Fall 2020
This course gives senior communication majors an opportunity to pursue a 15-20 hour per week internship in a specific field of Communication. Practical experience will be supplemented by discussions of relevant theoretical constructs. Periodic discussion group seminars will enhance a student's immersion in the industry. Adherence to professional protocol is expected. A field research paper is required as well as supervisor evaluations. This course counts as a 3-credit Communication elective.
Credits: 03
Room and Schedule: O'NEILL LIBRARY 253,T TH 7 30* AM;
Satisfies Core Requirement: None
Corequisites: Senior standing, six completed BC communication courses (including core requirements), and permission of the instructor.
Comments: This course may not be repeated. Satisfies one of three elective courses required within the Communication major

COMM106201
Spiritual, but Not Religious, Meaning Making in Media and Culture
PETERSON, KRISTIN M
Spring 2021
When asked to identify their religion, younger generations of Americans increasingly identify as "non" or "unaffiliated." At the same time, young people appear to be pursuing deeper meaning through practices like hiking pilgrimages, joining exercise communities like SoulCycle and CrossFit, reading Harry Potter books as sacred texts, meditating to mindfulness apps, following the latest wellness façad promoted by celebrity gurus, sharing inspirational astrology quotes on Instagram, and participating in digital detox retreats. This one credit course will use digital media and cultural spaces as the main sites to explore the ways young Americans still remain religious in their pursuit of spirit, significance and intimate connections with others. Students will read contemporary reflections, both academic and popular, on these emerging practices while they will also engage with these media spaces in their daily lives in order to reflect on the shifting ways that "religious nones" seek meaning and connections in their daily lives.

COMM170301
The Rhetoric of Social Inequality in America WELLS, CELESTE C
Spring 2021
This course looks at the role that rhetoric (i.e., communication and social interaction) plays in creating, maintaining, and forwarding social inequality in America. The course draws upon critical, scholarly work covering inequality of class, race, gender, and sexuality to analyze artifacts in the media (e.g., commercials, television, film, music). Students will consider the ways that rhetoric regarding inequality, meritocracy, capitalism, and the American Dream has been embedded in their communicative experience and impacted their notion of individual and group responsibility as it relates to inequality in order to become more thoughtful about how they perceive and engage the world.

COMM190201
Digital Storytelling REYNOLDS, PAUL A
Spring 2021
Storytelling is an essential part of every community, organization, and business. However, the channels through which stories are told have evolved. With the advent of the internet, digital media now combines tradition with technology. Narratives can be told in new, multidimensional ways with video, audio, blogs, text, images, and graphics. The purpose of this course is to help you understand why communication professionals and, moreover, civilizations throughout human history create and value stories. You will also learn how to employ a variety of digital technologies to create compelling content. This will be achieved through examining the underlying concepts and technical processes involved in telling stories for delivery on the desktop, the mobile device, or tablet.

COMM218001
Masculinity, Sexuality, and Difference INGRAM, BRETT D
Spring 2021
This course will examine constructions of masculinity and sexuality in Western society from a critical cultural perspective. We will consider the ways in which cultural narratives about "acceptable" masculine behaviors and attitudes catalyze social conflicts, reinforce established power hierarchies, and organize the modes of being available to people of different gender identities and sexual orientations. We will also evaluate the liberating potential of emergent discourses and practices that seek to cultivate greater acceptance of diversity, and promote social healing. There will be a concentrated focus on popular cultural forms (especially television, film, music, sports, and social media) that are particularly influential to contemporary men and boys.

COMM218401
Sports, Media, Culture KIM, KYOUNG-YIM
Spring 2021
Sports have long played a vital yet complex role in culture, and this course examines that intersection of sports, the mass media, and society. We will appraise and debate the ways in which sports are functional or problematic in their impact on and relationship to players, fans, journalists, co-cultural groups, and nations. Students will read both scholarly and journalistic reflections, view popular and documentary film, and analyze fan experiences, mediated presentations, and critical social issues. In short, we will go beyond
the box score to understand the importance—and deconstruct the hype—that accompanies modern sports.

**Fascist Rhetoric and Representation**  
**EROL, ALI E**  
**Spring 2021**  
This course will interrogate the rhetoric and aesthetics of fascism as a system of governmentality and as a mentalilty, both of which are characterized by a desire for dictatorial control, the forcible suppression of opposing positions and perspectives, and a preoccupation with rigidly defined hierarchies of power and privilege. We will survey the origins of fascism in the 20th century Europe, as embodied in political leaders such as Mussolini, Hitler, and Stalin, with particular focus on the ways in fascist ideology was disseminated and absorbed through the production and consumption of popular culture. We will then turn to contemporary manifestations of neo-fascism, including the recent rise of ethno-nationalist groups in America.

**Studio Television Production**  
**HOWLEY, RICHARD J**  
**Spring 2021**  
This course is designed to introduce students to the theories, tools, and techniques of television production. The focus of this class is on developing the production skills necessary for creating effective television communication. To pursue this goal, students will combine the information from the course’s texts with practical experience in the form of exercises and the creation of their own television programs. While producing and directing their programs, students, working in crews, will learn to operate studio television equipment and develop an understanding of how messages are communicated using "live" or "live-on-tape" production methods.

**Communicating Politics MERMELL, JESSE R**

Spring 2021

This course takes both a theoretical and practical approach to the art of political communication. Taught by an instructor with extensive field experience, this course surveys major historical trends in campaign advertising, policy messaging, and media relations. It then considers the modern world of political communication, offering an up-to-the-minute assessment of major trends in the field. Students have the opportunity to develop their own skills and portfolios by creating original political advertisements, social media campaigns, policy speeches, and more. The course features a number of notable guest speakers, including active politicians, candidates, and campaign managers.

**Memory and Media PASTEL, RENEE L**

Spring 2021

This course focuses on the relationship between memory and moving images. How can film, television, and online video capture and reproduce memory? What role can moving images play in shaping memory, both on an individual and collective level? What claims does the medium make about accurately presenting the past? Through close analysis of film, television, and digital media, we will practice making textually-grounded arguments about specific works while thinking about the broader implications for understanding media and memory. Drawing on material from a variety of time periods and genres, we will use moving images to explore how remembering (and forgetting) shapes a narrative, both on and off the screen.

**Credits:** 03

COMM228301
Asian Americans in Sport and Society KIM, KYOUNG-YIM
Spring 2021
In the mid-twentieth century, sport was a bastion of white supremacy, and it embodied such U.S national bodily ideals as white, heterosexual, Christian, muscular, and male. Histories of racial exclusion, racist violence, gendered policing, and sexual regulations positioned Asian-American men as outside the normative abilities of white men. In this respect, sport was a microcosm of the racial nation, with the language of citizenship and racial resistance coded within black-white discourse; however, this dichotomy failed to account for the long histories of Asian Americans in the United States. Asian-American sporting cultures trouble the current racial synchronicity between sport and nation while illuminating multiple performances of "belonging." This course highlights the diversity of Asian-American communities and aims to decipher how the ordinary practices of sporting cultures can offer extraordinary knowledge about U.S. society.

Room and Schedule: GASSON HALL 205, T TH 12*: Satisfies Core Requirement: None Prerequisites: None Corequisites: None Cross-listed with: None Frequency: Annually
Student Level: UNDERGRAD-MAJORS
Comments: One of COMM3330 or COMM3340 is required for the Communication major.
Status: OPEN

COMM334002
Communication Methods: Critical/Cultural HOGAN, LINDSAY R
Spring 2021
This course is designed to introduce students to historical, critical, and cultural methods in Communication research. Among the topics emphasized are: (1) development of theories and arguments, (2) critical/cultural data collection methods (e.g., archival research and locating texts), and (3) data analysis and interpretation (e.g., critical discourse analysis and textual analysis). The objective of the course is to provide students with the resources to interpret, evaluate, and conduct research in Communication from a critical/cultural perspective.
Credits: 03
Room and Schedule: GASSON HALL 205, T TH 1 30*;
Satisfies Core Requirement: None Prerequisites: None Corequisites: None Cross-listed with: None Frequency: Annually
Student Level: UNDERGRAD-MAJORS
Comments: One of COMM3330 or COMM3340 is required for the Communication major.

COMM337201
Media Theory SERAZIO, MICHAEL J
Spring 2021
The mass media wields tremendous power. This course investigates that power across a wide variety of social, cultural, and political dimensions. We will read an assortment of theoretical approaches to mass communication, looking at both the structural constraints in the production process and the interpretive agency of audiences. Our targets for analysis will be similarly wide-ranging, drawn from advertising, journalism, entertainment, and social media.
Credits: 03
Room and Schedule: GASSON HALL 204, T TH 9*; HYBRID;
Satisfies Core Requirement: None
Prerequisites: None Corequisites: None Cross-listed with: None Frequency: Annually
Student Level: UNDERGRAD-MAJORS
Comments: Satisfies the required theory course in the Communication major. Students that have taken Mass Communication Theory may not take Media Theory.
Status: OPEN

COMM337701
Visual Communication Theory BARRY, ANN M
Spring 2021
This course explores the role of perception within visual learning; the nature of images; how public images function in political and cultural discourse; the psychology of the camera eye; differences among television, film, and print images; and controversial media issues.
Credits: 03
Room and Schedule: T TH 12*; ONLINE; SYNCHRONOUS;
Satisfies Core Requirement: None Prerequisites: None Corequisites: None Cross-listed with: None Frequency: Annually
Student Level: UNDERGRAD-MAJORS
Comments: Satisfies the required theory course in the Communication major.
Status: OPEN

COMM337702
Visual Communication Theory BARRY, ANN M
Spring 2021
This course explores the role of perception within visual learning; the nature of images; how public images function in political and cultural discourse; the psychology of the camera eye; differences among television, film, and print images; and controversial media issues.
Credits: 03
Room and Schedule: T TH 1 30*; ONLINE; SYNCHRONOUS;

Comments: Satisfies the required theory course in the Communication major.
Status: OPEN

COMM337801
Critical Theory INGRAM, BRETT D
Spring 2021
This course provides a survey of the major strands of contemporary critical theory, a field of inquiry foundationally rooted in the insights of psychoanalysis and Marxism, and dedicated to intervening in authoritarian and oppressive systems of social control. There will be a particular emphasis on questions of discipline and resistance: how do powerful institutions contain unruly energies, and by what means might liberatory impulses find meaningful expression? Our investigation will incorporate feminism, race, queer studies, and affect theory. We will read works by theorists such as Sigmund Freud, Karl Marx, Herbert Marcuse, Louis Althusser, Michel Foucault, Judith Butler, and others.
Credits: 03
COMM442501
Broadcast Century Issues KEITH, MICHAEL C
Spring 2021
This course examines the cultural impact of globalization on the traditional centers and peripheries of media production. The course will cover topics such as the shifting definitions of cultural imperialism; the role of the United Nations in regulating cultural products; the latest transnational media mergers; the strategies of global television programmers such as CNN, MTV, or Discovery; the increasing commercialization of media systems around the world; and the role of media in relation to war and terrorism. This writing-intensive seminar is open to juniors and seniors.
Credits: 03
Room and Schedule: None Satisfies Core Requirement: None
Prerequisites: None
Corequisites: None
Cross-listed with: None Frequency: Annually
Student Level: UNDERGRAD-MAJORS
Comments: Satisfies one of two writing intensive courses required within the Communication major. Restricted to Juniors and Seniors.
Status: CLOSED

COMM442901
Globalization and the Media BRENN, MARCUS J
Spring 2021
This class examines the cultural impact of globalization on the traditional centers and peripheries of media production. The course will cover topics such as the shifting definitions of cultural imperialism; the role of the United Nations in regulating cultural products; the latest transnational media mergers; the strategies of global television programmers such as CNN, MTV, or Discovery; the increasing commercialization of media systems around the world; and the role of media in relation to war and terrorism. COMM443401
Advanced Visual Theory and Aesthetics BARRY, ANN M
Spring 2021
This course builds on study in Visual Communication Theory, extending into aesthetic principles founded in Eastern and Western visual cultural ideas. Visual design and aesthetics are explored in both our natural appreciation of beauty and through social constructions. Neurological principles provide the foundation for exploring visual persuasion, art appreciation, advertising techniques, political propaganda, and how visual culture creates our mental world.
Credits: 03

COMM444202
Intercultural Communication EROL, ALI E
Spring 2021
This course studies communication as it relates to society and as it occurs inter-culturally and internationally. In those contexts, questions and issues will be pursued which reveal processes, effects, methods, and critical norms for evaluating interpersonal, group, and mass communication.
Credits: 03

COMM444401
Social Movements ROSENTHAL, RITA
Spring 2021
This course provides students with methods for critically evaluating the cultural and social impact of television. First, students learn some fundamentals of television production and the structure of the media industry. Based on this knowledge, students examine and practice the critical analysis of contemporary television programs. The goal of the course is to make students more informed critics of our television saturated age.

COMM444901
Crisis Communication FISHMAN, DONALD A
Spring 2021
This course is designed to examine events and situations that potentially threaten the viability of an organization. Attention is devoted to developing an effective crisis communication plan, speaking to multiple stakeholders, decision-making under pressure, and resolving—rather than litigation—organizational problems. Among the studies examined are the Tylenol product tampering incident, the Exxon Valdez accident, the Union Carbide gas leak, the Challenger Space Shuttle disaster, the Three Mile Island accident, and the Pepsi syruping hoax.

COMM445501
Comedy Studies Seminar SIENKIEWICZ, MATTHEW S
Spring 2021
This course surveys major theories of comedy and applies them to the world of contemporary media. Students will study major thinkers in the field of comedy, talk to creators of comedy, and analyze a wide range of media ranging from silent cinema to contemporary sitcoms to the latest in social media. Students will write a research paper that combines theories of comedy with the economics of media in order to understand how comedy creates both laughs and profits while also playing a key role in contemporary politics and society.

COMM447301
Health/Illness in Relationships DUGGAN, ASHLEY P
Spring 2021
This class integrates communication theories and applications in the contexts of healthcare conversations and decisions, and with organizational and social systems. We consider conversations with health providers, family members, and close friends navigating illness. We address the complexities of communication within broader healthcare structures and the distribution of resources to promote health and address illness. We address disparities in access and communication about quality healthcare such that advances in science, technology, and medicine are unequally distributed. This course considers disparities in substantive ways that require us to consider how relationships are tied to resources, to values, and to larger economic motives. We address communication processes as we unpack each of the complexities in health and illness in relationships.

Advanced Topics PETERSON, KRISTIN M
Spring 2021
This course is an advanced seminar restricted to second-semester senior Women's and Gender Studies minors. Enrollment is by permission only.

Credits: 03
This course is an introduction to the art and science of computer programming and to some of the fundamental concepts of computer science. Students will write programs in the Python programming language. Good program design methodology will be stressed throughout. There will also be a study of some of the basic notions of computer science, including computer systems organization, files and some algorithms of fundamental importance.

This is the honors introductory computer science course. The course is organized around three themes: (1) computation, as a subject of study, (2) coding, as a skill, and (3) computer science, as an introduction to the field. The first half of the course explores computation from a simple mathematical perspective. From this point of view, computing can be understood as a natural extension of basic algebra. Midway through, the course turns to a machine-oriented view, considering storage and processor architecture, mutation and mutation-based repetition idioms. The core explores a number of fundamental algorithms with applications in various disciplines. Good program design methodology is stressed throughout. The course is taught using the OCaml programming language. (OCaml is closely related to the Javascript and Swift programming languages.) Students will be well prepared for the follow-up course CSCI 1102 Computer Science II. Students who are unsure about the fit should consult with Professor Muller.

Credits: 03
Room and Schedule: M W F 12;ONLINE;SYNCHRONOUS;

Functional programming is an important programming model that should be in every serious software developer’s toolkit. The main goal of this course is to learn the functional programming paradigm. In the process, you’ll develop a deeper understanding of computation and of software. The basic principles of functional programming underly the core of almost all high-level programming languages. Functional programs are naturally modular and robust, they’re relatively easy to read, they’re easy to manage and reason about. FP is often opaque and often leads to elegant solutions. In this course we’ll learn FP through the use of the OCaml dialect of the ML programming language. We’ll study applications in several domains, including some fundamental algorithms and data structures, graphical animations and acoustics. We’ll learn about polymorphic type inference, programming with sum types and pattern matching, and we’ll study the use of imperative features within the FP paradigm. OCaml has a relatively simple evaluation model that facilitates reasoning about the correctness of programs. In our studies, we’ll reason not only about the functional correctness of code, but also the space, time, and other resources used in a computation.

Comments: Note: CSCI2103 will run in parallel with CSCI1103 Computer Science 1 Honors but will require additional work. CSCI2103 is a good option for CS BA majors or CS Minors seeking a 2000-level CSCI elective.
Status: OPEN
needed for information security, and to understand the long-term behavior of random sequences used to rank web search results. Multidimensional random variables provide useful models for data mining, computer vision, social networks, and machine learning. Topics include combinatorics and counting, random experiments and probability, computational modeling of randomness, random variables and distributions, Bayes rule, collective behavior of random phenomena, vectors and matrices, and Markov chains. Each topic is illustrated with applications of its use.

CSCI22701
Technology and Culture GRIFFITH, WILLIAM

Fall 2020
This interdisciplinary course will first investigate the social, political, psychological, ethical, and spiritual aspects of the Western cultural development with a special emphasis on scientific and technological metaphors and narratives. We will then focus on the contemporary world, examining the impact of our various technological creations on cultural directions, democratic process, the world of work, quality of life, and especially on the emergent meanings for the terms "citizen" and "ethics" in contemporary society. Students will explore technologies in four broad and interrelated domains: (1) computer, media, communications, and information technologies, (2) biotechnology, (3) globalization, and (4) environmental issues.

CSCI331101  Visualization KIM, NAM WOOK  
Fall 2020  
Data can capture a snapshot of the world and allow us to understand ourselves and our communities better. With ever-increasing amounts of data, the ability to understand and communicate data is becoming essential for everyone. Visualization leverages our visual perception to provide a powerful yet accessible way to make sense of large and complex data. It has been widely adopted across disciplines, from science and engineering to business and journalism, to combat the overabundance of information in our society. In this course, students will learn to acquire foundational knowledge about how to design effective visualizations for analysis and presentation based on theories and principles from graphic design, perceptual psychology, and cognitive science. Students will also learn practical skills about how to rapidly explore and communicate data using Tableau and build interactive visualization products (e.g., articles, tools, and systems) using web-based frameworks including D3.js and Vega-Lite.

CSCI227203  Machine Learning ALVAREZ, SERGIO  
Fall 2020  
This course provides an introduction to computational mechanisms that improve their performance based on experience. Machine learning can be used in engineered systems for a wide variety of tasks in personalized information filtering, health care, security, games, computer vision, and human-computer interaction, and can provide computational models of information processing in biological and other complex systems. Supervised and unsupervised learning will be discussed, including sample applications, as well as specific learning paradigms such as decision trees, instance-based learning, neural networks and deep learning, Bayesian approaches, meta-learning, and clustering. General concepts to be described include feature space representations, inductive bias, overfitting, and fundamental tradeoffs.  
Credits: 03  
Room and Schedule: FULTON HALL 511, M W F 10;  
Satisfies Core Requirement: None  
Prerequisites: CSCI 102 AND CSCI 2244, With permission of the Instructor.

CSCI338401
Computability and Computational Complexity  STRAUBING, HOWARD
Fall 2020
This is a course in the theoretical foundations of computer science, centered around the theme of fundamental limits on computation. Topics include: Turing Machines, universal computation, undecidability of the halting problem, solvable and unsolvable algorithmic problems, recursive functions, Goedel's Incompleteness Theorem, time- and space-bounded computations, Cook's Theorem, NP-complete problems, problems solvable in polynomial space, randomized computation, application to cryptography, practical approaches to computationally intractable problems (such as SAT solvers), quantum computing, and Shor’s Theorem.

CSCI339001
Topics in Computer Science: Large-Scale Data Processing  TASSAROTTI, JOSEPH D
Fall 2020
In many modern applications such as social networks analysis, web data mining, computational biology, and scientific computing, processing the whole data in the main memory can be infeasible due to the order of the data sets. This course will cover a few paradigms for handling massive data sets, including the streaming model, massively parallel computation models such as MapReduce and Spark, and vertex-centric models such as Pregel. You will learn a few fundamental algorithms in these models and their analysis. You are also expected to implement some of them through hands-on programming exercises.
Credits: 03
Room and Schedule: GASSON HALL 310,M W 3*:HYBRID;
Satisfies Core Requirement: None
Prerequisites: CSCI2244 AND CSCI2243. Prerequisite: (1) Being able to competently program in any mainstream high-level language (e.g., C, C++, Ruby, Java, Scala, Python, Perl). (2) Familiarity with basic probability theory (CSCI2244 Randomness and Computation is required) (3) Familiarity with reading and writing rigorous proofs (CSCI2243 Logic and Computation is required). (4) Familiarity with algorithmic analysis (CSCI3383 Algorithms recommended but not required).

CSCI339801
Topics in Natural Language Processing: Speech Signal Processing  PRUD'HOMMEAUX, EMILY T
Fall 2020
This course introduces students to speech signal processing with a focus on real-world applications including automatic speech recognition and speech synthesis, as well as tasks such as emotional speech detection and speaker identification. Students will learn the fundamentals of signal processing for speech and explore the algorithms that allow computers to process and generate speech. This course provides both theoretical foundations and hands-on laboratory practice.

random variables provide useful models for data mining, computer vision, social networks, and machine learning. Topics include combinatorics and counting, random experiments and probability, computational modeling of randomness, random variables and distributions, Bayes rule, collective behavior of random phenomena, vectors and matrices, and Markov chains. Each topic is illustrated with applications of its use.

CSCI225401
Web Application Development KIM, NAM WOOK
Spring 2021
This course connects our society, providing enormous opportunities for changing and improving how we live every day from sharing information to interacting with others. We have witnessed the power of the web through a variety of web-based applications, including social media apps like Instagram and Twitter, productivity apps like Google Docs and Slack, as well as transportation apps like Uber and Lyft. These apps are now deeply immersed in our everyday lives and drastically changed how we communicate, work, and move in recent years. In this course, students will learn how to develop responsive and interactive web applications. We begin by learning basics including HTML, CSS, JavaScript, as well as advanced client-side frameworks such as Material-UI and React.js. We will also briefly touch on server-side issues including a web server (Node.js), data storages (Web Storage, MongoDB, and Firebase), and asynchronous communication between a client and a server. The course will culminate with a final project where students take a human-centered design approach to address the need of people by building a sophisticated web application.

CSCI227101
Computer Systems AVIRAM, AMITTAI F
Spring 2021
The goal of this course is to help you become a better programmer by teaching you the basic concepts underlying all computer systems. We want you to learn what really happens when your programs run, so that when things go wrong (as they always do) you will have the intellectual tools to solve the problem. In most of computer science, we're pushed to make abstractions and stay within their frameworks. But abstractions often ignore effects that can become critical. CSCI2271 introduce greater detail about system behavior and operation. This greater detail is needed for optimizing program performance, for working within the finite memory and word size constraints of computers, and for systems-level programming. Programming will be completed in the language C with comparisons to Java.

**Computer Organization and Lab UBAL TENA, RAFAEL**

**Spring 2021**

This course studies the internal organization of computers and the processing of machine instructions. Students will obtain a high-level understanding of how to design a general-purpose computer, starting with simple logic gates. Topics include computer representation of numbers, combinational circuit design (decoders, multiplexers), sequential circuit design and analysis, memory design (registers and main memory), and simple processors including data paths, instruction formats, and control units. CSCI 2272 includes laboratory-based computer hardware activities in which the students design and build digital circuits related to the topics of the course.

**An Introduction to Data Science ALVAREZ, SERGIO**

**Spring 2021**

This course provides an introduction to concepts and techniques of computational data modeling and inference that can inform rational decision-making based on data. Topics include data preprocessing, exploratory data analysis and visualization, elements of probability and statistical inference, and predictive and descriptive modeling, with an introduction to machine learning concepts and approaches as time allows. Programming in Python will be required. Prospective students should also be comfortable with mathematical notation and reasoning at the college calculus level.

**Software Engineering MARQUES SAMARY, MAIRA R**

**Spring 2021**

This course covers the basic life cycle of software development: requirements, design, implementation, testing, and production release. Students will learn the theory related to software engineering, but they will also learn hands-on how to create their own software. The main evaluation of the course is a team project that will simulate a small real project. The project will be done using the framework Django (Python), the ESS Framework Bootstrap, among other technologies. The project will be worth 50% of the grade, as well as 2 midterms, an exam, and a peer assessment (how your team members evaluate the work you did).

**Operating Systems UBAL TENA, RAFAEL**

**Spring 2021**

This course covers the fundamentals of operating systems (OS) design both from a theoretical and a practical perspective. The course is organized in two parts, each involving a separate course project. The first part deals with the system call interface between applications and the OS, the multi-process abstraction of a computing system, and task scheduling algorithms. The associated project involves the implementation of a custom Unix command-line interpreter (shell). The second part of the course covers memory management, multi-threading libraries, and file systems. A real implementation of these features is studied on a miniature, open-source operating system called xv6. The associated project involves an extension of xv6 to support custom features, such as new scheduling policies, kernel-level threads, or file system recovery.

**CSCI336601**

**Principles of Programming Languages TASSAROTTI, JOSEPH D**

**Spring 2021**

Starting with a simple language of expressions, the course develops a sequence of progressively more expressive programming languages keeping in mind the conflicting constraints between the expressiveness of the language and the requirement that it be reliably and efficiently implemented. The course focuses on these essential concepts and the run-time behavior of programs. Type systems play an essential role. By understanding the concepts the student will be able to evaluate the advantages and disadvantages of a language for a given application.

### Compilers

**CSCI33801**

**Compilers** GOVEREAU, PAUL  
**Spring 2021**

Compilers are programs that implement high-level programming languages by translating programs in such languages into machine code or some other easy to process representation. This course deals with the principles and techniques used in the design of compilers. Topics include parsing, static analysis, translation, memory management, and code optimization. This course includes a significant programming project.

### Cryptography

**CSCI339101**

**Cryptography** STRAUBING, HOWARD  
**Spring 2021**

Can Alice ensure that the message she sends to Bob can be read only by Bob, even if the message is intercepted by an eavesdropper? Can Bob ensure that the message he receives really came from Alice? How can a server verify a client's password without storing sensitive password information? This course studies both the theoretical foundations and implementation of algorithms for private and public key cryptography, digital signatures, cryptographic hash-codes, and authentication schemes. We will consider real world protocols and practices (e.g., SSL and public key certificates) as well as more speculative protocols and methods (electronic elections, quantum cryptography).

**Credits:** 3  
**Room and Schedule:** M W F 11; ONLINE; SYNCHRONOUS; Satisfies Core Requirement: None  
**Prerequisites:** CSCI1101, CSCI2243 and CSCI2244 or equivalent mathematics experience is recommended.  
**Corequisites:** None; Cross-listed with: None; Frequency: Biennially; Student Level: UNDERGRAD-MAJORS  
**Comments:** None; Status: CLOSED

### Algorithms

**CSCI338301**

**Algorithms** TRISTAN, JEAN-BAPTISTE  
**Spring 2021**

This course is a study of algorithms for, among other things, sorting, searching, pattern matching, and manipulation of graphs and trees. Emphasis is placed on the mathematical analysis of the time and memory requirements of such algorithms and on general techniques for improving their performance.

**Credits:** 3  
**Room and Schedule:** FULTON HALL 250, T TH 4 30*; HYBRID; Satisfies Core Requirement: None  
**Prerequisites:** CSCI2244 AND CSCI2243 AND CSCI1102.  
**Corequisites:** None; Cross-listed with: None; Frequency: Annually  
**Student Level:** UNDERGRAD-MAJORS  
**Comments:** None; Status: CLOSED

### Topics in Computer Science

**CSCI339001**

**Topics in Computer Science: Large-Scale Data Processing** SU, HSIN HAO  
**Spring 2021**

In many modern applications such as social networks analysis, web data mining, computational biology, and scientific computing, processing the whole data in the main memory can be infeasible due to the order of the data sets. This course will cover a few paradigms for handling massive data sets, including the streaming model, massively parallel computation models such as MapReduce and Spark, and vertex-centric models such as Pregel. You will learn a few fundamental algorithms in these models and their analysis. You are also expected to implement some of them through hands-on programming exercises.

**Credits:** 3  
**Room and Schedule:** DEVLIN HALL 026, T TH 4 30*; HYBRID; Satisfies Core Requirement: None  
**Prerequisites:** CSCI2244 AND CSCI2243. Prerequisite: (1) Being able to competently program in any mainstream high-level language (e.g., C, C++, Ruby, Java, Scala, Python, Perl). (2) Familiarity with basic probability theory (CSCI2244 Randomness and Computation is required) (3) Familiarity with reading and writing rigorous proofs (CSCI2243 Logic and Computation is required). (4) Familiarity with algorithmic analysis (CSCI3383 Algorithms is recommended but not required).  
**Corequisites:** None; Cross-listed with: None; Frequency: Annually; Student Level: UNDERGRAD-MAJORS  
**Comments:** None; Status: OPEN

### Independent Research

**CSCI496101**

**Honors Thesis** TASSAROTTI, JOSEPH D  
**Spring 2021**

Independent study project for students enrolled in the departmental honors program.

**Credits:** 3  
**Room and Schedule:** BY ARRANGEMENT; Satisfies Core Requirement: None  
**Corequisites:** None; Cross-listed with: None; Frequency: Annually; Student Level: UNDERGRAD-MAJORS  
**Comments:** Arrangements with a faculty supervisor and the permission of the department are required for registration.  
**Status:** OPEN

**CSCI491101**

**Readings in Computer Science** TRISTAN, JEAN-BAPTISTE  
**Spring 2021**

Independent reading and research for students who wish to study topics not covered in the regular curriculum.

**Credits:** 3  
**Room and Schedule:** BY ARRANGEMENT; Satisfies Core Requirement: None  
**Corequisites:** None; Cross-listed with: None; Frequency: Annually; Student Level: UNDERGRAD-MAJORS  
**Comments:** Arrangements with a faculty supervisor and the permission of the department are required for registration.  
**Status:** OPEN

**CSCI491102**

**Readings in Computer Science** BISWAS, ANJUM  
**Spring 2021**

Independent reading and research for students who wish to study topics not covered in the regular curriculum.

**Credits:** 0  
**Room and Schedule:** BY ARRANGEMENT; Satisfies Core Requirement: None  
**Corequisites:** None; Cross-listed with: None; Frequency: Annually; Student Level: UNDERGRAD-MAJORS  
**Comments:** Arrangements with a faculty supervisor and the permission of the department are required for registration.  
**Status:** OPEN

**CSCI491103**

**Readings in Computer Science** KIM, NAM WOOK  
**Spring 2021**

Independent reading and research for students who wish to study topics not covered in the regular curriculum.

**Credits:** 0  
**Room and Schedule:** BY ARRANGEMENT; Satisfies Core Requirement: None  
**Corequisites:** None; Cross-listed with: None; Frequency: Annually; Student Level: UNDERGRAD-MAJORS  
**Comments:** Arrangements with a faculty supervisor and the permission of the department are required for registration.  
**Status:** OPEN

**CSCI492101**

**Advanced Independent Research** None  
**Spring 2021**

TBD

**Credits:** 0  
**Room and Schedule:** None; Satisfies Core Requirement: None  
**Corequisites:** None; Cross-listed with: None; Frequency: Annually; Student Level: UNDERGRAD & GRAD

The Freshman Topic Seminars give freshmen an opportunity to meet with their faculty advisor once a week to enjoy small group discussions on a topic of research and intellectual interest to the instructor. The Freshman Topic Seminars are limited to 14 students per section, meet once a week for 75 minutes, and end before the Thanksgiving break, earn one credit, and are graded pass/fail. The short readings in the Topic Seminars focus on specific topics unique to each section and are designed to allow students to explore new academic areas. A list of current topics can be found at https://www.bc.edu/bc-web/schools/mcas/undergraduate/cornerstone.html.

Fall 2020
The Freshman Topic Seminars give freshmen an opportunity to meet with their faculty advisor once a week to enjoy small group discussions on a topic of research and intellectual interest to the instructor. The Freshman Topic Seminars are limited to 14 students per section, meet once a week for 75 minutes, and end before the Thanksgiving break, earn one credit, and are graded pass/fail. The short readings in the Topic Seminars focus on specific topics unique to each section and are designed to allow students to explore new academic areas. A list of current topics can be found at https://www.bc.edu/bc-web/schools/mcas/undergraduate/cornerstone.html.

Cornerstone Courses: Spring 2021

UNCS220101
Courage to Know DUGGAN, ASHLEY P
Spring 2021
This course offers an introduction to college life. The readings and discussions will investigate personal and social development in the college years. Topics will include the nature of learning, diversity, social justice, human sexuality, intimacy, addiction, and other topics. The class materials and strategies are designed to be provocative and practical as well as intellectually stimulating.
Credits: 03
Room and Schedule: GASSON HALL 203, T TH 10 30*;
Satisfies Core Requirement: None
Prerequisites: None
Corequisites: None
Cross-listed with: None
Frequency: Annually
Student Level: UNDERGRAD ELECT
Comments: This will be an interactive three-credit seminar of fifteen students, serving as one of students' university electives and one of the five courses in the first semester. Your instructor will serve as your academic advisor during the first year.
Status: CLOSED

UNCS220102
Courage to Know HINCKS, MARTHA M
Spring 2021
This course offers an introduction to college life. The readings and discussions will investigate personal and social development in the college years. Topics will include the nature of learning, diversity, social justice, human sexuality, intimacy, addiction, and other topics. The class materials and strategies are designed to be provocative and practical as well as intellectually stimulating.

Earth and Environmental Sciences Courses:
Summer 2020

EESC114001
Our Mobile Earth O'BRIEN, SUZANNE R
Summer 2020
This course will provide you with an introduction to the structure of Earth and the dynamic processes that continuously shape and remodel its surface. During class, we will discuss the formation and evolution of the oceans and continents within the framework of the modern theory of plate tectonics. The locations, causes and effects of earthquakes and volcanoes are presented. The dynamics within Earth which drive the tectonic plates are outlined.

EESC116301
Environmental Issues and Resources GALLI, KENNETH G
Summer 2020
Hybrid Core Course includes three themes: (1) Intro to Environmental Geology, (2) How to write well and how to write field trip reports, (3) How to use Google Earth to understand Earth Materials and Processes. Learn about the major processes at work inside and on the surface of the earth. Learn to be a careful observer and to write succinct field trip reports, through two field trips and the writing of a field trip report. Each class is designed to examine the facts, historical background, and through in-class exercises, homework and field trips, provide experience in analyzing and solving real world problems associated with environmental issues, resources and sustainability. Demonstrations, videos, readings and several field trips underscore important concepts and applications and the importance of careful observation. Online Google Earth exercises, done remotely, will introduce the power of this geographic application to understand geology.

EESC113201
Exploring the Earth KRUCKENBERG, SETH C
Fall 2020
The Earth is a dynamic planet that our species is clearly changing. A great challenge of the twenty-first century is to maintain the Earth's ability to support its growing human population. This course discusses the origin and materials of the Earth and the processes by which it has evolved. It is a first course for Geological Sciences majors and also provides a background for departmental majors and minors. EESC1132 is appropriate as a natural science core course for students interested in the Earth Sciences. The laboratory consists of in-class exercises, analysis of rocks, and a weekend field trip.

EESC112201
Conservation Ecology in Ecuador PISANI GAREAU, TARA
Summer 2020
This is an active learning course on tropical ecology and the conservation of tropical ecosystems which are the most biodiverse on Earth. Ecuador is an ideal country to study these topics. Within a small geographical region (109,483 sq mi) Ecuador has pristine tropical rain forests, tropical dry forests, cloud forests, high elevation grasslands, and coastal mangroves. Additionally, the Galapagos Archipelago off the coast of Ecuador is home to over 4,000 species, 40% of them endemic to the region--this was Charles Darwin's "laboratory of evolution." Ecuador is also a model for conservation with twelve national parks, ten national wildlife refuges, nine ecological reserves, four biological reserves, and one geo-botanical reserve. In this course, students will gain firsthand experience observing species and ecological processes and collecting data within pristine ecosystems. The course will explore and use three main physiographic regions of Ecuador--the central Andean highlands, the eastern alluvial plains of the Amazon, and the Galapagos Islands--as its laboratory.

EESC115001
Oceanography PALEVSKY, HILARY I
Fall 2020
An understanding of the ocean's role in the health and evolution of the planet is essential. This course is an investigation of the world's ocean as an integrated system. We will study the geographical characteristics of ocean water, causes and effects of ocean currents and circulation, marine ecology and biological productivity in the ocean. An understanding of the ocean's role in the health and evolution of the planet is stressed, with special emphasis on coastal areas. Two and a half hours of lecture and one two-hour laboratory each week.

EESC118001
The Living Earth I GALLI, KENNETH G
Fall 2020
This course provides a broad and modern presentation of the major topics and principles of Earth Science. The lectures will cover all the fundamental subjects of geology, with emphasis on earth materials such as minerals, rocks and internal and external Earth processes, with a brief overview of important aspects of Earth history. The labs will involve hands-on work studying minerals, igneous rocks, sedimentary rocks, metamorphic rocks, viscosity, weathering and running water, formation of ripples and sand dunes, plate tectonics, fossils, and earthquakes, in addition to a field geology trip during lab time. Additional topics may be covered if time allows.

EESC170201
Living on the Water: Coasts, Development, and Sea Level Change from Venice to Boston KINEKE, GAIL C
Fall 2020
Why do humans build cities on the water? How do humans impact the coast in intentional and inadvertent ways? The cities of Venice and Boston provide case studies for probing these enduring questions. We will explore the fundamental earth processes that define characteristics of coastlines around the world and the forces that bring about change. The human impacts of coastal development will be examined using a historical (last 1500 years) and a more modern (last 400 years) perspective. We will consider current projects and proposals to accommodate sea level and make predictions about future change.

Making the Modern World: Design, Ethics, and Engineering TONN, JENNA A; KRONES, JONATHAN S
Fall 2020
Together we will consider how engineers and other stakeholders navigate risks related to industrial and environmental disasters; balance financial, technological, and regulatory pressures associated with complex socio-technical problems; and negotiate technical and political liabilities surrounding artificial intelligence, surveillance, and climate adaptation. Students will collaborate on group design projects based on human-centered engineering. Engineering systems present pressing technical, ethical, and moral problems that we must grapple with as engaged global citizens. In this class students will explore the social, cultural, and institutional history of engineering; learn foundational skills in quantitative analysis of real-world engineering designs; and understand the political, environmental, economic, and ethical tradeoffs associated with building the modern world.

Environmental Systems: The Human Footprint BECKER, RICHARD
Fall 2020
Humans have become an increasingly significant force on Earth system, including the atmosphere, biosphere, and hydrosphere. This course explores the influence of humans on natural systems and how environmental solutions and consequences link to social, political, economic, health, and justice issues. Specifically, we will discuss topics related to population growth, energy, agriculture, urbanization, and environmental justice. This course is part of the Environmental Systems introductory sequence (EESC2201-EESC2208) for Environmental Geoscience majors.

**Credits:** 02
**Room and Schedule:** FULTON HALL 415, M W F 11:10-12:00; OCT 19-DEC 10

**EESC221201**
Environmental Systems: Ecosystems Lab PISANI GAREAU, TARA

Fall 2020
Conventional agriculture, while responsible for enormous increases in yield, has undermined the natural resources that support agricultural yield and ecosystem services. Yet there is a pressing need to maintain yield in the face of climate change. How can we meet the food needs of a growing human population without clearning more forests, polluting rivers and the atmosphere, overdraining from aquifers, and threatening the existence of wild species? In this course we will learn how the principles of ecology can be applied to the design, management, and analysis of agroecosystems and agricultural landscapes with the goal of creating a sustainable food system.

**Credits:** 03
**Room and Schedule:** FULTON HALL 415, M W F 11:10-12:00; OCT 19-DEC 10

Geomorphology
BECKER, RICHARD
Fall 2020
Geomorphology is the study of landforms, landscapes, and the processes that have shaped them. It is the science of scenery. Not only some landscapes, such as the Grand Canyon or Glacier National Park are deemed "stunning," but rather how landscapes like these formed. It is both a basic science, driven by curiosity about how the landscapes in which we live and play came to be, and an applied science, with implications for mitigating natural hazards and adverse environmental change. The course will feature a field trip to local destinations.
Credits: 03
Room and Schedule: DEVLIN HALL 201,M W F 1;HYBRID;

EESC514001
Isotope Geochemistry and Geochronology BAXTER, ETHAN
Fall 2020
This course will introduce the various isotopic methods that are used in the Earth Sciences. Topics will include: (1) radiogenic isotopes in geochronology and petrogenesis, including U-Th- Pb, K-Ar, Rb-Sr, and Sm-Nd, (2) light stable isotopes in geology, biogeochemistry, and paleothermometry, including C, H, O, N, and S, and (3) non-traditional stable isotopes in biogeochemistry, oceanography, and cosmochemistry including Fe, Mo, Cu, Ni, and Ca. We will emphasize the geochemical behavior, analytical methods, and specific applications of these isotope systems in geology.
Credits: 03
Room and Schedule: DEVLIN HALL 307,W 9-11 45;
Satisfies Core Requirement: None
Prerequisites: EESC2220, one semester of Calculus, one semester of Chemistry, or permission of instructor.
Corequisites: None Cross-listed with: None Frequency: Biennially

EESC554001
Marine Biogeochemistry PALEVSKY, HILARY I
Fall 2020
In this course, we will use marine biogeochemical tracers as a tool to understand the ocean as a system and to investigate the physical, chemical, biological, and geological processes that control the sources, distributions, and transformations of these tracers. We will describe the flow of essential elements (especially carbon, nitrogen, oxygen, and iron) through the open ocean, following their path from the air-sea interface to primary production in the surface ocean to organic matter export and remineralization in the water column and seafloor sediments. Students will develop skills in quantitative analysis of biogeochemical data through problem solving exercises and will apply concepts covered in class to interpretation of primary literature.

EESC556301
Advanced Paleoceanography and Paleoclimatology WANG, XINGCHEN
Fall 2020
This course will discuss major climate events through the course of Earth's history, including Snowball Earth; warm Cretaceous; Paleocene-Eocene Thermal Maximum; Pleistocene ice ages, and ongoing climate change in the Anthropocene. Topics will include evaluation of data and evidence behind these climate events; underlying governing mechanisms in the context of radiative balance, greenhouse gases, ocean circulation and atmosphere-ocean interactions; and modeling studies of these climate events. Formats will include lectures, student presentations and discussion of classic papers, a term paper, and final exam.

EESC559201
Senior Environmental Geoscience Research Seminar I BEHN, MARK D
Fall 2020
In this two semester course sequence, students will be introduced to the process of conducting original scientific research. This includes exploring fundamentals of a natural system from reading the scientific literature, defining a problem, designing and executing an experiment, analysis, data interpretation, and presentation of results in written and oral formats. Students will work individually or in groups within a broader research project. Topics and field areas will vary from year to year depending on existing projects and expertise of the instructor. The EESC5582-5583 sequence fulfills the senior research experience requirement for Environmental Geoscience majors.

EESC112501
Exploring Earth History BECKER, RICHARD
Spring 2021
"The earth is not finished, but is now being and will forever be remade." C.R. Van Hise (1898) The objective of this course is to describe the history of the earth and the development of life on Earth during the last 4.6 billion years, especially within North America. Major biological and physical events will be revealed by interpretation of the rock record. The use of animations and demonstrations will enhance your understanding of some major topics.

EESC114601
Origin and Evolution of Life on Earth STROTHER, PAUL K
Spring 2021
This course explores current theories about the origins of life, beginning with the original hypothesis of the Russian biochemist A.I. Oparin. Darwin’s theory of evolution is emphasized, but many different components of the natural sciences touch upon this topic. The course lectures include the study of the oldest fossils, life in extreme habitats, cellular biology, prebiotic molecules, and the search for life on other planets.

EESC117701
Cosmos
KUCHAR, THOMAS A
Spring 2021
There are more than a dozen interplanetary probes from numerous countries that are currently collecting data from several planetary bodies in the Solar System. These exploration missions are expanding knowledge of our Solar System, which is mostly built on only about half a century of space exploration. We will discuss these space missions and their scientific goals and results, which are increasingly oriented to answer questions on planetary evolution and the possibility of extraterrestrial biospheres. Throughout this course, the fundamentals of how science works will be emphasized. If weather permits, there might also be outdoor lectures for star-gazing opportunities.

EESC118701
Geoscience and Public Policy KAFKA, ALAN L
Spring 2021
In this course, we will explore case studies that demonstrate the role of the earth sciences in addressing problems of public policy. For each case study, students will be introduced to the underlying scientific concepts relevant to the problem being addressed. After this scientific foundation is developed, we will discuss how it needs to be considered as part of the process of making policy decisions. The course will also introduce students to how scientists and public policy makers apply the concepts of probability and statistics in the decision making process.

EESC150701
Spring 2021
This course explores U.S. energy. From the perspectives of history, culture, technology, engineering, and foreign policy, we ask how we have created and distributed energy in the past, how energy systems function in the present, and how they may evolve. We investigate energy production, distribution, and use--coal, oil, nuclear power, hydropower, wind, and solar power--along with cables, pipelines, and transmission systems. Through hands-on exercises and field trips, students learn how past technological and economic choices shaped current U.S. energy systems, how energy systems affect the environment, and how sustainable energy systems will be in the future.

EESC220601
Environmental Systems: Oceans KINEKE, GAIL C
Spring 2021
The oceans cover 70% of the earth's surface and are home to much of its life. The oceans are critical to the earth's biogeochemical cycling of energy and mass. Ocean currents play a key role in climate through redistribution and exchange of heat with the atmosphere and storage of CO2. Coastal areas, the narrow interface between land and ocean, represent some of the most productive, populated, and vulnerable regions on earth. The course provides an introduction to the ocean's role in earth processes and explores topics and challenges facing a changing planet through case studies and critical and analytical thinking.

EESC332001
Introduction to Geochemistry WANG, XINGCHEN
Spring 2021
This course will apply the principles of chemistry to investigate the chemical compositions of the Earth system, including the atmosphere, hydrosphere, biosphere, and lithosphere. Topics will include the origin of elements in the solar system; distribution of elements in the core, mantle, and crust; cycling of carbon, nitrogen, phosphorus, and other elements in the Earth's surface environments; radiometric dating techniques; and stable isotope geochemistry.
Credits: 03
Room and Schedule: DEVLIN HALL 215,T TH 1 30*;
Satisfies Core Requirement: None
Prerequisites: CHEM1110 AND CHEM1109. Or permission from the instructor.
Corequisites: None
Cross-listed with: None Frequency: Annually
Student Level: UNDERGRAD & GRAD
Comments: Formerly course number EESC2230
Status: OPEN

EESC333501
Topics in Geobiology STROTHER, PAUL K
Spring 2021
Geobiology broadly concerns the dynamic interface between biology and geology at the systems level. This year, topics will focus on Paleobotany and Paleontology as we explore the evolution of photosynthesis and its historical importance to our planetary ecosystem through the study of fossil plants. Starting with the beginnings of photosynthesis and the origin of land plants, Paleobotany covers the evolutionary history of plants on earth, including the origins of forests, coal, the rise of the flowering plants, and the use of fossil plants as indicators of past climate. Paleontology, the study of spores and pollen, is used to document past vegetation and climate change at a wide range of timescales.
Credits: 03
Room and Schedule: DEVLIN HALL 307,T TH 3*;
Satisfies Core Requirement: None
Prerequisites: Two years of college work or permission of the instructor.
Corequisites: None Cross-listed with: None Frequency: Biennially
Student Level: UNDERGRAD ELECT
Comments: None
Status: CLOSED

EESC338001
Environmental Oceanography KINEKE, GAIL C
Spring 2021
In this course, fundamental physical, chemical, geological, and biological processes occurring in ocean environments are examined in the context of how they impact humans and how humans have impacted the ocean. Emphasis is placed on understanding the challenges involved with the development of environments and resources through actual case studies and problem solving. Topics include coastal oceanography and shore processes, water chemistry, biogeochemical cycles and circulation, and air/sea interactions as related to pollution and climate change.
Credits: 03
Room and Schedule: DEVLIN HALL 201,T TH 9*; HYBRID;
Satisfies Core Requirement: None
Prerequisites: EESC1132. Corequisites: None Cross-listed with: None Frequency: Biennially

EESC338501
Structural Geology KRUCKENBERG, SETH C
Spring 2021
The goal of this course is the development of skills in the structural analysis of rock bodies as seen in outcrops, or small areas, to gain an understanding of the geometries, sequencing, and kinematics of deformational features. Structures such as folds, faults, foliations, lineations, and shear zones will be considered at various scales, as visible in the field, or in thin section. We will also discuss some inter- and intra-granular deformation mechanisms. The 3-hour laboratory consists of in-class problems and some field-based problems.

EESC666401
Environmental Data Exploration and Analysis PALEVSKY, HILARY I
Spring 2021
Earth and environmental science increasingly depends on scientific programming to explore and analyze large datasets from in situ and autonomous observations, satellite remote sensing, and numerical model output. In this course, students will learn to use MATLAB to visualize earth system data across broad spatial and temporal scales in maps and time-series plots and apply statistical tools to analyze trends and variability in their datasets. Students will also learn to critically assess datasets and to select and justify appropriate data sources and analytical methods to address scientific questions about earth system processes. Students will practice these skills in a series of data analysis assignments focused on regional and global climate data and will apply them in a team-based final research project.

Readings in Chinese Literature and Philosophy  
CHIANG, SING-CHEN L  
Fall 2020
By way of readings in Chinese literary and philosophical canons, this course introduces students to the basic diction and grammar of classical Chinese. Classical Chinese is the Latin of East Asian written traditions, the gateway to the cultural and historical legacy of East Asia, and the foundation of modern literary Chinese. We will read and translate selected passages from Chinese classics, including the Analects of Confucius, Mencius, the Dao de jing, and Zhuangzi. Class discussion will center on major philosophical concepts and their historical contexts.
**Credits:** 3
**Room and Schedule:** DEVLIN HALL 117,T TH 12 15*
**Satisfies Core Requirement:** None

Satisfies Core Requirement: Social Science
Prerequisites: ECON2201.
Corequisites: None
Cross-listed with: None
Frequency: Annually
Student Level: UNDERGRAD ELECT
Comments: None
Status: CLOSED

ECON336101
Monetary Theory and Policy KAZEMI, HOSSEIN S
Summer 2020
This course is an analysis of how the operation and behavior of financial markets are influenced by monetary policy, the actions taken by the Federal Reserve to promote full employment, price stability, and moderate long-term interest rates. Emphasis is placed on studying the interaction between financial intermediaries (e.g., commercial banks, investment banks, mutual funds, hedge funds, etc.) and a nation's central bank. Students are introduced to the modern theories of the demand for and supply of money, as well as their implications for economic activity, the cost of living, employment, and the conduct of monetary policy. Particular emphasis is given to recent Fed policy, including Quantitative Easing and Quantitative Tightening and the impact of these policies on asset prices and long-term interest rates. Furthermore, through an extensive use of Bloomberg in this class students learn how to analyze the impact of these and other Fed policies on the U.S. economy and financial markets to provide a window into how modern practitioners in the discipline follow and respond to changes in U.S. monetary policy.
Prerequisites: macro theory and econometrics.
Credits: 03
Room and Schedule: ONLINE COURSE; ASYNCHRONOUS; JUN 29 - AUG 14;
Satisfies Core Requirement: None
Prerequisites: ECON2202 AND ECON2228. Not open to students who have completed ECON3324; cannot be taken concurrently with ECON3324.
Corequisites: None
Cross-listed with: None

ECON336501
Public Finance KAZAROSIAN, MARK V
Summer 2020
This is a course in the microeconomics of the public sector. We will discuss the rationale for the government's role in a market economy, major expenditure programs, and the theory and structure of the tax system. The focus will be on the federal (as opposed to state and local) government's expenditure and tax programs, with special attention given to topics of current concern.
Credits: 03
Room and Schedule: ONLINE COURSE; ASYNCHRONOUS; MAY 13 - JUN 26;
Satisfies Core Requirement: None
Prerequisites: ECON2201 AND ECON2228. May be taken concurrently.
Corequisites: None
Cross-listed with: None
Frequency: Annually
Student Level: UNDERGRAD ELECT
Comments: None
Status: OPEN

ECON339501
International Monetary Economics MAGNANI, M.
Summer 2020
The course presents a basic economic analysis of open economy macroeconomics, with a focus on the theory of optimum currency area. These notions are then used to provide a historical and critical analysis of the construction and evolution of the European Monetary Union (EMU) after World War II. In this context, the effects on the Eurozone of the subprime crisis and of the crisis of sovereign debt are examined in depth.

Beyond Price: Markets, Cultures, Values ERBIL, CAN; SESHADRI, KALPANA R
Fall 2020
This course is about wealth and values—the condition of our “knowing the price of everything and the value of nothing.” Given the glamour and power
surrounding money and the super-rich, we examine issues concerning the economy, values, and the dominance of the market over our environment and personal lives. We look at markets, incentives, ecology and ethics through a combination of literature and economics. We also take up specific case studies that will enable us to better understand the relation between business decisions or market interests and their impact on the ordinary lives of working men, women, and children.

ECON220601
Real Estate and Urban Action MCCULLAGH, NEIL P
Fall 2020
Real Estate and Urban Action is a class in which students explore the interdisciplinary fields that are engaged in neighborhood revitalization. The course uses the transformation of the failed Columbia Point housing project (Dorchester, MA) into Harbor Point, a successful mixed income neighborhood, as a core teaching case study, highlighting how successful redevelopment addresses the social and economic needs of community residents. Classes include guest lectures from developers, public planning officials, and supportive services experts on the social, cultural, and political factors critical to transforming distressed neighborhoods into safe and economically viable neighborhoods. It is a practical course, in which students gain experience through field trips and interactions with real estate and supportive services professionals, culminating in a team neighborhood transformation proposal.
Credits: 03
Room and Schedule: FULTON HALL 145,W 4 30-6 50;
Satisfies Core Requirement: None
Prerequisites: None
Corequisites: None
Cross-listed with: None
Frequency: Annually
Student Level: UNDERGRAD-MAJORS
Comments: The only prerequisite is an interest in any facet of real estate and urban action. Given the multidisciplinary tasks required to create viable communities, students from all schools at Boston College are welcomed to participate.
Status: OPEN

ECON221101
Math for Economic Analysis WATSON, BRUCE D
Fall 2020
Assuming only high school algebra, the course develops all of the main mathematical tools used in modern economics. Students will learn the skills necessary to do well in subsequent economics courses, such as Micro Theory (ECON2201) and Macro Theory (ECON2202), as well as advanced electives, such as Game Theory in Economics (ECON3308) and Financial Economics (ECON3379). Those who have completed Multivariate Calculus (MATH2202) should not take this course. Beginning with applications of standard algebra to economics, the course looks at partial and general equilibrium and comparative statics. Topics subsequently explored include introductory linear algebra (matrices and vectors), and applications of univariate (single-variable) calculus to economics. Multivariate calculus is covered next, with applications to consumer theory and the theory of the firm. Finally, unconstrained and constrained optimization is covered, including techniques such as the Lagrange multiplier and Jacobian matrices. Applications and examples are drawn from practical problems in economics and business. Throughout the course, an emphasis is placed on combining intuition with rigor—the math is used to provide a more rigorous analysis of the intuitive understanding students acquired in their principles of economics courses.

ECON220001
Geographic Information Systems for Planning and Decision-Making COHEN, WILL W
Fall 2020
Large quantities of information are available to describe our social and physical environment with high detail, but making sense of this data requires specialized skill sets. Geographic Information Systems (GIS) is a general approach to analysis and is a powerful set of tools for understanding complex problems or for making a compelling argument about issues grounded in the physical or social environment. It is widely used in the public and private sectors. This course will introduce students to the use of GIS and representation as a means of looking at and representing spatial data. Students will learn how to perform the three broad steps of spatial analysis: (1) collecting and organizing data, (2) analyzing this data for appropriate patterns, and (3) using software to represent data on maps to support decision making.

Econometric Methods KHAN, SHAKEEB
Fall 2020
This course focuses on testing the predictions of economic theory. Topics covered include simple and multiple regression, multicollinearity, heteroskedasticity, serial correlation, specification errors, errors in variables, and an introduction to simultaneous equation estimation.

**ECON222805**
Econometric Methods SANZENBACHER, GEOFFREY T
Fall 2020
This course focuses on testing the predictions of economic theory. Topics covered include simple and multiple regression, multicollinearity, heteroskedasticity, serial correlation, specification errors, errors in variables, and an introduction to simultaneous equation estimation.

**ECON222806**
Econometric Methods SANZENBACHER, GEOFFREY T
Fall 2020
This course focuses on testing the predictions of economic theory. Topics covered include simple and multiple regression, multicollinearity, heteroskedasticity, serial correlation, specification errors, errors in variables, and an introduction to simultaneous equation estimation.

**ECON2222912**
Economic and Business Forecasting MC GOWAN, RICHARD
Fall 2020
The theory and practice of applied time series analysis will be explored. First the different segments (trend, seasonality, cyclical, and irregular) of a time series are covered. Then methods for analyzing each of these segments are introduced. Topics include exponential smoothing methods, ARIMA models, structural time series models, and transfer function models. Computer applications using R are emphasized.

This course follows Mathematical Statistics and develops the concepts of univariate time series and the use of those models in analyzing and forecasting economic data. This course is intended for students with prior coursework in elementary statistics and knowledge of regression analysis. Students who are more advanced in statistics may wish to take Econometric Methods instead.

**ECON222708**
Discussion Group: Econometric Methods GOEL, KRITIKA
Fall 2020

ECON224201
Public Policy in an Aging Society RUTLEDGE, MATTHEW S
Fall 2020
We live in a rapidly aging nation. In two decades, the age distribution of the U.S. will look like that of Florida today. We will analyze the underlying demographic trends, the economic status of the aged, the fiscal challenge of an aging society, public policies (especially social insurance) designed to assist older Americans, the impact of public policy on individual behavior, and proposals for reform.
Credits: 03
Room and Schedule: FULTON HALL 150, T TH 9*;

ECON227301
Development Economics POULSEN, ALEXANDER
Fall 2020
This course considers what we know about developing countries, and applies economic theory to help us understand the constraints of poverty. We will describe the economies of less developed countries and the lives of the poor, focusing on changes in poverty, inequality, demography, and health. We will consider theories and evidence for why some countries are rich and others poor. We will examine how land, labor, and credit markets function in poor countries and communities, and the consequences for health, education, and child labor. We will consider migration and its consequences and will discuss aid and international institutions.
Credits: 03
Room and Schedule: O'NEILL LIBRARY 253, T TH 12*;
Satisfies Core Requirement: Cultural Diversity
Prerequisites: ECON1151 AND ECON1132 AND ECON1131 AND ECON1101.
Corequisites: None
Cross-listed with: None
Frequency: Annually
Student Level: UNDERGRAD-MAJORS
Comments: Not open to students who have completed ECON3374 or ECON3375. Fulfills cultural diversity core requirement.

Industrialization and Democratization in Korea HWANG, INGU
Fall 2020
This lower-level course introduces students to the political and economic changes that South Korea experienced from 1960 to the present and explores how these changes contributed to social unrest, to demands for greater democracy, and to other social justice issues. In doing so, it will address how South Korea’s economic and political trajectory was informed by pressures at the international, national, and subnational level and compare the South Korean case to that of other Asian nations.

Advertising and Media Markets: Advanced Research Methods MORTIMER, JULIE H
Fall 2020
This course develops advanced research methods to study the advertising and media markets. The goal of the course is to provide hands-on experience with advanced research methods, including the ability to analyze and critique previous research and to identify important research questions. The course is designed primarily for junior economics majors who are interested in writing a senior thesis, or for junior and senior economics majors anticipating quantitative work in economics or marketing after graduation. Methods that are taught include theoretical tools from industrial organization, such as game theoretic models of imperfect competition, pricing, and entry, as well as statistical and empirical methods of analysis using data on advertising and media programming choices. Questions addressed in the course include the following: What is the impact of advertising on product markets? How do advertisers compete for air time, both across and within industries?

ECON336101
Monetary Theory and Policy KAZEMI, HOSSEIN S
Fall 2020
This course is an analysis of how the operation and behavior of financial markets are influenced by monetary policy, the actions taken by the Federal Reserve to promote full employment, price stability, and moderate long-term interest rates. Emphasis is placed on studying the interaction between financial intermediaries (e.g., commercial banks, investment banks, mutual funds, hedge funds, etc.) and a nation's central bank. Students are introduced to the modern theories of the demand for and supply of money, as well as their implications for economic activity, the cost of living, employment, and the conduct of monetary policy. Particular emphasis is given to recent Fed policy, including Quantitative Easing and Quantitative Tightening and the impact of these policies on asset prices and long-term interest rates. Furthermore, through an extensive use of Bloomberg in this class students learn how to analyze the impact of these and other Fed policies on the U.S. economy and financial markets.
Prerequisites: macro theory and econometrics.

Introduction to Computational Investing LAW, TZUO H  
Fall 2020  
Fall 2020***THIS COURSE IS OFFERED ONLINE***In this course, students develop skills to automate an investment strategy. The first third of the course covers programming skills (Python), market structure, and portfolio evaluation. The second third covers optimization and commonly used strategies. In the final third, we cross-evaluate student projects and discuss strategy behind applications. Students work on a project group after the first third of the course. By the end of the course, successful students are able to write and evaluate fully functional programs on an online trading platform. This is not a course that promotes quantitative investing. It is an immersion to acquire the universally useful skills required to automate investments. The lab session is mandatory. Course offered in the fall only. Sophomores and juniors are highly encouraged to take this course. If the course is full, simply show up in class and the instructor will sort things out. There are no formal requirements.

ECON338901
Machine Learning for Economics ARLASHIN, ANATOLY S
Fall 2020
One of the defining features of the world around us today is the ever-increasing amount of data that describe our daily lives. This "big data" phenomenon, as it became known, has led to developing of new methods, called "machine learning," that allow high-dimensional statistical analysis in ways that were either impossible or infeasible for classical statistical methods, such as regression analysis. The goal of this course is to provide students with an introduction to machine learning in a framework way that makes it applicable to causal economic analysis.

While we will cover the necessary theoretical foundations, the emphasis will be placed on application and learning how and when to use these new methods, and what are their pros and cons compared to classical methods of statistical analysis.

ECON339001
Applied Health Economics RICHARDSON, SAMUEL S
Fall 2020
A perennial health policy debate concerns the proper role of government in the allocation of health care. The first fundamental theorem of welfare economics states that (under certain assumptions) markets result in efficient allocations, so one might expect most economists favor minimal government involvement in allocating health care. We will begin by studying economic theories about why health care markets may be inefficient, along with the empirical evidence that supports these theories. As the course progresses, our emphasis will shift: in groups, students will use publicly-available data to write and present a research paper investigating a policy-relevant health economics question.
Prerequisites: micro theory and econometrics.

ECON772001
Math for Economists IRELAND, PETER N
Fall 2020
"Economics studies the efficient allocation of scarce resources." It follows almost immediately from this definition that while verbal and graphical analyses are often helpful too, economists derive their sharpest and most powerful results by setting up and solving constrained (because resources are "scarce") optimization (because allocations should be "efficient") problems. Hence, this course introduces first-year graduate students to a variety of techniques for doing just that: setting up and solving constrained optimization problems. Specific methods covered include those based on the Kuhn-Tucker envelope theorems, the maximum principle, and dynamic programming. Note that since this is a "math for economists course", its emphasis is not so much on stating and proving theorems but on developing an intuitive understanding of how and why each method works and determining when one particular approach may be easier or more convenient than all others to apply to a specific problem.

Macroeconomic Theory I SCHIANTARELLI, FABIO
Fall 2020
The course covers the standard models of exogenous and endogenous growth, mostly in a deterministic setting: The Solow-Swan model without and with human capital, the Ramsey growth model with infinitely lived optimizing agents, overlapping generation models without and with altruism, fiscal policy, models with human capital, basic AK models of endogenous growth, two sector models of endogenous growth, product variety models and Schumpeterian growth models. We will also review some crucial empirical papers on applied growth, starting from those on the fundamental causes of growth. In the last part of the course we cover the Ramsey model in discrete time with a stochastic technology shock and the choice of investment with adjustment costs and consumption in a stochastic setting.

ECON880201
Advanced Microeconomic Theory SONMEZ, TAYFUN O
Fall 2020
In recent years, auction theory and matching theory have found applications in many interesting real-life problems from a market/mechanism design perspective. Topics of this course include the theory of matching markets, multi-object auctions, school choice, and kidney exchange.

ECON880201
Time Series Econometrics XIAO, ZHIJIE
Fall 2020
This course covers major advances in time series analysis. In addition to univariate and multivariate models for stationary time series, it addresses the issues of unit roots and cointegration. The Kalman Filter and time series models of heteroskedasticity are also discussed. The course stresses the application of technical tools to economic issues, including testing money-income causality, stock market efficiency, the life-cycle model, and the sources of business cycle fluctuations.

ECON885301
Industrial Organization I MORTIMER, JULIE H
Fall 2020
In this course, we study imperfect competition among firms, emphasizing empirical work. We learn how to implement empirical methods commonly used in Industrial Organization (IO), and how to read, and ultimately write, papers in empirical IO. Topics covered include demand estimation, entry, auctions, bundling, vertical control and contractual arrangements, retailing and inventories, U.S. merger policy, health markets, and others as time allows. Each topic is organized around recent empirical work. Throughout, we consider the importance of identification in empirical studies.

ECON887201
International Finance VALCHEV, ROSEN Z
Fall 2020
The course provides an introduction to international finance, spanning from the classic puzzles to current research. It is designed for Ph.D. students in their second year or later, and provides an overview of theory and empirical tools for conducting research in this field. We study two overarching themes: First, exchange rate dynamics and second, international risk sharing and financial integration.

ECON887901
Game Theory and Applications EKMEKCI, MEHMET
Fall 2020
In this elective advanced Graduate Class, we will cover many topics and problems that fall under the category game theory with more emphasis on dynamic games and repeated games. Although we will study some topics of dynamic games with complete information, there will be a disproportionate weight on problems with asymmetric information, and problems in which there are elements related to learning. More specifically, we will study Repeated Games, Reputation Games, Bargaining, Experimentation and Information Aggregation. Students should have a strong background in Mathematical tools used in economics, and should have taken an advance undergraduate course in Game Theory, and/or first year Graduate Micro sequence.

ECON1101 Principles of Economics SANKARAN, CHANDINI
Spring 2021
This course is an analysis of prices, output, and income distribution through the interaction of households and business firms in a modern Western economy. It also includes an analysis of national income and employment, economic fluctuations, monetary and fiscal policy, inflation, growth, and international aspects of macroeconomic policy. The appropriate role of government intervention is examined, and basic analytical tools are applied to current economic problems.
Open to freshmen, sophomores, and juniors. Course is open to seniors by department permission.
Credits: 04

**ECON220601**  
**Real Estate and Urban Action MCCULLAGH, NEIL P**  
**Spring 2021**  
Real Estate and Urban Action is a class in which students explore the interdisciplinary fields that are engaged in neighborhood revitalization. The course uses the transformation of the failed Columbia Point housing project (Dorchester, MA) into Harbor Point, a successful mixed income neighborhood, as a core teaching case study, highlighting how successful redevelopment addresses the social and economic needs of community residents. Classes include guest lectures from developers, public planning officials, and supportive services experts on the social, cultural, and political factors critical to transforming distressed neighborhoods into safe and economically viable neighborhoods. It is a practical course, in which students gain experience through field trips and interactions with real estate and supportive services professionals, culminating in a team neighborhood transformation proposal.  
**Credits:** 03  
**Room and Schedule:** FULTON HALL 511, W 4 30-6 50;  
**Satisfies Core Requirement:** None  
**Prerequisites:** None

**ECON220701**  
**The Global Economy ERBIL, CAN**  
**Spring 2021**  
This course aims to deepen your understanding of real world economic issues, while providing you with a stronger analytical base and a guide to how to make connection to economic models. We will focus on international trade theory, policy, and its implications. We will also investigate some trending topics like "the end of the hyper-globalization era" and "shifting global supply chains."  
**Credits:** 03  
**Room and Schedule:** MERKERT 127, T TH 10 30*;
ECON221101
Math for Economic Analysis WATSON, BRUCE D
Spring 2021
Assuming only high school algebra, the course develops all of the main mathematical tools used in modern economics. Students will learn the skills necessary to do well in subsequent economics courses, such as Micro Theory (ECON2201) and Macro Theory (ECON2202), as well as advanced electives, such as Game Theory in Economics (ECON3308) and Financial Economics (ECON3379). Those who have completed Multivariate Calculus (MATH2202) should not take this course. Beginning with applications of standard algebra to economics, the course looks at partial and general equilibrium and comparative statics. Topics subsequently explored include introductory linear algebra (matrices and vectors), and applications of univariate (single-variable) calculus to economics. Multivariate calculus is used to describe, with applications to consumer theory and the theory of the firm. Finally, unconstrained and constrained optimization is covered, including techniques such as the Lagrange multiplier and Jacobian matrices. Applications and examples are drawn from practical problems in economics and business. Throughout the course, an emphasis is placed on combining intuition with rigor—the math is used to provide a more rigorous analysis of the intuitive understanding students acquire in their principles of economics courses.

ECON221201
Geographic Information Systems for Planning and Decision-Making COHEN, WILL W
Spring 2021
Large quantities of information are available to describe our social and physical environment with high detail, but making sense of this data requires specialized skill sets. Geographic Information Systems (GIS) is a general approach to analysis and is a powerful set of tools for understanding complex problems or for making a compelling argument about issues grounded in the physical or social environment. It is widely used in the public and private sectors. This course will introduce students to the use of GIS and representation as a means of looking at and representing spatial data.

Students will learn how to perform the three broad steps of spatial analysis: (1) collecting and organizing data, (2) analyzing this data for appropriate patterns, and (3) using software to represent data on maps to support decision making.

ECON221301
Economics of Health Policy RICHARDSON, SAMUEL S
Spring 2021
This course builds on fundamental concepts from Principles to apply economic reasoning to health policy issues. We will develop some tools for thinking critically about health economics data, and then delve into the history and institutional details of health policy in the United States. The rest of the course is devoted to the economics behind a variety of health policy questions: how could policymakers use cost-effectiveness analysis when deciding whether to adopt new health care technology? How can the economics of externalities inform policies around vaccination? Why do we give patents to pharmaceutical companies when we know that monopolies create deadweight loss? Why do economists oppose the tax deduction for employer-sponsored health insurance plans? How did Obamacare’s individual health insurance mandate affect insurance markets, and what should we expect now that the mandate has been repealed? How can information asymmetries result in low-quality health care? Why does the United States spend so much more than other countries on health care, and what do we gain from that additional spending?

ECON222912
Economic and Business Forecasting MC GOWAN, RICHARD
Spring 2021
The theory and practice of applied time series analysis will be explored. First the different segments (trend, seasonality, cyclical, and irregular) of a time series will be analyzed by examining the Autocorrelation functions (ACF) and Partial Autocorrelation functions (PACF). The specific model to model the various types of time series include linear regression, panel regression, seasonal decomposition, exponential smoothing, ARIMA modeling as well as combining models. This course is offered as an online hybrid course. In addition to the online lectures presented on the Canvas LMS, there are three required on-campus class meetings on Saturday morning September 15, Saturday morning October 6, and Saturday morning December 1. The midterm exam will also be held on campus on Monday evening October 15. Please see the course syllabus for additional details.

ECON227303
Development Economics JOGLEKAR, DEEPAK
Spring 2021
This course considers what we know about developing countries, and applies economic theory to help us understand the constraints of poverty. We will describe the economies of less developed countries and the lives of the poor, focusing on changes in poverty, inequality, demography, and health. We will consider theories and evidence for why some countries are rich and others poor. We will examine how land, labor, and credit markets function in poor countries and communities, and the consequences for health, education, and child labor. We will consider migration and its consequences and will discuss aid and international institutions.

Market Design YENMEZ, MEHMET B
Spring 2021
This is an advanced course on market design. The course aims to provide
students with theoretical concepts of matching and allocation problems. The
focus of the course is both introducing students to market-design theory as
well as exploring real-life applications such as on-campus housing, school
choice, kidney exchange, search engine auctions, and spectrum auctions.
Some knowledge of statistics, especially order statistics, and calculus is
required for the theoretical part. Students will be required to write a final
paper and do an in-class presentation.

ECON330801
Game Theory in Economics SHARUNOVA, VERA
Spring 2021
This course is an introduction to game theory. Game theory consists of a
coherent set of concepts and analytical tools to examine interactive or
strategic situations between people, that is, situations where the wellbeing of
one actor depends not only what s/he does but also on what others do. Hence
in deciding how best to act, each person needs to consider how others are
likely to act as well. Game theory has become a widely used tool of analysis in
a wide range of disciplines, including economics, business, political science,
law, and international relations.

Evolutionary Economics COX, DONALD
Spring 2021
This course uses evolutionary biology to better understand the psychology of
preferences, a central concept in economics. Why are people risk averse?
Impatient? What explains novelty seeking, habits, addictions? What makes
parents provide for children? We will use evolutionary thinking to explore these
and a host of other diverse topics: violence, adolescent risk taking, sexual
behavior, mating preferences, marriage and divorce, rearing and investing in
children, extended families, trade and specialization, cooperation and conflict,
cults and gangs, religion, and interactions between genetic and cultural forces.
This course has an intensive research and writing requirement and enrollment is
limited. You should be comfortable using Stata.
Prerequisites: Micro theory and econometrics.

ECON336101
Monetary Theory and Policy KAZEMI, HOSSEIN S
Spring 2021
This course is an analysis of how the operation and behavior of financial markets are influenced by monetary policy, the actions taken by the Federal Reserve to promote full employment, price stability, and moderate long-term interest rates. Emphasis is placed on studying the interaction between financial intermediaries (e.g., commercial banks, investment banks, mutual funds, hedge funds, etc.) and a nation's central bank. Students are introduced to the modern theories of the demand for and supply of money, as well as their implications for economic activity, the cost of living, employment, and the conduct of monetary policy. Particular emphasis is given to recent Fed policy, including Quantitative Easing and Quantitative Tightening and the impact of these policies on asset prices and long-term interest rates. Furthermore, through an extensive use of Bloomberg in this class students learn how to analyze the impact of these and other Fed policies on the U.S. economy and financial markets to provide a window into how modern practitioners in the discipline follow and respond to changes in U.S. monetary policy.
Prerequisites: macro theory and econometrics.

From Stone Tools to Robots: Economic Growth and Development GUERRON, PABLO
Spring 2021
In this class the student will learn about the drivers of economic growth. The class will cover the economic impact of major technological breakthroughs on humanity. These innovations include the invention of fire, agriculture, the printing press, electricity, the telephone, airplanes, and robotics. A significant part of the class will be devoted to discuss the Fourth Industrial Revolution, which is currently taking place. Within this framework, students will learn about research and development with emphasis on the development of vaccines and the job disruption created by artificial intelligence and automation.

ECON337601
International Economic Relations ANDERSON, JAMES
Spring 2021
This course introduces the study of economic relations among countries. It combines material contained in ECON3371 and ECON3372, and substitutes for both those courses. Primarily designed for international studies majors, it is also appropriate for economics and other social science majors, with the proviso that the comprehensive coverage of the course implies that the workload is heavy and expectations for students are high. Topics include the determinants of trade in goods, services, and capital; the economic policies that nations use to influence such trade; the theory and practice of international macroeconomics; and problems of coordinating macroeconomic policies among countries. The course features the usefulness (and limitations) of game theory for explaining international economic interactions.

ECON337901
Financial Economics IRELAND, PETER N
Spring 2021
This undergraduate elective focuses on financial economics, with specific emphasis on asset pricing and the valuation of risky cash flows. After developing and studying the details of consumer decision-making under uncertainty, it uses that general framework as a basis for understanding both equilibrium and no-arbitrage theories of securities pricing, including traditional models like the capital asset pricing model (CAPM), newer Arrow-Debreu theories, and, if time permits, arbitrage pricing theory (APT), the consumption capital asset pricing model (CCAPM), and martingale pricing methods.

ECON338901
Machine Learning for Economics ARALASHIN, ANATOLY S
Spring 2021
One of the defining features of the world around us today is the ever-increasing amount of data that describe our daily lives. This “big data” phenomenon, as it became known, has led to developing of new methods, called “machine learning,” that allow high-dimensional statistical analysis in ways that were either impossible or infeasible for classical statistical methods, such as regression analysis. The goal of this course is to provide students with an introduction to machine learning in a framework way that makes it applicable to causal economic analysis.
While we will cover the necessary theoretical foundations, the emphasis will be placed on application and learning how and when to use these new methods, and what are their pros and cons compared to classical methods of statistical analysis.

Experimental Economics COFFMAN, LUCAS
Spring 2021
This class is an introduction to experimental methods in economics. We will cover all the steps of an experiment from design, measurement, and randomization to practical considerations like cost and power analyses. This is mainly a methods course; the experiments we discuss are chosen to give a broad understanding of experimental methods (e.g., lab, field, and online studies, experiments in developing countries, interventions in organizations, and so on). The course is not intended to provide a foundation of famous experimental results overall or for any one topic. The take-away of the course is to develop the ability to design a confound-free experiment regardless of question or context.

English Courses: Summer 2020
ENGL101001
First Year Writing Seminar REZNICK, SCOTT
Summer 2020
Designed as a workshop in which each student develops a portfolio of personal and academic writing, the seminar follows a semester-long process. Students write and rewrite essays continuously, discuss their works-in-progress in class, and receive feedback during individual and small group conferences with the instructor. Students read a wide range of texts, including various forms of non-fiction prose. In addition to regular conferences, the class meets two hours per week to discuss the writing process, the relationship between reading and writing, conventional and innovative ways of doing research, and evolving drafts of class members.

ENGL108001
Literature Core REZNICK, SCOTT
Summer 2020
In Literature Core, students explore the principal motives which prompt people to read literature: to assemble and assess the shape and values of one's own culture, to discover alternative ways of looking at the world, to gain insight into issues of permanent human importance as well as issues of contemporary urgency, and to enjoy the linguistic and formal satisfactions of literary art. Literature Core will strive to develop the student's capacity to read and write with clarity and engagement, to allow for dialogue between the past and present we call history, and to provide an introduction to literary genres.

ENGL22101
Introduction to Creative Writing ROBERTS, SUSAN A
Summer 2020
An introductory course in which students will write both poetry and short fiction and read published examples of each. We will experiment with the formal possibilities of the two genres and look at what links and separates them. The course is workshop-based, with an emphasis on steady production and revision. Through exercises and/or open and directed writing assignments, students will produce a portfolio of short fiction and poetry.

ENGL331401
Writing Out of Place MATSON, SUZANNE M
Summer 2020
This writing workshop will take place in Bali. It will focus heavily on questions of location and dislocation. Writing can be seen as a complex negotiation between what we know and what we imagine, what we see and what we project or interpret. Such negotiation is greatly intensified for the person "out of place"—a condition that one, as a traveler, chooses to inhabit.

### English Courses: Fall 2020

#### ENGL33501
**Food Writing in Paris**  
**MATSON, SUZANNE M**  
**Summer 2020**  
ENGL335 is a four-week course held in Paris during the month of June. Students interested in applying to the course can e-mail questions to suzanne.mate@bc.edu or visit www.bc.edu/international.

**Credits:** 03  
**Room and Schedule:** None  
**Satisfies Core Requirement:** None  
**Prerequisites:** None  
**Corequisites:** None  
**Student Level:** UNDERGRAD-MAJORS  
**Comments:** None  
**Status:** CANCELLED

#### ENGL340101
**Science Fiction**  
**KAPLAN-MAXFIELD, THOMAS**  
**Summer 2020**  
This is a course on the genre of literature known as "Science Fiction," "SF," or "sci-fi." Since this is a genre course, we will spend a bit of time discussing the definition of science fiction, how there are many definitions that are not agreed upon, and what that tells us about the type of literature. We'll set the genre within the historical context of Enlightenment Rationalism and Romanticism's response to it, early nineteenth century Industrialism and the rise of machines. Class will consist of a bit of lecture followed mainly by discussions of the stories and books, within the terms set out above. We will read stories from Wells and Verne and novels from Asimov to Butler to see what science fiction tells us about ourselves and where we are going. Three papers required plus a midterm and final.

ENGL108001
Literature Core SHAW, CHANDLER M
Fall 2020
In Literature Core, students explore the principal motives which prompt people to read literature: to assemble and assess the shape and values of one's own culture, to discover alternative ways of looking at the world, to gain insight into issues of permanent human importance as well as issues of contemporary urgency, and to enjoy the linguistic and formal satisfactions of literary art. Literature Core will strive to develop the student's capacity to read and write with clarity and engagement, to allow for that dialogue between the past and present we call history, and to provide an introduction to literary genres.
Credits: 03
Room and Schedule: GASSON HALL 305; M W F 2;

ENGL108002
Literature Core MURPHY, JAMES H

Room and Schedule: T TH 10 30*; ONLINE; SYNCHRONOUS;

ENGL108008
Literature Core SONG, MIN
Fall 2020
In Literature Core, students explore the principal motives which prompt people to read literature: to assemble and assess the shape and values of one's own culture, to discover alternative ways of looking at the world, to gain insight into issues of permanent human importance as well as issues of contemporary urgency, and to enjoy the linguistic and formal satisfactions of literary art. Literature Core will strive to develop the student's capacity to read and write with clarity and engagement, to allow for that dialogue between the past and present we call history, and to provide an introduction to literary genres.

First Year Writing Seminar: From Slavery to Mass Incarceration  

**DEROSA, MARLA C**  
**Fall 2020**

This section of the First-Year Writing Seminar is centered around a book called Just Mercy by Bryan Stevenson. The book focuses on Stevenson's work with the criminal justice system and the organization he founded called the Equal Justice Initiative. The book raises questions about power, race, equality, justice, and the common good within the U.S. legal system for which there are no easy answers. Students will identify one of these issues/questions from the book and delve more deeply into that question. Students will start with an oral history/interview of a person who can shed light on their question from a personal or professional perspective. They will then review the academic research literature on the question and research what the media says about the issue. Finally, students will write and present (to a non-academic audience) an informed argument of their own about how to address issues of power and inequality.

Beyond Price: Markets, Cultures, Values  

**ERBIL, CAN; SE**  
**SESHADRI, KALPANA R**  
**Fall 2020**

This course is about wealth and values—the condition of our “knowing the price of everything and the value of nothing.” Given the glamour and power surrounding money and the super-rich, we examine issues concerning the economy, values, and the dominance of the market over our environment and personal lives. We look at markets, incentives, ecology and ethics through a combination of literature and academic research literature on the question and research what the media says about the issue. Finally, students will write and present (to a non-academic audience) an informed argument of their own about how to address issues of power and inequality.

Feeling Like Ourselves: How and Why Literature Moves Us SOFER, ANDREW  
**Fall 2020**

Ever since Aristotle questioned why we enjoy tragedy, thinkers have puzzled over why literature moves us. Why do we care about King Oedipus or Jane Eyre? Why do we laugh, cry, or shiver with pleasurable fear at stories we know aren't real? How do writers manipulate our emotions? More broadly, what can literature teach us about emotion's role in our own lives? By the course's end, students will have a richer understanding of literature's role in shaping and reflecting our emotions, together with a set of useful reading strategies that can be applied beyond literary studies.

Narrative and Myth in American Culture: The Case of Disney RUDNER, BONNIE  
**Fall 2020**

Storytelling and narrative have been central elements of communication since humans began to live in social structures. For hundreds of years, folk tales were adapted in order to influence social beliefs, values, attitudes, and behaviors. This literature Core course will explore the history of folk tales and their movement around the world. After reading source material from Grimm, Perrault, Anderson, and others, we will focus on the ways tales have been altered by the Disney Corporation in order to assess the impact of the movies on audiences.

When Life Happens: Disability and the Stories We Tell DUNSFORD, CLARE M  
**Fall 2020**

In this literature core course students will read stories of disability written by those who are disabled and those who love them or are interested in understanding their lives. We will read memoir, fiction, and essays that explore a range of physical and developmental disabilities. Questions of representation: who gets to tell the story, how disability has been represented historically at different times and in different cultures will be considered in terms of literary analysis and disability theory.

Intermediate Modern Irish I NUGENT, JOSEPH G  
**Fall 2020**

This is a continuing course in modern Irish for those with a basic knowledge of the language. We'll emphasize the ability to read contemporary literature in various genres. Texts from a variety of authors and historical periods allow students to taste different writing styles: contemporary fiction, journalism, literary criticism, historical and cultural texts, while we enjoy Irish-language short films and videos.

Introduction to Feminisms MURPHY, ANNALYSSA G  
**Fall 2020**

This introductory course offers both an overview and a foundation for understanding the various movements that make up what has come to be called the feminist movement in the U.S. Because systems of privilege and disadvantage shape women's and men's identities and social positions in multiple and unique ways, Introduction to
Feminisms analyzes gender from an interdisciplinary approach and applies numerous academic disciplinary methods to the study of gender, including history, literature, psychology, and sociology, and explores women’s and men’s experiences within various cultural contexts, including socioeconomic class, race and ethnicity, religion and spirituality, nations of citizenship, origin, and generation.

**Studies in Narrative WALLACE, ELIZABETH**

**Fall 2020**

This course introduces students to questions that they might bring to the study of narrative works—primarily novels, tales, and non-fictional narratives, though it may also include drama, film, and narrative poems. It aims to introduce the various critical frames through which we construct interpretations. As part of the process of reading, students will be introduced to common critical terms; narrative genres, conventions, and discourses; the construction of the character and the ways of representing consciousness; and the ordering of narrative time. The course will also expose the student to the implications of taking critical positions.

American Literary History I follows the development of American literary history from the landing of the Mayflower to the tumultuous decade of the 1850s, moving from such early writers as Bradstreet, Rowlandson, and Taylor through such writers of the Revolution and Early Republic as Equiano, Franklin, and Rowson to such antebellum writers as Child, Thoreau, Hawthorne, Poe, Douglas, Whittman, and Melville. Course assignments include regular participation in class discussions, mid-semester and final examinations, and either one ten-page or two five-page essay(s). Students considering careers in secondary English education will be given the option of writing about approaches to teaching course texts.

ENGL214301
American Literary History III O’HAR, GEORGE
Fall 2020
This course provides an introductory overview of literature written in the United States from World War I to the early twenty-first century. We will look at the ways writers of this period have experimented idiosyncratically and in dialogue with one another as modernism turned postmodern, as canons collided and collapsed, as movies and music albums, as well as graphic literature displaced some of literature’s more traditional forms. The course is largely conversational but structurally supported with student oral presentations. Required texts may include fiction by William Faulkner, Willa Cather, Toni Morrison, Maxine Hong Kingston, Sherman Alexie, and Junot Diaz, plus graphic literature by Art Spiegelman and Thi Bui. Requirements for the course include an oral presentation, two critical essays, two section exams, and a final exam.

ENGL216301
Triumphant Calamity: The Modern Condition BOWLES, DANIEL J
Fall 2020
In this seminar students are invited to explore the variety and complexity of modernism through German literature, film, and art. Our aim is to understand how such works gave voice to the triumphs and failings of humankind at a time of dislocation, upheaval, radical change, and seemingly limitless possibility. Readings include works by Nietzsche, Rilke, Kafka, Mann, Freud, and Keun and screenings include films by Lang, Murnau, Wiene, and Sagan.

Credits: 03

Comments: Conducted in English with all texts in English translation. Counts toward German major, German minor, and German Studies minor. New course number as of Fall 2020; formerly GERM1063-Triumphs and Failings of Modern Man
Status: OPEN

ENGL217001
Introduction to British Literature and Culture I CRANE, MARY T
Fall 2020
A survey of British literature from Beowulf to the early eighteenth century. You will be introduced to major cultural themes and both canonical and lesser-known writers; learn the basic history of the English language; and explore topics like the court’s influence on Renaissance literature and art, the new Renaissance focus on exploration and discovery, the development of drama before and after the English Revolution, the seventeenth-century emphasis on writing about the self, and the eighteenth-century rise of new modes of social life and communication. Works and authors will include Beowulf, Chaucer, Spenser, Shakespeare, Donne, Milton, Swift, and Pope.

ENGL217001
The Underground Press ARDS, ANGELA
Fall 2020
The underground press was a vast network of loosely affiliated newspapers that emerged in the 1950s and 60s when young people asked very hard questions about the meaning of power and the role of the press. The outsider outlets spread through hundreds of communities throughout the nation, ranging from big city weeklies like “The Village Voice” and the Berkeley “Barb” to specialized periodicals representing the Black press, as well as other ethnic newspapers, progressive weeklies, and various conservative perspectives. This course examines the factors that helped pave the way for this journalism of dissent and how this history affects alternative media today.

ENGL222001
Classical Mythology EISENFELD, HANNE E
Fall 2020
This course explores the mythology of ancient Greece, Rome, and the Near East within its cultural, political, historical, and religious contexts. You will meet (or renew your acquaintance with) mythical figures like Zeus, Gilgamesh, Medusa, and Helen as they appear in multiple literary genres and other artistic media. In order to analyze and interrogate these myths we will use ancient and modern frameworks for thinking about what mythology is and what it does. What can a myth tell us about the civilization that created, adopted, or adapted it? What do our uses of Classical mythology—and our creations of our own myths—tell us about ourselves?

ENGL224101
Playwriting I CUMMINGS, SCOTT T
Fall 2020
This writing-intensive course offers a practical introduction to the art and craft of writing for performance. Students will engage in numerous writing exercises that highlight the special demands and opportunities of writing for the stage. Emphasis is placed on finding ways to contact and release the theatrical imagination and on mastering the basics of writing a solid dramatic scene. Exemplary plays by established playwrights will be studied as appropriate, but the overwhelming emphasis is on student writing.

ENGL227701
Introduction to American Studies HARRISON-KAHAN, LORI
Fall 2020
This course offers an introduction to the interdisciplinary study of American culture. It is not a survey of American cultural history; rather, we will concentrate on approaches, methods, and themes of interest as we assemble critical skills for making interpretive arguments about aspects of culture in their historical moment. The forms we analyze will include examples from literature, film, painting, music, theater, landscape, and architecture, among others. Members of the American Studies faculty will present guest lectures to highlight various aspects of the field.

Ancient Comedy POLT, CHRISTOPHER B
Fall 2020
This course explores comedy from ancient Greece and Rome. Reading plays by Aristophanes, Plautus, and Terence, we will examine what the ancients considered "comic," how comedy was performed, and what comedy contributed to contemporary society. Along the way we will consider how comedy promotes, questions, and lampoons ancient values and ideas about warfare, slavery, gender and sexuality, etc. All readings will be in English and there will be substantial performance opportunities.

ENGL300101
Walking Infinite Jest BOUCHER, CHRISTOPHER G
Fall 2020
David Foster Wallace describes Enfield, Massachusetts—an important setting in his 1996 novel Infinite Jest—as "a kind of arm-shape extending north from Commonwealth Avenue and separating Brighton into Upper and Lower, its elbow nudging East Newton's ribs and its fist sunk into Allston?”. Sound familiar? In this course, we'll conduct a Bostonian's reading of Wallace's opus. Students will be required to write weekly critical reading responses, and should be prepared for the course's non-traditional structure: weekly meetings will sometimes be canceled in lieu of weekend on-site meetings in Brighton and Boston.

ENGL318001
The Story of My Teeth: Avant-Garde Literature in the Twenty-First Century BOUCHER, CHRISTOPHER G
Fall 2020
We know what it meant for avant-garde writers of previous eras--James Joyce, Gertrude Stein, Georges Perec, and so many others--to "make it new." But what does that concept mean in the here and now? How are today's artists incorporating or reflecting contemporary culture in order to "break the mold"? This course will begin by introducing students to the tradition of the avant-garde before examining the work of modern-day harbinger Lucy Ellmann, Nick Montfort, Enrique Vila-Matas, and Valeria Luiselli. By studying this work in context, students will acquire new lenses through which to read their own culture, especially with regards to the establishment or destabilizing of cultural norms.

ENGL332601
Blackness, Performance, and Freedom CURSEEN, ALLISON S
Fall 2020
From Henry Box Brown's cargo dramatization to Ellen Craft's incredible performance as a free black male traveler with his black servant to Brer Rabbit's feigned fear of the briar patch, artifice, and performance repeatedly serve as the necessary means, if not the conditions of possibility for, fugitive departure and black life. This course asks how masks, masquerades, con-acts, and acting enable resistance and escape. We will explore how the radical work of historical black performances continue in contemporary black performances like Danny Glover's Childish Gambino; Beyoncé's Sasha Fierce; Ru Paul's Drag Race; and the increasingly popular interest in black speculative and Afrofuturism (i.e., Random Acts of Flynness and Get Out).

ENGL335601
Incendiary Poetics ROBERTS, SUSAN A
Fall 2020
American poetry has come to establish a multitude of voices and styles since Walt Whitman challenged the formal structures of the genre with his long lines, confessional voice, and provocative subjects. In this course we'll examine a variety of "incendiary" poets: Whitman, Langston Hughes, Allen Ginsberg, Claudia Rankine, and Susan Howe specifically, with forays into the work of poets writing alongside these poets (the Harlem Renaissance, Beats, and Language Poets in particular) and shorter readings by emerging writers like Patrick Lockwood and Ilya Kaminsky. We'll be looking at what makes these poets' work controversial, to the point of being banned--Ginsberg's "Howl" was actually put on trial--and asking what poetry's role has been and might continue to be as an agent of change in the articulation of self as a lyric impulse, in form, and in social conscience.

ENGL337701
Medieval Arthurian Literature STANTON, ROBERT G
Fall 2020
Myth, legend, and history conspired to make the most popular and enduring set of characters in medieval literature: King Arthur, Guinevere, Machiavellian sorcerer Merlin, lustful Uther, Sirs Gawain, Lancelot, Perceval, and the other Knights of the Round Table. We will dig at the Celtic roots of the Arthurian tales, revel in the golden age of French romance, take a deotto to medieval Iceland, and examine the transformative influence the tradition had on the mainstream of English literature. All texts will be read in Modern English translation except the Middle English ones, but no previous Middle English knowledge is required.

ENGL400201  
Narrative Journalism in Peace and War  
WILSON, CHRISTOPHER P  
Fall 2020

This course will engage with modern and contemporary examples of so-called "long form" journalistic narratives (essays, books, and perhaps an example of graphic journalism) that, by applying literary techniques to nonfiction, tell us a story about contemporary social life.

Discussing matters of literary form and technique as well as journalistic norms, we will cover nonfiction texts that address both social conditions on the home front (inequality, Wall Street adventurism, street crime, race relations, police culture) and international conflicts (including war and terrorism), generally (but not always) involving the U.S. Writers covered will include figures such as Michael Lewis, Joan Didion, George Packer, William Finnegan, Suki Kim, Isabel Wilkerson, Geraldine Brooks, Mike Davis, Alex Kotlowitz, John Hersey, Anne Fadiman and others. This is a critical course.

Sexuality, History, and Faith in Nineteenth Century Prose  
NAJARIAN, JAMES  
Fall 2020

In this course, we will examine how dilemmas about faith, doubt, sexuality, and gender intertwine in the course of the nineteenth century. We will read diaries, letters, sermons, essays, poetry, short fiction and memoir, including works by Mary Wollstonecraft, Percy Shelley, John Keats, Anne Lister, Thomas Arnold, Sidney Smith, Matthew Arnold, George Eliot, Annie Besant, Francis Power Cobbe, Margaret Oliphant, and others.

Imagining New England  
RICE, JOCELYN L  
Fall 2020

This course will examine the idea of New England in American culture. Through the exploration of literature, film, and the built environment, we will consider the qualities that define the region and how these characteristics have changed over time. The course will be organized thematically around issues such as landscape, architecture, race, education, and icons. Readings and films may include works by Mary Rowlandson, Nathaniel Hawthorne, Dorothy West, and Greta Gerwig. Students will develop strategies for close reading and complete an archival research project.

ENGL403401  
Rape Culture in the Eighteenth-Century Novel  
SULLIVAN, SABINA M  
Fall 2020

Questions of consent, sexuality, and selfhood animate the eighteenth-century English novel. This course will endeavor to trace how rape culture shapes narrative, from seventeenth-century captivity narratives through "the rise of the novel." What is rape culture, and what did it look like during the eighteenth century? How does the eighteenth century speak to our contemporary cultural moment? Authors may include but are not limited to Daniel Defoe, Samuel Richardson, Leonora Sansay, Mary Rowlandson, Charlotte Lennox, Hannah Webster Foster, and Mary Prince. Students will also read literary and cultural criticism.

ENGL410001  
Fortunes, Failures, and Frauds: Business Stories  
HUNT, AERON P  
Fall 2020

In our economic, political, and personal lives, business stories exercise an extraordinary influence. This course examines the ways narratives shape commercial life, within ourselves and our communities. Spanning genres and national traditions from the nineteenth century to the present, the course addresses questions of ethics, value, and identity in novels, plays, films, and nonfiction prose. We read texts that focus on recent periods of commercial exuberance and economic crisis, technological innovation and identity-based tension. And we explore how literary arts and film have responded to the powerful ideologies and practices of modern capitalism in both collaborative and critical ways.

ENGL434001  
Milton  
HASKIN, DAYTON W  
Fall 2020

Readings in early poetry will lead up to reading Milton's epic in its entirety. Some attention will be afforded to Milton's political writing as well. After reading Paradise Lost, we'll look into the experience of one of its most earnest readers, the unnamed creature at the center of Mary Shelley's Frankenstein. There will be ample opportunities to read aloud in small groups outside our ordinary class-meetings.

ENGL439501  
Literary Theory  
LEHMANN, ROBERT S  
Fall 2020

In this course, we will examine theoretical works that pose and attempt to answer the question: What is literature? What, in other words, does or does not make literature different from non-literary writings or from ordinary communicative acts? Though our primary focus will be on trends in twentieth-century literary theory--e.g., new criticism, formalism, structuralism, and deconstruction--we will also examine earlier attempts to determine the nature and the possibilities of literature. Authors may include Friedrich Schlegel, Cleanth Brooks, Boris Eikhenbaum, Maurice Blanchot, Paul de Man, Helene Cixous, Barbara Johnson, and Jonathan Culler.

ENGL442001
How to Begin Thinking: Aftermaths of Twentieth-Century Literature, Philosophy, History NEWMARK, KEVIN
Fall 2020
"Thinking," the French philosopher Emmanuel Levinas once suggested, "probably begins through traumatisms." This course will study a series of disruptive and transformative events that have indelibly marked the twentieth century. What is the task of thinking for a European tradition displaced internally by the Holocaust and externally by the end of colonial expansions into other continents? Authors will include Levinas, Derrida, Nancy, Saussure, Barthes, Duras (in English translation from French); Borges and Dorfman (in English and English translation from Spanish); Calvino (in English translation from Italian); and Descartes (in English translation from Latin). A German component (in English translation) will consider Husserl and Heidegger as a counterpoint to the European tradition of Romance languages, literatures, and cultures.

ENGL442401
Irish Victorian Fiction MURPHY, JAMES H
Fall 2020
Now a subject of great scholarly interest, Irish Victorian fiction was long neglected because the following writers of the Irish Literary Revival, such as Yeats, sought to bolster their own importance. Twentieth-century, postcolonial critics wanted to see nineteenth-century Ireland as a fractured society incapable of fiction. In this class students will read novels that raise issues relevant to Irish Victorian fiction: the possession of land and relations between landlords and tenants; the dynamics of rural society; Gothic and allegory in writing; realism in fiction; social satire and urban fiction; women novelists and the New-Woman Novel.

ENGL447700
Writing Workshop: Poetry MATSON, SUZANNE M
Fall 2020
The course will provide an introduction to poetry writing as a discipline and craft by encouraging students to practice writing in a variety of modes. Students' own poems, from both open and directed writing assignments, will become the main text for this workshop, in addition to some models provided by the instructor for discussion of prosody and technique. The workshop critiques will focus on strategies for revising early drafts, and a chapbook of finished poems will be due from each student at the end of the semester. No application process.

ENGL443201
Advanced Creative Nonfiction: Writing Food, Identity, and Culture ANDERSON, LYNNE C
Fall 2020
In this workshop, we’ll examine the intersections between food, culture, and identity as we write about our own experiences. We’ll explore the local food landscape, drawing on the city of Boston with its ever-evolving culinary traditions that have been shaped by people from around the world. Assignments will include personal essays and profiles of cooks and the places and foods connected to them. Several field trips to a local farmer’s market, artisan bakery, and cheese cellar will be offered. We will sample a variety of locally produced foods and evoke the sensory experience of eating through writing. Previous workshop experience is helpful.

ENGL443401
Advanced Creative Non-Fiction: Writing Mental Health ROBERTS, SUSAN A
Fall 2020
"Much madness is divinest sense--'twas a discerning eye"--so begins one of Emily Dickinson's most famous poems. How do writers treat mental health and illness as a subject? What are the issues and questions that arise when contemplating such a large and complex area? In this workshop students will write their own essays in a variety of non-fiction styles (reportage, opinion, profile, narrative, memoir) to address issues of mental health such as mental illness, addiction, neurology and neuropsychology, behavior, and medical history. We'll read short works from a wide selection of writers across disciplines that may include: Ta Nehisi Coates, Oliver Sacks, Elizabeth Wurtzel, William Styron, Mary Karr, Sigmund Freud, Carl Jung, Alice Miller, Leslie Jamison, and poems of Theodore Roethke, Sylvia Plath, and Ted Hughes, documentary, and photographic work of artists like Dior Vargas. The first half of each class will be dedicated to discussing the readings and writing exercises and prompts; the second will be a workshop discussion of student essays-in-progress. You will be required to complete two shorter essays (7-10 pages) and one long essay (15-20) with a heavy emphasis on revision and research throughout. Experimentation is both encouraged and expected.

ENGL457901
Writing Workshop: Fiction NI DUBHNE, EILIS
Fall 2020
This course provides encouragement, practice, and criticism for students seriously interested in writing short fiction. The workshop format demands self-motivation and universal participation. Since students' stories are texts for class discussion, a generous willingness to respond to others' writing and to expose one's own work to such reactions is an essential prerequisite.

Individual conferences with the instructor supplement the workshop discussions. Students are expected to produce a steady stream of new and revised fiction throughout the semester.

Narrative preferences from the traditional to the experimental are welcome.

ENGL501801
Seminar: Graphic Texts as Literature PUENTE, LORENZO A
Fall 2020
This course is a seminar in the graphic novel. It will give students the critical skills to read, understand—and enjoy—the graphic narrative: the dynamic interrelationship between images and text to convey meaning. This class will study graphic literature's connections to modernist and postmodernist art and literature, as well as bring in comics-specific criticism and theory. Ultimately, the course will interrogate the term "graphic novel" and its cultural significance. The course is particularly interested in exploring the ways this genre narrates the central themes of the American experience: politics, sexuality, class, violence, cultural and ethnic diversity. Primary texts include works by artists such as Lynda Barry, Art Spiegelman, Alison Bechdel, Gene Luen Yang, and Thi Bui, among others.
Credits: 03
Room and Schedule: M 11 30-1 55;ONLINE;SYNCHRONOUS;
Satisfies Core Requirement: None
Prerequisites: None Corequisites: None Cross-listed
with: None Frequency: Periodically
Student Level: UNDERGRAD ELECT
Comments: This course satisfies the Seminar requirement for English Majors.
Status: OPEN

ENGL551001
Contemporary American Women Writers TANNER, LAURA E
Fall 2020
Focusing on literature written by American women from 1980 to the present, this course will explore issues of space, family dynamics, immigration, power, race, violence, grief, and embodiment, as well as gender. We will ask questions such as: How do these writers define space, and use literature to claim a space of their own? What is the relationship between gender and race or ethnicity, in a given text and in contemporary American culture? How do women writers represent the intangible dynamics of emotional connection and loss? How does fiction represent changing experiences of embodiment, including pregnancy, obesity, illness, and aging?

ENGL551301
American Studies Senior Seminar: Transnational American Studies KLEIN, CHRISTINA
Fall 2020
What happens when "foreign" people, texts, and ideas enter the United States? What happens when "American" people, texts, and ideas are consumed by others around the world? What happens when distinctions between "American" and "foreign" break down? This course explores diverse topics in American history and culture from a transnational perspective. Topics covered include: immigration, imperialism, wars, borders, cosmopolitanism, and cultural hybridity. Culminates in a substantial research project.
Credits: 03
Room and Schedule: T 9-11 25;ONLINE;SYNCHRONOUS;
Satisfies Core Requirement: None
Prerequisites: None Corequisites: None Cross-listed
with: None Frequency: Periodically
Student Level: UNDERGRAD ELECT
Comments: Fulfills the Seminar requirement for English Majors.

ENGL600401
Environmental Humanities SONG, MIN
Fall 2020
Entanglements. Assemblages. Precarity. As discussions about the environment run into the fact that the boundaries between humans and nature are hopelessly muddled, scholars and writers are in the process of developing a field of study that's been called "environmental humanities." Those working in this emerging field are coming up with original ways of thinking about our relationship to the world around us. This course seeks to make sense of the concepts they are developing and apply them to the interpretation of literary texts and to our understanding of everyday experiences. The readings for this course are a mix of scholarly writings, journalism, and novels.
Credits: 03
Room and Schedule: W 4 30-6 55;ONLINE;SYNCHRONOUS;
Satisfies Core Requirement: None

with: None Frequency: Periodically
Student Level: UNDERGRAD & GRAD
Comments: Fulfills the Seminar Requirement for English Majors.
Status: CLOSED

ENGL602501
Atlanta and the Black Atlantic CURSEEN, ALLISON S
Fall 2020
Though conceived before the COVID-19 crisis, this course proceeds with a belief that in this pandemic, Black America, to quote W.E.B. DuBois, "has a message for the world." Focusing on DuBois' beloved Atlanta and black communities along the Atlantic coast, we will listen for the potentially instructive message black cultural texts offer. We will study both what these texts reveal about the history and politics underlying the particularly racialized effects of the COVID crisis and what they might teach us about living amid fears of there being no "return back to normal." For to enter black study is to enter an ongoing study about possibilities: the possibility of living in the wake of the impossible-to-imagine rupture of every structure of normacy; the possibility of living, suddenly without space or time, as other—as less but also more—than oneself; the possibility of living still and living, nonetheless, abundantly.
Credits: 03
Room and Schedule: STOKES HALL 103N,T 7-9 25;
Satisfies Core Requirement: None
Prerequisites: None Corequisites: None Cross-listed
with: None Frequency: Periodically
Student Level: UNDERGRAD & GRAD
Comments: Fulfills pre-1700 requirement for English majors and minors. Also fulfills the Seminar Requirement for English majors.
Status: OPEN

ENGL602701
Seminar: Historical Fiction MCALEAVEY, MAIA M
Fall 2020
What is at stake in reimagining history through fiction? In this course, we consider the development of historical fiction from the eighteenth century to the present. We will investigate important settings for historical novels, likely including: the Middle Ages as seen through Arthurian legend, the Jacobite uprisings in the Scottish Highlands, the French Revolution, and American slavery. Topics will include: the claims of realism and the powers of fantasy, the relationship of space to time, the rise of nationalism, and the power of fiction itself to shape history. Theories of genre, historicism, and historiography will guide our conversation.
Credits: 03
Room and Schedule: CAMPION HALL 200,TH 2-4 25;
Satisfies Core Requirement: None
Prerequisites: None Corequisites: None Cross-listed
with: None Frequency: Periodically
Student Level: UNDERGRAD & GRAD
Comments: Grad/undergraduate course. Fulfills pre-1900 requirement for English. Fulfills Seminar requirement for English.
Status: CLOSED

ENGL602901
The Modern Novel OHI, KEVIN J
Fall 2020
What is distinctive about the novel genre in and after modernism? Beginning with Henry James, we will read a series of major novels, written in English between about 1900 and about 1960, seeking to describe what is significant about narrative voice, point of view, style, narrative structure, characterization, plot, and other aspects of their language. The novels' formal and linguistic innovations will lead us to consider their representations of politics (including race and gender), desire, psychology, and epistemology. Writers will include some of the following: James, Woolf, Joyce, Beckett,
Ford, O'Brien, Conrad, Faulkner, Barnes, Hurston, Nabokov, Baldwin, Ellison, and Gaddis.

ENGL88701
Introduction to Advanced Research NAJARIAN, JAMES
This course will acquaint you with the resources to carry out the central tasks of literary scholarship. Bibliography (studying the production, dissemination, collection, location, and identification of literary artifacts and versions) forms the dynamic basis for scholarship and criticism of all kinds, just as critical sensibility guides our choice of what to look for. You will be guided through the reference works and databases in the Boston College library and elsewhere, discuss the goals, purposes, and future of the field of literary studies, explore the phenomenon of digital humanities, and produce an original project based on archival sources.

ENGL900701
Ph.D. Seminar: Global Crossroads MITSEIN, REBEKAH K
Fall 2020
In this class, we will examine how British writers engaged questions of globalization and transnationalism during an era when the cultural understanding of both Britain and the world were changing. The reading list includes works by Aphra Behn, Daniel Defoe, Samuel Johnson, Lady Mary Wortley Montagu, Dean Mohamet, and Ignatius Sancho. The secondary material for this class comes from a variety of critical perspectives, including postcolonial and global theory, ecocriticism, geocriticism, and posthumanism/new materialism. We will discuss the different theoretical and political stakes these approaches bring to how we conceptualize the global as literary scholars and cultural critics.

English Courses: Spring 2021

ENGL101001
First Year Writing Seminar COTTI-LOWELL, ALISON S
Spring 2021
As a workshop in which each student develops a portfolio of personal and academic writing, the seminar follows a semester-long process. Students write and rewrite essays continuously, discuss their works-in-progress in class, and receive feedback during individual and small group conferences with the instructor. Students read a wide range of texts, including various forms of non-fiction prose. In addition to regular conferences, the class meets two hours per week to discuss the writing process, the relationship between reading and writing, conventional and innovative ways of doing research, and evolving drafts of class members.
Credits: 03

**ENGL101033**

First Year Writing Seminar REDMOND, CHARLES D  

**Spring 2021**  

Designed as a seminar for English Language Learners, students explore the principal motives which prompt people to read literature: to assemble and assess the shape and values of one's own culture, to discover alternative ways of looking at the world, to gain insight into issues of permanent human importance as well as contemporary urgency, and to enjoy the linguistic and formal satisfactions of literary art. Literature Core strives to develop the student's capacity to read and write with clarity and engagement and to provide an introduction to literary genres. Linguistic support for students from diverse language backgrounds is provided throughout the semester. Department Permission Required--from the English Department.

ENGL108008  
Literature Core SULLIVAN, SABINA M  
Spring 2021  
In Literature Core, students explore the principal motives which prompt people to read literature: to assemble and assess the shape and values of one's own culture, to discover alternative ways of looking at the world, to gain insight into issues of permanent human importance as well as issues of contemporary urgency, and to enjoy the linguistic and formal satisfactions of literary art. Literature Core will strive to develop the student's capacity to read and write with clarity and engagement, to allow for that dialogue between the past and present we call history, and to provide an introduction to literary genres.

This section of Literature Core will focus on narratives that speak to questions of slavery, incarceration, and freedom—both literal and metaphorical. The current pandemic along with the mass demonstrations against systemic racial injustices will provide a particular backdrop and context from which to consider these questions and issues. The course will start with historical and political writings about slavery from the 1800s and the social contexts in which these writings were produced and consumed. We will then move on to historical and contemporary fiction and film that informs and challenges our historical understanding of slavery and the relationship between slavery and our current system of incarceration. Course texts may include Homegoing (Yaa Gyasi), The Narrative of the Life of Frederick Douglass, David Walker’s Appeal, Beloved (Toni Morrison), Kindred (Octavia Butler), The Nickel Boys (Colson Whitehead), and Just Mercy (Bryan Stevenson).

We know that literature can transport us. But so too can literature transform us. Dislocate us. And provide challenges and shifts in thinking. In this course, which meets the goals of the Literature Core at Boston College, as well as the core requirement in Difference, Justice and the Common Good, students will encounter injustice within literary works. In reading treatments of injustice across time and literary genres, students will encounter powerful depictions of social injustices and ultimately will imagine and name alternate pathways toward a more just world. Literature in this course will bring readers close to the pain of injustice and inequality; research, writing and discussions of context will prompt greater understanding as well as a vision of transformative compassion and greater equality. We will read short stories, essays, speeches and poems, and authors including Allison Bechdel, Octavia Butler, Art Spiegelman, Bryan Stevenson. Reading selections will influence the style and content of the student work. Student experience and student questions regarding justice, injustice and ethics will provide a skeleton for the coursework.

An introduction to literary genres. For that dialogue between the past and present we call history, and to provide an introduction to literary genres.

An examination of how we use language to regulate power relations among social groups and of how individuals define personal identity through speech. Case studies include: the linguistic representation of social class membership, dialect geography,
Native Americans and U.S. language policy, the Ebonics controversy, and arguments for and against maintaining public language standards. Emphasis on the status of language and ethnicity in the United States, viewed in cross-cultural perspective.

**ENGL212501**  
Introduction to Feminisms  
MURPHY, ANNALYSSA G  
Spring 2021  
This introductory course offers both an overview and a foundation for understanding the various movements that make up what has come to be called the feminist movement in the U.S. Because systems of privilege and disadvantage shape women's and men's identities and social positions in multiple and unique ways, Introduction to Feminisms analyzes gender from an interdisciplinary approach and applies numerous academic disciplinary methods to the study of gender, including history, literature, psychology, and sociology, and explores women's and men's experiences within various cultural contexts, including socioeconomic class, race and ethnicity, religion and spirituality, nations of citizenship, origin, and generation.

This course introduces students to questions that they might bring to the study of narrative works—primarily novels, tales, and non-fictional narratives, though it may also include drama, film, and narrative poems. It aims to introduce the various critical frames through which we construct interpretations. As part of the process of reading, students will be introduced to common critical terms; narrative genres, conventions, and discourses; the construction of the character and the ways of representing consciousness; and the ordering of narrative time. The course will also expose the student to the implications of taking critical positions.

The decades following the Civil War were a time of fundamental change in U.S. society: the demise of the slave system and the rise of segregation; the emergence of industrialism, corporate culture, imperial adventurism, and successive waves of immigration; new roles for women; new patterns in cities and in regional byways; and new ideas imagined for reordering and reinventing democratic society all transformed the contours of daily life. This course examines how a diverse range of U.S. writers sought to capture and address these developments with new literary forms and practices, including the realist and naturalist novels to utopian literature and various forms of social commentary. Stretching, roughly, from 1865 to 1914, course readings will likely include works by Herman Melville, Mark Twain, W. E. B. Du Bois, Booker T. Washington, Rebecca Harding Davis, William Dean Howells, Charlotte Perkins Gilman, and Henry James.

ENGL215401
Introduction to Adolescent Fiction RUDNER, BONNIE
Spring 2021
First of all, what is a young adult? And second of all, what is a hero? We will be delving into both of these issues, as well as the relationship between them. We will be looking at heroes who function in real worlds and some who function in fantasy worlds. We will attempt to assess the impact of heroes in contemporary life, especially in relation to the young adults who need them. Are there any more heroes for young adults? In what ways do female heroes differ from male heroes?

ENGL217101
Introduction to British Literature and Culture II WALLACE, ELIZABETH
Spring 2021
This lecture course explores great British writers from 1700 to the present. This period includes (among much else) the great essayists and satirists of the eighteenth century, the Romantic poets and Victorian novelists of the nineteenth, the modernists of the twentieth, and the world writing that follows the break-up of the British empire. We consider these works in light of the cultural context in which they were written.

ENGL220201
Beast Literature POLT, CHRISTOPHER B
Spring 2021
From Mother Goose’s fairy tales to lolcats, we imagine animals often speaking as we do. But what are we saying when we use animals to talk with and about one another? And what does literature featuring articulate animals say about our attitudes towards humans, animals, and the lines we draw between them? This course explores “beast literature” in its various forms (fable, comedy, the novel, epic, debate poetry, etc.), examining its incarnations through ancient Greece and Rome, Medieval Europe, and the modern world.

ENGL221202
Introduction to Medical Humanities BOESKY, AMY
Spring 2021
This course will use contemporary literature as a springboard to consider the psychological, social, ethical, and experiential dimensions of sickness and health. In addition to exploring questions of illness and the body, we will address topics including disability, aging, pregnancy, pain, medical space, illness and culture, and care giving.

Through the analysis of novels, poems, short stories and non-fiction, we will consider the way that bodily experiences, material conditions, and cultural constructions of normality shape our understanding of identity in sickness and in health.

ENGL222501
War Stories WILT, JUDITH
Spring 2021
War has been a subject of stories across the centuries. This one-credit seminar will focus on nineteenth- through twenty-first-century accounts of war in novels, stories, nonfiction, poems, and films. We will analyze how texts create war stories that are celebratory or cynical, and sometimes both at once, with a focus on issues such as heroism, psychology and trauma, violence, sacrifice, and national belonging. Students will write five short reflection papers (approximately 2 pages each) and a take home final exam with an essay format.

ENGL227701
Introduction to American Studies HARRISON-KAHAN, LORI
Spring 2021
This course offers an introduction to the interdisciplinary study of American culture. It is not a survey of American cultural history; rather, we will concentrate on approaches, methods, and themes of interest as we assemble critical skills for making interpretive arguments about aspects of culture in their historical moment. The forms we analyze will include examples from literature, film, painting, music, theater, landscape, and architecture, among others. Members of the American Studies faculty will present guest lectures to highlight various aspects of the field.

ENGL301801
Graphic Texts as Literature PUENTE, LORENZO A
Spring 2021
This course is an introduction to the graphic novel. It will give students the critical skills to read, understand—and enjoy—the graphic narrative: the dynamic interrelationship between images and text to convey meaning. This class will study graphic literature's connections to modernist and postmodernist art and literature, as well as bring in comics-specific criticism and theory. Ultimately, the course will interrogate the term "graphic novel" and its cultural significance. The course is particularly interested in exploring the ways this genre narrates the central themes of the American experience: politics, sexuality, class, violence, cultural and ethnic diversity. Primary texts include works by artists such as Lynda Barry, Art Spiegelman, Alison Bechdel, Gene Luen Yang, and Thi Bui, among others.

ENGL330401
King Arthur in German Literature RESLER, MICHAEL
Spring 2021
A study centering on the most popular and enduring of all medieval legendary figures. We will examine the early texts from which the Arthurian mythology took root and contributed to the eventual spread into Germany of the tales of King Arthur and the Knights of the Round Table. We will then focus on a close reading of four or five of the most significant Arthurian romances within the German tradition. In addition, we will systematically trace the relationship between this highly idealized world of literary knighthood and real-life contemporary historical and social events of the twelfth and thirteenth centuries.

ENGL336401
Nineteenth-Century British Fiction MCALEAVEY, MAIA M
Spring 2021
This course examines five major works in the development of the British novel: Jane Austen's Pride and Prejudice (1813), Elizabeth Gaskell's North and South (1855), Charles Dickens's Bleak House (1852), George Eliot's Middlemarch (1872), and Thomas Hardy's The Return of the Native (1874). These classic (but long) novels will be considered in their cultural and historical contexts, with particular focus on gender roles, poverty, social justice, and the rise of the city. We will consider the aesthetic development of realism and experimental modes of narration, linking these artistic concepts, as our authors did, to questions of morality and community.

ENGL38001
True Stories: Nineteenth-Century American Novels and the News POTROFF, CHRISTY L
Spring 2021
This course considers three landmark nineteenth-century American novels--The Coquette (1797), Moby-Dick (1851), and Cotel (1853)--and their relationship to the true stories that drive their plots. Each novel was inspired by a ripped-from-the-headlines event: The Coquette is based on the scandalous life and death of Elizabeth Whitman; Moby-Dick was inspired by the sinking of the whaling ship Essex; the most notorious maritime disaster of the 1800s; and Cotel articulates the relationship between Thomas Jefferson and Sally Hemmings, a woman he enslaved. Before reading the novels, we will first explore primary documents--court transcripts, police reports, diaries, and letters--surrounding the historical events. Then, we will read a wide range of contemporary multimedia responses to the events, including newspaper articles, pamphlets, songs, poetry, and short fiction. With a thorough understanding of the event's historical context, we will then read the novel. By situating these novels and historical events within their media landscapes, we will explore the central question of literary studies: what can novels do that other written forms cannot?

ENGL370301
Performing Identity on Page and Stage MITSEIN, REBEKAH K
Spring 2021
Who do we think we are? Are we who we've born to be, or who we perform, or some combination of the two? How does literature help us work through these questions by enabling us to think beyond ourselves? In this course, we will situate a range of philosophies about identity and the self into literary and historical contexts. We will consider the intersections among race, ethnicity, gender and sexuality, and status or class presented in our texts. We will also critically examine modern cultural forms that portray, negotiate and understand their identities, including genealogy websites, ethnicity DNA tests, and personality tests like the Enneagram and the Meyers Briggs scale.
The reading list includes works by Apha Behn, Daniel Defoe, Olaudah Equiano, Mary Shelley, Jane Austen, George Bernard Shaw, and Jeanette Winterson.

ENGL380101
Close Encounters (of the Literary Kind) TANNER, LAURA E
Spring 2021
How does literature invite us into the intimate and sometimes messy emotional dynamics of human relationships? This class will explore the depiction of family dynamics, friendships and romantic bonds in American novels of the last century, including As I Lay Dying, White Noise and The History of Love. We will consider how intimate relationships are shaped by consumerism, disaster, grief, violence, poverty, race, aging, and romantic ideals. Class presentations will focus on film and television portrayals of complex relationships. Final projects will analyze a literary or visual narrative and reimagine its portrayal of intimacy in a short literary or video scene. This class is open to majors and non-majors alike, especially those fascinated by the way that stories probe the depths of human character and shape our assumptions about how we relate to one another.

ENGL400301
Shakespeare and Performance SOFER, ANDREW
Spring 2021
Although Shakespeare became "Literature," people originally encountered Shakespeare’s plays as popular entertainment, rather than as literary texts. In this course, we will examine Shakespeare through the lens of performance, looking at how several of his key plays were produced in their own time and how they have subsequently reimagined on stage and screen. As part of this re-examination, we will rehearse and perform scenes in small groups, as well as invent our own Shakespeare adaptations and attend a local production (if available). No previous performance experience or familiarity with Shakespeare is required, but enthusiasm is welcome.

ENGL400401
Boom, Bust, Austerity SMITH, JAMES M
Spring 2021
Ireland, in recent decades, has experienced the highs and lows of globalization and monetary crisis. The Celtic Tiger economy was the "fastest growing ... in Europe" from 1995-2005. Three years later, the country entered recession, ultimately requiring an 85 billion Euro "bailout" from the EU and IMF. Before long, international news outlets lauded Ireland as "the poster-child for implementing austerity programs." Is this the typical trajectory for a postcolonial nation still carving out its economic position in the new Europe and beyond? This course focuses on recent Irish writers who engage these boom and bust years. It considers how literature represents a period of unprecedented economic, social and cultural transformation? It evaluates the creative and/or imaginative arts' contribution to helping a society survive economic austerity? It examines representations of unemployment, emigration, bankruptcy, depression, as well as resilience, entrepreneurial spirit, and community rebuilding.

The Gothic Novel

Richardson, Alan

Spring 2021

A survey of major novels in English from 1719 to 2000 focusing on detailed textual readings: of narrative modes, voice, and focalization; style; the creation of characters and manipulation of sympathy; the structuring of plot. Developing our receptivity, in different registers and in different scales of attention, to the many, sometimes contradictory, effects of these texts, we will also ask questions about the genre over time: about its coherence as a tradition; how it represents (or doesn't) interiority, desire, and embodied experience; how it understands (and perhaps shapes) domesticity, the public sphere, and various forms of affiliation and self-definition.

The World Novel in English SESHADRI, KALPANA R
Spring 2021
This course opens a wealth of contemporary literature from the non-Western world mainly Africa, the Middle East, and South Asia that have expanded readers’ imaginations and enriched the English language in a variety of genres. We shall read fiction and non-fiction alongside cultural theory to deepen our understanding of the political, economic, and environmental issues that arise in these lands and the ways in which they impact the daily lives of people as delineated by some of the world’s most acclaimed authors. Readings may include works by Adhaf Souief (Egypt), Hisham Matar (Libya), Leila Abouleila (Sudan), Xiaolu Guo (China), Amitav Ghosh (India), Romesh Gunesekera (Sri Lanka), Mohsin Hamid (Pakistan), Samrat Upadhyay (Nepal), and others.

ENGL453601
Joyce’s Ulysses NUGENT, JOSEPH G
Spring 2021
One single semester. One demanding class. One hugely important book. This course will lead you on an extended exploration of Joyce’s Ulysses. Joyce is intermittently baffling; he’s always fascinating; he’s frequently hilarious. He’s never less than challenging. No prior knowledge of Joyce’s works is required, just a willingness to tackle the challenges offered by this wonderful, astonishing, intricate text. The demand that I make of my reader, he wrote, is that he should devote his whole life to reading my works. I think a semester will do. Mainly for the daring.

Writing Workshop: Poetry ANDERSON, JOHN M
Spring 2021
The course will provide an introduction to poetry writing as a discipline and craft by encouraging students to practice writing in a variety of modes. Students' own poems, from both open and directed writing assignments, will become the main text for this workshop, in addition to some models provided by the instructor for discussion of prosody and technique. The workshop critiques will focus on strategies for revising early drafts, and a chapbook of finished poems will be due from each student at the end of the semester. No application process.

ENGL457902
Writing Workshop: Fiction BOUCHER, CHRISTOPHER G
Spring 2021
This course provides encouragement, practice, and criticism for students seriously interested in writing short fiction. The workshop format demands self-motivation and universal participation. Since students’ stories are texts for class discussion, a generous willingness to respond to others’ writing and to expose one’s own work to such reactions is an essential prerequisite. Individual conferences with the instructor supplement the workshop discussions. Students are expected to produce a steady stream of new and revised fiction throughout the semester.

Narrative preferences from the traditional to the experimental are welcome.

ENGL458101
Uncanny Fiction BERNE, SUZANNE R
Spring 2021
How does an idea develop into a story? What makes a character come alive? Why is setting important? These are a few of the questions this course will explore by considering fiction that contains an uncanny or mysterious element. That uncanny element might be something seemingly supernatural; it might be a psychological state, a surreal event, or simply a weird detail that throws an "ordinary" day off-kilter. We will be focusing on character, framing, action, plot, and narrative perspective, among other aspects of fiction, by examining stories by professional writers and in workshop discussions of student writing.

ENGL491501
Advanced Fiction Writing Workshop MATSON, SUZANNE M
Spring 2021
This course provides encouragement, practice, and criticism for students who have demonstrated accomplishment in writing fiction. The workshop format demands self-motivation and universal participation. Since students’ stories are texts for class discussion, a generous willingness to respond to other’s writing and to expose one’s own work to such reactions is an essential prerequisite. Individual conferences with the instructor supplement workshop discussions. Students are expected to produce a steady stream of new and revised fiction throughout the semester. Narrative preferences from the traditional to the experimental are welcome. Students should submit up to 8 double-spaced pages of writing (your submission may be part of a larger piece; if so, indicate this on the manuscript), along with a note explaining your interest in the course and a list of previous creative writing or journalism workshops, with instructors, school (if you are a graduate student), and grades. Ideally, the writing sample will be fiction, but if your strongest writing is in nonfiction, poetry, or drama, that is also acceptable, although prose is encouraged. Include your e-mail address and class year/program. Materials should be submitted via e-mail to Suzanne

ENGL491701
Advanced Poetry Workshop ADAIR, ALLISON C
Spring 2021
This is a workshop for those who already have some experience writing poetry, and who wish to work intensively on matters of craft and revision. Students will produce roughly two poems a week, responding to each other's drafts in workshop discussion.
Though the bulk of class discussion will be about student writing, some class time will be devoted to a discussion of useful models and what they can teach us about strategy and craft. Short in-class exercises will be given weekly as prompts to begin the writing process. In ongoing consultation with the instructor about which poets might interest them most, students will devise their own reading list of contemporary poets and keep a response journal. In at least two half-hour conferences over the semester, each student will be given individual feedback on a packet of revisions. The final project will be a chapbook of at least twelve revised poems produced over the semester, culled from around 25 drafts produced in and out of class.
Credits: 03
Room and Schedule: W 7-9 25;ONLINE;S CHRONOUS;
Satisfies Core Requirement: None Prerequisites: With permission of the Instructor. Co-requisites: None
Cross-listed with: None Frequency: Annually
Student Level: UNDERGRAD & GRAD

ENGL50101 Seminar: Reading Like a Victorian MCALEAVEY, MAIA M
Spring 2021
In this course, we will read "like Victorians" by reading Victorian novels and stories in their original formats: Charlotte Bronte's Jane Eyre (published in three volumes), Wilkie Collins's The Woman in White (published in thrilling weekly segments), Charles Dickens's Our Mutual Friend (published in monthly installments), and Conan Doyle's Sherlock Holmes stories (published in a magazine). We will analyze their accompanying illustrations, articles, and advertisements. Along the way, we will imagine the effects of reading by candlelight, in a pub, or aloud with children, and consider the impact publication format might have had on the form of these classic texts.

Comments: Satisfies the pre-1900 requirement. Fulfills the Seminar requirement. Formerly titled ATS: Reading Like a Victorian
Status: CLOSED

ENGL502401 Seminar: Renaissance Horror CROW, ANDREA
Spring 2021
The horror genre is going through a "rennaissance" today; this course looks back to the renaissance era of the sixteenth- and seventeenth-century to examine the cultural contexts out of which many of our most enduring horror tropes emerged. We'll study records of witchcraft trials, catalogues of demons, and popular accounts of haunting crimes alongside plays and poetry centered on both supernatural and all-too-human evil, exploring what fears and desires these narratives consolidate and what social and cultural functions the circulation of tales of horror performs.
Credits: 03
Room and Schedule: T 11 30-1 55;ONLINE;S CHRONOUS;
Satisfies Core Requirement: None Prerequisites: None Co-requisites: None Cross-listed with: None Frequency: Periodically
Student Level: UNDERGRAD ELECT
Comments: Satisfies pre-1900 requirement for English. Satisfies Seminar requirement for English.
Status: CANCELED

ENGL51701 Capstone: Love and Indoctrination: A Foundation for the Rest of Your Life KAPLAN-MAXFIELD, THOMAS
Spring 2021
In our world of political spin and fake news, the surveillance state and social media, the pressure to separate what's real and valuable from what's fake and mere propaganda (another way of saying "lies") is paramount, and critical for figuring out how to live, practically, spiritually, intellectually, and psychologically.
In George Orwell's 1984, the affair of Winston Smith and Julia threatens the entire structure of Big Brother. Why? What is it about love that threatens large systems based on indoctrination? In this course we will explore and develop working definitions of both love and indoctrination in order to differentiate them.
Cross-listed with: UNCP5517 Frequency: Periodically
Student Level: UNDERGRAD ELECT
Comments: Capstone classes may NOT be taken Pass/Fail. You may take only ONE Capstone class before graduation.
Status: CLOSED

ENGL57501 Advanced Creative Non-Fiction (CNF): Writing About Place GRAVER, ELIZABETH
Spring 2021
Through the reading and writing of creative nonfiction essays, we will explore, depict, and interrogate various places in the natural and built world. Students will write and revise three sustained essays over the course of the semester: the first about home or another place with strong personal associations; the second about how our experience of place, space, and borders has been impacted by our current moment in the pandemic; and the third--a reported piece of journalism--about a community, natural site, or subculture in the Boston area (or elsewhere if you are studying remotely this term). Readings may include work by E.B. White, Wendell Berry, David Sedaris, Bridgett M. Davis, Annie Dillard, Carlos Rutells, Joan Didion, Jamaica Kincaid, and Pico Iyer.
Credits: 03
Room and Schedule: T 2 4-25;ONLINE;S CHRONOUS;
Satisfies Core Requirement: None Prerequisites: None Co-requisites: None Cross-listed with: None Frequency: Periodically
Student Level: UNDERGRAD MAJORS
Comments: Students should have taken a previous creative writing or journalism workshop or have commensurate experience writing on their own or for campus publications. Reach out to Professor Graver (graver@bc.edu) with questions.
Status: OPEN
ENGL602601
Scandalous Victorians
HUNT, AERON P
Spring 2021
This course examines the literature and culture of Victorian Britain through the lens of scandal, analyzing the representation of different types of scandal in a variety of literary genres as well as representative historical episodes. We will ask why some kinds of transgressions become scandalous and will explore what kinds of responses are evoked and foreclosed by the rhetoric of scandal. Particular attention will be paid to gender, sexuality, class and social mobility, and national and imperial identity, as well as to the dynamics of scandal and the processes of social change.
Credits: 03
Room and Schedule: W 4 30-6 50;ONLINE;SYNCHRONOUS;
Satisfies Core Requirement: None
Prerequisites: None Corequisites: None Cross-listed with: None

Comments: Grad/undergraduate course. Fulfills Seminar requirement for undergrad English majors. Fulfills the pre-1900 requirement for English majors.
Status: CLOSED

ENGL602801
Medieval Women's Voices STANTON, ROBERT G
Spring 2021
In this course we will read selections from the large and wide-ranging body of medieval women's literature, including biography, autobiography, hagiography, romance, fabliau, love poetry, visionary literature, utopian literature, political theory, and personal letters. Much of the class will focus on mysticism, which not only accounts for a lot of female-authored texts, but often articulates relationships between female experience, female identity, and the divine. We will supplement the primary texts with feminist and gender theory, grapple with the problem of what constitutes "women's writing" and the possibility of female voices in male-authored texts.
Cross-listed with: None
Frequency: Periodically
Student Level: UNDERGRAD & GRAD
Comments: Fulfills the pre-1700 requirement for English. Fulfills the Seminar requirement for English.

ENGL702001
Experimental Writing ROTELLA, CARLO
Spring 2021
Research and the field knowledge doesn't always have to lead to writing the usual scholarly papers and articles. In this workshop-style graduate seminar, we try out alternative forms presented by journalism, the essay, and other traditions: magazine feature, op-ed, interview, explainer piece, reported essay, memoir, obituary, digital forms, and more. Our objective is to expand our writerly repertoires and audiences. We write and workshop every week, and analyze examples of the genres we study. We also have class visits from colleagues who offer their own perspective on the rich variety of forms available to the experimentally ambitious scholarly writer.

ENGL702201
Kafka, Beckett, Coetzee LEHMAN, ROBERT S
Spring 2021
This course will be dedicated to a reading of the works of three of the century's strangest writers: Franz Kafka (1883-1924), Samuel Beckett (1906-1989), and J.M. Coetzee (b.1940). Although our principal focus will be on their novels, we'll also consider their work in a variety of other genres--parables (Kafka), film and theater (Beckett), and philosophy (Coetzee). We'll take up the question of how these writers responded to a rapidly modernizing world—a world characterized by war, revolution, new technologies, and a globalizing economy—as well as how they came to understand literature's past, present, and future. Finally, we'll consider theoretical and philosophical responses to their work from Blanchot, Cavell, Deleuze, Diamond, Lear, Pippin, and others.

ENGL770101
English Language Training for Graduate Level Students: Focus on Writing ANDERSON, LYNNE C
Spring 2021
Designed for graduate students whose first language is not English, this course provides writing practice in a range of academic modes including reflection, summary, analysis, and critique. Students will write and rewrite throughout the semester, discuss works in progress, and receive feedback during group conferences with the instructor. Several sessions will be devoted to email, reference letters, and proposal writing. Early in the semester, students will explore the composition process from brainstorming, drafting, revision, and editing. Grammar support for students from linguistically diverse backgrounds is provided throughout the semester. Students who enroll in the course are expected to attend all classes and complete short writing assignments weekly.

ENGL882501
Composition Theory and the Teaching of Writing MATHEIU, PAULA
Spring 2021
This course is designed to (1) prepare graduate students to teach introductory, college-level writing courses; (2) introduce students to central issues, problems, and theories in composition studies; and (3) encourage students to examine the interanimating relationship between critical theory, practical writing experience, and the teaching of Composition/Rhetoric. Though the emphasis is on central, nuts-and-bolts tasks in the teaching of writing (e.g., designing assignments; responding to student essays; selecting texts for discussion; etc.), this is not a prescriptive "how to" course; students are asked to consider pedagogical issues and choices in composition studies from a variety of personal and theoretical perspectives.
Credits: 03
Room and Schedule: T 2-4 25;ONLINE;SYNCHRONOUS;
Satisfies Core Requirement: None
ENGL88801

ENGL88801
British Literature and Postcolonial Theory SESHADRI, KALPANA R
Spring 2021
Historians such as Bernard Cohn have taught us that analyses of British Literature and Culture will be incomplete if we do not assume England and its colonies as a single unit of analysis. However, the translation of this historical wisdom to literary analysis demands not only an understanding of colonial policy but also a re-invention of our reading practices. We shall review the premises of postcolonial studies and its various approaches to canonical British literature by asking how Britain and colonial activities from the eighteenth to the twentieth centuries affected representations of the domestic space.

Environmental Studies Courses: Summer 2020
ENVS332101
Building Sustainable Communities DELSESTO, MATTHEW J; CERMACK, MICHAEL
Summer 2020
This course will investigate contemporary urban environments through the eyes of urban farmers and community innovators who are building more equitable communities and sustainable relationships with the land. Fieldwork, class discussions, environmental media, and workshops with community partners will facilitate our engagement with sustainability narratives and practices. Course themes include the urban planning and racial politics, challenges and opportunities of deindustrialization, the environmental justice movement, youth education, organizational development, and community-based urban transformation.

Environmental Studies Courses: Fall 2020
ENVS107701
Environmental Migration: Climate Change BJIANI, YASMIN
Fall 2020
How will longstanding and deeply embedded conceptions of "us" versus "them" in terms of national identity need to change in light of climate-change-induced migration in the future? What are the environmental origins of refugee migrations? The paired courses will familiarize students with the ways that climate disruptions have affected migrations, as well as governmental and nongovernmental institutions' responses to this environmentally driven movement. Students will learn to recognize the environmental push and pull factors for migration, understand and analyze existing legal definitions of "refugees," and consider the need for new strategies to address climate-change-induced migration globally.

ENVS110001
Environmental Studies Introductory Seminar JORGENSEN, ANDREW K
Fall 2020
Environmental studies connects the scientific, political, and cultural aspects of the world's environmental challenges. This twelve-week, one-credit seminar is an orientation and introduction to interdisciplinary scholarship for the cohort of new sophomore Environmental Studies majors each fall. The course will include reading and discussions of classic texts in environmental studies, planning of individual pathways through the major (including selection of thematic or disciplinary concentrations), and several writing assignments. Collaborative and cross-disciplinary work is emphasized throughout. The course ends at Thanksgiving.

ENV5250101
The State of Affordable Housing in the States LEBLANC, DANIEL R
Fall 2020
How does housing affect the lives of Americans? Where you live determines your access to schools, quality of healthcare, fresh food, clean air, parks and recreation, affordable credit, and even how long you are likely to live. This course explores concepts of housing policy and planning at the national, state, and local levels. It examines programs and policies used to subsidize housing for millions of Americans and help them gain access to a decent place to live. Topics will be considered from multiple perspectives including housing finance, design, community planning, inequality, operations management, and sustainability. We will explore the historical and economic context of U.S. housing and discuss the barriers that low-income families face that affects their access to decent housing. The course will be divided into three sections: history, policies, and today’s issues. Students will explore some of the most recently developed programs and how they fit into effective community revitalization. These programs will be evaluated in class discussions and group presentations.

ENV333501
Environmental Dispute Resolution BIJANI, YASMIN
Fall 2020
This course examines the application of conflict prevention and dispute resolution (EDR) processes to address a wide range of environmental, natural resource, and public policy conflicts. The course draws on case studies of environmental conflicts, policy readings, and negotiation simulations that will provide students with a substantive knowledge of environmental conflicts and help them develop the dispute resolution tools necessary to resolve similar conflicts. Case studies will highlight environmental conflicts from around the world over natural resources and land use. Negotiation topics include distributive bargaining, mutual gains negotiation, multi-party negotiation, mediation, and consensus building.

ENV334501
Environment and Public Health KUMAR, PRAVEEN
Fall 2020
This course will provide an introduction to the field of environmental public health. We will cover the basic tools of environmental health science, including toxicology, epidemiology, and risk assessment; the use of health data in the development of environmental policies; and the disproportionate burden of EH problems on vulnerable communities in the U.S. and around the world. Major topics will include air and water pollution, global sanitation and waste, urban design and health, and the use and regulation of chemicals. The course will have a strong emphasis on environmental justice and on the global health impacts of our environmental footprints.

ENV335601
Seminar in Environmental Law FOWLEY, JEFFRY T
Fall 2020
Topics to be covered include: (1) the Clean Water Act and the Boston Harbor cleanup; (2) the RCRA hazardous waste regulations; (3) contaminated (brownfield) site cleanups; and (4) the Flint water crisis, so as to understand how environmental protection still can fail and how more still needs to be done. This course will emphasize the practical aspects of environmental law and policy and will include several written exercises. This course will be useful both for pre-law students and also for any student with a serious interest in environmental policy. This course is open to seniors, juniors and sophomores.
Credits: 03
Room and Schedule: DEVLIN HALL 227, T TH 3-5; SATISFIES CORE REQUIREMENT
Prerequisites: None

ENV336001
Research Methods in Environmental Studies KELLY, JENNIFER R
Fall 2020
The course is designed to prepare majors and minors in Environmental Studies to pursue a senior thesis or seminar research project. The course helps students develop a research question from their interest and curiosity in an environmental topic. Students are introduced to qualitative, quantitative, and spatial methods that are used in environmental studies research. Students then design a study to answer their specific research question.

ENV336501
Human-Wildlife Conflicts and Co-existence KELLY, JENNIFER R
Fall 2020
This course introduces students to a wide spectrum of wild animal issues through an interactive and interdisciplinary lens. The course captures the diversity of both negative and positive interactions between humans and wildlife in rural and urban contexts. To highlight these different encounters, we will look at a variety of wild animal species and perspectives it uncovers. For example, we will study the relations between humans and wildlife in rural and urban contexts. To highlight these different encounters, we will look at a variety of wild animal species and perspectives it uncovers. For example, we will study the relations between humans and wildlife in rural and urban contexts. To highlight these different encounters, we will look at a variety of wild animal species and perspectives it uncovers.
aspects of our economy, from agriculture and manufacturing, trade and transportation, to communications and computing. In this course, we focus on a single aspect of this carbon-reliant economy, one that centrally and intimately shapes our patterns of life, our energy use, and our expectations of comfort. Focusing on architecture and landscape design, we review the dominant patterns of building and dwelling from before and during the Industrial Revolution in the U.S. We then examine a substantial series of alternative, sustainable strategies for constructing our shelters and their surrounding landscapes.

ENVS494101
ENVS: Senior Research Seminar I KELLY, JENNIFER R
Fall 2020
This year-long seminar is for seniors who are majors in the Environmental Studies Program. To assist with the transition from college to the next stage of a student's career, the seminar focuses on the further development of applied multidisciplinary research, accessible writing, project coordination, and public speaking skills. Students spend the first semester engaging with scholarly materials and developing proposals for a research project. During the second semester, students complete their research projects, potentially collaborating with a campus or community organization to address an environmental problem.

We end discussing the importance of effective governance and explore the impacts of climate change on the ocean and the resulting impact on life within and outside of the ocean. The ocean, which covers more than 70 percent of the Earth’s surface, is vital to human societies. Yet, we have better maps of Mars than our own sea floor. This course introduces students to what we know and don’t know about marine biodiversity and ecosystem services. It then describes the effects of climate change on the ocean—including rising temperatures, acidification, and sea level rise—and discusses the impact on life within and outside of the ocean. We end discussing the importance of effective governance and explore innovative ways in which people are working to repair and protect the ocean.

**ENVS244501 The Vegetative Soul: The Hidden Life of Plants VANDEWALL, HOLLY R**  
**Spring 2021**  
By weight, more than 80% percent of the living things on the earth are plants, and without them the earth's animals, including humans, would perish within weeks. But philosophy has spent a vanishingly small part of its efforts in considering this form of life, generally relegating plants to the status of minimally alive, but essentially uninteresting. As Michael Pollan notes, "plants are so unlike people that it's very difficult for us to appreciate fully their complexity and sophistication. Yet plants have been evolving much, much longer than we have, have been inventing new strategies for survival and perfecting their designs for so long that to say that one of us is the more 'advanced' really depends on how you define that term, and what 'advances' you value." This class will consider how humans have historically regarded the plant kingdom, what we can learn from the challenging imaginary exercise of attempting to understand how they live, and how we might reconsider the world if we came to regard the plant kingdom not as passive subjects of human actions, but as powerful and vital actors in their own right.

**ENVS356201 Environmental Sociology I KELLY, JENNIFER R**  
**Spring 2021**  
This is a reading and discussion seminar that provides an overview of theoretical and empirical work in environmental sociology. After a brief introduction to the origins of the field, the seminar will cover topics that are representative of what is current in the area, especially bodies of theory and research that are national, international, and global in scope and research that is structural in orientation, with a key focus on how large-scale social institutions and organizational forms impact the environment, and also how they shape the ways in which individuals and smaller groups interact with the natural environment. Attention is also given to how environmental sociology makes fundamental contributions to interdisciplinary research in environmental studies and sustainability science.

**Credits:** 03

**ENVS494201 ENVS: Senior Research Seminar II KELLY, JENNIFER R**  
**Spring 2021**  
This year-long seminar is for seniors who are majors in the Environmental Studies Program. To assist with the transition from college to the next stage of a student's career, the seminar focuses on the further development of applied multidisciplinary research, accessible writing, project coordination, and public speaking skills. Students spend the first semester engaging with scholarly materials and developing proposals for a research project. During the second semester, students complete their research projects, potentially collaborating with a campus or community organization to address an environmental problem.

**Credits:** 02  
**Room and Schedule:** W 4 30-6; 20; ONLINE; SYNCHRONOUS;

Film Courses: Summer 2020

FILM224401
Biography and Autobiography MICHALCYK, JOHN; MICHALCYK, SUSAN A
Summer 2020
The course will be structured around the genres of biography and autobiography and the ways in which the written genre is transformed and reinterpreted through film. Through analysis and close reading of texts, students will have opportunities to reflect upon the effectiveness of understanding personal narratives and connecting the individual experience to a larger cultural/historical context. As society moves to a more visual approach for understanding the challenges in life, studying adaptation from the written word to the visual expression can be useful in increasing awareness of the human condition and learning about the self. In addition to assigned readings and films, students will be provided with an extensive filmography of adaptations as resources for their research papers. The course will cover a selection of classic and contemporary works of literature/film, with a focus on analysis of the genre of autobiography and biography through modern interpretations.

**FILM228001**  
**Introduction to Video Art HOELTERMANN, JANNE**  
**Fall 2020**  
Introduction to Video Art is an Art course examining video as a medium for artistic expression and conceptual inquiry. How can we use video to ask questions about ourselves, our viewers, or our world? Responding to instruction about video, sound, and editing techniques, students produce multiple assignment based video art pieces and a self-designed final project. Class sessions are comprised of screenings, discussions, technical demonstrations, and group critiques of students’ projects. Screenings and readings cover a variety of topics, including: past and present video art, experimental/expanded cinema, performance art, art in the age of digital culture, and philosophical and sociological topics. Readings, screenings, and discussions are designed to provide a conceptual basis for students’ video art projects, while critiques and writing assignments provide a forum for dialogue.

**FILM228201**  
**Political Fiction Film MICHALCZYK, JOHN**  
**Fall 2020**  
Political fiction film has often served as a dramatic means to deliver an ideological message. Its roots go back to Griffith's Civil War epic Birth of a Nation (1915). During World War II with such popular films as Casablanca, Hollywood directors offered patriotic messages to an American audience with its recent history of isolationism. More recently, Costa-Gavras' Z (1969) combined thriller elements with a non-conventional political perspective. Through readings, screenings, and discussion of these and other works, we are able to analyze the dual components of drama and politics in a chronological manner.

**FILM330101**  
**Screenwriter ROLINCIK, KYLIE M**  
**Fall 2020**  
This course will explore the role of the screenwriter in the film making process, from original idea to the finished screenplay and film. Students will also learn how the screenwriter adapts source material such as plays, novels, and real life events. Along the way, students will learn about each of the elements of screenwriting including: structure, character, dialogue, theme, genre and breaking rules. Both individual and as a classroom project, students will read screenplays and analyze the resulting films to gain a better understanding of how those elements work in combination and contribute to the finished product.

**Advanced Screenwriting CONROY, MARY K**  
**Fall 2020**  
This course is for students interested in writing for film, applying the knowledge gained in FILM3301 toward their efforts at writing their own screenplays. In the early part of the class, students will select an idea for a film and transform that idea into a story suitable for the screen. From there, in a round-table setting, students will complete a series of exercises to help them focus their stories, eventually moving on to writing a finished first act (28-30 pages) by the semester’s end.

The Eye of Latin America Film LIVON-GROSMAN, ERNESTO
Fall 2020
This course focuses on recent Latin American cinema in order to explore the aesthetic and critical trends of its most recent films. How are those films shaped by always changing political circumstances? And what do they tell us about Latin America's present political realities? We will see films and read texts by Lisandro Alonso, Gonzalo Aguilar, Albertina Carri, Carlos Reygadas, Fernando Solanas, and Robert Stam among others. This class requires that in addition to critical readings students watch movies outside class time. Films in Spanish, French, and English with English subtitles.

FILM170101
Coming of Age: Crisis and Calm Revealed through Film MICHALCZYK, SUSAN A
Spring 2021
Coming of age, whether in moments of conflict or peace, remains a central theme in both classic and contemporary films. Film adaptation offers opportunities to study issues confronted from early to late adolescence that affect our adult lives. Viewing moments of crisis and calm through the medium of film has aesthetic value and promotes increased visual and cultural literacy. The films serve as foundational texts, as students engage in understanding the complexities of adapting a singular account of adolescence from printed word to the screen so as to reveal the relevance for our own lives.

FILM222001
Holocaust and the Arts MICHALCZYK, JOHN
Spring 2021

To express the inexpressible tragedy of the Holocaust from 1933 to 1945 remains a challenge. The Arts nonetheless attempt to get at the intrinsic experience of this twentieth-century genocide through poetry, film, music and literature. These symbolic, realist and at times surrealist expressions help us in a human way to understand the historical and personal events of the Holocaust.

FILM330401
From Script to Screen
ROLINCIK, KYLIE M
Spring 2021

Screenwriting is a visual medium, so the best ideas often come from pictures in the writer's mind. This course focuses on the props, sets, locations, actions, camerawork, cinematography, editing, and other visual elements that translate words on a page into worlds of light. By looking at scripts and films, we'll analyze the process of reading words as images.

FILM331001
The Working Cinematographer: On the Set
HEIM, ROBERT T
Spring 2021

An advanced course in cinematography. Students rotate crew assignments in the camera, lighting, and grip departments while completing video assignments varying documentary/dramatic, daylight, exterior/interior shooting skills. Visits by local freelancers underscore the collaborative nature of the role of the director of photography. Ideal for future filmmakers or aspiring film/video professionals.

FILM331201
World Cinema
LONG, CARTER E
Spring 2021

This course provides the opportunity for students to explore films from regions other than Europe and North America. Films of Asia, Africa, or the Middle East will serve as a focus for the course. Special attention is given to the social, economic, cultural, and political contexts from which these films arise, both in the country of origin and in the West.

FILM331501
Film Noir
LONG, CARTER E
Spring 2021

We will explore the history of the enigmatic Hollywood style from its origins in German Expressionism and Hard Boiled Fiction through its classic era, and finally into its rebirth as revisionist neo-noir in the 1970s. The course will examine how American social and political history factored into noir's sudden appearances, and study theoretical concepts of genre, space, gender, and self-perception. Directors include Wilder, Tourneur, Aldrich, Altman, Polanski, and Lynch.

FILM333101
Independent American Film
ROLINCIK, KYLIE M
Spring 2021
How might contemporary independent cinema be seen as both an alternative and a response to mainstream Hollywood fare? How has the acquisition of indie studios, such as Miramax and New Line Cinema, transformed the industry? Has the affordability of technology and accessibility of audiences truly created a democratization of film? This course emphasizes critical examination of contemporary American independent film from the 1980s films of John Cassavetes, Steven Soderbergh, Spike Lee through the 1990s and 2000s with features from Kevin Smith, Allison Anders, Richard Linklater, Quentin Tarantino; shorts from Wes Anderson and Jane Campion; and current festival hits.

FILM338101
Propaganda Film MICHALCZYK, JOHN
Spring 2021
This course introduces the student to various forms of propaganda usage during the twentieth century, primarily during wartime. Using lectures, film, slides, and outside screenings, it will present in a modified chronological order, the mind set and values of governments in crises periods. On a personal level, the course will offer the student the occasion to see several sides of an issue and help in determining his/her own perspective on the situation.

FILM339601
Advanced Screenwriting II CONROY, MARY K
Spring 2021
In a round-table setting, students will continue to work on the script they began in Advanced Screenwriting. The course will feature more exercises and outlining, leading to the writing of the remainder of their script. As in Advanced Screenwriting, students will critically examine each other's exercises and writing under the guidance of the professor. It is anticipated that students will complete a finished first draft of a full length feature film (100-120 pages) by the semester's end.

FILM370201
Women in Hollywood
KLEIN, CHRISTINA; NORWOOD, KELSEY E
Spring 2021
This course explores the history of women in Hollywood by studying both the cinematic representation of women and the role of women as actors, writers, and directors. Topics to be covered include, among others: female directors from the silent era to the present; women in the films of Alfred Hitchcock; the women's picture as a genre; feminist film theory and practice; the intersections of gender and race; and queerness. In addition to the regular course meeting times, the course also meets Wednesdays from 7-9pm for film screenings.

### French Courses: Summer 2020

**FREN106501**

*Intensive Reading in French*

**BOLD, STEPHEN**

**Summer 2020**

The course objectives are (1) to develop the ability to read French readily and accurately through the study of grammatical structures and vocabulary; (2) to develop techniques for the reading of French-language material; and (3) to provide practice in the translation of French texts in general and of texts related to the students' major fields of study and research. This course may be taken for a grade, for pass/fail, or audited (as a registered auditor). Students desiring a pass/fail grade must file this grading preference with the Graduate School of Arts and Sciences.

FREN330501
Wordplay: From the Stage to the Page BREINES, JOSEPH
Fall 2020
This course is open to any students interested in expanding their linguistic and cultural horizons while developing their literary skills through writing in French. Guided compositions will help students to gain precision and sophistication in their written French and in their writing in general. Selected poems and plays explore a chosen theme and allow students to learn the basics of literary analysis in each genre. Grammar review is tied to the readings. This course will prepare students for 400-level courses in literature and culture.

FREN330601
Narrative and Identity: The Story You Tell Yourself NEWMARK, KEVIN
Fall 2020
This course is designed to help students with a good background in French to progress to the next level. Students in this course will continue to solidify their mastery of French grammar through structural exercises tied to readings, discussion, and written analysis of selected short stories, novels, and narrative film. The stories have been chosen and presented to allow students to progress substantially both in their basic reading skills in French and in their awareness of critical aspects of storytelling such as narrative voice, point of view, and plot structure.
Credits: 03
Room and Schedule: T TH 1 30*; ONLINE; SYNCHRONOUS; Satisfies Core Requirement: None
Prerequisites: French CCR II (FREN2210). Students with just four years of high school French or CCR I (FREN2209) may enroll with instructor’s permission.

Comments: Conducted in French. Open to majors, prospective majors and interested non-majors. Fulfills one of the four 3000-level requirements for the French major and is designed to prepare students for 4000-level courses in literature and culture.
Status: OPEN

FREN331001
War/Twentieth-Century France BREINES, JOSEPH
Fall 2020
Our focus this semester will be on the artistic, intellectual, political, and social life of France during the period of the Second World War. We will be reading poetry and short stories published during the Occupation, recent magazine articles on the clandestine press, an anti-war play from the immediate pre-war period, essays published just after the Liberation, and very short selections on the history of the period. We will see a number of recent French films whose stories draw on the dynamics and psychology of resistance and collaboration. We will hear recollections of the Liberation of Paris, interviews with men who joined the Charlemagne division of the German “SS,” and songs from the period. While the main focus will be on the Second World War, we will begin the course with two texts (a short story and a poem) written just after the Franco-Prussian War (1870-71).
Credits: 03
Room and Schedule: M W F 12; ONLINE; SYNCHRONOUS; Satisfies Core Requirement: None

Life at the Limit: Narratives of Transformation KEARNEY, ANNE D
Fall 2020
This course is conducted in English. This course will consider texts that follow the path of a person making a journey from alienation, loss, or hardship through a turning point. We will read stories of people who, caught in a major life crisis, still manage to keep a deep connection with themselves and the world, people who ultimately survive to share their experience with others in writing. Students will read correspondence between Theo and Vincent Van Gogh, a short story by Fyodor Dostoevsky, excerpts from Les Misérables, a memoir by Primo Levi, and various texts by Albert Camus and several other authors. Satisfies Core Requirement for: Literature

FREN440401
How to Begin Thinking: Aftermaths of Twentieth-Century Literature, Philosophy, History NEWMARK, KEVIN
Fall 2020
"Thinking," the French philosopher Emmanuel Levinas once suggested, "probably begins through traumatisms." This course will study a series of disruptive and transformative events that have indelibly marked the twentieth century. What is the task of thinking for a European tradition displaced internally by the Holocaust and externally by the end of colonial expansions into other continents? Authors will include Levinas, Derrida, Nancy, Saussure, Barthes, Duras (in English translation from French); Borges and Dorfman (in English and English translation from Spanish); Calvino (in English translation from Italian); and Descartes (in English translation from Latin). A German component (in English translation) will consider Husserl and Heidegger as a counterpoint to the European tradition of Romance languages, literatures, and cultures.

FREN445401
Contemporary Francophone Women Writers JEAN-CHARLES, REGINE M
Fall 2020
This course explores the specificity of francophone women's writing in a contemporary context, examining narratives from a wide variety of geographic locations including the Caribbean, North Africa and Sub-Saharan Africa. The question of genealogy is central to this course as we attempt to delineate a matrilineal francophone literary tradition. As such we will also consider these narratives in relation to feminist theory, history, socio-cultural politics, culture and ethnicity.

Narrative and Identity: The Story You Tell Yourself BREINES, JOSEPH
Spring 2021
This course is designed to help students with a good background in French to progress to the next level. Students in this course will continue to solidify their mastery of French grammar through structural exercises tied to readings, discussion, and written analysis of selected short stories, novels, and narrative film. The stories have been chosen and presented to allow students to progress substantially both in their basic reading skills in French and in their awareness of critical aspects of storytelling such as narrative voice, point of view, and plot structure.

FREN30801
Building Fluency: Adv Lang Practice BOLD, STEPHEN
Spring 2021
This course helps you deepen your mastery of the structures of written French, develop your appreciation of style, and enrich your vocabulary. Selected topics of advanced grammar and stylistics will be examined in context in order to help you prepare for a wide range of exercises in written composition. Special attention will also be given to the enrichment of your active vocabulary. As you develop your analytical reading skills, you will use a wide variety of textual models for your own writing.

FREN30901
Artists and their Writings KEARNEY, ANNE D
Spring 2021
In this course, students will study French culture through some key artists of the turn of the nineteenth century. The course will explore the rapport between their visual work, their writings (or writings about them) and their lives. The artists studied will be Van Gogh, Gauguin, Matisse, Picasso, Rodin, Camille Claudel, Cezanne. We will look at the evolution of their work in conjunction with their biographies, reading extracts from their letters or pronouncements on art and life.

Conversational Approach to Contemporary France LANDRIN, OPHELIE
Spring 2021
This course is designed to familiarize students with the political and social features of contemporary France while helping them to develop oral communication skills in French. Using authentic documents (television, videos, films, songs, newspapers, and magazines), we will discuss current events and socio-political issues. Students will develop their vocabulary, increase their knowledge of idiomatic expressions, and further their command of spoken French by engaging in structured dialogues based upon real-life situations.

Versailles: A Cinematic Look at French Culture of the Grand Siecle BOLD, STEPHEN
Spring 2021
This course will focus on the cultural moment when modern France was born: the age of Louis XIV and his palace at Versailles. We will study the grandeur and the conflict that define this summit of French history through a variety of documents, including a number of recent films that reconstruct the period, and contemporary masterpieces of painting, architecture and music. We will also read a variety of literary, historical, and eyewitness texts that portray the age as it was or wanted to be.

FREN444201
Naturalism: Zola, Flaubert, Maupassant BREINES, JOSEPH
Spring 2021
This course will offer a study of novels by Emile Zola (L’Assommoir, L’oeuvre), Gustave Flaubert (Madame Bovary) and Guy de Maupassant (Pierre et Jean). With Zola’s novels, we will be looking at Parisian working class life during the Second Empire and the artistic milieu of the Impressionist painters. We will also be reading selections from Zola’s theoretical writing (Le Roman experimentel, Les Romanics Naturalistes) and will consider various possible relationships between naturalist theory and the naturalist novel.

FREN446401
Existentialism from A to Z NEWMARK, KEVIN
Spring 2021
This course will examine some of the fundamental literary, philosophical, and historical components of French Existentialism. It will examine the way that the major writers of this movement in twentieth-century thought developed their ideas against the backdrop of Surrealism in literature, existential phenomenology in philosophy, and the historical upheavals of World War II. Of primary concern will be the manner in which the themes, concepts, and experiences of Meaninglessness, Engagement, Occupation, Resistance, and Liberation are confronted and rearticulated in the texts considered. Authors will include Sartre, Camus, Malraux, de Beauvoir, Duras, Ponge, and Blanchot.

FREN448301
Twentieth-century French Theater BREINES, JOSEPH
Spring 2021
This course will study a number of plays written in French during the twentieth century. Authors will include Cocteau, Anouilh, Giraudoux, Sartre, Beckett and Genet. As many of the plays are remakes of Greek tragedies and legends (the Oedipus Cycle, the Trojan War, for instance) we will be posing questions such as: How does one explain the flurry of remakes at this time in France? How are classical notions of causality (Fate, Destiny) transposed in the modern versions? In what ways do the modern plays self-consciously express their status as remakes? Theoretical writings on theater will also be considered.

FREN775001
Reading Jacques Derrida NEWMARK, KEVIN
Spring 2021
This course will examine some of the fundamental ways that the work of Jacques Derrida has contributed to altering the context in which the humanities can be understood and studied within the modern university. It will take examples from Derrida’s repeated interventions in such disciplines as literature, philosophy, theology, and history. By situating Derrida’s work at the margins where accepted demarcations between the disciplines begin to blur, the course will suggest new possibilities for conducting interdisciplinary work in the future.

German Studies Courses: Summer 2020
GERM100601
Intensive German for Beginners SONDERMANN, RUTH; MANGOUBI, URSULA
Summer 2020
This course is designed to provide you with a solid background in the four language learning skills: speaking, understanding, reading, and writing. This is an intensive two semester language course—taught within six weeks. At the end of the class you will be able to ask questions and be able to respond to those questions, you can conduct simple everyday conversations and talk about yourself, your family, and your daily routines. Additional topics we will cover are travels in German-speaking countries, everyday life, customs and holidays, Germany’s past, and so on. We will be focusing on creating a stimulating learning environment, and the (e)book will be supplemented with audio, videos, and printed material as well as other up-to-date material from the instructor. Developing speaking skills is an integral part of your learning process, and your class participation is not only encouraged but also required. This is not a lecture class. Through partner exercises and role-play we will create opportunities for you to practice your acquired skills. Homework assignments from the MYGERMANLAB will also enhance your skills to understand German. No prior knowledge of the German language required. (If you have any little knowledge of German—if you took German in high school several years ago—this course may be right for you, if in doubt, please contact the instructor before enrolling in the course).

GERM216301
Triumphant Calamity: The Modern Condition BOWLES, DANIEL J
Fall 2020
In this seminar students are invited to explore the variety and complexity of modernism through German literature, film, and art. Our aim is to understand how such works gave voice to the triumphs and failings of humankind at a time of dislocation, upheaval, radical change, and seemingly limitless possibility. Readings include works by Nietzsche, Rilke, Kafka, Mann, Freud, and Keun and screenings include films by Lang, Murnau, Wiene, and Sagan.
Credits: 03

GERM300001
History of German Literature BLOCK, NICHOLAS
Fall 2020
An overview of German literature, including a field trip in Boston. Students will be able to identify European literary movements in selected German texts from the Middle Ages to the twenty-first century. Texts will be analyzed against the background of historical events. Students will improve their overall proficiency in German through various language learning activities, such as a review of advanced grammar points, vocabulary building exercises, short writing assignments, and oral reports.
Credits: 03
Room and Schedule: LYONS HALL 207, M W 3*;

Elementary German II MANGOUBI, URSULA
Spring 2021
This course is a continuation of GERM 1001. Students are introduced to the basics of the German language: vocabulary, grammar, communicating in everyday situations, reading, listening comprehension, and writing. The course is supplemented with a workbook, online videos, and audio programs. Intended for those with one semester of college-level German or at least three years of high school German.

GERM200201
German Composition and Conversation II BOWLES, DANIEL J
Spring 2021
This course is a continuation of GERM 2001 and is designed to improve proficiency in spoken and written German. Through a broad spectrum of regular creative-writing and conversational exercises, assignments, and projects, as well as an in-depth review of phonetics and complex grammar topics, students will expand and refine their German to achieve advanced
autonomous competency in the language. Readings and discussions focus on authentic contemporary texts and cultural topics. Auditors must register.

GERM200501
Germany in Europe today SONDERMANN, RUTH
Spring 2021
This course is intended to introduce students to today's Germany in Europe. The European Union and the four freedoms of the EU--free movement of people, goods, services, and capital--will be the chief topic of this course. Other topics will include the new influx of migrants and other demographic changes, the education system, and the opportunities that education offers. Because Germans are very concerned about the effects of environmental change, the course will also address the idea of sustainability, the sharing and caring society, and Fair Trade. This course is a language course offered to students from all majors who are contemplating a semester abroad, an internship, or even working in Germany. We will be listening to podcasts and the news and will read authentic material. You should therefore be quite confident in your German language skills, be able to discuss and present your opinion and write short essays. If you are uncertain about your level, please do not hesitate to contact the instructor.

Credits: 03
Room and Schedule: LYONS HALL 207,T TH 9*;
Satisfies Core Requirement: None
Prerequisites: GER M1051. Or equivalent. New course as of Fall 2019. This new course # and course description replaces GERM3320
Corequisites: None
Cross-listed with: None

GERM21001
Curiosities of the German Language BOWLES, DANIEL J
Spring 2021
This course offers a text-based examination of some of the more striking morphological quirks and peculiarities of the German language. We will study such phenomena as: Denglisch and other foreign influences, remarkable etymologies, the history of du, ihr and Sie, animal sounds and onomatopoeia, the language of marketing, long German compound nouns, dirty words, peculiar place names and related geographical idiosyncrasies, tongue twisters, wordplays, contrayms, the vocabulary of the Wende, acronyms and abbreviations, proverbial sayings, German in the social-media age, German-language political correctness, syntactic anomalies in older literary German, Worster (and Unworther) des Jahres, Mark Twain and the German language, and morphological and lexical variants across the German-speaking world. Reading assignments are drawn from philological scholarship, German literary texts, and the contemporary media landscape. The course is designed as an interactive seminar requiring dynamic student participation.

Credits: 03
Room and Schedule: LYONS HALL 207,M W F 10;
Satisfies Core Requirement: None
Prerequisites: GER M1051. Or equivalent. New upper-level topics course as of Spring 2021. 
Corequisites: None
Cross-listed with: None
Frequency: Triennially
Student Level: UNDERGRAD ELECT
Comments: Conducted in German. Counts toward German major and German Studies minor. Satisfies Foreign Language Proficiency core requirement.
Status: OPEN

GERM216001
Modern Jewish Thought BLOCK, NICHOLAS
Spring 2021
This course investigates the impact of modernity on Jewish thought and religion. Highlights include readings Spinoza, Moses Mendelssohn, Martin Buber, and Rachel Adler. First, the rise of the modern state led Jews to confront a crucial question: how can they belong to both the Jewish people and to their countries? Second, modernity emphasizes individual autonomy: we decide as individuals what is good for us. How can this emphasis co-exist with religious law and tradition? Third, modernity involves a strong belief in the authority of reason and progress. In this light, is religion rational or a matter of psychological experience? We will turn to three broader historical phenomena that represent a crisis of modernity: the rise of Zionism, the Holocaust, feminism. These phenomena continue to radically transform Jews and Judaism in our post-modern age. Key terms to be traced through the semester are "community" and "law" as Jews defined themselves and were defined along religious, racial, and national lines.

GERM224001
King Arthur in German Literature RESLER, MICHAEL
Spring 2021
A study centering on the most popular and enduring of all medieval legendary figures. We will examine the early texts from which the Arthurian mythology took root and contributed to the eventual spread into Germany of the tales of King Arthur and the Knights of the Round Table. We will then focus on a close reading of four or five of the most significant Arthurian romances within the German tradition. In addition, we will systematically trace the relationship between this highly idealized world of literary knighthood and real-life contemporary historical and social events of the twelfth and thirteenth centuries.

GERM222401
Germany Divided and Reunited BOWLES, DANIEL J
Spring 2021
This course provides a multi-dimensional look at post-war Germany, East and West. Politics, social and economic structure (East versus West), music, art, literature, philosophy (Critical Theory), the crisis and reform of the West German university system, the young generation, and Americanization will be discussed. Other topics include radicalism/extremism/protest movements (including terrorism), coping with the past (National Socialism), the Revolution of November 1989, and the legal ramifications and unsolved problems deriving from reunification.

Hispanic Studies Courses: Summer 2020
SPAN101501
Elementary Spanish I FALCONI, SILVANA
Summer 2020
This introductory course is designed for students with no prior Spanish experience as well as those who have had some high school Spanish. Elementary Spanish I provides a strong foundation in speaking, listening comprehension, reading, and writing as well as exploring the products, practices, and perspectives that are unique to Hispanic cultures. This course follows a communicative approach, which springs from the idea that languages are best learned when real-world information becomes the focus of student activities. Students interact in Spanish with the instructor and with classmates. By the end of this course, students should be able to successfully handle in Spanish a significant number of basic communicative tasks.

### SPAN111501
**Intermediate Spanish I** RUIZ BLANCO, ANGEL  
**Summer 2020**  
Intermediate Spanish I is the first course in the second-year sequence. It continues to develop and strengthen students' proficiency in the Spanish language as well as to increase their cultural understanding. Emphasis remains on the four skills and on critical thinking. Throughout the course, students develop fluency and accuracy, and focus on communication. They expand their vocabulary and enhance their understanding of essential Spanish grammar concepts. Short literary texts, cultural readings, and audiovisual materials provide opportunities to learn to appreciate cultural differences and impart authentic insight into the Hispanic world.  
**Credits:** 03  
**Room and Schedule:** ONLINE COURSE; SYNCHRONOUS  
**Satisfies Core Requirement:** None

### SPAN111601
**Intermediate Spanish II** CUENCA, DANIEL  
**Summer 2020**  
Intermediate Spanish II is the second course in the second-year sequence with a continued emphasis on the four skills and on critical thinking. This course focuses on vocabulary building, the examination of some of the finer grammar points, and moving students towards a more complex level of comprehension and expression. Students work with short literary texts, cultural readings, and audiovisual materials. After successful completion of this course, the foreign language requirement will be fulfilled for schools that require a four-semester proficiency.

It continues to provide a strong foundation in speaking, listening comprehension, reading, and writing as well as exploring the products, practices, and perspectives that are unique to Hispanic cultures. This course follows a communicative approach, which springs from the idea that languages are best learned when student activities involve critical thinking about real-world information. Students interact in Spanish with the instructor and with classmates. By the end of this course, students should be able to successfully handle in Spanish a significant number of communicative and writing tasks in different time frames.</td>

Intermediate Spanish II NOONAN, PHILIP
Fall 2020
Intermediate Spanish II is the second course in the second-year sequence with a continued emphasis on the four skills and on critical thinking. This course focuses on vocabulary building, the examination of some of the finer grammar points, and moving students towards a more complex level of comprehension and expression. Students work with short literary texts, cultural readings, and audiovisual materials. After successful completion of this course, the foreign language requirement will be fulfilled for schools that require a fourth-semester proficiency.

SPAN338701
Multicultural Spain NANDIN, TERESA
Fall 2020
This course focuses on the non-Western cultural influences on Spanish culture throughout history, starting with the presence of the Arabs in the Spanish territory from 718 to 1492 and the coexistence of Jewish, Muslims, and Christians during that time period. The rich multicultural nature of Spain at present times also has benefited from the role of recent massive immigration waves to the country, and the course will address the important consequences of this phenomenon. Special attention to improving Spanish proficiency through oral and written exercises. Taught by the Resident Director of BC in Barcelona, Teresa Nandin. Conducted in Spanish. Online only.

SPAN36666201
Violence in Hispanic Culture RHODES, ELIZABETH
Fall 2020
This course does not pose Hispanic culture as a model of violence, rather offers historic reasons to explain why and how certain universal forms of inter-personal violence manifest in great Hispanic art at particular moments in time. Based on an anthropological approach to violent systems of human behavior, the class analyzes a wide variety of texts that represent honor killing, mimetic desire, domestic violence, sexual violence, scapegoating, and “aesthetic” violence such as terror-producing works. Discussion-based class meetings with heavy emphasis on vocabulary building. This course fulfills the pre-1800 Peninsular requirement for majors.
Credits: 03

Hispanic Studies Courses: Spring 2021
SPAN101501
Elementary Spanish I RAMOS ORTA, YULIANA M
Spring 2021
This introductory course is designed for students with no prior Spanish experience as well as those who have had some high school Spanish. Elementary Spanish I provides a strong foundation in speaking, listening comprehension, reading, and writing as well as exploring the products, practices, and perspectives that are unique to Hispanic cultures. This course follows a communicative approach, which springs from the idea that languages are best learned when real-world information becomes the focus of student activities. Students interact in Spanish with the instructor and with classmates. By the end of this course, students should be able to successfully handle in Spanish a significant number of basic communicative tasks.

Credits: 03

Elementary Spanish II LOWDEN, ALICIA
Spring 2021

Elementary Spanish II is the second course in the first-year Elementary Spanish I and II sequence. It continues to provide a strong foundation in speaking, listening comprehension, reading, and writing as well as exploring the products, practices, and perspectives that are unique to Hispanic cultures. This course follows a communicative approach, which springs from the idea that languages are best learned when student activities involve critical thinking about real-world information. Students interact in Spanish with the instructor and with classmates. By the end of this course, students should be able to successfully handle in Spanish a significant number of communicative and writing tasks in different time frames.

Credits: 03
Room and Schedule: CAMPION HALL 300, M W F 12
Prerequisites: SPAN1015. Or admission by placement test.
Corequisites: None
Student Level: UNDERGRAD ELECT Comments: Conducted primarily in Spanish Status: CLOSED

Intermediate Spanish I NOONAN, PHILIP
Spring 2021

Intermediate Spanish I is the first course in the second-year sequence. It continues to develop and strengthen students' proficiency in the Spanish language as well as to increase their cultural understanding. Emphasis remains on the four skills and on critical thinking. Throughout the course, students develop fluency and accuracy, and focus on communication. They expand their vocabulary and enhance their understanding of essential Spanish grammar concepts. Short literary texts, cultural readings, and audiovisual materials provide opportunities to learn to appreciate cultural differences and impart authentic insight into the Hispanic world.

<tr>
<td></td>
<td>Intermediate Spanish II is the second course in the second-year sequence with a continued emphasis on the four skills and on critical thinking. This course focuses on vocabulary building, the examination of some of the finer grammar points, and moving students towards a more complex level of comprehension and expression. Students work with short literary texts, cultural readings, and audiovisual materials. After successful completion of this course, the foreign language requirement will be fulfilled for schools that require a fourth-semester proficiency.</td>

Cultural Studies: Spanish Cultures from 1940 to Present PELAEZ, ANA
Spring 2021
A study of Spanish cultural production since 1940, including expressions of high culture (paintings such as Guernica) and popular culture (soccer, bullfighting). We will analyze newspapers, political speeches, photographs, propaganda posters, cartoons, and popular songs, as well as movies, documentaries, and televised news reports. Includes two virtual field-trips to the Reina Sofia Museum to view works from the Spanish Civil War, Late-Francoism, and the Transition to Democracy. Special attention to improving Spanish proficiency through oral and written exercises. Taught by the Resident Director of BC in Barcelona, Teresa Nandn. Conducted in Spanish, Online.

SPAN339201
Advanced Spanish CANIGUERAL BATLOSSERA, PAU
Spring 2021
This course will allow students to improve their command of the Spanish language at an advanced level. By activating communicative and discursive strategies, they will be able to achieve a fluent use of the oral, as well as of the written language, emphasizing linguistic correction and adequacy. Students will become capable of appropriately interpreting a wide variety of complex texts and produce descriptive, narrative, expositive, and argumentative texts autonomously and efficaciously in the target language. The materials provided throughout the course will induce an approximation to different cultural, political, and social aspects related to current issues of the Spanish-speaking world.

The Colonial Imagination: History and Identity in Spanish America
BECKJORD, SARAH
Spring 2021
This course provides an overview of texts written from the colonial period to the nineteenth century and their connections to contemporary works. We will focus on the representation of historical actors (conquerors, captives, others) as well as geographical spaces (city, jungle, pampa) as imaginary regions where history and identity are forged. Readings will be drawn from a variety of genres (historiography, novel, short story, essay, poetry) and will include selections by authors such as Bernal Diaz, Cabeza de Vaca, El Inca Garcilaso, Rodriguez Freile, Sarmiento, Palma, Gorriti, Paz, Borges, and Garro.

SPAN662201
Crossing Borders: Narratives of U.S./Mexico Relations and the Underground Economy
SHAMES, DAVID A
Spring 2021
This course invites students to traverse disciplinary and genre boundaries as they think critically about the conventional narratives that frame our understanding of the complex geopolitical and historical arrangements of the U.S./Mexico border. By adopting a transnational perspective, students will examine different ways of narrating—and contesting—issues of territory, resources, and ways of life along this division between two nation states. We will consider border paradigms from the frontier to the "Drug War" as historical, ideological, and cultural modes of managing overlapping crises of political sovereignty and economic inequality by redefining where, and for whom borders are constructed.
Credits: 03
Room and Schedule: CARNEY HALL 005,M W F 2;
Satisfies Core Requirement: None
SPAN663601
Borderlines: Films of Immigration and Exile RHODES, ELIZABETH
Spring 2021
An advanced undergraduate seminar in film analysis following a trajectory of films that represent the drama of immigration into first-world countries (Spain, the United States). The course covers the historic, economic, and cultural motivations attributed to migrants in these works and the ways in which directors marshal specific cinematographic techniques to achieve the political and artistic objectives of each film. Emphasis is on the Mexico/U.S. border and the Strait of Gibraltar, one of the deadliest points of immigration in the world. The course begins with El alma brinda (Robert Young, 1977) and finishes with Retorno a Hansala (Chus Guitierrez, 2007).

SPAN664301
Historiography, Memory, and Autobiography in Colonial Latin American Texts BECKJORD, SARAH
Spring 2021
The European encounter with the New World brought about violent conflict and posed intellectual and material challenges perhaps unprecedented in Western civilization. In this course we will undertake a close study of the fascinating and extraordinarily rich works at the origins of the Latin American literary tradition, exploring literary themes such as discovery and shipwreck, possession and loss, and the ways in which authors use them to inscribe themselves as narrators. We will review the range of medieval and renaissance discursive practices at play in the texts and the ways that authors employ and subvert them, as well as critical debates and approaches of our times.

SPAN665801
Don Quijote (Spanish) RHODES, ELIZABETH
Spring 2021
Don Quijote is universally recognized as one of the most important books of all time. Why? What does this funny, poignant story continue to say to ongoing generations? This course, whose title takes a cue from The Hunger Games, analyzes how culture “encourages” individuals to conform to a particular set of gender expectations at a given moment in history. Considering how texts of various genres and media represent what means to be “a man,” “a woman,” or someone who identifies with neither, we will analyze how various art forms respond to established gender norms to support or subvert them, from the Middle Ages through contemporary Spain. Experience with gender analysis helpful but not necessary.
Credits: 3

**HIST781301**  
Graduate Colloquium: The Civil War Era in History and Memory  
**DELAHANTY, IAN G**  
**Summer 2020**  
This course investigates the causes, course, and consequences of the American Civil War. Major topics include the expansion of African American slavery and growth of antislavery sentiment; the political crisis of the 1850s; soldiers' and civilians' experiences in the war; emancipation; and the debate over African Americans' political and social status during Reconstruction. Special attention is given to how public monuments, Hollywood, and historical museums have influenced Americans' memory of the Civil War era.  
**Credits:** 03

**HIST781501**  
Topics in World History  
**PENDAS, DEVIN O**  
**Summer 2020**  
In recent years, history has taken what many are calling a "global turn." This involves both looking at old topics in new ways and investigating new topics that were previously neglected. This course will examine some key themes in recent global history, including economic, political, and cultural transformations. We will ask about the birth of the modern world and the relationship among various regions in the age of empire, discovery, colonialism, and globalization.  
**Credits:** 03
### History Courses: Fall 2020

**HIST100101**  
**Europe in the World I ISMAY, PENEOLOPE G**  
**Fall 2020**  
The course focuses on Europe and the world from the Black Death through the Haitian Revolution. Topics covered in the course include the Black Death and Renaissance, European expansion across the Atlantic and Indian Oceans, Europe and the Ottoman Turks, religious reformation and warfare, early capitalism and transatlantic slavery, early modern science and the Enlightenment, and the French and Haitian Revolutions.

HIST100501
Asia in the World I ZHANG, LING
Fall 2020
This Core course surveys the Asian origins of the modern world, from the rise of the Eurasian empire under the Mongols in the thirteenth century to the global colonial context of the Industrial Revolution in the eighteenth century. We will challenge common geographical (mis)conceptions (e.g., “East” versus “West”) in historical narratives/uncover their origins and how they have changed. While emphasizing the global conjunctions in history, this approach highlights Asian experiences of the historical forces that integrated yet also divided the world in changing ways: trade routes, migrations, religions, empires, wars, ideologies, and the constraints of a shared ecological environment.
Credits: 03

HIST109403
Modern History II MORTON, JOHN D
Fall 2020
This course covers several centuries of time (1800 and after) and traces the political, social, economic, and cultural changes that created the modern world. Depending on the expertise of the instructor, different parts of the world may serve as focal points for examining the complex historical processes behind modern-day transnational relationships, values, and ideas. As part of the Core Curriculum, this course seeks to broaden students' intellectual horizons by exposing them to new places, periods, and perspectives.

HIST111301
The African Diaspora and the World I LAL, PRIYA
Fall 2020
This course is the first of a two-course sequence that explores the African diaspora and its relationship to the world. By African diaspora, we are referring to both the continent and the communities of people of African descent that have formed in the Americas, in Europe, and in Asia as the result of forced and voluntary migrations over the last five hundred years. The course seeks to foster a fuller understanding of the African diaspora's role in the development of the modern world and the experiences of African-descended peoples from a global perspective.

HIST150501
Planet in Peril: The History and Future of Human Impacts on the Planet
SCHOR, JULIET; PARTHASARATHI, PRASANNA
Fall 2020
The twenty-first century opened with crises of climate, bio-diversity, and eco-system functioning. In this class we address ecological overshoot from the perspectives of sociology and history, emphasizing the role of inequality, the state, inequality, and power. The course combines contemporary analyses with a long historical record of human impact, considering both the familiar and the novel in the realm of ecological challenges. We devote substantial attention not only to causes but to solutions. Topics to be covered include: the Columbian exchange, forests, agriculture, water, climate change, toxics, and population. Solutions include state policy, social movements, individual action, and social innovation.

HIST161801
Making the Modern World: Design, Ethics, and Engineering
TONN, JENNA A; NES, JONATHAN S
Fall 2020
Together we will consider how engineers and other stakeholders navigate risks related to industrial and environmental disasters; balance financial, technological, and regulatory pressures associated with complex socio-technical problems; and negotiate technical and political liabilities surrounding artificial intelligence, surveillance, and climate adaptation. Students will collaborate on group design projects based on human-centered engineering. Engineering systems present pressing technical, ethical, and moral problems that we must grapple with as engaged global citizens. In this class students will explore the social, cultural, and institutional history of engineering; learn foundational skills in quantitative analysis of real- world engineering designs; and understand the political, environmental, economic, and ethical tradeoffs associated with building the modern world.

Core Topics: When Worlds Collide: From Contact to the Constitution LYERLY, CYNTHIA L
Fall 2020
This course will examine North American history from the perspective of the collision and exchange of cultures and peoples. From the Mississippian Indian civilization at Cahokia to the Illinois, Iroquois, Algonkian, and other Native American peoples, we will see how Indians resisted, adapted, and interacted with French, English, Spanish, and Dutch Europeans. African peoples were another key part of this cultural collision, as hundreds of thousands were brought to North America in the slave trade. The course ends with the consolidation of white European power in the creation of the United States. Major themes in the course are race, power, and religion.

Core Topics: The Atlantic World and Environmental Change, 1450-1800 O'NEILL, KEVIN
Fall 2020
This course will explore the dynamic relationship between human activity and the natural world of the Atlantic (climate, topography, plants, animals, and microorganisms) 1450-1800. Topics will include the consequences of the Columbian Exchange, the creation of plantation societies, energy usage, technological change, and the emerging global economic system. Several core themes will be followed—climate change, energy regimes, and food security. We will also consider the relationship between environmental change and more traditional historical topics such as the Reformation, the Enlightenment, and the Age of Revolution.

Core Topics: Modern China MO, YAJUN
Fall 2020
This course will trace the history of China from roughly the year 1800 to the present, including the collapse of the imperial system, the rise of nationalism and new political ideologies, the forging of Chinese identity through war and revolution, and the gradual consolidation of the nation-state. The focus will be on the daily life of ordinary people, and their relationship to the family, the village/city, the environment, and the State; their connections with local, regional, and global economic and cultural networks; and their ethnic identity, religious practice, and gender relations.

**HIST207901**

Core Topics: Russia under the Tsars EATON, NICOLE M
Fall 2020
In 1721, Peter the Great declared that Russia would be an Empire. That empire survived for almost two hundred years. This course will survey central issues in imperial Russian history, focusing on how the rulers of the Romanov dynasty solidified their rule and incorporated peoples of diverse cultures. Although Peter's dream collapsed in 1917, the key question to be asked in this course is: given all the forces threatening to tear the Russian Empire apart for so long, how was it that it survived--and even expanded--for so long?

Core Topics: Podcasting the Ottomans SAJDI, DANA
Fall 2020
The Ottoman Empire (1299-1922) connected West Asia, North Africa, and parts of Europe, and was of the largest and longest lasting empires in world history. This course deals with aspects of the social and cultural history of, and the latest trends in scholarship on, the Ottomans by using the Ottoman History Podcast as a launching point each week. Each podcast features an interview with a scholar accompanied by a suggested reading list. Students will listen to a selected podcast and do the assigned reading and will keep a "scholarly diary," which will be submitted in lieu of exams.

Core Topics: A Survey of Latin American History RICHARDSON, HEATHER C Fall 2020
A survey of the political, social, economic, and intellectual developments that have shaped and influenced the growth of the United States from a colonial appendage to a world power. The course seeks to provide a firm chronological foundation for the study of the American past but seeks to go beyond narrative and to provide analytical insights into the institutions, society, economy, and ideas upon which American civilization is founded.
This Land is Your Land: U.S. Environmental History

VALENCIUS, CONEVERY

HIST240601
Fall 2020

How do different environments, places, and resources shaped American history? We will survey main themes and events in the environmental history of the United States. We move from colonial-era differences in land use through contemporary environmental debates. We ask how American communities have used, defined, and fought over places and natural resources, from bison herds to nuclear stockpiles. We investigate intriguing aspects of our local Massachusetts environment: the Emerald Necklace of parks, the brass hoof prints of Harvard Square, even our nearby reservoir. No background in history is necessary to thrive in this class. Students in the sciences are welcome.

American Fascisms

GALLAGHER, CHARLES R

HIST245501
Fall 2020

Our goal is to understand the nature and role of the political right, right-wing extremism, and fascism in the U.S. from its European importation to the present. Beginning in the late nineteenth century, the course will address right-wing ideology in religion, politics, and culture both in Europe and the U.S. Topics will be connected to the theoretical underpinnings of European Fascism, its adaptation to the American landscape, and its persistence in modern discourse. The course will begin with a discussion of allegations of Trumpian fascism in the U.S. press in 2016.

American's War in Vietnam

JACOBS, SETH S

HIST247501
Fall 2020

This course will examine America's thirty-year military involvement in Southeast Asia, one of the most controversial episodes in U.S. history. Students will read a wide variety of primary and secondary sources, from recently declassified state and Defense Department documents to poetry and...
short stories. Course readings are selected from various points on the left-right political spectrum, with both "hawks" and "doves" receiving their day in court. Lectures will include the origins of the Cold War; the Eisenhower, Kennedy, Johnson, and Nixon presidencies; antiterrorism and other Vietnam era movements; and American soldiers’ experience during and after service in Vietnam.

HIST248101
African-American History I MILLER, KAREN
Fall 2020
This two-semester survey examines the history and culture of African-Americans from the pre-colonial period to the present. The first semester treats the period before the middle passage, the evolution of slave and free society, the development of Black institutions, and the emergence of protest movements through the Civil War's end. During the second semester, the emphases are placed on issues of freedom and equality from Reconstruction, urban migration, and civil rights struggles through current consideration of race, class, and gender conflicts.

HIST248501
Foodways and Folkways in African American History MILLER, KAREN
Fall 2020
Food provides a lens through which to explore and compare the impact of this dispersal on a people as they moved, adapted long-held practices to new places, new times, and new concerns. This course focuses on several themes such as evolving food customs and traditions, how those traditions reflect the common bonds as well as the limitations of diaspora, the politics, economics, and health implications of food availability and scarcity, and the presence of food as a dynamic element in cultural production and representation in art, literature, film, and history. Students will examine and share their own familial food traditions and histories.

HIST249901
Partisan Politics: American Political Parties from 1754-2020 RICHARDSON, HEATHER C
Fall 2020
America’s Founders believed political parties were divisive and hated them... until they formed their own. This course will follow the twists and turns of America’s major political parties from Thomas Jefferson’s Democratic Republicans, the Democrats, and the Whigs of the Early Republic, through today’s Democrats and Republicans. We will look at how third parties, including the Know-Nothings, the Populists, and the Dixiecrats shifted public opinion. Political parties are the means by which political ideologies get transformed into policy. Examining how they shifted reveals how America has changed and stayed the same since the days when Jefferson, who organized America’s first political party, said: “If I could not go to heaven but with a party, I would not go there at all.”

HIST250201
Introduction to Feminisms MURPHY, ANNALYSSA G
Fall 2020
This course introduces students to terms and concepts that ground feminist theory and gender analysis, a range of issues that intersect with gender in various ways (e.g., nationalism and post-colonialism, health, labor, sexuality, race, family), and some classic texts in Women's Studies. It will also combine a brief historical overview of the development of the first, second, and third wave of women’s movements, with an examination of their critiques by women of color. Finally, we will follow selected stories in the news that bear on the themes of the course.

HIST287101
Industrialization and Democratization in Korea HWANG, INGU
Fall 2020
This introductory course surveys the political and economic transformation of South Korea from decolonization through the high growth era to today's global neo-liberal age. It traces how a war-ravaged country became a prosperous and industrialized nation. In exploring this transformation, it also examines the relationship between Korea's industrialization and its democratization: How did U.S. Cold War modernization impact the Korean state's economic strategy and its political development? Why and how did Korean society campaign for social and political justice during the economic high growth era? The course also considers the reconfiguration of South Korea's political economy since the 1990s.

HIST287501
Development and Social Justice in Korea HWANG, INGU
Fall 2020
This course introduces students to the political and economic changes that South Korea experienced from the 1960s to the present and explores how these changes contributed to social unrest, to demands for greater democracy, and to other social justice issues. In doing so, it will address how South Korea's economic and political trajectory was informed by pressures at the international, national, and sub-national level and compare the South Korean case to that of other Asian nations.

Study and Writing: Violence and Protest in America

**Johnson, Marilyn**

Fall 2020

This course explores the fundamentals of the historian's craft through case studies of political and racial/violence in nineteenth and twentieth century America. We will read some of the latest historical literature dealing with incidents of collective and personal violence including strikes, racial and ethnic riots, rape, and vigilantism. Using primary sources such as congressional investigations, riot reports, personal memoirs, newspapers, and periodicals, students will write a major research paper analyzing a selected historical incident.

Mid-East Nationalisms Compared: Arab-Turkish-Jewish

**Braude, Benjamin**

Fall 2020

Nationalisms in the Middle East developed in a distinctive way. In contrast to Europe, religion was more important than language. In contrast to Africa, they emerged prior to the rise of anti-colonialism. Although nationalisms in the Middle East have spawned conflicts within themselves and with each other, they have displayed remarkable similarities to each other. One consistent similarity is their fraught attempts to distinguish the so-called nation from the religious traditions out of which it emerged. This course will address these questions through comparing Arab, Jewish and Turkish nationalism in the nineteenth and twentieth centuries.

<td>HIST422001</td>
<td>Romans and Barbarians</td>
<td>FLEMING, ROBIN</td>
<td>One of the chief objectives of this course is to understand Rome's metamorphosis in the West, after the empire's fall, and to come to grips with changing notions of Romanitas--&quot;Romaness&quot;--from the second through the eighth centuries. The other objective is to understand the construction of power during this period: who had it, who lost it, how it was flaunted and used. We will discuss new sources of power invented in the period: relics, asceticism, military brotherhoods, elaborate burial, and ethnogenesis. The course will emphasize archaeological evidence as much as traditional textual evidence.</td>

<td>HIST423001</td>
<td>The Age of the Renaissance</td>
<td>ROSS, SARAH</td>
<td>During the late fourteenth century, Europe was attacked by the Four Horsemen of the apocalypse: Disease, War, Famine, and Death. In the face of widespread catastrophe, men and women began to seek stability and truth in new ways, within and beyond the confines of state and church. The sum of the many solutions they found is what we call the Renaissance (1350 - 1650). This course introduces students to cultural and intellectual developments in Italy and Northern Europe, as well as European encounters with the New World.</td>

<td>HIST425801</td>
<td>Suspicious Minds: Marx, Nietzsche, Freud</td>
<td>BOURG, JULIAN E</td>
<td>This course examines three famously influential intellectuals--Karl Marx, Friedrich Nietzsche, and Sigmund Freud. All three are featured figures in the &quot;hermeneutics of suspicion&quot;--the traditions of emancipatory critical thought that have indelibly marked the world since the mid-nineteenth century. In addition to reconstructing these thinkers' basic projects within their historical contexts, we will investigate their long-term influences and assess their untimely relevance and resonance today.</td>

<td>HIST426701</td>
<td>Life and Death under Stalin</td>
<td>EATON, NICOLE M</td>
<td>Stalin's rule (1924-1953) marked the most transformational, dramatic, and violent period in Soviet History. The dramatic shifts in Soviet society led both to the long duration of the regime and to its ultimate collapse. The legacies of Stalin and &quot;Stalinism&quot; are still felt today in Russia and the other states of the former Soviet Union. This course is not so much about Stalin the man, as about the society that he helped create and the people who lived and died because of it. Readings focus on ideology, violence, terror, empire, domesticity, resistance, true belief, and the Second World War.</td>

HIST429401

Holocaust Literature: History, Memory, Legacy SHRAYER, MAXIM
Fall 2020
A brief overview of the history and legacy of the Shoah (Holocaust) followed by an examination of the variety of literary responses by witnesses and survivors, as well as by writers removed from the wartime horrors by distance, time, country, and language. Questions of ideology, metaphysics, ethics, aesthetics, memory, and cultural theory as formulated and debated in poetry, fiction, nonfiction, journalism, and discursive writings. The readings include works originally written in Russian, Yiddish, Polish, German, Italian, French, and English by Ilya Selvinsky, Vasily Grossman, Avrom Sutzkever, Tadeusz Borowski, Paul Celan, Primo Levi, Theodor Adorno, Elie Wiesel, Vladimir Nabokov, Hannah Arendt, Arthur Miller, W.G. Sebald and others. All the readings will be in English translation.

HIST430201

Borders and Frontiers in Modern Latin America PICON, MARIA DE LOS ANGEL
Fall 2020
Did you know that Brazil's border with its neighbors is longer than the U.S.-Mexico and Canada borders combined? But what do lines on a map mean? This course examines the historical making of borders in Latin America. From border negotiations to smuggling, we will trace how people imagined, experienced, and continue to transform border regions south of the Grande River.

HIST437301

Mexico between Fact and Fiction SELLERS-GARCIA, SYLVIA M
Fall 2020
Drawing from Edmundo O'Gorman's notion of Latin America as an 'invented' place, this course considers how the region has been imagined, distorted, and revised many times over hundreds of years. Focusing on a handful of moments or episodes from the colonial period to the twentieth century, we will read fiction, witness accounts, primary sources, and historical renderings. Our objective will not be to pin down the "facts," but to see what we can learn by examining diverse versions of the past alongside one another.

**HIST446801**  
Mass Incarceration in Historical Perspective ZUNIGA NIETO, CARLOS GERAR  
Fall 2020  
We live in an era when prisons have become a pressing social problem in the United States. As an important historical development, prisons around the world have grown over the past two hundred years as regimes of incarceration have developed and expanded in colonial, liberal, neo-liberal, and authoritarian state systems. Drawing on readings across time and space, the course will familiarize students with historical events and philosophical ideas that cause, shape, and sustain cultures of confinement. Students will develop an understanding of the current criminal justice reform policy challenges and potential solutions to confinement in global penal regimes.

**HIST447601**  
Social Action in America JOHNSON, MARYLYNN  
Fall 2020  
This service-learning course examines the history of social action in twentieth-century America. In an effort to understand how systems of power have shaped race, class, and gender relations, fostered inequality, and spurred activism, we will conduct case studies of several liberal and radical social movements including settlement houses, the labor movement, Alinsky-style community organizing, southern civil rights, and the War on Poverty. Students in the class must also participate in a local community service/action project for at least 3 hours per week, the functions and history of which will be the subject of classroom discussion, service reflection, and research.  
**Credits:** 03  
**Room and Schedule:** T TH 1 30*; ONLINE; SYNCHRONOUS

History of Black Nationalism MILLER, KAREN  
Fall 2020  
This course examines the evolution and diversity of Black Nationalism and nationalist ideologies in the United States from the early nineteenth century to the present. Detailed study of several distinct nationalist strategies, including emigrationist, separatist, cultural, andaccommodationist, and their proponents will allow students to analyze and compare the forces influencing the evolution, proliferation, reemergence, and resurgence of nationalist constructs at various points in African American history.

HIST455201
Race, Rights, and the Law ROGERS, ALAN
Fall 2020
This course is organized around a question recently raised by Supreme Court Justice Sonia Sotomayor: What role should the long dark history and the contemporary reality of racism in the United States play in the Court's decision making? Students will explore the checkered relationship between race, rights—and both civil and criminal—and the law, beginning with slavery and culminating with the so-called Ferguson effect. Students will read, discuss, and write about major Court decisions, look behind the law for evidence of cultural and political bias, and note how American politicians and jurists have "played the race card."

HIST480401
Divided Korea HWANG, INGU
Fall 2020
The Korean Peninsula has remained one of the most internationally contested areas since its division in 1945. Using a combined chronological and thematic approach, this upper-division course delves into the local, regional, and global factors that contributed to this division and its perpetuation. The course addresses the political, economic, social, and cultural impact of this division on Koreans and on the world.

<tr>
<td>Since the 1970s, the field of environmental history has evolved through several stages. At every stage, it encountered new theoretical challenges, adopted new methodologies, embraced new research possibilities, and thus allowed itself to expand toward broader horizons. This course leads students to experience various transformations of environmental history by reading several classic texts. We will begin with traditional historical critiques from the perspectives of political economy and political ecology, then move to interdisciplinary inquiries strongly informed by natural science, and end with the recent developments in multi-species ethnography, materiality studies, and post-humanist thinking from social science</td>

<tr>
<td>Unlike other courses you may have taken, the aim here is to give students an experience of concentrated study on a single year of the First World War, 1916. Within that parameter there will be twelve topics which will include Gallipoli, the Somme, the Battle of Jutland, and the war on the Eastern Front. Each student will become an expert in two such topics. Students will read a general book on the war in 1916, prepare their two areas of expertise and read two large books on World War I which will provide the context for the concentration on 1916. This is an intense project and is not for the faint hearted. A lot of reading is required, but you will emerge as an expert on WWI in general and of the war in 1916 in particular.</td>

<tr>
<td>This course examines the influence of race on American politics during the twentieth century. We will analyze how at several key moments, racial ideologies influenced the formation of laws, public policies, and political institutions. We will also trace how notions of race have changed over time, and we will compare the experiences of different racialized groups. Topics covered include immigration restriction, World War II, suburbanization, and mass incarceration. This comparative analysis will allow us reflect on how past decisions continue to influence contemporary realities.</td>

HIST7080001
Colloquium: Introduction to Doctoral Studies PENDAS, DEVIN O
Fall 2020
This graduate colloquium is required for and limited to first-year doctoral students in history. The course will explore a range of theoretical and methodological approaches to the study of the past. Exemplary works from a range of regional historiographies will constitute a significant portion of the course reading. The course aims to introduce entering students to central traditions and debates in the discipline.

HIST821001
Graduate Seminar: Medieval History FLEMING, ROBIN
Fall 2020
Students in this seminar will write original research papers on some topic in medieval social, economic or political history. The topic will be one upon which the student and professor have agreed, and will be based primarily on original sources. Students will not only be required to write a paper, but to read and critique all papers written in the seminar. The final paper will be a polished and rewritten piece incorporating the critiques of the professor and other graduate students in the seminar.

HIST7990101
Colloquium for Master’s Degree Students MATUS, ZACHARY A
Fall 2020
This graduate colloquium is required for first and second year master’s degree students in history. In it, we will explore the basics of a career as a professional historian, exploring the concepts of history, historiography and theory, and practicing how to conduct research, write a variety of historical pieces, teach, design courses, and create museum exhibits. We will also look at how to apply the skills used in graduate school to finding a future either in the academy or as a #altac.

HIST100601
Asia in the World II MO, YAJUN
Spring 2021
This course examines Asia in the shaping of the modern world, from competing definitions of empires circa 1800 to the rise of the notion of the twenty-first century as a "Pacific Century." It investigates the definition(s) of Asia as a world region, explores transnational interactions, and emphasizes Asians as historical actors via written, visual, and aural sources. Events are placed in the context of key historical paradigms, including varying definitions of modernity, the rise of the nation-state, the birth of mass politics, new mechanisms of war, the language of self-determination, changing views of gender, shifting types of media/consumption, etc.

HIST101001
The Power of Ideas/ Ideas of Power II BOURG, JULIAN E
Spring 2021
This lecture course traces the global history of ideas during the modern era since 1800. Following the story of thinkers and artists will lead us to consider the many -isms that have shaped our world, from romanticism and modernism to liberalism, socialism, conservatism, and fascism. We will investigate the connection of intellectual history to modern forces such as revolutionary nationalism, capitalism, and colonialism, and we will discuss different historically specific notions of power with respect to selfhood, society, politics, economics, gender, race, religion, and science. Alternative perspectives, including not ruling the world, will be considered.

This course covers several centuries of time (prior to 1800) and traces the political, social, economic, and cultural changes that created the modern world. Depending on the expertise of the instructor, different parts of the world may serve as focal points for examining the complex historical processes behind modern-day transnational relationships, values, and ideas. As part of the Core Curriculum, this course seeks to broaden students' intellectual horizons by exposing them to new places, periods, and perspectives.

HIST111401
The African Diaspora and the World II SUMMERS, MARTIN A
Spring 2021
This course explores the African diaspora and its relationship to the world from 1800 to the present. African diaspora refers to both the continent and the communities of African-descended people that have formed in the Americas, Asia, and Europe as the result of forced and voluntary migrations over the last five hundred years. This course examines such topics as the role of slavery in the development of capitalism; the role of black resistance in expanding concepts of freedom and equality; European imperialism in Africa; and the relationships between black freedom struggles in the Americas and anticolonial struggles in Africa.

This course explores U.S. energy. From the perspectives of history, culture, technology, engineering, and foreign policy, we ask how we have created and how they may evolve. We investigate energy production, distribution, and transmission systems. Through hands-on exercises and field trips, students learn how past technological and economic choices shaped current U.S. energy systems, how energy systems affect the environment, and how sustainable energy systems will be in the future.

HIST172501
Who Are You? The Science of Self
TONN, JENNA A
Spring 2021
How do you answer the question of who you are? Are you your body, your IQ, your race, your gender, your personality, your social roles or relationships (e.g., student, sibling), where you grew up? These courses explore the science and sociology of the self. We will examine how the modern sciences have understood the self since the nineteenth century. Scientific knowledge has been used to quantify and compare human traits and make recommendations about how best to live, work, and play. It has also been deployed to reinforce social inequalities and stigmatize minority groups. Similarly, sociologists have theorized the ways people define themselves in relation to others, sort themselves into groups and construct social boundaries, and perform their identities. Sociological thinking also examines the role of institutions (like colleges) in both reproducing and disrupting unequal outcomes for various social groups.

Course topics will include racial and sexual science, the social construction of deviant identities, the self in relation to college life, and the self in the age of social media, self-care, and quarantine.

HIST183301
Resisting and Rebellng II
PICONIE, MARIA DE LOS ANGEL
Spring 2021
Opening with the dramatic slave revolt that resulted in the Haitian independence, this course will examine the numerous instances of rebellion and resistance in Modern Latin America. While these terms might first bring us to struggles for state power, our readings will reveal that rebelling and resisting transcended theoretical articulations of authority in an effort to transform everyday lives. How did rebelling and resisting look like in different places? How did colonial legacies shape uprisings, and how were they resolved? How did global ideological trends, especially during the Cold War, affect resistance in Latin America?

HIST184101
Core Topics: When Worlds Collide: From Contact to the Constitution
LYERLY, CYNTHIA L
Spring 2021
This course will examine North American history from the perspective of the collision and exchange of cultures and peoples. From the Mississippian Indian civilization at Cahokia to the Illinois, Iroquois, Algonkian, and other Native American peoples, we will see how Indoans resisted, adapted, and interacted with French, English, Spanish, and Dutch Europeans. African peoples were another key part of this cultural collision, as hundreds of thousands were brought to North America in the slave trade. The course ends with the consolidation of white European power in the creation of the United States. Major themes in the course are race, power, and religion.

HIST202001
Japanese Cultural Icons through Modern Times
SERAPHIM, FRANZISKA
Spring 2021
This course surveys Japanese history from 1600 to the present. Each week focuses on a cultural icon that dominated public culture at the time or came to be identified as such later. Examples include the samurai warrior, the courtsean, the "men of high purpose" in the Meiji Revolution, the war general, the modern girl, the emperor, the postwar salaryman, etc. Some are anti-heroes, but all have found a firm place in Japan's cultural history. Lectures place these figures in historical context, while readings examine their cultural meanings through literature, biography, scholarly texts, visual images, and film.

HIST204301
The First Emperor and the Rise of Imperial China
CHEN, YUAN J
Spring 2021
This course surveys Chinese history from 221 B.C.E. to 1912 C.E. Students will learn to use a variety of materials (literary, archaeological, artistic, and multimedia) and to think critically about issues including the formation of China's early imperial dynasties; China's social, intellectual, and cultural histories; the continuity of China's bureaucratic system and authoritarian tradition; and China's relations with the outside world. The course is reading and discussion intensive.

HIST204501
A Material and Cultural History of Food in China
CHEN, YUAN J
Spring 2021
This course studies historical continuity and changes of dietary traditions and culinary practices in China. We will examine how certain foods gave possibilities to and conditioned China's cultural formation and, in return, how food and ways of eating are culturally, socially, and politically constructed. The course's themes include food and religion in early China, food and Chinese medicine in the early medieval, food exchanges with central Asia, food and urbanization during the "Medieval Economic Revolution," the New World food in late imperial China, regional culinary and cultural diversities, and eating in globalized, modern China.

HIST218001  
Afric Since 1850 LAL, PRIYA  
Spring 2021
This course provides an overview of the recent history of sub-Saharan Africa. It begins by examining colonization and the dynamics of colonialism, then traces the development of anti-colonialism and nationalism, and concludes by surveying the trajectories of post-colonial states and societies. Throughout the semester we will think about popular experiences in addition to institutional or elite narratives, ask questions about the changing position of Africa in the world, and contemplate the stakes of conceptualizing African history in the present. Materials will include a range of academic literature, fiction and non-fiction works by African intellectuals, and visual media.

HIST220601  
Roman Law and Family ESHLEMAN, KENDRA J  
Spring 2021
We will look at the makeup and dynamics of the Roman household through legal sources, which allow investigation of Roman legal arguments and approaches to issues such as marriage, dowry, divorce, disciplining children, adultery, procreation, adoption, and women's rights, and the role of the pater familias. We will also observe similarities and differences between Roman family law and modern American family law. By the end of the course you will have gained a better understanding not only of the Roman family but also of how societies—including our own—use law to order and regulate family relationships.

HIST223001  
Science before the Scientific Revolution MATUS, ZACHARY A  
Spring 2021
The advent of modern science in the western world was never a necessary outcome of Western intellectual activity. Yet histories of science frequently spin a tale of intellectual progress leading inexorably to scientific thinking (and hint at brighter futures to come). This course examines the technologies and philosophical tools that would give rise to science, but with an eye to their historical contexts and their many non-scientific aspects. We especially will focus on how pre-modern medicine, astronomy, and alchemy relate, or do not, to their modern counterparts.

HIST225401  
A Social History of Money in the World ISMAY, PENEOLE G  
Spring 2021
Money, they say, makes the world go round. But what is it? How does it acquire value? Who or what says how much it is worth? This question has been answered in very different ways throughout time and throughout the world. Even today the meaning of money varies greatly. This course will explore the meaning of money mostly in ancient, medieval, modern Europe and America but we will also explore the meaning of money in non-Western parts of the world, as well.

HIST225801  
The British Empire: Its Rise and Fall RAFFERTY, OLIVER P  
Spring 2021
How did a relatively small country at the edge of Europe come to acquire the largest empire in history? At its height it covered 24% of the earth's surface. How was it built up? What sustained it? What were the political, diplomatic, and military accomplishments of this empire "o'er which the sun never set"? Beginning with Colonial America this course will trace the history of the empire, and the men and women who shaped it, from the loss of the American colonies in 1781 to the handover of Hong Kong to China in 1997.

HIST245201
The Secret Lives of Spies GALLAGHER, CHARLES R
Spring 2021
This course is a survey history of the U.S. Intelligence Community that is grounded in the autobiographies of America’s most famous (and infamous) spies. The task is to learn American Intelligence History by reading spies in their own words. Some spies wrote to expose government censorship, others to justify their work for enemy nations, and others to assuage their own ego or bolster their bank accounts. The course will look at the ethics of spying, the operations compromised, and the way many spies have attempted to philosophically justify their actions.

HIST247601
The Cold War in the Third World JACOBS, SETH S
Spring 2021
The half-century conflict between the United States of America and the Soviet Union began in the mid- to late 1940s when the two superpowers established spheres of influence in Europe. Thereafter, unable to make much headway on the Continent, Washington and Moscow jockeyed for influence in the so-called “third world” of developing, decolonizing, and predominantly nonwhite areas in Africa, Asia, and Latin America. This course examines America’s campaign to win the third world to its side, and the often tragic consequences of that effort, as U.S. policymakers frequently wound up simplifying local and regional developments, equating nationalism with communism, aligning America with unstable and unrepresentative regimes, and wedding American interests to the status quo in places experiencing massive social, political, and economic upheaval.

HIST248201
African American History II MILLER, KAREN
Spring 2021
The two-semester survey examines the history and culture of African-Americans from the pre-colonial period to the present. The first semester treats the period before the middle passage, the evolution of slave and free society, development of Black institutions, and emergence of the protest movements through the Civil War’s end. During the second semester, the emphases are placed on issues of freedom and equality from Reconstruction, urban migration, civil rights struggles through current consideration of race, class, and gender conflicts.

Introduction to Feminisms MURPHY, ANNALYSSA G
Spring 2021
Counts toward German major and German minor.

Student Level: UNDERGRAD ELECT
Comments: Conducted in English. Required for the German Studies minor.
Counts toward German major and German minor.
Status: CLOSED
This class will introduce students to terms and concepts that ground feminist theory and gender analysis, a range of issues that intersect with gender in various ways (e.g., nationalism and post-colonialism, health, labor, sexuality, race, family), and some classic texts in Women's Studies. It will also combine a brief historical overview of the development of the first, second, and third wave of women's movements, with an examination of their critiques by women of color. Finally, we will follow selected stories in the news that bear on the themes of the course.

HIST250901
Catholics and Social Justice MURPHY, THOMAS
Spring 2021
This course examines how Catholic lay involvement in the American labor movement stimulated the inauguration of the papal social encyclical tradition in 1891. It will go to describe how American Catholics both supported and opposed this tradition from the Progressive movement to the censure of Senator Joseph McCarthy in 1954. The tendency of the movement’s critics to confuse Catholic social teaching with Marxist socialism will be stressed.

HIST270201
Colonial Past/Global Presents KENT, STACIE A
Spring 2021
While scholars of globalization often proclaim the novelty of the present, historians have become suspicious that deeper connections exist between global, networked presents, and colonial pasts. In this course we will study a variety of colonial histories form the eighteenth and nineteenth centuries and investigate whether and in what ways that history remains with us today. Our examples will come from Euromerican colonial empires, and topics will include commodity production and circulation, work regimes, labor migrations, gender and sex, development, science, medicine, and racial epistemologies.

HIST282401
Metropolitan America: Cities and Suburbs in the Twentieth Century GLASS, MICHAEL
Spring 2021
In 1920, a majority of Americans lived in cities for the first time. By 1990, a majority lived in suburbs. These dramatic shifts influenced every facet of life, from politics to economics, labor to culture. This course surveys these transformations in metropolitan America during the twentieth century. We will examine the history of the built environment; analyze changes in housing, business, work, and consumption; follow the movement of people, capital, and ideas; and assess how various institutions shaped the fate of urban and suburban communities.

HIST282501
Sports in U.S. History MOGAN, THOMAS
Spring 2021
Noted author and professor Gerald Early once wrote, "Sports may be among the most powerful human expressions in all history." The above statement lends credence to the notion that sport has become an integral part of the social, cultural, and political fabric of the United States. An examination of sport as an important social institution reveals a number of complex social and economic issues that warrant further discussion and evaluation. This course will examine how the institution of sport has reflected broader changes in American society from a historical perspective. Special focus will be placed on the relationship of sport to race, class, and gender; issues of economics, consumerism, urbanization and the media will also be considered. As such, we will be especially concerned with the experience of certain groups and individuals that have been associated with and affected by sports throughout the history of the United States.

HIST283701
Multiculturalism in the Roman Empire THATCHER, MARK R
Spring 2021
From its beginnings as a small city-state in central Italy, Rome built a vast multicultural empire stretching across the entire Mediterranean and much of Europe. We will travel through this empire, visiting such different peoples and provinces as the Germans and the Jews, Britain and Greece. How did those people remain loyal to their origins while also becoming Roman? How did the different cultures included within the empire transform who the "Romans" were and what it meant to be Roman? How did the emperors—those larger-than-life figures like Augustus and Nero—use the diversity of the empire to craft their public images as conquerors or as...Greek actors? We'll use a combination of written sources, archaeological evidence, and even visual art to investigate these questions and to explore the ever-expanding melting pot of the Roman world.

Colonial Korea and its Legacies HWANG, INGU
Spring 2021
This course explores Korea's experience under Japanese colonial rule (1910-1945) as well as how this experience was remembered and represented in the post-colonial era. Students will explore the three phases of Japanese rule: military rule (1910-1919); cultural rule (1919-1931), and wartime mobilization (1931-1945) and how each of these phases have shaped and continue to shape Korean national identity and politics, socioeconomic development, and memory culture. The course draws on historical and literary texts as well as film and other visual sources. This course combines lecture with active student discussion and presentations.

HIST285501
Human Rights in East Asia HWANG, INGU
Spring 2021
This course introduces students to the post-1945 development of global human rights talk, activism, and politics from an East Asian perspective. Through an examination of specific conflicts over self-determination and sovereignty, economic development and disparity, democratization, the legacies of decolonization, and global justice and environment, the course delves into how and why actors in China, Japan, Hong Kong, Taiwan, South Korea, and North Korea translated local struggles into international human rights agendas that gained attention on the global stage. In exploring this process of translation and appropriation, we will also analyze how these local conflicts transformed international human rights issues.

HIST312001
Study and Writing: The Arabian Nights from Baghdad to Hollywood SADJI, DANA
Spring 2021
The seminar will examine the history of the famous Arabic popular oral romance, A Thousand and One Nights (Arabic, alf layla wa layla), from its earliest Indian roots to its passage in Iran, to its incubation in medieval Baghdad, Damascus and Cairo, to its "discovery" by Victorian gentlemen, to its consumption all the way from Hawaii to Japan, to its adaptation to music, dance, film, and painting, to its production as a play here at BC this semester! Underlying the movement of the "Arabian Nights" from a regional Arabic popular romance to world literature is the colonial project. Thus, the history of The Arabian Nights from Baghdad to Hollywood touches on a wide range of important issues, including oral and written cultures, literary transitions to modernity, gender and sexuality, Orientalism, the colonial encounter, and the post-colonial condition. Students will learn how to treat different media of representation as sources for history and to discover in these cultural products clues, myths, and testimonies relating to politics, society, and economy.

Study and Writing: The Segregated Metropolis GLASS, MICHAEL
Spring 2021
This course explores the fundamentals of the historian's craft through a close examination of race, real estate, and public policy in the twentieth-century United States. We will discuss the historical literature dealing with segregation and inequality in metropolitan America. For independent research, we will analyze the "redlining" maps created by federal officials during the 1930s, read testimony from people in the aftermath of urban uprisings in the 1960s, and examine newspapers, census data, and other primary sources. As the culminating assignment, students will write a research paper analyzing a city and topic of their choice.

HIST3530201
Study and Writing: Jesuits and Indians STANWOOD, OWEN C
Spring 2021
This Study and Writing Course follows French Jesuit missionaries in their voyages around North America in the seventeenth and eighteenth centuries. Our topic will be less the Jesuits themselves than the world they encountered—and wrote about, in great detail, in a set of sources known as the Jesuit Relations. The Relations tell us not just about Jesuits, but about the Indians they attempted to convert, about French and English colonial societies, and about the North American environment. Students will use these rich sources to conduct their own original research.

HIST402101
Korean War: Conflict, Security, and Peace HWANG, INGU
Spring 2021
The Korean War (1950-1953) began as a civil war but became a global conflict against the backdrop of the emerging Cold War era. Known as "the Forgotten War" in the U.S., this conflict resulted in 5 million deaths and left an indelible imprint on the world. Seven decades later the Korean peninsula remains divided, and the contentious international security mechanisms engendered by this conflict still shape East Asian relations and U.S. foreign policy. Through engagement with recent historical works, this seminar course will explore the origins and legacies of this conflict, security options and limitations, and conditions and visions of peace.

HIST404801
Modern Girls: The Woman Question in Twentieth Century China MO, YAJUN
Spring 2021
How have the Chinese defined what it means to be a proper "man" or a "woman? How have these gender norms and ideologies shaped the life experiences and self-perceptions of individual men and women in modern China? How have they shaped Chinese social, political, economic, and cultural institutions? We will explore these questions by focusing primarily on Chinese women's lives—and the changes in shared social ideas about what women should do and be—from the mid-nineteenth century to the present. The central question animating the course is this: when we foreground gender as a category of analysis, how does history look different?

Gender, Sexuality, and Power in the Ottoman and British Empires SHLALA, ELIZABETH H
Spring 2021
In this course, we will utilize the concept of gender as an analytical tool within the history of empires. We will cover gender theory, the construction of gender identity (male and female), sexuality, power, politics, and culture. To understand how gender functioned within empire, we will undertake a comparative analysis of two of the greatest empires in the world—the Ottoman Empire and the British Empire. We will investigate the ways that race, religion, and class shape women's and gender imperial history.

HIST413001
Islam and Christendom: Renaissance to Revolution, 1400-1800 BRAUDE, BENJAMIN
Spring 2021
Despite the assumption of an abiding abyss between Islam and the so-called West, the civilizations of Christendom and the Islamic world have developed paradoxically in close albeit, at times, conflicting parallel. This was particularly true in the Mediterranean world during the early modern period. This course demonstrates that the major historical developments from this period such as the Renaissance, Exploration, Expansion, Exploitation, the Reformations, state-building, and the Enlightenment can best be understood if they are set in the widest cultural context. It concentrates on how the intertwining of Christians, Muslims, and Jews shaped this era.

HIST413401
The Ottoman Empire, 1300-1924 BRAUDE, BENJAMIN
Spring 2021
The Ottoman Turks founded an empire spanning the three continents of the eastern hemisphere and enduring for nearly three-quarters of a millennium. Despite nomadic origins they established a stable political structure, which crafted the high traditions of Islamic culture onto an ethnically, linguistically, and religiously diverse society. This course explores the evolution of this remarkable enterprise from its origin on the frontiers of Byzantium and Islam through its heyday under Suleyman the Magnificent to its military decline and first steps toward reform.

HIST413501
History and Historiography of the Arab-Israeli Conflict SADJ, DANA
Spring 2021
This course introduces students to the history of the Arab-Israeli conflict from the inception of the Zionist movement in the nineteenth century until the end of the twentieth century. Given that history itself is a site of contestation in this conflict, the course will focus equally on the various and conflicting historical narratives and will explore fundamental issues in the relationship between history writing and ideology, especially the use of history as a tool for the shaping of collective identities and for legitimizing and justifying nationalist claims.
Comments: Fulfills Non-Western Requirement for History Majors
Status: CANCELLED

HIST419001
Decolonization and the Cold War in Africa LAL, PRIYA
Spring 2021
After decades of organizing and protesting, African colonies began to gain independence from imperial rule in the late 1950s. Newly sovereign nation-states were born into a turbulent Cold War world, which both provided unprecedented opportunities for political experimentation and posed significant threats to young Third World countries. Caught in the middle of geopolitical contests between Western and communist powers, Africans strove to navigate these complex global dynamics while forging nation-building programs and continuing to support ongoing liberation struggles. This course reflects upon this era of political upheaval and transformation, focusing on case studies from across sub-Saharan Africa.

HIST420201
The Culture of Athenian Democracy HOFFMAN, GAIL L
Spring 2021
A political and cultural history of Athens during the creation and height of its democracy (circa 480-400 B.C.E.). The course will consider the Persian Wars and their effect on political and constitutional developments in Athens, the workings of the Athenian Democracy under Pericles, and the eventual collapse following the Peloponnesian War. Readings in translation include Thucydides, Plutarch, Aristotle, Xenophon, Plato, and the Greek playwrights (Aeschylus, Sophocles, Euripides, and Aristophanes). Emphasis will be on integrating historical, literary, and archaeological evidence to provide as complete a picture as possible of this dynamic period of ancient history.

HIST422601
Protest and Revolt in the Early Modern World REINBURG, VIRGINIA
Spring 2021
This course explores forms of resistance to public authority in the early modern world (c. 1550-1800), in Britain, France, and their American and Caribbean empires. State power in this era was authoritarian and anti-democratic. So protests and revolts were dialogues about power: how it was held, how it could be challenged, how it ought to be used. We will study religious riots, grain riots, tax revolts, anti-monarchical rebellions, and slave revolts, and try to understand how groups fought for their rights and tried to make a better world. Also included will be forms of everyday subversion under hierarchical and racist regimes.

Renaissance Women
ROSS, SARAH; LEONE, STEPHANIE
Spring 2021
This course examines the myriad forms of excellence women achieved during the Italian Renaissance (1400-1600). Even as Renaissance women labored as wives, mothers, nuns, and servants, they also created notable works of literature and art, patronized major projects; held jobs in the urban trades; shaped religious belief and practice; and even governed states. We will examine the work that Renaissance women did beyond "women's work," and analyze the conditions that shaped their professional no less than their personal lives. Our evidence encompasses both textual and material artifacts, including extraordinary objects housed at the MFA and other local repositories.

HIST426801
Socialist Techno-Utopias EATON, NICOLE M
Spring 2021
In the decades following the Russian Revolution, the Soviet state attempted to transform human society and the human species to bring about utopia. Soviet and other socialist scientists carried out numerous experiments in visionary biology, studying reproduction, immunity, and heredity in order to build proletarian new men and women; others sought to breed tame foxes, grow crops in winter, or explore the cosmos. This course explores socialist utopian visions through the social and cultural history of the experiments and their ideological and geopolitical underpinnings. The course focuses especially on their representations in film and fiction.

HIST427401
Eighteenth-Century Ireland O'NEILL, KEVIN
Spring 2021
Ireland experienced dramatic and often violent social, economic, and political changes as its place within the British political system and Atlantic culture emerged. These global changes coincided both with the emergence of a vibrant colonial culture represented by figures such as Jonathan Swift, Richard Brinsley Sheridan, and Edmund Burke, and a persistent indigenous culture, outside the view of Anglo culture. This course will explore the interaction of Anglo and Gaelic Irish and the major historical events of the period: the emergence of the Penal system, colonial nationalism, republicanism, the Revolution of 1798, and the Act of Union.

Spring 2021
The Inquisition in Spain and Spanish America

HIST429501
The End of History CRONIN, JAMES
Spring 2021
The ending of the Cold War and the collapse of socialism prompted a lively and intense debate about "the end of history." This course will investigate how such a strange notion could have arisen and attracted such serious attention, and whether this debate has any continuing effect on historical understanding and interpretation. More specifically, does it retain any useful meaning more than a decade after the end of the Cold War and in the aftermath of September 11? Major events that led to the idea will provide perspectives with which to assess its relevance to the post-Cold War world.

<td>When France Ruled the World</td>
<td>Stanwood, Owen C</td>
<td>Spring 2021</td>
<td>This course will examine the French experience in the Atlantic world from the sixteenth century through the Age of Revolution. We will examine the first attempts to explore and colonize the Americas, both north and south, the establishment of colonies in Canada and Louisiana, and the development of the slave trade and plantation colonies in the Caribbean. We will end with an examination of the global consequences of the French Revolution, especially in the establishment of the Republic of Haiti, the second independent nation in the western hemisphere.</td>

HIST448301

African American Life Stories
Miller, Karen
Spring 2021

A recurring theme in African American life histories is the narration of the moment when the black subject or author first becomes aware of himself/herself as a racial being in a society in which blackness has meaning. This course examines how these kinds of moments shaped individual perspectives of personal and racial identity and uses narratives and autobiographies to analyze how meanings of blackness are shaped by region, class, gender, sexuality, and historical context.

HIST449401

Enemy Aliens, Alien Friends: Asian Americans and U.S. Wars
Oh, Ariissa H
Spring 2021

Wars have been central to the relationship between the United States and Asia and to the history of Asian Americans. This course explores the ways in which twentieth century American wars, in Asia and elsewhere, have transformed migrations between Asia and the U.S. as well as war's impact on Asian Americans, social, economic, political, and cultural life. Rather than emphasizing geopolitics, we will focus on themes of migration, citizenship and U.S. imperialism, nationalism, and transnationalism. The broad scope of this course will also allow us to examine such concepts as race, gender, national identity, power, and cultural representations.

HIST449701

Terrorism in America
Gallagher, Charles R
Spring 2021

The aim of this course is to show how terror and violence have affected the United States from the late nineteenth century up to 9/11 and through the current U.S. military operations in Iraq and Afghanistan. It aims to show that while differing in scope and human loss, the latter events, including the so-called Global War on Terror, have certain antecedents in the U.S. experience. The course will concentrate on the theme of terror, both domestic and foreign, and examine the government response to terror and subversive groups aiming to overthrow the government or inflict harm upon its citizens.

HIST455101

American Hate
Lyerly, Cynthia L
Spring 2021
Racism is, unfortunately, as American as apple pie and baseball. This course explores the roots of racial hatred and the changes in American racism over time. In addition to studying the ideas that buttress racism, this course will examine case studies of racism in practice, such as the Tuskegee syphilis experiment, convict leasing, segregated recreation, the Trail of Tears and Japanese internment.

Capstone: Boston College/Your Life BURNS, JOHN J
Spring 2021
This seminar will focus on the historical development of Boston College and the continually evolving interaction between its traditions and its students. Students will do archival research on some aspect of Boston College in which they have a personal interest and will record oral histories with faculty, administrators, and alumni who can describe the ambience and personalities of different periods that have shaped the modern university. All students will write a series of reflective essays on their experience with Boston College traditions and the impact it has had on their own personal views of themselves, their pasts, and their futures.

HIST470201
Feast or Famine? Food and the Environment O'NEILL, KEVIN
Spring 2021
Through most of history the primary quest of humans has been to obtain sufficient food for survival. This course will explore the evolving relationships between that quest and the environment. Topics will include: climate change, the domestication of plants and animals, the development of settled agricultural societies, the Columbian exchange of biota, plantation and state sponsored agriculture, and the emergence of agro-business. We will explore the role of both individual crops/commodities such as sugar, chocolate, cod, corn, and the potato, and the environmental systems of which they were part.

HIST482301
Ireland at War in the Twentieth Century RAFFERTY, OLIVER P
Spring 2021
Twentieth-century Ireland seemed a country imbued with violence. This was not simply because of the Easter Rising of 1916 and the War of Independence, 1919-21. The warlike propensities of the Irish had already been demonstrated by Irish involvement in the Boer War 1899-1902. These events set the parameters of what happened in Ireland in the rest of the century and included such things as the Civil War 1922-23, the activity of the Irish Republican Army (IRA) in the 1930s, 40, and 50s. Ireland's participation in both world wars and the violence of The Troubles 1969-98 will also be examined.

HIST486701
Modernity and Tradition in Interwar Ireland MCGARRY, FEARGHAL
Spring 2021
This module explores Irish developments within an inter-war European context. Both Irish and European society were as characterized by cultural unease as the impact of the Great War, post-war revolts, radical statist ideologies, and technological innovations were seen to undermine tradition. Focusing on topics such as gender, morality, sexuality, popular culture, and the role of the state, this course will investigate how Irish society was preoccupied by anxieties about modernity, and how these concerns shaped the Irish state's construction of Irish national identity at home and abroad.

### HIST492115
Advanced Independent Research

**LYERLY, CYNTHIA L**

**Spring 2021**

Proposals for possible designation as scholar's projects should be submitted to the Director of Undergraduate Studies early in the spring. Details of dates and required materials are available either from the Director's Office or from the office of the Dean of Arts and Sciences. All proposals must be approved by the Director and the Departmental Honors Committee.

HIST519301
Senior Colloquium: Hungry Planet PARTHASARATHI, PRASANNAN
Spring 2021
The history of food is a window into many dimensions of the human past and can tell us about economic life, social relations, and political power. This course will draw upon examples from around the world to understand how food systems have evolved in the modern period and the consequences of contemporary food practices. Topics to be covered will include the moral economy, famine, national cuisines, sugar, the green revolution, fast food, and climate change. Readings will be supplemented with films and eating challenges.
Credits: 03

Status: CLOSED

HIST529001
Senior Colloquium: Reagan and Thatcher: Together Against the World CRONIN, JAMES
Spring 2021
Margaret Thatcher came to office in May, 1979; Ronald Reagan in January 1981. They each confronted serious crises at home and abroad. The two leaders shared a similar vision of the world: a strong belief in the market and an equally intense anti-communism. On both counts they represented a break with the prevailing consensus and had to fight hard for their ideas. Their alliance and friendship was a major resource in winning or losing the battles they chose. The course will provide an opportunity for students to examine the context in which these two leaders came to office, their ideas, and their relationship.

HIST546201
Senior Colloquium: Racism in U.S. History LYERLY, CYNTHIA L
Spring 2021
This course is an in-depth exploration of racism in U.S. history. It will examine books and readings that focus on events and policies of racial violence, oppression, and discrimination against people of color in the United States. Students will write final papers on a thematically related racist event or policy that is not covered in the class readings.
Credits: 03

Satisfies Core Requirement: None Prerequisites: Senior History Major Standing. Corequisites: None
HIST546501
Senior Colloquium: Death Penalty in the U.S., ROGERS, ALAN
Spring 2021
This colloquium focuses on the contentious social and legal history of the death penalty from its colonial beginnings to the present.
Credits: 03
Room and Schedule: None
Satisfies Core Requirement: None
Prerequisites: With permission of the Instructor. Graduate student status.
Corequisites: None
Status: OPEN

HIST549301
Senior Colloquium: Capitalism Around the World, KENT, STACIE A
Spring 2021
In this colloquium we will survey histories of capitalism (roughly 1600 to the present) from a variety of geographical sites, focusing on issues of race, exploitation, desire, global-integration, time, and the environment. We will read monographs that exemplify a range of methodological approaches to understanding capitalism as a complex historical phenomenon with social, political, ecological, and subjective dimensions. This is not an economic history course, though we will at times attend to capitalism's internal dynamics. Students will develop a portfolio of written summaries that will provide the foundation for a final critical literature review.

<td>HIST730301</td>
<td>Colloquium: Gender History and the Scholar's Craft Today</td>
<td>ROSS, SARAH</td>
<td>Familiarity with the issues and concepts of gender history constitutes essential preparation for graduate students entering the historical profession today. This course offers an introduction to the theories, methods, and sources of gender history. Engaging scholarship from the 1980s to the present, we will examine gender history's divergence from social and women's history, convergence with post-structuralism, and the linguistic turn and impact upon new lines of inquiry into the history of sexuality, transnational, and global history. The final component of the course is a tailored practicum: students will assess recent applications of gender analysis in their own research field.</td>

| HIST753101 | Colloquium: Political Integration and Fragmentation in the World | SAVAGE, ROBERT J | Spring 2021
This course will explore the formation and fragmentation of nation-states, empires, and political unions in a broad comparative context. Readings will explore the process and consequences of decolonization, the challenges partition presented in trying to resolve political crises, and the integration/fragmentation of post-war Europe. |
| HIST781701 | Graduate Colloquium: Digital Humanities | LEHMAN, BRITTANY | Spring 2021
Foundational course for the use of digital scholarship in the humanities. By the end of the course, students will have a grounding in what digital scholarship is as well as an arsenal of techniques for utilizing DS in their own work. |
| HIST810101 | Interim Study None | | Spring 2021
TBD |
| HIST822101 | Graduate Seminar: U.S. since 1900 | SUMMERS, MARTIN A | Spring 2021
This seminar will explore selected topics in the political, social, and cultural history of the United States in the twentieth century. We will also investigate the types of sources, archives, and methodologies employed by twentieth-century historians. Over the course of the semester, students will pursue in-depth research projects on a topic of their choosing using extensive primary and secondary source materials. The final product should be a substantial scholarly paper suitable for presentation at a professional conference or submission for publication in a scholarly journal. |

HONR330401
Honors Seminar: Twentieth Century Traditions | COHEN, MARTIN | Fall 2020
This is a continuation of the Western Cultural Tradition course into the twentieth century, and it is required of all Honors Program juniors. The course describes what happened to the tradition in the twentieth century, how it got criticized and rethought, and how it absorbed new forms of knowledge and new points of view. The first
semester deals with the period up to World War II and focuses on both the excitement engendered by the cultural movement called Modernism and the darker forces that accompanied it. The second semester of this course deals with the key cultural issues of the latter half of the century, especially those grouped under the heading of Postmodernity. Here the focus will be on the fundamental critique of the tradition posed by post-structuralist cultural theories, feminism, deconstructionism, the communications revolution, changing views of non-Western cultures, and new perspectives centering on race, ethnicity, and gender. The crucial question to be addressed is whether, and on what terms, it is possible to construct a reliable identity and an adequate basis for moral choice and political action.

HONR493301
Autobiographical Novel/Memoir
MICHALCZYZK, SUSAN A
Fall 2020
This seminar will focus upon the genre of autobiography, its origins and evolution and the resulting variations that have emerged from the traditional concept, as established by Augustine’s Confessions. Moving from the fundamentals of the genre, as defined in Gudorf's essay on the pact between author and reader, our pattern will be a comparative study of texts such as Bronte’s Wuthering Heights, Svevo's The Conscience of Zeno, Goethe's Sorrows of Young Werther and Akhtarová’s Requiem as well as more contemporary texts including Dubus and Munro. In addition to careful analysis of selected texts, we will explore Olney’s essays on autobiography.

Through the Mirror of the Western Cultural Tradition
EPSTEIN, THOMAS
Fall 2020
This Senior Seminar will explore the challenge, problem, and opportunity presented by the Other in the modern Western Cultural Tradition. Beginning with Daniel Defoe's epochal self-affirmation of modern Western Man, Robinson Crusoe, we will follow with two masterpieces of contemporary fiction that treat the same “myth” (Coetzee’s “Foe” and Tounier’s “Friday”). Next we'll sample Flannery O'Connor's work, itself imbued with questions of self and other, and essays by Emmanuel Levinas. Finally a series of brief novels on our theme (from Dostoevsky, Kerouac, Camus, and Daudet) before ending with Claudia Rankine’s book of poems, An American Lyric.

The Cost of Free Speech
BAYLES, MARTHA
Fall 2020
The course will focus on the challenge of preserving the Western ideal of free speech in a world where democratic governments seem paralyzed by political and cultural polarization; powerful tech companies have become unwilling content regulators; and authoritarian regimes deploy digital technology for surveillance, censorship, and propaganda. The goal is to help students situate the classic debate over free speech in both the contemporary landscape and the broader historical context.

HONR493201
Americans, Ugly and Beautiful
BAYLES, MARTHA
Spring 2021
This course is not about "hard power," meaning coercive military or economic action. Instead, it is about "soft power," meaning attraction, persuasion, the power of example. Despite today's decline, America's image and influence still permeate the world, conveyed through every media platform and taking such different forms as news reports, entertainment, face-to-face interactions, and "public diplomacy" (government efforts to cultivate goodwill among overseas populations). How did these different modes of communication work in the past? How should they work today? What messages should the people of the United States be sending to the 95 percent of humanity who are not American? What messages are we in fact sending? These questions will be explored historically, thematically, and by region.

Dante: Reflecting on Our Journey
MICHALCZYZK, SUSAN A
Spring 2021
The primary text will be Dante’s Commedia: Inferno, Purgatorio, Paradiso, translated by Hollander. With the understanding that most Honors Program students have had some experience reading Dante’s epic poem as freshmen, the seminar will be based upon the text while addressing broader topics such as government, religion, poetry, history and the like. There may be greater exploration of politics, philosophy, psychology, science, social structure within the context of medieval Florence, supported by additional texts, such as the Vita Nuova, De Monarchia (Dante’s works) and other works by various poets, religious figures from classical times through medieval including contemporary interpretations.

ITAL221301
Italian Conversation, Composition, and Reading

Fall 2020

The course topic, "Italian through Fiction and Films," allows development of oral and written language skills. Centered on the analysis of short stories and films related to contemporary Italian society, attention will be paid to analytical and textual enrichment. Other sources (articles from the Italian Press, audio-visual programs, and the Internet) will provide additional avenues of interpretation.

Comments: Conducted in Italian
Elective for major and minor in Italian. Satisfies Foreign Language Proficiency core requirement.
Status: OPEN

ITAL337301
Love, Sexuality, and Gender

Fall 2020

This course explores the modern conception of "romantic love" by examining its birth and development in prominent literary works (by men and women) of the Middle Ages and Renaissance. We will also investigate allied notions of sexuality, gender, and marriage, in both a heterosexual and same-sex ("homosexual") context. For contrast and comparison, the course begins with a study of the Bible and ancient Greek and Roman texts and ends with a look at the depiction of our themes in contemporary cinema as well as a discussion of the current debate in American society over the nature and purpose of marriage.

Credits: 03
Room and Schedule: T TH 12*, ONLINE; SYNCHRONOUS;
Satisfies Core Requirement: Literature
Prerequisites: None; Corequisites: None; Cross-listed with: None; Frequency: Periodically
Student Level: UNDERGRAD ELECT

ITAL551501
I Racconti delle Donne/Short Stories by Women

Fall 2020

How do women narrate the complexity of the lives they lead? Is the woman's voice distinctive in literature? We will read a series of short stories written in the twentieth and twenty-first centuries, almost all by Italian writers, and focus on common themes including women's identity, self-empowerment and the evolution of feminist ideas, and aesthetic questions like the author's distinctive use of language. The second objective of the course is to improve the Italian reading, writing, and speaking skills of all class members. Course conducted in Italian.

ITAL881001
Lyric Poetry from Giacomo da Lentini to Petrarch

Fall 2020

This seminar will survey Italian lyric poetry, the most dynamic and prestigious genre of the medieval period in which the literary language was being formulated. The course will cover the development of lyric poetry from the thirteenth-century Scuola Siciliana to the sixteenth-century petrarchist, but the principal focus of the course is the Canzoniere of Francesco Petrarca. Discussions will include orality and manuscript/print transmission of poetry, the complex relation of the individual poet to the tradition, the theory of imitation, and literary Neoplatonism.

ITAL885501
Italian Authorial Cinema

Fall 2020

This course will offer graduate students the opportunity to explore directors, films, and movements of Italian cinema from Postwar to the New Millennium. A central focus will be the definition of authorship in the study of Italian cinema. From Neorealism to "Italian Style," from the art films of the 1960s to contemporary experimentation, Italian directors have shaped the Italian cinematic universe and consolidated its relevance worldwide. The ultimate goal is to provide graduate students with the critical tools to analyze cinema and acquire methods for both teaching and writing on this subject.

ITAL100401
Elementary Italian II

Spring 2021

This course is a continuation of ITAL1003 and further develops the goals of the first semester. Special attention is given to this production of more complex speech, the expression of personal opinion, and a deeper knowledge of contemporary Italian culture. More formal writing exercises and reading of authentic texts aid students in reinforcing language skills. A group final project at the end of the course attempts to bring together the themes and experiences from previous study.

ITAL100402
Elementary Italian II

Spring 2021

This course is a continuation of ITAL1003 and further develops the goals of the first semester. Special attention is given to this production of more complex speech, the expression of personal opinion, and a deeper knowledge of contemporary Italian culture. More formal writing exercises and reading of authentic texts aid students in reinforcing language skills. A group final project at the end of the course attempts to bring together the themes and experiences from previous study.

ITAL232101  
Parma as a Microcosm of European History  
DACCI, ELISABETTA  
Spring 2021  
The goal of this course is to introduce students to the main phases of the history of Parma in the general context of the Italian and European History. Main topics to be discussed in a chronological order: the features of Parma as typical Roman colony; the agricultural production of Roman Parma; what’s typical of the Po Valley and what’s distinctive of Parma; the role of the bishops in Parma and in the Italian and European cities after the collapse of the Western Roman Empire; the political evolution of the Communes in North/Central Italy and Central Europe: a model confirmed by the case of Parma; the warfare against the emperor: the defeat of Frederick II in Parma (1248); the struggle for the power between the noble families during the Middle Ages; the intervention of the famous Italian noble families in the political situation of Parma: the Visconti, the Sforza and the Farnese; the intervention of Charles V: the marriage between his daughter Margaret (Margherita) and the Duke Ottavio and the war of Parma; Italy and the Duchy of Parma as pawns on the international checkboard: the Bourbons, Napoleon, and the Hapsburgs; the cultural improvements in Parma during the Bourbons; Europe and Italy after the Vienna congress: Maria Luigia of Hapsburgs: from Napoleon’s wife to beloved Duchess. Course to be taught by Director of Boston College Italia, Prof. Elisabetta Dacci.

ITAL881701  
Literature of Migration  
SHEPARD, LAURIE  
Spring 2021  
The course examines questions of identity in contemporary Italy through the lens of novels, short stories, and poems by first or second generation Italians. It focuses on the way in which patterns of migration have raised new questions about gender equality, and more generally on questions of the evolving Italian imaginary. The course also explores the importance of Italy’s colonial past to the understanding contemporary migration. The reading list includes Cristina Ali Farah, Gabriella Germandi, Pap Khounsia, Gabriella Kuruvilla, Amara Lakhou, Mihai Mirescu Butcovian, Ingy Mubiayi, Igiaba Scego, Segei, Younis Tawfi, and Laila Wadia.

International Studies Courses: Summer 2020

INTL225101
Food, Power, and Politics NAKAZATO, HIROSHI

Summer 2020
This course will seek to provide an intellectual and analytical-driven framework around the question of food as an integral part of any human experience, but particularly our experience with food through across cultures. We each have a unique opportunity to understand better the role of food in each of our lives as we move through this summer program by examining our own cultural and political assumptions and those of others from a new point of view. We can appreciate the lenses brought by other individuals, cultures and places to the acts of eating and producing food. Finally, we can express the human experience of food in ways that represent our understandings, experiences and vision for a healthy, just and pleasurable relationship to food in ways that can be shared and appreciated by others. In eating and producing food, we exist simultaneously in a deeply personal and communal place, a place of the present, past and future in which we are never more and less than human.

International Studies Courses: Fall 2020

INTL122101
Reflections on Being Abroad GOZIK, NICK J

Fall 2020
This on-line course is designed for students of all majors who are currently abroad and are committed to reflecting more deeply on their study abroad experience. The course permits students to consider where they are in life, what they hope to gain from their time abroad, and how their current experiences may shape their future personal, academic, and professional trajectories. The course also trains students to observe and document the culture(s) in which they are studying, and in turn to produce an interactive, mixed media presentation, which captures one aspect of their host setting. From the course, students will gain valuable insight and skills which will benefit them well beyond their study abroad experience.

Credits: 02

Room and Schedule: BY ARRANGEMENT; ONLINE COURSE;
Satisfies Core Requirement: None

Prerequisites: None

Corequisites: Open to students studying abroad during the current semester.

Comments: Students wishing to take this course should contact the Office of International Programs. OIP will register students later in the semester once abroad status has been verified (students must be studying at a BC sponsored program). OIP will keep a spreadsheet of students who wish to take this course. Once a student's abroad status has been verified, he or she will be notified if they have been granted a spot in the course.
This course offers a critical look at the history of the Internet and the ways in which online communication technologies are shaping our world. Merging conceptual approaches from the disciplines of cultural studies, globalization theory and international relations, the class will consider the role that new media is playing in shaping the art, entertainment, politics and economics of the new century. Case studies will include close looks at websites such Twitter, Facebook, World of Warcraft, Match.com and Alibaba.com, as well as considerations of social movements such as Occupy Wall St. and the Arab Spring.

INTL227403
Development Economics
JOGLEKAR, DEEPAK
Fall 2020
This course considers what we know about developing countries, and applies economic theory to help us understand the constraints of poverty. We will describe the economies of less developed countries and the lives of the poor, focusing on changes in poverty, inequality, demography, and health. We will consider theories and evidence for why some countries are rich and others poor. We will examine how land, labor, and credit markets function in poor countries and communities, and the consequences for health, education, and child labor. We will consider migration and its consequences and will discuss aid and international institutions.

INTL231001
The U.S. Intelligence Community in the Trump Era
CARLE, GLENN L
Fall 2020
What has been the shape and mission of the U.S. Intelligence Community since 9/11, and what will it confront in the Trump era and beyond? Terrorism has defined the U.S. Intelligence Community for twenty years. Now, an irredentist Russia, the explosion of cyber threats, a rising China, and persisting concerns about nuclear proliferation will all challenge the U.S. Intelligence Community, as the Pax Americana as Donald Trump engages in an historic retreat of the United States from its role as driver of multilateral norms--and undermines the credibility of the Intelligence Community itself. This course will examine how the U.S. Intelligence Community's mission and structures have changed to meet national security threats, and the challenges it will face during the Trump administration and beyond.

Transitions in Europe: The Comparative Politics of Identity, Populism, and Migration
MOLLES, ELITSA V
Fall 2020
Have all European polities and societies become liberal after post-communist transitions? How have populist parties across the continent transformed discourses, politics, and individual identities? How do race and exclusion of ethnic, religious, or other minorities figure into Europeans' everyday lives? How has migration uprooted social realities across Europe? The course will answer these questions and more through a mix of theoretical texts, current case studies, and non-academic sources.

### Comparative Constitutional Law: Latin America

**MACCLURE BRINTRUP, LUCAS**

**Fall 2020**

This course explores how constitutions protect human rights and shape political power in Latin America. It examines the constitutional law and history of Brazil, Chile, Colombia, Mexico, and Venezuela while comparing them with the American constitutional system. Additional cases may be studied in light of student interest.

Topics covered include (1) the making and amendment of constitutions, (2) elections, (3) authoritarianism and the rise of populist leaders, (4) executive power and its relationship to legislatures, (5) federalism, (6) the judiciary, and (7) constitutional rights, including freedom of speech, rights to life and sexual autonomy, data privacy, and socio-economic rights.

### World Politics: Conflict and Cooperation

**MOLLES, ELITSA V**

**Fall 2020**

This course examines the principle sources of the behavior of countries in international politics, including the nature of the international system and the decision-making process within states. It examines such issues as the sources of power, the causes and implications of the security dilemma, the dynamics of alliances, the causes of war, international political economy, and the dilemmas of world order.

### Religion and Contemporary Terrorism

**MCRBRIDE, MEGAN K**

**Fall 2020**

Since 9/11 there has been a radical increase in attention to what is casually referred to as religious terrorism. In most cases, the phrase is used to refer to the Islamist terrorism of non-state actors (e.g., Al Qaeda, ISIS, and Boko Haram), but there are other cases (e.g., Anders Breivik's counterjihad violence and Hezbollah's anti-Israeli violence) that might also fit the label. This course considers the relationship between religion and contemporary terrorism by looking at a wide variety of cases and asking: Why do we describe some terrorism as religious? How can we meaningfully separate religious terrorism from secular terrorism? Does it matter if we do so? How do stereotypes about religion and race influence our understanding of these movements and events? And do we even need to talk about religion in order to understand these cases?

### Colonial Korea and its Legacies

**HWANG, INGU**

**Fall 2020**

This course explores Korea's experience under Japanese colonial rule (1910-1945) as well as how this experience was remembered and represented in the post-colonial era. Students will explore the three phases of Japanese rule: military rule (1910-1919); cultural rule (1919-1931), and wartime mobilization (1931-1945) and how each of these phases have shaped and continue to shape Korean national identity and politics, socioeconomic development, and memory culture.

The course draws on historical and literary texts as well as film and other visual sources. This course combines lecture with active student discussion and presentations.

### Industrialization and Democratization in Korea

**HWANG, INGU**

**Fall 2020**

This introductory course surveys the political and economic transformation of South Korea from decolonization through the high growth era to today's global neo-liberal age. It traces how a war-ravaged country became a prosperous and industrialized nation. In exploring this transformation, it also examines the relationship between Korea's industrialization and its democratization: How did U.S. Cold War modernization impact the Korean state's economic strategy and its political development? Why and how did Korean society campaign for social and political justice during the economic high growth era? The course also considers the reconfiguration of South Korea's political economy since the 1990s.

### Development and Social Justice in Korea

**HWANG, INGU**

**Fall 2020**

This course introduces students to the political and economic changes that South Korea experienced from the 1960s to the present and explores how these changes contributed to social unrest, to demands for greater democracy, and to other social justice issues. In doing so, it will address how South Korea's economic and political trajectory was informed by pressures at the international, national, and sub-national level and compare the South Korean case to that of other Asian nations.

### Bodies Politic

**WILLARD, MARA E**

**Fall 2020**

By approaching power politics through a series of studies of lived experience around the globe, this course for students in the international studies major resets modern renditions of international relations. We begin with close studies of specific human worlds, using historical fiction and films to gain textured appreciation of particularities of the demands of religions and cultures around the globe. From close studies of "private" worlds, and themes of coming of-age, partnering, and parenting, students will consider how some lives are burdened more heavily by the weights of social, political, and economic governance. Students will learn to parse the ethical challenges and connections between ideals for human thriving and ethics of the rule of law, state sovereignty, international borders, and military intervention. Completion of Core requirements in philosophy and comfort with English-language reading and writing encouraged for enrollment.

INTL337201
International Finance MCHUGH, CHRISTOPHER
Fall 2020
International financial markets, international trade and balance of payments issues will be studied by using analytical models of the open economy. Topics of particular interests are exchange rate determination, capital flows, trade flows, and other international linkages between economies. The course will apply the analytical tools of international economics to address macroeconomic aspects of current policy issues such as the global impact of the financial crisis, exchange rate policy, sovereign debt crises, and persistent trade deficits and international indebtedness.

Divided Korea HWANG, INGU
Fall 2020
The Korean Peninsula has remained one of the most internationally contested areas since its division in 1945. Using a combined chronological and thematic approach, this upper-division course delves into the local, regional, and global factors that contributed to this division and its perpetuation. The course addresses the political, economic, social, and cultural impact of this division on Koreans and on the world.

International Studies Senior Seminar WILLARD, MARA E
Fall 2020
Open only to Seniors majoring in International Studies. International Studies majors are required to complete a senior seminar if they are not writing a senior thesis. Senior seminars offer extended examinations of an interdisciplinary theme or topic in international studies, culminating in a substantial research project submitted at the end of the term. Each seminar is tailored to the specific interests and expertise of the IS faculty member who teaches it; for details on this semester’s seminar options, please see our web site under Academics, Major. Scroll to the bottom of the page for the course listings.

### International Studies Courses: Spring 2021

#### INTL221001
**Reflections on Being Abroad**
**GOZIK, NICK J**
**Spring 2021**
This on-line course is designed for students of all majors who are currently abroad and are committed to reflecting more deeply on their study abroad experience. The course permits students to consider where they are in life, what they hope to gain from their time abroad, and how their current experiences may shape their future personal, academic, and professional trajectories. The course also trains students to observe and document the culture(s) in which they are studying, and in turn to produce an interactive, mixed media presentation, which captures one aspect of their host setting. From the course, students will gain valuable insight and skills which will benefit them well beyond their study abroad experience.

**Credits:** 02  
**Room and Schedule:** BY ARRANGEMENT; ONLINE COURSE; **Satisfies Core Requirement:** None  
**Prerequisites:** None  
**Corequisites:** Open to students studying abroad during the current semester. **Cross-listed with:** None  
**Frequency:** Annually  
**Student Level:** UNDERGRAD ELECT  
**Comments:** Students wishing to take this course should contact the Office of International Programs. OIP will register students later in the semester once abroad status has been verified. OIP will keep a spreadsheet of students who wish to take this course. Once a student's abroad status has been verified, he or she will be notified if they have been granted a spot in the course.  
**Status:** OPEN

### Development Economics JOGLEKAR, DEEPAK

**Spring 2021**

This course considers what we know about developing countries, and applies economic theory to help us understand the constraints of poverty. We will describe the economies of less developed countries and the lives of the poor, focusing on changes in poverty, inequality, demography, and health. We will consider theories and evidence for why some countries are rich and others poor. We will examine how land, labor, and credit markets function in poor countries and communities, and the consequences for health, education, and child labor. We will consider migration and its consequences and will discuss aid and international institutions.

**Credits:** 04

**Room and Schedule:** DEVLIN HALL 009, T TH 1:30*

**Satisfies Core Requirement:** Cultural Diversity **Prerequisites:** ECON1131, ECON1132, and ECON1151

**Corequisites:** None

**Cross-listed with:** ECON2273

**Frequency:** Annually

**Student Level:** UNDERGRAD & GRAD

**Comments:** Not open to students who have completed ECON3374 or ECON3375. Fulfills cultural diversity core requirement.

INTL253101
Politics of Energy and Climate in the U.S. and International Perspective
DEESE, DAVID A
Spring 2021
Why is energy and climate policy fundamentally political, deeply entwined with human, national, and international security, and critical to global stability and well-being? Major course units assess the main actors and institutions in energy; including OPEC and international markets; contrast the primary challenges confronting energy policy in the exporting and importing states; evaluate the implications of climate disruption and the solutions across the sixty largest greenhouse gas emitting states; and analyze how energy and climate politics shapes global security and sustainability. Class members will also conduct a global climate negotiation and study in depth the regional security and political economy of the (Persian) Gulf states.

Political Geography and Geopolitics GRANT, ANDREW N
Spring 2021
This course provides an understanding of the fields of political geography and geopolitics, which are the study of how politics organizes space and how space influence politics. We will discuss key political geographic concepts including territory, sovereignty, borders, and place, and their history and changing relevance in the face of capitalist globalization and the transition from empires to nation-states. We will also explore three major facets of geopolitics: classic geopolitics, critical geopolitics, and urban geopolitics and their relevance in the contemporary world. Finally, we will explore geographies of peace and conflict and the rise of non-state actors and non-state sovereignty.

INTL263001
Religion, Race, and Political Violence MCBRIDE, MEGAN K
Spring 2021
The terms religion, race, and political violence are largely understood to be constructed and contested. There is no single definition for any of them, and so there is no single relationship that binds them together. However, there is no question that the three can often be found together, as even a cursory review of the historical record brings countless examples to mind. This course will interrogate the relationship(s) between religion, race, and political violence by exploring the theoretical literature through the lens of mostly contemporary case studies. In exploring these cases, the course will ask: How are religion, race, and political violence related? How do stereotypes about religion and race (and perhaps also violence) influence our understanding of these relationships? What are the consequences of invoking religion and/or race in these conflicts? Who decides when political violence is religious or racial? Do we even need to talk about religion or race to understand this violence? And if so, how might we do so differently?

Colonial Pasts/Global Presents KENT, STACIE A
Spring 2021
While scholars of globalization often proclaim the novelty of the present, historians have become suspicious that deeper connections exist between globalized presents, and colonial pasts. In this course we will study a variety of colonial histories form the eighteenth and nineteenth centuries and investigate whether and in what ways that history remains with us today. Our examples will come from Euroamerican colonial empires, and topics will include commodity production and circulation, work regimes, labor migrations, gender and sex, development, science, medicine, and racial epistemologies.

INTL284001
Global China and the Belt and Road Initiative GRANT, ANDREW N
Spring 2021
China is increasingly a global player in international development, geopolitics, and soft power influence. This course will explore the history of Global China and its contemporary geographical reach in Asia, Africa, Europe, and the Americas. Touching upon topics including the ancient Silk Road, steppe empires and the tribute system, the century of national humiliation, the Belt and Road Initiative, sensitive borderlands, and issues of security and censorship, the course explores how China is reorienting global geographies. It asks: What about Chinese development is new? Does it pose a positive alternative to Western-led developmentalism? Why is China’s rise so controversial?

Colonial Korea and its Legacies HWANG, INGU  
Spring 2021  
This course explores Korea’s experience under Japanese colonial rule (1910-1945) as well as how this experience was remembered and represented in the post-colonial era. Students will explore the three phases of Japanese rule: military rule (1910-1919); cultural rule (1919-1931), and wartime mobilization (1931-1945) and how each of these phases have shaped and continue to shape Korean national identity and politics, socioeconomic development, and memory culture. The course draws on historical and literary texts as well as film and other visual sources. This course combines lecture with active student discussion and presentations.

Human Rights in East Asia HWANG, INGU  
Spring 2021  
This course introduces students to the post-1945 development of global human rights talk, activism, and politics from an East Asian perspective. Through an examination of specific conflicts over self-determination and sovereignty, economic development and disparity, democratization, the legacies of decolonization, and global justice and environment, the course delves into how and why actors in China, Japan, Hong Kong, Taiwan, South Korea, and North Korea translated local struggles into international human rights agendas that gained attention on the global stage. In exploring this process of translation and appropriation, we will also analyze how these local conflicts transformed international human rights issues.

INTL337501  
Economic Growth and Development GUERRON, PABLO A  
Spring 2021  
This course introduces students to Economic Growth. Our starting point is the question of why societies did not experience economic growth for most of human history. Indeed, growth is a very recent economic concept dating back to the eighteenth century. We will then study what drives growth. Examples include the introduction of electricity, telephone, and airplanes. In general, we will study how technology, capital accumulation, human capital, and innovation helped humanity to increase its wellbeing. Finally we will cover the impact of growth on our lives. For example, how life expectancy has changed over the past century.

INTL337601  
International Economic Relations ANDERSON, JAMES  
Spring 2021  
This course introduces the study of economic relations among countries. It combines material contained in ECON3371 and ECON3372, and substitutes for both those courses. Primarily designed for international studies majors, it is also appropriate for economics and other social science majors, with the proviso that the comprehensive coverage of the course implies that the workload is heavy and expectations for students are high. Topics include the determinants of trade in goods, services, and capital; the economic policies that nations use to influence such trade; the theory and practice of international macroeconomics; and problems of coordinating macroeconomic policies among countries. The course features the usefulness (and limitations) of game theory for explaining international economic interactions.

Islamic Civilization and Societies Courses: Fall 2020
ICSP119901
Islamic Civilization DIPASQUALE, DAVID M
Fall 2020
This course introduces the varieties of Islamic civilization from the seventh century to the modern world. It explores not only the tenets of faith and practice, and political, social, theological, and economic history, but also considers Muslim cultural and intellectual contributions, including by women, from Indonesia to Morocco and in the Western world. Students will read primary sources, listen to recordings, and view films. The course will emphasize the variety of experiences of Muslims and their contributions to the world.

ICSP261500
Islam and Liberal Democracy DIPASQUALE, DAVID M
Fall 2020
We will take advantage of current geopolitical controversies in order to unearth the theoretical core of the debate between Islam and the West. Materials related to the Islamic heritage will be placed next to arguments made on behalf of the West in relation to certain key issues, such as rights versus duties; religion and freedom; and democracy and progress. Modern, pre-modern, sacred, and secular texts will be studied. How can the secular world defend itself against a critique that begins from a position of faith and emphasizes virtue, God, and justice?

ICSP332801
Islam and the Iberian Peninsula GOIZUETA, ELIZABETH T
Fall 2020
This course will examine the relationship between cultures in the Euro-Arab context from both historical and contemporary perspectives. It will begin with an examination of the historical influence of Islam in the Iberian Peninsula from the eighth to the fifteenth centuries. During that period, Spain presented an example of religious tolerance and the place where the followers of the three Abrahamic religions lived, arguably, in harmony with one another. Against this background, the course will explore the interactions and mutual influences between the Iberian and the Islamic cultures from the Middle Ages to the present.

ICSP263801 Islamic Political Philosophy DIPASQUALE, DAVID M Spring 2021
What is the relationship between philosophy and Islam? Does the divine law (Shari'a) need to be supplemented with purely rational reflections on the nature and purpose of political life? What is the place of toleration and individual rights in the Islamic legal and philosophic tradition? We will explore these and similar questions by focusing on two particularly fertile periods of Islamic thought: the encounter of Islam with Greek philosophy in the classical period and its encounter with the modern secular west in late modernity.

ICSP331001 Women and Gender in Islam DELONG-BAS, NATANIA J Spring 2021
This course explores women and gender roles in Islamic history, civilization, and societies, beginning with the pre-Islamic period and continuing through the present. The goal is to present women and women's issues as central to the main narrative of Islamic history, rather than as a side story. This course explores questions related to both historical and contemporary religious interpretation and practice, Sunni, Shia and Sufi, as well as the impact of religion and gender constructs on women's access to the public sphere, positions of leadership, and legal status.

ICSP399901 Politics of Modern Middle Eastern Art ALQASIMI, SULTAN S Spring 2021
In this course, we shall survey the political underpinnings of Arab art in the twentieth century, and the socio-political conditions that shaped cultural production in the region. Whether it is under the Ba'athist regimes of Syria and Iraq or under Egypt's pan-Arabism championed by Gamal Abdel Nasser, painting and sculpture in addition to film and performance have been employed by various governments as a tool of soft power to propagate their policies to the public not only in their respective states but throughout the region and beyond. Despite this widespread government patronage of the arts, many artists have chosen to challenge their authorities through subversive movements and practices, which we will address at different moments in the semester. This course, through its focus on creative practices and strategic use of the arts, will attempt to shed light on an often neglected dimension of the modern history of the Arab World and other parts of the Middle East.

ICSP433701 Silk Roads: Religions and Cultures ASHUROV, BARAKATULLO Spring 2021
This course introduces the history of the Silk Road--a complex network of trade routes that connected China with the rest of the Eurasian continent over land and sea—and its role in fostering cultural and material exchanges between the people groups it connected. The chronology of the course covers the period between 500 BCE and 1500 CE, during which the Silk Road contributed to the forming and transforming the cultural, ethnic, and religious identities of different peoples inhabiting the vast area that came to be known as the Silk Road Corridors. The course moreover explores topics, including conspicuous consumption, cultural diversity, religious and linguistic pluralism by introducing art and archaeological and textual sources.

Jesuit Studies Courses: Summer 2020

JESU715701

In the Footsteps of Leaders BEAUMIER, CASEY

Summer 2020

This course considers the distinctive methods of Jesuit leadership by situating them in their historical and geographic context. The course begins with ten days of experiential learning in Spain and Rome where students immerse themselves in the key places that became the roots of the Society of Jesus using primary sources to critically examine the decisions and actions of the early Jesuits. The course continues at Boston College with lectures, discussions, and case-study analyses moderated by distinguished leaders of Jesuit apostolates. Students will consider contemporary topics such as the challenges and opportunities experienced by administrators and teachers at secondary and higher-education schools. Coursework features selected readings, workshops, and projects to be completed in small groups. Through this course, students will gain an understanding of the Jesuits’ early vision of leadership and of the ways that vision has both changed and remained constant.

Jesuit Studies Courses: Fall 2020

JESU713101

Social Justice in Jesuit Contexts CASALINI, CRISTIANO

Fall 2020

The Social Apostle of the Society of Jesus has developed in a variety of ways over the centuries according to the diverse contexts where Jesuits have operated as agents of “social justice.” This class offers students both a broad and deep understanding of: (1) How the Society of Jesus developed its mission in support of creating a “preferential option for the poor”; (2) How the Society understood its role to promote liberation from oppression in diverse social environments; (3) What kind of services have been activated by the Society of Jesus in order to fulfill its core values of “the service of faith and promotion of justice”; and (4) How social justice is pursued through pedagogy and practices by Jesuit and Ignatian schools today, given the significant involvement of the Jesuits with formal education on a global scale. The course is designed to foster a deep and meaningful conversation among students. It will include individual and collective readings and video-conferences with leaders and teachers of Jesuit schools around the world, deepening students’ knowledge of current practices and stimulating dialogue.

Journalism Courses: Summer 2020

JOUR201601

Reporting Civil Rights ARDS, ANGELA

Summer 2020

This course explores first-hand accounts from the front lines of movements to advance social justice, from the abolitionist and anti-lynching campaigns of the nineteenth century and those that toppled Jim Crow, to broader issues such as prisons and poverty, immigration and education. Students will develop their knowledge of civil rights reporting history in the U.S. gain skills and practices, and learn how to apply all three in reporting and writing in core beat areas.

JESU715801

Jesuit Pedagogy

Fall 2021

A study of the spiritual doctrine of St. Ignatius Loyola as articulated in the text of the Spiritual Exercises, but with reference to other texts such as Ignatius’ Testament, letters, and the Constitutions of the Society of Jesus. The focus is how Ignatius’ treatment of prayer, discernment of spirits, and discernment of God’s will, work together to form a “contemplative in action.”

Status: OPEN
This course will engage with modern and contemporary examples of so-called "long form" journalistic narratives (essays, books, and perhaps an example of graphic journalism) that, by applying literary techniques to nonfiction, tell us a story about contemporary social life.

Discussing matters of literary form and technique as well as journalistic norms, we will cover nonfiction texts that address both social conditions on the home front (inequality, Wall Street adventurism, street crime, race relations, police culture) and international conflicts (including war and terrorism), generally (but not always) involving the U.S. Writers covered will include figures such as Michael Lewis, Joan Didion, George Packer, William Finnegan, Suki Kim, Isabel Wilkerson, Geraldine Brooks, Mike Davis, Alex Kotlowitz, John Hersey, Anne Fadiman and others. This is a CRITICAL course.

Fall 2020
This class takes a close look at the practice and tradition of food journalism, introducing students to narrative techniques, elements of reporting, and works that have shaped the genre. Students will learn how to avoid the clichés and traps of food writing and to develop original, persuasive, surprising ideas about food and the culture of eating. Issues of voice, scene, social observation, and dramatic structure are addressed, with additional attention paid to crafting and pitching articles. Readings will include works by early practitioners like A. J. Liebling and M.F.K. Fisher and contemporary writings by Gabrielle Hamilton, Frank Bruni, David Foster Wallace, and others.

Credits: 03

JOUR225401
The Role of Class in U.S. Journalism MURPHY, CARLA M
Fall 2020
In our era of expanded economic inequality, this course explores the role of 'class' in U.S. journalism. How does 'class' both shape and signal coverage "for" versus "about" a community-- and how does this affect journalism's function in our representative democracy? This writing-intensive course has two additional objectives: foster awareness of how our own class positions may shape and inform our reporting and promote a critical understanding of the role of 'class' in journalism. We will cover a range of texts (scholarship; literature; screenplays; videos; art) and journalistic writing, with occasional class visits by journalism practitioners.

JOUR494201
Senior Seminar ROTELLA, CARLO
Fall 2020
This required course for senior Journalism minors is a blend of seminar and workshop. In it, students work at the craft of journalism by covering stories and also step back to analyze the work of professional journalists. Overall, the semester, each student chooses a particular subject area on which to concentrate and assembles a body of work that could be submitted to a prospective employer or graduate school. This portfolio might include examples of his or her own journalism, as well as critical assessments of stories, publications, and the news industry. Admission by permission of program.

JOUR21001
The Business of Journalism DAHL, DAVID K
Spring 2021
This course will help students to become literate in the business of journalism and the changes underway in the profession. Discussing the history of mainstream news organizations and new business models brought by the digital revolution, we consider how questions of audience, revenue, and platform shape the rapidly changing news business. We live in an age of new money, new platforms, and new ways of telling stories, but also an age in which many journalism jobs have disappeared. The opportunities unleashed by these changes are helping to create the most exciting period ever for journalism. We need to know how and why these changes have occurred.

Credits: 03
Room and Schedule: FULTON HALL 260; Satisfies Core Requirement: None; Prerequisites: None Corequisites: None Cross-listed with: None Frequency: Annually; Student Level: UNDERGRAD ELECT
Comments: This is a CRITICAL course. Status: CLOSED

JOUR222001
Introduction to Journalism MARCUS, JON P
Spring 2021
Organized like a professional newsroom, this course will give students interested in journalism a taste of its various facets, including topic-generation, reporting, interviewing, and editing, for print, broadcast, and online media. It will cover basic newswriting, beat reporting, investigative journalism, feature writing, and writing for the web, and provide an introduction to media law and ethics and the business and history of journalism. Students will produce a feature-length final project and will also work in teams to formulate, report, and write investigative stories. Student should expect to meet deadlines and high standards of grammar, style, punctuation, and factual accuracy.

Credits: 03
Room and Schedule: GASSON HALL 205,M W F 11; Satisfies Core Requirement: None Corequisites: None Cross-listed with: None Frequency: Annually; Student Level: UNDERGRAD ELECT
Comments: Note to Journalism minors: this is a REQUIRED course. Students who have taken JOUR223301 "Advanced Journalism" CANNOT take this course.

JOUR21601
Reporting Civil Rights ARDS, ANGELA
Spring 2021
This course explores first-hand accounts from the front lines of movements to advance social justice, from the abolitionist and anti-lynching campaigns of the nineteenth century and those that toppled Jim Crow, to broader issues such as prisons and poverty, immigration and education. Students will develop their knowledge of civil rights reporting history in the U.S., gain skills and practices, and learn how to apply all these in reporting and writing in core beat areas.

Credits: 03
Room and Schedule: GASSON HALL 205,M W F 11; Satisfies Core Requirement: None Corequisites: None Cross-listed with: COMM4452; Frequency: Annually; Student Level: UNDERGRAD ELECT

JOUR222501
Journalism and New Media JOHNSTON, MAURA K
Spring 2021
The rise of the internet as a news delivery system has changed the face of the news business, for better or worse, in the twenty-first century. This one semester seminar will trace the history of new media’s relationship with journalism while preparing students for the leaner online world. Students will learn about practical matters (storytelling for the web, condensing complex narratives into 140-character missives) while grappling with larger concerns affecting the industry and readers (traffic-based journalism, slippery sourcing) as they report and write on the world around them.

<td>Writing About Popular Music</td>
<td>JOHNSTON, MAURA K</td>
<td>Reporting on popular music is a keenly effective way to take a snapshot of culture as it's happening. In this discussion-intensive class, students will get hands-on tips on how to write about music effectively, hone their critical thinking skills, and examine the ways that the business struggles experienced by both music and publishing have affected the way pop writing is disseminated and consumed. Guest speakers from the music writing world will provide further insights on their career paths, their views on where music is now, and the artists and songs that stole their passion.</td>

</table>
Traveling can be one of life's more rewarding experiences, and for writers it can supply an inexhaustible trove of material. But the appeal of the genre—who wouldn't want to take an all-expenses-paid trip to Fiji's finest eco-resorts?—can also be its biggest crutch. With few exceptions, travel stories today merely recast the excruciating details of five-star hotels, hairy-chested masseurs, and the salutary effects of jalapeno margaritas. This class aims to show students ways to write about travel deeply and intelligently, with the hope of developing clear, informed opinions on the subject they’re writing about (and not merely "covering"). Readings will include works by Hunter S. Thompson, Geoff Dyer, Sloane Crosley, and others.

LING336101
Psycholinguistics THOMAS, MARGARET
Fall 2020
An exploration, from a linguistic perspective, of some classic issues at the interface of language and mind. Topics include the production, perception, and processing of speech; the organization of language in the human brain; the psychological reality of grammatical models; animal communication; the acquisition of language by both children and by adults; and the innateness hypothesis.

Credits: 03
Room and Schedule: LYONS HALL 207, T TH 10 30*; HYBRID;
Satisfies Core Requirement: None
Prerequisites: Some background in linguistics or psychology recommended.
Corequisites: None
An examination of how we use language to regulate power relations among social
language and ethnicity in the United States, viewed in cross-cultural perspective.

Linguistics Courses: Spring 2021

**LING323201**
The Linguistic Structure of English CONNOLLY, MICHAEL J
Spring 2021
An analysis of the major features of contemporary English with some reference to
earlier versions of the language, including sound system, grammar, structure and
meanings of words, and properties of discourse.

**LING332701**
The Linguistic Structure of Chinese ZHANG, MAN
Spring 2021
An analysis of the major features of modern Chinese with some reference to dialects
and earlier versions of the language: sound system, grammar, structure and meanings
of words, syntax, and properties of discourse.

**LING335601**
Classics in Linguistics THOMAS, MARGARET
Spring 2021
Supervised readings, reports, and discussions on formatative and important works in the
development of linguistic thought from the ancient world up through modern linguistic
trends. Readings are chosen with partial consideration of students' research
interests.

**LING433001**
Foreign Language Pedagogy JAVEL, ANDREA M
Fall 2020
A course of directed study on topics in linguistics intended solely for students who
have exhausted present course offerings or are doing thesis work on advanced topics.
The precise subject matter is determined by arrangement and need.

MATH110101
Calculus II DEPARTMENT
Summer 2020
MATH1101 is a second course in the calculus of one variable intended for biology, computer science, economics, management, and premedical students. It is open to others who are qualified and desire a more rigorous mathematics course at the core level. Topics include an overview of integration, basic techniques for integration, a variety of applications of integration, and an introduction to (systems of) differential equations.

Credits: 03
Room and Schedule: JUN 19 - AUG 20;
Satisfies Core Requirement: Mathematics
Prerequisites: MATH1100.
Corequisites: MATH1141. (Or MATH1142, etc., depending on section of MATH1101 taken.)
Cross-listed with: None
Frequency: Annually
Student Level: CORE
Comments: MATH1101 is not open to students who have completed MATH1103 or MATH1105. Students contemplating majors in Chemistry, Computer Science/B.S., Environmental Geosciences, Geological Sciences, Mathematics or Physics should enroll in either MATH1103 (Spring) or MATH1105 (Fall).
Status: CANCELLED

MATH221001
Linear Algebra WOLF, JAMISON B
Summer 2020
This course is an introduction to the techniques of linear algebra in Euclidean space. Topics covered include matrices, determinants, systems of linear equations, vectors in n-dimensional space, complex numbers, and eigenvalues. The course is required of mathematics majors and is also suitable for students in the social sciences, natural sciences, and management.

Credits: 03

Doctoral Continuation CHEN, DAWEI
Summer 2020
All students who have been admitted to candidacy for the Ph.D. degree are required to
register and pay the fee (tuition credits can be used for this) for doctoral continuation
during each semester of their candidacy when they are taking no other courses.
Doctoral Continuation requires a commitment of at least 20 hours per week working on
the dissertation.

Mathematics Courses: Fall 2020
MATH100201
Functions and Differential Calculus GOLDSTEIN, ELLEN J
Fall 2020
This course is intended for students who are required to take Calculus I (either
MATH1100 or MATH1102) but whose backgrounds necessitate additional preparation.
Topics include the real line and coordinate plane; linear and quadratic functions;
higher degree polynomials and rational functions; trigonometry, emphasizing
trigonometric functions; and exponential and logarithmic functions. Note: This course
does not satisfy the University Core Requirement in Mathematics. Department
permission is required: see the Assistant Chair for Undergraduates.

MATH100401
### Finite Probability and Applications CLOTÉ, MARIE
**Fall 2020**
This course, for students in the humanities, the social sciences, School of Education, and School of Nursing, is an introduction to finite combinatorics and probability, emphasizing applications. Topics include finite sets and partitions, enumeration, probability, expectation, and random variables.
**Credits:** 03
**Room and Schedule:** M W F 9; ONLINE; SYNCHRONOUS; Satisfies Core Requirement: Mathematics
**Corequisites:** None
**Comments:** Not open to students who have completed their Mathematics Core Curriculum Requirement without permission of the Department Chairperson (except for Psychology majors completing their second mathematics corequisite).
**Status:** OPEN

MATH110004
Calculus I
HULSE, THOMAS A
Fall 2020
MATH1100 is a first course in the calculus of one variable intended for biology, computer science, economics, management, and premedical students. It is open to others who are qualified and desire a more rigorous mathematics course at the core level. Topics include a brief review of polynomials and trigonometric, exponential, and logarithmic functions, followed by discussion of limits, derivatives, and applications of differential calculus to real-world problem areas. The course concludes with an introduction to integration.

Credits: 04
Room and Schedule: M W F 9:40-7:30;ONLINE;SYNCHRONOUS;
Satisfies Core Requirement: Mathematics
Prerequisites: Trigonometry.
Corequisites: MATH1101. (Or MATH1122, etc., depending on which section of MATH1100 taken.)
Cross-listed with: ADMT1901 Frequency: Annually Student Level: CORE
Comments: MATH1100 is not open to students who have completed a calculus course at the college level. Students contemplating majors in Chemistry, Computer Science/B.S., Environmental Geosciences, Geological Sciences, Mathematics, or Physics should enroll in MATH1102. ADMT1901 section for BCE students only.
Status: OPEN

MARTIN, GAGE
Fall 2020
MATH1100 is a first course in the calculus of one variable intended for biology, computer science, economics, management, and premedical students. It is open to others who are qualified and desire a more rigorous mathematics course at the core level. Topics include a brief review of polynomials and trigonometric, exponential, and logarithmic functions, followed by discussion of limits, derivatives, and applications of differential calculus to real-world problem areas. The course concludes with an introduction to integration.

Credits: 04
Room and Schedule: M W F 1;M 6-7 30;ONLINE;SYNCHRONOUS;
Satisfies Core Requirement: Mathematics
Prerequisites: Trigonometry.
Corequisites: MATH1121. ( Or MATH1122, etc., depending on which section of MATH1100 taken.).
Cross-listed with: ADMT1901 Frequency: Annually Student Level: CORE Comments: MATH1100 is not open to students who have completed a calculus course at the college level. Students contemplating majors in Chemistry, Computer Science/B.S., Environmental Geosciences, Geological Sciences, Mathematics, or Physics should enroll in MATH1102. ADMT1901 section for BCE students only.
Status: OPEN

MATH110019
Calculus I
REINOOS, BRAEDEN A
Fall 2020
MATH1100 is a first course in the calculus of one variable intended for biology, computer science, economics, management, and premedical students. It is open to others who are qualified and desire a more rigorous mathematics course at the core level. **MATH119001**  
Fundamentals of Mathematics I ROGERS, CARSON S  
Fall 2020  
MATH1190-1191 is a course sequence designed for those who plan to teach mathematics in grades K-8. The emphasis is on building conceptual understanding of the mathematics present in the emerging K-8 curriculum and on deepening content knowledge. Number and number systems through the real number system will be studied; functions and the structure of algebra will be developed. Problem solving and reasoning, applications and making connections will be featured.  
Credits: 03  
Room and Schedule: CARNEY HALL 005,M W F 12;HYBRID; Satisfies Core  
Requirement: Mathematics Prerequisites: None  
Corequisites: None  
Cross-listed with: None

**MATH225203**
**MATH331001**

**Introduction to Abstract Algebra LEHMANN, BRIAN T**

**Fall 2020**

This course studies four fundamental algebraic structures: groups, including subgroups, cyclic groups, permutations groups, symmetry groups, and Lagrange's Theorem; rings, including sub-rings, integral domains, and unique factorization domains; polynomials, including a discussion of unique factorization and methods for finding roots; and fields, introducing the basic ideas of field extensions and ruler and compass constructions.

**Credits:** 03  
**Room and Schedule:** GASSON HALL 202, TH 1; **Satisfies Core Requirement:**  
**Corequisites:** MATH2202. **Cross-listed with:** None  
**Frequency:** Annually  
**Status:** OPEN

**MATH331101**

**Algebra I MADAPUSI PERA, KEERTHI S**

**Fall 2020**

This course, with MATH3312, studies the basic structures of abstract algebra. Topics include groups, subgroups, factor groups, Lagrange's Theorem, the Sylow Theorems, rings, ideal theory, integral domains, field extensions, and Galois theory.

**Credits:** 03  
**Room and Schedule:** FULTON HALL 230, M W F 9; **Satisfies Core Requirement:**  
**Corequisites:** None  
**Cross-listed with:** None  
**Frequency:** Annually  
**Status:** OPEN

**MATH332001**

**Introduction to Analysis LINDSEY, KATHRYN A**

**Fall 2020**

This course gives students the theoretical foundations for the topics taught in Calculus. It covers algebraic and order properties of the real numbers, the least upper bound axiom, limits, continuity, differentiation, the Riemann integral, sequences, and series. Definitions and proofs will be stressed throughout the course.

**Credits:** 03  
**Room and Schedule:** GASSON HALL 205, M W F 30*; **Satisfies Core Requirement:**  
**Corequisites:** None  
**Cross-listed with:** None  
**Frequency:** Annually  
**Status:** OPEN

**MATH332101**

**Analysis I KEANE, WILLIAM J**

**Fall 2020**

This course, with MATH3322, studies the basic structure of the real numbers. Topics include the least upper bound principle, compactness of closed intervals (the Heine-Borel theorem), sequences, convergence, the Bolzano-Weierstrass theorem, continuous functions, boundedness and intermediate value theorems, uniform continuity, differentiable functions, the mean value theorem, construction of the Riemann integral, the fundamental theorem of calculus, sequences and series of functions, uniform convergence, the Weierstrass approximation theorem, special functions (exponential and trig), and Fourier series.

**Credits:** 03  
**Room and Schedule:** M W F 12; **Satisfies Core Requirement:**  
**Corequisites:** None  
**Cross-listed with:** None  
**Frequency:** Annually  
**Status:** OPEN

**MATH441001**

**Differential Equations JIN, XIN**

**Fall 2020**

This course is a junior-senior elective intended primarily for students interested in applications of mathematics. Topics include first order linear equations, higher order linear equations with constant coefficients, linear systems, qualitative analysis of nonlinear systems, and an introduction to stability and bifurcations.

**Credits:** 03  
**Room and Schedule:** GASSON HALL 202, M W F 9; **Satisfies Core Requirement:**  
**Corequisites:** None  
**Cross-listed with:** None  
**Frequency:** Annually  
**Status:** OPEN

**MATH442601**

**Probability GROSS, ROBERT**

**Fall 2020**

This course provides a general introduction to modern probability theory. Topics include probability spaces, discrete and continuous random variables, joint and conditional distributions, mathematical expectation, the central limit theorem, and the weak law of large numbers. Applications to real data will be stressed and we will use the computer to explore many concepts.

**Credits:** 03  
**Room and Schedule:** M W F 12; **Satisfies Core Requirement:**  
**Corequisites:** None  
**Cross-listed with:** None  
**Frequency:** Annually  
**Status:** OPEN

**MATH442602**

**Probability GROSS, ROBERT**

**Fall 2020**

This course provides a general introduction to modern probability theory. Topics include probability spaces, discrete and continuous random variables, joint and conditional distributions, mathematical expectation, the central limit theorem, and the weak law of large numbers. Applications to real data will be stressed and we will use the computer to explore many concepts.

Student Level: GRADUATE Comments: None
Status: CLOSED

MATH888006
Dissertation Research REEDER, MARK

Fall 2020
TBD
Credits: 01
Room and Schedule: BY ARRANGEMENT; Satisfies Core
Requirement: None Prerequisites: None
Corequisites: None Cross-listed with: None Frequency: Annually
Student Level: GRADUATE Comments: None
Status: CLOSED

MATH888901
Graduate Teaching Seminar I BELDING, JULIANA V
Fall 2020
This course is designed to support graduate students in their role as teaching assistants.
Credits: 01
Room and Schedule: None Satisfies Core
Requirement: None Prerequisites: None
Corequisites: None Cross-listed with: None Frequency: Annually
Student Level: GRADUATE Comments: None
Status: CANCELLED

MATH888905
Graduate Teaching Seminar I FRIEDBERG, SOLOMON
Fall 2020
This course is designed to support graduate students in their role as teaching assistants.
Credits: 01
Room and Schedule: None Satisfies Core
Requirement: None Prerequisites: None
Corequisites: None Cross-listed with: None Frequency: Annually
Student Level: GRADUATE Comments: None
Status: CANCELLED

MATH889101
Graduate Teaching Seminar II MEYERHOFF, G ROBERT
Fall 2020
This course is intended to assist graduate students as they make the transition to teaching fellows.
Credits: 03
Room and Schedule: BY ARRANGEMENT; Satisfies Core
Requirement: None Prerequisites: None
Corequisites: None Cross-listed with: None Frequency: Annually
Student Level: GRADUATE Comments: None
Status: CANCELLED

MATH888901
Readings and Research CHEN, DAWEI
Fall 2020
This is an independent study course, taken under the supervision of a Mathematics Department faculty member. Interested students should see the Director of the Graduate Program.
Credits: 03
Room and Schedule: By ARRANGEMENT; Satisfies Core
Requirement: None Prerequisites: With permission of the Department. Corequisites: None
Cross-listed with: None Frequency: Annually Student
Level: GRADUATE Comments: None
Status: OPEN

MATH888902
Readings and Research BALDWIN, JOHN A
Fall 2020
This is an independent study course, taken under the supervision of a Mathematics Department faculty member. Interested students should see the Director of the Graduate Program.
Credits: 03
Room and Schedule: BY ARRANGEMENT; Satisfies Core
Requirement: None Prerequisites: With permission of the Department. Corequisites: None
Cross-listed with: None Frequency: Annually Student
Level: GRADUATE Comments: None
Status: OPEN
Doctoral Continuation requires a commitment of at least 20 hours per week working on the dissertation. All students who have been admitted to candidacy for the Ph.D. degree are required to register and pay the fee (tuition credits can be used for this) for doctoral continuation during each semester of their candidacy when they are taking no other courses. Doctoral Continuation requires a commitment of at least 20 hours per week working on the dissertation.

Credits: 03
Room and Schedule: BY ARRANGEMENT; Satisfies Core Requirement: None Prerequisites: With permission of the Department. Corequisites: None
Cross-listed with: None Frequency: Annually Student Level: GRADUATE Comments: None Status: OPEN

Mathematics Courses: Spring 2021

MATH100301
Functions and Differential Calculus II GOLDSTEIN, ELLEN J
Spring 2021
This course is a continuation of MATH1002
Credits: 03
Room and Schedule: STOKES HALL 215,M W F 1; Satisfies Core Requirement: None Prerequisites: None Corequisites: None Cross-listed with: None Frequency: Annually Student Level: UNDERGRAD ELECT Comments: None Status: OPEN

MATH100302
Functions and Differential Calculus II BROOKS, ROBYN K
Spring 2021
This course is a continuation of MATH1002
Credits: 03
Room and Schedule: CAMPION HALL 302,M W F 10; Satisfies Core Requirement: None Prerequisites: None Corequisites: None Cross-listed with: None Frequency: Annually Student Level: UNDERGRAD ELECT Comments: None Status: OPEN

MATH100401
Finite Probability and Applications CLOTE, MARIE
Spring 2021
This course, for students in the humanities, the social sciences, School of Education, and School of Nursing, is an introduction to finite combinatorics and probability, emphasizing applications. Topics include finite sets and partitions, enumeration, probability, expectation, and random variables.
Credits: 03
Room and Schedule: M W F 9;ONLINE;SYNCHRONOUS; Satisfies Core Requirement: Mathematics Prerequisites: None Corequisites: None Cross-listed with: None Frequency: Annually Student Level: CORE Comments: Not open to students who have completed their Mathematics Core Curriculum Requirement without permission of the Department Chairperson (except for Psychology majors completing their second mathematics corequisite).
Status: CLOSED

MATH991101
Doctoral Continuation CHEN, DAWEI
Fall 2020
All students who have been admitted to candidacy for the Ph.D. degree are required to register and pay the fee (tuition credits can be used for this) for doctoral continuation during each semester of their candidacy when they are taking no other courses. Doctoral Continuation requires a commitment of at least 20 hours per week working on the dissertation.
Credits: 03

**Credits:** 03

**Room and Schedule:** M W F 12; ONLINE; SYNCHRONOUS; Satisfies Core Requirement: Mathematics

**Corequisites:** None

**Status:** CLOSED
MATH1101
Calculus II GOLDSMITH, ELLEN J
Spring 2021
MATH1101 is a second course in the calculus of one variable intended for biology, computer science, economics, management, and premedical students. It is open to others who are qualified and desire a more rigorous mathematics course at the core level. Topics include an overview of integration, basic techniques for integration, a variety of applications of integration, and an introduction to (systems of) differential equations.

Credits: 4
Room and Schedule: GOLDSMITH, ELLEN J, Room and Schedule: GOLDSMITH, ELLEN J; COREQUISITES: MATH1101; Satisfies Core Requirement: Mathematics; Prerequisites: MATH1100.

Cross-listed with: MATH1101; Frequency: Annually; Student Level: CORE; Comments: MATH1101 is not open to students who have completed MATH1103 or MATH1105.

Corequisites: MATH1141. (Or MATH1142, etc., depending on section of MATH1101 taken.)

Status: OPEN

MATH110101
Calculus II GOLDSMITH, ELLEN J
Spring 2021
MATH1101 is a second course in the calculus of one variable intended for biology, computer science, economics, management, and premedical students. It is open to others who are qualified and desire a more rigorous mathematics course at the core level. Topics include an overview of integration, basic techniques for integration, a variety of applications of integration, and an introduction to (systems of) differential equations.

Credits: 4
Room and Schedule: GOLDSMITH, ELLEN J, Room and Schedule: GOLDSMITH, ELLEN J; COREQUISITES: MATH1101; Satisfies Core Requirement: Mathematics; Prerequisites: MATH1100.

Cross-listed with: MATH1101; Frequency: Annually; Student Level: CORE; Comments: MATH1101 is not open to students who have completed MATH1103 or MATH1105. Students contemplating majors in Chemistry, Computer Science/B.S., Environmental Geosciences, Geological Sciences, Mathematics, or Physics should enroll in either MATH1102. ADMT1901 section for BCE students only.

Corequisites: MATH1141. (Or MATH1142, etc., depending on section of MATH1101 taken.)

Status: CLOSED

MATH110102
Calculus II BELDING, JULIANA V
Spring 2021
MATH1101 is a second course in the calculus of one variable intended for biology, computer science, economics, management, and premedical students. It is open to others who are qualified and desire a more rigorous mathematics course at the core level. Topics include an overview of integration, basic techniques for integration, a variety of applications of integration, and an introduction to (systems of) differential equations.

Credits: 4
Room and Schedule: BELDING, JULIANA V, Room and Schedule: BELDING, JULIANA V; COREQUISITES: MATH1101; Satisfies Core Requirement: Mathematics; Prerequisites: MATH1100.

Cross-listed with: B-Level; Frequency: Annually; Student Level: CORE; Comments: MATH1101 is not open to students who have completed MATH1103 or MATH1105. Students contemplating majors in Chemistry, Computer Science/B.S., Environmental Geosciences, Geological Sciences, Mathematics, or Physics should enroll in either MATH1102. ADMT1901 section for BCE students only.

Corequisites: MATH1141. (Or MATH1142, etc., depending on section of MATH1101 taken.)

Status: CLOSED

MATH110103
Calculus II BELDING, JULIANA V
Spring 2021
MATH1101 is a second course in the calculus of one variable intended for biology, computer science, economics, management, and premedical students. It is open to others who are qualified and desire a more rigorous mathematics course at the core level. Topics include an overview of integration, basic techniques for integration, a variety of applications of integration, and an introduction to (systems of) differential equations.

Credits: 4

This course introduces statistics as a liberal arts discipline and applies the principles of statistics to problems of interest for health sciences professionals. Students will gain an understanding of statistical ideas and methods, acquire the ability to deal critically with numerical arguments and gain an understanding of the impact of statistical ideas on the health sciences, public policy, and other areas of application.

Credits: 03
Room and Schedule: FULTON HALL 260, M W F 10:00
Satisfies Core Requirement: Mathematics
Prerequisites: Open to Connell School of Nursing students only.
Corequisites: None
Cross-listed with: None
Frequency: Annually
Student Level: CORE
Comments: None
Status: CLOSED

MATH119101
Fundamentals of Mathematics II ROGERS, CARSON S
Spring 2021
As in MATH1190, this course emphasizes building conceptual understanding of the mathematics present in the emerging K-8 curriculum and on deepening the content knowledge. Topics drawn from geometry and measurement, data analysis, statistics, and probability will be developed.
Problem solving and reasoning, applications, and making connections will be featured.
Credits: 03
Room and Schedule: CAMPION HALL 300, M W F 11:00
Satisfies Core Requirement: Mathematics
Prerequisites: MATH1190.
Corequisites: None
Cross-listed with: None
Frequency: Annually
Student Level: CORE
Comments: Restricted to Lynch School of Education students.
Status: CLOSED

MATH220201
Multivariable Calculus II TAO
Spring 2021
Topics in this course include vectors in two and three dimensions, analytic geometry of three dimensions, parametric curves, partial derivatives, the gradient, optimization in several variables, multiple integration with change of variables across different coordinate systems, line integrals, and Green's Theorem.
Credits: 04
Room and Schedule: GASSON HALL 210, M W F 9:00
Satisfies Core Requirement: Mathematics
Prerequisites: MATH2201.
Corequisites: None
Cross-listed with: None
Frequency: Annually
Student Level: CORE
Comments: This course is for students majoring in Chemistry, Computer Science/B.S., Geology, Geophysics, Mathematics and Physics, as well as other students who have completed Calculus II.
Status: OPEN

MATH220202
Multivariable Calculus II TAO
Spring 2021
Topics in this course include vectors in two and three dimensions, analytic geometry of three dimensions, parametric curves, partial derivatives, the gradient, optimization in
This course is an introduction to the techniques of linear algebra in Euclidean space. Topics covered include matrices, determinants, systems of linear equations, vectors in n-dimensional space, complex numbers, and eigenvalues. The course is required of mathematics majors and is also suitable for students in the social sciences, natural sciences, and management.

Credits: 03
Room and Schedule: M W F 12; ONLINE; SYNCHRONOUS; Satisfies Core Requirement: None
Prerequisites: None
Corequisites: None
Cross-listed with: None
Frequency: Annually
Status: OPEN

MATH221003
Linear Algebra CORNISH, JAMES
Spring 2021

This course is designed to develop the student's ability to do abstract mathematics through the presentation and development of the basic notions of logic and proof. Topics include elementary set theory, mappings, integers, rings, complex numbers, and polynomials.

Credits: 03
Room and Schedule: STOKES HALL 295S, M W F 1; Satisfies Core Requirement: None
Prerequisites: None
Corequisites: None
Cross-listed with: None
Frequency: Annually
Student Level: UNDERGRAD-MAJORS
Comments: None

MATH221004
Linear Algebra WARAKAGUN, SANGSAN
Spring 2021

This course is an introduction to the techniques of linear algebra in Euclidean space. Topics covered include matrices, determinants, systems of linear equations, vectors in n-dimensional space, complex numbers, and eigenvalues. The course is required of mathematics majors and is also suitable for students in the social sciences, natural sciences, and management.

MATH229001
Number Theory for Teachers DEPT
Spring 2021
This course is intended to focus on the wealth of topics that relate specifically to the natural numbers. These will be treated as motivational problems to be used in an activity-oriented program. Topics include prime number facts and conjectures, magic squares, Pascal's triangle, Fibonacci numbers, modular arithmetic, and mathematical art.
Credits: 03
Room and Schedule: None
Satisfies Core Requirement: Mathematics
Prerequisites: MATH1190 AND MATH1191.
Corequisites: None
Cross-listed with: EDUC2290 Frequency: Biennially
Student Level: CORE

MATH229101
Geometry for Teachers BELDING, JULIANA V
Spring 2021
This course is intended for teachers of grades K-9. Geometry now occupies a significant role in the elementary mathematics curriculum. The course will develop ideas for presenting geometry as an activity-based program. Topics include the geoboard and other key manipulatives, elements of motion and Euclidean geometry and suggestions for using Logo as a tool to enhance teaching geometry.
Credits: 03
Room and Schedule: GASSON HALL 205, M W F 12; Satisfies Core Requirement: Mathematics
Prerequisites: MATH1191 AND MATH1190.

MATH331001
Introduction to Abstract Algebra CORNHIS, JAMES
Spring 2021
This course studies four fundamental algebraic structures: groups, including
subgroups, cyclic groups, permutation groups, symmetry groups, and Lagrange's
Theorem; rings, including sub- rings, integral domains, and unique factorization
domains; polynomials, including a discussion of unique factorization and methods for
finding roots; and fields, introducing the basic ideas of field extensions and ruler and
compass constructions.
Credits: 0.3
Room and Schedule: M W F 2:ONLINE;SYNCHRONOUS;
Satisfies Core Requirement: None
Prerequisites: MATH2210 AND
MATH2216.
Corequisites: None
Cross-listed with: None
Frequency: Annually
Student Level: UNDERGRAD-MAJORS
Comments: Students may not take both MATH3310 and MATH3311.
Status: OPEN

MATH331201
Algebra II MADAPUSI PERA, KEERTHI S
Spring 2021
This course, with MATH3311, studies the basic structures of abstract algebra. Topics
include groups, subgroups, factor groups, Lagrange's Theorem, the Sylow Theorems,
rings, ideal theory, integral domains, field extensions, and Galois theory.
Credits: 0.3
Room and Schedule: FULTON HALL 250, M W F 9;
Satisfies Core Requirement: None
Prerequisites: MATH3311. With the permission of the Assistant Chair for
Undergraduates, students who have taken MATH3310 may be allowed to take
MATH3312. However, they may need to do additional work on their own in order to
make that transition.

MATH332001
Introduction to Analysis CHEN, DAWEI
Spring 2021
This course gives students the theoretical foundations for the topics taught in Calculus.
It covers algebraic and order properties of the real numbers, the least upper bound
axiom, limits, continuity, differentiation, the Riemann integral, sequences, and series.
Definitions and proofs will be stressed throughout the course.
Credits: 0.3
Room and Schedule: M W F 11; ONLINE;SYNCHRONOUS;

MATH44001  
**Dynamical Systems MIROLL, RENATO**  
**Spring 2021**  
This course is an introduction to nonlinear dynamics and their applications, emphasizing qualitative methods for differential equations. Topics include fixed and periodic points, stability, linearization, parameterized families and bifurcations, and existence and nonexistence theorems for closed orbits in the plane. The final part of the course is an introduction to chaotic systems and fractals, including the Lorenz system and the quadratic map.

MATH445501  
**Mathematical Problem Solving CHEUNG, CHI-KEUNG**  
**Spring 2021**  
This course is designed to deepen students' mathematical knowledge through solving, explaining and extending challenging and interesting problems. Students will work both individually and in groups on problems chosen from polynomials, trigonometry, analytic geometry, pre-calculus, one-variable calculus, probability and numerical algorithms. The course will emphasize explanations and generalizations rather than formal proofs and abstract properties. Some pedagogical issues, such as composing good problems and expected points of confusion in explaining various topics, will come up, but the primary goal is mathematical insight. The course will be of particular use to future secondary math teachers.  
**Credits:** 03  
**Room and Schedule:** GASSON HALL 302, M W 4 30*;  
**Satisfies Core Requirement:** None  
**Prerequisites:** MATH2202 AND MATH2210 AND MATH2216. Permission of the instructor required for students outside the Lynch School of Education.

MATH446001  
**Complex Variables CHEN, QILE**  
**Spring 2021**  
This course gives an introduction to the theory of functions of a complex variable, a fundamental and central area of mathematics. It is intended for mathematics majors and well-prepared science majors. Topics covered include complex numbers and their properties, analytic functions and the Cauchy-Riemann equations, the logarithm and other elementary functions of a complex variable, in variable calculus, probability and numerical integration of complex functions, the Cauchy integral theorem and its consequences, power series representation of analytic functions, and the residue theorem and applications to definite integrals.  
**Credits:** 03  
**Room and Schedule:** STOKES HALL 295S, M W F 10;  
**Satisfies Core Requirement:** None

MATH447001  
**Mathematical Modeling GARVEY, PAUL R**  
**Spring 2021**  
This course introduces students to methods of mathematical modeling. The emphasis is on ways to analytically represent and study today's complex modeling problems, with cases from the natural and social sciences. Topics include the model building process, mathematical models of systems, and modeling data to discover properties and hidden characteristics. The calculus of finite differences and solutions to classes of difference equations will serve as the core mathematical theory taught in this course. The dynamics of certain linear and nonlinear models will be explored from various domains (e.g., population models, economic models, Markov models). The course will conclude with an introduction to mathematical graph theory and its application to modeling interacting and interdependent systems and networks.

Introduction to Musics of the World DINEEN, DOUGLASS  
Summer 2020  
This course provides an introduction to selected musical traditions from around the world, in their cultural contexts. Our main goals are to study the connections between music and other cultural features and institutions, to become familiar with the features of major musical styles from the cultures studied, and with basic concepts in ethnomusicology and comparative musicology. Case studies include Native North and South American; Western, Central, and Southern African; Arabic; Persian; Hindusthani; Karnatak; Javanese; and Japanese musics. Musical training and background are not required and are not presumed.

Music Academic Courses: Fall 2020  
MUSA108001  
Keyboard Skills  
HATTORI, AYAKO M; MURPHY, EMILY  
Fall 2020  
Keyboard Skills is a corequisite for each of the following theory courses: MUSA1100 Fundamentals of Music Theory, MUSA2100 Harmony, and MUSA3100 Chromatic Harmony. In weekly 30-minute lessons, students will learn and demonstrate the practical understanding of scales, chord progressions, and the ability to play short compositions on the keyboard. Times to be determined once class begins. Students must be enrolled in MUSA1100, MUSA2100, or MUSA3100 to participate.

Credits: 00  
Room and Schedule: BY ARRANGEMENT;  
Satisfies Core Requirement: None Prerequisites: None

MUSA109001  
Ear Training/Sight-Singing Lab BURGO, MICHAEL  
Fall 2020  
In meetings twice a week students learn to sing melodies by sight through a selffge system of drilling scales and intervals (sight-singing) and learn to notate melodic, rhythmic, and harmonic patterns (ear-training). The course principally helps students pass the Ear Training/Sight Singing requirement for the major but can benefit individuals in singing groups or those who wish to improve their practical musical skills. Preference given to majors and minors. Usually taken concurrently with MUSA2100 Harmony or MUSA3100 Chromatic Harmony.

MUSA230701
Musics of Asia DINEEN, DOUGLASS
Fall 2020
This course offers an approach to Asian culture focusing on music and the performing arts. Case studies from India, Tibet, China, Japan, Korea, and Indonesia highlight the profound richness of musical experience seen throughout Asia while providing the foundation for a broader analysis of music-as-culture. Examining how music is deployed—in religious expression, political and social strategies, identity formation, and entertainment—reveals both continuities in musical uses/meanings and diversity in its cultural, social, and personal dimensions. This course locates contemporary Asian performing arts in their historical contexts, considers the transformations that take place as music flows across borders, and examines the interplay between global information networks and local forms and representations.

MUSA230901
Music and Culture in the Middle East LUCAS, ANN E
Fall 2020
This course explores the relationship between different music traditions of the Middle East and their respective cultural contexts. It addresses issues of music's structure and content vis-a-vis its role in social, political, and religious situations in the region; the ways that these forces influence musical aesthetics, while also addressing the role of music in the Middle East historically. The cultural areas covered in this class include the Arab World, Iran, Turkey, and Afghanistan.

MUSA241001
The Music Industry JAMES, DONALD J
Fall 2020
This course examines the music industry—broadly considered—from song publishing in the eighteenth century through the streaming era today. Taking a historical approach, we will place special emphasis on creative and cultural labor and the ways in which those who create and produce music have negotiated transformation in media, technology, and business. While our focus will be primarily on the U.S. popular music industry, we’ll periodically consider industry in the Western classical tradition and world music. Topics will include song publishing, copyright, performance rights, labor unions, the record industry, social networks, and streaming platforms.

MUSA310601
Counterpoint I PARK, BENJAMIN M
Fall 2020
In this course we will study the fundamentals of two- and three-part polyphonic styles. Using the principles of species counterpoint, we will acquire a dependable contrapuntal technique to write short compositions, first in two parts and eventually in three. Assignments will include short works in free imitation, strict canon, and invertible counterpoint. Our studies will include a brief survey of the historical origins of Western polyphony and analysis of contrapuntal compositions of the Baroque period.

MUSA311401
Jazz Harmony, Improvisation, and Arranging LEE, THOMAS O
Fall 2020
This music theory course will focus on the study of chord structures, chord
substitutions, chord scales, composition, and improvisation as they have been codified
by contemporary jazz musicians. The technical innovations in the music of Sonny
Rollins, Thelonious Monk, Charlie Parker, and Miles Davis will be analyzed and
discussed. Special attention will be placed on learning how to improvise on the great
standards of the jazz repertoire. Additional studies will include the following: piano lead
sheet arrangements; ii-V-I keyboard harmony, re-harmonization, and composing
original tunes based on chord structures of standards by Berlin, Kern, Gershwin;
rhythm changes; and the blues.

MUSA312001
Seminar in Composition GAWLICK, RALF Y
Fall 2020
The course will be conducted in two parts. One: class will meet once a month. Works
in both tonal and twentieth century idioms will be discussed and used as models for
student compositions. Two: each student will meet once a week with the instructor for
a private studio composition lesson. The student will complete, by the end of the
semester, three original compositions: theme and variations, a movement for string
quartet, and a song cycle for voice and piano. The purchase of Finale music software,
created by Coda Music Technology, Mac or PC version, is required for this course.

MUSA322101
Chamber Music HEBERT, SANDRA
Fall 2020
This course will focus on the repertoire of chamber music, defined as small
instrumental ensembles from two to nine players with one player per part. Chamber
music has been an important genre from the late medieval/early renaissance period
through the present day. The course will proceed primarily chronologically beginning
with string instrument ensembles, then moving to Baroque chamber and church sonatas,
string quartets and numerous other ensembles during the Classical period, and finally
development of similar ensembles as well as new instrumental combinations through
the Romantic period into the modern era. While most of the music studied will be
instrumental, a few important works that also include voice will be presented as well.

MUSA327201
Liszt at the Heart of Romanticism MCGRANN, JEREMIAH W
Fall 2020
Charlatan, heir of Beethoven, prophet of music of the future, the still controversial
Franz Liszt (1811-1886) spans the development of music in the nineteenth-century. He
was reportedly blessed by Beethoven (a myth) and lived long enough to write atonal
music. Virtuoso pianist, composer, teacher, author, through his music we will look at
the world of the pop-star virtuoso, his links to the French authors Lamartine and Saint-
Simon, his attempt to translate works of Romantic literature into music, his place
within the grand classical tradition, his influence on his son-in-law Richard Wagner, his
links to Hungarian nationalism, his little known sacred choral works and his enigmatic
late pieces.

Senior Seminar NOONE, MICHAEL J
Fall 2020
For music majors in their senior year (exception only by special permission). Through
supervised reading, research, writing, discussion, and performance, this seminar will
help majors develop a framework for synthesizing their various courses into a coherent
whole, with special emphasis in the area of strongest interest (theory, composition,
history, cross-cultural studies, or performance). It will also help prepare students for
examinations in listening repertoire and ear-training (see major requirements).

### Music Academic Courses: Spring 2021

**MUSA110001**
**Ear Training/Sight-Singing Lab**  
**BURGO, MICHAEL**  
**Spring 2021**  
In meetings twice a week students learn to sing melodies by sight through a solfege system of drilling scales and intervals (sight-singing) and learn to notate melodic, rhythmic, and harmonic patterns (ear-training). The course principally helps students pass the Ear Training/Sight Singing requirement for the major but can benefit individuals in singing groups or those who wish to improve their practical musical skills. Preference given to majors and minors. Usually taken concurrently with MUSA2100 Harmony or MUSA3100 Chromatic Harmony.  
**Credits:** 03  
**Room and Schedule:** DEVLIN HALL 112, T TH 12-12 30;

**MUSA110002**
**Fundamentals of Music Theory**  
**GAWLICK, BARBARA S**  
**Spring 2021**  
An introductory music theory course designed for students with a strong interest in music. As a Core course it includes speculations on how musical discourse informs our perception and understanding of the world around us. Students learn to acquire skills in music notation and transcription. The following theoretical concepts will be extensively covered: notation of pitch and rhythm, scales, intervals, chords, and harmonic progression. Students leave the course prepared for upper level study in music theory and will begin to question broader issues concerning the meaning and use of music.  
**Credits:** 03

<td>MANGIN, TIMOTHY R</td>
<td>Spring 2021</td>
<td>From the blues to country, jazz to rock, our nation's political, social, and economic history has been mirrored and influenced by the styles of popular music developed in our cultural melting pot. This course will provide an overall history of popular music in America, with emphasis upon mainstream popular music since 1954. Its focus will be on the independence and interdependence of black and white musical cultures in America. Students will learn stylistic developments in popular music and acquire interpretive strategies, including methods of aural analysis that will view popular songs as historical texts and as autonomous works of art.</td>

Medieval/Renaissance CARPENTIER, RACHEL O
Spring 2021
A study of the development of Western music from the first stages of musical notation in the Middle Ages through the polyphonic music of the sixteenth century. Both sacred and secular traditions will be considered, including Gregorian chant, the polyphonic Mass and motet, the chanson, and the madrigal of the sixteenth century. Although most of the literature of this period is vocal, a study of the instruments and instrumental literature will be included.

MUSA230401
Musics of India DINEEN, DOUGLASS
Spring 2021
This course will introduce students to the rich and varied musical arts of India. Students will delve into the ubiquitous songs of Bollywood and Tamil film, karnatak and hindustani art musics, temple musics, as well as the music (and dance) of bharatanatyam, bhangra, and other regional genres. Lectures will focus on situating Indian musics in their cultural and historic contexts while exploring issues of identity formation, regional and transnational movements, and the changing meanings of music and the arts in India. Students will also study performance practices—including basic exercises for South Indian melody (raga), rhythm (tala), and dance—which will provide engaged (and embodied) learning supplements to the lectures. There are no academic or music-skills prerequisites for this course.

MUSA322001
Opera
CALLAHAN, DANIEL
Spring 2021
In this course we will look at how text and music combine to relate a drama, concentrating on five representative masters of the seventeenth through nineteenth centuries—Monteverdi, Handel, Mozart, Verdi, and Wagner. This course will take excursions into other works—the operas created for the court of Louis XIV, the vocal pyrotechnics of the Italian golden age of singing, the spectacle of French grand opera, and the operatic qualities of the modern Broadway musical.

MUSA327001
Beethoven
MCGRANN, JEREMIAH W
Spring 2021
An introduction to Ludwig van Beethoven (1770-1827), tracing his intellectual development within the culture and society of the Rhinish Enlightenment, his musical enrichment of the High Classicism of Mozart and Haydn (among others), and the heroic style of his best known works to his feelings and expressions of musical and social isolation in his last years, and his problematic identity with the burgeoning romantic movement in Germany. Emphasis will be on the music itself, concentrating on compositions from three genres: piano sonata, string quartet, and symphony. Also covered will be the concerto, his opera Fidelio, and the Missa Solemnis.

The Beatles: From "Yesterday" to "Tomorrow Never Knows" JAMES, DONALD J
Spring 2021
Everyone loves the Beatles. In this class, we explore why that is the case. We will chart the rapidly changing idiom of popular music in the 1960s and outline its interaction with various social, political, and cultural movements, such as "Beatlemania" and psychedelia. The primary source material for this class is the established canon of Beatles songs, albums, and films, which we will supplement with secondary articles, reviews, and interviews. This course will challenge you to listen critically to, and think deeply about, one of the most influential bands in the twentieth century.

MUSP167001
African Music Ensemble MANGIN, TIMOTHY R; TOURE, AMAHOU L
Fall 2020
This ensemble is a hands-on introduction to Senegalese drumming and dancing. Students will learn to play different drums and rhythms from a Senegalese master drummer. Since dance is an integral part of Senegalese drumming, students will also learn basic dance moves and gestures. The instructor is a descendent from a long line of griots (hereditary musicians, dancers, drummers, and praise singers) and will teach the class musical and cultural traditions passed down to him and his family over the centuries. Students will also have the opportunity to learn new compositions by Senegalese drummers. This ensemble requires regular attendance and participation. There are no pre-requisites.

MUSP176001
Introduction to Improvisation KNIFFIN, ERIC L
Fall 2020
Improvisation is a central feature of many Western musical styles. This course offers students the opportunity to learn how to improvise in jazz, blues, and rock. In a hands-on manner, students are introduced to the fundamental concepts of improvising. No prior experience is necessary, and there is no prerequisite, but you should have at least some experience playing an instrument or singing. In addition to extensive in-class performance, accompaniment recordings are provided for outside class.

MUSP177001
Gospel Workshop JACOB, SHANNON D
Fall 2020
This course is a study and performance of the religious music of the Black Experience known as Spirituals and Gospels. One major performance is given each semester. Concerts and performances at local Black churches are also presented with the Voice of Imani Gospel Choir. The Gospel Workshop will provide the lab experience for MUSA231 (AADS2266) and MUSA232 (AADS2285). Members of these classes will be required to attend a number of rehearsals and performances of the Gospel Workshop. Members of the classes may sing in the choir but it is not required for the course.

Irish Fiddle/Experienced Beginner FALLS KEOHANE, SHEILA E
Spring 2021
For students who have taken a full semester of Beginner Irish Fiddle (MUSP1600) or
have at least one year's experience playing the violin. This class will help students
continue in the development of violin technique. Students will learn more advanced
Irish dance tunes with some beginning ornamentation (bowing and fingering).
Students may take the experienced beginner class for more than one semester until
they feel ready to move to the Intermediate level. Violin rentals are possible. A small
portable recorder is required. Fall participants may continue in spring semester, but
new students may not enroll in spring semester.

Traditional Irish Dance HAGGAN, CAITLIN M
Spring 2021
This course will introduce students to the traditional dances of Ireland, including solo
step dance footwork and group set and ceili dances. The class will include warm-ups,
technique, and choreography, as well as occasional short readings, video viewings,
and music listening exercises. Students will gain an understanding of Irish traditional
musical rhythms, while physically embodying their intrinsic connection to the dance
patterns. An uplifting and invigorating class. All levels welcome.

MUSP271001
Advanced Improvisation KNIFFIN, ERIC L
Spring 2021
This course offers the advanced improvisor the opportunity to build higher order skills of improvisation in the jazz and rock idioms. While the course entails extensive instruction in music theory, the focus is on application of theoretical concepts to real-world improvisational contexts. The course outlines advanced concepts in melody-shaping, form/harmony, and musical style.
Credits: 00
Room and Schedule: LYONS HALL 409, M 8 PM; Satisfies Core
Requirement: None Prerequisites: With permission of the Instructor. Corequisites: None Cross-listed with: None Frequency: Annually
Student Level: UNDERGRAD ELECT
Comments: Performance course. Status: OPEN

MUSP272001
B.C. bOp! Jazz Ensemble BONAIUTO, SEBASTIAN Spring 2021
B.C. bOp! is an ensemble dedicated to the highest levels of instrumental and vocal jazz performance. Membership is determined by audition. Instrumentation for B.C. bOp! consists of five saxophones, five trumpets, four trombones, piano, guitar, bass, drums, auxiliary percussion, and a vocal ensemble of four to six mixed voices. B.C. bOp! performs jazz and popular music from the 1940's to the 1990's and appeals to a wide range of musical tastes.

Language, Memory, and Identity in the Middle East SALAMEH, FRANCK

Spring 2021

A broad-based overview of the role which language-choice plays in the construction of national and cultural identity in the Middle East. The role of Modern Standard Arabic (or Fus-ha) in the elaboration of Arab Nationalism, and the role of local dialects in the conceptualization of competing national identities and territorial nationalisms. In particular. In addition to Arab Nationalism and Zionism, also the ideas of Greater Syria, the Egyptian Pharaonic idea, Lebanonism, Mesopotamianism, and the Canaanite movement in Israel.

This course introduces the history of the Silk Road—a complex network of trade routes that connected China with the rest of the Eurasian continent over land and sea—and its role in fostering cultural and material exchanges between the people groups it connected. The chronology of the course covers the period between 500 BCE and 1500 CE, during which the Silk Road contributed to the forming and transforming the cultural, ethnic, and religious identities of different peoples inhabiting the vast area that came to be known as the Silk Road Corridors. The course moreover explores topics, including conspicuous consumption, cultural diversity, religious and linguistic pluralism by introducing art and archaeological and textual sources.

**Philosophy Courses: Summer 2020**

**PHIL107001**  
Philosophy of the Person I  
SOBRAK-SEATON, MICHAELA T

This course introduces students to philosophical reflection and to its history through the presentation and discussion of the writings of major thinkers from ancient, medieval, modern, and contemporary periods. The course is designed to show how fundamental and enduring questions about the universe and about human beings recur in different historical contexts. Emphasis is given to ethical themes, such as the nature of the human person, the foundation of human rights and corresponding responsibilities, and the problems of social justice.

**Credits:** 03

PHIL125201
Practical Logic CLEMENTE, MATTHEW J
Summer 2020
A course not in the "new logic" (symbolic, or mathematical, logic) but in the "old logic" (ordinary language logic) invented by Aristotle and used for 2300 years in all the humanities. Includes such topics as definition, contradiction, syllogisms, implied premises, induction, and analogy. The course includes the commonsensical philosophical bases for this logic and also many practical applications to reading, interpreting, evaluating, and inventing arguments, especially in dialogs. Weekly quizzes, extra credit opportunities, and a take-home final exam. Texts: (1) SOCRATIC LOGIC, (2) THE BEST THINGS IN LIFE, (3) SUMMA PHILOSOPHICA (all 3 titles by Peter Kreeft)
Credits: 03
Room and Schedule: ONLINE COURSE;ASYNCHRONOUS;MAY 13 - JUN 26;

PHIL151001
Introduction to Ethics SEVERSON, ERIC
Summer 2020
What does it mean to be good, virtuous, or just? To what extent are we responsible or not responsible for our actions? How have our ethical values been established by society in the past? On what basis should our ethical values be established in the future? What are reasonable moral expectations we can have of other people? These are a few of the issues that will be discussed as students are introduced to some of the main schools of ethical thought in the Western philosophical tradition. We will examine debates over whether limits on migration are justifiable. We will also pay special attention to rights and duties concerning refugees. The course will be take place in Mexico, first in Mexico City and then in Tijuana, just a few miles from the U.S.-Mexico border. We will use the Mexican context—including both Mexican history and present realities—as a way of making concrete the philosophical and theological discussion of migration. For millennia, Mexico has been a place of migration and settlement by different peoples. And each year, hundreds of thousands of people move in and out of Mexico for a variety of reasons. Moreover, the U.S.-Mexico border is an issue of intense debate in both the U.S. and Mexico. Thus Mexico provides an excellent context for thinking about: (1) the big picture of migration as a human phenomenon, (2) the historical forces that have shaped, and continue to shape, patterns of migration, and (3) the contemporary situation of migrants and contemporary policies toward migration. Our goal is to combine philosophical/theological reflection with cultural immersion in a mutually illuminating way. The Mexican context will help make our philosophical/theological discussions of migration more vivid, nuanced, and realistic.

PHIL209001
Introduction to Formal Logic POPE, MICHAEL L
Summer 2020
Logic is the careful study of reasoning. It investigates how critical thinking is successful and, when it's not, what goes wrong. Understanding logic enables one to recognize and craft good arguments in every area of life, from science and technology to political debates and everyday in between. This course introduces the composition of arguments and fallacious reasoning, honing students' ability to identify and formulate problems and evaluate solutions. Our goal is to analyze and understand the formal tools that allow us to represent the most salient features of reasoning in the most precise terms.

PHIL327501
Movilidad Humana: Ethics of Migration LOTT, MICAH
Summer 2020
The course deals with migration as a topic for philosophical and theological reflection. We will consider key concepts related to migration—e.g., citizen, migrant, human rights, nation. We will examine debates over whether limits on migration are justifiable. We will also pay special attention to rights and duties concerning refugees. The course will be take place in Mexico, first in Mexico City and then in Tijuana, just a few miles from the U.S.-Mexico border. We will use the Mexican context—including both Mexican history and present realities—as a way of making concrete the philosophical and theological discussion of migration. For millennia, Mexico has been a place of migration and settlement by different peoples. And each year, hundreds of thousands of people move in and out of Mexico for a variety of reasons. Moreover, the U.S.-Mexico border is an issue of intense debate in both the U.S. and Mexico. Room and Schedule: STOKES HALL 113S, F 10; Satisfies Core Requirement: None
The course requirements include ten to twelve hours per week of community service. In light of classic philosophical and theological texts, students in this course address the relationship of self and society, the nature of community, the mystery of suffering, and the practical difficulties of developing a just society. PULSE students are challenged to investigate the insights offered by their readings in relationship to their service work. Places in the course are very limited.

PHIL108812
Person and Social Responsibility I MCCOY, MARINA B
Fall 2020
The course requirements include ten to twelve hours per week of community service. In light of classic philosophical and theological texts, students in this course address the relationship of self and society, the nature of community, the mystery of suffering, and the practical difficulties of developing a just society. PULSE students are challenged to investigate the insights offered by their readings in relationship to their service work. Places in the course are very limited.

PHIL109001
Perspectives on Western Culture I/Perspectives I RAPIER, KATHERINE N
Fall 2020
The course introduces students to the Judeo-Christian Biblical texts and to the writings of such foundational thinkers as Plato, Aristotle, Augustine, Aquinas, Luther, Bacon, Descartes, Hobbes, Locke, Kant, Hegel, and Kierkegaard. The first semester considers the birth of the self-critical Greek philosophic spirit, the story of the people of Israel, the emergence of Christianity and Islam, and concludes with a consideration of medieval explorations of the relationship between faith and reason. Attention will also be paid to non-Western philosophical and theological sources.

PHIL116001
The Challenge of Justice POPE, STEPHEN J  
Fall 2020
This course introduces the student to the principal understandings of justice that have developed in the Western philosophical and theological traditions. Care is taken to relate the theories to concrete, practical and political problems, and to develop good reasons for choosing one way of justice rather than another. The relationship of justice to the complementary notion of peace will also be examined. Special attention is paid to the contribution of Catholic theology in the contemporary public conversation about justice and peace. Problems discussed may include human rights, hunger and poverty, and ecological justice.

PHIL215001  
Philosophical Perspectives on Science STAN, MARIUS C  
Fall 2020
This course is an examination of the scientific enterprise with the tools of modern analytic philosophy. Topics include: the structure of a scientific theory; evidence and knowledge in science; the nature of scientific explanations; and the role of values in science. As paradigmatic examples, we will examine major breakthroughs by Archimedes, Newton, Darwin, and Einstein. Open to science and pre-med majors.

PHIL221501  
Telling Truths III: The Narratives that Shape Our Lives HIRSCH, KATHLEEN A  
Fall 2020
As we encounter injustice, conflicting visions of “the good,” and different moral scales of behavior, rights and responsibilities, it is essential that we become aware of our own foundational narratives. What “wisdom stories” shape the way you think about yourself in relation to others? What narratives do you carry into encounters with conditions, attitudes and beliefs that are different from yours? In this course, students will have a rare opportunity to bring their weekly experience of service into a time of reflection, and into relation to some of the core narratives of the great spiritual traditions. We will read modern mystics, parables, and creative theologians, including: Anne Lamott, Etty Hillesum, Kendrick Lamar, and Parker Palmer. The conversation will continue as we write in and read from our journals, sharing stories and questions. Several short writing assignments will occur through the course of the term; a final, longer piece of substantive “spiritual reflection” will give students the chance to synthesize the fruits of observation, reading, and reflection. The aim of the course is to expand students’ familiarity with the great narratives of grace and forgiveness, suffering and hope, as they engage in service, and to provide a setting in which they can become intentional about adopting narratives that will shape their lives.

PHIL228801
Philosophy as a Way of Life: East and West
STOREY, DAVID E
Fall 2020
The word philosophy means "the love of wisdom," and one way to define wisdom is the knowledge of how to live well. According to French scholar Pierre Hadot, for the ancient Greeks philosophy was not merely an academic exercise, but an inherently practical discipline designed to help people flourish. The ancients laid down different pathways to the good life, and devised "spiritual exercises," reflective practices to foster our intellectual and moral development. They sought to answer ethical and existential questions we all face: What is happiness, and how should we best pursue it? What qualities constitute moral character, and how can we acquire them? How should we manage difficult emotions like fear, anger, and anxiety? How can we come to terms with our mortality? What does a meaningful life require? In this course, you will not just study philosophy, you will do it. In addition to examining and evaluating philosophical texts, you will experiment with various contemplative practices to get a sense for what it might be like to live like a philosopher. In other words, the course is an opportunity to study philosophy with: Plato, Aristotle, Epicurus, Stoicism, Buddhism, Confucianism, and Existentialism. Note: this course will ask you to step outside of your comfort zone, and it assumes an interest and a willingness on your part to engage in regular and serious introspection and to experiment.

PHIL229101
Philosophy and Theology of Community I
SWEENEY, MEGHAN T
Fall 2020
This seminar explores the nature of community, with particular focus on community in the American context. Some of the central historical, cultural, political and religious forces that have shaped both American community and the American understanding of community are examined. These questions are initially approached from an historical perspective with an assessment of philosophical ideas which were dominant in the political thinking of the American founders. The seminar then considers the historical development of those ideas in light of the way they are concretized in political practice, arriving at an assessment of contemporary American thinking on community.

PHIL440101
Feminisms and Philosophies of Difference McGILL, CHERIE
Fall 2020
What does it mean to call oneself (or someone else) a 'feminist'? In attempting an answer to this question, we will consider efforts to reveal, unravel, and remedy the conceptual, psychological, and economic dimensions of the oppression of women. We will discuss a variety of feminisms-- liberal, existential, radical--and their differing approaches to such 'feminist' issues as marriage and domestic violence, reproduction and pregnancy, work and sexual harassment, and the science of gender and gender difference. We will examine the relationship of sexism to racism, heterosexism, and class exploitation, and investigate the role of the concept of difference in creating and maintaining structural inequalities.

PHIL44201
How to Begin Thinking: Aftermaths of Twentieth-Century Literature, Philosophy, History NEWMARK, KEVIN
Fall 2020
"Thinking," the French philosopher Emmanuel Levinas once suggested, "probably begins through traumatisms." This course will study a series of disruptive and transformative events that have indelibly marked the twentieth century. What is the task of thinking for a European tradition displaced internally by the Holocaust and externally by the end of colonial expansions into other continents? Authors will include Levinas, Berrida, Nancy, Saussure, Barthes, Duras (in English translation from French); Borges and Dorfman (in English and English translation from Spanish); Calvino (in English translation from Italian); and Descartes (in English translation from Latin). A German component (in English translation) will consider Husserl and Heidegger as a counterpoint to the European tradition of Romance languages, literatures, and cultures.

PHIL440601
History of Modern Philosophy DAVENPORT, ANNE A
Fall 2020
This course will explore early-modern philosophers who grappled with metaphysics, epistemology, and ethics in the context of the scientific revolution. How critical to their innovative ideas was the task of harmonizing science and religion on a new basis? We will read and debate Montaigne, Descartes, Hobbes, Pascal, More, cudworth, Bayle, and Locke. Did they succeed in making a home for us in the new infinite universe? Or did they leave us orphaned and disenchanted?

PHIL444201
German Romanticism and Idealism RUMBLE, VANESSA P
Fall 2020
Kant's transcendental idealism has been charged with divorcing the subject of understanding from the subject of moral experience. We shall examine the basis of this claim as well as the attempts by Romantic writers and German Idealists to provide a fresh account of the integrity of human experience. We begin examining Kant's attempt, in The Critique of Judgment, to bridge the moral and natural realms through aesthetics. We then trace the progressive emancipation of the imagination in the latter development of German Idealism and Romanticism.

PHIL444301
What is Democracy? LOTT, MICAH
Fall 2020
Etymologically, "democracy" means rule by the people, or people power. But what does it mean for the people to rule, or to have power? And what is so valuable about the people ruling, if anything? This course examines these questions, with a focus on contemporary political philosophy. We will look at issues like: deliberation, participation, political voice, and the relationship between capitalism and democracy. Throughout, we will consider democracy's connection to the social ideal of a "society of equals."

Global Justice and Cosmopolitanism _HUDSON, STEPHEN A_  
**Fall 2020**  
In this course, we will analyze how virtue can be applied to the local and global community for the creation of global justice. We will first briefly look at the ancient world and how virtue appears in the political community as civic solidarity. We will then analyze various theories of cosmopolitanism. Finally, we will spend significant time on the theme of global justice. We will apply the previous themes of the course to issues such as global poverty, the environment, global peace, human rights, gender, immigration, global health, and forms of global governance.

Aquinas and the Classics _BYERS, SARAH C_  
**Fall 2020**  
While it is commonly known that Aquinas was a product of the twelfth-century renaissance of classical thought when it comes to Aristotle, less attention is typically given to his use of Roman Hellenistic philosophy and Greek Neoplatonism. This course is devoted to analysis of how Aquinas developed key elements of his ethics and philosophical psychology, as well as some of his metaphysics, from Roman and Greek authors including Cicero, Seneca, Augustine, and Ps- Dionysius in addition to Aristotle.

PHIL559301
Philosophy of Science STAN, MARIUS C
Fall 2020
An introduction to the central themes of twentieth century history and philosophy of science. Topics to be discussed include the classic and contemporary problems of demarcation, explanation, confirmation, laws of nature, inter-theoretic reduction, social and historical critiques of neopositivism, and the realism-antirealism debate. We will examine some philosophical perspectives sometimes thought to be closely associated with science including empiricism, pragmatism, naturalism, and physicalism. We will also discuss a number of other issues, including questions about objectivity and the role of values in science, about the methods, scope, and limits of science, and about whether science provides anything like a worldview.

Fall 2020
This course will examine theories of interpretation (hermeneutics) and the practice of interpretation in law. We will address interpretation as a fundamental feature of human understanding, using religious and literary texts, and then specific schools of legal interpretation, including originalism, strict construction, and the so-called living constitutional approach, using both American constitutional cases (Second Amendment, same-sex marriage, and others) and disputes in scriptural interpretation, such as the debate over the ordination of women. A particular focus will be the question of law at the limit, such as instances of executive law-breaking. Authors will include Aristotle, Aquinas, Gadamer, and Schmitt, as well as Dworkin, Scalia, and Breyer.

PHIL635001
Kant on the Arguments for God’s Existence BASILE, GIAMPIERO
Fall 2020
The demonstration of God’s existence is the main topic of the most relevant among Kant’s pre-critical writings: The Only Possible Argument in Support of a Demonstration of the Existence of God. In this work, Kant examines first the possibility of a deduction a priori, then the possibility of arguments a posteriori. Finally, he discusses what he considers the only possible basis or condition for every proof of God’s existence, a priori as well as a posteriori. The Only Possible Argument offers an original contribution to the debate on this issue in modern philosophy, from Descartes to Christian Wolff. It also works out in a systematic way some of the theses exposed in earlier works like Universal Natural History and the dissertation Nova dilucidatio, and prepares the later developments in the Transcendental Dialectic of the Critique of Pure Reason. A selected number of studies on Kant’s Only Possible Argument will be taken into account.

PHIL660401
Social Construction GARCIA, JORGE L
Fall 2020
This course explores recent claims that important categories of social life—notably including race, ethnicity, and gender—are not grounded in nature, but are inventions of human societies. We treat the content of such claims, reasons adduced for them, and some of their implications for individual attitudes and social policies.

PHIL665401
Contemporary Aristotelian Ethics LOTT, MICAH
Fall 2020
This course examine some of the most interesting recent work in moral philosophy done from a broadly Aristotelian perspective. Our course will be divided into two main sections. In the first section, we will consider accounts of fundamental normative notions like: goodness, the good of, good as, and good for. We will pay special attention to possible connections between goodness and nature. In the second section we will look at Aristotelian accounts of practical reasoning and practical wisdom. As part of this, we will...
consider the eudaimonistic structure of Aristotelian ethics, and challenges to eudaimonism.

PHIL667001
Technology and Culture GRIFFITH, WILLIAM
Fall 2020
This interdisciplinary course will first investigate the social, political, psychological, ethical, and spiritual aspects of the Western cultural development with a special emphasis on scientific and technological metaphors and narratives. We will then focus on the contemporary world, examining the impact of our various technological creations on cultural directions, democratic process, the world of work, quality of life, and especially on the emergent meanings for the terms "citizen" and "ethics" in contemporary society. Students will explore technologies in four broad and interrelated domains: (1) computer, media, communications, and information technologies, (2) biotechnology, (3) globalization, and (4) environmental issues.

PHIL750001
Hegel's Philosophy of Spirit MAGRI, ELISA
Fall 2020
This course is dedicated to Hegel's philosophy of Geist, which is often translated in English as "spirit," "mind," or "collective cultural mindset." However, the full meaning of Geist in Hegel's philosophy comprises a more fine-grained and richer development of affective, psychological, and practical elements. Drawing on Hegel's Phenomenology of Spirit as well as on the sections on the Philosophy of Spirit of Hegel's Encyclopaedia, this course will explore the main philosophical questions that surround the dimension of Geist in both Hegel's philosophy and contemporary debates, including Hegel's departure from transcendental philosophy and the nature-spirit relation, the novelty of Hegel's philosophical anthropology, the problem of recognition, and the quest for absolute knowledge.

PHIL755001
Seminar in Comparative Phenomenology JOHNSON, DAVID W
Fall 2020
This course addresses the problem of how to understand the nature and significance of the relation between self and other in phenomenology. We will examine Heidegger on co-existence (Mitsein) and Merleau-Ponty's understanding of intersubjective relations as a primordial, pre-subjective field. We can compare these views with similar ideas found in the work of the Japanese phenomenologists Watsuji and Kimura and the new Confucian thinker Tu Wei-Ming, and contrast these notions with the thought of Sartre and Levinas, which disrupts the continuity between self and other. We will also consider what Hermann Schmitz's and Eugene Gendlin's discussion of embodiment and affectivity can add to our investigations. The conception of intersubjective experience that emerges from these comparisons reframes our sense of how social relations function in the constitution of the self and how they serve as a primary source of existential meaning. These considerations also call for a shift in our self-understanding and opens the way to a renewed focus on life as a primary theme for phenomenology.

PHIL770301
Aristotle and Plotinus: Ethics GURTLER, GARY
Fall 2020
The purpose of this course will be twofold: (1) An analysis of the moral and intellectual virtues in relation to happiness as the goal of ethics. Aristotle understands human nature as social, so how do individuals attain virtue, especially as member of society and as friends? (2) Plotinus reacts to Aristotelian eudaimonism, which he finds deficient in relation to the Platonic goal of the ascent of the soul. Despite Plotinus' critique, he incorporates ideas from both Plato and Aristotle into a more complex understanding of human nature that includes, among other things, the first explicit theory of the unconscious.

### Philosophy Courses: Spring 2021

**PHIL107001**
**Philosophy of the Person I**
**HANLY, PETER C**
**Spring 2021**
This course introduces students to philosophical reflection and to its history through the presentation and discussion of the writings of major thinkers from ancient, medieval, modern, and contemporary periods. The course is designed to show how fundamental and enduring questions about the universe and about human beings recur in different historical contexts.

*Emphasis is given to ethical themes, such as the nature of the human person, the foundation of human rights and corresponding responsibilities, and the problems of social justice.*

**Credits:** 03
**Room and Schedule:** BY ARRANGEMENT; Satisfies Core Requirement: Philosophy Prerequisites: None
**Corequisites:** None Cross-listed with: None Frequency: Annually
**Student Level:** GRADUATE
**Comments:** Two-semester, six credit course
**Status:** CLOSED

**PHIL999001**
**Teaching Seminar**
**LOTTC, MICAH**
**Fall 2020**
This course is required of all first- and second-year doctoral candidates. It includes discussion of teaching techniques, planning of curricula, and careful analysis of various ways of presenting major philosophical texts.

**Credits:** 00

The American Divide: The Philosophy of Inequality MCGILL, CHERIE
Fall 2021
Concern over inequality in the U.S. has shown itself in movements like Occupy Wall Street, the Fight for a Fifteen Dollar Minimum Wage, and Black Lives Matter. These courses will examine the meaning, causes, and consequences of inequality from the perspectives of Philosophy and Economics. Providing a broad picture of the current state of the U.S. economy, and analyzing the role of economic policy in determining opportunities and outcomes, the courses will prepare students to develop their own views about how past economic choices shaped current economic realities, and how we might create a more equitable future.

Corequisites: None

PHIL116001
The Challenge of Justice SNYDER, JOSHUA R
Spring 2021
This course introduces the student to the principal understandings of justice that have developed in the Western philosophical and theological traditions. Care is taken to relate the theories to concrete, practical and political problems, and to develop good reasons for choosing one way of justice rather than another. The relationship of justice to the complementary notion of peace will also be examined. Special attention is paid to the contribution of Catholic theology in the contemporary public conversation about justice and peace. Problems discussed may include human rights, hunger and poverty, and ecological justice.

PHIL1172001
Animals in the Moral Imagination: Beyond Human Justice FITZPATRICK, MELISSA A
Spring 2021
This course will provide students with an introduction to the work of philosophy by probing our understanding of the relation between humans and non-humans, and examining the moral implications of that relation. This will involve analyzing how we have imagined our relationship with non-humans in the past (and why), and evaluating human decision-making in relation to animal welfare. Some of the questions that we will probe throughout the course include: how are the boundaries between humans and animals constructed? Why do they matter? And what values inform them? How does our understanding of non-humans influence our understanding of ourselves? What is the relation between social hierarchies within human society and our understanding of non-humans? Is there a relation between our treatment of animals and our treatment of marginalized groups? In the wake of the ecological crisis, should we recast our relation with animals? And if so, how?
How do we change what we value? Is this something that we can voluntarily will? Though we will primarily focus on the ethical and existential dimensions of these questions, we will explore the metaphysical, epistemological, and political dimensions of them as well.

**Boston: An Urban Analysis MANZO, DAVID W**

**Spring 2021**

This course is intended for PULSE students who are willing to investigate, analyze, and understand the history, problems, and prospects of Boston's neighborhoods. With the exception of the fourth session, class meetings in the first half of the semester will meet on campus. Class number four will meet in the Skywalk Observation Deck at the Prudential Center. For the second half of the semester, as snow banks give way to slush and sun and blossoms, we will meet in the South End of Boston for a case study of a most intriguing and changing inner-city neighborhood.

**Mass Incarceration: Philosophical and Theological Perspectives LOTT, MICAH**

**Spring 2021**

This course will explore problems of justice in relation to incarceration in the United States with particular attention to attention to race, social class, gender, and immigration status. Students will read authors writing on the philosophy of race, gender, and class in relation to incarceration, the phenomenology of solitary confinement and the concept of “social death,” church documents and theological works on incarceration, and works on restorative justice and other models of justice that serves the common good. Catholic Social Justice teachings and discussion will also be a part of the course. The course will also address interconnections between immigration and incarceration. This course will be offered as a PULSE elective, in which students undertake four hours per week of service in the City of Boston at institutions such as Suffolk County Jail and non-profits that provide transitional services for returning residents or formerly incarcerated individuals or that advocate for prison reform. The PULSE office will vet and coordinate students' placements and serve as a liaison with community partners.

**Telling Truths II: Depth Writing as Service RIZZUTO, ALEXIS A**

**Spring 2021**

This PULSE elective will focus on the power of story-telling to achieve justice and social liberation. We will read theoretical and narrative accounts of the role of story, examine the use of story-telling among marginal populations as a means of participating in their own “solutions.” We will explore the benefits and liabilities of social media in emerging change movements. Students will engage in story gathering, telling, and analysis, through their PULSE placements and class discussion, producing a collection of original writings.

PHIL424401
The Vegetative Soul: The Hidden Life of Plants VANDEWALL, HOLLY R
Spring 2021
By weight, more than 80% of the living things on the earth are plants, and without them the earth's animals, including humans, would perish within weeks. But philosophy has spent a vanishingly small part of its efforts in considering this form of life, generally relegating plants to the status of minimally alive, but essentially uninteresting. As Michael Pollan notes, "plants are so unlike people that it's very difficult for us to appreciate fully their complexity and sophistication. Yet plants have been evolving much, much longer than we have, but we have been inventing new strategies for survival and perfecting their designs for so long that to say that one of us is the more 'advanced' really depends on how you define that term, and what 'advances' you value." This class will consider how humans have historically regarded the plant kingdom, what we can learn from the challenging imaginary exercise of attempting to understand how they live, and how we might reconsider the world if we came to regard the plant kingdom not as passive subjects of human actions, but as powerful and vital actors in their own right.

PHIL326001
Existentialism and Philosophy of Existence: Sartre, Heidegger, Arendt, and Jaspers BASILE, GIAMPIERO
Spring 2021
The course focuses on two fundamental questions concerning Existentialism and the Philosophy of Existence. The first question is about the relationship between existence as freedom and transcendence. According to every account of the philosophy of existence, existence is a synonym for freedom. This freedom can be understood, on one side, as an original structure of the human condition and self-determination, so that human being transcends itself through its own project, becoming, by its own decision, what it is not yet. On the other side, human freedom can be conceived as the answer to a call, so that existence does not mean the self-positioning of human being, but has its own source in some form of transcendence. The second question concerns the idea of the philosophy of existence as, at the same time, a philosophia perennis and a specific historical event. Throughout the history of philosophy, there have been philosophers who deal with existential questions and criticize a merely speculative idea of existence. Both questions will be treated with reference to Sartre, Heidegger, Hannah Arendt, and Jaspers.

PHIL438701
Epistemology ATKINS, RICHARD
Spring 2021
Philosophy is full of wonderfully perplexing arguments aimed at undermining our claims to knowledge. Like this one: If I know I have two hands, then I know I'm not just a brain in a vat. But, I don't know I'm not just a brain in a vat. So, I don't know I have two hands. Or this one: A claim is known only if it is justified. Claims cannot rest on themselves for justification, cannot depend on nothing for justification, and cannot be justified by an infinite series of propositions. But as those are the only options, we must not know anything. Or this one: I believe that God exists, but many of my epistemic peers and superiors believe that God does not exist. Therefore, I have a strong countervailing reason to believe God does not exist such that my belief is not justified. This course will examine these and other puzzling arguments about knowledge, justification, and disagreement.

PHIL440501
Greek Philosophy BYERS, SARAH C
Spring 2021
This course is organized around the central philosophical questions asked and answered by philosophers in the ancient Greek-speaking world. Topics include theories of material bodies, change and time, elemental physics, and entities and their predicates; whether anything immaterial or immutable exists and, if so, its relation to the changing cosmos; the existence and nature of God or gods; the existence and nature of the human soul and its relation to the human body; the criterion of truth and the nature of language; the criterion of ethics; theories of animal and human cognition and motivation. We will consider Plato, Aristotle, and, more briefly, some pre-Socratic and post-Aristotelian authors such as Plutarch, Epicetus, and Plotinus.

PHIL440701
Medieval Philosophy KREEFT, PETER J
Spring 2021
Far from being monolithic and repetitive, the Middle Ages were a creative period during which multiple solutions were proposed to make sense of the world and of human life. The legacy of Antiquity, the philosophic and scientific knowledge of the time, and religious views were combined in original syntheses. The aim of the course is to provide a precise picture of this diversity, through a study of the main problems that a wide range of authors (Christian thinkers from St. Augustine to Ockham, but also Islamic and Jewish philosophers) faced. Syllabus on www2.bc.edu/jeanluc solere/pl407.html.

PHIL442901
Freud and Philosophy RUMBLE, VANESSA P
Spring 2021
This introductory course for the interdisciplinary minor in psychoanalysis (open to all interested) is designed to acquaint students with the scope and evolution of Freud's thinking and with significant developments in psychoanalysis since his time. Students will study and assess Freud's and Breuer's first formulation of the nature and etiology of hysteria; Freud's groundbreaking work in dream interpretation and the nature of unconscious processes; Freud's attempt to apply his novel theory of unconscious mechanisms to cultural anthropology as well as individual psychology; and the implications of the ongoing revisions in Freud's classification of the drives.

PHIL444501
The Greeks and Their Gods DECHIARA-QUENZER, DEBORAH
Spring 2021
How did the Greeks view their gods? In this course, we will use Greek literature and philosophy to answer that question. We will read some of the more traditional mythological accounts in Greek literature presented in Hesiod's Theogony, Homer's Iliad and Odyssey, Euripides' Bacchae, and Aeschylus' Eumenides. We will then turn to the distinctive philosophical accounts of the gods given by Plato in works such as Republic II, the Myth of the Charioteer in the Phaedrus, the Demiurge in the Timeaus, and by Aristotle on their nature and contemplation in Metaphysics XII and Nicomachean Ethics X.

PHIL517501
Locke and Political Philosophy
FRIED, C GREGORY
Spring 2021
This course will explore Locke's ethical and political thought, broadly conceived to include not just his Two Treatises of Government, but also his work on religion and education. We will also examine Locke's influence on subsequent thinkers and upon history, such as the American founding, and we will address some of the most important critiques and defenses of Locke in recent and contemporary scholarly literature.

PHIL524901
British Empiricists
DAVENPORT, ANNE A
Spring 2021
Why are the British Empiricists both perplexing and indispensable? Do they deserve the odium that they often receive? How fundamental are they to our American identity? This course conducts an in-depth examination of John Locke, George Berkeley, and David Hume. We look at the entire spectrum of their concerns, from theories of the self to political science, ethics, and aesthetics. We tease out and discuss their views of the "good life." We probe their arguments critically and look at some of their followers and opponents in order to understand more fully the impact of their positions. We end with Rousseau's critique of British Empiricism.

PHIL540701
Buddhist Philosophy and Psychology
MAKRANSKY, JOHN J
Spring 2021
We focus on early and Mahayana Indian Buddhism, then some areas of Tibetan and Japanese Buddhism, exploring philosophical, psychological, and spiritual understandings. Buddhist approaches to theological anthropology, ontology, epistemology, ethics, and soteriology are related to practices of meditation, phenomenological investigation, and philosophical and psychological analyses. Reading in classical and modern Buddhism and in a few areas of modern psychology that draw on Buddhism. Weekly writing, active discussion, two short papers, one longer paper.

PHIL541801
Capstone: Working, Playing, Being
STOREY, DAVID E
Spring 2021
The conventional wisdom is that BC student culture is "work hard, play hard." But what do we mean by "work" and "play" here? How do these implicit meanings reflect broader cultural forces? And do these meanings serve us well? Senior year is an exciting but anxious time, and this seminar is a chance for you to: (a) reflect on how your education has shaped you, and how you have shaped your education and (b) explore your goals, fears, hopes, and expectations around life post-graduation with a small group of peers. We will examine: (1) the meaning of, and relationship between, work and leisure in your own life; (2) how they have developed since your freshman year in light of your education at BC and; (3) how they figure into your vision of a fulfilling life.

PHIL551801
Philosophy of Imagination
KEARNEY, RICHARD
Spring 2021
Readings in the philosophy of imagination from ancient myth to post-modernity. Beginning with Biblical and Greek accounts of images and imagemaking, this course will explore three main paradigm shifts in the Western history of imagination: (1) the ancient paradigm of the Mirror (Plato to Augustine); (2) the modern paradigm of the Lamp (Kant to Sartre); and (3) the postmodern paradigm of the circular Looking Glass (Lacan to Derrida). The course will conclude with a critical evaluation of the political and ethical functions of imagination in our contemporary civilization of cyber fantasy, simulation, and spectacle.

PHIL552901
Metaphysics
GURTLER, GARY
Spring 2021
The course begins with classical modern philosophers. Their problems concern the relation of mind and body, the possibility of objective knowledge, and cause and effect. Their method is that of science, combining both empirical and logical elements. After these modern thinkers, giving our cultural assumptions, we turn to Ancient and Medieval philosophers. Their problems concern the relation of spirit and matter, the analogy of being and truth, and causal explanation. Their method is one of dialogue. With this different set of problems and method, we will be able to evaluate the relative strengths of these different philosophical positions.

PHIL554901
Selected Readings in Phenomenology
MORAN, DERMOT
Spring 2021
This course offers a critical introduction to phenomenology, one of the most important movements of twentieth-century European philosophy, including its French existentialist development, and its critics. The major themes and movements in phenomenology and existentialism will be studied through several key thinkers: Franz Brentano, Edmund Husserl, Martin Heidegger, Edith Stein, Maurice Merleau-Ponty, Jean-Paul Sartre, Emmanuel Levinas. Themes that will be critically considered include: intentionality, phenomenological description, perception and embodiment, moods and emotions, self-consciousness, the nature of the self, sociality, and the surrounding lifeworld. The course will have both a historical and a critical orientation with an emphasis on reading selected primary-source texts in English translation. At least one year of Philosophy required.

PHIL55301
Capstone: Poets, Philosophers, and Mapmakers MCNELLIS, PAUL W
Spring 2021
We go through life with mental maps of reality in various degrees, implicit or explicit. A liberal arts education presupposes such a map of the intelligible world. Is it accurate? What does your map of reality look like? How has it changed since freshman year? The goal of the seminar is to help you see what kind of map you implicitly have now and to begin to ask what you want the map to look like ten years after graduation. How do you develop an open rather than closed map?

PHIL557701
Symbolic Logic: Theory and Practices ATKINS, RICHARD
Spring 2021
An introduction to the powerful ways the logical forms woven into deductive reasoning and language can be analyzed using abstract symbolic structures. The study of these structures is not only relevant for understanding effective reasoning, but also for exploring the Anglo-American analytic philosophical tradition and foundations of mathematics, computer science, and linguistics. Philosophically interesting properties about logical systems will be explored, including the task of proving whether a logical system is complete and consistent. A number of interesting topics of twentieth-century logic will be briefly considered, such as set theory, Russell's paradox, and Goedel's theorems.

PHIL566001
Good and Evil LOTT, MICAH
Spring 2021
This class examines two areas in our moral thinking. First, we will look at various conceptions of "extreme" moral goodness: the saint, the sage, and other moral exemplars. Second, we will look at the notion of "extreme" badness, i.e., evil or wickedness. We will consider evil both as an ordinary phenomenon and an exceptional one. The guiding question of our reflections will be: what can we learn about morality by thinking about moral extremes? We will approach our topic mainly through philosophical texts, but also through works of film and literature.

PHIL660501
Augustine BYERS, SARAH C
Spring 2021
In this course we examine questions in epistemology, ethics and metaphysics using major works of Augustine (354-430 AD/CE), supplemented by works of contemporary philosophers on related themes (Kretzmann, Matthews, MacDonald, VanInwagen). We will aim at depth of understanding and breadth of knowledge, contextualizing Augustine as a philosopher of late antiquity in dialogue with the Hellenistic schools (Stoicism, Skepticism, Neo-Platonism) whose philosophy is still of interest today. Topics include the nature of faith, skepticism, the problem of evil, the nature of God, moral development and
conversion, the origin and characteristics of the natural world, including the human soul and body.

**PHIL67001**

**Technology and Culture**

**GRAFFITH, WILLIAM**

**Spring 2021**

This interdisciplinary course will first investigate the social, political, psychological, ethical, and spiritual aspects of the Western cultural development with a special emphasis on scientific and technological metaphors and narratives. We will then focus on the contemporary world, examining the impact of our various technological creations on cultural directions, democratic process, the world of work, quality of life, and especially on the emergent meanings for the terms “citizen” and “ethics” in contemporary society. Students will explore technologies in four broad and interrelated domains: (1) computer, media, communications, and information technologies, (2) biotechnology, (3) globalization, and (4) environmental issues.

**PHIL71501**

**Science in Ancient and Medieval Thought**

**Sweeney, Eileen C**

**Spring 2021**

What counts as ‘science,’ and are the sciences different from the liberal arts? Where did the notion that these two realms of thinking are fundamentally different with different standards of evidence and truth, and different levels of certainty and reliability? This seminar will be an attempt to consider these questions through an exploration of the idea of science and the definitions and methods of the sciences beginning with Aristotle and Augustine and moving through the Middle Ages in such thinkers as Hugh of St. Victor and Roger Bacon, Thomas Aquinas, Bonaventure Scotus and Ockham, Al-Farabi and Al-Ghazali.

PHIL782501
Concepts of God in 20th Century Jewish Thought NISENBAUM, KARIN
Spring 2021
God stands as the central pillar of all monotheistic religions. What kind of being is God(if a being at all)? Jewish philosophers/theologians in the 20th century have offered wide-ranging answers to this question; their different answers have shaped their different approaches to religious life/thought as a whole. We will investigate the different conceptions of God that have been proposed by Jewish philosophers/theologians in the 20th century. These conceptions will range from God conceived as transcendent/ineffable (negative theology), to God conceived as an unlimited whole encompassing everything (pantheism); from God conceived as the unique/perfect being (ethical monotheism), to God conceived as the Eternal Thou or face of the other(jewish existentialism) and many more. We will consider how these conceptions of God relate to and emerge in response to previous conceptions, and will broach the question whether political, cultural, or economic conditions pose special challenges for the formation of conceptions of God. We will draw on works by philosophers such as: Hermann Cohen, Franz Rosenzweig, Emil Fackenheim, Martin Buber, Emmanuel Levinas, Hans Jonas, and more. For each of the conceptions of God we will ask: What is its content? What is its rationale? What kind of life does it call forth? What is its religious/spiritual significance? By broaching one of the most fundamental issues in the phi of religion, this course introduces some of the key figures in 20th century Jewish Philosophy.

PHIL786501
Aristotle's Physics and Metaphysics WIANS, WILLIAM R
Spring 2021
Aristotle consistently distinguishes between physics and metaphysics–between what he calls second and first philosophy. Physics studies natural things--things that change in any of several ways according to an inner principle governing the changes. First Philosophy studies substances that are immovable and unchanging, including primarily but not exclusively Aristotle's god. But though he separates the two sciences in principle, he sometimes moves freely between the two in his arguments and discussions, and thus he often neglect the crucial differences between them, and thus fail to understand Aristotle's full philosophy of nature in relation to the knowledge of what lies beyond it. The course will explore Aristotle's central division between Second and First Philosophy. Its first half will begin with a close reading of the opening books of the Physics, then move on to a consideration of the Unmoved Mover as presented in Physics 7 and 8. The second part of the course will turn to the Metaphysics, particularly its first book and books 7 and 12. By the end of the course, students should grasp how the two disciplines are separated by a fundamental difference in principles, which in turn implies a difference in the degree of knowledge to which each may aspire of its proper objects, but yet not only allows but may even require the intertextual references and resonances in the Physics and Metaphysics.

**PHYS21001**
Introduction to Physics I (Calculus) ENGELBRECHT, JAN
Summer 2020
First semester of a two-semester calculus-based introduction to physics primarily for biology majors and premedical students. The development and application of classical physical principles are covered, and students are introduced to more advanced mathematical techniques to extend these applications. Emphasis is placed on problem-solving to better understand the implications of these principles, as well as to develop analytical skills. Topics include classical mechanics, including Newton's laws, energy, rotational motion, hydrostatics and fluid dynamics, oscillations, waves, and gravitation.

**PHYS21001**

Physics Courses: Fall 2020

PHYS110001
Structure of the Universe I BEDELL, KEVIN
Fall 2020
An introductory course directed at non-science majors. Physical principles are developed and applied to our space and astrophysical environment. Topics include structure and evolution of the solar system, physics of the sun and planets, space discoveries, creation and structure of stars and galaxies, relativity and cosmology, extraterrestrial life, and astronomical concepts.

Credits: 03
Room and Schedule: ONLINE; SYNCHRONOUS; Satisfies Core Requirement: Natural Science
Corequisites: None
Cross-listed with: None Frequency: Annually
Student Level: CORE Comments: None Status: OPEN

PHYS150001
Foundations of Physics I KEMPA, KRZYSZTOF
Fall 2020
First semester of a two-semester algebra-based introductory physics course sequence, primarily for non-science majors, that covers the basic principles of physics. Emphasis is placed on problem-solving to demonstrate the implications of these principles, and to develop analytical skills. This course is similar to PHYS2100 in pace and content but with less emphasis on mathematical technique. First semester covers classical mechanics, including Newton's laws, energy, rotational motion, fluids, thermal physics, oscillations, waves, and gravitation.

Credits: 03
Room and Schedule: ONLINE; SYNCHRONOUS; Satisfies Core Requirement: Natural Science
Corequisites: None
Cross-listed with: None Frequency: Annually
Student Level: CORE
Comments: Recommended laboratory (optional): PHYS2050-2051
Status: OPEN

PHYS160001
Special Projects None
Fall 2020
Individual programs of study and research under the direction of physics faculty members.

Credits: 03
Room and Schedule: BY ARRANGEMENT; Satisfies Core Requirement: None
Corequisites: None
Cross-listed with: None Frequency: Annually
Student Level: UNDERGRAD ELECT
Comments: Credits and requirements by arrangement with the approval of the Chairperson.
Status: OPEN

Vibrations and Waves BURCH, KENNETH S
Fall 2020
This course is an introduction to the phenomena of vibrations and waves that span most of the areas in physics. The basic subject matter includes the following: mechanical vibrations and waves, free and forced vibrations and resonances, coupled oscillations and normal modes, vibration of continuous systems, propagation of mechanical and electromagnetic waves, phase and group velocity, interference and diffraction. The course also covers the basic concepts in first and second order differential equations, matrices, eigenvalues and eigenvectors and Fourier series.

PHYS440001
Quantum Physics I ENGELBRECHT, JAN
Fall 2020
First of a two-semester sequence providing a comprehensive treatment of the principles and applications of non-relativistic quantum mechanics. This semester focuses on basic principles. Topics covered include: historical development of quantum mechanics; the uncertainty principle; the Schrodinger equation and its solution for simple one-dimensional potentials, including constant potentials and the harmonic oscillator; formal presentation of the postulates of quantum mechanics using Dirac notation; commutation relations; basic scattering theory; formulation of Schrodinger equation in three-dimensions, central potentials, orbital angular momentum, and the hydrogen atom; spin angular momentum and the addition of angular momenta.

PHYS454501
Condensed Matter Physics ZELJKOVIC, ILJJA
Fall 2020
Condensed matter physics concerns all aspects of the physics of "condensed" materials, that is, solids, liquids, gels, and plasma. It is the science behind many technologically-relevant applied and integrated science and engineering fields. This course primarily covers the solid state, starting with crystal lattices and their vibrations (phonons), and descriptions of crystalline metals, semiconductors, insulators, and superconductors. It covers in some detail the electrical, magnetic, optical, and thermal properties of materials, and introduces the student to noncrystalline solids and so-called "soft condensed matter."

PHYS460001
Statistical Mechanics and Thermodynamics BROIDO, DAVID
Fall 2020
The results of classical thermodynamics are deduced from a statistical basis, including the concepts of temperature and entropy, and the three laws of thermodynamics. Applications to ideal and real gases. Basic elements of statistical mechanics, including the canonical ensemble, partition function, equipartition theorem and Maxwell velocity distribution. Simple application of Maxwell-Boltzmann, Bose-Einstein, and Fermi-Dirac Statistic.

Matrix algebra, linear vector spaces, orthogonal functions and expansions, boundary value problems, introduction to Green's functions, complex variable theory, and applications.

**PHYS872001 Quantum Computation: Software and Hardware**

**Fall 2020**
The course will be a graduate-level course covering quantum computation and quantum information. Topics include a review of classical and quantum methods, quantum gates, classical and quantum algorithms and quantum supremacy, quantum key distribution, entanglement-as-a-resource, and the physical realization of quantum computers. Prerequisites include undergraduate quantum mechanics and linear algebra.

**Credits:** 03

**Room and Schedule:** HIGGINS HALL 260, T TH 10 30*;

**Satisfies Core Requirement:** None

Assume physical-quantum analytical and quantum physics.

Second semester of a calculus

Spring 2021

Introduction to Physics II (Calculus) GOCHAN, MATTHEW

Second semester of a calculus-based introduction to physics primarily for biology majors and premedical students. The development and application of classical physical principles are covered, and students are introduced to more advanced mathematical techniques to extend these applications. Emphasis is placed on problem-solving to better understand the implications of these principles, as well as to develop analytical skills. Topics are electrostatics, electrical circuits, magnetism, electromagnetism and electromagnetic waves, topics in physical optics, and basic concepts of special relativity and quantum physics.

Credits: 04
Room and Schedule: ONLINE; ASYNOCHRONOUS; Satisfies Core Requirement: Natural Science Prerequisites: MATH1101. (May be taken concurrently). Corequisites: PHYS2111. Cross-listed with: None Frequency: Annually Student Level: CORE Comments: PHYS2051 is the laboratory course to supplement the lecture course material. No class on 07/04/2017, make-up class is scheduled on 07/05/2017. Status: OPEN

<td>Second semester of a calculus-based introduction to physics for those majoring in the physical sciences. Students utilize analytical reasoning combined with mathematical formalism to fully explore the development, consequences, and limitations of the classical principles of physics; similar to PHYS2101 in pace and content but at a greater depth appropriate for physical science majors. Class size is limited to promote classroom discussion. Topics include fundamentals of electrostatics, simple electrical circuits, magnetism, electromagnetism and electromagnetic oscillations and waves, and selected topics in physical optics.</td>

<td>None</td>
<td>Prerequisites: None Corequisites: None Cross-listed with: None Frequency: Annually</td>
<td>This course is a transition between introductory and advanced physics courses for science majors. The basic subject matter includes the two principal physical theories of the twentieth century—relativity and quantum mechanics. Included are the following: the Lorentz transformation, kinematic consequences of relativity, origin of the quantum theory, one- dimensional quantum mechanics, quantum mechanics of a particle in three dimensions, applications to the hydrogen atom and to more complex atoms, molecules, crystals, metals, and semiconductors.</td>

<td>Prerequisites: None Corequisites: None Cross-listed with: None Frequency: Annually</td>
<td>This course introduces students to a variety of numerical methods and then applies these methods to solve a broad range of scientific problems. These problems include examples from physics as well as several other disciplines, including chemistry, mathematics, economics, and finance. Numerical techniques for solving problems expressed in terms of matrix, differential and integral equations will be developed. Other topics will include statistical sampling and Fourier and Laplace transforms.</td>

<td>Prerequisites: None Corequisites: None Cross-listed with: None Frequency: Annually</td>
<td>To provide students with the background in electricity and magnetism necessary to deal with experimental problems in electromagnetism. Part 1 will present the mathematical foundations for the entire treatment of electromagnetism. Part 2 deals with Coulomb's law and the electrostatics based on this law. Part 3 addresses stationary currents and magnetostatics. Part 4 deals with induction and quasi-stationary phenomena, self- and mutual-induction. Part 5 presents a treatment of Maxwell equations and the consequences of these equations, e.g., energy and momentum conservation, Plane waves, reflection, and refraction. Time permitting, we will discuss radiation from moving charges.</td>

<td>Prerequisites: MATH2202. With permission of the Instructor. Corequisites: None Cross-listed with: ECON2215 Frequency: Annually</td>
<td>The course includes experiments in optics, solid state physics, nuclear physics, spectroscopy, x-ray, and electron diffraction. Students will carry out independent projects aimed at acquiring a sound understanding of both the physical principles involved in each subject area and of the principles and problems of modern experimental physics.</td>

PHYS440101
Quantum Physics II TAFTI, FAZEL
Spring 2021
Second semester of the PHYS4407-4408 sequence, focusing on applications. Topics covered include: treatment of the many-particle systems, including effects of spin and symmetry of the wave function; many-electron atoms and the periodic table; basic elements of quantum statistics; approximation techniques, including non-degenerate and degenerate perturbation theory and the variational principle; time-dependent perturbation theory and the interaction of electromagnetic radiation with matter.

PHYS495101
Senior Thesis BEDELL, KEVIN
Spring 2021
A semester-long project in the course of which a student carries out an investigation and research of an original nature or formulates a mature synthesis of a topic in physics. The results are presented as a written thesis, which the student will defend in an oral examination. This course is highly recommended for majors considering graduate study in physics.
Credits: 03
