critically assess the complex influences—both proximal and direct as well as distal and indirect—shaping the development of children of color. Participants in this course will learn about multiple domains of child and youth development, socio-historical factors and policy issues that impact children and families of color, and the specific contextual challenges and developmental assets that confer risk or support resilience among diverse children.

or, a student organizational life in school.

Students will also explore the impact of the future of work on individuals and the private and public sectors, and within broader social and political contexts. Enhance knowledge of the role of work in career development, organizations, and communities. In this course, students will learn how psychology can be used to understand work, including the psychology of work, which encompasses much of our time, energy, and effort. Applied psychology has a deep foundation in the psychology of work, which represents a key context for people to interact socially and economically within their organizations. In this course, students will learn how psychology can be used to enhance knowledge of the role of work in career development, organizational life in the private and public sectors, and within broader social and political contexts. Students will also explore the impact of the future of work on individuals and organizations, and the ways in which the psychology of work can inform meaning, purpose, and social justice.
APSY634801
Prevention and Intervention Strategies for Children, Families, and Communities
DEARING, ERIC
Spring 2021
This course is designed to provide an overview of key issues that arise in the development, implementation, evaluation, and scaling of prevention and intervention programs that intersect with the field of psychology. Key issues include the challenges and opportunities of research-practice partnerships, the critical role of theories of change, diverse perspectives on evidence, and unintended consequences of good intentions. A variety of exemplar prevention and intervention programs are used to illustrate and analyze these key issues using theoretical, conceptual, and empirical works from psychological science.

Translating the Science of Learning into Practice LASKI, ELIDA V
Spring 2021
The science of learning has a tremendous potential for enhancing educational outcomes and job performance. Yet findings obtained in laboratory settings are not easily replicated, expanded, and integrated into applied settings. This course will consider key issues to consider in translating learning science into practice across diverse contexts. Students will consider examples of how findings from the science of learning have been applied either successfully or unsuccessfully to practice in fields such as education, counseling, design, and business.

Organizational Effectiveness: Governance, Risk Management, and Compliance ALDRICH, PHILIP
Spring 2021
Technical proficiency is not enough to manage business risk. Every potential or identified threat cannot be mitigated, and organizations must choose where to focus their often limited resources to support business goals. This course focuses on Governance, Risk and Compliance (GRC) as an organizational capability that all organizations require in today’s complex world. Topics include understanding the business context of key stakeholders, corporate culture, and organizational risks. Students will understand how GRC capabilities such as enterprise risk management (ERM), compliance management (SOX, ISO, PCI, NIST, etc.) and policy management should work together to build a cohesive strategy within the business context. Students will learn about GRC technology and GRC program management required to support and grow GRC capabilities. Lastly, students will hear from guest lecturers about the roles and responsibilities of the Board of Directors, Risk/Audit Governance Committees, Chief Executives (Chief Information Security Officer (CISO), Chief Risk Officer (CRO), Chief Security Officer (CSO), etc.) and how they rely on GRC capabilities to support the business.

Applied Research Project For Non-Profit Organizations MISATA, KELLEY
Spring 2021
This course provides students with hands-on experience in the development, delivery, and results analysis of an information and cybersecurity assessment process for local non-profit organizations. The assessment tool that will be used is a prototype based on the NIST Cybersecurity Framework (CSF). Students will explore how NIST CSF maps to other well-known assessment frameworks including NIST SP800-53, NIST SP800-171, COBIT 5, and ISO 27000. Students will review the assessment tool and other research through the lens of the non-profit environment. Students will complete a controlled assessment of a local non-profit, which will help them develop skills in assessing, through the lens of information and cyber security, a business environment. Students will utilize these skills in bridging the gap between technical jargon and non-technical audiences by preparing and presenting their assessment findings to the executive leadership of the assessed non-profit. Students will gain a practical ability to perform an information/cybersecurity risk assessment along with the process of developing and delivering the assessment as a part of the students’ learning.

Neurological and Biological Bases of Behavior DECANDIA, Carmela J
Spring 2021
Health professionals work with many clients where biological and neurological factors play a role in influencing or exacerbating psychological problems. This course will touch on a variety of topics in psychology from a biological perspective that will be helpful in clinical practice. Areas to be covered include the basic structure and function of neurons, basic neuroanatomy, cognitive functions, substance abuse, addictions, and psychopharmacology. Discussion of these topics will be approached from a biopsychosocial approach. Students are encouraged to ask questions throughout the lecture to both clarify material and to work toward application of the material to clinical work.

APSY741901
Applied Adolescent Development SEIDER, SCOTT C
Spring 2021
This course is designed to provide students with an overview of the theoretical and empirical knowledge base concerning adolescent development. In particular, four broad areas will be considered: (1) psychological, biological, and cognitive transitions; (2) central developmental tasks of adolescence; (3) primary contextual influences; and (4) prevalent types of problematic functioning that emerge during adolescence. The overarching goals of the course are to provide a solid and broad understanding of how and why adolescents develop in the manner they do, and to extend this developmental understanding into research, application, and practice.

APSY744501
Theories of Counseling and Personality II DECANDIA, CARMELA J
Spring 2021
Second part of a year-long sequence examining personality and counseling theories. Continues introduction to major theories of personality in the field of psychology and how those theories are applied in constructing counseling and psychotherapy models. Focuses on psychodynamic personality and counseling models as well as critical theory as manifested in the psychology of gender and counseling models that integrate gender into working with clients. Specifically, for each model, students will examine the theoretical foundations developed in its theory of personality, relevant client and counselor dimensions, counseling techniques, and the active ingredients of change that each model uses in bringing about change.

APSY746101
Human Rights Interdisciplinary Seminar LYNES, M BRINTON
Spring 2021
The study of human rights defies disciplinary boundaries. This seminar, sponsored by the Center for Human Rights and International Justice, provides a rare space to examine human rights from an interdisciplinary perspective. It brings together faculty affiliated with the Center, students from across the university, visiting scholars, and guest speakers to examine issues of human rights and international justice. The spring 2021 seminar will begin with an overview and brief historical review of human rights as understood in the West and then explore a series of complexities for those seeking to engage in human rights scholarship, advocacy, and activism.

We seek to engage critically with human rights discourse and actions as they intersect with gender, culture/ethnicity, race, social class, and other categorizations as well as with emergent challenges from Indigenous people of the global South beyond Northern epistemologies, understandings, and praxis.

Topics in the Psychology of Women GOODMAN, LISA A
Spring 2021
Explores current theory and research on the psychology of women and implications of this work for psychologists and educators. The first half of course examines and critiques major themes that have emerged in the field over the last three decades and considers ways in which the field of psychology of women has influenced conceptualizations of development, psychopathology, and intervention. The second half considers some of the psychological underpinnings of a set of social and political issues commonly faced by women. The course is designed for developmental and counseling psychology graduate students.

This course continues the examination and application of the principles of item response theory and educational measurement introduced in previous courses. The first section of the course will address the use of a variety of item response theory models for dichotomous and polytomous items. The second section of the course will focus on application of the principles of item response theory to a variety of practical situations and problems commonly encountered in educational testing. In the final section of the course, overarching theoretical and practical issues are addressed and future directions in item response theory are discussed.

Credits: 03
Room and Schedule: CAMPION HALL 131; W 1 30-4; HYBRID;
Satisfies Core Requirement: None; Prerequisites: ( APSY8667 OR ERME8667 ). Corequisites: None

Educational Leadership and Higher Education Courses: Summer 2020

ELHE444901
Human Resources Administration LOWENHAUPT, REBECCA J

Summer 2020
Addresses fundamental school personnel functions such as hiring, retention, socialization, rewards and sanctions, and performance appraisal. These functions, however, are situated in a broader approach to the human and professional development of school personnel in a learning organization. Situates human resource development within the larger agenda of increased quality of student learning and teacher development.

ELHE620301
Universities and the Prison Industrial Complex CONWAY, PATRICK F

Summer 2020
This course examines the involvement of higher education institutions in providing educational opportunities for incarcerated individuals. Students will gain insight into the prison complex by exploring pertinent issues related to mass incarceration, to inequities within the American judicial system, and to the role that higher education can play in responding to such trends.

Students will achieve a better understanding of both the history and current status of prison education policies at both the federal and state levels. The focus of the course is threefold: (1) provide an overview of federal and state policies related to higher education in prison, situating these policies within broader empirical scholarship on mass incarceration in the United States; (2) explore moral and ethical implications related to prison education; and (3) consider the challenges, barriers, and opportunities within the implementation and administration of higher education programs for incarcerated students.

ELHE720301
Universities and the Prison Industrial Complex CONWAY, PATRICK F
Summer 2020
This course examines the involvement of higher education institutions in providing educational opportunities for incarcerated individuals. Students will gain insight into the prison complex by exploring pertinent issues related to mass incarceration, to inequities within the American judicial system, and to the role that higher education can play in responding to such trends. Students will achieve a better understanding of both the history and current status of prison education policies at both the federal and state levels. The focus of the course is threefold: (1) provide an overview of federal and state policies related to higher education in prison, situating these policies within broader empirical scholarship on mass incarceration in the United States; (2) explore moral and ethical implications related to prison education; and (3) consider the challenges, barriers, and opportunities within the implementation and administration of higher education programs for incarcerated students.

Serving International Students and Scholars RUSSBAUM, ADRIENNE J
Summer 2020
Despite recent trends, the United States continues to be one of the most popular destination countries globally for internationally students, faculty, and researchers. Serving this growing and diverse population has taken on new and complex dimensions under the current administration, with implications for universities at all levels. This course will provide participants with a grounding in the fundamentals of international student and scholar services. This will include an overview of practical matters governing effective support services design and delivery such as immigration advising and cross-cultural programming. Additionally, the specific knowledge, attitudes, and skills required to work in this profession will be explored, with a
ELHE731201  
Internationalizing the Curriculum LEASK, BETTY R  
Summer 2020  
Increasingly, universities across the world are focusing on new ways to internationalize students' learning as they simultaneously deal with the ongoing challenges of the pandemic. While some of the opportunities are context-dependent, others are shared across a range of different disciplinary, institutional, and national contexts. But with opportunities come challenges. This course will stimulate participants to think in new ways about internationalization and how staff, students, and faculty might contribute to internationalizing classrooms and campuses during and post-pandemic.

Research Grant Writing PANZA, ROSEMARY  
Summer 2020  
This applied course introduces the proposal submission process to graduate students, junior faculty, and others interested in understanding and obtaining research funding. The class will be a combination of lecture/hands-on format to ensure that participants emerge with practical knowledge, so that they will be able to independently complete a grant proposal. Topics include: identifying how to look for funding, registering in government systems, reviewing common proposal components, creating a budget, understanding the review process, and next steps if you are not funded. Templates, examples, and best practice hand-outs will be provided.

ELHE740601  
Refugees and Migrants in Higher Education DEWIT, JOHANNES W; UNANGST, LISA M  
Summer 2020  
Forced displacement, as calculated by UNHCR, has now exceeded 68 million people worldwide. The resulting influx of refugees to temporary and semi-permanent "host" countries has prompted higher education institutions and policy actors to innovate pathways to tertiary education. Concurrently, both "old" and "new" immigrant-receiving contexts are called to facilitate the tertiary access and attainment of students from a migrant background. This population may include students of the so-called first, second, or third generations. In this online course, we probe questions of access and experience among migrant and refugee populations as related to higher education institutions globally. We focus this conversation on the post-1945 period, beginning our discussions with a brief overview of global migration trends. We then consider various approaches to the support of migrant students in key world regions, highlighting comparative data, before turning to refugee student support in both "brick and mortar" as well as online settings. The final portion of the course allows for an integrative discussion of educational equity and policy innovation supporting immigrant and refugee students alike. A final paper of 2000 words will be required for course completion.

ELHE740801  
Summer Institute WES-CHIE DEWIT, JOHANNES W  
Summer 2020  
This annual symposium offered by World Education Services (WES) and the Center for International Higher Education (CIHE) aims to address questions around the internationalization of higher education and provide a space to discuss implications for institutions worldwide. Over the past decades, international higher education has grown exponentially. The global knowledge economy, the massive movement of students, scholars, and academic programs around the world, the IT revolution and its impact on international teaching and learning have all contributed to a strong feeling of interconnectedness and global citizenship in the higher education community. In many local communities outside of academia, however, an increasing frustration over the lack of benefits from globalization has emerged. This disconnect has resulted in rising nationalism and xenophobia, as manifested in several referenda and elections in the past two years. What does this mean for our policies and strategies for internationalization? What lessons are to be learned from these developments? What are the ethical challenges for international education in this political climate? BC students are eligible to receive credit for attending the conference (June 10-12, 2020). Those wishing to earn credit for participation will be required to submit a 1500-2000 word paper on a topic discussed at the conference. The paper will be due by the end of June.

Catholic Higher Education Administration & Leadership JAMES, MICHAEL J  
Summer 2020  
This course explores contemporary issues, organizational and governance structures and distinct characteristics of successful Mission leadership for administrators at Catholic Colleges and Universities focusing on effective campus policy development, strategic planning, and assessment. Students will engage research, historical literature, Church documents, lectures and group exercises. A unique component to this course is participation in the Institute for Administrators in Catholic Higher Education (IACHE) - a four-day seminar for senior administrators and leaders in Catholic higher education where internationally recognized scholars and practitioners address the challenges and opportunities that Catholic higher education faces on a daily basis.

Institute for Administrators/Catholic Higher Ed JAMES, MICHAEL J  
Summer 2020  
Each July, the Institute for Administrators in Catholic Higher Education hosts a five-day seminar providing a singular opportunity for administrators and leaders at Catholic colleges and universities around the globe to interact with some of the nation's most
This course explores the history, purpose, current status, and possible futures of Catholic elementary and secondary schools. Students will become conversant with the body of scholarly literature, theoretical and empirical, that defines the field of Catholic education. Though the primary focus will be on Catholic schools in the United States, the course will explore how we can learn from the experience of other religiously affiliated schools here and abroad, and from the experience of Catholic educators worldwide. Special attention will be devoted to how the Ignatian spirituality and pedagogy can be a resource for educators in Jesuit and non-Jesuit schools.

ELHE770101
Introduction to Educational Leadership and Change GOUGH, BRIDGET A
Summer 2020
Brings a foundational focus to the work of educational administration, centering on the core work of teaching and learning and exploring how that central work is supported by the cultural, technical, political, and ethical systems of the school. That work is deepened as administrators support learning as meaning making, as involving a learning and civil community, and as involving the search for excellence. Students are asked to research the realities at their work sites using the concepts and metaphors developed in the course and, through discussion and the utilization of case studies, to propose improvements to those realities.

ELHE770201
Education Policy and Practice MCEWEN, LORI B
Summer 2020
This course provides an overview of educational policy as it plays out in local practice. Throughout the course, students will develop an understanding of foundational approaches to policy making, interpretation, and implementation as it plays out in education settings. In addition to providing an overview to the field of educational policy, the course investigates the relationship between policy and practice through attention to: (1) policymaking including policy mechanisms, framing, and policy actors; (2) processes of policy interpretation and implementation; and (3) policy as practice and the role of local leaders in developing policy. Throughout the course, we will examine how context shapes the relationship between policy and practice by focusing on sociocultural, organizational, and political influences. The course integrates critical perspectives as well as foundational concepts in our study of policy, highlighting how systems of oppression and power dynamics influence the policy process.

Using Data and Evidence for School Improvements GRAVES, KENNETH E
Summer 2020
This course prepares leaders to manage initiatives around continuous improvement and data-informed inquiry. On one hand, students will develop basic research skills that will contribute to evidence-based school improvement, including action research. On the other hand, students will explore the landscape of supports and barriers to using data and other evidence effectively in schools. In particular, students will explore the role of leadership in: the appropriate use and design of assessments; fostering a positive cycle of inquiry among educators; and the effective use of information systems and other technologies.

ELHE772601
Organizational Theory and Learning DRISCOLL, WILLIAM
Summer 2020
Rather than focusing on traits of the individual leader, this course focuses on the dimensions of organizations and teams that both facilitate and complicate leadership. Examples include managing conflict, developing a shared vision, and differentiating between technical and adaptive change. Students will apply various organizational theories in order to understand group- and system-level patterns in “how groups get things done” (e.g., structures and resources, symbols and values, power and politics). Ultimately, students leave the course better able to plan and evaluate school improvement through the lenses of organizational theory.

ELHE774001
Ethics for District Leaders SCANLAN, MARTIN K
Summer 2020
The course explores how schools are used as a vehicle of the state to de-culturalize various communities of people throughout the country’s history. Students will explore how schools can more appropriately promote respect for valuing diversity as a generative source of the country’s vitality and its relationship to the global village. The role of educators is not only to act ethically in the many individual situations of their daily professional lives, but more importantly to see that the institutional structures and processes of the school system are themselves reflections of a system of justice and care.

ELHE776201
PSAP Cohort BRUNELLE, MARYELLEN
Summer 2020
The Professional School Administrator Program (PSAP) provides an opportunity for full-time administrators to obtain their superintendent licensure and a Doctor of Education in educational leadership. The program was developed by Boston College more than three decades ago to provide an opportunity for full-time school administrators to pursue doctoral study. The Lynch School of Education at Boston College partners with the Massachusetts Association of School Superintendents (MASS) and Teachers21 to prepare future superintendents and school leaders for public, Catholic, charter, and independent schools. Boston College’s Ed.D. program is an active member of the Carnegie Project on the Education Doctorate, a national effort by 55 institutions to reform and strengthen the
education doctorate. The program is grounded in the core values of the Lynch School, with coursework focusing on leadership for social justice, school reform, community building, and leadership for learning. Through a cohort model that emphasizes collaborative learning and support, PSAP aims to create a powerful network of district-level leaders throughout the Commonwealth of Massachusetts and beyond.

Practicum in School Principalship LIBANO, JOSE A
Summer 2020
A 500-hour, field-based experience designed to enable the student to develop the competencies required to be an effective assistant principal/principal. The practicum is supervised jointly by a University representative and a cooperating practitioner. The student is expected to engage in a variety of experiences defined in the state standards for certification and to provide leadership to a major administrative project. The student will maintain a reflective journal of experiences and develop a portfolio that demonstrates the learning and insights gained during the practicum.

Educational Leadership in Higher Education

JACOBSEN, CHRISTOPHER D

Fall 2020

This course will be designed to provide undergraduate students with an overview of numerous leadership concepts and theories in order to impart an understanding of how leadership is expressed within organizational contexts, specifically higher educational settings. Furthermore, students will also develop an in-depth understanding of their own personal leadership aptitudes and preferences, providing them with the knowledge and tools to further their leadership abilities as they pursue their careers within specific educational and community settings.

ELHE710101
Higher Education in American Society JAMES, MICHAEL J
Fall 2020
An introduction to higher education in America, this course focuses on the complex relationships between colleges and universities, and the political and social systems of society. This analysis includes a historical perspective on the evolution of American higher education, and especially the development of the contemporary university since the beginning of the twentieth century. Attention is also paid to the impact of federal and state governments on higher education; the role of research in the university; issues of accountability, autonomy, and academic freedom; the academic profession, student politics and culture; affirmative action issues; and others.

ELHE750501
Transforming the Field of Catholic Education MILLER, ANDREW F
Fall 2020
This course explores the history, purpose, current status, and possible futures of Catholic elementary and secondary schools. Students will become conversant with the body of scholarly literature, theoretical and empirical, that defines the field of Catholic
education. Though the primary focus will be on Catholic schools in the United States, the course will explore how we can learn from the experience of other religiously affiliated schools here and abroad, and from the experience of Catholic educators worldwide. Special attention will be devoted to how the Ignatian spirituality and pedagogy can be a resource for educators in Jesuit and non-Jesuit schools.

**Introduction to Educational Leadership and Change JOHNSON, LAURI D**

**Fall 2020**

Brings a foundational focus to the work of educational administration, centering on the core work of teaching and learning and exploring how that central work is supported by the cultural, technical, political, and ethical systems of the school. That work is deepened as administrators support learning as meaning making, as involving a learning and civil community, and as involving the search for excellence. Students are asked to research the realities at their work sites using the concepts and metaphors developed in the course and, through discussion and the utilization of case studies, to propose improvements to those realities.

**ELHE770201**

**Education Policy and Practice MCEWEN, LORI B**

**Fall 2020**

This course provides an overview of educational policy as it plays out in local practice. Throughout the course, students will develop an understanding of foundational approaches to policy making, interpretation, and implementation as it plays out in educational settings. In addition to providing an overview to the field of educational policy, the course investigates the relationship between policy and practice through attention to: (1) policymaking including policy mechanisms, framing, and policy actors; (2) processes of policy interpretation and implementation; and (3) policy as practice and the role of local leaders in developing policy.

Throughout the course, we will examine how context shapes the relationship between policy and practice by focusing on sociocultural, organizational, and political influences. The course integrates critical perspectives as well as foundational concepts in our study of policy, highlighting how systems of oppression and power dynamics influence the policy process.

During the course, students will have opportunities to apply theories and concepts to their own contexts, engaging in policy analysis and creation through hands-on assignments. The course approaches educational policy as incorporating both formal and informal policies, positioning practitioners as interpreters and implementers of local, state, and federal policies, as well as simultaneously designing and creating policies themselves.

**Education Policy Analysis KRAMER, JENNA**

**Fall 2020**

This course provides a foundation for engaging in analysis of educational policy by developing students' knowledge of and experience with tools, data sources, and frameworks that form the toolkit of policy analysts. The course engages with major theories and concepts that guide public policy analysis and provides opportunity to produce novel policy analysis and critique the framing, clarity, and concreteness of published policy analyses and proposed policy tools and solutions. Students will engage with current discourse and considerations in education policy throughout the course, with a particular focus on analyzing policy for equity. By the conclusion of the course, students will be able to engage in public policy analysis and communicate policy issues and analysis that draws on their professional expertise.

**Leadership for Social Justice TAYLOR, KRIS A**

**Fall 2020**

This course introduces students to the theory and practice of leadership for social justice at the school and district level. Definitions, approaches, and controversies in this emerging field will be examined. Readings, films, class discussions, and case studies related to the topics of race, ethnicity, culture, language, gender, social class, religion, sexual orientation, and disability will focus on how these issues affect educators, students and their families in today's K-12 schools. In particular, students will learn about leadership which is culturally and linguistically responsive; strengthens parent-community-school relationships; and formulates diversity policies to promote educational equity for students from diverse groups.

### ELHE771101
**Using Data and Evidence for School Improvements** CHO, VINCENT  
**Fall 2020**
This course prepares leaders to manage initiatives around continuous improvement and data-informed inquiry. On one hand, students will develop basic research skills that will contribute to evidence-based school improvement, including action research. On the other hand, students will explore the landscape of supports and barriers to using data and other evidence effectively in schools. In particular, students will explore the role of leadership in: the appropriate use and design of assessments; fostering a positive cycle of inquiry among educators; and the effective use of information systems and other technologies.

**Reflection on Leadership Seminar Information** SCANLAN, MARTIN K  
**Fall 2020**
The primary purpose of the Reflection on Leadership Seminar is for students to synthesize their learning across their course of studies and prepare to apply this as they continue on their career and vocational journey. The course will be conducted in a seminar format, with students sharing in the leadership of the course discussions and activities. Students will: describe how they have experienced the signature pedagogies across their program of study; provide clear evidence of their level of mastery of the key behaviors for educational leadership; articulate how they envision continuing to grow and innovate as a research-informed practitioner.

**Global Perspectives on Teaching and Learning in Higher Education** GREEN, WENDY J  
**Fall 2020**
Whether you are an administrator, policy maker, faculty, or researcher, all professionals in roles related to higher education are educators. To be a positive agent in the education venture is to ensure learning that is meaningful, empowering, and just--for students, colleagues, and external stakeholders. In this course--we strive to understand the contours of learning, teaching, and curriculum with a critical lens and from an international perspective, through an exploration of key trends and relevant issues in higher education institutions and systems around the world.

**Credits:** 03  
**Room and Schedule:** M 7-9:30; ONLINE; SYNCHRONOUS  
**Satisfies Core Requirement:** None  
**Prerequisites:** None  
**Corequisites:** None  
**Student Level:** GRADUATE

**Applying Research in International Higher Education**  
**BLANCO, GERARDO L**  
**Fall 2020**  
This course—provides a framework for a "real world" experience for students interested in international higher education, in combination with an in-depth research project. This combination of practical experience with research gives students an appreciation for the ways that the daily work of different kinds of organizations—higher education institutions, individual programs and offices, policymaking organizations, governmental units, and professional associations—are framed by questions and concerns that require the ability to undertake a significant exploration of information and ideas in order to inform practice.

**Practicum in School Principalship**  
**LIBANO, JOSE A**  
**Fall 2020**  
A 500-hour, field-based experience designed to enable the student to develop the competencies required to be an effective assistant principal/principal. The practicum is supervised jointly by a University representative and a cooperating practitioner. The student is expected to engage in a variety of experiences defined in the state standards for certification and to provide leadership to a major administrative project. The student will maintain a reflective journal of experiences and develop a portfolio that demonstrates the learning and insights gained during the practicum.

Educational Leadership and Higher Education

Courses: Spring 2021

ELHE229501
Spirituality, Religion, and College Student Experience JAMES, MICHAEL J
Spring 2021
Faith, religion, and spirituality have become topics of increasing interest for scholars and practitioners in higher education and student personnel development. This semester-long, upper-level, undergraduate course explores the historic, developmental, sociological, and philosophical dimensions of the college student experience at the intersection of faith life, spirituality, and academic culture. The course approaches themes and readings from an ecumenical and interreligious set of perspectives. Students will engage several major texts as well as articles from scholarly journals and narratives from institutional models that attempt to integrate faith life and spirituality into the prevailing academic and student development culture.

ELHE337501
Educational Leadership in Higher Education JACOBSEN, CHRISTOPHER D
Spring 2021
This course will be designed to provide undergraduate students with an overview of numerous leadership concepts and theories in order to impart an understanding of how leadership is expressed within organizational contexts, specifically higher educational settings. Furthermore, students will also develop an in-depth understanding of their own personal leadership aptitudes and preferences, providing them with the knowledge and tools to further their leadership abilities as they pursue their careers within specific educational and community settings.

ELHE760301
Internationalization of Higher Education BLANCO, GERARDO L
Spring 2021
Higher education around the world today is increasingly affected by the forces of internationalization. Professionals working in postsecondary education in the United States and elsewhere must have a clear understanding of the range of opportunities and challenges presented by the evolution of this phenomenon. This course has two main objectives. The first is to introduce students to the central issues relevant to the international dimension of higher education in different national contexts. The second objective is to promote students' understanding of the practical implications of internationalization for their own work in higher education administration and/or policy-making contexts.

ELHE770101
Introduction to Educational Leadership and Change
BRUNELLE, MARYELLEN
Spring 2021
Brings a foundational focus to the work of educational administration, centering on the core work of teaching and learning and exploring how that central work is supported by the cultural, technical, political, and ethical systems of the school. That work is deepened as administrators support learning as meaning making, as involving a learning and civil community, and as involving the search for excellence. Students are asked to research the realities at their work sites using the concepts and metaphors developed in the course and, through discussion and the utilization of case studies, to propose improvements to those realities.

Diversity in Higher Education: Race, Class, and Gender
CASTRO SAMAYOA, ANDRES
Spring 2021
The purpose of this course is to provide students with the opportunity to examine the theoretical scholarship and empirical research on race, class, and gender in American higher education. The course readings are interdisciplinary in nature and require students to identify research claims and their relationship to higher education practice and policy in the U.S. We explore such issues as admissions and affirmative action policy, sexual harassment, access, and financial aid practices.

ELHE760701
Seminar on Law and Higher Education
CATANZANO, PHILIP J
Spring 2021
The Law and Higher Education seminar covers a broad range of pressing contemporary topics impacting institutions of higher education. Topics range from First Amendment concerns on campus, to the business of higher educational institutions (e.g., intellectual property protections and high profile athletic programs), to the impact of government and non-governmental actors on the university, to the future prospects of the American higher education model. The legal, historical, and theoretical underpinnings of each issue are covered, but the focus of the seminar is on the practical decision-making of general counsel, administrators, students, and others who coexist in the university context.

ELHE770401
Ethics and Equity in Education ICIN, EYLEM B
Spring 2021
The course explores how schools are used as a vehicle of the state to de-culturalize various communities of people throughout the country's history. Students will explore how schools can more appropriately promote respect for valuing diversity as a generative source of the country's vitality and its relationship to the global village. The role of educators is not only to act ethically in the many individual situations of their daily professional lives, but more importantly to see that the institutional structures and processes of the school system are themselves reflections of a system of justice and care.

ELHE770801
Instructional Leadership CELLI, LYNNNE
Spring 2021
Introduces students to many of the contested issues in the field of supervision, such as the relationship between supervision and teacher development, teacher empowerment, teacher alienation, learning theories, school effectiveness, school restructuring, curriculum development, and scientific management. Supervision will be viewed also as a moral, community-nested, artistic, motivating, and collaborative activity. Will stress the need for a restructuring of supervision as an institutional process.

ELHE771102
Using Data and Evidence for School Improvements None
Spring 2021
This course prepares leaders to manage initiatives around continuous improvement and data-informed inquiry. On one hand, students will develop basic research skills that will contribute to evidence-based school improvement, including action research. On the other hand, students will explore the landscape of supports and barriers to using data and other evidence effectively in schools. In particular, students will explore the role of leadership in: the appropriate use and design of assessments; fostering a positive cycle of inquiry among educators; and the effective use of information systems and other technologies.

Organizational Theory and Learning CHO, VINCENT
Spring 2021
Rather than focusing on traits of the individual leader, this course focuses on the dimensions of organizations and teams that both facilitate and complicate leadership. Examples include managing conflict, developing a shared vision, and differentiating between technical and adaptive change. Students will apply various organizational theories in order to understand group- and system-level patterns in "how groups get things done" (e.g., structures and resources, symbols and values, power and politics). Ultimately, students leave the course better able to plan and evaluate school improvement through the lenses of organizational theory.
Credits: 03

Spring 2021
Reflection on Leadership Seminar Information SCANLAN, MARTIN K
Spring 2021
The primary purpose of the Reflection on Leadership Seminar is for students to synthesize their learning across their course of studies and prepare to apply this as they continue on their career and educational journey. The course will be conducted in a seminar format, with students sharing in the leadership of the course discussions and activities. Students will: describe how they have experienced the signature pedagogies across their program of study; provide clear evidence of their level of mastery of the key behaviors for educational leadership; articulate how they envision continuing to grow and innovate as a research-informed practitioner.

Global Perspectives on Student Affairs in Higher Education BLANCO, GERARDO L
Spring 2021
In this course students will explore the realities of the student experience around the world, and the ways in which higher education institutions and systems endeavor to understand and respond to them. The course will examine conceptual and practical, historical and contemporary approaches to student affairs. Critical analysis of the similarities and differences in approaches to student affairs across the world will provide students with insights into the relationship between theory and practice in the field.

Advanced Field Experience in Higher Education JAMES, MICHAEL J
Spring 2021
A guided practicum experience for students enrolled in higher education program, the field experience requires supervised field work in a higher education institution or agency and participation in a bimonthly internship seminar. Field work is overseen by program faculty and supervised by a professional administrator at the internship site. The seminar covers transition into the workforce and relating field work issues to theory and research in higher education.

Practicum in School Principalship LIBANO, JOSE A
Spring 2021
A 500-hour, field-based experience designed to enable the student to develop the competencies required to be an effective assistant principal/principal. The practicum is supervised jointly by a University representative and a cooperating practitioner. The student is expected to engage in a variety of experiences defined in the state standards for certification and to provide leadership to a major administrative project. The student will maintain a reflective journal of experiences and develop a portfolio that demonstrates the learning and insights gained during the practicum.

Experience, Reflection, Action Courses: Summer 2020  
ERAL400001  
First Year Experience, Reflection, and Action WHITCAVITCH-DEVOS, JULIA  
Summer 2020
First Year Experience, Reflection, and Action is a seminar designed to help first-year students negotiate the rigors and dilemmas of college life and become more critical citizens. Readings, discussions, and panel presentations will address moral-cognitive decision-making, vocational discernment in the context of Ignatian Pedagogy, local, state, and national trends in Applied Psychology and Human Development and Teacher Education and expose students to the Lynch School and university faculty and student research. Participants will read and critique current research about college student issues and learn to self-reflect critically in order to make more informed choices and decisions.

ERAL111008 First Year Experience, Reflection, and Action WHITEAVITCH-DEVVOY, JULIA Fall 2020
First Year Experience, Reflection, and Action is a seminar designed to help first year students negotiate the rigors and dilemmas of college life and become more critical citizens. Readings, discussions, and panel presentations will address moral-cognitive decision-making, vocational discernment in the context of Ignatian Pedagogy, local, state, and national trends in Applied Psychology and Human Development and Teacher Education and expose students to the Lynch School and university faculty and student research. Participants will read and critique current research about college student issues and learn to self-reflect critically in order to make more informed choices and decisions.

Spring 2021
Students break up into small groups to further discuss the main topics they have read about and heard during the large group lectures. Group facilitators and Peer Advisors lead discussions and all students must participate and submit assignments and research. The goals of the experience are the same as EDUC1100.

### Learning Engineering Courses: Summer 2020

#### LREN711301
**Design Studio 3 KOLODNER, JANET L**

**Summer 2020**

The Design Studio is the venue for learning how to practice Learning Engineering. Students will learn practices of design thinking and design decision making in the context of an internship, focused on designing learning experiences for a targeted population of learners that foster learning of targeted learning objectives. The Design Studio will be richly-facilitated and orchestrated as a Cognitive Apprenticeship. Students will work with the internship organization individually or in pairs, and also spend time as a Knowledge Building Community sharing what they are designing and the complexities they are facing, providing advice to each other, and reflecting on and articulating what they are learning about designing for learners.

- **Credits:** 0.5
- **Room and Schedule:** T TH 9 30-12; ONLINE COURSE; SYNCHRONOUS; MAY 13 - JUL 31
- **Satisfies Core Requirement:** None
- **Prerequisites:** None
- **Corequisites:** None Cross-listed with: None
- **Student Level:** GRADUATE
- **Status:** OPEN

#### LREN712301
**Reflective Seminar 3 KOLODNER, JANET L**

**Summer 2020**

This one-credit seminar is designed to help students make sense of and synthesize across the new concepts, skills, and practices they are learning as participants in the M.A. in Learning Engineering Program. Focus will be taking what they are learning into the workplace. Students will continue to reflect on their experiences to identify their strengths and what brings them joy, to imagine the special expertise they’d like to develop, and to identify the kinds of responsibilities they’d enjoy taking on in the workplace.

- **Credits:** 0.5
- **Room and Schedule:** TH 1 30-4; ONLINE COURSE; SYNCHRONOUS; MAY 13 - JUL 31
- **Satisfies Core Requirement:** None
- **Prerequisites:** None
- **Corequisites:** None Cross-listed with: None
- **Student Level:** GRADUATE
- **Status:** OPEN

#### LREN720601
**Collaborative Learning Environments and Social Media ZHANG, HELEN Z**

**Summer 2020**

In this module, students will engage with a variety of collaborative learning environments and social media platforms, reading relevant papers, exploring exemplary projects, and applying ideas to the functional design, adaptation, personalization, and use of learning technology. The module includes a “Design Concept” assignment, where students work in small teams to apply what they are learning to some learning design. Students will work to curate a “knowledge base” of exemplary projects, including examples both from current practice and from the research literature.

- **Credits:** 1
- **Room and Schedule:** TH 4 30-6; 5/28, 6/4, 6/11, 6/18, 7/2; ONLINE COURSE; SYNCHRONOUS; MAY 13 - JUL 31
- **Satisfies Core Requirement:** None
- **Prerequisites:** None
- **Corequisites:** None Cross-listed with: None
- **Student Level:** GRADUATE
- **Status:** OPEN

#### LREN740401
**Assessment of and for Learning BROWN, NATHANIEL**

**Summer 2020**

This course introduces students to the design of valid, reliable, meaningful, and useful assessments that serve both summative (assessment of learning) and formative (assessment for learning) purposes. Students will learn how to evaluate and improve the quality of assessments, both in the context of evaluating the effectiveness of a designed learning experience and supporting the learning that takes place within that context.

- **Credits:** 0.5
- **Room and Schedule:** T TH 1 30-4; ONLINE COURSE; SYNCHRONOUS; MAY 26 - JUN 23
- **Satisfies Core Requirement:** None
Learning Engineering Courses: Fall 2020

LREN710101
Introduction to Learning Engineering KOLODNER, JANET L
Fall 2020
This course introduces the content and skills needed to thrive as systematic designers of learning experiences, environments, and technologies. It focuses on three themes: (1) how people learn—cognitive processes involved in learning and social, cultural, physical, affective, and other influences on those processes; (2) how to fostering or promote learning—what we know about the help learners need to engage and participate at their best and ultimately to become more knowledgeable and capable; and (3) designing for learners and analyzing those designs—how to apply what you are learning to the design and analysis of learning experiences, environments, and technologies.

LREN711101
Design Studio 1 LACHAPELLE, CATHY P; SMITH, BRIAN K
Fall 2020
The Design Studio is the venue for learning how to practice Learning Engineering. Students will learn practices of design thinking and design decision making in the context of two design projects, each focused on designing learning experiences for a targeted population of learners that foster learning of targeted learning objectives. The Design Studio will be richly-facilitated and orchestrated as a Cognitive Apprenticeship. Students will work in pairs and also spend time as a Knowledge Building Community sharing what they are designing and the complexities they are facing, providing advice to each other, and reflecting on and articulating what they are learning about designing for learners.

LREN720101
Games for Learning SIDMAN, JASON G
Fall 2020
What can we learn from games about engaging learners and fostering learning? How can games be developed specifically to promote learning? What kinds of things can be learned from games? What does it take to foster learning from games? Some educational games that have been designed in research labs can inform about the answers to these questions. As well, there are many computer games around that can teach us about sustaining engagement, particularly important for understanding deeply and mastering capabilities. In this module, students will engage with and read about a variety of games for learning and, hopefully, develop imagination about what different kinds of games and ways of interacting with games afford with respect to learning and come to recognize aspects of game design that are relevant to designing learning experiences. Your project will be the conceptual design of a game to achieve a set of learning goals of your choice.

LREN720201
Modeling and Simulation for Learning DEPT
Fall 2020
Simulations and computational modeling are popular educational activities that can serve as venues for engaging learners in observations and explorations of invisible processes and phenomena, collecting data and evidence, and constructing and iteratively understanding of mechanisms and processes. This module will engage students in exploring interesting questions such as "What are simulation activities good for?", "What about modeling activities?" "What are the affordances of each and should each be used?", "What makes some simulations better for some situations and learner groups than others?", and "How can you design modeling/simulations to support desirable interactions?"

LREN730101
Principles of Fostering Learning LASKI, ELIDA V
Fall 2020
This course will introduce students to what the field of psychology has to say about how humans learn. This includes examining the basic cognitive processes involved in learning, and considering how these processes interact with task demands and organization. The course is organized around key principles about learning and cognition which have emerged from empirical work in the fields of cognitive and developmental psychology. Its focus will be to identify practices that can be used to foster learning in different settings and interactions, including approaches such as spaced practice and group discussions.

Motivation in Educational Contexts PEREZ, SHENIRA A
Spring 2021
In this module, we will explore what it means to be motivated and what it is that we want at a fundamental level (i.e., our basic human needs). We will also learn about important theories of achievement motivation from the fields of educational, developmental, and social psychology, as well as empirical research that supports these theories. The contextual focus of the module will be on what motivates students to learn and what kinds of instructional practices and interventions can be employed in order to foster student motivation and engagement.

Measurement, Evaluation, Statistics, and Assessment Courses: Summer 2020

MESA546001
Interpretation and Evaluation of Research LITTENBERG-TOBIAS, JOSHUA
Summer 2020
This course will improve a students' understanding of the empirical research literature in education and psychology. It concentrates on developing the conceptual foundations of empirical research and the practical analytic skills needed by a competent reader and user of research articles. Topics address purpose statements, hypotheses, sampling techniques, sample sizes and power, instrument development, internal and external validity, and typical quantitative research designs. Exercises emphasize the critical evaluation of published research. Each student will develop a research proposal.

MESA546801
Introductory Statistics BROWN, NATHANIEL
Summer 2020
An introduction to descriptive and inferential statistics. In particular, students will learn descriptive statistics, graphical and numerical representations of information; measures of location, dispersion, position, and dependence; the normal distribution; and exploratory data analysis. Also, students will be introduced to inferential statistics, point and interval estimation, tests of statistical hypotheses, sampling distribution of t, and inferences involving one or more populations, as well as ordinary least squares regression and chi-square analyses. Provides computer instruction on PC and Mac platforms and in the SPSS statistical package.

**MESA810101**  
**Interim Study: Master's and C.A.E.S. Students SPARKS, ELIZABETH**  
**Summer 2020**  
Master's and C.A.E.S. students who need to take one to two semesters off during the academic year, but wish to remain active in the University system must enroll in this course. Students cannot enroll in this course for more than two consecutive semesters during the academic year (e.g., Fall and Spring). Students who need to be away from their studies for more than two consecutive semesters during the academic year should file for a formal leave of absence.

**Measurement, Evaluation, Statistics, and Assessment Courses: Fall 2020**

**MESA106001**  
**Classroom Assessment LYONS, SUSAN C**  
**Fall 2020**  
This course emphasizes that assessment entails more than quizzes, unit tests, and standardized multiple-choice measures of student learning. The course explores how assessment is a key component of all aspects of the instructional process including organizing and creating a classroom culture, planning lessons, delivering instruction, and examining how students have grown as result of instruction. The validity of inferences and decisions made based on assessment information is examined within each phase of instruction. The goal is to show students that assessment is an integral part of teaching that should not be separated from daily classroom practices.

MESA546001
Interpretation and Evaluation of Research Bebelf, Damian
Fall 2020
This course will improve a students’ understanding of the empirical research literature in education and psychology. It concentrates on developing the conceptual foundations of empirical research and the practical analytic skills needed by a competent reader and user of research articles. Topics address purpose statements, hypotheses, sampling techniques, sample sizes and power, instrument development, internal and external validity, and a typical quantitative research designs. Exercises emphasize the critical evaluation of published research. Each student will develop a research proposal.
Credits: 03
Room and Schedule: CAMPION HALL 302, TH 4 30-6 50; Satisfies Core Requirement: None Prerequisites: None Corequisites: None Cross-listed with: ELHE7460, MESA7460 Frequency: Annually

MESA546201
Assessment and Test Construction Moncaleano, Sebastian
Fall 2020
This course addresses the major issues of educational assessment, with emphasis on the characteristics, administration, scoring, and interpretation of both formal and informal assessments, including but not limited to tests of achievement. All forms of assessment are examined including observation, portfolios, performance tasks, and pencil-and-paper tests, including standardized tests. Basic techniques of test construction, item writing, and analysis are included. Standardized norm-referenced tests and statewide testing programs are also examined.
Credits: 03
Room and Schedule: CARNEY HALL 109, M 1 30-4; Satisfies Core Requirement: None Prerequisites: None Corequisites: None Cross-listed with: MESA7462 Frequency: Annually
Student Level: UNDERGRAD ELECT Comments: None Status: CLOSED

MESA546601
Evaluation Practice and Methods Gates, Emily F
Fall 2020
This course introduces the process of conducting evaluations from beginning to end. Evaluation is a form of applied social science research focused on systematically assessing the value—merit, worth, or significance—of interventions. The evaluation process includes defining the intervention to be evaluated and its context; framing the evaluation purposes, questions, and quality criteria; designing the evaluation; collecting and analyzing data; synthesizing findings; and disseminating and supporting use. Students will have opportunities to learn and teach each other about a variety of concepts, methods, and tools that can be used at different points in the process. Taking an interdisciplinary approach to evaluation, this course draws on scholarly articles and examples from multiple fields including education, public health, social services, and international development and addressing evaluation at various scales including program, organizational, and systems-level evaluations. By the end of the course, students will gain knowledge of how to carry out evaluations, apply this knowledge to develop evaluation plans for real-world interventions, and gain skills to critique existing evaluations supporting their development as informed, critical consumers of evaluations.

Measurement, Evaluation, Statistics, and Assessment Courses: Spring 2021

MESA106001
Classroom Assessment LYONS, SUSAN C
Spring 2021
This course emphasizes that assessment entails more than quizzes, unit tests, and standardized multiple-choice measures of student learning. The course explores how assessment is a key component of all aspects of the instructional process including organizing and creating a classroom culture, planning lessons, delivering instruction, and examining how students have grown as result of instruction. The validity of inferences and decisions made based on assessment information is examined within each phase of instruction. The goal is to show students that assessment is an integral part of teaching that should not be separated from daily classroom practices.

MESA746701
Evaluation Theory and Research GATES, EMILY F
Spring 2021
Evaluation as a professional practice and academic discipline is characterized by variation in perspectives on what evaluation is and how it should be practiced. This course introduces students to evaluation theory, key debates, and research on evaluation in order to develop students as critical, responsible evaluators and evaluation scholars. Evaluation theories are models, approaches, or frameworks that prescribe how and why one should conduct evaluation in a particular way. Debates in the evaluation field center on the following issues: role of evaluation in society, particularly around advancing equity, social justice, and human rights; the relationship between theory and practice; role of stakeholder and public interest values in evaluation and the theory and practice of valuing; what constitutes credible evidence and, particularly evidence of outcomes and impact; influence of politics on evaluation and evaluation on policy-making; what are and should be evaluators? professional competencies and responsibilities; and future of evaluation. Research on evaluation involves conceptual and empirical investigations of theories, methods, and practices in order to better understand and improve evaluation. By the end of the course, students will be familiar with evaluation theories, debates, and research on evaluation and, ideally, strengthen their perspective and sense of responsibility within the evaluation field.

MESA746801
Introductory Statistics BROWN, NATHANIEL
Spring 2021
An introduction to descriptive and inferential statistics. In particular, students will learn descriptive statistics, graphical and numerical representations of information; measures of location, dispersion, position, and dependence; the normal distribution; and exploratory data analysis. Also, students will be introduced to inferential statistics, point and interval estimation, tests of statistical hypotheses, sampling distribution of t, and inferences involving one or more populations, as well as ordinary least squares regression and chi-square analyses. Provides computer instruction on PC and Mac platforms and in the SPSS statistical package.

MESA746902
Intermediate Statistics LAWSON, JORDAN
Spring 2021
Topics and computer exercises address tests of means, partial and part correlations, multiple regression, analysis of variance with planned and post hoc comparisons,
This course provides lectures, examples, and lab analyses that address multinomial and ordinal logistic regression models, multiple group discriminant analysis, multivariate analysis of variance, principal component analysis, factor analysis, and structural equation modeling. We cover various issues related to research design, model building, and the interpretation of the output from SPSS, R, Lisrel, and SAS software programs.

The goal of this course is to prepare students to participate in increasingly multilingual and multicultural environments in order to better serve bilingual students, families, and communities. Building on theory, research, and practice from the fields of bilingualism, second language acquisition, and education, students will learn about the process of language and literacy development in children and adolescents who are exposed to more than one language, and the social and cultural contexts in which this development occurs. Through the use of case studies and school profiles, students will deepen their understanding of issues in bilingualism and bilingual education.

Preparing the Whole Person for Global Citizenship LIANG, BELLE
Summer 2020
This course is for graduate students and upper-level undergraduates who are interested in the fields of education and psychology. The course will focus on the development of individuals and their role as global citizens. We will explore the whole person development of adolescents and emerging adults in the digital age—one marked by a participatory culture. We explore these questions while foregrounding the different strategies and methodologies of counseling, developmental, and educational psychology.

Teaching Bilingual Students NGUYEN, MINH H
Summer 2020
Deals with the practical aspects of the instruction of teaching English Language Learners in Sheltered English Immersion, and mainstream classrooms. Reviews and applies literacy and content area instructional approaches. Includes such other topics as history and legislation related to English Language Learners and bilingual education, and the influences of language and culture on students, instruction, curriculum, and assessment. There are two sections of this course: one for elementary and early childhood education majors and one for secondary education majors.

Classroom Management CASS, RICHARD J
Summer 2020
Focuses on observation and description of learning behaviors, with emphasis on examining the relationship of teacher behavior and student motivation. Prepares teachers to analyze behavior in the context of a regular classroom setting that serves moderate special needs students and to select, organize, plan, and promote developmentally appropriate behavior management strategies that support positive learning. Also considers theoretical models of discipline and classroom management strategies, and requires students to propose and develop a rationale for selection of specific techniques for specific classroom behaviors.

Assessment and Grading for Equity MOODY, RACHEL L  
Summer 2020

This course is designed to introduce students to principles of assessment and grading, with a focus on grading practices that proactively try to mitigate issues of equity and implicit bias. The course emphasizes a combination of practice and theory. Students will practice different ways of grading the same assessment, design their own grading systems, and critically examine traditional and innovative grading philosophies. Important grading-related topics include: purposes of grading, "homework" as grading category, the influence of student behavior on grading practices, rubrics and grading scales, use of percentages in grading, and the infamous "zero."

Teaching, Curriculum, and Learning Environments: Global Perspectives None  
Summer 2020

What kinds of education are most needed for a world characterized by spiraling political polarization, increasing economic interdependence, rapid climate change, and a global pandemic like COVID-19? This online course will introduce students to contemporary debates about how educators should teach, what students should learn, and how schools should interact with society. The course is global in scope and will require in-depth study of country cases and failed and successful models of change. International students and U.S. students curious about other countries' approaches to education are strongly encouraged to enroll.

EDUC730301  
Curriculum Theories, Practice, and Design JONES, RENATA L  
Summer 2020

The overarching objective for Curriculum Theories and Practice is to help course participants develop and clarify their philosophy of education, in particular, their beliefs regarding the purposes and processes of effective and equitable curricular organization. To do so, the class explores varied ways of conceptualizing a school curriculum, drawing on insights from major curriculum designers, both past and present, U.S. and international. So students appreciate the ever-evolving nature of effective teaching practices and related school curricula, they will assess their own experiences with educational and institutional change processes writ large. Lining effort to help course participants to thrive in the current, volatile, educational and political climate, students will consider several approaches to multicultural education, anti-racist education, and inclusion practices that aim to transform the curriculum, attending to the needs of all students and overly promoting equitable outcomes. In doing so, students will enact alternative strategies for assessment that provide multiple and authentic measures of student learning. Ultimately the course intends to help students consider how school curricula can be structured to promote social justice.

Family and Community Engagement SCANLAN, MARTIN K  
Summer 2020

The purpose of this course is to introduce participants to theories, practices, and empirical research regarding family and community engagement in schools. The focus is on how school leaders—formal and informal—enact organizational models, educational programs, and political strategies that increase authentic relationships with parents and community members. Topics of study will include community schools/full service schools, parent involvement models, involvement of diverse families, grassroots organizing for community development, afterschool and community-based education, and school-board/community relations. Direct participation in inquiry into school/community activities conducted on-site in schools and neighborhoods will be requirement of the course.

EDUC730501  
Globalization, Mobility, and Education JEON, AHRUM  
Summer 2020

This course addresses political economic issues related to migration and education. Drawing on the anthropology of globalization and sociology of immigration, the course reviews major theories of immigrant incorporation and exclusion processes in schools, examines case studies of im/migrants, refugees, and displaced persons and their adaptation processes in countries in the Global North and the Global South, and considers educational practices and policies that develop to address mobility in diverse contexts. The course asks how cultural, social, political, and economic factors influence im/migrant incorporation, and how educators can facilitate im/migrant students’ opportunities for learning through changes in policies, pedagogies, and curricula.

EDUC730601  
Language Learner in Global Perspective KIM, DEOKSOON  
Summer 2020

This course provides an overview of language learning and the situation of second language learners in schools. First, we review processes of language learning and the challenges language learners face when they must simultaneously learn a language and learn subject matter in that language. We do this from a sociocultural perspective, exploring language learning as embedded in socioculturally situated activities. We develop an account of how learning language is also learning culture. Second, we study how these processes vary across cultural contexts. Because language learning is woven into social and historical contexts, processes of language learning and schooling vary around the world. The course develops several case studies from different areas of the globe in order to illustrate how language learning and schooling can interconnect in different ways.

EDUC733501
Korean Culture and Education in Global Perspective KIM, DEOKSOON
Summer 2020
Korean society, politics, culture, and values are quite different now than they have been in the past. This course provides an overview of modern Korean history, Korean language, and Korean culture and values in the contemporary, interconnected global world. The course will explore Korean traditions such as Confucianism, Shamanism, and Buddhism, the modern education system in Korea, arts, science, and technology in modern Korea, as well as Korean popular culture. The course will take place at Seoul National University in Seoul, Korea, as a combined class with Korean students who are enrolled at Seoul National University. By engaging in various assignments such as a case study, discussions, field work, and digital storytelling, students will gain insights into Korean culture, history, values, pop culture, and current society, and they will also learn about these topics through lived experiences and trips in Korea.

EDUC740101
Supervision in Action COWNIE, CHARLES T
Summer 2020
This course is designed as an introduction to research-based clinical supervision models in teacher education. Hands-on application-in-action includes observational strategies, collaborative assessment logs, and summative reports as resources for ongoing data collection. Course participants acquire and then apply the Massachusetts Department of Education Pre-service Performance Assessment rubric for coaching and evaluating student teachers, integrating the BC Teacher Education themes that emphasize teaching for equity and social justice. This course is restricted to cooperating teachers in BC Partnership Schools who are supervising a BC student teacher in a full-time practica and to new BC Clinical Faculty.

Teaching Narrative Writing to K-8 Students SOTO VIQUEZ, ANA LAURA
Summer 2020
This is a project-based course where groups of participants will collaborate to develop a writing unit in a genre appropriate for their grade level. Using a genre-based pedagogy informed by systemic functional linguistics, participants will learn what and how to teach non-fiction narratives (Personal and procedural recounts, autobiographies, biographies, empathetic autobiographies, and historical recounts) and fictional narratives. Features of the genres demanded in elementary and middle schools will be learned and practiced. The strong emphasis on language development distinguishes this approach from others currently used in schools. The approach to teaching guides teachers in ways of apprenticing students to writing that builds confidence and success.

Bilingualism, Second Language, and Literacy Development BECKER, MARIANA N
Summer 2020
Explores first and second language and literacy development of children raised bilingually as well as students acquiring a second language during pre-school, elementary, or secondary school years. Also addresses theories of first and second language acquisition, literacy development in the second language, and factors affecting second language and literacy learning. Participants will assess the development of one aspect of language or language skill of a bilingual individual and draw implications for instruction, parent involvement, and policy. This course is fully online. The course will have biweekly synchronous meetings. The course meeting time will be determined at the first session by consulting with all students. The first session will be on September 4 (Thursday) at 9:00 AM.

See Urban Catholic Teacher Corps' website https://www.bc.edu/bc-web/schools/lynch-school/academics/departments/tespeci/urban-catholic-teacher-corps.html for details or contact the program office at 617-552-0602.
Credits: 00
The course will provide a foundation in the topic of scholarly writing while also supporting the development of the unique writing needs of participating students. Course readings will explicitly introduce students to text structures and language demands of different genres of scholarly writing in education and other related areas. Assignments will build on the writing that students are already doing in their doctoral programs. Foundational instruction sets the stage of individualized attention to the unique challenges and audience demands of each student’s writing focus.

Teacher Education and Curriculum and Instruction Courses: Fall 2020

EDUC103001
Child Growth and Development LASKI, ELIDA V
Fall 2020
First part of a two-course sequence (APSY1030 - APSY1031) designed to introduce students to the multiple dimensions of child development, and the place of education in promoting healthy development for all children. This course acquaints students with multiple processes of child development, including physical, social, cognitive, linguistic, and emotional development from birth through adolescence. Both typical and atypical patterns of development will be examined. Students discuss and analyze classic theories, contemporary issues, and key research in child development in view of their application to educational and other applied settings.

**EDUC105001**  
The Educational Conversation CASALINI, CRISTIANO  
Fall 2020  
What does it mean to be an educated person? At first, we must defer to the answers of others. Over time, we become curious about our formation. What does all of this schooling add up to? How do all of my influences beyond school fit together? We realize that it is time to take responsibility for our own education, to reflect on what it is admirable to become, to locate resources for self-cultivation, and to integrate them into a life worth living. But this is not solitary work. Together we will consider a range of rich, rival conceptions of what it means to be educated. In this way, you will be invited to join one of the oldest and richest dialogues, the educational conversation.

**EDUC125001**  
Teaching, Curriculum, and Learning Environments: Global Perspectives SHIRLEY, DENNIS L  
Fall 2020  
What kinds of education are most needed for a world characterized by spiraling political polarization, increasing economic interdependence, rapid climate change, and a global pandemic like COVID-19? This online course will introduce students to contemporary debates about how educators should teach, what students should learn, and how schools should interact with society. The course is global in scope and will require in-depth study of country cases and failed and successful models of change. International students and U.S. students curious about other countries’ approaches to education are strongly encouraged to enroll.

**EDUC203901**  
Learning and Curriculum in the Elementary School HOMZA, ANNE E  
Fall 2020  
Introduces pre-service teachers to a variety of issues surrounding special education, including its historical development, concepts of disability, the terminology commonly used in the field, and recent trends and practices. Examines legislation pertaining to special education, particularly the Individuals With Disabilities Education Act (IDEA). Assists future educators to understand the process of designing and implementing an Individualized Educational Program (IEP).

**EDUC210402**  
Teaching Reading HEAVY, MARYKATE  
Fall 2020  
This course is designed to offer preservice teachers theoretical and practical knowledge and experience into teaching literacy to elementary age students. Emphasis will be placed on the social, political, and cultural context of reading instruction. Students will gain understanding of major theoretical perspectives on literacy development and the myriad strategies for teaching reading in a variety of contexts. Students will also be expected to spend time in a context where they can gain experiences in providing reading instruction in a relevant and productive way.

**EDUC210501**  
Teaching the Social Sciences and the Arts STEINER, ADAM C  
Fall 2020  
Provides prospective elementary teachers with opportunities to develop social studies and arts curricula for elementary age students and consider a variety of instructional approaches appropriate for this age group. Students will learn how to develop the skills of an historian and select and integrate knowledge appropriate for diverse learners. Curricular topics include evaluating context-appropriate materials, developing critical thinking, using and critiquing primary sources in the classroom, and developing varied learning activities through the use of multiple media.

**EDUC210801**  
Teaching Mathematics and Technology MITCHELL, REBECCA  
Fall 2020  
This course presents methods and materials useful in teaching mathematics to elementary school children. It analyzes mathematics content and pedagogy from both conceptual and practical perspectives. Emphasis is placed on the interconnections among theory, procedures, and applications that form the framework on which specific mathematics lessons are constructed. It examines the elementary mathematics curriculum through technology resources, addressing the different ways in which technology can be used. Activities include laboratory experiences with concrete models and technology as well as...
EDUC210901  
Teaching About the Natural World  
GONZALEZ, CASANDRA  
Fall 2020  
This course is designed to increase confidence, enthusiasm, and knowledge for teaching elementary science. Science can be an essential part of an elementary classroom not only to achieve key science learning goals, but also as a means to engage and motivate students as well as support literacy and mathematics learning. An overarching focus of the course is on the idea that science is a “practice” that includes specific ways of reasoning, communicating, and acting. The course is also designed in partnership with the afterschool program at Gardner Pilot Academy in BPS. For eight weeks during the course, undergraduates will work with elementary students to teach them science and to reflect on how to design more effective science lessons.

Undergraduate Inquiry Seminar: I  
HOMZA, ANNE E  
Fall 2020  
The purpose of this seminar is to introduce and develop classroom-based inquiry skills in teacher candidates. Teachers develop a self-awareness about their personal beliefs and biases about teaching, learning, and pupils; explore, understand, and learn to navigate the various aspects of school culture; and learn to use their classroom as a research site by posing critical questions about pupil learning, consulting related research, gathering and analyzing data about their pupils and classrooms, attempting interventions, evaluating results, and documenting pupil learning.

Educational Strategies: Children with Special Needs  
PARK, HAERIN  
Fall 2020  
This course provides instruction to pre-service teachers interested in learning more about instruction, curriculum, and teaching for children with special needs, with a framework highlighting important educational issues pertinent to their professional development and the realities of teaching. The course emphasizes the complexities of teaching children with individual learning profiles in inclusive settings. Students will examine educational readings and instructional practices through the lenses of curriculum, author voice, and academic tension. Class participants will develop a comprehensive understanding of the historical, legal, and political developments influencing current general and special education practices.

Secondary Curriculum and Instruction  
DECCELLES, DANIEL G  
Fall 2020  
Provides an introduction to secondary teaching practices as well as an overview of the history and structure of secondary schools. Topics include curriculum theory and development, interdisciplinary teaching, teaching students with diverse learning abilities, application of educational research, assessment, national standards, and alternative models for secondary schools. Focuses on the role of the teacher in secondary education reform. Taught on-site and in conjunction with secondary education teacher candidates’ first prepracticum experience, this course offers a unique opportunity for a cohort experience in which preservice teachers work closely with each other, high school faculty, the instructor, and urban students.

Undergraduate Inquiry Seminar: II  
HOMZA, ANNE E  
Fall 2020  
The purpose of this seminar is to introduce and develop classroom-based inquiry skills in teacher candidates. Teachers develop a self-awareness about their personal beliefs and biases about teaching, learning, and pupils; explore, understand, and learn to navigate the various aspects of school culture; and learn to use their classroom as a research site by posing critical questions about pupil learning, consulting related research, gathering and analyzing data about their pupils and classrooms, attempting interventions, evaluating results, and documenting pupil learning.

Bilingualism in Schools and Communities PAEZ, MARIELA M
Fall 2020
The goal of this course is to prepare students to participate in increasingly
multilingual and multicultural environments in order to better serve bilingual
students, families, and communities. Building on theory, research, and practice
from the fields of bilingualism, second language acquisition, and education,
students will learn about the process of language and literacy development in
children and adolescents who are exposed to more than one language, and the
social and cultural contexts in which this development occurs. Through the use
of case studies and school profiles, students will deepen their understanding of
issues in bilingualism and bilingual education.

Reading and Special Needs Instruction for Secondary and Middle School Students DUNN, LORI A
Fall 2020
Develops knowledge of the reading process and how to "teach reading the
content areas." Students will develop curriculum and instruction that integrates
reading instruction in the content areas, addressing diverse learners. Involves
understanding relationship among assessment, evaluation, and curriculum;
learning what and how to teach based on student assessments; developing and
providing scaffolded instruction that addresses reading comprehension and
critical thinking; and integrating reading, writing, speaking, listening, and
thinking into content curriculum. Also addresses how to help students
comprehend non-printed text.

<td>This capstone inquiry seminar requires teacher candidates to continue to develop an inquiry stance in their practice through the systematic analysis of teaching and learning in their classroom experiences. Grounded in a theory of teacher education for social justice that encourages practitioners to challenge educational inequities by inquiring into practice, this course advances teacher candidates’ skills in planning, delivering, assessing, and analyzing instruction that promotes pupil learning and enhances their life-chances.</td>

Inclusive Education Field Observation SCANLON, DAVID
Fall 2020
Open to undergraduate majors in the Morrissey College of Arts and Sciences, the Inclusive Education Minor is offered in the LSOE. The minor is designed to
(1) introduce Morrissey College of Arts and Sciences students to the world of disabilities and special education with an emphasis on special education practice, and (2) enhance the ability of future professionals to meet the needs of increasingly diverse school populations. Classes address the nature and implications of disabilities and effective practices in special education. The minor consists of six-courses and a zero-credit field observation. Appropriate for those considering a career or further studies in education.

Partnering with Diverse Families and Communities in Early Childhood PAEZ, MARIELA M
Fall 2020
This course is designed to help early childhood educators establish effective partnerships and reciprocal relationships with diverse families and communities. First, students will learn about models of family involvement and important family developmental processes in early childhood such as attachment, maternal responsiveness, and parenting styles. Second, we discuss important social, cultural, and linguistic characteristics which shape the life of families and children and are relevant for understanding diverse families. Third, we present strategies for supporting and working with diverse families through family, school, and community partnerships. At the end of this course, students will have developed an action plan for working with diverse families in early childhood settings including activities for: collecting and providing information, planning for family involvement in the classroom, establishing reciprocal relationships with families, and collaborating with communities.

Secondary/Middle School Science Methods LOWELL, BENJAMIN R
Fall 2020
Provides an active, instructional environment for science learning that enables each student to construct knowledge (skill, affective, and cognitive) that, in turn, allows them to be prepared to construct instructional environments meeting the needs of tomorrow's secondary and middle school students. Activities reflect on current research: reform movements of AAAS, NRC, NSTA, inclusive practices, interactions with experienced teachers, firsthand experience with instructional technology, and review and development of curriculum and related instructional materials.

EDUC630201
Secondary and Middle School English Methods DECELLES, DANIEL G
Fall 2020
Develops knowledge, skills, and dispositions essential for competent understanding, development, and delivery of effective English Language Arts instruction in a diverse classroom. Addresses educational and literary theory, pedagogy, assessment, evaluation, content, curriculum, critical literacy, and sensitivity to and respect for adolescents who come from a variety of cultures, abilities, interests, and needs. Provides knowledge of local, state, and national standards and strategies to help students reach those standards. Encourages risk-taking, experimentation, flexibility, application of theory, and innovation. Good teaching demands open-mindedness, critical reading, writing, and thinking, honest reflection, high expectations, ongoing revision, and commitment to social justice.

EDUC632501
Innovative Pedagogy for English Language Learners KIM, DEOKSOON
Fall 2020
This course will enable you to understand and respond to the diverse linguistic, cultural, and educational needs of English learners in your K-12 content area classes. The course engages with questions of equity as preservice and in-service teachers and language learners prepare to serve culturally and linguistically diverse populations. The course will prepare you to teach emergent bilinguals (or English language learners) guided by the principles of comprehensibility, cultural awareness, and cultural sensitivity. The course will equip you with techniques and strategies for your specific classroom. We will investigate theory and practice in cross-cultural communication, language acquisition, methods of language teaching, curriculum development, and language assessment. You will engage in activities and tasks, online and in the field, that will address practical and philosophical issues in fostering optimal environments for language and content learning for English learners. This course is fully online. The course will have biweekly synchronous meetings. The course meeting time will be determined at the first session by consulting with all students. The first session will be on September 3 (Wednesday) at 9:00 AM.

Teaching and Learning Strategies for Moderate Special Needs SCANLON, DAVID
Fall 2020
This course is intended to help prospective and experienced special education teachers and other educators a repertoire of skills for teaching students with mild/moderate (high incidence) educational disabilities. Participants will accomplish this goal by making connections among their knowledge of disabilities, special education policy and practices, assessments, education theory, and teaching methods. Students will learn how to develop, implement, and monitor individualized education programs, implement research-based effective intervention practices, and collaborate with others to meet the needs of special education students in inclusive and other educational settings. Successful students will have familiarity and competency with a variety of special education procedures and teaching approaches and specific practices. Appropriate for both elementary and secondary level education. Class sessions will routinely include time to practice skills being learned.

or, a -

What have been the characteristics of the Society following the Jesuits’ suppression in 1773, to various enterprises and stimulating dialogue.

foster deep and meaningful conversation among students. It will include references with leaders and understanding its role to promote liberation from oppression in diverse social environments; (3) What kind of services have been activated by the Society of Jesus in order to fulfill its core values of "the service of faith and promotion of justice"; and (4) How social justice is pursued through pedagogy and practices by Jesuit and Ignatian schools today, given the significant involvement of the Jesuits with formal education on a global scale. The course is designed to foster deep and meaningful conversation among students. It will include individual and collective readings and video-conferences with leaders and teachers of Jesuit schools around the world, deepening students’ knowledge of current practices and stimulating dialogue.

This survey course focuses on practical considerations regarding inclusive and accessible design. The focus is around guiding principles and key content that learners and designers can apply to their particular area of design. Particular focus is paid to understanding the functional barriers that individuals with disabilities might encounter, how these barriers can be addressed proactively, and why retrofitting designs can be costly and ineffective. After a general introduction to some of the guiding ideas behind inclusion and accessibility, both Universal Design for Learning (UDL) and accessibility are discussed to provide practical paths towards design that is ultimately more effective for all learners.

The Social Apostolate of the Society of Jesus has developed in a variety of ways over the centuries according to diverse contexts where Jesuits have operated as agents of "social justice." This class offers students the opportunity to interact with faculty member approval. Corequisites: None

EDUC713101
Social Justice in Jesuit Contexts CASALINI, CRISTIANO
Fall 2020
The Social Apostle of the Society of Jesus has developed in a variety of ways over the centuries according the diverse contexts where Jesuits have operated as agents of "social justice." This class offers students both a broad and deep understanding of: (1) How the Society of Jesus developed its mission in support of creating a "preferential option for the poor"; (2) How the Society understood its role to promote liberation from oppression in diverse social environments; (3) What kind of services have been activated by the Society of Jesus in order to fulfill its core values of "the service of faith and promotion of justice"; and (4) How social justice is pursued through pedagogy and practices by Jesuit and Ignatian schools today, given the significant involvement of the Jesuits with formal education on a global scale. The course is designed to foster deep and meaningful conversation among students. A History of The Jesuits MEEHAN, SETH M
Fall 2020
introductory survey to this rich and varied past with particular attention, following the Jesuits’ suppression in 1773, to various enterprises and enterprises in the Americas. The course seeks to answer these questions: What have been the characteristics of the Society of Jesus and its associated works? And how and why have those characteristics remained the same or changed? Complementing the other courses in the Certificate program, the course traces the development, expansion, suppression, restoration, and recent developments of the Society of Jesus by closely examining the historical contributions of significant Jesuits.

EDUC730201
Models and Theories of Instructional Design JACKSON, RICHARD
EDUC730301
Curriculum Theories, Practice, and Design MORALES, MELITA M
Fall 2020
The overarching objective for Curriculum Theories and Practice is to help course participants develop and clarify their philosophy of education, in particular, their beliefs regarding the purposes and processes of effective and equitable curricular organization. To do so, the class explores varied ways of conceptualizing a school curriculum, drawing on insights from major curriculum designers, both past and present, U.S. and international. Students appreciate the ever-evolving nature of effective teaching practices and related school curricula, they will assess their own experiences with educational and institutional change processes wrt large. Aiming to help course participants to thrive in the current, volatile educational and political climate, students will consider various approaches to multicultural education, anti-racist education, and inclusion practices that aim to transform the curriculum, attending to the needs of all students and overtly promoting equitable outcomes. In doing so, students will enact alternative strategies for assessment that provide multiple and authentic measures of student learning. Ultimately the course intends to help students consider how school curricula can be structured to promote social justice.

**Advanced Graduate Inquiry Seminar**  
**DAVIS, CHERYL J**  
**Fall 2020**  
This course is designed for the Lynch School Fifth Year Program students who have successfully completed a licensure program at Boston College. It is designed to build on teacher candidates’ experiences with inquiry as stance and expand their skills in conducting classroom-based research that leads to pupil achievement and teaching for social justice. The hybrid course is online with one class meeting. A case-study approach is used to help teacher candidates mediate the relationships of theory and practice, pose questions for inquiry, learn through reflection and discussion, learn from their students and colleagues, construct critical perspectives about teaching, learning, and schooling, and to improve teaching and learning. The second part of this sequence is EDUC7432 which is taken in conjunction with full-time student teaching (EDUC7420).<br>

**SARIDIS, ELENI**  
**Fall 2020**  
The course will coincide with the pre-practicum experience. It is designed to introduce teacher candidates to inquiry as stance and the skills necessary to conduct classroom-based research that leads to pupil achievement and teaching for social justice. The course is designed to help teacher candidates mediate the relationships of theory and practice, pose questions for inquiry, learn through reflection and discussion, learn from their students and colleagues, construct critical perspectives about teaching, learning, and schooling, and to improve teaching and learning. The second part of this sequence is 432 which is taken in conjunction with full-time student teaching (EDUC7420). In the fall of 2020 this course will be fully online. Part is asynchronous and part synchronous. The synchronous part will be scheduled for 8:00-9:30 pm on the scheduled day of the course. Since this is a 1-credit course, there will be 5 synchronous sessions. The dates of the five synchronous sessions have not been set, but these sessions will occur over the course of the semester (i.e., not five weeks in a row).  
**Credits:** 0.1  
**Room and Schedule:** TH 8-9 PM; ONLINE; SYNCHRONOUS; Satisfies Core Requirement: None

EDUC743201  
**Graduate Inquiry Seminar:** Two  
**CUDA, JOSEPHINE**  
**Fall 2020**  
The primary goal of this capstone seminar is to initiate teacher candidates into the practice of teacher research or collaborative inquiry for action. Collaborative Inquiry for Action is an ongoing, collaborative process of systematic and self-critical inquiry by educators about their own schools and classrooms in order to increase teachers' knowledge, improve students' learning, and contribute to social justice. This final project will be presented at a roundtable presentation at the end of the semester and also satisfies the M.Ed., MAT, MST Comprehensive Examination in Education.  
**Credits:** 0.2

EDUC743501  
**Social Contexts of Education**  
**MCELWAINE, MICHELLE L**  
**Fall 2020**  
Examines the role of situational, school, community, peer, and family factors on the education of children. Participants in the course will strive to understand the effects of their own social context on their education, to develop strategies to help students understand their context, and to understand and contribute to what schools can do to improve teaching and learning and school culture for all students regardless of internal and external variables.

EDUC743801
Instruction of Students with Special Needs and Diverse Learners
FRANCIS, HEATHER
Fall 2020
This course focuses on the education of students with disabilities and other learners from culturally and linguistically diverse backgrounds. The goal of the course is to promote access to the general curriculum for all students through participation in standards-based instruction.
Universal Design for Learning (UDL) provides the theoretical framework for this course. Through an examination of historical milestones, landmark legislation, systems for classification, approaches to intervention, and the daily experiences of diverse learners, students acquire knowledge about diversity and the resources, services, and supports available for creating a more just society through education.

EDUC754702

Teaching Narrative Writing to K-8 Students MACDONALD, ELIZABETH A

Fall 2020

This is a project-based course where groups of participants will collaborate to develop a writing unit in a genre appropriate for their grade level. Using a genre-based pedagogy informed by systemic functional linguistics, participants will learn what and how to teach non-fiction narratives (Personal and procedural recounts, autobiographies, biographies, empathetic autobiographies, and technical recounts) and fictional narratives. Features of the genres demanded in elementary and middle schools will be learned and practiced. The strong emphasis on language development distinguishes this approach from others currently used in schools. The approach to teaching guides teachers in ways of apprenticing students to writing that builds confidence and success.

Credits: 01

EDUC761501 Foundations of Bilingual Education ALVARADO, JASMINE N Fall 2020
Students will be able to walk into any school that offers a bilingual program and/or serves bilingual pupils and identify the type of program in place depending on the specifics of different contexts. In service of this goal, students will explore the following characteristics of language education programs in the U.S specifically: history, models and key attribute of program types), political contexts, and legal foundations. Students will understand dual language models, design, and implementation, specifically: competencies, knowledge, and skills of dual language teachers, features of instruction and assessment, and implementation.

EDUC761101 Bilingualism, Second Language, and Literacy Development KIM, DEOKSOON Fall 2020
Explores first and second language and literacy development of children raised bilingual as well as students acquiring a second language during pre-school, elementary, or secondary school years. Also addresses theories of first and second language acquisition, literacy development in the second language, and factors affecting second language and literacy learning. Participants will assess the development of one aspect of language or language skill of a bilingual individual and draw implications for instruction, parent involvement, and policy. This course is fully online. The course will have biweekly synchronous meetings. The course meeting time will be determined at the first session by consulting with all students. The first session will be on September 4 (Thursday) at 9:00 AM.

This course focuses on the study of change theories and approaches, their application in educational reform, and their impact on teaching and learning. Students examine the history of educational change and consider the forces for and against change in schools and other educational organizations. Each student is expected to conduct a research study of an educational change initiative.

Teacher Education and Curriculum and Instruction

Courses: Spring 2021

EDUC103001
Child Growth and Development LASKI, ELIDA V
Spring 2021
First part of a two-course sequence (APSY1030 - APSY1031) designed to introduce students to the multiple dimensions of child development, and the place of education in promoting healthy development for all children. This course acquaints students with multiple processes of child development, including physical, social, cognitive, linguistic, and emotional development from birth through adolescence. Both typical and atypical patterns of development will be examined. Students discuss and analyze classic theories, contemporary issues, and key research in child development in view of their application to educational and other applied settings.

Family, School, and Society MORELLI, GILDA A
Spring 2021
Second part of a two-course sequence (APSY1030-APSY1031) that introduces students to the multiple dimensions of child development, and the place of education in promoting healthy development for all children. This course considers the social and cultural contexts that shape developmental and educational processes. Focuses on understanding the nature of contemporary social problems including racism, sexism, ethnic prejudice, poverty, and violence, as they affect children, families, and schooling. Emphasizes special role of education in linking community resources for an integrated approach to serving children and families.
Credits: 03

EDUC112801
Computer Applications for Educators KINDER, T SCOTT
Spring 2021
The technology which is often available in contemporary classrooms affords opportunities for reaching more students in relevant ways. This course covers fundamental knowledge and skills needed by teachers who wish to use that technology and affords students opportunities to develop their expertise in mainstream and emerging educational technologies. This course includes presentations on hardware (e.g., computers, scanners, digital cameras, video cameras) and software (e.g., interactive, web, productivity) and discussion of how these integrate into classroom instruction. Substantial hands-on project time is provided.

Credits: 03

EDUC105101
Reimagining School and Society HIGGINS, CHRISTOPHER R
Spring 2021
Schooling as we understand it dates to the early nineteenth century, born of and contributing to a period of rapid social change marked by the spread of literacy, the rise of the nation state, and the advent of industrialization. Schooling remains one of the most powerful educational tools ever invented, but how well does it equip us to confront the educational task of today? How will education, in and out of school, need to evolve in light of new technologies and media ecologies, global interconnectedness, health crises, mass migrations, surges of xenophobia, entrenched inequality, climate emergency, and the new "post-truth" political condition?

Comments: This is not a course in computer programming. (EDUC1128 is for undergraduate students only).
Status: OPEN
Focuses on the teaching and learning of language arts in the elementary grades. Students will be exposed to theoretical approaches to both oral and written language development in addition to teaching methods that support development. In the fall semester, content and approaches related to teaching in English/Spanish bilingual programs will be included. Students will have the opportunity to apply their learning through practical lesson development, and implementation in connection to their pre-practicum placement. Student diversity and its implications for teaching language arts will be an integral theme. Students will draw on their experiences in their prepractica to apply and reflect on learning as they mediate theory and practice.

EDUC210401
Teaching Reading DUNN, LORI A
Spring 2021
This course is designed to offer preservice teachers theoretical and practical knowledge and experience into teaching literacy to elementary age students. Emphasis will be placed on the social, political, and cultural context of reading instruction. Students will gain understanding of major theoretical perspectives on literacy development and the myriad strategies for teaching reading in a variety of contexts. Students will also be expected to spend time in a context where they can gain experiences in providing reading instruction in a relevant and productive way.

EDUC210501
Teaching the Social Sciences and the Arts MORALES, MELITA M
Spring 2021
Provides prospective elementary teachers with opportunities to develop social studies and arts curricula for elementary age students and consider a variety of instructional approaches appropriate for this age group. Students will learn how to develop the skills of an historian and select and integrate knowledge appropriate for diverse learners. Curricular topics include evaluating context-appropriate materials, developing critical thinking, using and critiquing primary sources in the classroom, and developing varied learning activities through the use of multiple media.

EDUC210801
Teaching Mathematics and Technology ALBERT, LILLIE
Spring 2021
This course presents methods and materials useful in teaching mathematics to elementary school children. It analyzes mathematics content and pedagogy from both conceptual and practical perspectives. Emphasis is placed on the interconnections among theory, procedures, and applications that form the framework on which specific mathematics lessons are constructed. It examines the elementary mathematics curriculum through technology resources, addressing the different ways in which technology can be used. Activities include laboratory experiences with concrete models and technology as well as inquiry into the role of the teacher in the school community in the epoch of teaching for social justice.

EDUC210901
Teaching About the Natural World LOWELL, BENJAMIN R
Spring 2021
This course is designed to increase confidence, enthusiasm, and knowledge for teaching elementary science. Science can be an essential part of an elementary classroom not only to achieve key science learning goals, but also as a means to engage and motivate students as well as support literacy and mathematics learning. An overarching focus of the course is on the idea that science is a "practice" that includes specific ways of reasoning, communicating, and acting. The course is also designed in partnership with the afterschool program at Gardner Pilot Academy in BPS. For eight weeks during the course, undergraduates will work with elementary students to teach them science and to reflect on how to design more effective science lessons.

EDUC213101
Undergraduate Inquiry Seminar: I HOMZA, ANNE E
Spring 2021
The purpose of this seminar is to introduce and develop classroom-based inquiry skills in teacher candidates. Teachers develop a self-awareness about their personal beliefs and biases about teaching, learning, and pupils; explore, understand, and learn to navigate the various aspects of school culture; and learn to use their classroom as a research site by posing critical questions about pupil learning, consulting related research, gathering and analyzing data about their pupils and classrooms, attempting interventions, evaluating results, and documenting pupil learning.

EDUC221101
Secondary Curriculum and Instruction DECELLES, DANIEL G
Spring 2021
Provides an introduction to secondary teaching practices as well as an overview of the history and structure of secondary schools. Topics include curriculum theory and development, interdisciplinary teaching, teaching students with diverse learning abilities, application of educational research, assessment, national standards, and alternative models for secondary schools. Focuses on the role of the teacher in secondary education reform. Taught on-site and in conjunction with secondary education teacher candidates' first prepracticum experience, this course offers a unique opportunity for a cohort experience in which preservice teachers work closely with each other, high school faculty, the instructor, and urban students.

Reading and Special Needs Instruction for Secondary and Middle School Students DUNN, LORI A
Spring 2021
Develops knowledge of the reading process and how to "teach reading the content areas." Students will develop curriculum and instruction that integrates reading instruction in the content areas, addressing diverse learners. Involves understanding relationship among assessment, evaluation, and curriculum; learning what and how to teach based on student assessments; developing and providing scaffolded instruction that addresses reading comprehension and critical thinking; and integrating reading, writing, speaking, listening, and thinking into content curriculum. Also addresses how to help students comprehend non-printed text.

Senior Inquiry Seminar  
MONTGOMERY, NICHOLL D  
Spring 2021  
This capstone inquiry seminar requires teacher candidates to continue to develop an inquiry stance in their practice through the systematic analysis of teaching and learning in their classroom experiences. Grounded in a theory of teacher education for social justice that encourages practitioners to challenge educational inequities by inquiring into practice, this course advances teacher candidates’ skills in planning, delivering, assessing, and analyzing instruction that promotes pupil learning and enhances their life-chances.

Inclusive Education Field Observation  
SCANLON, DAVID  
Spring 2021  
Open to undergraduate majors in the Morrissey College of Arts and Sciences, the inclusive Education Minor is offered in the LSOE. The minor is designed to (1) introduce Morrissey College of Arts and Sciences students to the world of disabilities and special education with an emphasis on special education practice, and (2) enhance the ability of future professionals to meet the needs of increasingly diverse school populations. Classes address the nature and implications of disabilities and effective practices in special education. The minor consists of six-courses and a zero-credit field observation. Appropriate for those considering a career or further studies in education.

Art and Music in Early Childhood Education
PAEZ, MARIELA M
Spring 2021
The main purpose of this course is to encourage early childhood educators to embrace the unique characteristics of young children's artistic and musical expression and appreciation of these experiences. By providing a foundational knowledge of young children's creative thinking and aesthetic development, the course will teach you how to apply effective pedagogical strategies in teaching art and music and how to integrate art and music across the early childhood curriculum. Students will learn how to bridge theory and practice through various readings, recorded lectures, and classroom examples. At the end of this course, you will be able to plan effective process-focused art and music lessons, use various materials and medium for artistic and musical expression, maximize the potential of your classroom resources, and use art and music to promote multiculturalism, diversity, and enhance family involvement.

EDUC610201
Science Playing and Learning in the Early Childhood Classroom PAEZ, MARIELA M
Spring 2021
This course is designed to encourage and prepare early childhood educators for planning and implementing engaging and developmentally appropriate science learning experiences (Pre-K-2nd grade). An overarching focus of the course is instilling in students an appreciation for the wonder of science and the world around them. The course is divided into three science content areas: Earth and Space Sciences, Life Sciences, and Physical Sciences. Students will learn how to connect their teaching with new science, technology, and engineering standards. Through interactive activities and discussions including the review of video, science lessons, and research in science education, we will explore key elements and challenges of science teaching and provide a foundation for supporting science learning in the early childhood classroom.

EDUC630701
Teachers and Educational Reform MCQUILLAN, PATRICK J
Spring 2021
Issues of school reform are constantly in the media—high-stakes testing, charter schools, the Common Core. At the heart of these reforms are teachers and the work they do with students in their classrooms. In this course, students look in-depth at the nature of teaching and learning in schools and classrooms. In particular, the course attends to issues and practices linked to current efforts at educational reform, approaching these matters through active inquiry and experiential enactment of such practices. Focused reflection also is a central component of this class.

EDUC631601 Developmentally Appropriate Curriculum in Early Childhood Education CRISTELLO, KAREN M

**Spring 2021**

This course focuses on the development and implementation of curriculum in early education. The Massachusetts Guidelines for Preschool Learning Experiences and the national standards for developmentally appropriate practices will be utilized throughout the semester. This course will highlight each of the curriculum domains (language/literacy, mathematics, science and technology, social studies, health, and the arts) while demonstrating how to build an integrated curriculum in an early childhood classroom. The importance and value of play in the early years will be emphasized, and strategies will be shared to help teacher candidates document student learning.

EDUC637301 Classroom Management CASS, RICHARD J

**Spring 2021**

Focuses on observation and description of learning behaviors, with emphasis on examining the relationship of teacher behavior and student motivation. Prepares teachers to analyze behavior in the context of a regular classroom setting that serves moderate special needs students and to select, organize, plan, and promote developmentally appropriate behavior management strategies that support positive learning. Also considers theoretical models of discipline and classroom management strategies, and requires students to propose and develop a rationale for selection of specific techniques for specific classroom behaviors.

Ed Implications/Sensory, Motor, and Health Impairments MILLER, THOMAS
Spring 2021
This course addresses the impact of physical disabilities on learning. Emphasis is placed on the educational needs of children with cerebral palsy, visual impairment, or hearing loss in combination with intellectual disability. Basic anatomy of the eye and ear are covered along with the common causes of vision and hearing loss. This course prepares teachers to perform functional vision and hearing evaluations and to translate those findings into appropriate classroom accommodations and adaptations. Many children with disabilities have unmet sensory integration needs that influence their behavior and subsequent readiness to learn.

EDUC658801
Teaching and Learning Strategies for Moderate Special Needs DEPT
Spring 2021
This course is intended to help prospective and experienced special education teachers and other educators a repertoire of skills for teaching students with mild/moderate (high incidence) educational disabilities. Participants will accomplish this goal by making connections among their knowledge of disabilities, special education policy and practices, assessments, education theory, and teaching methods. Students will learn how to develop, implement, and monitor individualized education programs, implement research-based effective intervention practices, and collaborate with others to meet the needs of special education students in inclusive and other educational settings. Successful students will have familiarity and competency with a variety of special education procedures and teaching approaches and specific practices. Appropriate for both elementary and secondary level education. Class sessions will routinely include time to practice skills being learned.

Teaching and Learning Strategies for Inclusive Secondary Educators SCANLON, DAVID
Spring 2021
Designed primarily for elementary and secondary education teacher candidates and practicing educators, this course helps them develop an initial repertoire of skills for teaching students with educational disabilities. The primary emphasis of this course is on the education of students with mild/moderate disabilities in inclusive classrooms. Participants will learn to develop comprehensive instructional plans fully inclusive of students with educational disabilities, utilize an IEP to guide instruction, develop accommodations and modifications appropriate to students and the curriculum, design individual, small, and large group instructions, and evaluate various service delivery options for educating students with special needs.

EDUC713201
Discernment and Prayer in the Spiritual Exercises of St. Ignatius GEGE
BARTON T
Spring 2021
A study of the spiritual doctrine of St. Ignatius Loyola as articulated in the text of the Spiritual Exercises, but with reference to other texts such as Ignatius' Testament, letters, and the Constitutions of the Society of Jesus. The focus is how Ignatius' treatment of prayer, discernment of spirits, and discernment of God's will, work together to form a "contemplative in action."

EDUC715801
Jesuit Pedagogy
CASALINI, CRISTIANO
Spring 2021
This three-credit, graduate-level online course examines the distinctiveness of the Jesuits’ approaches to teaching and of their philosophy of education that have propelled their schools to unprecedented success over the centuries. One key to the unprecedented success of Jesuit education has been the tension between the recognizable mark of uniformity that long distinguished the methods, contents, and practices of Jesuit schools and their ability to adapt to different contexts and times. Both aspects—the uniformity and the adaptability—were explicitly supported by the "Ratio Studiorum," the Jesuits’ foundational plan of studies issued in 1599, which, despite the schools' many variations and complexities, has retained some influence over time. With the "Ratio" discarded, Jesuit schools had to clarify what made them distinctively Jesuit, reconciling their mission with the contemporary world. This three-credit, graduate-level class sketches the developments of Jesuit educational endeavors by focusing on both the permanent and changing traits of its distinctive pedagogy.

Observing Designs In Use DEPT
Spring 2021
In this course, students will learn theory and method relevant to examining learning and instruction as it occurs in educational contexts (broadly considered). Students will be supported in collecting and analyzing data related to learning and instruction that is relevant to their interests, with the goal of understanding the interactional implications of various learning designs and how designs might be refined.

EDUC723101
Accessible and Inclusive Design DEPT
Spring 2021
This survey course focuses on practical considerations regarding inclusive and accessible design. The focus is around guiding principles and key content that learners and designers can apply to their particular area of design. Particular focus is paid to understanding the functional barriers that individuals with disabilities might encounter, how these barriers can be addressed proactively, and why retrofitting designs can be costly and ineffective. After a general introduction to some of the guiding ideas behind inclusion and accessibility, both Universal Design for Learning (UDL) and accessibility are discussed to provide practical paths towards design that is ultimately more effective for all learners.

Teaching, Curriculum, and Learning Environments: Global Perspectives
SHIRLEY, DENNIS L
Spring 2021
What kinds of education are most needed for a world characterized by spiraling political polarization, increasing economic interdependence, rapid climate change, and a global pandemic like COVID-19? This online course will introduce students to contemporary debates about how educators should teach, what students should learn, and how schools should interact with society. The course is global in scope and will require in-depth study of country cases and failed and successful models of change. International students and U.S. students curious about other countries' approaches to education are strongly encouraged to enroll.

EDUC730201
Models and Theories of Instructional Design JACKSON, RICHARD
Spring 2021
Now well into the twenty-first century, schools struggle with the challenge of offering a high quality education for all learners regardless of race, family status, national origin, language, or ability. Increasingly, curriculum is accessed digitally and student work is generated and exhibited using technology tools. The once familiar artifacts of classrooms are rapidly giving way to radically new forms of teaching and learning. Within this context of change, this course reviews the evolution of theories of learning and instruction and then critically examines a range of contemporary models and theoretical frameworks. Learning activities in the course will allow participants to develop their own personalized framework for planning and implementing instruction.

EDUC730301
Curriculum Theories, Practice, and Design PETERS, WILLIAM D
Spring 2021
The overarching objective for Curriculum Theories and Practice is to help course participants develop and clarify their philosophy of education, in particular, their beliefs regarding the purposes and processes of effective and equitable curricular organization. To do so, the class explores ways of conceptualizing a school curriculum, drawing on insights from major curriculum designers, both past and present, U.S. and international. So students appreciate the ever-evolving nature of effective teaching practices and related school curricula, they will assess their own experiences with educational and institutional change processes writ large. Aiming to help course participants to thrive in the current, volatile educational and political climate, students will consider various approaches to multicultural education, anti-racist education, and inclusion practices that aim to transform the curriculum, attending to the needs of all students and overtly promoting equitable outcomes. In doing so, students will enact alternative strategies for assessment that provide multiple and authentic measures of student learning. Ultimately the course intends to help students consider how school curricula can be structured to promote social justice.

This course addresses political economic issues related to migration and education. Drawing on the anthropology of globalization and sociology of immigration, the course reviews major theories of immigrant incorporation and exclusion processes in schools, examines case studies of im/migrants, refugees, and displaced persons and their adaptation processes in countries in the Global North and the Global South, and considers educational practices and policies that develop to address mobility in diverse contexts. The course asks how cultural, social, political, and economic factors influence im/migrant incorporation, and how educators can facilitate im/migrant students’ opportunities for learning through changes in policies, pedagogies, and curricula.

This course provides an overview of language learning and the situation of second language learners in schools. First, we review processes of language learning and the challenges language learners face when they must simultaneously learn a language and learn subject matter in that language. We do this from a socialcultural perspective, exploring language learning as embedded in sociohistorically situated activities. We develop and account of how learning language is also learning culture. Second, we study how these processes vary across cultural contexts. Because language learning is woven into social and historical contexts, processes of language learning and schooling vary around the world. The course develops several case studies from different areas of the globe in order to illustrate how language learning and schooling can intersect in different ways.

EDUC743101
Graduate Inquiry Seminar: One CUDA, JOSEPHINE
Spring 2021
The course will coincide with the pre-practicum experience. It is designed to introduce teacher candidates to inquiry as stance and the skills necessary to conduct classroom-based research that leads to pupil achievement and teaching for social justice. The course is designed to help teacher candidates mediate the relationships of theory and practice, pose questions for inquiry, learn through reflection and discussion, learn from their students and colleagues, construct critical perspectives about teaching, learning, and schooling, and to improve teaching and learning. The second part of this sequence is 432 which is taken in conjunction with full-time student teaching (EDUC7420). In the fall of 2020 this course will be fully online. Part is asynchrony and part synchronous. The synchronous part will be scheduled for 8:00-9:30 pm on the scheduled day of the course. Since this is a 1-credit course, there will be 5 synchronous sessions. The dates of the five synchronous sessions have not been set, but these sessions will occur over the course of the semester (i.e., not five weeks in a row)

Graduate Inquiry Seminar: Two SARIDIS, ELENI
Spring 2021
The primary goal of this capstone seminar is to initiate teacher candidates into the practice of teacher research or collaborative inquiry for action. Collaborative Inquiry for Action is an ongoing, collaborative process of systematic and self-critical inquiry by educators about their own schools and classrooms in order to increase teachers’ knowledge, improve students’ learning, and contribute to social justice. This final project will be presented at a roundtable presentation at the end of the semester and also satisfies the M.Ed., MAT, MST Comprehensive Examination in Education.

Instruction of Students with Special Needs and Diverse Learners CUDA, JOSEPHINE
Spring 2021
This course focuses on the education of students with disabilities and other learners from culturally and linguistically diverse backgrounds. The goal of the course is to promote access to the general curriculum for all students through participation in standards-based reform. Universal Design for Learning (UDL) provides the theoretical framework for this course. Through an examination of historical milestones, landmark legislation, systems for classification, approaches to intervention, and the daily experiences of diverse learners, students acquire knowledge about diversity and the resources, services, and supports available for creating a more just society through education.

EDUC746101
Human Rights Interdisciplinary Seminar LYKES, M BRINTON
Spring 2021
The study of human rights defies disciplinary boundaries. This seminar, sponsored by the Center for Human Rights and International Justice, provides a rare space to examine human rights from an interdisciplinary perspective. It brings together faculty affiliated with the Center, students from across the university, visiting scholars, and guest speakers to examine issues of human rights and international justice. The spring 2021 seminar will begin with an overview and brief historical review of human rights as understood in the West and then explore a series of complexities for those seeking to engage in human rights scholarship, advocacy, and activism.
We seek to engage critically with human rights discourse and actions as they intersect with gender, culture/ethnicity, "race," social class, and other categorizations as well as with emergent challenges from Indigenous people of the global South beyond Northern epistemologies, understandings, and praxis.

EDUC754703
Teaching Narrative Writing to K-8 Students HODGSON-DRYSDALE, TRACY L
Spring 2021
This is a project-based course where groups of participants will collaborate to develop a writing unit in a genre appropriate for their grade level. Using a genre-based pedagogy informed by systemic functional linguistics, participants will learn what and how to teach non-fiction narratives (Personal and procedural recounts, autobiographies, biographies, empathetic autobiographies, and historical recounts) and fictional narratives. Features of the genres demanded in elementary and middle schools will be learned and practiced. The strong emphasis on language development distinguishes this approach from others currently used in schools. The approach to teaching guides teachers in ways of apprenticing students to writing that builds confidence and success.

EDUC754801
Teaching Report and Explanation Writing to K-8 Students BRISK, MARIA E
Spring 2021
This is a project-based course where groups of participants will collaborate to develop a writing unit in a genre appropriate for their grade level. Using a genre-based pedagogy informed by systemic functional linguistics, participants will learn what and how to teach reports and explanations in the context of social studies and/or science. Features of the genres demanded in elementary and middle schools will be learned and practiced. The strong emphasis on language development distinguishes this approach from others currently used in schools. The approach to teaching guides teachers in ways of apprenticing students to writing that builds confidence and success.

Developmental Disabilities: Evaluation, Assessment, Family, and Systems
HELM, DAVID T
Spring 2021
This course focuses on issues facing professionals who work with people with developmental disabilities, their families, and the system whereby services are...
offered. It is designed for graduate and post-graduate students interested in learning about interdisciplinary evaluation and teams, in understanding disabilities from the person's and family's perspective, and in acquiring knowledge about the services available in the community. This course will be held at Children's Hospital.

Historical and Political Contexts of Curriculum OLIVEIRA, GABRIELLE; HIGGINS, CHRISTOPHER R
Spring 2021
Introduces Ph.D. students in Curriculum and Instruction to the major curriculum movements in American educational history by examining the history and implementation of curriculum development on the macro and micro levels of schooling. Focuses on key campaigns and controversies in curriculum theory and practice, using primary source materials to place them within the academic, political, economic, and social contexts that have marked their conceptualization, and change inside and outside of schools.

Controversies in Curriculum and Instruction COCHRAN-SMITH, MARILYN
Spring 2021
Explores contemporary curriculum controversies in American education as well as the ways these are shaped by differing conceptions of teaching, learning, and the purposes of schooling and by the larger social, historical, political, and cultural contexts in which schooling occurs. The course assumes a broad and encompassing definition of curriculum and the aspects of instruction, assessment, and teacher preparation that have major implications for curriculum. Although the focus of the course is on curricular controversies in K-12 education, controversies related to the curriculum of early childhood education, adult learning, and higher education are also relevant.

Morrissey College of Arts and Sciences

African and African Diaspora Studies Courses:
Summer 2020
AADS447101
Paris Noir: From La Negritude to Le Hip-Hop JEAN-CHARLES, REGINE M
Summer 2020
Afropeen... Negropolitain... France-antilles... Senegaulois... Franco-africain... Black Frenchmen... The numerous ways of referring to people of African descent in France
reflects the complexity of how racial identity is approached, considered and imagined. Indeed, since the Negritude movement of the 1930s people from Africa and the diaspora have been making their mark in Paris. This course explores the idea of Black Paris in various forms of cultural expression including poetry, literature, film, drama, autobiography and music. We will examine how race, national identity, and immigration are important issues addressed by not only writers and filmmakers, but also by hip hop artists, comedians and soccer players.

From #BlackLivesMatter to #MeToo: Violence and Representation in the African Diaspora JEAN-CHARLES, REGINE M; MCGUFFEY, CLIFTON S
Fall 2020
This course explores pressing problems of modern race and gender-based sexual violence in the U.S. and throughout the African Diaspora. Utilizing interdisciplinary perspectives in both the humanities and social sciences, we will examine the role of sexual violence, the ways in which it has been expressed, the meanings attached to it, and its implications for society from an intersectional perspective. Students will: (1) examine the wide-ranging ramifications of racism on rape culture; (2) formulate solutions for intervening in and eradicating rape culture; and (3) summon their imaginations to envision a world without sexual violence.

Introduction to African Diaspora Studies SUMMERS, MARTIN A
Fall 2020
A survey of the African continent and the Diaspora that would include geography, history, politics, economics and literature. The purpose of the course is to introduce students to specific historical, cultural, social and political topics related to Africa and the African Diaspora. Because the scope of the course is so vast, we will explore important issues and themes to give students a desire to pursue more specific courses in African and African Diaspora Studies. Boston College faculty members will be invited to lecture in their area of expertise specific to Africa and the Diaspora throughout the semester.

AADS111401
When Gods Begin Again: Intro to African and African Diaspora Religions MCELWaine, Michelle L
Fall 2020
This introductory course examines Indigenous African and African Diaspora religions from an interdisciplinary perspective. We explore Yoruba and other African religions, along with African Christianity, Islam, Haitian Vodou, Cuban Santeria, Brazilian Candomble, Sango Baptist of Trinidad and Tobago, Rastafari and Obeah of Jamaica, Black American conjure, and Oyo town Village. Important themes of religions in Africa and the Afro-Atlantic Diaspora are addressed, such as: the veneration of God(s), Spirit(s), Ancestors, and the natural world; divination, initiation, sacred space, and healing; the impact of slavery on conversion and continuity; fetish as a colonial construct; globalization, race, gender, and power. Ultimately, this course encourages students to reevaluate their understanding of Africana religions, recognize diverse cultural practices and ritual knowledge systems, and engage with oral, written and audiovisual texts that underscore the values of these traditions.

Spirits, Race, and Culture VATS, ANJALI S
Fall 2020
In the early 2000s, the resurgence of Prohibition Era cocktail culture led to renewed interest in hard liquor. As speakeasy style cocktail bars popped up all over the country, the demand for spirits rose. This course examines the racial implications of America's drinking cultures, specifically the complex relationships between race, colonialism, capitalism, and liquor consumption. Using examples such as the construction of cocktail bars, the production of rum, the development of tiki culture, and the disenfranchisement of sugar cane farmers, we will think about the identity implications of drinking.

Community Service Research Seminar HAIDER, MAHEEN
Fall 2020
CRP is a two-semester program that offers leadership, research, and public policy training for students interested in working with communities of color in Massachusetts. In the fall, students will participate in a seminar to study the process of community-based research and its methodologies and begin to design a research proposal for an independent study with a faculty advisor for the spring semester research project. The seminar will also include a lecture series, in which academic researchers and community professionals will discuss their current work and experiences on issues related to four research-interest communities.

The Walking Dead ADKINS, AMEY
Fall 2020
What happens when we die? Historically, the conditions of death in America have never been equal or just for all, but do visions of an afterlife resolve the inequities of lived experience? With Orlando Patterson's pronouncement of the black slave and social death in mind, this course examines the way a theological vision of "the damned" informs everything from racialized injustice and incarceration, to sovereignty and Zombie anxiety in the American conscience. Bringing together philosophy, theology, and critical race theory, we will consider how constructions of death, memory, eternity, and the Other speak to the ethics of a life "well-lived."

Foodways and Folkways in African American History MILLER, KAREN  
Fall 2020

Food provides a lens through which to explore and compare the impact of this dispersal on a people as they moved, adapted long-held practices to new places, new times, and new concerns. This course focuses on several themes such as evolving food customs and traditions, how those traditions reflect the common bonds as well as the limitations of diaspora, the politics, economics, and health implications of food availability and scarcity, and the presence of food as a dynamic element in cultural production and representation in art, literature, film, and history. Students will examine and share their own familial food traditions and histories.

Blackness, Performance, and Freedom CURSEEN, ALLISON S  
Fall 2020

From Henry Box Brown's cargo dramatics to Ellen Craft's incredible performance as a feeble white male traveling with his black servant to Brer Rabbit's feigned fear of the briar patch, artifice, and performance repeatedly serve as the necessary means, if not the conditions of possibility, for fugitive departure and black life. This course asks how masks, masquerades, con- acts, and acting enable resistance and escape. We will explore how the radical work of historical black performances continue in contemporary black performances like Danny Glover's Childish Gambino; Beyonce's Sasha Fierce; Ru Paul's Drag Race; and the increasingly popular interest in black speculative and Afro futurism (i.e., Random Acts of Flyness and Get Out).

AADS111401
When Gods Begin Again: Intro to African and African Diaspora Religions
MCELWAINE, MICHELLE L
Spring 2021
This introductory course examines Indigenous African and African Diaspora religions from an interdisciplinary perspective. We explore Yoruba and other African religions, along with African Christianity, Islam, Haitian Vodou, Cuban Santeria, Brazilian Candomble, Sango Baptist of Trinidad and Tobago, Rastafari and Obeah of Jamaica, Black American conjure, and Oyotunji Village. Important themes of religions in Africa and the Afro-Atlantic Diaspora are addressed, such as: the veneration of God(s), Spirit(s), Ancestors, and the natural world; divination, initiation, sacred space, and healing; the impact of slavery on conversion and continuity; fetish as a colonial construct; globalization, race, gender, and power. Ultimately, this course encourages students to reevaluate their understanding of Africans religions, recognize diverse cultural practices and ritual knowledge systems, and engage with oral, written and audio/visual texts that underscore the values of these traditions.

We Wear the Mask DANIELS, KYRAH M
Spring 2021

In acts of mourning and in times of celebration, in solemn rites of passage and in elaborate performance, we decorate our faces and adorn our bodies. This course introduces students to the diversity of African and African Diaspora ritual arts traditions. We take a comparative approach to study traditions of masquerade in initiation ceremonies, street festivals, carnivals, and funerary rites of the Black Atlantic. Employing a material culture approach, we explore particularly "festive" sites such as the sacred city of Ile-Ife, Nigeria, which hosts festivals nearly 360 days of the year, a Caribbean carnival-capital in Jacmel, Haiti, and New Orleans traditions of Mardi Gras Indians and jazz funerals. Students will gain concrete skills in visual art analysis, research, and writing, becoming versed in the fields of art history, religion, anthropology, and museum studies. By the end of this course, students will gain familiarity with various definitions of parade, masquerade, funeral, and carnival, and analyze the role of masks and art implements in private ritual ceremony as well as public festival. In this way, students will develop a deeper understanding of the intricate relationship between sacred arts and religious ceremony.

Intro to African Arts and Visual Culture DANIELS, KYRAH M
Spring 2021

This course introduces students to the diversity of the African continent's art, architecture, and visual culture, spanning from ancient history to contemporary eras. Complementary themes such as the arts of nature and royalty, divination and masquerade, architecture and the body, and initiation and funerary rites will serve as guiding frameworks. Examining various artistic mediums (e.g., metal, wood, clay, beads, textiles, and the body), students will investigate how the arts have been used to build African empires, invent polyrhythmic music, resist colonialism and slavery, and open portals to the divine world. Ultimately, this class will encourage students to redefine their definitions of "art" and cultivate greater appreciation for Africa's vibrant aesthetics and dynamic visual cultures.

AADS552401
African Refugees and the Politics of Belonging DUALE, MOHAMED
Spring 2021
This interdisciplinary course explores contemporary refugee and forced migration issues affecting people on and from the African continent. We look at the historical causes of displacement in Africa and focus on the politics of humanitarianism and belonging at the local, regional, and global levels. We examine displacement at three key sites: borders, refugee camps, and cities, and consider the lives of the displaced at these locales as well as the legacies of war and exile. We scrutinize the durable solutions of local integration, resettlement, and return, and trace the experiences of African refugees at different geographic scales and policy contexts.

**ARTH222401**
Art and Patronage in Renaissance and Baroque Rome
GUENDELINA SARAFINELLI
Summer 2020
This course explores the discourses of diaspora by taking into account the origins, various meanings, multiple dimensions, cultural iterations, and restrictive limitations of the term. How does "the practice of diaspora" translate in different forms of cultural work such as music, film, and literature? How has diaspora shifted in the age of globalization? How can we use diaspora as an analytical tool for reading from a critical perspective? We will consider closely how diaspora is theorized, practiced, and represented in various forms of cultural production.
Therefore we will be taking an interdisciplinary approach reading across genre, medium, and disciplines.

Spanish Art History: From Al-Andalus to Picasso
PELAEZ
Summer 2020
This course offers students a visual journey through the history of Spanish art, through the study and analysis of some of the most important works and artists, from the Islamic Art in Al-Andalus during the Middle Ages to present-day works. In each of the major eras, focus will be placed on the most outstanding artistic movements, especially on the painters that have played an essential role in bringing universal recognition to Spanish art. The course will be divided into two components—a theoretical and a practical part. The latter will be taught in the form of lectures offered at the classroom, and the former will consist of virtual cultural study activities, which will include virtual visits to some of the major monuments of the city of Toledo (Gothic Cathedral, Mosque of Bab-al Mardum, and the Toledo Synagogue) and Malaga (Picasso and Pompidou Museums); study of specific works of art at the National Archeological, Prado, Reina Sofia, Sorolla, and the Thyssen museum.

Living on the Water: Venetian Art, Architecture, and the Environment
LEONE, STEPHANIE
Fall 2020
Why do humans build cities on the water? How does the environment affect the creation and development of cities? How do humans shape cities in intentional and inadvertent ways? The long and illustrious history of Venice provides a case study for probing these enduring questions. Students use methods of art and architectural history to examine how Venetians constructed the city in space and over time, how its coastal position influenced art and architecture, how Venetians expressed individual and collective identity through the built and natural environment, and what issues threaten the city today.

East Asian Art and Architecture
CAMPBELL, AURELIA
Fall 2020
This course surveys the visual and material culture of China, Korea, and Japan from Neolithic to present times. We will address a wide range of topics, including ancient tombs, Buddhist icons, landscape paintings, imperial palaces, tea culture, and contemporary art. Particular attention will be paid not only to the physical forms of these objects and buildings, but also to their makers, users, and audiences, as well
their historical, religious, and social functions. Students will be introduced to various art historical methodologies and will deepen their knowledge about one aspect of East Asian art and architectural history through a substantial research project.

**Mysteries and Visions: Early Medieval Art**
**BERGER, PAMELA**
**Fall 2020**

This course will illuminate the art of the so-called Dark Ages, from about 200 A.D. to around the year 1000 A.D. We will begin with the art of the waning classical world where, in addition to the burgeoning imagery of early Christianity, one finds the magico-religious art of the mystery cults of Cybele, Mithras, and Isis. We will look at the art of Byzantium, as well as that of Celtic-Early Christian Ireland, and go on to a study of the Carolingian renaissance. The last part of the course will be devoted to the apocalyptic medieval art of tenth century Spain.

**ARTH334201**
**Age of Rembrandt**
**CRAIG, KENNETH M**
**Fall 2020**

In this introductory course we will unpack some of the crucial episodes in art of the first half of the twentieth century, including Italian Futurism and manifesto writing, Dada and the invention of the readymade, the "marvellous" in Surrealist painting and photography, De Stijl and the pursuit of abstraction, the Harlem Renaissance and cross-disciplinarity, and revolutionary Mexican Murals. We will explore how these avant-gardes sought to break down the barrier between the making of art and the making of life itself, inventing ways of sliding art into the everyday lives of people on the street, at home, and in the factory. Why, these artists ask again and again, must art be slided in privileged gallery spaces that uphold repressive models of gender, class, and race? What new utopian futures are opened up when these spaces are negated or left behind?

In the seventeenth century the prosperous Dutch middle class became passionate art collectors. Wealthy merchants and tradesmen, and even butchers and bakers, bought art of the highest quality and displayed it proudly in their homes and shops. The artists living in the Netherlands responded by producing wonderful genre pictures, landscapes, still lifes and portraits as well as religious and mythological pictures for this, the first free market in the history of art. Among the artists we will study are Rembrandt, Jan Vermeer, Frans Hals.

ARTH431501
Gender and the Material World in China CAMPBELL, AURELIA
Fall 2020
This research seminar investigates the ways in which traditional gender roles were defined, shaped, represented, and challenged in Chinese art and architecture from about 1500 to the present. We will begin by examining male and female spaces, both actual and imagined, during the Ming and Qing dynasties. We will then turn our attention to how gender was performed with regard to work and labor, faith and piety, and love and sexuality during this time. Finally, we will explore how gender took on new meaning in the visual and material culture of the early twentieth century, the Maoist era, and now within contemporary art. Students will be introduced to critical scholarship in the field and will deepen their knowledge on one aspect of gender and art through an in-depth research project.

Artists Design Exhibitions: Installation Art and Exhibit Making in Modern and Contemporary Art  
LOTTERY, KEVIN  
Fall 2020  
Our goal in this course will be to explore the history of exhibition design and installation in modern and contemporary art. We will investigate what happens when artists forego the production of discrete art objects in order to investigate the conditions of display, curation, or participation. A major problem will be formulating ways of analyzing works that make the experience of the viewer—in a sometimes bewildering, disorienting environment—the subject of art making. What sensory experiences are opened up once the privileged sense of sight is negated and we must feel our way through space by means of touch, hearing, or smell? And most importantly: Why and to what ends have artists, such as Marcel Duchamp, Louise Bourgeois, Yayoi Kusama, and David Hammons found it necessary to decenter, disjoint, or ground spectators, making the experience of the art uncomfortable, agitating, or unsettling?

Photography's Hidden Histories  
ANDERSON, ASHER  
Fall 2020  
This seminar will examine photography beyond the Western canon. We will learn about histories that don't fit into typical surveys of the field, like the story of Hercules Florence, the little-known inventor of photography in Brasil; Miroslav Tichy, the recluse disident Czech artist who built his own cameras from scratch; and Zaida Ben-Yusuf, the fashionable genre-shifting former milliner in nineteenth-century New York. We will also consider attempts by American museums to collect and exhibit vernacular material coherently and, among others, movements based in China, West Africa, and South Asia. Through these topics, we will study the process by which canons are formed and read the work of scholars who have sought to revise the standard historical narrative for photography, including those who actively expand the canon and those who dismantle movement canons.

Arts and Myth in Ancient Greece  
HOFFMAN, GAIL L  
Spring 2021  
This course will examine the presence of non-human animals in the history of art, starting with the early modern period in Western Europe and continuing into the present. We consider a series of cases, each of which represents a different "use" of animals by human artists. Yet, as strong visual presence with their own weight and substance, these fully-realized animal figures can draw us into new perspectives, as we ask: what are these animals experiencing? how do they see us? what do they want, call for, and demand? Our goal is to interpret these presents as an opening, from which we can articulate a counter discourse to modern Western philosophical narratives of human separation from, and superiority to, the other animals who inhabit the earth with us.

Art and Myth in Ancient Greece  
HOFFMAN, GAIL L  
Spring 2021  
An introduction to the visual representation of the Greek gods and goddesses and to the artistic depiction of the primary cycles of Greek legends (e.g., the Trojan War and heroes such as Herakles, Perseus, and Theseus). This course focuses on how specific visual attributes serve to identify mythological characters and how the development of narrative in Greek art helped to relate their stories. Inquiring into the use of
mythological imagery to decorate temples, cult statues, and vases used primarily for the symposium (male drinking parties), we will consider the functions of mythological imagery within Greek society.

ARTH21001
We Wear the Mask DANIELS, KYRAH M
Spring 2021
In acts of mourning and in times of celebration, in solemn rites of passage and in elaborate performance, we decorate our faces and adorn our bodies. This course introduces students to the diversity of African and African Diaspora ritual arts traditions. We take a comparative approach to study traditions of masquerade in initiation ceremonies, street festivals, carnivals, and funerary rites of the Black Atlantic. Employing a material culture approach, we explore particularly “festeive” sites such as the sacred city of Ife-Nigeria, Nigeria, which hosts festivals nearly 360 days of the year, a Caribbean carnival-capital in Jacmel, Haiti, and New Orleans traditions of Mardi Gras Indians and jazz funerals. Students will gain concrete skills in visual art analysis, research, and writing, becoming versed in the fields of art history, religion, anthropology, and museum studies. By the end of this course, students will gain familiarity with various definitions of parade, masquerade, funeral, and carnival, and analyze the role of masks and art implements in private ritual ceremony as well as public festival. In this way, students will develop a deeper understanding of the intricate relationship between sacred arts and religious ceremony.

ARTH224101
Modern and Contemporary Chinese Art, 1911 to present CAMPBELL, AURELIA
Spring 2021
After the fall of the Qing dynasty in 1911 Chinese artists were confronted with the great challenge of expressing radically new concepts of modernity, national identity, and selfhood in visual terms. By the mid-twentieth century their attention had shifted to the problem of how best to represent the ideologies of the Communist party. Today, contemporary artists and architects respond to new social issues, such as political censorship, environmental destruction, and urban displacement. By covering a wide range of topics—including advertisements of the modern Shanghai woman, Socialist realist sculpture, Mao-era propaganda posters, and the politically-charged works of Ai Weiwei—this course introduces students to this extremely dynamic period in Chinese art history.

ARTH225001
Intro to African Arts and Visual Culture DANIELS, KYRAH M
Spring 2021
This course introduces students to the diversity of the African continent’s art, architecture, and visual culture, spanning from ancient history to contemporary eras. Complementary themes such as the arts of nature and royalty, divination and masquerade, architecture and the body, and initiation and funerary rites will serve as guiding frameworks. Examining various artistic mediums (e.g., metal, wood, clay, beads, textiles, and the body), students will investigate how the arts have been used to build African empires, invent polyrhythmic music, resist colonialism and slavery, and open portals to the divine world. Ultimately, this class will encourage students to redefine their definitions of “art” and cultivate greater appreciation for Africa’s vibrant aesthetics and dynamic visual cultures.

Modern Architecture ORWIG, TIMOTHY T
Spring 2021
This course charts the development of modern architecture from late eighteenth-century revival styles to modernism, post-modernism, and deconstructivist architecture. We examine the work of F.L. Wright, Gropius, Mies van der Rohe, LeCorbusier, Aalto, Louis Kahn, Venturi, and Gehry, among others, and explore how their work embodies social, political, and economic issues.

ARTH226701
From Salt-Box to Skyscraper: Architecture in America Seventeenth to Twentieth Centuries ORWIG, TIMOTHY T
Spring 2021
This course will trace the development of American architecture from colonial times to the present. Particular attention will be paid to monuments in New England, with field trips to important buildings in the Boston area. In addition to studying stylistic changes, the class will consider the significance of changes in building technology and social needs for the history of architecture. This course will make extensive use of a networked archive of scanned photographs. The Digital Archive of American Architecture (http://www.bc.edu/bc_org/avp/cas/fnart/fa267/) is available on BCInfo.

ARTH300901
Artists and their Writings KEARNEY, ANNE D
Spring 2021
In this course, students will study French culture through some key artists of the turn of the nineteenth century. The course will explore the rapport between their visual work, their writings (or writings about them) and their lives. The artists studied will be Van Gogh, Gauguin, Matisse, Picasso, Rodin, Camille Claudel, Cocteau. We will look at the evolution of their work in conjunction with their biographies, reading extracts from their letters or pronouncements on art and life.

ARTH301001
Introduction to Contemporary Art
LOTERY, KEVIN
Spring 2021
This course traces art since roughly 1975, focusing primarily on Europe and the Americas in a global context. Rather than a strict survey, it looks closely at the key techniques, ideas, and debates conditioning contemporary art. We begin with postmodernist takes on the “politics of representation” in appropriation-based photographic and video works of the 1980s, situating them in larger discourses of feminist and queer theory, postcolonial thought, and critical race theory. We end with the challenges of our present and near future: ecological crisis, perpetual war, neo-fascist formations, questions of privilege, and the technologization of everyday life. What strategies have artists invented to research, articulate, and intervene in these ongoing emergencies?

ARTH311010
Artists Design Exhibitions: Installation Art and Exhibition Making in Modern and Contemporary Art
LOTERY, KEVIN
Spring 2021
Our goal in this course will be to explore the history of exhibition design and installation in modern and contemporary art. We will investigate what happens when artists forge the production of discrete art objects in order to investigate the conditions of display, curation, or participation. A major problem will be formulating ways of analyzing works that make the experience of the viewer--immersed in sometimes bewildering, disorienting environments--the subject of art making. What sensory experiences are opened up once the privileged sense of sight is negated and we must feel our way through space by means of touch, hearing, or smell? And most importantly: Why and to what ends have artists, such as Marcel Duchamp, Louise Bourgeois, Yayoi Kusama, and David Hammons found it necessary to deperson, disorient, or unground spectators, making the experience of art uncomfortable, agitating, or unsettling?

ARTH335601
Postwar: Art After 1945
LOTERY, KEVIN
Spring 2021
This course examines developments in the art of Europe and the Americas from 1945 to roughly 1975. We will focus on the major paradigms of this period: Abstract Expressionism, Neo-Dada and New Realism, Neo-concretism, Happenings, Pop, Minimalism and Post-minimalism, Arte Povera, Fluxus, Conceptual Art, Feminist strategies, and Institutional Critique. Key questions include the following: How did artists of the postwar period participate in strategies of mourning and working through? How were notions of artistic skill--and of the artist’s social function--reimagined in the postwar period? How did artists intervene in the construction of identity, whether along the lines of race, class, gender, or sexuality? And finally, what new roles did artists imagine for the spectator during this period?

ARTH336201
Photography and Modernism
ANDERSON, ASHER
Spring 2021
After decades of constant change in photography’s use and technology, at the turn of the twentieth century photographers began exploring the defining conditions of their quintessentially modern medium. Photography came into its own in the years that followed, as it became a primary medium of mass-communication and solidified its place among the fine arts. This course will trace the intertwined iterations of modernism in photography, focusing on European and American art movements. We will look at photographers including Alexander Rodchenko, Laszlo Moholy-Nagy, Alfred Stieglitz, Imogen Cunningham, Edward Weston, and Ansel Adams, and read both theoretical texts and artists’ own writing about photography.
Credits: 03

ARTH336801
Contemporary Photography
ANDERSON, ASHER
Spring 2021
The course will trace the development of photography from the 1960s--when its status in the art world was fundamentally changed by the rise of conceptualism--to the present. The course will address themes including the relationship between photography and performance art, the culture wars, identity politics, environmental concerns, globalization, digital media, and how photography has been shaped by the art market. Although the course will focus on fine art photography, we will also consider commercial and journalistic work.

ARTH399901
Politics of Modern Middle Eastern Art
ALQASIMI, SULTAN S
Spring 2021
In this course, we shall survey the political underpinnings of Arab art in the twentieth century, and the socio-political conditions that shaped cultural production in the region. Whether it is under the Ba'athist regimes of Syria and Iraq or under Egypt's Pan-Arabism championed by Gamal Abdel Nasser, painting and sculpture in addition to film and performance have been employed by various governments as a tool of soft power to propagate their policies to the public not only in their respective countries but throughout the region and beyond. Despite this widespread government patronage of the arts, many artists have chosen to challenge their authorities through subversive movements and practices, which we will address at different moments in the semester. This course, through its focus on creative practices and strategic use of the arts, will attempt to shed light on an often neglected dimension of the modern history of the Arab World and other parts of the Middle East.

ARTH423301
Renaissance Women
ROSS, SARAH; LEONE, STEPHANIE
Spring 2021
This course examines the myriad forms of excellence women achieved during the Renaissance (1400-1600). Even as Renaissance women labored as wives, mothers, nuns, and servants, they also created notable works of literature and art; patronized major projects; held jobs in the urban trades; shaped religious belief and practice; and even governed states. We will examine the work that Renaissance women did beyond "women's work," and analyze the conditions that shaped their professional no less than their personal lives. Our evidence encompasses both textual and material artifacts, including extraordinary objects housed at the MFA and other local repositories.

ARTH440201
Art and Architecture of the Forbidden City
CAMPBELL, AURELIA
Spring 2021
The Forbidden City palace in Beijing constituted the center of Chinese imperial power from the year 1420, when it was constructed, until the early twentieth century. Now
home to the Palace Museum, the Forbidden City attracts millions of tourists annually. In addition to examining the Forbidden City's magnificent halls, temples, gardens, and art objects, produced exclusively for the members of the Ming and Qing imperial courts, students in this course will discuss the shifting roles of the Forbidden City—as a monument, a symbolic form, a social space, a political entity, and a center of cultural production—over a period of approximately six centuries, including the Mao and post-Mao eras.

ARTH444401
Contested Monuments from the French Revolution to the Present WUNSCH, OLIVER M
Spring 2021
Is it possible to separate the political message of a monument from its artistic or historic value? What should be done with statues that glorify racism and injustice? Recent debates over Confederate monuments across the United States have made these questions impossible to ignore. This seminar approaches these debates from a historical perspective, examining case studies from the late eighteenth century to the present. The course begins with the French Revolution, when the term "vandalism" acquired its modern meaning, and when new notions of "cultural heritage" were developed in response. We then move on to the American Civil War, examining how its memorialization in sculpture varied across time and place. Subsequent case studies will include settler monuments in the American West, fascist monuments in Europe, and apartheid monuments in South Africa. For final projects, each student will write a position paper on a monument of their choice, using historical and visual evidence to justify a plan for the monument's future.

**Biology Courses: Summer 2020**

**BIO130001 Anatomy and Physiology 1 NELSON, LISA M**

**Summer 2020**

This course lays the foundation for the understanding of human anatomy and physiology. The first portion of the course covers cellular and molecular aspects of eukaryotic cell function: basic chemistry, macromolecules, cell structure, membrane transport, metabolism, gene expression, cell cycle control, and genetics. The course continues with the study of several organ systems. Beginning with the Integument, which is followed by the Skeletal and Muscular Systems, and ending this first semester with the Nervous System. The cellular and molecular basis for the functions of these systems is an integral element of this portion of the course.

BIOL230001  
Biostatistics  
DACOSTA, JEFFREY M

Summer 2020

This course will introduce biology students to the basic statistical techniques that are used in conducting biological and medical research. The course is divided into four parts: (1) descriptive statistics (averages, variability); (2) probability and probability distributions (basic probability theory and the binomial, poison, and normal distributions); (3) statistical inference (parametric and non-parametric tests); and (4) relationships between variables (simple and multiple regression). Students will become familiar with a standard statistical analysis software package and will critique actual research papers.

BIOI200001
Molecules and Cells
TAGHIAN, DANIELLE; CHILES, THOMAS
Fall 2020
Foundational course required for Biology majors that introduces students to living systems at the molecular and cellular level of organization. Topics introduced in this course include basic cellular biochemistry, gene regulation, cellular organization and metabolism, and cell signaling and genetics.
Credits: 03
Room and Schedule: M W F 10;ONLINE;SYNCHRONOUS;
Satisfies Core Requirement: Natural Science
Prerequisites: CHEM1109. May be taken concurrently or equivalent or permission of the department.
Corequisites: None Cross-listed with: None Frequency: Annually Student Level: CORE Comments: None Status: OPEN

BIO201002
Ecology and Evolution OLINS, HEATHER C
Fall 2020
Foundational course required for Biology majors with a focus on the ecology and resilience of living systems across all levels of spatial scales. Topics introduced in this course include evolution, population dynamics, behavioral ecology, ecosystems, co-evolution, and human ecology.
Credits: 03
Room and Schedule: ONLINE/ASYNCHRONOUS; Satisfies Core Requirement: Natural Science
Prerequisites: None
Corequisites: None Cross-listed with: None Frequency: Annually Student Level: CORE Comments: None Status: OPEN

BIO204001
Investigations in Molecular Cell Biology Lab WARNER, DOUGLAS M; JENSEN, KARI
Fall 2020
A 3-credit laboratory course designed to introduce students to the core techniques and experimental strategies of modern molecular cell biology within the context of an original research investigation. Students will learn to construct testable hypotheses, design experiments, and critically analyze experimental results. During the course of their investigations, students will gain proficiency in microbial cell culture, molecular cloning, genetic analysis, and molecular characterization. Students will also gain proficiency in scientific communication and the use of biological databases.
Credits: 03
Room and Schedule: HIGGINS HALL 370,M W 12-2 50;HYBRID;
Satisfies Core Requirement: None Prerequisites: BIOL2000 AND CHEM1111. Corequisites: None
Cross-listed with: None Frequency: Annually Student Level: UNDERGRAD ELECT Comments: Lab fee required. Status: CLOSED

BIO204003
Investigations in Molecular Cell Biology Lab WARNER, DOUGLAS M; JENSEN, KARI
Fall 2020
A 3-credit laboratory course designed to introduce students to the core techniques and experimental strategies of modern molecular cell biology within the context of an original research investigation. Students will learn to construct testable hypotheses, design experiments, and critically analyze experimental results. During the course of their investigations, students will gain proficiency in microbial cell culture, molecular cloning, genetic analysis, and molecular characterization. Students will also gain proficiency in scientific communication and the use of biological databases.

BIOL220001

Biostatistics DACOSTA, JEFFREY M
Fall 2020

This course will introduce biology students to the basic statistical techniques that are used in conducting biological and medical research. The course is divided into four parts: (1) descriptive statistics (averages, variability); (2) probability and probability distributions (basic probability theory and the binomial, poison, and normal distributions); (3) statistical inference (parametric and non-parametric tests); and (4) relationships between variables (simple and multiple regression). Students will become familiar with a standard statistical analysis software package and will critique actual research papers.

BIOI314001
Experimental Methods in Organismal Biology KENALEY, CHRISTOPHER P
Fall 2020
Organismal biology is the study of living systems of all scales that shape the structure, function, ecology, and evolution of individual organisms. Experiments that elucidate how organisms respond to biotic and abiotic environmental stimulus over broad time scales—from changes in behavior to adaptation—are crucial to understanding biological diversity. In this course we'll explore the concepts and analytical tools that frame experimental research in organismal biology. Through group projects and active learning exercises, students will first make hypotheses concerning how organisms respond in time, space, and behavior to changes in environment and then design experiments and instruments that produce data to evaluate these hypotheses. Topics covered will include reconstructing phylogenetic history and the evolution of organismal form and function, evaluating form-function relationships, and the correlates of spatial and temporal distribution of organisms. In addition, the development of an analytical toolbox—specifically, learning the principles of data science and statistical analysis—is a central theme of this course.

BIOI403001
Deep Sea Biology OLINS, HEATHER C
Fall 2020
Roughly 80% of habitable space on this planet is in the ocean below 1000 meters where sunlight never reaches. In this course we will dive into this rarely visited habitat that occupies the majority of our biosphere. We will take an interdisciplinary approach, as studying the deep requires the integration of geology, chemistry, ecology, physiology, and engineering. We will investigate fundamental aspects of biology such as how organisms adapt to challenges posed by their environment. Students will also gain an appreciation for how much of the planet remains unexplored and learn how scientists study the inaccessible ecosystems of the deep.

BIOI409001
Virology
EBERHARD, JEREMY J
**BIOL420001**

*Introduction to Bioinformatics*

**CLOTE, PETER G**

**Fall 2020**

Bioinformatics is an emerging field at the intersection of biology, mathematics, and computer science. It harnesses the power and speed of computers to analyze the molecules essential for life. This introductory course requires that students have a basic understanding of molecular biology, genetics, and the Internet, but it does not require extensive background in mathematics or programming. Students will learn bioinformatic tools from the public domain, public databases, and simple programming tasks in PYTHON.

**Credits:** 03

**BIOL422001**

*Research in Molecular Cell Biology*

**DUNN, REBECCA K**

**Fall 2020**

An advanced project laboratory course for hands-on training in the experimental techniques of molecular biology under faculty supervision. In addition to formal lab training and discussions, students will have access to the lab outside class hours to work on projects intended to produce publication quality data. The research project will focus on the phenotypes and branched proteins that results from induced expression of ubiquitin-like proteins in budding yeast. Methods taught may include: DNA cloning techniques, DNA sequencing, polymerase chain reaction, metal chelate chromatography, SDS-PAGE, and Western blotting. This course is ideal for students who desire a solid introduction to research in molecular/cellular biology through practical training.

**BIOL432001**
**Developmental Biology**
**HAKE, LAURA E**
**Fall 2020**

Developmental biology is in the midst of a far-reaching revolution that profoundly affects many related disciplines, including evolutionary biology, morphology, and genetics. The new tools and strategies of molecular biology have begun to link genetics and embryology and to reveal an incredible picture of how cells, tissues, and organisms differentiate and develop. This course describes both organismal and molecular approaches, which lead to a detailed understanding of (1) how it is that cells containing the same genetic complement can reproducibly develop into drastically different tissues and organs, and (2) the basis and role of pattern information in this process.

**Credits:** 03
**Room and Schedule:** HIGGINS HALL 225, T TH 1 30*;
**Satisfies Core Requirement:** None
**Prerequisites:** BIOL2040. And additional coursework in molecular cell biology (such as BIOL3040, BIOL4140, BIOL4400).

---

**BIOL435001**
**Biological Chemistry**
**FOLKER, ERIC S**
**Fall 2020**

This course is designed to introduce biology and biochemistry majors to the subject with an emphasis on understanding the biochemical principals that are crucial to biological function at the molecular, cellular, and organismal levels. The material includes: (1) the structure and chemistry of biomolecules, including amino acids, proteins, lipids, carbohydrates, and nucleic acids; (2) the key metabolic pathways and enzymology involved in the synthesis/degradation of carbohydrates; and (3) the cycling of energy through biological systems. Reference will be made to alterations in biochemical structures, processes, and pathways that relate to specific diseases.

**Credits:** 03
**Room and Schedule:** MERKERT CENTER 127, M W F 10;
**Satisfies Core Requirement:** None
**Prerequisites:** CHEM2231 AND BIOL2000.
**Corequisites:** None
**Cross-listed with:** None
**Frequency:** Annually
**Student Level:** UNDERGRAD-MAJORS
**Comments:** Students cannot get credit for BIOL4350 if they have already completed CHEM4461 Biochemistry 1. This course, together with BIOL4400, satisfies the one year requirement of basic biochemistry for the biochemistry major.
**Status:** OPEN

---

**BIOL446001**
**Molecular Basis of Disease**
**DUNN, REBECCA K**
**Fall 2020**

This is an upper-level elective in which students will use the primary literature to study the cellular and molecular bases of diverse diseases. Topics will include aberrations in cellular structures, protein misfolding, protein glycation, oxidative damage, immune activation, and autoimmunity. Students will gain an understanding of the interconnections between basic biology and human disease and experience in reading scientific research articles and in presenting scientific work.

**Credits:** 03
**Room and Schedule:** FULTON HALL 415, M W F 12;
**Satisfies Core Requirement:** None

**BIOL480201**
**Research in Evolutionary Genomics**
**DACOSTA, JEFFREY M**
**Fall 2020**

This course will provide hands-on training in the collection and analysis of genome-scale data from non-model organisms. Students will learn good laboratory practices while preparing samples for next-generation DNA sequencing, which will be run in the department's core sequencing facility. Students will also learn basic Linux/Unix computational skills and several bioinformatics tools that will be applied in managing and analyzing the massive amounts of data generated by this sequencing technology. Through data analyses and reviews of the primary literature, students will gain exposure to modern methods in phylogenetics and population genetics. This course is recommended for students interested in advanced topics in genomics, bioinformatics, and evolution. BIOL3150 and BIOL4200 recommended.

**Credits:** 03

**BIOL481001**
**Research in Molecular Microbiology Lab**
**WARNER, DOUGLAS M**
**Fall 2020**

This advanced project laboratory course for hands-on training in the experimental techniques of molecular microbiology under faculty supervision. The course will focus on the extraction of genetic material and cloning of genes from a variety of different organisms in order to analyze functional homology of the methionine pathway. Methods taught include: DNA extraction, DNA sequencing, polymerase chain reaction, and the use databases for research and analysis.

**Credits:** 03
**Room and Schedule:** HIGGINS HALL 475, M W 1-3 50; HYBRID;

**BIOL483001**
**Research in Molecular Biology Lab**
**FOFANA, ISMAEL B**
**Fall 2020**

An advanced project laboratory course for hands-on training in the experimental techniques of molecular biology under faculty supervision. In addition to formal lab
training and discussions, students will have access to the lab outside class hours to work on projects intended to produce publication quality data. The research project will focus on environmentally-mediated gene expression in the organism Pseudomonas fluorescens. Methods taught include: DNA cloning techniques, DNA sequencing, polymerase chain reaction, and the use of national databases for research and analysis. It is ideal for students who desire a solid introduction to hypothesis-driven research in molecular biology through practical training.

**Credits:** 03

**Room and Schedule:** HIGGINS HALL 570, T TH 2-4 50; HYBRID;

**Satisfies Core Requirement:** None

**B IOL49001**

**Investigations in Cellular Re-Programming**

**CONNOLLY, TIMOTHY J**

**Fall 2020**

Induced pluripotent stem cells, iPSCs, are cells that can be generated from adult cells such as skin fibroblasts. Once generated, iPSCs can be directed to differentiate into any cell and offer exciting models for disease research. This laboratory course will teach students the techniques used to reprogram adult murine fibroblasts into pluripotent stem cells and their subsequent differentiation into cardiac and neuronal lineages. Resulting cell lines will be characterized using molecular and cell biology techniques and students will work to create novel cellular disease models to progress particular disease research.

**Credits:** 03

Nobel Prize Winning Research in Medicine or Physiology BURGESS, DAVID R  
Fall 2020  
In this course we will discuss primary research literature in the fields of cell and developmental biology that have led to the award of the Nobel Prize. Each student will select a primary paper cited by the Nobel Foundation as justification for the award together with a supportive current review on the topic and present the background information to the class. The primary paper will be discussed at the following class period, with all students having defined responsibilities for discussion of the figures and data.  
**Credits:** 02

Emerging Therapeutics NYSTUEN, ARNE M  
Fall 2020  
This course will focus on novel therapeutic technologies. The first gene therapy has been approved in the U.S. following decades of development. Furthermore, many more gene and cell therapies are in development. The process of therapeutic development will be covered. New technologies will be discussed as well as the results of preclinical and clinical trials. Topics will be presented by the instructor and students and discussions will follow. Students will select their topics for presentation with direction and final approval from the instructor. We will develop presentation skills throughout the course.  
**Credits:** 02  
**Room and Schedule:** HIGGINS HALL 265,M 4 30-6 30;HYBRID;  
**Satisfies Core Requirement:** None  
**Prerequisites:** BID12000. Additional course work in molecular cell biology. Biochemistry and Physiology recommended.

Environmental Disruptors of Development HAKE, LAURA E  
Fall 2020  
More than 100,000 chemicals are manufactured and may end up as environmental pollutants. Some have toxic effects at high concentrations and protection plans are already in place. However, embryonic, fetal, or neonatal exposure to low "safe" levels of numerous pollutants can (1) induce subtle changes in developmental programs regulated by steroid hormones; (2) increase the reproductive, immune, metabolic, or cognitive disorders; and (3) increase the risk of adult-onset disorders (breast cancer, prostate cancer, diabetes, reduced fertility). This course will examine experiments regarding Environmental Endocrine Disruptors and consider how this work is important in the development of regulatory policy.  
**Credits:** 03  
**Room and Schedule:** HIGGINS HALL 225,T TH 10 30;  
**Satisfies Core Requirement:** None  
**Prerequisites:** At least two of the following courses: BIOL3040, BIOL5060, BIOL4170, BIOL4510, BIOL4140, BIOL4350, BIOL4400 or instructor permission.

**BIO1515001**

Vaccine Development and Public Health FOFANA, ISMAEL B  
Fall 2020  
Despite more than three decades of research, the development of an efficacious HIV/AIDS vaccine remains elusive. Nonetheless, the quality of knowledge generated by HIV researchers is impressive. It is no surprise that potent Ebola virus and Zika virus vaccine candidates have been developed in a short time span. This class will discuss the difficulties and successes encountered with vaccine development (AIDS, tuberculosis, malaria, small-pox, measles, poliomyelitis, tetanus, Ebola, and Zika). At a time when questions have been raised about the link between childhood vaccination regimens and autism, we will discuss the ethics, economics, problems, and benefits of modern day vaccination.  
**Credits:** 03  
**Room and Schedule:** CARNEY HALL 202,T TH 10 30;  
**Satisfies Core Requirement:** None

**BIO1542001**

Cancer As A Metabolic Disease SEYFRIED, THOMAS N  
Fall 2020  
This seminar will review evidence showing that impaired cellular energy metabolism is the defining characteristic of nearly all cancers regardless of cellular or tissue origin. In contrast to normal cells, which derive most of their usable energy from oxidative phosphorylation, nearly all cancer cells become dependent on non-oxidative substrate level phosphorylations to meet energy demands. Evidence will be discussed supporting a general hypothesis that all hallmarks of cancer including genomic instability and metastasis can be linked to impaired mitochondrial function. A view of cancer as a metabolic disease will impact approaches to cancer management and prevention.  
**Credits:** 03  
**Room and Schedule:** T TH 9*;ONLINE;SYNCHRONOUS;  
**Satisfies Core Requirement:** None

BIOLOGY50001
Advanced Lab in Cell Imaging JUDSON, BRET
Fall 2020
This course will survey the various visualization techniques and instruments used by
scientists and biomedical researchers: light microscopy, confocal, electron microscopy,
super-resolution, and image processing. Students will discuss the experimental use of
these techniques and instruments as described in the primary literature. The
laboratory component will focus on becoming familiar with the instrumentation that we
have available at Boston College. The course will culminate in individual projects of the
students choosing utilizing equipment that we have in the laboratory.

Sustaining the Biosphere HAKE, LAURA E
Spring 2021
Environmental problems and their solutions occur at the intersection of natural systems and the human systems that manipulate the natural world. The course will provide students with an integrated understanding of human systems that affect nature. Topics will include climate, air and water pollution, economics and urbanization, food and agriculture, population growth, biodiversity, waste management, and health and toxicology. Sustainability, personal responsibility, and a proactive approach to involvement in solutions to current environmental crises will be emphasized. This course is designed for students who are not majoring in biology or biochemistry.

BIO170601
Understanding and Protecting Our Oceans in the Wake of Climate Change OLINS, HEATHER C; BIJANI, YASMIN
Spring 2021
The ocean, which covers more than 70 percent of the Earth's surface, is vital to human societies. Yet, we have better maps of Mars than our own sea floor. This course introduces students to what we know and don't know about marine biodiversity and ecosystem services. It then describes the effects of climate change on the ocean, including rising temperatures, acidification, and sea level rise—and the resulting impact on life within and outside of the ocean. We end discussing the importance of effective governance and explore innovative ways in which people are working to repair and protect the ocean.

Investigations in Molecular Cell Biology Lab WARNER, DOUGLAS M; JENSEN, KARI

Spring 2021

A 3-credit laboratory course designed to introduce students to the core techniques and experimental strategies of modern molecular cell biology within the context of an original research investigation. Students will learn to construct testable hypotheses, design experiments, and critically analyze experimental results. During the course of their investigations, students will gain proficiency in microbial cell culture, molecular cloning, genetic analysis, and molecular characterization. Students will also gain proficiency in scientific communication and the use of biological databases.

Credits: 03

Room and Schedule: HIGGINS 390, M W 12-2 50; HYBRID;
Satisfies Core Requirement: None
Prerequisites: BIOL2000 AND CHEM1111
Corequisites: None
Cross-listed with: None
Frequency: Annually
Student Level: UNDERGRAD ELECT
Comments: Lab fee required.
Status: CLOSED

BIO124004

Investigations in Molecular Cell Biology Lab WARNER, DOUGLAS M; JENSEN, KARI

Spring 2021

A 3-credit laboratory course designed to introduce students to the core techniques and experimental strategies of modern molecular cell biology within the context of an original research investigation. Students will learn to construct testable hypotheses, design experiments, and critically analyze experimental results. During the course of their investigations, students will gain proficiency in microbial cell culture, molecular cloning, genetic analysis, and molecular characterization. Students will also gain proficiency in scientific communication and the use of biological databases.

This course is designed to provide students with a strong foundation in the molecular biology of the cell. Topics covered in the course include cellular biochemistry,
regulation of gene expression, subcellular organization, regulation of the cell cycle, membrane trafficking, cell-substrate interactions, cytoskeleton, cancer, and cell signaling. It serves as excellent preparation for more advanced courses in cell biology, molecular biology, developmental biology, and genetics.

This course will consider eukaryotic DNA and RNA viruses that are important in human disease. Basic principles of virus structure, host cell entry and the molecular biology of virus life cycles will be considered in the context of infectious disease. Viruses to be examined include Influenza, cancer-related viruses such as the Human Papilloma Virus, HIV, and emerging viruses such as Ebola and the hantaviruses. The host immune response to viral infection and the effectiveness of various vaccination strategies will also be discussed.

BIOL445001
Behavioral Ecology DACOSTA, JEFFREY M
Spring 2021
This course will examine the adaptive significance of behavior in an ecological context. Lectures and readings from the primary literature will review basic concepts and theory as well as model-based and experimental approaches to exploring questions in the field. Topics covered include social behavior, reproductive behavior, life history strategies, optimal foraging, territoriality, co-evolution, and communication.
Credits: 03
Room and Schedule: HIGGINS HALL 370, MWF 1-2 50; HYBRID;

BIOL435001
Cancer Biology TAGHIAN, DANIELLE
Spring 2021
The onset of cancer occurs through a multi-step process that is accompanied by the deregulation of fundamental cellular processes, including cell cycle control, apoptosis, and angiogenesis. This course will provide an overview of the molecular and cellular changes associated with these processes and with the initiation, progression, and metastasis of tumors. Topics covered include tumorigenesis, tumor viruses, oncogenes, tumor suppressor genes, genomic instability, and the current treatments for cancer. The class will draw on textbook and primary literature readings to enrich the current view of this complex disease.
Credits: 03

BIOL435001
Biological Chemistry MEYER, MICHELLE M
Spring 2021
This course is designed to introduce biology and biochemistry majors to the subject with an emphasis on understanding the biochemical principals that are crucial to biological function at the molecular, cellular, and organismal levels. The material includes: (1) the structure and chemistry of biomolecules, including amino acids, proteins, lipids, carbohydrates, and nucleic acids; (2) the key metabolic pathways and enzymology involved in the synthesis/degradation of carbohydrates; and (3) the cycling of energy through biological systems. Reference will be made to alterations in biochemical structures, processes, and pathways that relate to specific diseases.
Credits: 03
Room and Schedule: TTH 9-10; ONLINE; SYNCHRONOUS;
Satisfies Core Requirement: None
Prerequisites: CHEM 2231 AND BIOL2000.
Corequisites: None
Cross-listed with: None
Frequency: Annually
Student Level: UNDERGRAD-MAJORS
Comments: Students cannot get credit for BIOL4350 if they have already completed CHEM451 Biochemistry 1. This course, together with BIOL4400, satisfies the one year requirement of basic biochemistry for the biochemistry major.
Status: OPEN

| BIOL454001 | Neuroscience | NYSTUEN, ARNE M | Spring 2021 | This class will cover molecular neuroscience and neuroanatomy in a clinical and pharmacological context. Anatomy topics will include the structure, function, and pathology for the brain and associated nerves and vasculature. Sensory and motor systems will be discussed with special attention to the visual system, where genetic disease and current therapeutic strategies will be discussed in depth. We will cover pathology associated with neurodegenerative disease and the current clinical trials within this disease group. | Credits: 3 | Room and Schedule: ONLINE/ASYNCHRONOUS; | Satisfies Core Requirement: None | Prerequisites: BIOL2000. Additional coursework in molecular cell biology or biochemistry. Not open to students who have completed BIOL4500. | Corequisites: None | Cross-listed with: None | Frequency: Annually | Student Level: UNDERGRAD-MAJORS | Comments: None | Status: CLOSED |
| BIOL483001 | Research in Molecular Biology Lab FOFANA, ISMAEL B | Spring 2021 | An advanced project laboratory course for hands-on training in the experimental techniques of molecular biology under faculty supervision. In addition to formal lab training and discussions, students will have access to the lab outside class hours to work on projects intended to produce publication-ready data. The research project will focus on environmentally-mediated gene expression in the organism Pseudomonas fluorescens. Methods taught include: DNA cloning techniques, DNA sequencing, polymerase chain reaction, and the use of national databases for research and analysis. It is ideal for students who desire a solid introduction to hypothesis-driven research in molecular biology through practical training. | Credits: 3 | Room and Schedule: HIGGINS HALL 570,M W 1-3 50;HYBRID; | Satisfies Core Requirement: None | Prerequisites: BIOL2040. | Corequisites: None | Cross-listed with: None | Frequency: Annually | Student Level: UNDERGRAD-MAJORS | Comments: Satisfies the advanced experience requirement for the Biology major. Lab Fee required. | Status: CLOSED |
| BIOL487002 | Research in Molecular Genetics Lab HOFFMAN, CHARLES | Spring 2021 | The fission yeast Schizosaccharomyces pombe is an important model organism for the study of intracellular processes such as cell cycle control, transcription, DNA replication, chromosome maintenance, and signal transduction. This laboratory will involve original molecular genetic research using S. pombe that involves concepts related to forward genetics and gene manipulation. This course is recommended for students interested in pursuing graduate studies or careers in biomedical research. | Credits: 3 | Room and Schedule: HIGGINS HALL 475,M W 1-3 50;HYBRID; | Satisfies Core Requirement: None | Prerequisites: BIOL2040 AND ( BIOL3150 OR BIOL3190 OR BIOL4170 ). BIO501001
Nobel Prize Winning Research in Medicine or Physiology BURGESS, DAVID R
Spring 2021
In this course we will discuss primary research literature in the fields of cell and developmental biology that have led to the award of the Nobel Prize. Each student will select a primary paper cited by the Nobel Foundation as justification for the award. Together with a supportive current review on the topic and present the background information to the class. The primary paper will be discussed at the following class period, with all students having defined responsibilities for discussion of the figures and data.

Status: CLOSED

BIO504001
Topics in Developmental Biology MCMENAMIN, SARAH K

Spring 2021
This course will focus on novel therapeutic technologies. The first gene therapy has been approved in the U.S. following decades of development. Furthermore, many more gene and cell therapies are in development. The process of therapeutic development will be covered. New technologies will be discussed as well as the results of preclinical and clinical trials. Topics will be presented by the instructor and students and discussions will follow. Students will select their topics for presentation with direction and final approval from the instructor. We will develop presentation skills throughout the course.
Credits: 02
Status: CLOSED

BIO505001
Recombinant DNA Technology HOFFMAN, CHARLES
Spring 2021
This course will describe the theory and practice of recombinant DNA technology and its application within molecular biology research. Topics will include the cloning of genes from various organisms, plasmid construction, transcriptional and translational gene fusions, nucleic acid probes, site-directed mutagenesis, polymerase chain reaction, and transgenic animals. The goal of the course is to make the research-oriented student aware of the wealth of experimental approaches available through this technology.
Credits: 02
Status: OPEN

BIO5070101
Microbial Community Ecology MOMENI, BABAK
Spring 2021
Polymicrobial communities can cause harmful infections as pathogens or facilitate food digestion as resident microbiota. They also have industrial applications for waste remediation or biofuel production. We will examine examples of microbial communities with implications in health, environment, or industry. The course surveys relevant ecological theories and covers current tools and methodologies used for characterization and analysis of microbial communities.

Microbiome and Human Disease ALTINDIS, EMRAH
Spring 2021
For thousands of years, humans have thought of themselves as single autonomous organisms. With new sequencing technologies and experiments, we are learning that the human microbiome and commensal organisms are an important aspect of host biology, and change the idea of who we really are. Recent data suggest that we are more than Homo sapiens, but a symbiotic-organism that is surrounded with trillions of microorganisms in all surfaces. Recent studies suggest that the human microbiome and commensal microbes have important roles in human health and disease. Indeed, the gut microbiota aid in normal digestion, metabolism of nutrients and drugs, and development of the gut and immune system. Reduced bacterial diversity, as well as alterations in the microbiota composition, have been associated not only with gastrointestinal disease, but also obesity, diabetes, and metabolic syndrome. Direct evidence now suggests that transfer of the microbiome can play a role in host phenotypes, homeostasis, behavior, and disease pathogenesis. Using current scientific literature and reviews, we will investigate the role of the microbiome in human health and disease. Students will make short presentations of the papers, and the class will discuss the methodology and findings of the papers.

BIOL542001
Cancer As A Metabolic Disease SEYFRIED, THOMAS N
Spring 2021
This seminar will review evidence showing that impaired cellular energy metabolism is the defining characteristic of nearly all cancers regardless of cellular or tissue origin. In contrast to normal cells, which derive most of their usable energy from oxidative phosphorylation, nearly all cancer cells become dependent on non-oxidative substrate level phosphorylations to meet energy demands. Evidence will be discussed supporting a general hypothesis that all hallmark of cancer including genomic instability and metastasis can be linked to impaired mitochondrial function. A view of cancer as a metabolic disease will impact approaches to cancer management and prevention.

BIOL543001
Genomics and Personalized Medicine CONNOLLY, TIMOTHY J
Spring 2021
Personalized medicine is based on the idea that each person’s unique genome sequence can be used to predict risk of acquiring specific diseases, allowing for more informed choices about health. The students will be exposed to the scientific concepts and technologies empowering personalized medicine. Through lecture, research paper reading and discussion, students will understand how human genomic information has impacted current topics in biomedical research. Students will write a research paper focused on how genomic information has advanced understanding of a human disease and how translation of genomic information will impact treatment or disease detection in the future.

Topics in Biomechanics KENALEY, CHRISTOPHER P
Spring 2021
This course will explore the physical principles underlying biological processes and mechanisms including movement, feeding, architecture, and transport. Drawing on physics and mechanical engineering, the course will explore how organisms swim, fly, walk, and consume resources, how they respond to moving fluids, and the relationship between their size and design of mechanical systems. Underlying all these topics will be hands-on investigations of how biological materials (e.g., wood, muscle, bone, skin, etc.) influence the mechanical behavior of complex life forms. The course will prepare students for more in-depth explorations of other related disciplines including ergonomics, orthopedics, kinesiology, and sports medicine.

Capstone Courses: Summer 2020
No records found

Capstone Courses: Fall 2020

UNCP55001
Capstone: One Life, Many Lives WEISS, JAMES M
Fall 2020
This course gives you the chance to review what you have made of your education and preview your long-term life commitments to work, relationships, community, and spirituality. We read fiction, psychology, sociology, and wisdom figures to find the deeper continuity underlying our many experiences. Students lead discussions, conduct interviews of working people, and cap off their Capstone by writing their own autobiography.

UNCP550101
Capstone: Authenticity and Human Development BRACHER, ELIZABETH R; DACEY, JOHN S
Fall 2020
The path to becoming a more authentic person is twofold: coming to know who you are and who you are not as well as sharing this information with others. As you progress along this path, you become more authentic and are rewarded for doing so. Why should you want to be more authentic? Misrepresenting yourself costs energy. More importantly, people just seem to know intuitively who is authentic and who is not. If you are, you will be seen as more trustworthy, more deserving of love, more skilled as a leader, and more likable. This course will help you to better recognize and improve on the areas of personal development called for in every Capstone course: your education up to now and in the future; your relationships; your role in society; your vocational callings and choice of career; and your spirituality. Assignments include group projects, personal projects, and lots of small and large group discussions.

Capstone: Life and Career Planning CAPALBO, ROBERT F
Fall 2020
This course provides an overview of life and career planning in the context of (1) career, (2) personal relationships, (3) spirituality, and (4) ethical decision making. Students are asked to develop autobiographical responses to a series of questions about their lives to find themes related to possible careers and relationship issues. Readings, cases, exercises, and guest lecturers will amplify those personal themes and common issues in life as we enter the twenty-first century. The integration of spirituality and ethical decision making into one’s life will be addressed by readings on ethical perspectives and the students’ written reflections.

College students have many competing demands: academics, friends, family, faith, service, and work all need attention. This just in—after college, it gets worse! This course begins with students reflecting on their commitments and choices up to now. Students will then establish personal priorities and learn strategies to become engaged in their future long-term commitments to career and community, while attending to family, friends, faith, personal well-being, and leisure. Readings will explore the changes ahead for young professionals balancing family, graduate school, and/or careers. The final assignment will be developing a personal road map to a full, meaningful, and balanced life.

UNCPS555701
Capstone: Adulting ARNOLD, KAREN
Fall 2020
Most college students in their early 20s feel neither fully adult nor fully competent in the tasks, responsibilities, and behaviors that are traditionally associated with grown-up life. In this class, students will take stock of their journey to adulthood so far and look ahead to what relationships, work, citizenship, and spirituality might look like in post-college life. Readings on the developmental psychology of young adulthood will be paired with popular media, exercises, and reflective writing to help students progress in their own "adulting" as they prepare to negotiate the transition out of college. Students may sign-up for this cross-listed course under UNCP Capstone or through the Lynch School ELHE department.

UNCPS51101
Capstone: The Balancing Act  
OLIVIERI, SCOTT D  
Spring 2021
College students have many competing demands: academics, friends, family, faith, service, and work all need attention. This just in—after college, it gets worse! This course begins with students reflecting on their commitments and choices up to now. Students will then establish personal priorities and learn strategies to become engaged in their future long-term commitments to career and community, while attending to family, friends, faith, personal well-being, and leisure. Readings will explore the changes ahead for young professionals balancing family, graduate school, and/or careers. The final assignment will be developing a personal road map to a full, meaningful, and balanced life.

Capstone: Exploring Art, Exploring Self

This course presents art as a means of personal development, encouraging students to appreciate not only art but also the capacities and self-knowledge art can stimulate. We will explore art by experiencing it, sharing it, discussing it, and writing about it. Artworks will represent various levels and periods (e.g., fine art, popular art, contemporary art, past art) and forms (e.g., photography, music, dance, writing, sculpture, painting, theatre). How can exploring art show us who we are? Artistic engagement will help us understand our experiences and goals, in education, relationships, spirituality, career, and society, preparing us to flourish.

Capstone: Love and Indoctrition: A Foundation for the Rest of Your Life

In our world of political spin and fake news, the surveillance state and social media, the pressure to separate what's real and valuable from what's fake and merely propaganda (another way of saying "lies") is paramount, and critical for figuring out how to live, practically, spiritually, intellectually, and psychologically.
In George Orwell's 1984, the affair of Winston Smith and Julia threatens the entire structure of Big Brother. Why? What is it about love that threatens large systems based on indoctrination? In this course we will explore and develop working definitions of both love and indoctrination in order to differentiate them.

Capstone: Working, Playing, Being

The conventional wisdom is that BC student culture is "work hard, play hard." But what do we mean by "work" and "play" here? How do these implicit meanings reflect broader cultural forces? And do these meanings serve us well? Senior year is an exciting but anxious time, and this seminar is a chance for you to: (a) reflect on how your education has shaped you, and how you have shaped your education and (b) explore your goals, fears, hopes, and expectations around life post-graduation with a small group of peers. We will examine: (1) the meaning of, and relationship between, work and leisure in your own life; (2) how they have developed since your freshman year in light of your education at BC and; (3) how they figure into your vision of a fulfilling life.

Capstone: Poets, Philosophers, and Mapmakers

We go through life with mental maps of reality in various degrees, implicit or explicit. A liberal arts education presupposes such a map of the intelligible world. Is it accurate? What does your map of reality look like? How has it changed since freshman year? The goal of the seminar is to help you see what kind of map you implicitly have now and to begin to ask what you want the map to look like ten years after graduation. How do you develop an open rather than closed map?

Credits: 03
Room and Schedule: STOKES HALL 209; TH 4 30-6 50; Satisfies Core Requirement: None Prerequisites: With permission of the Instructor. Completion of Philosophy and Theology core. Capstone classes may NOT be taken Pass/Fail. You may take only ONE Capstone class before graduation.
Status: CLOSED

Capstone: Moral of Story

This course aims to help students review the process of their education and preview the process of making long-term commitments by taking a long, loving look at how we experience desire and how we act upon those desires to construct a life well lived. The course will first expose students to spiritual practices of discernment, rooted in the Ignatian and Benedictine spiritual traditions. Second, it will involve careful thinking about stories of discernment which involve the sorting and pruning of desire.

Comments will reflect on these stories, in order to help each other consider what they mean for our own lives.

Spring 2021
Hanging in Boston's Museum of Fine Arts is the magna opus of Paul Gauguin, "Where Do We Come From? What Are We? Where Are We Going?". Gauguin left family, friends, and a career in banking to flee to Tahiti, in search of life's meaning. "Where Do We Come From? What Are We? Where Are We Going?" is his ultimate representation of these philosophical questions. We will move through a different artistic medium--that of the short story--as we ask those same questions. We will examine complex plots and characters in the hopes of exploring our own stories.

UNCPS56901
Capstone: How We Decide LAMOUREUX, JEFFREY A
Spring 2021
Why did I eat at "White Mountain" at 11 p.m. last night? And how can my friends convince me to go to Cityside when I know I should be studying? In this seminar, we will focus on how the mind and brain function to produce the decisions we ourselves make. The class is open to students from all majors, and there is no science prerequisite. Throughout the semester, we will reflect on our own past decisions, and consider alternative decision making strategies for the future.

Room and Schedule: None

Required of all students in Gateway General Chemistry. Discussion will offer a comprehensive review of the material presented in lecture, with a focus on the key mathematical and chemical concepts needed for problem-solving, in a small group setting.

Credits: 0.50

Room and Schedule: DEVLIN HALL 008,T TH 9*;
Prerequisites: With permission of the Instructor. CHEM1117 is a prerequisite for CHEM1118.
Corequisites: CHEM1119 AND CHEM1121.
Cross-listed with: None
Frequency: Annually Student Level: CORE
Comments: Department permission required.
Status: OPEN

CHEM111902
Honors Modern Chemistry Laboratory I | YOUNG, ALLISON P | Fall 2020 | CHEM1117 | 0.50 | OPEN | Laboratory required for all students enrolled in CHEM1117. This laboratory course stresses discovery-based experiments. It uses state-of-the-art instrumentation to illustrate the principles discussed in CHEM1117-1118 and introduces students to techniques used in modern chemical research. One three-hour period per week. |

Credits: 0.50
Room and Schedule: MERKERT CENTER 120,M 30-8 30;HYBRID;
Prerequisites: None Corequisites: CHEM1117. Cross-listed with: None Frequency: Annually Student Level: CORE

This course is a continuation of the CHEM1117-1118 honors sequence and will concentrate on the structure, bonding, and reactivity of organic compounds. Particular
emphasize will be placed on stereochemistry, conformational analysis, reaction mechanisms, principles of organic synthesis, and modern spectroscopic methods.

**Credits:** 03

**Room and Schedule:** MERKERT CENTER 129, T TH 9*; HYBRID;

**Satisfies Core Requirement:** None

**Prerequisites:** CHEM1117 AND CHEM120 AND CHEM1118 AND CHEM1119. With permission of the Instructor.

**Corequisites:** CHEM2243 AND CHEM2245.

**Cross-listed with:** None

**Frequency:** Annually

**Student Level:** UNDERGRAD-MAJORS

**Comments:** None

**Status:** OPEN

---

**CHEM224301**

**Honors Organic Chemistry I Laboratory**

**YOUNG, ALLISON P**

**Fall 2020**

Laboratory course required for students enrolled in Honors Organic Chemistry (CHEM2241). Students will be instructed in experimental techniques relevant to research in contemporary organic chemistry. It will solidify concepts that are taught in lecture and provide a forum for discovery-based learning in organic chemistry.

**Credits:** 01

**Room and Schedule:** MERKERT CENTER 021, W 12 15-4 15; HYBRID;

**Satisfies Core Requirement:** None

**Prerequisites:** None

**Corequisites:** CHEM2241. Cross-listed with: None

**Frequency:** Annually

**Student Level:** UNDERGRAD-MAJORS

**Comments:** Lab fee required.

**Status:** CLOSED

---

**CHEM224501**

**Honors Organic Chemistry Discussion I**

**BYRNE, KEVIN T**

**Fall 2020**

Required of all students in CHEM2241. Discussion of organic synthesis design, spectroscopic analysis, reaction mechanisms, and other lecture topics in small groups.

**Credits:** 00

**Room and Schedule:** MERKERT CENTER 129, M 6; HYBRID;

**Satisfies Core Requirement:** None

**Prerequisites:** None

**Corequisites:** CHEM2241. Cross-listed with: None

**Frequency:** Annually

**Student Level:** UNDERGRAD-MAJORS

**Comments:** None

**Status:** OPEN

---

**CHEM224502**

**Honors Organic Chemistry Discussion I**

**BYRNE, KEVIN T**

**Fall 2020**

Required of all students in CHEM2241. Discussion of organic synthesis design, spectroscopic analysis, reaction mechanisms, and other lecture topics in small groups.

**Credits:** 00

**Room and Schedule:** MERKERT CENTER 129, T 7; HYBRID;

**Satisfies Core Requirement:** None

**Prerequisites:** None

**Corequisites:** CHEM2241. Cross-listed with: None

**Frequency:** Annually

**Student Level:** UNDERGRAD-MAJORS

**Comments:** None

**Status:** OPEN

---

**CHEM224701**

**Honors Organic Pre-Lab**

**MORKEN, JAMES P; BYERS, JEFFERY**

**Fall 2020**

This 50 minute lecture will discuss the principles and theories behind the experiments performed in the laboratory course.

**Credits:** 00

**Room and Schedule:** CAMPION HALL 204, M 3; HYBRID;

**Satisfies Core Requirement:** None

**Prerequisites:** None

**Corequisites:** CHEM2243. Cross-listed with: None

**Frequency:** Annually

**Student Level:** UNDERGRAD-MAJORS

**Comments:** None

**Status:** OPEN

---

**CHEM335301**

**Analytical Chemistry Laboratory METZ, KENNETH R**

**Fall 2020**

Laboratory required of all students enrolled in CHEM3351. One four-hour period per week.

**Credits:** 04

**Room and Schedule:** ONLINE/ASYNCHRONOUS; Satisfies Core Requirement: None

**Prerequisites:** None

**Corequisites:** CHEM3355 AND CHEM3353.

**Cross-listed with:** None

**Frequency:** Annually

**Student Level:** UNDERGRAD-MAJORS

**Comments:** None

**Status:** OPEN

---

**CHEM335302**

**Analytical Chemistry Laboratory METZ, KENNETH R**

**Fall 2020**

Laboratory required of all students enrolled in CHEM3351. One four-hour period per week.

**Credits:** 00

**Room and Schedule:** MERKERT CENTER 120, W 5-9; HYBRID;

**Satisfies Core Requirement:** None

**Prerequisites:** None

**Corequisites:** CHEM3351. Cross-listed with: None

**Frequency:** Annually

**Student Level:** UNDERGRAD-MAJORS

**Comments:** Lab fee required

**Status:** CLOSED

---

**CHEM335303**

**Analytical Chemistry Laboratory METZ, KENNETH R**

**Fall 2020**

Laboratory required of all students enrolled in CHEM3351. One four-hour period per week.

**Credits:** 00

**Room and Schedule:** MERKERT CENTER 120, TH 1-5; HYBRID;

**Satisfies Core Requirement:** None

**Prerequisites:** None

**Corequisites:** CHEM3351. Cross-listed with: None

**Frequency:** Annually

CHEM445001
Modern Laboratory Techniques of Photocontrolled Radical Polymerization NIU, JIA
Fall 2020
Polymer science is indispensable in providing materials to support our current lifestyle and may provide important solutions to a sustainable and eco-friendly society in the future. This course will survey and analyze the contemporary laboratory techniques of photocontrolled radical polymerization. Participants will have hands-on experience of developing methods to control reactivities in polymerization and gain valuable experience in the concept and practice of reaction optimization and product analysis in the modern polymer science.
Credits: 01
Room and Schedule: MERKERT CENTER 120,TH 5 30-8 30; Satisfies Core Requirement: None
Prerequisites: CHEM2232.
Corequisites: None Cross-listed with: None Frequency: Periodically
Student Level: UNDERGRAD ELECT
Comments: None
Status: OPEN

CHEM446101
Biochemistry | CHATTERJEE, ABHISHEK
Fall 2020
This course is a two-semester introductory-level course in biochemistry. Topics in the first semester concentrate on protein structure and function, bioenergetics, kinetics and mechanisms of enzyme reactions, intermediary metabolism, control of metabolic pathways, and photosynthesis. Topics in the second semester concentrate on the structure of nucleic acids, recombinant DNA technology, mechanisms of gene rearrangements, DNA replication, RNA synthesis and splicing, protein synthesis, control of gene expression, membrane transport, and hormone action. Experimental methods will also be discussed as they relate to course topics.
Credits: 03
Room and Schedule: T TH 9*;ONLINE;SYNCHRONOUS; Satisfies Core Requirement: None
Prerequisites: CHEM2232 AND CHEM2231 AND BIOL2000. OR equivalent.
Corequisites: CHEM4463. Cross-listed with: None Frequency: Annually
Student Level: UNDERGRAD-MAJORS
Comments: None
Status: OPEN

CHEM339707
Students may engage in a research project that is limited in scope under the supervision of a faculty member.
Credits: 01
Room and Schedule: BY ARRANGEMENT; Satisfies Core Requirement: None Prerequisites: With permission of the Department. Corequisites: None
Cross-listed with: None Frequency: Annually
Student Level: UNDERGRAD-MAJORS
Comments: None
Status: OPEN
CHEM446301
Biochemistry Discussion I HUANG, RACHEL L
Fall 2020
Required of all students in CHEM4461. Discussion of lecture topics and problem-solving methods in small groups.
Credits: 00
Room and Schedule: MERKERT CENTER 130,W 6,HYBRID; Satisfies Core Requirement: None
Prerequisites: None
Corequisites: CHEM4461, CHEM4461.
Cross-listed with: None
Frequency: Annually
Student Level: UNDERGRAD & GRAD
Comments: None
Status: CLOSED

CHEM446302
Biochemistry Discussion I HUANG, RACHEL L
Fall 2020
Required of all students in CHEM4461. Discussion of lecture topics and problem-solving methods in small groups.
Credits: 00
Room and Schedule: HIGGINS HALL 225,T 6;HYBRID; Satisfies Core Requirement: None
Prerequisites: None
Corequisites: CHEM4461, CHEM4461.
Cross-listed with: None
Frequency: Annually

Comments: None
Status: OPEN

CHEM446303
Biochemistry Discussion I JEWEL, DELILAH
Fall 2020
Required of all students in CHEM4461. Discussion of lecture topics and problem-solving methods in small groups.
Credits: 00
Room and Schedule: MERKERT CENTER 129,W 7;HYBRID; Satisfies Core Requirement: None
Prerequisites: None
Corequisites: CHEM4461, CHEM4461.
Cross-listed with: None
Frequency: Annually
Student Level: UNDERGRAD & GRAD
Comments: None
Status: OPEN

CHEM446501
Biochemistry (Chemistry Majors) GAO, JIANMIN
Fall 2020
This course is an accelerated one-semester survey of the basic principles of biochemistry emphasizing a broad understanding of the chemical events in living systems. Although the course is an introduction to biochemistry, prior proficiency in general and organic chemistry is required. Topics will include structure and function of biological molecules, including proteins, enzymes, nucleic acids and biological membranes. Also covered in the course will be bioenergetics, metabolism and photosynthesis. Experimental methods will also be discussed as they relate to course topics. This course fulfills the biochemistry requirement for the Chemistry major. Non-chemistry majors are requested to consult with the instructor before registering for this course.
Credits: 03
Room and Schedule: CAMPION HALL 302,T TH 9*; Satisfies Core Requirement: None
Prerequisites: CHEM2232 AND CHEM2231. Non-chemistry majors are requested to consult with the instructor before registering for this course.
Corequisites: CHEM4466. Cross-listed with: None Frequency: Annually
Student Level: UNDERGRAD-MAJORS
Comments: None
Status: CLOSED

CHEM446601
Introduction to Biochemistry Discussion NOBILE, VINCENT R
Fall 2020
Required of all students in CHEM4465. Discussion of lecture topics and problem-solving methods in small groups.
Credits: 00
Room and Schedule: CAMPION HALL 231,M 2;HYBRID; Satisfies Core Requirement: None
Prerequisites: None Corequisites: CHEM4465. Cross-listed with: None Frequency: Annually
Student Level: UNDERGRAD-MAJORS
Comments: None
Status: OPEN

CHEM446602
Introduction to Biochemistry Discussion NOBILE, VINCENT R
Fall 2020
Required of all students in CHEM4465. Discussion of lecture topics and problem-solving methods in small groups.
Credits: 00
Room and Schedule: CAMPION HALL 231,F 2; Satisfies Core Requirement: None
Prerequisites: None Corequisites: CHEM4465. Cross-listed with: None Frequency: Annually
Student Level: UNDERGRAD-MAJORS
Comments: None
Status: OPEN

CHEM447301
Physical Chemistry (Biochemistry Majors) HAEFFNER, JAN F
Fall 2020
This course is an introduction to physical chemistry. The following topics are covered: thermodynamics, transport properties, chemical kinetics, quantum mechanics, and spectroscopy. Applications to biochemical systems are emphasized.
Credits: 03
Room and Schedule: MERKERT CENTER 130,M W F 10;
Satisfies Core Requirement: None
Prerequisites: CHEM2232 AND MATH1101.
Corequisites: CHEM4474. PHYS2100-2101 (or equivalent) are pre- or co-requisites.
Cross-listed with: None
Frequency: Annually
Student Level: UNDERGRAD-MAJORS
Comments: None
Status: OPEN

CHEM447501
Physical Chemistry I MC FADDEN, DAVID L
Fall 2020
This course deals with the foundations and applications of thermodynamics and reaction kinetics. Topics include: (1) classical thermodynamics, including the Laws of Thermodynamics, Helmholtz and Gibbs energies, chemical potential, and thermodynamic descriptions of phase equilibria and chemical equilibrium; (2) kinetic theory of gases; (3) chemical reaction rate laws and mechanisms.
Credits: 03
Room and Schedule: MERKERT CENTER 129,T TH 10 30*;HYBRID;
Satisfies Core Requirement: None
Prerequisites: CHEM2232 AND PHYS2101/2201 are pre- or co-requisites.
Corequisites: CHEM4474. PHYS2100-2200-2201 are pre- or co-requisites.
Cross-listed with: None
Frequency: Annually
Student Level: UNDERGRAD-MAJORS
Comments: None
Status: CLOSED

CHEM447701
Physical Chemistry Discussion I None
Fall 2020
Required of all students in CHEM4475. Discussion of lecture topics and problem-solving methods, in small groups.
Credits: 00
Room and Schedule: CAMPION HALL 204,M 6; Satisfies Core Requirement: None
Prerequisites: None
Corequisites: CHEM4475. CROSS-listed with: None Frequency: Annually
Student Level: UNDERGRAD-MAJORS
Comments: None
Status: OPEN

CHEM449101
Introduction to Undergraduate Research I DAVIDOVITS, PAUL
Fall 2020
Sophomores or juniors who show exceptional ability may engage in an independent research project under the supervision of a faculty member. The experimental work will be preceded by library research on the project and training in essential laboratory techniques.
Credits: 03
Room and Schedule: BY ARRANGEMENT;
Satisfies Core Requirement: None

CHEM449114
Introduction to Undergraduate Research I BYERS, JEFFERY
Fall 2020
Sophomores or juniors who show exceptional ability may engage in an independent research project under the supervision of a faculty member. The experimental work will be preceded by library research on the project and training in essential laboratory techniques.
Credits: 03
Room and Schedule: BY ARRANGEMENT;
Satisfies Core Requirement: None
Prerequisites: CHEM1110 AND CHEM1109. With permission of the Instructor. With permission of the Department.
Corequisites: None

CHEM5553101
Modern Methods in Organic Synthesis WASA, MASAYUKI; HOVEYDA, AMIR H
Fall 2020
Survey and analysis of reactions employed in the synthesis of medicinally significant compounds. An in-depth understanding of the mechanistic details for each transformation will be emphasized. Topics will relate fundamental structural and electronic properties to issues of chemical reactivity. An emphasis will be placed on carbon-carbon bond and ring forming reactions.
Credits: 03
Room and Schedule: MERKERT CENTER 130,T TH 10 30*;HYBRID;
Satisfies Core Requirement: None Prerequisites: CHEM2232 or equivalent. Corequisites: None
Cross-listed with: None Frequency: Annually

Status: OPEN

CHEM556001
Principles of Chemical Biology ZHOU, HUIQING
Fall 2020
An introduction to the chemistry of biological macromolecules, including proteins, nucleic acids, and carbohydrates. Students will learn the structure and nomenclature of the monomer building blocks as well as the macromolecules. Chemical principles that define secondary and tertiary biomolecular structure as well as state-of-the-art chemical (or chemical-biological) synthetic procedures will be presented. Examples of specific types of binding interactions, catalysis, or recognition processes as viewed from a chemical perspective will be discussed.
Credits: 03
Room and Schedule: CARNEY HALL 202,T TH 9*;HYBRID;
Satisfies Core Requirement: None Prerequisites: CHEM2232 or equivalent. Corequisites: None
Cross-listed with: None Frequency: Annually
Student Level: UNDERGRAD & GRAD
Comments: None
Status: OPEN

CHEM557601
Chemical Biology: Structure and Function WEERAPANA, ERANTHIE
Fall 2020
A major component of chemical biology is the application of chemical tools to the study of biological systems. This course will provide an overview of techniques such as genome sequencing, mass spectrometry-based proteomics, fluorescence imaging and unnatural amino-acid incorporation into proteins, with emphasis on examples drawn from the current literature. There will also be a focus on the mechanism of action of drugs, incorporating aspects of both the chemistry and biology of drug design.
Credits: 03
Room and Schedule: MERKERT CENTER 129,T TH 12*;
Satisfies Core Requirement: None Prerequisites: CHEM2231-2232, and CHEM4465 or CHEM4461 or CHEM4462, or with permission of the instructor.
Corequisites: None Cross-listed with: None Frequency: Periodically
Student Level: UNDERGRAD & GRAD
Comments: None
Status: OPEN

CHEM559101
Undergraduate Chemical Research I ARMSTRONG, WILLIAM
Fall 2020
The essential feature of this course is an independent research project performed under the supervision of a faculty member. The individual work will be preceded by a series of lectures and demonstrations on the use of the library and several essential laboratory techniques.

Advanced Research in Biochemistry I WEERAPANA, ERANTHIE
Fall 2020
A substantial independent research project performed under the supervision of a faculty member. Seniors whose projects are judged by the department to be of the highest quality, and who maintain a minimum GPA of 3.70, will be nominated for Scholar of the College recognition.

CHEM661101
Scientific Communication in Chemistry I BYERS, JEFFERY
Fall 2020
This course seeks to best facilitate the transition of incoming graduate students to successful researchers in chemistry. Specifically, students in this course will practice and improve on various communication skills including scientific presentations, as well as writing articles and proposals. Ethics and social responsibilities of performing chemical research will also be discussed.

CHEM64001
Computational Chemistry: Model, Method, and Mechanism HAEFFNER, JAN F
Fall 2020
The goal of the course is to develop skills in using computational chemistry software in the Linux operating system environment and to get a basic understanding of the underlying theory and algorithms which these computer programs are built upon. Topics covered include Linux commands and shell script programming, as well as Python script programming, basic understanding of statistical thermodynamics, potential energy surface, stationary points, conformational space, molecular mechanics, quantum chemistry (Schrödinger equation, Hückel method, LCAO-concept, Hartree-Fock and post Hartree-Fock methods, density functional theory). Computer programs such as Gaussian, Jaguar, GaNess, MacroModel and Tinker will be used during the course.
Credits: 03
Room and Schedule: MERKERT CENTER 129,M W F 2;
Satisfies Core Requirement: None
Prerequisites: CHEM4475 AND CHEM4476 AND CHEM2232 AND CHEM2231 AND MATH2202.
Or equivalent. Corequisites: None Cross-listed with: None Frequency: Annually
Student Level: UNDERGRAD & GRAD
Comments: This course is intended for graduate students and will be graded pass/fail.
Status: OPEN

CHEM667101
Physical Chemistry III MOHANTY, UDAYAN
Fall 2020
Building upon the foundations of Physical Chemistry I and II, this course introduces phenomena at the interface between a solid and an electrolyte. It starts with a discussion on the Debye- Hückel theory of electrolytes, followed by studies on ions near charged surface and then moves on to applications to capacitance near the surface/electrolyte interface. The Marcus electron transfer reaction theory is discussed next. With the background information introduced, the course examines applications to the semiconductor/liquid interfaces, with a focus on the potential applications of such systems for energy conversion and storage. Modern characterization techniques such as transient open-circuit-decay, diffusion equation, and titration methods will be studied, in combination with linear potential sweep and cyclic voltammetry as well as electrochemical impedance spectroscopy. The general concepts of photoelectrochemistry and batteries will be introduced within the context of solar energy harvesting and storage.
Credits: 03
Room and Schedule: CAMPION HALL 009,T TH 10 30*;
Satisfies Core Requirement: None
Prerequisites: CHEM4475 and MATH2202 and CHEM4476.
Corequisites: None Cross-listed with: None Frequency: Periodically
Student Level: UNDERGRAD & GRAD
Comments: None
Status: OPEN

CHEM667601
Physical Chemistry: Principles and Applications BAO, JUNWEI L
Fall 2020
This course intends to build a solid foundation for physical-chemistry graduate students to understand chemistry and materials at the microscopic level and to study the physical nature of bonding and chemical reaction dynamics quantitatively. We focus on fundamental principles of quantum mechanics, and their connections to chemistry and chemical physics. Topics covered in this course include principles of quantum mechanics, the connections between classical and quantum dynamics, exactly solvable systems, variational principle, perturbation theory, quantitative molecular orbital theory, electron correlation, introductory Kohn-Sham density-functional theory, and the electronic structures under periodic potential.
Credits: 03
Room and Schedule: MERKERT CENTER 130,M W F 8;HYBRID;
Satisfies Core Requirement: None
Prerequisites: CHEM4475 and CHEM4476 or equivalent.
Corequisites: None Cross-listed with: None Frequency: Annually
Student Level: GRADUATE
Comments: One year undergraduate physical chemistry course that has covered the fundamentals of thermodynamics, quantum mechanics, and statistical mechanics is strongly recommended. At least one and half years of a college level calculus sequence is recommended. Undergraduate students must seek permission to enroll.
Status: OPEN

CHEM772201
Advanced Physical Chemistry/Electronics and Optics WAEGLE, MATTHIAS
Fall 2020
In experimental physical chemistry, we use an assortment of instruments to perform various measurements. In this course, we will explore the basic principles of electronic circuits and optics. The aim of this course is to equip the participants with the necessary knowledge to solve practical problems that are often encountered in experimental physical chemistry research. The participants will develop a fundamental understanding of the operating principles of the most commonly used instruments in physical chemistry laboratories (potentiostat, chromatograph, mass spectrometer, FTIR spectrometer, laser, etc.). Further, the participants will develop a solid foundation of electronics, optics, and signal processing (theory and practice). An emphasis is placed on practical problem solving skills. To this end, the course is partitioned into theoretical and practical sessions. During the practical sessions, the students will experiment with electronic filters and oscilloscopes.
Credits: 03
Room and Schedule: BY ARRANGEMENT; Satisfies Core
Requirement: None Prerequisites: None
Corequisites: None Cross-listed with: None Frequency: Periodically
Student Level: GRADUATE
Comments: Students must contact the instructor for information about when and where the course will meet.
Status: OPEN

CHEM779901
Readings and Research I ROBERTS, MARY F
Fall 2020
A course required of Ph.D. matriculants for each semester of research.
Credits: 03

CHEM111501
Fundamentals of Chemistry FOX, DANIEL J
Spring 2021
This course is designed to prepare students for the first semester of General Chemistry. The course will consist of two major parts, the first of which will focus on mathematical skills that are fundamental to the deeper understanding of chemical concepts, including but not limited to: ratios, percentages, algebra, exponentials, base 10, and natural logarithms. The second part of the course will focus on basic chemical concepts such as atomic structure and isotopes, balancing chemical equations, and stoichiometry. Once they have mastered these proficiencies, students will have a strong foundation in the skills necessary to succeed in higher level chemistry courses.

CHEM111801
Honors Modern Chemistry II WASA, MASAYUKI
Spring 2021
This is the second part of a one-year course that serves as the Honors alternative to the two-semester General Chemistry CHEM1109-1110. This course will build upon the chemical fundamentals that were covered in the first semester to introduce organic chemistry as well as its physical basis. Topics to be covered include the structure and reactivity of organic compounds.

Credits: 03
Room and Schedule: MERKERT CENTER 130, T TH 9*; HYBRID; Satisfies Core Requirement: Natural Science
Prerequisites: CHEM1117.
Corequisites: CHEM1122 AND CHEM1120.
Cross-listed with: None Frequency: Annually
Student Level: CORE
Comments: Department permission required.
Status: OPEN

CHEM112001
Honors Modern Chemistry Laboratory II YOUNG, ALLISON P
Spring 2021
This laboratory required for all students enrolled in CHEM1118. This laboratory course stresses discovery-based experiments. It uses state-of-the-art instrumentation to illustrate the principles discussed in CHEM1117-1118 and introduces students to techniques used in modern chemical research. One three-hour period per week.

Credits: 01
Room and Schedule: MERKERT CENTER 120, M 1-4; HYBRID;

Status: OPEN

CHEM1223001
Organic Chemistry II BYERS, JEFFERY
Spring 2021
An introduction to the chemistry, properties, and uses of organic compounds. The correlation of structure with properties and reaction mechanisms and the modern approach to structural and synthetic problems are stressed throughout. In the laboratory, the aim is acquisition of sound experimental techniques through the synthesis of selected compounds.

Credits: 03
Room and Schedule: M W F 9:00-12:00; SYNCHRONOUS;
Satisfies Core Requirement: None
Prerequisites: CHEM2231. Corequisites: CHEM2234. CHEM2236. Cross-listed with: None
Frequency: Annually
Student Level: UNDERGRAD-MAJORS

Laboratory required of all students enrolled in CHEM2232. One four-hour period per week. Having acquired the necessary lab skills in Organic Chem Lab I, students now can carry out reaction chemistry in the laboratory that is being taught in the lecture course.
Credits: 01
Room and Schedule: MERKERT CENTER 018, T 5-8 50;HYBRID;
Satisfies Core Requirement: None
Prerequisites: CHEM2233. Corequisites: CHEM2232. Cross-listed with: None
Frequency: Annually
Student Level: UNDERGRAD-MAJORS
Comments: Lab fee required
Status: CLOSED

CHEM223408
Organic Chemistry Laboratory II JAYASUNDERA, THUSITHA
Spring 2021
Laboratory required of all students enrolled in CHEM2232. One four-hour period per week. Having acquired the necessary lab skills in Organic Chem Lab I, students now can carry out reaction chemistry in the laboratory that is being taught in the lecture course.
Credits: 01
Room and Schedule: MERKERT CENTER 018, W 5-8 50;HYBRID;
Satisfies Core Requirement: None
Prerequisites: CHEM2233. Corequisites: CHEM2232. Cross-listed with: None
Frequency: Annually
Student Level: UNDERGRAD-MAJORS
Comments: Lab fee required

CHEM223612
Organic Chemistry Discussion II DEAK, HOLLY L
Spring 2021
Required of all students in CHEM2232. Discussion of organic synthesis design, spectroscopic analysis, reaction mechanisms, and other lecture topics in small groups.
Credits: 0.0
Room and Schedule: CAMPION HALL 204, TH 4; Satisfies Core Requirement: None
Prerequisites: None
Corequisites: CHEM2232. Cross-listed with: None Frequency: Annually
Student Level: UNDERGRAD-MAJORS
Comments: None
Status: OPEN

CHEM223613
Organic Chemistry Discussion II DEAK, HOLLY L
Spring 2021
Required of all students in CHEM2232. Discussion of organic synthesis design, spectroscopic analysis, reaction mechanisms, and other lecture topics in small groups.
Credits: 0.0
Room and Schedule: CAMPION HALL 204, F 1; Satisfies Core Requirement: None
Prerequisites: None
Corequisites: CHEM2232. Cross-listed with: None Frequency: Annually
Student Level: UNDERGRAD-MAJORS
Comments: None
Status: OPEN

CHEM223614
Organic Chemistry Discussion II BYERS, JEFFERY
Spring 2021
Required of all students in CHEM2232. Discussion of organic synthesis design, spectroscopic analysis, reaction mechanisms, and other lecture topics in small groups.
Credits: 0.0
Room and Schedule: MERKERT CENTER 130, F 2; Satisfies Core Requirement: None
Prerequisites: None
Corequisites: CHEM2232. Cross-listed with: None Frequency: Annually
Student Level: UNDERGRAD-MAJORS
Comments: None
Status: OPEN

CHEM223615
Organic Chemistry Discussion II BYERS, JEFFERY
Spring 2021
Required of all students in CHEM2232. Discussion of organic synthesis design, spectroscopic analysis, reaction mechanisms, and other lecture topics in small groups.
Credits: 0.0
Room and Schedule: MERKERT CENTER 127, M 2; Satisfies Core Requirement: None
Prerequisites: None
Corequisites: CHEM2232. Cross-listed with: None Frequency: Annually
Student Level: UNDERGRAD-MAJORS
Comments: None
Status: OPEN

CHEM223616
Organic Chemistry Discussion II DEAK, HOLLY L
Spring 2021
Required of all students in CHEM2232. Discussion of organic synthesis design, spectroscopic analysis, reaction mechanisms, and other lecture topics in small groups.
Credits: 0.0
Room and Schedule: CAMPION HALL 231, W 2; Satisfies Core Requirement: None
Prerequisites: None
Corequisites: CHEM2232. Cross-listed with: None Frequency: Annually
Student Level: UNDERGRAD-MAJORS
Comments: None
Status: OPEN

CHEM223801
Gateway: Organic Chemistry Discussion II DEAK, HOLLY L
Spring 2021
Required of all students in Gateway Organic Chemistry. Discussion will offer a fairly comprehensive review of the material presented in lecture, with a focus on the key concepts needed for problem-solving in a small group setting.
Credits: 0.1
Room and Schedule: MERKERT CENTER 130, W 2; Satisfies Core Requirement: None
Prerequisites: None
Corequisites: CHEM1110. Cross-listed with: None Frequency: Annually
Student Level: UNDERGRAD-MAJORS Comments: Department permission required. Status: OPEN

CHEM224201
Honors Organic Chemistry Discussion II CHATTERJEE, ABHISHEK
Spring 2021
This course is a continuation of the CHEM1117-1118 honors sequence and will concentrate on the structure, bonding, and reactivity of organic compounds. Particular emphasis will be placed on stereochemistry, conformational analysis, reaction mechanisms, principles of organic synthesis, and modern spectroscopic methods.
Credits: 0.3
Room and Schedule: MERKERT CENTER 129, T TH 9*; HYBRID; Satisfies Core Requirement: None
Prerequisites: CHEM2241.
Corequisites: CHEM2224 AND CHEM2246.
Cross-listed with: None Frequency: Annually
Student Level: UNDERGRAD-MAJORS
Comments: Registration with instructor’s approval only.
Status: CLOSED

CHEM224601
Honors Organic Chemistry Discussion II None
Spring 2021
Required of all students in CHEM2242. Discussion of organic synthesis design, spectroscopic analysis, reaction mechanisms, and other lecture topics in small groups.
Credits: 0.0
Room and Schedule: MERKERT CENTER 129, M 6; Satisfies Core Requirement: None
Prerequisites: None
Corequisites: CHEM2242. Cross-listed with: None Frequency: Annually
Student Level: UNDERGRAD-MAJORS
Comments: None
Status: OPEN

CHEM224602
Honors Organic Chemistry Discussion II None
Spring 2021
Required of all students in CHEM2242. Discussion of organic synthesis design, spectroscopic analysis, reaction mechanisms, and other lecture topics in small groups.
Credits: 0.0
Room and Schedule: MERKERT CENTER 129, T 7; Satisfies Core Requirement: None
Prerequisites: None
Corequisites: CHEM2242. Cross-listed with: None Frequency: Annually
Student Level: UNDERGRAD-MAJORS
Comments: None
Status: OPEN

CHEM332201
Introduction to Inorganic Chemistry FOX, DANIEL J
Spring 2021
This course offers an introduction to inorganic chemistry. Topics include: applications of group theory to describe structure and bonding, coordination chemistry, organometallic chemistry, bioinorganic chemistry, crystal packing, and semiconducting and superconducting materials.
Credits: 0.3
Room and Schedule: MERKERT CENTER 130, M W F 11; Satisfies Core Requirement: None Prerequisites: CHEM1110 AND CHEM1109. Corequisites: CHEM3324.
Cross-listed with: None Frequency: Annually
Student Level: UNDERGRAD-MAJORS
Comments: Though not required, one year of Organic Chemistry (CHEM2231-2232 or CHEM1118 and CHEM2241) is recommended as a prerequisite for this course.
Status: OPEN

CHEM332301
Inorganic Chemistry Discussion None
Spring 2021
Required of all students in CHEM3322. Discussion of lecture topics in small groups.
Credits: 0.0
Room and Schedule: MERKERT CENTER 129, M 5; Satisfies Core Requirement: None
Prerequisites: None
Corequisites: None Cross-listed with: None Frequency: Annually
Student Level: UNDERGRAD-MAJORS
Comments: None
Status: OPEN

CHEM332302
Inorganic Chemistry Discussion None
Spring 2021
Required of all students in CHEM3322. Discussion of lecture topics in small groups.
Credits: 00
Room and Schedule: CARNEY HALL 007, W 5; Satisfies Core
Requirement: None Prerequisites: None
Corequisites: None Cross-listed with: None Frequency: Annually
Student Level: UNDERGRAD-MAJORS
Comments: None
Status: OPEN

CHEM332401
Inorganic Chemistry Laboratory FOX, DANIEL J
Spring 2021
Laboratory required of all students enrolled in CHEM3322. One four-hour period per week.
Credits: 01
Room and Schedule: MERKERT CENTER 120, W 12-4;
Satisfies Core Requirement: None
Prerequisites: None Corequisites: CHEM3322. Cross-listed
with: None Frequency: Annually
Student Level: UNDERGRAD-MAJORS
Comments: Lab fee required.
Status: OPEN

CHEM332402
Inorganic Chemistry Laboratory FOX, DANIEL J
Spring 2021
Laboratory required of all students enrolled in CHEM3322. One four-hour period per week.
Credits: 01
Room and Schedule: MERKERT CENTER 120, TH 12-4;
Satisfies Core Requirement: None
Prerequisites: None Corequisites: CHEM3322. Cross-listed
with: None Frequency: Annually
Student Level: UNDERGRAD-MAJORS
Comments: Lab fee required.
Status: CLOSED

CHEM339702
Research Module DEPARTMENT
Spring 2021
Students may engage in a research project that is limited in scope under the supervision of a faculty member.
Credits: 01
Room and Schedule: BY ARRANGEMENT;
Satisfies Core Requirement: None Prerequisites: With permission of the Department. Corequisites: None
Cross-listed with: None Frequency: Annually
Student Level: UNDERGRAD-MAJORS
Comments: None
Status: OPEN

CHEM339703
Research Module WEERAPANA, ERANTHIE
Spring 2021
Students may engage in a research project that is limited in scope under the supervision of a faculty member.
Credits: 01
Room and Schedule: BY ARRANGEMENT; Satisfies Core
Requirement: None Prerequisites: With permission of the
Department. Corequisites: None
Cross-listed with: None Frequency: Annually
Student Level: UNDERGRAD-MAJORS
Comments: None
Status: OPEN

CHEM339705
Research Module LIU, SHIH-YUAN
Spring 2021
Students may engage in a research project that is limited in scope under the supervision of a faculty member.
Credits: 01
Room and Schedule: BY ARRANGEMENT;
Satisfies Core Requirement: None
Prerequisites: With permission of the Department. Corequisites: None Cross-listed with: None Frequency: Annually
Student Level: UNDERGRAD-MAJORS
Comments: None
Status: OPEN

CHEM339708
Research Module CHATTERJEE, ABHISHEK
Spring 2021
Students may engage in a research project that is limited in scope under the supervision of a faculty member.
Credits: 01
Room and Schedule: BY ARRANGEMENT; Satisfies Core
Requirement: None Prerequisites: With permission of the Department. Corequisites: None
Cross-listed with: None Frequency: Annually
Student Level: UNDERGRAD-MAJORS
Comments: None
Status: OPEN

CHEM446201
Biochemistry II NIU, JIA
Spring 2021
This course is a two-semester introductory-level course in biochemistry. Topics in the first semester concentrate on protein structure and function, bioenergetics, kinetics and mechanisms of enzyme reactions, intermediary metabolism, control of metabolic pathways, and photosynthesis. Topics in the second semester concentrate on the structure of nucleic acids, recombinant DNA technology, mechanisms of gene rearrangements, DNA replication, RNA synthesis and splicing, protein synthesis, control of gene expression, membrane transport, and hormone action. Experimental methods will also be discussed as they relate to course topics.
Credits: 03
Room and Schedule: T TH 9*; ONLINE; SYNCHRONOUS;
Satisfies Core Requirement: None Prerequisites: CHEM2232 AND CHEM4461. OR equivalent.
Corequisites: CHEM4464. Cross-listed with: None Frequency: Annually
Student Level: UNDERGRAD & GRAD
Comments: None
Status: OPEN

CHEM446401
Biochemistry Discussion II None
Spring 2021
Required of all students in CHEM4462. Discussion of lecture topics and problem-solving methods, in small groups.
Credits: 00
Room and Schedule: MERKERT CENTER 130, W 6; HYBRID;
Satisfies Core Requirement: None Prerequisites: None Corequisites: CHEM4462. Cross-listed
with: None Frequency: Annually
Student Level: UNDERGRAD & GRAD
Comments: None
Status: OPEN

CHEM446402
Biochemistry Discussion II None
Spring 2021
Required of all students in CHEM4462. Discussion of lecture topics and problem-solving methods, in small groups.
Credits: 00
Room and Schedule: HIGGINS HALL 225, T 6; HYBRID;
Satisfies Core Requirement: None Prerequisites: None Corequisites: CHEM4462. Cross-listed
with: None Frequency: Annually
Student Level: UNDERGRAD & GRAD
Comments: None
Status: OPEN

CHEM446403
Biochemistry Discussion II None
Spring 2021
Required of all students in CHEM4462. Discussion of lecture topics and problem-solving methods, in small groups.
Credits: 00
Room and Schedule: MERKERT CENTER 129, W 7; HYBRID;
Satisfies Core Requirement: None Prerequisites: None Corequisites: CHEM4462. Cross-listed
with: None Frequency: Annually
Student Level: UNDERGRAD & GRAD
Comments: None
Status: CLOSED
Sophomores or juniors who show exceptional ability may engage in an independent research project under the supervision of a faculty member. The experimental work will be preceded by library research on the project and training in essential laboratory techniques.

**Credits:** 03

**Room and Schedule:** BY ARRANGEMENT;

**Satisfies Core Requirement:** None

**Prerequisites:** CHEM1109 AND CHEM1110. With permission of the Instructor. With permission of the Department.

**Corequisites:** None

**Frequency:** Annually

**Student Level:** UNDERGRAD-MAJORS

**Comments:** CHEM5591-5592 or CHEM5593-5594 cannot be taken concurrently.

**Status:** OPEN

---

**CHEM449207**  
Introduction to Undergraduate Research II MOHANTY, UDAYAN  
Spring 2021

Sophomores or juniors who show exceptional ability may engage in an independent research project under the supervision of a faculty member. The experimental work will be preceded by library research on the project and training in essential laboratory techniques.

**Credits:** 03

**Room and Schedule:** BY ARRANGEMENT;

**Satisfies Core Requirement:** None

**Prerequisites:** CHEM1109 AND CHEM1110. With permission of the Instructor. With permission of the Department.

<td>This course will present concepts of organometallic chemistry, e.g., the chemistry of compounds that have bonds between metals and carbon. Organotransition metal chemistry will be emphasized. Among the areas to be covered will be structure and bonding in organotransition metal complexes, ligand systems, catalysis, polymerizations, common reactions, and applications in organic synthesis.</td>

<td>The purpose of this course is to expose students to the wide scope of metal-dependent enzymes and proteins in biology and the mechanism by which these metallocofactors promote unique and complex biochemical transformations. By the end of the course, students will have: (1) a detailed appreciation for the history, direction, and future of the field of metallobiochemistry, and (2) a set of skills that allows them to critically interpret biochemical and spectroscopic data from the primary literature and infer the structure, function, and mechanisms of unknown metalloproteins.</td>

<td>Innovations in the fields of biology and medicine over the last three decades have been rapid and immense. This course will focus on studying the applications of magnetic resonance to solve problems in chemistry, chemical biology, biochemistry, and biophysics. Hands-on experience with the complete NMR chemical shift assignments (backbone, side chain, distance) for the structure determination of proteins, and using NMR to probe the dynamics of protein- ligand binding interactions, will be the two central projects of the course. Time permitting, the role of electron paramagnetic resonance in biology will also be discussed.</td>

CHEM555201
Advanced Methods in Chemistry I METZ, KENNETH R
Spring 2021
This course discusses the principles, methods, and applications of instrumental techniques such as calorimetry, chromatography, lasers, and optical spectroscopy in modern chemistry, along with techniques for the analysis and interpretation of experimental data. It is intended mainly for third year students. The accompanying laboratory includes experiments with these methods and emphasizes experimental design, data interpretation, and the presentation of results in written and oral formats.
Credits: 04
Room and Schedule: MERKERT CENTER 130, TH 6-8;
Satisfies Core Requirement: None Prerequisites: CHEM4475 AND CHEM3351. Corequisites: CHEM5554.
Cross-listed with: None

Advanced Research in Biochemistry II GAO, JIANMIN
Spring 2021
A substantial independent research project performed under the supervision of a faculty member. Seniors whose projects are judged by the department to be of the highest quality, and who maintain a minimum GPA of 3.70, will be nominated for Scholar of the College recognition.
Credits: 06
Room and Schedule: BY ARRANGEMENT; Satisfies Core Requirement: None
Corequisites: None Cross-listed with: None Frequency: Annually
Student Level: UNDERGRAD-MAJORS
Comments: Seniors only.
Arrangement with an individual faculty member and departmental permission is required. This is a two-semester course and may not be taken for only one semester.
Status: OPEN

CHEM559803
Advanced Research in Biochemistry II MC LAUGHLIN, LARRY
Spring 2021
A substantial independent research project performed under the supervision of a faculty member. Seniors whose projects are judged by the department to be of the highest quality, and who maintain a minimum GPA of 3.70, will be nominated for Scholar of the College recognition.
Credits: 06
Room and Schedule: BY ARRANGEMENT; Satisfies Core Requirement: None
Corequisites: None Cross-listed with: None Frequency: Annually
Student Level: UNDERGRAD-MAJORS
Comments: Seniors only.
Arrangement with an individual faculty member and departmental permission is required. This is a two-semester course and may not be taken for only one semester.
Status: OPEN

CHEM559804
Advanced Research in Biochemistry II ROBERTS, MARY F
Spring 2021
A substantial independent research project performed under the supervision of a faculty member. Seniors whose projects are judged by the department to be of the highest quality, and who maintain a minimum GPA of 3.70, will be nominated for Scholar of the College recognition.
Credits: 06
Room and Schedule: BY ARRANGEMENT; Satisfies Core Requirement: None
Corequisites: None Cross-listed with: None Frequency: Annually
Student Level: UNDERGRAD-MAJORS
Comments: Seniors only.
Arrangement with an individual faculty member and departmental permission is required. This is a two-semester course and may not be taken for only one semester.
Status: OPEN

CHEM559805
Advanced Research in Biochemistry II WEERAPANA, ERANTHIE
Spring 2021
A substantial independent research project performed under the supervision of a faculty member. Seniors whose projects are judged by the department to be of the highest quality, and who maintain a minimum GPA of 3.70, will be nominated for Scholar of the College recognition.
Credits: 06
Room and Schedule: BY ARRANGEMENT; Satisfies Core Requirement: None
Corequisites: None Cross-listed with: None Frequency: Annually
Student Level: UNDERGRAD-MAJORS
Comments: Seniors only.
Arrangement with an individual faculty member and departmental permission is required. This is a two-semester course and may not be taken for only one semester.
Status: OPEN

CHEM660201
Senior Thesis Research in Chemistry II MORKEN, JAMES P
Spring 2021
An independent research project performed under the supervision of a faculty member. A written thesis is required to culminate the project.
Credits: 03

CHEM660202
Senior Thesis Research in Biochemistry II HOVEYDA, AMIR H
Spring 2021
An independent research project performed under the supervision of a faculty member. A written thesis is required to culminate the project.
Credits: 03
Room and Schedule: BY ARRANGEMENT; Satisfies Core Requirement: None
Corequisites: None Cross-listed with: None Frequency: Annually
Student Level: UNDERGRAD-MAJORS
Comments: None
Status: OPEN

CHEM660203
Senior Thesis Research in Chemistry II MOHANTY, UDAYAN
Spring 2021
An independent research project performed under the supervision of a faculty member. A written thesis is required to culminate the project.
Credits: 03
Room and Schedule: BY ARRANGEMENT; Satisfies Core Requirement: None
Corequisites: None Cross-listed with: None Frequency: Annually
Student Level: UNDERGRAD-MAJORS
Comments: None
Status: OPEN

CHEM660204
Senior Thesis Research in Chemistry II BYERS, JEFFERY
Spring 2021
An independent research project performed under the supervision of a faculty member. A written thesis is required to culminate the project.
Credits: 03
Room and Schedule: BY ARRANGEMENT; Satisfies Core Requirement: None
Corequisites: None Cross-listed with: None Frequency: Annually
Student Level: UNDERGRAD-MAJORS
Comments: None
Status: OPEN

CHEM660401
Senior Thesis Research in Biochemistry II MC LAUGHLIN, LARRY
Spring 2021
An independent research project performed under the supervision of a faculty member. A written thesis is required to culminate the project.
Credits: 03
Room and Schedule: BY ARRANGEMENT; Satisfies Core Requirement: None
Corequisites: None Cross-listed with: None Frequency: Annually
Student Level: UNDERGRAD-MAJORS
Comments: None
Status: OPEN

CHEM660402
Senior Thesis Research in Biochemistry II GAO, JIANMIN
Spring 2021
An independent research project performed under the supervision of a faculty member. A written thesis is required to culminate the project.
Credits: 03
Room and Schedule: BY ARRANGEMENT; Satisfies Core Requirement: None
Corequisites: None Cross-listed with: None Frequency: Annually
Student Level: UNDERGRAD-MAJORS
Comments: None
Status: OPEN

CHEM660403
Senior Thesis Research in Biochemistry II WEERAPANA, ERANTHIE
Spring 2021
An independent research project performed under the supervision of a faculty member. A written thesis is required to culminate the project.
CHEM661201
Scientific Communication in Chemistry II WEERAPANA, ERANTHIE
Spring 2021
A continuation of CHEM6611. This course seeks to best facilitate the transition of incoming graduate students to successful researchers in chemistry. Specifically, students in this course will practice and improve on various communication skills including scientific presentations, as well as writing articles and proposals. Ethics and social responsibilities of performing chemical research will also be discussed.
Credits: 02

## Classical Studies Courses: Summer 2020

**CLAS106301**  
**Intensive Reading in Latin**  
**KAKAVAS, MARIA**  
**Summer 2020**  
The goal of this course is to build solid reading skills in the Latin language by providing an intensive and comprehensive introduction to the basics of Latin grammar and syntax. The course meets for twelve weeks and is divided into two sessions. The first session will begin to guide students through the fundamentals of the language using Wheelock's *Latin*. The second session will complete Wheelock's *Latin* and proceed to readings in the original from Caesar, Cicero, Catullus, and others.  
**Credits:** 03  
**Room and Schedule:** M TH 6:30-9:REMOTE COURSE;;SYNCHRONOUS;MAY 13 - JUL 30;  
**Satisfies Core Requirement:** None  
**Prerequisites:** None  
**Corequisites:** None  
**Cross-listed with:** None  
**Frequency:** Annually  
**Student Level:** UNDERGRAD & GRAD

**Status:** OPEN

## Classical Studies Courses: Fall 2020

**CLAS101001**  
**Elementary Latin I**  
**POLT, CHRISTOPHER B**  
**Fall 2020**  
This course will introduce the fundamentals of Latin grammar and vocabulary. The aim is to prepare students to read simple Latin prose.  
**Credits:** 03  
**Room and Schedule:** M W F 10:ONLINE;SYNCHRONOUS;  
**Satisfies Core Requirement:** None  
**Prerequisites:** None  
**Corequisites:** None  
**Cross-listed with:** None  
**Frequency:** Annually  
**Student Level:** UNDERGRAD & GRAD  
**Comments:** None  
**Status:** OPEN

**CLAS101002**  
**Elementary Latin I**  
**THATCHER, MARK R**  
**Fall 2020**  
This course will introduce the fundamentals of Latin grammar and vocabulary. The aim is to prepare students to read simple Latin prose.  
**Credits:** 03  
**Room and Schedule:** M W F 11:ONLINE;SYNCHRONOUS;  
**Satisfies Core Requirement:** None

**CLAS105801**  
**Advanced Intermediate Latin**  
**SUTHERLAND, ELIZABETH H**  
**Fall 2020**  
This course is intended for students who have completed the equivalent of BC's intermediate-level Latin sequence but who need further preparation before joining the advanced Latin courses. We will read a selection of Latin prose and poetry with a focus not only on literary analysis but also on strengthening language ability. Readings vary.  
**Credits:** 03  
**Room and Schedule:** M W F 12;ONLINE;SYNCHRONOUS;  
**Satisfies Core Requirement:** None

**CLAS118601**  
**Greek Civilization**  
**HOFFMAN, GAIL L**  
**Fall 2020**  
An introduction to the art and archaeology, cultural history, and literature of ancient Greece from the Late Bronze Age to the end of the Peloponnesian War (ca. 2000-400 BCE). Readings in the Iliad, Herodotus, and Thucydides, examine how the Trojan, Persian, and Peloponnesian Wars molded Greek civilization. While art and archaeology provide a counterpoint for the broader study of Greek culture.  
**Credits:** 03  
**Room and Schedule:** STOKES HALL 103N,M W F 1;HYBRID;  
**Satisfies Core Requirement:** None  
**Prerequisites:** None  
**Corequisites:** None  
**Cross-listed with:** None

**CLAS220601**  
**Roman History**  
**ESHELEMAN, KENDRA J**  
**Fall 2020**  
A study of the social, political and cultural history of ancient Rome from its foundation by Romulus to the rise of Constantine and late antiquity. The course will focus on the development of Roman social and political institutions, the Roman conquest of the Mediterranean, the evolution of Roman identity, and the rise and spread of Christianity. Emphasis will be on the study of the ancient sources: literary, historiographic, archaeological and epigraphic.  
**Credits:** 03  
**Room and Schedule:** FULTON HALL 250,M W F 12;  
**Satisfies Core Requirement:** History I  
**Prerequisites:** None  
**Corequisites:** None  
**Cross-listed with:** HIST2205  
**Frequency:** Annually  
**Student Level:** UNDERGRAD & GRAD

Comments: None
Status: OPEN

CLA 2333301
Apuleius ESHELMAN, KENDRA J
Fall 2020
Apuleius' "Metamorphoses" (aka the "Golden Ass") is the only ancient Latin novel to survive complete, an exploration of the dark underbelly of Roman imperial society, sex, violence, slavery, witchcraft, banditry, and unholy curiosity. In this course, we will read in Latin all of book three, and large sections of the novella that occupies the center of the work, the "Cupid" and "Psyche." In addition, we will read the entire novel in English.

Credits: 03
Room and Schedule: CAMPION HALL 302,M W 1 30*;

Status: OPEN

CLA 2333701
Vergil POLT, CHRISTOPHER B
Fall 2020
Vergil's Aeneid, the premier work of Roman poetry, recounts the struggles of refugees from the Trojan War as they wander in search of a new home and in the process lay the foundations of Rome. We will read large selections of the epic in Latin and the whole in English, considering how Romans viewed themselves in their broader Mediterranean context, what archetypal values Vergil embodies in his characters, and how the poem speaks to the anxieties and interests of Vergil's contemporaries at the beginning of the Empire.

CLAS105301
Intermediate Ancient Greek II EISENFELD, HANNE E
Spring 2021
This course is designed to develop students proficiency in reading Greek literature in
the original language through intensive readings from two Greek travel narratives:
Book 9 of Homers Odyssey (including the story of the Cyclops) and selections from
Xenophon's Anabasis. We will read the Greek assignments slowly and carefully while
reviewing grammar, combined with discussion of the social and cultural contexts of
these works.

CLAS228001
Beast Literature POLT, CHRISTOPHER B
Spring 2021
From Mother Goose's fairy tales to loccata, we imagine animals often speaking as we do. But what are we saying when we use animals to talk with and about one another? And what does literature featuring articulate animals say about our attitudes towards humans, animals, and the lines we draw between them? This course explores "beast literature" in its various forms (fable, comedy, the novel, epic, debate poetry, etc.), examining its incarnations through ancient Greece and Rome, Medieval Europe, and the modern world.

Communication Courses: Summer 2020

COMM103001
Public Speaking SCHWARTZ, CHRISTINE O
**SUMMER 2020**

**Public Speaking INGRAM, BRETT D**

This course is an introduction to the theory, composition, delivery, and criticism of speeches. Attention is devoted to the four key elements of the speech situation: message, speaker, audience, and occasion. Emphasis in the course is also given to different modes of speaking and a variety of speech types, such as persuasive, ceremonial, and expository addresses. This is a performance course.

**Credits:** 3

**Room and Schedule:** ONLINE COURSE; ASYNCHRONOUS; MAY 13 - JUN 26; Satisfies Core Requirement: None

**Prerequisites:** None

**Cross-listed with:** None

**Frequency:** Annually

**Student Level:** UNDERGRAD ELECT

**Comments:** Required course for all Communication majors

**Status:** OPEN

---

**Public Speaking LINDMARK, JOYCE**

This course is an introduction to the theory, composition, delivery, and criticism of speeches. Attention is devoted to the four key elements of the speech situation: message, speaker, audience, and occasion. Emphasis in the course is also given to different modes of speaking and a variety of speech types, such as persuasive, ceremonial, and expository addresses. This is a performance course.

COMM444901
Crisis Communication FISHMAN, DONALD A
Summer 2020
This course is designed to examine events and situations that potentially threaten the viability of an organization. Attention is devoted to developing an effective crisis communication plan, speaking to multiple stakeholders, decision-making under pressure, and resolving--rather than litigating--organizational problems. Among the studies examined are the Tylenol product tampering incident, the Exxon Valdez accident, the Union Carbide gas leak, the Challenger Space Shuttle disaster, the Three Mile Island accident, and the Pepsi syringe hoax.

COMM106001
Anti-Social Media HARTNETT, KRISTIN A
Fall 2020
Do you ever wonder what toll social media might be taking on your mental health? Do you long to ‘break up’ with your phone and live in the moment? This one-credit (pass-fail) seminar examines student anxieties about technology habits and experiments with practices of mindfulness. The course orientes you to the mind and act more purposefully as a ‘whole person’--in mind, body, and spirit--with the focus on Zen Buddhist ideals of attentiveness and character formation--as opposed to one who is screen-dependent. Short readings, fun viewpoints, meditative journal entries, and small-class discussions will focus on the social, psychological, and emotional consequences of digital experiences (including friendships, learning, privacy, dating, and so on). Students will also set one goal per month, of their own choosing, to try to live differently with their tech habits--self-examining how that change feels and what insights emerge.

Credits: 01

COMM170101
American Social Norms and Values: The Case of Disney ROSENTHAL, RITA
Fall 2020
How does our culture determine social norms, values, and behaviors, and what influence does media have on these? This course examines how one particular media conglomerate, the Disney corporation, influences society's view of acceptable and preferable social constructs. By analyzing Disney's media and other cultural products students will examine the implications and global impact of their persuasive messages.

COMM190201
Digital Storytelling REYNOLDS, PAUL A
Fall 2020
Digital storytelling is an essential part of every community, organization, and business. However, the channels through which stories are told have evolved. With the advent of the internet, digital media now combines tradition with technology. Narratives can be told in new, multidimensional ways with video, audio, blogs, text, images, and graphics. The purpose of this course is to help you understand why communication professionals and, moreover, civilizations throughout human history create and value stories. You will also learn how to employ a variety of digital technologies to create compelling content. This will be achieved through examining the underlying concepts and technical processes involved in telling stories for delivery on the desktop, the mobile device, or tablet.

<td>Sports, Media, Culture</td>
<td>SERAZIO, MICHAEL J</td>
<td>Fall 2020</td>
<td>Sports have long played a vital yet complex role in culture, and this course examines the intersection of sports, the mass media, and society. We will appraise and debate the ways in which sports are functional or problematic in their impact on and relationship to players, fans, journalists, and nations. Students will read both scholarly and journalistic reflections, view popular and documentary film, and analyze fan experiences, mediated presentations, and critical social issues. In short, we will go beyond the box score to understand the importance—and deconstruct the hype—that accompanies modern sports.</td>

<td>Image as Communication</td>
<td>LIVON-GROSMAN, ERNESTO</td>
<td>Fall 2020</td>
<td>The goal of this course is to study how images are formed within the ways in which they are being used to communicate. Following the critical tradition that treats images as a static representation all the way to recent studies that focus on writing with images in the era of interactive media, we will read critical texts while exploring concrete examples taken from books, political posters, films, and social media. What is the relation between text and image? What are the politics of image making? How do images change through different national and cultural settings? And how does the materiality of images define the way we make sense of them? From Walter Benjamin, John Berger, Malcolm Turvey to Noigandres and Laura Mulvey to Harun Farocki we will try to answer some of these questions while looking at concrete examples. We will watch and analyze multimedia productions, read texts, and discuss visual representations from a variety of visual and textual sources. Class and readings in English, audiovisual materials in English and/or with English subtitles.</td>

<td>Spirits, Race, and Culture</td>
<td>VATS, ANJALLI S</td>
<td>Fall 2020</td>
<td>Spirits, Race, and Culture VATS, ANJALLI S Fall 2020 In the early 2000s, the resurgence of Prohibition Era cocktail culture led to renewed interest in hard liquor. As speakeasy style cocktail bars popped up all over the country, the demand for spirits rose. This course examines the racial implications of America's drinking cultures, specifically the complex relationships between race, colonialism, capitalism, and liquor consumption. Using examples such as the construction of cocktail bars, the production of rum, the development of tiki culture, and the disenfranchisement of sugar cane farmers, we will think about the identity implications of drinking.</td>

<td>Fascist Rhetoric and Representation</td>
<td>EROL, ALI E</td>
<td>Fall 2020</td>
<td>Fascist Rhetoric and Representation EROL, ALI E Fall 2020 This course will interrogate the rhetoric and aesthetics of fascism as a system of governmentality and as a mentality, both of which are characterized by a desire for dictatorial control, the forcible suppression of opposing positions and perspectives, and a reassertion of rigid hierarchies of power and privilege. We will survey the origins of fascism in the 20th century Europe, as embodied in political leaders such as Mussolini, Hitler, and Stalin, with particular focus on the ways in fascist ideology was disseminated and absorbed through the production and consumption of popular culture. We will then turn to contemporary manifestations of neo-fascism, including the recent rise of ethno-nationalist groups in America.</td>

COMM221301
Fundamentals of Audio I SCHWARTZ, JUDITH E
Fall 2020
This course is designed to introduce the student to the multifaceted world of sound, in theory and practice. Topics covered include the history of recording techniques, design and use of microphones, and careful listening techniques. The course will present an overview of current audio production software typically used in modern recording studios. Students will work in the audio labs to create professional quality pieces and will take home a portfolio of work at the end of the semester.

Growing Up Gendered: Contemporary Media Representations CUKLANZ, LISA M
Fall 2020
This course explores how conventional and unconventional views of feminine and masculine behaviors for children, adolescents and adults have been circulated in current popular culture through television, film, and advertising over the past two decades. Starting with an examination of children's media, the course will examine how different theorists and popular media have created and analyzed patterns of representation related to gender, identity, and cultural expectations. Throughout the course we will explore how the categories of gender and sexuality intersect with other dimensions of individual identity such as race, class, and religion. The course will examine a range of commonly gendered themes in popular culture, including sports culture, girlhood, eating disorders, consumerism, romance/bromance, and gendered violence.

Digital Media Field Production HOWLEY, RICHARD J
Fall 2020
With the ubiquitous nature of video streaming on desktops, mobile phones, and tablets, the influence of video storytelling has never been greater or more pervasive—and the demand for skilled digital storytellers to fill those increasingly ubiquitous screens is stronger than ever. This course offers professional guidance and hands-on experience to develop the skills, techniques, and disciplines necessary for the creation of digital media produced in the field. Students will write and produce their own video programs, becoming familiar with all aspects of production and post production, including producing, perforforming, directing, single-camera shooting, sound recording, and location lighting, as well as editing, digital effects, and graphics. In the process, students will develop a discerning eye for what makes an effective, professional, aesthetically pleasing video production, while they build a portfolio that can be used during job or graduate program interviews.

COMM222401
The Ideal of the Open Mind SANDEL, ADAM
Fall 2020
In an age of polarized politics, it is immensely difficult to keep an open mind in public debate. Convinced that our side is right and the other wrong, we readily retreat to our respective corners, rally our allies, and prepare to outvote or shout down our opponents. But insofar as we remain committed to democratic deliberation, we must try to understand our fellow citizens and allow citizens around to our way of seeing things, we have to first understand where they're coming from, to understand their respective corners, rally our allies, and prepare to outvote or shout down our opponents. But insofar as we remain committed to democratic deliberation, we must try to understand our fellow citizens and allow citizens around to our way of seeing things, we have to first understand where they're coming from, which means keeping an open mind. In this course, we will address the meaning of the open mind as it has emerged in the Western philosophical tradition from Plato and Aristotle to the present.

COMM222001
Studio Television Production REYNOLDS, PAUL A
Fall 2020
This course is designed to introduce students to the theories, tools, and techniques of television production. The focus of this class is on developing the production skills necessary for creating effective television communication. To pursue this goal, students will combine the information from the course's texts with practical experience in the form of exercises and the creation of their own television programs. While producing and directing their programs, students, working in crews, will learn to operate studio television equipment and develop an understanding of how messages are communicated using "live" or "live-on-tape" production methods.

Introduction to Feminisms MURPHY, ANNALYSSA G
Fall 2020
This introductory course offers both an overview and a foundation for understanding the various movements that make up what has come to be called the feminist movement in the U.S. Because systems of privilege and disadvantage shape women's and men's identities and social positions in multiple and unique ways, Introduction to Feminisms analyzes gender from an interdisciplinary approach and applies numerous academic disciplinary methods to the study of gender, including history, literature, psychology, and sociology, and explores women's and men's experiences within various cultural contexts, including socioeconomic class, race and ethnicity, religion and spirituality, nations of citizenship, origin, and generation.

The Global Internet: politics, power and digital communication SIEKIEWICZ, MATTHEW S
Fall 2020
This course offers a critical look at the history of the Internet and the ways in which online communication technologies are shaping our world. Merging conceptual approaches from the disciplines of cultural studies, globalization theory and international relations, the class will consider the role that new media is playing in shaping the art, entertainment, politics and economics of the new century. Case studies will include close looks at websites such as Twitter, Facebook, World of Warcraft, Match.com and Alibaba.com, as well as considerations of social movements such as Occupy Wall St. and the Arab Spring.

COMM336201
Film Theory and Criticism PASTEL, RENEE L
Fall 2020
This course is structured around the question of how visual media convey and influence the world in which they are created. By surveying some of the major questions raised by theorists from the beginnings of film as a medium to the present, students will gain critical lenses through which to historically and theoretically engage visual media. We will cover topics including: film aesthetics; Marxist, psychoanalytic, feminist, critical race, and queer theoretical approaches to film criticism; television studies; and new media theories. Students will learn how to analyze film on a formal level, taking into account how form creates meaning, and to think historically and theoretically about how film as art and commerce has contributed to shaping “smaller screen” media forms and understandings.

Critical News Studies SEARS, ANNE
Fall 2020
What is news? We will examine the deceptively simple question, paying attention to historical shifts in news organizations, journalistic practice and process, technological forms and sociocultural patterns. We will dissect visual and textual features of news, consider how events become newsworthy, analyze journalistic work routines, identify framing devices, public agendas, editorial power and audience relationships. Topics include climate change, immigration, mass violence and representation. Studying how news works and model of how it can be made differently gives us a guide for navigating news in our personal and professional lives.

Joy, Activism, Justice VATS, ANJALI S
Fall 2020
Discussions of difference and social change often focus on the traumatic as a starting point for conversation. This course begins in a different place, with the proposition that ethics of happiness, connection, and community must anchor and propel activism and justice. Drawing on the work of writers including bell hooks, adrienne maree brown, Joan Morgan, and E. Patrick Johnson we will explore how love, joy, and pleasure can ground progressive projects. We will explore performative practices such as friendship, dance, baking, somatic therapy, queer astrology, culture jamming, meme production, crafting, and political protest as ways of cultivating joyful resistance in activism and justice. This writing-intensive seminar is open to juniors and seniors.

From film to television to mobile apps, this course examines children’s media as an economic, cultural, and political entity and explores the relationships among young people and the contemporary media environment. Students will analyze various scholarly approaches and major debates in the study of children and media while also learning the larger historical contexts of those debates. This course offers a critical/cultural approach that examines the ways in which media industries, institutions, technologies, and texts intersect to produce particular media practices and considers how such practices relate to the production of cultural norms or social power.

As a Communication student at Boston College you have been, and will continue to be, provided with numerous opportunities to learn about communication at both theoretical and practical levels in multiple areas within our discipline (e.g., media, rhetoric, culture, gender, health, interpersonal family). The objective of this course is to assist in you in discerning how your education in the field of communication will prepare you to ask and eventually answer questions about your life, vocation, and role in the lives of others. Each week, a Communication department faculty member or guest speaker from the professional world will address a topic relevant to students on the precipice of entering the workforce. Including (but not limited to): how to discuss academic research in language that resonates with employers in fields such as public advocacy, broadcasting, advertising, public relations, and consulting; whether/how to pursue graduate study; and how to present yourself in job applications and interviews.

Anti-Social Media SERAZIO, MICHAEL J
Spring 2021
Do you ever wonder what toll social media might be taking on your mental health? Do you long to 'break up' with your phone and live in the moment? This
Digital Storytelling REYNOLDS, PAUL A
Spring 2021
Storytelling is an essential part of every community, organization, and business. However, the channels through which stories are told have evolved. With the advent of the internet, digital media now combines tradition with technology. Narratives can be told in new, multidimensional ways with video, audio, blogs, text, images, and graphics. The purpose of this course is to help you understand why communication professionals and, moreover, civilizations throughout human history create and value stories. You will also learn how to employ a variety of digital technologies to create compelling content. This will be achieved through examining the underlying concepts and technical processes involved in telling stories for delivery on the desktop, the mobile device, or tablet.

Masculinity, Sexuality, and Difference INGRAM, BRETT D
Spring 2021
This course will examine constructions of masculinity and sexuality in Western society from a critical cultural perspective. We will consider the ways in which cultural narratives about "acceptable" masculine behaviors and attitudes catalyze social conflicts, reinforce established power hierarchies, and organize the modes of being available to people of different gender identities and sexual orientations. We will also evaluate the liberating potential of emergent discourses and practices that seek to cultivate greater acceptance of diversity, and promote social healing. There will be a concentrated focus on popular cultural forms (especially television, film, music, sports, and social media) that are particularly influential to contemporary men and boys.

This course looks at the role that rhetoric (i.e., communication and social interaction) plays in creating, maintaining, and forwarding social inequality in America. The course draws upon critical, scholarly work covering inequality of spirit significance and intimate connections with others. Students will read contemporary reflections, both academic and popular, on these emerging practices while they will also engage with these media spaces in their daily lives in order to reflect on the shifting ways that "religious none" seek meaning and connections in their daily lives.

The Rhetoric of Social Inequality in America WELLS, CELESTE C
COMM106201
Spring 2021
This course examines student anxieties about technology habits and experiments with practices of mindfulness. The course orients you to think and act more purposefully as a ‘whole person’—in keeping with the Jesuit ideals of attentiveness and character formation—as opposed to one who is screen-dependent. Short readings, fun viewings, meditative journal entries, and small-class discussions will focus on the social, psychological, and emotional consequences of digital experiences (including friendships, learning, privacy, dating, and so on). Students will also set one goal per month, of their own choosing, to try to live differently with their tech habits—self-examining how that change feels and what insights emerge.

This course is designed to introduce students to the theories, tools, and techniques of television production. The focus of this class is on developing the production skills necessary for creating effective television communication. To pursue this goal, students will combine the information from the course's texts with practical experience in the form of exercises and the creation of their own television programs. While producing and directing their programs, students, working in crews, will learn to operate studio television equipment and develop an understanding of how messages are communicated using "live" or "live-on-tape" production methods.

Fascist Rhetoric and Representation EROL, ALI E

**Spring 2021**

This course will interrogate the rhetoric and aesthetics of fascism as a system of governmentality and as a mentality, both of which are characterized by a desire for dictatorial control, the forcible suppression of opposing positions and perspectives, and a preoccupation with rigidly defined hierarchies of power and privilege. We will survey the origins of fascism in the 20th century Europe, as embodied in political leaders such as Mussolini, Hitler, and Stalin, with particular focus on the ways in fascist ideology was disseminated and absorbed through the production and consumption of popular culture. We will then turn to contemporary manifestations of neo-fascism, including the recent rise of ethno-nationalist groups in America.

**Communicating Politics MERMELL, JESSE R**

**Spring 2021**

This course takes both a theoretical and practical approach to the art of political communication. Taught by an instructor with extensive field experience, the class surveys major historical trends in campaign advertising, policy messaging, and media relations. It then considers the modern world of political communication, offering an up-to-the-minute assessment of major trends in the field. Students have the opportunity to develop their own skills and portfolios by creating original political advertisements, social media campaigns, policy speeches, and more. The course features a number of notable guest speakers, including active politicians, candidates, and campaign managers.

**Memory and Media PASTEL, RENEE L**

**Spring 2021**

This course focuses on the relationship between memory and moving images. How can film, television, and online video capture and reproduce memory? What role can moving images play in shaping memory, both on an individual and collective level? What claims does the medium make about accurately presenting the past? Through close analysis of film, television, and digital media, we will practice making textually-grounded arguments about specific works while thinking about the broader implications for understanding media and memory. Drawing on material from a variety of time periods and genres, we will use moving images to explore how remembering (and forgetting) shapes a narrative, both on and off the screen.

**Credits:** 3

**COMM224401**

**Criticism as Communication MARTIN, ANDREW**

**Spring 2021**

Critics often get a bad rap these days. Pilloried for nitpicking instead of creating, denounced as “haters” and “spoilers,” the critic’s important, generative role in contributing to and shaping art and culture is too often overlooked. But criticism (which, of course, includes at least as much appreciation and “passionate re-description” as fault-finding) is essential to a robust artistic culture. In this class, we will read, watch, listen to, and look at works of art across many disciplines and genres (including television, film, music, visual art, and more) and engage with the work of the critics who responded to them. We’ll use their examples to produce media criticism, geared for popular, non-academic audiences, of our own, across a variety of formats: writing (in different forms, for different venues), audio (radio segments and podcasting), visual, and more. The purpose of the class is to help us develop well-reasoned and articulated opinions about art, art, and literature, which, as we’ll see over the course of the semester, can be, at their best, works of art in their own right. The course will also give students the skills and context to pursue careers as writers and editors at magazines, newspapers, and websites, as well as in other fields that require critical writing and thinking. More broadly, by developing these skills, students will be better equipped to understand, situate, and contribute to the shifting cultural landscape around them.

COMM228301
Asian Americans in Sport and Society KIM, KYOUNG
Spring 2021
In the mid-twentieth century, sport was a bastion of white supremacy, and it embodied such U.S national bodily ideals as white, heterosexual, Christian, muscular, and male. Histories of racial exclusion, racist violence, gendered policing, and sexual regulations positioned African-American men as outside the normative abilities of white men. In this respect, sport was a microcosm of the racial nation, with the language of citizenship and racial resistance coded within black-white discourse; however, this dichotomy failed to account for the long histories of Asian Americans in the United States. Asian-American sporting cultures trouble the current racial synchronicity between sport and nation while illuminating multiple performances of "belonging." This course highlights the diversity of Asian-American communities and aims to decipher how the ordinary practices of sporting cultures can offer extraordinary knowledge about U.S. society.

Spring 2021
This course is designed to introduce students to historical, critical, and cultural methods in Communication research. Among the topics emphasized are: (1) development of theses and arguments, (2) critical/cultural data collection methods (e.g., archival research and locating texts), and (3) data analysis and interpretation (e.g., critical discourse analysis and textual analysis). The objective of the course is to provide students with the resources to interpret, evaluate, and conduct research in Communication from a critical/cultural perspective.
Credits: 03
Room and Schedule: GASSON HALL 205,T TH 12*:HYBRID;
Satisfies Core Requirement: None Prerequisites: None Corequisites: None Cross-listed with: None Frequency: Annually
Student Level: UNDERGRAD-MAJORS
Comments: One of COMM3330 or COMM3340 is required for the Communication major.
Status: OPEN

COMM333501
Communication Methods: Honors WELLS, CELESTE C
Spring 2021
This course is an honors introduction to research methods used in communication research. Students will learn how to ethically conduct research; develop a working knowledge of the IRB and associated requirements; learn the process of creating a compelling research question/hypothesis; acquire the skills necessary to gather and analyze data; and write initial scholarship regarding their potential thesis project. Overall, this course will create a strong foundation for students who will conduct their own research. Students will demonstrate their understanding of the material as well as their ability to apply the material through exams, a research project, an oral presentation, and daily participation.
Credits: 03
Room and Schedule: T TH 12*:ONLINE;SYNCHRONOUS;
Satisfies Core Requirement: None
Prerequisites: None Corequisites: None Cross-listed with: None Frequency: Annually
Student Level: UNDERGRAD-MAJORS
Comments: Open to students in departmental honors
Status: OPEN

COMM337201
Media Theory SERAZIO, MICHAEL J
Spring 2021
The mass media wields tremendous power. This course investigates that power across a wide variety of social, cultural, and political dimensions. We will read an assortment of theoretical approaches to mass communication, looking at both the structural constraints in the production process and the interpretive agency of audiences. Our targets for analysis will be similarly wide-ranging, drawn from advertising, journalism, entertainment, and social media.
Credits: 03
Room and Schedule: T TH 12*:ONLINE;SYNCHRONOUS;
Satisfies Core Requirement: None
Prerequisites: None Corequisites: None Cross-listed with: None Frequency: Annually
Student Level: UNDERGRAD-MAJORS
Comments: Satisfies the required theory course in the Communication major. Students that have taken Mass Communication Theory may not take Media Theory.
Status: OPEN

COMM337701
Visual Communication Theory BARRY, ANN M
Spring 2021
This course explores the role of perception within visual learning; the nature of images; how public images function in political and cultural discourse; the psychology of the camera eye; differences among television, film, and print images; and controversial media issues.
Credits: 03
Room and Schedule: T TH 12*:ONLINE;SYNCHRONOUS;
Satisfies Core Requirement: None Prerequisites: None Corequisites: None Cross-listed with: None Frequency: Annually
Student Level: UNDERGRAD-MAJORS
Comments: Satisfies the required theory course in the Communication major.
Status: OPEN

COMM337702
Visual Communication Theory BARRY, ANN M
Spring 2021
This course explores the role of perception within visual learning; the nature of images; how public images function in political and cultural discourse; the psychology of the camera eye; differences among television, film, and print images; and controversial media issues.
Credits: 03
Room and Schedule: T TH 1 30*:ONLINE;SYNCHRONOUS;
Satisfies Core Requirement: None Prerequisites: None Corequisites: None Cross-listed with: None Frequency: Annually
Student Level: UNDERGRAD-MAJORS
Comments: Satisfies the required theory course in the Communication major.
Status: OPEN

COMM337801
Critical Theory INGRAM, BRETT D
Spring 2021
This course provides a survey of the major strands of contemporary critical theory, a field of inquiry foundationally rooted in the insights of psychoanalysis and Marxism, and dedicated to intervening in authoritarian and oppressive systems of social control. There will be a particular emphasis on questions of discipline and resistance: how do powerful institutions contain unruly energies, and by what means might liberalitarian impulses find meaningful expression? Our investigation will incorporate feminism, race, queer studies, and affect theory. We will read works by theorists such as Sigmund Freud, Karl Marx, Herbert Marcuse, Louis Althusser, Michel Foucault, Judith Butler, and others.
Credits: 03
COMM442501
Broadcast Century Issues KEITH, MICHAEL C
Spring 2021
The impact of radio and television has been felt around the world. It has altered the way we think and behave. This course is an assessment of the major issues and events that have helped form broadcast media. Topics will be examined within the context of their relationship to society and culture.
Credits: 03
Room and Schedule: None Satisfies Core Requirement: None
Prerequisites: None
Corequisites: None
Cross-listed with: None Frequency: Annually
Student Level: UNDERGRAD-MAJORS
Comments: Students who have previously taken either Media and Cultural Studies, Media and Cultural Theory or Popular Culture Theory should not register for this class.
Status: OPEN

COMM444301
Seeing God and Hearing Ghosts: Spirituality in US MEDIA PETERSON, KRISTIN M
Spring 2021
This writing intensive course will explore the intimate connections between the development of media technologies and the emergence of religious movements in the U.S. Emphasizing the unique relationship of religion and media in American public life, this course will focus on how the disestablishment of religion creates a competitive marketplace in which religions engage with new media technologies to make meaning, maintain community connections, and reach new members. Students will examine how the development of new media technologies presents both opportunities and challenges to various religious groups in the U.S. Cases to be discussed in the class include: how access to mass printing technologies enables publications and sacred texts from emerging religious groups like the Church of Jesus Christ of Latter-Day Saints, the Nation of Islam, and the Jehovah's Witnesses; how radio waves and photography influenced the popularity of spiritualism after the Civil War; how cable networks provided the opportunity for Evangelical Christians to ascend to the center of American public life; and how social media create space for young Muslim Americans to express their faith in contrast to mainstream media stereotypes.
Credits: 03
Room and Schedule: None Satisfies Core Requirement: None
Prerequisites: None
Corequisites: None
Cross-listed with: None Frequency: Annually
Student Level: UNDERGRAD-MAJORS
Comments: Satisfies one of two writing intensive courses required within the Communication major. Restricted to Juniors and Seniors.
Status: CLOSED

COMM444401
Social Movements ROSENTHAL, RITA
Spring 2021
The course is designed to evaluate social movements by examining the characteristics of various movements. Similarities and differences between national and global level movements will be analyzed in terms of the types, stages, and outcomes of the movements. Students will examine the rhetorical, sociological, and philosophical strategies used to enact change in a governmental, cultural, or social establishment.
Credits: 03
Room and Schedule: None Satisfies Core Requirement: None
Prerequisites: None
Corequisites: None
Cross-listed with: None Frequency: Annually
Student Level: UNDERGRAD-MAJORS
Comments: Satisfies one of two writing intensive courses required within the Communication major. Restricted to Juniors and Seniors.
Status: CLOSED

COMM444801
Television Criticism SEARS, ANNE
Spring 2021
This course provides students with methods for critically evaluating the cultural and social impact of television. First, students learn some fundamentals of television production and the structure of the media industry. Based on this knowledge, students examine and practice the critical analysis of contemporary television programs. The goal of the course is to make students more informed critics of our television saturated age.
Credits: 03
Room and Schedule: None Satisfies Core Requirement: None
Prerequisites: None
Corequisites: None
Cross-listed with: None Frequency: Annually
Student Level: UNDERGRAD-MAJORS
Comments: Satisfies one of two writing intensive courses required within the Communication major. Restricted to Juniors and Seniors.
Status: CLOSED

COMM444202
Intercultural Communication EROL, ALI E
Spring 2021
This course studies communication as it relates to society and as it occurs inter-culturally and internationally. In those contexts, questions and issues will be pursued which reveal processes, effects, methods, and critical norms for evaluating interpersonal, group, and mass communication.

<td>COMM447301</td>
<td>Health/Illness in Relationships</td>
<td>DUGGAN, ASHLEY P</td>
<td>Spring 2021</td>
<td>This class integrates communication theories and applications in the contexts of healthcare conversations and decisions, and with organizational and social systems. We consider conversations with health providers, family members, and close friends navigating illness. We address the complexities of communication within broader healthcare structures and the distribution of resources to promote health and address illness. We address disparities in access and communication about quality healthcare such that advances in science, technology, and medicine are unequally distributed. This course considers disparities in substantive ways that require us to consider how relationships are tied to resources, to values, and to larger economic motives. We address communication processes as we unpack each of the complexities in health and illness in relationships.</td>
