The Boston College University Catalog contains current information regarding the University calendar, admissions, degree requirements, fees, regulations, and course offerings. It is not intended to be and should not be relied upon as a statement of the University’s contractual undertakings.

Boston College reserves the right in its sole judgment to make changes of any nature in its program, calendar, or academic schedule whenever it is deemed necessary or desirable, including changes in course content, the rescheduling of classes with or without extending the academic term, cancelling of scheduled classes and other academic activities, and requiring or affording alternatives for scheduled classes or other academic activities, in any such case giving such notice thereof as is reasonably practicable under the circumstances.

Boston College is committed to providing information in a manner that is accessible to all. If you are in need of a printed copy of the material presented in the University Catalog, please contact the Office of Student Services for a printout of the website.

Student Services can be reached by e-mail, phone, or mail:

- E-mail: studentservices@bc.edu
- Phone: 617-552-3300 or 800-294-0294
- Address: Boston College, Office of Student Services, Lyons Hall 103, 140 Commonwealth Avenue, Chestnut Hill, MA 02467
Undergraduate Programs

With more than a hundred undergraduate majors, concentrations, and minors, Boston College students have the opportunity to complete degrees in diverse and wide-ranging areas of study. In addition to courses taken for majors, minors, and electives, students also engage with the Core Curriculum, allowing students to step out of their comfort zone and fostering the Jesuit ideal of educating the whole person.

Boston College is committed to providing information in a manner that is accessible to all. If you are in need of a printed copy of the material presented in the University Catalog, please contact the Office of Student Services for a printout of the website.

Carroll School of Management, Undergraduate Programs

Founded in 1938, Boston College’s Carroll School of Management educates undergraduate students for careers in the various disciplines of management, as well as graduate students and practitioners who seek deeper insights into a complex global economy. The School has a dual mission: to carry out both top-level teaching and cutting-edge research. It sees this mission as a collaborative effort among faculty, staff, and students, in engagement with alumni and other management practitioners.

A Carroll School education is a lively blend of the liberal arts and the functional areas of management. Undergraduates are introduced to a broad slate of topics related to accounting, economics, finance, information systems, business law, marketing, and other disciplines. But they are also encouraged to branch out and delve into subjects ranging from history and literature to natural science and the fine arts. Academic rigor and close interaction with faculty go hand in hand with this multidisciplinary approach.

Situated within a Jesuit liberal arts university, the Carroll School helps its students cultivate the habits of intellectual discernment along with a commitment to service and the public good. There are numerous opportunities for students to apply their specialized knowledge to a vast array of human, social, and organizational challenges.

In keeping with its philosophy of undergraduate management education, the Carroll School aims to:

- Teach analytical reasoning, problem solving, and communication skills to create effective leaders.
- Inform students of the latest advances in accounting, finance, data analytics, marketing, operations, and many other fields.
- Help students carve out a specialization in one or more fields, making them ready for management practice and leadership upon graduation.
- Provide them with the tools and inspiration to seek out, develop, and experiment with innovative ideas drawn from a wide mix of sources.
- Create a variety of programs that allow students to gain hands-on experience and apply theory to practice. Specialized research and education centers provide many of these opportunities.
- Develop a multicultural and global outlook, attentive to the needs of diverse communities and a fast-changing world.
- Emphasize the ethical responsibilities of managers and business and assist students in the development of their capacity for moral reasoning.
- Inculcate the habits of lifelong learning and self-reflection.

Through the curriculum and other offerings, Carroll School students are taught to value both knowledge and wisdom, both hard skills and broader insights. They emerge from Boston College as capable professionals and thoughtful leaders ready to make a difference in their organizations and in their world.
Information for First Year Students

In most ways, the first year in the Carroll School of Management resembles the first year in the Morrissey College of Arts and Sciences. Carroll School of Management freshmen are expected to focus their study on aspects of the University's Core curriculum (described in the University Policies and Procedures section); the study of courses required in the Management Core, with the exceptions noted below, usually begins in earnest in sophomore year.

All Carroll School freshmen will enroll in PRTO1000 Portico, a 3-credit course, offered in the fall semester, which combines an introduction to business with ethics and attention to globalization.

During freshman year, Carroll students should also complete the Writing Seminar and Literature Core requirements, the Mathematics Core, and Business Statistics (OPER1135). These five courses, or their equivalent via Advanced Placement, along with ISYS1021 Digital Technology, are indispensable in the first year. Note that there is no necessary sequence for the above-mentioned courses; they may be taken in any order, either semester, during the first year.

What other courses should a freshman pursue? Students contemplating study abroad should be aware that some programs require a language proficiency and may want to consider taking a relevant language course(s). However, beginning with the class of 2022, the Carroll School no longer has a language requirement.

Freshmen should also consider enrolling in one of the University's hallmark programs, PULSE and Perspectives, which fulfill both the Philosophy and the Theology Core requirements. Perspectives, with the exception of one sophomore section, is restricted to freshmen; PULSE may be taken at any time except senior year.

Other possibilities for freshman year include the History sequence, Principles of Economics (ECON1101) plus one other Social Science core class, and a pair of science courses.

While the preceding remarks capture a range of possibilities, even greater possibilities await a student possessed of Advanced Placement, transfer, or International Baccalaureate credit. Such students should consult carefully with the Senior Associate Dean and their faculty orientation advisor in crafting a plan of study for first year.

Management Core Courses

Note: There are curricular changes for the Class of 2022 and beyond; please note them below.

- PRTO1000 Portico (freshman, fall)
- OPER1135 Business Statistics (freshman)
- ECON1101 Principles of Economics (freshman or sophomore)
- ISYS1021 Digital Technology (freshman)
- ACCT1021 Financial Accounting (sophomore or freshman, fall)
- ACCT1022 Managerial Accounting (sophomore)*
- OPER2235 Modeling for Business Analytics (sophomore)**
- BSLW1021 Introduction to Law (sophomore or junior)
- MGMT1021 Organizational Behavior (sophomore or junior)
- OPER1021 Operations Management (junior)
- MFIN1021 Fundamentals of Finance (junior)
- MKTG1021 Principles of Marketing (sophomore or junior)
- MGMT3099 Strategic Management (senior)
- 4–6 CSOM concentration courses (junior, senior)
12 credits of MCAS Electives

With the exception of MGMT3099 Strategic Management, all Management Core courses usually are completed by the end of the junior year. Students who have transferred, who have done a semester or a year abroad, or who have had deficiencies may have to modify their schedules somewhat.

Students pursuing a minor in the Morrissey College of Arts and Sciences or the Lynch School of Education and Human Development may elect to eliminate one of the Carroll School core management courses. Students who complete the pre-medical program requirements (without a major or minor in MCAS) are eligible for this incentive as well. A student pursuing a major in the Morrissey College of Arts and Sciences may elect to eliminate two of the Carroll School core management courses. Selection of the eliminated courses must be done with advising from the Associate Dean's office. No one may eliminate Portico, Financial Accounting, Statistics, or Principles of Economics. Note: Students are not eligible to combine any of the incentives above (i.e., a student with two minors may not eliminate two courses.)

Prerequisites, which are listed in the individual course descriptions, must be followed.

*Beginning with the class of 2022, Managerial Accounting will no longer be required except for students concentrating in Accounting.

**Required core course for the classes of 2022 and 2023. Beginning with the Class of 2024, OPER2235 Modeling for Business Analytics is no longer required for the core and will be replaced by OPER2021 Coding for Business.

Satisfactory Academic Progress

All students must complete 120 credits for graduation.

To continue enrollment in a full-time program of study, a student must maintain a cumulative grade point average of at least 1.5 as the minimum standard of scholarship and must not fall more than 6 credits behind the total number of credits a student of their status is expected to have completed. For example, a first semester sophomore student must have completed at least 24 credits during the freshman year. Any student who is permitted by the dean to continue enrollment in a full-time undergraduate program is considered to be in good standing.

Failure to maintain good standing either through a low cumulative grade point average or by incurring excessive deficiencies including failures, withdrawals, or unapproved underloads will result in the student's being placed on probation or being required to withdraw, as the Academic Standards Committee or the Dean shall determine.

A student on probation may return to good standing by approved methods (e.g., make-up of credits via approved summer school work; students may make up no more than 10 credits in summer study). A student who incurs additional failures or withdrawals or carries an unapproved underload while on probation may be required to withdraw from the School at the time of the next review.

Morrissey College of Arts and Sciences Major

Students who have a very strong interest in an area in Arts and Sciences may complete a major in the Morrissey College of Arts and Sciences by careful use of their electives. For example, it is possible to graduate with a concentration in Finance and a major in Philosophy or History. Students interested in this option should contact the Carroll School of Management Undergraduate Senior Associate Dean and the department chairperson in the Morrissey College of Arts and Sciences as early in their studies as possible.
Pre-Medical Studies

Carroll School students are also eligible to pursue a pre-medical course of study in addition to their management curriculum.

International Study

Studying and living in another country enables students to broaden their horizons and experience a different culture, and Carroll School of Management students who have a 3.0 GPA or higher are eligible to study abroad during their junior year. During the spring semester of freshman year, the Dean's Office sponsors an annual program for management students interested in studying abroad; a subsequent fall semester program for first semester sophomores complements the first-year program. All students interested in international study should visit the Office of International Programs early in their sophomore year.

The Office of International Programs administers a growing number of programs for Boston College including course-based summer programs for those who desire a shorter abroad experience or cannot go during the regular academic year. Carroll School of Management students may avail themselves of opportunities for study in excellent institutions in the Pacific Rim, continental Europe and the United Kingdom, South America, and Eastern Europe, among others. See elsewhere in this Catalog for a full listing.

Special Programs

Pre-Professional Studies for Law

Pre-Law students need clear reasoning power, a facility for accurate expression, a mature balance of judgment, and the ability to appreciate the moral, social, and economic problems related to the administration of justice in modern society. The Carroll School of Management offers an ideal opportunity to develop these qualities both through the Liberal Arts Core and specialized management courses, notably those case style courses which place a premium on analytical powers and a capacity in both oral and written expression.

Carroll School students interested in law should contact Salvatore Cipriano, Assistant Director for Career Engagement, in the Career Center, and the University's pre-law advisor.

The Ethics Initiative

In addition to PRTO1000 Portico, many regular Carroll School of Management courses integrate ethical issues in business and management. Elective courses in accounting, marketing, law, and operations are focused on ethical issues specific to those disciplines.

The Winston Center for Leadership and Ethics offers annual lecture, seminar, and workshop programs on ethics and leadership for undergraduate students.

Summer Management Catalyst Program

The Carroll School of Management Summer Management Catalyst Program is an intensive, full-time, 9-week program designed to develop a solid and broad foundation in the functional areas of management for non-management students.

Participants take three full courses and a career practicum that covers a wide range of business management topics, including management, accounting, finance, marketing, ethics, law, Excel, big data, and career skills.

Additional information and application can be found at: www.bc.edu/catalyst.
Program Benefits

- Learn how organizations operate and develop management skills to contribute to complex, not-for-profit, business, and government entities.
- Complete three core management courses in one summer and receive 9 credits through the completion of 3 full courses—ideal for students who find it difficult to fit management courses into their schedule and students interested in completing a Carroll School minor.
- Develop career strategies in building your personal brand through sessions on skills assessment, writing resumes and business letters, interviewing skills, effective networking, and employer panels.
- Attend a Catalyst-exclusive Career Networking Night with employers from a wide array of industries looking to recruit Catalyst students specifically.

Stand out in the competitive job market for internships or full-time positions with enhanced credentials from the summer program, including Excel and exposure to programming languages.

Carroll School of Management Dean's Office Courses

PRTO1000 Portico (Fall: 3)

This course is required for all Carroll School students and must be taken in the fall semester of their first year at BC. Portico fulfills the Carroll School ethics requirement.

This is the introductory course for Carroll School of Management’s first year students. Topics will include ethics, leadership, globalization, economic development, capitalism, innovation, entrepreneurship, vocational discernment, and the functional areas of business. This will be an interactive 3-credit seminar, serving as one of the five courses in the fall semester and fulfilling the ethics requirement for the Carroll School. The instructor will serve as academic advisor during the student’s first year.

The Department

BCOM1116 Business and Professional Speaking (Fall/Spring: 3)

This course is designed to be an introduction to the theory, composition, delivery, and criticism of speeches. Individual as well as group speaking assignments will be used to help the student become more comfortable and confident in speaking situations. The following areas will be developed: the uses of evidence, the development of clear organizational structure, and the development of a dynamic presentation style. The student will also examine speaking from the audience perspective and learning ways to analyze and evaluate the oral presentations of others.

Stacy Schwartz

BCOM3688 Communication for Consultants

The course is designed for juniors and seniors who are planning on consulting (or client facing) careers.

This course explores the communication challenges and opportunities consultants encounter when they work with internal or external clients. Students learn practical business writing and presentation skills specifically related to engagement activities. There is a strong focus on assessing audience needs, analyzing case studies, and determining the value of a communication with a client. Students produce a variety of communications including project proposals, statements of work, instructions, routine project correspondence, progress reports, formal reports, panel presentations, and post-implementation reviews. Students must have demonstrated strong writing skills in English.
Rita Owens

BCOM6688 Business Writing and Communication Skills for Managers (Fall/Spring: 3)

Restricted to CSOM

The course focuses on the type of communication done on the job, especially in corporations. Business assignments are used to illustrate appropriate writing and communication strategies, protocols, styles, and formats. Students work alone and in collaboration with others around a variety of assignments and tools including traditional paper reports, electronic materials, e-mails, social media, and oral presentations. By the end of the semester, students will be proficient in producing business letters, instructions, reports, proposals, and visual materials.

Rita Owens

PRTO2401 Free Markets, Faith, and the Common Good (Spring: 3)

If sharing our gifts, pursuing justice, and acting on our concern for the poor and marginalized of society are core values of Jesuit-trained students, to what extent is free market capitalism a good "fit" for helping us meet those goals? In this course, we will explore several key moral and philosophical foundations of free market capitalism. These arguments will then be placed in dialogue with central insights contained in Catholic social teaching, especially the principles of human dignity, solidarity, the preferential option for the poor, and the common good.

Joseph Cioni

PRTO4307 Happiness in a Commercial Society (Spring: 3)

The aim of this course is to introduce students to the interdisciplinary study of human well-being as it applies to the domains of contemporary business and commercial life. The course will include philosophical, psychological, and social scientific inquiries into human flourishing, as well as the nature of meaningful work, the relationship between wealth and happiness, and the application of well-being measures to thriving economic and political institutions.

Michael Smith

Jeremy Evans

PRTO4901 Special Topics: The Ethics of Capitalism (Spring: 3)

This course explores the philosophical basis and moral implications of contemporary commercial life. Along the way, we will consider the role of business in society, the relationship between capitalism and democracy, and the ethics of consumption, among other issues where market values intersect public and private virtues.

Michael Smith

Jeremy Evans

UGMG1010 Perspectives on Management (Spring: 3)
This course, taught by practitioners John Clavin (BC ’84) and Jere Doyle (BC ’87), provides BC students with an excellent opportunity to explore the functional disciplines of business from a real-world perspective. Using a combination of lectures, case studies, readings, and outside speakers, the course provides students the opportunity to get grounded in each of the CSOM concentrations while gaining outside views on careers in related fields and industries. The course will also provide a framework to explore and discuss cross-functional issues that impact business strategy and execution. This is a highly interactive class that places a premium on both preparation and participation each week. The course is initially open to CSOM sophomores but normally has availability for juniors and seniors across all undergraduate majors.

John Clavin

Jeremiah Doyle

UGMG2222 Career Accelerator (Fall/Spring:1)

Restricted to sophomores and second semester freshmen in the Carroll School of Management

It is a 1-credit pass/fail course consisting of eight 90 minute sessions designed to ensure that you learn the following: how to identify your top skills/interests and explore career fields that are a good match; write an effective resume/cover letter; how to talk about yourself to employers; how to network effectively and utilize the BC Network; how to interview to get the job—you will learn about interviewing from employers/upperclassmen and conduct a video mock interview; how to dress to impress—learn from a professional stylist what you need to wear to all these different employer and networking events; how to make a positive first impression; how to use social media to your advantage—you will develop a strong LinkedIn page and learn how to convey a positive image through social media, as well as how to use social media to network with the right people. It features employers/alumni and expert speakers on using social media and how to dress for success.

Amy Donegan

Madeline Cortes

Co-concentration in Entrepreneurship

Are you interested in revolutionizing markets or joining a firm that does? The entrepreneurship co-concentration provides a strong background for launching and managing high-growth ventures in nascent or high-velocity industries. The curriculum introduces a set of tools and a way of thinking that will help students navigate the uncertain, ambiguous contexts that often characterize new initiatives in established firms as well as start-ups.

The Entrepreneurship co-concentration is designed to be a second concentration for Carroll School of Management students. Up to one class from the co-concentration course list can be counted towards another concentration.

Required Courses

The courses in the co-concentration include the following:

Required:

- MGMT2170 Entrepreneurial Management

Choose one of the following courses:
Choose two electives from the following list or any not previously taken from above:

- BSLW6604 Law for the Entrepreneur
- ISYS3178 Special Topics: Design Thinking
- ISYS3205 TechTrek West
- ISYS3206 TechTrek East
- ISYS3253/MKTG3253 Digital Commerce
- ISYS6621/MKTG6621 Social Media, Emerging Technologies, and Digital Business
- ISYS6640/MKTG6640 Analytics and Business Intelligence
- MGMT2123 Negotiation
- MGMT2139 Social Innovation and Entrepreneurship
- MKTG3156 Special Topics: Launching Digital Marketing
- MKTG3158 Product Planning and Strategy
- MKTG3170 Entrepreneurial Marketing
- UGMG1010 Perspectives on Management
- UNAS1025 Innovation Through Design Thinking

**Managing for Social Impact and the Public Good**

The Managing for Social Impact and the Public Good co-concentration is jointly sponsored by the Business Law and Society, Information Systems, and Marketing departments. It is designed to be a second concentration for Carroll School of Management undergraduate students, who must first choose a primary concentration such as Accounting, Finance, Information Systems, Management and Leadership, Marketing, or Operations Management.

Managing for Social Impact and the Public Good aims to provide Carroll School students with a well-defined, interdisciplinary co-concentration focused on analyzing the multifaceted impacts of today’s global corporations, social enterprises, public sector, and nonprofit organizations.

In successfully completing this co-concentration, students will:

- Develop a theoretical and practical understanding of the extended social impacts of global corporations and why responsible enterprise values and the public good are relevant for all stakeholders
- Learn to apply research and critical thinking to understand the challenges, benefits, and current practices in corporate social responsibility
- Explore the philosophical, ethical, legal, economic, and ecological implications of the decisions made by corporate and public sector global leaders through case studies, readings, and class discussions
- Understand the challenges, available tools and innovative models for managing social impacts and balancing stakeholder value in a variety of corporate, nonprofit, and public sector organizations
- Develop and articulate a personal vision for integrating moral decision-making, social justice, citizenship, and responsible management in their future professional lives

**Course Requirements**
This co-concentration requires four courses (representing at least 12 credits), two of which are required and two of which are electives. In accordance with the interdisciplinary nature of Managing for Social Impact and the Public Good, students in this co-concentration will select their two electives from a list of courses jointly approved by the Carroll School of Management and participating departments in the Morrissey College of Arts and Sciences. The MCAS elective courses taken for credit toward completing this co-concentration cannot be counted toward fulfilling other Boston College or MCAS course distribution requirements.

The following two Carroll School courses are required:

- BSLW3345 Managing for Social Impact (fall/spring)
- BSLW6001 Leading for Social Impact (spring of senior year)

In addition, students must take two approved MCAS elective courses (for a total of at least 6 credits). Students can choose from over 150 electives, which appear on a list that is updated every semester on our website at the following link:

www.bc.edu/content/bc-web/schools/mcas/sites/msi-pg/minor.html

- Digital Economy, Social Innovation and Citizenship
- Economic Development, Equality and Enterprise
- Environmental and Economic Sustainability

**Study Abroad**

A course taken during a semester abroad may be approved as an elective counting toward the Managing for Social Impact co-concentration, but such courses must be pre-approved by the directors of the program before enrollment if they are to be counted. After a student completes the pre-approval process, credit for courses taken abroad will only be granted upon the student's return from the program, based on the graded work completed for the course.

**Declaring the Co-Concentration**

Students interested in the co-concentration can declare it at the Undergraduate Dean's office after filling out an interest form in Fulton 460. Students must declare the co-concentration by October 15 of their junior year. After that date we cannot guarantee a spot in the required foundation course.

For questions about the Managing for Social Impact co-concentration, contact Professor Lourdes German at germanl@bc.edu.

**Accounting**

The objective of the accounting curriculum sequence is to prepare the undergraduate accounting concentration for a career in accounting or a related field. This curriculum is broad in scope and coverage, so it is relevant and useful for a career in public accounting, industry, financial institutions, government, information systems, law, or not-for-profit organizations.

There are three concentrations housed in the Accounting Department: (1) Accounting, (2) Accounting for Finance and Consulting, and (3) Accounting and Information Systems. Students will not be allowed to concentrate in more than one of these.

Students outside of CSOM will be able to complete one of two minors in accounting. The requirements for a minor are based on a selection of the required and elective courses for the Accounting and the Accounting for Finance and Consulting concentrations.
Concentration in Accounting

This is the primary concentration of the department, and it is intended to prepare students for a professional career in public accounting, industry, financial institutions, government, information systems, law, or not-for-profit organizations. The curriculum is broad in its scope and coverage, so it is relevant and useful for a variety of careers. Students intending to pursue a Certified Public Accountant (CPA) designation should choose this concentration.

Objectives

The objectives of the Accounting Concentration are as follows:

1. Prepare the student to successfully pass the CPA exam. The exam includes four parts, covering auditing and attestation (AUD), business environment and concepts (BEC), financial accounting and reporting (FAR), and regulation (REG). The course requirements for the concentration provide a sound basis for preparing students to successfully pass each section of the exam.

2. Provide a broad-based understanding of the use of accounting data and information by managers and others for decision-making. Passing the CPA exam and becoming a licensed accountant opens the door for many careers in addition to professional accounting. The CPA designation not only signals a specific set of skills but is also indicative of the dedication and rigorous analytical skills useful in numerous non-accounting pursuits. Although most graduates with an Accounting Concentration begin their careers in public accounting, the long-term career options are diverse, and our graduates now hold key positions in corporate finance, human resources, marketing, economics, entrepreneurship, government, education, and many other fields.

Required 15 credits hours in:

- ACCT1022 Managerial Accounting
- ACCT3301 Financial Accounting Standards and Theory I
- ACCT3302 Financial Accounting Standards and Theory II
- ACCT3307 Managerial Cost and Strategic Analysis
- ACCT4405 Federal Taxation

And at least 3 credits from one of the following four courses only:

- ACCT3309 Audit and Other Assurance Services*
- ACCT3351 Financial Statement Analysis
- ACCT6601 Financial Accounting Standards and Theory III
- ACCT6618 Accounting Information Systems

*Auditing is a requirement to sit for the CPA exam in all states, and a requirement for admission to the Boston College Master of Science in Accounting (MSA) program.

Most states require from eight to eleven accounting classes (24 to 33 accounting credit hours) in order to be qualified as a Certified Public Accountant (CPA). Because the accounting concentration requires only six accounting classes (18 credits), in addition to ACCT1021 Financial Accounting (3 credit hours) included in the CSOM core, a student must take additional accounting classes. The department offers a number of accounting electives that students can take to satisfy their CPA requirements.

- ACCT3309 Audit and Other Assurance Services
- ACCT3351 Financial Statement Analysis
The Accounting for Finance and Consulting Concentration builds on the CSOM core curriculum and is a great complement to many other concentrations, including finance, marketing and operations management. Students with this concentration can pursue a wide variety of careers in business, including financial analysis, investment banking, consulting, marketing, and management training programs. Skills learned in this concentration position students for greater upward mobility in their career paths since the need for managers with an understanding of financial statements and financial reporting is evergreen. This concentration is designed to teach users of financial statements (rather than preparers of financial statements) how accounting information, shaped by regulation, has advantages and limitations in assessing the economics of an underlying business.

Objectives

The objectives of the Accounting for Finance and Consulting Concentrations are as follows:

(1) Expand and deepen your knowledge of external financial reporting and choices that managers make in preparing information for SEC filings. The knowledge is critical for both those who plan to use financial statements to value companies and those whose jobs require an understanding of how business decisions affect financial statements.

(2) Provide an understanding of the accounting data and information managers use for internal decision-making. For students interested in marketing or consulting, this knowledge enables you to accurately assess the true costs of producing a product or service and to identify the relevant information for make-versus-buy decisions. You will develop skills needed to accurately forecast revenues, expenses, and product demand. You will also understand how to set important organizational controls.

(3) Provide students with the financial tools and accounting savvy needed to converse with upper level management about the operation of the firm.

Guidelines and Courses

This concentration requires four courses (12 credit hours) one intermediate accounting course, one required elective in either managerial cost analysis or financial statement analysis, and two other electives from a set of approved electives in accounting, finance, operations, or economics.

Required 3 credit hours in:

- ACCT3321 Intermediate Accounting for Finance and Consulting*

And at least 3 credit hours from one of the following:
And at least 6 credit hours from two of the following:**

- ACCT3307 Managerial Cost Analysis OR ACCT3351 Financial Statement Analysis***
- ACCT3309 Audit and Other Assurance Services
- ACCT4405 Federal Taxation
- ACCT6601 Financial Accounting Standards and Theory III
- ACCT6618 Accounting Information Systems
- ACCT6623 Fair Value Accounting and Measurement
- ACCT6626 Taxes and Management Decisions
- ACCT6635 Forensic Accounting
- ACCT6640 Dive, Dissect, and Decide with Big Business Data
- ECON2228 Econometric Methods
- MFIN2235 Investment Banking (fulfills Finance “Bucket” elective)
- MFIN6616 Investment Banking (fulfills Finance “Other” elective)
- OPER3384 Predictive Analytics
- OPER6606 Forecasting Techniques

*Note: ACCT3301 FAST I will be accepted as a substitute for ACCT3321, but then you must also take ACCT3302 FAST II as one of your electives.

**A maximum of one elective can count towards the requirements of two different concentrations.

***Both classes may be taken, and the second one will count as an elective.

Concentration in Accounting and Information Systems

Employers continually emphasize the value of graduates who understand both business and the information system (IS) that supports it. While IS professionals develop competence in the design and implementation of business information systems, accountants have a broad understanding of the business process and controls and how the systems are used to generate information for decision making. Having the two skill sets is invaluable.

Students fulfilling this concentration will satisfy all of the requirements for the IS concentration and also obtain a background in Accounting. The curriculum entails six courses (five required and one Accounting elective) and is designed for students interested in careers either with the consulting divisions of professional service firms, such as major accounting firms and IS departments of companies, or as IS auditors. Students are advised to see a faculty advisor in selecting an appropriate Accounting elective. This concentration is administered jointly by the Accounting Department and the Information Systems Department.

Required 15 credit hours in:

- ACCT3301 Financial Accounting Standards and Theory I
- ACCT6618/ISYS6618 Accounting Information Systems
- ISYS2157 Programming for Management and Analytics (or CSCI1157)
- ISYS3257 Database Systems and Applications
And at least 3 credit hours from one of the following:

- ACCT3302 Financial Accounting Standards and Theory II
- ACCT3307 Managerial Cost and Strategic Analysis
- ACCT3309 Audit and Other Assurance Services
- ACCT3351 Financial Statement Analysis
- ACCT6640 Dive, Dissect and Decide with Big Business Data

**Accounting for CPAs Minor**

This minor is for students who are interested in working in public accounting. Please note: To meet the CPA requirements, students will need several courses beyond the minor.

The objective of the accounting curriculum sequence is to prepare a student for a professional career in public accounting, industry, financial institutions, government, information systems, law, or not-for-profit organizations. The curriculum is broad in its scope and coverage so it is relevant and useful for a variety of careers. Students intending to acquire a Certified Public Accountant (CPA) designation should choose this concentration as a way to start to satisfy the many CPA requirements. For more information, see the discussion of the Accounting Concentration.

**Please note:** This MCAS minor does not ensure that a student meets all requirements for sitting for the CPA exam. For instance, most states require a significant number of general business classes to sit for the CPA exam. This minor is only meant to give an MCAS student a start on meeting the many requirements.

**Required 18 credit hours in:**

- ACCT1021 Intro to Financial Accounting
- ACCT3301 Financial Accounting Standards and Theory I
- ACCT3302 Financial Accounting Standards and Theory II
- ACCT3307 Managerial Cost Analysis
- ACCT3309 Auditing and Other Assurance Services
- ACCT4405 Federal Taxation

**Accounting Department Electives**

- ACCT1022 Managerial Accounting
- ACCT3309 Audit and Other Assurance Services
- ACCT3351 Financial Statement Analysis
- ACCT3399 Directed Readings and Research
- ACCT4409 Advanced Auditing
- ACCT6601 Financial Accounting Standards and Theory III
- ACCT6615 Advanced Federal Taxation
- ACCT6618 Accounting Information Systems
- ACCT6623 Fair Value Accounting
- ACCT6626 Taxes and Management Decisions
Accounting for Finance and Consulting Minor

The Accounting for Finance and Consulting minor leverages the critical thinking and communication skills developed in the MCAS curriculum, providing students with key skills that distinguish them for other new hires in financial services or consulting. It also provides students with an advantage in graduate business programs.

Objectives:

The objectives of the Accounting for Finance and Consulting minor are:

1. Develop your knowledge of external financial reporting and choices that managers make in preparing information for SEC filings. This knowledge is critical for both those who plan to use financial statements to analyze or value companies and those whose jobs require an understanding of how business decisions affect financial statements.

2. Provide an understanding of the accounting data and information managers use for internal decision-making. For students interested in consulting, this knowledge enables you to accurately assess the true costs of producing a product or service and to identify the relevant information for make-versus-buy decisions. You will develop skills needed to accurately forecast revenues, expenses, and product demand. You will also understand how to set important organizational controls.

3. Provide students with the financial tools and accounting savvy needed to converse with upper level management about the operations of the firm.

Requires 18 credit hours:

Required Courses:

- ACCT1021 Financial Accounting
- ACCT3321 Intermediate Accounting for Finance and Consulting*

Choose a Track:

Consulting Track

- ACCT1022 Managerial Accounting
- ACCT3307 Managerial Cost Analysis

Finance Track

- MFIN1021 Fundamentals of Finance
- ACCT3351 Financial Statement Analysis
Two electives from the following list:**

- ACCT1022 Managerial Accounting
- ACCT3307 Managerial Cost and Strategic Analysis
- ACCT3351 Financial Statement Analysis
- ACCT4405 Federal Taxation
- ACCT6601 Financial Accounting Standards and Theory III
- ACCT6623 Fair Value Accounting and Measurement
- ACCT6626 Taxes and Management Decisions
- ACCT6635 Forensics Accounting
- ACCT6640 Dive, Dissect, and Decide with Big Business Data
- OPER3384 Predictive Analytics
- OPER6606 Forecasting Techniques
- ECON2228 Econometric Methods
- MFIN2235 Investment Banking
- MFIN6616 Investment Banking

*ACCT3301 FAST I will be accepted as a substitute for ACCT3321, but then you must also take ACCT3302 (FAST II) as one of your electives.

**Electives may also include both courses from the other track.

Information for Study Abroad

Given the international scope of the profession, Accounting concentrators are encouraged to study abroad. The Accounting Department may recognize certain Core and elective courses for transfer to BC, depending on the circumstances, but students are encouraged to take accounting courses at Boston College. Prior approval is required. All Accounting concentrators should meet with the department assistant chair, department chair, or administrative assistant to plan their study abroad programs and to obtain definitive course approvals.

CPA Recommendations

The Department recommends that students who intend to practice as Certified Public Accountants (CPAs) check the board of accountancy of the state in which they plan to practice for its specific educational requirements (www.nasba.org). In almost all states, students are now required to complete 150 semester hours of course work to qualify for CPA licensure. In addition, a minimum number of accounting courses with specific topical coverage may be necessary. For more information please refer to the BC Guide to Meeting CPA Requirements available online or in the department office.

Because Boston College students typically graduate with only 120 credit hours (ignoring AP credits and overloads), students may require an extra year of course work in order to meet the 150 credit hours. Boston College offers a Master of Science in Accounting (M.S.) program to meet these additional requirements. For more details on the program, refer to the Boston College M.S. website: www.bc.edu/msa. Students who enter BC with Advanced Placement credits may be able to satisfy the 150-hour requirement in less time. Please contact the Accounting Department in Fulton 520 or via e-mail at csom.accounting@bc.edu if you have any additional questions.
Business Analytics

The Department offers undergraduate and graduate courses in the areas of business analytics and operations management. Undergraduate concentrations are offered in both Business Analytics and Operations Management.

Concentration in Business Analytics

Business Analytics is the emergent capability for organizations in the twenty-first century. All organizations, regardless of industry, size, or operating environment generate and manage large volumes of data and information that, used well, inform the decision making and competitive capabilities of the enterprise. The emerging area of analytics is focused on using business data to examine what already happened, to determine or predict what will happen, and to explore or model what should happen. Successful managers across functional areas, whether finance, marketing, operations, human resources, or information systems, need to be able to understand and utilize business analytics in order to manage and lead effectively.

Business Analytics draws upon a portfolio of methods and tools including statistics, forecasting, experimental design, data mining, and modeling to turn data into information and insights. The business analytics field includes descriptive, predictive, and prescriptive analytics. Descriptive analytics help organizations describe what has happened in their operating environment and includes gathering, organizing, tabulating, and communicating historical information, e.g., how many online subscribers do we have? Predictive analytics helps organizations understand what to do by uncovering relationships and associations in the available data and uses techniques such as probability and forecasting to reveal the likelihood of outcomes. For example, the number of online subscribers increases when we have banner advertising on search sites. Prescriptive analytics is focused on understanding the causal effects that can be discerned from data sets and strives to predict what will happen, given a particular course of action. For example, if we increase our banner advertising and provide one-click subscribing, how will the number of subscribers change?

The Business Analytics concentration builds upon the Carroll School of Management core. The concentration is designed to align with a variety of functional disciplines making Business Analytics an excellent complement to other concentrations including Accounting, Operations Management, Finance, Marketing, Information Systems, or Management and Leadership.

Objectives of the Undergraduate Concentration in Business Analytics

The objectives of the undergraduate concentration are to develop managers who:

- possess a broad and deep understanding of theories and concepts in business analytics
- are adept at data management and analysis
- understand and utilize quantitative techniques for historical analysis, predictive analysis, modeling, and simulation
- are capable of applying analytical skills and knowledge to address management problems across disciplines and industries

Careers in Business Analytics

Rather than simply answering questions about what, how, when, and where things have happened, today’s business analysts are able to push the use of data further, find out why things are happening and what will happen if identified trends continue, and model how an organization can use this information to optimize outcomes. Careers that utilize the skills and knowledge of business analytics continue to emerge and grow in all fields and business disciplines. Students with this concentration may pursue careers in consulting, financial services, healthcare services, accountancy, technology management, government, manufacturing, and not-for-profit organizations. The demand for managers with these skills is strong and will increase as firms continue to recognize that they compete not only with new products and services, but also with a high degree of competence in managing their data, information, and business intelligence.
Business Analytics Concentration Requirements

The following three courses are required:

- ISYS3340 Data Analytics in Practice (fall and spring)
- OPER3384 Predictive Analytics (fall and spring)
- OPER6604 Management Science (fall and spring)

Select two additional courses, excluding any courses taken from above list:

- OPER3310 Sports Analytics (fall and spring)
- OPER6605 Risk Analysis and Simulation (spring)
- OPER6606/MFIN6606 Forecasting Techniques (fall, online, and spring)
- OPER6607 Machine Learning for Business Intelligence (fall and spring)
- OPER6608 Pricing and Revenue Optimization (spring)
- OPER6614 Quality Management (fall)
- ISYS2157 Programming for Management and Analytics (fall and spring) (or CSCI1101)
- ISYS3257 Database Systems and Applications (fall and spring)
- ISYS6621 Social Media, Emerging Technologies, and Digital Business (fall)
- ISYS6625 Geographic Information Systems (fall and spring)
- ISYS6645 Data Visualization (fall and spring)
- MKTG2153 Customer Research and Insights for Marketing Decisions (fall and spring)
- MKTG3161 Customer Relationship Management (fall and spring)
- MKTG3258 Marketing Analytics for Customer Insights (spring)
- ACCT6640 Dive, Dissect, and Decide with Big Business Data (spring)
- MFIN2270 Data Analytics in Finance (fall and spring)

Concentration in Operations Management

Operations Management is a broad and multi-dimensional business area. Highly integrative, Operations Management determines how an organization executes its mission and goals. Operations Management is both an art and a science, tying together quantitative analytical skills with cognitive problem solving.

The Operations Management concentration provides students with knowledge of current issues in the Operations Management discipline. Intense competition in fast-paced global environments makes competencies in this field critical in both service and goods-producing organizations. This concentration is applicable in many industries and organizations, combining knowledge in business analytics, process design and analysis methods, project management, and operations management issues. The curriculum recognizes environmental, ethical, and social issues. The pedagogy entails lectures and discussions, case studies, field studies, and analytical modeling.

The Operations Management concentration builds upon the Carroll School of Management core, particularly complementing courses in statistics, organizational management, and economics. Our courses emphasize analysis and decision making and are explicitly designed to deliver the skills and knowledge required to successfully manage people, processes, and systems in today’s competitive environment.

The concentration is designed to intersect with other functional disciplines making Operations Management an excellent complement to other concentrations including Accounting, Business Analytics, Finance, Marketing, Information Systems, or Management and Leadership.
Objectives of the Undergraduate Concentration in Operations Management

The objectives of the undergraduate concentration are to develop managers who:

- possess a broad and deep understanding of theories and concepts in Operations Management
- are capable of applying skills and knowledge to address management problems
- understand and utilize quantitative and qualitative analysis in decision making
- appreciate the role of operations in an organization and the interrelationships among functional areas

Careers in Operations Management

Operations managers manage both processes and people, with a highly integrative career path tying together analytical decision making with strategic perspectives and the needs of employees and other stakeholders. Our graduates have successfully attained positions in process management and analysis in major companies such as Accenture, Boston Beer, Deloitte, EY, Fidelity, General Electric, Goldman Sachs, IBM, JPMorgan Chase, and UBS. Students with this concentration may pursue careers in consulting, financial services, healthcare services, retail, transportation, technology, government, manufacturing, and not-for-profit organizations. Students with an operations management concentration are typically hired into positions such as Operations Analyst, Project Team Member, Supply Chain Analyst, Consultant, Process Designer, and Management Trainee, as well as positions on the corporate planning staff.

The demand for managers with these skills is strong and will increase as firms continue to recognize that they compete not only with new products, good marketing, and skillful finance, but also with a high degree of competence in managing their operations. Salaries for majors in Operations are and will likely remain competitive with all other concentrations in management.

Operations Management Concentration Requirements

The following two courses are required for the concentration:

- OPER3375 Operations Strategy and Consulting (fall)
- OPER2255 Managing Projects (fall and spring)

Also take two of the following:

- OPER3310 Sports Analytics (fall and spring)
- OPER3332 Supply Chain Management (spring)
- OPER3384 Predictive Analytics (fall and spring)
- OPER6604 Management Science (fall and spring)
- OPER6605 Risk Analysis and Simulation Methods (spring)
- OPER6606 Forecasting Techniques (fall, online, and spring)
- OPER6608 Pricing and Revenue Optimization (spring)
- OPER6614 Quality Management (fall)
- Other Special and Advanced Topic courses as offered

Study Abroad
Although there are no particular prerequisites needed in order to qualify for study abroad, the usual course prerequisites still apply. There is no limit to how many courses taken abroad will be allowed for major credit. If the courses are judged equivalent and if the proposed courses constitute a reasonable selection, major or elective credit will be given.

All students wishing to study abroad must first meet with an advisor from the Office of International Programs (OIP). If accepted into the study abroad program and approved by the Undergraduate Dean's Office, the student should then see Sam Graves, Department Chair, for course approvals before going abroad. When students wish to have a course considered, they should e-mail or bring a copy of the syllabus and course description for approval.

**Business Law and Society**

The Department of Business Law and Society in the Carroll School of Management does not offer a major or concentration. The courses taught by the Department of Business Law and Society are designed to give students a basic understanding of legal procedures and the legal environment of business. Undergraduate students in the Carroll School of Management are required to take Law I—Introduction to Law and Legal Process. This course covers the legal system, the sources of law, business ethics, the regulatory environment of business including antitrust and employment law, securities regulation and corporate governance, the international trade environment, and contract law. Elective courses are offered in a variety of topics that may interest students interested in starting their own business, considering law school, or preparing for the Certified Public Accounting examination. A core course and other electives that relate to concentrations are offered at the graduate level.

**Economics (CSOM)**

The Economics major provides a critical examination of how the economic system works in the United States and throughout the world. The introductory course, ECON1101, is a survey of economic problems, policies, and theory, and the required courses in micro theory and macro theory, ECON2201–ECON2202, give a deeper analytical foundation. Electives permit further study in a wide range of fields, including money and banking, international trade and finance, public sector economics, economic development, capital theory, labor economics, industrial organization, environmental economics, law and economics, and econometrics. Students from the Carroll School of Management may choose Economics as an area of concentration. The Economics minor is not available to Carroll School of Management students. The concentration consists of six courses:

- Principles of Economics (ECON1101)
- Microeconomic Theory (ECON2201 or ECON2203)
- Macroeconomic Theory (ECON2202 or ECON2204)
- Business Statistics (OPER1135)
- And two electives, at least one of which must be an upper level (3xxx) course
- At least one of the Theory courses must be completed by the end of junior year. Exceptions to this requirement may be granted at the discretion of the Director of Undergraduate Studies.

Students with a serious interest in economics are urged to complete the 11-course major in Economics within the Morrissey College of Arts and Sciences. Finally, all Carroll School of Management students, regardless of their area of concentration, are required to take Principles of Economics (ECON1101) and Business Statistics (OPER1135).

The major in Economics provides a general background that is useful to those planning careers in law, government service, or business, as well as those planning careers as professional economists. Professional economists work as college teachers, as researchers for government agencies, for businesses and consulting firms, and as administrators and managers in a wide range of fields.
Accessibility to preeminent finance faculty and cutting-edge academic research are key ingredients to providing undergraduate and graduate students with the tools and methods necessary to expand their understanding of finance. Rigorous training at all academic levels prepares students for the quantitative and analytical challenges in both the business and academic fields.

Concentrations and degrees for qualified students include:

- Undergraduate Concentration in Finance
- Master of Science in Finance
- Ph.D. Program in Finance

Our nationally recognized Finance Department, cited by *U.S. News & World Report* as among the top 15 in the country, hosts the Finance Department Seminar Series featuring top scholars from around the world addressing current research and trends in the field. These weekly seminars provide an engaging forum for students, faculty, and practitioners alike. In addition, informal brown bag lunches are hosted throughout the year by the Department.

Members of the Finance Department consistently facilitate meaningful interaction between students and professionals through an alumni advisement system which supplements faculty advisement in the areas of financial institutions, manufacturing firms, service firms, nonprofit organizations, and government agencies.

**Concentration in Finance**

**Finance Concentration Course Requirements**

*All required finance core courses (1–4) and select elective (5) must be taken in CSOM only.*

**Five Prescribed Courses**

1. MFIN1021 Fundamentals of Finance (formerly Basic Finance) (prerequisite: ACCT1021)

2. MFIN1127 Corporate Finance (prerequisite: MFIN1021)

3. MFIN1151 Investments (prerequisite: MFIN1021)

4. One elective from the following list* *(courses listed below must be taken in CSOM)*

- MFIN2202 Derivatives and Risk Management
- MFIN2205 Corporate Financial Strategies
- MFIN2225 Financial Policy
- MFIN2230 International Finance
- MFIN2235 Investment Banking
- MFIN2250 Fixed Income Analysis
- MFIN2270 Data Analytics in Finance
5. At least 1 elective from any MFIN\textsuperscript{\textcopyright} course offered outside of the required courses or another from the set list above.

* Not every course will be offered each semester. Additional courses may be added to set list in the future. Please pay careful attention to prerequisites which are listed in Course Information and Schedule.

\textsuperscript{\textcopyright} All MFIN66XX electives require senior status and permission from the Department. This requires that seniors visit with Prof. Elliott Smith in Fulton 330B to seek approval, giving consideration to the student’s successful completion of the required prerequisites.

\textit{See Course Information and Schedule for up-to-date course listings.}

Regardless of your concentration, we expect finance concentrators to have understanding in the following areas:

- major investment, financing and governance decisions (e.g., capital structure, merger and acquisitions, dividend, board of directors, etc.) of corporations;
- the risk and return trade-offs in investment and know how to evaluate basic financial products (e.g., stocks, bonds and derivatives);
- the role of financial institutions/intermediaries (e.g., investment and commercial banks, asset management companies) in the financial system;
- the role of financial markets in the economy and the need for efficient regulations.

For more information about the concentration in finance, visit the Finance Department's Academics and Study Abroad page.

**Minor in Finance**

This minor is for non-CSOM students who are interested in learning more finance to be better prepared for careers in financial institutions, service firms, nonprofits, and government agencies.

\textit{Required courses:}

- ACCT1021 Introduction to Financial Accounting
- MFIN1021 Fundamentals of Finance (formerly Basic Finance) (sophomore or junior year)
- MFIN1127 Corporate Finance (prerequisite: MFIN1021) (junior or senior year)
- MFIN1151 Investments (prerequisite: MFIN1021) (junior or senior year)

One elective from the following list* (\textit{courses listed below must be taken in CSOM})

- MFIN2202 Derivatives and Risk Management
- MFIN2205 Corporate Financial Strategies
- MFIN2225 Financial Policy
- MFIN2230 International Finance
- MFIN2235 Investment Banking
- MFIN2250 Fixed Income Analysis
- MFIN2270 Data Analytics in Finance
At least 1 elective from any MFIN\(^\text{^}\) course offered outside of the required courses or another from the set list above.

* Not every course will be offered each semester. Additional courses may be added to set list in the future. Please pay careful attention to prerequisites which are listed in Course Information and Schedule.

\(^\text{^}\) All MFIN66XX electives require senior status and permission from the Department. This requires that seniors visit with Prof. Elliott Smith in Fulton 330B to seek approval, giving consideration to the student’s successful completion of the required prerequisites.

* See Course Information and Schedule for up-to-date course listings.

**Information for Study Abroad**

All students wishing to study abroad must first meet with an advisor in the Office of International Programs (OIP).

If accepted into the study abroad program and approved by the Undergraduate Dean's Office (Fulton 315), the student should then contact either the Department Chairperson, Ronnie Sadka (Fulton 560C), or Elliott Smith (Fulton 330B), by e-mail or in person, with all supporting documentation (course description, detailed syllabus, etc.) for elective course approvals.

Any requested finance elective abroad must be equivalent to a finance elective taught at BC.

The Finance Department requires that Financial Accounting (ACCT1021) and Fundamentals of Finance (formerly Basic Finance) (MFIN1021) be taken at Boston College as prerequisites for any finance elective prior to going abroad. All required finance concentration core courses must be taken in CSOM only.

In the rare circumstance where course selection is only available upon arrival at the university, you must e-mail the course syllabus to either the Department Chairperson, Ronnie Sadka, or Elliott Smith before enrolling in the course in order to obtain approval. If the course is deemed a suitable finance elective, the Finance Department will send a confirming e-mail to you approving the course for credit.

All approvals should be obtained prior to going abroad.

No approvals will be granted after the course has been completed.

For more information about study abroad, visit the Finance Department's Academics and Study Abroad page.

**General Management**

Students choose to concentrate in this area for many reasons, but it is especially attractive to those students who are preparing for the management of a family business or for those who want a broad management background as preparation for law school.

The Undergraduate Associate Dean coordinates the General Management concentration.

**Concentration in General Management**

Choose two areas and meet the criteria specified by the departments. Usually, this involves one required course and a choice of an elective.
Note: Students who have elected another concentration within the Carroll School of Management as well as the General Management concentration must select areas different from their other CSOM concentration as they pursue General Management.

Accounting

Required courses:

- ACCT3301 Financial Accounting Standards and Theory I
- ACCT3302 Financial Accounting Standards and Theory II

OR

Required course:

- ACCT3307 Managerial Cost and Strategic Analysis

Plus one elective:

- ACCT3351 Financial Statement Analysis
- ACCT4405 Federal Taxation
- ACCT6618 Accounting Information Systems

Information Systems

Required course:

- ISYS2157 Programming for Management and Analytics

Electives (choose one):

- ISYS3257 Database Systems and Applications
- ISYS4258 Systems Analysis and Design

Finance

Required courses:

- MFIN1127 Corporate Finance
- MFIN1151 Investments

No electives

Marketing
Required course:

- MKTG2153 Customer Research for Marketing Decisions
  OR
- MKTG4256 Applied Marketing Management

Electives (choose one):

- MKTG2152 Consumer Behavior
- MKTG3153 Retailing
- MKTG3154 Integrated Marketing Communications
- MKTG3156 Special Topics: Launching Digital Marketing
- MKTG3157 Professional Selling and Sales Management
- MKTG3158 Product Planning and Strategy
- MKTG3165 Strategic Brand Management
- MKTG3170 Entrepreneurial Marketing in a Digital World
- MKTG3177 Heritage Marketing
- MKTG3178 Special Topics
- MKTG/ISYS3205 Tech Trek-West
- MKTG/ISYS3253 Digital Commerce
- MKTG3258 Marketing Analytics for Customer Insights
- MKTG3625 Luxury Marketing
- MKTG6610 Sports Marketing
- MKTG/ISYS6620 Marketing Information Analytics
- MKTG/ISYS6621 Social Media, Emerging Tech., and Digital Business
- MKTG/ISYS6635 New Media Industries
- MKTG/ISYS6640 Analytics and Business Intelligence

Management and Organization

Required course:

- MGMT2127 Leadership

Electives:

- Choose one additional MGMT course other than MGMT1021, MGMT1031, MGMT3099, MGMT3100, or MGMT2127

Operations Management

Required course:

- OPER3375 Operations Strategy and Consulting
Information Systems

Concentration in Information Systems

Information Systems (IS) are the lifeblood of the modern enterprise, making up the single largest portion of capital spending among U.S. corporations. Information Systems have the power to create and restructure industries, empower individuals and firms, and dramatically reduce costs. Many of the world's most successful corporations arrived at their position in large part due to their effective use of such systems. However, when poorly designed and implemented, IS can become a major source of risk, squander shareholder wealth, waste taxpayer money, and destroy firms and careers. As a result, organizations desperately need well-trained information systems specialists and technology-savvy managers. Today's manager simply cannot effectively perform without a solid understanding of the role of information systems in organizations, competition, and society.

The Information Systems concentration focuses on both technology and its effective use in organizations. In this program, students will learn how to plan, develop, and deploy technology-based business solutions, as well as to understand the strategic role of IS in organizations and the influential role of technology in society. The Information Systems concentration is designed for students with an aptitude for logical, analytical thinking and prepares them for positions in a variety of fast-growing professions. The Information Systems concentration is a strong choice as a primary concentration for CSOM students. Given the increasing influence of IS in all functional areas, it also serves as an excellent second concentration for students whose primary concentration is in another field such as accounting, finance, marketing, or operations.

The Information Systems concentration emphasizes both team and individual work, allowing students to gain the skills and experience to strategize, design, program, and implement computerized information systems. The curriculum emphasizes software development technologies, data management, data communications, electronic commerce, and knowledge management as well as the fundamentals of computer hardware and software systems, high-level software design and programming, project management, emerging technology studies, and the strategic, operational, and responsible use of information systems.

Concentrators will develop the ability to work with others to understand business requirements and to determine the need for and feasibility of information systems change. They will use analytical thinking to simplify complex business tasks and to design efficient and user-friendly computer systems. They will develop communication skills to understand and explain systems requirements, make the case for IS investment, prepare clear documentation, and deliver effective presentations. Concentrators will also develop a strategic perspective on information systems, enabling them to participate in and support the increasingly visible role of information technology in corporate decision making.

Objectives of the Undergraduate Concentration in Information Systems

The objectives of the undergraduate concentration are to develop managers who:

- understand how to analyze the linkages between information technology (IT), innovation, business strategy, and competitive advantage.
● possess the technical skills (related to programming and databases) and managerial concepts needed to effectively plan, develop, and implement IT.

● understand how to promote more effective use of IT in organizations, taking into consideration how IT aligns with an organization's strategic focus, culture, business processes, etc.

● appreciate the broader ethical and societal implications of the burgeoning application of information technologies.

### Careers in Information Systems

Careers available to IS concentrators dominate the U.S. Bureau of Labor Statistics’ list of fastest growing occupations. IS professionals encompass a broad array of careers, from the highly technical to those which bridge the gap between the people who program information systems and the people who use them. Information Systems concentrators may pursue a variety of careers in business, consulting, and government. Technology careers often give professionals a broad and deep exposure to the firm and its customers, providing exceptional training for future executive leadership. The greatest demand in the IS field will be for professionals who have technical knowledge supported by a solid understanding of the role of information systems in business and organizations.

### Courses Required for the Information Systems Concentration

- ISYS2157 Programming for Management and Analytics (or CSCI1101 or ISYS2160)
- ISYS3257 Database Systems and Applications
- ISYS4258 Systems Analysis and Design
- One additional ISYS course of level 1000 or above.

### Information for Study Abroad

All students wishing to study abroad must first meet with an advisor in the Office of International Programs (OIP).

If accepted into the study abroad program and approved by the Undergraduate Dean's Office (Fulton 315), the student should then contact the Department Chairperson by e-mail or in person, with all supporting documentation (course description, detailed syllabus, etc.) for elective course approvals.

Although there are no particular prerequisites needed in order to qualify for study abroad, the usual course prerequisites still apply. Courses taken abroad can be allowed for concentration or elective credit if the courses are judged equivalent and if the proposed courses constitute a reasonable selection.

### Management and Organization

How can managers best develop and utilize the human capital in an organization and inspire their employees to thrive? Why do individuals and groups behave the way they do in organizations? What strategies should organizations pursue to grow and be productive? Our Management and Organization Department focuses on how to manage an organization's human resources and effectively develop and implement strategies for all types of organizations.

Through our programs, students develop the critical competencies for organizational success: leadership, communication, design, organizational development, and more.
Concentration in Management and Leadership

The Management and Leadership concentration will help develop and enhance your ability to lead and manage people and organizations. These skills are highly desired by virtually all potential employers, making the Management and Leadership concentration beneficial to all Carroll School undergraduates.

Upon completing the concentration, students will (1) demonstrate an appreciation for the fundamentals and complexity of successful leadership; (2) identify exemplary leadership in themselves and others; and (3) demonstrate skills of effective leadership.

In addition to taking MGMT1021 Organizational Behavior, the concentration requires MGMT2127 Leadership and three electives. Two electives in particular are highly recommended for this concentration: MGMT2123 Negotiation and MGMT2137 Managing Diversity.

Required of all concentrators:

● MGMT1021 Organizational Behavior
● MGMT2127 Leadership

Three electives chosen from the following:

● MGMT2110 Human Resources Management
● MGMT2111 Ethical Leadership Skills
● MGMT2123 Negotiation
● MGMT2132 Managing Change
● MGMT2133 Leading High Performance Teams
● MGMT2137 Managing Diversity
● MGMT2139 Social Innovation and Entrepreneurship
● MGMT2140 International Management
● MGMT2170 Entrepreneurial Management
● MGMT2177 Leadership in Action: Lessons From Exploration
● MGMT2260 Leadership and Corporate Accountability
● MGMT2265 Globalization, Culture, and Ethics
● MGMT4901 Independent Study (by permission of instructor)
● MGMT5548/UNCP5548 Capstone: Leadership and Mindfulness

Minor in Management and Leadership for Non-Carroll School of Management Students

A minor in Management and Leadership is offered to students in the Morrissey College of Arts and Sciences, Lynch School of Education and Human Development, and Connell School of Nursing who are interested in pursuing management careers. This minor focuses on the behavioral side of management by offering courses designed to increase students’ knowledge of leadership and management and build skills in these areas. Students must complete six courses offered by the Management and Organization Department.

The Management and Leadership minor will help students develop and enhance their ability to lead and manage people and organizations. More specifically, students will:
(1) develop an appreciation for the fundamentals and complexity of successful leadership;

(2) identify exemplary leadership in themselves and others; and

(3) demonstrate effective leadership and management skills.

The minor is completed by taking two required courses and four MGMT electives.

**Required courses:**

- MGMT1021 Organizational Behavior
- MGMT2127 Leadership

**Four additional MGMT electives (junior/senior year)**

The Management and Leadership minor prepares students for managerial roles in corporations, non-profit organizations, and government agencies. The common thread is managing people. In addition, the concentration provides excellent preparation for a career in management consulting, which focuses on diagnosing and solving management problems in client organizations.

For more information, please consult Professor Richard Spinello, in Fulton 430E or e-mail him at spinello@bc.edu to set up an appointment.

**Entrepreneurship Co-concentration**

Are you interested in an entrepreneurial career where you start or join a firm that revolutionizes markets through innovation? The entrepreneurship co-concentration provides a strong background for launching and managing high-growth ventures in nascent or high-velocity industries. It is an interdisciplinary program that will help engender entrepreneurial thinking and problem-solving approaches. The course of study includes a mix of theory and real-world application with an emphasis on teamwork. The curriculum introduces a set of tools and a way of thinking that will help students to navigate the uncertain, ambiguous contexts that often characterize new initiatives in established firms as well as start-ups. The Entrepreneurship co-concentration is designed to be a second concentration for Carroll School of Management students. Up to one class from the co-concentration course list can be counted towards another concentration.

**Required Courses**

The courses in the co-concentration include the following:

**Required:**

- MGMT2170 Entrepreneurial Management

**Required: one of the following two finance courses:**

- MFIN2210 Entrepreneurial Finance
- MFIN2212 Venture Capital/Private Equity
- MGMT2139 Social Innovation & Entrepreneurship
Students must also take two electives from the following list:

- BSLW6604 Law for the Entrepreneur
- ISYS3205 TechTrek West
- ISYS3206 TechTrek East
- ISYS3253/MKTG3253 Digital Commerce
- ISYS6621/MKTG6621 Social Media and Digital Business
- ISYS6640/MKTG6640 Analytics and Business Intelligence
- MGMT2123 Negotiation
- MGMT2139 Social Innovation and Entrepreneurship
- MKTG3156 Special Topics: Launching Digital Marketing
- MKTG3158 Product Planning and Strategy
- MKTG3170 Entrepreneurial Marketing in a Digital World
- UMG1010 Perspectives on Management

For more information, please visit the Edmund H. Shea Jr. Center for Entrepreneurship website.

Information for Study Abroad

Students may take one or two electives abroad to count toward either the Management and Organization concentration or minor. In addition, it is sometimes possible to take the equivalent of MGMT1021 abroad. However, this must be approved prior to finishing the course by the Chairperson of the Management and Organization Department, who will need a detailed copy of the course syllabus, assignments, and readings.

Marketing

Marketing is the business function that is responsible for setting market strategy and giving strategic direction to other business functions in the firm. It centers around understanding the wants and needs of a firm’s customers, be they consumers or other businesses, and is essential for properly positioning the company within the firm’s target markets.

Marketing offers a number of varied and interesting career paths, from sales, advertising, and product development, to marketing research, retailing, and brand management. A marketing degree is a valuable asset in many business sectors, for large or small companies, for-profit or non-profit firms, products or services, and consumer or business-to-business environments.

In the digital mobile economy, consumers are increasingly armed with more and better information, making them more demanding, less gullible, and less loyal to companies that don’t pay close attention to their needs. Competition is increasingly global and markets mature faster; first mover and market leader advantages can evaporate in a heartbeat. Advances in production and service delivery make it very difficult to compete on quality and production or distribution advantages are difficult to sustain long-term.

This means that the successful company is the one that can respond to changing market demands faster than its competitors. Marketing is one of the key tools in keeping a company responsive and nimble. It specializes not only in understanding customer needs and motivations, but it also delivers the message to consumers that the company can meet those needs and motivations. This focus on the customer has caused marketing and the marketing concept to become increasingly central in management decisions and marketing is fully integrated with other functional areas in successful leading companies.
Regardless of your specific interests within marketing, Boston College will help you understand the marketing functions and its financial, social, and ethical responsibilities. The marketing program at BC teaches critical thinking, creative problem-solving, and a mix of theory- and skill-based approaches to marketing management and decision making. Marketing represents a unique mixture of quantitative statistics and analysis with a more lateral-thinking and behavioral approaches to management. Recent advances in technology, from social media to supply-chain integration, have revolutionized the way marketing is conducted. As a marketing major, you will develop skills in market analysis and decision making by working on varied marketing projects and programs such as new product launches, pricing and distribution strategies, service innovations, sales force management, and internet marketing campaigns.

**Undergraduate Concentration in Marketing**

Marketing Principles is a prerequisite for all other Marketing courses. Beyond the required core course (MKTG1021 Marketing Principles) students must take four courses for the Marketing concentration. Of these four courses, the two required are as follows:

- MKTG2153 Customer Research for Marketing Decisions
- MKTG4256 Applied Marketing Management

Customer Research should be taken in the junior year. Applied Marketing Management should be taken in the senior year.

The two additional courses may be taken from any of the following electives:

- MKTG2152 Consumer Behavior
- MKTG3114 Pricing and Demand Analytics
- MKTG3148 Services Marketing
- MKTG3153 Retailing
- MKTG3154 Integrated Marketing Communications
- MKTG3156 Digital Marketing
- MKTG3157 Professional Selling and Sales Management
- MKTG3158 Product Planning and Strategy
- MKTG3165 Strategic Brand Management
- MKTG3170 Entrepreneurial Marketing in a Digital World
- MKTG3177 Heritage Marketing
- MKTG3178 Special Topic: Design Thinking and Strategy
- MKTG3205 Tech Trek-West (cross listed with ISYS3205)
- MKTG3253 Digital Commerce (cross listed with ISYS3253)
- MKTG3258 Marketing Analytics for Customer Insights
- MKTG3625 Luxury Marketing
- MKTG6157 Professional Selling and Sales Management
- MKTG6610 Sports Marketing
- MKTG6620 Marketing Information Analytics (cross listed with ISYS6620)
- MKTG6621 Social Media and Digital Business (cross listed with ISYS6621)
- MKTG6635 New Media Industries (cross listed with ISYS6635)

Students interested in a career in marketing often take more than the minimum four courses in order to enhance career preparation.
Students are cautioned, however, against becoming too narrowly specialized.

MKTG4911 (Independent Study, 3 credits) provides creative learning opportunities and is offered for enrichment purposes only. It does not count toward the Marketing concentration. Independent Study enables a student to focus on a topic of his/her own choice working with a marketing professor.

Marketing Minor

This minor is for non-Carroll School students who are interested in developing quantitative and qualitative marketing knowledge and skills to be better prepared for careers in marketing and advertising.

Required Course Sequence:

- ACCT1021 Introduction to Financial Accounting
- MKTG1021 Marketing Principles
- MKTG2153 Customer Research for Marketing Decisions
- MKTG4256 Applied Marketing Management

2 electives:

Choose two MKTG electives from course list available at www.bc.edu/marketing.

Information for Study Abroad

Only one course from the international university can be considered for concentration credit. Customer Research for Marketing Decisions (MKTG2153) and Applied Marketing Management (MKTG4256) cannot be taken abroad.

All students wishing to study abroad must first meet with an advisor from the Office of International Programs. If accepted into the study abroad program and approved by the Undergraduate Dean's Office, the student should then see the Marketing Study Abroad Coordinator for course approvals before going abroad. When students wish to have a course considered they should e-mail or bring a copy of the syllabus and course description for approval.

All approvals must be obtained prior to going abroad. No approvals will be granted after the course has been completed.

Boston College AMA Chapter

The Boston College collegiate chapter of the American Marketing Association is affiliated with both the National and Boston AMA organizations. The aim of the Boston College chapter is to expose its members who are committed to and passionate about a marketing career to industry professionals, organizations, and events that will further their experience.

Boston College Marketing Academy

The Marketing Academy is one of Boston College’s most active organizations. It is open to all students at Boston College.

It is the Academy’s goal to educate students about career opportunities, assist students in training for a future professional career, and establish professional contacts in business.
Connell School of Nursing, Undergraduate Programs

Founded in 1947, the Boston College Connell School of Nursing offers a four-year program of study leading to a Bachelor of Science degree with a major in Nursing. At the completion of the program, graduates are eligible to take the national examination for licensure as a registered nurse (R.N.). The program of study is approved by the Massachusetts Board of Registration in Nursing and is accredited by the Commission on Collegiate Nursing Education. Visit [www.bc.edu/cson](http://www.bc.edu/cson) for more information.

The mission of the Boston College William F. Connell School of Nursing is to prepare compassionate, professionally competent nurses whose practice and scholarship are scientifically based and grounded in humanizing the experience of health and illness. In keeping with the Jesuit, Catholic ideals, we focus on formation of the whole person and promotion of social justice. The Connell School of Nursing educates students as reflective life-long learners who use knowledge in service to others. The graduate of the baccalaureate program is prepared as a generalist who promotes, maintains, and restores the health of individuals, families, and communities/populations across the life span.

Nursing courses are designed to include more complex concepts and content at each level. Consequently, students must take courses in a specific sequence and pass each course before proceeding to the next level. To be eligible for graduation, students must successfully complete the courses that comprise the curriculum, nursing requirements, and electives.

The study of nursing is based on a common intellectual heritage transmitted by a liberal education and the art and science of nursing. (See Core Curriculum under the University Policies section of this catalog.) Students are encouraged to complete their history, philosophy, theology, and English Core courses in their first and second years.

Nursing students use the clinical reasoning process to assess, plan, implement, and evaluate care. Judgments made by the nurse result in selection of interventions and outcomes in concert with the client's choices. Most nursing courses have a theory and a clinical component, and the curriculum includes content on the care of children, childbearing families, and adults of all ages across the continuum of wellness to illness. Faculty members guide student learning in campus laboratories and in a variety of healthcare agencies in the Greater Boston area.

Students should consult the curriculum plan and see their advisors as they plan for registration.

Typical Plan of Study for Class of 2019 and Forward

Note: CSON Undergraduates are obligated to register for a minimum of 12 credits per semester but normally should take 15 credits in almost all semesters to meet all program requirements on time.

Freshman Year

Semester I

- BIOL1300, BIOL1310 Anatomy and Physiology I
- CHEM1161, CHEM1163 Life Science Chemistry
- NURS1010 Professional Development Seminar
- Core or elective
- Core or elective

Semester II

- BIOL1320, BIOL1330 Anatomy and Physiology II
Sophomore Year

Semester I

- BIOL2200, BIOL2210 Microbiology for Health Professionals
- NURS2120 Nursing Health Assessment Across the Life Span
- NURS2121 Nursing Health Assessment Across the Life Span Clinical Laboratory
- NURS2080 Pathophysiology
- Core or elective

Semester II

- NURS2230 Adult Health Nursing Theory I
- NURS2231 Adult Health Nursing Clinical I
- NURS2205 Clinical Pharmacology
- HLTH2206 Principles of Nutrition
- NURS2090 Sophomore Formation Seminar
- Core or elective

Junior Year

All students will have a flexible semester in their junior year. The flexibility will allow for study abroad (if approved by the Office of International Programs and their specific program) or other co-curricular activities. Students who are not abroad in their "flex" semester may be scheduled to take at least one clinical course.

This is one example of the flexible junior year schedule below. The Undergraduate Program Office will determine the exact clinical sequence for each junior.

Semester I

- NURS3242 Adult Health Nursing Theory II
- NURS3243 Adult Health Nursing Clinical II
- NURS3244 Childbearing Nursing Theory
- NURS3245 Childbearing Nursing Clinical
- NURS3170 Principles of Evidence-based Nursing

Semester II

- "Flex" Semester

Senior Year

The Undergraduate Program Office will determine the exact clinical sequence for each senior.
Semester I

- NURS4250 Child Health Theory
- NURS4251 Child Health Clinical
- NURS4252 Psychiatric-Mental Health Nursing Theory
- NURS4253 Psychiatric-Mental Health Nursing Clinical Lab
- Core or elective

Semester II

- NURS4260 Population Health Nursing Theory
- NURS4261 Population Health Practice in the Community
- NURS4263 Nursing Synthesis Clinical Laboratory
- NURS4264 Actualizing the Role of the Professional Nurse
- Core or elective

The Connell School of Nursing reserves the right to alter any program or policy outlined.

Satisfactory Academic Progress

The CSON Academic Standards Advisory Committee meets at the end of each semester to review the records of students with course failures, course deficiencies, low GPAs, or other academic concerns. Decisions about progression in the program are made by this committee in accordance with the policies outlined in the CSON Baccalaureate Program Handbook (on the CSON website) and other relevant university policies.

Credit and Graduation Requirements

Students registered for at least 12 credit hours per semester are considered full-time students. Usually 15 credits are carried each semester and a minimum of 117 credits are required for graduation.

Information for First Year Students

During the first year students typically complete two semesters of Anatomy and Physiology with laboratories, Life Science Chemistry with Laboratory, Writing and Literature, Statistics, History I and II, Introduction to Professional Nursing, and Nursing Professional Development Seminar. Electives may be substituted in certain situations (e.g., the student has Advanced Placement credits for Core courses or wishes to continue foreign language study). During orientation, students will meet with faculty members who will assist them with registration for the fall. In September, students will be assigned advisors who will guide them through the Nursing program.

Special Opportunities

Study Abroad

Students in the William F. Connell School of Nursing are encouraged to take advantage of opportunities to study abroad for one semester. Normally, students may study abroad during fall or spring semester of junior year. Most students take electives and can sometimes complete Core courses while they are abroad. Students are free to study abroad in any location approved by the Office of International Programs. A minimum GPA is required for all study abroad programs.
Nursing Synthesis Course

The Nursing Synthesis course in the senior year offers students an advanced nursing practicum where they work with an individually assigned professional nurse preceptor. Students write a proposal in the semester prior to the course indicating their special learning interests.

Independent Study (NURS4911)

Junior or senior nursing students develop a proposal for independent study in an area of nursing in which they wish to obtain further knowledge and/or experience. Guidelines are available on the CSON undergraduate website. Students should consult an academic advisor and/or the Associate Dean of the undergraduate program about their proposal. All independent study is graded as Pass/Fail.

Undergraduate Research Fellows Program

Students in excellent academic standing may apply to assist faculty in a faculty-directed research project and gain valuable experience in nursing research.

Minors in the Connell School of Nursing

Nursing students may minor in any Morrissey College Arts and Sciences or Lynch School of Education and Human Development discipline by fulfilling the requirements of those departments.

Minor in Hispanic Studies

Nursing students may minor in Hispanic Studies by completing 18 credits in Spanish/Hispanic Studies that are approved by the Associate Dean. CSON students who wish to declare a CSON Hispanic studies minor should meet with the Associate Dean.

Minor in Psychology

The minor is awarded to CSON students who complete 18 credits in psychology. Courses should include PSYC1110 Introduction to Brain, Mind, and Behavior and PSYC1111 Introduction to Psychology as a Social Science. Students who received AP credit for PSYC1110 and PSYC1111 may select alternate courses. Courses that may be applied to the minor include the following (or others approved by the undergraduate Associate Dean):

- ADPS1100 Introductory Psychology (Woods College; no credit for ADPS1100 if PSYC1111 was taken)
- APSY1030 Child Growth and Development
- APSY1032 Psychology of Learning
- APSY2041 Adolescent Psychology
- APSY2241 Abnormal Psychology
- FORS5315 Victimology
- FORS5317 Forensic Mental Health
- FORS5318 Forensic Science 1
- PSYC1011 Psychobiology of Mental Disorders
- PSYC1029 Mind and Brain
- PSYC2241 Social Psychology
- PSYC2260 Developmental Psychology
Minor in Humanities, Health, and Culture

This is a minor for students who are interested in examining health and health care from new and varied perspectives. Currently, students from pre-med and pre-health professions throughout the Morrissey College of Arts and Sciences and other backgrounds such as law, psychology, public/global health, social work, and journalism are enrolled in the MCAS version of the minor. A special version of the minor has been created for CSON students to accommodate constraints in the B.S. (nursing) schedule. CSON students who are comfortable with significant writing assignments, have room in their schedule to accommodate added classes (especially those who have brought in AP credit and/or fulfilled a majority of their Core in the freshman year), and may wish to engage with a range of academic fields may consider this minor.

Minor Requirements:

- ENGL2212 Introduction to Medical Humanities (Enrollment is based upon acceptance to the minor.)
- BIOL1300 and BIOL1310 Anatomy and Physiology I with Lab
- BIOL1320 and BIOL1330 Anatomy and Physiology II with Lab
- NURS4264 Actualizing the Role of the Professional Nurse
- A paper/article (minimum 20 pages) approved by the Undergraduate Associate Dean (original, from a course, or extended/adapted from a course) on a topic relevant to the minor to be submitted previous to graduation.
- 2 electives from the approved list:
  - (At least one course should be beyond those used to fulfill the Core requirements and not come from either Nursing or Biology.)

The Humanities, Health, and Culture minor is only open to the Class of 2019 and forward. Applications are available in the early spring semester for first-year students only.
Special Requirements for CSON Students

Health Requirements

In addition to the health and immunization requirements for all undergraduate students, nursing students must have immunity to varicella (chicken pox), hepatitis B, and MMR with an annual screening for tuberculosis (PPD) and flu shot. Other requirements may be required.

Other Clinical Requirements

Nursing students are required to be certified in Cardiopulmonary Resuscitation (CPR) before enrolling in Adult Health I clinical, and must keep this certification current. Nursing students must also undergo the expanded multistate criminal offense background checks that are required by affiliating health care institutions.

General Information

Cooperating Hospitals and Health Agencies

Students in the baccalaureate nursing program have planned learning experiences in teaching hospitals and community agencies in the Boston metropolitan area. The facilities used for these experiences are located in Boston and the surrounding area. Students are responsible for providing their own transportation to and from those facilities. Most sites are accessible by public transportation.

Fees

School of Nursing students pay the same tuition, fees, and room and board costs as other colleges’ enrollees. In addition, nursing students have the following expenses:

- Standardized examination (NCLEX Assessment Test) $70.00
- Laboratory Fee up to $200.00 (Payable for certain clinical nursing courses)
- Costs for transportation to clinical sites, additional health requirements, and CPR certification

College Credit for Transfer Students

Candidates possessing a bachelor's degree in another field and candidates possessing college credit in either nursing or non-nursing programs apply to the Office of Transfer Admissions, located in Devlin Hall. A maximum of 60 credits will be accepted in transfer. Nursing courses taken at another institution will be evaluated on an individual basis. Students applying for transfer will be asked to submit course syllabi to the School of Nursing for use in evaluating prior course work. Additional information on transfer credits may be found in the Baccalaureate Program Handbook on the BC website.

Career Opportunities

The field of nursing offers a wide variety of career options, including positions in hospitals, long-term care facilities, community health agencies, clinics, and day care centers for children and the elderly. Nurses are establishing private practices and group practices with other health professionals. Business, industry, and occupational health settings employ nurses.

The baccalaureate program of study prepares its graduates for entry into master's and doctoral degree programs in nursing. With graduate study, advanced practice nurses see clients in primary care, teach students and other health professionals, establish programs of research, provide consultation, serve as health care planners, and participate on governmental committees dealing with health care issues. Many graduates of the Boston College Connell School of Nursing have gone on from clinical careers to
become researchers in clinical settings and to serve on faculties of schools of nursing and administrators of clinical and educational institutions.

**Lynch School of Education and Human Development, Undergraduate Programs**

The Lynch School offers undergraduate and graduate programs in education and applied psychology and human development.

The mission of the Lynch School of Education and Human Development is to improve the human condition through education. It pursues this goal through excellence and ethics in teaching, research, and service. It prepares undergraduate and graduate students to serve diverse populations in a variety of professional roles as teachers, administrators, human service providers, psychologists, and researchers.

Through research, the Lynch School seeks to advance knowledge in its respective fields, inform policy, and improve practice. Teachers, scholars, and learners at Lynch engage in collaborative school and community improvement efforts locally, nationally, and internationally. What unites the diverse work conducted within the Lynch School of Education and Human Development is the underlying aspiration to enhance the human condition, to expand the human imagination, and to make the world more just.

The Lynch School is named in honor of Carolyn A. and Peter S. Lynch. Peter Lynch, a Boston College graduate, is one of the country’s best-known financial investors.

**Undergraduate Programs**

Undergraduate students in the Lynch School may choose to major in Elementary Education, Secondary Education, or Applied Psychology and Human Development. All students entering Lynch School undergraduate programs follow a program of study in selected majors and complete Core requirements and electives needed to fulfill degree requirements.

Elementary Education majors must also complete a second major either in a content area in the Morrissey College of Arts and Sciences, Applied Psychology and Human Development, or in one of three interdisciplinary majors offered through the Lynch School. Interdisciplinary majors include American Heritages, Mathematics and Computer Science, and Perspectives on Spanish America.

Secondary Education majors must also major in a state-approved licensure area. These areas include Biology, Chemistry, Geology or Earth Sciences, Physics, English, History, Mathematics, French, and Hispanic Studies.

All education majors complete three pre-practicum experiences (1 day/week for 10 weeks) and one full practicum experience (5 days/week for 14 weeks) in a variety of classrooms where they mediate theory and practice to develop and provide instruction that enhances the life chances of all children. All Elementary and Secondary Education programs lead to endorsement for Initial Licensure in the state of Massachusetts. These programs may change in response to state licensure regulations. All students seeking licensure in Massachusetts must pass all the appropriate Massachusetts Tests for Educator Licensure (MTEL), regardless of which state students wish to teach in.

Graduates from Elementary and Secondary Education programs attain positions in public, private, parochial, and charter schools, other education-related fields, and areas that require strong liberal arts, subject matter, and pedagogical preparation and the ability to collaborate with others.

The major in Applied Psychology and Human Development prepares students for work in human, social, and community services and/or for graduate study in counseling, human development, educational psychology, organizational studies, higher education, and related fields. Coursework in this major curriculum offers a theoretical base in developmental and counseling psychology with a focus on understanding psychological processes in a variety of contexts.
Students in Applied Psychology and Human Development, in the Classes 2021 and 2022, obtain employment in educational, human service, and business settings. A practicum experience is strongly recommended and provides students with an opportunity to develop important professional skills and explore career opportunities. The 10-course major provides a strong background in the area of developmental psychology and an introduction to the field of counseling. Students choose to concentrate their upper level courses in one of three focus areas: human services, organizational studies, or community advocacy and social policy. The major is designed for students who wish to work in a range of human services and community settings. Students in the Class of 2023 and beyond enroll in a 36 credit major, with a required practicum experience, and selected foci in a choice of five areas: human services and health science; organization studies and human capital; policy, advocacy and community change; science of learning; design-thinking and innovation.

Students, in the Classes 2021 and 2022, in the Applied Psychology and Human Development major, are required to complete a minor of six courses in one discipline outside of the Lynch School, either in an interdisciplinary minor or major in the Morrissey College of Arts and Sciences or the Carroll School of Management or in a second major or interdisciplinary major in the Lynch School. Students in the Class of 2023 and beyond are not required to declare a minor or second major; however, students are encouraged to consider the many minor and major options available.

In addition, there are a number of Fifth Year Programs available for academically superior students through which the bachelor's and the master's degrees may be earned in five years. Please refer to the section following the descriptions of majors in the Lynch School of Education for more information about these programs.

Satisfactory Academic Progress

Lynch School of Education and Human Development students who are Elementary or Secondary Education majors must successfully complete 120 credits which must include the Core curriculum, the education major, and an appropriate second major. Students who are majoring in Applied Psychology and Human Development must also successfully complete 120 credits, which must include the Core curriculum, the Applied Psychology and Human Development major, and at least one minor in a Morrissey College of Arts and Sciences discipline or an interdisciplinary minor in the Lynch School or the Carroll School. Students in the Class of 2023 and beyond are not required to declare a minor, but are encouraged to consider additional programs.

To continue enrollment in a full-time program of study, a student must maintain a cumulative grade point average of at least 1.667, as the minimum standard of scholarship and must not fall more than 6 credits behind the total number of credits a student of his/her status is expected to have completed (Elementary and Secondary Education majors usually carry 15–17 credits each semester during the first three years and 30 credits during the senior year). For example, a first semester sophomore student must have completed at least 30–32 credits during the freshman year. Any student who is permitted by the Dean to continue enrollment in a full-time undergraduate program is considered to be in good standing.

Failure to maintain good standing either through a low cumulative grade point average or by incurring excessive deficiencies including failures, withdrawals, or unapproved underloads will result in placement on academic probation, possible withdrawal or dismissal, as determined by the Academic Standards Committee or the Dean.

A student on probation may return to good standing by approved methods, e.g., make-up of credits via approved summer school work, raising GPA to acceptable standards, etc. (Students may make up no more than 9 credits in summer study.) A student who incurs additional failures or withdrawals, or carries an unapproved underload while on probation, may be required to withdraw from the institution at the time of the next review.

Information for First Year Students

Although students may satisfy Core requirements (42 credits) during any of their four undergraduate years, they are advised to complete most or, if possible, all Core requirements within the first two years. The remaining 78 credits (minimum) are to be fulfilled by courses required in the major(s), minor(s), and elective choices.

All first semester, first year students should select ENGL1010 First Year Writing Seminar or a Core Literature course, APSY1030 Child Growth and Development, ERAL1100 First Year ERA Seminar, and the course(s) designated by your major department. (Students who place out of Core courses in advance will take different courses selected in collaboration with an advisor.) Major
requirements are listed in the sections that follow. Students who have not declared a major, and are listed as ‘Undeclared,’ follow the course requirements for the Applied Psychology and Human Development major.

The First Year Experience, Reflection, and Action Seminar (First Year ERA), a 3-credit course (1 credit first semester and 2 credits second semester), is a requirement for all Lynch School students and is taken as a sixth course during first and second semesters, freshman year.

The Bachelor of Arts in Applied Psychology and Human Development degree requires the completion of at least 120 credits, which includes the University Core. Students must achieve at least a cumulative grade point average of 1.667.

Students majoring in Elementary Education or Secondary Education must also complete 120 credits, which include the University Core and which are normally distributed over eight semesters of four academic years. Both Elementary and Secondary Education students must also fulfill a second major. Elementary Education majors may fulfill the second major in either a subject in the Morrissey College of Arts and Sciences or one of the three Lynch School interdisciplinary majors. Secondary Education majors can only fulfill a second major in specific content areas in the Morrissey College of Arts and Sciences. All Teacher Education majors must complete three pre-practica, a full practicum, and an inquiry seminar. Students pursuing teacher licensure programs, however, must maintain a cumulative grade point average of at least 2.5 in order to be eligible to participate in the full practicum (full-time student teaching). Any student who enrolls in a pre-practicum must obtain a Massachusetts Education Personnel Identification (MEPID). Please consult the Office of Practicum Partnerships and Professional Development for more information.

The Associate Dean, Associate Director or Assistant Director of the Undergraduate Student Programs Office must approve a program of study in the declared major in the Lynch School before the end of sophomore year. Students majoring in Applied Psychology and Human Development or a teacher licensure program must be accepted officially into the major by the Lynch School.

Students seeking a major leading to teacher licensure must complete and submit a Declaration of Major form and an application for Admission to a Teacher Education Program to the Associate Director (Campion 104). This office reviews applications and accepts qualified applicants prior to the end of the sophomore year. Early application to the program is encouraged. Applied Psychology and Human Development majors need to complete a Declaration of Major form.

The remaining courses required for graduation include additional major courses, minor courses, and electives.

**Online Courses**

Ordinarily, credit for courses taken online is not transferable. In rare cases of extenuating circumstances, e.g., proximity to degree, certain conditions apply. If students have circumstances that might warrant an exception, they should see their Academic Dean.

**Practicum Experiences Leading to Teacher Licensure**

Endorsement for license is a collaborative effort between the teacher candidate, Lynch School Assistant Dean of Field Placement and Outreach, Program Supervisor, and the Supervising Practitioner. The Office of Field Placement and Partnership Outreach, Campion 102, approves and arranges placements for pre-practica and full-practica leading to licensure only for eligible students enrolled in programs in the Lynch School. Placement for full practicum also requires prospective teacher candidates to complete a successful interview with the Principal/Headmaster and/or potential Supervising Practitioner from the school in which they plan to fulfill this requirement. The Assistant Dean of Field Placement and Outreach evaluates each placement to ensure that it meets the requirements for endorsement and licensure by the Massachusetts Department of Elementary and Secondary Education. The Assistant Dean of Field Placement and Outreach, for appropriate reasons, may choose not to approve a teacher candidate for the practicum. All teacher candidates seeking licensure in Massachusetts must pass the appropriate Massachusetts Tests for Educator Licensure (MTEL) regardless of which state(s) students wish to teach in upon graduation. Pre-practica and full practica are essential components and experiences of the teacher preparation curriculum in the Lynch School. Teacher candidates must complete three semesters of pre-practicum placements (1 day/week/10 days) before they enter a full-time practicum placement in Elementary and Secondary Education classrooms. A full description of policies may be found in the Practicum Handbook available in the Office of Field Placement and Partnership Outreach in Campion 102.
A full practicum (student teaching) is a full-time five-days-per-week experience that occurs for a minimum of 14 weeks during the senior year. In the Lynch School, a full practicum must meet the teaching performance standards required by the Massachusetts Department of Elementary and Secondary Education. Teacher candidates must demonstrate competence according to the standards outlined in the Boston College Candidate Assessment of Performance (BC-CAP). The semester prior to completing a field placement, students must formally apply and participate in an interview in the Office of Field Placement and Partnership Outreach before securing a field assignment. Subject to eligibility, teacher candidates submit an online application for pre-practicum and practicum experiences. Online applications are available at the Student Teaching page.

All students seeking teacher licensure must complete the full practicum. A cumulative grade point average of 2.5 and successful completion of all major courses are required prior to student teaching for all students in the Elementary program. Students in Secondary Education must complete all major courses in Secondary Education and 4/5 of Morrissey College of Arts and Sciences courses prior to student teaching. No incomplete grades may be outstanding and a minimum of 87 credits must have been completed before placement is approved.

A full description of policies may be found in the Practicum Handbook available in the Office of Field Placement and Partnership Outreach in Campion 102. All students will be screened for eligibility and any who fail to meet the standards (academic, health, professional) will be counseled into courses that will complete an appropriate degree program from Boston College. These students will not be recommended for endorsement for teacher licensure and will not receive the BC Endorsement (a recommendation for licensure). The Commonwealth of Massachusetts issues teacher licenses, not the endorsing university. Therefore, students who earn the BC Endorsement submit all licensing documentation directly to the Massachusetts Department of Elementary and Secondary Education. Students will not be allowed to overload courses while student teaching. If, for any reason, a student is unable to complete the full practicum, an extended practicum (additional time in the field and/or semester) will be required by arrangement of the Assistant Dean of Field Placement and Outreach.

Application deadlines for all pre-practica are May 1 for fall placements and December 1 for spring placements. Application deadlines for all full-practica are March 15 for fall placements and October 15 for spring placements. The Office of Field Placement and Partnership Outreach will not be able to arrange assignments for late applicants. Applications are submitted online at the Student Teaching page.

The school sites utilized for pre-practica and full-practica are located in Boston and neighboring communities. Teacher candidates are responsible for their own transportation to and from these facilities.

Applied Psychology and Human Development Field Practicum

Applied Psychology and Human Development students should visit the Applied Psychology and Human Development page for information on practicum experiences for this major and register for APSY2152 in the semester during which they will complete their field practicum experience. Students in the Class of 2023 and beyond may register for a practicum no sooner than second semester of sophomore year, preferably junior or senior year, or after having successfully completed a minimum of twelve (12) credits of APSY courses.

International and Special Practicum Placement Program for Undergraduate Studies

Lynch School students may participate in the International Programs described in the University Policies and Procedures section of this catalog.

The Lynch School's International and Special Practicum Placement Program offer opportunities for undergraduate coursework in a variety of foreign countries for pre- and full-practicum placements. International settings include classrooms in such countries as Switzerland, Ireland, England, France, Italy, Germany, Spain, and Mexico. For information regarding programs and requirements, contact the Office of Practicum Partnerships and Professional Development in Campion 102.

Majors in Education

The undergraduate majors in the Lynch School, with the exception of the major in Applied Psychology and Human Development, are intended to meet the requirements for Initial Licensure as a teacher of the Massachusetts Department of Education. The
Lynch School accreditation process and the Interstate Licensure Compact (ICC) facilitate licensure in other states. Licensure requirements are set by each state, however, and are subject to change. Students seeking licensure in Massachusetts must pass all appropriate tests of the Massachusetts Tests for Educator Licensure. All students must consult with the Office of Practicum Partnerships and Professional Development to review the most recent licensure requirements of Massachusetts and other states.

The Lynch School offers two minors and one concentration for Education majors—Middle School Mathematics Teaching, Leadership in Higher Education and Community Settings, and a Special Education Concentration. The Massachusetts Department of Elementary and Secondary Education is mandating that all teacher candidates complete a specific bilingual course. Please consult the Chair of Teacher Education, Special Education, and Curriculum and Instruction or the Associate Dean of Undergraduates at LSEHD for the most current information.

The concentration in Special Education is designed to prepare students to work with a diverse group of special needs learners. In light of a growing national movement for further inclusion of special needs students in regular classrooms, teachers must be able to accommodate special needs students in their classrooms. All education students are strongly urged to consider this important concentration. Detailed information on the concentration in Special Education can be found in the minors section of the Lynch School catalog and on the Lynch School website.

The minor in Middle School Mathematics Teaching is available to Elementary Education majors with a Morrissey College of Arts and Sciences Mathematics major or Mathematics/Computer Science interdisciplinary major, or to Secondary Education majors with a Morrissey College of Arts and Sciences Mathematics major. Teachers of middle school mathematics are in great need in the United States, and all eligible Lynch School students should investigate this option. For more information on the minor in Middle School Mathematics Teaching, consult the minors section of the Lynch School catalog and the Lynch School website.

Major in Elementary Education

The major in Elementary Education prepares students for teaching children without disabilities and children with mild disabilities in regular classrooms, grades 1–6.

The major requirements for the elementary program include foundation and professional courses. Foundation courses focus on building understanding in areas such as child growth, learning, pedagogy, and development from diverse social, cultural, and historical perspectives. Professional courses integrate theoretical and pedagogical knowledge of the subject matter of the elementary classroom that includes reading, language, literature, mathematics, science, and social studies, informed by a pupil-centered perspective.

In addition to the mastery of program content, students are instructed in learning theories, instructional strategies and models, curriculum and school organizational practices, educational technology, inquiry, and effective assessment procedures and instruments.

Students also develop competencies in working with diverse learners including English language learners. Instruction enables teacher candidates to effectively integrate children with disabilities into regular classrooms. Teacher candidates have opportunities to engage in problem-solving and reflective practice, work with parents and communities, and apply knowledge to research projects.

The pre-practicum component begins at the sophomore level and culminates in full-time senior level practicum. Courses and practica are carefully linked.

The learning outcomes for Elementary Education majors include:

- **Outcome 1**: The teacher candidate will promote the learning and growth of all students by providing high-quality and coherent instruction, designing and administering authentic and meaningful student assessments, analyzing the student performance and growth data, using the data to improve instruction, providing students with constructive feedback on an ongoing basis, and continuously refining learning objectives.
Outcome 2: The teacher candidate will promote the learning and growth of all students through instructional practices that establish high expectations, create a safe and effective classroom environment, and demonstrate cultural proficiency.

Outcome 3: The teacher candidate will promote the learning and growth of all students through ethical, culturally proficient, skilled, and collaborative practice.

Outcome 4: The teacher candidate will demonstrate an inquiry stance by collecting and reporting data on pupil outcomes for the purpose of assessing, teaching, and modifying instructional practice.

Outcome 5: The teacher candidate will identify policies and practices that contribute to systemic inequities in education, be aware of how his or her own background experiences are influenced by these systems, and recognize a professional responsibility to promote and practice principles of social justice teaching.

A second major, either interdisciplinary or in a subject discipline in the Morrissey College of Arts and Sciences or Applied Psychology and Human Development in the Lynch School, is required. Students must consult with their program advisors as to the selection and requirements for the major.

Major in Secondary Education

The major in Secondary Education prepares students for teaching in secondary schools, grades 8–12. The major in Secondary Education is ideal for those students interested in high school teaching, who want to achieve an in-depth major in a discipline, and who want to apply elective courses to enhance the major and professional course work. Students may prepare to teach in the following disciplines: biology, chemistry, earth science, physics, English, history, mathematics, Spanish, and French.

Requirements for the secondary major include courses in child and adolescent development; theory and instruction in teaching diverse populations and meeting the special needs of children; teaching reading, writing, and specific subject methods courses; inquiry; and classroom assessment. The program also includes three pre-practicum experiences beginning sophomore year and culminating in a full practicum in the senior year.

Learning outcomes for Secondary Education majors include:

- Outcome 1: The teacher candidate will promote the learning and growth of all students by providing high-quality and coherent instruction, designing and administering authentic and meaningful student assessments, analyzing student performance and growth data, using this data to improve instruction, providing students with constructive feedback on an on-going basis, and continuously refining learning objectives.
- Outcome 2: The teacher candidate will promote the learning and growth of all students through instructional practices that establish high expectations, create a safe and effective classroom environment, and demonstrate cultural proficiency.
- Outcome 3: The teacher candidate will promote the learning and growth of all students through effective partnerships with families, caregivers, community members, and organizations.
- Outcome 4: The teacher candidate will promote the learning and growth of all students through ethical, culturally proficient, skilled, and collaborative practice.
- Outcome 5: The teacher candidate will promote an inquiry stance of critical reflection about personal practice through individual and collaborative inquiry in service of improving pupil academic, emotional, and social learning.

Middle School Licensure

Teacher candidates seeking licensure to teach at the middle school level should consult the Office of Field Placement and Partnership Outreach.

Major in Applied Psychology and Human Development

The major in Applied Psychology and Human Development consists of course offerings in developmental psychology, personality theories, educational psychology, and related fields. It provides a basic foundation for careers in social service and community
settings or for graduate study in many fields of psychology, including counseling, developmental or educational psychology, organizational studies, business, and social work. This major prepares students for entry-level employment as support personnel in offices of senior professional psychologists and counselors and in settings such as child/adult residential or day care facilities and alternative educational, community, or business settings. Ten courses or a minimum of 30 credits are required for the major for students in the Classes 2021 and 2022. A twelve course (36 credit) major is required for students in the Class of 2023 and beyond.

Classes 2021 and 2022: The Applied Psychology and Human Development major requires five specified courses and five additional courses selected from one of the following concentrations: Human Services, Organization Studies, and Community, Advocacy and Social Policy. Each concentration includes 2–3 specified courses and/or 2–3 electives. Classes 2023 and beyond requires six specified courses and six additional courses selected from one of the following concentrations: Human Services and Health Science; Organization Studies and Human Capital; Policy, Advocacy and Community Change; Science of Learning; Design-Thinking and Innovation.

Learning outcomes for Applied Psychology and Human Development majors include:

- **Outcome 1:** Understand the processes of human development and learning from infancy into late adolescence or the transition to adulthood.
- **Outcome 2:** Understand how social and cultural contexts shape developmental and educational processes.
- **Outcome 3:** Understand how contemporary social problems affect children, families, and communities.
- **Outcome 4:** Use foundational theories of applied psychology and human development to analyze educational and other real-world settings.
- **Outcome 5:** Articulate a researchable theoretical argument and apply appropriate research techniques to empirical analysis.
- **Outcome 6:** Articulate their personal core values and beliefs, how these are informed by critical engagement with theoretical and empirical knowledge in applied psychology and human development, and how these inform their relationships with their families and communities.
- **Outcome 7:** Develop a specialized understanding of 1 of 3 areas:
  - Human Services: Basic knowledge of psychosocial challenges to normal development and of a range of individual and community-level strategies to prevent mental illness and enhance psychosocial well-being and mental health;
  - Organizational Studies—Human Resources: Basic knowledge of organizational behavior theories, their applications in human resource management, and the contributions of applied psychology in these contexts.
  - Community, Advocacy and Social Policy: Basic knowledge of theories of community psychology and the applications of psychological knowledge to advocacy and social policy for and with children, youth and their families and communities.

The Applied Psychology and Human Development major does not provide for state licensure as a classroom teacher.

Students in the Class of 2023 and beyond are not required to declare a minor or major; however, they are encouraged to consider additional minor or majors that are available. Students in the Classes 2021 and 2022, who are pursuing Applied Psychology and Human Development as their primary major within the Lynch School, regardless of class year, are required to complete coursework in one of the following:

- A minor of 18 credits in a single subject discipline in the Morrissey College of Arts and Sciences, in Management and Leadership in the Carroll School of Management, in a variety of Lynch School minors including: Communication; Cyberstrategy and Design; Design-Thinking Interdisciplinary; Education Theatre; Korean Studies; Leadership in Higher Education and Community Settings; Research, Evaluation and Measurement; Restorative and Transformational Justice, or in other specific interdisciplinary minors.
- A major or an interdisciplinary minor (e.g., African and African Diaspora Studies, Women's and Gender Studies) in the Morrissey College of Arts and Sciences; or
- A second major or interdisciplinary major in the Lynch School.
The minimum number of credits acceptable for most minors is 18, which may include applicable Core courses. The concentration in Special Education (which does not satisfy the required minor for students in Applied Psychology and Human Development), however, requires only 12 credits. This is an excellent option as a second area of concentration for Applied Psychology and Human Development majors interested in special needs settings. The minor in Management and Leadership, offered in collaboration with the Carroll School of Management, is another excellent option for students planning to work in business or industry. The Lynch School also offers a number of interdisciplinary minors as mentioned above: Communication; Cyberstrategy and Design; Design-Thinking; Education Theatre; Korean Studies; Leadership in Higher Education and Community Settings; Research, Evaluation and Measurement; Restorative and Transformational Justice Minor. Students who have a second major automatically fulfill the minor requirement. Approved areas of study for both majors and minors are listed under the Morrissey College of Arts and Sciences, with acceptable interdisciplinary majors listed above.

Additional detailed information for Applied Psychology and Human Development majors is available on the Applied Psychology and Human Development page. There is a link at the bottom of this page for details about course requirements. There are also links from this page to a list of faculty who teach in the program, field practicum courses, supporting fields of study, and study abroad opportunities, as well as information about future career choices. For those students in the Classes 2021 and 2022, it is strongly recommended that all students pursue a field practicum course which includes ten hours a week of volunteer work in community, business, or human service agencies or programs, and a weekly seminar. Students who are interested in pursuing an Applied Psychology and Human Development Practicum should seek information in Campion Hall 102. Students in the Class of 2023 and beyond may enroll in a 3-credit practicum, beginning in the sophomore spring semester, or after completing 12 credits in the Applied Psychology and Human Development major.

Second Majors and Interdisciplinary Majors for Lynch School Students

All students in the Lynch School pursuing an Education major leading to licensure are required to complete a second major in the Morrissey College of Arts and Sciences or an interdisciplinary major as outlined below. Applied Psychology and Human Development majors, Classes 2021 and 2022, are also required to carry a minor of 18 credits in a single subject discipline in the Morrissey College of Arts and Sciences, a major or an interdisciplinary minor in the Morrissey College of Arts and Sciences, or a second major or interdisciplinary major in the Lynch School. Acceptable interdisciplinary majors are listed below. Students in the Class of 2023 and beyond are not required to declare a minor, but are encouraged to do so.

Lynch School Majors

Interdisciplinary Majors

Interdisciplinary majors are based in two or more Morrissey College of Arts and Sciences disciplines that are relevant to teaching in elementary school settings. Each of these majors is available to students in the Lynch School pursuing Elementary Education and Applied Psychology and Human Development. Students should consult their advisors regarding the specific courses required for these interdisciplinary majors.

Note: Secondary Education students cannot become licensed to teach in any of these interdisciplinary areas. Secondary licensure requires a Morrissey College of Arts and Sciences major in one of the specific subject disciplines listed under the description of Secondary Education requirements.

Applied Psychology and Human Development majors may choose a second major or one of the interdisciplinary majors listed below in place of their Morrissey College of Arts and Sciences minor requirement.

American Heritages

Recommended for students who are interested in the American heritage from literary and historical perspectives. Two tracks are available for students pursuing this major: a cultural track with emphasis in the literary perspective, and a social science track for students interested in historical and sociological perspectives.

Mathematics/Computer Science
This major is recommended for students who have had four years of high school mathematics and wish to specialize in the area of mathematics and computer science but who are not interested in the traditional Mathematics major because of their intended career objective as elementary, early childhood, or special needs educators. Many students who complete this interdisciplinary major in conjunction with Applied Psychology and Human Development or Elementary Education go on to acquire licensure to teach mathematics at the secondary level by fulfilling master’s degree requirements in Secondary Education through the Fifth Year Program.

**Perspectives on Spanish America**

Recommended for students who may have had at least two years of high school Spanish and wish to develop Spanish language skills, this minor is to be coupled with a background in the historical, sociological, and literary traditions of Hispanic cultures.

**Minors or Concentrations for Lynch School Students**

**Cyberstrategy and Design Minor**

The minor is designed to advance understanding of the intersections of cybersecurity and human behavior. Students will explore introductory and mastery level coursework, select electives from different departments, and engage in applied action projects and special topics research specially designated each year.

**Design-Thinking and Innovation Minor**

The minor is designed to advance understanding of Design-Thinking as an important tool for social impact and human-centered problem solving for our world. Students will explore introductory and mastery Design-Thinking coursework, select electives from different departments, and engage in social impact action/field-based projects specially designated each year.

**Korean Studies Interdisciplinary Minor**

The minor is designed to advance understanding of Korea as an important collaborator. Students will attain proficiency at or beyond the elementary level in the Korean language, select electives from different departments, and engage in an experience or project specially designated with our partner institutions in South Korea, following an interdisciplinary approach to a topic in education, applied psychology, and/or human development.

**Leadership in Higher Education and Community Settings Minor**

This 18-credit minor is designed for students who may have an interest in institutions of higher education, in local and international non-government organizations (NGOs), and/or in community-based organizations and programs.

**Middle School Mathematics Teaching Minor**

A minor in Middle School Mathematics Teaching is available to undergraduates who are either: Elementary Education majors (with an MCAS Mathematics major OR a Mathematics/Computer Science Interdisciplinary major) OR Secondary Education majors (with an MCAS Mathematics major). While the minor does not lead directly to middle school mathematics certification at Boston College (we do not offer middle school certification), it does fulfill the National Council of Teachers of Mathematics requirements for middle school teachers of mathematics. With this minor, acquiring middle school mathematics certification in Massachusetts should not be difficult.

**Research, Evaluation, and Measurement Minor**
The Research, Evaluation, and Measurement minor is designed to advance understanding research, evaluation, and measurement tools and practices. Students will explore topics as they relate to education, applied psychology, and human development.

**Restorative and Transformational Justice Minor**

The minor is designed to advance understanding of Restorative and Transformational Justice as a critical important tool. Students will explore Restorative and Transformational Justice topics as they relate to Education, Applied Psychology, and Human Development.

**Special Education Concentration**

The Special Education Concentration is available to Lynch School of Education and Human Development students only. This includes students majoring in Elementary Education, Secondary Education, and Applied Psychology and Human Development who have an interest in special needs education.

**Teaching English Language Learners (TELL) Certificate**

The Lynch School of Education at Boston College offers a certificate program in Teaching English Language Learners (TELL). Candidates should be working toward a licensure in an education field (early childhood, elementary, secondary, reading, etc.). This program is designed to prepare mainstream teachers to work with bilingual learners/English Language Learners in their mainstream classroom settings. The certificate requires two courses and completion of a field experience in a classroom that includes bilingual learners.

**Minors in the Carroll School of Management for Lynch School of Education and Human Development Students**

There are six minors offered to non-management students: Accounting for CPAs, Accounting for Finance and Consulting, Finance, Management and Leadership, Managing for Social Impact and the Public Good, and Marketing. Interested students should visit [www.bc.edu/csom-minors](http://www.bc.edu/csom-minors) for more information.

**Minors in the Morrissey College of Arts and Sciences for Lynch School of Education and Human Development Students**

In addition to a multitude of MCAS department and interdisciplinary minors, open to the Lynch School undergraduates, students may also declare the following minors that were created for Lynch School students by visiting Campion Hall 104.

**Educational Theatre Minor**

This minor provides drama education and theatre training to LSOE students who hope to include theater as a subject they teach and practice in school settings and/or who want to use creative dramatics and applied theatre techniques as teaching tools in other institutional settings.

**Communication Minor**

This 18-credit minor introduces students to the field of Communication. Students enroll in four required courses and two electives.
Minors in the Lynch School for Morrissey College of Arts and Sciences, Carroll School of Management, and Connell School of Nursing Students

Applied Psychology and Human Development Minor

This 18-credit minor may interest students who wish to (1) deepen their knowledge of human behavior in the areas of psychology, human development, and learning sciences in preparation for a career in fields such as human capital, consulting, research, consumer behavior, organizational studies, client relations, recruitment, marketing, advertising, counseling, public health, social, community and political advocacy, among others; (2) gain specialized knowledge in certain specific areas of human development and wellness: for example, counseling, training, personal assessment, family crisis assistance, substance abuse interventions, and child/aging/elderly care; or (3) prepare for employment in a government or private sector organizations.

Foundation in Education Minor

This 18-credit minor introduces students to courses in the fields of applied psychology and teacher education.

Inclusive Education Minor

This 18-credit minor is designed to (1) introduce students to the world of disabilities and special education, with an emphasis on special education practice, and (2) enhance the ability of future professionals to meet the needs of an increasingly diverse population of students in America’s schools.

Leadership in Higher Education and Community Settings Minor

This 18-credit minor is designed for students who may have an interest in institutions of higher education, in local and international non-government organizations (NGOs), and/or in community-based organizations and programs.

Secondary Education Minor

This minor is open to Morrissey College of Arts and Sciences students who major in one of the following disciplines: English, Mathematics, History, Foreign Language, Biology, Chemistry, Earth and Environmental Science, Physics, and who plan to pursue licensure to teach in high school. The minor is also open to CSOM or CSON students who would like to explore options for pursuing licensure to teach in high school.

Declaration of Minor Process

Students in MCAS, CSOM and CSON who are interested in the Secondary Education Minor should make an appointment in Campion 104. This minor requires early planning, an interview, an application, and a minimum grade point average of 3.0.

Graduation

For information regarding graduation, visit the Graduation section of Undergraduate Academic Policies.

This includes information on policies regarding such topics as:

- Advanced Standing
- Acceleration
The University awards degrees in May, August, and December of each year, although commencement ceremonies are held only in May.

Fifth Year and Early Admit Programs

For Boston College Juniors

The Fifth Year and Early Admit Programs offer academically outstanding Boston College juniors a unique opportunity to begin graduate study during their undergraduate senior year, allowing them to graduate with a bachelor’s and master’s degree in a shortened amount of time.

None of the 6 credits of the 120 credits required for the Lynch bachelor’s degree may be counted toward a Fifth Year Program. In consultation with an advisor, a graduate level course may be added each semester to the student's senior-year schedule.

All undergraduate juniors in the Lynch School of Education, Morrissey College of Arts and Sciences, Connell School of Nursing, and Carroll School of Management are eligible to apply for these programs. (*See additional Early Admit requirements below.)

Fifth Year Programs are available in:

- Early Childhood, Elementary, or Secondary Teaching
- Curriculum and Instruction
- Moderate Special Needs (mild/moderate learning disabilities, developmental disabilities, and behavior disorders)
- Severe Special Needs (including visually impaired, deaf/blindness, and multiple disabilities)
- Higher Education
- Measurement, Evaluation, Statistics, and Assessment
- Applied Developmental and Educational Psychology
- Global Perspectives
- Learning Engineering

There may be limited federal financial assistance for some graduate programs in Severe Special Needs and Secondary Science Teaching.

Early Admit Programs are available in Mental Health Counseling and School Counseling. Given the number of credits required for licensing in Mental Health and School Counseling, both Early Admit Program and students admitted directly into the M.A. programs typically need six years to complete their B.A. and license-eligible M.A. Mental Health degree (60 credits) or School Counseling (48 credits). The main advantages of the Early Admit Program are (1) BC juniors receive early provisional admittance into these M.A. programs, and (2) complete two master’s-level courses during senior year.

Students interested in a Fifth Year or Early Admit Program should consult with the Lynch School Office for Graduate Student Services, Campion 135, during the fall semester of their junior year. Without proper advisement and early acceptance into a master’s degree program, students will be unable to complete the program in five years.

A special master's degree program in Social Work program is also available for a limited number of students pursuing a B.A. in Applied Psychology and Human Development. Students should consult the Graduate School of Social Work for information on requirements, prerequisites, and application at the beginning of their sophomore year. Students interested in this 3/2 program in Applied Psychology and Human Development/Social Work should apply to the Graduate School of Social Work before the end of their sophomore year. Please contact the Office of Admissions, Graduate School of Social Work, Boston College, McGuinn Hall, Chestnut Hill, Massachusetts 02467, 617-552-4024.
Students who have completed some psychology-related coursework, have at least a 3.5 GPA, and have completed some type of practical, field-based or helping experience (e.g., residential advisor, camp counselor, hotline operator, youth worker, etc.), either volunteer or paid, are strong candidates for this program.

Application Process

- Students must apply by March 1 of their junior year.
- Applicants must meet all graduate admission requirements.
- The application fee and GRE is waived for applicants to the Fifth Year and Early Admit Programs.
- Notification of approval to begin the program is usually made in May by the Office of Graduate Admission.
- If students are in a study-abroad program during their junior year but are still interested in one of these programs, they should contact the Office of Graduate Admission at gsoe@bc.edu or (617) 552-4214.

If an applicant is not offered admission into the program, they are welcome to re-apply to the master's program upon completion of their undergraduate degree.

Full Graduate Student Status

Upon successful graduation from the undergraduate program, Fifth Year and Early Admit students will be advanced to full graduate student status if they have maintained good academic standing (including a 3.5 or higher in their two graduate courses). Early admit students will also need to have engaged in field experience as described above. Students should submit their transcripts and documentation of any additional service work if the work was not previously documented in their application for the Fifth Year and Early Admit programs. Upon final admission, the student will receive an official letter of acceptance into the full master's program by the Office of Graduate Admission (gsoe@bc.edu or 617-552-4214).

Morrissey College of Arts and Sciences, Undergraduate Programs

The Morrissey College of Arts and Sciences is the oldest and largest of the undergraduate colleges of the University. It offers either a Bachelor of Arts (B.A.) or Bachelor of Science (B.S.) degree, depending upon the major discipline, and prepares graduates for careers in a broad range of fields, as well as graduate training in both professional and academic disciplines.

In the Morrissey College of Arts and Sciences a student's program consists of required Core courses, intensive study in a major field, and a choice of individual electives reflecting a student's personal interests.

Core—A modern version of the traditional Jesuit Ratio Studiorum, the Core in the Morrissey College of Arts and Sciences provides an introductory exposure to the various disciplines that define a liberally educated individual in today's world as well as to the philosophical and theological ideas that help integrate these different areas of knowledge into a student's own intellectual perspective. All Morrissey College of Arts and Science students must complete the University Core requirements in the Arts, Cultural Diversity, History, Literature, Mathematics, Natural Sciences, Philosophy, Social Sciences, Theology, and Writing, as well as a Foreign Language Proficiency Requirement.

Major—All students in the Morrissey College of Arts and Sciences must select a major field of study from the 39 majors offered in the college. Work in the major is not necessarily directly related to career training, but it is meant to develop critical and analytical thinking, professional and presentational skills, and an appreciation for the complexity of an area of study beyond the introductory level. A major generally consists of at least 30 credits (ten to twelve focused courses) in a field, 27 of which are not used to fulfill requirements for another major or minor. Some of these are sequentially organized required courses. Some of the courses are more narrowly focused major electives. A list of majors is available at the Majors and Minors page.

Electives—Electives in the Morrissey College of Arts and Sciences are designed to challenge students to help define their own individual education. Students may use electives to pursue intensive work in another field with a second major or minor; to study...
fields that bridge traditional disciplines through organized interdisciplinary minors; to pursue professional interests in management, education, or nursing; or to explore their own individualized personal, intellectual, and artistic interests.

Thus, the purpose of the Morrissey College of Arts and Sciences is to produce broadly-educated, as well as highly-skilled graduates.

To ensure a coherent, well-developed program, students must meet with their faculty advisors before registration for each semester. They should also consult with other faculty, students, the Deans, the Pre-medical and Pre-law advisors, the Counseling Office, and the Career Center.

**Scholar of the College**

Scholar of the College is a designation given at Commencement to exceptional students (those with overall GPAs of 3.700 or higher) who have done independent work of the highest quality for a significant part of their senior year under the supervision of scholars in their major fields. The program is administered by the Dean’s Office. Students apply through their major departments and ordinarily complete Advanced Independent Research projects within that department. Interdisciplinary projects require the approval of all of the relevant departments, one of which must be the student's major department.

Normally, the Advanced Independent Research that qualifies for Scholar of the College recognition will consist of 12 academic credits, 6 each in the fall and spring of senior year, although occasionally a 3-credit senior thesis in the fall may develop into a 6-credit Advanced Independent Research in the spring. Students who successfully complete Advanced Independent Research projects with grades of A- or better and maintain cumulative GPAs of 3.700 or higher may be nominated for Scholar of the College recognition at Commencement.

To be considered for Scholar of the College recognition, finished projects, along with the evaluations of the faculty advisor and a department-appointed second and independent reader, must be submitted to the Office of the Dean in mid-April. Student should consult the Dean’s office for the exact deadline for the current year. The Scholars of the College will be selected from among the nominated student authors. All projects nominated for the McCarthy Prize will be reviewed by a faculty committee appointed by the Dean.

**Departmental Honors**

The designation of departmental honors is reserved for above average students who have demonstrated academic achievement in additional or more difficult courses or by successfully undertaking an approved research project, as determined by each department.

**Departmental Minors**

A departmental minor consists of at least 18 credits (typically six, 3-credit courses). These must include one introductory-level course and at least one upper-level course or seminar. Students choose courses for the minor in consultation with the director of the department's minor program. The following restrictions apply:

- No more than two Core courses may be used toward a minor.
- Core courses that do not count toward a departmental major will not count toward a departmental minor.
- Students may not major and minor in the same department unless that department offers more than one major.
- Students must have at least 15 credits in the minor program that are not used to fulfill requirements for another major or minor.

Minors are available in Arabic Studies, Art History, Biology, Chemistry, Chinese, Classics, Computer Science, Economics, English, Environmental Studies, Film Studies, French, Geological Sciences, German Studies, Hispanic Studies, History, Irish
Studies, Italian, Linguistics, Mathematics, Music, Philosophy, Physics, Russian, Sociology, Studio Art, Theatre, and Theology. Information regarding specific requirements is available in the departments.

Interdisciplinary Programs

The Morrissey College of Arts and Sciences offers a variety of interdisciplinary programs and minors. Visit the Interdisciplinary Programs and Minors page for more information.

Six-Year Bachelor and Law Degree Program

In order to respond to changing student needs, the Boston College Law School has instituted an accelerated admissions program (3+3 Program). The 3+3 Program allows students to earn an undergraduate degree and a law degree in six years instead of seven.

Under this program, exceptionally well-qualified students from the Morrissey College of Arts and Sciences will be allowed to enter the Boston College Law School after completing their junior year of undergraduate study. During their junior year, students seeking to participate in the 3+3 Program apply to Boston College Law School. If accepted for admission, they begin law school immediately following completion of their junior year. Upon successful completion of the first year of law school with grades of "C" or better, students earn a bachelor’s degree from the Morrissey College of Arts and Sciences. Upon successful completion of the remaining two years of law school, students earn a J.D. from Boston College Law School.

The 3+3 Program is limited to undergraduates in the Morrissey College who have completed at least four full-time semesters in residence in the College. Interested students should contact the pre-Law advisor early in their program of study for more information and advisement.

Fifth Year B.A./M.A.

The Morrissey College of Arts and Sciences—Graduate School offers a five-year B.A./M.A. program in some departments. Application to the program normally takes place early in the second semester of the junior year. The applicant must complete an application to the master's degree program in the Graduate School of the Morrissey College of Arts and Sciences, Gasson 108. Admission to the B.A./M.A. program normally requires an overall GPA of 3.333 and a GPA of 3.5 in the major. Although specific B.A./M.A. program requirements will vary across departments, the program limits the number of credits that can be applied towards the master's degree to 6 credits that may also be applied to the 120 credits required for the undergraduate degree. The undergraduate degree will be conferred upon completion of undergraduate requirements. The master's degree will be conferred upon completion of degree requirements specified by the department.

Accelerated Bachelor of Arts—Master of Social Work Program

The Morrissey College of Arts and Sciences and the Boston College School of Social Work offer an Accelerated B.A./M.S.W. Program whereby a limited number of Psychology and Sociology majors may begin the Social Work foundation courses during their junior and senior years and receive the B.A. at the end of four years and the M.S.W. after the fifth year. Students must meet all standard requirements for admission to the Boston College School of Social Work and enroll as final-year M.S.W. candidates for their fifth year. Interested students should contact the Director of Admissions of the School of Social Work by spring semester of the sophomore year at the latest. For prerequisites and application information, consult the School of Social Work, McGuinn 118, 617-552-4024.

The School also offers an upper-division introductory course that is not applicable to the M.S.W. degree, SCWK6600 Introduction to Social Work, which is cross-listed with the Departments of Psychology and Sociology in the Morrissey College of Arts and Sciences.
Minors in the Lynch School of Education and Human Development for Morrissey College of Arts and Sciences Students

Arts and Sciences students completing minors in the Lynch School of Education and Human Development must fulfill all major, Core, and elective requirements in the Morrissey College of Arts and Sciences and have completed at least 96 credits in the Morrissey College of Arts and Sciences.

The minor in Secondary Education is open to Morrissey College of Arts and Sciences students in specific majors. See the Lynch School of Education and Human Development section for more information.

Minors in the Carroll School of Management for Morrissey College of Arts and Sciences Students

Morrissey College of Arts and Sciences students completing minors in the Carroll School of Management must fulfill all major, Core, and elective requirements in the Morrissey College of Arts and Sciences and have completed at least 96 credits in the Morrissey College of Arts and Sciences.

There are six minors offered to non-management students: Accounting for CPAs, Accounting for Finance and Consulting, Finance, Management and Leadership, Managing for Social Impact and the Public Good, and, Marketing. Interested students should visit www.bc.edu/csom-minors for more information.

International Study

The aim of international study is to enable students to become fluent in a foreign language and to better understand a different culture. Students wishing to spend a year or a semester abroad and transfer the credits earned to their Boston College degree must receive approval from a Dean and enroll in a program approved by the College. To qualify for Dean's approval, a student must have at least a 3.0 cumulative average, have completed a significant number of courses in the major and have made substantial progress on Core requirements, have the approval of the Chairperson of the major department, and have adequate proficiency in the language of the country in which he/she plans to study. For students who have not passed the language proficiency requirement, a minimum of one year of college-level language study is required.

Students should begin the application process by contacting the Office of International Programs early in their sophomore year.

Academic Regulations

Satisfactory Academic Progress

A student in the Morrissey College of Arts and Sciences must complete at least 120 credits to earn the bachelor’s degree 96 of which are Morrissey College credits over at least 8 full-time semesters. Particular requirements for gaining those credits, or compiling those courses, are stated elsewhere in this section. All Morrissey College of Arts and Sciences students must complete the University Core requirements in Arts, Cultural Diversity, History, Literature, Mathematics, Natural Sciences, Philosophy, Social Sciences, Theology, and Writing, as well as the Language Proficiency requirement. For more information, visit the Policies and Procedures section.

To continue normal progress in a full-time program of study, a student must ordinarily maintain a cumulative average of at least 1.667 as the minimum standard of scholarship and must not fall more than 7 credits behind the total number of credits a student of their status is expected to have completed (an average of 15 credits each semester). Any student who is permitted by the Deans
to continue enrollment in a full-time undergraduate program, with the exception of students on probation, is considered to be in good standing.

Failure to maintain good standing either through a low cumulative average, or by incurring deficiencies including failures, withdrawals, incompletes, or unapproved underloads, will result in the student being placed on warning, probation, or being required to withdraw, as the Dean shall determine.

Morrissey College Academic Warning and Probation Policy

Academic Concern

A student who falls 8–11 credits behind, at the end of the semester, will be the subject of academic concern for the Associate Deans. These students are required to take summer courses to make up their academic deficiencies.

Academic Warning

A student who falls 12–14 credits behind, at the end of a semester, will receive an academic warning. Incompletes are considered deficient credits for the purpose of this determination. An academic warning will push the student's graduation date back by one semester, though the original graduation date may be regained if and when adequate make up credits are completed. A student may request restoration of their original graduation date when they are within three credits of their original graduation date.

Academic Probation

A student who falls 15 or more credits behind at the end of a semester will be academically withdrawn for the subsequent semester, or placed on probation. Incompletes will be counted as deficient credits for the purposes of making this determination. A student on probation is not considered in academic good standing. In order to return to academic good standing and continue as a degree candidate in MCAS a student on probation must:

1. Demonstrate their capability of continuing by successfully completing at least 12 credits in MCAS day courses.
2. Achieve an average term GPA of at least 2.00 in those 12 credits.
3. Earn sufficient credits to be within 3 of the number expected for their revised graduation date.

While courses taken at BC while on probation will count towards graduation, the probationary semester will not count as one of the 8 semesters required for the degree. Hence, after a probationary semester, the student's graduation date will normally be delayed at least one semester. A student who has been on probation may become eligible to regain their original graduation semester by satisfying all degree requirements by their original graduation date.

A student failing to meet all the conditions of the probationary semester will be academically withdrawn from the college and can only apply for readmission after making up all credit deficiencies by approved methods. Probation will not be extended to a second consecutive semester. A student is allowed no more than 2 probationary semesters. Subsequent credit deficiencies can lead to permanent academic dismissal.

If a student does not want to meet the conditions of a probationary semester in MCAS they can choose to be academically withdrawn. While withdrawn, a student can apply to take pre-approved makeup courses as a non-degree student in the Woods College or at an appropriately accredited external college or university. After completing the required makeup credits, the student can apply for readmission to the Morrissey College. Upon readmission, their graduation semester will be postponed at least one semester.

Importantly, in all cases, there is normally a limit of 24 external credits that can be applied to a Morrissey College degree. A student who finds they are unable to meet the requirements of their academic warning or probationary semester should contact their Dean immediately.
Acceleration

For information regarding acceleration, visit the Graduation section of Undergraduate Academic Policies.

Procedure of Appeal

Students with questions of interpretation or petitions for exception from the Morrissey College of Arts and Sciences Regulations, apart from those specified in the University's academic integrity policy, may submit them to the Associate Deans.

A student should always attempt to resolve problems concerning the manner in which grades have been awarded or the academic practices of an instructor by direct contact with the instructor. In the rare case of an unresolved question the student should first refer the matter to the Chairperson or Director of the relevant department or program.

A formal appeal of a course grade, which ought not be entered lightly by a student nor lightly dismissed by an instructor, should be made no later than the sixth week of the following semester. In making a formal appeal, a student files a written statement with the Dean for his or her class. The Dean will then request written responses from both the instructor and Chairperson and submit the case to the Appeals Committee of the Educational Policy Committee. The committee will review the case thoroughly and make a recommendation on resolution to the Dean of the College. The Dean's decision will be final.

African and African Diaspora Studies

The African and African Diaspora Studies Program (AADS) considers the history, culture, and politics of Africans on the continent and African-descended peoples in the U.S., the Caribbean, South America, Europe, Asia, and the Middle East. Covering vast historical periods and geographies, AADS acquaints students with the multiplicity and diversity of the African Diaspora and the world in which we all live. Using interdisciplinary and comparative approaches, the program draws on a broad range of methodologies in English, history, sociology, philosophy, theology, communication, and theater.

Central Themes

To get the most out of an AADS minor, students are encouraged to organize their courses around the central themes of globalization, intersectionality, or social justice.

Globalization

Globalization is as old as the trade in African slaves. Patterns of resource extraction, labor, trade, commerce, and travel have shaped the experiences of African-descended peoples and the peoples they have encountered. Selected courses explore the connections between various geographic regions, cultural traditions, and historical developments that have defined globalization.

Intersectionality

Race is defined by various identity categories and social locations such as gender, class, color, ethnicity, region, nation, age, sexuality, political ideals, and spiritual beliefs. Intersectionality reminds us that race is not a monolithic or homogenous category of human experience.

Social Justice

The history of African and African-descended peoples has been defined by the struggle for social justice: the fight for human equality and the fight against racism, sexism, homophobia, and class exploitation. In resisting enslavement, segregation,
patriarchy, imperialism, and colonialism, and by striving to overturn discrimination in education, housing, healthcare, employment, and religious institutions, African and African Diasporic peoples have undertaken drives for social emancipation that have expanded the meaning of democratic ideals.

Major Requirements—31 Credits (or More)

The African and African Diaspora Studies (AADS) major consists of a minimum of 31 credits, equivalent to at least 10 full-semester courses. AADS majors can have a second major as long as the student stays in compliance with the University’s regulation that, in order to earn a major, a student must have at least 27 credits in the major program that are not used to fulfill requirements for another major or minor. In addition to taking AADS1110 Introduction to African Diaspora Studies (3 credits) and AADS6600 Senior Seminar (4 credits), students pursuing an AADS major need to take 8 additional elective courses, and only two of which can be a 1000-level course. Four of those elective courses must be Black Atlantic courses. Black Atlantic courses are those that have a global framework that puts different geographical regions of the world in conversation with one another within the African Diaspora.

There are two tracks in which AADS majors can concentrate: (1) Intellectual Traditions and Cultural Production or (2) Politics and Social Inquiry. Students in the Intellectual Traditions and Cultural Production track examine Black intellectual traditions, expressive forms, and modes of cultural analysis and cultural criticism primarily (but not exclusively) based on textual analyses. In the Politics and Social Inquiry track students examine the development of institutions, measure inequality, and identify societal patterns utilizing primarily (but not exclusively) historical and social science techniques. While both tracks are rooted in the interdisciplinary study of the African Diaspora, the Intellectual Traditions and Cultural Production track will be for those students most interested in pursuing careers and graduate studies typically associated with the humanities, while the Politics and Social Inquiry track will attract students with more social science curiosities.

AADS majors must take six of their eight elective courses in one track and their remaining two in the other. Students’ elective courses may not fall exclusively in Social Science (Communication, History, Political Science, or Sociology) or Humanities (Art History, English, Music, Philosophy, Romance Languages and Literatures, or Theatre) departments.

Sample Schedule for Intellectual Traditions and Cultural Production

First Year

- AADS/SOCY1511 Where #BlackLivesMatter meets #MeToo: Violence and Representation in the African Diaspora (6 credits)
- AADS1110 Introduction to African Diaspora Studies (3 credits)

Sophomore Year

- AADS2210/ARTH2210 Festival, Carnival, and Masquerade (3 credits)
- AADS2306/MUSA2306 Music of Africa (3 credits)
- AADS3000/THEO3000 Black Church, Black Protest (3 credits)

Junior Year

- AADS3002/ENGL4017 Black Nature: Race and Ecology (3 credits)
- AADS4481/HIST4481 History of Black Nationalism (3 credits)

Senior Year

- AADS3466/FREN3360 Literature and Culture in Francophone Africa (3 credits)
- AADS5597/SOCY5597 Contemporary Race Theory (3 credits)
- AADS6600 Senior Seminar (4 credits)
Sample Schedule for Politics and Social Inquiry

First Year

● AADS1110 Introduction to African Diaspora Studies (3 credits)
● AADS1155/SOCY1043 Introduction to African American Society (3 credits)

Sophomore Year

● AADS1139/SOCY1039 African World Perspectives (3 credits)
● AADS2442/POLI2442 African Politics (3 credits)
● AADS3302/RLRL3302 Racism: French and American Perspectives (3 credits)

Junior Year

● AADS3416/POLI3416 Race and Ethnicity in Latin America (3 credits)
● AADS4472/COMM4472 Race, Law, and Media (3 credits)

Senior Year

● AADS3466/FREN3360 Literature and Culture in Francophone Africa (3 credits)
● AADS4485/HIST4485 Medicine and Public Health in the African Diaspora (3 credits)
● AADS6600 Senior Seminar (4 credits)

Minor Requirements—18 Credits (or More)

AADS introduces histories, cultures, and experiences of African descended peoples to the broadest range of students; supports serious academic research on Africa and the African Diaspora; gives students opportunities to examine the depth and breadth of African legacies on the continent and in all parts of the world; links local Black communities more closely to Boston College; projects the significance of realities of people of African descent to the intellectual life of Boston College and larger communities; and prepares students to succeed in college and their post-graduate careers.

An AADS minor will consist of a minimum of 19 credits (6 full-semester courses)

Requirements

● AADS1110 Intro to African Diaspora Studies (3 credits)
● AADS6600 Senior Seminar (4 credits)
● 4 electives (12 credits)
  ○ 2 electives must be Black Atlantic Courses

A Black Atlantic course has a global perspective that puts different geographical regions of the world in conversation with one another within the African Diaspora

AADS1110 Introduction to African Diaspora Studies familiarizes students with the major issues and methodologies involved in studying the African Diaspora. AADS6600 Senior Seminar is an intensive reading and writing course designed to assist students in synthesizing their minor experience. Minors must pass AADS1100 prior to enrolling in AADS6600.
To affirm and specify our minors’ selected Central Theme, we suggest that their four additional courses reflect a particular thematic focus. Some possible themes are:

- Cities and Urban Life
- Economics of Inequality
- Gender and Sexuality
- Globalization and Development
- Intellectual and Philosophical Traditions
- Migration and Immigration
- Music and the Performing Arts
- Political Systems and Grassroots Protest
- Popular Culture and New Media
- Spirituality and Social Protest

Though suggested, these themes are not required; additionally, students may devise their own thematic focus, in consultation with the AADS Director or their AADS Advisor.

Contact us at 617-552-3238 or visit our website at www.bc.edu/aads.

Core Offerings

The Program offers several courses that satisfy the Core requirement in Cultural Diversity and one course that satisfies the requirement in Social Sciences.

Art, Art History, and Film

The department offers three majors: Art History, Film Studies, and Studio Art. Minors are offered in each area as well. Internships are available in local museums and galleries. For details, inquire at the Art, Art History, and Film department office.

Major Requirements: Art History

The Art History major offers undergraduate students an opportunity to acquire specialized knowledge and understanding of visual artifacts from prehistory to the present day, from Western and non-Western cultures. As a humanistic discipline, the history of art closely relates the analysis of visual culture to other modes of intellectual inquiry; accordingly, art history students and faculty frequently participate in interdisciplinary programs across the University.

Contributing to the broad foundation that constitutes a liberal arts education, departmental courses prepare students for graduate work leading to professional careers in the arts, including teaching and research, art criticism, museum curatorship, art conservation, museum directorship, and art appraising. They also prepare the student to hold positions in commercial galleries and auction houses.

The skill sets developed in art historical studies, however, do not apply exclusively to the analysis of works of art. The ability to evaluate material evidence, to study the cultural contexts in which it was discovered, to assess critically the various interpretations works of art have elicited, and to fashion clear and persuasive arguments in kind are valuable in any program of study or professional situation. In a world increasingly dominated by images, visual literacy is as indispensable to navigating one’s everyday environment as it is to analyzing products of high culture.
To tailor departmental offerings to suit their specific needs, students majoring in art history plan integrated programs in consultation with their faculty advisors and are encouraged to take courses in history, philosophy, religion, and other fields related to their specialization.

**Students in the classes of 2020, 2021, and 2022**

The Art History major requires 11 courses (33 credits):

- ARTH1101 Intro to Art History I: Pre-History to Middle Ages
- ARTH1102 Intro to Art History II: Renaissance to Modern
- One Studio Art (ARTS) course or ARTH4314 The Materials of Art and Their Conservation
- One course in Ancient Art
- One course in Medieval Art
- One course in Renaissance through Eighteenth Century Art
- One course in Nineteenth through Twentieth Century Art
- One course in non-Western Art
- Elective 1
- Elective 2
- ARTH4401 Seminar in Art Historical Research (must be taken in the fall semester of junior or senior year)

At least three of these courses must have ARTH numbers at or above the 3000 level and two must have ARTH numbers at or above the 4000 level.

Students also have the option of choosing a non-Western track for the major. The requirements are identical to the Western track (see above) in terms of the number and level of courses, except for these distribution requirements:

- Two courses in the area of Islamic art
- Two courses in the area of East Asian art
- At least one course in another non-Western field, such as African, Pre-Columbian, or ancient Near Eastern art.

Those students choosing this option should select Professor Aurelia Campbell or Professor Kyrah Daniels as their advisor.

**Students in the class of 2023 and later**

Majors in the class of 2020, 2021, and 2022 may follow the new requirements with the approval of the Director of Undergraduate Study.

The Art History major requires 11 courses (33 credits):

- ARTH1101 Intro to Art History I: Pre-History to Middle Ages
- ARTH1102 Intro to Art History II: Renaissance to Modern
- **Two** of the following three courses: ARTH2210 Introduction to African Art and Visual Culture, ARTH2212 East Asian Art and Architecture, ARTH2213 Islamic Art and Architecture
- One Studio Art (ARTS) course or ARTH4314 The Materials of Art and their Conservation
- Elective 1 (2000 or 3000 level)
The Art History major can also be completed with a concentration in Museum Studies, which requires a minimum of 12 courses (36 credits):

- ARTH1101 Intro to Art History I: Pre-History to Middle Ages
- ARTH1102 Intro to Art History II: Renaissance to Modern
- Two of the following three courses: ARTH2210 Introduction to African Art and Visual Culture, ARTH2212 East Asian Art and Architecture, ARTH2213 Islamic Art and Architecture
- ARTH4314 The Materials of Art and Their Conservation
- ARTH4370 Museum of Art: History, Philosophy, and Practice Course
- One of the following courses: MGMT1021 Organizational Behavior, MGMT2123 Negotiation, MGMT2127 Leadership, MGMT2132 Managing Change, MGMT2133 Leading High Performance Teams, MGMT2265 Globalization, Culture, and Ethics
- Elective 1 (2000 or 3000 level)
- Elective 2 (2000 or 3000 level)
- Elective 3 (3000 or 4000 level)
- Elective 4 (3000 or 4000 level)
- ARTH4401 Seminar in Art Historical Research (must be taken in the fall semester of junior or senior year)

Major Requirements: Film Studies

The Film Studies major applies the liberal arts tradition to the present-day culture of images and technologies. Courses in film history, theory, and criticism enable students to become active, selective, and ethical participants in a world progressively more dominated by the media of visual communication.

Research-based studies in American and world cinema explore the mutual influence of the films and their respective diverse cultures and historic periods. Familiarity with several of the great films and filmmakers provides a basis for understanding the relationship between contemporary artists and industrial society. Each student will have an opportunity to apply this theoretical knowledge to the experience of film making and exhibition both through programs in scripting, photography, production, and digital editing, and through an extensive internship program in the Boston area.

Students are encouraged to widen and deepen their understanding of the medium through additional courses in Art History, Studio Art, Theater, and Communication. While this Film Studies major provides a solid foundation for further studies and professional involvement in the industry, it also offers the liberal arts student a broad-based preparation for other career options.

For more information, contact John Michalczyk, Director, Film Studies major Coordinator, Devlin Hall 420, 617-552-3895, john.michalczyk@bc.edu.

For the major in Film Studies there is a requirement of twelve courses, eight of which must be at the 2000 level or above:

- FILM2202 Introduction to Film Art
At least two courses in American Film History:

- FILM2280 Early Years
- FILM2281 Studio Era
- FILM3389 American Directors Series
- FILM3392 Post-Classical Period
- FILM3393 Hollywood’s Golden Age

At least two production courses:

- ARTS1161 Photography I
- ARTS2261 Intermediate Photography
- ARTS2276 Art and Digital Technology
- FILM1171 Filmmaking I
- FILM2273 Filmmaking II
- FILM2274 Digital Non-Linear Editing

Six electives, at least two at the 3000 or 4000 level:

- FILM2277 Russian Cinema
- FILM2282 Political Fiction Cinema
- FILM2283 History of European Cinema
- FILM3301 Screenwriter
- FILM3312 World Cinema
- FILM3380 Latin American Cinema
- FILM3381 Propaganda Film
- FILM3382 Documentary Film
- FILM3383 Film Criticism and Theory
- FILM3391 American Film Genres

Senior year:

- FILM4400+ Senior Project

**Major Requirements: Studio Art**

In our increasingly image-laden society, visual intelligence and visual literacy are paramount skills. The Studio Art program addresses this prerequisite and provides students with exciting opportunities for creative exploration in painting, drawing, photography, video, ceramics, and digital media. Students are encouraged to connect their interests, experience, and other fields of study with their studio practice. The program emphasizes the importance of linking a skillful handling of materials with an understanding of the conceptual issues at stake, and an ability to view their own work in an art historical context. It is about having the hand, eyes, brain, and heart working in unison.

The Studio Art major is designed both for the student artist and the student interested in art. It teaches how to make art and an appreciation of how art is made. The department courses are conceived as an integral part of the university curriculum, and the
studio major provides a solid basis for continuing work in graduate school and in art-related fields such as design, art criticism, teaching, conservation, art therapy, publishing, exhibition design, and advertising.

The Studio Art major provides students with an opportunity to develop the techniques, visual sensibility, and historical understanding necessary for working with various materials. An exploration of the meanings and ideas generated by the things we make and an awareness of the process of making are essential parts of the program.

An integral part of the Studio Art major’s undergraduate education is the senior project. Focused in their area of concentration, senior projects are exhibited on campus at the end of the academic year.

Students intending to major in Studio Art are encouraged to begin the major in their freshman year; the major must be declared before the beginning of a student’s junior year. Students must have taken at least four semesters of work relating to the senior project prior to their senior year.

For more information, contact Professor Sheila Gallagher, Studio Art major Coordinator, Devlin Hall 401B, 617-552-0482, sheila.gallagher@bc.edu.

Majors are required to take a minimum of twelve courses for a total of 36 credits, to be distributed as indicated below:

Required introductory course for all majors (suggested after the introductory courses):

- ARTS1103 Issues and Approaches to Studio Art

Two of the following for a total of 6 credits. In consultation with an advisor, one of these classes should set the direction and future course choices and concentration of the major:

- ARTS1101 Drawing I
- ARTS1102 Painting I
- ARTS1104 Design: Seeing is Believing or ARTS1107 Design I
- ARTS1141 Ceramics I
- ARTS1150 Painting Plus Collage
- ARTS1155 Introduction to Digital Art
- ARTS1161 Photography I

One of the following:

- ARTH3356 Art Since 1945
- ARTS2211 Ideas in Contemporary Art (formerly Hot Off the Shelf)

Six additional studio art courses:

- (for a total of 18 credits) at the 2000 level or above, of which three courses (9 credits) must be at the 3000 level

Required courses for all senior majors:
Students must have taken at least four semesters of work relating to the senior project prior to their senior year.

In addition to the required courses, the following courses are recommended:

- ARTH1101 Art: Prehistoric to Middle Ages
- ARTH1102 Art: Renaissance to Modern
- ARTH2257 Nineteenth-Century Art
- ARTH2258 Modern Art: Nineteenth-Twentieth Century
- ARTH3356 Art Since 1945

**Architecture Studies Concentration in the Studio Art Major**

Minimum of 11 courses (33 credits) to be selected as follows:

**Required courses for the Architecture Studies concentration:**

- ARTS1101 Drawing I (Core)
- ARTS1103 Issues and Approaches
- ARTS1125 Innovation Through Design Thinking (also UNAS1025)

One of the following courses:

- ARTS1155 Introduction to Digital Art
- ARTS2276 Arts and Digital Technology
- ARTS2250 Introduction to Digital Design

Two Architectural History course from this list (six credits), at least one of which must be at the 1000 or 2000 level:

- ARTH1107 History of Architecture (World Architecture)
- ARTS2211 Ideas in Contemporary Art
- ARTH2251 Modern Architecture
- ARTH2267 Salt Box to Skyscraper: American Architecture Seventeenth–Twentieth Centuries
- ARTH3311 Greek Art and Archaeology
- ARTH3314 Egyptian Art and Archaeology
- ARTH3332 The Age of Leonardo, Michelangelo, Raphael and Beyond: Sixteenth-Century Art in Italy
- ARTH3344 Venetian Art and Architecture
- ARTH3346 Architecture in East Asia
- ARTH3347 The Age of the Baroque: Seventeenth-Century Art in Italy
- ARTS3356 Art Since 1945
- ARTH4315 Gender and the Material World in China
• ARTH4402 Art and Architecture in The Forbidden City

Three additional courses (9 credits) one of which must be at the 3000 level, suggested electives:

• ARTS2250 Introduction to Digital Design
• ARTS2252 Architecture Design I
• ARTS2207 Urban Design for Complexity and Sustainability
• ARTS3335 Advanced Digital Design: Designing Spaces
• ARTS3334 Advanced Mixed-Media
• During the senior year:
  ○ ARTS4498 Senior Project I OR Internship OR Independent Study
  ○ ARTS4473 Senior Project II

Career Discovery

• Summer courses and internships are available, but do not count towards the major/minor credit requirements.
• Summer travel and summer courses are recommended for enrichment. Students should consult with a departmental advisor about these opportunities.

Additional Stipulations for the Studio Art Major

• No more than two independent studies in the field of concentration.
• No more than two courses taken during the junior year abroad or at another institution may count toward the major. Transfer students should work out credits with the department major advisor.
• Courses to be counted in the major must be taken for a grade (no pass/fail grades).

Art History Minor

Students in the classes of 2020, 2021, and 2022

(Minors in the class of 2023 and later, please see below.)

The Art History minor requires 6 courses (18 credits):

• ARTH1101 Intro to Art History I: Pre-History to Middle Ages
• ARTH1102 Intro to Art History II: Renaissance to Modern
• Elective 1
• Elective 2
• Elective 3
• Elective 4

At least two of these electives must be at or above the 3000 level, and at least two must come from one of the following categories:

• Ancient/Medieval
• Renaissance/Baroque
The Art History minor also requires a copy of a research paper written in one of the Art History elective courses. To satisfy the requirement, the paper must have received a grade of B or above. Please submit the paper to Professor Pamela Berger.

Courses counted for the minor must be taken for a grade, not pass/fail. At least 15 credits (5 courses) in the minor program must not be used to fulfill any other major or minor.

**Students in the classes of 2023 and later**

**The Art History minor requires 6 courses (18 credits):**

- ARTH1101 Intro to Art History I: Pre-History to Middle Ages
- ARTH1102 Intro to Art History II: Renaissance to Modern
- One of the following three courses: ARTH2210 Introduction to African Art and Visual Culture, ARTH2212 East Asian Art and Architecture, ARTH2213 Islamic Art and Architecture
- Elective 1
- Elective 2
- Elective 3

At least two of these electives must be at or above the 3000 level, and at least two must come from one of the following categories:

- Ancient/Medieval
- Renaissance/Baroque
- Nineteenth/Twentieth Century
- Asian
- African
- Islamic
- Museum Studies

The Art History minor also requires a copy of a research paper written in one of the Art History elective courses. To satisfy the requirement, the paper must have received a grade of B or above. Please submit the paper to Professor Pamela Berger.

Courses counted for the minor must be taken for a grade, not pass/fail. At least 15 credits (5 courses) in the minor program must not be used to fulfill any other major or minor.

**Film Studies Minor**

The Film Studies minor enables students to develop a basic awareness of film as a contemporary medium of communication. The minor consists of the Introduction to Film Art, one course in history or criticism, one course in production, and three electives in Film Studies which enable a student to design a personalized area of concentration.
Requirements normally include FILM2202 Introduction to Film Art, then one production course, and one course in history or criticism. A selection of three additional courses as electives from the offerings of the film studies program allows the student to pursue individual interests and develop a level of competence in one particular area, such as filmmaking, digital editing, scriptwriting, photography, history of film, or film criticism.

Students interested in the Film Studies minor may contact the Director, Professor John Michalczyk, Film Studies minor Coordinator, Devlin Hall 420, 617-552-3895, john.michalczyk@bc.edu.

**Studio Art Minor**

The minor in Studio Art offers students the opportunity to pursue a course of study in ceramics, design, digital arts, drawing, mixed media, painting, or photography. There are features of the minor program that resemble, in an abbreviated way, successful aspects of our majors' studio art program. The required Senior Minor Projects class, for example, will function analogously to our Senior Project. This curriculum of six courses is designed to encourage an in-depth investigation of one medium, rather than a generalized sampling of many. The course structure aims at having the individual student develop the artistic techniques and conceptual visual sensibility necessary for working as an artist today. It should be noted students will not be permitted to begin the Studio minor after their junior year. Students who are interested in declaring a minor can contact Professor Hartmut Austen, Studio Art minor Coordinator, Devlin Hall 414, hartmut.austen@bc.edu.

**Information for First Year Majors**

First Year Art History majors should take ARTH1101 Art from Prehistoric Times to the High Middle Ages with ARTH1103 Art History Workshop. First Year Studio Art majors are advised to select two studio courses from ARTS1101, ARTS1102, ARTS1104, ARTS1107, ARTS1150, ARTS1155, or ARTS1161 before taking ARTS1103. First year Film Studies majors should take FILM2202 Introduction to Film, a required foundation course to ground the student in film language, history, and criticism.

**Information for Study Abroad**

The Boston College Art, Art History, and Film Department offers study abroad options for Art History, Film Studies, and Studio Art majors. The department assists students with their options under close supervision, as well as providing encouragement.

The Art, Art History, and Film Department believes strongly that study abroad is worthwhile, exposing students to not only other cultures but other forms and traditions of artistic expression. At the same time, it cautions students to consider their growth and development in their specific major and to integrate study abroad with their chosen area of concentration in consultation with their department advisor.

The Art History department advisor is Kenneth Craig, Devlin Hall 424, 617-552-3153, kenneth.craig@bc.edu. The Film Studies department advisor is John Michalczyk, Devlin Hall 434, 617-552-3895, john.michalczyk.1@bc.edu. The Studio Art department advisor is Sheila Gallagher, Devlin Hall 401b, 617-552-0482, Sheila.galagher.2@bc.edu.

**Biochemistry**

This interdisciplinary major in Biochemistry, administered jointly by the Chemistry and Biology Departments, provides the student with a broad background in biochemistry and related courses in chemistry and biology. This major is intended for those interested in the more chemical and molecular aspects of the life sciences.

**Degree Requirements for B.S. in Biochemistry**

- BIOL2000 Molecules and Cells (3 credits)
- BIOL2010 Ecology and Evolution OR BIOL3030 Introduction to Physiology (3 credits)
- BIOL2040 Investigations in Molecular Cell Biology (3 credits)
- One course in cell biology from the following list (3 credits):
  - BIOL3040 Cell Biology
  - BIOL3210 Plant Biology
  - BIOL4140 Microbiology
- One course in genetics or genomics from the following list (3 or 4 credits):
  - BIOL3150 Introduction to Genomics
  - BIOL3190 Genetics and Genomics
- CHEM1109 General Chemistry I and CHEM1111 Laboratory (or CHEM1117 and CHEM1119) (4 credits)
- CHEM1110 General Chemistry II and CHEM1112 Laboratory (or CHEM1118 and CHEM1120) (4 credits)
- CHEM2231 Organic Chemistry I and CHEM2233 Laboratory (or CHEM2241 and CHEM2243) (4 credits)
- CHEM2232 Organic Chemistry II and CHEM2234 Laboratory (or CHEM2242 and CHEM2234) (4 credits)
- CHEM3351 Analytical Chemistry and CHEM3353 Laboratory (4 credits)
- CHEM4473 Physical Chemistry for Biochemistry majors (3 credits); CHEM4461–4462 Biochemistry I and II; or BIOL4350 Biological Chemistry and BIOL4400 Molecular Biology (6 credits)
- PHYS2100 Physics I (calculus) and PHYS2050 Laboratory (5 credits)
- PHYS2101 Physics II (calculus) and PHYS2051 Laboratory (5 credits)
- MATH1101 (or MATH1103, or MATH1105) Calculus II (3–4 credits); or MT2202 Multivariable Calculus (4 credits)
- Two advanced electives (5 credits min.)* see current major checklist for available options

Total Credits: 64–65

Note: The Biochemistry major requires all of its majors to take a Boston College calculus course, regardless of AP score. Students can take Calculus 2 (MATH1101, MATH1103 or MATH1105), or Multivariable Calculus (MATH2202).

*With Biology or Chemistry Department approval, two semesters of Undergraduate Research may be substituted for one advanced elective.

Advanced Placement: Biochemistry majors who have a 5 on the Biology AP exam in their senior year may choose to bypass the 2000 level lecture courses (BIOL2000 and BIOL2010). These students will begin the major with BIOL3040 Cell Biology and take 6 credits of additional biology courses, level 3000 or above.

Recommended Course Sequencing for Biochemistry Majors

Freshman Year

- General Chemistry and Labs
- BIOL2000 and either BIOL2010 or BIOL3040
- BIOL2040 lab (if possible)

Sophomore Year

- Organic Chemistry and Labs
- One course from the cell biology list (or BIOL3030)
- One course from the genetics/genomics list
- BIOL2040 lab (if needed)
Junior Year

- Biochemistry sequence

Senior Year

- Analytical Chemistry and lab
- Physical Chemistry
- Two advanced electives

Note:

- Calculus is typically completed by the end of the sophomore year.
- Physics can be taken at any time beginning with the sophomore year.
- Students are encouraged to participate in Undergraduate Research, typically beginning in the junior year; other options are available. Students should speak to individual professors regarding research opportunities.

Approvals for Biochemistry Major Courses Taken Abroad; Boston College Summer Courses

With prior Department approval, students may apply one course taken abroad to their biochemistry elective requirement. To be considered as a possible substitute for a Biochemistry major elective, a course must be a second level course with published biochemistry prerequisites and not be an introductory level course or a course intended for professional study (or for non-biochemistry majors).

Note: Biochemistry major required courses offered through the Boston College Summer School will be applied to the Biochemistry major as regular academic-year electives with the same catalog number.

Biology

The Biology Department considers a basic understanding of biological systems to be an essential skill in our increasingly technological society and offers a range of courses for both biology majors and non-majors. Courses are designed to promote scientific literacy and a sophisticated understanding of complex biological systems. Our courses introduce students to life at various levels of organization, with topics ranging from the molecular basis of cellular function, to the coordination of organ systems in the physiology of organisms, to the interactions of organisms with each other and the environment. The importance of research and experimentation in biology is stressed throughout the curriculum, which includes both lab courses and research experiences.

The Biology Department offers the following degrees:

**Bachelor of Science (B.S.) in Biology** is a structured program for biology majors who are interested in pursuing those aspects of the field that require a strong background knowledge in physics, chemistry, and mathematics and for students who want to fulfill premedical/predental requirements.

**Bachelor of Arts (B.A.) in Biology** is a flexible program that can prepare students for graduate school in the life sciences or can be integrated with other areas, including law, ethics, history, sociology, computer science, and management. The B.A. provides a solid foundation in biology, but allows more flexibility in course selection by removing some of the chemistry and quantitative requirements that characterize the B.S. program. Thus, students in the B.A. program can either add more depth and focus around a sub discipline or have more breadth, either within the biology curriculum or by taking advantage of the B.A. elective options. Students should note that, unlike the B.S. program, the B.A. program does not fulfill medical school admission requirements.
The Biology Department offers a **minor in Biology**, a **concentration in Bioinformatics** and also co-sponsors a **Bachelor of Science (B.S.) in Biochemistry** together with the Chemistry Department. The Biochemistry degree is described separately in this Catalog. Requirements for the Biology minor and bioinformatics concentration can be found at the Biology Department website.

**Bachelor of Science (B.S.) and Bachelor of Arts (B.A.) Program Requirements**

- BIOL2000 Molecules and Cells
- BIOL2010 Ecology and Evolution
- BIOL2040 Investigations in Molecular Cell Biology
- One course from Category A: Genetics and Genomics
  - BIOL3050 Genetics
  - BIOL3150 Introduction to Genomics
- One course from Category B: Physiology and Organismal Biology
  - BIOL3030 Introduction to Physiology
  - BIOL3210 Plant Biology
  - BIOL4110 Ornithology
  - BIOL4330 Human Physiology
  - BIOL4450 Behavioral Ecology
- One course from the Advanced Experience list—a minimum of 2 credits
- For the B.S.: Additional electives numbered 3000 and above to reach a minimum of **30 Biology credits** for ALL Biology courses. Students can choose from any of the Biology elective courses or choose specific courses to complete one of the four concentrations in:
  - Microbiology
  - Cell Biology and Development
  - Genetics and Genomics
  - Physiology and Organismal Biology
- A complete listing of Biology courses is available on the departmental website.
- For the B.A.: Additional electives numbered 3000 and above to reach a minimum of **33 credits for ALL Biology courses**. (9 credits can be from the B.A. elective list available on the departmental website).

Advanced Experience courses include undergraduate research, research lab courses, and smaller classes involving the primary literature and data analysis. Courses fulfilling this requirement are available on the Biology Department website. Note: While independent undergraduate research courses can be taken over several semesters for credit, only 3 of these credits can be applied toward the 30 required credits for the Biology major (B.A. or B.S.). Students using undergraduate research to fulfill the Advanced Experience requirement and/or to have the 3 credits applied to the Biology major must complete at least two semesters.

Students wishing to focus their studies on a biology sub-disciplines, can choose biology electives from the following concentrations: Microbiology, Cell Biology and Development, Genetics and Genomics, and Physiology/Organismal Biology. List of elective courses and directions for completing a concentration are found on the departmental website.

**Corequisite Courses for the Bachelor of Science (B.S.) Program**

**Chemistry (15–16 credits)**

- General Chemistry I and II with Labs (CHEM1109–1110, CHEM1111–1112)
- Organic Chemistry I with Lab (CHEM2231–2232)
- Organic Chemistry II with Lab (CHEM2233–2234) or Biological Chemistry (BIOL4350) OR Biochemistry I (CHEM4461)*
Quantitative Requirements: Mathematics, Physics, and Computer Science

- Calculus I (MATH1100)
- Three additional courses from the following list:
  - PHYS2100 Physics I (calculus) with Lab
  - PHYS2101 Physics II (calculus) with Lab
  - BIOL2300 Biostatistics (or EC1151 or MATH3353)
  - BIOL3140 Experimental Methods in Organismal Biology
  - BIOL4250 Population Genetics*
  - CSCI1101 Computer Science I
  - CSCI1102 Computer Science II
  - CSCI2291 Topics: Data Science
  - CSCI2257 Database Systems and Application
  - MATH1101 Calculus II
  - Mathematics courses numbered 2000 or higher

Additional options are noted on the Biology Department website.

*BOL4350, BIOL4250, and CHEM4461 cannot be used to satisfy both a corequisite and a biology elective.

Calculus Placement

- Calculus I requirement is satisfied by completing MATH1100 or with an AP score of 4 or 5 on the AB exam or a score of 3 on the BC exam
- Calculus I and II can be satisfied by completing MATH1101 or with an AP score of 4 or 5 on the BC exam

Corequisite Courses for the Bachelor of Arts (B.A.) Program (8–12 Credits)

- General Chemistry I and II with Labs (CHEM1109–1110, CHEM1111–1112)
- Calculus I (MATH1100)

Advanced Placement Programs for the B.A. and B.S. Degrees

Students who received a score of 5 on the AP exam in their senior year of high school and wish to consider advanced placement may enroll in BIOL3040 in place of BIOL2000. Freshmen should enroll in BIOL2010 first semester (there is no AP substitution for BIOL2010), and take BIOL3040 in the second semester, if they wish to continue with the AP substitution for BIOL2000. The AP substitution does not reduce the total number of credits for the major; students will still need a total of 30 credits in biology courses.

Information for First Year Students: Biology Majors and Others Considering a Major in Biology

Biology majors in the regular B.A. and B.S. programs are advised to enroll in BIOL2000 Molecules and Cells and BIOL2010 Ecology and Evolution their freshman year. Freshmen are also advised to enroll in CHEM1109/CHEM1110 General Chemistry (with corequisite Labs) and Calculus I or II, depending on their AP scores. First-term AP students should enroll in BIOL2010 Ecology and Evolution. Second term, students using the AP option will enroll directly in BIOL3040, or they can continue with the regular program by enrolling in BIOL2000 Molecules and Cells. Calculus need not be taken in the freshman year.
Information for Study Abroad and Summer Programs

With Department approval, students may apply ONE course taken either abroad or during an off-campus summer session to their biology elective requirements. To be considered as a possible substitute for a biology elective, a course must be a second level course with published biology prerequisites and not be an introductory level course or a course intended for professional study or for non-biology majors. As an exception, students studying abroad for two full academic semesters may apply two courses taken abroad to the biology elective requirement.

This policy does not apply to Biology Department major elective courses offered through the Boston College Summer School; such courses are applied to the Biology major as regular academic-year electives.

Research Opportunities for Undergraduates

Research is a fundamental aspect of undergraduate training in the sciences, and the Biology Department actively encourages interested majors to take advantage of the undergraduate research programs that are available. There are two distinct options for engaging in research activity.

Option 1: Students do research in the laboratory of a Biology Department faculty member or at an off-site laboratory with departmental approval. Undergraduate research can be taken for course credit over multiple semesters. Two semesters must be completed to fulfill a Biology elective requirement. Only 3 credits of the undergraduate research are applied to the Biology major; all credits are applied to the 120 credits for graduation.

Option 2: The Department offers a number of research lab courses where students build technical skills in the context of an ongoing research project. These one-semester courses are taught by Biology faculty and focus on their current area of research. Students have full access to dedicated lab space throughout the semester and present their data at the departmental Undergraduate Research Day.

Biology Senior Thesis

Students doing undergraduate research may elect to write a Senior Thesis with the approval and support of their faculty research adviser. Students writing a thesis are recognized at Undergraduate Research Day. The student producing the “Best Senior Thesis,” as judged by a faculty committee, is awarded the Balkema Prize.

Information for Non-majors

Non-majors may fulfill their Natural Science Core requirements through the introductory major courses (BIOL2000 or BIOL2010) or one of several university Core courses offered for non-majors by the Department. Information about preparation for the allied health professions is available online at www.bc.edu/premed.

Chemistry

The Chemistry Department offers a comprehensive curriculum to students in the Morrissey College of Arts and Sciences who wish to acquire a knowledge of chemistry. The Chemistry Department is approved by the American Chemical Society (ACS) Committee on Professional Training. By electing to supplement the degree requirements for the chemistry major with a year of independent research under the direction of a faculty member, the student qualifies for degree certification by the ACS.
The major in chemistry consists of ten 1-semester courses as follows: Two semesters of general chemistry with laboratory (CHEM1109–1110 and CHEM1111–1112 or CHEM1117–1118 and CHEM1119–1120), two semesters of organic chemistry with laboratory (CHEM2231–2232 and CHEM2233–2234 or CHEM2241–2242 and CHEM2243 and CHEM2234), one semester of analytical chemistry with laboratory (CHEM3351 and CHEM3353), one semester of inorganic chemistry with laboratory (CHEM3322 and CHEM3324), two semesters of physical chemistry (CHEM4475–4476), one semester of advanced methods with laboratory (CHEM5552 and CHEM5554), and one semester of biochemistry (CHEM4465). In addition, the following are required: two semesters of physics with laboratory (PHYS2200–2201 or PHYS2100–2101 and PHYS2050–2051) and two or three semesters of calculus (MATH1102–1103 or MATH1105, and MATH2202 or MATH2203).

The preceding fulfills the Boston College requirements for a B.S. degree in chemistry. For this degree to be certified by the American Chemical Society, two additional chemistry laboratory electives are required, usually CHEM4491–4492 Introduction to Undergraduate Research I and II or CHEM5591–5592 Undergraduate Chemical Research I and II.

The recommended sequence for the Chemistry major is as follows:

**First Year**

CHEM1109–1110 General Chemistry with Laboratory or CHEM1117–1118 Honors Modern Chemistry with Laboratory; two semesters of Physics with Laboratory (PHYS2200–2201 or PHYS2100–2101 with PHYS2050–2051); Calculus (MATH1102–1103 or MATH1105); Core courses.

**Second Year**

CHEM2231–2232 Organic Chemistry or CHEM2241–2242 Honors Organic Chemistry with Laboratory; CHEM3351 Analytical Chemistry with Laboratory; CHEM3322 Introduction to Inorganic Chemistry with Laboratory; MATH2202 or 2203 Multivariable Calculus; elective or Core courses.

**Third Year**

CHEM4475–4476 Physical Chemistry; CHEM5552 Advanced Methods in Chemistry I with CHEM5554 Advanced Methods in Chemistry Laboratory I; elective or Core courses.

**Fourth Year**

CHEM4465 Introduction to Biochemistry; elective or Core courses.

The ten 1-semester chemistry courses that comprise the chemistry major amount to 37 credits. The five non-chemistry courses amount to 17 or 22 credits, depending on the selection chosen for Calculus.

**Information for First Year Majors**

Students who intend to be Chemistry or Biochemistry majors must enroll in CHEM1109 General Chemistry and CHEM1111 General Chemistry Laboratory, or CHEM1117 Honors Modern Chemistry and CHEM1119 Honors Modern Chemistry Laboratory. The choice of chemistry or biochemistry as a major requires that certain courses in other disciplines be taken as soon as possible.

**Minor Requirements**
The minor in chemistry consists of six courses. Two semesters of general chemistry (CHEM1109–1110 or CHEM1117–1118, with associated laboratories) are required as the introductory courses for the minor. Four additional chemistry courses are chosen in consultation with a faculty advisor and approved by the Director of the departmental minor, Professor Lynne O'Connell (Merkert 111, 617-552-3626). Normally, two of the four additional courses would be Organic Chemistry I and II, but other selections might be better choices, depending on the student's objective in attaining the minor. In accordance with MCAS policy, a student must have at least 15 credits in the minor program that are not used to fulfill requirements for another major or minor.

The following courses for non-science majors cannot be used to complete the minor: CHEM1102, CHEM1105, CHEM1106, or CHEM1161. The following research courses cannot be used to complete the minor: CHEM4491–4492 or CHEM5591–5592.

Information for Study Abroad

Before going abroad, Chemistry majors must have completed the following prerequisites: General Chemistry, CHEM1109–1110 or CHEM1117–1118 and lab; Organic Chemistry, CHEM2231–2232 or CHEM2241–2242 and lab; Analytical Chemistry, CHEM3351 and lab; Inorganic Chemistry, CHEM3322 and lab; Calculus, MATH1102–1103 and MATH2202 or 2203; Physics, PHYS2200–2201 or PHYS2100–2101 and lab. Exceptions must be approved by the department.

In order for a course studied abroad to count for major credit, prior department approval is required for each course. Students must meet with the department study abroad advisor for course approval, advisement, and planning.

Fulfilling the Natural Science Core Requirement

The requirement of two courses in natural science may be fulfilled by any of the following courses: CHEM1102 Intersection of Science and Painting, CHEM1105 Chemistry and Society I, CHEM1106 Chemistry and Society II, CHEM1109 General Chemistry I with lab, or CHEM1110 General Chemistry II with lab. The courses specifically intended for students who are not science majors are CHEM1102, CHEM1105, and CHEM1106.

Biochemistry Major

Refer to the Biochemistry section for a description of this interdisciplinary major.

Classical Studies

Classical Studies encompasses all the social, material, and intellectual culture of the ancient Greek and Roman worlds, as they can be studied both in the original languages and in English.

The department offers courses under three headings, including (1) elementary and intermediate courses in Latin and Greek, designed to teach a student to read the languages; (2) courses in Greek and Roman literature, history, art and archaeology, society, and culture, including Core Literature, History I, and Fine Arts courses, taught in English and designed to acquaint a student broadly with the world of classical antiquity; (3) advanced reading courses in ancient authors and genres taught in the original languages. Courses related to antiquity are also available in other departments.

Major Requirements

The major includes courses in Latin and/or Greek language and literature, from the elementary to the advanced level, and courses in ancient civilization and culture. Readings in the latter courses are in English. There are no separate majors in Latin or Greek. The program is designed to be flexible in response to the interests and prior experience of individual students. Requirements, totaling a minimum of ten courses (or 30 credits), fall under three headings:
Three courses or 9 credits (minimum) in Latin and/or Greek at the advanced level.

Three courses or 9 credits (minimum) in the area of ancient civilization and culture.

Four other courses or 12 credits, either in Latin and/or Greek language at any level (excluding only Elementary Latin) or in ancient civilization and culture, in any combination.

**Notes**

Students who may think of going on in Classics are strongly advised to study both languages and to take as many advanced courses as possible. They should also discuss their interest with a faculty member at the earliest opportunity.

**The Minor in Ancient Civilization**

The interdisciplinary minor in Ancient Civilization is designed to make the study of the ancient world available to students without the requirement of learning Latin or Greek. Students learn about the history, literature, art, and culture of antiquity in courses that emphasize the study of primary texts in English translation. As a minor, it naturally looks to students whose main interests lie in other areas, but who are curious about the ancient world and who seek a program that is at once structured and interdisciplinary. It makes a good complement in particular to majors in English, History, Art, Art History, and Film, Philosophy, and Theology but is available to everyone regardless of major. A list of the courses that are available each semester from the various departments and that count for the minor will be available at registration time. A program consists of six courses under three headings:

- One course in Greek History (CLAS2205) or Greek Civilization (CLAS1186). As a rule, one or the other of these courses will be taught each year.
- One course in Roman History (CLAS2206) or Roman Civilization (CLAS2262). Again, as a rule one or the other of these courses will be taught each year.
- Four electives, taught in Classics and other departments, chosen from various offerings in ancient culture, for instance, in the areas of literature, philosophy, religion, history, art, and archaeology.

**Latin Minor**

The Latin minor consists of 6 courses/18 credits:

- courses (12 credits) in Latin above the Elementary level
- 1 of the following courses on Roman culture: City of Rome (CLAS2262) or Roman History (CLAS2206)
- 1 elective: either Latin (intermediate or above) or a course on Roman civilization

**Courses for the Latin Minor**

I. 4 courses (12 credits) in Latin above the Elementary level

- CLAS1056 Intermediate Latin I
- CLAS1057 Intermediate Latin II
- CLAS1058 Advanced Intermediate Latin
- CLAS3312 Roman Love Elegy
- CLAS3320 Roman Civil War Literature
- CLAS3325 Lucretius
- CLAS3329 Ovid, *Metamorphoses*
- CLAS3333 Apuleius
- CLAS3335 Ovid
- CLAS3336 Horace
II. 1 course on Roman culture: City of Rome (CLAS2262) or Roman History (CLAS2206)

III. 1 elective: either Latin (intermediate or above) or a course on Roman civilization

- Any of the Latin courses above
- Electives:
  - CLAS1702 Rome: Art, Regime, and Resistance
  - CLAS2210/HIST2207 Roman Spectacles
  - CLAS2206/HIST2205 Roman History
  - CLAS2225/HIST2225, Ancient Medicine
  - CLAS2230/ENGL2200 Classical Mythology
  - CLAS2236/HIST2206 Roman Law and Family
  - CLAS2240/ENGL2204 Dangerous Women in Classical Literature
  - CLAS2242/THEO2241/HIST4211 Roman Religion
  - CLAS2250/HIST2837 Multiculturalism in the Roman Empire
  - CLAS2262/ARTH2262 City of Rome
  - CLAS2270 Gender and Sexuality in Ancient Rome
  - CLAS2280/ENGL 2202 Beast Literature
  - CLAS2286/LING3205 History and Structure of Latin
  - CLAS2295/ENGL2295 Ancient Comedy
  - CLAS2384/LING 2384/THEO2384 Church Latin
  - THEO5448 Patristics: Latin and English

Ancient Greek Minor

The ancient Greek minor consists of 6 courses/18 credits:

- 4 courses (12 credits) in ancient Greek above the Elementary level
- 1 of the following courses on Greek culture: Greek Civilization (CLAS1186) or Greek History (CLAS2205)
- 1 elective: Either ancient Greek (intermediate or above) or a course on Greek civilization

Courses for the Ancient Greek Minor

I. 4 courses (12 credits) in ancient Greek above the Elementary level

- CLAS1052 Intermediate Greek I
- CLAS1053 Intermediate Greek II
- CLAS3302 Greek Rhetoric
II. 1 course on Greek culture: Greek Civilization (CLAS1186) or Greek History (CLAS2205)

III. 1 elective: either Greek (intermediate or above) or a course on Greek civilization

- Any of the ancient Greek courses above
- CLAS1186 Greek Civilization
- CLAS1701 Death in Ancient Greece, Achilles to Alexander
- CLAS2205/HIST2201 Greek History
- CLAS2207/HIST2202 Greeks and Barbarians
- CLAS2208/ARTH2206 Art and Myth in Ancient Greece
- CLAS2216/ARTH2216 Art and Archaeology of Homer and Troy
- CLAS2225/HIST2225 Ancient Medicine
- CLAS2230/ENGL2200 Classical Mythology
- CLAS2240/ENGL2204 Dangerous Women in Classical Literature
- CLAS2254/HIST4202 Culture of Athenian Democracy
- CLAS2260/ENGL2111 Greek Drama and Society
- CLAS2280/ENGL2202 Beast Literature
- CLAS2295/ENGL2295 Ancient Comedy
- ARTH3311 Greek Art and Archaeology
- PHIL3332 Political Thought of the Greeks
- PHIL4405 Greek Philosophy
- PHIL5505 The Aristotelian Ethics
- PHIL5528 Skepticism/Stoicism/Neoplatonism
- THEO5425 Patristic Seminar: Intermediate Greek and English

Information for First Year Majors and Non-majors

"Classics" as outlined above is a broad, interdisciplinary field of study. For a first-year student, courses of two types are likely to be of most immediate interest: (1) Core Literature, History, and Fine Arts courses, in which the reading is entirely in English, and (2) elementary and intermediate language courses in Latin and Greek.

If you would like to begin a language now or have had only one or two years of a language in high school, you should choose an elementary course: CLAS1010 Elementary Latin I or CLAS1020 Elementary Greek I. If you have studied a language for three or four years in high school, you may want to choose an intermediate course: CLAS1056 Intermediate Latin I or CLAS1052 Intermediate Ancient Greek I.

Completion of the second semester of Latin or Greek at the intermediate level will fulfill the Morrissey College of Arts and Sciences and Carroll School of Management language proficiency requirement (beginning with the class of 2022, the Carroll School will no longer have a language requirement). In addition, the Department offers elective courses in ancient civilization and
on Greek and Roman authors. Those in ancient civilization are taught entirely in English. They make excellent choices for freshmen interested in antiquity. Those on Greek and Roman authors require a background in the appropriate language. If you have studied Latin or Greek for four or more years in high school, you may wish to try courses in Greek and Roman authors. For further information, consult the Chair of the Department.

**Information for Study Abroad**

The Classics Department does not have a general set of requirements for study abroad. Students are advised individually, and recommendations are made based on their academic records and the specific program. Students should arrange to meet with the Chair of the Department when planning to study abroad.

**Core Offerings**

The Department offers several courses that satisfy Core requirements. CLAS2206 Roman History will be offered in fall 2020, and CLAS2208 Art and Myth in Ancient Greece will be offered in spring 2021. CLAS1701 Death in Ancient Greece, Achilles to Alexander, an Enduring Question History I course, will be offered in spring 2021.

**Licensure for Teachers**

The Undergraduate Initial License as Teacher of Latin and Classical Humanities 5–12 may be gained by pursuing a Classics major in addition to the Secondary Education major or minor. For further information, contact the Chair of the Department.

**Communication**

The Boston College Department of Communication is committed to the intellectual and ethical development of analytical and creative communication skills in our students, with particular emphasis on the effective functioning of circuits of communication, the impact of technological innovation on human beings and institutions, and the power relationships that develop through this interaction.

This program of study has led graduating majors to careers in communication industries and to success in fields related to communication including business, government/politics, international relations and negotiations, social and human services, health, and education. Many majors have completed graduate programs in fields including communication, business, and law.

33 credits are required for the major.

**Major Requirements**

**Four Common Requirements (12 credits):**

- COMM1010 Rhetorical Tradition
- COMM1020 Survey of Mass Communication
- COMM1030 Public Speaking
- COMM3330 Communication Methods: Social Science or COMM3340 Communication Methods: Cultural (take one)

**One Critical Issues Course (3 credits):** *each course offered periodically*

- Social Media
- Cultural Diversity in the Media
One Theory Course (3 credits):

- Any course numbered between COMM3360 and COMM3380
- Theory courses should, ideally, not be taken until after a student has completed Rhetorical Tradition, Survey of Mass Communication, Public Speaking, and the Communication Methods course.

Two Writing Intensive Seminars (6 credits):

- Any two courses numbered between COMM4425 and COMM4475
- These are upper-level courses and should not be taken until after a student has completed the four common requirements. Freshmen and sophomores should never register for writing-intensive seminars.

Three Electives (9 credits):

- Electives may be chosen from any 3-credit class offered by the department.
- A maximum of 6 transfer credits will be accepted by the department toward elective credits.
- One class of 3 credits or more from the Woods College may be counted toward an elective, with permission from the Director of Undergraduate Studies.
- Senior Internship Seminar, a 3-credit elective, may be conducted only once during the senior year and used toward elective requirements.

Information for First Year Majors

Students may declare the Communication major by contacting Kristin Hartnett, Academic Advisor at kristin.hartnett@bc.edu.

Information for Study Abroad

The department strongly advises majors to be on track to complete Rhetorical Tradition, Survey of Mass Communication, Public Speaking, and Communication Methods prior to going abroad. All students wishing to study abroad must meet with Professor Christine Caswell, Director of Undergraduate Studies, for permission. A maximum of two electives to the major may be conducted abroad with her permission.
Internship Program

COMM1901 Communication Internship, a 1-credit pass/fail course.

COMM5589 Senior Internship Seminar, a 3-credit course, is open to senior Communication majors. In addition, potential interns must have completed a minimum of six courses in communication including COMM1010 Rhetorical Tradition, COMM1020 Survey of Mass Communication, COMM1030 Public Speaking, COMM1040 Interpersonal Communication, and one of COMM3330 Communication Methods: Social Science or COMM3340 Communication Methods: Critical/Cultural.

For internship applications, please visit our department website. For departmental approval, contact Professor Christine Caswell, Director of Undergraduate Studies.

Honors Program

The honors program in the Department of Communication is targeted towards exceptional communication majors, defined as those whose overall GPA is 3.70 or higher. To be invited to join the honors program, students must have an overall GPA of 3.70 or higher at the conclusion of their freshman year (summer courses will be counted if taken for BC graded credit). Students will be invited to the program in the fall semester of their sophomore year prior to spring registration. The honors program requires enrollment in an honors methods course in sophomore spring and an honors writing course in their junior year. In addition, students in the honors program will complete a thesis in order to officially graduate with department honors. A more complete description of the program is available on the department website or in the Honors Handbook in the department's main office. Students may also contact Professor Celeste Wells, Director of the Communication department Honors Program.

Contacts

Questions about the Communication curriculum, study abroad, academic credit for internships, internship approval, course substitution forms and transfer credits should be directed to Prof. Christine Caswell, Director of Undergraduate Studies, St. Mary's Hall South, Room S375, 617-552-6148, caswellc@bc.edu.

To declare the major and discuss general course of study, please e-mail Kristin Hartnett, Academic Advisor, St. Mary's Hall South, Room S376. kristin.hartnett@bc.edu.

Communication Department Chairperson: Associate Professor Matt Sienkiewicz, matt.sienkiewicz@bc.edu 617-552-8837 St. Mary's Hall South Room S455.

Computer Science

The Computer Science Department offers major programs in the Morrissey College of Arts and Sciences leading to the degrees of bachelor of arts and bachelor of science as well as minor and concentration programs in Computer Science and Bioinformatics. The Information Systems Department offers a program in Information Systems. Consult their listing under the Carroll School of Management for a program description. For further information, contact the Computer Science Department at St. Mary's Hall, Second Floor South, 617-552-3975.

Bachelor of Arts in Computer Science

The curriculum for the bachelor of arts degree in Computer Science is based on current recommendations of the Association for Computing Machinery (ACM) for liberal arts institutions. The program is designed both to provide a solid foundation in the fundamentals of computer science and to provide practical, hands-on experience with computing systems, as the current technology job market dictates.
Bachelor of arts students complete a 34-credit computer science component, supplemented by a mathematics component rooted in calculus. For most students, the program requires completion of fourteen 3-credit courses along with one 1-credit lab.

**Computer Science Component**

The 34 credits required for completion of the bachelor of arts major are grouped into two categories, seven required core courses (totaling 22 credits) and four electives (totaling at least 12 credits). The seven required core courses are the following:

- CSCI1101 Computer Science I or CSCI1103 Computer Science I Honors
- CSCI1102 Computer Science II
- CSCI2243 Logic and Computation
- CSCI2244 Randomness and Computation
- CSCI2271 Computer Systems
- CSCI2272 Computer Organization and Lab
- CSCI3383 Algorithms

All of these courses are 3 credits with the exception of CSCI2272, which is 4 credits. The remaining 12 credits will typically be earned from four courses with 3 credits earned through any CSCI courses numbered CSCI2000 or above and at least 9 of the credits earned from courses at the CSCI3000 level or above.

Logic and Computation and Randomness and Computation (CSCI2243 and CSCI2244) provide students with mathematical fundamentals necessary for Computer Science. It is especially important that these be completed no later than the end of junior year, since this material is a prerequisite for the required course Algorithms (CSCI3383). CSCI2243 and CSCI2244 are also required prerequisites for many 3000-level CSCI electives.

**Mathematics Component**

One semester of calculus at the level of Calculus II or higher is required for completion of the bachelor of arts major. Students will ordinarily complete the calculus requirement with any one of the following courses: MATH1101, MATH1103, MATH1105, or MATH2202. Many students will need to complete a prerequisite calculus course (e.g., MATH1100 before MATH1101 or MATH1102 before MATH1103), so this calculus requirement is often satisfied by enrolling in a two-semester sequence.

**Bachelor of Science in Computer Science**

The curriculum for the bachelor of science major in Computer Science is designed to provide an extensive background in computer science and is well suited for students considering graduate study or students planning to pursue careers in science or engineering.

Bachelor of science students must complete a 38-credit computer science component, supplemented by a mathematics component and a natural science component.

**Computer Science Component**

The bachelor of science major in Computer Science requires a minimum of 37 credits in computer science. The computer science credits are grouped into two categories: seven required CSCI courses (totaling 22 credits) and five elective courses (totaling at least 15 credits).

The seven required core courses are:
CSCI1101 Computer Science I or CSCI1103 Computer Science I Honors
CSCI1102 Computer Science II
CSCI2243 Logic and Computation
CSCI2244 Randomness and Computation
CSCI2271 Computer Systems
CSCI2272 Computer Organization and Lab
CSCI3383 Algorithms

All of these courses are 3 credits with the exception of CSCI2272, which is 4 credits.

Of the 15 credits of electives, 3 credits must be earned from one course in the social and ethical issues cluster (CSCI2260–2267) and at least 12 credits must be from courses numbered CSCI3000 or above.

Logic and Computation and Randomness and Computation (CSCI2243 and CSCI2244) provide students with mathematical fundamentals necessary for Computer Science. It is especially important that these be completed no later than the end of junior year, since this material is prerequisite for the required course Algorithms (CSCI3383). CSCI2243 and CSCI2244 are also required prerequisites for many 3000-level CSCI electives.

Mathematics Component

At least 12 credits of mathematics are required for completion of the bachelor of science major:

- MATH1103 Calculus II (Math/Science majors) or MATH1105 Calculus II–AP (Math/Science majors)
- MATH2202 Multivariable Calculus
- MATH2210 Linear Algebra
- Any MATH course 3000 or higher, other than MATH 4426 Probability.

Since many students will need to complete MATH1102 before taking MATH1103, this calculus requirement will often be met by enrolling in a two-semester sequence.

Science Component

A two-semester sequence in a laboratory science for science majors. The sequences that fulfill this requirement can be chosen from among Biology, Chemistry, Physics or Earth and Environmental Sciences.

Biology:

- BIOL2000 Molecules and Cells, BIOL2010 Ecology and Evolution and BIOL2040 Investigations in Molecular Cell Biology Lab, or
- BIOL2000 Molecules and Cells, BIOL3030 Introduction to Physiology and BIOL2040 Investigations in Molecular Cell Biology Lab;

Chemistry:

- CHEM1109/1111/113 General Chemistry I and CHEM1110/1112/1114 General Chemistry II or
- CHEM1117/1119/1121 Honors Modern Chemistry I and CHEM1118/1120/1122 Honors Modern Chemistry II;
Physics:
- PHYS2200/2050 Introductory Physics I (Calculus) and PHYS2201/2051 Introductory Physics II (Calculus);

Earth and Environmental Sciences:

Option #1
- Exploring the Earth EESC1132/1133

Then any two of the following 2-credit Environmental Systems courses:
- EESC2202/2212 Ecosystems
- EESC2203/2213 Water Resources
- EESC2204/2214 The Critical Zone
- EESC2205/2215 Climate Change
- EESC2206/2216 Oceans
- EESC2207/2217 Earthquakes
- EESC2208/2218 Quantitative Methods

Option #2
- Exploring the Earth EESC1132/1133

Then any 2000, 3000, or 4000 level class in EESC (note the prerequisites)

Option #3

Any two of the following 2-credit Environmental Systems courses:
- EESC2202/2212 Ecosystems
- EESC2203/2213 Water Resources
- EESC2204/2214 The Critical Zone
- EESC2205/2215 Climate Change
- EESC2206/2216 Oceans
- EESC2207/2217 Earthquakes
- EESC2208/2218 Quantitative Methods

Then any 2000, 3000, or 4000 level class in EESC (note the prerequisites)

Departmental Honors

Junior and senior Computer Science majors with at least a 3.3 GPA in CSCI courses are eligible to join the Departmental Honors Program. In order to graduate with the Departmental Honors designation, eligible students must maintain at least a 3.3 GPA in
CSCI courses and complete a senior thesis. Thesis requirements are to have a thesis proposal approved by a faculty advisor and by the Honors Committee by the end of junior year. Students in the Departmental Honors Program must

1. complete two sections of CSCI4961 Honors Thesis during their senior year with grades of B+ or higher;
2. submit a written honors thesis by the last day of class in the second semester of senior year, and
3. give a 30-minute presentation of their thesis at the end of their senior year.

Students participating in the Honors Program are required to take both sections of CSCI4961 Honors Thesis. One section of CSCI4961 Honors Thesis may count as a CSCI 3000-level elective.

The Minor Program

The minor program in Computer Science is designed to provide an introduction to computer science, primarily for mathematics and science majors. It is also suitable for students with a strong secondary interest in computer science and good analytical skills.

18 credits are required for completion of the minor.

The requirements for a Minor in Computer Science are:

1. CSCI1101 Computer Science I or CSCI1103 Computer Science I Honors
2. CSCI1102 Computer Science II
3. Two electives numbered 2000 or higher (only one of: CSCI2257 Database Systems and Applications or CSCI2267 Technology and Culture may count toward this requirement)
4. Two electives numbered 3000 or higher

Students pursuing a minor in computer science should consider the prerequisites of 3000-level courses when selecting 2000-level electives. Several 3000-level electives specify CSCI2243 Logic and Computation and/or CSCI2271 Computer Systems as prerequisites.

Students wishing to pursue a minor emphasizing computer science should consider the foundations sequence:

- CSCI2243 Logic and Computation and
- CSCI2244 Randomness and Computation (to be taken after CSCI2243)

Students wishing to pursue application development or applications of computer science in management may wish to consider:

- CSCI2254 Web Application Development and
- CSCI2257 Database Systems and Applications

Students wishing to pursue applications in data science may wish to consider:

- CSCI2244 Randomness and Computation (to be taken after CSCI2243),
- CSCI3346 Data Mining, or
- CSCI3345 Machine Learning
Students wishing to pursue applications in security may wish to consider:

- CSCI2201 Computer Security,
- CSCI2243 Logic and Computation, and
- CSCI3381 Cryptography

**Interdisciplinary Concentration in Bioinformatics**

The Bioinformatics Concentration is offered to students majoring in Biology, Mathematics, or Computer Science. Please note that courses in this concentration may overlap with major or minor requirements. In addition, a semester of bioinformatics research within a lab can be substituted for either one of the three additional computer science courses or the computational biology course. Students wishing to pursue this option should visit the Biology Department (Higgins 355) for course approval.

**Course Requirements (for a Total of Seven Courses)**

- BIOL2000 Molecules and Cells or BIOL3150 Introduction to Genomics (fall/spring)
- One of the following statistics courses:
  - BIOL2300 Biostatistics
  - MATH4426 Probability
  - CSCI2244 Randomness and Computation
- BIOL4200 Introduction to Bioinformatics (spring)
- A computational biology course, such as:
  - BIOL6160 Graduate Bioinformatics
  - BIOL4802 Research in Evolutionary Genomics*
  - Undergraduate Research in a Computational Biology lab
- Any three computer science courses at the level of CSCI1101 or above, such as:
  - CSCI1101 Computer Science 1 (recommended)
  - CSCI1102 Computer Science 2 (recommended)
  - CSCI2227 Introduction to Scientific Computation*
  - CSCI3345 Machine Learning*
  - CSCI3346 Data Mining*
  - CSCI3383 Algorithms*

*Prerequisites apply

**Information for First Year Majors and Non-majors**

The Computer Science majors are for students who enjoy using computers and who wish to gain a deeper understanding of computing technology. Both B.S. and B.A. majors are designed to provide a solid foundation in the fundamentals of computer science. At the same time, they provide practical, hands-on experience, as the current technological job market dictates. Students are prepared for a variety of careers such as software development, network administration, technical support, and systems analysis. In addition, knowledge of computing technology is becoming increasingly important for people entering business, law, and the health care fields.
First Year Computer Science Majors

First year students considering majoring in Computer Science should plan to complete the program's calculus requirement (MATH1101 or higher) during their first year. Most will enroll in MATH1100 in fall semester and continue with MATH1101 in spring semester. Students who either carry advanced mathematics placement or who have completed a year of calculus in high school, should enroll directly in MATH1101–1102 (or a more advanced course) in the fall semester. First year students wishing to double major in Computer Science and Mathematics should take the calculus sequence recommended for the Mathematics major.

Freshmen with some prior programming experience or strong technical skills are encouraged to take CSCI1101 Computer Science I or CSCI1103 Computer Science I Honors or CSCI1102 Computer Science II in their first semester. Those students who have had no programming experience may consider beginning with an introductory computer course (e.g., CSCI1074) in their first year. First year students who have achieved a score of 4 or higher on the Computer Science A.P. examination or students entering with significant programming backgrounds, should speak with the Computer Science Chairperson or Undergraduate Program Director about proper course placement (e.g., directly taking CSCI1102).

First Year Non-majors

The department periodically offers introductory 3-credit courses in computer science: CSCI1074, CSCI1075, CSCI1101, CSCI1103, and CSCI2227.

CSCI1074 is a survey of Computer Science for students who know little about computing. How do computer hardware and software really work? How is information (text, music, images, numbers) represented in computer files, CDs, digital cameras, and iPods; how do computers manipulate this digitally encoded information; and how is it all sent around the Internet? Students will learn the answers to these questions through weekly hands-on computer exercises.

CSCI1075 is a gentle introduction to computer programming for non-majors. Students will learn about computers and computer software by working with a small personal robot. Students will learn the Python programming language, and write Python programs to control their robot's behavior, explore its environment, and perform various tasks. As we get our robots to do more and more, we learn how software is designed and written to solve real problems.

CSCI1101 and CSCI1103 are the introductory programming courses. One of these is required of all Computer Science majors and minors and is a prerequisite for all advanced computer science courses. Therefore, students who wish to take more than one course in computer science will need to take either CSCI1101 or CSCI1103 at some point. The skills needed to write computer programs come easily to some people and less easily to others. Students who have little or no programming experience and are apprehensive about their ability should consider enrolling in CSCI1074 before enrolling in CSCI1101 or CSCI1103.

CSCI2227 is an introduction to programming with an orientation to scientific applications, using MATLAB as the programming language.

Transfer Credits and Placement for Computer Science Courses

The Computer Science Department will accept transfer credits from other schools with documentation (for example, syllabi) sufficient for us to determine course equivalence. Before taking an external course, check BC’s academic policies. AP, IB, and GCE scores are used to make placement decisions, but not for course credit. Specifically, students who score a 5 on the Computer Science A exam, or a 4 or 5 on the Computer Science AB exam, or who have significant programming experience should consult with the Chairperson of the Department or Undergraduate Program Director about starting the Computer Science course sequence with CSCI1102.

Course Availability
Most introductory courses (e.g., CSCI1101, CSCI1103, and CSCI1102) are available every semester. CSCI1074 and CSCI1075 are offered periodically. All courses that are required for the major are offered at least once each academic year. Most advanced electives are offered only in alternate years; hence, student schedules should be designed carefully.

**Course Credit Information**

All Computer Science courses are prefixed by the letters CSCI and are registered as courses in the Morrissey College of Arts and Sciences. However, some courses are cross-listed with the Information Systems department in the Carroll School of Management.

**Earth and Environmental Sciences**

An undergraduate in the Department of Earth and Environmental Sciences will develop a program in one of two majors: Environmental Geoscience or Geological Sciences. Within the requirements discussed below, programs can be designed to meet the interests and objectives of each student. Students may wish to major or to have a concentration in the department for a variety of reasons including: (1) a desire to work professionally in Earth and environmental sciences, (2) a desire to obtain a preparatory foundation for post-graduate work in Earth and/or environmental science, environmental studies, environmental policy, resource management, environmental law, or similar fields, (3) a desire to teach Earth and environmental science in secondary schools, or (4) a general interest in the discipline. Geoscientists study the Earth’s complex systems and the interrelations among the solid Earth, hydrosphere, biosphere, and atmosphere. Students trained in the Earth sciences can look forward to exciting and rewarding careers, as society continues to require ever greater amounts of energy and resources in the twenty-first century, and at the same time, will face increasing environmental problems and concerns. The department provides students with the skills and varied background needed to address these problems. Earth scientists are naturally interdisciplinary and use science to solve real-world problems. Today’s Earth scientist can choose to work in the field in almost any area of the world, including ultramodern laboratories equipped with the latest scientific and computing equipment. Whether understanding hazards and environmental challenges such as earthquakes, landslides, floods, sea level rise, and climate change, exploring for Earth’s energy and mineral resources, or working with governmental agencies or industry to analyze pollution problems, the Earth and environmental sciences provide exciting possibilities for a rewarding career.

**Major Requirements: Environmental Geoscience**

The field of Environmental Geoscience is interdisciplinary and evolving. This bachelor of science program serves as an excellent major for students who wish to concentrate in the scientific aspects of sustainability, including those who might not be looking toward professional careers as scientists. Many Environmental Geoscience students go on to graduate work in environmental law, environmental policy, or sustainability studies. Students majoring in Environmental Geoscience should work out their programs closely with a departmental advisor to insure both breadth and depth in this subject area.

To provide students with training in the interdisciplinary nature of Environmental Geoscience, the major includes an introductory sequence in Environmental Systems (EESC2201–2208), consisting of nine 2-credit courses (plus associated labs, EESC2211–2218). These courses can be taken in any order and do not have prerequisites. They are recommended particularly for first-year students and sophomores. They are usually offered as two-course pairs, with one course meeting for the first half of the semester and another course meeting for the second half of the semester, in the same time slot. Students are welcome to take one or both of the courses in each of these pairs in any given semester. In general, 2–4 Environmental Systems courses are offered each semester. Environmental Geoscience majors are required to take 12 credits toward this requirement. Students have the option to take our introductory geology course, Exploring the Earth (EESC1132–1133), to fulfill 4 credits.

Students in this major must complete the following course requirements:

(A) 12 credits from EESC2201–2208 (2 credits each, plus laboratories EESC2211–2218) and/or EESC1132–1133 (4 credits)

- Environmental Systems: The Human Footprint (EESC2201)
- Environmental Systems: Ecosystems (EESC2202)
- Environmental Systems: Water Resources (EESC2203)
Environmental Systems: The Critical Zone (EESC2204)
Environmental Systems: Climate Change (EESC2205)
Environmental Systems: Oceans (EESC2206)
Environmental Systems: Earthquakes (EESC2207)
Environmental Systems: Quantitative Methods (EESC2208)
Exploring the Earth (EESC1132/1133)

Note: Some substitutions are possible. Approved substitutions include: EESC1170 for EESC2203, EESC1174 for EESC2205, and EESC1157 for EESC2206.

(B) EESC2220 Earth Materials (+EESC2221, 4 credits)

(C) At least 18 credits of elective courses. All EESC courses count toward this requirement, with the following limitations:

- Up to 3 credits can be from 1000-level courses.
- Up to 6 credits can be from 2000-level courses.
- Up to 6 credits can be from approved non-EESC courses.
  (Approved courses: all ENVS courses, BIOL3210, BIOL4450, BIOL5130, CHEM2231, CHEM4475, CSCI1127, ECON2277, ECON2278, ECON3391, ECON3392, HIST2406, HIST4703, INTL2260, MATH3305, PHIL5515, PHIL5534, PHYS3301, SOCY3346, SOCY3349, SOCY3350, SOCY5562, THEO5429, or other courses, such as field camps, by permission of the Undergraduate Studies Committee.)
- Up to 3 credits of independent study (EESC5596–EESC5598) can count toward this requirement.

(D) Senior research experience (at least 4 credits)

- EESC5582 and EESC5583 Senior Research seminar (2 credits each), or
- EESC5595 Senior Thesis (at least 6 credits)

(E) Three corequisite courses in Natural Sciences and Mathematics (12 credits)

- Calculus II (MATH1101, MATH1103, or MATH1105) and
- Two semesters of Physics with labs (PHYS2200/2050 and PHYS2201/2051), or
- Two semesters of Chemistry (CHEM1109–1110 with labs CHEM1111–1112 or CHEM1117–1118 with labs CHEM1119–1120), or
- Three semesters of Biology (BIOL2000, BIOL2010, and lab BIOL2040)

AP credits cannot substitute for the Physics, Chemistry or Biology corequisite (E) above. Students planning to go on to graduate programs in science are encouraged to take at least four semesters of introductory Physics, Chemistry, and/or Biology.

Information for First-Year Environmental Geoscience Majors

For those students who would like to explore the major in Environmental Geoscience, it is suggested that students take two to four of the Environmental Systems courses (EESC2201–2208, with laboratories EESC2211–2218) and/or Exploring the Earth (EESC1132–1133) during their first year. The laboratory science requirement (E above) should be taken during the first or second year.
Major Requirements: Geological Sciences

This major combines elements of traditional Earth and environmental sciences programs and is considered excellent preparation for those working toward graduate school in the geosciences or employment in industry following graduation with a B.S. degree.

(A) Two required courses (8 credits)

- Exploring the Earth (EESC1132) with laboratory EESC1133, 4 credits
- Earth Materials (EESC2220) with laboratory EESC2221, 4 credits

*Note:* Any pair of Environmental Systems courses (EESC2201–2208, plus labs) can substitute for EESC1132.

(B) At least 11 credits from the following courses

- Stratigraphy and Sedimentation (EESC2264) with laboratory EESC2265, 4 credits
- Structural Geology (EESC3385) with laboratory EESC3386, 4 credits
- Introduction to Geophysics (EESC3391), 3 credits
- Petrology (EESC3378) with laboratory EESC3379, 4 credits

(C) At least 19 credits of elective courses, with the following requirements:

- Electives include all EESC courses and approved interdisciplinary options (below).
- Up to 3 credits toward this requirement may be from a 1000-level course
- At least 7 credits must be from EESC courses numbered 3000 or above.
- Up to 6 credits from approved non-EESC courses can count toward this requirement (approved courses: MATH3305, PHYS3301, CHEM2231, CHEM4475, or others by permission of the Undergraduate Studies Committee).
- Up to 6 credits from independent study or senior thesis (EESC5595–5599) can count toward this requirement.

(D) Five corequisite courses in Natural Sciences and Mathematics (20 credits)

- Calculus II (MATH1103 or MATH1105)
- Two semesters of Physics with labs (PHYS2200/2050 and PHYS2201/2051)
- Two semesters of Chemistry (CHEM1109–1110 with labs CHEM1111–1112 or CHEM1117–1118 with labs CHEM1119–1120)

AP credits cannot substitute for the Physics and Chemistry corequisite (D) above.

*Note:* All Geological Sciences majors are strongly encouraged to take a geology summer field course, which can count toward requirement C.

Information for First-Year Geological Sciences Majors

The following courses are recommended for first-year Geological Sciences majors, if their schedules permit:
Minor in Geological Sciences

In addition to the two major programs, a student may choose to minor in Geological Sciences. The minor is designed to be flexible and to allow the interested student to explore an area of interest in the Earth sciences without the formal commitment of a major. Students interested in declaring a minor in the department should contact the Director of Undergraduate Studies (Professor Jeremy Shakun) to ensure they receive advising about course selections.

A minor in the Department of Earth and Environmental Sciences consists of a minimum of six courses in the department structured as follows:

(A) Two required courses (8 credits):

- Exploring the Earth I (EESC1132) with laboratory (EESC1133)
- Earth Materials (EESC2220) with laboratory (EESC2221)

(B) At least 7 additional credits from departmental courses numbered 1000 or higher

(C) At least 3 additional credits from a departmental course numbered 2000 or higher

(D) At least 3 additional credits from a departmental course numbered 3000 or higher

Each student's minor program must be approved in advance by a faculty advisor in the Department of Earth and Environmental Sciences. Students should be aware that many upper-level courses have prerequisites in geoscience, mathematics, physics, or chemistry. Consult this catalog or a departmental advisor, and keep in mind that these prerequisites must be considered in designing a specific minor program. The minor program allows students flexibility in their choice of courses. Minor programs can be designed to emphasize specific areas of concentration within the broad range of subjects in Earth and Environmental Sciences.

Senior Thesis and the Departmental Honors Program

Students are encouraged to conduct research with professors in the department. A senior thesis is normally a two-semester project, often also involving work during the summer after your junior year (or before). To do a thesis, students register for Senior Thesis (EESC5595) each semester of the senior year. To achieve Department Honors, majors in the department need to meet the GPA criteria (3.3 in major, 3.2 overall) and provide a thesis proposal to the Undergraduate Studies Committee by the add-drop date in the fall semester. In the spring, the completed thesis, signed by the faculty research advisor, is due to the committee by 5:00 p.m. on April 20, or if that is on a weekend or holiday, 5:00 p.m. on the first regular day of classes thereafter. Students can also write a senior thesis under the Morrissey Arts and Sciences Honors and Scholar of the College programs. Theses that meet these requirements would normally meet the Department Honors requirements. Honors will be awarded upon successful completion of a thesis based on the proposed research project as evaluated by the faculty advisor and approval of the thesis and the candidate’s academic record by the Undergraduate Studies Committee. In general, all students in the department are urged to fulfill at least one of the elective courses in any major program with a project-oriented research course during their senior year. Students may propose substitutes for particular course requirements by writing to the department Undergraduate Studies Committee.

Fulfilling the Core Requirements
Core courses in the department (numbered EESC1XXX) are designed to give non-science majors an introduction to various aspects of the Earth’s history and dynamics. The course offerings include a wide variety of subjects and approaches that reflect the breadth of the Earth sciences. This variety of courses provides maximum freedom of choice for introductory students. All of these courses presume no prior knowledge beyond high school science and all fulfill the Natural Science Core requirement. They are designed to acquaint students with some exciting aspect of the world we live in while providing a background in the methods of analysis and reasoning common to all science. EESC1125, EESC1132, and EESC1180 are courses that provide insight into the wide scope of geoscience subjects. Other Core offerings (such as EESC1146, EESC1150, EESC1157, EESC1170, EESC1172, EESC1174, EESC1177, and EESC1187) cover more specific sub-fields, such as oceanography, climate change, water resources, astronomy, or evolution. The department participates in the Core Renewal process, offering both Complex Problems (for example, EESC1501, EESC1506) and Emerging Questions (for example, EESC1701, EESC1702) courses for first-year students. Students wishing to find out more about department Core courses should contact the department at 617-552-3640 (Devlin 213) or see the department Director of Undergraduate Studies (Professor Jeremy Shakun, jeremy.shakun@bc.edu).

Information for Study Abroad

The Department of Earth and Environmental Sciences strongly encourages students to take advantage of study abroad opportunities. An Earth scientist can never see too much of our planet. We particularly encourage students to participate in programs that include field-based courses and research experiences. Depending upon the student's major, and the courses available at the foreign school, the department can be quite flexible. We typically allow one elective per semester abroad to count toward major requirements, or two courses in unusual circumstances. Students should work out their plan well in advance with a departmental advisor or the departmental Foreign Study Advisor (Professor Jeremy Shakun, jeremy.shakun@bc.edu).

Eastern, Slavic, and German Studies

The Department administers undergraduate majors in German, Linguistics, Russian, and Slavic Studies, as well as minors in Arabic Studies, Chinese, German, Linguistics, Russian, and East European Studies. Students may also participate in an interdisciplinary minor in interdisciplinary programs in Asian Studies, German Studies, Jewish Studies, International Studies, and Islamic Civilization and Societies. A German business concentration within the German major and minors is also available. Departmental honors require successful completion of honors requirements. For information, contact the Department.

The Department maintains listings of related courses from other departments that satisfy various program requirements. Substitutions and exemptions from specific program requirements, as well as the application of courses from other institutions, require express permission from the Chairperson or the Undergraduate Program Director.

Students fulfilling the undergraduate Core requirements in Literature and Cultural Diversity should consider Core offerings taught by members of the Department.

References to the number of credits required correlate with the number of full one-semester courses.

 Majors

The Department offers majors in German, Linguistics, Russian, and Slavic Studies.

Major in German (30 Credits)

The major in German is designed to help students achieve linguistic, literary, and cultural competence and to foster and develop transferable skills of critical thinking, textual analysis, effective writing and communication, and international cultural discernment. Training in German Studies includes advanced language courses combined with upper-level seminars on topical areas of literature, film, history, music, and culture. Majors complete the program with strong German-language proficiency, expertise in the analysis of texts and cultural artifacts in their historical and cultural context, the ability to produce texts of various genres in German, and the intellectual background for graduate study in German and many other fields, including business, law, political science, international studies, and medicine. German majors are eligible to apply for popular internships, which place Boston College students with companies in Germany or Austria every summer.
The German major requires ten 3-credit courses (30 credits):

- GERM2001–2002 German Composition and Conversation I and II (6 credits)
- An upper-level topics course numbered GERM2003 or between GERM2010 and 2020 (3 credits)
- GERM3000 History of German Literature (3 credits)
- Six additional courses in German Studies, at or above the 1051 level, two of which may be taught in English (18 credits)

Students are encouraged to consult with the German Studies Director of undergraduate studies concerning opportunities for study abroad at a German, Austrian, or Swiss university, in which case up to 12 credits (four 3-credit courses) may be applied to the major. Only one course for the major program may be "double counted" toward another major, minor, or Core requirement. To declare your major in German Studies, contact the director of the major, Professor Michael Resler, Lyons Hall 201C, resler@bc.edu.

Major in Linguistics (31 Credits)

The focus of the Linguistics program does not solely lie in the acquisition of language skills, but rather, in learning to analyze linguistic phenomena with a view toward making significant generalizations about the nature of language.

Students majoring in Linguistics build their programs around a specific area of emphasis. In consultation with the faculty, students design a program of study tailored to the individual's interests and goals. Typical areas of emphasis include philology (the historical and comparative study of ancient languages), psycholinguistics, and language acquisition.

A typical program for this major requires the following:

- LING3101 General Linguistics (3 credits)
- LING3102 Syntax and Semantics (3 credits)
- LING3103 Language and Language Types (3 credits) or LING3104 Formalism and Functionalism in Linguistics (3 credits)
- 3 credits in Philology
- 3 further credits in Philology or in Structure of a Language
- 15 additional credits drawn from departmental offerings, of which two must be upper-division electives
- LING4391 AB Comprehensive: Linguistics (1 credit)

Linguistics majors should additionally develop proficiency in at least one foreign language and competence in at least one other language at levels appropriate to their career plans (e.g., French, German, Spanish, Latin, Greek, Russian, Bulgarian).

Also desirable: exposure to a non-Indo-European language (e.g., Chinese, Arabic, Japanese, Korean, Hebrew, Persian (Farsi))—all of which are taught within the Department of Eastern, Slavic, and German Studies.

Major in Russian (30 Credits)

The major in Russian provides rigorous training in Russian language, literature, and culture. The major concentrates on acquiring advanced proficiency in Russian language and on comprehending important aspects of the literature, culture, and civilization of Russia and the former USSR.

The requirements for the major in Russian are as follows:
9 credits (normally, three one-semester courses) in Russian grammar, composition, and stylistics beyond the intermediate level

9 credits (normally, three one-semester courses) in Russian literature and culture, including 2 survey courses for classical and modern Russian literature (SLAV2162 and SLAV2173)

3 credits in Slavic Civilizations or Russian Civilization and Culture (usually SLAV2169 Slavic Civilizations)

6 credits (normally, two one-semester courses) in Russian literature, culture, advanced grammar and stylistics, history or politics, of which at least 3 credits must be in Russian literature and culture (consult the Department about the list of available courses)

3 credits (normally, a one-semester course) in Russian and Slavic linguistics (The Structure of Russian, Old Church Slavonic, or Old Russian)

**Major in Slavic Studies (30 Credits)**

The major in Slavic Studies provides broadly based training about Russia and the nations of Eastern Europe and the former Soviet Union. The normal program for this major requires the following:

- 6 credits (normally, two one-semester courses) in a Slavic language at or above the intermediate level
- 3 credits (normally, one one-semester course) in Slavic civilizations (usually SLAV2169 Slavic Civilizations)
- 6 credits (normally, two one-semester courses) in a Slavic literature, including, but not limited to, Russian literature
- 6 credits (normally, two one-semester courses) in Slavic history, politics, or linguistics (consult the Department about the list of available courses)
- 9 credits (normally, three one-semester courses) in Russian and Slavic Studies (consult the Department about the list of available courses)

**Minors**

The Department offers departmental minors in Arabic Studies, Chinese, German, Linguistics, and Russian, as well as interdisciplinary minors in Asian Studies, East European Studies, German Studies, and Jewish Studies.

**Minor in Arabic Studies (Departmental)**

The departmental minor in Arabic Studies covers areas of Modern Standard Arabic and Modern Hebrew languages, Modern Middle Eastern literature and cultural history, and Near Eastern Civilizations. The minor requires a minimum of 18 credits in approved courses (normally, six one-semester courses):

- 6 credits (normally, two one-semester courses) in Modern Standard Arabic above the first semester of intermediate intensive level
- 12 credits (normally, four one-semester courses) from departmental offerings in Middle Eastern languages, cultures, literatures, and civilizations (consult the Department about the list of available courses)

**Minor in Chinese (Departmental)**

The departmental minor in Chinese focuses on acquiring modern language proficiency and knowledge of aspects of Chinese culture, literature, and civilization. The minor requires a minimum of 18 credits of approved course work (normally, six one-semester courses):

- 6 credits (normally two one-semester courses) in modern Mandarin Chinese beyond the first semester of intermediate intensive level
Minor in German (Departmental)

The minor in German is for students interested in learning the German language and creating ties with the German-speaking world while combining their interest in German with other academic and professional goals. The foremost goal of the program is to foster among students an international focus and the accompanying skills, whatever their major may be. Minors are strongly encouraged to study or work abroad. German minors are eligible to apply for popular internships, which place Boston College students with companies in Germany or Austria every summer.

The German minor requires six 3-credit courses (18 credits):

- GERM2001–2002 German Conversation and Composition I and II (6 credits)
- An upper-level topics course numbered GERM2003 or between GERM2010 and 2020 (3 credits)
- Three additional courses in German Studies, at or above the 1051 level, one of which may be taught in English (9 credits)

Students are encouraged to consult with the German Studies Director of Undergraduate Studies concerning opportunities for study abroad at a German, Austrian, or Swiss university, in which case up to 6 credits (two 3-credit courses) may be applied to the minor. Only one course for the minor program may be “double counted” toward another major, minor, or Core requirement. To declare your minor in German Studies, contact the director of the minor, Professor Daniel Bowles, Lyons Hall 201F, bowlesd@bc.edu.

Minor in Linguistics (Departmental)

This departmental minor requires a minimum of six approved one-semester courses (18 credits)

- LING3101 General Linguistics (3 credits)
- LING3102 Syntax and Semantics (3 credits)
- 3 credits in Philology
- 3 further credits in Philology or in Structure of a Language
- 6 additional credits drawn from departmental Linguistics offerings

Minor in Russian (Departmental)

The departmental minor in Russian requires a minimum of 18 credits (normally, 6 approved courses):

- 6 credits (normally, two one-semester courses) in Russian at or above the intermediate level
- 6 credits (two one-semester courses) in Russian literature: one pre-twentieth century and one post-nineteenth century (normally two survey courses for classical and modern Russian literature, SLAV2162 and SLAV2173)
- 6 additional credits (normally, two one-semester courses) in Russian literature, culture, advanced grammar and stylistics, history or politics (consult the Department about the list of available courses)
Minor in Asian Studies (Interdisciplinary)

The Asian Studies program offers students a rich curriculum in the arts and literatures, history, philosophy, religion, and contemporary affairs of East Asia, South Asia, and Central Asia. It rests on three pillars:

- an emphasis on regional and transnational relations
- the integration of different disciplinary approaches
- language study

For more information concerning the Asian Studies minor:

- Visit the Interdisciplinary Programs and Minors (MCAS) page
- Contact the Director of the interdisciplinary minor in Asian Studies, Sing-chen Lydia Chiang, chiangs@bc.edu, 617-552-0128

Minor in East European Studies (Interdisciplinary)

The East European Studies interdisciplinary minor requires a minimum of 18 credits in approved course work (normally, six one-semester courses), distributed as follows:

- 3 credits in either Russian Civilization (SLAV2165) or Slavic Civilizations (SLAV2169)
- 3 additional credits in Russian or East European history, culture, or politics
- 6 credits in Russian or in another Slavic or East European language at or above the intermediate level
- 6 credits in approved elective course work from related areas such as: art history, economics, sociology, film studies, literature, linguistics or language, philosophy, or theology.

For more information on the minor in East European Studies, contact Professor Maxim D. Shrayer, Director, East European Studies minor, shrayerm@bc.edu.

Minor in German Studies (Interdisciplinary)

The interdisciplinary minor in German Studies aims to provide a comprehensive understanding of German-speaking civilization and its place in today's world. Students choose the interdisciplinary minor for its flexibility in taking courses tailored to their interests across departments and may complete the entire minor with courses taught in English. German Studies minors are eligible to apply for popular internships, which place Boston College students with companies in Germany or Austria every summer.

The German Studies minor requires six 3-credit courses (18 credits):

- GERM2242/HIST2270 Germany Divided and Reunited (3 credits)
- Two additional courses from the German Studies course offerings at or above the 1051 level (6 credits)
- Three courses from at least two other departments in the Morrissey College of Arts and Sciences (9 credits)
Students should consult the director of the interdisciplinary minor for a list of courses from across the campus suited to the interdisciplinary minor in German Studies. Students are also encouraged to consult with the director concerning opportunities for study abroad at a German, Austrian, or Swiss university, in which case up to 6 credits may be applied to the minor. Only one course for the minor program may be “double counted” toward another major, minor, or a Core requirement.

To declare your German Studies minor and plan your course of study, contact the director of the interdisciplinary minor, Professor Nick Block, Lyons 201A, blockni@bc.edu.

**Minor in Jewish Studies (Interdisciplinary)**

The Boston College Jewish Studies program seeks to examine the multiple dimensions and complexities of Jewish culture throughout its broad chronological and geographical range. The interdisciplinary minor in Jewish Studies consists of a total of six 3-credit courses (18 credits), including one foundation course, four electives, and a concluding seminar/Capstone course.

For information concerning the interdisciplinary undergraduate minor in Jewish Studies, visit the [Minor in Jewish Studies](#) program web page.

**German Studies Special Opportunities**

**Honors Program in German**

Students with a minimum 3.5 GPA in German Studies courses are encouraged to apply for the Honors program in German. Honors students take an additional 6 credits in German Studies (either one additional 3-credit upper-level course and one semester of GERM6699, or two semesters of GERM6699). As part of GERM6699, students complete a bachelor's thesis on a topic chosen in consultation with their proposed thesis advisor. To apply for the Honors program, please contact the director of undergraduate studies, Professor Daniel Bowles, Lyons 201F, bowlesd@bc.edu.

**Business Concentration in German Studies**

The business concentration allows German majors or minors to combine a dual interest in business and German with a program of study that prepares them for an international career. The business concentration has been developed in conjunction with the Boston College Carroll School of Management to take advantage of the thriving German economy that makes Central and Eastern Europe a strong market for American products and has enabled German companies to open branches in the United States.

The German business concentration requires two 3-credit courses (6 credits), counting simultaneously toward the German major or minors:

- GERM2004 Business German (3 credits)
- GERM2005 Germany in Europe Today (3 credits)

Students majoring or minoring in German Studies can apply in the fall semester for popular internships, which place Boston College students with companies in Germany or Austria every summer. Inquire about the internship, for which you may receive one course credit (GERM5501), by contacting Ursula Mangoubi in Lyons 201G, mangoubi@bc.edu.

Students are encouraged to spend a year or a semester at the Wirtschaftsuniversität Wien (Vienna University of Economics and Business), the Frankfurt School of Finance and Management, or the Ingolstadt School of Management affiliated with our partner university, the Catholic University of Eichstätt-Ingolstadt.
Study Abroad

The Department of Eastern, Slavic, and German Studies requires, in general, at least two years of language study, in addition to coursework (tailored to the individual student's program of study) that would provide cultural orientation. Since the Department offers a wide-variety of majors and minors, courses taken abroad may be accorded major or minor credit (up to 12-credits to majors and 6-credits to minors) on a per case basis. Please consult with the relevant departmental undergraduate studies coordinator.

Individual programs of study are arranged according to the types of instruction available and the student's goals and background.

Students interested in German Studies can study in a German-speaking country for a year, a semester, or a summer, with recommended programs in Eichstätt, Berlin, Heidelberg, Frankfurt, and Vienna. Students majoring in Linguistics may profit from any number of study-abroad opportunities, depending on the specific language(s) they elect to focus on. Students of Near Eastern and East Asian languages have participated to great advantage in a variety of different study abroad opportunities in Egypt, Jordan, Morocco, Oman, Japan, the People's Republic of China, the Republic of China, Korea, and other nations of Asia.

Junior year is the most popular time to study abroad, but seniors have done so successfully as well. All Eastern, Slavic and German Studies majors must obtain department course approval before going abroad. Students should consult with the relevant faculty members, depending on their language and area of expertise.

Work Abroad in Germany

Only German majors and minors are eligible to apply for popular internships, which place Boston College students with companies in Germany every summer. Students are paid through their job and/or through Boston College internship grants and other fellowships.

The Fulbright Program (German Studies students only)

Students apply for the elite Fulbright program starting the spring before their senior year. For Fulbright information, contact Professor Michael Resler, Lyons Hall 201C, resler@bc.edu.

Office of International Programs

Students taking classes in the Department of Eastern, Slavic and German Studies participate in Boston College’s programs and international partnerships in China, Germany, Israel, Japan, Korea, Lebanon, Morocco, Nepal, Philippines, Poland, Russia, and other countries.

For complete information on any of these programs and also on unofficial study abroad, visit www.bc.edu/international.

Teachers of English to Foreign Students

The Department of Eastern, Slavic and German Studies offers a number of linguistics courses for training teachers of English to foreign students. The Department of English offers elective and Core-level undergraduate courses of English language and literature for foreign students enrolled at Boston College.

Economics
The Economics major provides a critical examination of how the economic system works in the United States and throughout the world. The introductory course, ECON1101, is a survey of economic problems, policies, and theory. The required courses in micro theory and macro theory, ECON2201–ECON2202, give a deeper analytical foundation. The two required courses in quantitative methods, ECON1151 and ECON2228, develop analytical and empirical research skills. Electives permit further study in a wide range of fields, including: banking, fiscal policy, international trade and finance, law and economics, public sector economics, development studies, capital theory and finance, labor economics, income distribution, financial econometrics, industrial organization, consumer economics, health economics, history of economic thought, transportation economics, environmental economics, urban economics, political economy, financial markets, real estate, sports, and public policy analysis.

The Economics major provides a foundation that is useful to those planning careers in law, government service, and business as well as those planning careers as professional economists. Professional economists work as leaders, administrators, and managers in a wide variety of fields.

The Core Courses

Principles of Economics (ECON1101) is a 4-credit course, with 3 hours of lecture and a 1-hour discussion section. This satisfies one of the two required social science Core courses. Qualifying AP scores on Micro Principles or Macro Principles can be used to satisfy the remaining social science Core course requirement. It is possible to waive this requirement entirely with qualifying AP scores on both Micro Principles and Macro Principles AP exams, but the Department strongly recommends taking Principles of Economics at Boston College for a well-rounded introduction to the U.S. economy and current policy issues. Some Enduring Questions and Complex Problems courses, available to first-year students, are offered by Economics faculty. They satisfy the Social Science core, but they do not count toward Economics major requirements.

Principles of Economics I/Microeconomics and Principles of Economics II/Macroeconomics (ECON1131 and ECON1132) satisfy the Core requirements in the social sciences. They are not open to students in the Class of 2023 and will not be offered after Spring 2020.

Requirements for Class of 2023 and Beyond

Major Requirements: Class of 2023 and Beyond

A minimum of 36 credits, consisting of five required courses and six electives, are required for the economics major. The required courses are: Principles of Economics (ECON1101), Economic Statistics (ECON1151), Microeconomic Theory (ECON2201 or 2203), Macroeconomic Theory (ECON2202 or 2204), and Econometric Methods (ECON2228). At least four of the six electives must be upper-level courses, i.e., 3000-level courses that have a theory prerequisite. In addition, Microeconomic Theory (ECON2201 or 2203), Macroeconomic Theory (ECON2202 or 2204), Statistics (ECON1151), and Econometric Methods (ECON2228) must be completed by sophomore year unless a student starts the major after their first year. All students must have the five required courses completed by the end of junior year. Exceptions to this requirement may be granted at the discretion of the Director of Undergraduate Studies.

All Economics courses counting toward the major and minor are 3-credit courses with the exception of Principles of Economics (ECON1101), Statistics (ECON1151), and Econometric Methods (ECON2228), which are 4-credit courses.

The Economics major is designed to be structured. Students should take ECON1101 before taking economics courses other than Statistics. Consult the Department’s web page (www.bc.edu/economics) for a discussion of the policies pertaining to advanced placement for the Principles and Statistics courses.

- Those who begin the major as freshmen should take Microeconomic Theory, Macroeconomic Theory, Statistics, and Econometric Methods in the sophomore year. Students beginning the major as sophomores should take both Theory classes, Statistics, Econometric Methods, and at least one elective by junior year.
- Statistics should be taken as soon as possible, preferably no later than the first semester of sophomore year. Econometric Methods should be taken in the following semester.
With the exception of ECON2211 Math for Economic Analysis, students should complete at least one Theory course before beginning the electives. Those who start the major late may not have time to follow this sequence precisely. Students who need to take an elective before completing a theory course should register for a 2000-level elective that has only Principles as a prerequisite. It is also possible, with permission of the instructor, to take a 3000-level elective concurrently with its Theory prerequisite.

Economic electives are taught in two formats: the traditional lecture format, with enrollments up to 49, and a smaller writing-intensive format, with enrollments capped at 15 to 25 depending on the size of the writing component. Students are urged to take advantage of the writing-intensive courses and to check with the Department before the registration period to learn which courses will be offered in which format.

Calculus I (MATH1100, MATH1102 [preferred], or the equivalent) is required of all Economics majors prior to taking the Microeconomic Theory and Macroeconomic Theory courses. Any student with a serious interest in economics should take at least one full year of calculus, MATH1100–1101, MATH1102–1103 [preferred], or the equivalent. Candidates for Departmental Honors must take a year of calculus (see below). Students considering graduate work in economics or related fields should take additional mathematics courses: about the same number as required for the minor in mathematics.

Honors Program: Class of 2023 and Beyond

The Honors Program presents highly motivated economics majors with opportunities for more individualized and challenging training in economics. Entrance to the program is ideally in the sophomore year, when students with good Principles grades will be urged to consider the Honors Theory sequence (ECON2203–2204) in place of the standard Theory sequence (ECON2201–2202). However, students who have already completed ECON2201–2202 may still be accepted into the Honors Program. Students considering the Honors Program should arrange to take Statistics as soon as possible and then Econometric Methods (ECON2228), MATH1100–1101, MATH1102–1103 [preferred], or the equivalent are prerequisites for both Honors Theory courses and the Honors Program generally. The Honors candidate must complete a 6-credit Senior Honors Thesis (ECON4497–4498) or a 12-credit Advanced Independent Research (ECON6601) in the senior year under the direction of a faculty member. Only ECON4497 is counted toward the 11-course requirement. Honors students take five other electives, at least three of which must be upper-level courses.

The distinction of Honors in Economics may be conferred only upon those students completing a Senior Honors Thesis. A letter grade less than B+ on the Senior Honors Thesis would be considered a deficiency to the conferral of Honors in Economics. A higher letter grade supports the conferral but does not in itself assure that the distinction shall be conferred. GPA and the rigor of the courses taken will be considered. The conferral is the sole responsibility of the Honors Committee.

Minor Requirements: Class of 2023 and Beyond

The minor in Economics consists of five required courses and two electives, a minimum of 24 credits. The required courses are: Principles of Economics (ECON1101), Statistics (ECON1151), Microeconomic Theory (ECON2201 or 2203), Macroeconomic Theory (ECON2202 or 2204), and Econometric Methods (ECON2228). At least one of the two electives must be an upper-level (3xxx) course. At least one of the Theory courses must be completed by the end of the junior year. Exceptions to this requirement may be granted at the discretion of the Director of Undergraduate Studies.

Calculus I (MATH1100, MATH1102 [preferred], or the equivalent) is a prerequisite for the Theory courses.

Economics Concentration for Carroll School of Management Students: Class of 2023 and Beyond

All Carroll School of Management students, regardless of their area of concentration, are required to take Principles of Economics (ECON1101) and Statistics (OPER1135). In addition, CSOM students may choose Economics as an area of concentration. The concentration consists of four courses, i.e., at least 12 additional credits, beyond the two required courses. The four additional courses are Microeconomic Theory (ECON2201 or 2203), Macroeconomic Theory (ECON2202 or 2204), and two electives, at least one of which must be an upper-level (3xxx) course. Students with a serious interest in economics are encouraged to fulfill all the requirements of the Morrissey College of Arts and Sciences major. At least one of the Theory courses must be completed by the end of the junior year. Exceptions to this requirement may be granted at the discretion of the Director of Undergraduate Studies.
Requirements for Classes of 2021 and 2022

Major Requirements: Classes of 2021 and 2022

A minimum of 35 credits, consisting of six required courses and five electives, are required for the economics major. The required courses are: Principles of Economics I/Microeconomics and Principles of Economics II/Macroeconomics (ECON1131 and ECON1132), Statistics (ECON1151), Microeconomic Theory (ECON2201 or 2203), Macroeconomic Theory (ECON2202 or 2204), and Econometric Methods (ECON2228). At least three of the five electives must be upper-level courses, i.e., 3000-level courses that have a theory prerequisite. In addition, Microeconomic Theory (ECON2201 or 2203), Macroeconomic Theory (ECON2202 or 2204), and Econometric Methods (ECON2228) must be completed by sophomore year unless a student starts the major after their first year. All students must have the five required courses completed by the end of junior year. Exceptions to this requirement may be granted at the discretion of the Director of Undergraduate Studies.

Students in the classes 2021 and 2022 may substitute ECON1101, Principles of Economics, for ECON1131/ECON1132. They must then take six elective courses, four of which must be at the 3000 level.

All Economics courses counting toward the major and minor are 3-credit courses with the exception of Principles of Economics (ECON1101), Statistics (ECON1151), and Econometric Methods (ECON2228), which are 4-credit courses.

The Economics major is designed to be structured. Students should take ECON1131 and ECON1132 before taking economics courses other than Statistics. Consult the Department’s web page (www.bc.edu/economics) for a discussion of the policies pertaining to advanced placement for the Principles and Statistics courses.

- Those who begin the major as freshmen should take Microeconomic Theory, Macroeconomic Theory, Statistics, and Econometric Methods by sophomore year. Students beginning the major as sophomores should take both Theory classes, Statistics, Econometric Methods, and an elective by junior year.
- Statistics should be taken as soon as possible, preferably no later than the first semester of sophomore year.

With the exception of ECON2211 Math for Economic Analysis, students should complete at least one Theory course before beginning the electives. Those who start the major late may not have time to follow this sequence precisely. Students who need to take an elective before completing a theory course should register for a 2000-level elective that has only Principles as a prerequisite. It is also possible, with permission of the instructor, to take a 3000-level elective concurrently with its Theory prerequisite.

Economic electives are taught in two formats: the traditional lecture format, with enrollments up to 49, and a smaller writing-intensive format, with enrollments capped at 15 to 25 depending on the size of the writing component. Students are urged to take advantage of the writing-intensive courses and to check with the Department before the registration period to learn which courses will be offered in which format.

Calculus I (MATH1100, MATH1102 (preferred), or the equivalent) is required of all Economics majors prior to taking the Microeconomic Theory and Macroeconomic Theory courses. Any student with a serious interest in economics should take at least one full year of calculus, MATH1100–1101, MATH1102–1103 (preferred), or the equivalent. Candidates for Departmental Honors must take a year of calculus (see below). Students considering graduate work in economics or related fields should take additional mathematics courses: about the same number as required for the minor in mathematics.

Honors Program: Classes of 2021 and 2022

The Honors Program presents highly motivated economics majors with opportunities for more individualized and challenging training in economics. Entrance to the program is ideally in the sophomore year, when students with good Principles grades will be urged to consider the Honors Theory sequence (ECON2203–2204) in place of the standard Theory sequence (ECON2201–2202). However, students who have already completed ECON2201–2202 may still be accepted into the Honors Program. Students considering the Honors Program should arrange to take Statistics as soon as possible and then Econometric Methods (ECON2228). MATH1100–1101, MATH1102–1103 (preferred), or the equivalent are prerequisites for both Honors Theory courses
and the Honors Program generally. The honors candidate must complete a 6-credit Senior Honors Thesis (ECON4497–4498) or a 12-credit Advanced Independent Research (ECON6601) in the senior year under the direction of a faculty member. Honors students take four other electives, at least two of which must be upper-level courses.

The distinction of Honors in Economics may be conferred only upon those students completing a Senior Honors Thesis. A letter grade less than B+ on the Senior Honors Thesis would be considered a deficiency to the conferral of Honors in Economics. A higher letter grade supports the conferral but does not in itself assure that the distinction shall be conferred. GPA and the rigor of the courses taken will be considered. The conferral is the sole responsibility of the Honors Committee.

**Minor Requirements: Classes of 2021 and 2022**

The minor in Economics consists of five required courses and two electives, a minimum of 23 credits. The required courses are: Principles of Economics I/Microeconomics and Principles of Economics II/Macroeconomics (ECON1131 and ECON1132), Statistics (ECON1151), Microeconomic Theory (ECON2201 or 2203), and Macroeconomic Theory (ECON2202 or 2204). At least one of the two electives must be an upper-level (3xxx) course. At least one of the Theory courses must be completed by the end of the junior year (exceptions to this requirement may be granted at the discretion of the Director of Undergraduate Studies).

Calculus I (MATH1100, MATH1102 [preferred], or the equivalent) is a prerequisite for the Theory courses.

Students in the classes of 2021 and 2022 may substitute ECON1101, Principles of Economics, for ECON1131/ECON1132. They must then take three elective courses, two of which must be at the 3000 level.

**Economics Concentration for Carroll School of Management Students: Classes of 2021 and 2022**

All Carroll School of Management students, regardless of their area of concentration, are required to take Principles of Economics I/Microeconomics and Principles of Economics II/Macroeconomics (ECON1131 and ECON1132) and Statistics (OPER1135). In addition, CSOM students may choose Economics as an area of concentration. The concentration consists of four courses, i.e. at least 12 additional credits, beyond the three required courses. The four additional courses are Microeconomic Theory (ECON2201 or 2203), Macroeconomic Theory (ECON2202 or 2204), and two electives, at least one of which must be an upper-level (3xxx) course. Students with a serious interest in economics are encouraged to fulfill all the requirements of the Morrissey College of Arts and Sciences major. At least one of the Theory courses must be completed by the end of the junior year. Exceptions to this requirement may be granted at the discretion of the Director of Undergraduate Studies.

Students in the classes of 2021 and 2022 may substitute ECON1101, Principles of Economics, for ECON1131/ECON1132. They must then take three elective courses, two of which must be at the 3000 level.

**Double Major**

Requirements for double majors are the same as those for the major.

**Courses Taken Outside the Department**

Students are permitted to transfer in external credits from summer study, study abroad, and any coursework taken outside the MCAS Economics department. WCAS, study abroad through OIP, and BC Summer Study are all considered external. The maximum number allowed for majors is two courses and one course for minors. Nine out of the eleven required courses for majors must be taken through the department. Six out of the seven required courses for minors must be taken through the department. Students transferring in from another university may transfer in more courses depending on their class year. However, at least five of the courses towards the major must be taken with the MCAS Economics department at Boston College.

The Theory courses,* ECON1151 Statistics and ECON2228 Econometric Methods, may not be taken outside the department.
All external courses need the syllabi approved by the Director of Undergraduate Study to determine eligibility for transfer. Lists of pre-approved courses abroad and through WCAS are listed on the Economics website.

The Department requires that at least nine of the courses for the major, and five of the courses for the minor and the CSOM concentration, be taken within the Department. Of the two courses that may be taken outside the Department, the following limit applies: a maximum of two electives for the major and one elective for the minor or CSOM concentration. The Theory courses, Statistics, and Econometric Methods may not be taken outside the Department. Students who transfer from another university may transfer more than three courses towards the major, but must take at least five courses for the major at Boston College. The transferred courses may include the Theory courses. All students who wish to receive credit for courses taken outside the Department must contact the Director of Undergraduate Studies, who will determine if particular courses can be counted towards the major, minor, or CSOM concentration. Note, finally, that the limits apply in total to all courses taken outside the Department. For example, a student who is studying abroad and has already received credit towards the major for an elective taken in a summer program can only receive credit for one elective taken abroad.

*Exceptions can be made for transfer students.

**Economics Internship**

ECON1199 Economics Internship, a 1-credit course, is available for any student who wishes to do an internship with an agency or organization that requires a Boston College connection as a condition for offering the internship opportunity. A student who wishes to enroll in ECON1199 is required to complete an approval form that can be obtained in the Dean's Office of the Morrissey College of Arts and Sciences. The form must be signed by the student's supervisor in the organization or agency providing the internship and by the Department's Director of Undergraduate Studies. After it is signed, it should be sent to the student's class dean. At the end of the internship, the agency or organization supervisor must provide an evaluation to the Director of Undergraduate Studies. The internship is graded on a pass/fail basis. Credits received through internships cannot be applied to the credits required for completing the major, minor, or CSOM concentration. Only one such credit will be counted toward the 120 required for graduation.

**Information for Study Abroad**

There are many excellent economics programs offered through universities overseas. Students are encouraged to ask their faculty advisors and the Office of International Programs for details about the quality of various programs. Schools with strong programs in economics include the London School of Economics and University College London in England; Trinity College and University College Dublin in Ireland; Pompeu Fabra University, Universidad Complutense, and Universidad Carlos III in Spain; University of Paris Dauphine in France; Bocconi University in Italy; and the University of Melbourne in Australia. Some programs require a full-year commitment, which requires careful planning in order to complete major requirements.

To ensure that students are able to complete the requirements for the major in time for graduation, we prefer students to have five courses completed before studying abroad: Principles of Economics, Statistics, Econometric Methods, and Microeconomic and Macroeconomic Theory. Minors and CSOM concentrators should have completed Principles of Economics, Statistics, and at least one Theory course. At a minimum, all students must complete Principles of Economics and one Theory course to be approved for study abroad. To be eligible to transfer back credits for the major, minor, or CSOM concentration, students must earn at least a B- in at least one of the Theory courses before going abroad.

Department policies on study-abroad courses are as follows:

- Up to two of the electives that are required for the Morrissey College of Arts and Sciences Economics major may be taken abroad. Minors and CSOM concentrators are limited to counting one elective from abroad towards their degree requirements.
- The prerequisite restrictions on upper-level and lower-level electives taken at Boston College apply to courses taken abroad.
- Electives previously transferred from outside the Department, such as from a summer program, reduce the number of electives that can be transferred from study abroad.
- Microeconomic and Macroeconomic Theory, Statistics, and Econometric Methods cannot be taken abroad. This means that students interested in studying abroad must carefully plan their courses for the major. Theory courses and
Econometric Methods must be completed by the end of junior year. For example, students who begin the major in sophomore year should take the Principles and Statistics courses and one of the Theory courses in the second semester, and then complete the second Theory course and Econometric Methods junior year in the semester that they are at Boston College. These students should not expect to be approved for study abroad for their entire junior year.

Those students planning to participate in the Department’s Honors program are strongly advised to identify a thesis topic and a faculty supervisor before going abroad. Very tight deadlines during the fall semester of senior year make this advance planning essential.

Students should meet with their advisors to plan their semester or year abroad. Students who are considering doing Ph.D. work in economics should think ahead and plan their programs abroad with particular care.

English

In an academic milieu fragmented into specialized disciplines, the study of literature continues to offer students a comprehensive point of view from which they can integrate the diversity of human experiences. Language reveals fascinating truths about the human mind and literature records its preoccupations—intellectual, aesthetic, spiritual, psychological, political, social, historical, and ethical.

The study of literature offers deep schooling in human experience. It is also superb training for any field in which understanding of behavior is valued. Students of literature consistently explore language and the forms of expression, valuable in any future work where precise and effective communication is important. English majors and minors can develop these skills to a considerable degree, and non-majors find that taking even a few well-chosen electives beyond the Core requirement can widen their knowledge of literature and sharpen their linguistic abilities.

The English major at Boston College is designed to introduce students to a wide range of expression in the literary traditions of the past and present. It aims to help undergraduate students develop a strengthened ability to work critically and sensitively with texts in poetry and prose, to write with clarity and grace, and to articulate judgments about literature with an awareness of various critical approaches. English majors will become familiar with some of the major developments in the history of literature in the English language and will have the opportunity to choose from an array of courses covering topics from the medieval period to contemporary cultural studies to a range of transnational literatures.

By the successful completion of the English major at Boston College, students will be able to demonstrate:

- an ability to write clear, coherent, organized, and stylistically correct papers;
- an ability to close-read, interpret, and analyze texts (including poetic texts);
- a knowledge of literary genres and appropriate use of critical terminology;
- a recognition of the historical specificity of literary works and/or other cultural products;
- an awareness that there are a variety of critical approaches to literary and cultural texts.

Information for First Year Majors and Non-majors

The English Department has primary responsibility for two Core requirements—ENGL1010 First Year Writing Seminar, taught entirely by English Department faculty, and ENGL1080 Literature Core, taught largely by English Department faculty. Because Core classes are restricted to first-year students, students should plan to take both courses during the first year.

ENGL1010 First Year Writing Seminar

The First Year Writing Seminar helps students use their writing as a source of learning and a form of communication. Designed as a workshop in which each student develops a portfolio of personal and academic writing, the seminar follows a semester-long
process. Students write and rewrite essays continuously, discuss their works-in-progress in class, and receive feedback during individual and small group conferences with the instructor. In connection with their writing, students read and discuss a wide range of texts, including various forms of non-fiction prose. In addition to regular conferences, the class meets two hours per week to learn and discuss writing processes and strategies, various genres and rhetorical situations for writing, the evolving drafts of class members, and various forms of conducting and writing research, including an introduction to using the resources at O’Neill Library.

**ENGL1080 Literature Core**

In this part of the Core program, students explore the principal motives which prompt people to read literature—to assemble and assess the shape and values of one’s own culture, to discover alternative ways of looking at the world, to gain insight into issues of permanent human importance as well as issues of contemporary urgency, and to enjoy the linguistic and formal satisfactions of literary art.

Literature Core will strive to develop the student’s capacity to read and write with clarity and engagement, to allow for that dialogue between the past and present we call history, and to provide an introduction to literary genres.

**Courses for English Language Learners**

The department offers Core level courses in language and literature for English language learners. These classes require department permission for registration. Interested students should contact the ELL Director, Lynne Anderson, for more information: lynne.anderson@bc.edu.

**Major Requirements**

Students ordinarily begin the English major in their sophomore year, after completing the First Year Writing Seminar and the Literature Core. In addition to the two 3-credit Core courses, students take 30 credits (in the form of ten, 3-credit courses) from the Department’s offerings. These must include ENGL2131 Studies in Poetry (3 credits) and ENGL2133 Studies in Narrative (3 credits), usually taken in sequence in the sophomore year. Both courses train students intensively in the close reading of literary texts and in writing with critical awareness about literature.

To provide deeper understanding of the foundations of literary traditions, English majors are also required to take 9 credits in *earlier literatures in English*, to be distributed in the following manner:

- 3 credits in medieval or early-modern literature (before 1700)
- 3 credits in eighteenth or nineteenth-century literature (between 1700–1900)
- 3 additional credits in either category (e.g., pre–1900)

Students complete the English major by taking 15 credits in elective courses of their choice.

During the sophomore year, historical survey courses such as Introduction to British Literature and Culture I and II and the American Literary History sequence may be useful to fill in students’ knowledge of the development of English and American literature. Students who have a special interest in American literature are advised to take American Literary History I as a foundation for later courses. Please note that earlier literatures in languages other than English (such as cross-listed courses offered through other departments) will be counted as major electives and not historical distribution requirements. At this point, students should be in a position to begin making their own choices about how they will complete the major requirements, in discussion with their major advisor. They will have many options from among the 30 or more electives the Department offers each semester in English and American literature, in Irish Studies, in writing, in the different genres, and in particular themes.
Seminars

Seminars are designed for English majors who want to pursue a topic or field in more depth than is possible in larger electives. Beginning with the class of 2022, all majors will be required to take one seminar prior to graduation. The seminar, with its small class size and intensive focus, is designed to foster an intimate learning community where students are encouraged not only to study an issue intensively but also to engage actively in an intellectual exchange with a faculty member and a select group of committed peers. These courses are intended mainly for juniors and seniors, and ordinarily, students are advised to have completed both Studies in Poetry and Studies in Narrative and at least one additional elective before taking a seminar. Students should expect to produce a longer seminar project or research paper (15–20 pages) as well as one or more shorter papers and make at least one oral presentation.

Individually Designed Major

For some students with specific interdisciplinary interests, in American Studies for instance, an individually designed sequence of courses under the English major is appropriate. Students who satisfy their major requirements this way may count for English credit up to two courses (6 credits) taken in other departments. This plan must be approved by the chairperson and the student's department advisor by the end of the first semester of junior year.

English Minor

The English minor is comprised of six courses (18 credits) beyond the Core requirements in English. These must include:

- Either ENGL2131 Studies in Poetry or ENGL2133 Studies in Narrative
- A historical foundations course (pre–1700 or pre–1900)
- Four electives from the department offerings.

Core and Woods College classes may not be counted toward the minor, though additional courses that fulfill the first two requirements may be counted as electives. Students may count up to two courses from study abroad toward the minor, though they must be approved by the department.

For questions about the English minor, or to declare, please contact Marla DeRosa (marla.derosa@bc.edu).

English Courses for Non-majors

Students majoring in other subjects have always been welcome in English courses for the diversity of viewpoint and variety of knowledge they often bring with them. From the students' point of view, English courses offer the enjoyment of reading good literature; insight into history, culture, and human character; and a chance to polish reading and writing skills.

Interdisciplinary and Related Programs

The English Department is connected to a variety of interdisciplinary programs at Boston College.

American Studies Program

American Studies is an interdisciplinary program that brings together faculty from several departments to expose students to a wide range of approaches to American culture past and present. Thematic emphases include the American city; the historical
interaction of class, gender, race, and ethnicity; high culture, popular culture, and mass media; crime and deviance; migration, borderlands, and empire.

**Minor Requirements**

Courses used for fulfilling the minor must come from outside the student's major and from at least two different departments. Eighteen credits are required for the minor. Nine of these credits must be clustered in a common area of concentration chosen by the student in consultation with the director of American Studies. In the fall of the senior year each student must take the elective designated as the American Studies senior seminar for that year. Also, ENGL2277 Introduction to American Studies, is strongly recommended for minors, but not yet required.

For further information on the American Studies minor and application forms, visit the American Studies website at [www.bc.edu/amstudies](http://www.bc.edu/amstudies).

**Irish Studies**

Irish Studies, an integral part of Boston College's distinguished Irish Programs, offers an interdisciplinary approach to the culture and society of Ireland. Individual courses cover the areas of social, political, and economic history, literature, medieval art, sociology, folk music, and the Irish language. In addition, there are several courses that are jointly taught by faculty from various disciplines. These include a 3-semester sequence of courses integrating the history and literature of Ireland, from the eighteenth to the twentieth centuries.

The minor in Irish Studies requires students to complete 6 courses drawn from more than one discipline and designated as appropriate by the Irish Studies program. (These courses may not be "double counted" towards both a major and minor.) Students should contact Irish Studies at 617-552-3938 to arrange a meeting with the Director for assistance planning their courses. Those completing the Irish Studies minor are eligible for the Maeve O'Reilly Finley Fellowship for graduate study in Ireland. A listing of Irish Studies-approved courses is posted on our website and is also available at Connolly House.

Students pursuing the minor are encouraged to take advantage of the partnership programs that the Irish Studies program and the Office of International Programs have developed with the National Universities of Ireland at Galway and Maynooth, University College Cork, University College Dublin, Trinity College Dublin, the University of Ulster, and Queen’s University Belfast.

**Women's and Gender Studies**

Please contact Professor Sharlene Hesse-Biber in the Sociology Department for information regarding Women's Studies.

**Secondary Education Majors and Minor**

English majors who are also completing Lynch School of Education and Human Development majors must fulfill more specific major requirements to demonstrate a broad range of knowledge within the discipline. In addition to the First Year Writing Seminar, the Literature Core, Studies in Poetry, and Studies in Narrative, these students must fulfill the following requirements:

- one pre–1700 course
- one pre–1900 course
- one course on Anglophone or Ethnic American Authors
- one course on Women Authors
- one course on the History of Language/Grammar/Linguistics
- one course in Adolescent and Young Adult Literature
- two English electives
To acquire sufficient knowledge across this spectrum, Lynch students should consider taking more general survey courses (e.g., Introduction to British Literature and Culture I and II, American Literary History I, II, and III) to fulfill some requirements.

Students with questions about the ENGL/Lynch requirements should contact Marla Derosa in Stokes S493.

**Minor in Secondary Education**

Students in the Morrissey College of Arts and Sciences majoring in English may apply to minor in Education, in order to gain certification for teaching. The program begins in the junior year. Interested students should contact the Coordinator of Secondary Education or the Associate Dean in the Lynch School of Education during the first semester in sophomore year.

The Department recommends that English majors completing a secondary education minor follow the guidelines listed above for course selection as well.

**Linguistics**

The Program in Linguistics, housed in the Department of Slavic and Eastern Languages, offers courses for English majors who want to study English from a linguistic perspective or to examine the nature of language.

**Creative Writing Concentration**

The English Department offers a Creative Writing Concentration that allows certain students to intensify and focus their English majors by taking a series of practice-based writing courses along with their literature courses.

- The creative writing concentrator undertakes a 36-credit English major instead of the usual 30 credits. At least 9 of these credits must be writing workshops in any genre, selected with the help of the student's concentration advisor.

All concentrators also attend monthly social gatherings to read new work and share news about literary activity on campus. English majors may declare the Creative Writing Concentration up through first semester of junior year, after receiving a grade of A- or better in one of the Department's creative writing workshops. The period for declaring the Concentration runs through the end of add/drop week of each semester. Eligible English majors wishing to declare should see Marla DeRosa in Stokes S493.

**Summer Courses**

A limited number of summer courses maybe be counted toward the English major or minor.

These include summer English courses taught abroad by our faculty through the Office of International Programs, as well as electives taught through the Woods Colleges by our faculty.

Please contact Marla DeRosa (marla.derosa@bc.edu) for questions about summer courses.

Courses offered through the Woods College during the academic year may not be counted toward the English Core, major, or minor.

**Information for Study Abroad**
English majors should complete (at minimum) the required Studies in Poetry and Studies in Narrative prior to study abroad, while minors should complete at least one of those requirements. Majors will need to have their preliminary application for study abroad approved by the department. Majors may count up to six credits per semester abroad for the major (12 credits maximum); minors may count six credits total. These courses may fulfill historical requirements or major electives. All courses taken abroad must be approved by the department in order to be counted toward the major or minor. A course syllabus is required for major/minor approval. This syllabus must include the writing requirements for the course, and courses cannot be approved without this information. Please note that the number of credits awarded per course is determined by the Office of International Programs.

Students may study abroad for either or both semesters but must contact Marla DeRosa, Assistant to the Chairperson, Stokes S493, when planning their study abroad.

Honors Program

The English Department offers an honors program for English majors. Students admitted to the program will write an honors thesis senior year, either a critical study or a creative project, for 6 credits total toward the major. Students contemplating an honors thesis are encouraged to take a seminar during their junior year. A description of this program is available on the department website.

B.A./M.A. Program

The English Department at Boston College offers a B.A./M.A. Program that allows selected students to earn both a B.A. and an M.A. in English in five years. Enrolled students will start earning graduate credit as a senior, then complete the M.A. in a fifth year of full-time study.

Requirements

Admission to the program requires a GPA of 3.3 overall and 3.6 in the English major. Students may count four courses taken in the senior year toward their M.A. degree. These courses may be graduate courses, or undergraduate courses designated as “seminars.” At least two of the four must be at the graduate level, including hybrid graduate/undergraduate seminars; up to two of the four may be undergraduate courses designated as “seminars.” The two graduate courses must be taken as overloads, and these count toward the M.A. degree only. The other two courses will count toward both degrees. One of the graduate courses taken in the senior year must be Introduction to Advanced Research or Issues and Methods in American Studies. One of the courses counting for both degrees may be an undergraduate course designated as a “seminar” which was taken before the senior year for a grade of A or A-.

The purpose of the program is to allow students a greater opportunity for concentrated study and research training. Students in the B.A./M.A. program must meet all the specific course requirements for the undergraduate major as well as the formal requirements for the M.A., including the completion of Introduction to Advanced Research or its equivalent, demonstrated proficiency in a foreign language, a theory course, and a comprehensive exam.

Students interested in the program should consult the Director of the M.A. Program, to discuss whether this version of the M.A. is right for their individual goals. The Director will review the student's academic record and, if appropriate, facilitate the application process. The application fee and GRE requirement will be waived. Once accepted into the B.A./M.A. program, students will have the Director of the M.A. Program as their advisor. Students in the program will not be eligible for TF/TA positions or graduate financial aid. Students in the program will not be charged graduate tuition for the two overload graduate courses taken in the senior year.

How to Apply:

Students must submit applications by March 31 of the junior year. The required application materials are a personal statement, a writing sample, three letters of recommendation, and an official transcript. Please take a look at www.bc.edu/bc-web/schools/mcas/graduate/admission.html for application instructions and e-mail gsasinfo@bc.edu with any questions on how to upload materials.
Environmental Studies

Learning Outcomes

The Environmental Studies Program offers an interdisciplinary curriculum to students interested in perspectives on sustainability from faculty and courses across the university. Both a major and a minor are available to qualified students. The goals of the major are to provide students with:

● the knowledge and perspective to cultivate rewarding lives as responsible citizens of the planet;
● a deep understanding of the scientific, political, and cultural aspects of the world's environmental challenges;
● the tools and creativity necessary to envision and implement paths to sustainable solutions; and
● a solid background for environmentally related graduate programs and/or careers in business, education, law, policy, planning, government, or research.

Applying for the Environmental Studies Major

Students are admitted into the Environmental Studies major by application at the end of the freshman year. Acceptance is determined by the Steering Committee of the Environmental Studies Program, which includes faculty drawn from many departments and an associate dean from the Morrissey College of Arts and Sciences. Criteria for admission include academic achievement and a personal statement.

The deadline for submitting applications is the last day of classes, at the end of students’ first year. The application form may be found at Apply for the Major page.

Major Requirements

The ENVS major consists of a minimum of 43 credits, equivalent to at least 14 full-semester courses, as detailed below. ENVS students may choose more than one major, but at least 27 credits for the ENVS major must not be used to fulfill requirements for another major or minor (i.e., 16 credits can be shared). Note that all Boston College majors require at least 27 unique credits, so the number of credits that can be shared will be fewer for majors that require fewer courses, such as most departmental majors (i.e., if a major requires 30 credits, only 3 can be shared).

A. Environmental Studies introductory seminar ENVS1100 (1 credit)

This seminar is offered in the fall semester for the new cohort of ENVS majors (sophomores). It involves readings of classic texts in environmental studies, and it is similar in structure to Cornerstone courses.

B. Eight credits of Environmental Systems courses: EESC2201 Environmental Systems: The Human Footprint plus three of any of the following courses (and labs EESC2211–2218):

● EESC2202 Environmental Systems: Ecosystems
● EESC2203 Environmental Systems: Water Resources
● EESC2204 Environmental Systems: The Critical Zone
● EESC2205 Environmental Systems: Climate Change
● EESC2206 Environmental Systems: Oceans
● EESC2207 Environmental Systems: Earthquakes
- EESC2208 Environmental Systems: Quantitative Methods

These are a series of 2-credit half-semester courses that introduce students to the basic concepts of environmental science from a variety of perspectives and professors, with the specific goal of providing students with a foundation for further interdisciplinary study of environmental issues. Students can take one or more of these courses in any given semester. Approved substitutions include: EESC1167 for EESC2201, EESC1170 for EESC2203, EESC1174 or EESC1505 for EESC2205, and EESC1157 for EESC2206.

C. 9 credits of foundation courses in environmental studies: ENVS3360 Research Methods in Environmental Studies plus another environmental course in the social sciences or humanities

- ENVS3360 Research Methods in Environmental Studies
- HIST2406 U.S. Environmental History, HIST4701 Ecological History of the Atlantic World, or HIST1710 Nature and Power: Modern World
- SOCY3562 Environmental Sociology

D. 18 credits in a concentration:

Food and Water Sustainability

- Two of:
  - EESC3310 Agroecology
  - ENVS3315 Sustainable Agriculture
- One of:
  - EESC1170 Rivers and the Environment
- One of:
  - EESC2297 Environmental Hydrology
  - EESC4400 Geomorphology and Landscape Change
  - EESC4457 Watershed Science
  - EESC5535 Coastal Processes
- One of:
  - HIST2044 A Material and Cultural History of Food in China
  - HIST4254 Century of Famine
  - HIST4702 Feast or Famine? Food and the Environment
  - HIST4703 Environmental Histories of Water
- One of:
  - ARTS2207 Urban Design for Complexity and Sustainability
  - ENVS3345 Environment and Public Health
  - ENVS3355 Sustainable Cities
  - PHIL5534 Environmental Ethics
  - THEO2231 The Bible and Ecology
  - THEO5429 Theology and Ecology

Climate Change and Societal Adaptation

- One of:
  - EESC1174 Climate Change and Society
  - EESC1501 Global Implications of Climate Change (for freshmen only)
- One of:
  - HIST1505 Planet in Peril (for freshmen only)
  - HIST1507 Powering America: Energy, Tech, Environment (for freshmen only)
  - HIST1842 Atlantic World and Environmental Change
  - SOCY1031 Society and Environmental Transformations
  - SOCY1501 Global Implications of Climate Change (for freshmen only)
  - SOCY1509 Planet in Peril (for freshmen only)
- Two of:
  - EESC4400 Geomorphology and Landscape Change
  - EESC4440 Global Biogeochemical Cycles
  - EESC4457 Watershed Science
  - EESC4462 Paleoclimate Dynamics
  - EESC4463 Paleoclimate Proxies
  - EESC5535 Coastal Processes
  - EESC5599 Climate Change Debates
- Two of:
  - ARTS2207 Urban Design for Complexity and Sustainability
  - ECON3391 Economics of Energy and the Environment
  - ENVS3340 Alternative Energy
  - ENVS3355 Sustainable Cities
  - INTL2260 International Environmental Science and Policy
  - PHIL5515 How to Save the World: Ethics of Climate Change
  - POLI2531 Energy Politics in U.S., Comparative and Global Perspective

**Environmental Health**

- One of:
  - ENVS3345 Environment and Public Health
- One of:
  - PHIL5534 Environmental Ethics
  - THEO3223 The Ethics of Global Public Health and the Common Good
- One of:
  - NURS3210 Contemporary Issues in Public Health
  - NURS5345 Global Health Perspectives
  - NURS5350 Global Health Care: Meeting Challenges and Perspectives
- One of:
  - BIOL2240 Race, Disease, and Disparities
  - BIOL2320 Case Studies in Epidemiology
  - BIOL5130 Environmental Disruptors of Development
  - PHCG2120 Introduction to Epidemiology
- One of:
  - AADS4485 History of Medicine and Public Health
  - HIST2431 Leeches to Lasers: Medicine and Health in the U.S.
  - HIST4741 Opium Past and Present
- One of:
Environmental Justice and Policy

- One of:
  - SOCY1071 Global Inequalities
  - SOCY1501 Global Implications of Climate Change
  - SOCY1711 Social Inequality in America

- One of:
  - SOCY3346 Environmental Justice
  - SOCY3370 Gender, Health, and Inequality

- One of:
  - ENVS/UNAS2256 Environmental Law and Policy

- Two of:
  - POLI2531 Politics of Energy and Climate in U.S. and International Perspectives
  - POLI2446 Natural Resource Politics
  - POLI2441 Comparative Politics of Development

- One of:
  - INTL2440 Poverty, Human Rights, and the Environment
  - INTL2260 International Environmental Science and Policy
  - INTL2533 Global Climate Politics

Environmental Entrepreneurship

- One of:
  - HIST2703 Is All Commerce Capitalism?
  - HIST2702 Colonial Pasts/Global Presents
  - HIST5403 U.S. Energy History
  - PHIL5901 The Ethics of Capitalism

- One of:
  - SOCY1040 Global Sociology
  - SOCY5557 Sociology of Development
  - SOCY5559 Economic Sociology

- One of:
  - ECON1131 Principles of Macroeconomics I/Microeconomics

- Two of:
  - ECON2278 Environmental Economics or ECON2277 Environmental Economics and Policy
  - ECON3391 Economics of Energy and the Environment

- One of:
  - ISYS3345 Managing for Social Impact and the Public Good
Biodiversity Conservation

● One of:
  ○ ENVS3365/SOCY3364 Human-Wildlife Conflicts and Coexistence
  ○ SOCY3360 Animals and Society
● Two of:
  ○ BIOL1520 Biodiversity Connections: Biodiversity, Humans and Environment
  ○ BIOL1440 Sustaining the Biosphere
  ○ BIOL2010 Ecology and Evolution
● One of:
  ○ BIOL4030 Deep Sea Biology
  ○ BIOL5050 Evolution and Development
  ○ BIOL4450 Behavioral Ecology
● Two of:
  ○ ENGL1721 Finding the Animal
  ○ ENGL2202 Beast Literature
  ○ HIST4222 How Animals Saved the World
  ○ PSYC1092 Humans and Other Animals: Mental Life
  ○ THEO2231 Bible and Ecology
  ○ THEO3223 The Ethics of Global Public Health and Common Good
  ○ UNAS1703 Humans and Other Animals: Changing Perceptions

E. At least 3 credits of environmental studies electives

Please see our current elective offerings, which include all Earth and Environmental Sciences courses, as well as more than 30 other options.

F. Senior Research Seminar (ENVS4941–ENVS4942; 4 credits; 2 credits per semester for both semesters)

The senior seminar involves a combination of discussions of key readings in ENVS, guest speakers, team research projects focused on solving real environmental problems, and engagement with communities beyond the BC campus. Alternatively, students can request to fulfill this requirement via a two-semester (6 credits) senior thesis (ENVS4951 and ENVS4952) or senior honors thesis (ENVS4961 and ENVS4962).

Minor Requirements

The ENVS minor consists of 20 credits, with at least 15 credits being used solely for the ENVS requirements.

A. EESC2201 Environmental Systems: The Human Footprint (plus lab EESC2211; two credits)

B. One of the following courses (plus lab EESC 2212-2218; two credits):
C. Two foundation courses (six credits)

One in research methods:

- ENVS3360 Research Methods in Environmental Studies

One in the social sciences or humanities:

- ECON2277 Environmental Economics and Policy or ECON2278 Environmental Economics
- ENVS/UNAS2256 Environmental Law and Policy
- HIST2406 U.S. Environmental History
- HIST4703 Environmental Histories of Water
- INTL2260 International Environmental Science and Policy
- MGMT2145 Environmental Management
- SOCY1031 Society and Environmental Transformations
- SOCY2200 Statistics (or a different statistics course)
- SOCY3562 Environmental Sociology
- PHIL5534 Environmental Ethics
- Core Courses Open Only to First Year Students:
  - SOCY1501 Global Implications of Climate Change
  - SOCY1509 Planet in Peril: History and Future of Human Impacts

D. At least 7 credits (two or more courses) of electives.

Only 3 credits can be from courses numbered 2000 and below. At least 3 credits must be from courses numbered 3000 and above.

E. ENVS4943 Environmental Seminar, a 3-credit senior seminar offered every spring semester

To register for the minor, contact the Environmental Studies Program at envstudies@bc.edu, or stop by the program office in Devlin 213. For more information see the program website at envstudies@bc.edu.

Information for First Year Students

First-year students who are considering applying to become Environmental Studies majors should consider taking the following courses:
Environmental Systems: The Human Footprint (EESC2201 and lab EESC2211), as well as one or more of other the Environmental Systems courses (EESC2202–EESC2208 and labs EESC2212–EESC2218).

- University Core courses with an environmental focus.

Information for Study Abroad

ENVS majors are encouraged to take advantage of study abroad opportunities. Studying outside of the U.S. provides a global perspective on environmental and sustainability issues and educational opportunities not available at BC. ENVS students are allowed 3–6 credits (two courses) per semester abroad to count toward the major (or minor) requirements. If a student is doing a program specifically designed for Environmental Studies, more than 3–6 credits may be approved.

For further information see the program website at [www.bc.edu/envstudies](http://www.bc.edu/envstudies), contact the Environmental Studies Program at envstudies@bc.edu, or stop by the program office in Devlin 213.

History

The Department of History offers the undergraduate student a variety of courses in American, European, African, Asian, Latin American, and Middle Eastern history. History majors and minors can work with faculty advisors to develop a sequence of courses that will prepare them for careers in a vast array of fields, including law, government, foreign service, public policy, international affairs, journalism, business, and teaching.

Major Requirements

In addition to the two-semester (6-credit) University Core sequence in history (History I + History II, selected from the 1000-level HIST courses), a History major is required to complete at least 30 additional credits in history, including the following: a two-semester (6-credit) sequence in U.S. History (HIST2401 and HIST2402); 3 credits of The Study and Writing of History (selected from 3000-level HIST courses and preferably taken during sophomore year); at least 6 credits in LAMA (Latin American, Asian, Middle Eastern, African) history; and at least 12 credits of upper-division electives (4000-level HIST courses). All students who are not writing a senior Honors thesis in history must take three of their upper-division credits in the form of a Senior Colloquium (HIST5001–5499).

Students planning to major in history are strongly encouraged to take the University History Core in their freshman year. A score of 4 or 5 on the Advanced Placement test in European or World History fulfills the two-semester (6-credit) University Core requirement in history. Students who score 4 or 5 on the A.P. test in American history have fulfilled the two-semester (6-credit) U.S. History requirement and may substitute 6 credits of U.S. History electives (any level) instead.

Of the 30 required credits for the major, students may take a maximum of 12 credits abroad, no more than 6 of which may be upper-division credits. Likewise, students may earn a maximum of 6 credits for the major through summer school. However, at least 18 credits, including The Study and Writing of History and 6 of the upper-division credits, must be taken at Boston College during the regular academic year.

Minor Requirements

The History minor requires six courses worth at least 18 credits. It begins with the two Core courses in history and concludes with two upper-division electives (numbered HIST4001–4962) worth at least 6 credits. In between, students can choose two other courses (worth at least 6 credits) freely from among the Department’s offerings. Because many Core courses emphasize Europe, students minoring in history are strongly encouraged to take at least one course in non-Western history. Advanced placement credit cannot be used to satisfy minor requirements, but students who have fulfilled the History Core through advanced placement may substitute two electives (worth at least 6 credits) in order to complete the required six courses (and 18 credits).
Beginning with the Class of 2024, the History minor will consist of 5 courses worth a total of 15 credits: two 2000-level electives and two 4000-level advanced electives plus one LAMA (Latin American, Asian, Middle Eastern, African) history course at either the 2000- or 4000-level. Core courses will no longer satisfy minor requirements.

Information for First-Year Majors and Non-Majors

The University History Core requirement is a two-semester sequence in history from late medieval times to the present. Every student must take two halves of a sequence: History Core I, which covers c. 1500–1800; and History Core II, which covers 1800 to the present. Although students are encouraged to take both halves in the same sequence, switching to a different sequence at midyear is permitted.

History Core courses examine the complex historical processes that lie behind modern-day transnational relationships, values, and ideas. They introduce students to key historical concepts, methods, and controversies and examine how present-day concerns shape our understandings of the past. Covering several centuries of time, all History Core courses trace the political, social, economic, and cultural changes that created the modern world. As part of the Core Curriculum, these courses seek to broaden students’ intellectual horizons by exposing them to new places, periods, and perspectives. Through the History Core, students will learn how to (1) use primary sources to interpret the past, and (2) explain change over time.

Taught by historians who specialize in distinct areas, eras, and approaches, History Core courses vary in their emphases on different parts of the world. The History Core currently includes courses focused on Asian, Atlantic, European, Latin American, and global experiences. Students should read the descriptions of the department’s Core offerings to find the choice that best suits them.

Detailed information on Advanced Placement and the Core may be found on the department’s website. Students who would like to apply foreign study courses for Core credit must get permission from the Director of the Core, and they are strongly urged to do so before going abroad. In order for a course taken abroad to fulfill the History Core requirement, it must cover the time periods outlined above (c. 1500–1800 for History Core I, and 1800 to the present for History Core II) and examine more than one country, surveying historical developments in a global or world-regional framework. Similar guidelines apply to summer classes and courses transferred from a previous institution. At least one of the Core courses must be taken at Boston College.

For further information about the History Core, please visit Core Requirements page.

Information for Study Abroad

Many History majors and minors profit greatly from spending part or all of their junior year abroad. History majors may take as many as four courses (12 credits) abroad for major credit (and a maximum of two courses—6 credits—for upper-division credit), although six history courses (18 credits) beyond the Core, including The Study and Writing of History, must be taken at Boston College during the regular academic year. History minors may take as many as two courses (6 credits) abroad for minor credit, including one upper-division course worth 3 credits.

Students seeking major or minor elective credit need only show that they passed a course offered in a history department. Typically, the department does not give upper-division credit for history courses taken abroad. Students seeking upper-division credit should present the course syllabus and the paper(s) written for the course to the Director of Undergraduate Studies after they have completed the course. In spite of the limitations on courses accepted for major credit, students who have gotten a good start on Core and major requirements before leaving for study abroad should have no trouble completing them, even if they spend an entire year abroad. Students should complete the Study and Writing of History requirement before studying abroad.

Students who are contemplating a senior Honors thesis and who will be abroad during the normal application process in the spring of their junior year are strongly urged to plan ahead. They should try to establish a thesis topic and to identify a faculty member willing to supervise their work before departing and verify that they will be able to be in e-mail contact with their thesis advisor while abroad. They should be aware that the deadline for submission of applications is April 1 of their junior year. For additional information, they should consult with the director of the History Honors Program early in the semester prior to their departure for study abroad.
For additional information on foreign study for history majors, please visit the Foreign Study page.

For more information on the application of these guidelines to the history minor, please visit Minor in History page.

If you have further questions about your study abroad or the History Honors Program, please contact Professor Arissa Oh, Director of Undergraduate Studies, at 617-552-3799 or by e-mail at ohac@bc.edu.

Honors Program (MCAS)

The class of 2021 will be the last group of students to graduate from the Honors Program.

The Structure of the Honors Program

Senior Year

In their final year, students may choose either of two ways to finish the Honors curriculum. They may either write a senior thesis—normally a 6-credit enterprise, spread over two semesters—or take two advanced seminars.

A thesis may be an extended research or analytical paper written either in the student's major discipline or in the Honors Program; it may also be a creative project involving performance in an artistic medium. Honors students have written on topics as diverse as personalism in the summas of St. Thomas, grace and freedom in Dostoevsky, the role of Buddhism in the works of Jack Kerouac, the political organization of the European Community, the influence of alcoholic fathers on their sons, superconductivity, and original cancer research; they have produced novels, dramas, operas, and electronic performance pieces.

In the integrative, advanced seminars students re-consider texts they may have studied years earlier such as Dante’s The Divine Comedy or the novels of Dostoevsky with the aim rising above the specialization of their particular majors to critically comprehend the relationship between contemporary ways of thinking and the cultural values of the tradition.

Honors Program Completion

Students will receive Honors Program designation in the commencement program and on their academic records if they complete the freshman, sophomore, and junior courses, a senior thesis and/or two of the advanced seminars, and have maintained a minimum 3.4 GPA.

Information for Study Abroad

The Honors Program encourages students to study abroad. Depending on the student's situation, the Honors Program will defer part or all of the junior year Twentieth Century and Tradition sequence to senior year. In certain cases (a full year abroad and a senior thesis in the offing) the Honors Program will drop the requirement altogether.

Interdisciplinary Programs and Minors (MCAS)

In addition to the areas of major study offered by individual departments, a variety of special programs are available. All of them are designed to provide a coherent grouping of courses drawn from various disciplines and focused around a specific theme. Through such programs, a student can integrate or enrich an academic program through completing a minor or developing an independent major.
Independent Major

Under usual circumstances, students are advised to follow the formal educational programs offered by departments. In rare instances, for students with special interests that cannot be satisfied in a regular major, double major, or a combined major and minor, the Educational Policy Committee will approve an interdisciplinary Independent Major. Students who wish to apply for an Independent Major must normally have achieved a minimum 3.5 GPA. The student must plan, with the aid of a faculty advisor, a program of 36 credits (ordinarily twelve courses), thirty of which must be in upper-division courses. These will extend over no more than three departments and will be selected in accordance with a clearly defined unifying principle. This program should be equal in depth and coherence to a typical departmental major and should include a plan for a final project or paper that demonstrates the intellectual coherence of the Independent Major and for ongoing assessment of the program by the student and the advisor. Each proposed major should be submitted to the Dean's Office before March 1 of the student's sophomore year. The Dean will then present it to the Educational Policy Committee for approval. An Independent Major will ordinarily be the student's only major.

Interdisciplinary Minors

An interdisciplinary minor in the Morrissey College of Arts and Sciences must consist of at least 18 credits (typically six, 3-credit courses) and must include either a required introductory course or a concluding seminar or project. (Note: some programs require both.) The minor should aim for a coherent form appropriate to the subject matter and offer courses that give students a definite sense of movement—from a beginning to a middle and an end, from introductory to advanced levels, or from general to specialized treatments.

Students must select at least three of the courses from three different Morrissey College of Arts and Sciences departments. With the approval of the program, students may use one Core course or one course from their major toward the minor (not both). In addition, at least 15 credits used for the minor cannot be used toward any other major or minor. For specific program requirements see the individual program descriptions below. Students carrying a double major are advised not to minor.

Each minor will be administered by a coordinating committee, consisting of a Director appointed by the Dean and at least two additional members who represent departments included in the minor. One important function of this committee is the advising of students enrolled in the minor.

African and African Diaspora Studies

The African and African Diaspora Studies Program (AADS) considers the history, culture, and politics of Africans on the continent and African-descended peoples in the U.S., the Caribbean, South America, Europe, Asia, and the Middle East. Covering vast historical periods and geographies, AADS acquaints students with the multiplicity and diversity of the African Diaspora and the world in which we all live. Using interdisciplinary and comparative approaches, the program draws on a broad range of methodologies in English, history, sociology, philosophy, theology, communication, and theater.

For more information on the African and African Diaspora Studies program, visit the following:

- African and African Diaspora Studies catalog web page
- or the African and African Diaspora Studies website

American Studies

American Studies is an interdisciplinary program that brings together faculty from various departments to teach a wide range of approaches to American culture past and present. Thematic emphases include race and ethnicity; gender, sexuality, and culture; cultures of cities; society and subcultures; popular culture and media; law, politics, and culture; and America and the world.

The program is directed by Christina Klein of the English Department. Participating faculty come from English, History, Art History, Sociology, African and African Diaspora Studies, and Political Science, among other departments.
Eighteen credits are required for the minor. All students must take ENGL2277 Introduction to American Studies when beginning the minor and ENGL5513 American Studies Senior Seminar during their senior year. In addition, nine credits must be clustered in a common area of concentration chosen by the student in consultation with the director or assistant director. Courses used for fulfilling the minor must come from at least two different departments outside the student’s major.

For further information on the American Studies minor, e-mail american.studies@bc.edu, or visit the American Studies website at www.bc.edu/amstudies.

Ancient Civilization

The interdisciplinary minor in Ancient Civilization introduces students to the history, literature, art, philosophy, and culture of ancient Greece and Rome. Students explore the world of the Greeks and Romans by reading primary texts in English translation and by studying their art and archaeological remains. Studying the Latin or Greek languages is not required. The minor consists of six courses (18 credits or more), two required and four electives:

- 3 credits in Greek History or Civilization and 3 credits in Roman History or Civilization, drawn from the following list. These courses, offered every other year, serve as a general overview of the field and an introduction to the minor.
  CLAS2205/HIST2201 Greek History OR CLAS1186 Greek Civilization
  CLAS2206/HIST2205 Roman History OR CLAS2262/ARTH2262 The City of Rome
- 12 other credits, chosen after consultation with the director, from available offerings in Classics and other departments in the areas of literature, philosophy, religion, art and archaeology, history, and linguistics; however, courses in the Greek and Latin languages do not normally count for the minor.

A list of the courses that are available each semester from the various departments and that can count for the minor will be published at registration time. Interested students should contact Professor Mark Thatcher of the Classical Studies Department, Stokes Hall 245S, 617-552-1807, or visit the Classical Studies website at www.bc.edu/classics.

Asian Studies

The Asian Studies program offers students a rich curriculum in the arts and literatures, history, philosophy, religion, and contemporary affairs of East Asia, South Asia, and Central Asia. It rests on three pillars:

- an emphasis on regional and transnational relations
- the integration of different disciplinary approaches
- language study

Students take a minimum of 18 credits to fulfill the minor, 15 of which may not simultaneously be counted towards the Core or other major/minor requirements. The minor begins with an introductory survey course on Asia as a world region from the vantage point of a particular discipline (such as art, literature, history, or philosophy) and concludes with a senior capstone course that approaches a particular topic relevant to the study of Asia from an interdisciplinary perspective. Along the way, students have ample opportunity to hone their interdisciplinary skills and global outlook through a wide range of lower and upper level electives involving different departments. Although no more than an intermediate proficiency in an Asian language is required (the same as the University Core requirement), further language study is encouraged. All minors must meet with the Director when they declare their minor, typically in their sophomore year. They must also meet with the Director prior to choosing the senior capstone course.

Summary of minimum requirements (18 credits):

1. Introductory course on Asia as a world region (3 credits)
2. Intermediate proficiency in an Asian language (3 credits)
3. Two to four electives (6–12 credits) from the list provided
4. Senior capstone course (3 credits)

Students are invited to take full advantage of the Distinguished Lectures Series in Asian Studies as well as other Asian Studies-sponsored campus events and are encouraged to study abroad in Asia. Our faculty provide many different resources related to advising, scholarships, and internship opportunities.

For further information, consult the Asian Studies website, contact the director at asian.studies@bc.edu, and follow us on Facebook.

Catholic Studies

The interdisciplinary minor in Catholic Studies at Boston College seeks to develop an intellectual and academic approach to Catholicism which does justice to the full human reality, integrity, and pluralism within this major world religious tradition. Since Catholicism comprises more than a religious institution, a set of moral or ritual practices, a body of doctrines, or individual and communal experiences, no one discipline or several disciplines functioning separately can properly understand it from the vantage point of its lived experience as a culture.

The Catholic Studies minor provides students with the opportunity to explore the Catholic intellectual tradition. The minor emphasizes the richness of Catholic philosophical and theological systems, artistic and cultural expressions, historical evolution (including internal and external moments of contestation), and approaches to social analysis, economic systems, and the natural sciences, in order to appreciate the vision and values which emerge from this tradition.

Requirements:

Six approved 3-credit courses or a total of 18 credit hours:

● 18 credit hours selected from the three Catholic Studies clusters: The Catholic Imagination, Catholicism in Time and Space, and Catholic Social Thought.
● Upon petition, electives and other courses may be counted for the minor if the major research paper course is completed on a Catholic topic.
● In many cases, electives and other required courses can be petitioned for inclusion in the Catholic Studies Interdisciplinary minor based on the Catholic content of the course.
● Students are strongly encouraged to take THEO1401 Engaging Catholicism, which will count towards their Christian Theology (CT) credit in Core theology. THEO1401 is a 3-credit course and will count for Core theology credit as well as the “basis course” for the Interdisciplinary Minor in Catholic Studies.
● Depending upon enrollment numbers in the minor, a concluding 3-credit research seminar will be offered which will focus on texts dealing either with the enculturation of Catholicism in different geographical/regional locations (e.g., Asia, Latin America, Africa, Oceania, Irish-American, Italian-American, Latino/a, Black, and Amerindian), or a Catholic theme that is approached from several disciplinary perspectives and across historical periods (e.g., Catholic practices of asceticism in art, music, literature, and theology). This seminar will offer the student the opportunity to research, write, and present a senior project that thematically integrates what has been learned in the minor. The seminar is facilitated by a member of the Catholic Studies advisory committee. It is envisioned that the seminar presentations will become an occasion for creating intellectual community among Catholic Studies minors and faculty advisors.

Further information is available from the Director, Professor Charles R. Gallagher, S.J., Department of History, Stokes Hall S353, 617-552-0726, or the Catholic Studies website.

East European Studies

The minor in East European Studies encompasses faculty and courses from across the University and spans the entire region east and southeast of western Europe, from central and eastern Europe to southeastern Europe, Russia, Ukraine, Belarus, the
Caucasus, and Siberia. The minor in East European Studies concentrates on the multilingual, multicultural, and multi-religious legacy of Slavic and Eastern European nations and countries. Students who complete the minor will work toward proficiency in a Slavic and/or East European language related to the region and attain valuable knowledge, experience, and professional skills. The Program prepares students for careers in diplomacy, journalism, law, military, business, government, and social service, as well as graduate, academic, or professional study.

Further information is available from the Director, Professor Maxim D. Shrayer, Slavic and Eastern Languages Department, Lyons 210, (shrayerm@bc.edu). Students may also consult the Program’s website at www.bc.edu/ees.

**Environmental Studies**

The Environmental Studies minor uses an interdisciplinary approach to understand the science and policy of the Earth’s environmental challenges and is designed to complement any undergraduate major.

The goals of the Environmental Studies minor are to provide undergraduate students with: (1) an awareness of the scientific, political, and cultural aspects of the world’s environmental problems and potential paths toward sustainable solutions; (2) a background for environmentally related careers in business, education, law, policy, or research; and (3) preparation for graduate study.

For more information on the Environmental Studies program, visit the following:

- Environmental Studies catalog web page
- or the Environmental Studies website

**Faith, Peace, and Justice**

The Faith, Peace, and Justice minor offers students the opportunity to explore, in an interdisciplinary manner, how their own serious questions about faith, peace, and justice are related to concrete work for peace and justice in our world. The goals of the Faith, Peace, and Justice Program are to (1) help undergraduate students acquire skills in the social scientific analysis of challenges for justice and peace, (2) gain a solid grasp of the ethical principles and theories of justice that pertain to these issues, (3) become agents of social change that know how to formulate public policy or transform unjust structures in order to solve these problems, and (4) implement creative methods for conflict resolution appropriate for their particular issues.

To achieve these goals, each student is required to take the introductory course for the minor, THEO2160/PHIL1160 The Challenge of Justice and, in the second semester of their senior year, UNAS4942 Faith, Peace, and Justice Senior Seminar. In addition, the student selects or develops an area of concentration focused on a particular concern for justice and peace. With the advice and approval of the Faith, Peace, and Justice Director, the student takes a cluster of four elective courses, from at least three different academic disciplines, that addresses the area of concentration. These four elective courses serve as the foundation for the student's writing project in the FPJ Senior Seminar. In total, eighteen credit hours are required for the minor.

For further information or to register for the Faith, Peace, and Justice minor, see the Director, Professor Joshua R. Snyder, Ph.D., Stokes 453N or visit the program website at www.bc.edu/fpj.

**German Studies**

The interdisciplinary minor in German Studies is one of two minors offered by the Department of German Studies. This program aims to provide a comprehensive understanding of German-speaking civilization and its place in today's world. Students choose the interdisciplinary minor for its flexibility in taking courses tailored to their interests across departments and may complete the entire minor with courses taught in English. German Studies minors are eligible to apply for popular internships, which place Boston College students with companies in Germany or Austria every summer.
For more information on the minor in German Studies program, visit the following:

- Eastern, Slavic, and German Studies catalog web page
- or the Eastern, Slavic, and German Studies website

**International Studies**

The International Studies Program offers a flexible and rigorous interdisciplinary undergraduate major and minor in the Morrissey College of Arts and Sciences that develops keen analytical skills and ethical reasoning amidst complex global dynamics.

For more information on the International Studies program, visit the following:

- International Studies catalog web page
- or the International Studies website

**Irish Studies**

Founded in 1978, the Irish Studies Program provides an interdisciplinary approach to the study of Irish culture and society. Our faculty includes internationally recognized scholars whose influential publications and professional commitment distinguish them as leaders in the field of Irish Studies. Undergraduate and graduate courses alike address social and economic history, literature, art, film, music, and the Irish language. The Irish Studies program also offers extensive public programs including a comprehensive lecture, symposia, and renowned music series. Faculty routinely collaborate with the McMullen Museum to present groundbreaking exhibits and have developed public programming, as well as undergraduate and graduate seminars, to complement exhibits.

Students must successfully complete 18 credits in approved Irish Studies courses, which must be drawn from more than one discipline and designated as appropriate by the Irish Studies program advisor. Only one course may be "double counted" toward both a major and minor.

Please contact Irish Studies at 617-552-3938 to arrange curriculum planning assistance. A listing of Irish Studies-approved courses is posted on the Irish Studies Courses web page.

Students pursuing the minor are encouraged to take advantage of partnerships that the Irish Studies program and the Center for International Programs have forged with the National Universities of Ireland at Galway and Maynooth, University College Cork, University College Dublin, Trinity College Dublin, the University of Ulster, and Queen’s University Belfast. It is important to note that only two courses taken abroad in any given semester may be applied to the Irish Studies minor.

Contact: Professor Robert Savage, Interim Director of Irish Studies, robert.savage@bc.edu.

**Islamic Civilization and Societies**

This program emphasizes the interdisciplinary study of the Middle East and Muslim world from the rise of Islam in the seventh century to the present. Through a sequence of courses, it offers preparation in Middle Eastern and Islamic Studies useful to careers in journalism, diplomacy, business, and social service as well as graduate programs of academic and professional training. Courses cover the social, economic, political, cultural, and religious heritage as well as contemporary developments in their regional and world settings.

Students interested in the program should contact Professor Kathy Bailey, Political Science Department, McGuinn 529, 617-552-4170 or Kathleen.Bailey@bc.edu, or Professor Ali Banuazizi, Political Science Department, McGuinn 513, 617-552-4124, or visit www.bc.edu/ics.
Jewish Studies

The Jewish Studies Program seeks to examine the multiple dimensions and complexities of Jewish civilization throughout its broad chronological and geographical range. In so doing, the program contributes to Boston College's efforts to internationalize and enrich its curriculum by creating a space for reflection on an ethnically and religiously diverse campus. Far from being a parochial field, Jewish Studies is a well-established academic discipline, drawing upon almost every area in the humanities and social sciences in order to understand the myriad expressions of Jewish civilization over the course of thousands of years and in every corner of the globe.

The minor in Jewish Studies consists of a total of six 3-credit courses, including one foundation course, four electives selected from at least three departments within the Morrissey College of Arts and Sciences, and a concluding seminar/Capstone course.

Although the minor in Jewish Studies has no specific language requirement, students are encouraged to take as many courses as possible in biblical and modern Hebrew; however, a maximum of 6 credits in Hebrew language may be applied to the minor. Students may participate in Boston College's study-abroad program at The Hebrew University in Jerusalem. They may also avail themselves of summer programs in Yiddish and Judeo-Spanish.

For additional information or to sign up for the minor in Jewish Studies, contact the program co-director, Professor Donald Fishman, Department of Communications, St. Mary’s Hall 454, fishmand@bc.edu, or contact the other program co-director, Professor John Michalcyk, Devlin Hall 420, 617-552-3895, john.michalcyk@bc.edu. The Jewish Studies Program Office is located in St. Mary’s Hall 454.

Journalism

The Journalism minor at Boston College is an interdisciplinary program designed to bring the liberal arts into direct, ongoing conversation with the wider contemporary world. Students from all majors and schools are invited to apply to this dynamic minor that combines craft skills with a critical understanding of the history and traditions of journalism.

The six-course minor includes the following:

- Introduction to Journalism, to be taken as early as possible during the course of study;
- One “Craft” course (i.e., Investigative Journalism, Feature Writing, Podcasting);
- One “Critical” course (i.e., News Media & Democracy, Reporting Civil Rights, Narrative Journalism in Peace & War);
- Two additional electives drawn from a mix of “Craft” and “Critical” courses; and
- the Senior Seminar, to be taken in the senior year.

Course offerings reflect our shifting technological and media climate while continuing to develop bedrock reportorial and writing skills: identifying and acquiring reliable information; making analytical, ethical, and technical choices about how best to turn that information into news; and presenting the news in useful, compelling ways. As the program continues to develop the possibilities of its Boston location, forging fresh links between the Boston College campus and the city's international public culture, students will also have more and more opportunities to work with the city's wide array of talented professional journalists, venture out to do original reporting, and intern at a variety of media outlets. Interested students should contact program director, Associate Professor Angela Ards, Department of English, Stokes S443, 617-552-3712, angela.ards@bc.edu.

Latin American Studies

The Latin American Studies program encompasses faculty and courses from across the University. With academic advisement from participating faculty, students can shape the Latin American Studies minor to fit usefully with their academic major and with the ambitions they hope to pursue after graduation. Students may earn a minor in Latin American Studies by completing 18 credits (approximately six courses) from at least three different academic departments, selected from courses approved for the program. Proficiency in Spanish or Portuguese that is equivalent to successful completion of a third-year college language course is
required for the minor (but this course is not counted as one of the above six). With approval from the Director, two courses with focus on Latin America taken in a study abroad program can count toward the minor.

Students seeking to earn a minor in Latin American Studies must submit a proposed plan of study to the Director of the program, usually no later than the second semester of the sophomore year. The Director, in consultation with the student and other faculty in the program, will review the proposal, and notify the student of his/her acceptance into the minor.

For further information contact the Director, Professor Ernesto Livon-Grosman, Communication Department, St Mary’s Hall South 482, 617-552-2680, or visit the Latin American Studies website.

Managing for Social Impact and the Public Good

The Managing for Social Impact and the Public Good minor is sponsored by both the Carroll School of Management (CSOM) and the Morrissey College of Arts and Sciences (MCAS). It draws upon faculty and courses in both schools and is open to all undergraduates. It is the first interdisciplinary minor jointly sponsored by different schools within the university.

In an interconnected world, we are all stakeholders in how business is conducted. Billions of human lives and our planet’s viability depend on whether leaders in the private and public sectors are guided by the principles of sustainability and social justice. The interdisciplinary minor integrates ethical, social, economic, environmental, and management perspectives in analyzing the role of business in society and the challenges of managing private and public institutions for the good of society, both domestic and global.

The minor is an 18-credit program with two required and four elective courses. The required courses are: Managing for Social Impact (BSLW3345 in CSOM), the introductory course to the program, and Leading for Social Impact (BSLW6001 in CSOM), the cumulative seminar course taken in spring of senior year.

Students will select their four elective courses (for a minimum of 12 credits) from approved electives in MCAS, CSOM, and the Lynch School of Education and Human Development. The intro course Managing for Social Impact should be taken prior to taking any of the approved electives. The electives must come from at least three different academic departments, with the Carroll School counting as a single department. Additionally, all electives must also come from one of the three Focus Areas described below.

A course taken during a semester abroad may be approved as an elective counting toward the minor, but such courses must be pre-approved before enrollment if they are to be counted. After a student completes the pre-approval process, credit for courses taken abroad will only be granted upon the student’s return from the program, based on the graded work completed for the course.

Elective courses are grouped into the following Focus Areas:

**Digital Economy, Social innovation, and Citizenship**

Today's global digital economy, in which people, companies, markets, and even machines are constantly connected and communicating, enables innovative social solutions as well as opportunities for rapid growth and expansion of services. Such a setting also presents complex challenges. Expectations about long-term employment, economic security, and personal privacy are shifting with the rise of billion-dollar global firms based on freelance jobs, global social networks, digital media, and data mining. The rights and responsibilities of citizenship, both personal and corporate, are open to debate and radical revision, as are the form of the corporation and the appropriate roles of the public and private sectors in addressing urgent social issues. This focus area prompts students to consider the social impacts of the digital economy on citizenship, equality, personal values, work, privacy, and public policy.

**Economic Development, Equality, and Enterprise**
Citizens of wealthier nations and communities, as well as managers of multinational corporations and local enterprise, need to examine the degree to which their well-being and profitability may rely on the exploitation of natural resources and fellow human beings. Such judgments are difficult without the skills of ethical reflection, social/political/historical/economic analysis combined with research, discussion, and evaluation. This focus area challenges students to move beyond their taken-for-granted assumptions common to life in an economically developed society and to consider models of economic development and enterprise management that provide not only greater material well-being but also more equity and empowerment for individuals and groups in domestic and international settings who are disadvantaged at present.

**Environmental and Economic Sustainability**

With more than 13,000 signatories committed to the principles of a sustainable and inclusive global economy, the UN Global Compact is the world’s largest corporate sustainability initiative. Its mission recognizes the significant challenges facing nations, corporations, and communities in the twenty-first century. It is vital that culturally and economically diverse populations come to terms with the pressing need to organize environmentally sustainable economies at the local community level as well as for the benefit of the entire planet. Sustainable enterprise and economic development require managers in the private and public sector to balance the needs of their diverse stakeholders in an ethically informed manner. This focus area will enable students to analyze the difficult questions of social, ethical, and environmental sustainability and development from multiple disciplines in the sciences, humanities, social sciences, and management.

**Medical Humanities, Health, and Culture**

In the Medical Humanities, Health, and Culture minor, students explore health and health care practices through multiple disciplines, including literature, theology, history, and philosophy, as well as natural and social sciences. From each vantage, humanistic and cultural approaches to health and the body are emphasized. The minor, interdisciplinary in its approach, draws on Boston College’s commitment to social justice, ethics, and care for the whole person. This is a useful program for students interested in careers in medicine, health care policy or law, psychology, public or global health, social work, patient advocacy, or health journalism. It is also helpful for students interested in exploring historical, narrative, and cultural contexts for current (and at times competing) ideas about illness, the body, and representation.

The minor is comprised of 18 credits. Courses (not necessarily in sequence) include a required Introductory course (ENGL2212), four electives from a designated list of approved courses, and a final advanced elective, normally taken in the junior or senior year. In addition, minors will be encouraged to take part in reading groups, film series, conferences, and relevant local events.

Students choose electives from at least three different departments. The following thematic clusters will help students to plan a path through the minor:

- Global/Public Health
- Values and Ethics
- Mind and Body
- Health Care Delivery
- Medical narrative, writing and representation

Students interested in learning more or in registering for the minor should contact the Director, Amy Boesky, in Stokes 437 South or e-mail boesky@bc.edu to set up an appointment.

**Religion and Public Life**

The Religion and Public Life minor will offer students a way to explore and connect diverse conversations about the role of religion in public life. Bringing together a wide array of courses to choose from, the Religion and Public Life minor will have an interdisciplinary emphasis and be composed of six courses, one introductory course and five electives. The introductory course will be a focused and constructive seminar conversation about the various intersections between religion and public life, focusing
on the American context. Listed as a theology course, the introductory seminar, Religion and American Public Life, will be taught by the director of the minor. All students entering the minor will take this introductory course first. During the course, students will meet with the director to determine which elective courses are the best fit for their interests and, if needed, will be connected with another faculty member who will assist in recommending electives. These electives will form a cluster that narrows the focus of the minor to consider the individual student's interests in religion and public life, either within or expanding beyond the American context. This cluster consists of five electives, including at least one advanced elective. An advanced elective is a writing intensive course that should be taken near the end of the student's fulfillment of minor requirements. The elective courses must be chosen from at least two departments outside of theology. When the student has completed all six minor courses, the student will be expected to write a short paper (no more than 1000 words) reflecting on their studies in the minor, the relationship between courses in their cluster and their major, and how what they have learned may impact their future beyond Boston College. Students who have completed the minor will be expected to give a brief presentation of this reflective paper at a spring reception for affiliated faculty, staff, and fellow students involved in the Religion and Public Life minor.

In order to enroll in the minor, students must complete an application process. Any Boston College undergraduate may apply. Ideal students for the minor are high achieving BC sophomores and juniors who are interested in the intersection of religion and public life, would like to be introduced to the study of religion and public life, and are interested in being guided through articulating and exploring their own specific academic and/or professional interest within this broad intersection. The minor includes courses on various religious traditions: Judaism, Catholicism, Islam, etc. Similarly, the minor includes courses under a broad understanding of what we mean by "public life." If selected for the minor, students would also be named as Boisi Center Fellows and would be invited to participate in the Boisi Center's many events.

Overall, the minor will create an atmosphere where students may seriously engage in conversations with each other and with faculty about the pursuit of the common good of a religiously diverse society, the future of engaged citizenship, the religious and theological role of the arts, and the moral consequences of public policies. In doing so, the minor in Religion and Public Life supports Boston College's Jesuit and Catholic commitment to education that shapes the minds and hearts alike for service to the common good, with an eye towards addressing the world's most urgent problems.

Expectations and Requirements

The aims of the Religion and Public Life minor are to form undergraduate students who are able to:

- Understand and narrate the history of religious and cultural interactions across the U.S. historical landscape;
- Speak knowledgeable about what comprises a religiously diverse society—its constructions, conflicts, and common goods—both within the American tradition and in international contexts;
- Understand varying roles of an engaged citizenry and the political consequences of religious associations;
- Ask difficult questions that lead to analyses of the moral consequences of public policies;
- Articulate what the ‘Common Good’ might look like in a pluralistic society.

Students are required to take six courses for the minor, beginning with the introductory theology course, Religion and American Public Life. Each student will work predominantly with the director of the minor and affiliated faculty, as necessary, to design a personalized interdisciplinary course of study comprised of five other elective courses (a "cluster"). The fifth elective in this cluster will be an advanced elective. All courses for the minor must be completed with a grade of "B" or higher.

Course Requirements

Introductory Seminar Course in Religion and American Public Life

Boisi minors are expected to enroll in a one semester, 3-credit introductory seminar. This class will immerse students in the ongoing conversation around the issues, approaches, and texts focusing on religion in America. It is not designed to be cumulative, but instead is an orienting look at relevant issues in religion and American public life, which will spark a more specific interest to be explored by individual students over the course of the minor. During the course of the semester, students will be asked to convene parts of the seminar meeting, offering reflection on their reading and developing interests. Over the course of the seminar students will also begin to formulate a problem that will constitute the core of what they will focus on within the minor as a whole. This could be a focus on religion and politics, religion and the arts, religion and race and/or ethnicity, religion and
government, etc., and it will form the basis for how they will select their later electives. This introductory course will be listed as a theology course, and will always be taught by the director of the minor, Mark Massa, S.J.

Elective Clusters

The elective cluster consists of five courses (15 credits), in addition to the 3 credits already provided by the one semester introductory seminar. These electives must come from at least two different departments other than theology in order to satisfy the requirements for minors at Boston College. The courses students take that comprise a cluster will be decided in conjunction with the director of the minor, and with the input of affiliated faculty as needed. Available courses will vary each year depending on the given year’s course catalog; example clusters are listed below, and some example courses are listed along with affiliated faculty at the end of this document.

Examples of Elective Clusters:

- Religion and the Arts
- Religion and Gender
- Religion and the Environment
- Religion and Technology
- Religion, Culture, and Media
- Religion and Political Philosophy
- Religion and the Social Sciences
- Religion and American Politics
- Religion and International Politics

Advanced Elective

This course is a writing intensive course, which requires more advanced reading and research skills. The specific course will vary each year depending on course offerings, and will be determined by the director in consultation with the board. It will ideally be an advanced undergraduate seminar with a longer final paper requirement.

Application Procedures

Students are eligible to begin applying for the minor at the start of their sophomore year. Students will apply out of interest in the minor, but may also be recommended to apply by their academic advisor. The affiliated faculty of the minor may also recommend students from within their respective departments.

The application requirements include:

- The student's personal information;
- Resume or C.V.;
- A degree audit;
- A 250-word statement of purpose explaining why the student is interested in the minor, and why the student thinks he or she is qualified and a good fit for the minor.

The minor will ideally be comprised of 15–20 students each year, capping at no more than 20 students per cohort.

Boisi Center Access
Because the minor's course of study aligns with the research interests of Boston College's Boisi Center for Religion and American Public Life, students will have access to the resources of the Boisi Center during their studies in the minor. Students will be named as Boisi Center Fellows, and will have contact with speakers, primary access to events, and be able to engage in other specific programs designed especially for students in the minor, including dinner conversations twice a year. As Boisi Center Fellows, students in the minor will be expected to attend at least one Boisi Center event each semester.

Women's and Gender Studies

The Women's and Gender Studies Program is an interdisciplinary forum for the study of women's past and present positions in American society and across a diversity of nation-state, international, and global contexts. Drawing from a broad range of theoretical frameworks and empirical scholarship, Women's and Gender Studies analyzes the intersection of gender with differential identity factors such as race, class, religion, culture, and sexuality. Women's and Gender Studies sheds light on the construction and maintenance of gender ideologies in different environments and locations and considers gender relations a primary factor in our understanding of women’s and men’s statuses and roles. Multiple perspectives and lenses—literary, historical, sociological, psychological, political, activist, popular culturist—are applied to the study of women’s lived realities, representations, histories, oppressions, coalitions, and movements.

The Boston College Women’s and Gender Studies Program encourages diversity and equality in all areas of campus life. Our WGS courses and professors respect differences in background and identity, including differences in race, gender, ethnicity, sexuality, and class.

The WGS classroom environment is inclusive: which means that differences are not ignored, but rather that students can have space to bring their various identities into conversation.

We expect students to honor and respectfully listen to differences that may come up in the classroom setting and to listen and respond to other points of view.

In addition, this means that students have space to bring their various identities into conversation with class material as they find helpful, but are not expected to represent or speak for an entire group of people who share aspects of an identity.

Boston College students may decide to minor in Women's and Gender Studies at any time prior to graduation, provided that the requisite scope and number of courses have been completed with satisfaction.

Required Courses

The following two courses should not be taken in the same semester.

- **ENGL2125 Introduction to Feminisms**
  Cross-listed with HIST2502, SOCY2225. *Minors are encouraged to take Introduction to Feminisms prior to taking other WGS electives.*

- **SOCY5593 or COMM4941 Advanced Topics**
  Always taken as a Senior during Spring semester

Electives

Four electives (12 or more credits) from a variety of departments are required and can be tailored to your own interests.

The following guidelines must be followed:
Guidelines

- No more than two electives (6 credits) can be courses within the same department.
  - Note: Many courses that count for the minor are cross-listed with other departments. To avoid having to select an alternative course, you can select the department from which you wish to register the course. For example, if you have three additional courses from the Sociology department, one may be cross-referenced with the Communications department; therefore, you would register for it as a COMM course rather than an SOCY course.

- Only one course can "double count" toward the WGS minor and another requirement (ex: Core, major, or another minor). Five of the six courses, or 15 out of 18 credits, must only count toward the WGS minor. The Women's and Gender Studies program does not guarantee that one of our courses will satisfy any major/minor requirements in other departments. You are responsible for knowing whether or not your respective department will accept a WGS elective for major credit. Please contact gender@bc.edu if you have any questions or concerns.

For more information on the Women's and Gender Studies Program, visit www.bc.edu/ws or consult the Director of the minor, Professor Sharlene Hesse-Biber, Sociology Department, 617-552-4139, e-mail: hesse@bc.edu.

International Studies

The International Studies Program offers a flexible and rigorous interdisciplinary undergraduate major and minor in the Morrissey College of Arts and Sciences that develops keen analytical skills and ethical reasoning amidst complex global dynamics. Our faculty is drawn from many departments across the Morrissey College of Arts and Sciences. Students in our major take seven IS Core courses and six courses in one of four concentrations, study abroad, and satisfy a rigorous foreign language requirement and complete a senior research project. Students in the IS minor complete six courses in one of four concentrations.

** Please consult the International Studies website for the most accurate and up-to-date information about requirements for the IS major and minor.

Applying to Be an International Studies Major

Students are accepted into the International Studies major only through an online application process. We accept approximately 105 students into the major each year. Applications from freshmen are due the first week of February; applications from transfer students should be made the spring or summer before they enroll as sophomores at BC. Visit the International Studies website for exact dates and more information about the process.

Language Requirement

All students completing the IS major, regardless of school, must demonstrate advanced proficiency in one modern foreign language or intermediate proficiency in two modern foreign languages. All students completing the IS minor must demonstrate intermediate proficiency in a modern foreign language. Visit the International Studies website for more about how to meet these requirements.

Major Requirements

The International Studies major requires at least 13 courses, totaling 45 credits. This includes seven classes (24 credits) in the IS core; six classes (18 credits) in one of four concentrations; and a senior seminar (3 credits) or thesis (6 credits). At least 27 of these credits must be applied exclusively to the IS major and cannot fulfill requirements for another major or minor. Courses to meet the major’s language requirements (noted above) are not included, although they confer university credit and meet the university’s language requirements. Visit the International Studies website for complete details.

The four concentrations available to IS majors and minors are:
Minor Requirements

The International Studies minor requires 6 courses, totaling 18 credits. Students select one of four concentrations (Cooperation and Conflict; Ethics and Social Justice; Political Economy and Development Studies; or Global Cultures) in which they take two foundation courses and four electives, offered from at least three different academic departments. Courses to meet the language requirements (noted above) are not included, although they confer university credit and meet the university’s language requirements. Visit the International Studies website for complete details.

Information for First Year Students

The responses you give on your IS major application are the most important factor we use to admit students into the major, but grades and courses taken your first semester play a role as well. To prepare for your application, we encourage students to read about the IS Program online and talk with current IS majors; you might consider starting with our Peer Advisors or with members of the new International Studies Student Association. We also encourage freshmen to enroll in one or more classes that take up international issues and/or are taught by an IS faculty member. Your application will ask you to list a faculty member who can give you a reference, so we encourage you to get to know a faculty member, rather than simply list the professor who gave you the best grade of the semester.

There are no specific courses you need to have taken to apply for the IS major, but there are some introductory courses you will need to take to complete it that also count for the University Core requirements (e.g., Principles of Economics). A comparative politics course in the political science department could be a useful way to test the waters. But we encourage freshmen to take the interdisciplinary Core Renewal courses or others that meet University's Core requirements, even if they don't count for IS major requirements. The IS major is just one part of your university experience, and we understand that you won't necessarily focus on that your first semester.

Information for Study Abroad

IS majors are expected to study abroad for a semester, but are not required to do so. Nearly 90% of our majors study abroad for a summer, semester, or year. Those who do not (for economic, personal, or athletic reasons) can take advantage of other opportunities to engage with international students, use their language skills, and meet people and groups from around the world via video links. IS majors can apply up to 8 credits to their IS major if abroad for one semester and up to 12 credits if abroad for two semesters. IS minors can apply a maximum of 8 credits toward their International Studies minor.

Islamic Civilization and Societies

The interdisciplinary major in Islamic Civilization and Societies encompasses faculty and courses from across the university. The program prepares students for careers in diplomacy, journalism, business, government, social service, as well as graduate academic or professional study. Students who complete the major will attain proficiency in Arabic or another language related to the region, along with valuable skills and broader horizons that only an interdisciplinary major can provide.

Major Requirements

The major consists of ten required courses (30 credits) plus language proficiency (four semesters of a relevant language or native speaking ability).
Islamic Civilization and Societies Core: One Course

Integrative and multidisciplinary, this course is designed as an introduction to the field. It explores rich culture produced in the regions where Islam was the predominant religion during the past 1,400 years. The course is offered in the fall semester, is open to non-majors, and fulfills the Cultural Diversity Core requirement.

Disciplinary Base: Four Courses

Choose a Disciplinary Base in History, Political Science, Theology, Art, Art History, and Film, or Near Eastern Languages and Literatures. Take all required departmental foundation courses and two additional courses in your primary department. Visit the department website at www.bc.edu/ics for the list of approved courses.

Departmental Foundation Courses: Two Courses

- Political Science: POLI1041/1042 Fundamentals of Politics I and II
- Art, Art History, and Film: ARTH1101/1102 Art from Prehistoric Times to High Middle Ages/Art: Renaissance to Modern Times
- History: Two courses from the HIST1001–1094 sequence: HIST1059 Islam and Global Modernities preferred
- Theology: Any of the two-semester University Core requirements: THEO1161–THEO1162 Religious Quest I&II preferred
- Near Eastern Languages and Literatures: Any two of the following: NELC2061 Language and Identity in the Middle East, NELC2062 States and Minorities in the Middle East, NELC2161 Modern Middle Eastern and Arabic Literature, NELC2063 Near Eastern Civilization

Base Discipline Electives: Two Courses

**Political Science:**

- POLI2363 Muslims in U.S. Society and Politics
- POLI2405 Comparative Politics of the Middle East
- POLI2414 Politics and Society in Central Eurasia
- POLI3444 Intellectuals and Politics in the Middle East
- POLI2502 U.S.-Iran Relations since World War II
- POLI3527 Terrorism and Political Violence
- POLI2528 International Relations of The Middle East
- POLI2615 Islam and Liberal Democracy
- POLI2638 Islamic Political Philosophy
- POLI7700 Muslims and American Institutions
- POLI7806 Political Cultures of the Middle East
- POLI7812 State-Church Relations in Modern Europe
- POLI7813 Islam in Europe

**History:**

- HIST4140 Middle East in the Twentieth Century
- HIST4150 Modern Iran
- HIST4370 Byzantium and Islam
- HIST4131 Rise and Fall of the Ottoman Empire
HIST4135 History and Historiography of Arab Israeli Conflict
HIST4122 Odysseys in the Western and Islamic Traditions
HIST4090 Modern South Asia
HIST4497 Terror and the American Century

Theology:

THEO3116 Medieval Religions and Thought
THEO1225/ICSP2225 Exploring the Religious Worlds of Istanbul and Anatolia
THEO5351 Faith Elements in Conflict
THEO5352 Israelis and Palestinians
THEO5441 Ibn ’Arabi and The Islamic Humanities: Islamic Philosophy and Theology
THEO5544 Prophetic Tradition and Inspiration: Exploring the Hadith
THEO5554 Encountering the Qur’an: Contexts and Approaches
THEO5566 Mystical Poetry in the Islamic Humanities

Art, Art History, and Film:

ARTH2213 Introduction to Islamic Architecture
ARTH2226 Islamic Spain/al-Andalus: Word, Monument, and Image
ARTH2280 Masterpieces of Islamic Art
ARTH3350 The Art of the Object/Islamic Art
ARTH4409 The Art of the Islamic Book
ARTH4412 Cairo: City of 1001 Nights
FILM3314 Cinema of the Greater Middle East

Near Eastern Languages and Literatures:

NELC1211/1212 Modern Hebrew I and II
NELC1251/THEO5582 Biblical Hebrew
NELC1431/1432 Turkish for Scholars I and II
SLAV2069 Literature of the Other Europe in Translation
SLAV2067 Gender and War in Eastern Europe
SLAV2066 Conversion, Islam, and Politics in the Balkans
NELC4121/4122 Advanced Arabic I and II
SLAV2071 War and Peace in Yugoslavia
SLAV2065/SOCY2280 Society/National Identity in the Balkans
SLAV2062 Exile and Literature
NELC2063 Near Eastern Civilizations
NELC2331 Advanced Readings in Persian Texts
LING3359 The Structure of Biblical Hebrew
NELC3162 Business Arabic
NELC4190 Advanced Tutorial Arabic
Electives: Three Courses

Majors choose three elective courses from an approved list found on our website at www.bc.edu/ics. Electives must be distributed among at least two other departments in addition to the disciplinary base.

Senior Seminar and Research Project/Honors Thesis: Two Courses

All majors will be required to enroll in a thesis seminar in the fall of their senior year. In the spring term of their senior year, students will complete a senior thesis under the supervision of a faculty member affiliated with the Program.

The Senior Seminar will allow ICS majors to integrate the knowledge, skills, and concepts of their diverse disciplinary bases and to share them in a genuinely cross-disciplinary manner. The course encourages students to make intellectual connections across disciplines and to engage in critical reflection. After exploring common themes, majors will develop a research design, select a methodology, engage in research, and begin writing the thesis.

Language Requirement: Four Courses

Students will be expected to attain proficiency (completion of intermediate level) in a relevant language such as Arabic, Hebrew, Turkish, Persian, or Urdu. In some cases, French, Russian, Chinese or other languages relevant to specific research concerns may be accepted for students specializing in the study of Muslims in Africa, Central Asia, China, Europe, or the Americas, subject to approval by the program’s director.

Boston College currently offers four years of Arabic language instruction, from Elementary Intensive through Advanced Arabic. Students studying abroad can enroll in even more intensive language programs offered in Morocco, Kuwait, Egypt, Jordan, and at the School of Oriental and African Studies at the University of London (SOAS) during the regular academic year and in the summer. Our students have also studied during the summer months at Middlebury, Harvard, and Columbia to accelerate their language skills, and several have won U.S. State Department Critical Language Scholarships and Flagship Fellowships to study Arabic in the summer.

Arabic and other relevant languages can be taken through the Boston Area Consortium. Our Consortium partners, B.U., Brandeis, and Tufts in particular, offer additional languages such as Persian, Turkish and advanced levels of Hebrew if majors wish to study a language other than, or in addition to, Arabic.

Minor Requirements

Students seeking to earn an Islamic Civilization and Societies minor must submit a proposed plan of study to the Associate Director, listing the courses that will be taken to fulfill the requirements. In general, proposed plans of study for the minor should be submitted no later than the second semester of the sophomore year. The Associate Director will review the proposed plan of study, in consultation with the student and Program Director, and if accepted, the Committee will grant approval for the student.

Fill out and e-mail the proposed plan of study form before scheduling an appointment with the Associate Director. Whenever possible, the Associate Director will arrange for each student to receive continuing academic advisement from a faculty member in the student’s academic major who is affiliated with the Islamic Civilization and Societies Program. Students will be expected to consult with the Associate Director at each semester registration period to update their plan of study.

Requirements for the Islamic Civilization and Societies Minor

- Six courses from the approved course list
- Selected courses must be from three different academic departments
- Required multidisciplinary foundation course ICSP1199 (fall semester)
- Two courses in Arabic or an equivalent language, at the intermediate level or above
Requirements for the Arabic Studies Minor

Near Eastern Languages and Literature offers a minor in Arabic Studies, which covers areas of Modern Standard Arabic and Modern Hebrew, Modern Middle Eastern Literature and Cultural History, and Near Eastern Civilizations.

- Six approved one-semester courses
- Two in Modern Standard Arabic, above the intermediate level
- Four in Middle Eastern languages, cultures, literatures and civilizations. May include a language course in Modern (Israeli) Hebrew, courses taught in translation, and Near Eastern Civilizations

For additional information, visit the Slavic and Eastern Languages and Literatures section in this Catalog.

Mathematics

The Mathematics Department offers two undergraduate degree programs, leading to the Bachelor of Science and to the Bachelor of Arts.

Bachelor of Arts (B.A.)

The Bachelor of Arts program in Mathematics is designed to provide a solid foundation in the main areas of mathematics and mathematical applications. Course work is offered in preparation for careers in the actuarial profession, applied areas of government and industry, and education. Students who succeed in the program make excellent candidates for law school and other professional schools.

Requirements for Mathematics B.A.

The Mathematics B.A. major requires completion of at least 33 credits, including:

- MATH2202 Multivariable Calculus or MATH2203 Multivariable Calculus (Honors)
- MATH2210 Linear Algebra or MATH2211 Linear Algebra (Honors)
- MATH2216 Introduction to Abstract Mathematics
- MATH3310 Introduction to Abstract Algebra
- MATH3320 Introduction to Analysis
- 18 elective credits chosen from MATH courses numbered 4000 or higher

With the approval of the Assistant Chair for Undergraduate Programs, advanced students may omit required courses, substituting 3 credits in MATH courses numbered 4000 or higher for each.

Bachelor of Science (B.S.)

The Bachelor of Science program in Mathematics is designed to give students a rigorous and thorough mathematical experience, one that includes connection to another area of scholarship in which mathematics is an essential tool. In particular, the program is strongly recommended for those who wish to pursue graduate study in mathematics.
Requirements for Mathematics B.S.

The Mathematics B.S. major requires completion of at least 36 credits, including:

- MATH2202 Multivariable Calculus or MATH2203 Multivariable Calculus (Honors)
- MATH2210 Linear Algebra or MATH2211 Linear Algebra (Honors)
- MATH2216 Introduction to Abstract Mathematics
- MATH3311–3312 Algebra I, II
- MATH3321–3322 Analysis I, II
- MATH4460 Complex Variables
- 12 elective credits in mathematics numbered 4000 or above
- 12 credits in natural science, computer science or economics courses (listed below).

With the approval of the Assistant Chair for Undergraduate Programs, advanced students may omit required courses, substituting 3 credits in MATH courses numbered 4000 or higher for each.

Corequisite Science Courses for B.S. in Mathematics

- BIOL2000 Molecules and Cells
- BIOL2010 Ecology and Evolution
- BIOL2020 Organisms and Populations
- BIOL3040 Cell Biology
- BIOL3190 Genetics and Genomics
- BIOL4200 Introduction to Bioinformatics
- CHEM1109 (1117)–1110 (1118) General (Modern) Chemistry I, II
- CHEM3351 Analytical Chemistry
- CHEM4475–4476 Physical Chemistry I, II
- CSCI1101–1102 Computer Science I, II
- Any upper division course for majors in Computer Science
- ECON2228 Econometric Methods
- ECON2229 Forecasting Techniques
- ECON3308 Game Theory in Economics
- ECON3311 Mathematics for Economists
- EESC1132–1134 Exploring the Earth I, II
- EESC3391 Introduction to Geophysics
- EESC4424 Environmental Geophysics
- EESC4455 Exploration Seismology
- PHYS2100/2110–2101/2111 Introduction to Physics (Calculus) I and II
- Any upper division course for majors in Physics

Additional Major Requirement (All Students)

A grade point average of at least 1.67 in the MATH courses used to fulfill the major.
Some students may need to complete (or will benefit from completing) MATH1102 Calculus I (Math/Science Majors) and/or MATH1103 Calculus II (Math/Science Majors) to prepare for the major. Well-prepared students with a strong Calculus BC program may, and sometimes should, begin directly in MATH2202. Exceptionally strong students may apply for the Honors Section MATH2203, and should contact the Assistant Chair for Undergraduate Programs. More information about Calculus courses and suggestions for choosing the right Calculus course can be found at www.bc.edu/mathadvise.

Each student should consult directly with the Assistant Chair for Undergraduate Programs or a Mathematics Advisor at Orientation to determine the appropriate and recommended Calculus choice for their situation.

**Departmental Honors**

Candidates for either the Bachelor of Arts or the Bachelor of Science who meet the following requirements will be awarded Departmental Honors in Mathematics:

- Completion of the mathematics requirements for the B.S. degree.
- A grade point average of at least 3.3 in all mathematics courses numbered 3000 and above.
- Completion, as one of the required electives, of an honors thesis course MATH4961; or an independent study course MATH4901 under the direction of a faculty member; or completion, as one of the required electives, of one graduate course at the 8000 level.

Each student's honors program must be approved individually by the Assistant Chair for Undergraduate Programs.

**The Minor in Mathematics**

The Mathematics Department also offers a program for majors in other disciplines leading to the minor in Mathematics.

**Requirements for the Minor in Mathematics**

- MATH2202 Multivariable Calculus or MATH2203 Multivariable Calculus (Honors)
- MATH2210 Linear Algebra or MATH2211 Linear Algebra (Honors)
- 12 elective credits, chosen from:
  - MATH2216 Introduction to Abstract Mathematics
  - MATH3310 Introduction to Abstract Algebra
  - MATH3311–3312 Algebra I, II
  - MATH3320 Introduction to Analysis
  - MATH3321–3322 Analysis I, II
  - MATH major courses numbered 4000 or higher

**Information for Study Abroad**

Normally, Mathematics majors should have completed MATH2202/3, MATH2210/1, and MATH2216 before going abroad. For students going abroad in the second semester of junior year only, you should also complete at least one of MATH3310/MATH3311 or MATH3320/MATH3321 before leaving.

Students usually may take no more than two mathematics courses for credit towards the mathematics major while abroad, although exceptions may be made if the host institution provides suitable offerings. All courses to be used for major credit must be approved beforehand.
There are no restrictions on what type of mathematics course you may take while abroad, but usually each will be counted as an elective. Choices most commonly available include courses in Differential Equations, Numerical Analysis, Graph Theory/Combinatorics, Number Theory, Complex Analysis, Probability and Statistics, Mathematical Modeling, and Operations Research.

Substitutes for the required 3000-level courses in Algebra and Analysis may be available while abroad; however, these titles are generic. Thus it is extremely important that you check with the Department about taking either one of these two courses abroad, to be sure that the level of the course matches your background.

For course approval, contact the Assistant Chair for Undergraduate Programs.

Choosing Courses and Fulfilling Core Requirements

All students at Boston College are required to complete one mathematics course as part of the University Core Curriculum. A score of 4 or higher on either the Calculus AB or BC Advanced Placement Exam (once recorded on your transcript by the Admissions Office) exempts you from this Core requirement.

Some schools or major programs, however, may require more than this minimum, or perhaps require a specific Calculus course or courses. Basic guidelines for students who fall into these categories (or who are seriously thinking about choosing majors in these categories) are as follows:

**Majors in Mathematics, Physics, Chemistry, Computer Science (B.S.), or Geological Sciences**

In your first semester of freshman year, enroll in MATH1102 Calculus I (Math/Science Majors), MATH1103 Calculus II (Math/Science Majors), or MATH2202 Multivariable Calculus. If you have had a solid year of calculus, MATH1103 is usually the most appropriate choice. Well-prepared students with a strong Calculus BC program may, and sometimes should, begin directly in MATH2202. Exceptionally strong students may apply for the honors section of MATH2202 and should contact the Assistant Chair for Undergraduate Programs.

**Majors in Biology, Computer Science (B.A.), or Environmental Geoscience and All Premedical students**

Enroll in your first semester of freshman year in one of the Calculus courses MATH1100 (Calculus I), MATH1101 (Calculus II), or MATH2202 (Multivariable Calculus). If you have had a solid year of calculus (the AB curriculum), MATH1101 is usually the most appropriate choice. Particularly well-prepared students should consider MATH2202. If you have a strong interest in mathematics, you should consider choosing a Calculus course from the MATH1102–MATH1103–MATH2202 sequence mentioned above.

**Other Students**

For all other students seeking to fulfill the Core requirement in mathematics, you may take a Core-level mathematics course at any time—it need not be (and sometimes simply cannot be) completed right away in freshman year. You certainly have the option to elect a Calculus course for the Core requirement, but there often may be more appropriate course selections available to you, such as:

- MATH1004 Finite Probability and Applications
- MATH1007 Ideas in Mathematics
- MATH1180 Principles of Statistics for the Health Sciences (CSON students)
- MATH1190 Fundamentals of Mathematics I (LSOE students in Elementary Education or Human Development)
Music

Whether students desire a career in music or want to pursue their own love of the art, the Department of Music offers courses in theory and composition, in the history and current trends of both Western and non-Western music, and lessons in performance. All students, regardless of musical background, are welcome in any course unless a prerequisite or permission of instructor is indicated (as for certain theory courses).

The Department offers a variety of courses (MUSA1100, MUSA1200, MUSA1300) that satisfy the University Core requirement in the Arts and that serve as introductions to the various areas of musical knowledge. MUSA1100 Fundamentals of Music Theory focuses on technical aspects of the language of music and serves as a prerequisite to Harmony and further upper level courses in theory and composition, such as Chromatic Harmony, and Counterpoint, as well as Jazz Harmony, Tonal Composition, and the Seminar in Composition. MUSA1200 Introduction to Music offers a broad survey of music history and styles of music, while upper level courses focus on various periods of Western music history (Middle Ages, Renaissance, Baroque, Classical Era, Romantic Era, Modern Era), the historical development of various genres (Opera, Symphony, Keyboard Music, Dance), or the contributions of various individual composers (Monteverdi, Bach, Beethoven, Brahms). MUSA1300 History of Popular Music in the U.S. offers a socio-historical approach to the broad history and context of popular music; upper level cross-cultural courses deal with popular traditions (such as Irish Folk Music, Music in America, History of Jazz, Hip-Hop, the Beatles) and world music. In world music, MUSA1320 Introduction to Musics of the World, MUSA2303 Afro-Brazilian Music, MUSA2304 Musics of India, MUSA2306 Musics of Africa, MUSA2307 Musics of Asia, and MUSA2309 Music and Culture in the Middle East satisfy the Cultural Diversity requirement of the Core but not the University Core requirement in the Arts.

For the music major, a liberal arts framework offers a broader outlook than that of a conservatory or a school of music. In a liberal arts framework, students encounter historical, theoretical, cultural, ethnographic, and performance perspectives on music. The student majoring in music at Boston College may find employment in teaching, communications, arts administration, liturgical music or may major in music simply to provide a firm discipline for the mind or a source of lifelong enjoyment. Some students plan to go on to graduate school or a conservatory to become professional performers, composers, musicologists, ethnomusicologists, or educators. Within the major, all students receive a common base of knowledge with a specialization at higher levels in such areas as composition, performance, music history, or cross-cultural studies. A grounding, not only in the traditional musical skills of Western art music, but also knowledge of American music and of the traditions of other cultures, is considered indispensable.

Performance

The Music Department offers individual instruction in voice and instruments either for credit (MUSP1925—1 credit per semester) or not for credit (MUSP1920, 1910, 1900). Individual Instrumental Instruction, either credit or non-credit, requires an extra fee. In addition, several free, non-credit performance courses offer instruction and/or coaching in various instruments and ensembles. Private lessons, when taken for credit, require a juried performance at the end of the semester. Students may use up to 3 credits of individual instruction toward graduation.

Major Requirements

(Minimum of 12 courses, 38 credits)

- **Theory, Analysis, and Composition Courses:** (12 credits total)
  - **Prerequisite:** MUSA1100 Fundamentals of Music Theory or equivalent
  - **Required of all majors:** MUSA2100 Harmony, MUSA3100 Chromatic Harmony, MUSA3106 Counterpoint
- **Choice of any one course:** MUSA3110 Form and Analysis, MUSA3114 Jazz Harmony, MUSA3120 Composition Seminar, MUSA3126 Tonal Composition, MUSA3130 Orchestration, MUSA2130 Education Through Music
- **Historical Courses:** (9 credits total)
  - **Required of all majors:** MUSA2209 Music of the Modern Era
  - **Choice of any two:** MUSA2201 Medieval-Renaissance Music, MUSA2202 Music of the Renaissance, MUSA2203 Music of the Baroque, MUSA2205 Music of the Classic Era, MUSA2207 Music of the Romantic Era
With permission of the Director of the Undergraduate Program in Music, a composer or genre course may be substituted for a period course.

**Cross-Cultural Courses:** (6 credits total)
Required of all majors, a choice of one from each of the following two groups:

- **Group I—World Music**
  - MUSA1320 Introduction to Musics of the World*
  - MUSA2303 Afro-Brazilian Music*
  - MUSA2304 Musics of India*
  - MUSA2306 Musics of Africa*
  - MUSA2307 Musics of Asia*
  - MUSA2308 Music in the Medieval Islamic World
  - MUSA2309 Music and Culture in the Middle East*

  *MUSA1320, MUSA2303, MUSA2304, MUSA2306, MUSA2307, and MUSA2309 also satisfy the Core Cultural Diversity requirement

- **Group II—Popular Music**
  - MUSA2320 Music and America
  - MUSA2330 History of Jazz
  - MUSA2334 Hip Hop in American Culture
  - MUSA2340 Introduction to Irish Folk Music
  - MUSA3350 The Beatles

**Required Senior Seminar:** (one semester, 3 credits)
The Senior Seminar (MUSA4941) is ordinarily open only to senior music majors. The Seminar entails a series of weekly projects allowing majors to investigate issues in-depth with special emphasis in one of the areas listed above (history, cross-cultural, or performance). The Seminar serves as preparation for a senior project with supervised reading, research, writing, and discussion.

**Electives:** (6 credits)
The student will choose a minimum of two 3-credit courses in whatever category is appropriate to his or her particular interest, whether it is in music theory and composition, performance, history, or cross-cultural studies. Students with performance emphasis must have three semesters of private instruction for credit. Three semesters of private instruction for credit may be used as an elective only upon completion of the juries at the end of each semester of lessons.

**Performance Ensemble Experience:** (minimum of two semesters)
Each major must have two semesters of experience in performance in some capacity and may choose from any organized performance group at Boston College (such as Boston College Symphony Orchestra, Chamber Music Ensemble, Popular Styles Ensemble, Irish Traditional Music classes, University Chorale, Voices of Imani, Liturgy Arts Group, student a cappella group, BC bOp, Marching Band, Wind Ensemble, etc.), through more informal student groups (by consultation with the Director of the Undergraduate Program in Music), or through private lessons.

**Cumulative Listening Competency**
Majors will be asked to identify important works from the Western tradition in a series of Listening Competency exams. Each year of the music major (normally three), a list of works will be given to students that they must be able to identify by the end of the year. A listening test on each of three lists of works will be administered until the student passes.

**Ear Training/Sight Singing:** (2 credits)
All majors must pass the minimum competency requirements in Ear Training and Sight-Singing before graduation. The courses MUSA1090 and MUSA2090 Ear-Training and Sight-Singing are 2-credit classes designed and recommended as an aid to passing this test.

---

**Minor Requirements**

(Minimum of six courses, 18 credits)
The Music Department has designed a minor in music as an alternative for students who are interested in music, but who do not wish either to make music their career or to go on to graduate studies or who have majors that preclude taking music as a second major. The total number of courses required for the minor in music is six. Those wishing to minor in music should take the following:

- One of the following (3 credits): MUSA1100 Fundamentals of Music Theory (required if they do not have the background in music theory needed before entering MUSA2100 Harmony), or MUSA1200 Introduction to Music or MUSA1300 History of Popular Music. Students who can pass out of MUSA1100 will substitute an upper-level course as an elective.
- Two additional music theory courses (6 credits): MUSA2100 Harmony and MUSA3100 Chromatic Harmony.
- Three historical and cross-cultural electives (9 credits): One period course, one composer or genre course, one cross-cultural course (either World Music or Popular Music).

The choice of courses should be made in consultation with an advisor from the Music Department. In addition, each student must participate in at least two semesters of credit or non-credit performance experience (either as a member of an ensemble or through private lessons), as approved by the department.

**Honors**

In order to graduate with departmental honors, a student must maintain a grade point average of 3.5 in the major and 3.3 in the University, pass the Ear-Training and Listening Repertoire requirements with a high score, and produce a final project, recital, or paper deemed worthy of honors. The project must be completed for a grade of A- or better to receive honors. There are various ways to fulfill the project:

- A research paper of no less than 40 pages and a public presentation of approximately 20 minutes on their findings.
- A recital of around 40 minutes (but no less than 30 minutes) with a paper of no less than 15 pages. Non-honors majors may still do a senior recital for credit as MUSA4600 Senior Recital Preparation but without it being considered for honors.
- A composition or set of compositions of no less than 15 minutes.

**Information for First Year Majors and Non-majors**

Included in the University's Core Curriculum is one course in the Arts (Art, Art History, and Film, Music, or Theatre), MUSA1200 Introduction to Music, MUSA1100 Fundamentals of Music Theory, and MUSA1300 History of Popular Music in the U.S. are the Music Department's Core offerings. They are designed for the non-musician as well as the student who has studied music. Prospective music majors should reference the Recommended Course of Study below. Students with advanced musical backgrounds and interests should speak to the Director of the Undergraduate Program, regarding appropriate upper-level courses. The department offers MUSA1320 Introduction to Musics of the World, MUSA2303 Afro-Brazilian Music, MUSA2304 Musics of India, MUSA2306 Musics of Africa, MUSA2307 Musics of Asia, and MUSA2309 Music and Culture in the Middle East as options for the Cultural Diversity requirement of the Core.

**Information for Study Abroad**

**For the Core:** Students who wish to satisfy the Arts Core through Music while abroad should consult with the Director of the Undergraduate Program before their departure. Acceptable courses should be similar in scope and content to those offered at Boston College. Many abroad programs do not offer classes that fit these requirements.

**For the major and minor:** The department requires that the music theory sequence for minors and majors through Chromatic Harmony and the Senior Seminar for majors be taken at Boston College. Music of the Modern Era and Counterpoint (required of majors) should be taken at Boston College, but exceptions may be possible depending on equivalent courses offered by the host school. Majors may not be abroad first semester senior year in order to take the required Senior Seminar at BC.
Before going abroad, both minors and majors should have completed Chromatic Harmony in theory, and majors, in addition, should have taken a few of the history or cross-cultural courses. Thus, acceptable offerings from abroad tend to lean towards courses in music history or in cross-cultural studies, with some upper-level theory courses acceptable. Usually students complete 6 or 9 credits; however, majors have had as many as 12 credits fulfilled abroad.

Students should contact the Director of the Undergraduate Program in Music, to plan an acceptable course of study for their semester or year abroad. The department recommends the music programs offered at King’s College, London, and University College, Cork, Ireland.

**Recommended Course of Study**

**Freshman Year**

All students with a serious interest in music should try as freshmen to take or test out of MUSA1100 Fundamentals of Music Theory. The theory courses (especially MUSA1100 Fundamentals and MUSA2100 Harmony) are essential and necessary indicators of how well a student will be able to succeed in the major. Those who can test out of MUSA1100 and who wish to fulfill the Arts Core requirement with a music course should take MUSA1200 Introduction to Music or MUSA1300 History of Popular Music. Arts Core courses in Art, Art History, and Film or Theatre are also possible instead of Music and are recommended for those who wish for a broader understanding of the Arts.

**Sophomore Year**

Harmony and Chromatic Harmony should be taken in sequence along with MUSA1090–2090 Ear Training/Sight Singing Labs. Two history courses in Western Music (selected from Medieval-Renaissance, Baroque Music, Music of the Classical Era, Music of the Romantic Era, Music of the Modern Era, or a composer or genre course) or one history course and one cross-cultural course should be taken. The first year’s required Listening Repertoire should be mastered. Some performance experience (Orchestra, Chorale, Band, Chamber Music, non-Western performance, and/or private lessons) should be started and pursued throughout the rest of the major.

**Junior Year**

Counterpoint and a choice of Jazz Harmony, Form and Analysis, or Composition and a second or third history course and/or a cross-cultural course should be taken. The second year of the required Listening Repertoire should be mastered.

**Senior Year**

Any advanced courses in the department relevant to the particular emphasis the student has chosen—performance, composition, history, or cross-cultural—and the Senior Seminar, which will help the student synthesize previous course work. The final year of the required Listening Repertoire should be mastered.

**Recommended Course of Study: Minors**

Students can add music as a minor as late as their junior year, but no later than second semester as the minor requires a minimum of three consecutive semesters in order to complete the theory sequence of the following: Fundamentals, Harmony, and Chromatic Harmony. The history and cross-cultural component may be taken at any time in conjunction with various levels of theory, although some understanding of Fundamentals is recommended for students with little previous, formal background in music.

**Philosophy**
To study philosophy is to engage in systematic reflection on the most fundamental questions about ourselves, and our world. Studying philosophy provides the critical skills, the historical understanding, and the vision necessary to meet existential and ethical challenges, and live richer, more self-aware lives. As students prepare to become citizens, professionals, parents, and men and women for others, the study of philosophy is strong preparation for a wide variety of enterprises. Both as a Core requirement and as a major, Philosophy is foundational in helping us appropriate our intellectual and spiritual heritage and develop self-understanding anew.

Philosophy has been central to the educational mission of Boston College since its founding. The prominence of philosophy in the curriculum reflects our Jesuit heritage. From the beginning, Jesuit colleges emphasized the values of authentic Christian humanism, the power of human intelligence, and the mutual compatibility of faith and reason.

The study of philosophy remains among the most relevant and urgent of pursuits. It investigates life’s perennial questions—questions of ultimate meaning and value, truth and rationality, being and transcendence. The mission of the Philosophy Department at Boston College is to provide an encouraging and supportive environment for the exploration of these questions, and for the critical examination of philosophical traditions that inform our personal and professional lives. Toward that end, we offer a broad spectrum of courses with a special focus on the history of philosophy, and fundamental contemporary problems in "practical philosophy."

A Philosophy major is excellent preparation for careers in numerous fields including law, business, and medicine. The study of philosophy teaches highly marketable and highly transferrable skills. Philosophy blends well with other majors because it speaks to issues that are foundational to numerous disciplines and career paths. For students entering fields such as science, medicine, law, public service, economics, finance and management, the Philosophy Department offers specialized tracks within the major to provide focus and direction toward career goals.

Major Requirements

All Philosophy Majors must complete a total of 30 credits in Philosophy, as follows:

- Two Core courses in Philosophy (6 credits)
- Eight Philosophy electives (24 credits):
  - 1 course in the History of Philosophy
  - 1 course in Knowledge and Reality
  - 1 course in Ethics and Value
  - 5 free electives

Lists of courses satisfying each of the three distribution requirements (2a-c) can be found on the Philosophy Department website. Students may take up to two cognate courses in other departments for elective credit toward the Philosophy major. The courses must be philosophical in content and/or substantially contribute to the enhancement of the student's chosen area of study. Cognate courses must be approved by the Director of Undergraduate Studies.

Students wanting focus and direction for their elective choices may select a track within the major. Tracks are satisfied by completing two electives from within the track area, in consultation with the major advisor. The Philosophy Department offers the following major tracks:

Science, Ethics, and Humanity Track

- Designed for students preparing for careers in science and medicine

Law, Public Policy, and Economics Track

- Designed for students preparing for careers in law, politics, economics, or business/finance
Philosophy, Religion, and the Arts Track

- Designed for students preparing for careers in theology, ministry, or the arts

Philosophy Minor

All Philosophy Minors must complete a total of 18 credits in Philosophy, as follows:

- Two Core courses in Philosophy (6 credits)
- Four Philosophy electives (12 credits)

No particular course or course distribution is required of minors. Each student will design his or her own minor in consultation with a faculty advisor.

Core Requirement in Philosophy

As part of the Core Curriculum at Boston College, all students take a two-semester Philosophy Core sequence. There are several ways to complete the Philosophy Core requirement:

- PHIL1070–1071 Philosophy of the Person I and II
  - Fall/Spring: 3 credits per semester. Satisfies Philosophy Core.
- PHIL1090–1091 Perspectives on Western Culture I and II
  - Fall/Spring: 6 credits per semester. Satisfies Philosophy Core and Theology Core.
- PHIL1088–1089 Person and Social Responsibility I and II (PULSE)
  - Fall/Spring: 6 credits per semester. Satisfies Philosophy Core and Theology Core.
- One of our new Enduring Questions courses, available to freshmen only.
  - One 3-credit Philosophy Core course paired with a Core course from another discipline. Satisfies one semester of the two-semester Philosophy Core requirement. Students complete the second semester of Philosophy Core with Philosophy of the Person I or II.

It is strongly recommended that students complete the Philosophy Core requirement by the end of sophomore year. Core courses are foundational, providing skills and background knowledge presupposed by more advanced courses in the college.

The Honors Program in Philosophy

The Philosophy Department offers highly qualified students the opportunity to participate in a departmental honors program. Application to the honors program is by invitation only, based on GPA and/or nomination by a member of the faculty. Invitations to apply will be extended by the Director of Undergraduate studies in the fall of the junior year. Applications are due early in the spring of the junior year.

Accepted students will pursue a year-long research project in the senior year, under the direction of a faculty mentor, culminating in a thesis of approximately 50-75 pages. Honors students participate in a Philosophy Honors Seminar in the fall semester of senior year and complete the project in consultation with a faculty advisor in the spring.

The department arranges seminar meetings and social events to provide intellectual community for honors program participants. The Department also participates in the Scholar of the College Program, details of which can be found in the Morrissey College of Arts and Sciences section.
The Perspectives Program at Boston College is a four-year interdisciplinary program centered upon the great books of the Western intellectual tradition. It integrates the humanities and natural sciences in order to help students work out for themselves a set of coherent answers to such questions as the following: Who are we? Where do we come from? Where are we going? The Perspectives Program seeks (1) to educate the whole person, (2) to help students develop skills in practical living and critical thinking, and (3) to form students who are intelligent, responsible, reasonable, attentive, and loving.

Students in the Perspectives Program complete the Philosophy major by completing the following sequence of four Perspectives courses:

- Perspectives I
  - PHIL1090–1091 (THEO1090–1091) Perspectives on Western Culture I and II
  - Fall/Spring: 6 credits per semester. Satisfies 6-credit Philosophy Core and 6-credit Theology Core. Normally open to freshmen only.

- Perspectives II
  - UNAS1104–1105/UNAS1106–1107 Modernism and the Arts I and II
  - Fall/Spring: 6 credits per semester. Satisfies 6-credit Philosophy Core, 3-credit Fine Arts Core, 3-credit Literature Core.

- Perspectives III
  - UNAS1109–1110/UNAS1111–1112 Horizons of the New Social Sciences I and II
  - Fall/Spring: 6 credits per semester. Satisfies 6-credit Philosophy Core, 6-credit Social Sciences Core.

- Perspectives IV
  - UNAS1119–1120/UNAS1121–1122 New Scientific Visions I and II
  - Fall/Spring: 6 credits per semester. Satisfies 6-credit Philosophy Core and either 6-credit Natural Science Core or 3-credit Mathematics Core, 3-credit Natural Science Core.

Each Perspectives course is a year-long, 12-credit course. Each is designed to fulfill the Core requirements of the relevant departments. While Perspectives I is normally open only to freshmen, Perspectives II, III, and IV are open to students at any rank, and need not be taken in order. Descriptions of Perspectives II, III, and IV are in the University Courses section of the course catalog.

**Perspectives Honors Program**

Philosophy majors in the Perspectives Program may be invited to the Perspectives Honors track in the junior year. Perspectives Honors students will participate in the Senior Perspectives Honors seminar in the fall semester and register for a Senior Thesis Directed Readings course with an advisor in the spring semester of the senior year. Such a senior thesis will ordinarily consist of original research in the field, in close work with a faculty advisor, culminating in the production of a 50–70 page senior thesis.

**The PULSE Program for Service Learning**

With its mission to educate Boston College students about social injustice, the PULSE Program for Service Learning educates more than 500 undergraduates each year through the integration of community-based social service and social advocacy fieldwork with the study of theology and philosophy. The PULSE Program offers its signature Core course, "Person and Social Responsibility," in addition to a few elective courses. For a full description of the program, please visit the PULSE website at www.bc.edu/pulse.

**Fifth Year B.A./M.A. Program**
Undergraduate Philosophy majors may opt to enter a five-year B.A./M.A. program. Application to the program will normally take place during the junior year.

Students admitted to the B.A./M.A. program will follow the curriculum for Philosophy majors, except that two courses taken during the senior year must be eligible for graduate credit. These two courses will count toward both the M.A. and the B.A. The remainder of the M.A. may be completed by taking eight additional graduate courses, submitting an M.A. qualifying paper in the fifth year, and satisfying the M.A. language requirement.

Interested undergraduate Philosophy majors should consult with the Director of the Graduate Program during junior year, and must apply to the Graduate School of the Morrissey College of Arts and Sciences. Expectations are that such applicants will have achieved an overall GPA of at least 3.33 and a major GPA of 3.5 or above. For internal applicants, the application fee is waived and the GRE is not required.

Physics

The Department of Physics offers a comprehensive program of study leading to the B.S. degree in Physics. This program is designed to prepare students not only for advanced graduate studies in physics or a related field but also for employment upon graduation in physics and other disciplines related to science and technology. Basic courses give students a solid foundation in the concepts of classical and modern physics and assist them in developing their analytical reasoning and problem-solving skills. Laboratory courses complement this experience with an opportunity to develop experimental skills and a working knowledge of advanced technology and computational techniques. Students are strongly encouraged to further develop all these skills by participating in advanced experimental, analytical, or computational research under the supervision of faculty mentors, and we will make every effort to find a suitable research opportunity for all interested students with our faculty members.

Major Requirements

The minimum requirements for the B.S. degree with a major in Physics include 46 credits in Physics, as described below, and additional corequisites in Mathematics and other sciences.

Physics Requirements

- PHYS2200 Introductory Physics I (Fall: 4 credits)
- PHYS2201 Introductory Physics II (Spring: 4 credits)
- PHYS2050 Introductory Physics Lab I (Fall: 1 credit)
- PHYS2051 Introductory Physics Lab II (Spring: 1 credit)
- PHYS3100 Vibrations and Waves (Fall: 4 credits)
- PHYS3300 Modern Physics (Spring: 4 credits)
- PHYS3510 Contemporary Electronics Laboratory (Fall: 2 credits)
- PHYS4100 Classical Mechanics (Fall: 4 credits)
- PHYS4200 Electricity and Magnetism (Spring: 3 credits)
- PHYS4400 Quantum Physics I (Fall: 3 credits)
- PHYS4401 Quantum Physics II (Spring: 3 credits)
- PHYS4600 Statistical Mechanics and Thermodynamics (Fall: 4 credits)
- At least 3 credits of a course*, chosen from:
  - PHYS4300 Numerical Methods and Scientific Computing** (Spring: 4 credits)
  - PHYS4951 Senior Thesis*** (Spring: 3 credits)
  - PHYS4350 Experiments in Physics (Spring: 3 credits)
**MCAS Honors Program Thesis or Scholar of the College Thesis when supervised by a Physics faculty member will also meet this requirement.**

**Students need a background in computer programming, for example, CSCI2227 Introduction to Scientific Computation.**

***Students will need prior agreement from a physics faculty supervisor to enroll in this course.***

- At least 6 credits of an advanced (at or above the 4000 level) elective course. Courses vary from year-to-year, but recent offerings include:
  - PHYS4505 Nuclear and Particle Physics (3 credits)
  - PHYS4515 The Physics of Conventional and Alternative Energy (3 credits)
  - PHYS4525 Foundations of Plasmonics (3 credits)
  - PHYS4535 Nanoscale Integrated Science (3 credits)
  - PHYS4545 Introduction to Condensed Matter Physics (3 credits)
  - PHYS4555 Optics (3 credits)
  - PHYS4565 Cosmology and Astrophysics (3 credits)
  - MATH4440 Dynamical Systems (3 credits)

Students should consult with the Undergraduate Program Director regarding current elective offerings.

**Corequisites**

Students are also required to take the following mathematics courses:

- MATH2202 Multivariable Calculus (4 credits)
- MATH2210 Linear Algebra (3 credits)
- MATH4410 Differential Equations (3 credits)

Students without advanced math placement will need to take introductory calculus courses, such as MATH1103 or MATH1105, which are prerequisites for MATH2202.

Physics majors are also required to take 8 credits of CHEM1109–1110 and associated labs; other science courses, along with their associated labs, may qualify but require prior departmental approval.

Advanced undergraduate Physics majors may, with departmental approval, enroll in first-year graduate courses, such as PHYS7711, 7732, or 7741.

**Minor Requirements**

The minimum requirements for a minor in Physics include 24 credits in Physics and 8 corequisite credits, as described below:

- PHYS2200 Introductory Physics I (Fall: 4 credits)
- PHYS2201 Introductory Physics II (Spring: 4 credits)
- PHYS2050 Introductory Physics Lab I (Fall: 1 credit)
- PHYS2051 Introductory Physics Lab II (Spring: 1 credit)
PHYS3100 Vibrations and Waves (Fall: 4 credits)
PHYS3300 Modern Physics (Spring: 4 credits)

Also required are 6 credits in courses at or above the 4000 level. Students should discuss course selection with the Undergraduate Program Director.

Corequisites*

- MATH1102 Calculus I (4 credits) and MATH1103 Calculus II (4 credits) or
- MATH1105 Calculus II–AP (4 credits) are required

*Students who have been placed by the Mathematics Department at a level above MATH1105 will have satisfied this corequisite.

MATH2202 (4 credits) is required as a prerequisite for some of the upper-level physics courses.

Information for First Year Majors and Non-majors

Physical science, computer science, and mathematics majors planning on taking physics in their freshman year should enroll in PHYS2200 and the associated lab PHYS2050. Biology majors and premedical students should enroll in PHYS2100 and the associated discussion section PHYS2110 and lab PHYS2050. Depending on high-school background, Physics majors take either the Calculus I–II sequence MATH1102–1103, or Calculus II–AP MATH1105 or start with Multivariable Calculus MATH2202. Note that MATH1100–1101 is intended for Biology and Premedical students and is not sufficient calculus preparation for Physics majors.

Information for Study Abroad

Before undertaking study abroad, it is strongly recommended that the Physics major complete PHYS2200, PHYS2201 (or PHYS2100, 2101) with labs, PHYS3100, PHYS3300 (also with labs), and the corequisite math courses MATH1102, MATH1103, and MATH2202. The Department typically allows a maximum of four courses taken abroad to count for major credit. Of these four courses, two should be major required courses, plus two Physics electives. The department recommends any program with a solid teaching and research program in physics.

Students who are interested in studying abroad are strongly encouraged to do so during the spring semester of their junior year. While planning their study abroad program, Physics majors should meet with the Undergraduate Program Director. Students should inquire early at the Office of International Programs, and with possible host institutions, to arrange for a course of study appropriate for physics majors.

Course Offerings

Courses numbered below 2000 are introductory courses directed primarily towards non-science majors. These courses have no prerequisites and need no mathematics beyond ordinary college entrance requirements. The courses that satisfy the Natural Science Core requirement are noted in the individual course descriptions. PHYS2100–2101 Introductory Physics I, II (Calculus) or PHYS2200–2201 Introduction to Physics I, II (Calculus) and PHYS2050–2051 Introductory Physics Laboratory I and II are required of all Chemistry and Physics majors; Biology majors should consult the Biology Department regarding Physics requirements. Courses numbered above 3000 are advanced offerings primarily for Physics majors.

Political Science
An undergraduate major in Political Science provides a foundation for careers in politics, public administration, international service, law, business, and journalism, as well as a foundation for graduate work and teaching in the social sciences.

The Political Science major at Boston College consists of ten courses: two introductory courses; at least one course in each of the four subfields of political science (American Politics; Comparative Politics; International Politics; and Political Theory); and four electives from any of the subfields. Please note that courses not credits are the fundamental building block of the major. In order to complete the major, students must complete 10 political science courses that are each worth at least 3 credits. Thus, for the purposes of the major, three 4-credit political science courses from another institution are counted as three courses (they are not equivalent to four 3-credit courses). The larger number of credits for a single course from another institution may count toward the aggregate credits required for BC graduation, but that course will still count as a single course toward the major’s ten course requirement. (A “double course” transferred from abroad, however, that spans two semesters, and carries 6–8 credits, will be counted as two elective courses for the major.)

The Introductory Sequence

With some exceptions as noted below under Qualifications, Exceptions, and Special Rules, all majors should take one of the following introductory courses: Fundamental Concepts of Politics (POLI1041) or How to Rule the World (POLI1021). In addition, students should take a second introductory course, selected from the following: Introduction to Modern Politics (POLI1042); Introduction to American Politics (POLI1061); Introduction to International Politics (POLI1081); or Introduction to Comparative Politics (POLI1091).

NB: It is not essential to take Fundamental Concepts of Politics or How to Rule the World before Introduction to Modern Politics, Introduction to American Politics, Introduction to Comparative Politics, or Introduction to International Politics; nor is it essential to take either or both of the introductory courses in the freshman year. Many students do not begin their major until the sophomore year, and they have no difficulty finishing it on time. Students who scored a 4 or 5 on either of the AP exams in Government and Politics (American or Comparative) may place out of the requirement for the second introductory course (but not the first). It will still be necessary to take 10 courses in the major. You will need to have a “Degree Audit Course Substitution and Waiver Form” signed by the Director of Undergraduate Studies in order for this waiver to be reflected on your Degree Audit.

The introductory curriculum in political science is not like that in other majors, such as economics or the natural sciences. It does not present a single curriculum that all students are expected to know before moving on to higher-level courses. Rather, the introductory curriculum is designed to expose students to the study of politics in a variety of ways. Thus, each faculty member who teaches POLI1041 Fundamental Concepts will have his or her own particular style of doing so.

There is, however, some common ground. POLI1041 Fundamental Concepts of Politics and POLI1021 How to Rule the World, are devoted principally to a study of some of the classic texts in political theory. POLI1042 Introduction to Modern Politics, POLI1061 Introduction to American Politics, POLI1081 Introduction to International Politics, and POLI1091 Introduction to Comparative Politics, all emphasize philosophical, conceptual, and analytical foundations for understanding their substantive domains. Critical dialogue—in the classroom and in some cases, in discussion sections—is central to the way these introductory courses are taught.

To summarize: Students are normally required to take two introductory courses: either Fundamental Concepts of Politics (POLI1041) or How to Rule the World (POLI1021); and one additional course from the introductory list: Introduction to Modern Politics (POLI1042); Introduction to American Government (POLI1061); Introduction to International Politics (POLI1081); and (POLI1091) Introduction to Comparative Politics.

- POLI1021, POLI1061, and POLI1091 satisfy the Social Sciences Core and are open to majors and non-majors.
- POLI1041, POLI1042, and POLI1081 satisfy the Social Sciences Core and are major restricted only.

Beyond the Introductory Sequence

Students go directly from introductory courses into upper-level electives. These electives do not have to be taken in any particular order. The second digit of course numbers indicates the subfield. Courses with a “3” in that location (e.g., 2300) are in American Politics; courses with a “4” in that location (e.g., 2400) are in Comparative Politics; courses with a “5” in that location (e.g., 2500)
are in International Politics; and courses with a "6" in that location (e.g., 2600) are in Political Theory. Students must take eight courses beyond the introductory courses and at least one course must be taken in each of the four subfields: American Politics, Comparative Politics, International Politics, and Political Theory. All courses that do not fulfill the subfield or introductory requirements will be counted as electives in the major. The subfield requirements must be satisfied by courses taken in the department; courses taken abroad or transferred from other institutions may only be used to fulfill introductory or elective requirements. Furthermore, to fulfill the major, at least six courses of the ten courses required must be taken in the Political Science Department in the Morrissey College of Arts and Sciences. No more than four courses in total, then, can be transferred from outside the department, including other U.S. institutions, study abroad programs, or the Woods College of Advancing Studies (WCAS).

There is a considerable variety in our elective offerings because each faculty member has a rotating set of courses and usually teaches four of these each year. There are approximately 100 courses open to undergraduates over a four-year period. Some of these courses are seminars, which meet once a week and are usually limited to 15–19 members so that there is much more opportunity for sustained and intense analysis of texts and problems than there is in a conventional lecture/discussion format. With the exception of the special Sophomore Seminars, seminars are open only to juniors and seniors.

The amount of work required in all of our courses is generally high. Clarity of thought and writing are two sides of the same skill, and for this reason, our courses place special emphasis on writing skills. In addition, most courses encourage classroom discussion on a regular basis so that students may be graded on their participation in class as well as on their writing and exams.

**Degree Requirements**

**Fields and Electives**

- Two introductory courses: One introductory course must include either Fundamental Concepts of Politics (POLI1041) or How to Rule the World (POLI1021). The other introductory course must include one of the following: Introduction to Modern Politics (POLI1042); Introduction to American Politics (POLI1061); Introduction to International Politics (POLI1081), or Introduction to Comparative Politics (POLI1091).

- At least one course in each of the four subfields of Political Science: American Politics (POLIX300–X398), Comparative Politics (POLIX400–X499), International Politics (POLIX500–X599), and Political Theory (POLIX600–X699), for a total of four subfield courses.

- Four electives from among any courses offered by the department that are not introductory courses. NB: POLI1021 (How to Rule the World) may also satisfy the subfield requirement in Political Theory; POLI1061 (Introduction to American Politics) in American Politics; POLI1081 (Introduction to International Politics) in International Politics; and POLI1091 (Introduction to Comparative Politics) in Comparative Politics. They may not, however, satisfy the Introductory requirement and the subfield requirement at the same time.

**Note:** Courses designated as POLIX200–X299 count as electives toward the major but do not fulfill any of the four subfield distributional requirements. Courses numbered POLI7700 and above are graduate courses.

**Qualifications, Exceptions, and Special Rules**

- Introductory courses do not have to be taken in any particular sequence: thus, students may take one of the “second” Introductory courses before Fundamental Concepts or How to Rule the World.

- Students who join the major after their sophomore year should not take Introductory courses. With department permission, they may substitute other elective courses for the standard introductory. Students who have scored at least a 4 on the American Government or Comparative Government AP exams may waive the second introductory course. In either of these cases, students will still need to take ten courses and will need to see the Director of Undergraduate Studies in order to get this waiver recorded on their Degree Audits.

The courses in Political Science offered in the Woods College are separate from the courses offered in the Department and cannot generally be used towards the major. Students who believe they have a compelling reason to use a Woods College course for the major must petition the Department’s Director of Undergraduate Studies prior to the start of the class to see whether an exception can be made.
Students may transfer up to four courses from other institutions, including study abroad programs; however, in no case may a student earn a degree in Political Science without taking at least six courses (18 credits) in the Department. Transfer credits and study abroad credits may not be used to satisfy the four subfield distributional requirements.

Please Note: Even after the University has accepted a transfer or a study abroad course for your MCAS requirements, you will still need to see the Director of Undergraduate Studies or one of the Study Abroad Advisors to fill out the forms that will move those courses into the appropriate slot on your Degree Audit.

**Honors Program**

The Department of Political Science has established its own Honors program to encourage and reward high academic achievement among its majors. Admission to the program is by invitation from the Department. Each year approximately 20 Political Science majors who have completed the sophomore year are invited to join the Honors program. Selection is based on academic records within the major and overall. The Honors program seeks to provide additional opportunities for intellectual exchange and friendship among students as well as with the faculty. The Department hopes that the spirit of the Honors program will in turn extend to all our classes.

*Honors Seminar:* The Department offers special Honors Seminars on a variety of topics to members of the program. These are topics not ordinarily available in our course offerings, and they frequently focus on the special interests of faculty in important policy questions or intellectual puzzles. The intention of these seminars is to provide a setting in which students who have shown their lively and nimble engagement with politics can come together with others who share their enthusiasm, for the enjoyment and rewards of shared scholarly exploration. Members of the Honors program must take at least two Honors Seminars over the course of their junior and senior years, in addition to the ten courses otherwise required for the major. Students seeking to complete the Honors program and graduate with Honors must, therefore, take at least 12 Political Science courses in all.

One Honors Seminar is given each semester. The seminars are scheduled a year in advance so that students can plan their programs (especially important for students who will be studying abroad for one or two semesters). Because these seminars are beyond the regular requirements for the major, they do not exempt the student from the requirement of taking one course in each of four subfields in Political Science. With the permission of the Director of the Honors program, Honors students may substitute one graduate seminar for one of the two required Honors Seminars, subject to the approval of the faculty member teaching the seminar.

*Honors Thesis:* As a culmination of the Honors program, members may write an Honors Thesis during their senior year. An Honors Thesis is generally a two-semester project, for which students earn credit for two elective courses in the major (Honors Thesis I and II, designated in the catalog as POLI4961 and POLI4962).

Students participating in the Honors program are eligible for one of three Honors designations when they graduate: Honors, High Honors, and Highest Honors in Political Science. All members of the program who complete at least 12 courses in Political Science, including two Honors Seminars, are eligible to graduate with Honors, if they have sustained a record of academic excellence in the major. Members of the program who choose to write an Honors Thesis, and do so successfully, will be eligible to be considered for High or Highest Honors.

For further information on the Political Science Honors Program, contact the Director of the Honors Program.

**Study Abroad**

Study abroad is an excellent way for Political Science majors to gain a comparative and cross-cultural perspective on politics. Study abroad is encouraged by the Department, so long as students have prepared themselves with a strong academic background and have chosen their study abroad location with care, to assure that the courses taken abroad meet the Department’s expectations with respect to quality and content.

Students planning to go abroad will be given a form by the Office of International Programs in Hovey House, which must be filled out in consultation with the one of Department’s study abroad advisors (check the department’s website to see who they are). The
The purpose of this consultation is to make sure that a student is far enough along in the major so that he or she can finish in time to graduate and can successfully integrate the study abroad program with other academic plans. Students who are in the Department’s Honors Program, for example, need to plan carefully to coordinate study abroad with the Honors requirements. Information on specific study abroad opportunities can be obtained from the Office of International Programs in Hovey House and by speaking with Professor Hayao or Professor Purnell.

To be eligible for elective course credits toward the Political Science major while studying abroad, a student should have at least a 3.0 GPA generally and in the Political Science major before departing. Students with GPAs below this should contact one of the Department’s study abroad advisors about the possibility of being granted a waiver to this requirement.

Political Science majors should be aware that not all study abroad sites available to Boston College students will have courses acceptable toward the major. Some sites lack political science departments or have weak political science offerings. In these cases, students should be careful to consult with one of the Department’s study abroad advisors or the Director of Undergraduate Studies.

Because gaining foreign-language fluency is one of the main benefits of study abroad, Political Science majors are encouraged to seek study abroad programs in non-English-speaking countries. Students who believe that their foreign-language skills are not advanced enough to take college courses abroad in a foreign language should consider study-abroad programs in foreign-language countries where universities offer courses to their own students in English. Information about such programs can be obtained from the Office of International Programs in Hovey House.

The Department’s study abroad advisors can advise students about which programs and courses abroad will be acceptable. Students are urged to gain approval for specific courses from one of them before departing. A student who seeks approval only after he or she returns from abroad risks not receiving approval for study abroad courses. Always ask first, and if circumstances in the host country change (as they frequently do), e-mail one of the study abroad advisors or the Director of Undergraduate Studies for advice.

The Department will accept no more than two courses per semester from an institution abroad or four courses for an entire year. These courses will count as major electives only. As noted above, the four courses for the field distributional requirement in the Political Science major (one each in American, Comparative, and International Politics and in Political Theory) must be taken at Boston College. No courses taken abroad will be accepted for these distributional requirements. Again, bear in mind that courses not credits are the building blocks of our major. Single courses taken abroad that carry 3 or more credits will be counted as single courses in the major. Thus, for the purposes of the major, three 4-credit political science courses from another institution are counted as three courses (they are not, in other words, treated as equivalent to four 3-credit BC political science courses). Final approval of courses taken abroad requires a signature from one of the Department’s study abroad advisors on the Approval Forms available from the Office of International Programs in Hovey House.

Students should also know that they can apply for grants and scholarships that will help pay for the costs of studying abroad. For a list of such opportunities, check the University Fellowships Committee website.

**Washington Semester**

The university offers semester-long internship programs in cooperation with universities in Washington, D.C. These programs combine academic courses with internship placements in legislative, executive, and interest-group offices in the nation’s capital. Students sometimes do a Washington internship semester as an alternative to study abroad. The academic requirements for participation are the same as those for study abroad (i.e., a 3.0 GPA overall and in the major). Students interested in the American University Washington Semester Program should schedule an appointment with the Office of International Programs. For more information, visit [www.bc.edu/international](http://www.bc.edu/international).

**Thesis Writing Outside the Honors Program**

With department permission, students who are not members of the Honors Program may still have the opportunity to write a thesis by enrolling in POLI4951–4952 (Thesis I and II). This is an opportunity open to seniors, and the first step is to speak with a faculty member, during your junior year, who might be willing to act as your thesis supervisor. The thesis courses do not satisfy subfield requirements in the major, but they may be used to satisfy elective requirements.
Scholar of the College Program

Scholar of the College is a special designation conferred at Commencement on seniors who have successfully completed particularly creative, scholarly, and ambitious Advanced Independent Research projects during their senior year, while maintaining an overall cumulative grade point average of 3.700 or better. Students interested in this program should consult the University’s website for further information. (In this Department, Scholars projects are done under the course number POLI4921 Advanced Independent Research.)

Awards and Fellowships

Advanced Study Grants

The Boston College Advanced Study Grants were established to encourage, support, and give visible recognition to undergraduates who have that special spark of scholarly initiative and imagination. Students with these qualities should also be thinking of themselves as prospective candidates for national fellowships, such as the Rhodes, Marshall, Fulbright, Goldwater, or Truman. An Advanced Study Grant for a summer project can be an important step along the way. For more information on the ASG program, consult the University’s website.

Advanced Study Grants are for student-designed projects. They are not awarded for projects in which a student proposes to work with a faculty member on the faculty member’s research. For faculty-designed projects, Boston College has Undergraduate Research Fellowships.

Students intending to write an Honors Thesis or Senior Thesis should consider applying in their junior year for Advanced Study Grants for Thesis Research, which fund summer research or skills-acquisition projects in direct support of a senior project that will be undertaken during the student’s senior year.

Undergraduate Research Fellowships Program

The Undergraduate Research Fellowships program enables students of at least sophomore status to gain firsthand experience in scholarly work by participating with a faculty member on a research project. Faculty members select students, and students receive a monetary award based upon the scope and duration of the project. Students do not receive academic credit for these fellowships. Their value lies in the close mentoring relationship students can form while working with a faculty member. All full-time undergraduates of at least sophomore status are eligible. Fellowships are available for the fall, spring, and summer semesters. For more information on the program and application deadlines, consult the website for the University Fellowships Committee or inquire directly with faculty to express your interest in being involved in their research.

National Fellowships Competitions

Boston College students need to be aware, early in their undergraduate careers, of the fellowships and awards given on a competitive basis by national foundations. Fulbright Grants, Marshall Scholarships, Mellon Fellowships, National Science Foundation Fellowships, Rhodes Scholarships, and Truman Scholarships are among the major grants available. Some of these are available to juniors and seniors for undergraduate study. In order to have a realistic chance of competing for one of these awards, students need to plan ahead. Students interested in pursuing any of these opportunities should contact Dr. Jason Cavallari, the Director of the University Fellowships Office. Many of these opportunities are especially for students planning a future in public service, so they are very appropriate for Political Science majors. In recent years, several of the Department’s majors have, for instance, been awarded Fulbright Grants and Truman Scholarships. We encourage students to plan and prepare early—freshman year is not too early.

For further information about national fellowships, consult the University Fellowships Committee website.

Psychology and Neuroscience
Psychology is the scientific study of how and why people think, feel, and behave as they do. Psychology focuses on understanding basic functions such as memory, emotion, visual perception, social interaction, development and learning, and problem solving and creativity, as well as on alterations to these functions in psychopathology, developmental disorders, or neurological disorders. Faculty in our department approach these topics from multiple, converging levels, using assessments of individual behavior, dynamic group interactions, and investigations of the neural processes and computations that give rise to behavior. Our courses embody the philosophy of Boston College's liberal arts education, providing students the opportunity for intellectual growth and a deeper understanding of the scientific method as applied to the human condition. Our courses also provide the knowledge and tools necessary for students to prepare for graduate training.

The Department of Psychology and Neuroscience offers three majors: the Psychology Bachelor of Arts (B.A.) major, the Psychology Bachelor of Science (B.S.) major, and the Neuroscience Bachelor of Science (B.S.) major. There are two distinct sets of requirements for the Psychology B.S. major: one for the classes of 2023 and after, and one for the classes of 2022 and before. All three degree options introduce students to the broad range of topics that psychologists study, while also allowing students to choose an individualized course of study and focus on some aspects of psychology in greater depth. Each option allows students to gain research experience working in one or more of our labs.

The Psychology B.A. and the Psychology B.S. (classes 2023 and after) majors are particularly suited to students who wish to understand human behavior and mental function. Students will take Psychology courses relevant to social, developmental, biological, and cognitive psychology and will learn how animal models can be used to inform human behavior. Together these courses will provide students with an appreciation for the theories that have been put forth to explain human behavior and for the importance of considering clinical, cultural, social, biological, and developmental factors when trying to understand why humans think, feel, and act as they do. Both degree options introduce students to the broad range of topics that psychologists study, while also allowing students to choose an individualized course of study and focus on some aspects of psychology in greater depth.

The Psychology B.S. (classes of 2023 and after) is a research-focused track. Students interested in psychology as it relates to other scientific disciplines and/or who are planning to pursue research-focused graduate work (e.g., Ph.D., M.D.) are encouraged to select the B.S. major. B.S. students will take courses in Psychology and choose from elective corequisites in departments including Economics, Computer Science, Biology, Chemistry, and Physics. Together these courses will provide students with an in-depth understanding of the scientific study of the human mind and with opportunities for exposure to hands-on, laboratory science. This major is well-suited for students interested in a research-based approach to psychology. For students who are more likely to pursue graduate work without a focus on research (e.g., social work, law, Psy.D., Ed.D.) and/or would like greater flexibility in their course schedule, the B.A. may be more appropriate.

The Psychology B.S. (classes of 2022 and before) is particularly suited to students who wish to explore the brain mechanisms of human and animal behavior and mental functioning. Students will take courses from the Psychology, Biology, and Chemistry Departments that are related to evolution, genetics, physiology, neurobiology, and the neural basis of higher cognitive and emotional processes in humans. Together these courses will provide students with a strong foundation in the neurobiological processes that underlie behavior, motivation, and cognition. The Psychology B.S. (classes of 2022 and before) major covers most of the pre-medical requirements.

The Neuroscience B.S. is a research-focused degree for students who are interested in understanding the biological basis of brain function in relation to thought and behavior. The major has co-requisites in Biology and Chemistry as well as elective natural science corequisites and emphasizes exposure to hands-on, laboratory science. Students will take courses that are related to evolution, genetics, physiology, neurobiology, and the neural basis of higher cognitive and emotional processes in humans. Together these courses will provide students with a strong foundation in the neurobiological processes that underlie behavior, motivation, and cognition. The Neuroscience major covers many of the pre-medical requirements.

Requirements for Psychology B.A. Majors

Students must take a minimum of 33 credits, including the following required courses.

PSYC1110 and PSYC1111 should be taken in either order as early as possible. PSYC1120 and PSYC1121 (or a research practicum) should be taken sequentially and in the sophomore year when possible.
PSYC1110 Introduction to Brain, Mind, and Behavior (formerly Introduction to Psychology as a Natural Science) (3 credits)
PSYC1111 Introduction to Psychology as a Social Science (3 credits)
PSYC1120 Introduction to Behavioral Statistics and Research I (3 credits)
Either of the following courses (3 credits):
  ○ PSYC1121 Introduction to Behavioral Statistics and Research II
  ○ Any Research Practicum
Three 2000-level courses, including at least one course from three of the following five areas (9 credits):
  ○ Abnormal: PSYC2234 Abnormal Psychology
  ○ Biological: PSYC2285 Behavioral Neuroscience or PSYC2289 Comparative Psychology: Study of Animal Behavior
  ○ Cognitive: PSYC2272 Cognitive Psychology: Mental Processes and their Neural Substrates or PSYC2274 Sensation and Perception
  ○ Developmental: PSYC2260 Developmental Psychology or PSYC2262 Baby Talk
  ○ Social and Personality: PSYC2241 Social Psychology, PSYC2242 Personality Theories, or PSYC2245 Psychology of Motivation
Four additional courses in Psychology (12 credits), at least three of which must be at the 3000-level or higher and the fourth course at the 2000-level or higher

Requirements for Psychology B.S. Majors (Classes of 2022 and Before)

Students must take a minimum of 59 credits, including the following required courses.

PSYC1110 and PSYC1111 should be taken in either order as early as possible. PSYC1120 and PSYC1121 (or a research practicum) should be taken sequentially, and in the sophomore year when possible.

30 Credits within the Department

PSYC1110 Introduction to Brain, Mind, and Behavior (formerly Introduction to Psychology as a Natural Science) (3 credits)
PSYC1111 Introduction to Psychology as a Social Science (3 credits)
PSYC1120 Introduction to Behavioral Statistics and Research I (3 credits)
Either of the following courses (3 credits):
  ○ PSYC1121 Introduction to Behavioral Statistics and Research II
  ○ Any Research Practicum (recommended)
PSYC2285 Behavioral Neuroscience (3 credits)
Either of the following courses (3 credits):
  ○ PSYC2272 Cognitive Psychology: Mental Processes and their Neural Substrates
  ○ PSYC2274 Sensation and Perception
Any one of the following courses (3 credits):
  ○ PSYC2234 Abnormal Psychology
  ○ PSYC2241 Social Psychology
  ○ PSYC2242 Personality Theories
  ○ PSYC2260 Developmental Psychology
  ○ PSYC2245 Psychology of Motivation
Three neuroscience courses (9 credits): one from one of the following clusters and two from the other cluster. One of these three courses must be a designated laboratory course from one of these clusters. A Research Practicum may also
be used to fulfill this designated laboratory requirement, but the Research Practicum will not count toward one of these three required neuroscience cluster courses.

● **Cognitive/Affective Neuroscience Cluster:**
  ○ PSYC3329 Psychophysiology of Stress
  ○ PSYC3338 Topics in Abnormal Psychology
  ○ PSYC3341 Psychology of Morality
  ○ PSYC3360 How Extraterrestrials Think
  ○ PSYC3362 Mind of a Dog: How Canine Cognition Informs Human Psychology
  ○ PSYC3371 Cognitive Neuroscience
  ○ PSYC3372 Affective Neuroscience
  ○ PSYC3373 Learning and Motivation
  ○ PSYC3374 Cognitive Aging
  ○ PSYC3375 Psychology and Neuroscience of Human Memory
  ○ PSYC3378 Vision
  ○ PSYC3379 Disorders of Language and Communication
  ○ PSYC3391 Ethical Controversies in Psychology and Neuroscience
  ○ PSYC3397 Cognitive and Neural Bases of Person Knowledge
  ○ PSYC4433 Addiction, Choice, and Motivation
  ○ PSYC4437 Stress and Behavior
  ○ PSYC4472 fMRI
  ○ PSYC4473 Event-Related Potentials (laboratory course)
  ○ PSYC4476 Cognitive Neuroscience of Memory
  ○ PSYC5540 Advanced Topics in Social Psychology
  ○ PSYC5541 Moral Emotions
  ○ PSYC5571 Controversies in Cognitive Neuroscience
  ○ PSYC5574 Neuroscience of Sensation and Perception
  ○ PSYC5575 Advanced Affective Neuroscience
  ○ PSYC5576 Methods in Human Brain Mapping (laboratory course)
  ○ Any one of the following courses in a Cognitive/Affective Neuroscience laboratory (Brownell, Kensinger, Ritchey, Slotnick, Young). (Only one semester of a thesis or scholar’s project course can be used to satisfy this requirement):
    ■ PSYC4490 Senior Thesis I (laboratory course)
    ■ PSYC4495 Senior Honors Thesis I (laboratory course)
    ■ PSYC4497 Scholars Project Research (laboratory course)

● **Systems Neuroscience Cluster:**
  ○ PSYC3376 Developmental Neuroscience
  ○ PSYC3380 Neuroscience of Psychopathology
  ○ PSYC3381 Psychobiology of Emotional Learning
  ○ PSYC3383 Neurobiological Basis of Learning and Memory
  ○ PSYC3384 Neurophysiology
  ○ PSYC3385 Neurobiology of Motivation and Emotion
  ○ PSYC3386 Psychopharmacology
  ○ PSYC3388 Neurobiology of Eating and Eating Disorders
  ○ PSYC3389 Sex and Aggression
  ○ PSYC3390 Neurobiology of Psychiatric Disorders
  ○ PSYC3392 Neuroscience of Addiction
○ PSYC5580 Neural Systems and Stress
○ PSYC5581 Neurobiology of Mental Illness
○ PSYC5583 Molecular Basis of Learning and Memory
○ PSYC5585 Brain Systems: Motivation and Emotion
○ PSYC5587 Cellular Perspectives on Motivated Behavior
○ Any one of the following courses in a Behavioral Neuroscience laboratory (Christianson, McDannald, Petrovich). (Only one semester of a thesis or scholars project course can be used to satisfy this requirement)
  ■ PSYC4490 Senior Thesis I (laboratory course)
  ■ PSYC4495 Senior Honors Thesis I (laboratory course)
  ■ PSYC4497 Scholars Project Research (laboratory course)

29 Credits outside the Department

● Three Biology courses (9 credits):
  ○ BIOL2000 Molecules and Cells
  ○ Any two of the following Biology courses:
    ■ BIOL2010 Ecology and Evolution
    ■ BIOL3030 Introduction to Physiology
    ■ BIOL3040 Cell Biology
    ■ BIOL3050 Genetics
    ■ BIOL3150 Introduction to Genomics
    ■ BIOL3190 Genetics and Genomics
    ■ BIOL4260 Human Anatomy
    ■ BIOL4320 Developmental Biology
    ■ BIOL4330 Human Physiology
    ■ BIOL4350 Biological Chemistry
    ■ BIOL4590 Introduction to Neuroscience

● Two Chemistry courses (8 credits):
  ○ CHEM1109 General Chemistry I with Lab (CHEM1111)
  ○ CHEM1110 General Chemistry II with Lab (CHEM1112)

● Two of the following Mathematics courses (6 credits):
  ○ MATH1004 Finite Probability and Applications
  ○ A Mathematics course numbered MATH1100 or above
  ○ Another Mathematics course numbered MATH1100 or above

● Two of the following courses (6 credits):
  ○ Courses listed in the Cognitive/Affective Neuroscience and Systems Neuroscience clusters listed above
  ○ Biology courses at the 3000 level or above
  ○ Chemistry courses at the 2000 level or above
  ○ Physics courses at the 3000 level or above

Whenever an upper-level Biology, Chemistry, or Physics course that has an associated lab is taken, the student must also take the lab.

Students planning on applying to doctoral programs in neuroscience should consult with their advisor about which of these courses to choose. Highly recommended for such students are: CHEM2231 Organic Chemistry I and CHEM2232 Organic Chemistry II, MATH1100 and MATH1101 (Calculus I and II), and/or PHYS2209 Introduction to Physics I and PHYS2210 Introduction to Physics II.
Requirements for Psychology B.S. Majors (Classes of 2023 and After)

Students must take a minimum of 54 credits, including the following required courses:

36 Credits within the Department

- PSYC1110 Introduction to Brain, Mind, and Behavior (formerly PSYC1110 Introduction to Psychology as a Natural Science) (3 credits)
- PSYC1111 Introduction to Psychology as a Social Science (3 credits)
- PSYC1120 Introduction to Behavioral Statistics and Research I (3 credits)
- Any Research Practicum (3 credits)
- Three 2000-level courses, including at least one course from three of the following five areas (9 credits):
  - Abnormal: PSYC2234 Abnormal Psychology
  - Biological: PSYC2285 Behavioral Neuroscience or PSYC2289 Comparative Psychology: Study of Animal Behavior
  - Cognitive: PSYC2272 Cognitive Psychology: Mental Processes and their Neural Substrates or PSYC2274 Sensation and Perception
  - Developmental: PSYC2260 Developmental Psychology or PSYC2262 Baby Talk
  - Social and Personality: PSYC2241 Social Psychology, PSYC2242 Personality Theories, or PSYC2245 Psychology of Motivation
- Five additional courses in Psychology, at least four of which must be at the 3000-level or higher and the fifth course at the 2000-level or higher (15 credits)

18 Related Science Credits

- Two of the following courses (6 or more credits):
  - CSCI1101 Computer Programming I (recommended)
  - MATH1004 Finite Probability and Applications
  - MATH1100 Calculus I
  - MATH2210 Linear Algebra
- 12 additional science credits from the following:
  - Any Biology course at the level of BIOL2000 or above (excluding BIOL2040)
  - Any Computer Science course at the level of CSCI1102 or above
  - Any Math course at the level of MATH1100 or above
  - Any Physics course at the level of PHYS1500 or above
  - CHEM1105 Chemistry and Society I
  - CHEM1106 Chemistry and Society II
  - CHEM1109 General Chemistry I with Lab (CHEM1111)
  - CHEM1110 General Chemistry II with Lab (CHEM1112)
  - ECON2201 (or ECON2203) Microeconomic Theory
  - ECON3305 Market Design
  - ECON3308 Game Theory in Economics
  - ECON3312 Evolutionary Economics
  - LING2379 Language and Ethnicity
  - LING3101 General Linguistics
  - LING3102 Syntax and Semantics
  - LING3103 Language and Language Types
For all B.S. students, participation in research in a laboratory setting (e.g., enrolling in Senior Thesis) is strongly recommended.

Requirements for Neuroscience B.S. Majors

Students must take a minimum of 57 credits, including the following required courses.

Foundation (24 Credits)

- PSYC1110 Introduction to Brain, Mind, and Behavior (formerly PSYC1110 Introduction to Psychology as a Natural Science) (3 credits)
- Either PSYC2272 Cognitive Psychology: Mental Processes and their Neural Substrates (3 credits) or PSYC2274 Sensation and Perception (3 credits)
- BIOL2000 Molecules and Cells (3 credits)
- CHEM1109 General Chemistry I with lab (4 credits) or CHEM1117 Honors Modern Chemistry I with lab (4 credits)
- CHEM1110 General Chemistry II with lab (4 credits) or CHEM1118 Honors Modern Chemistry II with lab (4 credits)
- MATH1100 Calculus I (4 credits) or MATH1102 Calculus I (Math and Science Majors) (4 credits)
- Any one of the following courses (3 credits):
  - PSYC2285 Behavioral Neuroscience
  - BIOL4540 Neuroscience
  - BIOL4590 Introduction to Neuroscience

Computation (6 Credits)

- Any one of the following courses:
  - PSYC1120 Introduction to Behavioral Statistics and Research I
  - BIOL2300 Biostatistics
  - MATH3353 Statistics
  - MATH4427 Mathematical Statistics
  - SOCY2200 Statistics
- Any one of the following courses:
  - PSYC1121 Introduction to Behavioral Statistics and Research II
  - CSCI1101 Computer Science I
  - CSCI1102 Computer Science II
  - CSCI2227 Introduction to Scientific Computation
  - MATH1101 Calculus II, MATH1103 Calculus II (Math and Science Majors) or MATH1105 Calculus II-AP (Math and Science Majors)
  - MATH2210 Linear Algebra
A PSYC Research Practicum (cannot be double counted to fulfill Praxis requirement)

**Cognitive Neuroscience (3 Credits)**

- Any one of the following courses:
  - PSYC3338 Topics in Abnormal Psychology
  - PSYC3371 Cognitive Neuroscience
  - PSYC3372 Affective Neuroscience
  - PSYC3373 Learning and Motivation
  - PSYC3374 Cognitive Aging
  - PSYC3375 Psychology and Neuroscience of Human Memory
  - PSYC3378 Vision
  - PSYC3379 Disorders of Language and Communication
  - PSYC3391 Ethical Controversies in Psychology & Neuroscience
  - PSYC3397 Cognitive and Neural Bases of Person Knowledge
  - PSYC4437 Stress and Behavior
  - PSYC4446 Social Neuroscience
  - PSYC4472 fMRI
  - PSYC4476 Cognitive Neuroscience of Memory
  - PSYC5570 Advanced Topics in Cognitive Neuroscience
  - PSYC5571 Controversies in Cognitive Neuroscience
  - PSYC5573 Advanced Topics in the Neuroscience of Memory
  - PSYC5574 Neuroscience of Sensation and Perception
  - PSYC5575 Advanced Affective Neuroscience

**Systems Neuroscience (3 Credits)**

- Any one of the following courses:
  - BIOL4450 Behavioral Ecology
  - PSYC3329 Psychophysiology of Stress
  - PSYC3376 Developmental Neuroscience
  - PSYC3381 Psychobiology of Emotional Learning
  - PSYC3383 Neurobiological Basis of Learning and Memory
  - PSYC3384 Neurophysiology
  - PSYC3385 Neurobiology of Motivation and Emotion
  - PSYC3386 Psychopharmacology
  - PSYC3388 Neurobiology of Eating and Eating Disorders
  - PSYC3389 Sex and Aggression
  - PSYC3390 Neurobiology of Psychiatric Disorders
  - PSYC3392 Neuroscience of Addiction
  - PSYC5585 Brain Systems: Motivation and Emotion
  - PSYC5587 Cellular Perspectives on Motivated Behavior
  - PSYC5589 Neural Systems and Social Behavior

**Electives (18 Credits)**
Any six courses from the following:
  ○ Courses listed in the Cognitive Neuroscience and Systems Neuroscience clusters above (A course cannot double-count for both the cluster and elective requirements.)
  ○ Biology courses at the 3000 level or above
  ○ Chemistry or Physics courses at the 2000 level or above
  ○ CSCI3341 Artificial Intelligence
  ○ CSCI3343 Computer Vision
  ○ CSCI3345 Machine Learning

Praxis (3 credits)

Any one of the following courses:
  ○ PSYC2205 Undergraduate Research*
  ○ PSYC2206 Independent Study*
  ○ PSYC4401 Research Practicum in Computational Methods
  ○ PSYC4470 Research Practicum in Cognition Psychology
  ○ PSYC4471 Research Practicum in Experimental Psychology
  ○ PSYC4473 Event-Related Potentials
  ○ PSYC4474 Research Practicum in Sensation and Perception
  ○ PSYC4477 Research Practicum in Cognitive Neuroscience
  ○ PSYC4478 Research Practicum in Human Memory
  ○ PSYC4479 Research Practicum in Neurogastronomy
  ○ PSYC4481 Research Practicum in Behavioral Neuroscience
  ○ PSYC4490 Senior Thesis I*
  ○ PSYC4491 Senior Thesis II*
  ○ PSYC4495 Senior Honors Thesis I*
  ○ PSYC4496 Senior Honors Thesis II*
  ○ PSYC5576 Methods in Human Brain Mapping

*Students may conduct research with any faculty member, including those conducting neuroscience research outside of the department. Projects should have significant neuroscience components, and course proposals are subject to review by the Director of Undergraduate Studies.

Advanced Placement

A student who has earned AP credit by scoring a four or five on an Advanced Placement exam may substitute the exam for a relevant course, according to the following list.

Psychology: Either PSYC1110 or PSYC1111. Students making this substitution are required to take an additional Psychology course. For Psychology B.A. and B.S. majors, this course must be a Psychology course numbered 2000 or higher. For Neuroscience majors, this course must be from the Cognitive Neuroscience, Systems Neuroscience, or Electives clusters.

Biology: BIOL2000 Molecules and Cells.

Calculus AB: MATH1100 Calculus I
Calculus BC: MATH1100 Calculus I and MATH1101 Calculus II

Chemistry: CHEM1109 General Chemistry I and CHEM1110 General Chemistry II. Students may still be required to take the chemistry labs.

Statistics: We generally do not give major credit for the Statistics exam. A student can petition the Director of Undergraduate Studies for credit for PSYC1120.

**Senior Thesis**

Students in all three majors may choose to write a thesis during the senior year. In most cases, the thesis will involve original, empirical research, although theoretical papers will also be permitted. Students must obtain the consent of a faculty member to serve as their thesis advisor.

Those who are interested in writing a thesis are encouraged to participate in an Independent Study with a prospective thesis advisor during the junior year to develop a thesis proposal.

Seniors who are engaged in writing a thesis may enroll in PSYC4490 in the fall and/or PSYC4491 in the spring. Only one semester may count as an elective to fulfill a major requirement. Students who plan to write a thesis are advised to complete PSYC1120 Introduction to Behavioral Statistics and Research I and either PSYC1121 Introduction to Behavioral Statistics and Research II or a Research Practicum before their senior year.

Students whose theses are judged to be of exceptional merit will receive a note that their “Senior thesis passed with distinction.” This is kept on file in the department but not noted on transcripts.

**Clinical Concentration**

The Concentration in Clinical Psychology is designed for majors with a particular interest in careers in clinical or counseling psychology or clinical social work. The concentration lays a solid foundation in coursework, research, and field experiences to help students decide whether they wish to apply to a graduate program and obtain licensure to practice in a clinical field.

To complete the clinical concentration, students must satisfy their major requirements and some additional course requirements. A complete description of the concentration, along with a listing of the additional required courses, is available on the department’s website: go to the Undergraduate section, click Academic Opportunities, and click Concentration in Clinical Psychology. Contact the concentration advisor, Karen Rosen, for additional information.

**Honors Program**

The Psychology Honors Program offers students in our majors an excellent opportunity to get involved in research. The program is for students with strong academic records who wish to devote a substantial amount of time in their senior year to a senior honors thesis.

Students who are eligible to participate in the Psychology Honors Program receive a letter from the Honors Program Director at the beginning of their junior year. Students who meet or exceed the GPA requirement, in Psychology and overall, will be invited to join the Honors Program. The Honors Program requires a GPA of 3.6. Students must identify a faculty member in the Department of Psychology and Neuroscience who is willing to supervise them in their work. Students then need to complete a preliminary application by November 1 of their junior year. On this application, they need to indicate the issue or topic they would like to investigate in their honors thesis and the name of the faculty member who has agreed to advise them.
The principal requirement of the Honors Program is the completion of the honors thesis. During their senior year, students should enroll in PSYC4495-4496 Senior Honors Thesis I and II. In addition, students in the Honors Program are required to take one additional upper-level course (5000-level or above). One semester of the Senior Honors Thesis course (PSYC4495) may count toward the major requirements. The second semester of the Senior Honors Thesis course (PSYC4496) and the 5000-level course are taken in addition to the courses required for the majors. Therefore, students in the Honors Program will have completed two courses in Psychology beyond the basic major requirements.

For further information about the requirements of the Honors Program, distinctions between the MCAS Honors and Psychology Honors Programs, and what to do if you are planning to study abroad, visit our website or contact the Director of the Honors Program, Karen Rosen.

Study Abroad

Psychology and Neuroscience majors should arrange an appointment with their advisor for permission to study abroad. Students should meet with the Director of Undergraduate Studies for permission to apply courses taken abroad towards meeting major requirements. These decisions about international study are made on a case-by-case basis. Approval should be obtained before the start of the study abroad program.

Fifth Year M.A. Program

The Fifth Year M.A. program allows selected students to earn both a B.A. or B.S. in Psychology or in Neuroscience and an M.A. in Psychology in five years. The purpose of the program is to give students a greater opportunity for concentrated study and research training. Such training is excellent preparation for application to a Ph.D. program in any area of psychology. The Fifth Year M.A. program is limited to Boston College undergraduates who are majoring in Psychology or Neuroscience, and the fifth year must follow immediately after the fourth.

The Department of Psychology and Neuroscience has the following areas of concentration. Visit our website for additional information on these areas.

- Behavioral Neuroscience
- Cognitive Psychology and Cognitive Neuroscience
- Social Psychology
- Developmental Psychology
- Quantitative and Computational Psychology

Fifth Year B.A./M.S.W. Program

This program is available only to Psychology B.A. majors.

In cooperation with the Graduate School of Social Work, the Department of Psychology and Neuroscience offers a dual five-year master’s degree program for those students who have decided upon a career in social work. Students in this program complete their undergraduate requirements including those for the Psychology B.A. major during their first four years. In addition, in their junior year students begin to take Social Work courses. Upon successful completion of all undergraduate requirements, students receive the B.A. after their senior year at which time they are formally enrolled in the Graduate School of Social Work. Upon successful completion of all graduate requirements at the end of the fifth year, students are awarded the M.S.W. Students apply for admission to the five-year program during their sophomore year. Contact faculty advisor Michael Moore for more information.

Faculty Advisement
All majors should seek faculty advisement prior to each registration period. Faculty members provide expanded office hours during these periods. Students interested in studying abroad should seek the consent of their advisor.

Majors who do not have an academic advisor (e.g., majors in their first year of study or recent transfer students) should consult with the Director of Undergraduate Studies prior to registration.

**University Core Requirements**

PSYC courses numbered between 1010 and 1111 fulfill University Core requirements. PSYC1110 Introduction to Brain, Mind, and Behavior is a Natural Science Core course. All other Core courses in this department (e.g., PSYC1032, PSYC1072, PSYC1091, PSYC1092, and PSYC1111) are Social Science Core courses.

Students receiving a four or five on the Psychology AP exam have fulfilled half of the Social Science Core requirement.

**Prerequisites**

Course prerequisites are listed with each course description. If none is listed, the course has no prerequisites.

**Guide to Psychology Course Numbering**

**PSYC1000–PSYC1009**: Courses that *do not* satisfy the Social Science Core requirement and do not provide credit toward completion of the major.

**PSYC1010–PSYC1099**: Core courses that satisfy the Social Science Core requirement but *do not* provide credit toward completion of the major.

**PSYC1110–PSYC1111**: Courses that satisfy the Social Science Core requirement and also provide credit toward completion of the Psychology and Neuroscience majors.

**PSYC1112–PSYC1119**: Introductory, one-credit courses.

**PSYC1120–PSYC1999**: Introductory, statistical, and methodological courses.

**PSYC2000–PSYC2999**: Introductions to primary subdisciplines of psychology, serving as prerequisites to more advanced courses.

**PSYC3000–PSYC3999**: More advanced and/or specialized courses requiring one or more 2000-level courses as prerequisites.

**PSYC4000–PSYC4999**: Research practica and advanced seminars in various areas of psychology.

**PSYC5000–PSYC5999**: Seminars and Advanced Topics courses open to advanced undergraduates and to graduate students.

**PSYC6000 and above**: Graduate-level courses.

**Romance Languages and Literatures**
The Department of Romance Languages and Literatures offers both majors and minors in French, Hispanic Studies, and Italian, each of which affords a wide exposure to international culture and literature in the target language. The major offers solid preparation and guidance for students interested in teaching or in graduate studies and serves as an important foundation for work in many diverse fields such as law, medicine, interpreting, politics, publishing, and international business, to name only a few. The minor is a strong complement to other major programs at Boston College, offering linguistic proficiency as well as the analytic fundamentals of written and visual culture. To learn of the, in fact, numerous areas of employment in which mastery of a second language and culture gives you valuable, necessary skills and, indeed, a competitive edge, see Foreign Language Careers.

Unless otherwise stated, all courses are taught in the target language.

French Studies

A French Studies major assures exceptional competence in French, allowing students to work extensively and closely with literary and cultural artifacts that language makes possible. Building on their linguistic proficiency consolidated in the language program, majors expand that proficiency to a wide variety of French texts. This training exercises and assures our students' ability to analyze texts and contexts, as well as to conceive, articulate, and defend an original idea.

French Studies minors reap similar benefits, albeit to a lesser extent, by attaining linguistic proficiency and taking at least two 4000-level courses.

Language Courses for the Major and Minor

Students begin the program at the level most appropriate for their linguistic proficiency. Contact Prof. Andrea Javel (andrea.javel@bc.edu) for guidance about placement.

French Studies majors and minors may begin their program with Conversation, Composition and Reading I (FREN2209) or II (FREN2210).

French Studies Major Requirements

30 Credits (ten 3-credit courses), which must include:

- **12 credits (four 3-credit foundation courses)** to be chosen from among the following categories:*  
  ○ FREN3305 Wordplay: Introduction to Drama and Poetry  
  ○ FREN3306 Introduction to Narrative Forms  
  ○ FREN3307 Masterpieces of French Literature  
  ○ FREN3308 Advanced Language Studies in French  
  ○ FREN3309 Topics in French Culture and Civilization

*Note that the specific titles of the courses that fall within these “foundation categories” change from year to year (though not the course number); however, students can only take one course in each category.

- **12 credits (four advanced courses)** in French language, literature, or culture at the 4000 level or above.
- **6 credits (two elective courses)** to be chosen among the following:  
  ○ FREN2209 and FREN2210 French Conversation, Composition and Reading I and II (as entry-level courses only)  
  ○ Additional courses in French Studies at the 3000 or 4000 level  
  ○ Related courses with departmental permission
Notes and Conditions

- French Studies majors are required to enroll in at least one advanced course (4000 level or above) each semester of their senior year, regardless of whether they have completed the ten-course requirement for the major.
- 1-credit practicum courses do not count for the major.
- Maximum total transfer credit toward the major from study abroad: 15 credits (five 3-credit courses) for one year of study; 9 credits (three 3-credit courses) for one semester of study. No RLL credit will be granted for courses abroad conducted in English taken during a semester or academic year program.
- Credit toward the French Studies major will be granted for courses taken abroad (1) conducted in French; (2) of the sophistication and level of expectations appropriate for our program; (3) directly related to analysis of French-speaking peoples’ cultural production. Students taking courses in other disciplines are encouraged to seek credit for those courses in the appropriate departments.
- French Studies majors who transfer 9 credits (three 3-credit courses) or more from study abroad or elsewhere outside the department must take their remaining courses towards the major in the department.
- Students who do not study abroad may take up to two courses related to their major program of study outside the Department of Romance Languages and Literatures, with departmental permission.
- Approval for summer courses taught by Boston College faculty, including courses abroad, will be granted on a case-by-case basis by the Director of Undergraduate Studies in consultation with the French Studies section.

French Studies Minor Requirements

18 Credits (six 3-credit courses), which must include:

- 6 credits (two foundation courses) to be chosen from among the following categories*:
  - FREN3305 Introduction to Drama and Poetry
  - FREN3306 Introduction to Narrative Form
  - FREN3307 Masterpieces of French Literature
  - FREN3308 Advanced Language Studies in French
  - FREN3309 Topics in French Culture and Civilization

*Note that the specific titles of the courses that fall within these “foundation categories” change from year to year (though not the course number); however, students can only take one course in each category.

- 3 credits (one advanced course) at the 4000 or 7000 level
- 9 credits (three elective courses) to be chosen among the following:
  - FREN2209 and FREN2210 French Conversation, Composition, and Reading I and II (as entry level courses only)
  - Additional courses at the 3000 or 4000 level in French

Notes and Conditions

- French Studies minors must enroll in at least one advanced course (4000 level and above) during their senior year, regardless of whether they have completed the six-course requirement for the minor.
- 1-credit practicum courses do not count for the minor.
- Maximum total transfer credit toward a minor from study abroad: 9 credits (three approved 3-credit courses) for one year of study; 6 credits (two approved 3-credit courses) for one semester of study. No RLL credit will be granted for courses abroad conducted in English taken during a semester or academic year program.
- Credit toward the French Studies major will be granted for courses taken abroad (1) conducted in French; (2) of the sophistication and level of expectations appropriate for our program; (3) directly related to analysis of French-speaking peoples’ cultural production. Students taking courses in other disciplines are encouraged to seek credit for those courses in the appropriate departments.
- French Studies minors who transfer 9 credits (three 3-credit courses) or more from study abroad or elsewhere outside the department must take their remaining courses towards the minor in the department.
- All courses for the French minor will normally be in French, though one relevant course taught in English may be counted toward the minor with permission from the French Section.
- Approval for summer courses taught by Boston College faculty, including courses abroad, will be granted on a case-by-case basis by the Director of Undergraduate studies in consultation with the French section.

**Hispanic Studies**

A Hispanic Studies major assures exceptional competence in Spanish, allowing students to work extensively and closely with literary and cultural artifacts that language makes possible. Building on their linguistic proficiency consolidated in the language program, majors expand that proficiency to a wide variety of Hispanic texts. This training exercises and assures our students’ ability to analyze texts and contexts, as well as to conceive, articulate, and defend an original idea.

Hispanic Studies minors reap similar benefits, albeit to a lesser extent, by attaining linguistic proficiency and taking at least two 6000-level courses.

**Language Courses for the Major and Minor**

Students begin the program at the level most appropriate for their linguistic proficiency. Advanced, heritage, and native speakers of Spanish should seek advisement to determine where to enter the program from Professor Adela Penagos (adela.penagos@bc.edu).

Non-native Spanish speaking majors and minors may begin the program with Conversation, Composition and Reading II (SPAN2216) or Advanced Spanish (SPAN3392). Strong students who have taken Conversation, Composition and Reading II (SPAN2216) are not required to take Advanced Spanish (SPAN3392), but may do so if appropriate.

Note that linguistic proficiency equivalent to Advanced Spanish (SPAN3392) is a prerequisite for Contextos: Introduction to Literary Analysis in Spanish (SPAN3395), and Contextos is a prerequisite for all upper-level courses (SPAN6000 and above).

**Hispanic Studies Major Requirements**

30 Credits (ten 3-credit courses), which must include:

- **3 credits (one course) in SPAN3395 Contextos**
- **12 credits (four advanced courses) at the 6000 level in literature and culture**, which must include at least one course in each of the following categories:
  - Pre-1800 Peninsular literature and culture
  - Pre-1900 Latin American literature and culture
  - Post-1800 Peninsular literature and culture
  - Post-1900 Latin American literature and culture
- **15 credits (five elective courses)**, which may be chosen from:
  - SPAN2216 Spanish Conversation, Composition, and Reading II (as entry-level course only)
  - SPAN3392 Advanced Spanish
  - Additional courses at the 3000 or 6000 level in Hispanic Studies
  - Related courses with departmental permission

**Notes and Conditions**
Hispanic Studies majors are required to enroll in at least one 6000 level course each semester of their senior year, regardless of whether they have completed the ten-course requirement for the major.

1-credit practicum courses do not count for the major.

Maximum total transfer credit toward the major from study abroad: 15 credits (five 3-credit courses) for one year of study; 9 credits (three three-credit courses) for one semester of study. No RLL credit will be granted for courses abroad conducted in English taken during a semester or academic year program.

Credit toward the Hispanic Studies major will be granted for courses taken abroad (1) conducted in Spanish; (2) of the sophistication and level of expectations appropriate for our program; (3) directly related to analysis of Spanish-speaking peoples’ cultural production. Students taking courses in other disciplines are encouraged to seek credit for those courses in the appropriate departments.

Hispanic Studies majors who transfer 9 credits (three 3-credit courses) or more from study abroad or elsewhere outside the department must take their remaining courses towards the major in the department.

Students, who have taken SPAN3392 Advanced Spanish, will not receive credit toward the major for language or proficiency-building courses taken abroad.

Students who do not study abroad may take up to two courses related to their major program of study outside the Department of Romance Languages and Literatures, with permission of the Hispanic Studies section.

Approval for summer courses taught by Boston College faculty, including courses abroad, will be granted on a case-by-case basis by the Director of Undergraduate studies in consultation with the Hispanic Studies section.

Hispanic Studies Minor Requirements

18 Credits (six 3-credit courses), which must include:

- 3 credits (one course): SPAN3395 Contextos
- 6 credits (two advanced courses) at the 6000 level in literature and culture
- 9 credits (three elective courses), which can be chosen from:
  - SPAN2216 Spanish Conversation, Composition, and Reading II (as entry-level course only)
  - SPAN3392 Advanced Spanish
  - Additional courses at the 6000 level in Hispanic Studies

Notes and Conditions

- Hispanic Studies minors must enroll in at least one 6000 level course during their senior year, regardless of whether they have completed the six-course requirement for the minor.
- 1-credit practicum courses do not count for the minor.
- Maximum total transfer credit toward the minor from study abroad: 9 credits (three approved 3-credit courses) for one year of study; 6 credits (two approved 3-credit courses) for one semester of study. No RLL credit will be granted for courses abroad conducted in English taken during a semester or academic year program.
- Credit toward the Hispanic Studies major will be granted for courses taken abroad (1) conducted in Spanish; (2) of the sophistication and level of expectations appropriate for our program; (3) directly related to analysis of Spanish-speaking peoples’ cultural production. Students taking courses in other disciplines are encouraged to seek credit for those courses in the appropriate departments.
- Students who have taken SPAN3392 Advanced Spanish will not receive credit toward the minor for grammar or proficiency-building courses taken abroad.
- All courses for the Hispanic Studies minor will normally be in Spanish, though one relevant course taught in English may be counted toward the minor with permission from the Hispanic Studies Section.
- Approval for summer courses taught by Boston College faculty, including courses abroad, will be granted on a case-by-case basis by the Director of Undergraduate Studies in consultation with the Hispanic Studies section.

Italian Studies
An Italian Studies major assures exceptional competence in Italian, allowing students to work extensively and closely with literary and cultural artifacts that language makes possible. Building on their linguistic proficiency consolidated in the language program, majors expand that proficiency to a wide variety of Italian texts. This training exercises and assures our students' ability to analyze texts and contexts, as well as to conceive, articulate, and defend an original idea.

Italian Studies minors reap similar benefits, albeit to a lesser extent, by attaining linguistic proficiency and taking at least two advanced courses.

Language Courses for the Major and Minor

Students begin the program at the level most appropriate for their linguistic proficiency. For advisement about elementary and intermediate level placement, contact Prof. Brian O'Connor (oconnobc@bc.edu). For advisement at the post-intermediate level, contact Prof. Mattia Acetoso (acetoso@bc.edu).

Italian Studies majors and minors may begin their program with Conversation, Composition and Reading I (ITAL2213) or II (ITAL2214).

Italian Studies Major Requirements

30 Credits (ten 3-credit courses), which must include:

- **18 credits (six advanced courses)** in Italian literature or culture (5000 level and above)
- **12 credits (four elective courses)** to be chosen from the following:
  - ITAL2213 and ITAL2214 Italian Conversation, Composition and Reading I and II (as entry-level courses only)
  - Additional courses at the 3000, 5000 or 8000 level
  - Related courses with departmental permission

Notes and Conditions

- An Advanced Placement high school course in Italian with an exam score of 4 or 5 will count toward the Italian Studies major as one 3-credit elective.
- Italian Studies majors are required to enroll in at least one advanced course (5000 level and above) each semester of their senior year, regardless of whether they have completed the ten-course requirement for the major.
- 1-credit practicum courses do not count for the major.
- Maximum total transfer credit toward the major from study abroad: 15 credits (five 3-credit courses) for one year of study; 9 credits (three 3-credit courses) for one semester of study. No RLL credit will be granted for courses abroad conducted in English taken during a semester or academic year program.
- Credit toward the Italian Studies major will be granted for courses taken abroad (1) conducted in Italian; (2) of the sophistication and level of expectations appropriate for our program; (3) directly related to analysis of Italian-speaking peoples' cultural production. Students taking courses in other disciplines are encouraged to seek credit for those courses in the appropriate departments.
- Students who transfer 9 credits (three 3-credit courses) or more from study abroad or elsewhere outside the department must take their remaining courses towards the major in the department.
- Students who do not study abroad may take up to two courses related to their major program of study outside the Department of Romance Languages and Literatures, with departmental permission.
- Approval for summer courses taught by Boston College faculty, including courses abroad, will be granted on a case-by-case basis by the Director of Undergraduate Studies in consultation with the Italian Studies section.

Italian Studies Minor Requirements

18 Credits (six 3-credit courses), which must include:
6 credits (two foundation courses): ITAL2213 and ITAL2214 (Italian Conversation, Composition, and Reading I and II)
6 credits (two advanced courses) in Italian Literature or Culture at the 5000 level or above (courses for undergraduates)
6 credits (two elective courses) in Italian Literature or Culture at the 3000 level or above

Notes and Conditions

- An Advanced Placement high school course in Italian with an exam score of 4 or 5 will count toward the Italian Studies minor as one 3-credit elective.
- Italian Studies minors must enroll in one advanced course (5000 level or above) during their senior year, regardless of whether they have completed the six-course requirement for the minor.
- 1-credit practicum courses do not count for the minor.
- Maximum transfer credit toward a minor from study abroad: 9 credits (three approved 3-credit courses) for one year of study; 6 credits (two approved 3-credit courses) for one semester of study. No RLL credit will be granted for courses abroad conducted in English taken during a semester or academic year program.
- Credit toward the Italian Studies minor will be granted for courses taken abroad (1) conducted in Italian; (2) of the sophistication and level of expectations appropriate for our program; (3) directly related to analysis of Italian-speaking peoples’ cultural production. Students taking courses in other disciplines are encouraged to seek credit for those courses in the appropriate departments.
- All courses for the Italian Studies minor will normally be in Italian, though one relevant course taught in English may be counted toward the minor with permission from the Italian Studies section.
- Approval for summer courses taught by Boston College faculty, including courses abroad, will be granted on a case-by-case basis by the Director of Undergraduate Studies in consultation with the Italian Studies section.

Study Abroad Guidelines and Policies

Majors and minors in French, Hispanic Studies, and Italian are encouraged to study abroad. Interested students should consult with the appropriate program director in the Office of International Programs.

No RLL credit will be granted for courses taken abroad conducted in English, except for summer courses taught by Boston College faculty (in which case a maximum of three credits are transferrable). Credit is not automatically granted for courses taken in the target language. Courses must show a direct relationship to the student’s program of study.

In order to earn credit in an RLL major or minor, courses must be in the target language, show a direct relationship to the student’s program of study in the department, and have a level of sophistication comparable to departmental offerings. Students are encouraged to seek credit for courses in other disciplines, such as (but not limited to) economics, political science, communications, and history, from appropriate Boston College departments.

Students are urged to consult with the Director of Undergraduate Studies for pre-approval of any courses they would like to transfer into a major or minor in French, Hispanic Studies, or Italian. This should happen before departure or on-site abroad before enrollment. Students who seek approval only after they return from abroad risk not receiving Romance Languages and Literatures credit for courses taken abroad. Upon return, students should meet with the Director of Undergraduate Studies to obtain the appropriate signed forms.

To schedule an appointment with the Director of Undergraduate Studies, contact the Romance Languages and Literatures Department, Lyons 304, 617-552-3820; rll@bc.edu.

For further information about Study Abroad requirements, please consult our department website.
Transfer of Credit from Study Abroad

Romance Languages and Literatures majors may earn credit for up to three courses (9 credits) toward their major in a single semester of study abroad, and credit for up to five courses (15 credits) in a two-semester program. Courses must be related to textual and cultural analysis and must be in the target language. Majors who transfer 9 credits or more (three 3-credit courses) from study abroad into their RL&L major must take their remaining courses in the department.

Romance Languages and Literatures minors may earn credit for up to two courses (6 credits) toward their minor in a single semester of study abroad, and credit for up to three courses (9 credits) in a year-long program. Courses must be related to textual and cultural analysis and must be in the target language.

For more detailed information about study abroad credit transfer, visit the Romance Languages and Literatures Study Abroad web page.

For further information or to declare a major or minor, please contact the Romance Languages and Literatures Department, Lyons 304; rll@bc.edu.

Getting Started

Students who plan to major or minor in Romance Languages and Literatures should consult the Director of Undergraduate Studies to review their qualifications, establish correct placement in the program, and organize a course of study suited to their individual needs and objectives.

Information for First-year Majors and Non-majors

Students considering a major or minor in Romance Languages and Literatures are welcome to contact the Director of Undergraduate Studies to discuss how the program might relate to and enhance their career and life objectives (rll@bc.edu).

Students who have not already fulfilled the language proficiency requirement through an achievement or advanced placement test should sign up for an appropriate language course. Refer to the requirements for the Morrissey College of Arts and Sciences degree programs found in the Academic Regulations section of this catalog. Placement tests in French and Spanish are available.

The RLL Department offers courses, some taught in the target languages and some in English, that satisfy University Core requirements and also earn credit in the major or minor. Students interested in advancing their major credits at the early stages of their Boston College careers are encouraged to take these Core courses.

Core Offerings: Literature and Cultural Diversity

All the courses offered in the Department of Romance Languages and Literatures explore the culture and literature of countries around the world where French, Italian, and Spanish are spoken. In addition, the department has created a number of courses for inclusion in the Morrissey College of Arts and Sciences Core, both Literature and Cultural Diversity, which are designed for non-specialists.

Literature Core

Core offerings, whether in the target language or in translation, treat texts in their full linguistic, artistic, and cultural contexts. Literature Core courses offer students close exposure to great narrative arts, whether visual or written, under the guidance of a professor sensitive to their original language. Comparative literature courses introduce students to the interplay of artistic forms and themes across national boundaries. In order to achieve an intimate understanding of the texts studied, all Core courses propose close reading and thorough discussion of a limited number of texts.
For a list of courses that satisfy the Literature Core requirement, visit [www.bc.edu/core](http://www.bc.edu/core).

**Cultural Diversity Core**

The curriculum of Romance Languages and Literatures offers courses that treat the cultures of people around the world who speak French, Spanish and Italian, including western Europe as well as Hispanic and Francophone cultures in the Caribbean, South and Central America, Africa, and Asia. Students can choose from a number of courses that focus on these cultures in order to satisfy the Cultural Diversity Core requirement.

For a list of courses that satisfy the Cultural Diversity Core requirement, visit [www.bc.edu/core](http://www.bc.edu/core).

**The Departmental Honors Program**

The Honors Program offers RLL majors a unique opportunity to conduct research and write a thesis on a topic of their choice, under the guidance of a faculty member in the department. Students admitted into the program will work throughout the senior year with their Thesis Director.

To be eligible, candidates must be declared majors in the Department of Romance Languages and Literatures with a grade point average of 3.4 or higher. No more than 9 credits must remain for completion of the major in their senior year. Candidates must also have exhibited the maturity and self-discipline that long-term independent work requires.

Faculty members will nominate students for the Honors Program in April of their junior year. Nominated students will be invited to meet with the Program Coordinator during the semester preceding their enrollment in the program. The final decision about acceptance into the program will be made during the first week of registration.

For complete details, please read the RLL Honors Program Guidelines available on the [Romance Languages and Literatures website](http://www.bc.edu/core). After consulting the guidelines, interested students should contact their current RLL instructor to inquire about nomination to the program.

**Undergraduate Research Positions**

Departmental faculty regularly obtain university funding for undergraduate majors and minors to work on research projects with them during a set number of hours per week. Interested students should contact their current professor or the Director of Undergraduate Studies.

**Sociology**

The undergraduate program in Sociology is designed to satisfy the intellectual, career, and civic interests of students who are concerned about what is happening in their society and in their daily personal interactions. The sociological perspective and the technical knowledge and skills developed in this program contribute to personal growth and are useful in a broad range of occupations. The program prepares students for graduate study in sociology, social work, law, urban affairs, governmental administration, criminal justice, industrial organization, education, etc.

Many Sociology courses are part of the University Social Science Core. These courses address a wide range of important sociological themes ranging from the study of major social institutions, such as the family, religion, education, mass media, the workplace, and justice system, to the analysis of global social processes including culture, identity formation, war and peace, deviance and social control, aging, social movements, and inequalities in the areas of race, class, and gender.

**Information on Core Courses**
Course listings in Course Information and Schedule will indicate which, if any, Core requirements are satisfied by each course.

**Major Requirements**

Sociology majors are required to take a minimum of 30 credits (generally ten courses) in Sociology. These courses must include the following:

- Either SOCY1001 Introductory Sociology (preferably SOCY1001.01, the section designed for Sociology majors), or SOCY1002 Intro to Sociology for Healthcare Professionals, but not both.
- Statistics (SOCY2200), Social Theory (SOCY2215), and Research Methods (SOCY2210) are also required.
- 18 credits in elective courses, at least 9 credits of which must be in upper level courses (SOCY3000 or higher).

**Minor Requirements**

Sociology minors are required to take a minimum of 18 credits (generally six courses). These courses must include the following:

- Either SOCY1001 Introductory Sociology (preferably SOCY1001.01, the section designed for Sociology majors), or SOCY1002 Intro to Sociology for Healthcare Professionals, but not both.
- Statistics (SOCY2200), Social Theory (SOCY2215), and Research Methods (SOCY2210) are also required.
- 6 credits in elective courses, at least 3 credits of which must be in courses numbered SOCY3000 or above.

**Honors Program**

Membership in the undergraduate Honors Program in Sociology is by invitation and is designed to give eligible Sociology majors (3.50 GPA, 3.50 in Sociology) the experience of doing original sociological research that leads to a Senior Honors Thesis. The program includes a three-course Honors sequence that allows students to work closely with their faculty and other students in the Program. The sequence begins in the second term of the junior year when students read some of the most engaging classics of sociological research. In the first semester of the senior year, students design an original project and in the last semester of the senior year, they gather and analyze the data and write the thesis. For details, consult Professor Sarah Moorman.

**Information for Study Abroad**

Although the Sociology Department designates no particular prerequisites, it strongly recommends that students have completed at least five courses in Sociology, including all of the required courses (Introductory Sociology or Intro to Sociology for Health Care Professionals, Statistics, Methods, and Theory), prior to going abroad.

Courses taken overseas in a department of Sociology or Anthropology of a BC-approved program will almost always be accepted for credit towards the Sociology major. The department recommends not more than two Sociology courses in any one semester or five Sociology courses in a full year. Courses taken in other departments will not be considered for Sociology credit unless a syllabus and reading list are submitted. All Sociology majors should consult with Professor Eve Spangler, McGuinn 402, when planning their study abroad program. The Sociology Department does not accept overseas courses for Social Science Core credit.

**Five Year Master’s Degrees with a Sociology Major**

Majors in Sociology have the opportunity to earn two degrees over a period of five consecutive years. There are two separate programs:
B.A./M.A. Program

Application normally takes place by February 1 of the second semester of the junior year. The applicant must submit the same admissions materials as are required of all graduate degree applicants. Apply online at the Admission website.

Undergraduates must understand that admission is highly competitive. Normally, a student must have an overall GPA, after five semesters, of at least 3.50 with at least a 3.50 GPA in Sociology courses. For details, consult the Director of Graduate Admissions no later than the first semester of the junior year.

B.A./M.S.W. Program

The choice of this program will provide the Sociology major with an undergraduate B.A. degree in Sociology and with the professional degree of Master of Social Work. The B.A. degree will be awarded with the student's undergraduate class. The master's degree will be awarded one year later. The choice of this program should be made by Sociology majors before April of their sophomore year so that the required course sequence and degree requirements can be fulfilled. For details, consult Professor Sara Moorman and the M.S.W. Program website.

Theatre

The Boston College Theatre Department—faculty, staff, and students—is committed to theater education that combines art with scholarship and drama study with theater practice. We seek to foster creativity, critical thinking, excellence, and professionalism through the integration of courses, productions, workshops, and other activities. We value theater as a liberal art as well as a performing art, which means that we seek to understand it not only as a means of artistic expression and a form of entertainment, but as a window onto history, a method of inquiry into all things human, and a vehicle for social change. Interested students are invited to join us in this mission regardless of previous experience. Those who do will develop an intellectual frame of reference, a theatrical imagination, and practical skills that prepare them for advanced training in a wide range of disciplines and vocations.

Major Requirements

The Theatre Department offers a major in Theatre and students earn a bachelor of arts degree. Students must successfully complete a total of eleven 3-credit courses, five of which constitute the foundation upon which the upper-level courses are built. Ideally, these five courses will be completed by the end of the sophomore year. The required foundation courses are:

- THTR1172 Dramatic Structure and Theatrical Process (fall only) or, only in special cases, THTR1170 Introduction to Theater (fall and spring)
- THTR1103 Acting I: Fundamentals of Performance (fall and spring)
- THTR1130 Elements of Stagecraft (spring only; corequisite THTR1017 1-credit lab)
- THTR1140 Elements of Theatrical Design (fall only; corequisite THTR1018 1-credit lab)
- THTR2275 History of Theater I (fall only) or THTR2285 History of Theater II (spring only)
- Two upper-level Performance/Production courses (numbered from THTR3300 to THTR3369 or from THTR4400 to THTR4469)
- Three upper-level Dramatic Literature, Criticism, and Theater History courses (numbered from THTR3370 to THTR3389 and from THTR4470 to THTR4489 or History of Theater I or II that is in addition to the one taken previously)
- One Theatre Elective, THTR2000 and above, chosen from the Theatre Department curriculum according to individual interest. Students may bundle three 1-credit mini-courses together to make one General Theatre Elective.
- Four additional Production Lab credits numbered THTR1011 through 1016 and THTR1020 through 1060. These are experiential learning courses that involve practical work backstage or in the shops (1 credit) or as a designer or stage manager (2 credits) on Theatre Department productions. Students register for Labs at the beginning of each semester.
Students who wish to declare a Theatre major should contact Professor Luke Jorgensen, Acting Chairperson, luke.jorgensen@bc.edu, with an e-mail indicating their interest and providing their Eagle ID number.

### Minor Requirements

The Theatre minor is intended for students with a serious interest in theater who for one reason or another are not able to commit to fulfilling the requirements for the Theatre major. Based on the same principles and structure as the Theatre major, it aims to provide students with a broad-based theater education that balances courses in theater studies and theater practice.

A Theatre minor will complete the following courses and requirements:

- THTR1172 Dramatic Structure and Theatrical Process (fall only) or, only in special cases, THTR1170 Introduction to Theater (fall and spring)
- THTR1103 Acting 1: Fundamentals of Performance (fall and spring)
- THTR1140 Elements of Theatrical Design (fall only; corequisite THTR1018 1-credit lab) or THTR1130 Elements of Stagecraft (spring only; corequisite THTR1017 1-credit lab)
- THTR2275 History of Theater I (fall only) or THTR2285 History of Theater II (spring only)
- One upper-level Dramatic Literature, Criticism, and Theater History courses (numbered from THTR3370 to THTR3389 and from THTR4470 to THTR4489 or History of Theater I or II that is in addition to the one taken previously)
- One upper-level Performance/Production courses (numbered from THTR3300 to THTR3369 or from THTR4400 to THTR4469)
- Two additional Production Lab credits numbered THTR1011 through 1016 and THTR1020 through 1060

Students who wish to declare a Theatre minor should contact Professor Luke Jorgensen, Acting Chairperson, luke.jorgensen@bc.edu, with an e-mail indicating their interest and providing their Eagle ID number.

For students in the Lynch School of Education and Human Development with an interest in the teaching and practice of theater in school and institutional settings, the Theatre Department offers a minor in Educational Theatre. An Educational Theatre minor will complete the following courses and requirements:

- THTR1172 Dramatic Structure and Theatrical Process (fall only) or, in special cases, THTR1170 Introduction to Theater (fall and spring)
- THTR1103 Acting 1: Fundamentals of Performance (fall and spring) or THTR1130 Elements of Theater Production I (spring only)
- THTR3378 Creative Dramatics (fall only)
- THTR2268 Theater for Youth (spring only) or THTR3366 Directing I (fall only) or THTR4469 Composition and Performance Workshop (intermittent)
- One upper-level Literature, Criticism, History course (see above) or THTR2275 History of Theater I (fall only) or THTR2285 History of Theater II (spring only)
- One upper-level Production/Performance course (see above) or THTR1130 Elements of Stagecraft (fall only)
- Two 1-credit Production Labs (including at least one Prep Lab)

**Educational Theatre minor:** Lynch School of Education and Human Development students who wish to declare this minor should contact Professor Luke Jorgensen, Acting Chairperson, (luke.jorgensen@bc.edu) with an e-mail indicating their interest and providing their Eagle ID number. Contact should also be made with the Assistant Dean in the Lynch School of Education and Human Development.

All courses for the Morrissey College of Arts and Sciences minor in Theatre and the Lynch School of Education and Human Development minor in Educational Theatre need to be chosen from the Theatre Department curriculum. Courses taken abroad,
Mentoring and Advisement

The Theatre Department faculty place great emphasis on academic advisement and professional mentoring. We are committed to helping students design an academic program that stimulates their curiosity, supports their interests, and advances their abilities. In this interest, we encourage students to pursue professional internships and/or summer training programs that provide practical experience and help to clarify long-range goals. When arranged in advance, internships can earn academic credit and often lead to job offers after graduation. Junior and senior Theatre majors are guided and coached as they prepare for graduate study, advanced training, a full-time professional internship, or early-career job experience.

The Theatre Department Production Program

The Theatre Department maintains an ambitious co-curricular production program that includes four faculty-or-guest directed Mainstage productions and two student-directed, student-designed Workshop productions per academic year. Casting is open to all students and based mainly on audition. The Theatre Department actively encourages students of color to audition for all productions and is firmly committed to a policy of non-traditional color conscious casting, which means that race and ethnicity are not a factor when casting decisions are made. Opportunities abound for students who are interested in design, technical production, and stage management.

Information for Study Abroad

The Theatre Department has no formal affiliation with international programs that focus on theater training or theater study. Students who are considering study abroad are advised to meet with their advisor a full year in advance of their departure in order to plan their academic progress and discuss the advantages and disadvantages of being off campus for a semester or more as an upperclassman. In general, students can receive credit towards the Theatre major (as appropriate) for no more than one course taken abroad. For more information, please contact Professor Luke Jorgensen, Acting Chairperson, luke.jorgensen@bc.edu.

Theology

The undergraduate program in Theology is designed to provide students with the knowledge and skills necessary for a reasoned reflection on their own values, faith, and tradition, as well as on the religious forces that shape our society and world. As a broad liberal arts discipline, theology encourages and guides inquiries into life's most meaningful issues from such diverse perspectives as ethics, biblical studies, history, psychology, social studies, philosophy, and comparative religion. There is a strong, although not exclusive, emphasis on Christianity, especially as manifested in the Roman Catholic tradition.

The major in Theology has proven to be excellent preparation for vocations requiring careful reasoning, close reading, clarity in written expression, the ability to make ethical decisions, and a broad understanding of cultures. It provides a solid background for graduate study in the humanities and for such professional schools as medicine, business, and law. For those wishing to pursue a career in ministry or religious education Theology is, of course, still a prerequisite. Long gone, however, is the time when Theology was considered the exclusive domain of seminarians and the religious. Many students now elect Theology as a second major to balance and to broaden their education and to provide perspective on such first majors as biology, political science, or English literature.

Students who elect to major or minor in Theology are encouraged to meet with the Department's Director of Undergraduate Studies to review their opportunities as well as pertinent departmental policies.

The Theology Department boasts a large, internationally known faculty with expertise in areas as diverse as systematic theology, ethics, biblical studies, church history, liturgy, psychology of religion, and the dialogue between Christianity and other major religious traditions. A prestigious graduate program leads to the Ph.D. degree in several specialties. Nevertheless, the Department as a whole remains fully committed to the teaching of undergraduates and to the education of Theology majors.
Course Offerings

The Department distinguishes four levels of course offerings:

1. Level One/Core (THEO1000–1999)—introductory, designed for the fulfillment of the University's basic Theology requirement
2. Level Two (THEO2000–4999)—undergraduate, more specifically aimed at minors and majors
3. Level Three (THEO5000–5999)—addressed to advanced undergraduates (usually majors) and graduate students who are more theologically proficient
4. Graduate (THEO 6000–7999)—offered exclusively for professionally academic theological formation

Core Options

The Core requirement in theology is six credit hours and may be fulfilled by either of the following options (A or B):

A. Two 3-Credit Courses: One CT and one STT

Students must take one Christian Theology (CT) course and one Sacred Texts and Traditions (STT) course. These need not be taken in any particular order and may even be taken in the same semester.

Christian Theology (CT) Courses

- THEO1401 Engaging Catholicism
- THEO1402 God, Self, and Society

Sacred Texts and Traditions (STT) Courses

- THEO1420 The Everlasting Covenant: The Hebrew Bible
- THEO1421 Inscribing the Word: The New Testament
- THEO1422 The Sacred Page: The Bible
- THEO1430 Buddhism and Christianity in Dialogue
- THEO1431 Islam and Christianity in Dialogue
- THEO1432 Hinduism and Christianity in Dialogue
- THEO1433 Chinese Religions and Christianity in Dialogue
- THEO1434 Judaism and Christianity in Dialogue

Enduring Questions courses offered by the Theology Department (THEO17XX) will be identified as counting as either towards Christian Theology (CT) or Sacred Text and Traditions (STT) requirement. Note: a student may not fulfill their Theology Core with two Enduring Questions courses.

B. 12 Credit Options

A student may take either of these course sequences to fulfill the Theology requirement:

- THEO/PHIL1088–1089 Person and Social Responsibility I and II (for PULSE Program students only)
- THEO/PHIL1090–1091 Perspectives on Western Culture I and II (for first-year students only)
Major Requirements

The major curriculum in Theology incorporates both structure and flexibility, intensive focus and breadth of scope. Majors take a combination of essential, required courses and electives from within and outside the Department of Theology. Programs are designed in consultation with the Director of Undergraduate Studies. Theology majors must choose one of the following curricular tracks:

I. The **Standard Theology Major (30 hours)** is relatively unstructured and flexible, easily tailored to various motivations and goals for theological study and adaptable to the diverse paths and timetables by which students come to the major. It offers a theological enrichment and complement to a student's BC education, through the following requirements:

   1. *Theology Core* (2 courses; 6 credits)
   2. *Majors Course:* “Conciliar Traditions” (1 course; 3 credits)
   3. *Majors Seminar:* “Key Theologians and Texts” (1 course; 3 credits)
   4. *Electives* (6 courses; 18 credits)*

II. The **Honors Theology Major (36 hours)** is designed for Theology as a first major, especially for students with an interest in further study of theology or related fields. Both rigorous and comprehensive, it provides an integrated introduction to the discipline and a broad foundation for further study. With its comprehensive distribution requirements across all areas, it exposes students to the entire breadth of the theological discipline. With increased credit hours and an optional thesis, it is capacious enough for students to focus on a particular sub-discipline in which to pursue and demonstrate theological excellence. As an Honors Program it would also allow students to be recognized for their achievement, both within and outside the university, thus facilitating admission to the next level of study. Students are expected to maintain a 3.5 GPA within the major.

**Requirements:**

1. *Theology Core* (2 courses; 6 credits): Students must fulfill their normal Theology Core requirements with either (A or B):

   A. One semester of Christian Theology:

      ● THEO1401 Engaging Catholicism
      ● THEO1402 God, Self, and Society
      ● CT-themed Enduring Questions/Complex Problems

   And one semester of Sacred Texts and Traditions from the following:

      ● THEO1430 Buddhism and Christianity in Dialogue
      ● THEO1431 Islam and Christianity in Dialogue
      ● THEO1432 Hinduism and Christianity in Dialogue
      ● THEO1433 Chinese Religions and Christianity in Dialogue
      ● THEO1434 Judaism and Christianity in Dialogue
      ● STT-themed Enduring Questions/Complex Problems

   (NOTE: Honors Majors may **not** fulfill their STT core requirement with THEO1420, THEO1421, or THEO1422)

   B. Perspectives or PULSE.
2. **Scripture Sequence** (2 courses; 6 credits): Students must also complete both THEO1420 The Everlasting Covenant: The Hebrew Bible and THEO1421 Inscribing the Word: The New Testament.

3. **Majors Course:** “Conciliar Traditions” (1 course; 3 credits)

4. **Majors Seminar:** “Key Theologians and Texts” (1 course; 3 credits)

5. **Honors Distributions** (3 courses; 9 credits): 1 upper-level course (Level 3 or above) in each of the sub-disciplines *not already covered* by the Theology Core or Scripture Sequence.

6. **Honors Electives** (4 courses; 12 credits), including an *optional* Honors Thesis (6 or 12 credits)*

*2 courses/6 credits from another discipline (including the first major) may also count toward the Standard Theology or Honors Theology majors, provided that they have sufficient theological relevance as determined by the Director of Undergraduate Studies.

The Department's membership in the Boston Theological Interreligious Consortium (BTI) allows advanced Theology majors to cross-register into some 7,000 courses taught by 150 faculty members at eight other BTI schools. Students thus have access to the resources of one of the world's great centers of theological study.

## Minor Requirements (21 Hours)

The Theology minor consists of the Theology Core requirement plus five 3-credit courses that are Level Two or above.

## Information for First Year Majors and Non-majors

Theology is the academic discipline concerned with the realities that are the center of religious faith and with the traditions of belief and worship that inform the life of communities of faith. Historical, biblical, psychological, ethical, pastoral, comparative, philosophical, and doctrinal studies are all included within the scope of Theology at Boston College, which introduces the undergraduate to a mature, critical approach to religious knowledge and experience. There is a strong, but by no means exclusive, emphasis on Christianity, and more specifically, on the Roman Catholic tradition.

The courses offered are grouped in four categories: (1) biblical, (2) historical, (3) ethical and social-scientific, and (4) comparative and systematic or doctrinal. All courses, particularly those taught at the Core level, aim at fulfilling certain goals:

- A liberal arts goal of fostering awareness of the religious roots and background of our culture—for example, by giving students a coherent view of religion and its development, a groundwork for moral decision, and an awareness of their own existence as religious persons.
- A specifically theological goal of introducing the materials and methods of one or more approaches to the academic study of religious faith and tradition.

A religious or confessional goal, explicit in some—though not all—courses, of exploring a particular tradition from the inside, healing negative encounters with religion, inviting commitment and belief, and the like.

## Information for Study Abroad

There are no formal requirements stated by the Theology Department, but it is presumed that students will have completed at least one Core course *(or 3 credits of the Core)* before going abroad. The Department will allow 6 credits or two courses taken abroad to count toward major credit. A maximum of one Core course (3 credits) may be taken abroad.
The international programs at the University of Durham and Oxford University are both recommended by the Theology Department. All Theology majors should contact the Director of Undergraduate Studies while planning their study abroad program.

**Lonergan Center**

Studies related to the work of the Jesuit theologian and philosopher Bernard Lonergan (1904–1984) have a focus in the Lonergan Center at Boston College. The Center houses a growing collection of Lonergan’s published and unpublished writings as well as secondary materials and reference works, and it also serves as a seminar and meeting room. Kerry Cronin is the Associate Director of the Lonergan Center, which is located on the fourth level of Bapst Library and is open during regular hours as posted. Information about the Center or the Lonergan Institute is available at [www.bc.edu/lonergan](http://www.bc.edu/lonergan).

**University Courses**

**University Capstone Courses**

For up-to-date information on Capstone, including the best way to register, the seminars available, their syllabi, and the faculty, please see the Capstone website at [www.bc.edu/capstone](http://www.bc.edu/capstone).

A **course for seniors**: Reserved for seniors only, the Capstone program is designed to cap off college by facing the questions of life after graduation. The Capstone Seminars (UNCP5500–UNCP5599 only) directly address the hopes and anxieties that seniors face but seldom find treated in traditional courses. They invite seniors to discover the patterns underlying their choices up to now. They also relate the life and learning of the past four years to the life and learning ahead. In this way, Capstone Seminars take seriously the struggle to integrate four crucial areas of life: work, relationships, citizenship, and spirituality.

**Ask some inevitable questions now, not later.**

How did my education prepare me to live? With everything I want to do, what will I have to compromise? How can I balance my career and my family? Can I find work with a higher meaning than my income? How do I wish to live responsibly and affect society?

**Special features of the courses:**

- Faculty from various departments
- Each section limited to 15–19
- Innovative teaching methods
- Interdisciplinary reading
- Some guest speakers from professional life

Capstone Seminars may satisfy major requirements if they are cross-listed in certain departments. Check with the instructor.

**To Register for a Capstone Seminar**

You must be a senior to take the course. **Students may take only one Capstone Seminar during their time at Boston College. Capstone Seminars may not be taken Pass/Fail. This is true whether the course is listed under the UNCP department numbers or as a course in a specific department. If a second Capstone course appears on your record, it will be removed. This could make you ineligible for graduation.**
Different Capstone Seminars will be offered each semester. All Seminars are interdisciplinary. You may register for any one of the seminars as a University (UN) course.

In addition, several Capstone seminars are cross-listed, both as University courses with a UNCP number and also as courses in the department of the professor offering the course. If you find a particular Seminar closed, try to register under the cross-listed number (e.g., if UNCP5500 is closed, try to register for the class as THEO2410, and vice versa). Some Capstones require “Department Permission”; if so, contact the instructor, not the Program Director. A Capstone Seminar can count as an elective for students in all colleges (Morrissey College of Arts and Sciences, Connell School of Nursing, Lynch School of Education and Human Development, Carroll School of Management). For majors in English, Philosophy, Theology, and certain other departments, it might satisfy the major requirements if the seminar is taken under the cross-listing in the department of his/her major. Check with the instructor.

Students should also understand the following rule:

No student may take more than one Capstone seminar during his/her undergraduate years. Thus, you may not take two Capstone courses in one semester or in two different semesters.

Schiller Institute for Integrated Science and Society

Global Public Health and the Common Good

The Undergraduate Minor in Global Public Health and the Common Good at the Schiller Institute for Integrated Science and Society at Boston College provides opportunities for community service, reflection, and experiential learning in the United States and abroad. This 6-course minor introduces students from a broad range of backgrounds to key concepts in Global Public Health.

Minor Objective

The goal of the 6-course minor in Global Public Health and the Common Good is to introduce students from a wide range of majors, disciplines and schools across Boston College to key concepts in Global Public Health. Program graduates will gain knowledge of:

- The theory, history, and key issues in Global Public Health;
- Epidemiology: the study of the distribution and determinants of health and disease in populations—the foundational science of public health;
- The social, economic, and environmental determinants of health and disease;
- The contributions of public health to the stability and well-being of modern societies; and
- The moral and ethical foundations of Global Public Health.

Minor Requirements

The Global Public Health and the Common Good minor consists of 3 required core courses and a selection of 3 elective courses.

Core Courses

- PHCG1210: Public Health in a Global Society (fall and spring, cross-listed as NURS1210)
- PHCG2120: Introduction to Epidemiology (fall and spring)
- One of the following:
  - PHCG2130: Global Public Health Law (fall semester only)
Electives

In addition to the 3 required courses students are also expected to select 3 elective courses from the list below. Please note: Additional electives may be considered subject to the approval of the program director and Associate Deans.

- Two Elective Courses from List A
- One Elective Course from List B

List A

**Carroll School of Management**

- Social Innovation and Entrepreneurship (MGMT2139)

**Connell School of Nursing**

- Population Health Nursing Theory (NURS4260, CSON students only)
- Population Health Practice in the Community (NURS4261, CSON students only)
- Global Healthcare (NURS5350) (Swiss exchange program course)
- Ecuador: Global Health Perspectives (NURS5345)

**Lynch School of Education and Human Development**

- Psychological Responses to Humanitarian Crises (APSY7471)
- Social Issues and Social Policy (APSY6397)
- Community Change: Prevention and Promotion (APSY3320)
- Building Sustainable Communities (APSY3320)
- Psychological Disorders
- Health Psychology (APSY4151)

**Morrissey College of Arts and Sciences**

**Biology**

- BIOL1440 Sustaining the Biosphere
- BIOL2300 Biostatistics
- BIOL5150 Vaccine Development and Public Health

**Communications**
COMM4465 Health Communication

*Earth and Environmental Sciences*

- EESC1174 Climate Change and Society
- EESC2297 Environmental Hydrology
- ENV3311 Sustainable Agriculture
- ENV3345 Environment and Public Health
- BSLW1113 Climate Change Law and Ethics

*Economics*

- ECON1151 Statistics
- ECON2242 Public Policy and an Aging Society

List B

Connell School of Nursing

• NURS3210 Contemporary Issues in Public Health

Lynch School of Education and Human and Development

• APSY4050 Public Health Practice in the Community

Morrissey College of Arts and Sciences

• BIOL2320 Case Studies in Epidemiology

Schiller Institute for Integrated Science and Society

• PHCG3120 Cancer Epidemiology
• PHCG4140 Children’s Health and the Environment

OR

• An approved field practicum at a local site in the Greater Boston area

Connell School of Nursing Students

CSON students only must take the following two courses, which will count as electives:

• NURS4260 Population Health Nursing Theory
• NURS4261 Population Health Practice in the Community
• One elective from List A or B above

Additional Notes

*Students enrolled in the Global Public Health minor can use no more than one course to satisfy the requirements of both the minor and the University core. The only exception is for CSON students, for whom two population health nursing courses (NURS4260 and 4261) will count as electives.
Students can use no more than one course to satisfy the requirements of both the Global Public Health minor and their major.

**Woods College of Advancing Studies, Undergraduate Programs**

The James A. Woods, S.J., College of Advancing Studies offers both full and part-time study to undergraduate and graduate students from widely differing backgrounds and preparations who wish to maximize their experiences and master the skills necessary to advance their future.

Boston College fosters in its students rigorous intellectual development coupled with religious, ethical, and personal formation in order to prepare them for citizenship, service, and leadership in a global society.

Within the context of the Boston College environment, James A. Woods, S.J., College of Advancing Studies promotes the care and attention to the human person that is the hallmark of Jesuit education while faculty and students engage in scholarship that enriches the culture and addresses important societal needs.

**Undergraduate Programs**

The James A. Woods, S.J., College of Advancing Studies offers the atmosphere of a small college within the environment of a large university. The professional staff at the James A. Woods, S.J., College of Advancing Studies has experience helping students arrange a realistic program of study, one that combines work responsibilities with educational goals. Students receive personal attention while enjoying access to the many resources of Boston College. A flexible admission process coupled with academic advising allows a student to select the most appropriate major based on individual needs. Courses are ordinarily scheduled between the hours of 6:15–9:15 p.m. weekdays, with Saturday and online courses also available.

**Bachelor of Arts Program**

The Bachelor of Arts program prepares students to address and master the challenges of a rapidly changing and increasingly complex world. A broad-based and robust liberal arts curriculum, which includes core requirements, permits students to choose courses and majors reflecting individual interests and varied career objectives. The curriculum offers intensive work and a degree of disciplined mastery in a major area.

**Degree Requirements**

A distinguishing characteristic of liberal arts education is a required core curriculum. The Bachelor of Arts programs require the following core courses:

- The Examined Life
- Woods College Formative Seminar
- 2 English courses:
  - College Writing
  - Literary Works or other core literature course
- 2 Philosophy courses (one of which should be an Ethics course)
- 2 Theology courses
- 2 Social Science courses
- 2 History courses (1 must be non-Western)
- 1 Quantitative Reasoning course
- 1 Natural Science course
- 1 Arts course
1 Cultural Diversity Course

The Purposeful Life

Degree candidates must fulfill all core curriculum and major requirements as part of earning the minimum of 120 credits. Students are required to achieve a minimum cumulative GPA of 1.67 to be eligible to graduate.

Admission as a transfer student is also available. A minimum of 60 credits must be completed at Boston College to satisfy residency. A maximum of 60 credits may be transferred into a student’s program from regionally accredited institutions. Courses with an earned grade of C or better will be accepted in transfer; however, courses transferred from schools within Boston College may be accepted with grades of C- or better. A minimum of three semester hours is required for a transferred course to satisfy a program requirement.

For students in the degree program, the maximum course load is three per semester. Authorization for one additional course will be given only if a student has completed three courses, each with a grade of B or better, in the previous semester.

Undergraduate Admission

Applications for admission may be submitted at any time and are reviewed on a rolling basis during the academic year. The following documentation is required:

- Completed online application form;
- Official transcripts from high school and colleges previously attended;
- Two essays (requirements are found on the application);
- Optional SAT, PSAT, or similar standardized test results if the student graduated from high school less than four years previously;
- Two letters of recommendation (if four years or less from high school, request one from a guidance counselor or, for students whose high school graduation is greater than four years, request one from a teacher, employer, or other personal reference); and
- Demonstrated English Language Proficiency with an IELTS score of 6.5–7.5 or TOEFL score of 90–100.

Fifth Year and Advanced Standing Programs for Boston College Students

Accelerated Program for Boston College Undergraduate Economics Students (Enrolled at the Woods College, Morrissey College of Arts and Sciences, or Carroll School of Management)

Woods College of Advancing Studies is proud to offer Boston College students an option for accelerated completion of the Master of Science in Applied Economics program. This option is available to students with significant previous economics course work, including Economics majors and minors in the Morrissey College of Arts and Sciences as well as to students with Economics concentration in the Carroll School of Management. Students enrolled in the accelerated program will have to complete eight courses in WCAS, which is possible to achieve within one calendar year of entry into the program.

Benefits

- Waiver of application fee
- Waiver of Graduate Record Exam (GRE)
- Preferred admission without the competition of the rest of the applicant pool
- Credit for Microeconomic Theory (ECON2201 or ECON2203) and Macroeconomic Theory (ECON2202 or ECON2204) courses if the courses are completed with a grade of B or better. These credits will count as fulfilling the requirement of taking Applied Microeconomic Theory (ADEC7201) and Applied Macroeconomic Theory (ADEC7200).
- Option to complete the eight remaining course requirements in one additional calendar year
Qualifications

- Anticipated successful completion of a bachelor’s degree in May of senior year
- Overall GPA of 3.30 or above
- Grade of B or better in prerequisite courses: Principles of Microeconomics, Principles of Macroeconomics, Statistics, Calculus I, and Calculus II*
- Submission of all Applied Economics application materials by the end of the semester in which the student will graduate.

In order to receive priority consideration for WCAS financial aid, students should apply in the fall semester of their senior year.

*Calculus II course can be taken after the admission into the program.

Accelerated Program for Boston College Undergraduate Students (enrolled at the Woods College, Morrissey College of Arts and Sciences, or Carroll School of Management)

Woods College of Advancing Studies is proud to offer Boston College students an option for accelerated completion of the Master of Science in Leadership and Administration program. Students enrolled in the accelerated program will have to complete eight courses in WCAS, which is possible to achieve within one calendar year of entry into the program.

Under the terms of this agreement, qualified students are eligible for:

- Waiver of the application fee;
- Waiver of the Graduate Record Exam (GRE);
- Preferred admission without the competition of the rest of the applicant pool;
- Advanced standing for up to two upper-level courses that student has completed at BC; Graduate Program Director to approve.
- Option to complete the eight remaining course requirements in one additional calendar year.

Qualifications:

- Anticipated successful completion of a bachelor’s degree from BC in May of senior year
- Overall GPA of 3.30 or above
- Submission of all the application materials by the published Boston College deadline.

Interested students should contact the Program Director of Leadership and Administration at Boston with any further questions.

Academic Honors

Degree with Honors

For information regarding academic honors printed in the Commencement program, visit the Policies and Procedures: Undergraduate Academic Regulations, Degree with Honors section of the catalog.

Undergraduate Graduation Awards

Awards at commencement recognize a distinguished scholastic record, special accomplishments in various academic fields, and qualities of outstanding character, leadership, and demonstrated loyalty to the college.
Dean's List

The Woods College Dean's List recognizes the achievement of undergraduate students semester by semester. Students with a GPA of 3.700 or above in the B.A. programs will be placed on the Dean's List. In order to be eligible for the Dean's List, students must earn at least 8 or more credits in courses evaluated with a letter grade. Students must not have withdrawals, pass/fail grades, or incompletes in the semester in question.

Professional Studies Certificates

The Professional Studies Certificate is an end in itself for some students. For others, it may be applied toward completion of a bachelor’s degree. Whatever one’s ultimate goal, whether to qualify for promotion, initiate a career change, or earn an undergraduate degree, a Professional Studies Certificate can help to achieve that objective. The number of courses required to complete a Professional Studies Certificate varies with the area of study, but in every instance courses must be completed at Boston College.

A Professional Studies Certificate may be obtained in:

- Communication
- Finance
- Human Resources
- Information Systems
- Management
- Marketing
- Sustainability

Certificate requirements include the following:

- Students must receive at least a grade of C for each course credited toward the certificate.
- Certificate requirements should be completed within two years of initial enrollment for non-degree students, and prior to degree completion for students already enrolled in a degree program; courses are permanently retained on the student record.

A request to apply to a certificate program must be made to the James A. Woods, S.J. College of Advancing Studies. A request must also be made to receive a formal certificate upon completion.

Non-Degree Students

Non-degree students are individuals interested in taking evening undergraduate courses for academic credit but not in applying for a degree. Non-degree students may enroll in fall, spring, or summer semesters. A brief non-degree application form must be completed and submitted online.

Visiting Students

Individuals wishing to attend during the day as special undergraduate students are required to apply for Visiting Student status at the James A. Woods, S.J., College of Advancing Studies. Qualified applicants are admitted to specific courses on an individual basis.
More specific application instructions for those interested in applying for Visiting Student status can be found at the Visiting Students web page.

Summer Session

Boston College Summer Session offers a wide variety of undergraduate courses, which run over two six-week sessions. Our courses are open to anyone with a high-school diploma or the equivalent and no application is required to enroll. We also offer a selection of graduate courses through the Woods College of Advancing Studies master's programs. Most summer classes are 3 credits, unless specifically noted in the course description and meet twice a week for 6 weeks; exceptions noted in individual course descriptions in this catalog.

The Boston College Experience Program

The Boston College Experience provides motivated high school students the opportunity to live and learn as students at Boston College. Through adherence to our Jesuit mission, our programs focus on exposing students to a rich and rewarding college experience through coursework, extracurricular activities, and reflection. Built into the programs are activities that help to prepare students for their college search and the transition into college life. Students will participate in service learning activities, culture, and social outings all while enjoying the beautiful city of Boston over the summer.

For more information about dates, requirements, and costs, please visit the Boston College Experience website at www.bc.edu/bce.
Graduate Programs

Boston College’s eight graduate schools offer master’s, doctoral, and professional degrees in over ninety disciplines. As scholars at a R1 research institute, Boston College graduate students have the opportunity to engage in the highest level of research activity and intellectual discourse.

Boston College is committed to providing information in a manner that is accessible to all. If you are in need of a printed copy of the material presented in the University Catalog, please contact the Office of Student Services for a printout of the website.

Boston College Law School

Established in 1929, Boston College Law School is dedicated to the highest standards of academic, ethical, and professional development while fostering a unique spirit of community among its students, faculty, and staff. Boston College Law School is accredited by the American Bar Association, is a member of the Association of American Law Schools, and has a chapter of the Order of the Coif.

The Law School offers two degrees—the three-year Juris Doctor (J.D.) degree, which is the school’s primary degree, and the one-year Master of Laws (LL.M.) degree, which is designed for students who already hold a law degree from another school.

Juris Doctor (J.D.) Degree

Student Learning Outcomes

Upon graduation from Boston College Law School, graduates shall have acquired competency in the following:

- Knowledge and understanding of substantive and procedural law;
- Legal analysis and reasoning, legal research, problem-solving, and written and oral communication in the legal context;
- Exercise of proper professional and ethical responsibilities to clients and the legal system;
- Other professional skills needed for competent and ethical participation as a member of the legal profession; and
- A readiness for intellectual and professional engagement, whether in local, national or global settings, that incorporates respect for knowledge and for the dignity of the human person.

Registration for Bar Examination

Upon entering law school, some students know the state(s) in which they intend to practice after graduation. Some states require students to register with the Board of Bar Examiners prior to, or shortly after, beginning law school. For further information, contact the secretary of the state’s Board of Bar Examiners for the state where you intend to practice to determine the standards and requirements for admission to practice.

Auditors

A limited number of applicants, usually members of the bar, who do not wish to study for a degree but who desire to enroll in specific courses may be admitted as auditors. Auditors must prepare regular assignments and participate in classroom discussions. They are not required to take examinations but may elect to do so. Normally, credit will not be certified for auditing. Auditors are charged tuition at the per credit hour rate.
Advanced Standing

An applicant who qualifies for admission and who has satisfactorily completed part of his or her legal education in another ABA-approved law school may be admitted to an upper class with advanced standing. Four completed semesters in residence at Boston College that immediately precede the awarding of the degree will be required. Transfer applicants must submit the application form and fee, the CAS report, a law school transcript, a letter of good standing from his or her law school dean, and a recommendation from a law school professor. Applications are due by July 1 from those wishing to enroll for the fall semester.

Other Graduate Courses and Cross Registration

Law students are permitted to take a maximum of four graduate level courses (12 credits) in other departments during their final two years with the consent of the Associate Dean. Also, students may cross-register for certain courses at Boston University School of Law. A list of courses is made available prior to confirmation of registration. Tuition for dual programs is separately arranged. From time to time individual students have also made special arrangements, with the approval of the Associate Dean for Academic Affairs, for dual study programs with other schools and departments at Boston College or, in some instances, with other universities in the Boston area.

Information

For more detailed information regarding course offerings, applicants should consult the Boston College Law School Bulletin that may be obtained by writing to the Office of Admissions and Financial Aid, Boston College Law School, 885 Centre Street, Newton, MA 02459, or by e-mailing the office at bclawadm@bc.edu.

Course descriptions and scheduling information are also available on the BCLS website at www.bc.edu/law.

Dual Degree Programs

The Law School offers a variety of dual degree programs.

Dual Degree Program in Law and Business Administration

Boston College Law School and the Carroll School of Management offer a dual J.D./M.B.A. program. Students in the program are required to be admitted independently to both schools. Credit for one semester’s courses in the M.B.A. program is given towards the J.D. degree, and, similarly, credit for one semester’s courses in the Law School is given towards the M.B.A. degree. Both degrees can thus be obtained within four academic years, rather than the five required for completing the two degrees separately. Interested students can obtain detailed information from the Admission Offices of both schools.

Dual Degree Program in Law and Social Work

The Boston College School of Social Work and the Law School at Boston College offer a dual J.D./M.S.W. program designed for students interested in serving the combined legal and social welfare needs of individuals, families, groups, and communities. Students may obtain the two degrees in four years, rather than the usual five years.

Dual degree candidates must apply to, and be accepted by, both schools. Interested students can obtain more information from the Admission Offices of both schools.

Dual Degree Program in Law and Education
The dual degree program in Law and Education is designed for students who are interested in serving the combined legal and educational needs of students, families, and communities in our nation. The program reflects the University’s mission to promote social justice and to prepare men and women for service to others. The program is particularly designed to prepare students to meet the needs of individuals who have traditionally not been well-served by the nation's schools. The program is designed to serve the needs of persons who wish to combine knowledge about education and applied psychology with legal knowledge and skills to better serve their clients and constituencies. The program offers an opportunity to further the University’s goals in promoting interdisciplinary inquiry and integrating the work of service providers.

Students admitted to the program may expect to receive both a master’s degree in Education (M.Ed. or M.A.) and the Juris Doctor (J.D.) degree in approximately three years (sometimes requiring additional summer classes), rather than the four or more years such degrees would normally entail if taken separately.

Students seeking to pursue the J.D./M.Ed. or M.A. dual degree must be duly admitted to their intended Education program and to the Law School. Any student seeking certification, or education or human services licensure must meet all of the requirements in the Lynch School of Education for that certification/licensure.

J.D./M.P.H. Dual Degree Program with Tufts University School of Medicine

Our program, in partnership with Tufts University School of Medicine, gives students the flexibility to pursue a broad range of career opportunities in the legal, health care, and public health fields, while completing their degrees in four years instead of five years if obtained separately. The Tufts medical school curriculum provides a practical expertise in health policy, data analysis, and health care management, and also includes an applied learning experience in the public health field. The demand for health care law and policy expertise encompasses job opportunities at small and large law firms, government agencies, hospitals and other institutional health care providers, public interest and advocacy organizations, international human rights organizations, and in-house counsel departments.

J.D./M.A. in Urban and Environmental Policy and Planning with Tufts University

Land Law and urban and environmental policy and planning open up an array of modern areas of professional practice. In this innovative program, BC students can receive two degrees—a Master of Arts and a Juris Doctor (M.A./J.D.) in just eight semesters. Planning skills (including policy analysis) are critical in guiding development patterns, and law frames the mechanisms and limits of private and governmental roles in this process. Students are immersed in practical skills training; in broad debates and critical thinking about the environment, human settlements, social and environmental justice; corporate responsibility; and public and private land use management—all shaped by constitutional, equitable, and pragmatic principles.

The M.A./J.D. is offered through a collaboration between the Tufts University Department of Urban and Environmental Policy and Planning (UEP) and Boston College Law School. There is currently no graduate program in New England which offers the combined strengths of this program.

In the dual degree program, students meet regularly with the program coordinator and the respective academic advisors from both Schools in planning and implementing an overall course of study that matches the student’s background, interests, and requirements of the program. Advisors at both Schools collaborate, under the auspices of an advisory committee, to ensure that students receive accurate and timely support in the dual degree program. Students are eligible for financial assistance based on current policies at each University.

J.D./M.A. or J.D./Ph.D. Philosophy Program

These programs are designed for students who have an interest in legal theory and jurisprudence, and who may eventually wish to go into law teaching in those fields. Students may complete their law degree and master’s in philosophy in four years of joint study, or law and Ph.D. in six years. Students must apply to both the Law School and master’s or Ph.D. program in the Philosophy Department of Boston College.
Entrance Requirements and Admission

To join the dual degree program students need to submit separate applications to each program. Students in the Boston College J.D. program can wait until their second year before applying to the Tufts degree program. Each school reviews candidates based on its own requirements and criteria. For detailed information on the requirements for the UEP master’s degree, contact Tufts Admissions at http://ase.tufts.edu/uep/admissions/WhoComesToUEP.aspx.

Master of Laws (LL.M.) Degree

The LL.M. degree program is designed to expose legal professionals and recent graduates who hold a first degree in law, primarily but not necessarily of foreign origin, to a broad range of subjects in public and private law, including U.S. and international law. The program enables students to explore many cross cutting issues that engage U.S. and international law from courses in the Law School’s extensive curriculum, including both introductory and more advanced courses in their particular fields of interest. The program is intended for students from a variety of legal systems and backgrounds. Because of our strength in the field of global practice, we are equally interested in applicants pursuing careers in private practice, government service, the judiciary, international organizations, non-governmental organizations, and legal scholarship. We are most interested in applicants who have completed their prior legal studies with high rank and who intend to return to their home countries to contribute to the legal profession.

Further information is available on the program’s website at www.bc.edu/llm or from the LL.M. Office, Boston College Law School, 885 Centre Street, Newton, MA 02459. Our e-mail address is bcllm@bc.edu.

Boston College School of Social Work

In keeping with the four-century-old Jesuit tradition of educating students in the service of humanity, Boston College established a School of Social Work (SSW) in March 1936. The SSW offers the Master of Social Work (M.S.W.) and the Doctor of Philosophy in Social Work (Ph.D.) degrees. In addition to providing foundation courses for all students, the Master of Social Work program of study affords each student the opportunity to specialize in a social work practice intervention method. The two areas of specialized practice are Clinical Social Work and Macro Social Work on the master’s level. Six advanced Fields-of-Practice are offered: Children, Youth, and Families; Global Practice; Health; Latinx Communities; Mental Health; and Older Adults and Families. The School also offers a research-oriented Doctoral program that prepares scholars to pursue knowledge that will advance the field of social welfare and social work practice.

Professional Program: Master of Social Work (M.S.W.)

Introduction to the Master of Social Work (M.S.W.)

The M.S.W. Program offers students a choice of specialized practice. Students select either Clinical Social Work Practice or Macro Social Work Practice.

Clinical Social Work is the process of working with individuals, families, and groups to help them deal with intrapersonal, interpersonal, and environmental problems. The process utilizes a bio-psychosocial assessment and intervention model to increase an individual’s well-being. Each person, family, or group has a unique story to share, one that is shaped by cherished beliefs, values, and traditions, one that is connected to the larger stories of communities and nations. The complex process of helping others is, fundamentally, one of empowerment. In practicing clinical social work, the aim is to strengthen, support, and accompany clients in their healthy efforts to repair their past and build a future that honors their uniqueness and brings into reality their personal dreams. Our challenging, dynamic, and contemporary program of professional formation transforms compassion into therapeutic empathy. We integrate social work’s enduring values, theories, and skills with bold and innovative ways of helping others. This fusion of old and new creates an environment where students learn that interventions, guided by evidence-based practice, become powerfully therapeutic when imbedded in a relationship of respect and authentic concern.

Macro Social Work Practice prepares students to develop and foster social innovation by understanding the process of innovation and through skill development related to assessment, strategic planning, organizational development, financial management, and
administration. Students are prepared to develop innovative solutions to solve today’s complex problems, lead organizations that foster these solutions, and mobilize strategic partners, political resources, and community resources to initiate and sustain social change.

The M.S.W. Program is accredited by the Council on Social Work Education and is designed for completion in either two full-time academic years of concurrent class and field work or in a Three-Year or Four-Year Program. All degree requirements must be fulfilled within a period of five years.

The M.S.W. curriculum is divided into four overlapping components: Foundation, Specialized Practice, Field-of-Practice, and Electives. This configuration allows students to establish a solid foundation in social work practice, choose either Clinical or Macro Social Work Practice as their area of specialized practice, and then choose a Field-of-Practice to gain advanced practice skills in a particular area. The Field-of-Practice choices are: Children, Youth, and Families; Global Practice; Health; Latinx Communities; Mental Health; and Older Adults and Families.

Foundation Courses

Seven foundation courses provide the basis for the advanced curriculum. In compliance with Council of Social Work Education (CSWE) Accreditation Standards, the foundation curriculum includes content on Social Work competencies: professional and ethical behavior, diversity, human rights and justice, research, policy, engagement, assessment, intervention, and evaluation.

The following courses comprise the Foundation curriculum:

- SCWK7701 The Social Welfare System
- SCWK7721 Human Behavior and the Social Environment
- SCWK7723 Re-thinking Diversity: Systems of Oppression and Privilege
- SCWK7747 Research Methods in Social Work Practice
- SCWK7762 Basic Skills in Clinical Social Work
- SCWK8800 Basic Skills in Macro Practice
- SCWK9921 Field Education I

Specialized Practice Courses

Students select one of two areas of specialized practice to focus their acquisition of practice skills: Clinical Social Work or Macro Social Work. Required Clinical courses include an advanced human behavior course, SCWK7722 Psychosocial Pathology, and two methods courses that focus on clinical assessment, practice theory, and evidenced-based practice interventions for a variety of problem areas and populations utilizing various treatment modalities—individual, family, and group.

The required Clinical courses are as follows:

- SCWK7722 Psychosocial Pathology
- SCWK8855 Clinical Practice with Children and Families: Assessment, Intervention, and Evidenced-Based Practice
- SCWK8856 Clinical Practice with Adults: Assessment, Intervention, and Evidenced-Based Practice
- SCWK8841 Program Evaluation
- One Advanced Policy Course (SCWK8802 Policy Issues for an Aging Society, SCWK8805 Policy Issues in Family and Children, SCWK8806 Global Policy Issues, or SCWK8817 Health and Mental Health Policy)
- SCWK9932 Field Education II—Clinical Social Work
Required Macro courses include an advanced human behavior course, SCWK8833 Leadership and Social Transformation, and two methods courses that focus on organizational and leadership analysis, marketing, resource development and financial management, and the development of social innovation skills necessary to implement and sustain change.

The required Macro courses are as follows:

- SCWK8833 Leadership and Social Transformation
- SCWK8886 Financial Management and Resource Development
- SCWK8889 Social Innovation
- SCWK8841 Program Evaluation
- One Advanced Policy Course (SCWK8802 Policy Issues for an Aging Society, SCWK8805 Policy Issues in Family and Children, SCWK8806 Global Policy Issues, or SCWK8817 Health and Mental Health Policy)
- SCWK9942 Field Education II—Macro Social Work

**Fields-of-Practice**

Students entering their final full-time year will choose a Field-of-Practice. Each Field-of-Practice consists of an advanced practice course. All Fields-of-Practice require either SCWK9933–9934 Field Education III–IV—Clinical Social Work or SCWK9943–9944 Field Education III–IV—Macro Social Work.

**Children, Youth, and Families**

The Children, Youth, and Families Field-of-Practice prepares students for professional practice with children, adolescents, and families seen across multiple settings. Clinical students will be proficient in practice with child and adolescent mental health intervention, including individual, group, and family modalities. Macro students will develop competence in leadership and administration, including personnel management, grant writing, and financial management within the context of community-based nonprofit organizations and public systems. Required courses include:

**Clinical Social Work**

- SCWK8872 Advanced Clinical Practice with Children, Youth, and Families

**Macro Social Work**

- SCWK8885 Management of Organizations Serving Children, Youth, and Families

**Global Practice**

The Global Practice Field-of-Practice prepares students to become effective international social workers. Students learn how to collaborate with local partners around issues of humanitarian aid, social development, and capacity-building. Guiding principles are human rights, global justice, and diversity. Final year field placements will be managed in partnership with international organizations. Required course includes:

**Clinical Social Work and Macro Social Work**

- SCWK7797 Frameworks and Tools of Global Practice
Health

The Health Field-of-Practice prepares students for clinical or macro practice in healthcare settings by providing specialized knowledge and skills in assessment, interventions, and health and mental health policy.

Clinical Social Work students, with knowledge of diagnostic assessment and evidenced-based interventions, will focus on treatment with individuals, couples, families, and small groups that are aimed at dealing with the impact of illness on the client system in culturally diverse environments within medical/healthcare settings.

Macro Social Work students, with knowledge of financial management, leadership, and social innovation, will focus on skills in planning, designing, and funding for innovating and sustaining current programs within medical/healthcare settings. Required courses include:

**Clinical Social Work**

- SCWK8873 Psychosocial Dimensions of Health and Medical Care Practice

**Macro Social Work**

- SCWK8897 Planning for Health and Mental Health Services

Latinx Communities

The Latinx Communities Field-of-Practice trains MSW students to work with Latinx communities in the U.S. and around the world. Our innovative program includes: culturally-centered coursework and field placements, tailored mentoring, self-advocacy training, and career development guidance.

From an asset-based approach, students will develop a nuanced understanding of the barriers Latinx populations encounter in accessing equitable education, social services, and health care, as well as a deep understanding of how to implement evidence-based interventions that address systemic inequities.

Following a cohort model, students will take core classes taught in Spanish and intern at a field placement with one of our many partners in the Greater Boston area that serve the legal, medical, behavioral health, immigration, and educational needs of the Latinx community. Required course includes:

**Clinical Social Work and Macro Social Work**

- SCWK8837 Social Services with Latin Populations in the U.S.

Mental Health

The Mental Health Field-of-Practice prepares students for clinical or macro practice in mental health settings by providing specialized knowledge and skills in assessment, interventions, and health and mental health policy.

Clinical Social Work students, with knowledge of diagnostic assessment and evidenced-based interventions, will focus on family systems work in culturally diverse environments within mental health settings and select from a broad range of elective courses in various practice modalities.
Macro Social Work students, with knowledge of financial management, leadership, and social innovation, will focus on skills in planning, designing, and funding for innovating and sustaining current programs within mental health settings. Required courses include:

**Clinical Social Work**
- SCWK8865 Family Therapy

**Macro Social Work**
- SCWK8897 Planning for Health and Mental Health Services

**Older Adults and Families**

The Older Adults and Families Field-of-Practice prepares social work students for an integrated macro and clinical practice approach to working with older adults, their families, and the social policies and programs that affect their lives. Coursework for the concentration encompasses the entire range of health and mental health services from those provided to older adults as they “age in place” in their homes and communities through policy and advocacy functions of the local, state, and national aging network. Required course includes:

**Clinical Social Work and Macro Social Work**
- SCWK8823 Practice in Health and Mental Health Settings with Older Adults

**Field Education**

Students complete a total of 1200 hours of field education (480 hours in Field Education I and II and 720 hours in Field Education III and IV). Students participate in Field Education 2 days per week in Field Education I and II and 3 days per week in Field Education III and IV.

**Electives**

Students take five electives to round out their knowledge and skill-building with courses that offer advanced training in a particular area or provide new knowledge and skills in an area of interest to the student. The required Field-of-Practice advanced policy and advanced practice courses may be taken as electives by students from other Fields-of-Practice on a space-available basis. Elective courses are offered pending sufficient enrollment. The following courses may be offered as Elective options:

- SCWK7724 Neurobiology of Stress and Resilience in the Life Course
- SCWK7725 Families Impacted by Military Service
- SCWK7726 Neuroscience of Human Relationships and Development
- SCWK7727 Substance Use Disorders
- SCWK7728 Global Perspectives on Gender Inequalities
- SCWK7729 Public Health Social Work
- SCWK7733 Working with Lesbian, Gay, Bisexual, Transgender, and Questioning Youth, Families, and Adults
- SCWK7735 Social Determinants of Health and Mental Health
- SCWK7777 Services to Migrants: A Border Perspective
The Boston College School of Social Work has instituted three dual degree programs with other graduate departments of Boston College and one dual degree program with the undergraduate Morrissey College of Arts and Sciences and the Lynch School of Education and Human Development. A description of the programs is available from the respective admission offices. Candidates must apply to, and be accepted by, each of the relevant schools independently.

Established in 1980, the M.S.W./M.B.A. Program, in cooperation with the Carroll School of Management Graduate Programs, involves three full-time years—one each in the foundation years of both schools, and the third incorporating joint class and field education.

The four-year M.S.W./J.D. Program, inaugurated in 1988 with Boston College Law School, requires a foundation year in each school followed by two years of joint class and field instruction with selected emphasis on such areas as family law and services; child welfare and advocacy; and socio-legal aspects and interventions relating to poverty, homelessness, immigration, etc.
The three-year M.S.W./M.A. (Theology and Ministry), in conjunction with the Boston College’s School of Theology and Ministry, began in 1989. Three options for completing the M.S.W./M.A. include a foundation year in each curriculum with a third year of jointly administered class and field instruction; a program of summer courses taken in STM and a two-year academic program in the SSW; or an integrated program of study with courses taken in STM and the SSW during three years of study. Areas of focus include clinical work in hospitals and prisons, organizational services/administration, and parish social ministry.

In cooperation with the Morrissey College of Arts and Sciences and the Lynch School of Education and Human Development, the Boston College School of Social Work has instituted an Accelerated B.A./M.S.W. Program that enables Psychology, Sociology, and Applied Psychology and Human Development majors to complete the Social Work foundation courses during their junior and senior years. Students receive the B.A. at the end of four years, and then apply for admission to the School of Social Work for a final year of study in the M.S.W. Program. For sophomore prerequisites and application information, undergraduates should call the School of Social Work Assistant Dean of Enrollment Management at 617-552-4025.

The School also offers an upper-division introductory course that is not applicable to the M.S.W. degree: SCWK6600 Introduction to Social Work is cross-listed with the departments of Psychology and Sociology in the Morrissey College of Arts and Sciences.

Doctor of Philosophy Degree Program

Introduction to Doctor of Philosophy Degree Program

The School offers a research-oriented Ph.D. program that prepares scholars committed to pursue knowledge that will advance the field of social welfare and social work practice. Students master a substantive area of scholarship and gain methodological expertise to excel as researchers and teachers in leading academic and social welfare settings throughout the world. Grounded in core values of human dignity and social justice, the program nurtures independence and originality of thought in crafting innovative research and policy agendas for constructive social change.

The School of Social Work doctoral program offers three programs of study: a Ph.D. in Social Work, a Ph.D. in Social Welfare, and a combined M.S.W./Ph.D. The Ph.D. in Social Work is designed for students with an M.S.W. or equivalent degree. The Ph.D. in Social Welfare is designed for students enrolled in the International Doctoral Program with partner Jesuit Universities in Latin America. The M.S.W./Ph.D. is designed for exceptionally talented students with several years’ work experience and another master’s degree.

Program of Study—Social Work

Research training is at the core of the program. Students acquire expertise in applied social and behavioral science research methodologies that are especially appropriate for investigating critical policy and practice questions. This set of courses emphasizes analytic skills needed to understand, appraise, and advance knowledge in social work. The learning process involves more than classroom instruction. Students are expected to work closely with faculty mentors in their roles as scholars and researchers. Besides required courses, students can select from an array of elective academic courses, independent studies, research internships, and teaching practicums.

A minimum of 51 credit hours are required to complete the degree: 45 credits for academic courses and 6 credits for the dissertation. Among the 15 elective credits, 3 elective credits are specified to be an advanced social or behavioral science theory course, and 9 credits are specified to be a methods course. Students must pass the qualifying exam at the end of year two. For the qualifying exam, students need to produce a publishable paper that meets the requirements for publication in a scholarly journal. Before beginning research on the dissertation, the student must complete all required courses and the publishable paper. Required courses include the following:

- SCWK9950 Professional Development Seminar
- SCWK9951 Survey of Research Methods in Social and Behavioral Science
- SCWK9956 The Dialectics of Social and Behavioral Theory
- SCWK9959 Doctoral Publishable Writing Project
- SCWK9960 Regression Analysis for Social and Behavioral Sciences
SCWK9964 Introduction to Statistics and Data Analysis
- SCWK9991 Doctoral Teaching Practicum
- SCWK9992 Theories and Methods of Teaching in Professional Education
- SCWK9993 Research Internship
- SCWK9994 Integrative Dissertation Seminar

**Total Credits**

The 51 credits are a minimal requirement. The actual number of courses taken by an individual student varies according to prior educational background and coursework.

**Program of Study—Social Welfare**

Students in the International Doctoral Program in Social Welfare enroll in courses in both Boston College and a partner Jesuit university in Latin America. Students start the program in the partner university taking elective courses in social behavioral science theory and other courses that provide a foundation in a social problem likely to be the focus of the student’s research. In subsequent years, student’s residence alternates between Boston College and the partner university. The International Doctoral Program in Social Welfare encourages and facilitates students to focus their doctoral research on topics and populations drawn from Latin American countries.

The program provides a strong foundation in research and preparation for an academic career through nine required courses and two dissertation direction courses. Students will enroll in a total of four to six courses in the partner university during year one and year three. The remaining four elective courses will be taken during students’ residency at Boston College in year two. Students must also pass a written comprehensive examination and produce a manuscript that is fitting for publication in a peer-reviewed scientific journal. Before beginning research on the dissertation, the student must complete all required courses and pass an oral qualifying examination based upon the publishable paper requirement. Required courses include the following:

- SCWK9951 Survey of Research Methods in Social and Behavioral Science
- SCWK9952 Tools for Scholarship in Social and Behavioral Science
- SCWK9980 History and Philosophy of Social Welfare in the U.S.
- SCWK9954 Models for Social Welfare Intervention Research
- SCWK9959 Doctoral Publishable Writing Project
- SCWK9960 Statistical Analysis for Social and Behavioral Research
- SCWK9961 Introduction to Structural Equation Modeling
- SCWK9992 Theories and Methods of Teaching in Professional Education
- SCWK9994 Integrative Seminar for Doctoral Students

**Total Credits**

The minimal credit requirement is 51, of which 38 credits are taken at Boston College and include required and elective courses and 6 credits for the dissertation. The remaining elective credits are taken at the partner university and may vary in accordance with the partner university’s academic offerings. The actual number of courses taken by an individual student varies according to prior educational background and coursework.

**Dual Degree Program—M.S.W./Ph.D.**
BCSSW provides an option for those who don’t already have a master’s of social work to earn both the M.S.W. and the Ph.D. degrees. Applicants will be considered for acceptance into the M.S.W./Ph.D. program in exceptional cases and must possess a master’s degree in a behavioral or social science discipline in addition to considerable work experience. This program is especially well-suited for international graduate students, enabling them to acquire an understanding of fundamental American social welfare policy and social work practice prior to launching their advanced doctoral studies.

A minimum of 98 credit hours are required to complete the degree: 92 credits for academic courses and field work and 6 credits for the dissertation. Among the 12 elective credits, 3 elective credits are specified to be an advanced social or behavioral science theory course, and 9 credits are specified to be a methods course. Students must pass the qualifying exam at the end of year three. For the qualifying exam, students need to produce a publishable paper that meets the requirements for publication in a scholarly journal. Before beginning research on the dissertation, the student must complete all required courses and the publishable paper. Required courses include the following:

- SCWK7701 Social Welfare System
- SCWK7721 Human Behavior and the Social Environment
- SCWK7722 Psychosocial Pathology (Clinical) OR SCWK8833 Leadership and Social Transformation (Macro)
- SCWK7723 Diversity and Cross-Cultural Issues
- SCWK7762 Basic Skills in Clinical Social Work
- SCWK8800 Basic Skills in Macro Social Work
- SCWK8802, SCWK8805, SCWK8806, or SCWK8817 Advanced Policy course
- SCWK8872, SCWK8885, SCWK7797, SCWK8873, SCWK8897, SCWK8837, SCWK8865, or SCWK8823 Advanced Practice in Field-of-Practice
- SCWK8855 Clinical Practice with Children and Families: Assessment, Intervention and Evidence Based Practice (Clinical) OR SCWK8889 Social Innovation (Macro)
- SCWK8856 Clinical Practice with Adults: Assessment, Intervention, and Evidence Based Practice (Clinical) OR SCWK8886 Financial Management and Resource Development (Macro)
- SCWK9921 Field Education I
- SCWK9932 Field Education II—Clinical OR SCWK9942 Field Education II—Macro
- SCWK9933 Field Education III—Clinical OR SCWK9943 Field Education III—Macro
- SCWK9934 Field Education IV—Clinical OR SCWK9944 Field Education IV—Macro
- SCWK9950 Professional Development Seminar
- SCWK9951 Survey of Research Methods in Social and Behavioral Science
- SCWK9956 The Dialectics of Social and Behavioral Theory
- SCWK9959 Doctoral Publishable Writing Project
- SCWK9960 Regression Analysis for Social and Behavioral Sciences
- SCWK9964 Introduction to Statistics and Data Analysis
- SCWK9991 Doctoral Teaching Practicum
- SCWK9992 Theories and Methods of Teaching in Professional Education
- SCWK9993 Research Internship
- SCWK9994 Integrative Dissertation Seminar

**Total Credits**

The 98 credits are a minimal requirement. The actual number of courses taken by an individual student varies according to prior educational background and coursework.
Doctoral Funding

There are five major sources of funding available for students in the Doctoral Program in Social Work at Boston College:

- The Boston College Doctoral Fellowship in Social Work is awarded each year on a competitive basis to full-time doctoral students in social work. Full tuition and a stipend are provided for four years as long as the student maintains good academic standing and demonstrates progress toward the Ph.D.
- Two Fellowships are awarded each year on a competitive basis to full-time doctoral students to provide additional financial support to help encourage them to successfully complete their studies.
- Research Assistant positions are provided through faculty research and training grants.
- Teaching Assistant positions are available for some doctoral and M.S.W. courses.
- Additional grants and scholarship opportunities are available on an individual basis.

In addition to the financial assistance directly available from Boston College, SSW doctoral students are encouraged to apply for nationally competitive fellowships from private foundations and federal agencies.

For More Information

For a more detailed description of course offerings, the applicant should consult the Boston College School of Social Work Bulletin, which may be obtained by e-mailing swadmit@bc.edu or by writing to the Assistant Dean of Enrollment Management, Boston College School of Social Work, McGuinn Hall, Chestnut Hill, MA 02467.

Carroll School of Management, Graduate Programs

Boston College’s Carroll School of Management, Graduate Programs are recognized for offering innovative programs uniquely suited to today's challenging management environment. The School enrolls approximately 900 students in five highly regarded degree programs: the Master of Business Administration (M.B.A.), emphasizing hands-on, group learning and a global outlook; the Master of Science in Accounting (M.S.) providing students with the advanced quantitative tools and understanding of the important role of accounting in business; the Master of Science in Finance (M.S.), a rigorous ten-course curriculum providing advanced financial skills; the Ph.D. in Management with a concentration in Finance; the Ph.D. in Management with a concentration in Organization Studies; and the Ph.D. in Accounting, offering doctoral-level education for individuals interested in research and teaching. The Carroll School of Management, Graduate Programs have developed many exciting options that enable students to individualize their management education including several dual degree programs. Among those options are the Master of Business Administration/ Master of Science in Finance (M.B.A./M.S. in Finance); the Master of Business Administration/Juris Doctor (M.B.A./J.D.); and the Master of Business Administration/Master of Social Work (M.B.A./M.S.W.).

Master of Business Administration

Full-Time M.B.A.

For today's complex business environment, companies and organizations actively seek individuals who possess both highly developed management skills and advanced training in a specific discipline. An M.B.A. from Boston College offers you the skills and experience you need for an impactful career. Our Full-Time M.B.A. Program combines carefully sequenced courses with a variety of experiential learning components. Summer and academic year internships provide opportunities to apply classroom learning directly to professional practice. The M.B.A. prepares you to become a distinguished leader in business, acquire the tools employers demand from our world-class faculty, and connect with a powerful network of leaders and innovators at Boston College.
Requirements and Schedule

In the first year, students progress through the core curriculum as a cohort, developing a broad foundation of business knowledge and capabilities while forming meaningful connections with classmates. The second year of the program allows you to strengthen your skills in functional disciplines of your choice. Through the pursuit of elective courses, you can ready yourself for success in your desired field.

The Carroll School is committed to instilling a strong sense of community service in its students. In an effort to align this commitment with the Program, all M.B.A. students must fulfill a requirement of 20 hours of service to others through meaningful work as volunteers.

Full-Time M.B.A. students should plan on academic sessions from 8:30 a.m. to 5:00 p.m., Monday through Friday during the first year of study.

Second year elective courses are taught in the late afternoon and evening, and full-time students take their electives with Evening Program students whose participation adds a wider range of knowledge and experience to class discussions and projects. Most classes meet once a week from 7:00 p.m. to 9:30 p.m. during the academic year, with a limited number meeting from 4:30 p.m. to 6:50 p.m.

For current course listings and schedules, visit the Full-Time MBA website.

- 11 Electives

Evening Part-Time M.B.A.

As a working professional, the Part-Time M.B.A. Program at Boston College offers you the flexibility you need to earn your degree while advancing your career. And you benefit from the opportunity to apply what you learn in the Program directly to your work.

As a Part-Time M.B.A. student, you develop managerial, analytical, and practical management skills through the completion of a strong set of core courses that emphasize experiential learning. The program attracts a diverse mix of highly motivated individuals from the vibrant and diverse regional business community, helping you grow your network as you develop and learn new skills.
Requirements and Schedule

Students generally take two courses in the fall and spring semesters, but may take additional courses during the summer. Evening students must complete 57 credits of course work as well as 20 hours of community service. Most Evening program classes meet once a week from 7:00 p.m. to 9:30 p.m. during the academic year, with a limited number meeting from 4:30 p.m. to 6:50 p.m. Summer courses meet twice a week from 6:30 p.m. to 9:30 p.m. Evening students typically complete their degrees in four years.

For current course listings and schedules, visit the Part-Time MBA website.

Part-Time Program Curriculum

- OPER7704 Economics
- MGMT7709 Managing People and Organizations
- ACCT7770 Accounting
- ISYS7700 Data Analytics 2: Management & Data Skills
- MFIN7704 Financial Management
- MKTG7700 Marketing
- OPER7706 Data Analytics 1: Model Building*
- ISYS7705 Data Analytics 3: Data Analytics in Practice
- OPER7700 Operations Management
- MGMT7710 Strategic Management
- 9 Electives

*Students are required to complete a zero credit online Statistics module (OPER7703 Managerial Statistics) prior to enrolling in OPER7706.

Advanced Standing and Equivalency for Graduate Degrees (M.B.A.)

M.B.A. students may be eligible to waive courses based upon prior coursework and/or professional certifications (such as CPA or CFA). Waiver policies vary according to program.

Advanced Standing Credit: Students may waive a class and will also reduce the overall credit requirement for the degree.

Equivalency: Students may waive a class but will be required to replace it with an elective. Equivalency applies to core courses only.

Transfer Credit: Under certain circumstances, students may receive approval to take graduate courses at other AACSB-accredited colleges or universities. Grades received for transferred courses are not calculated into the student’s Boston College GPA.

M.B.A. Part-Time

All students accepted into the part-time M.B.A. program will be evaluated to determine their eligibility for Advanced Standing Credit. If not included in their application materials, students may be required to provide official transcripts and other relevant course information necessary to facilitate the review of their academic record. Shortly after receipt of their acceptance letter, students will receive notification of their eligibility to waive courses.

- The maximum amount of Advanced Standing Credit that a Part-time M.B.A. student may receive is 15 credits.
Advanced Standing Credit will only be granted for courses in which the student has earned a grade of “B” or better, at an accredited institution, within the five years prior to enrolling in the Boston College Part-time M.B.A. program.

The combination of waived credits and transfer credits may never exceed 1/3 of the course requirements for the degree.

Students who have recognized professional certifications (i.e., CPA, CFA) may receive Advanced Standing Credit. A copy of the exam results will be required.

Once an accepted student has been notified of eligibility to waive a course(s), he/she must respond with his/her intent to accept the Advanced Standing Credit, in writing, no later than Drop/Add Deadline for the semester in which he/she is enrolling.

Students may contest waiver decisions within 30 days of the date of the initial decision. Course waivers will not be granted after this date.

Once a student has accepted Advanced Standing Credit for a course, he/she may not take the course and receive credit.

Professional experience alone will not make a student eligible to waive a course.

Current Part-time M.B.A. students, who wish to take a course outside of the Carroll School of Management, must submit their request, in writing, at least 30 days prior to the start of the semester in which the student wishes to enroll in the outside course. Transfer credit will only be granted for courses related to the degree and is subject to approval by the Graduate Programs Office. Students must have completed a minimum of two semesters before they can submit a request to take a course outside of the Carroll School of Management. This includes courses taken through the Jesuit M.B.A. Network.

Except under extenuating circumstances, students will not be approved for transfer credit if a comparable course is offered in the Carroll School of Management during the same academic year.

Part-time M.B.A. students may cross register for one course each semester (not including Summer) at Boston University and Tufts, through the Consortium. Students interested in cross-registering for courses through the Consortium must first seek approval from the Graduate Programs Office and complete the necessary cross-registration forms, available through the University’s Office of Student Services (Lyons Hall). Per the Consortium agreement, tuition will be billed through the student’s Boston College account, at the Carroll School of Management’s tuition rate.

**Undergraduate Course Work**

Part-time M.B.A. students who have demonstrated mastery in a core subject area may receive Advanced Standing Credit for up to five courses (15 credits).

Mastery typically entails either an undergraduate major in a core course area or at least two intermediate to advanced undergraduate courses with grades of B or higher.

Students may only receive Advanced Standing Credit for core courses, based upon undergraduate coursework.

**Graduate and Professional Course Work**

Part-time M.B.A. students who have a prior graduate degree in a relevant field or have completed graduate management courses at other AACSB-accredited institutions may receive Advanced Standing Credit for a maximum of five courses (15 credits).

Students may receive Advanced Standing Credit for core courses and elective courses, based upon graduate coursework.

**Full-Time M.B.A. Program**

Students accepted to the full-time M.B.A. program may apply to waive core courses based upon prior course work. If a full-time M.B.A. student is deemed eligible to waive a course, he/she will receive Equivalency. Equivalency requires the student to replace the waived course with an elective; therefore, it does not decrease the credit requirement for the degree. Full-time M.B.A. students who wish to be evaluated for course waiver eligibility must submit a Course Waiver Form. Students may be required to provide official transcripts and other relevant course information necessary to facilitate the review of their academic record. Students
enrolled in the full-time M.B.A. program must maintain their full-time status for four continuous semesters (with the exception of students enrolled in approved dual degree programs outside of the Carroll School of Management).

- Full-time M.B.A. students may receive Equivalency for up to three core courses.
- Equivalency will only be granted for courses in which the student has earned a grade of "B" or better, at an accredited institution, within the five years prior to enrolling in the Boston College Part-time M.B.A. program.
- The combination of waived credits and transfer credits may never exceed 1/3 of the course requirements for the degree.
- Students who have recognized professional certifications (i.e., CPA, CFA) may receive Equivalency. A copy of the exam results will be required.
- Once an accepted student has been notified of eligibility to waive a course(s) and receive Equivalency, he/she must respond, in writing, his/her intent to accept the Equivalency no later than the drop/add deadline for the semester in which he/she is enrolling.
- Students may contest waiver decisions within 30 days of the date of the initial decision. Course waivers will not be granted after this date.
- Once a student has accepted Equivalency for a course, he/she may not take the course and receive credit.
- Professional experience alone will not make a student eligible to waive a course.
- Current full-time M.B.A. students who wish to take a course outside of the Carroll School of Management, must submit their request, in writing, at least 30 days prior to the start of the semester in which the student wishes to enroll in the outside course. Transfer credit will only be granted for courses related to the degree and is subject to approval by the Graduate Programs Office. Students must have completed a minimum of two semesters before they can submit a request to take a course outside of the Carroll School of Management. This includes courses taken through the Jesuit M.B.A. Network.
- Courses taken outside of Boston College will not reduce the student’s flat-rate M.B.A. tuition for that semester.
- Except under extenuating circumstances, students will not be approved for transfer credit if a comparable course is offered in the Carroll School of Management during the same academic year.
- Full-time M.B.A. students may cross register for one course each semester (not including Summer) at Boston University and Tufts, through the Consortium. Students interested in cross-registering for courses through the Consortium must first seek approval from the Graduate Programs Office and complete the necessary cross-registration forms, available through the University Office of Student Services (Lyons Hall). Per the Consortium agreement, tuition will be billed through the student’s Boston College account, at the Carroll School of Management’s tuition rate.

**Undergraduate Course Work**

Full-Time M.B.A. students who have demonstrated mastery in a core subject may be eligible for equivalency for up to five courses (15 credits).

Mastery typically entails either an undergraduate major in a core course area or at least two intermediate to advanced undergraduate courses with grades of B or higher.

Students may only receive Equivalency for core courses, based upon undergraduate coursework.

**Graduate and Professional Course Work**

Students who have a prior graduate degree in a relevant field or have completed graduate management courses at other AACSB-accredited institutions may be eligible for equivalency.

The CPA and CFA certifications will make a student eligible for equivalency.

Professional experience alone will not make a student eligible to waive a course.
Master of Science Programs

M.S. in Accounting

The Master of Science in Accounting program at Boston College cultivates students’ analytical abilities and promotes an in-depth understanding of the role of accounting in the world at large. The Master of Science in Accounting prepares students to excel in the pursuit of their CPA and provides a strong foundation for a thriving career. The M.S. in Accounting program is only offered on a full-time basis. Required coursework is determined by faculty through the review of the student’s academic transcript.

Enrollment Options

If you earned your undergraduate degree in a subject other than accounting, the Master of Science in Accounting summer program is designed to prepare you for the advanced study of accounting topics by providing a foundational education in core accounting subjects.

If you earned an undergraduate degree in accounting, you can apply to either the Master of Science in Accounting summer or Master of Science in Accounting fall program. Typically, the program can be completed in two semesters, and matriculation options remain flexible if you have accepted an offer from a firm prior to the start of the program.

Curriculum

The Master of Science in Accounting Program offers a flexible curriculum that is tailored to your academic background. Courses focus on concepts that can be practically applied to professional accounting practice, and you learn from an accomplished faculty possessing valuable experience in the industry.

Upon completion of the Master of Science in Accounting Program, you will have a thorough understanding of the audit process. You will be proficient with firms’ strategic cost management and management control decisions. You will be proficient with respect to financial statement analysis. And you will gain an in-depth understanding of the role taxes play in business decision making.

Each student receives a personalized course worksheet upon entering the Program that lists the specific courses you need to take to fulfill the Master of Science in Accounting degree. Completion of the Program requires a minimum of ten courses (30 credit hours) and at least six accounting classes, including the three Master of Science in Accounting core courses.

In addition to the academic requirements, all M.S. in Accounting students must complete ten hours of Community Service to fulfill their degree requirements.

Students are responsible for meeting the individual state requirements for taking the CPA exam. In some states, these requirements may result in additional courses.

M.S. in Finance

The Master of Science in Finance offers you a comprehensive curriculum grounded in fundamental economic principles to develop specialized knowledge and skills as well as insights into innovative methodologies.

Two scheduling options are available. The full-time option allows you to complete the Master of Science in Finance in one full year of study, while the part-time option offers a part-time curriculum for students who wish to continue their careers.
All Master of Science in Finance candidates must meet certain prerequisite requirements prior to entering the program.

Curriculum

The traditional 30-credit M.S. in Finance Program comprises seven core courses and three electives. All M.S. in Finance students first master the sophisticated framework of financial understanding, techniques, and analysis taught in Investments, Corporate Finance, Financial Econometrics, and Management of Financial Institutions, which are the prerequisites for subsequent core courses and all finance electives. Knowledge and skills acquired in the initial courses inform advanced discussions and exploration of innovative methodologies in Derivatives and Risk Management, Advanced Corporate Finance, and Active Portfolio Management. Learning is engineered to be cumulative and reinforcing.

The Quantitative Track 30-credit M.S. in Finance Program comprises eight core courses and two electives. This track is STEM designated and provides M.S. in Finance students with a highly quantitative focus with an emphasis on financial analytics. The STEM designation will enable students graduating from the Quantitative Finance Track to gain vital career experience and bring quantitative skills to workplaces in Corporate Finance, Asset Management, and Investment Banking.

In addition to these 30 credits, all M.S. in Finance students must complete 10 hours of Community Service to fulfill their degree requirements.

The M.S. in Finance Program is designed to meet the varied needs of finance professionals. Most classes meet from 7:00 p.m. to 9:30 p.m. during the academic year, with a limited number meeting from 4:30 p.m. to 6:50 p.m. Summer term courses meet twice a week from 6:30 p.m. to 9:30 p.m.

M.S. in Finance Program Options

Cohort (Accelerated) Option

Students are drawn from across the country and around the world to participate in the Carroll School's accelerated M.S. in Finance Program, which can be completed in one full year of study. Students take four courses in the fall and spring terms and two courses in the summer term when they may also choose to pursue an internship. Students progress through the program as a cohort. Taking all courses together not only fosters exceptional camaraderie, but also creates a supportive network—one that continues long after the Program comes to an end.

Self-Paced Option

The self-paced option is designed to meet the needs of individuals who wish to continue in their careers while pursuing advanced study. While course enrollment is flexible, self-paced students typically complete the Program in twenty months by taking two courses in the fall, spring, and summer semesters respectively.

M.S. in Finance Curriculum, Cohort Option

Core Courses

- MFIN8801 Investments
- MFIN8807 Corporate Finance
- MFIN8820 Management of Financial Institutions
- MFIN8852 Financial Econometrics
- MFIN8860 Derivatives & Risk Analytics
- MFIN8881 Advanced Corporate Finance
• MFIN8803 Quantitative Portfolio Management

Three electives:

• Any 6600- or 8800-level Finance elective

M.S. in Finance Curriculum, Quantitative Track (available only as full-time cohort)

Core Courses

• MFIN8801 Investments
• MFIN8807 Corporate Finance
• MFIN8820 Management of Financial Institutions
• MFIN8852 Financial Econometrics

Four of the five following:

• MFIN8XXX Data Analytics (course number TBD)
• MFIN8803 Quantitative Portfolio Management
• MFIN6640 Finance Seminar: Simulation and Optimization in Finance
• MFIN8860 Derivatives and Risk Analytics
• MFIN8880 Fixed Income Analysis

Two electives:

• Any 6600- or 8800-level Finance Elective

M.S. in Finance Curriculum, Self-Paced Option

Core Courses

• MFIN8801 Investments
• MFIN8807 Corporate Finance
• MFIN8820 Management of Financial Institutions
• MFIN8852 Financial Econometrics
• MFIN8860 Derivatives & Risk Management

One of the following:

• MFIN8803 Active Portfolio Management
• MFIN8880 Fixed Income Analysis

One of the following:
Three electives:

- Any 6600- or 8800-level Finance elective

Doctor of Philosophy Programs

Ph.D. in Accounting

Ph.D. students in accounting complete a five-year program that is based on a thorough grounding in fundamental economic principles and rigorous statistical skills. Students will develop an appreciation of the institutional details that characterize accounting research and will concentrate on developing skills in econometrics as well as contracting and capital markets theory.

Course Requirements

Accounting Ph.D. students complete a program of study that begins with coursework in accounting, quantitative methods, economics, and finance. Through seminar courses, students will become fluent on the existing state of research literature, appropriate research methods, and proper management of the publication process.

Course requirements are typically satisfied in the first two years of the program. In addition to doctoral seminars, Ph.D. students will take courses in the departments of finance and economics and are encouraged to explore inter-disciplinary pursuits (visit the Ph.D. in Accounting website for more details).

Comprehensive Examination

A comprehensive examination will be administered at the conclusion of the second year in the program. Satisfactory performance on the exam marks the transition from coursework to full-time thesis research.

Research

Doctoral students engage early in the research process. The completion of a first-year paper, which can be a replication or an extension of a previous study, provides an early hands-on experience in research design, programming, data-management, and statistical analysis. In addition, students complete a second-year paper based on an original research idea, and submit a research proposal at the end of the third year. The proposal is the precursor to the dissertation: a substantial, significant, and original contribution to the field.

Assistantships

Doctoral Students at the Carroll School are expected to serve as research or teaching assistants throughout their studies. Typically, students will serve as research assistants for the first two years of the program and act as teaching/research assistants in the following years. In exchange, students receive full tuition remission and a stipend.

Ph.D. in Finance
The Ph.D. program in Finance at Boston College is internationally known for a rigorous curriculum that combines theory with applied research and pedagogy. Finance faculty at Boston College are experts in their disciplines and globally acclaimed for their scholarship, research, and mentorship. In our collegial environment, students typically collaborate with one another and with faculty to produce groundbreaking research. The academic program begins with systematic, rigorous training in quantitative methods, economics, and finance. In addition, students complete a major research project, serve as research and teaching assistants, and write a doctoral dissertation. Graduates of the program are leaders in the field of finance who have the knowledge and analytical skills they need to conduct research and teach at the highest level.

The Ph.D. Program contains five components:

- Course Requirements
- Research Paper
- Comprehensive Examination
- Dissertation
- Research/Teaching Requirements

Each of these requirements is described below. Detailed standards for the Ph.D. candidate are published and provided to all students.

**Course Requirements**

Students complete a program of study that leads to competency in three areas: quantitative methods, economics, and finance. Ph.D. candidates in finance must complete four doctoral courses in quantitative methods, two in microeconomics, four in finance, and one in accounting. These requirements are typically satisfied in the first three years of the program (visit the [Ph.D. in Finance website](#) for details). In some cases, coursework completed prior to entering the program may be substituted for required courses.

**Research Paper**

Students are expected to engage in research early in the program. All students work as research assistants for fifteen hours per week for the first two years of the program. By May 31 of their third year, students are required to submit a research paper. A more detailed description of the research paper, its standards and criteria used to evaluate it is available from, maintained, and updated by the Ph.D. Committee.

**Comprehensive Examination**

Satisfactory performance on a written comprehensive examination marks the student’s transition from coursework to thesis research. The examination is intended to allow the student to demonstrate substantial knowledge of financial economics. The examination is taken within two months of the completion of the first year of the program.

**Dissertation**

The doctoral dissertation is expected to be a substantial, significant, and original contribution to knowledge. It is prepared under the guidance of a thesis committee of three or more faculty members selected by the candidate in consultation with his or her thesis advisor. Early in the process, the candidate submits a thesis proposal. The proposal is presented in a seminar to which the finance faculty and doctoral students are invited. The purpose of the presentation is to give the student an opportunity to hear the suggestions and comments of members of the Boston College finance community while the research plan is still fluid. A thesis-defense seminar, open to the Boston College community, is held when the research is completed.
Student Support and Research/Teaching Requirement

Doctoral students are offered financial support at a competitive rate. A student in good standing may receive this support for four years. Financial support beyond the fourth year is conditional on the student’s performance and may vary in amount. In return for this support, the student acts as a research assistant for the first two years of the program, then acts as a teaching assistant in the following years of the program. This generous level of support is based on the fact that students are expected to devote their full energies to the program during the entire calendar year, not just the academic year.

Ph.D. in Organization Studies

Designed to prepare students for academic careers, the Ph.D. program in Organization Studies at Boston College is recognized worldwide for its rigorous curriculum and exceptional faculty who are leaders in their fields. The program emphasizes a strong foundation in organizational theory, research methods, and statistics. Students begin the program with a set of complementary courses in micro- and macro-organizational theory, qualitative and quantitative research methods, statistics, and teaching skills. In the third year, students complete a major empirical research project and teach a course of their own. Throughout the Ph.D. program, students pursue research on their own and in collaboration with faculty. All students are encouraged to deliver papers at national and international professional conferences, as well as to submit articles for publication in top-tier research journals. Our graduates emerge as creative, independent scholars who can craft and pursue their own research agendas.

Ph.D. in Management with a Concentration in Organization Studies Curriculum

Course Requirements

Ph.D. students who have previous education in management take a total of 19 courses during the program; students without management education take two additional M.B.A. courses, for a total of 21 courses. All students begin the organization studies program with a set of complementary courses in micro- and macro-organizational theory, qualitative and quantitative research methods, statistics, and teaching skills. For course details, see Curriculum.

Comprehensive Examination

The comprehensive examination is given at the end of the second year. To pass the exam, students must demonstrate a substantial knowledge of theory and methods involved in the study of organizational behavior and theory.

Research Project and Dissertation

By the end of the third year, students complete a research paper demonstrating the ability to conduct innovative research in organizational studies. The culmination of the program is the dissertation: a substantial, significant, and original contribution to the body of knowledge in organizational studies that is prepared under the guidance of a dissertation committee of three faculty members.

Assistantship Requirement

Doctoral students at the Carroll School are expected to serve as research or teaching assistants throughout their studies. Typically, a student works as a research assistant for 15 hours a week during the first two years of the program, then teaches one course per semester or acts as a research assistant in the third and fourth years. In exchange, the Carroll School provides financial support for doctoral students in the form of a stipend and tuition remission.

Dual Degree Programs

The Carroll School of Management, Graduate Programs collaborate with other outstanding graduate schools and programs at Boston College to offer over highly regarded dual degree programs. Students are generally able to complete the requirements of a
dual degree program in less time than it would take to pursue each program separately. Interested applicants must apply and be admitted to both schools involved with a program. Dual degree programs have varying requirements and, while most take three years to complete, program lengths vary from two to four years of full-time study.

Students interested in dual degree programs must apply and be admitted to both the Carroll School of Management, Graduate Programs and the participating school within the University.

Applicants should contact both admissions offices to learn about admission requirements, deadline dates, and appropriate entrance tests.

**Admission Information**

Read below for more information on how to apply.

**Master of Business Administration**

Boston College’s M.B.A. program welcomes applications from graduates of accredited colleges and universities. The Admissions Committee considers applicants with academic backgrounds from virtually all areas of study, including liberal arts, business administration, social sciences, physical sciences, engineering, and law.

Courses in business administration or management are not required for admission to the M.B.A. program. However, students are expected to be proficient in communication skills and mathematics. In addition, all applicants are required to take either the GMAT or GRE.

The Admissions Committee looks for evidence of sound scholarship and management potential. Work experience and academic excellence are significant criteria in their evaluation. With few exceptions, students enter the program after at least two years of full-time work experience. Leadership and community involvement are also important factors in admissions decisions.

Additional information can be found at [www.bc.edu/mba](http://www.bc.edu/mba).

**Master of Science in Accounting**

The M.S. in Accounting Program welcomes applications from graduates of accredited colleges and universities. The Admissions Committee considers applicants with academic backgrounds from virtually all areas of study, including liberal arts, business administration, social sciences, physical sciences, engineering, and law.

Courses in business administration or management are not required for admission to the M.S. in Accounting Program. All applicants are required to take either the GMAT or GRE.

The Admissions Committee looks for evidence of superior intellectual ability, excellent communication and interpersonal skills, and the potential for a successful career in the accounting profession. Sound undergraduate scholarship, together with internship/work experience and leadership and community involvement, are significant criteria in their evaluation. Work or internship experience is not required to apply to the program; however, it can strengthen a candidate’s application.

Additional information can be found at the [M.S. in Accounting](http://www.bc.edu/mba) website.
Master of Science in Finance

The M.S. in Finance Program welcomes applications from graduates of accredited colleges and universities who have a strong interest in finance. Applicants with undergraduate or graduate degrees in other subject areas are encouraged to apply early so that they will have the opportunity to fulfill prerequisites that may be required. The Admissions Committee focuses on evidence of strong academic and professional success in all aspects of the application. An applicant's quantitative ability is carefully considered due to the rigorous nature of the curriculum. The Committee also considers leadership and community involvement factors in the admissions process. All applicants are required to take either the GMAT or GRE. Additional information can be found at the M.S. in Finance website.

M.B.A. Dual Degrees: Master of Science in Finance or Master of Science in Accounting

Students should be admitted to both the M.B.A. and M.S. in Finance or M.S. in Accounting programs to enter the Dual Degree program. The M.B.A./M.S. in Finance program is highly analytical, and an applicant's quantitative skills are weighed heavily in the admission decision. Students are expected to be proficient in English and mathematics. All applicants are required to take either the GMAT or GRE.

The M.B.A./M.S. in Accounting program is for individuals interested in careers in public accounting, financial analysis, or financial management in a corporate or not-for-profit environment. Students are expected to be proficient in English. All applicants are required to take either the GMAT or GRE.

Ph.D. in Finance

Admission to the Ph.D. program in Finance is open to applicants who show evidence of strong intellectual abilities, a commitment to research and teaching, and previous preparation in an analytical field. Students are required to have demonstrated competence and basic knowledge of finance. A student entering the program without such a background may be required to take additional courses. The GMAT or GRE is required for admission.

Ph.D. in Organization Studies

Admission to the Ph.D. program in Organization Studies is open to applicants who show evidence of strong intellectual capabilities, a commitment to research and teaching, and previous academic preparation in fields related to management. Students are required to have demonstrated competence in the functional areas of management. Applicants who have not already received an M.B.A. or have not completed the equivalent of the M.B.A. core curriculum prior to entering the program may be required to take additional courses. The GMAT or GRE is required for admission.

Ph.D. in Accounting

Admission to the Ph.D. program in Accounting is open to applicants with outstanding potential for leadership and academic excellence. While notable for their individual achievements, competitive candidates will demonstrate a consistent record of taking initiative in their academic and professional pursuits, and aptitude for conducting research at its highest levels, and a desire to make an impact on the world. Applicants are required to take the GMAT or GRE.

International Students

All applicants who completed their undergraduate course work outside the United States must have the equivalent of an American bachelor's degree or American master's degree (equivalency to be determined by the Graduate Dean of the School). In addition, all students whose first language is not English are required to take the Test of English as a Foreign Language (TOEFL) or Pearson Test of English (PTE). This requirement is waived for applicants who have completed a four-year course of study or have been enrolled for the past two years in a college or university in the United States, Canada, Great Britain, Australia, or New Zealand. The minimum required score on the TOEFL is 600 paper-based, 250 computer-based, or 100 on the IBT. The minimum
required score on the PTE is 68. An official score report should be sent to Boston College, The Carroll School of Management, Graduate Programs, Cushing Hall, 203, 140 Commonwealth Ave., Chestnut Hill, MA 02467-3808, United States.

Accepted international applicants must provide financial certification for two years for the M.B.A. Program and one year for the M.S. in Finance or M.S. in Accounting Program.

Financial Assistance

See below for more information on financial aid.

Graduate Assistantships and Scholarships

The Carroll School of Management offers a range of graduate assistantships and scholarships to Full-Time M.B.A., M.S. in Finance and dual degree M.B.A./M.S. in Finance students. Assistantships and scholarships are merit-based awards and are made only at the time of admission. These awards range in value and are typically awarded to exceptionally strong candidates. These institutional awards are determined by committee and administered at the point of admission.

NOTE: Applicants must indicate interest in receiving merit-based funding on the application.

Graduate assistantships involve research or administrative duties in exchange for a stipend. Assistantships are generally 6 hours per week assignments.

Assistantships are available to both domestic and international applicants, and can be offered in combination with academic scholarship awards. Scholarships are awarded on the basis of merit and vary in amount.

Merit-based awards are made to new students at the time of admission. Students who receive a scholarship and/or assistantship during the first year of the M.B.A. program and maintain a cumulative grade point average of at least a 3.0 are eligible for consideration for continuing support during the second year, subject to performance evaluation by their supervisor.

The M.S. in Accounting Program offers merit-based scholarships to selected admitted applicants. Awards are made only at the time of admission. Scholarships are available to both domestic and international applicants. All admitted applicants are automatically considered for an award and awardees typically show evidence of superior performance in their application materials.

Ph.D. in Finance candidates, upon completion of any necessary prerequisite courses, receive full tuition remission and an annual stipend for up to four years of full-time study. In return, each candidate works as a research assistant the first two years and as either a research assistant or teaching assistant for the second two years.

University-Administered Financial Aid

In addition to the assistantships and scholarships offered through the Carroll School of Management, Graduate Programs, the Office of Student Services offers a variety of programs to help students finance the potential for a successful career in the accounting profession. Sound undergraduate scholarship, together with internship/work experience and leadership and community involvement are significant criteria in their evaluation. Work or internship experience is not required to apply to the program; however, it can strengthen a candidate’s application.

Additional information can be found at the Graduate and Law Financial Aid website.

Career Development, Accreditation, and More Information
Career Development

The Office of Graduate Management Career Development supports students in achieving their career goals through placement initiatives, career coaching, recruiting, and other services. In addition, the office serves as a bridge to corporations through its outreach activities and links to Boston College’s worldwide alumni network. Specific services include the following: recruiting program, corporate presentations and informational sessions, interview preparation, resume books, corporate outreach, and other relevant Career Resources.

Accreditation

The Carroll School of Management is accredited by the Association to Advance Collegiate Schools of Business (AACSB). The School is also a member of the Graduate Management Admission Council (GMAC) and the New England Association of Graduate Admission Professionals.

For More Information

Prospective students should direct inquiries for the M.B.A., M.S. in Finance, M.S. in Accounting, or Ph.D. in Finance Program to the Graduate Management Admissions Office at Boston College, Cushing Hall, Room 203, Chestnut Hill, MA 02467-3808; telephone: 617-552-3920; fax: 617-552-8078; www.bc.edu/carroll.

Connell School of Nursing, Graduate Programs

The William F. Connell School of Nursing offers a Master of Science (M.S.) degree program preparing individuals to become advanced generalists or nurse anesthetists; a Doctor of Nursing Practice (DNP) degree program, preparing individuals for advanced nursing practice as nurse practitioners; and a Doctor of Philosophy (Ph.D.) degree program preparing highly qualified individuals for research and leadership roles in nursing, health care, research, and academic settings.

Accreditation

All nurse practitioner degree programs are nationally accredited by the Commission on Collegiate Nursing Education (CCNE). For additional information, visit the CCNE website. The Nurse Anesthesia program is accredited by the Council of Accreditation of Nurse Anesthesia Educational Programs.

Doctor of Philosophy Degree Program with a Major in Nursing

The Ph.D. Program in Nursing emphasizes knowledge development and research to advance nursing science and improve the health of individuals, families, and communities. For the program objectives, please refer to the student handbook.

The Ph.D. program includes two phases: coursework and dissertation. After finishing the required coursework, the student completes a comprehensive examination. The purpose of the Ph.D. Comprehensive Examination is to demonstrate mastery of the program objectives through written and oral responses to questions related to knowledge development, research methods, substantive knowledge, ethical judgment, nursing/healthcare issues, and health policy. After successful completion of the Ph.D. Comprehensive Examination, the student moves to the dissertation phase, in which the student develops and conducts original dissertation research. The Ph.D. program and defense of the final dissertation must be completed within eight years of initial enrollment. Policies and procedures are consistent with those of the University.

Consistent with the recommendations of leading professional organizations, full-time doctoral study is highly recommended. Fellowships, scholarships, and other financial resources are available to full-time Ph.D. students through the Connell School of Nursing (CSON), Boston College, professional nursing organizations and governmental agencies (e.g., HRSA, NIH, and NINR). The full-time plan of study allows students to complete required coursework in two years; some students may take longer to
complete required coursework or may need to take additional coursework. Most full-time students complete the entire Ph.D. program in four to five years. Part-time students usually take longer to complete the degree. Nonetheless, the entire Ph.D. program, including dissertation research and defense, must be completed within eight years.

Low student-to-faculty ratios and research mentorship facilitate student success and program completion in a reasonable amount of time. Multiple resources for scholarly development are available within the Connell School of Nursing, the University, our consortium University partners, and through research collaborations with research and clinical academic centers of the Greater Boston area. The Ph.D. program offers a variety of learning opportunities through course work, CSON forums, interdisciplinary colloquia, and collaborations through the Harvard Catalyst, independent study, and research practica. An individualized plan of study is developed according to the student’s educational background, research interests, and stage of development in scholarly activities.

Program of Study

A minimum of forty-six (46) credits are required to complete the Ph.D. degree. Additional credits and course work may be needed, depending upon the student’s background, previous graduate training, and area of research interest. Substantive content expertise is acquired by taking cognates and elective courses in the area of interest. The research component of the program includes qualitative and quantitative research methods, statistics, research seminars, research practica and experiences, and dissertation development and advisement.

The list of courses in the Ph.D. program of study can be found in the Ph.D. Student Handbook.

Ph.D. Funding

There are three major sources of funding for full-time students in the doctoral program in nursing at Boston College.

1. University Fellowships are awarded to eligible full-time students each year on a competitive basis. Full tuition and a stipend are provided for up to three years as long as the student maintains good academic standing and demonstrates progress toward the Ph.D.
2. Research Assistant positions may be available through faculty research grants.
3. Teaching Assistant positions are available within the Connell School of Nursing.

Additional grants and scholarship opportunities are available on an individual basis. Students are encouraged to apply for a competitive individual National Research Service Award to assist with tuition and to provide a stipend.

Career Opportunities

Graduates of the Ph.D. program often seek positions in academic settings or in health care, industry, government, or other settings where research is conducted. Some Ph.D. graduates continue on to complete post-doctoral fellowships at research centers located at universities, government, or health care agencies.

Doctor of Nursing Practice Degree Program

The Doctor of Nursing Practice (DNP) program is a terminal nursing practice degree emphasizing holistic and compassionate care in the preparation of advanced practice nurses. The DNP program prepares advanced practice nurses with the knowledge and skill for providing comprehensive primary care to patients, families, communities, and populations within our complex and ever-changing health care system. With a focus on innovative and effective leadership, evidence-based practice, quality improvement, and a systems approach to care, the DNP advanced practice nurse is equipped to become an expert nurse leader in improving health outcomes.
The DNP program builds upon and integrates core course work in Epidemiology, Health Care Policy for Nursing Practice Leaders, Healthcare Information Technology Management, Program Planning and Evaluation for Population Health, Healthcare Quality Management, as well as the three P’s (Advanced Physiology and Pathophysiology Across the Life Span, Advanced Health/Physical Assessment Across the Life Span, Pharmacotherapeutics in Advanced Practice Nursing) throughout the curriculum and clinical practicum courses. A focus on the history of nursing science, nursing’s ethical responsibilities, as well as a strong foundation in evidence-based practice, culminates in the development of a student-led, innovative practice improvement or change project (DNP project).

**DNP Areas of Specialization**

**Adult-Gerontology Primary Care Nurse Practitioner**

As an advanced practice nurse, a graduate of this program is able to manage the health care of adolescents, adults, and older adults, providing interventions to promote optimal health across a wide range of settings. Graduates serve as advanced practice nurses in a variety of health care settings including hospitals, clinics, health maintenance organizations, hospices, home care, and community-based medical practices, and they can pursue national certification (through organizations such as the American Nurses Credentialing Center) as an Adult-Gerontology Primary Care Nurse Practitioner.

**Family Nurse Practitioner**

A graduate of this program is able to deliver primary care to individuals, families, and communities across a broad range of racial/ethnic, socioeconomic, geographic, and age/development strata. Graduates can serve as Family Nurse Practitioners (FNPs) in a variety of health care settings, including ambulatory settings, wellness centers, home health agencies, occupational health sites, senior centers, homeless shelters, and migrant camps. Graduates can pursue national certification (through organizations such as the American Nurses Credentialing Center) as a Family Nurse Practitioner.

**Pediatric Primary Care Nurse Practitioner**

A graduate of this specialty program is able to provide a wide range of primary and secondary health services for children from infancy through adolescence. Graduates can serve as a Pediatric Nurse Practitioner in a variety of health care agencies and community settings. Graduates can pursue national certification (through the American Nurses Credentialing Center or the National Certification Board of Pediatric Nurse Associates and Practitioners) as a Pediatric Primary Care Nurse Practitioner.

**Psychiatric-Mental Health Nurse Practitioner**

A graduate of the Family Psychiatric Mental Health Nurse Practitioner Program is able to conduct psychotherapy with individuals across the life span, groups, and families. Graduates can also function as case managers for persons with psychiatric disorders, provide psychiatric consultation to primary care providers, serve as Psychiatric-Mental Health Specialists in a variety of settings, including out-patient, partial hospitalization, day treatment, and community-based intervention programs. Graduates are eligible to seek national certification (through organizations such as the American Nurses Credentialing Center) as a Family Psychiatric-Mental Health Nurse Practitioner or Psychiatric-Mental Health Nurse Practitioner, and can apply for prescriptive authority in many states (including Massachusetts).

**Women’s Health Nurse Practitioner**

As a Women’s Health Nurse Practitioner, a graduate from this specialty program is able to provide direct care to meet women’s unique concerns and health needs across the life span. Graduates can also serve as a Women’s Health Nurse Practitioner inside or outside of formal health care agencies and institutions. Graduates can pursue national certification as a Women’s Health Nurse Practitioner offered by national programs such as the National Certification Corporation.

**Program Entry Options**
Direct Entry Doctor of Nursing Practice (DNP)

The Direct Entry Doctor of Nursing Practice program is an accelerated program designed for individuals who have a baccalaureate degree or higher in fields other than nursing who wish to pursue preparation as an advanced practice nurse. The Direct Entry DNP provides a seamless, integrated curriculum to prepare students for license as registered nurses and for certification as advanced practice nurses. In this program, students complete extensive prerequisite courses prior to acceptance and enrollment. They study and complete advanced generalist nursing requirements on an intensive full-time basis during the first 18-months of the program.

Students will meet both the AACN Essentials of Baccalaureate Education for Professional Nursing Practice and the AACN Essentials of Master’s Education in Nursing during the 18-month pre-licensure portion of the program. A Master of Science in Nursing as an Advanced Generalist is conferred upon successful completion of the pre-licensure coursework, whereupon students are eligible to sit for the National Council Licensure Examination (NCLEX-RN). The pre-licensure component of the program consists of 56 academic credits.

After passing the NCLEX-RN exam and receiving a license as a registered nurse, students then proceed into the doctoral level coursework in one of the following nurse practitioner specialty areas of practice: Adult-Gerontology Primary Care Nurse Practitioner, Family Nurse Practitioner, Pediatric Primary Care Nurse Practitioner, Psychiatric-Mental Health Nurse Practitioner, and Women’s Health Nurse Practitioner. In order to progress to nurse practitioner study (doctoral level), students must be in good academic standing and be licensed as registered nurses. The program includes a clinical project associated practicum, 1,000 clinical practice hours, and an additional 48 credits following conferral of the pre-licensure master’s degree.

Applicants are reviewed and accepted into the clinical specialty program to which they apply and are assigned a clinical placement year at that time. Students are permitted to slow down and attend part-time during the nurse practitioner component. To do so, they should contact the graduate office to find out when a clinical seat would be available. Students who wish to change specialty programs must contact the graduate office and the two program directors, apply and be accepted into the desired specialty program. Acceptance is not guaranteed and may slow completion of the degree as the clinical year is assigned on a space available basis.

Direct Entry program students are not eligible to apply to the nurse anesthesia program because admission to this program requires a minimum of one-year of experience as a registered nurse in an intensive care (ICU) setting.

Post-Baccalaureate Doctor of Nursing Practice (DNP)

The Post-Baccalaureate DNP provides a seamless, integrated curriculum to prepare registered nurses for certification as advance practice nurses. This program, designed for individuals who hold baccalaureate degree in nursing and wish to specialize in one of the following specialty practice areas: Adult-Gerontology Primary Care Nurse Practitioner, Family Nurse Practitioner, Pediatric Primary Care Nurse Practitioner, Psychiatric-Mental Health Nurse Practitioner, and Women’s Health Nurse Practitioner, can be completed on a full or part-time basis. The program includes a clinical project associated practicum, 1,000 clinical practice hours, and 71 academic credits.

Post-Master's Doctor of Nursing Practice (DNP)

The Post-Master’s DNP program is designed for currently practicing master’s prepared advanced practice nurse practitioners who wish to complete a terminal practice degree program. Following a complete portfolio review and building on prior clinical knowledge and experience, students will focus on innovative core class work in healthcare quality, safety, informatics, and policy. Building on a foundation of evidence-based practice knowledge, students will develop and lead an innovative practice improvement or change project. The program includes a project associated practicum and a minimum of 30 academic credits.

RN (ASN) to Doctor to Nursing Practice (DNP)

The RN to DNP program is designed for the associate degree prepared registered nurse who wishes to become an advanced practice nurse and specialize in one of the following specialty practice areas: Adult-Gerontology Primary Care Nurse Practitioner,
Family Nurse Practitioner, Pediatric Primary Care Nurse Practitioner, Psychiatric-Mental Health Nurse Practitioner, and Women’s Health Nurse Practitioner. Following a complete portfolio review, an individualized curriculum of classroom and clinical content will be developed. Students entering by this route will be required to complete bridge course work prior to beginning the DNP curriculum. This program can be completed on a full or part-time basis. One thousand (1,000) advanced practice clinical hours and a clinical project associated practicum are required. Credit hours are dependent on results of the individual portfolio review.

Master of Science Degree Program with a Major in Nursing

The graduate of the master’s program is prepared as an advanced generalist nurse with disciplinary knowledge and skill to provide culturally sensitive, safe, and high quality care. The graduate will improve the delivery of care through leadership, mentorship, and evidence-based practice. The graduate will have met the AACN Essentials of Master’s Education in Nursing. The graduate without a baccalaureate degree in nursing will have met the AACN Essentials of Baccalaureate Education for Professional Nursing Practice and will be eligible to sit for the National Council Licensure Examination (NCLEX-RN). Program objectives can be found in the Master's Student Handbook.

Program Entry Options

Post-Baccalaureate Advanced Generalist

The Post-Baccalaureate Master of Science in Nursing, Advanced Generalist is designed for bachelor’s prepared registered nurses. This program is designed for current nurses to advance into nursing leadership roles. Students will meet the AACN Essentials of Master’s Education in Nursing. The program utilizes evidence-based practice to improve the delivery of care through leadership and mentorship culminating in a clinical experience in advanced generalist practice. This program consists of 31 credits.

Direct Entry Advanced Generalist Masters (AGM)

The Direct Entry Advanced Generalist Master's program is an accelerated program designed for individuals who have a baccalaureate degree or higher in fields other than nursing who wish to pursue preparation as a registered nurse. The Direct Entry AGM program provides a seamless, integrated curriculum to prepare students for license as registered nurses with enhanced content in healthcare quality, informatics, nursing leadership and policy. In this program, students complete extensive prerequisite courses prior to acceptance and enrollment. They study and complete generalist nursing requirements on an intensive full-time basis during the 18-months of the program.

Students will meet both the AACN Essentials of Baccalaureate Education for Professional Nursing Practice and the AACN Essentials of Master’s Education in Nursing during the 18-month program. A Master of Science in Nursing as an Advanced Generalist is conferred upon successful completion of the pre-licensure coursework, whereupon students are eligible to sit for the National Council Licensure Examination (NCLEX-RN). The pre-licensure component of the program consists of 56 academic credits. The list of courses in the Direct Entry Master's Generalist program can be found in the Master's Student Handbook. For further details, please visit www.bc.edu/nursing.

RN (ASN) to M.S., Advanced Generalist

The RN to Master of Science in Nursing, Advanced Generalist is designed for associate’s prepared registered nurses. This program is designed for current nurses to advance into registered nurse leadership roles. Students will meet the AACN Essentials of Master’s Education in Nursing. The program utilizes evidence-based practice to improve the delivery of care through leadership and mentorship culminating in a clinical experience in advanced generalist practice. Following a complete portfolio review, an individualized curriculum of classroom and clinical content will be developed. Students entering by this route will be required to complete bridge course work prior to beginning the master’s curriculum. Credit hours are dependent on results of the individual portfolio review.
Certified Registered Nurse Anesthetist (CRNA)

The Nurse Anesthesia Program is a collaborative effort between the William F. Connell School of Nursing and Anesthesia Associates of Massachusetts. The curriculum design takes advantage of the core courses common to all master’s degree nursing specialties. In addition, students learn the advanced physiologic and pharmacologic principles specific to nurse anesthesia practice. The Nurse Anesthesia program of study includes 21 credits of core courses and 49 credits of specialty and theory clinical practicum. Clinical practica take place at the varied facilities where Anesthesia Associates of Massachusetts provide services and give students broad hands-on experience. The 27-month full-time curriculum is accredited by the Council on Accreditation of Nurse Anesthesia Educational Programs; graduates are eligible to sit for the National Certification Examination of the Council on Certification. The Nurse Anesthesia Program was re-accredited in 2015 by the Council on Accreditation (COA) for Nurse Anesthesia Programs. The list of courses can be found in the Master's Student Handbook.

Electives

Elective course options within the Connell School of Nursing include: NURS7524 Master’s Research Practicum; NURS7525 Integrative Review of Nursing Research; and graduate level independent study. Additional elective courses are offered in forensic nursing, global health, sexual health, and interdisciplinary approaches to palliative care. Other relevant graduate level elective courses are available in other schools or departments at Boston College. Independent Study is recommended for students who have a particular interest that is not addressed in required courses in the curriculum. Other electives are available through the consortium. The list of courses in the Direct Master’s Entry program of study can be found in the Master's Student Handbook.

Non-Degree (Special Student)

The Special Student status is for non-matriculated students with a bachelor’s degree in nursing who are not seeking a degree but are interested in pursuing course work at the graduate level. Persons interested in this option must apply and be admitted as a non-degree student to the Connell School of Nursing, Graduate Programs before registering for courses. Some courses are restricted to matriculated students only; other courses allow enrollment on a space-available basis.

Cooperating Health Agencies

Our programs utilize numerous and diverse practice settings in the city of Boston, the greater metropolitan area, and eastern New England. Sites are selected to offer rich experiences for developing advanced competencies in the nursing specialty. Community agencies include the Boston VNA, mental health centers, general health centers, community health centers, college health clinics, public health departments, visiting nurse associations, health maintenance organizations, nurse practitioners in private practice, and home care agencies. Additional settings include hospice, homeless shelters, schools, prisons, and Boston Veterans Administration (VA) health services. Selected major teaching hospitals used include: Massachusetts General Hospital, Beth Israel-Deaconess Medical Center, McLean Hospital, Brigham and Women’s Hospital, Boston Medical Center, and Boston Children’s Hospital.

Admission Requirements

For all admissions requirements, please visit the Connell School of Nursing website at the How to Apply page.

General Information

Read below for more information regarding graduate study at the Connell School of Nursing.

Graduate Academic Policies in the Connell School of Nursing
Academic Integrity

Students are expected to have high standards of integrity in both the academic and clinical settings. CSON adheres to the Boston College policies surrounding academic integrity. This policy may be accessed online at the Policies and Procedures section of this Catalog.

Expected ethical behavior in clinical situations is based on the American Nurses' Association Code of Ethics for Nurses (ANA, 2001, 2010). Students are expected to protect patients' confidentiality at all times, and to be honest in any documentation regarding the patient’s condition and their own assessments and interventions. Students are expected to maintain high professional standards, including being physically, intellectually, emotionally, and academically prepared when caring for patients. Unprofessional conduct is considered serious and may result in dismissal from the school.

Graduate Academic Standing and Progression Policies

The Graduate Academic Standards Committee, composed of professors responsible for the NURS courses in the graduate program, meets at the end of each semester to review the records of master’s students with course failures, course deficiencies, low GPAs, or other academic concerns. This Committee makes recommendations about progression in the program in accordance with the policies described below and other relevant university policies. Final progressions decisions are made and implemented by the Graduate Associate Dean.

Graduate students are expected to maintain good academic standing at all times and progress through their program of study. Those who are not in good academic standing or are not progressing are subject to review by the Graduate Academic Standards and Progression Committee.

All graduate students in the William F. Connell School of Nursing are expected to maintain a GPA of 3.0 in order to remain in good academic standing. The minimum acceptable passing grade for graduate courses is a B- (80). Students will undergo academic review if they have a GPA of less than 3.0 or earn a grade less than a B- (80) in a course.

If a student does not meet the minimum of a B- in any graduate NURS course, the student will be required to retake the course before advancing in the curriculum. Additionally, the student will be placed on academic probation and will be unable to progress until the deficit is remediated. Graduate students may repeat a nursing course only once after withdrawing from it or not achieving a B-.

Graduate students who are on probation are not eligible for teaching assistantships, research assistantships, fellowships, and/or any type of merit-based tuition remission award. Students will be dismissed from the School of Nursing after 2 nursing (NURS) course failures and/or withdrawals to prevent failure in NURS courses.

Graduate students, who demonstrate unsafe clinical practice or unprofessional conduct in clinical, classroom settings, and/or interactions with BC faculty or staff, will undergo academic review and may be dismissed from the program. Unsafe clinical practice and/or unprofessional conduct are grounds for failure in any clinical course and may result in immediate removal from the clinical site.

The Graduate Associate Dean will notify the student of the outcome of academic review as soon as possible. If the student is dissatisfied with the decision, the student may submit a formal appeal.

For the procedure for graduate student grievances and the formal appeals procedure, please refer to the student handbook:

- Master's Student Handbook
- Ph.D. Student Handbook

Transfer of Credits
Matriculated graduate students may request permission to transfer in up to 6 credits of graduate course work completed at another regionally accredited graduate university prior to matriculation. Only courses completed within the past five years that were not applied to a prior degree and in which the student earned a grade 80 (B-) or better can be considered for transfer. Matriculated students are not permitted to take courses outside of Boston College, other than through the Consortium. Core courses that were taken prior to matriculation may be considered on a case-by-case basis. Students will not be allowed to transfer in more than six (6) credits towards their degree.

To request to have an outside course considered for transfer, the student must provide a copy of the course description for electives and course syllabus for core courses to the graduate office. Core nursing courses that were taken prior to matriculation at Boston College must be reviewed for equivalency by the TOR for the core course at Boston College, and approved by the TOR and the graduate associate dean (forms in the appendix and on the CSON website). If approved, the student must submit a final official transcript documenting a grade of B or better to the graduate office for processing. The transfer course and credit, but not a grade, will be recorded on the student's transcript after the student has successfully completed one full semester at Boston College.

Electives/cognates may be approved by the faculty advisor.

Time to Degree Completion

Students in the M.S. program have five (5) years from initial enrollment to complete their program of study. Students in the DNP program have eight (8) years from initial enrollment to complete their program of study. Students in the Ph.D. program have eight (8) years from initial enrollment to complete all degree requirements, including defending and submitting the final version of the dissertation.

Graduate students may apply for a leave of absence (LOA) for personal reasons, health reasons, or other extenuating circumstances. LOAs are usually granted for one semester; a two semester LOA may be granted under unusual circumstances. Leaves of Absence do not “stop the clock” or extend the program time limits. An exception is made for graduate students who require an LOA due to active military service. Students should contact the Graduate Associate Dean. Graduate students who exceed the program time limits or who fail to make progress towards their degree will be reviewed by the Graduate Academic Standards and Progressions Committee and may be subject to dismissal from the program.

Financial Aid

Applicants and students should refer to the Connell School of Nursing web page for Financial Aid resources at the Admission and Aid page. Refer to the Financial Aid section of this Catalog for additional information regarding other financial aid information.

Housing

The Boston College Off-Campus Housing Office offers assistance to graduate students in procuring living arrangements. Please refer to the Off-Campus Housing website.

Transportation

Precepted clinical practica are held in a wide variety of hospitals, clinics, and health-related agencies and are a vital part of the graduate nursing program. Most of the clinical facilities are located in the greater Metropolitan Boston area, although some are located in the suburbs, eastern Massachusetts, southern New Hampshire, and Rhode Island. Students are responsible for providing their own transportation to and from the clinical facilities.

Graduate Program Contacts in the Connell School of Nursing

The Dean of the School of Nursing is responsible for the overall administration of the school.
Susan Gennaro, RN, Ph.D., FAAN

Dean

Office: Maloney 294
Telephone: 617-552-4251

The Associate Deans are responsible for academic and financial administration.

Susan Kelly-Weeder, Ph.D., FNP-BC, FAANP, FAAN

Associate Dean for Graduate Programs

Office: Maloney 220
Telephone: 617-552-8018

Christopher Grillo

Associate Dean for Finance and Administration

Office: Maloney 294
Telephone: 617-552-8531

The Program Directors are responsible for the direct oversight of their respective APRN programs.

**Graduate Clinical Specialty Program Directors**

Susan Emery, Ph.D., CRNA
Office: Maloney 234
Telephone: 617-552-6844

Lynch School of Education and Human Development, Graduate Programs

To enhance the human condition, expand the human imagination, and make the world more just—that’s the mission driving the work of our faculty and students.

We put our mission into action through teaching, research, and service—informing policy, improving practice, and preparing students to serve diverse populations in a variety of roles.

And we define education expansively—as an opportunity to shape the future of humanity and our society. Toward that end, the Lynch School employs the Jesuit, Catholic holistic approach to student formation. We educate our students as whole people so they, in turn, can empower others to prosper and lead full lives.
Enhancing the Human Condition

We recognize that people develop and flourish across many interrelated dimensions: cognitively, emotionally, morally, socially, and spiritually. We prepare our students to transform others’ lives across each of these dimensions and at their intersections.

Expanding the Human Imagination

By providing us with new paradigms and new information, universities have the capacity to spur people to think differently, expanding our approaches to problems and potential solutions. Through education, we progress beyond conventional ways for understanding the world and discover unexpected patterns.

Making the World More Just

As a community of scholars and practitioners, we have an obligation to help people realize their aspirations, increase access to societal opportunities, and lift up those who have fewer advantages. We engage in individuals’ lives and build social contexts that promote justice, equality, and a sense of community.

Introduction to Graduate Programs

Consistently ranked among the top 25 schools of education and as the top-ranked Catholic school of education in the country, the Lynch School at Boston College offers 17 master’s programs, six doctoral programs, and five dual-degree programs. Theory, research, and practice are integrated across programs, which also leverage the robust practice opportunities available in schools, hospitals, mental health centers, and universities in the Boston metropolitan area. The Lynch School’s focus on expanding social justice is a hallmark of our programs and the work of our students and faculty.

Admission Information

Information about admission is available on the Lynch School website at www.bc.edu/lynchschool. You may also write to: Boston College, The Office of Graduate Admission, Financial Aid, and Student Services, Lynch School of Education and Human Development, Campion Hall 135, 140 Commonwealth Avenue, Chestnut Hill, MA 02467-3813, telephone 617-552-4214, or e-mail gsoe@bc.edu.

The Lynch School admits students without regard to race, ethnicity, religion, age, sex, sexual orientation, marital or parental status, national origin, veteran status, or disability. The Lynch School welcomes the presence of multiple and diverse cultural perspectives in its scholarly community.

Students must be formally admitted to the Lynch School Graduate Programs by a committee composed of faculty and administrators. Students may apply to degree programs or to study as a Non-Degree Student. Consult the Lynch School admissions website for complete information.

Official notification of admission is made by a written announcement from the Lynch School. Students should not presume admission until they receive this announcement. Admitted students are required to submit a non-refundable deposit of $250 by the date stipulated in the admission letter. The deposit is applied to tuition costs for the first semester of study.

Application Deadlines

All admission deadlines are posted on the Lynch School website at www.bc.edu/lynchschool. In some cases, master’s program applications are considered beyond the deadline. While official deadlines are posted for summer/fall start, some programs may
consider a spring start. Non-degree applications are considered for summer, fall, and spring start dates. Call the Office of Graduate Admission, Financial Aid, and Student Services at 617-552-4214 or e-mail gsoe@bc.edu for more information.

Deferral of Admission

Admission may be deferred for up to one year for those accepted to master’s degree programs. Deferral of admission to doctoral programs is at the discretion of the admitting faculty. Requests to defer admission must be submitted in writing to the Associate Dean of Graduate Admission and Financial Aid in the Office of Graduate Admission, Financial Aid, and Student Services and must be approved and confirmed by the Lynch School.

The number of acceptances to graduate programs each year is dependent upon the number of deferred students who will be matriculating in a given year. For this reason, the Lynch School requires that students who wish to defer for a semester or a year indicate this at the point of acceptance and return the response form with a deposit of $250.00. This will hold a space in the following year’s class and will be credited toward the first semester of study.

Because of the volume of applications received each year by the Lynch School, there can be no assurances of deferred admission and the above procedure must be followed.

Admission for International Students

International Students (non-U.S. citizens who are not permanent U.S. residents) may find information about admission and an online application on the Lynch School website at www.bc.edu/lynchschool. Prospective students may also write to: Boston College, Office of Graduate Admission, Financial Aid, and Student Services, Lynch School of Education and Human Development, Campion Hall 135, 140 Commonwealth Ave, Chestnut Hill, MA 02467-3813, telephone 617-552-4214, or e-mail gsoe@bc.edu. All international student applicants for whom English is not their first language, or who do not hold a degree from an English-speaking university, must take the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS) examination and request that their score be forwarded to the Lynch School of Education and Human Development by the Educational Testing Service (www.ets.org). The Lynch School of Education and Human Development's TOEFL code is 3240. Ordinarily, the Lynch School expects a minimum score of 100 on the internet-based TOEFL. Information on exemptions from the TOEFL, as well as additional testing information, is contained in the graduate application materials available on the Lynch School website. Information about these examinations also may be obtained from the Educational Testing Service (www.ets.org).

Non-Degree Status

Students not seeking a degree, but interested in pursuing course work at the graduate level, may apply for admission as a Non-Degree Student. While there is no guarantee of later admission to a degree program, many individuals choose Non-Degree Status either to explore the seriousness of their interest in studying for an advanced degree and/or to strengthen their credentials for later application for degree status. Others are interested in taking graduate course work for personal enrichment or professional development. Included among those taking courses are school counselors, teachers, administrators, and psychologists who are taking classes as a means of fulfilling professional development requirements or continuing education units.

Students seeking non-degree student status must submit the online application form on the Lynch School admissions web page.

Although there is no limit on the number of courses Non-Degree Students may take, no more than four courses (12 semester hours), if appropriate, may be applied toward a degree program in the Lynch School. Courses taken as a Non-Degree Student may be applied to a degree program only after official acceptance into a degree program and with the consent of the student's advisor.

Due to space limitations, all courses may not be available to Non-Degree Students. Practicum coursework associated with teacher licensure or counseling psychology licensure is reserved for matriculated degree students in these programs. Students who wish to become certified or licensed must gain admittance to a graduate degree program in the desired area. Other courses are restricted each semester to maintain class size. Individuals considering Non-Degree Student status may seek advising from the
Office of Graduate Admission, Financial Aid, and Student Services. Non-degree students are not eligible for University sponsored sources of financial aid or any financial aid that requires matriculation in a degree program.

**Fifth Year/Early Admit Programs**

The Fifth Year Program and Early Admit Program offer academically outstanding Boston College juniors a unique opportunity to begin graduate study during their undergraduate senior year, allowing them to graduate with a bachelor's and a master's degree in a shortened amount of time. All undergraduate juniors in the Lynch School of Education and Human Development, Morrissey College of Arts and Sciences, Connell School of Nursing, and Carroll School of Management are eligible to apply for these programs.

In consultation with an advisor, students have the ability to take up to two graduate-level courses in their senior year. In addition to the time advantage, there is a considerable savings involved. The two graduate-level courses taken during senior year are covered by undergraduate tuition.

Upon successful completion from the undergraduate program, senior year coursework and the additional graduate-level courses are reviewed and a determination about formal admission into the graduate program is made. Upon final admission, the student is sent an official letter of acceptance to the Lynch School Graduate Program.

Students interested in the Fifth Year/Early Admit Program should contact the Office of Graduate Admission, Financial Aid, and Student Services in Campion Hall 135 or at 617-552-4214. Students can also e-mail gsoe@bc.edu and learn more at the Fifth Year/Early Admit Program page.

**Financial Aid**

For a full description of University financial aid loan programs, refer to the Policies and Procedures section of this Catalog and the Lynch School website (www.bc.edu/lynchschool) and select Admissions. Financial aid opportunities occur in several forms, including grants, scholarships, assistantships, fellowships, loans, and work-study. Some of these resources can be obtained directly from Boston College. Others may be obtained through outside sources such as local civic organizations, religious organizations, educational foundations, banks, and Federal low-interest loan programs.

Please note that the University's Financial Aid Office administers only Federal loan programs, which include Unsubsidized Stafford loans, Perkins loans, and work-study. If you are applying for any of these loan programs through Boston College, consult the Policies and Procedures section.

While most universities primarily fund doctoral students, there is a substantial amount of aid available to master’s students at Boston College in the form of special program scholarships, administrative assistantships, paid internships, grant-funded opportunities, and scholarships for students from historically underrepresented groups. A number of the scholarships, listed below, are intended to support students who are preparing to work with low income children, youth, and families in urban communities. Applicants will be considered for these scholarships at the time of admission. No additional application is required.

**Listing of Named Scholarships: Academic Year 2020–2021**

*Barry Fellowship*

Steven M. and Tammy J. established this fund to support graduate students with financial need enrolled in Lynch School, with preference for students focusing on learning among multi-disabled children. *Two students: one new, one continuing—15 credits.*

*Bradley Fellowship*
The Bradley Endowed Fellowship supports fifth year master’s students pursuing specialization in moderate special needs education. Preference given to students seeking experience in urban schools with first preference given to those seeking to work in Boston Public Schools (BPS). *Three students—21 credits.*

**Bristing Urban Scholar Fund**

Supports fifth year master’s students pursuing specialization in moderate special needs education. Preference given to students seeking experience in urban schools with first preference given to those seeking to work in the Boston Public Schools (BPS). *Five students—3–6 credits.*

**Catholic Educator Award**

The Lynch School Catholic Educator Award provides partial tuition assistance to students who are currently working as teachers and/or administrators in Catholic schools. The Catholic Educator Award requires an additional application.

**Dreyer Scholarship**

The Herman J. Dreyer Fund provides assistance for graduate students enrolled in Lynch School with financial need who have demonstrated academic excellence. *Two students: one new, one continuing—12 credits.*

**Duvnjak Fellowship**

The Barbara Benz Duvnjak and Karlo Duvnjak Fund supports graduate students with financial need who have demonstrated academic excellence. *One student—12 credits.*

**Flaherty and Masella Fellowship**

The Mary Jane Flaherty and William Masella Fellowship Fund supports graduate students with financial need enrolled in the Lynch School with a preference for students from New Jersey or New York. *One student—6 credits.*

**Fruscione Fellowship**

The Immaculate A. Fruscione Fellowship supports graduate students in the school counseling program. The fellowship will be awarded to graduates who will work for at least three years in an inner-city school following completion of their degree. *One student—12 credits.*

**Hearst Fellowship**

The William Randolph Hearst Endowed Fund supports students in teacher education programs. Preference is for students who intend to reside permanently in the U.S. upon completing their studies. *One student—6 credits.*

**Kaneb Catholic Leadership Fellowship**

This Fund was established in 1986 through a gift from John A. and Virginia P. Kaneb, Boston College parents. Income from the endowment provides scholarship assistance for students in Catholic leadership in master’s programs in the Lynch School of Education and Human Development.

**Keough Memorial Fellowship**
The William F. Keough Memorial Fellowship Fund provides scholarship assistance for both undergraduate and graduate students pursuing studies in international education. One student—6–9 credits.

**Lam Family Fellowship**

William and Mary Lam Family Endowed scholarship support for Lynch School students of Chinese origin. It is the donors’ wish that recipients of the Lam Scholarship return to their home to work in the education field for one year following graduation. **One student—15 credits + stipend = $13,000.**

**Christine Martin Memorial Scholarship Fund**

Support a Lynch School fifth year student during their master’s program. The award is a tuition scholarship. Preference is given to students engaged in volunteer service, especially serving children with disabilities. **One student—9–12 credits.**

**Brenda and Robert Martin Fellowship**

Support Lynch School graduate student who is focusing on the education of students with learning differences. **One student—6 credits.**

**Sherman Family Scholarship**

Provides financial support to qualified students pursuing graduate degrees through the Department of Counseling, Developmental, and Educational Psychology. **One student—9 credits.**

**Frances D. Stiglin Fellowship**

Tara Stiglin DeNuccio created this fund in honor of her mother to provide scholarship assistance for qualified Lynch School graduate students with preference to those studying special needs. **One student—9 credits.**

**Listing of Graduate Student Awards: Academic Year 2020–2021**

**Mary T. Kinnane Award for Excellence in Higher Education**

Given annually to master’s or doctoral degree students in Higher Education. The award, named for Emeritus Professor Kinnane, is given for both academic excellence and the embodiment of the Jesuit ideal of service to others.

**Bernard A. Stotsky/Thomas H. Browne Prize**

Awarded to a student who has demonstrated excellence in the area of special education at the graduate level.

**Donald J. White Teaching Excellence Award**

The Donald J. White Teaching Excellence Awards program was established to provide further stimulus toward teaching excellence by graduate Teaching Fellows and Teaching Assistants. It is presented to graduate students who have shown excellence in the teaching of undergraduate students. Each of the winners will receive a cash award and letter of congratulations from the Provost and Dean of Faculties.
Campus School Students and Families Award

Presented to Severe Special Needs graduate students who have distinguished themselves by dedication to the Severe Special Needs population and presented in honor of all those who dedicate themselves to our children at the Campus School with our appreciation, admiration, and validation.

Serena B. Strieby Award

Presented to a talented graduate student in the field of Counseling Psychology.

The (Mary) Kim Fries Award

Awarded to a Curriculum & Instruction doctoral student who exhibits academic achievement, belief in social justice education, and enduring commitment to community.

Kelsey A. Rennebohm Memorial Fellowship

The Center for Human Rights and International Justice at Boston College established the Kelsey A. Rennebohm Memorial Fellowship in 2013. The fellowship will be awarded each summer in her memory to a Boston College student, undergraduate or graduate, who proposed research or activist scholarship is at the interface of psychology, mental health, gender, social justice, and human rights. The recipient will subsequently give a presentation about his or her work at the university upon return.

George Madauss Graduate Student Research Award

The George Madaus Graduate Student Research Award honors a founder of the department and a major figure in educational assessment and evaluation. It is awarded annually to a student in Measurement, Evaluation, Statistics, and Assessment in recognition of outstanding research that contributes to one or more of the following topical areas: advancing the quality of educational and psychological assessments; enhancing the practice of program evaluation; or contributing to reducing the negative impact of test use on students, teachers, and society-at-large.

Urban Education Funding

Donovan Urban Teaching Scholars Program

Donovan Urban Teaching Scholars is an intensive one-year master’s degree program in teacher preparation. Each year, the program recruits and supports a cohort of up to 30 graduate students. Students in this program:

- Receive tuition remission covering a minimum of 50% to a maximum of 100% of tuition costs for the M.Ed. degree
- Are eligible for the Sharp Urban Teaching Scholarship, which provides financial support to up to 22 highly talented graduate students per year who are from underrepresented groups and are committed to teaching in urban schools. The scholarship is comprised of a $10,000 stipend—half of the stipend is an outright grant and the remaining $5,000 is a forgivable loan. A quarter of the loan amount will be forgiven upon completion of the master's degree and the remaining three-quarters is forgiven, up to the full amount, for each year spent teaching in an urban school. Special awards are also available for applicants interested in teaching in urban secondary schools.

Details on the Donovan Urban Teaching Scholarship can be found on the Lynch School website. Please note that the application deadline is also earlier than the normal deadline for teacher education programs.

Urban Catholic Teacher Corps (UCTC)
Urban Catholic Teacher Corps is an academically rigorous and experientially rich, Catholic school teacher preparation program that prepares students to be excellent Catholic school teachers who are actively engaged in the ministry of teaching urban students in the Roman Catholic Archdiocese of Boston. Participants live together, actively engaging in an intentional faith-based living and learning community where faith is actively incorporated, individuals are loved and supported, and all experiences and perspectives are shared and respected. All students in this program:

- Receive 100% tuition coverage for the M.Ed. degree in Curriculum and Instruction
- Have all rent and utilities paid for in the required UCTC community housing.
- Receive a $650 pre-tax stipend per month over the two years of program participation to cover living expenses. The Lynch School Catholic Education Award provides partial tuition assistance to students who are currently working in Catholic schools.

There are a separate application and additional requirements for UCTC. Please note that the application deadline is also earlier than the normal deadline for teacher education programs.

**Licensure and Program Accreditation**

Many of the teacher education and administration programs offered by the Lynch School have been designed to comply with current standards leading to initial and professional licensure for educators in the Commonwealth of Massachusetts. Through the University’s accreditation by the Interstate Certification Compact (ICC), a program of study preparing for educator licensure in Massachusetts, will also provide graduates, through reciprocity, with facilitated opportunities for licensure in most other states. Licensure is granted by the state, and requirements for licensure are subject to change by the state. Students seeking licensure in Massachusetts must pass the Massachusetts Tests for Educator Licensure (MTEL). Especially in the case of out-of-state students, it is the responsibility of the student to plan a program that will lead to licensure in a given state. Staff in the Office of Practicum Experiences and Teacher Induction (Campion 102, 617-552-4206) can help with most teacher and administrator licensure questions. Mental health and school counselor licensure questions should be addressed to the Office of Graduate Admission, Financial Aid, and Student Services at 617-552-4214. The teacher education programs at Boston College are accredited by both the Commonwealth of Massachusetts Department of Elementary and Secondary Education (ESE) and nationally by the Teacher Education Accreditation Council (TEAC).

The 60-credit M.A. in Mental Health Counseling fulfills the educational requirements for licensure as a mental health counselor in Massachusetts, and the M.A. in School Counseling meets the educational requirements for licensure in school counseling in Massachusetts. Students seeking school counseling licensure in Massachusetts must pass the Massachusetts Tests for Educator Licensure (MTEL). Students are encouraged to check the requirements for the states in which they eventually hope to obtain licensure.

The School Counseling sequence is designed to meet the professional standards recommended by the Interstate Certification Compact (ICC), Massachusetts Department of Education. This sequence is designed to meet the educational requirements for licensure as a school counselor in the state of Massachusetts. Licensure is granted by the state Department of Education and requirements are subject to change by the state. Students seeking licensure in Massachusetts must pass the Massachusetts Tests for Educator Licensure.

The 60-credit-hour Mental Health Counselor sequence of study reflects the professional standards recommended by the American Counseling Association and the Massachusetts Board of Allied Mental Health and Human Services Professionals. This sequence is designed to meet the pre-master’s educational requirements for licensing as a Mental Health Counselor in the state of Massachusetts. Licensing is granted by the Massachusetts Board of Allied Mental Health and Human Service Professionals and the requirements are subject to change by the state. Students, for all programs, should check the requirements in other states where they may choose to live and work.

The doctoral program in Counseling Psychology is fully accredited by the American Psychological Association.
International and Special Practicum Placement Program for Graduate Studies

The Lynch School’s International and Special Practicum Placement Program offers graduate students in the Teacher Education programs classroom opportunities in a variety of foreign countries for full-practicum experiences upon successful completion of the pre-practicum and all prerequisite work. International settings include classrooms in such countries as Ireland, England, France, Italy, and Spain, subject to current student visa regulations in each country. Placements are also available in San Juan, Puerto Rico, where a visa is not required. In all cases, housing accommodations are the responsibility of the student. For information regarding programs and requirements, contact the Director, Practicum Experiences and Teacher Induction, Campion 102, Lynch School of Education and Human Development, Boston College, 140 Commonwealth Avenue, Chestnut Hill, MA, 02467-3804 or 617-552-4206.

Degree Programs

Through its various graduate programs, the Lynch School offers the M.Ed., M.A., M.S., M.A.T., M.S.T., Ph.D., and Ed.D. degrees. The Lynch School also offers programs leading to a Certificate of Advanced Educational Specialization (CAES). Our graduate programs serve a dual purpose:

- Research: Preparing students in research-based knowledge of their profession with specialized competence in the evaluation of educational and psychological innovations, and in basic and applied quantitative and qualitative research methodologies.
- Practice: Preparing students to apply knowledge in appropriate areas of specialization to practice in both academic and nonacademic settings.

Doctoral Degree Programs

General Requirements for the Degree of Doctor of Philosophy

The Ph.D. is granted for distinction attained in a special field of concentration and demonstrated ability to modify or enlarge a significant subject in a dissertation based upon original research. Doctoral studies are supervised by the student’s advisor, department chairperson, and the Associate Dean of Students. The Ph.D. is granted in the Lynch School in the following areas:

- Curriculum and Instruction
- Higher Education
- Counseling Psychology
- Applied Developmental and Educational Psychology
- Measurement, Evaluation, Statistics, and Assessment

Upon admission to a doctoral program, the doctoral student will be assigned an academic advisor. The Doctoral Program of Study should be designed by students in consultation with their advisors during the first or second semester of coursework. A formal Program of Study must be filed with the student’s advisor and the Academic Department Office. Programs of Study for all programs are available on the Lynch School’s website at www.bc.edu/lynchschool.

Doctoral students in the Lynch School, in addition to coursework, complete comprehensive exams before being admitted for doctoral candidacy. Doctoral students also complete a doctoral dissertation. Current information on policies and procedures regarding doctoral degree programs is provided online at the Doctoral Policies and Procedures page.

General Requirements for the Degree of Doctor of Education
The Professional School Administrator Program (PSAP) provides an opportunity for full-time administrators to obtain their Massachusetts superintendent licensure and a Doctor of Education (Ed.D.) degree in Educational Leadership. The program is grounded in the core values of the Lynch School, with coursework focusing on leadership for learning, social justice, diversity, anti-racism, and community building.

The intensive, three-year program is taught by full-time university faculty and knowledgeable, skilled school leaders, with personalized support for students from mentor superintendents.

Certificate of Advanced Educational Specialization (C.A.E.S.)

The C.A.E.S. course of study is designed for currently practicing educators who already have a master's degree and seek a higher level of specialization in Curriculum and Instruction or professional licensure in administration. For further information on C.A.E.S. programs in Educational Leadership, Special Education, Reading/Literacy, and Curriculum and Instruction, contact Boston College, The Office of Graduate Admission, Financial Aid, and Student Services, Lynch School of Education and Human Development, Campion Hall 135, 140 Commonwealth Avenue, Chestnut Hill, MA 02467-3813, telephone at 617-552-4214, or e-mail gsoe@bc.edu.

Master's Degree Programs

While candidates may apply to master's programs while still completing an undergraduate degree, candidates must be graduates of an accredited college or university by their program's start date.

The Office of Graduate Admission, Financial Aid and Student Services, Campion 135, provides academic and financial aid services for master's students throughout their studies in the Lynch School.

Master of Education Degree (M.Ed.)

The Master of Education is awarded in the following areas:

- Elementary Education
- Secondary Education
- Special Education *
- Reading/Literacy Teaching
- Curriculum and Instruction
- Global Perspectives: Teaching, Curriculum, and Learning Environments
- Educational Leadership
- Educational Research, Measurement, and Evaluation

*The M.Ed. program in Special Education includes the following areas of concentration: Moderate Special Needs, Grades Pre-K–8 and Grades 5–12, Students with Severe Special Needs Pre-K–12.

Master of Arts in Teaching and Master of Science in Teaching Degrees (M.A.T./M.S.T.)

M.A.T. and M.S.T. for Initial Licensure

The M.A.T./M.S.T. Initial Licensure programs are designed for students who have graduated with a major in liberal arts or sciences and who wish to prepare for teaching in the secondary school, for experienced teachers in secondary schools who do
not yet hold a license, and for recent college graduates already prepared to teach at the secondary level who want to earn an additional area of expertise and/or licensure. These degrees are coordinated with the appropriate Graduate School of the Morrissey College of Arts and Sciences department and require more coursework in Arts and Sciences than the M.Ed. degree in Secondary Teaching. Only one application to the Lynch School is necessary for admission.

Students may prepare in the following disciplines: biology, chemistry, physics, geology, mathematics, history, and English.

Programs are described under the section of this manual on programs in Teacher Education/Special Education and Curriculum and Instruction.

**Master of Arts Degree (M.A.)**

The Master of Arts degree is given in the following areas:

- Higher Education
- International Higher Education
- School Counseling
- Mental Health Counseling
- Applied Developmental and Educational Psychology
- Learning Engineering

**Master of Science Degree (M.S.)**

The Master of Science degree is given in the following area:

- Applied Statistics and Psychometrics

These programs are described in each departmental section of this catalog.

**Course Credit**

A minimum of 30 graduate credits is required for a master’s degree. Specific programs may require more credits. No formal minor is required. All graduate students cannot transfer more than six graduate credits from another institution. Only courses in which a student has received a grade of B or better, and which have not been applied to a prior degree, will be accepted. If approved, the transfer course and credit, but not the grade, will be recorded on the student’s academic record. Credit received for courses completed more than ten years prior to a student’s admission to his or her current degree program are not acceptable for transfer. A Masters Transfer Request Form should be completed and signed by the student’s academic advisor and then sent, along with an official transcript from the institution, to the Office of Graduate Admission, Financial Aid, and Student Services.

**Programs of Study**

In the second semester of matriculation, students must complete a Program of Study in consultation with their academic advisor and/or the Associate Director of Student Services in the Office for Graduate Admission, Financial Aid, and Student Services. Program of Study forms are available on the Lynch School website at the Master’s Program page. These forms must be approved and filed with the Associate Dean of Students.
The Department of Teacher Education/Special Education and Curriculum and Instruction prepares educational leaders for instructional and administrative roles in public and private schools, in institutions of higher education, and in related organizations. The intent is to provide a blend of scholarship, disciplined inquiry, and professional experiences that will develop the sound understanding, practical skills, ethical values, and social responsibilities that are required of competent educators.

Student programs are individualized under the guidance of a faculty advisor, with special consideration given to each student’s career goals and licensure requirements. The list of specific courses required for each program is available on the Lynch School website under Programs of Study.

Areas of Concentration

Programs and courses in Teacher Education are designed to prepare educators in the areas of elementary and secondary teaching, early childhood education, special education, and reading. In addition, master’s programs are available in Curriculum and Instruction and Global Perspectives, along with a doctoral program in Curriculum and Instruction. Teacher preparation programs are designed for individuals interested in working in elementary and secondary schools, both public and private, as well as early childhood and special needs programs and facilities. The Lynch School prepares outstanding teachers in both theoretical and practical dimensions of instruction. The doctoral program in Curriculum and Instruction prepares students for college and university teaching, research positions, and/or school leadership positions.

Master’s candidates can include the Teaching English Language Learners (TELL). TELL prepares educators to teach bilingual learners in English-only classrooms, while the certificate requires students to complete EDUC7621 Bilingualism, Second Language and Literacy Development and EDUC6346 Teaching Bilingual Students, as well as requires students to work with English language learners in English-only or Dual-Language classrooms, respectively.

Licensure

Endorsement of candidates for initial Massachusetts teaching licensure is a collaborative effort between the student’s Lynch School supervisor and cooperating teacher. The Lynch School offers graduate programs designed to prepare students for teaching licensure at the master’s and C.A.E.S. levels. A student seeking licensure must be admitted as a degree candidate. Programs are approved by the Interstate Certification Compact (ICC), allowing students easier access to licensure outside Massachusetts.

The following are licenses available from the state department of Massachusetts through completion of a Lynch School program:

- Early Childhood Teacher
- Elementary Teacher
- Teacher of English, Mathematics, History, Physics, Chemistry, Biology, and Earth Science
- Specialist Teacher of Reading
- Specialist Teacher of Students with Moderate Special Needs (pre K–8, 5–12)
- Specialist Teacher of Students with Severe Special Needs (pre K–12)

Note: Students who plan to seek licensure in states other than Massachusetts should check the licensure requirements in those states. Students seeking licensure in Massachusetts must pass the Massachusetts Tests for Educator Licensure (MTEL).
Practicum Experiences

Practicum experiences are an essential part of the curriculum in licensure programs and should be planned with the respective faculty advisor early in the student’s program. Practicum experiences for licensure in Teacher Education are offered at the Initial Licensure level for Massachusetts. Students seeking licensure in Massachusetts also must pass the Massachusetts Tests for Educator Licensure (MTEL).

All field experiences for students enrolled in Lynch School degree programs are arranged through the Office of Practicum Experiences and Teacher Induction (Campion 102). The Director of Practicum Experiences and Teacher Induction must approve all students for the practicum.

The following are prerequisites for students who are applying for practica and clinical experiences:

- GPA of B or better (3.0 or above)
- Satisfactory completion of required pre-practica or waiver from the Director of the Office of Practicum Experiences and Teacher Induction
- Completion of 80 percent of the course work related to required Education courses, including methods courses in the content area and courses required for initial licensure
- Application in the Office of Practicum Experiences and Teacher Induction

A full practicum is characterized by the five professional standards as required by the Massachusetts Department of Education. Student teachers must demonstrate competence in these five standards during their practicum experience: plans curriculum and instruction, delivers effective instruction, manages classroom climate and operation, promotes equity, and meets professional responsibilities.

If, for any reason, a student is unable to complete the full practicum, an extended practicum (additional time in the field) will be required by arrangement of the Director of Practicum Experiences and Teacher Induction.

Programs in Teacher Education/Special Education and Curriculum and Instruction

Master of Education (M.Ed.) in Early Childhood Education

The master’s degree program in Early Childhood Education focuses on developmentally appropriate practices and critical thinking skills. This program is appropriate for students who wish to be prepared to teach children who are typically developing as well as children with moderate disabilities in a general education, pre-K–2 classroom. Students can enter the program without teaching licensure. The prerequisite for either program is a college degree with an Arts and Sciences major or equivalent. Students who have majored in other areas, such as business or engineering, should consult the Office of Graduate Admission, Financial Aid and Student Services.

At completion of the program, students will be able to demonstrate:

- The teacher candidate will promote the learning and growth of all students by providing high-quality and coherent instruction, designing and administering authentic and meaningful student assessments, analyzing the student performance and growth data, using the data to improve instruction, providing students with constructive feedback on an ongoing basis, and continuously refining learning objectives.
The teacher candidate will promote the learning and growth of all students through instructional practices that establish high expectations, create a safe and effective classroom environment, and demonstrate cultural proficiency.

The teacher candidate will promote the learning and growth of all students through ethical, culturally proficient, skilled and collaborative practice.

The teacher candidate will demonstrate an inquiry stance by collecting and reporting data on pupil outcomes for the purpose of assessing, teaching, and modifying instructional practice.

The teacher candidate will identify policies and practices that contribute to systemic inequities in education and be aware of how his or her own background experiences are influenced by these systems, and recognize a professional responsibility to promote and practice principles of social justice teaching.

**Master of Education (M.Ed.) in Elementary Education**

The Elementary Education program leads to licensure in grades 1–6. The program stresses a humanistic approach to teaching that is both developmentally appropriate and intellectually challenging. Graduate students participating in the Elementary Education program will learn to promote student development, how to teach for social justice, and how to reflect on practice to improve instruction. They will be prepared to work with students of a variety of backgrounds creating classroom environments that engage all students.

At completion of the program, students will be able to demonstrate:

- The teacher candidate will promote the learning and growth of all students by providing high-quality and coherent instruction, designing and administering authentic and meaningful student assessments, analyzing the student performance and growth data, using the data to improve instruction, providing students with constructive feedback on an ongoing basis, and continuously refining learning objectives.
- The teacher candidate will promote the learning and growth of all students through instructional practices that establish high expectations, create a safe and effective classroom environment, demonstrate cultural proficiency, and knowledge about language challenges in academic settings.
- The teacher candidate will promote the learning and growth of all students through ethical, cultural proficient, skilled, and collaborative practice.
- The teacher candidate will demonstrate an inquiry stance by collecting and reporting data on pupil outcomes for the purpose of assessing, teaching, and modifying instructional practice.
- The teacher candidate will identify policies and practices that contribute to systemic inequalities in education and be aware of how his or her own background experiences are influenced by these systems, and recognize a professional responsibility to promote and practice principles of social justice teaching.

The prerequisite for the program is a bachelor’s degree with an Arts and Sciences or interdisciplinary major or equivalent. No prior teaching licensure is required for admission. The program of study includes foundations and professional courses, and practicum experiences. Courses of study are carefully planned with the faculty advisor to ensure that both degree requirements and licensure requirements are fulfilled.

For the applicants seeking a master’s in Elementary Education, undergraduate transcripts will be audited for mathematics courses. It is expected that applicants have completed a two 3-credit mathematics course equivalent in Arts and Sciences. If applicants do not fulfill this requirement, they will be advised to take the needed courses.

**Master's Programs (M.Ed., M.A.T., and M.S.T.) in Secondary Education**

Students in secondary education can pursue either a Master of Education (M.Ed.), a Master of Arts in Teaching (M.A.T.), or a Master of Science in Teaching (M.S.T.). These degree programs lead to (8–12) licensure in one of the following disciplines: English, history, biology, chemistry, geology, physics, or mathematics.

Upon completion of the program in Secondary Education graduates will be able to:
● The teacher candidate will promote the learning and growth of all students by providing high-quality and coherent instruction, designing and administering authentic and meaningful student assessments, analyzing student performance and growth data, using this data to improve instruction, providing students with constructive feedback on an ongoing basis, and continuously refining learning objectives.

● The teacher candidate will promote the learning and growth of all students through instructional practices that establish high expectations, create a safe and effective classroom environment, and demonstrate cultural proficiency.

● The teacher candidate will promote the learning and growth of all students through effective partnerships with families, caregivers, community members, and organizations.

● The teacher candidate will promote the learning and growth of all students through ethical, culturally proficient, skilled, and collaborative practice.

● The teacher candidate will promote an inquiry stance of critical reflection about personal practice through individual and collaborative inquiry in service of improving pupil academic, emotional, and social learning.

The prerequisite for the program is a bachelor’s degree with a liberal arts major in the field of desired licensure or an equivalent. Students who do not have the prerequisite courses must take discipline area courses before being admitted into a degree program. All prerequisite courses must be taken before taking the practicum. Check with the Office of Graduate Admission, Financial Aid, and Student Services (617-552-4214) if you have questions.

In addition to required courses in the field of education, secondary education master’s degrees require a number of courses taken at the graduate level in the Morrissey College of Arts and Sciences department of specialization. M.Ed. students take a minimum of two graduate courses, and M.A.T./M.S.T. students take five graduate courses in their disciplinary area. Courses of study are carefully planned with a faculty advisor. All of the master’s programs leading to licensure in secondary education include practicum experiences in addition to coursework. M.A.T./M.S.T. applicants file only one application to the Lynch School. All Lynch School admissions requests should be addressed to Boston College, The Office of Graduate Admission, Financial Aid, and Student Services, Lynch School of Education and Human Development, Campion Hall 135, 140 Commonwealth Avenue, Chestnut Hill, MA 02467-3813, telephone 617-552-4214, or e-mail gsoe@bc.edu.

**Master of Education (M.Ed.) in Reading and Literacy**

The graduate Reading and Literacy licensure program is designed to prepare licensed classroom teachers and resource room specialists for specialized literacy instruction in schools. Literacy specialists provide critical supports in schools by working with both students and teachers to prevent and remediate language and literacy difficulties in children. Eligible applicants must have at least one year of teaching to meet Massachusetts Literacy Specialist licensure standards. The program conforms to the Standards for Reading Professionals of the International Literacy Association.

At completion of the program, students will know:

● In the Reading/Literacy Education licensure program, you will learn about language development and its relation to literacy outcomes, the varied social contexts in which language and literacy development take place, bilingualism and second language acquisition, text selection, and literacy assessment practices. Knowledge in these domains will be applied via targeted practicum experiences. In your practica, the knowledge you build via your Lynch classroom experiences is applied to direct work with mentor reading/literacy specialists, classroom teachers, and students in schools. This synthesis of coursework knowledge and classroom practice is encapsulated in the Inquiry Seminars that are required of all licensure students. In these seminars, students work directly with faculty to make sense of their daily school-based experiences in the contexts of the readings and activities that characterize Lynch School coursework. This cyclical process of teaching, learning, and reflecting is the core of the licensure experience.

The program of study consists of foundation courses, courses in language and literacy, and practica experiences as a teacher of reading. A classroom teaching certificate is normally required for admission into the program. Students should carefully plan programs in consultation with the program advisor to see that degree and licensure requirements are met. Classroom teachers must meet with the practicum director to create a proposal to fulfill practicum requirements while remaining in their own classroom.
Master of Education (M.Ed.) in Curriculum and Instruction

The master’s degree program in Curriculum and Instruction consists of a planned program with a minimum of 30 graduate credit hours. Four courses in Curriculum and Instruction are required. Programs of study are planned in consultation with a faculty advisor to meet each candidate’s career goals and needs.

This degree program does not lead to licensure, nor are students in this program eligible to apply for supervised practicum experiences. This program is for:

- U.S. students who already possess an initial license and want to enhance learning further in their area of licensure;
- International students who wish to engage with foundational and leading edge thinking and thinkers on curriculum, pedagogy, and educational reform;
- All candidates who want to explore new areas of interest such as policy, teacher leadership, teaching English Language Learners, universal design for learning, assessment, and special education;
- Students interested in Curriculum Design and Instructional Design;
- Private school educators, Boston College students enrolled in the fifth-year program, and educators from areas such as publishing, curriculum design, and museum education;
- Classroom teachers who wish to become educational leaders in their schools and districts.

At the completion of the program, students will be able to:

- Develop and clarify their philosophy of education, in particular, their beliefs regarding the purposes and processes of effective curricular organization;
- Become familiar with different ways to conceptualize a school curriculum and with major curriculum designers, both past and present;
- Assess their own experiences with educational and curricular change as a means to gain greater insight into educational and institutional change processes writ large;
- Examine approaches to multicultural education, anti-racist education, and inclusion that aim to transform the curriculum;
- Explore the tensions and possibilities that face teachers day-in and day-out in the current social and political context;
- Learn alternative strategies for assessment that provide multiple and authentic measures of student learning;
- Analyze existing curricula in terms of various philosophical orientations;
- Examine implications and applications of learning theories as drawn from teachers in elementary and secondary schools as well as from professionals working in higher education and contexts outside of formal schooling;
- Consider how school curricula and pedagogical practices can be structured to promote social justice and democratic citizenship.

Master of Education (M.Ed.) in Special Education

Master of Education (M.Ed.) in Special Education: Teacher of Students with Moderate Special Needs, Grades Pre-K–8 and Grades 5–12

This program prepares teachers to work with students with mild to moderate disabilities (also known as high incidence disabilities) such as: attention deficit/hyperactivity disorder, specific learning disability, emotional and behavioral disorders, and mild developmental disabilities—including autism spectrum disorders. Based on the program option they select, students will learn about assessment and instructional practices at the elementary or secondary schooling levels, consistent with teacher licensure options in Massachusetts and many other states.

The goal of the program is to prepare teachers to work in a variety of roles including: lead teacher, special education teacher, and learning specialist, as well as to collaborate with general education regular teachers and educators, other services providers and
parents. The program leads to initial licensure. Students who have not earned general education licensure will be required to take additional courses. At completion of the program, students will be able to demonstrate:

- How to develop learning goals and experiences responsive to the developmental and learning needs of students with special needs, including ways that are responsive to language, cultural, and family backgrounds;
- How to work collaboratively with students and professional colleagues in a variety of instructional settings;
- How to plan individually-appropriate curriculum through the IEP as well as in inclusive classroom settings;
- How to use formal and informal assessments to plan instruction for pupils in ways that reduce bias and to monitor learning progress;
- How to use evidence-based practices to advance the learning of students with disabilities. Practices will include uses of technology and augmentative and alternative communication;
- How to plan for and work with students and colleagues for successful transition preparation;
- How to use ethical and professional practices that respond to language, cultural, and familial diversity.

Applicants who have completed a regular education preparation program can enter directly into the program. Applicants with no previous regular education preparation program must apply for both regular and special education programs. For this reason, students become licensed in regular and special education. Financial aid is available in the form of paid internship experiences in local school systems and in some private schools.

**Master of Education (M.Ed.) in Special Education: Teacher of Students with Severe Special Needs, Pre-K–12**

The Boston College program in Severe and Multiple Disabilities prepares teachers to work with students who have moderate to severe intellectual disability, autism, and additional disabilities (such as visual impairment, deafness, cerebral palsy, and medical conditions). The program leads to eligibility for the Massachusetts teaching license in Severe Disabilities. Additional specializations in deafblindness or autism are available. No prior teaching license is required for admission. The Program of Study include two routes, one for those who already have a teaching license (in any area) and one for those who do not. The Severe and Multiple Disabilities Program is founded on close linkages between current research and best practices in teaching. Students may be enrolled on a full or part-time basis. At completion of the program, students will be able to demonstrate:

- How to teach to the strengths and needs of all students with severe disabilities, including those with additional sensory disabilities;
- How to implement evidence-based practices and best practices to apply when assessing and teaching children with severe and multiple disabilities;
- How to be fully competent in writing the appropriate sections of the Individualized Education Plan (IEP) and as a participant in associated meetings;
- How to select assessment instruments appropriate to each child and to conduct assessments to produce findings that support valued and meaningful instruction;
- How to engage parents in the planning and generalization of their child’s educational program;
- How to plan, implement, and evaluate comprehensive communication systems in collaboration with others;
- How to teach content from the general curriculum as well as functional academics, skills of daily living, prevocational and vocational skills, play and social-emotional competencies to address the needs of the whole child;
- How to keep meaningful data on student learning and behavior and to make data-based decisions;
- How to create learning environments that promote engagement and learning;
- How to promote the learning and growth of all students through ethical, culturally proficient, skilled, and collaborative practice.

For those students employed in approved Intensive Special Needs programs, practicum requirements are individualized and may be completed within the work setting. The program of study expands on and builds upon a prerequisite education foundation through the development of competencies that are research and field-based and consistent with the highest professional standards of the field.
M.Ed. in Global Perspectives: Teaching, Curriculum, and Learning Environments

This program is for teachers who see how the world is changing. They believe deeply in the mission and potential of equitable education and want to be able to prepare their students for the future. The program will explore educational viewpoints across a wide range of cultures and countries. Based on these perspectives, graduates will learn how to design effective curriculum to serve diverse and increasingly globalized student populations and improve the common good. Through conducting a problem-solving form of research involving one or more cycles of actions and reflection—drawing both on international research perspectives and generating solutions in local contexts—graduates will develop valuable collaborative action research skills. The program welcomes the participation of individuals or teams of educators ready to collaborate. Teachers and other educational professionals with a bachelor's degree and two or more years of professional experience in schools and other educational related settings preferred. The program can be completed totally online. Graduates from the Global Perspectives program will learn to:

- Develop self-knowledge, meaning, and a sense of purpose as an educator;
- Create effective learning environments (through curriculum design and instructional practice) that reflect an increasingly globalized student population;
- Identify, pose, and solve education problems, and assess opportunities;
- Apply action research studies in response to authentic problems encountered in a variety of educational settings;
- Contribute to and access a robust collaborative network of educators working to address today's educational challenges.

Teaching English Language Learners (TELL) Certificate Program

For Candidates in a Licensure Program

All students who successfully complete a teacher licensure program in the Lynch School will earn the required Massachusetts Sheltered English Immersion (SEI) Endorsement. This SEI endorsement meets state regulations for working with bilingual learners/English language learners as a core academic teacher in Massachusetts. In addition, however, Lynch offers the option of the Teaching English Language Learners (TELL) Certificate Program, a deeper and more extensive preparation for working with bilingual learners/English Language Learners. For candidates in a licensure program this entails adding one course: EDUC7621 Bilingualism, Second Language and Literacy Development for graduates. All TELL certificate program participants are strongly encouraged to work with ELLs in their full practicum sites.

For Candidates in a Non-Licensure Program

Students who are not enrolled in a teaching licensure program may also complete the TELL certificate program. These students complete EDUC7621 Bilingualism, Second Language and Literacy Development as well as EDUC6346 Teaching Bilingual Students and are required to work with English language learners in an instructional setting. The TELL certificate program for students who are not enrolled in a licensure program is ideal for candidates seeking to work with English language learners abroad or in contexts in the United States where Massachusetts SEI Teacher Endorsement is not required. For more information please contact Dr. Maria Brisk, brisk@bc.edu, Dr. Mariela Paez, paezma@bc.edu or Dr. Anne Homza, anne.homza@bc.edu.

Donovan Urban Teaching Scholars Program

The Donovan Urban Teaching Scholars program is open to master’s students specifically interested in urban teaching. To qualify for the program, students must be accepted into one of the Master of Education licensure programs in teaching listed above. All Donovan Scholars must complete a teacher education program in Early Childhood, Elementary, Secondary, Reading, Moderate Special Needs, or Severe Special Needs Teaching. A cohort of 30 students is selected each year from students applying to an M.Ed. teacher licensure program and financially supported from the Donovan Scholars program, which carries a half-tuition scholarship.

Certificate of Advanced Educational Specialization (C.A.E.S.)

The C.A.E.S. course of study is designed for currently licensed educators who already have a master’s degree and seek a higher level of specialization in Curriculum and Instruction. For further information on the C.A.E.S. program in Curriculum and Instruction,
Doctoral Program (Ph.D.) in Curriculum and Instruction

The doctoral program in Curriculum and Instruction is for people who hold, or plan to assume, leadership positions in curriculum, instruction, and teacher education in schools, school systems, or other related instructional environments. It is also designed for candidates who are preparing for a career in curriculum and instruction or teacher education at the college, university, or staff development level.

Courses and related program experiences are designed to develop scholarly methods of inquiry in teaching, teacher education, curriculum development and evaluation, and professional development. There is a complementary emphasis on designing and researching effective instruction. Students who plan to work in school settings may pursue programs that will help them develop expertise in several areas of instruction such as mathematics, literacy, technology, science, history, or combinations thereof. Students who plan to work at the post-secondary level may pursue specialties in curriculum or teacher preparation in a specific subject area.

The program of study requires a research core that will familiarize students with quantitative and qualitative research methodology and develop the candidate's expertise for analyzing and conducting research. Also required are advanced-level core courses in curriculum and teaching theory, research, and practice.

Upon graduation, Ph.D. students in our program should be able to:

- Students will demonstrate knowledge of effective practices regarding college-level teaching and/or professional development with in-service teachers.
- Students will demonstrate the ability to conduct original, empirical and/or conceptual research related to topics in curriculum and instruction.
- Students will participate in regional, national and/or international conferences in the broad areas of curriculum and instruction.
- Students will learn how to create an academic paper at the “publishable” level of quality on a topic related to the student’s area of specialization within the broad field of curriculum and instruction.

Programs of study are carefully planned on an individual basis to help candidates meet their goals related to scholarship, professional, and career paths. Throughout their doctoral programs, candidates work closely with faculty in research and teaching activities related to one of four areas of specialization: Language, Literacy, and Culture; Critical Perspectives on Schooling: Race, Class, Gender, Disabilities Specialization; Leadership, Policy, and Educational Change; and Math, Science, and Technology.

Department of Educational Leadership and Higher Education

The Department of Educational Leadership and Higher Education prepares educational administrators and leaders of educational institutions ranging from pre-schools, to K-12, public, Catholic, charter schools to universities, to post graduate institutions. Graduates are prepared to bring perspectives from sociology, psychology, history, and philosophy, as well as social justice and public policy to their analysis and articulation of educational issues. Course work and field-based learning experiences develop reflective practitioners who integrate theory with practice. Courses in the department encompass these primary themes:

- Social justice
- Diversity
- Reflective practice
Partnerships and collegiality

Courses in the various programs of study explore how economic, societal, political, and global forces change the way people think about schooling, educational leadership, and the post-secondary administration. To keep up with the constantly changing world there have been broad shifts in the knowledge and skills required of educational leaders today:

- from technical skills to interpersonal skills
- from command and direction to consensus building and motivating
- from resource allocation to being accountable for learning processes and outcomes
- from campus administrators to coordinator of institutional and community services
- from policy recipient to shaping and informing policy

These shifts have been reflected in courses throughout the Educational Leadership and Higher education programs. The list of specific courses required for each program is available on the Lynch School website under Programs of Study.

Programs in Educational Leadership

Master of Education (M.Ed.) in Educational Leadership & Policy

The Master of Education (M.Ed.) in Educational Leadership and Policy prepares graduates to assume leadership roles both within schools and within the greater community. Prospective applicants are diverse; they include educators, policymakers, religious officials, community-based organizers, and professionals seeking to make meaningful changes in the field of education. Often, applicants have a background in teaching and aspire to expand their leadership beyond the classroom. While teachers work directly with students, educational leaders work to determine the systems serving students.

The program, characterized by discernment and critical reflection, aims to educate the whole person to live a life of meaning and purpose. Drawing on social-justice values and leadership strategies, graduates will inform organizational cultures and processes, boldly improving equitable opportunities for traditionally marginalized students. Graduates, trained in critical inquiry and the use of evidence, will approach student development from a holistic perspective, engaging the whole community to support the whole child. The program can be completed fully online or as a hybrid program.

We serve both students who are seeking a master’s degree as well as students who are looking to obtain additional training but do not require a master’s degree.

The M.Ed. in Educational Leadership & Policy is a program approved and monitored by the Department of Elementary and Secondary Education in Massachusetts (DESE). Formal learning outcomes were developed by the DESE and apply to all students, whether or not they are seeking licensure. They are as follows:

- Instructional Leadership: The school leader promotes the learning and growth of all students and the success of all staff by cultivating a shared vision that makes effective teaching and learning the central focus of schooling.
- Management and Operations: The school leader promotes the learning and growth of all students and the success of all staff by ensuring a safe, efficient, and effective learning environment, using resources to implement appropriate curriculum, staffing and scheduling.
- Family and Community Engagement: The school leader promotes the learning and growth of all students and the success of all staff through effective partnerships with families, community organizations, and other stakeholders that support the mission of the school and district.
- Professional Culture: The school leader promotes success for all students by nurturing and sustaining a school culture of reflective practice, high expectations, and continuous learning for staff.
Graduates from the Educational Leadership and Policy program will learn to:

- Practice critical self-reflection and discernment.
- Foster an ethical, mission-driven school or educational environment/organization.
- Create structures that advance organizational and professional learning.
- Observe, assess, and support effective teaching and instructional practices.
- Advance equity and agency across multiple constituencies.

Certificate of Advanced Educational Specialization Degree Program (C.A.E.S.)

The C.A.E.S. course of study is designed for currently practicing educators who already have a master’s degree and who do not plan to pursue a doctoral degree but seek a higher level of specialization or professional licensure in a particular field. For further information on the C.A.E.S. program in Educational Leadership, contact Boston College, The Office of Graduate Admission, Financial Aid, and Student Services, Lynch School of Education and Human Development, Campion Hall 135, 140 Commonwealth Avenue, Chestnut Hill, MA 02467-3813, telephone 617-552-4214, or e-mail gsoe@bc.edu.

Doctoral Program (Ed.D.) in Educational Leadership

The Lynch School offers a three-year accelerated doctoral program for practicing school administrators—the Professional School Administrators Program (PSAP). This program provides an opportunity for full-time administrators to obtain their superintendent licensure and a Doctor of Education in educational leadership. The Lynch School of Education partners with the Massachusetts Association of School Superintendents and Teachers to prepare future superintendents and school leaders for public, Catholic, charter, and independent schools. The program is grounded in the core values of the Lynch School, with coursework focusing on leadership for social justice, school reform, community building, and leadership for learning. Admission to this program is offered in alternate years and the next cohort will be admitted in 2019.

Students who complete the Ed.D. program (PSAP) are expected to demonstrate:

- Competence in instructional leadership (district level leadership; ethics and equity; culturally proficient leadership; needs of diverse learners; collaborative; reflective; open to feedback; strong oral and written communication; self-directed; confident).
- Competence in management and operations (planning and implementing change; budget development; human capital analysis; school committee relationships; strategic thinking; teaming skills).
- Competence in family and community engagement (culturally proficient leadership; educational equity audit and diversity planning; professional development implementation; community relationships; crisis communication).
- Competence in professional culture (self-awareness; culturally proficient leadership; team leadership; reflectiveness and self-assessment of leadership).
- Competence in advanced level data collection, analysis, and interpretation of research in the field of educational leadership.

Applicants must be currently practicing in their administrative area. More information is available from Boston College, The Office of Graduate Admission, Financial Aid, and Student Services, Lynch School of Education and Human Development, Campion Hall 135, 140 Commonwealth Avenue, Chestnut Hill, MA 02467-3813, telephone 617-552-4214, or e-mail gsoe@bc.edu.

Programs in Higher Education

Master of Arts (M.A.) in Higher Education
The master’s degree in Higher Education prepares students for entry-level and mid-level positions in student affairs as well as in other professional areas in colleges, universities, and policy organizations. The M.A. program consists of 30 credit hours of required and elective coursework and field experiences. Most students complete the program in two academic years. Students with substantial professional experience have the opportunity to complete the program full-time in one academic year and one summer. It is also possible to complete the program on a part-time basis. In addition to a core of foundational courses in higher education, the program offers students the opportunity to focus on one of the following concentrations:

- **Student Affairs**: This concentration prepares students to work as professionals in functional areas of student affairs such as student activities, residence life, admissions, service learning, orientation, career services, and academic advising. Students gain an understanding of the foundations of higher education and student affairs and are able to link theory and practice through class projects and field experience placements.

- **Higher Education Administration**: This concentration prepares students to work as professionals in colleges and universities, policy organizations, and advocacy organizations. Students gain an understanding of the foundations of higher education with a focus on law, policy, and administration and are able to link theory and practice through field experience placements.

- **Spirituality, Faith, and Formation**: The top-ranked Catholic graduate school of education in the country, the Lynch School offers the only master’s degree in higher education that prepares students to shape the policies, practices, and intellectual life of Catholic colleges and universities while supporting the continuing formation of diverse students in their own journey of faith and spiritual development. This course of study integrates theories of student development, sociology of religion, institutional culture, leadership formation, policy development, and theological topics in a Catholic higher education setting.

At the completion of the program, students must demonstrate:

- Knowledge of the important issues facing higher education.
- Knowledge of foundational, methodological and concentration content.
- Demonstrated competence in communication skills, cooperation and teamwork, work quality and quantity, and job knowledge as assessed in the Field Experience Performance Review and Development Plan.

Faculty advisors work with students on an individual basis to design programs of study and applied field experiences according to the individual student’s background, interests, and goals.

**Master of Arts (M.A.) in International Higher Education**

Designed to provide students with a deep understanding of and a scholarly perspective on global higher education, this master’s program examines challenges and opportunities in different geographic regions, and explores such cross-cutting topics as leadership and management, economics and finance, and teaching learning, and student affairs in the field—from global and regional standpoints. The M.A. program consists of 30 credit hours of required and elective coursework and field experiences. The program may be completed in one academic year and one summer by students interested in full-time study.

**Doctoral Degree (Ph.D.) in Higher Education**

The doctoral program is designed to prepare experienced practitioners for senior administrative and policy-making posts and careers in teaching/research in the field of higher education. The program has several programmatic foci that permit students to specialize in an area of interest.

Among these are:

- Administration and policy analysis in higher education
In addition, students may choose other topics which are relevant to the administration of post-secondary education and to research. Upon completing the program, students should demonstrate:

- Knowledge of the important issues facing high education from a multi-disciplinary perspective (history, sociology, philosophy, psychology, economic, and political science).
- Knowledge of theoretical and empirical knowledge in the field.
- Knowledge of managerial and policy-making issues in the field.
- Knowledge of research methodologies and research ethics and applications.

A special feature is the Center for International Higher Education, linking the Lynch School’s Higher Education program with Jesuit colleges and universities worldwide. This initiative, as well as other international efforts, provides a significant global focus to the higher education program.

The doctoral program requires 54 credit hours of coursework, 48 of which must be beyond the 7000 level. At least six credit hours of dissertation direction is needed. The Ph.D. program is organized into several tiers of study. These include a core of foundational studies in higher education; methodological courses; specialized elective courses in higher education and related fields, including research seminars; and research. In the context of a rigorous selection of courses, students are encouraged to pursue their own specific interests in higher education.

**Department of Counseling, Developmental, and Education Psychology**

The Department of Counseling, Developmental, and Educational Psychology (CDEP) department promotes psychosocial well-being, positive social change, and social justice through innovative and rigorous teaching, research, and professional training in applied and counseling psychology. The department engages in psychological research and its applications to advance more equitable and socially just policies and practices in partnership with diverse local, national and global communities. CDEP programs prepare students to engage in culturally informed research and practice within and across disciplines and settings.

**Programs in Counseling and Counseling Psychology**

Programs in Counseling and Counseling Psychology have, as a mission, the preparation of mental health counselors and school counselors at the master’s level and counseling psychologists at the Ph.D. level for competent professional practice in schools, universities, and a variety of non-school health care delivery settings.

The primary focus of the multi-level program is the facilitation of healthy functioning in clients and a respect for individual and cultural differences. Competencies are developed in psychological theories of personality and behavior, human development, counseling strategies, and career development. Developmental concepts are integrated with supervised practice through field placements and varied instructional approaches.

The list of specific courses required for each program is available on the Lynch School website under Programs of Study.
Master of Arts (M.A.) in Mental Health Counseling

The Lynch School's Master of Arts program in Mental Health Counseling prepares students for careers as mental health counselors and/or to pursue doctoral studies in psychology or other fields. A core component of the Master's in Psychology and Counseling Accreditation Council's (MPCAC)-accredited program, consistent with the University's broader mission and Jesuit tradition, is an emphasis on social justice. Graduates are prepared to serve the mental health needs of individuals, groups, communities, and systems across contexts and cultures, and to promote and advocate for social change.

The program's training emphasizes both academic and applied experiences that incorporate developmental-contextual and multicultural frameworks to understand and promote mental health and well-being in diverse populations. Students receive a broad background in counseling and mental health theories, develop strong counseling skills, engage in reflective scholarship, gain core professional competencies, and master scientifically informed best practices. They graduate ready to practice contemporary counseling.

The Master of Arts degree in Counseling is a two-year program with two tracks:

- The 60-credit hour program meets the educational requirements for licensure as a Mental Health Counselor (LMHC) in the Commonwealth of Massachusetts. Graduates of this program are ready for entry-level counseling positions and, with postgraduate supervision and experience, prepared to obtain licensure and advanced skills/specialization. Students in the 60-credit sequence are expected to take one required course during the Summer Session. They may also take additional elective courses during the Summer Session if they wish to reduce their course load during the second year in the program. During the first year of the program students complete a year-long course, Foundations of Counseling I and II, which includes an intensive, counseling skills training lab experience. In the second year, students complete a combined Practicum-Internship experience of between 700 and 900 hours in a community setting while completing academic requirements.

- The 48-credit program prepares students for further studies in counseling or fields in which a solid counseling foundation is valuable. Our graduates have gone on to pursue doctoral degrees in psychology and further studies in public policy, law, and business.

Each program requires students to complete a practicum experience.

At completion of the program, students will be able to:

- Demonstrate foundational training in, and foster identification with, the field of counseling.
- Become competent as practitioners and knowledgeable of the ways in which science influences practice and practice influences science.
- Understand the nature of social justice in their professional work and to infuse this perspective into their practice.

Master of Arts (M.A.) in School Counseling

The School Counseling program is a 48-credit hour track that is accredited by the Massachusetts Department of Elementary and Secondary Education and that meets current Massachusetts requirements for initial licensure as a school counselor at the PreK-8 and/or the 5-12 grade levels. The M.A. in School Counseling is also accredited by the Master's in Psychology and Counseling Accreditation Council (MPCAC) for the period of March 2017 through March 2027. The first year of the program is devoted primarily to course work; however, School Counseling students do spend one day a week at a school in their second semester to meet pre-practicum requirements. The second year of the program consists of a full-year, 600-hour practicum placement and the completion of remaining academic requirements. At completion of the program, students will be able to:

- To demonstrate foundational training in, and foster identification with, the field of psychology generally, and counseling and school counseling, specifically.
• Become competent as practitioners, and knowledgeable of the ways in which science influences practice and how practice can inform scientific investigation.
• Promote social justice in their professional work.

Doctoral Program (Ph.D.) in Counseling Psychology (APA accredited)

The doctoral program in Counseling Psychology, through advanced course work and supervised internships, builds on prior graduate training and professional experience. Using a developmental framework and a scientist-practitioner model of training, the program helps students acquire the following competencies: ability to comprehend and critically analyze current literature in the field; understanding of major theoretical frameworks for counseling, personality, and career development; skills to combine research and scientific inquiry; knowledge and practice of a variety of assessment techniques; respect for and knowledge of diverse client populations; ability to provide supervision, consultation, and outreach; commitment to the ethical and legal standards of the profession including sensitivity to individual, gender, and cultural differences; and demonstrated competencies with a variety of individual and group counseling approaches in supervised internships.

At the completion of the program:

• Students demonstrate foundational knowledge, and identification with, the field of psychology, generally and counseling psychology, specifically.
• Students demonstrate competency as theorists, researchers, and scholars, who are knowledgeable of the ways in which practice influences science.
• Students demonstrate competency as practitioners and are knowledgeable of the ways in which science influences practice.
• Students demonstrate social justice practices in their professional work.

The doctoral program in Counseling Psychology accepts applications from applicants with a master's degree prior to applying as well as from applicants who wish to pursue their doctoral education directly after their undergraduate education (Direct Admit). The doctoral program (Ph.D.) in Counseling Psychology is accredited by the American Psychological Association (Office of Program Consultation and Accreditation, 750 First Street, NE, Washington, DC 20002; 202-336-5979) and is designed to qualify candidates for membership in that organization and Division 17 (Counseling Psychology). The program is designed to provide many of the professional pre-doctoral educational requirements for licensure as a Psychologist in the Commonwealth of Massachusetts and for inclusion in the National Register of Health Care Providers. Licensure requirements in Massachusetts include an additional year of post-doctoral supervised experience.

The entering doctoral student who has not completed all of the educational prerequisites for the M.A. in Counseling must complete them during the initial year of enrollment in the doctoral program. Decisions regarding this aspect of the student’s coursework will be based on a review of the student’s background by the assigned advisor and the director of doctoral training.

Once admitted, doctoral students are required to complete courses in each of the following broad areas that fulfill the basic professional training standards: scientific and professional ethics and standards, research design and methodology, statistical methods, psychological measurement, history and systems of psychology, biological bases of behavior, cognitive-affective bases of behavior, social bases of behavior, individual differences, and professional specialization.

The Ph.D. in Counseling Psychology requires a minimum five years of full-time academic study, doctoral comprehensives, and advanced practica, including a year of full-time internship and successful defense of a dissertation. Other departmental requirements for the Ph.D. are discussed above.

Programs in Applied Developmental and Educational Psychology
The theoretical orientation of the programs in Applied Developmental and Educational Psychology is development and learning in sociocultural context. The programs are designed to develop expertise in integrating theory, research, and application to the development of children, adolescents, and adults.

Two degrees are offered: the master’s degree in Applied Developmental and Educational Psychology and the doctoral degree in Applied Developmental and Educational Psychology.

The doctoral program in Applied Developmental and Educational Psychology accepts applications from applicants with a baccalaureate or master’s degree in psychology or a related field. Most applicants have some research experience as well as practice/education experience in the field.

Master's Programs (M.A.) in Applied Developmental and Educational Psychology

The M.A. degree focuses on the unique characteristics, crises, and developmental tasks of people at specific periods in their lives, including the social, affective, biological, and cognitive factors that affect development. The program is designed for those pursuing knowledge of theory and research in the area of life span development, and for those practitioners (counselors, nurses, personnel specialists, teachers, social workers) seeking a greater understanding of the populations they serve. The M.A. degree does not lead to licensure. Those possessing a degree in this option are employed in a number of developmentally oriented settings, (e.g., residential care centers, prisons and correction centers, children’s museums and parks, adult and industrial educational facilities, personnel departments, governmental offices, and hospitals). Graduates also serve as educational instructors and/or consultants in these settings.

Learning outcomes for the program:

- Learn to critically analyze and evaluate research, programs, and policies related to developmental and educational psychology;
- Learn to communicate about research and current controversies in the field through collegial discussions in courses and close collaborations with faculty;
- Learn how to apply disciplinary knowledge to real-world situations through field placements and internships.

A listing of specific course requirements may be obtained from the Office of Graduate Admissions, Financial Aid, and Student Services, Campion 135. The program is designed to give maximum flexibility to suit individual needs. Beyond the core requirements, students work with their academic advisor to select an additional set of courses that best fulfills their career goals and areas of interest. Through these courses students can elect to complete Certificates or Specializations, which can be found online at the Certificates page.

Doctoral Program (Ph.D.) in Applied Developmental and Educational Psychology

We prepare graduate students to serve diverse populations in a variety of professional roles as teachers and researchers in colleges and universities and as researchers and leaders in applied settings, including schools, government agencies, and health and human services organizations. Faculty situate their work within the mission of the Lynch School, which is to improve human well-being through teaching, research, and service.

The focus of the Applied Developmental and Educational Psychology Program is on development and learning in sociocultural context. Areas of program expertise within the study of child development and child functioning include cognitive and socioemotional development from the preschool years through adolescence. We also have expertise on adult functioning in community settings. Development is examined, in both research and curriculum, across multiple, interactive contexts or levels.

These levels include:
Individual Functioning

- Basic Processes
- Individual Differences
- Developmental Disabilities
- Biological Bases of Behavior

Interpersonal Processes

- Family Relationships
- Peer Relationships
- Parenting

Community, Cultural, and Public Policy

- Schools and Learning Environments
- Poverty
- Race and Ethnicity
- Gender

Upon completion of the Ph.D. program, graduates will be able to:

- Demonstrate knowledge of the major concepts and theories in the field of child development.
- Critically evaluate existing research and integrate research findings across studies.
- Analyze applied and theoretical issues related to child development from different theoretical perspectives and based on prior research findings.
- Develop research questions reflecting basic and applied issues in the areas of education, social policy, and human/community development.
- Use appropriate methodology to design empirical studies addressing research questions.
- Use a variety of quantitative and qualitative techniques for analyzing data.
- Communicate research findings clearly and accurately in publications and presentations for both professional and lay audiences.
- Teach courses in the field and the college and graduate level.

The range of careers available to Applied Developmental and Educational Psychology graduates with a Ph.D. includes university teaching, research, advocacy, consultation, and positions in business, governmental agencies, and human service organizations.

The program guidelines promote active engagement in research with faculty mentors for all students throughout their doctoral program. In addition to this mentored training, the curriculum requires that students take core courses in (1) social, affective, and cognitive development and the contexts of development; (2) qualitative and quantitative research methods and statistics; (3) professional development and teaching preparation; and, (4) application to practice and policy. In addition, students develop expertise in targeted areas of psychology through selected elective courses and through their research and practice experiences. Finally, students with a particular interest in human rights and social justice can obtain a Certificate through the BC-based Center for Human Rights and International Justice.
Studies in Measurement, Evaluation, Statistics, and Assessment are designed to prepare researchers with specialized competence in testing, assessment, applied statistics, the evaluation of educational programs, and research methodology for the social sciences and human services.

Master of Education (M.Ed.) in Educational Research Methodology

The Measurement, Evaluation, Statistics and Assessment (MESA) program at the Lynch School combines the study of research design, statistical methods, and testing and assessment with a research focus on major contemporary education policy issues. The program is designed to prepare students for research and academic careers in education, social sciences, and human services.

Upon completion of the M.Ed., graduates should be able to:

- Understand the theory of research, evaluation, statistics, measurement and assessment methodology.
- Critically analyze published quantitative and qualitative research.
- Interpret and report quantitative and qualitative designs, procedures, and results.
- Communicate research findings effectively.

The master’s program prepares graduate students with fundamental skills in testing, assessment, the evaluation of educational innovations, and in quantitative and qualitative social science research methods. A minimum of 30 credit hours and satisfactory performance on a comprehensive examination are required for the M.Ed. degree.

Master of Science (M.S.) in Applied Statistics and Psychometrics

The Applied Statistics and Psychometrics program at the Lynch School combines the study of research design, statistical methods, and testing and assessment with a research focus on major contemporary education policy issues. The program is designed to prepare students for research and academic careers in education, social sciences, and human services.

Upon completion of the M.S., graduates should be able to:

- Understand the theory of applied statistics and psychometrics.
- Conduct analyses using advanced procedures such as multiple regression, multivariate models, hierarchical linear modeling, causal modeling, and longitudinal analyses.
- Interpret and report quantitative and qualitative designs, procedures, and results.
- Design, conduct, analyze, interpret and report both Classical Test Theory and Item Response Theory analyses.
- Communicate research findings effectively.

The MESA Master of Science meets the need for quantitative specialists to conduct statistical analyses, design quantitative research studies, and develop measurement scales for educational, social, behavioral, and health science research projects. This program meets the increasingly higher expectations of applied research organizations and funding agencies, (e.g., the Institute for Education Sciences and the National Science Foundation), for master’s-level specialists trained in quantitative designs, statistical procedures, and measurement methodology applicable to a wide variety of projects. A minimum of 30 credit hours and satisfactory performance on a comprehensive examination are required for the M.S. degree.
Doctoral Program (Ph.D.) in Measurement, Evaluation, Statistics, and Assessment

This program prepares researchers with specialized competence in testing, assessment, the evaluation of educational innovations, and in quantitative and qualitative social science research methodology.

A student without a master’s degree may apply directly to the doctoral program in Measurement, Evaluation, Statistics, and Assessment; however, note that this Direct Admit option is appropriate only when the applicant has demonstrated exceptional academic achievement and has acquired relevant research experience.

Emphasis is on the research methodology and data analysis and includes advanced coursework in research design, statistical methods, and testing and assessment as well as seminars in statistical and measurement topics. MESA students have the opportunity to tailor coursework to their particular interests and background. The doctoral degree requires a minimum of 54 credits beyond a master’s and satisfactory completion of comprehensive exams and a dissertation. Students are expected to develop an understanding of modern techniques of test construction and evaluation, design of research and experiments, univariate and multivariate statistical analysis of data, and psychometric theory. Training and experience are provided in the use of specialized computer software for statistical analysis.

Upon completion of the Ph.D., graduates should be able to:

- Understand the theory of research, evaluation, statistics, measurement and assessment methodology.
- Critically analyze published quantitative and qualitative research.
- Construct both cognitive and affective measurement instruments and assessments.
- Conduct original empirical research related to topics in education, evaluation, statistics, measurement, assessment, and policy.
- Interpret and report quantitative and qualitative designs, procedures, and results.
- Communicate research findings effectively.

Since the important issues in these areas require more than technical solutions, the program also attends to non-technical social, ethical, and legal issues. Care is taken to design programs of study and experience according to the individual student’s needs, interests, and goals. Students may choose an additional concentration in Developmental and Educational Psychology, Educational Policy and Reform, Curriculum and Instruction, Educational Leadership, or other area.

Graduates of the program are qualified for academic positions in university departments of education and social sciences. They also are qualified for research and testing specialist positions in universities, foundations, local education agencies, state and regional educational organizations, and in research and development centers.

Interdisciplinary Programs

The Lynch School of Education and Human Development takes a multifaceted view of education—one that is transformative and focused on the whole person. Interdisciplinary programs integrate the epistemological strengths of the Lynch School’s four academic departments to enhance the practice of our graduates and the outcomes of learners.

Master of Arts (M.A.) in Learning Engineering

Interdisciplinary and experiential, this one-year, full-time program prepares you to design engaging and effective learning experiences that are informed by the learning sciences and incorporate cutting-edge technologies. This first-to-market program in a pioneering discipline leverages the expertise of faculty from across the Lynch School of Education and Human Development. Throughout the on-campus program, you’ll complete design challenges, shadow working professionals, take field trips to technology incubators and collaboratories, and intern with local organizations. You’ll graduate with a dynamic portfolio that
showcases the depth and breadth of your design work and demonstrates your capabilities in learner-centered design, leadership, and forward-thinking imagination.

Learning engineering is the systematic application of principles and methods from the learning sciences to support and better understand learners and learning. The discipline leverages human-centered design approaches to iteratively develop and improve design solutions that address specific learning needs and opportunities—often using technology.

The program is built around a well-facilitated and increasingly challenging experiential core. Three-credit courses and one-credit modules emphasize the knowledge and skills needed to develop design and leadership capabilities and improve understanding of learning. Our program is designed as a cognitive apprenticeship in which you participate as an active member of a knowledge-building community with teachers, mentors, and peers.

- Hands-on learning through a design studio every semester, opportunities to shadow groups engaged in designing for learners, and internships with local organizations.
- Classes and modules designed specifically to support you as you learn what you need to thrive as a learning engineer. You’ll use what you learn in classes to guide the decisions you make while completing studio projects.
- Reflection—you will continuously reflect on your experiences and the design challenges you face, using those reflections to develop new insights. You’ll track your thinking, record and justify your decisions, continually identify what you learn, and synthesize across your experiences in the Reflective Seminars.

Throughout the program, you’ll develop the expertise and imagination to design learning experiences that dynamically engage learners’ interests, passions, and prior knowledge. You will also acquire interpersonal and leadership skills that will prepare you to thrive as leaders and collaborators.

- How people learn and what influences their engagement. You will be introduced to the theoretical foundations of how people learn, pedagogies and practices for fostering learning, and how to design and use technology to engage learners.
- Learner-centered design and designing for diversity. You’ll master design thinking, design decision-making practices, and how to use what you learn about learning to create engaging and effective designs that address learners in all of their complexity.
- Design for social justice and equity. Across classes, design studio experiences, and reflective activities, you will account for the full range of social, cultural, affective, and cognitive influences on access and learning. Promoting social justice is a pillar of both Boston College’s mission and the mission of the Lynch School of Education and Human Development.
- Vocational discernment and career readiness. You will have opportunities to identify what you enjoy doing as a designer of learning experiences, your personal values and aspirations, what your strengths are, and concrete steps to achieve your goals. You’ll work with and be mentored by practicing learning engineers.
- Leadership skills. Whether you are a team member or a team leader in your first position, you’ll learn valuable skills and knowledge you can use to influence your team, organization, or clients.

Dual Degree Programs

The Lynch School offers five dual degree programs in collaboration with the Boston College Law School, the Carroll School of Management, and the School of Theology and Ministry (STM).

Dual Degree Programs—Law and Education

The dual degree programs in law and education are designed for students interested in serving the combined legal and educational needs of students, families, and communities in our nation. They reflect the University’s mission to promote social justice and to prepare men and women for service to others. The programs prepare students to meet the needs of individuals who have traditionally not been well served by the nation’s schools. The programs are designed to serve the needs of persons who wish to combine knowledge about education and applied psychology with legal knowledge and skills to better serve their clients.
and constituencies. The programs offer an opportunity to further the University’s goals in promoting interdisciplinary inquiry and integrating the work of service providers.

Students admitted to the program may expect to receive both a master’s degree in Education (M.Ed. in Curriculum and Instruction or Educational Leadership or M.A. in Higher Education) and the Juris Doctor (J.D.) degrees in approximately three and a half years, or three years and two summers, rather than the four or more years such degrees would normally entail if taken separately. Students must matriculate and spend at least one semester of residence in the Lynch School.

Students seeking to pursue the J.D./M.Ed. or J.D./M.A. dual degree must file separate applications to, and be admitted by, both their intended Education program in the Lynch School and the Boston College Law School. Any student seeking licensure or human services licensure must meet all of the requirements in the Lynch School for that licensure. Students seeking licensure in Massachusetts must pass the Massachusetts Tests for Educator Licensure (MTEL).

All Lynch School admissions requests should be addressed to: Boston College, The Office of Graduate Admission, Financial Aid, and Student Services, Lynch School of Education and Human Development, Campion Hall 135, 140 Commonwealth Avenue, Chestnut Hill, MA 02467-3813, telephone 617-552-4214, or e-mail gsoe@bc.edu. The BC Law School accepts applications from mid-September through March 31 for the class entering in August. Contact them directly for further information at Office of Admissions, BC Law School, 885 Centre Street, Newton Centre, MA 02459, 617-552-8550.

**Dual Degree Program—Higher Education and Business Administration (M.A./M.B.A.)**

This dual degree program will provide students in higher education with an opportunity for professional training in resource management. The M.B.A./M.A. program will prepare students to assume leadership positions in such areas as financial management, resource planning, and technology management in major universities and policy-making institutions in post-secondary education.

Students admitted to the program may expect to receive both a master’s degree in education (M.A. in Higher Education Administration) and the Master of Business Administration (M.B.A.) degrees in three academic years and two summers. Students seeking to pursue the M.B.A./M.A. dual degree must file separate applications to, and be admitted by, both the Higher Education program in the Lynch School of Education and Human Development and the Carroll School of Management.

All Lynch School admissions requests should be addressed to: Boston College, The Office of Graduate Admission, Financial Aid, and Student Services, Lynch School of Education and Human Development, Campion Hall 135, 140 Commonwealth Avenue, Chestnut Hill, MA 02467-3813, telephone 617-552-4214, or e-mail gsoe@bc.edu. All M.B.A. admissions requests should be addressed to the Office of Graduate Admissions, Carroll School of Management, 140 Commonwealth Avenue, Chestnut Hill, MA 02467-3813, 517-552-3920.

**Dual Degree Program—Counseling Psychology/Theology and Ministry (M.A./M.A.)**

The dual M.A. in Theology & Ministry/M.A. in Counseling Psychology program was developed by the School of Theology and Ministry and the Lynch School. It is designed for individuals who wish to pursue graduate studies that combine theories and practice in counseling and psychology with studies in religion and exploration of the pastoral dimensions of caregiving.

It combines the core studies and faculty resources of the existing M.A. in Theology & Ministry (Pastoral Care and Counseling Concentration), and the M.A. in Mental Health Counseling. It prepares students to seek licensing as professional mental health counselors while also providing them with theoretical foundations for integrating pastoral ministry and counseling techniques. Students seeking to pursue the dual M.A./M.A. program must file separate applications to, and be admitted by, both the Lynch School master's program in Counseling and the School of Theology and Ministry. Any student seeking mental health licensure or school counseling licensure must meet all of the requirements in the Lynch School for that licensure.

All Lynch School admissions requests should be addressed to the Office of Graduate Admissions, Financial Aid, and Student Services, Campion 135, Lynch School, Boston College, Chestnut Hill, MA 02467-3813, 617-552-4214. All Pastoral Ministry admissions requests should be addressed to the School of Theology and Ministry, 140 Commonwealth Avenue, Chestnut Hill, MA 02467-3921, 617-552-6506.
Certificate and Specialization Programs

All Lynch School Certificate and Specialization Programs requests should be addressed to: Boston College, The Office of Graduate Admission, Financial Aid, and Student Services, Lynch School of Education and Human Development, Campion Hall 135, 140 Commonwealth Avenue, Chestnut Hill, MA 02467-3813, telephone 617-552-4214, or e-mail gsoe@bc.edu.

Certificate in Child and Family Mental Health

The Certificate in Child and Family Mental Health and Wellness is designed for students who would like to broaden and deepen their understanding of developmental psychology, and the mental health and wellness of children, adolescents, and families. The courses included in this certificate foster an understanding of children and families from strengths-based, developmental-contextual framework.

Certificate in Human Rights and International Justice

The certificate program is designed to address the increasing complexity of human rights issues in an increasingly globalized world. Certificate students learn to think critically within and across disciplines to grasp more fully contemporary human rights challenges, and to be better prepared to offer thoughtful and effective responses. The certificate program is open to students who are registered in BC’s graduate and professional schools.

Certificate in Social Justice Leadership

The certificate program helps current and aspiring leaders develop and enact a theory of change to boldly advance equity in schools. Through a series of four courses, participants discern organizational impediments to students’ opportunities to learn, then envision and enact a systemic response to confront these barriers. The goal of the program is to provide intensive support to educators committed to deepening their knowledge, skills, and dispositions to ameliorate educational inequities.

Certificate in Educational Policy Development

The certificate program equips current and aspiring leaders in schools and community-based organizations to leverage dramatic organizational change. Through a series of four courses, participants develop a sophisticated appreciation of how policies shape the cultural norms and day-to-day practices at both a micro level (e.g., within institutions) and a macro level (e.g., within a school district, a city, or a state). The goal of the program is to help leaders develop their repertoire of skills to use policy levers to creatively and effectively advance organizational goals.

Certificate in International Higher Education

The certificate program in International Higher Education is designed to provide students with an understanding of and a scholarly perspective on global higher education, and examines challenges and opportunities in different geographic regions. It outlines the major trends and issues affecting this fast-growing field and provides the skills to understand and analyze policy, practice, and theory. You’ll explore cross-cutting topics as leadership and management, economics and finance, and teaching learning, and student affairs in the field-from global and regional standpoints. Successful completion can be applied to the Master’s in International Higher education. This Certificate can be completed fully online.

Certificate in Positive Youth Development

The Certificate in Positive Youth Development equips professionals with an understanding of the theoretical, empirical, and experiential bases of the Positive Youth Development (PYD) model. PYD offers an applied perspective to frame applications (programs and policies) for promoting positive development among youth living in diverse communities. The certificate benefits
early-and mid-career professional youth development leaders for careers in agencies, institutions, schools, nonprofits, and community organizations that serve youth.

**Specialization in Autism Spectrum Disorder**

The Specialization in Autism Spectrum Disorder assists teachers and other professionals who work with students diagnosed with Autism Spectrum Disorder (ASD) in K–12 schools in understanding the nature of ASD and the educational techniques used to meet their needs. The population of student being diagnosed with ASD has grown dramatically over the past decade. This specialization will benefit special educators and many general education teachers, who are being asked to serve these students at all grade levels.

**Certificate in Serving Exceptional Learners in Catholic Schools**

The Certificate in Serving Exceptional Learners in Catholic Schools is designed to prepare participants to serve the diverse learning and behavioral needs of their students who are atypical learners. Teachers will sharpen their skills in managing classrooms of diverse learners, connect their practice with new research findings, and learn practical strategies to enhance student learning. Although this certificate does not fully prepare teachers to be special educators, it addresses the key strategies needed for serving these students in Catholic school classrooms.

**Certificate for Institutional Research Officer/Analyst**

The Certificate in Institutional Research prepares professionals for higher education careers as institutional research officers and analysts where addressing institution-related questions and problems requires: skill in program evaluation, assessment development, general research design, and applied social science statistics; and familiarity with institutional structures and operations.

**Certificate in Bilingual Education**

The Bilingual Education Certificate (BEC) certificate is designed to prepare BC graduates to work in settings where instruction takes place in two languages. Through targeted coursework, students will become familiar with the foundations of bilingual education, infusing language into content instruction, and teaching reading and language arts in Spanish as well as English. The work undertaken by BEC scholars prepares educators for teaching in both monolingual and bilingual educational settings. You will work with Lynch School faculty with extensive expertise in bilingual teaching and learning. Practicum placements in partner bilingual schools in the greater Boston area provide critical points of practice for teaching. The BEC accompanies the state-level certification associated with elementary and literacy specialist licensure programs.

**Morrissey College of Arts and Sciences, Graduate Programs**

The Graduate School of the Morrissey College of Arts and Sciences (GSMCAS) offers programs of study leading to the degrees of Doctor of Philosophy (Ph.D.), Master of Arts (M.A.), and Master of Science (M.S.). In addition, GSMCAS may admit as Special Students those students not seeking a degree who are interested in pursuing coursework for personal enrichment.

The Graduate School of the Morrissey College of Arts and Sciences also offers several dual degree options. The Master of Arts in Teaching (M.A.T.) and Master of Science in Teaching (M.S.T.) are offered in cooperation with the Lynch School of Education Graduate Programs. The Master of Arts/Juris Doctor (M.A./J.D.) and the Doctor of Philosophy/Juris Doctor (Ph.D./J.D.) are offered in cooperation with the Boston College Law School. The Master of Arts/Master of Business Administration (M.A./M.B.A.), and the Doctor of Philosophy/Master of Business Administration (Ph.D./M.B.A.) are offered in cooperation with the Carroll Graduate School of Management. The Graduate School also offers, through select departments, a Fifth Year Master of Arts (M.A.) and Master of Science (M.S.) program for high-achieving BC undergraduates wishing to pursue an accelerated graduate program.
General Information

The Deans' Office of the Graduate School of the Morrissey College of Arts and Sciences in Gasson 108 is open from 9:00 a.m. to 5:00 p.m., Monday through Friday, to assist prospective students with general admissions inquiries and current students with any academic or student services needs. Application materials may be obtained either from the department in which students hope to study or from the Graduate Admissions Office.

The course schedule is available online prior to each semester’s registration period at the Course Information and Schedule link at www.bc.edu/courses. The International Student Office, the Office of the Dean for Student Development, and the Graduate Student Association provide non-academic services for students.

Master's Degree Programs

Requirements for the Degrees of Master of Arts and Master of Science

Acceptance

Candidates for the Master's degree must be graduates of an accredited college and normally must have at least 18 semester hours of upper division work in the proposed area of study. In case of deficiencies, prerequisites may be earned in the graduate school by achieving a minimum grade of B in courses approved for this purpose. Where there is some doubt about a scholastic record, acceptance may be conditional. The candidate will then be evaluated by the department and recommended to the Dean for approval after completing the first semester of coursework or after earning a minimum of six credits.

Course Credits

The number of graduate credits required for the degree varies by department. No more than six graduate credits will be accepted in transfer toward fulfillment of course requirements, as described more fully under “Transfer Credit Policies” under Academic Regulations.

Fifth Year B.A./M.A. and B.S./M.S.

In cooperation with the Morrissey College of Arts and Sciences, the Graduate School offers five year B.A./M.A. and B.S./M.S. programs in some disciplines. See the Undergraduate Morrissey College of Arts and Sciences for further information.

Doctoral Degree Programs

Requirements for the Degree of Doctor of Philosophy

The Ph.D. degree is granted only for distinction attained in a special field of concentration and the demonstrated ability to modify or enlarge upon a significant subject in a dissertation based upon original research meeting high standards of scholarship.

Requirements for the doctoral degree are specific to departments and may be found under departmental listings. Detailed statements of requirements and procedures should be requested directly from the department in which the student has an interest.

Residence

The philosophy of the residence requirement is that a doctoral student should experience the total environment of the University. Residence for at least two consecutive semesters of one academic year, during which the student is registered as a full-time
student at the University, is required. A plan of study that meets this requirement must be arranged by the student with the
department. Registration in two courses per semester is considered to fulfill the residency requirement for students holding full-
year fellowships and assistantships. The residence requirement may not be satisfied, in whole or in part, by summer session
attendance.

Interdisciplinary Doctoral Program

Where departmental doctoral programs are unable to satisfy the interests of the student, an interdisciplinary doctoral program
remains a possibility. However, students must first be admitted to a departmental program. A student interested in exploring such
a possibility should first make an inquiry to the GSMCAS Dean's Office.

Special Students (Non-degree)

Non-degree seeking students, who are interested in pursuing course work at the graduate level, may apply for admission as
special students. Many individuals enter departments of GSMCAS as special students—either to explore the seriousness of their
interest in studying for an advanced degree or to strengthen their credentials for possible later application for degree study. Others
are simply interested in taking graduate coursework for interest's sake or for other purposes. Admission as a special student does
not guarantee subsequent admission for degree candidacy. Individuals who are admitted as special students and who
subsequently wish to apply for admission as degree candidates must file additional application documents and be accepted for
degree study. The number of credits one has earned as a special student that may be applied toward the requirements of a
degree is determined by the appropriate department in concert with GSMCAS regulations.

Those admitted as special students may take courses only in the department that has recommended their admission. Permission
to continue to take courses as a special student beyond the semester for which admission was originally gained must be obtained
from the admitting department’s Graduate Program Director.

Admission

Eligibility and Application Information

The Graduate School of the Morrissey College of Arts and Sciences is an academic community whose doors are open to all
students without regard to race, ethnic or national origin, religion, color, age, gender, marital or parental status, veteran status,
disabilities, or sexual orientation. Opportunities and experiences are offered to all students on an equal basis and in such a way as
to recognize and appreciate their individual and cultural differences.

Applicants for admission to the GSMCAS must possess at least a bachelor’s degree from an accredited institution and give
evidence of the ability and preparation necessary for the satisfactory pursuit of graduate studies. This evidence consists primarily,
but not exclusively, in the distribution of undergraduate courses and the grades received in them. Please consult the your intended
department for additional program-specific requirements.

Individuals lacking a bachelor's degree generally are not admitted to GSMCAS classes. In order to attend graduate classes,
persons lacking the bachelor's degree should apply for authorization either through the Dean of the Woods College of Advancing
Studies or, in the case of Boston College undergraduates, through their appropriate dean and with the approval of the chairperson
of the given department. Such students will receive only undergraduate credit for the course taken in the GSMCAS, and the
course credit will be entered only on their undergraduate record. For regulations governing the simultaneous master’s/bachelor’s
degree, students should consult their department.

GSMCAS accepts two classes of applicants—degree students (degree-seeking) and special students (non-degree-seeking).

A completed application to GSMCAS includes the application form and official transcripts, as well as any program-specific
requirements, e.g., GRE scores, statement of purpose, writing sample, letters of recommendation, etc. For these additional
requirements, please consult the requirements of the department to which admission is being sought. All application materials
should either be submitted online or sent to the Graduate Admissions Office, Gasson 108.
Applicants for special student status are only required to submit an application form, statement of purpose, and official transcripts. All application materials should either be submitted online or sent to the GSMCAS Admissions Office, Gasson 108.

Degree and special students are not admitted officially until the completed application form with a positive department recommendation has been approved by the Associate Dean of Admissions and Administration. Admission should not be presumed without receipt of official notification from the Associate Dean.

Degree-seeking applicants should consult the department of specialization regarding the specific requirements for the various departmental master’s and doctoral programs.

For the necessary application forms and information, students may either address their requests to the department of interest or to the Graduate Admissions Office, Gasson 108.

Information on the GRE and TOEFL tests may be obtained from the Educational Testing Service, Box 955, Princeton, New Jersey 08540 or at www.gre.org.

All documents submitted by applicants for admission become the property of GSMCAS and are not returnable.

Acceptance

Announcements of acceptance or rejection are usually sent no later than April 15 for September admissions, but may vary by department. Decisions are made on the basis of departmental recommendations and the fulfillment of prerequisites. No student should presume admission until he or she has been notified officially of acceptance by the Associate Dean.

Financial Aid

Academic Awards

Stipends and scholarships are available to aid promising students in the pursuit of their studies, including:

- Graduate Assistantships
- Research Assistantships
- Teaching Assistantships
- Teaching Fellowships
- Tuition Scholarships
- University Fellowships

Individuals whose applications are complete will routinely be considered for financial aid by the department in which they hope to study. No separate application is necessary. The scholastic requirements for obtaining these stipend awards or scholarship awards are necessarily more exacting than those for simply securing admission to GSMCAS.

- Graduate students may not receive University financial aid (stipend and/or tuition scholarships) from two schools or departments simultaneously.
- Graduate students who hold fellowships or assistantships may not be employed full-time without the Dean’s approval.
Fellowships and Assistantships

University Fellowships

University Fellowships are available in some departments offering the Ph.D. degree. These awards do not require service to the University.

Teaching Fellowships

The Graduate School of the Morrissey College of Arts and Sciences has available a limited number of Teaching Fellowships. These provide a stipend that varies among departments. The Teaching Fellow, in addition to his or her program of studies, is usually responsible for six hours of teaching in the undergraduate colleges.

Assistantships

Graduate Assistantships and Teaching Assistantships

Graduate and Teaching assistantships are assigned by departments. Duties, including the nature and number of hours (though in no case to exceed 20 hours), and stipend amounts vary by department.

Research Assistantships

Research Assistantships are available in some departments. Research Assistantship duties, including the nature and number of hours (though in no case to exceed 20 hours), and stipend amounts vary by department. Summer research opportunities are available on some research projects. For further information, contact the department's graduate program director.

Tuition Scholarships

Tuition scholarships are awarded based on academic achievement and promise. These awards do not require service to the University.

Procedures for Financial Aid Recipients

At the opening of each school year, or at whatever other time financial aid may be awarded, recipients of fellowships and assistantships must report to the Human Resources Service Center to complete his/her personnel and tax information forms.

An aid recipient who relinquishes a fellowship, assistantship, or a tuition scholarship must report this matter in writing to the department chairperson and to the Dean. These awards may be discontinued at any time during an academic year if either the academic performance or in-service assistance is of an unsatisfactory character. They may also be discontinued for conduct injurious to the reputation of the University.

Other Sources of Financial Aid

Students interested in other sources of financial aid, such as work-study funds and various loan programs, should inquire in the Office of Student Services where all such aid is administered. Refer to the earlier section on financial aid in this catalog.
Academic Regulations

Full-Time Enrollment Status

Full-time enrollment in the Graduate School of the Morrissey College of Arts and Sciences is 9 or more credits.

All students are considered half-time with six credits.

Students completing degree requirements in their final semester may be given exceptions to the school’s minimum credit standard for full-time status by their academic dean.

The credit amounts listed above are used to determine a student’s enrollment status for loan deferments, immunizations, medical insurance requirements, and verifications requested by other organizations.

Graduate schools may also define full-time status by a student’s course work or role responsibilities as listed below:

- All doctoral candidates in the Graduate School of the Morrissey College of Arts and Sciences are considered full-time students.
- Master’s candidates are considered full-time students if they are registered full-time and/or receiving an assistantship or fellowship through an academic unit, e.g., Graduate Assistants, Teaching Fellows, Teaching Assistants, or Research Assistants.

Transfer Credit Policies

Graduate students may request the transfer of no more than six graduate credits. Courses will be considered for transfer if the student has received a grade of B or better and if the course has not been applied to a prior degree. If approved, the transfer course and credit, but not the grade, will be recorded on the student’s academic record. Credit received for courses completed more than ten years prior to a student’s admission to his or her current degree program are not acceptable for transfer. Students are advised to consult with the procedures and policies of their department or school for exceptions to this policy.

Biology

The Biology Department offers courses leading to the degree of Doctor of Philosophy. A B.S./M.S. degree is offered to enrolled undergraduate students. The master of science in teaching (M.S.T.) degree is administered through the Lynch School of Education in cooperation with the Biology Department.

Those seeking admission to the graduate program should have a bachelor’s degree and undergraduate coursework in calculus, physics, biochemistry, biology, and chemistry, including organic chemistry. Deficiencies in preparation as noted by the Admissions Committee may be made up in the graduate school.

The minimum curriculum for Ph.D. students consists of six Graduate Core Courses (BIOL6110 Advanced Genetics, BIOL6350 Graduate Biochemistry, BIOL6140 Graduate Molecular Biology, BIOL6150 Advanced Cell Biology, BIOL6160 Graduate Bioinformatics and BIOL6180 Scientific Proposal Writing), two additional Biology-approved Graduate Elective Courses (e.g., BIOL5000+, BIOL 8000+), and a University seminar in Responsible Conduct of Research.

Graduate Research Experience entails three lab rotations during the first year. After each rotation, students present at the Department Data Club. Rotations allow students the opportunity to explore important questions in different areas of biology and to determine if a particular lab environment is suitable for their thesis research. Students are expected to have joined a permanent lab by the end of this year, with permission of the lab’s P.I.
Students are also required to be a Teaching Assistant for at least two semesters, beginning in their first semester. Depending on the availability of funding from their lab P.I., they may be supported by either a Research Assistantship or a Teaching Assistantship in subsequent semesters.

Throughout the academic year, the Biology Departmental Colloquium hosts distinguished researchers in many areas of biology. Attendance is required of all full-time Ph.D. students at both the Seminar Talk and Department Data Club.

For the M.S.T. degree, course requirements vary depending upon the candidate’s prior teaching experience; however, all master’s programs leading to certification in secondary education include practical experiences in addition to course work. Students seeking certification in Massachusetts are required to pass the Massachusetts Educators Certification Test. For further information on the M.S.T., please refer to the Lynch School of Education and Human Development section, Master’s Programs in Secondary Teaching, or call the Office of Graduate Admissions, Lynch School, at 617-552-4214.

Chemistry, Graduate Programs

The Department of Chemistry offers programs leading to: (1) the Doctor of Philosophy (Ph.D.) degree in chemistry and to (2) the Master of Science in Teaching (M.S.T.) degree in education. The latter is in conjunction with the Lynch School of Education.

Ph.D. Degree Requirements

There is no total credit requirement for the Ph.D. degree. All entering graduate students are required to take the core graduate courses that are designed to provide a reasonable and broad level of proficiency in the various chemistry disciplines, in addition to at least two advanced courses in the student’s chosen focus of research. Core courses may include Mechanistic Organic Chemistry, CHEM5537; Principles of Chemical Biology, CHEM5560; and Physical Chemistry: Principles and Applications, CHEM6676. First year students are required to take a year-long course, Scientific Communication in Chemistry. Advanced course selection will depend on the student’s research areas and are chosen in consultation with their research advisor. Every student is expected to attain a GPA of at least 3.0 at the end of his or her second semester in the Graduate School and to maintain it thereafter. If this standard is not met, the student may be required to withdraw from the graduate program.

At the end of the second year, Ph.D. candidates must pass an oral exam that stresses material from their own research specialty and other related areas. Members of the student’s thesis committee comprise the exam committee. Students who do not pass this exam will be asked to do one of the following: repeat the oral exam (for a final time), complete the requirements for a Master of Science (M.S.) degree, or withdraw from the program. Students choosing to complete the requirements for an M.S. degree must complete a minimum of 18 graduate credits of coursework and a thesis. Students typically accumulate 12 to 18 credits of coursework during the first year of study. The Comprehensive Examination for the M.S. degree is a private, oral defense of the student’s research thesis.

Graduate Curriculum

The curriculum is designed to stimulate intellectual exchange among students as well as faculty members and to train graduate students in communication skills. First-year course requirements provide students with a breadth of knowledge in the traditional fields: organic, chemical biology, physical chemistry, and inorganic chemistry. While a specific number of credits is not required for the Ph.D., students are encouraged to pursue a program of studies—with the approval of their advisor—that is consistent with their individual educational goals. An outline of the curriculum follows:

- Year 1: Coursework
- Year 2: Qualifying Exam
- Year 3/4: Student Department Seminar*
- Year 3/4: Original Proposal*

*Students are expected to complete these two requirements (Department Seminar and Original Proposal) before the end of Year 4, and complete at least one in Year 3.
The M.S. and Ph.D. degrees require a thesis based upon original research, either experimental or theoretical. For the Ph.D. candidate, a thesis project involving a sustained research effort (typically requiring 4–6 years) will begin usually during the second semester of study. An oral defense of the dissertation before a faculty thesis committee and a public presentation complete the degree requirements. Some teaching or equivalent educational experience is required. This requirement may be satisfied by at least one year of service as a teaching assistant or by suitable teaching duties. Arrangements are made with each student for a teaching program best suited to his/her overall program of studies. Waivers of teaching requirements may be granted under special circumstances with the approval of the Director of Graduate Studies or Department Chairperson.

M.S.T. Degree

The Master of Science in Teaching degree program is administered through the Lynch School of Education in cooperation with the Department of Chemistry and requires admission to graduate programs in both the Lynch School of Education and the Department of Chemistry. Although course requirements may vary depending upon the candidate’s prior teaching experience, all master’s programs leading to certification in secondary education include practical experiences in addition to course work. Students seeking certification in Massachusetts are required to pass the Massachusetts Educators Certification Test. For further information on the M.S.T. degree, please refer to the Lynch School of Education Graduate Programs section, Master's Programs in Secondary Teaching, or call the Office of Graduate Admissions, Lynch School, at 617-552-4214.

Classical Studies

Candidates must complete 30 credits of coursework at the graduate level, of which six may, with departmental permission, consist of a thesis tutorial. In addition, candidates must complete a departmental reading list of Latin and/or Greek authors, must demonstrate the ability to read a modern foreign language (usually French or German), and must pass comprehensive examinations. The examinations will be written and oral. The written portion includes translation from the authors on the reading list and an essay on one of the passages translated. The oral consists of discussion with the faculty about topics in the history and interpretation of Latin and/or Greek literature.

Incoming students can expect to find major Greek and Latin authors and genres taught on a regular basis. In Greek these include Homer, lyric poets, fifth-century dramatists (Aeschylus, Sophocles, Euripides, Aristophanes), the historians Herodotus and Thucydides, Plato, and fourth-century orators. In Latin they include Plautus and Terence, the late republican poets Catullus and Lucretius, Cicero, Augustan poetry (Virgil, Horace, Elegy, and Ovid), the historians Livy and Tacitus, and the novel.

Earth and Environmental Sciences

The department offers graduate courses and research programs leading to an M.S. in Geology or Geophysics and a Ph.D. in Earth and Environmental Sciences. Students are encouraged to obtain broad scientific backgrounds by taking courses in geology, geochemistry, geophysics, and environmental geosciences along with the other sciences and mathematics. Through this multidisciplinary approach, our program provides graduates with the credibility and interdisciplinary vision they need to advance careers in academia, government, and the private sector, as well as continued studies toward a Ph.D. for students in our M.S. track.

The department, with approximately 20 graduate students in residence, is housed in Devlin Hall and has additional research facilities at Weston Observatory. Students enjoy close working relationships with faculty while being able to undertake research using modern scientific equipment available. Both the M.S. and Ph.D. programs stress a strong background in the earth sciences, as well as the ability to carry out research.

Research in the department covers a broad range of topics, including: coastal and estuarine processes, sedimentology, geomorphology, earthquake and exploration seismology, tectonics, structural geology, igneous and metamorphic petrology, isotope geochemistry and geochronology, groundwater hydrology, oceanography, paleoclimatology and cryospheric change, marine biogeochemistry, and environmental geology and geophysics. Our students use state-of-the-art research techniques, including modern scientific equipment and instrumentation, performing field-based research across the globe in areas such as the Appalachians, western U.S., Europe, New Zealand, Australia, China, and Greenland, as well as at sea in the Atlantic, Pacific, and Arctic Oceans.
The department offers financial aid in the form of teaching and research assistantships.

**Doctor of Philosophy**

The doctoral program provides students with the tools they need to perform novel research in the earth and environmental sciences. The program provides our graduates with the disciplinary credibility and the interdisciplinary vision they need to advance careers in academia, government, and the private sector. Students combine course work with advanced research under the supervision a faculty advisor. The doctoral program assumes a basic undergraduate foundation in the geosciences. Students lacking such a background may be required to complete certain additional coursework before or during their graduate program. Ph.D. candidates are expected to have taken two semesters (or equivalent) of a college-level physics or chemistry course before admission, and must complete, or have completed, a minimum of two semesters of college-level calculus before completing their degree. Students are encouraged to obtain broad backgrounds by taking courses in geology, geophysics, and environmental geosciences along with the other sciences and mathematics.

**Application**

Applicants to the doctoral degree program are typically admitted to work under the guidance of a specific faculty advisor. Prospective students are thus encouraged to contact department faculty members during the application process to explore opportunities for thesis research projects. Upon entering the program students will determine a specific thesis topic in consultation with their advisor. Under certain circumstances students will be admitted to the graduate program without assignment to a thesis advisor. In this case, the student will pick their thesis topic and thesis advisor, with his or her approval, when they start the graduate program. Applicants to the Ph.D. program are expected to have a course background in geology, geophysics, and environmental geosciences along with the other sciences and mathematics before entering the program.

In addition to the normal application forms, applicants should submit transcripts, letters of recommendation, a personal statement of the strengths and weaknesses of their undergraduate education (including course and non-course experience), and their graduate study interests and current post-degree plans. Graduate Record Exam (general) scores are required. Applications from those applying for financial aid and assistantships for September should be completed by January 10, our recommended application target date. In exceptional circumstances, late applications will be considered.

**Ph.D. Degree Requirements**

Ph.D. students are required to complete the equivalent of 48 credit hours of graduate level course work beyond their bachelor's degree, of which 18 credit hours may be completed through Ph.D. thesis research courses. Students admitted to the Ph.D. program who have already earned a M.S. degree in an earth or environmental sciences related field may have up to 30 course credits approved from their prior graduate course work. All Ph.D. students will take an interdisciplinary course focused on Broader Impacts and Integrated Research. In addition, students must pass an oral qualifying examination by the end of their fourth semester and enter into candidacy by preparing and defending a thesis proposal within one year of passing their qualify exam. Finally, students must complete and defend a research-based thesis, of which one chapter must be devoted to the Broader Impacts of their work.

A summary of the regulations for graduate students in the Department of Earth and Environmental Sciences as well as information for enrolled and prospective graduate students can be found in the [Graduate Student Regulations and Procedures Handbook](updated annually).

**Master of Science**

The M.S. program includes coursework and a research-based thesis. The curriculum is flexible, and a program that is consistent with the student's background, and professional and research objectives, is developed by the student and his or her faculty advisory committee. Like the Ph.D. program, the M.S. program assumes a basic undergraduate foundation in the geosciences. Students lacking such a background may be required to complete certain subjects at the undergraduate level before or during their graduate program. Master's candidates in geology or geophysics are expected to have taken two semesters (or equivalent) of a college-level physics or chemistry course before admission, and must complete, or have completed, a minimum of two semesters of college-level calculus before completing their degree. Students are encouraged to obtain broad backgrounds by
taking courses in geology, geophysics, and environmental geosciences along with the other sciences and mathematics. Multidisciplinary preparation is particularly useful for students seeking future employment in industry.

The program stresses a strong background in the earth sciences, as well as the ability to carry out research. It prepares students for successful careers as geoscientists in the environmental consulting and engineering industries, natural resource exploration, government service, or for continued studies toward a Ph.D. A particularly beneficial aspect of the M.S. program is the opportunity for students to integrate studies in geology, geophysics, and environmental subjects.

Application

Applicants to the Master of Science degree program generally fall into one of the following categories: (1) students well-prepared in geology or geophysics with courses in mathematics, physics, chemistry, and/or biology who are interested in broadening their experience at the M.S. degree level before employment or doctoral studies elsewhere; (2) students well-prepared in mathematics or one of the natural sciences other than geology or geophysics and who wish to use the M.S. degree program to transfer into the earth sciences.

In addition to the normal application forms, applicants should submit transcripts, letters of recommendation, a personal statement of the strengths and weaknesses of their undergraduate education (including course and non-course experience), and their graduate study interests and current post-degree plans. Graduate Record Exam (general) scores are required. Applications from those applying for financial aid and assistantships for September should be completed by January 10, our recommended application target date. Later applications will be considered for financial aid if funding is available. Such applications may be made at any time, but, to be assured of consideration for September admission, they should be received by May 1.

M.S. Degree Requirements

No fixed curriculum is prescribed for the M.S. degree. Instead, a course and research program that is consistent with the student’s background and professional objectives are developed by the student and his or her faculty advisory committee. The graduate program assumes a basic undergraduate foundation in the geosciences. Students lacking such a background may be required to complete certain subjects at the undergraduate level before or during their graduate program. Master’s candidates in either Geology or Geophysics must complete or have completed two-semester (or equivalent) courses in physics or chemistry, and a two-semester, college-level calculus course.

A minimum of ten graduate-level courses, (numbered 3000 or above), approved by the student’s faculty advisory committee, must be completed in addition to a research thesis for graduation. Graduate level multidisciplinary Earth Systems Seminars are offered annually by the department on different topics. Beginning graduate students are required to take the Earth Systems Seminar. A maximum of two thesis courses (EESC8801) are allowed for M.S. thesis credit. Normally, no more than one Reading and Research course (EESC7798 or EESC7799) may be applied toward the minimum course requirement. All students are required to maintain at least a 3.0 average in their graduate courses, as well as in all undergraduate courses in the other sciences and mathematics. Passing a comprehensive oral examination is required of each student. A research thesis approved by two faculty members is also required of all M.S. students.

A summary of the regulations for graduate students in the Department of Earth and Environmental Sciences as well as information for enrolled and prospective graduate students can be found in the Graduate Student Regulations and Procedures Handbook (updated annually).

Dual Degree Program (M.S.-M.B.A.)

In conjunction with the Carroll Graduate School of Management at Boston College, the Department of Earth and Environmental Sciences offers interested students the opportunity to participate in the combined M.S.-M.B.A. degree program. Completion of this program leads to the awarding of both degrees. This program is excellent preparation for careers in industrial or financial geoscience management, including areas such as the environmental and petroleum industries, natural hazard assessment, and natural resource evaluation and investment.
The combined M.S.-M.B.A. program normally takes three years for students with a good science background as an undergraduate—about one year less than pursuing these two degrees independently. Students in this program commonly take their first year entirely within the Department of Earth and Environmental Sciences. During the first summer, the student is expected to begin work on a research M.S. thesis that may be combined with an off-campus internship. The second year of the program is taken at the Carroll Graduate School of Management and the third year is split between both programs. Corporate internships are encouraged.

In applying to the program, students have two options. The first and most desirable option is for the student to apply directly to, and be accepted by, both the Graduate School of the Morrissey College of Arts and Sciences and the Carroll Graduate School of Management at the time of their initial application to Boston College. The GRE is required and GMAT tests may be requested. Students may contact the Department of Earth and Environmental Sciences for information and application materials to both programs (indicate that you are interested in the Dual Degree Program). The deadline for admission to the Department of Earth and Environmental Sciences is January 10 for consideration for financial aid and assistantships, the same as the deadline for M.S. candidates. Applications to the Carroll Graduate School of Management are accepted on a rolling basis.

The second option is for students to apply and be accepted to the M.S. program in the Department of Earth and Environmental Sciences. During the spring of their first year, after consultation with their academic advisor, the student may then choose to apply to the Carroll Graduate School of Management for admission into the dual degree M.S.-M.B.A. program.

Further information on this program and application materials may be obtained from the Department of Earth and Environmental Sciences, Boston College, Chestnut Hill, MA 02467, 617-552-3640, or from Graduate Admissions, Carroll Graduate School of Management, Boston College, Chestnut Hill, MA 02467, 617-552-3920.

Master of Science in Teaching

The Master of Science in Teaching (M.S.T.) program is administered through the Lynch School of Education in cooperation with the Department of Earth and Environmental Sciences. It requires admission to both the Lynch School of Education and the Department of Earth and Environmental Sciences. This program, which is designed for prospective teachers, acknowledges variations in prior background and skills.

M.S.T. Degree Requirements

The five required courses in the earth sciences include Exploring the Earth and Earth Materials, and the following: (1) No more than four credits from Weather, Climate, and the Environment, Oceanography, or Astronomy; and (2) Eight credits from Petrology, Structural Geology or Advanced Structural Geology, Environmental Geology, Environmental Chemistry, Introduction to Geophysics or graduate courses (numbered 3000 or above). Students who have previously taken these courses may substitute other graduate courses within the Department of Earth and Environmental Sciences, with approval. One semester of full-time residency may be necessary. A comprehensive examination is given to each student at the end of the program. This examination is in two parts—one part is oral in the earth sciences, and the other part is given by the Lynch School of Education.

Cooperative Program

The Department is part of a cooperative program with the Department of Earth Sciences at nearby Boston University, as well as the Civil Engineering Department at Tufts University. This program permits degree candidates at Boston College to enroll in courses that are unavailable at Boston College but are available at Boston University or Tufts.

Weston Observatory

Weston Observatory is a geophysical research and science education center of the Department of Earth and Environmental Sciences at Boston College. It is located in Weston, Massachusetts about 10 miles west of BC's Chestnut Hill campus. The Observatory, which has been recording earthquakes since the 1930s, conducts basic research on earthquakes and related processes, provides public information after significant earthquakes occur, contributes to earthquake awareness to help reduce the tragic effects of earthquakes, and educates future generations of geophysicists, geologists, environmental geoscientists and
scientifically literate citizens. Seismic monitoring at Weston Observatory is part of a consortium of institutions that operate networks of seismographs throughout the Northeast United States and around the world. The facilities at Weston Observatory offer students a unique opportunity to work on research projects in geophysics and related research areas. For more information, visit the Observatory website: www.bc.edu/westonobservatory.

**Eastern, Slavic, and German Studies**

**Program Overview**

The Department administers three different Master of Arts degree programs—Linguistics, Russian, and Slavic Studies.

A B.A.-M.A. option is available for Boston College undergraduates.

**Graduate Admission**

For admission to M.A. candidacy in Russian or Slavic Studies, students must be able to demonstrate a working knowledge of the Russian language equivalent at the very least to the proficiency expected at the end of three years (advanced level) of college study. They must also be acquainted with the major facts of Russian literature and history.

Students applying in Linguistics, a program that stresses the interdisciplinary nature of linguistics (i.e., not restricted to Slavic topics), should have a good preparation in languages and some undergraduate level work in linguistics.

Russian, Slavic Studies, and Linguistics programs involve a significant proportion of work in other departments of the University, and candidates in these areas are expected to meet all prerequisites for such courses and seminars.

Students must also be prepared, in the course of studies, to deal with materials in various languages as required. Students with an undergraduate degree who require preparation for admission to the M.A. program may apply as special students. This mode of application is suited to those who are looking for post-undergraduate courses without enrolling in a formal degree program and for guests from other universities.

**Degree Requirements**

All M.A. programs require:

- a minimum of thirty credits in prescribed graduate-level course work
- qualifying and special field examinations
- a supervised research paper of publishable quality on an approved topic.

The grades for the qualifying examinations, special-field examinations, and the research paper are reported to the Office of Student Services as a single comprehensive examination grade. Comprehensive examination sectors are in written or oral format, depending on the nature of the subject matter.

The Department has exemption procedures to allow limited substitution of requirements. A student may apply up to six credits of advanced work from other universities or research institutes toward program requirements, provided this work has not been previously applied to an awarded degree.
Course Information

Courses numbered below 3000 do not normally apply for graduate degree credit but are open to interested graduate and special students.

Economics

Ph.D. Program

The graduate program in economics is designed for full-time students who are seeking a Ph.D. The program trains economists for careers in teaching, research, and the private sector by providing strong backgrounds in economic theory, quantitative research methods, and applied fields. Requirements include course work, comprehensive examinations, a thesis, and a one-year residence requirement. The course requirements consist of a first-year core curriculum and eight electives, for a total of 48 credits. The first-year program consists of core courses in Micro Theory (ECON7740–7741), Macro Theory (ECON7750–7751), Mathematics for Economists (ECON7720), Statistics (ECON7770), and Econometric Methods (ECON7772). The second year is devoted to electives. In addition to the Department’s own electives, students may take courses in the Carroll School of Management's Ph.D. program in Finance. All courses accepted for the degree are worth three credits, with the exception of the spring courses taken in the second semester of the first year: ECON7741, ECON7751, and ECON7772. These three courses are each worth four credits.

Students are required to pass written comprehensive examinations in micro theory, macro theory, and in two of the following fields: econometrics, industrial organization, international economics, international finance and macroeconomics, labor economics, advanced macro and monetary economics, public sector economics, advanced micro theory, and finance. Most exams are based on a two-course sequence on the subject matter. The micro and macro theory comprehensives are offered twice each year in late May and late August. Students take them immediately after the first year and begin to write field comprehensives at the end of the second year.

All students accepted to the program are offered financial aid including tuition remission. Students can expect continued financial support for five years as long as they meet all conditions and achieve satisfactory progress toward the Ph.D. More information about the Ph.D. program and financial aid opportunities can be found at the graduate program menu option at www.bc.edu/economics.

Admission Information

An online application for your convenience is located at the Graduate School of the Morrissey College of Arts and Sciences Admission website. Any questions regarding admission requirements should be directed to gbasinfo@bc.edu. For further information regarding the Ph.D. program, please contact Casey Eaton at casey.eaton@bc.edu.

English

Master of Arts Program

The Master of Arts in English degree is intended for students who wish to extend and consolidate their knowledge of the field before moving on to work at the Ph.D. level and for students aiming at careers in secondary education, publishing, or related fields that require advanced skills in critical thinking, research, and writing. Candidates pursuing the M.A. degree will be expected to complete courses granting at least 30 hours of graduate credit. Three of these course credits must be in a theory course (ordinarily thought of as a course primarily concerned with the study of texts in literary and/or cultural theory) from among the Department’s regular offerings, and three must be in the Introduction to Advanced Research course (or its equivalent). Students may devote up to six of the required 30 credits to independent work under the supervision of Department faculty, resulting in one or more longer papers. Students wishing to pursue this option should consult with the Program Director early in their graduate careers.
Students must also pass two examinations—a language and a comprehensive examination. The comprehensive exam requires students to demonstrate knowledge about literary periodization and to use close-reading skills. It is three hours in length, is offered in December and May, and must be taken no later than the fall semester of the second year of study.

The language exam is offered at the same time as the comprehensive examination and may be taken at any point in the student’s program. A wide range of languages will be accommodated for this requirement, and it may be waived if (1) the candidate supplies an undergraduate transcript showing two courses beyond beginning level in a foreign language with grades of B or above (taken within three years of entering the M.A. program), (2) the candidate successfully completes a 12-week intensive language course administered by the Graduate School of the Morrissey College of Arts and Sciences at Boston College, or its equivalent, or (3) the candidate has native-level proficiency and completed a university degree using that language.

**Master of Arts Concentration in Irish Literature and Culture**

The Master of Arts in Irish Literature and Culture degree offers English Department candidates the opportunity to design an interdisciplinary course of study drawing from a wide range of fields, including literature, Irish language, history, women's studies, American studies, fine arts, music, and cultural studies. Candidates seeking the degree must fulfill the course requirements of 30 credits within two years. At least 12 of these must be in Irish literature courses in the English Department, an additional three in an Irish Studies course offered by another University department, and at least six in Irish language. Remaining credits are taken as electives. To complete the degree candidates must pass an oral examination focusing on a specific period, genre, or theme they have chosen in consultation with members of the Irish Studies faculty. Students interested in pursuing the concentration in Irish Literature and Culture should register with Marjorie Howes at the beginning of their second year.

English faculty offering graduate courses in Irish Studies include Professors Marjorie Howes, Joseph Nugent, and James Smith. In addition, the distinguished visiting scholar holding the Burns Library Chair in Irish Studies will teach graduate courses in the program. For further information about the Irish Studies Program, please see the website at [www.bc.edu/irish](http://www.bc.edu/irish).

**Master of Arts in Teaching**

The Master of Arts in Teaching (M.A.T.) degree is administered through the Lynch School of Education and Human Development in cooperation with the Department of English. It requires admission to both the Lynch School of Education and Human Development and to the Department of English. Course requirements vary depending upon the candidate’s prior teaching experience; however, all master’s programs leading to certification in secondary education include practical experiences in addition to course work. Students seeking certification in Massachusetts are required to pass the Massachusetts Educators Certification Test. For further information on the M.A.T., please refer to Master’s Programs in Secondary Teaching in the Lynch School of Education and Human Development section of the University Catalog or call the Lynch School’s Office of Graduate Admissions at 617-552-4214.

**Graduate Assistantships and Teaching Fellowships**

Students in the first year of the M.A. program are eligible to receive financial aid in the form of tuition remission. Second year students are eligible for Teaching Fellowships and Teaching Assistantships conferring a stipend.

**Doctor of Philosophy Program**

Normally, no more than four students will be admitted to the doctoral program each year (one additional student is sometimes admitted on an Irish Studies fellowship, and there is additional support for diversity candidates and other exceptional students). The small number of students makes a flexible program possible, individually shaped to suit the interests and needs of each student.

All students accepted into the program receive stipends and tuition remission. Fellowships are renewed for five years as long as the student is making satisfactory progress toward completion of requirements for the degree.
Course Requirements

Three doctoral seminars are to be taken in consecutive semesters over the first two years of the program. The remainder of the student’s program may include other graduate courses in the English Department or related disciplines, small reading groups, or individual tutorials shaped around the candidate’s preparation for examinations. Ideally, students will have taken four to six courses in addition to the doctoral seminars by the end of the second year. A student-initiated pedagogy colloquium accompanies student teaching, and an advanced professionalization colloquium is taken in the third or fourth year.

Language Requirement

Students must demonstrate an ability to read two foreign languages or a working knowledge and application of one foreign language and its literature. The first alternative requires successful performance on two translation examinations in which a short text must be translated adequately (with use of a dictionary) in two hours. The second involves submitting a paper in which knowledge of the foreign language is used to work out a literary question or translating a substantial critical or literary text currently unavailable in English. Commonly, enrollment in language courses or in graduate electives on translation accompanies the completion of the assignment.

Examinations

Each student will direct a course of study toward completion of three examinations—a minor field exam by the end of the second year, a major field exam, and a dissertation prospectus exam.

The minor field examination normally runs one and one-half hours and may focus on an author, historical period, theoretical field, or genre. The major field examination is broader in scope and consists of a two-hour oral examination usually on a period or genre. The dissertation prospectus exam, two and one-half hours long, explores a topical area in which the dissertation is likely to take place. All examinations are graded according to the university scale for graduate examinations.

Prospectus, Dissertation, and Defense

After completing the dissertation prospectus exam, the student writes a prospectus in consultation with his or her dissertation director describing the dissertation topic and including a working bibliography. This prospectus will then be submitted to two additional faculty members who will also approve it. All dissertation committees will have at least three faculty readers (under special circumstances, a faculty member from outside BC may sit on the committee). Submission of the dissertation will be followed by an oral defense. Students are responsible for acquainting themselves with all university requirements, fees, and deadlines pertinent to dissertation submission and graduation. This information can be obtained from the English Department office or from the Graduate School of the Morrissey College of Arts and Sciences Dean's office.

Teaching

As part of their program, Ph.D. students engage in a carefully organized sequence of teaching experiences. In the second year, students spend one semester assisting in a course taught by a faculty member. In the third and fourth years, students teach four independently taught courses—at least one semester of First-Year Writing Seminar, a self-designed elective in the student’s own field, and two more courses selected to provide the best range of teaching experience for each individual student. Faculty mentoring is a part of every phase of this program.

Graduate Colloquium

A student committee composed of M.A. and Ph.D. candidates organizes and schedules graduate colloquia, at which faculty members, outside speakers, or students lead discussions on literary topics. In alternate years, the spring colloquium will be a full-day graduate conference. All graduate students and faculty are strongly encouraged to attend.
Good Standing

Candidates for the degree are expected to remain in good standing in accordance with department guidelines set out for the timely completion of the degree. Continued financial support and participation in the program depends on maintaining good standing.

History

Boston College’s History Department attracts talented graduate students from around the nation and around the world. We offer M.A. and Ph.D. degrees with training in a number of regional and thematic specialties. For the master’s degree in teaching (M.A.T.) program administered by the Lynch School of Education and Human Development see M.A. Programs in that section.

Doctor of Philosophy in History

The Ph.D. degree is offered with concentrations in United States, medieval, early modern European, modern European (including British/Irish/British Empire), and Asian history. The department also offers course work in African, Middle Eastern, and Latin American history, as well as a number of global and comparative fields, including imperial history, the history of the Atlantic world, religious history, and international history. During the first semester of full-time study, doctoral students choose a faculty advisor, who oversees the student’s progress in preparing for comprehensive exams and in developing a dissertation topic.

The Ph.D. is a research degree and requires special commitment and skills. While the degree is not granted for routine adherence to certain regulations, or for the successful completion of a specified number of courses, there are certain basic requirements.

Course and Residency Requirements: Students entering directly into the Ph.D. program are required to complete 39 credits, 36 of which are taken prior to comprehensive exams. All students in the Ph.D. program are required to pursue two semesters of full-time study during the first year and must, in the course of their studies, complete at least two seminars and at least two colloquia (one in the major and one in a minor area).

Plan of Study: By the conclusion of the first semester, and after full consultation with their professors and the Director of Graduate Studies, students file a plan of study leading to the comprehensive examination. This plan of study consists of three areas of concentration. Usually faculty require that students take at least some formal coursework in each field and expect students to develop and master a reading list of important books and articles. With the approval of the advisor and the Director of Graduate Studies students may select a discipline related to History or a topic within that cuts across traditional geographical or chronological boundaries. When considered necessary to a student’s program, the department may require advanced-level work in a related discipline, either as a minor field or as supplemental work. This plan of study may be reviewed, evaluated and revised whenever necessary. However, changes must be approved by the faculty advisor and the Director of Graduate Studies.

Language Requirement: Ph.D. candidates, with the exception of medievalists, must pass two language exams. Students concentrating in United States history may substitute competency in a field of particular methodological or theoretical relevance to their program of study for competency in a second foreign language. To do so, students must petition the Graduate Committee for the substitution and explain the nature of the field and its importance to the plan of study, particularly the dissertation. The student’s faculty advisor certifies that the student has acquired the appropriate skills and knowledge. Medievalists must pass three language exams, one of which must be Latin or Greek.

The Comprehensive Exam: The student’s oral comprehensive examination will be conducted by an examining board composed of three faculty members. A written examination may be substituted for an oral exam at the joint discretion of the student and the student’s committee.

The Dissertation: Students must have a dissertation topic before taking and passing comprehensive exams. The last six credits earned for the degree, taken after the comprehensive exams, will be focused explicitly on the dissertation. These should include the Dissertation Seminar. Dissertation proposals, written in the Dissertation Seminar, must be approved by the student’s dissertation committee, consisting of three faculty, one of them designated as advisor. Proposals must be completed by the end of the semester following the passing of comprehensive exams and filed with the department. The completed dissertation must be
approved by a committee of three readers—the faculty advisor and two other faculty members—and approved by the Director of Graduate Studies. It must also be defended at a public oral defense.

**Master of Arts Programs**

The M.A. degree in History is offered with concentrations in early modern European, Latin American, medieval, modern European (encompassing British, Irish, and continental European), international and global history, and United States history. The department also offers coursework in African, Middle Eastern, and Asian history. The Master of Arts in Teaching (M.A.T.) program for secondary school History teachers is administered by the Lynch School of Education and Human Development. It requires admission to both the Lynch School of Education and Human Development and to the Department of History. For further information on the M.A.T., please refer to the Lynch section on Master’s Programs in Secondary Teaching or call the Lynch School of Education and Human Development, Graduate Admissions Office, at (617) 552-4214.

**Requirements:** The M.A. degree in History requires 30 graduate credits, a distribution requirement for each particular program, and an oral comprehensive examination. Students are not allowed to complete the M.A. program by attending only summer sessions, but are required to take a total of at least four courses (12 credits) during the regular academic year.

**Plan of Study:** All candidates for the M.A. in History are encouraged to pursue an individual course of study developed in conjunction with their faculty advisor and selected by the student during the first year in the program. In making their selection of courses and seminars, students are urged to widen their chronological and cultural horizons while deepening and specifying one special area of concentration.

Students must choose a major and minor field. As many as seven courses (21 credits) can be taken in the major field. Major fields for the M.A. include early modern European, Latin American, medieval, modern European (encompassing British, Irish, and continental European), and United States history.

The minor field is made up of a minimum of three courses (nine credits), at least one of which must be a graduate level course. Minor fields can be chosen from the same list of major fields or can be more conceptual or historiographical. Such fields, for example, could include a field in economic, social, or labor history; or could concern race or gender. We now offer a minor field in archival management or cultural heritage/public history, in cooperation with the Simmons College Graduate School of Library and Information Science (see our website for further information). Minor fields must be approved by the Director of Graduate Studies.

Students whose prior academic preparation warrants an exception to the above requirements may, with the consent of their faculty advisor, request permission to substitute a different proportion or variety of courses and areas than those generally required. The opportunity for study in a major or minor area is open to the extent that the department offers sufficient courses in the student’s area of interest.

Students may study in departments outside History, and, with the permission of the Graduate Committee, a candidate whose advisor so recommends may earn as many as six credits in Classics, Economics, English, Political Science, Sociology, or other related disciplines. Graduate credits earned in a related discipline will be included in the distribution requirements for the appropriate area.

In addition to the general requirements for the M.A. degree, students in the History program are required to complete a seminar in their major area.

**Language Requirement:** Master’s candidates must pass a foreign language reading examination, ordinarily in French, German, or Spanish. Another foreign language, when relevant to the research of the student, may be substituted with permission of the Graduate Committee.

**Exam and Thesis:** Students must complete a comprehensive exercise. This can take one of three forms:

1. An oral comprehensive exam administered by the student’s advisor and a faculty member from the minor area;
Applications to the M.A. and Ph.D. Programs

The deadline for applications to the Ph.D. programs in history is January 2 and the deadline for applications to the M.A. program is February 1. Ph.D. and M.A. applicants must submit GRE general scores (the GRE in History is not required), official undergraduate and graduate transcripts, at least three letters of recommendation, a statement of purpose emphasizing intellectual interests, a writing sample (a paper written for a recent course or one written expressly for the application), and all the application forms.

Funding

The History Department has a highly competitive Ph.D. program, but one which guarantees five years of funding to all incoming Ph.D. students contingent upon satisfactory academic performance and progress towards the degree, as well as satisfactory performance in teaching as evaluated by the faculty of the Department of History.

Students interested in the Doctoral or Master’s programs should write to:

Director of Graduate Studies

History Department

Boston College

Chestnut Hill, MA 02467

E-mail: anastasia.macherides@bc.edu

Islamic Civilization and Societies

The graduate program in Middle Eastern Studies offers an interdepartmental, interdisciplinary curriculum designed for students who wish to acquire a broad background in Middle Eastern history, cultures, and politics. The program seeks to prepare candidates for a variety of post-graduate opportunities in diplomacy, human rights, government and public service, business, media, non-governmental organizations, and cultural institutions in the United States and abroad. Master’s students contribute to the intellectual life of the Boston College community and are encouraged to participate in colloquia and conversations across the University.

The master’s program in Middle Eastern Studies (MES) offers two areas of focus: (1) Politics and International Relations and (2) Religion, Culture, and Society. Students have considerable flexibility in designing their programs of study and have access to the resources of all relevant departments, such as Art, Art History, and Film, Music, History, Near Eastern Languages and Literatures, Political Science, Theology, and other departments of the University. In addition to the wide range of courses offered within the MES program, students have the opportunity to utilize the resources of the outstanding network of scholars in the Boston area, including those of our Boston Area Consortium partners at Boston University, Tufts University, and Brandeis University.
The Middle Eastern Studies program admits about 10 students a year, a number small enough to allow for personal attention, close contacts with the faculty, and an environment of collegiality, as well as small class size. Graduate students are encouraged to attend extra-curricular events, such as our Distinguished Lecture Series, alumni networking workshops, and informal discussions. Program faculty, with the assistance of the Office of International Programs, will direct students toward opportunities for language immersion, internships abroad, and other invaluable opportunities for professional development outside the classroom.

Mathematics

The Department of Mathematics offers programs leading to: (1) the Doctor of Philosophy (Ph.D.) degree in mathematics; to (2) the Master of Science in Teaching (M.S.T.) degree in education, in conjunction with the Lynch School of Education and Human Development.

Ph.D. Degree Requirements

The requirements for the Ph.D. fall into five categories: coursework, examinations (Preliminary, Language, and Comprehensive), teaching, a dissertation, and a residency requirement of two consecutive semesters with full-time registration.

Coursework: Students must complete at least 50 credit hours at the graduate level, including the first-year core curriculum, and receive a grade of B- or higher in at least 44 of these. The first-year program consists of core courses in Algebra (MATH8806, MATH8807), Geometry/Topology (MATH8808, MATH8809), Real Analysis (MATH8810), Complex Analysis (MATH8811), Graduate Teaching Seminar (MATH8890), and Graduate Research Seminar (MATH8892). The second year is devoted to electives. Students with prior comparable coursework may be exempted from one or more of the first-year graduate courses, upon approval of the Assistant Chair for Graduate Programs. Up to 18 credit hours of the coursework requirement may be waived for students with prior graduate work, upon approval of the Assistant Chair for Graduate Programs.

Examinations: There are three types of examinations: Preliminary, Language, and Comprehensive.

Preliminary: All students must take preliminary exams in two of the three following subjects: Real and Complex Analysis; Algebra; Geometry and Topology. These exams cover the material in the core first-year courses and are typically taken at the end of May following the first year. They may also be taken by advanced entering first year students at the start of the academic year and by second year students who have not already passed all their preliminary exams in mid-year. Preliminary exams are graded as follows: Ph.D. pass, M.A. pass, or fail. Students are strongly encouraged to complete two preliminary examinations at the Ph.D. pass level by the start of their second year. The following two rules apply: (1) Students may re-take each preliminary exam once. (2) Students must pass two preliminary examinations at the Ph.D. pass level by the middle of their second year in order to continue in the program after their second year. Exceptions to these two rules require the approval of the Chair, who will consult the Assistant Chair for Graduate Programs and the student's instructors before arriving at a decision. Exceptions will be granted when there is clear evidence of potential to complete a degree in a timely way or for special circumstances such as extended illness. A student with advanced preparation may choose to take one or more of the preliminary examinations immediately upon entering Boston College. In such a case, the examination would not count as one of the student's two attempts, and failure of the examination would have no negative consequences. Students who wish to take an examination upon entrance should notify the Assistant Chair for Graduate Programs in writing by mid-July that they intend to do so.

Language: This exam consists of translating mathematics from French or German into English. The student will select, in consultation with their Ph.D. advisor, a book or substantial article in the chosen language and will be asked to translate passages from it with the aid of a dictionary.

Doctoral Comprehensive: After passing the preliminary exams at the Ph.D. level, the student requests that a department faculty member (tenured or tenure-track) serves as his/her research advisor. Upon agreement of the faculty member, the student, in consultation with the research advisor, forms a Comprehensive Examination Committee, consisting of the research advisor and at least two other members. Two members must be from Boston College; the chair must be a tenured or tenure-track member of the departmental faculty. Committee composition is subject to departmental approval. The comprehensive exam can be taken any time after the Comprehensive Examination Committee has been chosen. We recommend that it be taken as soon as possible, to allow time for dissertation research. The doctoral comprehensive exam consists of a research topic and one secondary topic, chosen by the student in consultation with the student’s Committee. Typically, these are based on topics courses or independent study completed by the student in the second and third years. The comprehensive exam has both a written and an oral
In the written part the student is given a week to solve problems or answer questions in the chosen areas. The Committee then reads the student's work and questions the student about it in the oral exam, which may range into related areas. After the oral exam the Committee grades the entire comprehensive exam as Pass with Distinction, Pass, or Fail. A student who fails the comprehensive exam may take it one additional time but not sooner than the following semester.

Teaching: In addition to their responsibilities as teaching assistants and teaching fellows, students participate in the required Graduate Teaching Seminar in the fall semester of their first two years. The first-year teaching seminar is for teaching assistants, covering their responsibilities both to their students and their supervisors and providing guidance on leading a classroom for the first time. The second-year teaching seminar is for teaching fellows, providing guidance for teaching their own classes.

Dissertation: Upon satisfactory performance on the Language and Doctoral Comprehensive Examinations, the student is eligible to be admitted to candidacy for the Ph.D. To be admitted, the student formally constitutes a Dissertation Committee which is then approved by the Assistant Chair for Graduate Programs. The Comprehensive Examination Committee will typically become the student's Dissertation Committee; any changes of membership require the department’s approval. At this point the student begins research for the doctoral dissertation. The dissertation must consist of original scholarly work. The Dissertation Committee will read and evaluate the completed dissertation and conduct an oral examination, at which the dissertation is defended in a public meeting. The dissertation is accepted when endorsed on the official title page by the Dissertation Committee after the oral examination. After ensuring that the format of the accepted dissertation conforms to Boston College requirements, the student submits the dissertation to the University.

Qualified students accepted to the program are offered financial aid stipends and tuition remission. It is anticipated that support will be provided for five years of study, given reasonable progress toward the degree and acceptable performance of Teaching Assistant/Fellow duties.

More information about the Ph.D. program can be found at the graduate program menu option at [www.bc.edu/math](http://www.bc.edu/math).

Master of Arts Degree

Students enrolled in the Ph.D. program who receive at least an M.A. pass in two of the three preliminary exams and pass at least 30 credits of mathematics graduate courses, including at least five semesters of the first-year graduate courses in Real and Complex Analysis, Algebra, and Geometry/Topology, will receive an M.A. degree. Advanced undergraduate courses may count towards the 30 credits in meeting the M.A. requirements with the permission of the Assistant Chair for Graduate Programs. Students who skip a first-year course because of advanced preparation may substitute more advanced courses in any area, with the permission of the Assistant Chair for Graduate Programs. A student may receive an M.A. and continue on to a Ph.D. provided the student meets the Ph.D. requirements above.

Master of Science in Teaching Program

The Master of Science in Teaching (M.S.T.) program is administered through the Lynch School of Education and Human Development in cooperation with the Department of Mathematics. Application for the program is made to the Lynch School, and students must be accepted by the Lynch School and approved by the Department of Mathematics.

This program is designed either for experienced teachers or for prospective teachers. It is a two-year program that consists of 46 credits, of which 31 are in Education and 15 are in Mathematics. All master’s programs leading to certification in secondary education include practical experiences in addition to coursework. Students seeking certification in Massachusetts are required to pass the Massachusetts Educators Certification Test. Degree candidates draw up an overall plan of study with joint advisement from the Assistant Chair for Graduate Programs in Mathematics and the advisor for the M.S.T. program in the Lynch School. For further information on the M.S.T., refer to the Master’s Programs in Secondary Teaching in the Lynch School section of the University Catalog or call the Office of Graduate Admissions, Lynch School, at 617-552-4214.

Of the 15 credits which comprise the mathematics component of the M.S.T., candidates are required to complete MATH8810–8811 Real and Complex Analysis, which should be completed in the first year. The other credits must be earned in MATH courses at or above the 4000-level. Because of certification requirements, unless approved equivalents have been taken previously, these required courses should include the following:
Some exposure to the use of computers in mathematics that may be accomplished by any Computer Science major course beyond Computer Science I.

Other courses particularly well-suited for this program are MATH4430 Number Theory and MATH4475 History of Mathematics. M.S.T. candidates must also pass an oral comprehensive examination and submit a brief expository paper in some area of mathematics.

Philosophy

The Department of Philosophy offers M.A. and Ph.D. programs. These programs provide a strong emphasis on the history of philosophy (ancient, medieval, modern, and contemporary), and a special focus on Continental philosophy from Kant to the present. Faculty also teach and conduct research in metaphysics, philosophy of science, philosophy of religion, ethics, aesthetics, and social and political philosophy. Students have considerable flexibility in designing programs of study and have access to the resources of Political Science, Theology, and other departments. If a desired course is not offered, it may be possible to arrange a Readings and Research course on the desired topic (consult with the appropriate professor). The department also participates in a joint M.A. Program in Philosophy and Theology, and a Law and Philosophy Dual Degree Program (see below).

Admission to the doctoral program is highly selective (about five admitted each year from over 150 applicants). Doctoral studies are funded for five years (four for students who already have an M.A. when they enter the program) in the form of tuition remission, Research Assistantship and Teaching Fellowship, and a University Fellowship in the last year for the writing of the dissertation free of any other duty. Doctoral students are expected to pursue the degree on a full-time basis and to maintain satisfactory progress toward the completion of degree requirements.

The M.A. program may be taken on a full-time (two years) or part-time basis (five years maximum). Financial aid and tuition remission are not normally available for students seeking the M.A.

All applicants must submit the results of the Graduate Record Examination. Students who speak a native language other than English must provide evidence of English proficiency. A score of 100 or higher on the TOEFL iBT test or 7.0 or higher on the IELTS test is required. TOEFL and IELTS scores are considered valid from exams taken a maximum of two years prior to application program deadlines.

For more information on the programs, please consult our website at www.bc.edu/philosophy.

M.A. Program Requirements

Requirements for the M.A. are as follows:

- Ten courses (30 credits)
- Proficiency in one foreign language
- Qualifying research paper

It is possible, though not common, for students to write an M.A. thesis in place of two courses (six credits).
Ph.D. Program Requirements

Requirements for the Ph.D. are as follows:

- One year of full-time residence
- Sixteen courses (48 credits)
- Proficiency in logic (tested by course or by examination)
- Proficiency in two foreign languages
- One hour and fifteen minute oral Preliminary comprehensive examination
- Doctoral comprehensive examination
- Dissertation
- Oral defense of the dissertation
- Students entering the program with an M.A. in philosophy may be credited with six courses (18 credits) toward the Ph.D.

The Preliminary comprehensive exam is a one hour and fifteen minute oral examination on a reading list in the history of philosophy, and it is to be taken at the end of the student’s first year. The Doctoral comprehensive exam has two components: writing and oral defense of a qualifying paper; submission and oral defense of a dissertation prospectus. They are to be taken respectively in the first and the second semester of the student’s fourth year (third year, for students entering the program with the M.A. degree in hand).

Joint M.A. Program in Philosophy and Theology

This M.A. program is administered jointly between the Philosophy and Theology departments and is structured around distinct concentrations addressing major areas of common concern, such as faith and science, philosophy and religion, foundations in Philosophy and Theology, and Medieval Philosophy and Theology. The degree program has two directors representing each department. Students develop a program of study in discussion with an academic advisor and take courses in the standard graduate programs offered by the Philosophy and Theology departments.

Law and Philosophy Dual Degree Program

These programs are designed for students who have an interest in philosophy of law, legal theory and jurisprudence, and who may eventually wish to go into legal practice or teaching in those fields. Students may complete their master’s in philosophy and law degree in four years of joint study or Ph.D. and law degree in seven. Students must apply to both Boston College Law School and master’s or Ph.D. program in Boston College Philosophy Department and be admitted in both.

The Lonergan Institute

Studies related to the work of Jesuit theologian and philosopher Bernard Lonergan (1904–1984) are sponsored by the Lonergan Institute at Boston College. The Institute supports the renowned Lonergan Workshop and other conferences, scholarship assistance, and operates the Lonergan Center, a center for research with an extensive collection of published and unpublished works. For more information, refer to the Research Centers in the About Boston College section of this catalog or to the website: www.bc.edu/lonergan.

Physics

The Department offers comprehensive programs of study and research leading to the degrees of Doctor of Philosophy (Ph.D.), as well as Master of Science (M.S.) and Master of Science in Teaching (M.S.T.) in conjunction with the Lynch School of Education and Human Development. Courses emphasize a strong foundation in the basic principles of physics, preparing the student to undertake advanced research under the supervision of a faculty advisor. Graduate students are encouraged not only to
collaborate closely with their research advisor, but also to draw upon the experience of the entire faculty and other graduate students. Our students are trained primarily to carry out independent research at the Ph.D. level, and our graduates have gone on to successful careers in many areas.

**Doctoral Programs**

A student enters the doctoral program upon faculty recommendation after passing the Doctoral Comprehensive Examination and the Research Proposal Examination. Upon entering the doctoral program, each student shall select a field of specialization and establish a working relationship with a member of the faculty. With the approval of a faculty member, who normally shall be the principal advisor, the student shall inform the chairperson of his/her major field selection and the chairperson shall appoint a faculty Doctoral Committee consisting of at least two full-time faculty members to advise and direct the student through the remainder of his or her graduate studies.

**Requirements**

Required courses for the doctorate are several in the fundamental areas of classical and quantum physics, a graduate seminar, plus four additional courses in distinct areas outside the student’s research specialty chosen from the graduate electives of the department or from other graduate departments with the approval of the chairperson. Two courses in condensed matter physics are strongly recommended as two of these four courses.

Some teaching or equivalent educational experience is required. This requirement may be satisfied by at least one year of service as a teaching assistant or by suitable teaching duties. Arrangements are made with each student for a teaching program best suited to his or her overall program of studies.

**Comprehensive Examination**

The comprehensive examination is a written exam that covers all of physics that a physics graduate student can be expected to know at the end of one year of formal course work in the curriculum; however, it will stress classical mechanics, electromagnetism, quantum mechanics, and statistical physics. The examination is prepared and administered by a faculty committee, appointed by the Chairperson, and the examination is evaluated by this committee with approval of the faculty of the department.

The examination is offered twice a year, the week before the beginning of each semester. The student must pass one of two possible attempts in order to continue in the graduate program before the end of their second year. A student, who fails the first attempt, must make their second attempt the next time the exam is offered. The first attempt would typically be a fall exam taken a week before the beginning of the student's second fall semester. If unsuccessful, the second try would be a spring exam, one week before the beginning of their second spring semester. Exceptionally well-prepared and qualified students can make the first attempt of the exam either by arriving one week early to take a fall exam or taking a spring exam during their first year. A student choosing to do this who does not pass their first attempt must take the comprehensive examination before the next semester begins.

**Research Proposal Examination**

Within one year of passing the comprehensive examination, a student shall take the Research Proposal Exam (RPE). The purpose of this oral examination is for the student to assimilate work done in an area of research and to define a research project that addresses one or more open important questions in this area. The RPE will be a 40 minute, public presentation followed by 20 minute of questions by the exam committee in private. The proposal should include a detailed explanation for how it proposes to address the open questions and preferably include preliminary results. The topic of the RPE will be chosen by the graduate student’s research advisor and will not necessarily be the student’s ultimate thesis topic. The questions will not be restricted to the RPE topic but will also require the student to demonstrate some breadth. The examination will be evaluated by a committee prepared by the student’s doctoral thesis advisor and will consist of at least two additional department faculty. The student will have at most two opportunities to pass this exam. Those who do not pass the RPE on the first try must make a second attempt within six months of this time. Students will not advance to Ph.D. candidacy without passing the RPE, and after two unsuccessful attempts will not receive additional TA support from the department.
Thesis Defense

Upon the student’s passing performance of the RPE, the Chairperson shall recommend to the dean the appointment of a doctoral thesis committee consisting of the student’s advisor who will chair the committee and at least three tenure track faculty members, with at least two from the physics department. The committee will read and evaluate the completed thesis and conduct an open meeting at which the thesis is defended in an oral examination. The thesis is accepted when endorsed on the official title page by the Doctoral Thesis Committee after the oral examination.

Admissions Information

Support for qualified students is available in the form of teaching assistantships. Research assistantships are also available during the summer and academic year, depending on research area and the extent of current funding. Students are required to take the GRE Aptitude Test and Advanced Test and to have the scores submitted as part of their application. Students whose native language is not English must take the TOEFL exam.

General Information

Waivers of departmental requirements, if not in violation of graduate school requirements, may be granted by recommendation of the Graduate Affairs Committee with approval of the Chairperson. Students with an advanced level of physics preparation are encouraged to take the Doctoral Comprehensive Examination upon arrival thereby accelerating their progress in the program.

Research Information

The Physics Department is strongly research oriented with faculty involved in both experimental and theoretical areas. The department is one of the strongest in materials and optics research, of both fundamental and applied topics using cutting-edge facilities. Some areas of current interest are in the condensed matter physics areas of superconductivity, photovoltaics, thermoelectrics, nanomaterials, plasmonics, plasmas, topological states, 2D atomic crystals, and other strongly correlated electron systems. Cutting-edge research facilities are available to our graduate students including: Scanning Tunneling Microscopy (STM); thin film growth; Angle Resolved PhotoEmission Spectroscopy (ARPES); Raman and Infrared microscopy; low temperature and high magnetic field Seebeck; thermal and electrical conductivity; Near-Field Scanning Optical Microscopy (NSOM/A-NSOM); x-ray; NMR; materials/nano-materials; (Clean Room) preparation laboratories; graduate and undergraduate computational facilities; and access to the University computing system.

The Department of Physics is constantly enhancing and supplementing these facilities. In addition, the Department has developed strong ties to many outside facilities, including Los Alamos National Laboratory, Argonne National Laboratory, the Institute for Complex Adaptive Matter (ICAM), Brookhaven National Laboratory, the Naval Research Laboratory, and the National High Magnetic Field Laboratory. Boston College’s participation in the Boston Area Graduate School Consortium enables students to cross-register for graduate courses at Boston University, Brandeis University, and Tufts University. Students wishing more detailed information can write to the Physics Department or visit www.bc.edu/physics.

Political Science

The department offers advanced study in American Politics, Comparative Politics, International Relations, and Political Philosophy. It displays a distinctive blend of philosophical and practical concerns within a tradition of friendly debate and scholarly exchange. Seminars and courses are supplemented by individual readings and informal gatherings. Both the master’s and doctoral programs are flexible as to fields and courses, and they allow students to study in other Boston College departments. Graduate students in the Graduate School of the Morrissey College of Arts and Sciences are eligible to cross-register for one graduate course per semester during the academic year at Boston University, Tufts University (not at the Fletcher School of Law and Diplomacy) and at Brandeis University with the approval of the Graduate Director or the Master’s Program Director.
Masters of Arts Degree

The master's program is a two-year program. Students are required to take ten courses (30 credits) with at least one course taken in three of the department's four fields (American Politics, Comparative Politics, International Politics, and Political Theory). The passing of a written comprehensive examination completes the requirements of the program. A student is allowed to take two or, with permission, three courses in other Boston College departments, and may also receive credit for two courses by writing a thesis. If a student chooses to write a thesis, the comprehensive examination is waived. In lieu of a thesis or a comprehensive examination, students also have the option of taking Advanced Directive Study (ADS) with a supervising faculty member. An ADS is a focused final paper project that is based on a paper that a student has already written in a seminar.

Doctor of Philosophy Degree

Fourteen courses (42 credits) are required for students entering the program with no previous graduate work. Students generally take three courses a semester. Of the 14 courses, three may be in independent study and two (not more than one a semester) in non-graduate courses. This latter option is usually appropriate only when needed to offset a deficiency in a student's undergraduate background in a field. Generally, graduate students taking non-graduate courses are required to do additional work beyond the requirements set for undergraduates in those courses.

Admissions

An undergraduate major in political science is preferred, but not required. Applicants must demonstrate both past performance of exceptional quality in their academic work and promise of sustained excellence in the future. Three letters of recommendation must be submitted at the time of application, in addition to the transcripts and results of the Graduate Record Examination. The Department requires the general GRE test, a Statement of Purpose, and a sample of scholarly work, such as a term paper.

- Completed applications for the Ph.D. program should be submitted by January 2.
- Completed applications for the M.A. program should be submitted by February 1.

Financial Aid

The Department is usually able to provide financial support to our doctoral students for a period of four to five years, pending satisfactory performance. This financial support to our doctoral students consists of a service stipend and full tuition remission during the period that the doctoral student is funded. The service stipend is compensation for twelve to fifteen hours per week of research assistance or teaching assistance to members of the faculty or teaching assistance in undergraduate courses. Each year the Department also awards a Thomas P. O'Neill, Jr. Fellowship to one student in American politics in honor of the late Speaker of the House.

Psychology and Neuroscience

The Department of Psychology and Neuroscience at Boston College offers two graduate programs, all research-oriented: a doctoral (Ph.D.) program and a Fifth Year M.A. program. Completion of the doctoral program typically requires four to five years of training after the bachelor's degree. Completion of the Fifth Year M.A. program requires one consecutive year beyond the B.A. or B.S.

The Ph.D. program requires that students devote 100 percent of their time and effort to their studies, including summers. Students are admitted whose interests fall within or bridge one or more of our five areas of concentration, listed below. Our program requires adequate preparation, ability, maturity, and motivation to pursue a demanding program of individual research and scholarship. Because of our emphasis on research and on a mentoring relationship with one member of the faculty, a principal criterion for admission to our graduate programs is that a student's interests be compatible with those of at least one member of the faculty. Each student is admitted to work with a faculty member as his/her advisor.
The Fifth Year M.A. program is limited to students who are majoring in Psychology or Neuroscience at Boston College. The program is designed to allow selected students to earn both a B.A. or B.S. and an M.A. in Psychology in five years. The purpose of the program is to allow students a greater opportunity for concentrated study and research training. Such training is excellent preparation for application to a Ph.D. program in any area of psychology. Undergraduate Psychology and Neuroscience majors may apply to continue their studies and to earn an M.A. with the equivalent of another, consecutive year of full-time study.

The areas of concentration in the Department of Psychology and Neuroscience:

- Behavioral Neuroscience
- Cognitive Neuroscience
- Developmental Psychology
- Quantitative and Computational Psychology
- Social Psychology

Visit the department's website at [www.bc.edu/psychology](http://www.bc.edu/psychology) for additional information on these areas.

**General Information**

Visit the department’s website at [www.bc.edu/psychology](http://www.bc.edu/psychology) and find detailed information about the research interests of individual faculty members and the requirements for completing the program. For application materials or further information, visit the [Graduate School of the Morrissey College of Arts and Sciences Admission](http://www.bc.edu) website.

The deadline for applications to the Ph.D. program is December 15. Applications are accepted for fall term admissions only. Applicants should submit:

- Application form
- Official transcripts
- GRE and (optionally) GRE Psychology subject scores
- Three letters of recommendation
- Statement of research interests
- Application Fee

The deadline for applications to the Fifth Year M.A. program is February 1 of the student’s junior year. Applicants should submit:

- Application form
- Official transcripts
- Two letters of recommendation
- Statement of research interests

**Romance Languages and Literatures**

**The M.A. Programs**

The Department includes the fields of French and Francophone, Italian, and Hispanic (Peninsular and Spanish American) literatures and cultures. The Master of Arts degree is offered in French, Italian, and Hispanic Studies. The degree is meant to prepare students to enter doctoral programs, to teach one of the Romance languages, or to take up professional positions in other fields, such as general education, business, or publishing.
Deadlines and Prerequisites for Admission

The M.A. application is due on February 1. Students applying for admission to graduate degree programs in the Romance literatures must satisfy the following prerequisites: (1) a general coverage of their major literature at the undergraduate level; (2) a formal survey course or a sufficient number of courses more limited in scope; (3) at least four semesters of advanced work in period or general courses in the major literature. There is no GRE requirement for M.A. candidates. For complete information concerning the graduate programs, visit the Master of Arts Degree in French, Hispanic, or Italian Literature and Culture page.

Master of Arts Degree in French, Hispanic, or Italian Literature and Culture

- Thirty-one credits (i.e., ten courses) which includes ten RLL courses and the one-credit Professional and Pedagogical Seminar
- Completion of the Independent Research Project
- Graduate students must take whatever graduate courses are offered in their language section before they will be allowed to take courses in other language sections in the department, outside of the department, or another school within the Graduate Consortium.
- In any given semester, if their language section does not offer sufficient graduate courses, students may obtain credit by taking a graduate course in another section of the department or in another Boston College department, or in a graduate seminar taught in the target language at Boston University.
- Graduate students can only earn credit for graduate-level courses ("mixed level" courses open to both graduates and undergraduates are included in this category).
- Distribution Requirement in French: Each French student should endeavor to take at least one course from as many different areas of the curriculum as possible (Early Modern, nineteenth century, twentieth century, Francophone). The fulfillment of the Distribution Requirement is to be overseen and verified by the Faculty Advisor.
- Distribution Requirement in Hispanic Studies: Hispanic Studies students must take a minimum of nine credits in Peninsular Spanish and nine credits in Spanish American Literature.
- Distribution Requirement in Italian: Each semester the Italian section faculty offer two 8000-level graduate seminars (and/or 5000-level advanced courses open to graduate students and qualified undergraduates). M.A. students in Italian are required to take both of these 8000-level or 5000-level courses each semester.
- Entering M.A. students in French and Hispanic Studies are strongly encouraged to take FREN7704 Explication de texte, and SPAN9901 Advanced Textual Analysis in Spanish and/or SPAN9904 Topics in Advanced Literary Analysis, respectively, during their first year of graduate study.
- Students wishing to register for Graduate Consortium courses may do so in their second year of study, and must secure permission from their advisor as well as the Graduate Program Director prior to registration.
- Before registering for any and all courses before the start of each new semester, graduate students must have their course selection approved by their advisor, who will sign the appropriate departmental permission form.

Independent Research Project

- All M.A. candidates in French, Hispanic Studies, and Italian are required to complete the Independent Research Project (IRP) as part of their degree program. During the summer between their first and second years, M.A. students write a paper, in the target language, which represents a significant revision or extension of a paper written in a graduate course taken during the first two semesters of study. The candidate's formal presentation of the paper will be made before the faculty of the section, again in the target language.
- In consultation with the faculty member whose course is at the origin of the project, the student will define a precise topic by the end of the second semester of the first year of study and before the summer break. That same faculty member in whose specialization the project falls will serve as the student's IRP director, unless another faculty member with sufficient expertise agrees to assume that role. Students should also inform their academic advisors of their plans for the IRP.
- The principal work on the project will be carried out by the student over the summer between the first and second years, under the guidance of her/his IRP director.
- The paper should demonstrate critical competence in textual analysis, in developing and sustaining an argument, and in appropriate use of evidence and citation of sources. For further guidelines, please consult and follow the instructions contained in the RLL Department’s publication, "The Graduate Research Paper: An Essential Guide." The IRP will also be judged by the "Learning Outcomes" established by the department for Masters of Arts students.
The IRP should be between 20–25 pages in length, including bibliography.

The IRP deadlines must be strictly adhered to. They are as follows: (1) May 15: IRP topics and outline must be finalized and approved by the IRP director; (2) August 15: first draft of the complete essay must be sent to the IRP director; (3) September 10: no later than this date, students must meet with director to discuss the IRP draft and receive feedback for completion of the final draft; (4) October 10: final draft of the IRP must be submitted to director; (5) November 1: final version of IRP must be submitted to all faculty members in their language section.

The student who does not meet the November 1 deadline will not be allowed to continue with the IRP and will instead be obliged to take a written, comprehensive exam. This four-hour, Pass/Fail exam will take place in the spring semester (during the week following Spring Break) and will cover all of the student's completed courses.

Successful completion of the IRP (or the written comprehensive exam) is required for the granting of the M.A. degree. The M.A. degree cannot be granted to those who do not complete a satisfactory IRP within established deadlines (or do not pass the written comprehensive exam in its place).

Candidate will make a brief but formal presentation (in the target languages) of the finished IRP before the faculty of his/her section, followed by a discussion with the faculty. The dates of these presentations are to be determined by each section.

The IRP will be graded on a Pass/Fail basis.

There will be a department-wide reception/celebration for all IRP writers in the spring semester, once all three sections have completed their formal presentation. On that occasion, students will deliver brief remarks about the process of developing, researching, and writing their IRPs.

Students may apply for the departmental Sue Nyugen Research Travel Prize to engage in research, outside the U.S., related to their IRP. The best essays will be eligible to compete in the annual departmental Sue Nyugen Prize for Academic Excellence in Graduate Studies. Information about these two Nyugen prizes can be found on our Graduate Resources page.

Complete information on the Graduate Program is available on the department website: www.bc.edu/rll.

Sociology

Below is a general description of our M.A. and Ph.D. programs. For more detailed information, see the Guide to Graduate Study on the Resources for Current Students web page.

Master's Program in Sociology and Social Research

The M.A. program provides the foundation for advanced graduate level study toward the Ph.D. while also preparing students for careers in the areas of social research, applied sociological analysis, and basic college-level teaching.

Admissions: Superior students, regardless of their undergraduate area of specialization, are encouraged to apply. Applicants should submit, in addition to the usual transcripts and letters of reference, a statement of purpose, a writing sample, and any other information that might enhance their candidacy. GREs are required. Apply online at the Graduate School of the Morrissey College of Arts and Sciences Admission website.

Master's Degree Requirements: To receive the master's degree in Sociology and Social Research, the student must complete 30 credit hours (generally 10 courses). The required courses for all students are the following: a course in methods of social inquiry (SOCY7710) in the first semester of study, one semester of sociological theory (SOCY7715 or SOCY7716), and two semesters of statistics (e.g., SOCY7703 and SOCY7704). With permission of the Graduate Program Director, students may complete either a Master's Thesis or a Master's Paper. Students completing a Thesis or Paper are required to take a course in empirical research (SOCY7711) in the second semester of study and a seminar in writing in their second year (SOCY7761); students not writing a Thesis or Paper are required to take an elective research methods course.

Doctoral Program

The Ph.D. program seeks to combine the rigors of scholarly analysis with a commitment to social justice in a wide range of social institutions and settings. It prepares students for careers as researchers and university and college faculty.
Admissions: The primary criteria for admission are academic performance and promise of outstanding independent work. Applicants should submit, in addition to the usual transcripts and letters of reference, a statement of purpose, a writing sample, and any other information that might enhance their candidacy. GREs are required. Apply online at the Graduate School of the Morrissey College of Arts and Sciences Admission website.

Ph.D. Degree Requirements: The doctoral degree is fulfilled by completing a course in methods of social inquiry (SOCY7710) in the first semester of study, two semesters of sociological theory (SOCY7715 and SOCY7716), two semesters of statistics (e.g., SOCY7703 and SOCY7704), an M.A. Thesis or Paper (which entails taking SOCY7711 in the second semester of study and SOCY7761 in the second year of study), plus elective courses (to include at least one additional course in research methods) for a total of 54 credits. Other requirements include meeting a one-year full-time residency requirement, passing general comprehensive examinations, completing a doctoral dissertation, and passing an oral defense.

Financial Assistance

All candidates accepted to the Ph.D. program who remain in good academic standing are assured of receiving funding for five years (unless they enter with advanced standing due to graduate work completed elsewhere, in which case they will normally be offered support for four years). Financial assistance assumes the form of tuition waivers and living stipends. Stipends are typically tied to work duties, including teaching and research assistantships. No separate applications for financial assistance are necessary.

Theology

Boston College offers extensive resources for Catholic and ecumenical study of theology. Embedded in the culturally rich Boston metropolitan area, the combined faculties of the Morrissey College of Arts and Sciences Theology Department and the School of Theology and Ministry make Boston College a premier international center for the study of theology. The library, courses, and faculty resources available to graduate students at Boston College are further expanded by Boston College’s membership in the Boston Theological Interreligious Consortium (BTI), a consortium of theology faculties primarily in the Boston-Newton-Cambridge area, which has as its constituent members the following institutions:

- Boston College’s Department of Theology
- Boston College’s School of Theology and Ministry
- Boston University Graduate Program in Religion
- Boston University School of Theology
- Gordon-Conwell Theological Seminary
- Hartford Seminary
- Harvard Divinity School
- Hebrew College
- Holy Cross Greek Orthodox Seminary
- St. John’s Seminary and Theological Institute

This consortium offers complete cross-registration in several hundred courses, the use of library facilities in the ten schools, joint seminars and programs, and faculty exchange programs.

Ph.D. Program in Theology

The doctoral program in theology at Boston College has as its goal the formation of theologians who excel intellectually in the church, the academy, and society. It is confessional in nature and envisions theology as “faith seeking understanding.” Accordingly, the program aims at nourishing a community of faith, scholarly conversation, research, and teaching centered in the study of Christian life and thought, past and present, in ways that contribute to this goal. It recognizes that creative theological discussion and specialized research today require serious and in-depth appropriation of the great philosophical and theological traditions of the past, as well as ecumenical, interdisciplinary, inter-religious, and cross-cultural endeavors.
The program is led by an internationally respected ecumenical faculty. Students are encouraged to explore widely and deeply in a variety of Catholic, Protestant, and Orthodox theological and doctrinal traditions, while also engaging in critical and constructive dialogue with other major religions and cultures.

The program is rigorous in its expectation that students develop a mature grasp of the Christian theological tradition and probe critically the foundations, intelligibility, and relative adequacy of various theological positions. Students are expected to master the tools and techniques of research and to organize and integrate their knowledge in order to make an original contribution to theological discussion. Because the program includes faculty members who are experts in the Hindu, Buddhist, Muslim, and Jewish traditions, it also offers a context in which the issues raised by religious pluralism can be explored, responsibly and in detail, and in which a Christian comparative theology can be pursued seriously.

Successful applicants to the Ph.D. Program will generally have in hand an M.Div., a master’s degree in religion, theology, or philosophy, or an equivalent degree.

Areas of Specialization

Students in the doctoral program specialize in one of five major areas: Biblical Studies, Historical Theology/History of Christianity, Systematic Theology, Theological Ethics, or Comparative Theology.

**Biblical Studies** focuses on the canonical books of the Bible both within their historical and cultural world and in relation to their reception within the Christian and Jewish traditions. All students will acquire a thorough competency in both the Old Testament/Hebrew Bible and the New Testament including competency in Hebrew, Aramaic, and Greek. They may learn other ancient languages and literatures as their research requires and must acquire a reading knowledge of German and either French or Spanish. The comprehensive exams will cover the whole Bible, with emphasis on either the Old Testament/Hebrew Bible or the New Testament, and will include a specialized exam in an area of study pertinent to the student’s dissertation. Students will be expected to pass a general examination on the testament that is not their specialty (which counts as their “minor” area).

**The Historical Theology/History of Christianity** (HT/HC) area studies past theological reflection on the faith and practice of the Church. The HT/HC area strives to appreciate these theological expressions both within their immediate historical contexts (social, cultural, institutional) and within the broader trajectories of theological development in the Christian tradition. Currently, this area has a strong common interest in early and medieval Christian theology.

**Systematic Theology** is the contemporary intellectual reflection on the content of divine revelation as an interrelated whole. The program fosters the capacity to treat theological material systematically, constructively, and contextually, according to methods that attend to the coherence and interconnectedness of the elements of the Christian tradition, to take responsibility for the tradition’s ongoing development, and to address diverse cultural situations. Special attention is given to the historical development of Christian thought and doctrine, its intellectual cogency, its role and significance within different cultural contexts, its contemporary expressions from different theological perspectives, and newly emergent questions.

**Theological Ethics** includes the ecumenical study of major Christian ethicists and attends to the Biblical foundations, philosophical contributions, socio-political contexts, and theological interpretations of ethics. The program encompasses the historical development of traditions in Christian ethics, including the natural law and virtue ethics. It also includes a strong social ethics component as well as offerings in applied ethics. The exploration of contemporary ethics is set in a critical, historical perspective and encourages attention to the global, multicultural, and public character of the Christian community. Interdisciplinary and intersectional work on contemporary ethical problems is also encouraged.

**Comparative Theology** involves faith seeking understanding in constructive dialogue with another religious tradition. Students are expected to acquire significant expertise in a religion other than their own, as well as a solid grounding in a particular area of theology (ethics, biblical studies, historical theology, or systematic theology). Equipped with the methodological tools of the comparative study of religion, as well as a critical self-awareness of theology of religions, students will reflect on a particular theological question or problem in their own religious tradition through constructive engagement with analogous ideas or practices in the other tradition. This will prepare them to teach courses in Christian theology and in their non-Christian religious tradition, as well as in interreligious dialogue and comparative theology more generally. As a minor area of study, Comparative Theology may also expand the theological and professional opportunities of students in any other area of the doctoral program.
Language Requirements

Each doctoral student must pass examinations in at least two languages. These test the student’s proficiency in reading languages important for his or her research and must be passed before admission to the comprehensive examinations. Students may take either the departmental translation examinations (offered three times a year) or pass (with a grade of B+ or better) the 12-week summer intensive language courses offered by the Graduate School of the Morrissey College of Arts and Sciences.

Some areas may require more than a minimum of two languages. Knowledge of various ancient languages may also be required, depending on the student’s dissertation topic. Thus, Greek, Latin, and Hebrew may well be required for students working in the early Christian and/or medieval period. Students in Biblical Studies are expected to demonstrate proficiency in appropriate ancient and modern languages. Students in Comparative Theology are expected to acquire at least an intermediate level of proficiency in a language related to the non-Christian religious tradition they are studying.

Joint M.A. in Philosophy and Theology

If you have questions and interests that lead you into both philosophy and theology, or would like to deepen your understanding of each field by opening it to the other, you might consider pursuing a M.A. in Philosophy and Theology at Boston College.

Drawing on the resources of large major departments and distinguished authorities in each field, and situated at the heart of a prominent Jesuit Catholic university, this program is structured around distinct concentrations that address major areas of common concern to the two fields, and explores their historical, systematic and disciplinary relations. Students develop a program of study in discussion with an academic advisor, and take courses in the standard graduate programs offered by the Philosophy and Theology departments. Concentrations include: Faith, Science and Philosophy; Foundations in Philosophy and Theology; Medieval Philosophy and Theology; and Philosophy and Religions.

This program is designed to address the various interests of students who wish to augment graduate study of philosophy with greater exposure to theology or graduate study of theology with greater exposure to philosophy, consider teaching in private secondary schools, or simply feel in need of intellectual enrichment.

School of Theology and Ministry

The Boston College School of Theology and Ministry (STM) is an international theological center that serves the Church’s mission in the world as part of a Catholic and Jesuit university. The school prepares its students for ministries that are as diverse as the composition of the student body—Jesuits and other candidates approved for ordination studies, women and men for lay ecclesial ministries and for service rooted in faith. The STM is committed to the Catholic theological tradition, rigorous academic inquiry, interdisciplinary study, ecumenical and interreligious dialogue, and the engagement of faith and culture. The STM offers graduate programs, including civil and ecclesiastical degrees in theology and ministry that integrate intellectual, spiritual, pastoral, and personal formation and reaches out to larger theological and pastoral communities through STM Crossroads learning resources, the publication of New Testament Abstracts, and timely continuing education programs. For more information, visit the STM website at www.bc.edu/stm.

Admissions and Financial Aid

Applying to the School of Theology and Ministry is straightforward; however, each program has specific requirements. Be sure to review carefully the requirements for your program of study. Access to the online application can be found through the STM website at www.bc.edu/stmapply.

Application Deadlines

Fall Admission
● Ph.D.: January 15
● All other degrees: January 15 (for priority financial aid consideration)

Summer Admission (M.A. and non-degree programs only)

● June 15 (for priority financial aid consideration)

Spring Admission (Except Ph.D. and S.T.D.)

● November 15 (for priority financial aid consideration)

Note: With the exception of the Ph.D. in Theology and Education, applications are still considered after the priority deadline.

Admission Materials

Application Form

The application form to STM must be completed online. In addition to demographic and academic information, applicants should upload their personal statement, resume, and transcripts at the time they submit their application forms.

Applicants are encouraged to submit their application materials as soon as possible and before the posted deadlines. You do not need to wait until you have gathered all of your supporting materials to submit the application form.

Supporting Materials

● Application Fee
  A non-refundable fee of $75 is required for every degree and non-degree application submitted. Fee waivers are automatically granted to the following applicants: Jesuits, applicants currently completing a year of service, and current STM students. We do not waive the application fee for other reasons.

● Personal Statement
  The personal statement must be uploaded as part of the Application Form. Your statement should be three pages double-spaced and address the following:
  ○ The academic, professional, and personal development that has motivated you to apply to the STM. Include a sketch of your educational background and interests, any experience you have in ministry and/or religious education, and any other relevant professional and volunteer experience;
  ○ Your understanding of theological education and/or ministry in the context of the Church’s mission;
  ○ How you plan to apply your theological education;
  ○ Given your experience, how you assess your principal strengths for theological education and/or ministry as well as your areas of needed development;
  ○ For the Ph.D., S.T.D., S.T.L., and Th.M. programs, please provide information outlining your specific area and field of academic interest, a proposed topic(s) for your research and dissertation/thesis, how your previous academic, professional, and/or pastoral experience has prepared you for studies within that particular field, and the STM faculty member(s) with whom you would like to work;

● Resume or Curriculum Vitae

● Letters of Recommendation
  Degree applicants are required to submit three recommendations using the online application system. Certificate applicants are required to submit at least one recommendation. Each recommender should be familiar with the applicant’s academic competence. For applicants who have been out of school for a significant amount of time, the recommenders
should be familiar with the applicant’s professional competence. For M.Div. and M.A. applicants, one recommender should be familiar with the applicant’s ministerial potential and experience.

- **GRE Scores**
  Scores need to be received directly from ETS. Our GRE code is 2508. All applicants applying to the Ph.D. and S.T.D. degree programs must submit GRE scores—no exceptions will be made. For master’s applicants, the Admissions Office may accept other standardized tests. The admissions committee may also decide to waive this requirement for master’s applicants if they have completed a previous graduate degree.

- **Personal Interview**
  A personal interview is required of master’s applicants. The Admissions Office will contact applicants to set up an interview by Zoom or Skype.

- **Writing Sample**
  A writing sample is required of Ph.D. and S.T.D. applicants only. The writing sample must be uploaded as part of the Application Form. The sample should be an academic paper, usually no less than 10 pages, not to exceed 25 pages. S.T.D. applicants are also required to submit a copy of their S.T.L. thesis upon its completion.

- **Transcripts**
  One copy of each transcript is required from all colleges, universities, seminaries, or theological schools that an applicant has attended. If a college or university will send official transcripts electronically, they can be emailed to stmadm@bc.edu. Unofficial copies of transcripts may be uploaded by the applicant with the Application Form. If transcripts must be mailed, they can be sent to the address below. If an official transcript is not English, a translation should be provided with the official document. Please alert us if your transcript will be arriving with a different name than the one you are using on your application.

Brighton, MA 02135-3841

**Jesuit Applications**
Jesuit scholastic applicants must follow the instructions above. Additionally, international Jesuits should first contact the Assistant Director of Admissions at least five months prior to their planned enrollment to discuss their plans, academic background, and language skills. Jesuits requiring financial assistance should be in touch with the school by February 1, so that names may be submitted to the U.S. Jesuit Conference. After this initial contact, the scholastic's provincial would write a letter to the rector of the Saint Peter Faber Community. The letter would indicate an intent to mission the student to STM, request housing, and indicate if financial funding is needed. Funding for Jesuits from developing countries is approved by the U.S. Jesuit Conference in Washington D.C., and the request is made by the rector of Saint Peter Faber Community. All Jesuit scholastic applications are reviewed by the Admissions Committee.

In addition, Jesuit applicants are asked to complete a FERPA release form as part of the application process. This form is available on our website and allows us to communicate with the rector of the Saint Peter Faber Community and other religious superiors about your application and, potentially, academic and financial matters while you are a student at Boston College.

Non-Jesuit Religious Applicants

Religious applicants who are not Jesuits must also follow the instructions above. Religious applicants requiring scholarship and parish or convent housing assistance should apply by February 1 for the fall semester. All religious applicants are reviewed by the Admissions Committee. Lastly, if accepted, the Office of Admissions will work with the Office of International Students and Scholars to process all visa documentation for international applicants.

In addition, non-Jesuit religious applicants are asked to complete a FERPA release form as part of the application process. This form is available on our website and allows us to communicate with your vocation director and/or other religious superiors about your application and, potentially, academic and financial matters while you are a student at Boston College.

Additional Information

No materials submitted as part of the application for admission can be returned or forwarded to a third party. The Admissions Committee will not consider an application until it is complete.

The Admissions Committee takes into account all of the material submitted with the application: grade point average (GPA), GRE or other standardized test scores (if applicable), TOEFL (for international students), letters of recommendation, work and/or volunteer experience, and personal statement—where we look for a high level of intellectual, social, and religious maturity.

Acceptance to an STM degree program is not guaranteed and is very competitive. Therefore, estimates of the likelihood of acceptance cannot be given to any applicant.

Scholarship and Grant Funding

As an international theological center providing outstanding academic resources and an intimate community for its members, we want to help you finance your studies and make it possible for you to join us. Boston College School of Theology and Ministry (STM) offers generous funding through several types of financial assistance. When you complete the STM Application, you are automatically considered for all financial assistance for which you may be eligible from the STM.

Tuition scholarships are based on considerations of academic achievement, potential for ministry, demonstrated leadership, and financial need. Funding is generally renewable at the same level in years following the student’s initial award year, assuming the student’s need and academic standing do not change markedly. Prospective students are encouraged to contact the Associate Dean, Enrollment Management for questions regarding the funding of their studies.

Federal Student Loans
In addition to scholarship and grant funding, the University participates in the Federal Direct Loan Program. Students can borrow up to the total cost of attendance, minus any funding they are receiving from the STM through the Direct Loan Program. To apply for the Stafford loan, you will need to submit a Free Application for Federal Student Aid (FAFSA), and also complete and submit the Boston College Graduate Financial Aid Application/Validation. Information and forms are available through the Boston College Office of Student Services located in Lyons Hall. Go to www.bc.edu/gradaid or call 617-552-3300 for more information. Please note that Federal Stafford loans are only available for U.S. citizens and residents. Please also note that Federal loans are not available to S.T.L. or S.T.D. degree seeking students, certificate seeking students, or non-degree seeking students.

Notification of your funding will occur after a decision is made regarding your admission into the STM.

Please note that if you receive a scholarship after you receive your loan package, your loan package may have to be adjusted. Federal regulations limit the total amount of aid (including student loans) a student can receive. Contact the Boston College Office of Student Services if you have any questions about Federal loans.

**International Student Admission Requirements**

As an international theological center, STM represents the changing landscape of the Catholic Church on the global stage by training priests, lay ministers, and theologians from over forty nations. While we continue to attract and train students from North America and Europe, more and more, the future leadership of the Church is emerging from South America, Africa, India, and Asia. STM is a part of this movement, training some of the first indigenous professors of seminaries, universities, and theological centers in those regions.

We encourage clergy, religious men and women, and lay students from all countries to apply to our programs. Below is important information that you should consider before applying.

**Visa Process**

**When Applying**

Applicants only start securing a visa after they have been accepted to a program. No work on the part of the international applicant needs to be done toward a visa until after they receive a letter of admission, have confirmed intent to enroll, and have proven financial ability for studies. (See next page.)

**After Being Accepted**

After being accepted, the Admissions Office will send you the Declaration and Certification of Finances form for the I-20 document. Filling out and returning these forms to the STM Admissions Office will start the process of obtaining an F-1, or student, visa to study in the United States, as long as you meet the financial and English language requirements.

International students, who are also Diocesan priests, must obtain priestly Faculties to serve as priests in the Boston Archdiocese. The student’s bishop or major superior must write to the Archbishop of Boston, requesting housing and facilities to function as a priest in the area. A copy of this letter should be sent to STM. Boston College can only issue an I-20, after such facilities have been secured.

**Additional Requirements**

All applicants for whom English is not their native language must demonstrate proficiency in the English language. This can be demonstrated by an acceptable score on the TOEFL exam (Test of English as a Foreign Language) or by receiving a degree from a college or university at which English is the language of instruction.
An acceptable TOEFL score is 85 on the internet exam. When taking the exam, include STM's institutional code—3971—so that your scores may be sent directly to the school. Students cannot be accepted into any STM program without an acceptable TOEFL score.

TOEFL Registration

CN6152

Princeton, NJ 08541, USA

TOEFL website

The TOEFL score is not required if:

1. You are a citizen of Australia, Canada (except Quebec), Great Britain, Ireland, New Zealand, Guyana, an Anglophone country of Africa, or an English-speaking country of the Caribbean.
2. You earned your prior college or university degree in the U.S. or one of the countries listed above.
3. You are currently enrolled as a full-time student in a U.S. degree-granting program or at an American or English-speaking school in one of the countries listed above and will have completed two academic years of college/university work before beginning your studies at Boston College.

GRE Exam

If you do not already have a graduate degree (a degree beyond the initial first post-secondary degree) you must take the Graduate Record Examination (GRE). All Ph.D. and S.T.D. applicants must submit GRE scores. STM GRE code is 2508.

Educational Testing Service

P.O. Box 6000

Princeton, NJ 08541

www.gre.org

Permission of Superior

All diocesan priests and members of religious orders must submit a letter of approval and financial support from their bishop or major superior. The letter must indicate complete knowledge and support for your studies indicating degree and semester of initial enrollment. The letter must be on official letterhead and signed by your superior or bishop. The letter should be addressed to the Associate Dean, Director of Enrollment Management and must contain contact information.

Costs

The United States Government requires all international students to prove that they have the financial means to support themselves while studying in the United States. If you are a member of the clergy or a religious, you need to document by either a bank statement or letter of support from your bishop or congregation that you have funds to live and study in the U.S. The U.S. Embassy will not issue you a visa if you do not have the necessary funds. Any tuition costs not covered by STM scholarship funds must be documented.
Financial Aid Scholarships

The cost of higher education in the United States is high. STM awards partial tuition grants to international students, depending on availability, to help ease their financial burden. Students must be enrolled in a degree seeking program. Students must exhibit an exemplary academic record and personal potential. Students should be aware that, even if receiving a tuition grant, they still must obtain support to pay for their living expenses. Unfortunately, Federal loans are not available to those who are not U.S. citizens or permanent residents.

All international students must show that they have sufficient funds or resources to pay for their tuition and living expenses during the course of their studies, whether support comes in the form of scholarships, grants, or support from a religious order or personal bank account. Applicants do not need to supply evidence of sufficient resources with their applications. Once accepted, the admissions office will send a form where one can document resources. No additional funding will be available to international students once they arrive in the United States.

Housing

Boston College does not offer on-campus housing for graduate students. International lay students are encouraged to contact the STM admissions office and the Boston College's Off-Campus Housing Office, if they are interested in learning more about resources to help them locate housing. International diocesan priests and members of religious orders usually find housing with area parishes or religious communities. International religious sisters are encouraged to contact the admissions office if they are in need of housing.

Graduate Degree Programs

The School of Theology and Ministry offers graduate students a number of degree-granting programs. Our degree programs prepare students for ministries that are as diverse as the composition of the student body—Jesuits and other candidates approved for ordination studies, women and men for lay ecclesial ministries and for service rooted in faith, and scholars preparing for a career in academia.

Master of Divinity (M.Div.)

The School’s most comprehensive program, the three-year M.Div. program offers a course of theological, pastoral, and spiritual formation to prepare students for ordained ministry, professional lay ecclesial ministry, or doctoral studies. M.Div. students at the STM have a demonstrated passion for ministry and service to the world, and often go on to careers in parish ministry, campus ministry, chaplaincy, teaching, and non-profit work.

Student Learning Outcomes for the M.Div. Program

Upon completion of the M.Div. Program, students will be able to:

1. Demonstrate an understanding of the Catholic theological tradition.
2. Bring the insights of the Catholic theological tradition into dialogue with contemporary social and religious issues.
3. Integrate theological thinking and ministerial practice.
4. Demonstrate capacities conducive to effective ministry.

Master of Arts in Theology and Ministry (M.A.)

The M.A. in Theology and Ministry prepares students for a wide variety of ministries. Designed for students of all ages and career backgrounds, this two-year program (48 credits in the academic year) combines theological study with the pastoral arts.
Graduates of the program go on to careers in parish ministry and administration, ministry in Hispanic and/or multicultural communities, campus ministry, religious education, high school religion teaching, spiritual direction, faith-based social service, and hospital chaplaincy, among others.

For the most flexibility, students in the M.A. Theology and Ministry utilize their electives to explore theological and pastoral areas of interest. Those wishing to do so can choose a specific track in either Hispanic Ministry or Religious Education.

The M.A. in Theology and Ministry can also be completed in a hybrid mode through a combination of on-campus courses and online courses taken throughout the year. Students enrolled in the hybrid mode will be guided by our faculty advisors to craft the best program of study and sequence of courses for them. They can take advantage of our on-campus course offerings throughout the academic year, take online courses, and take courses over the summer sessions. Through an intensive program of study, it is possible to complete the program in 3 years. However, students have up to 5 years to complete the M.A. program.

In collaboration with other BC professional schools, the M.A. Theology and Ministry can be combined with an M.S.W., M.B.A., M.A. Counseling Psychology, and M.S. Nursing.

**Student Learning Outcomes for the M.A. in Theology and Ministry**

Upon completion of the M.A. program, students should be able to:

1. Bring informed theological, biblical, and pastoral resources to interpret and to enhance the life and ministry of faith-based communities and programs of service;
2. Embody the pastoral and spiritual formation that is needed to provide leadership and empowerment to communities of faith through various functions of ministry and service;
3. Develop effective programs of ministry and service that are well grounded in theological and pastoral studies and that enable persons and communities to integrate life and Christian faith in the context of their everyday lives.

**Master of Theological Studies (M.T.S.)**

The two-year M.T.S. program (48 credits) offers a broad study of theology with the option to specialize in an area of particular interest. With a flexible curriculum and a special focus on scholarship, the M.T.S. is especially appropriate for students who intend to pursue doctoral studies in theology. The program is also appropriate for students seeking personal reflection and theological development.

**Student Learning Outcomes for the M.T.S. program:**

Upon completion of the M.T.S. program, students should be able to:

1. Demonstrate knowledge of the Bible, its historical contexts and methods of interpretation;
2. Articulate methodologies of moral reasoning in relation to Scripture, Tradition, and experience, demonstrated by literacy in a specific area of interest;
3. Demonstrate knowledge of Christian tradition, articulated in systematic thought on Christology, ecclesiology, or fundamental theology;
4. Demonstrate critical knowledge of the historical development of the Christian church, its institutions, practices and teachings; and
5. Articulate methodologies of pastoral studies and practical theology, and demonstrate a capacity for interdisciplinary and contextual analysis for Christian discipleship.
Doctor of Philosophy, Theology and Education (Ph.D.)

The Ph.D. program educates scholars in the interdisciplinary field of religious education. Participants take courses in theology, education, and religious education; faculty members from each of these areas serve on both the comprehensive examination committee and on the dissertation committee. The program is offered in conjunction with the Boston College Theology Department and the Lynch School of Education and Human Development, and the degree is awarded by the Graduate School of the Morrissey College of Arts and Sciences.

Master of Theology (Th.M.)

The Th.M. is a one-year, post-master’s degree (24 credits) that is intended to deepen and focus a student’s foundational knowledge of theological disciplines and ministerial practice. Th.M. graduates come from various backgrounds and go on to use their experience in a diverse array of professions. Graduates take their Th.M. education and serve as teachers, administrators, medical doctors, advocates for refugees and human rights, and ecumenical ministers, as well as in numerous other capacities. Lay students who have already completed a master of divinity and who are interested in pursuing doctoral work, but believe they need additional course work, might also consider the master of theology.

Student Learning Outcomes for the Th.M. Program

Graduates of the Th.M. program will be able to demonstrate:

- At the completion of the Th.M. in Advanced Theological Study, a student will be able to demonstrate competence in a particular area of theological studies beyond the Master's level (i.e. at the level of an advanced master’s degree). (THM-ATS)
- At the completion of the Th.M. in Ministerial Practice, a student will be able to articulate an advanced theological understanding of and demonstrate competence in a focused area of ministry. (THM-MP)

Ecclesiastical Degrees

The ecclesiastical degrees are part of a three-degree cycle offered by an ecclesiastical faculty and granted in the name of the Holy See. The degrees provide training in advanced theological areas, preparing students to teach in a seminary or for religious and lay leadership positions in the Catholic Church.

The Bachelor of Sacred Theology (S.T.B.) is a first-level, three-year ecclesiastical degree granted in the name of the Holy See through the ecclesiastical faculty of the School of Theology and Ministry (STM) by virtue of its status as an Ecclesiastical Faculty accredited by the Vatican Congregation of Catholic Education. Admission to the S.T.B. Program requires two full years of coursework in philosophy (48 credit hours). The S.T.B Curriculum is fundamentally academic with an established curriculum of required courses determined by Veritatis Gaudium. Unlike the M.Div., it does not include electives or course work in Pastoral/Ministerial Studies, other than those courses specifically required for ordination. It prepares one to pursue the Licentiate of Sacred Theology (S.T.L.), a second-level, research-oriented ecclesiastical degree also offered by the STM.

The Licentiate in Sacred Theology (S.T.L.) is the second degree in a three-degree progression of ecclesiastical degrees. The S.T.L. enables students to build upon previous work and focus more on a particular subject or field within a Catholic context. An advanced degree, it provides students with two full years of work above and beyond the S.T.B. or M.Div. Students use the S.T.L. to continue work in Catholic theological studies, prepare for doctoral work, or teach or build competence for working within the Church. Officially, it is “the academic degree which enables one to teach in a major seminary or equivalent school.” The S.T.L. can open many doors for service in the Church, and in a number of official capacities within dioceses, religious communities, and institutions of higher learning.
Student Learning Outcome for the S.T.L. Program

At the completion of the degree requirements for the S.T.L., students will be able to demonstrate advanced mastery of a particular area of theological studies beyond the first cycle Ecclesiastical degree.

The Doctor of Sacred Theology (S.T.D.) is the culminating step in the three-degree ecclesiastical program. The purpose of the S.T.D. program is to create scholars who combine broad knowledge of a certain area, a critical knowledge of theological methodology, and an ability to contribute original research in a chosen field of study. Most students who complete the S.T.D. go on to teach in university faculties, seminaries, and theological centers. They also contribute to Church administration and pastoral work, using their extensive study, training, and expertise as resources for their community. Students interested in the S.T.D. usually have discerned a vocation of working within the Catholic Church or a related environment. As with the S.T.L., the S.T.D. can open many doors for service in the Church, and in a number of official capacities within dioceses, religious communities, and institutions of higher learning.

Student Learning Outcomes for the S.T.D. Program

At the end of the S.T.D. program, students will be able to demonstrate the skills necessary

1. To teach at the post-secondary level
2. To engage in scholarly research in preparation for teaching and publication
3. To demonstrate a sufficient level of mastery in a particular discipline, which corresponds to the expectations of the academy of the completion of a terminal degree

Non-degree Programs

The School of Theology and Ministry is committed to providing the opportunity for professional development and ongoing formation for today's Church. Every person interested in exploring the important issues of the Church today can find a workshop, lecture, or course to meet his or her interest—whether professional or personal. Our programs are designed to fit into a variety of schedules, with day, evening, weekend, and online programs during the academic year, as well as one- or two-week courses held during the STM's Summer Institute.

Academic Certificate Programs

Post-Master's Certificate in Spiritual Formation

The Post-Master's Certificate prepares ministers with a prior master's degree in theology or a related field to be spiritual mentors for persons and Christian faith communities. This program highlights three themes—prayer and discernment, the art of spiritual direction, and working within faith communities.

Theology and Ministry Certificate

The Theology and Ministry Certificate is a flexible 18-credit program for individuals who wish to study either a specialized area of ministry or an expansive range of theological areas, but not enroll in a full master's program.

Religious Education Certificate

The Religious Education Certificate is an 18-credit program for individuals who wish to study religious education, but not enroll in a full master's program. Intended for educators in Catholic high schools and catechists in parishes who want to concentrate their knowledge, this certificate program is designed to adapt to student's needs.
Hispanic Ministry Certificate

The Hispanic Ministry Certificate is an 18-credit program designed to prepare students, ministers, and educators who are already working or are interested in doing so in the context of Hispanic communities anywhere in the U.S.

Christian Spirituality Certificate

The Christian Spirituality Certificate is an 18-credit program that enables persons who are personally or professionally interested in the study of Christian spirituality to delve into historical and contemporary Christian spiritual traditions, themes, and practices with an eye toward effective spiritual leadership today. Teachers, pastors, ministers, and those drawn to spiritual formation work will benefit from this focused study of Christian Spirituality.

Ignatian Spirituality Certificate

The Ignatian Spirituality Certificate is an 18-credit program that prepares persons to assume leadership in specifically Ignatian spiritual formation. It makes possible careful study of a highly influential Christian spiritual tradition, giving sustained attention to Ignatian and Jesuit spiritual themes and practices, pedagogy and leadership.

Spiritual and Pastoral Care Certificate

The Spiritual and Pastoral Care Certificate is an 18-credit program that provides nurses, counselors, social workers, and parish pastoral care givers with an opportunity to explore the intersection of Spirituality Studies and Pastoral Care in ways that deepen their ministerial and faith-based service.

Summer at STM

In addition to individual courses for credit or audit, the M.A. in Theology and Ministry is offered through the summer at STM.

Individual Courses

Special Student

Special Students at Boston College are those students wishing to take one or more classes in the academic year. As a Special Student at STM you may earn academic credit without enrolling in a degree program. Regular tuition applies and up to 12 credit hours maybe taken. Should you later enroll in an STM degree program, the credits you earn will count toward your degree. Special Students may cross-register at other BTI schools, as long as they take one course at STM. Special Students are also allowed to take select courses for audit for one-half of the credit cost.

Minister-in-the-Vicinity

Boston College STM offers a special audit rate for those currently engaged in full-time ministry (ministers, lay ecclesial ministers, priests, rabbis, and others) who live in the vicinity and who hold a theological degree. Minister-in-the-Vicinity students can audit one course per semester at the rate of $100 per credit hour.
Continuing Education

Conferences, Lectures, Workshops, Seminar Series

STM welcomes all as part of our commitment to making contemporary theological discussion accessible to the community. Many events are free of charge and others have a small fee.

Sabbatical

Those who wish to come to Boston College for sabbatical may apply as a Special Student or Minister-in-the-Vicinity and create their own independent sabbatical experience.

STM Online: Crossroads

STM Online: Crossroads, a program of Boston College School of Theology and Ministry, offers non-credit online courses for adult spiritual enrichment and faith formation. With a focus on shared reflection in an online learning community, Crossroads models the kind of conversation and participation that lead to deeper understanding of and personal growth in faith.

Academic Policies and Procedures

Academic Integrity at Boston College

Academic integrity is taken quite seriously at Boston College and by the dean and faculty of the School of Theology and Ministry in particular. STM abides by the University policy on academic integrity to be found in the Policies and Procedures section of this Catalog. The roles and responsibilities of students, faculty, and deans with regard to promoting academic integrity can be found there as well. STM students are strongly encouraged to become familiar with these policies and procedures, as they are held responsible for this knowledge. Students with questions regarding what constitutes a violation of Boston College’s Academic Integrity Policy, especially with regard to specific courses and assignments, are invited and encouraged to ask these questions of their professors and the Associate Dean for Academic Affairs.

STM Academic Integrity Procedures

Each member of the School of Theology and Ministry (STM) community is responsible for supporting a teaching and learning environment that cultivates the necessary habits of heart and mind that are rooted in the Gospel. Because each violation of academic integrity—whether intentional or unintentional—harms our common goal to create an academic culture of honesty, all violations are taken seriously at the STM. Faculty members are responsible for promoting academic integrity in their courses by including a clear statement in their syllabi of the school’s policy and by discussing this policy in class at the beginning of the semester. Faculty are also responsible for promptly reporting violations of academic integrity as they occur. Consistent with the expectations set forth at Boston College, STM students are personally responsible for upholding academic honesty in all aspects of their work and should hold their peers accountable when they suspect that a questionable act of academic dishonesty has taken place, either by directly addressing the violation as it is happening or by informing the appropriate individuals (a trusted faculty member or dean).

Violations of academic integrity include, but are not limited to, plagiarism. Students are responsible for educating themselves about what constitutes plagiarism and the inappropriate use of sources in an academic context. Any reference to the ideas or insights of others, either in direct quotation or in paraphrase, should be given explicit and clear attribution; to fail to do so is intellectually dishonest. Other instances of academic dishonesty include:

- Unauthorized collaboration on papers, presentations, assignments, and exams
- Unauthorized use of materials and sources in assignments and examinations
- Collusion with the intent to deceive
Knowingly allowing your work to be used by others in an academically dishonest way
Submit the same work for two different courses
Misrepresenting work that has been purchased or written by someone else as your own
Lying in order to secure an extension on an assignment, to reschedule an exam, or to manipulate an outcome of a course requirement
Cheating or copying from another student
Fabricating stories or otherwise misrepresenting data in conversations related to training in counseling, CPE, and spiritual direction
Inappropriate use of confidential information and inappropriate use of privileged access to spaces or information

In order to cultivate an academic culture of honesty, faculty are asked to document all instances of academic dishonesty, even if the assignment itself is not graded or the violation did not result in a grading penalty. Violations of academic integrity are taken seriously because of the mission of the STM to prepare students for leadership in teaching and active ministry in the global Church where students will be expected to promote a culture of integrity after leaving the STM.

STM Review Process

Cases are reviewed by the Academic Integrity Committee (AIC), which is constituted by (usually four) members of the faculty, one student, and the associate dean for academic affairs (hereafter "academic dean"). The chair of the AIC is a faculty person appointed by the Dean of the STM. All cases are handled with strict confidentiality. When a faculty member determines that a student's work violates the standards of academic integrity, that faculty member should discuss the violation with the student, ideally in person, or in writing. The violation should be described and documented in a letter and sent to the academic dean along with the following supporting documents:

- Course syllabus with the instructions for the assignment highlighted
- The student's work
- Evidence that a violation has taken place (e.g., copy of the original publication)

Along with the supporting documentation, the faculty person should clearly state if the violation will or will not incur a grade penalty, and, if so, what the faculty member thinks that penalty should be.

For instances where there is no grade penalty, either because the assignment itself is not graded or because it is a low-weighted assignment, faculty should submit the necessary documentation and a clear explanation for why no penalty was issued in a confidential sealed envelope addressed to the academic dean. The chair of the AIC and the academic dean will meet to determine whether or not a violation has taken place. For these instances where a violation does not incur a grading penalty, an individual meeting between the student and the academic dean may or may not be scheduled. The academic dean will issue a warning letter documenting the violation to the student and to the faculty member. All paperwork associated with the violation will be archived in the office of the academic dean in a confidential file until the student graduates, at which point it will be destroyed. Such instances are considered to be minor violations or warning violations.

If the faculty member decides that the violation is serious enough to warrant a grade penalty, the following procedure will be followed: The faculty person should meet with the student in person or explain the situation by email. This communication should discuss the nature of the academic integrity violation and also how to avoid such violations in the future. There should be a clear statement about the grade for the work without the violation and the additional penalty that is being imposed for the violation. The penalty for the academic integrity violation should take into account the severity of the violation, the complexity of the assignment, and the weight of the assignment. Grade penalties for students found guilty of academic integrity violations should also consider the degree of premeditation involved. If violations of academic integrity occur towards the end of the semester, faculty should issue the final course grade of “I” until the AIC review process has been completed. The faculty person should document, in a letter addressed to the AIC, the meeting with the student, and the grade and grade penalty for the assignment, and forward this letter and all supporting documentation to the academic dean in a confidential file.
Every violation that incurs a grade penalty will fall under full review by the AIC and the academic dean. Upon receiving a report of an academic integrity violation, the academic dean will notify the student of the allegation and set up a meeting with him or her. The student will receive the report of the academic integrity violation report that has been submitted by the faculty member and the grade penalty for the violation. The student will have the chance to respond to the faculty member’s report in an individual meeting with the academic dean, and also be invited to submit his or her response in writing, so that it can be reviewed by the AIC. While a case is pending, the student may not withdraw from the course or program or change status in a course. The academic dean will serve as a non-voting member of and administrative resource for the AIC, acting as a liaison between the student and the AIC and maintaining the committee's record of notifications and relevant materials. In cases involving students from more than one school or students enrolled in joint or dual degree programs, the academic dean will coordinate the relevant academic integrity committees to participate in the review process.

The academic dean will notify the faculty member who reported the violation and the student(s) that the case is under full review by the AIC. Members of the AIC are held to strict confidentiality and may not discuss any case that is under review, even with the student(s) involved. At its discretion, the AIC as a whole may interview any individual, including the student, with knowledge pertinent to the case.

The AIC will review all cases involving a grade penalty. First, the AIC will determine whether or not a violation of academic integrity has taken place by a simple majority vote. Then, the AIC will assess the reasonableness of the penalty that has been given by the faculty member and either approve or reject the grade penalty. The AIC always reserves the right to make its own recommendation for a grade penalty based on the confidential information that it has about the student’s previous record of violations. Because academic integrity is a serious matter at the STM, instances of multiple violations are handled severely and may even result in dismissal from the School. The AIC may recommend a different grading penalty and/or impose additional administrative penalties, such as university probation, suspension, or expulsion, all of which become part of a student’s academic record and will be reported to graduate/professional schools and outside agencies. The academic dean is responsible for communicating the decisions of the AIC in writing to both the student and the faculty member.

The academic dean is also responsible for tracking all violations of academic integrity. A complete file of each case will be kept in a confidential file in the academic dean’s office until the student leaves the school or graduates. Unless the penalties include an action which is by its nature public (see examples above), the case will not be reported to outside agencies or institutions.

Appeal of the committee’s decision may be made by written request to the Dean of the STM no later than ten days following notice of the committee’s decision. The Dean’s decision will be final.

STM Academic Integrity Tutorial

This online tutorial, developed by STM faculty, students, and administrators (with assistance from offices across the University) reviews different instances where academic integrity is in question and introduces students to the academic culture at the STM. As well, the tutorial serves as an introduction to good research practices and resources in theology and ministry at the graduate level. The tutorial is required of all new STM degree and certificate students in their first semester or summer of study. Students who do not complete the tutorial by the deadline set each semester by the Associate Dean for Academic Affairs will not be able to register for courses for the following term. Information regarding the administration of the tutorial will be given at new student orientation and by e-mail from the Associate Dean of Academic Affairs.

University Communication Policies and Student Responsibilities

The STM follows the policies set forth in the Policies and Procedures section of this Catalog.

Absences for Religious Reasons

The STM follows the policy set forth in the Policies and Procedures section of this Catalog.

Academic Advising
Students are free to form mentoring relationships with all STM faculty, including but not limited to their assigned advisors, and are encouraged to form these relationships particularly with those faculty working in the student’s area of academic or ministerial interest. STM faculty welcome the opportunity to mentor students.

All students are assigned a faculty advisor for the purpose of course selection upon entry into an STM degree program. Students are strongly encouraged to meet with their advisors once per semester to choose courses for the following semester. Consulting the advisor ensures that when it comes time for graduation the student will have fulfilled the requirements of his or her program. Conversely, students who do not consult advisors risk not having fulfilled their requirements and then needing to take extra courses in order to do so before they graduate. Please consult the STM Academic Advising Student Resource Guide for course selection information, advising resources, and tips and tools to make the most out of your advising session.

Faculty advisors are assigned based on the student’s degree program and an equitable distribution of advising among the faculty. Because advising is so important to the student’s academic success, students should feel comfortable with their faculty advisors. Students who wish to change their advisor may do so by contacting the Associate Dean for Academic Affairs, requesting and giving the reason for the change, and identifying the faculty person whom the student wishes to have as his or her advisor moving forward. The Associate Dean will handle the matter in a way that is respectful to all parties.

**Academic Grievances**

I. Preamble

The Academic Grievance Policy of the School of Theology and Ministry provides a procedure for the constructive and timely resolution of serious academic grievances of students against faculty members. An academic grievance is defined as a complaint by a currently enrolled graduate student against a member of the faculty related to a serious academic matter that has had an adverse effect on the student’s learning or ability to perform to the best of his/her ability.

Ordinarily, questions related to a course grade are not considered cause for setting in motion an academic grievance, unless the disputed grade is judged to be evidence of a broader issue or concern related to instruction, communication, access, availability, accountability and/or fairness on the part of the professor. If a student’s only issue is the grade itself, the matter should be addressed directly with the professor either in person or in writing. It is the professor’s prerogative to alter or uphold the grade. In this case, the decision of the professor is final. If a student wishes to dispute a grade based on one of the alleged broader issues named above, a student may use the Academic Grievance Process to do this. The decision-makers in the Academic Grievance Process will consider only how the broader issues affected the student’s grade; they will not abrogate the professor’s prerogative to evaluate the academic quality of the student’s work.

Resolution of grievances should involve all parties working cooperatively and respectfully to obtain resolutions acceptable to all parties involved. The grievance process first strives for mediated outcomes and only moves to directed outcomes when such efforts at mediation fail. All parties should seek resolutions at the lowest possible administrative level. The grievance should be initiated no later than the end of the sixth week of the semester immediately following the one in which the action giving rise to the complaint occurred—for example, a grievance arising from spring semester must be initiated before the end of the fall semester.

II.

Any student who believes he or she has a grievance should communicate with the faculty member(s) immediately involved as soon as possible after the action being grieved, but by no later than the close of the fall or spring semester immediately following the term in which the action giving rise to the complaint occurred. If communication results in a mutually acceptable solution, the matter shall be considered closed. If either party wishes to have a written statement of the outcome, the parties shall put the solution in writing, sign it, and each retain a copy.

III.

If, however, a resolution acceptable to all parties is not achieved, the student may present the matter in writing in a timely manner—ordinarily, “a timely manner” suggests no more than ten business days; in this case, that means ten business days from the date of the unsuccessful effort to achieve a negotiated resolution—to the chairperson of the department in which the faculty member(s) resides administratively. The written statement must clearly specify: (a) the nature of the complaint and (b) the remedy
requested. The chairperson should proceed in the following manner. If the chairperson is a party to the grievance, the Associate Dean for Academic Affairs shall act in his/her stead:

(A) After consultation with both the student and the faculty member(s) affected, the chairperson should proceed in a timely manner either to mediate the matter personally or assign it for mediation to one or more members of the department.

(B) The chairperson or designated faculty mediator(s) shall then meet formally with the faculty member(s) involved and obtain a written answer to the grievance with a full explanation of the faculty member(s)’ position. After a full investigation, the chairperson or assigned mediator(s) should meet again with the faculty member(s) and student involved, either separately, or jointly, or both, in order to work out a settlement of the problem. If the chairperson or assigned mediator(s) succeeds in resolving the grievance, he/she shall put the agreement in writing, obtain the signatures of all parties to the document, and provide copies of the agreement to all parties involved in the process.

Should the chairperson or assigned mediator not obtain a resolution, the chairperson, after conducting such further proceedings as he/she may determine to be necessary or desirable in his/her sole discretion, shall prepare a written decision and provide a copy of it to the student and the faculty member(s) involved.

IV.

A student grievant may appeal a decision of the department chairperson to the Dean. The appeal must be made in writing within ten business days of the decision of the department chairperson and must specify clearly: (a) the nature of the grievance; (b) the remedy sought; and (c) the reason or reasons why the proposed resolution emanating from step (III) above is not acceptable. Upon receiving the written appeal, the Dean or the Dean’s designees must meet with the chairperson, faculty member(s) and student involved, separately or jointly, to seek a timely solution to the issues. If such procedures produce a resolution acceptable to all parties involved, it shall be put in writing and copies given to all of the parties.

If no resolution acceptable to all parties is achieved, the Dean or the Dean’s designees shall expeditiously gather all written statements and evidence accumulated up to that point and conduct such review or such further proceedings, including hearings, as the Dean or the Dean’s designees may determine in their sole discretion to be reasonably necessary to reaching an ultimate disposition of the issue(s). In the event of a hearing, the faculty member(s) and student shall each be entitled to bring, for consultative purposes only, an advisor from the School of Theology and Ministry or the wider Boston College community. If the above process achieves a resolution acceptable to all parties, the Dean or the Dean’s designee(s) must put the agreement in writing, obtain the signatures of all parties to the document, and provide copies of the agreement to all of the parties.

If the Dean or the Dean’s designee(s) does not achieve a resolution acceptable to all parties, the Dean shall in ten working days convey his/her decision and report (or the report of his/her designee(s) as applicable) to the chairperson and the parties involved. The Dean’s decision shall be final.

Attendance

University Policy

Students are responsible for being familiar with and following the attendance policy in the Policies and Procedures section of this Catalog. In addition, each instructor has the right to specify their own, more stringent, attendance policy for a course, provided it is clearly defined in the syllabus.

STM Policy

In order to complete and achieve successfully the objectives of an STM course, students must attend the course meetings in order to engage the professor and fellow students in the teaching and learning dynamic. Unless other arrangements are made with the instructor, a student must withdraw from a course in which he or she has been absent for any reason for 25% or more of class meeting time. If a student with 25% or greater absence rate does not withdraw from the course, the student will be given a failing grade for the course.
Audits

Students enrolled in STM degree and certificate programs may audit courses and will be charged half the per-credit tuition rate. Students will not receive financial aid/tuition remission for audited courses and audited courses will not count toward degree programs (but may be counted toward certificate programs).

Students not enrolled in STM degree or certificate programs can apply through the Admissions Office to audit STM courses for half of the credit rate per course.

The STM has a reduced audit rate for Ministers-in-the-Vicinity. Please contact the Admissions Office for more information. The rate is limited.

Students cannot register to audit courses through their Agora accounts. Students should contact the STM Service Center or the Assistant Director for Financial Aid and Academic Services in order to register to audit a course.

For summer courses, students wishing to switch from credit to audit status must do so within one week of the start of the course.

Bias-Related Incidents: Reporting

As a graduate and professional school of Boston College, the School of Theology and Ministry rejects and condemns all forms of harassment, wrongful discrimination, and disrespect that occurs on the basis of race, color, national origin, sex, religion, disability, age, marital or parental status, sexual orientation, military status, or other legally protected status. In order to foster an open and respectful educational environment, the STM is committed to responding to any incident that impedes a student’s ability to learn, coexist peacefully, express ideas, or which impedes any other right listed in the Code of Student Conduct. This includes bias-related incidents that may occur between faculty or staff and students or between students themselves.

Students at the STM are encouraged to report bias-related incidents to Dr. Jennifer Bader, Associate Dean, Academic Affairs or Jacqueline Regan, Associate Dean, Student Affairs and Career Services. Students should also familiarize themselves with Boston College’s Hate Crimes and Bias-Related Incident Protocol for information on the different kinds of incidents, the process for reporting them, and the University’s responses to them. Students may also report bias-related incidents directly to the Office of Institutional Diversity using the Boston College Bias-Related Incident Report Form or through any of the other support resources at Boston College, such as University Counseling Services or the Office of Dean of Students. Students should also be aware that each member of the faculty and staff may have reporting obligations under our sexual misconduct policy.

For more information concerning the University’s policies surrounding harassment and incidents of bias, refer to the Boston College Notice of Nondiscrimination or visit the Policies and Compliance section of the Office of Institutional Diversity website.

Childbirth and Adoption Accommodation Policy

Boston College recognizes the importance of family issues to its graduate students. Eligibility requirements for this accommodation for students in the School of Theology and Ministry are as follows:

- The student must be the primary caregiver of a newborn child or an adoptive child under the age of 13 newly placed in the home.
- The student must be receiving a service stipend for work done at the School of Theology and Ministry.
- The student must be enrolled in courses full-time.
- The student must be in good academic standing.
- This student accommodation is not an employee medical leave or a leave of absence from the academic program.
- In connection with the birth of a child, a student is eligible for an accommodation extending for a period of up to eight consecutive weeks. A student who is the primary caregiver for an adoptive child under the age of 13 is eligible for an
accommodation extending for a period of up to eight consecutive weeks immediately following the placement of the child in the home.

- During the accommodation period, the student will be relieved of the service requirements that accompany the student's funding. During the remainder of the semester (before and/or after the accommodation period), the student’s supervisor will assign service duties consistent with the academic and/or administrative nature of the work for which the student was offered the stipend.

- During the accommodation period, the student may attend classes and work on course assignments to the extent possible. The student and the Associate Dean, Academic Affairs should work with the professors in these courses to adjust, to the extent reasonably possible, attendance requirements, assignment deadlines, and exam dates during the accommodation period. The Associate Dean and faculty instructors should work with the student to establish appropriate timetables for completing coursework and exams during the semester in which the accommodation is taken.

- Funding provided by the University, including funding for health insurance, if any, will continue during the accommodation period.

- The accommodation policy will not extend the total number of years of funding available to a student.

- For students with 9-month stipends, funding is for the academic year only.

- A student anticipating a childbirth or adoption accommodation must notify their faculty advisor and submit a written request to the Associate Dean for Academic Affairs or the Associate Dean for Finance and Administration. The Associate Dean will inform the other Associate Deans and the Dean of the STM of all such requests. Requests for accommodation should be made no less than three months before the expected start of the accommodation period in order to allow appropriate arrangements to be made to cover any administrative, teaching, TAing, or research responsibilities. The STM will work out specific arrangements with students, on a case-by-case basis, within the broad framework of this policy.

- Students funded by government grants or other external sources must follow the policies of their funding agency. If external funding is suspended or reduced during the accommodation period, the university will assume funding responsibility for the accommodation period. Details of the arrangement should be worked out in writing among the student and the Associate Deans for Academic Affairs and Finance and Administration, and reported to the Dean of the STM before the accommodation period begins.

Comprehensive and Synthesis Exams

Doctoral Students: S.T.D.

Consult the S.T.D. Handbook for more information about policies and procedures for comprehensive examinations. During the semesters in which a student is not registered for coursework but is preparing for and taking comprehensives, a student must be registered in TMST8528 S.T.D. Specialized Research. In accordance with the University policy on grading, comprehensive exams are graded Pass with Distinction, Pass, and Fail.

Doctoral Students: Ph.D.

Consult the Ph.D. Prospectus for more information about policies and procedures for comprehensive examinations. During the semesters in which a student is not registered for coursework but is preparing for and taking comprehensives, a student must be registered in TMST9911 Doctoral Continuation. In accordance with the University policy on grading, comprehensive exams are graded Pass with Distinction, Pass, and Fail.

M.Div. Students: Synthesis Exams

Synthesis exams are taken in the third (or for part-time students, the last) year of the M.Div. program. Consult the M.Div. Handbook and the M.Div. Program Director for more information about policies and procedures for the synthesis exams.

M.A. Students: Thesis Projects

For M.A. students, the Thesis Project serves as the comprehensive exam. Students wishing for more information about the Thesis Project should consult their faculty advisor and consult the Thesis Information Packet. In accordance with the University policy on grading comprehensive exams, Thesis Projects are graded Pass with Distinction, Pass, and Fail.
Course Loads

M.Div. students may not enroll for more than fifteen (15) credits in any one semester. The Associate Dean for Academic Affairs will monitor compliance with this policy. Exceptions are given for M.Div. students wishing to register for a 1-credit module. Students should discuss the rationale for this choice and timing with their academic advisor prior to registering for the module.

For summer course loads, please see the policy on Summer Courses.

Course Numbering

STM course numbers reveal two things about the course: the subject area and the level. The following is a key to STM Course Numbering:

- TMCE: Christian Ethics
- TMHC: History of Christianity
- TMNT: New Testament
- TMOT: Old Testament
- TMPS: Pastoral Studies
- TMPT: Practical Theology
- TMRE: Religious Education
- TMST: Systematic Theology
- TMTM: Courses that do not fit into a particular area listed above, (e.g., cross-listed courses and languages).

All courses offered at the BC STM are rigorous, graduate courses appropriate for students in graduate degree programs. They presuppose graduate level academic scholarly work. Students wishing to take a course, but having questions about whether the course will be taught at an appropriate level for their needs should contact the instructor of the course directly.

- NP = No Prerequisites Required (course numbers 7000–7999)
  This course is appropriate for students taking their first graduate course in a theological (sub) discipline or with topics or sources that are new to the students. No Prerequisites are required.

- P = Prerequisites Required (course numbers 8000–8499)
  This course is appropriate for students seeking further study in a theological (sub) discipline or with theological topics or sources. The course has prerequisites, either in terms of general background (e.g., “a year of graduate studies in theology”) and/or course work (e.g., “one course in Christology” or “fundamental moral theology”). The prerequisites are indicated by the professor.

- D = Doctoral Seminar (course numbers 8500 and above)
  This course is a doctoral level seminar. It may also be appropriate for S.T.L. and Th.M. students. Other advanced graduate students may apply. Department permission required.

Cross-Registration

In consultation with their faculty advisors, STM students may cross-register into courses at other universities and schools of theology through the following consortia: the Boston Theological Interreligious Consortium (BTI), the Consortium, and Consortium for Graduate Studies in Gender, Culture, Women, and Sexuality. More information is available in the Policies and Procedures section of this Catalog. Students can register for courses at BTI institutions by visiting the BTI website: www.bostontheological.org. Note that 50% of coursework required for a Boston College degree must be taken at Boston College, and that 50% of coursework for an ecclesiastical degree (S.T.B., S.T.L., S.T.D.) must be taken with the Ecclesiastical Faculty of the STM.
Directed Readings and Research

Directed readings and research may be pursued on a specialized topic not currently covered in the course offerings in the same year, depending on the availability of faculty to work with a student. Ordinarily only one such project may be undertaken in the course of a master’s program. Subject matter and requirements must be worked out with the professor. The agreement must be put in writing on a Readings and Research form, obtainable online or through the STM Service Center, signed by both the student and faculty member, and approved by the Associate Dean for Academic Affairs.

Doctoral Candidacy and Continuation

The STM follows the policy set forth in the Policies and Procedures section of this Catalog. To register for doctoral continuation, Ph.D. students register for TMST991101 and S.T.D. students register for TMST852801.

Doctoral Dissertation Submission

In order to graduate, your graduation date must match your graduation date listed in Agora. If not, you must contact STM’s Assistant Director for Financial Aid and Academic Services to have this corrected. Follow the instructions below to ensure you have completed all requirements.

Submitting your Ph.D. Dissertation

Ph.D. students should consult the office or the website of the Graduate School of the Morrissey College of Arts and Sciences for further instructions on how to submit their dissertation.

Submitting your S.T.D. Dissertation

Please review the S.T.D. Handbook for instructions on formatting your dissertation. Submit your dissertation electronically via eTD@BC. Instructions are available at the Electronic Theses and Dissertations page. Please review the Open Access Policy for S.T.D. Dissertations section below, detailed in the STM Academic Policies.

Enrollment Status

The STM follows the policies set forth in the Policies and Procedures section of this Catalog.

Graduate full-time enrollment is as follows:

School of Theology and Ministry—9 or more credits

All students are considered half-time with 6 credits.

Students completing degree requirements in their final semester may be given exceptions to the school’s minimum credit standard for full-time status by their academic dean.

The credits amounts listed above are used to determine a student’s enrollment status for loan deferments, immunizations, medical insurance requirements, and verifications requested by other organizations.
Graduate students in the School of Theology and Ministry are full time if enrolled in TMST8014, TMST8053, TMST8054, TMST8101, TMST8526, TMST8528, TMST8529, TMST8530, TMST8543, TMST8546, TMST9901, or TMST9911. MTS students can enroll in either TMST8053 (MTS Thesis) or TMST8014 (MTS Reflection Paper) in the last semester and should be considered full-time. Doctoral students are considered full-time if they are Graduate Assistants for academic departments, Teaching Fellows, or Research Assistants.

**Final Examinations**

The STM follows the policies set forth in the Policies and Procedures section of this Catalog.

Policies include information regarding the following:

- Exam schedules
- Students’ responsibilities
- Obtaining permission for alternate arrangements if granted permission to do so

**Foreign Language Requirements**

Students should consult individual degree program handbooks/prospectuses for program-specific requirements.

**Good Standing**

A student in one or more of the following situations is considered under academic review:

1. The student’s cumulative grade point average (GPA) falls below 3.0;
2. The student receives a grade of “incomplete” for one-half or more of the courses taken in a single semester;
3. The student has any incompletes that are not resolved by the end of the semester following the one in which the incomplete was obtained; and/or
4. The student has two or more grades that are below what is considered “Passing” for his or her degree program.

If a student is under academic review, the student will be notified in writing by the associate dean for academic affairs. The student will have until the end of semester in which she or he receives this notice in writing to bring his/her GPA up to 3.0, to complete all incompletes, and/or to develop a plan to make up the work not passed. If a student does not do these things, the student loses good academic standing. The associate dean will engage the student’s faculty course selection advisor, the relevant department chair, and the associate dean for student affairs in a discussion as to whether and under what conditions the student may continue in his or her degree or certificate program.

The associate dean for academic affairs will also notify the associate dean for enrollment management of the names of all students who have lost good academic standing. As a result of these conversations, the student may be prevented from enrolling in further coursework, lose his or her financial aid, be dismissed from the University, or be given further conditions to meet in order to remain enrolled in the STM. The associate dean for academic affairs will communicate this information to the student in writing as soon as possible after the meeting.

**Grading**

Grades in the STM reflect the Academic Policies of Boston College for Graduate Courses as outlined in the Policies and Procedures section of this Catalog. In addition, the STM faculty has adopted the following grading guidelines:
The STM’s policy is articulated in relation to individual assignments; the principles, however, apply to the overall grade for a course.

- **A (4.0) (94–100)**

  This is the highest grade awarded for individual assignments, and for a course as a whole. “A” indicates that a student’s work not only meets, but exceeds the requirements specified for an assignment, and does so in an exemplary manner. As such it should be rare and granted for exemplary work. The outstanding quality of the work includes, but is not limited to, evidence of breadth and depth in reading, insightful engagement with primary and secondary sources, and a well-constructed argument that is creative in its analysis and, where appropriate, underscores the pastoral implications of a topic. To receive an “A,” the assignment would be written in a way that is concise and compelling, while also conforming to accepted academic methodologies for the citation of sources.

- **A- (3.67) (90–93)**

  This grade indicates that the work significantly exceeds the standards for a “B.” The professor’s comments will identify the area/s in which the assignment significantly exceeds the standards, such as its argument, methodology, range of reading, or its structure/expression.

- **B+ (3.33) (87–89)**

  This grade indicates that the work exceeds the standards for a “B.” The professor’s comments will identify both what aspect/s of the paper went beyond “B” and what would have enhanced the paper’s argument or presentation.

- **B (3.0) (84–86)**

  This grade indicates that the assignment satisfies requirements specified for the particular task and does so in a competent manner; as such, the work meets expectations at the graduate level. As such it should be seen as the standard grade for satisfactory completion. “B” confirms that an assignment demonstrates a sound understanding of relevant material, is constructed coherently, and communicates ideas in a clear and accessible manner, while also being properly attentive to the norms governing the citation of references. While the B grade recognizes competency in the area covered by the assignment, the grade also suggests that greater breadth or depth was possible in fulfilling the assignment; this implies, for example, the need for wider or deeper reading, a better sequencing of ideas, or greater attentiveness to written expression in order to enhance clarity.

- **B- (2.67) (80–83)**

  This grade indicates that the work approaches the standards for a “B,” but does not fulfill all the requirements of that grade. The professor’s comments will indicate whether the deficit resides in one particular aspect of the paper—ideas, methodology, works consulted, or its structure/expression—or whether more than one aspect of the paper fell below the standard for a higher grade.

- **C+ (2.33) (77–79)**

  This grade indicates that the work significantly fails to meet the standards for a B,” but is more than marginally acceptable. The professor’s comments will identify both what aspect/s of the paper were insufficient and what would have enhanced the paper’s argument or presentation.

- **C (2.0) (74–76)**
This grade applies to work that is no more than marginally acceptable at the graduate level. The grade makes clear that the work does not rise to the level of competency in the topic covered by the assignment; the deficits could be in any or all of the work’s ideas, research, methodology, or structure/expression. “C” indicates that satisfactory completion of the course will require significant improvement in the areas specified by the professor’s comments.

- F (0.0)

An assignment that receives this grade is unsatisfactory in all of the areas that demonstrate competency for a graduate student. There are no other gradations between C and F. All work below C is unsatisfactory.

Grade Changes

The STM follows the policies set forth in the Policies and Procedures section of this Catalog.

Graduation

For graduation policies and procedures, please visit the Policies and Procedures section of this Catalog.

Walking in the STM Diploma Ceremony: Students who have completed all their requirements for their degrees on or before the Wednesday just prior to May graduation may participate in the STM diploma ceremony, even if they have not met the university deadlines for graduation (and, thus won’t be actually receiving diplomas). Students who have not completed their requirements by the Wednesday before graduation may not participate in the STM diploma ceremony. Exceptions to this policy are rare and are granted solely at the discretion of the dean of the STM.

Incompletes

A student may, with adequate reason and at the discretion of the instructor, take an incomplete in a course. A formal request form must be obtained at the STM Service Center and signed by the professor and the Associate Dean for Academic Affairs. For approval to be granted, a date for completion must be agreed upon between the student and the professor. Except in extraordinary cases, all such “I” grades will automatically be changed to “F” according to the following University-dictated schedule:

- Spring: August 1
- Fall: March 1
- Summer: October 1

See the STM Good Standing policy for the number of incompletes a student may take in a given semester or summer and remain in good academic standing.

Leave of Absence and Readmission after a Leave of Absence

The STM follows the policies set forth in the Policies and Procedures section of this Catalog.

Students are not eligible for STM financial aid or funding while on leave. When they return to the STM, students continue to receive the tuition remission that they were granted upon entrance into their degree program.
Students wishing to take courses at theological institutions outside of Boston College and the BTI while on leave of absence from Boston College are strongly advised to discuss this plan with their faculty advisor, the relevant department chair and the Associate Dean for Academic Affairs to make sure that the courses they are planning to take will transfer into and be counted toward their STM degree program. Please see the Transfer of Credit policy for more information.

In some cases, the Associate Dean may require that the student work out a plan of study for the following semester or for the completion of the degree as a condition of re-admission after a leave of absence.

Masters’ Theses

All M.A. and M.Ed. students are required to complete a non-credit thesis in or prior to the last semester of their programs. Students seeking more information about the thesis should consult the Thesis Project Guidelines, as found on the M.A. program page of the STM website.

M.T.S. students have the option of using one of their electives to do a 3-credit thesis. Students seeking more information about the thesis should consult the M.T.S. Handbook and/or consult the M.T.S. Program Director. Students should be registered for TMST8053 M.T.S. Thesis.

Th.M. in Advanced Theological Studies students enroll in a 6-credit thesis course during their final semester; these 6 credits are part of the 24 required for the degree. Students seeking more information about the thesis should consult the Th.M. Program Director.

Online Courses

Students wishing to take online courses should note the following degree-specific policies:

- M.A.T.M. students doing the M.A. in hybrid mode may take up to 7 courses online toward their degrees (not including Contextual Education). M.A. students not doing the degree in hybrid mode may take up to 4 courses online.
- M.T.S. students may take up to two online courses toward their degree.
- M.Div. students may take up to three online courses toward their degree.
- Th.M. and S.T.L. students may ordinarily not take online courses toward their degrees. By way of exception, the program director may grant permission to those students with a concentration in Spirituality Studies for 1 online course offered in conjunction with the Institute for Advanced Jesuit Studies.
- S.T.D. students may not take online courses toward their degree.
- Ph.D. students wanting to take a particular online course should consult their faculty advisors about whether and under what circumstances that course would be appropriate for their degree.

Open Access Policy for S.T.D. Dissertations

Upon submission of a completed S.T.D. dissertation in the School of Theology and Ministry, a student may request an embargo for not more than two years without special permission. To request an extension beyond two years, but for no more than five years, a student must submit a written rationale to the Associate Dean for Academic Affairs. Requests for more than five years will be granted only for extraordinary reasons.

Pass/Fail Option

Select courses are designated Pass/Fail. All requests for Pass/Fail credit, beyond taking courses designated Pass/Fail, must be approved by the student's academic advisor and the Associate Dean for Academic Affairs during the registration period. Students should obtain a Pass/Fail Approval Form from the Academic Forms page or from the STM Service Center.
In order to receive a grade of Pass, a student must complete all assignments in the course, is subject to the same attendance policy as all other students in the course, and must earn a final grade in the course of C or above. A Pass will then be entered as the grade for the course instead of a letter grade.

- M.A. students may take 2 courses P/F beyond those designated as such.
- M.Div. students may take no more than 18 credits on a P/F basis.
- M.T.S. students may take no more than 12 credits on a P/F basis.
- Th.M., S.T.L., and S.T.D. students may not elect to take any courses P/F, with the exception of the Spiritual Direction Practicum.
- Ph.D. students should consult the dean’s office of the Graduate School of the Morrissey College of Arts and Sciences.

Prerequisites

For students with little or no background in writing research papers in the humanities, students for whom English is a second language, and others, the Admissions Committee may decide to recommend or require TMST7081 Writing and Research for Theology and Ministry as a condition of admission into a master's or certificate program.

TMST7081 is not a remedial course and is highly recommended for most students. It can be used for elective credit toward the degree by M.A. and M.Ed. students who have not been required to take it. If the student is required to take this course, however, it must be taken in addition to the credit hours required for the degree.

Four courses (12 credits) in philosophy are prerequisites for the M.Div. degree. These courses can be taken on an undergraduate or graduate level, and they can be taken Pass/Fail. For students who do not have at least 12 credits of philosophy at the time of application to the M.Div. program, these courses may be taken during the first year of the M.Div. All courses must be taken for credit and the courses themselves approved by the M.Div. program director. As prerequisites for the degree, they do not count in the 84 credits required for the M.Div.

Professional Ethics in Ministry Workshop

STM's Professional Ethics in Ministry Workshop, required for all STM students, is intended for students as they begin their programs at STM. The workshop considers ministerial ethics in theological, pastoral, and legal perspectives and invites students into an ongoing, school-wide conversation and reflection on the nature of ministerial roles and the power dynamics and ethics that attend them. Students in ministerial degree programs (except for summers-only degrees) with a field education requirement (Contextual Education or Supervised Ministry) must fulfill this requirement before they begin their placements. All other students must complete the requirement before they graduate. Information about when the Professional Ethics in Ministry Workshop is offered is distributed with admission materials. Students who have not fulfilled the requirement in their first year of study will be notified of the next available date to fulfill the requirement by the Associate Dean for Academic Affairs.

Readmission after a Lapse in Enrollment

All students are required to keep their University status current. If a student does not do so, s/he must seek approval from the STM to be re-admitted to the degree program.

Each degree has a term limit—a number of years from the date of matriculation into the degree program by which a student must finish the degree. These term limits are the following:

- M.A. and M.Ed.: 5 years
- M.T.S.: 4 years
- M.Div.: 6 years
- Th.M.: 2 years
If a student seeks readmission before the term limit expires, s/he must write the Associate Dean for Academic Affairs to request re-admittance before the start of the semester in which the student wishes to return. If granted, all courses taken towards the degree thus far will count toward the degree.

If a student seeks readmission after the term limit has expired, the student must reapply through the Office of Admissions. To begin this process, the student should e-mail the Associate Dean for Enrollment Management. If the student is readmitted to the program, a decision will be made on a case-by-case basis by the Associate Dean for Academic Affairs as to (1) which and how many courses already taken will count toward the degree; and (2) any changes in requirements for graduation with the degree. The decision to re-admit a student will be based on a consideration of the best interests of both the student and the University.

**S.T.L. Thesis Submission**

Before your defense, please consult the S.T.L. Handbook, found on the STM website, and follow the process outlined therein, including what to do with your signature page and instructions on how and where to submit your S.T.L. Thesis.

**STM Style Guide**

The STM faculty has unanimously adopted the [STM Style Guide](#) for all written assignments.

**Summer Courses**

M.A. students as well as students enrolled in Certificate studies may take summer courses at any time during their studies. Enrollment policies are as follows:

- Students who have not completed a semester or summer at the STM may take up to two on-campus courses (6 credits) per summer, with a maximum of one course (3 credits) per summer session.
- In subsequent summers, students who have and maintain a 3.5 GPA may take up to two on-campus courses (6 credits) per session. This is an intensive schedule and not recommended for all students. Students wanting to take more than one course a session should check with their advisors before registering.
- For students who are primarily "summers only," Spiritual Formation and Contextual Education may be taken in addition to the guidelines set above.

Ph.D. students should consult with their academic advisor before enrolling in summer courses.

M.Div. and M.T.S. students are eligible to take summer courses after at least one semester of study during the Academic Year.* Currently enrolled M.Div. and M.T.S. students may take up to two courses (6 credits) per summer, with a maximum of one course (3 credits) per summer session. With permission, M.Div. students may take a 1-credit module, in addition to one or two other summer courses in the same summer. Students should discuss the rationale for this choice and timing with their academic advisor prior to registering for the module.

For Th.M., S.T.L., S.T.D. students, permission of the program director is required before enrolling in summer courses.

*With permission of the program director, incoming biblical studies students have the option of beginning their language courses in the summer term prior to their first semester, not to exceed a total of 6 credits during that summer term.
For students in all STM degree programs, summer courses in languages are acceptable if they conform to the requirements of the degree program to which they are to be applied; the student should contact the relevant program director to determine such suitability before enrolling in a summer language course.

**Summer Course Registration**

All students must be registered for class before the class begins. Please note: all tuition and housing charges must be paid prior to the first class. Students who have not paid their tuition and housing charges will not be admitted to class until the charges are paid. Persons with questions about this policy should contact the STM’s associate dean for academic affairs.

**Supervised Ministry: Criteria for Enrollment**

Upon beginning their ministerial studies at the STM, students are responsible for knowing and following the guidelines for their respective degree programs regarding supervised ministry requirements. Cultivating a positive working relationship with the appropriate faculty director of supervised ministry is essential to the dynamic and interrelated processes of conscientious self-assessment, enrollment in the supervised ministry course, the appropriate selection of sites and supervisors, the development and implementation of learning goals and objectives, and rigorous, constructive and formative evaluations.

Mindful of the fact that students admitted to ministerial degree programs at the STM are expected to manifest the faith and religious commitment, the personal responsibility, the emotional maturity, the capacity for collaboration and perspective-taking, and the resiliency, resourcefulness and integrity that a program of preparation for professional ministry presupposes, the faculty members and administrators of the STM take extremely seriously their collective institutional responsibility for guaranteeing that these expectations, among others, are met and verified before any student’s enrollment in a supervised ministry course is approved. Associated with such responsibility is ongoing accountability to those supervised ministry sites and supervisors with whom the STM works in partnership.

In the light of such responsibility, when a faculty director of supervised ministry and/or the associate dean for academic affairs is provided with substantive evidence indicative of a student’s lack of readiness or suitability for undertaking supervised ministry in general or a specialized supervised ministry in particular, it is the responsibility of the directors for supervised ministry and the associate dean for academic affairs to delay or deny enrollment in the supervised ministry course. In obtaining and evaluating such evidence, the faculty directors and the associate dean may consult with other Boston College personnel, who may reveal relevant information as permitted by law. In addition, the appropriate faculty director and/or the associate dean are responsible for providing the student with adequate feedback regarding the reasons for the decision as well as support and guidance regarding subsequent steps. Such advice may include referring the student to appropriate avenues of personal and professional development, inviting the student to apply for supervised ministry at a future time, encouraging the student to consider a change of degree program, or recommending (or in some cases mandating) a leave of absence or withdrawal from the STM.

**Syllabi: Incorporated Texts**

The following text is incorporated into every STM course syllabus, usually via a link:

**For Students with Disabilities:** If you have a disability and will be requesting accommodations for this course, please register with the Connors Family Learning Center (learning disabilities and ADHD) or the Disability Services Office (all other disabilities). Advance notice and appropriate documentation are required for accommodations.

**Writing Help for All Students:** The STM Writing Companions Corner (WCC) offers students one-on-one help with writing research papers, exegeses, reflection papers, and other assignments frequently given by STM faculty. Please watch STM News for more information on signing up for an appointment in the WCC.

**Academic Integrity Policy:** Plagiarism is the act of taking the words, ideas, data, illustrations, or statements of another person or source, and presenting them as one’s own. Penalties at Boston College range from a grade penalty to dismissal from the University. To avoid plagiarism, any use of another’s words or ideas must be fully cited. If in the original wording, quotation marks
or blocked, indented quotations must be used. For more information regarding plagiarism and other violations of academic integrity, please consult the STM website.

**Bias Neutral and Inclusive Language:** Language is not fixed or static, but is constantly evolving and changing as society’s attitudes and practices change. Be aware of the development of new forms of expression that endeavor to describe persons in non-discriminatory ways that are appropriate, respectful, and just. In accordance with the *Chicago Manual of Style* and generally accepted contemporary canons of scholarship, the expectation is to use bias neutral language in academic writing. In addition to gender inclusive language, conscientious effort should be made to use appropriate language with reference to race, ethnicity, disability, age, religion, social status, etc.

**Taping of Lectures and Presentations**

Except in cases where a student has a documented disability that requires an accommodation, presentations and lectures given by faculty, students, or others in the classroom cannot be recorded or distributed for any purpose (including use by enrolled students) without the presenter’s permission. If a class is being recorded, the instructor must inform the class that the class is being recorded (without breaking the confidentiality of a student with a disability).

Students who wish to record a lecture or presentation must ask for and receive the permission of the presenter prior to recording. Recording of lectures of class presentations made with the presenter’s advance consent is authorized solely for the purposes of individual or group study with students enrolled in the same class unless the instructor has explicit written consent for other uses. The recording may not be reproduced or distributed in any manner, including the Internet, without the instructor’s explicit prior written consent.

**Time-to-Degree Completion and Extensions**

Each degree has its own time limit for graduation from the date of matriculation into the degree program.

- M.A. and M.Ed.: 5 years
- M.T.S.: 4 years
- M.Div.: 6 years
- Th.M.: 2 years
- S.T.L.: 4 years
- S.T.D.: 5 years, with one year extension possible

Students must petition the STM for an extension if they will not complete the degree in the time frame indicated above. Normally, only one extension will be granted per student. Students should send a letter by U.S. mail or e-mail to the Associate Dean for Academic Affairs, detailing (1) the reason the extension is needed and (2) giving a completion date for the degree. The Associate Dean will circulate the petition for extension to the student’s faculty advisor and program director for approval before making a final decision on an extension. The Associate Dean will notify the student as to whether the petition has been approved and the student’s new graduation term.

**Transcripts and Transcripts/Diploma Holds**

The STM follows the policies set forth in the Policies and Procedures section of this Catalog.

**Transfer of Credit**
All STM degree students, with the exception of M.Div. students, may transfer a total of six graduate credits from another regionally accredited or ATS accredited university or school of theology, subject to the following criteria:

- At the date of the student's graduation, his or her transfer credits may be no more than five years old;
- Transfer credits must have been obtained for graduate-level coursework;
- Each transfer course must have been taken for a letter grade and a minimum grade of "B" must have been earned;
- Credit must not have been used in obtaining any other degree; and
- Coursework must be relevant to the student's degree program.

M.Div. students may transfer in 18 credits to their degree program. All of the above criteria must be met, except that transfer credits may be no more than six years old.

Students may transfer up to 12 credits taken at the STM prior to degree matriculation into an STM degree program. After admission into the degree program, students wishing to do this should contact the Associate Dean for Academic Affairs.

Jesuit scholastics transferring in courses from First Studies will receive a letter from the Director of Jesuit Studies in the spring or summer prior to their arrival at STM with instructions on how to transfer in those credits.

All other students (including Jesuits transferring courses from sources other than First Studies prior to enrollment) should follow the procedure outlined below to transfer credits to STM degrees. In order to transfer credits into your STM degree program, you will need to submit the following materials to the academic services specialist:

- Transcript containing the courses you wish to transfer in (if you submitted the transcript with your admissions application, stop by the admissions office and ask that it be printed out for you; if you did not submit it already, then contact the institution and have them send an official transcript to Karen Smith, Academic Services Specialist, Boston College School of Theology and Ministry, 140 Commonwealth Ave., Chestnut Hill, MA 02467).
- Syllabi of the courses you wish to transfer.
- An up-to-date program of study/course tracking sheet indicating the courses you’ve taken so far at STM, the courses you are hoping to transfer into the degree, and the requirements that you are proposing that all those courses fulfill (blank forms can be printed from the STM website).
- A completed Transfer of Credits form (to be obtained from the academic services specialist).

Please deliver all of the above documents to the academic services specialist, who will circulate all information for approval to the student’s advisor, department chair, and the associate dean for academic affairs (for Jesuit Scholastics, it will also go to the director of Jesuit Studies). The associate dean will send approved credit transfers to University Student Services, who will complete the transfer process. If courses do not show up in your Agora course history within two weeks, please contact the academic services specialist.

Withdrawal from a Course

The STM follows the policies set forth in the Policies and Procedures section of this Catalog.

If you decide to drop a course after the posted add/drop period, you will be responsible for paying whatever portion of the course is not refunded based on the withdrawal date and according to the University's tuition refund schedule. Please note, if you are receiving tuition remission funding, it will be cancelled for the dropped course and you will be responsible for the payment.

Withdrawal from Boston College
The STM follows the policies set forth in the Policies and Procedures section of this Catalog.

Woods College of Advancing Studies, Graduate Programs

As one of the eight schools that make up Boston College, The James A. Woods, S.J., College of Advancing Studies (Woods College), fosters in its students rigorous intellectual development coupled with religious, ethical, and personal formation in order to prepare them for citizenship, service, and leadership in a global society. Within the context of the Boston College environment, Woods College promotes the care and attention to the human person that is the hallmark of Jesuit Catholic education. In addition, our faculty and students engage in significant applied scholarship that enriches the culture and addresses important societal needs.

Woods College offers the atmosphere of a small college within the environment of a large university. Students receive personal attention while enjoying access to the many resources of Boston College. Courses are ordinarily scheduled after work hours during the week. Online courses are available for specific programs.

Graduate Programs

The James A. Woods, S.J., College of Advancing Studies offers graduate degree programs that focus on the application of knowledge and skills to professional practice. The graduate programs combine academic and workplace experience to enable students to enhance their professional competencies, thereby facilitating career development. With an applied focus, each program provides learning opportunities to develop the skills needed to develop innovative, practical, and effective solutions that can be applied to relevant professional and societal challenges.

Woods College graduate program directors, faculty, and advisors help direct previous learning and work experience toward degree completion and career advancement through advanced coursework and complex projects.

The graduate programs in Woods College seek to offer degree programs to provide effective and efficient learning opportunities for students to develop complex knowledge and skills with the goal of preparing students to address current and future professional and societal challenges.

The graduate programs offer the following Master-level degree programs.

- Master of Science in Applied Economics
- Master of Science in Cybersecurity Policy and Governance
- Master in Healthcare Administration
- Master of Science Leadership and Administration
- Master of Science Sports Administration

Graduate Certificates

The graduate programs offer the following graduate-level certificates.

Data Analytics Graduate Certificates

- Graduate Certificate in Data Analytics
Leadership and Administration Graduate Certificates

- Graduate Certificate in Corporate Communications and Marketing
- Graduate Certificate in Executive Leadership/Organizational Development
- Graduate Certificate in Human Resources
- Graduate Certificate in Project Management

Cybersecurity Graduate Certificates

- Graduate Certificate in Cybersecurity Policy and Strategy
- Graduate Certificate in Computer Security
- Graduate Certificate in National Security and Global Affairs

Master of Science in Applied Economics (On Campus and Online)

Program Description

The Master of Science in Applied Economics offers a practical and comprehensive curriculum to students interested in acquiring skills related to the analysis and interpretation of data across a variety of fields. Through training in Economic theory, graduates will be equipped to understand the context of data they are analyzing, and through training in cutting-edge analytic techniques, they will be able to analyze the data, interpret and present results to decision makers, and make recommendations bolstered by the results of the data analysis. Focus of the program is on preparing graduates to use rigorous analytic approaches to provide actionable insights for their organization. The program provides individuals with extensive training in the tools and methods necessary for understanding complex policy issues, industry trends, and analytic strategies within fields and industries including health care, finance, marketing, and environmental policy. These skills are developed within a curricular framework that emphasizes reflective, people-centered, ethical decision making that reflects the Jesuit, Ignatian tradition. The program is intended for individuals seeking to begin or advance careers in industry, policy and government, or non-profit sector.

The Master of Science in Applied Economics is a ten-course degree program. The program can be completed in a 12-month period, but is designed to be flexible in meeting student needs, allowing students to attend full- or part-time. Applications are accepted on a rolling basis for admission in the fall, spring and summer semesters. All undergraduate majors are encouraged to apply.

Program graduates develop career skills that include:

- Use of economic models to analyze the choices made by consumers, investors, firms, and governments
- Utilizing macro and microeconomic models in order to analyze business, policy, and social issues and decisions
- Interpreting and analyzing macroeconomic data to formulate economic policy and to evaluate the impact of macroeconomic events and forces on their organization
- Practical knowledge of data analysis including econometric and non-econometric approaches
- Applying economic models and econometric techniques in the context of economic analysis in order to address practical business or policy issues
- Use of statistical/econometric software packages
- Ability to evaluate the ethical ramifications of economic policy proposals

Admission Requirements

- Bachelor’s degree from a regionally accredited college/university (minimum GPA 3.0)
- Official academic transcripts from colleges/universities where courses were completed
- GRE (reporting code 7534) or GMAT (reporting code 44X-HX-07)
Prerequisite courses: Principles of Microeconomics,* Principles of Macroeconomics,* Statistics,* Calculus I,* and Calculus II**

Notes:

*CLEP exam score of 56 or higher is acceptable in lieu of a passing grade from accredited undergraduate program

**Calculus II may be taken concurrently during your first semester of study. This requirement can also be fulfilled by taking ADEC3510 Mathematics for Economists (does not count toward the degree).

International Students—Additional Admission Requirements

In addition to the general requirements listed above, international students have the following requirements:

- TOEFL (minimum 90–100 range) (reporting code 3276) or IELTS (minimum 6.5–7.5 range) from within the past two years, unless they have completed their undergraduate degree at a regionally-accredited U.S. institution, or a foreign institution in which English is the medium of instruction.
- Detailed course-by-course transcript evaluation indicating conferral of an undergraduate degree that is equivalent to a U.S. bachelor's degree from an accredited institution (see transcript requirements for international students).

Degree Requirements

Ten courses are required to complete the Master of Science in Applied Economics.

Core Requirements (All Required, 15 Credits)

- ADEC7201 Applied Microeconomic Theory
- ADEC7200 Applied Macroeconomic Theory
- ADEC7320 Econometrics
- ADEC7310 Data Analysis
- ADEC7500 Ethics, Economics, and Public Policy

Electives Requirements (Selected from the following, 15 Credits)

- ADEC7101 Directed Readings and Research
- ADEC7340 Advanced Urban and Regional Economics
- ADEC7350 Economics of Banking and Insurance
- ADEC7360 Financial Economics
- ADEC7370 Applied Stress Testing for Economists
- ADEC7380 Empirical Health Economics
- ADEC7390 Empirical Money and Banking
- ADEC7410 Operations Research in Applied Economics
Scheduling and Tuition

Program courses are ordinarily scheduled to meet one time per week starting in the late afternoons on week nights and during the day on Saturdays. Courses meet face-to-face, and select courses are offered online. Students can complete the program in either modality or combine classes according to their schedule. Students who complete the required courses will be awarded the Graduate Certificate in Data Analytics at the time of conferral of the Master degree.

Information about tuition rates for the 2020–2021 academic year is available at the Tuition and Fees page. Students are assessed a $25 registration fee each semester they enroll in courses.

Master of Science in Cybersecurity Policy and Governance (On Campus and Online)

Program Description

The Master of Science in Cybersecurity Policy and Governance provides students with the skills necessary to manage the critical and emerging cybersecurity issues faced by private industry and government. Taught by industry leaders and practitioners, students will learn applied and hands-on ways to identify, assess, and manage cyber risk, and to develop and implement a proactive, comprehensive cybersecurity strategy to effectively defend, mitigate, and recover from a cyber-attack. The program prepares practitioners to lead and design a business case for investment to senior executives, boards of directors, and government officials, and to bridge the communication gap between Information Technology (IT) security professionals and key business stakeholders.

Students also will learn to cultivate strategies based on ethical principles informed by company policies and government regulations to protect against and respond to cyber threats. The program emphasizes leadership, critical thinking, analytic problem solving, and strong communication skills preparing practitioners to meet and respond to the varying issues presented by the rapidly changing cyber ecosystem.

The Master of Science in Cybersecurity Policy and Governance is a ten-course degree program that can be completed in a 16-month period, but is designed to be flexible in meeting students’ needs. The program is intended for business and government professionals, managers, and practitioners, IT professionals, and individuals seeking skills in cybersecurity strategy, leadership, management, and policy to begin or advance careers in private industry or government. As a working professional, you may wish to attend full- or part-time. Applications are accepted on a rolling basis for admission in the fall or spring semesters.
Admission Requirements

- Bachelor’s degree from a regionally accredited college/university (minimum GPA 3.0)
- Official academic transcripts from colleges/universities where courses were completed
- Personal Statement
- Letter of Recommendation (Two)
- Resume
- Application Fee
- Professional work experience (minimum of three years) involving information technology, cybersecurity related issues, business management, communications, privacy, risk management and compliance, and/or law enforcement and national security concerns.

Notes:

Applicants with less than 3 years of professional experience will be considered for admission based on their academic credentials and relevant coursework.

Applicants who do not meet these requirements also may be considered for admission with the following condition: the completion of an approved course(s) as a non-degree student within the Cybersecurity Program, as approved by the Program Director, with a grade of B or higher.

International Students

Applicants requiring a student visa to enroll in this program are currently not eligible to apply for this program.

Program Requirements

Ten courses are required to complete the Master of Science in Cybersecurity Policy and Governance.

Core Requirements (All Required, 18 Credits)

- ADCY6000 Cyber Ecosystem and Cybersecurity
- ADCY6050 Cybersecurity Policy: Privacy and Legal Requirements
- ADCY6300 Network and Infrastructure Security (Prereq: ADCY6000)
- ADCY6350 Incident Response and Management
- ADCY6500 Organizational Effectiveness: Governance, Risk Management, and Compliance
- ADCY6900 Ethical Issues in Cybersecurity

Students choose a specialization below or 12 credits of any non-core courses to complete the degree program.

Cybersecurity Risk Management and Strategy Specialization Requirements (Select from the following, 12 Credits)

- ADCY6925 Cybersecurity: Risk Management and Resiliency
- ADCY6400 Managing Cyber Risk: Mobile Devices and Social Networking
- ADCY6475 Security in the Cloud
- ADCY6600 Establishing the Business Case and Resource Allocation
- ADCY6450 Cyber Investigations and Digital Forensics
- ADCY6640 National Security: Law, Policy, and Investigations

**Computer Security Specialization Requirements (Select from the following, 12 Credits)**

- ADCY6810 Cybersecurity: Designing Offensive/Defensive Capabilities (Prereq: ADCY6600)
- ADCY6450 Cyber Investigations and Digital Forensics
- ADCY6475 Security in the Cloud
- ADCY6925 Cybersecurity: Risk Management and Resiliency
- ADCY6820 Cybersecurity Engineering
- ADCY6830 Applied Cryptography
- ADCY6840 Machine Learning and Data Analytics

**National Security and Global Affairs Specialization Requirements (Select from the following, 12 Credits)**

- ADCY6650 Role of Intelligence: Enabling Proactive Security
- ADCY6200 International Cybersecurity
- ADCY6450 Cyber Investigations and Digital Forensics
- ADCY6925 Cybersecurity: Risk Management and Resiliency
- ADCY6640 National Security: Law, Policy, and Investigations
- ADCY6630 Counterintelligence: Methods and Process
- ADCY6620 National Security: Corporate Law and Policy

**Elective Requirements if you are not completing a specialization (Select from the following, 12 Credits)**

- ADCY6200 International Cybersecurity
- ADCY6400 Managing Cyber Risk: Mobile Devices and Social Networking
- ADCY6425 Cyber Strategy: Innovation, Technology, and Formative Development
- ADCY6450 Cyber Investigations and Digital Forensics
- ADCY6475 Security in the Cloud
- ADCY6600 Establishing the Business Case and Resource Allocation
- ADCY6620 National Security: Corporate Law and Policy
- ADCY6630 Counterintelligence: Methods and Process
- ADCY6640 National Security: Law, Policy, and Investigations
- ADCY6650 Role of Intelligence: Enabling Proactive Security
- ADCY6700 Privacy Law and Data Protection
- ADCY6810 Cybersecurity: Designing Offensive/Defensive Capabilities (Prereq: ADCY6600)
- ADCY6820 Cybersecurity Engineering
- ADCY6830 Applied Cryptography
- ADCY6840 Machine Learning and Data Analytics
- ADCY6850 Applied Research Project: Study Abroad at Cambridge University, UK
- ADCY6925 Cybersecurity: Risk Management and Resiliency
- ADCY6955 Applied Research Project for Non-Profit Organizations
Scheduling and Tuition

Program courses are scheduled ordinarily meeting one time per week starting in the late afternoons on week nights. Courses meet face-to-face and select courses are offered online.

Information about tuition rates for the 2020–2021 academic year is available at the Tuition and Fees page. Students are assessed a $25 registration fee each semester they enroll in courses.

Master of Healthcare Administration (Online Only)

Program Description

The Master of Healthcare Administration (MHA) at Boston College prepares students to provide effective leadership in the fast-paced and rapidly evolving healthcare sector. With a focus on service and leadership in a global society, the MHA program was built with strong links to industry, and draws knowledge and inspiration from Boston's innovative healthcare, pharmaceutical, and other life sciences economy.

The curriculum was designed with input from an Advisory Board comprised of healthcare, life sciences, and academic leaders, who continue to advise on key competencies and curriculum. Designed to support the career goals of emerging healthcare managers and supervisors, the MHA curriculum is competency-based curriculum and delivered entirely online. These accelerated courses, which are offered in seven-week sessions, help students gain knowledge and develop mastery of the industry-related skills.

Most students choose to take one course every seven weeks and complete the program in two years. Some students elect to take two courses every seven weeks in order to progress more quickly through the curriculum.

The MHA program draws students from a broad range of settings, including health systems management, insurance providers, and biotechnology, pharmaceutical, and medical device industries. The program also attracts professionals from the software and technology sectors, and others who aspire to pivot into healthcare related industries. BC MHA graduates are able to tackle emerging challenges and capitalize on new opportunities in healthcare. BC MHA graduates advance or find new careers in leadership, management, research, and consulting.

With three starting points each year (August, January, and May), applications for admissions are accepted on a rolling basis.

Admission Requirements

- Bachelor’s degree from a regionally accredited college/university (minimum GPA 3.0)
- Official academic transcripts from colleges/universities where courses were completed
- Personal Statement
- Letter of Recommendation (Two)
- Resume
- Application Fee
- Two years of professional work experience. Applicants with less than two years of professional experience may be considered for admission based on a holistic review of academic credentials, internships, and relevant undergraduate coursework, together with an interview.
- Optional GRE (reporting code 7534) or GMAT (reporting code 44X-HX-74) (recommended only for students with an undergraduate GPA under 3.0)
International Students

Applicants requiring a student visa to enroll in this program are currently not eligible to apply for this program.

Degree Requirements

Thirteen courses are required to complete the Master of Health Administration. There are no electives.

Core Requirements (All Required, 46 Credits)

- ADHA7000 Introduction to Healthcare Systems and Organizations (4 credits)
- ADHA7005 Management Theory and Organizational Behavior (4 credits)
- ADHA7010 Health Policy (4 credits)
- ADHA7015 Leadership in Healthcare (4 credits)
- ADHA7020 Healthcare Human Resources Management (4 credits)
- ADHA7025 Healthcare Finance (4 credits)
- ADHA7033 Healthcare Ethics and Law (4 credits)
- ADHA7035 Healthcare Innovation-Based Strategy: Managing Change (2 credits)
- ADHA7040 Healthcare Quality Management (4 credits)
- ADHA7045 Health Analytics (4 credits)
- ADHA7050 Healthcare Information Technology (4 credits)
- ADHA7055 Strategic Planning and Marketing (4 credits)

Scheduling and Tuition

Program courses are offered online asynchronously with some synchronous live sessions.

Information about tuition rates for the 2020–2021 academic year is available at the Tuition and Fees page. Students are assessed a $25 registration fee each semester they enroll in courses.

Master of Science in Leadership and Administration (On Campus and Online)

Program Description

This program is designed to help students acquire high-level management skills and competencies necessary for effective leadership. With a foundation in leading and managing change, creating diverse teams, project management, and Ignatian-based, applied ethics, students graduate from this program grounded and confident in key leadership skills. With four specializations to choose from, this degree is designed to equip you with the skills and knowledge to lead and manage in a variety of professional fields.

The M.S. in Leadership and Administration Program is comprised of core courses. Students pick one specialization to focus the remainder of the degree program: Corporate Communications and Marketing; Executive Leadership and Organizational Development; Human Resources Management; or Project Management. Each specialization may also be obtained as a stand-alone certificate.
Admission Requirements

- Bachelor’s degree from a regionally accredited college/university (minimum GPA 3.0)
- Official academic transcripts from colleges/universities where courses were completed
- Personal Statement
- Letter of Recommendation (Two)
- Resume
- Application Fee
- Optional—GRE (reporting code 7534) or GMAT (reporting code 44X-HX-47)— Recommended for students with lower undergraduate GPA

International Students—Additional Admission Requirements

In addition to the general requirements listed above, international students have the following requirements:

- Interview (in person or online)
- TOEFL (minimum 90–100 range) (reporting code 3276) or IELTS (minimum 6.5–7.5 range) from within the past two years, unless they have completed their undergraduate degree at a regionally-accredited U.S. institution or a foreign institution in which English is the medium of instruction.
- Detailed course-by-course transcript evaluation indicating conferral of an undergraduate degree that is equivalent to a U.S. bachelor’s degree from an accredited institution (see transcript requirements for international students).

Degree Requirements

Core Requirements (All Required, 18 Credits)

- ADGR7708 Project Management
- ADGR7715 Inclusive Leadership
- ADGR7726 Leading and Managing Change
- ADGR7777 Evolution of Successful Marketing Strategies in the Digital Era
- ADGR7785 Leadership and Decision Making: Ignatian-based Applied Ethics
- ADGR9902 Applied Leadership Project

Students choose from one of four specializations below to complete their degree program.

Corporate Communications and Marketing Specialization Requirements (All Required, 12 Credits)

- ADGR8006 Communication in a Global Work Environment
- ADGR8028 Public Relations/Crisis Communication
- ADGR8041 Social Influence
- ADGR8120 Marketing Analytics

Executive Leadership and Organizational Development Specialization Requirements (All Required, 12 Credits)

- ADGR8010 Leader as Change Agent
- ADGR8015 Business Strategy
- ADGR8030 Talent Management
Human Resources Management Specialization Requirements (All Required, 12 Credits)

- ADGR8030 Talent Management
- ADGR8053 Employment and Labor Law
- ADGR8055 Human Resource Development
- ADGR8090 Workforce Planning

Project Management Specialization Requirements (All Required, 12 Credits)

- ADGR8120 Agile Methodologies
- ADGR8130 Risk Management, Quality Management
- ADGR8201 Applied Techniques: Software and Reporting
- ADGR8203 Stakeholder Management

Scheduling and Tuition

Program courses are ordinarily scheduled starting in the late afternoons on week nights. Courses meet face-to-face and select courses are offered online.

Information about tuition rates for the 2020–2021 academic year is available at the Tuition and Fees page. Students are assessed a $25 registration fee each semester they enroll in courses.

Master of Science in Sports Administration (On Campus Only)

Program Description

The Master of Science in Sports Administration (MSSA) at Boston College addresses the challenges and opportunities of an industry in rapid growth. Designed to propose new thinking and broaden leadership competencies for those in sports management as well as administrators and coaches, this degree focuses on balancing the needs of the many stakeholders within an athletic system. The Sports Administration master's degree program focuses on development and cultivation of the individual, team, and organization through the establishment of an intentional culture of trust and commitment which adheres to the broader core values of the institution.

Students will learn how to guide team members into alignment and learn how to embrace and overcome setbacks through a positive focus on teamwork and collaboration. Using the Jesuit principles as the foundation for leadership and decision-making, graduates will learn how to authentically lead and bring out the best in others by espousing core values as guiding principles.

Admission Requirements

- Bachelor’s degree from a regionally accredited college/university (minimum GPA 3.0)
- Official academic transcripts from colleges/universities where courses were completed
- Personal Statement
- Letter of Recommendation (Two)
- Resume
- Application Fee
- Optional—GRE (reporting code 7534) or GMAT (reporting code 44X-HX-47)— Recommended for students with lower undergraduate GPA
International Students—Additional Admission Requirements

In addition to the general requirements listed above, international students have the following requirements:

● Interview (in person or online)
● TOEFL (minimum 90–100 range) (reporting code 3276) or IELTS (minimum 6.5–7.5 range) from within the past two years, unless they have completed their undergraduate degree at a regionally-accredited U.S. institution or a foreign institution in which English is the medium of instruction.
● Detailed course-by-course transcript evaluation indicating conferral of an undergraduate degree that is equivalent to a U.S. bachelor's degree from an accredited institution (see transcript requirements for international students).

Course Offerings

Core Requirements (All Required, 18 Credits)

● ADSA7501 Introduction to Sports Management
● ADSA7502 Sports Marketing and Communication
● ADSA7503 Sports Finance
● ADSA7504 Sports Law and Compliance
● ADSA7585 Sports Leadership and Ignatian-based Ethics
● ADSA9001 Sports Administration Internship or ADSA9902 Applied Sports Administration Project

Electives Requirements (Selected from the following, 12 Credits)

● ADSA8005 Health and Wellness in Athletics and Sports Admin
● ADSA8008 Sport Psychology
● ADSA8010 Coaching for Performance and Student Athlete Development
● ADSA8011 The History of Sport
● ADSA8012 Sports Media and Public Affairs
● ADSA8015 Sports Analytics
● ADSA8018 The Athletic Director
● ADSA8020 Operations and Event Management
● ADSA8025 Sport Security and Event Management
● ADSA8359 Sports and Society

Scheduling and Tuition

Program courses are ordinarily scheduled starting in the late afternoons on week nights. Courses meet face-to-face.

Information about tuition rates for the 2020–2021 academic year is available at the Tuition and Fees page. Students are assessed a $25 registration fee each semester they enroll in courses.

Graduate Certificates

The Graduate Programs at Woods College of Advancing Studies offers several graduate certificates. Each certificate requires completion of several courses that build students' knowledge and skills that are aligned with industry needs.
Prospective students may apply for a certificate program without becoming a Master program student. For students who are or will be enrolled as MS students, there are several options for graduate certificates. A number of these certificates can be taken as part of your graduate degree. The information that follow is to help you determine what courses are covered in each certificate and to determine how this will play out with your graduate degree.

For more information about the graduate certificates please contact the respective Graduate Program Directors or Graduate Student Advisors.

**Admission Requirements**

- Bachelor’s degree from a regionally accredited college/university (minimum GPA 3.0)
- Official academic transcripts from colleges/universities where courses were completed
- Personal Statement
- Letter of Recommendation (One)
- Resume
- Application Fee

Note: Applicants whose undergraduate GPA are below 3.0 will be considered for admission. Such applications will be considered holistically, including letter of reference, personal statement, and industry experience. For particular applicants, they may take a course within the certificate program as “non-degree student,” and if they pass the course with a B or better, their application to the certificate program may be reconsidered.

**International Students**

Applicants requiring a student Visa to enroll in the graduate certificate programs are currently not eligible to apply for the graduate certificate unless they are already enrolled in a M.S. degree program. For international students who do not need a student visa, they may be considered for all the graduate certificates except for the Cybersecurity Graduate Certificates.

**Graduate Certificate Completion Requirements**

- Students must receive at least a grade of C for each course credited toward the certificate.
- Certificate requirements should be completed within two years of initial enrollment for non-degree students, and prior to degree completion for students already enrolled in a degree program, courses are permanently retained on the student record.

**Data Analytics Graduate Certificate (On Campus and Online)**

Offered by the M.S. in Applied Economics Program.

All four courses are offered fully online in 8-week terms and can be completed in 8 months. The courses are for-credit and can be transferred into the Boston College Master of Science in Applied Economics degree program. Students enrolling in this graduate certificate must have taken the following prerequisite course: college-level statistics or completion of statistics module.

**Graduate Certificate in Data Analytics**

Requirements *(All Required, 12 Credits):*
Leadership and Administration Graduate Certificates (On Campus and select courses Online)

Offered by the M.S. in Leadership and Administration Program.

The courses are for-credit and can be transferred into the Boston College Master of Science in Leadership and Administration degree program.

Graduate Certificate in Corporate Communications and Marketing

Requirements (All Required, 12 Credits):

- ADGR8006 Communication in a Global Work Environment
- ADGR8028 Public Relations/Crisis Communication
- ADGR8041 Social Influence
- ADGR8120 Marketing Analytics

Graduate Certificate in Executive Leadership/Organizational Development

Requirements (All Required, 12 Credits):

- ADGR8010 Leader as Change Agent
- ADGR8015 Business Strategy
- ADGR8030 Talent Management
- ADGR8046 Organization Theory and Design

Graduate Certificate in Human Resources

Requirements (All Required, 12 Credits):

- ADGR8030 Talent Management
- ADGR8053 Employment and Labor Law
- ADGR8055 Human Resource Development
- ADGR8090 Workforce Planning

Graduate Certificate in Project Management

Requirements (All Required, 12 Credits):
Cybersecurity Graduate Certificates (On Campus and select courses Online)

Offered by the M.S. in Cybersecurity Policy and Governance Program.

The courses are for-credit and can be transferred into the Boston College Master of Science in Cybersecurity Policy and Governance degree program.

Graduate Certificate in Cybersecurity Risk Management and Strategy

Core Requirements (All Required, 6 Credits):

- ADCY6050 Cybersecurity Policy: Privacy and Legal Requirements
- ADCY6350 Incident Response and Management

Elective Requirements (Selected from the following, 6 Credits):

- ADCY6925 Cybersecurity: Risk Management and Resiliency
- ADCY6400 Managing Cyber Risk: Mobile Devices and Social Networking
- ADCY6475 Security in the Cloud
- ADCY6600 Establishing the Business Case and Resource Allocation
- ADCY6450 Cyber Investigations and Digital Forensics
- ADCY6640 National Security: Law, Policy, and Investigations

Graduate Certificate in National Security and Global Affairs

Core Requirements (All Required, 6 Credits):

- ADCY6650 Role of Intelligence: Enabling Proactive Security
- ADCY6200 International Cybersecurity

Elective Requirements (Selected from the following, 6 Credits):

- ADCY6450 Cyber Investigations and Digital Forensics
- ADCY6050 Cybersecurity Policy: Privacy and Legal Requirements
- ADCY6640 National Security: Law, Policy, and Investigations
- ADCY6630 Counterintelligence: Methods and Process
Graduate Certificate in Computer Security

Core Requirements (All Required, 6 Credits):

- ADCY6000 Cyber Ecosystem and Cybersecurity
- ADCY6300 Network and Infrastructure Security (Prereq: ADCY6000)

Elective Requirements (Selected from the following, 6 Credits):

- ADCY6450 Cyber Investigations and Digital Forensics
- ADCY6810 Cybersecurity: Designing Offensive/Defensive Capabilities (Prereq: ADCY6000)
- ADCY6475 Security in the Cloud
- ADCY6925 Cybersecurity: Risk Management and Resiliency
- ADCY6820 Cybersecurity Engineering
- ADCY6830 Applied Cryptography
- ADCY6840 Machine Learning and Data Analytics

Non-Degree Students

Non-degree students are individuals interested in taking graduate courses for academic credit but not in applying for a degree. A brief non-degree application form must be completed and submitted online. Non-degree students may enroll in fall, spring, or summer semesters. Most graduate courses are only available to non-degree students with approval from the respective Graduate Program Director.
Law Courses: Summer 2020

LAWS800101  
Summer in Training--Curricular Practical Training Fieldwork  
GOULD, PATRICIA  
Summer 2020  
Summer in Training Fieldwork is the companion course to the CPT seminar. Students are responsible for finding their own placement, and must have it approved by the Associate Director for Externships (includes, having the MOU signed by their supervisor). Class Dates: dates to be determined, but expect that class will meet the week of May 22.

Law Practice 1
VAN NESTE, MAUREEN R
Fall 2020
All 1L students in their first semester will be enrolled in this course for which they will receive 3 credits toward satisfaction of the requirement in ABA Standard 303 for 6 experiential course credits. The curriculum will introduce students to the role of the lawyer through legal problem solving in a simulated client context. Students will be provided with instruction in: research and analysis of binding authority; identification of legally significant facts from documents, interviews, etc.; guided instruction in how to read and synthesize the law, the presentation of analysis of the law and application of the analysis to the problem facts; and preparation of office memorandum. The course involves classroom instruction and discussion, group work, and intensive individual feedback and conferencing.

LAWS218101
Constitutional Law: Speech and Religion GREENFIELD, HAROLD K
Fall 2020
In this course, students will study the First Amendment rights of free speech, religious exercise, and non-establishment of religion. The course will cover the theories of these rights, their original meaning, and how they have evolved over time. Students will also analyze how these rights overlap or conflict. The course will cover the substance of the rights in question as well as the proper claimants, including whether and when corporate entities can bring constitutional claims. Students will gain a sophisticated knowledge of existing law and develop a strong theoretical foundation for evaluating future cases.

LAWS218501
Law and Religion ROMANO, NATHANIEL V
Fall 2020
Law and religion are fundamental organizing principles across societies. This course will survey the relationships and interactions between them. Our survey will include a discussion of foundational concepts in the field of law religion, as well as a review of questions related to religious liberty and religious freedom, and an investigation of the relationship between religious and state or civic institutions. We will focus primarily on U.S. law, but will also review and discuss international approaches and models. Class will be lecture and discussion, and students will be evaluated based on class participation, several short critical reflections, and a take-home comprehensive final exam.
Credits: 03

LAWS219001
Professional Responsibility WHITE, BRANDON F
Fall 2020
This course focuses on central issues of professional responsibility faced by most lawyers in the practice of law, whether in the public or private sector. Included may be problems of client confidences, conflicts of interest, behavior in court, obligations to represent unpopular clients, and other restrictions on a lawyer's own speech and actions. Other topics focus on the fundamental moral responsibility of lawyers, analyzed in terms of the rules governing attorney conduct, principles of moral philosophy, and the pressures that create ethical blindness.

LAWS219202
Professional and Moral Responsibility of Lawyers COQUILLETTE, DANIEL R
Fall 2020
The first part of this course focuses on central issues of professional responsibility faced by most lawyers in the daily routine of practice, whether in a large firm, a small firm, or a legal services program. Included will be problems of client confidences, conflict of interest, behavior in court, obligations to represent unpopular clients, and other restrictions on a lawyer's own speech and actions. The second part focuses on the fundamental moral responsibility of lawyers, analyzed both in terms of the rules governing attorney conduct and the principles of ethical philosophy. There also will be a discussion of the professional organizations of the bar in a historical context, and their future challenges. Because of the amount and nature of coverage of the fundamental moral responsibility of lawyers, this class fulfills the Perspectives requirement in addition to the Professional Responsibility requirement.

LAWS333003
Legal Analysis for Practice MC MORROW, JUDITH A
Fall 2020
This course will further develop and strengthen students' legal analysis and problem-solving skills. Using a practice-oriented approach, the class puts students in the position of new associates at a law firm working with a senior
partner (the professor). The course focuses on enhancing fundamental lawyering skills such as reading comprehension, rule mastery, issue spotting, outlining, the mechanics of legal analysis, and strong writing. Throughout the course, students will have multiple opportunities for hands-on practice of these skills through focused drills, group exercises, and workbook activities. The course enhances learning by providing students with individual feedback to learn how to evaluate their work and see a clear pathway for consistent improvement. Evaluation will be based on (1) Good faith completion of a Diagnostic Exam; (2) Timely completion of all quizzes, in-class assignments, and homework assignments; (3) Class Participation; (4) Compliance with Attendance Policy; (5) Midterm Exam; and (6) Final Exam.

Law and Accounting
MAISON, DAVID W; WHITE, FRANK M
Fall 2020
A study of the basic concepts and limitations of financial accounting, our course covers the financial reporting process and the development of financial statements for external users, such as investors and creditors. In addition, techniques for analyzing financial statements and putting them to use are introduced along with the context of law, auditing, corporate governance, and globalization in which they are generated. No student who has taken undergraduate courses in accounting may register.

Blockchain, Cryptocurrencies, and Digital Assets TOMUNEN, MARI H
Fall 2020
Welcome to a course where blockchain assets meet law. This course is designed to give the students an understanding of blockchain technology as well as cryptocurrency and other digital assets, and their interaction with law and the legal practice. The course will explore the legal issues arisen by the innovative business models utilizing peer-to-peer networks and distributed ledger technology. During the course, we will analyze several major cryptocurrency issuances (e.g., Bitcoin and Ether) and the benefits of tokenizing or digitalizing other assets, like gold, art, or equity, as well as the business and legal issues connected to trading them. Moreover, students will learn about stablecoins and central bank digital currencies.

LAW336301
Civil Gideon and Access to Justice ADEDIRAN, ATINUKE
Fall 2020
This seminar explores access to justice debates in the civil context. We, however, begin our discussion from the landmark Supreme Court case, Gideon v. Wainwright, which granted the right to counsel in criminal cases. Topics include whether Gideon’s promise is being fulfilled in criminal cases, the costs and benefits of having a civil Gideon regime, funding for civil legal services organizations, empirical research on the impact of lawyers on access to justice, pro bono work as a form of access to justice, and the role of race and class in access to justice. Readings will comprise mostly of law review and social science articles. Final grades will be based on a series of short response papers and class participation.

LAW338301
Selected Topics in White Collar Crime DOWDEN, JAMES P
Fall 2020
This seminar will examine emerging issues in the prosecution and defense of white collar crimes. We will first examine the concept of white collar crime and its import on other areas of both criminal and business law. We will next study the concepts of corporate and individual liability. Our examination of white collar crime will also include several substantive offenses including conspiracy, tax fraud, mail/wire fraud, bribery, RICO, and financial crimes (including bank fraud and securities fraud). We will also conduct a study of the grand jury system and its role in both the prosecution and defense of white collar crime. Finally, we will intertwine an analysis of federal sentencing throughout the semester.

Global Risks and Regulations BARROZO, PAULO D
Fall 2020
This course introduces participants to some of the most important areas of twenty-first century global risk and their respective regulatory frameworks: Health, Energy, Environment, Order, Economy, and Information. Students become acquainted with each of these risk areas before analyzing their current regulation. Students then learn about how the evolution of law catalyzes and structures social change. In the last part of the course, students convene as a think-tank to produce short white papers on the risk area of their choice, on which their course grade is based. The course does not assume knowledge of science or policy-making. Students and auditors from across the university and beyond are welcome to fully participate in the course. No pre- or corequisites. The course meets the Law School’s Perspectives Requirement.

LAW443901
European Union Law PERJU, VLAD
Fall 2020
This course provides a general overview of the legal architecture of the European Union. It introduces students to the complex relationship between the European legal order and the national legal systems of Member States. Students will study the Union's major institutions and decision-making mechanisms as well as substantive legal matters that include fundamental rights, free movement of persons and goods, non-discrimination. This course is a prerequisite for participation in the SIP Dublin but is open to any student interested in the present and future of Europe.

With the rise of the Internet, we can store and transmit vast amounts of digital data across the globe at little to no cost. This digital revolution raises fundamental questions about how, if at all, existing legal rules should apply online. This course explores the legal and policy issues that arise in cyberspace, including issues of sovereignty and jurisdiction, regulation of online speech, peer-to-peer networking, cybersquatting, and virtual property. It also addresses regulation of the physical architecture of the Internet, including net neutrality. The course examines the broader jurisprudential and policy questions that apply to issues arising on the network, and in the process uses cyberlaw to reexamine the way that law operates in the offline world.

**LAWS445901**
Semester in Practice Seminar RIVERA, ANA M
Fall 2020
The primary goal of the SIP seminar is to help students with their professional development as attorneys. The SIP Seminar brings together extern students for a weekly discussion of common practice issues and seminar discussions of current issues in the practice of law, such as changes in the U.S. legal profession, the adversary system, unmet legal needs, and ethical issues. The first part of the semester focuses on identifying learning goals for the semester and developing strategies for obtaining appropriate supervision and feedback to attain those goals. As students become more settled in their placements, a portion of the seminar time focuses on issues that arise in their fieldwork. This course enables students to bridge the gap between law school and practice and explore what professional and personal success means personally, including examining core values, professional identity, and the implications for future career plans.

**LAWS446001**
Prosecutorial Ethics CASSIDY, R MICHAEL
Fall 2020
This course addresses constraints on prosecutorial power in the United States criminal justice system. Students will study constitutional constraints on prosecutorial discretion under the 5th and 6th Amendment, and particular Model Rules of Professional Conduct that limit or curtail prosecutorial conduct during the investigation and prosecution of crime. Particular topics addressed will include the prosecutor's conduct before the grand jury, charging decisions, plea bargaining, disclosure of exculpatory evidence, trial conduct, contacting and interviewing witnesses, and relations with the media. For additional credit students may write a 15 page research paper on a topic to be agreed upon with professor. There will be an in-class examination.

LAW446601  
Cybersecurity Policy: Privacy and Legal Requirements  
Powers, Kevin R; Fick, Katherine J  
Fall 2020  
Course provides a comprehensive examination of the laws, regulations, and Executive Orders concerning data protection and privacy, including PCI, HIPAA, GLBA, SOX, FISMA, NIST, FISA, CFCA, and their overseas counterparts, and the roles of federal, state, and local regulators and law enforcement officials. The course also examines data protection and national security issues governed by various Federal agencies (e.g., SEC, FTC, FCC, DOE, DOJ, DHS, NSA, Treasury), including suspicious activity reporting (SAR) requirements under the Patriot Act. Additionally, the course addresses intellectual property protection, security classifications, data location requirements, audits, compliance assessments, and individual, class-action, and shareholder derivative litigation and liability.

Energy Law and Deregulation  
Moskal, John F; Duffy, Dennis J  
Fall 2020  
This survey course focuses on the law and public policy of electricity and natural gas, with discussion of both market and environmental regulation. The course will examine the frequent tensions between economic and environmental regulation. There will also be analysis of the Constitutional law applicable to the energy industries, including Commerce Clause and Supremacy Clause limitations upon state energy policies. Class time will also involve review of ongoing political and industry developments. There will be particular focus upon the development and financing of renewable energy resources.

This course addresses the nature, content, and structure of international environmental law. The course commences with an introduction to international environmental problems, together with basic principles of international law and environmental regulation. Specific topics include global warming, stratospheric ozone depletion, and exports of hazardous substances. Other topics may include marine pollution, transboundary pollution, trade and environment, and development and environment. The course evaluates the role of international and non-governmental organizations; the interrelationship between international legal process and domestic law; and the negotiation, conclusion, and implementation of international environmental agreements. Class meets at the Fletcher School, Graduate School of International Affairs, Tufts University.

LAW696001
International Trade and Investment Law WIRTH, DAVID
Fall 2020
This is an integrated and comprehensive course on the law, theory and policy of international trade and foreign investment law, which together comprise international economic law (IEL). The course will introduce students to the treaty-based WTO international economic law system, its principal agreements and institutions, its core doctrines, and some of its current policy questions. The course will also introduce students to the law of foreign investment, key doctrines, and the contemporary BIT system. The course will conclude with an examination of current issues and challenges, such as IEL dispute settlement, IEL and development, IEL and the environment, and IEL and human rights.

LAW682401
Startup Company Governance: Taming Unicorns JONES, RENEE M
Fall 2020
This seminar will focus on understanding and analyzing governance problems that arise at “unicorns,” large private companies valued at $1 billion or more. We will first study the conventional financing process for startup companies, and how these practices have changed in recent years. We will examine market trends and legal reforms that have contributed to these developments. We will then focus on the challenges the new legal framework creates for unicorn founders, investors, and employees. We will also explore how the new unicorn governance model impacts consumers and society. Students will write research papers on topics of their choosing related to issues discussed in the course. The course satisfies the Upper Level Writing Requirement. Prerequisites: Corporations.

LAW643001
Political Corruption BROWN, GEORGE D
Fall 2020
This course focuses on issues relating to the franchise. The franchise is central to a democratic republic. Voting not only determines who will be in the government, it establishes the legitimacy of any government that flows from accountability to the governed. Thus, a government must establish and protect a franchise that is fairly available and fairly administered. However, this seemingly simple goal masks a wide range of problems. Some examples are redistricting and gerrymandering (both partisan and racial), questions of voter suppression, including voter ID and “purging” of rolls, campaign finance, and bribery of candidates. The course is given in seminar form for 2 credits. The grading instrument is a paper of 25-30 pages in length. Students work closely with the instructor in developing and researching a topic.

LAW765201
Healthcare Law and Compliance SHAFF, LESLIE P
Fall 2020
Healthcare Law and Compliance offers the student with a personal or professional interest in the healthcare industry the opportunity to develop a basic understanding of the legal framework and ethical issues involved in today’s healthcare environment. The seminar (2-credit hour once weekly) will use a practical, case-study approach to some of the issues arising in the complex world of healthcare enforcement and compliance. Emphasizing the procedural mechanisms of the False Claims Act and the substantive law of the Anti-Kickback Act, the Stark Laws, the Food and Cosmetic Act, the seminar will explore the following: how prosecutors, defense attorneys, whistleblowers, and compliance officers approach their work; the relationships between regulated industries (pharmaceuticals; hospitals; doctors; medical device companies) and government insurance companies (Medicare; Medicaid); and legal and ethical issues arising from the expanding edges of healthcare technology and treatment.

LAW773901
Conflict of Laws WILLIAMS, RYAN C
Fall 2020
Conflict of laws often arise involving transactions, occurrences, or events that touch on the laws of different legal systems—a car crash in Missouri involving residents of California and New York, a contract between a U.S. purchaser and a seller in Italy, a marriage in Nevada between two Canadian citizens who reside in Massachusetts, etc. When such disputes result in litigation, how should a court determine which jurisdiction’s laws govern which aspects of the parties’ legal rights and responsibilities? This course examines the ways in which courts determine which substantive, procedural, and remedial law should be used to adjudicate disputes involving such multi-jurisdictional contacts. This course will be of special interest to students considering a career in litigation as the problem of conflicting law is endemic in modern litigation, and the ways in which courts resolve these conflicts is not intuitive. Topics covered will include the historical development of principles governing conflicts between the laws of different states within the U.S. legal system and modern approaches to such questions; the role of state and foreign law in federal court adjudication; constitutional limits on choice of law; and the legal effectiveness of judgments issued by courts in a different jurisdiction.

LAW774401
Anatomy of a Cross-Border Insolvency KEACH, ROBERT J
Fall 2020
The purpose of this course will be to take students through a cross-border case from beginning to end, using Montreal Maine & Atlantic Railway Ltd. ("MMA") as the primary "hypothetical" case, but borrowing from and referring to the other recent cases as well. MMA was a unique case presenting a variety of cross-border issues; the case—precipitated by the tragic derailment at Lac Megantic, Quebec—has been described as a "mass tort, environmental disaster cross-border chapter 11, with a railroad reorganization attached to it." The course will illustrate the difficult legal, political & practical problems faced by practitioners in these cases. As a result of the journey through the case(s), students will be taught concepts of extraterritoriality (& its limits); jurisdiction over foreign persons & entities (& its limits); the doctrine of forum non conveniens in the international context; and comity (& its limits). Students will also learn the basics mechanics of chapter 15 (& its international counterparts) and its critical substantive and procedural components. Through the use of the MMA case study, students will be exposed to how these concepts and issues arise and are dealt with in an actual case, rather than being exposed only to the theoretical problems. Using experiential learning opportunities in the case, the course will highlight the difficulties low, such as the case, students will be placed in the position of the various parties & their counsel, with the attendant need to argue relevant positions and solve the problems it presented.

Copyright LIU, JOSEPH
Fall 2020
This course studies the ability of authors, publishers, artists, and others to control the distribution, sale, copying, and performance of their works. Topics will include the subject matter of copyright, requirements for copyright, proof of infringement, and remedies. The course will cover the application of copyright law to literature and art as well as the rapidly developing use of copyright law to protect high technology products such as computer programs. Students interested in pursuing careers in high technology law should seriously consider taking classes in both copyright and patent law.

LAW774901
Immigration Law KANSTROOM, DANIEL
Fall 2020
U.S. immigration law involves such technical questions as how to obtain a visa, a "green card," citizenship and who is subject to deportation. It is also "a magic mirror" in which the highest aspirations and the deepest biases of American legal culture and history are reflected. This course explores both aspects of this complex area of law: the technical/legal and the political/philosophical. It involves constitutional law, administrative law, statutory interpretation, among other disciplines. There are traditional lectures, class discussions, in-class exercises, outside speakers, films, and court visits. The three-credit course requires class attendance, participation, and a final exam. More detailed information will be available in the first class. It is a pre- or co-requisite for the Immigration Clinic.

This course provides an introductory examination of the basic rules and policies bearing upon the taxation of international transactions. The course will cover the major U.S. income tax rules governing the taxation of foreign persons (including corporations) investing and doing business in the United States (inbound transactions) and the taxation of U.S. persons (including corporations) investing and doing business abroad (outbound transactions). The goal of the course is to provide an overview of the structure, issues, and rules pertaining to the U.S. taxation of cross border transactions. The major issues examined include jurisdiction to tax, treaties, source of income, mechanisms for reducing or preventing double taxation of income, transfer pricing, and regimes that prevent deferral of U.S. income tax on certain types of income.

Taxation II explores the taxation of corporations. After a brief review of the other common forms for organizing a business and their distinctive tax treatments, the course focuses on the most important federal income tax issues relating to the organization, operation, liquidation and reorganization of publicly-traded corporations (and other "C" corporations). This includes the relationship between corporations and shareholders and the treatment of dividends and redemptions. The course is important for any student thinking of practicing in the general business area, even if she or he does not intend to become a "tax specialist."

This course examines legal, economic, political, and diplomatic considerations relevant to the formulation and implementation of U.S. federal tax policy. The class will be based on readings on three sets of issues: whether to tax consumption, income and/or wealth (and transition issues); how international considerations affect business taxation policy; and whether and how to use the tax system to reduce poverty on the one hand and to provide incentives to business on the other. The course's coverage of selected tax policy literature is intended to equip students to critically assess the post-U.S. reform tax system

LAW778101
Legal Scholarship Workshop: Regulation and Business SHNITSER, NATALYA; JONES, RENEE M; MCCOY, PATRICIA A
Fall 2020
This workshop will feature presentations by five or six invited legal scholars of their works-in-progress concerning law, business, and the regulation of economic activity, broadly construed. Students will meet with one or more 3C faculty conveners the week before each presentation to discuss the paper. (The faculty conveners are: Renee Jones, Patricia McCoy, Diane Ring, Shu-Yi Oei, and Natalya Shnitzer.) Students will prepare one-page response papers for each works-in-progress presentation. Response papers will be shared with the authors.
This workshop is designed for students who are interested in publishing during law school and in legal scholarship more generally. It is also well suited for students with an interest in economic regulation, business, and corporate governance. 1 credit, pass/fail.

LAW778501
International Law WIRTH, DAVID
Fall 2020
This course is designed to familiarize students with the operation and institutional structure of the international legal system, the law of nations that govern relations among states. The first portion of the course, consisting of somewhat more than half of the semester, will address the principal attributes of the international legal system, including (1) sources of international law; (2) subjects of international law; (3) jurisdiction of states; (4) international adjudication and dispute settlement; and (5) the law of treaties. The remainder of the course, as time permits, will be devoted to special topics, including such subjects as international human rights; the use of force in international law; and diplomatic and consular immunity.

LAW779001
Entertainment Law
BROWN, CHRISTOPHER L; ROSEN, JOSEPH
Fall 2020
Most entertainment law practitioners agree “Entertainment Law” has no set definition, but includes a hybrid of distinct areas of the law, including but not limited to, copyright, trademark, contracts, wills, estate planning, real estate, bankruptcy and intellectual property. Course focuses on the protection of IP and the contractual relationships between various parties in the Entertainment and Music Industry. A major focus will be analysis of the Copyright Act of 1976, as amended, the Digital Millennium Copyright Act, and the protection of IP and contractual rights in TV, film, music, books, etc. The relationship between the artist and his/her manager, agent, lawyer, and record company will be explored in detail. Course will cover representation of artists and music labels and the problems they encounter. Students will participate in a group exercise where they negotiate a record deal on behalf of either the artist or the record label, and report back their terms to instructors.

LAW779101
Food and Drug Law GREEN, ALLAN M
Fall 2020
The FDA regulates 25% of the US economy & exerts decisive authority over the availability of new therapeutic drugs & medical devices. Activities of biotechnology, pharmaceutical & medical device industrial sectors are rigidly controlled by FDA regulation & the Boards of those enterprises have been deemed to have an obligation of good faith to provide independent judgment about managing regulatory risks. FDA activities, processes & procedures by which the Agency carries out its mandate & public policy debates which deal with tension between accelerating approval of new treatments for incurable diseases (AIDS, cancer & Alzheimer's disease) & demand to improve the safety of marketed drugs. We will also consider aspects of FDA law which affect intellectual property protection in biotech & pharmaceutical industries, including the Hatch-Waxman Act which provides support for the US generics drug industry. Also addressed is development of public policy & regulation for some contentious contemporary issues: the use of genetic manipulation in agricultural, animal/human re-engineering, regulations for food safety & standards for labeling as "organic"/" GMO-free.

LAW779201
Federal Courts WILLIAMS, RYAN C
Fall 2020
The Constitution assures that the separate powers conferred upon each of the branches of the federal government serve as a check and balance to prevent abuse of power by any single branch, and that the aggregate of federal power, while supreme, is limited in scope, thereby serving to bind the union and simultaneously respect state sovereignty. This course will explore these two themes as they relate to the role of federal courts. Among the topics to be covered: separation of powers, federalism, congressional power to curtail federal jurisdiction, the case and controversy requirements as it relates to doctrines of standing, ripeness, and mootness, sovereign immunity, Congressional power to abrogate Eleventh Amendment immunity, Ex Parte Young doctrine, section 1983 litigation, absolute and qualified immunity in suits against state and federal officers, abstention doctrines, inter-system preclusion, and Rooker-Feldman doctrine. Evaluation will be by an in-class exam.

**Course Description:**

The law of human rights is global and rests on a vast array of international human rights conventions, customary international law, and borrowed, transplanted, or migrating constitutional or statutory fundamental rights. These two avenues—the international and the domestic—are together examined in this course, using recently advanced techniques of comparative law. Our focus is on how the law of human rights conceives of, and addresses, the problem of inequality. In particular, we will study one set of human rights—the so-called “economic and social rights”—which include the rights to food, housing, health care, education, and water and sanitation. Of immediate interest to the American law student with a global, transnational, or

LAWS800001
Ninth Circuit Appellate Project HONG, KARI E
Fall 2020
The Ninth Circuit Court of Appeals permits supervised law students to brief and argue immigration cases brought by indigent clients who would otherwise be without counsel. The Court screens pro se cases and selects those that present important issues that deserve further development by counsel. Past cases have included asylum, withholding, and CAT claims, immigration consequences of criminal convictions, and presented issues of first impression. The Court schedules the opening brief to be filed in September, the reply brief in December, and schedules oral argument before a panel of sitting judges in March of the same academic year.

Students will travel to the scheduled court hearing to present oral argument. The Court then issues its decision based on the merits of the individual cases

LAWS811601
Bankruptcy Law Research NEARY, MARY ANN
Fall 2020
Students are introduced to research methods and resources for tracking bankruptcy filings, locating court opinions, and utilizing practice materials. This course covers statutory research in bankruptcy code, use of treatises, desk books, and other research sources. Emphasis is on the technology and tools used in current bankruptcy practice, e.g., electronic case filing (ECF/ECM), docket searching, and specialized bankruptcy practice software. Course grade is based on several written assignments.

LAWS811801
Environmental Legal Research SHEAR, JOAN
Fall 2020
This course is designed as an in-depth look at the legal resources and research techniques used in the practice of environmental law. Strong emphasis on administrative law and the rule-making process, legislative history, and government documents. Course will also review basic case law and statutory research. Students are exposed to strategies for using these materials competently, effectively, and economically in the research process to enable them to develop research skills necessary to be a successful environmental lawyer. Ungraded exercises allow students to track their progress in learning the materials. Class is completed in the first two-thirds of the semester so that students are able to apply knowledge gained in this class to more easily and effectively research papers for other classes and to journal work.

LAWS811901
Immigration Law Guided Research BREDA, KAREN
Fall 2020
Immigration Law Research is a two-credit optional companion course to Immigration Law. The course will teach students how to research complex immigration law issues, using specialized secondary sources, administrative agency decisions and regulations, federal constitutional law, statutes, and case law. Students will learn strategies and resources by completing pragmatic research problems. Research techniques and sources will track the course content of Immigration Law. Students will receive an introduction to international and foreign law resources used in immigration law. Weekly ungraded exercises allow students to track their progress in learning the material. Grade will be based upon class participation, two graded assignments and a final, open book, take-home examination.

LAWS812501
Research for Criminal Law Practice DAVIS, LAUREL E
Fall 2020
This course is designed to provide an in-depth examination of legal research materials and techniques useful for students who are interested in becoming prosecutors or criminal defense attorneys. Course will cover basic primary sources of criminal law such as the U.S. Constitution and state constitutions, as well as federal and state statutes, cases, and administrative law. Course will cover important secondary sources in the criminal law field: legislative history research skills; how to find and use jury instructions, sentencing guidelines, dockets, and practice materials such as formbooks. Students will also learn how to find and work with criminal court rules. Both print and electronic sources are explored and critiqued. The course covers Westlaw, LexisNexis, Bloomberg Law and other electronic sources.

LAWS813002
Advanced Legal Research SHEAR, JOAN
Fall 2020
Advanced Legal Research offers an in-depth, hands-on experience with the process of legal research. Students use a wide range of legal materials and devise practical techniques and strategies for using these materials competently and effectively. The goal of the course is to create self-sufficient legal researchers capable of analyzing and resolving legal problems effectively. Emphasis is placed on the types of legal sources and research not covered in the first year of law school (e.g., treatises, forms sources, administrative law, statutory research, legislative histories and legal practice materials). Both print sources and free and fee-based electronic sources are explored and critiqued. The course covers Westlaw, LexisNexis, BloombergLaw, and other electronic sources.

LAWS823901
Representing Inmates at Prison Disciplinary Hearings TANNENBAUM, KARI M
Fall 2020
Representing clients at prison disciplinary hearings provides a window into the hidden world of prisons. Massachusetts is one of the only states that allow students to represent clients at these hearings. All students will meet and interview clients in maximum security prisons, conduct discovery and investigation, file motions, cross-examine witnesses, make closing arguments and file appeals when necessary. Because the hearings are relatively short, students will be able to have multiple hearings each term. Legal skills learned: mini trials in 30-60 minute hearings; administrative law; adversarial practice; client interviewing skills; witness interviews; discovery practice; motion practice (written and oral); cross-examination of witnesses; direct examination of client; closing argument; written appeals if necessary.

LAWS826001
BC Innocence Clinic BECKMAN, SHARON L; WHITMORE, CHARLOTTE H
Fall 2020
Students in BC Innocence clinic work with faculty supervision on post-conviction screening and/or litigation of cases of prisoners who assert their innocence. Case screening involves review of trial transcripts, pre-trial discovery, appellate and post-conviction briefs, and judicial opinions, as well as factual and forensic research, to determine whether scientific testing or other investigative leads could establish a strong likelihood that the prisoner is factually innocent. Students produce a memorandum analyzing the case and making a recommendation as to whether post-conviction litigation should be pursued. Students engaged in litigation research and draft motions for various types of post-conviction relief with supporting memoranda and affidavits. Class component is devoted to case-rounds and development of legal, professional, and ethical skills in the context of post-conviction innocence work. Students spend 10-12 hrs/week outside of class time on casework.

LAWS826501
International Human Rights Practicum UROSA, DANIELA
Fall 2020
This course focuses on appellate submissions to regional and international courts and other legal organizations that address international human rights issues. For spring 2020, students will work on submissions to the Inter-American Court of Human Rights (IACHHR) and the Inter-American Commission on Human Rights (IACHHR). The Inter-American System for the protection of human rights (IASHR) is the regional system responsible for monitoring, promoting, and protecting human rights in the countries that are members of the Organization of American States (OAS). Currently, it is one of the strongest regional human rights protection systems in the world. This clinic will include two components. (1) The practicum will provide students with practical experiences in advocacy for the promotion of international protection of human rights through amicus briefs before the IACHHR; drafting of legal reports, protocol proposals, and hearings before the IACHHR; and the possibility of submissions to other human rights tribunals around the world. (2) The accompanying seminar will provide an overview on the study of the IASHR, including its normative framework, mechanisms, rights protected and its principal entities. Possible practicum fieldwork at the IACHHR (Washington D.C) or the IACHHR (San Jose, Costa Rica) during spring break. Previous course work in International Law, International Human Rights, and/or International Legal Research is not required, but may provide an enriched perspective.

LAWS826701
Community Enterprise Clinic TREMBLAY, PAUL R
Fall 2020
This course introduces students to transactional legal work on behalf of low- and moderate-income entrepreneurs, small businesses, nonprofit organizations, and first-time home buyers. The fieldwork is based at the Law School’s Legal Services Lab located in the Center for Experiential Learning on campus. Students will perform all of the legal work and interact with the clients. Students will be assigned to work with entrepreneurs with business-related legal needs; with emerging, community-based small businesses facing corporate, employment or similar legal issues; with nonprofit organizations or groups seeking assistance to establish a tax-exempt organization; and first-time home buyers. For fieldwork purposes students will be assigned six office hours per week at the clinic, arranged based on the student’s schedule. The fieldwork is complemented by a weekly seminar. The weekly seminar will address substantive law, ethical issues, and legal skills.

LAWS827101
Judge and Community Court Seminar CRATSLYE, JOHN C; BYRNE, CATHERINE K
Fall 2020
This seminar examines through participant observation the functioning of the judicial process in our first-level or community courts. Students undertake this study of judicial performance through clerkship-like fieldwork placements with judges of the Boston Municipal, District, Juvenile, Housing, and Land Courts. Students are available to assist their judges with legal research and writing. Students are expected to observe and assist their judges eight hours/week (one full day or two mornings) for which they receive two clinical (pass-fail) credits. The weekly classroom sessions cover the full range of issues which trial judges encounter on a daily basis, including judicial ethics, sentencing policy, ADR, jury management, and treatment courts. A twenty-page paper describing some aspect of the judiciary’s work in these courts is required and serves as the basis for the two graded credits.

LAW 3006
BC Defender Program Clinic TANNENBAUM, KARI M
Fall 2020
The BC Defender program is a full-year criminal defense clinic and a weekly seminar class. Practicing under faculty supervision pursuant to SJC Rule 3:03, BC Defenders represent clients charged with crimes and probation violations in the Boston Municipal Court (Dorchester Division). In the course of representing their clients, students broaden their own life experiences and develop professional skills, including interviewing, counseling, investigation, legal research and writing, collaborating, negotiating, oral advocacy, case organization and management, and trial skills.

LAW 31801
Immigration Law Externship KANSTROOM, DANIEL; FRIEDMAN, HEATHER J
Fall 2020
This externship, co-sponsored by the Boston College Center for Human Rights and International Justice, is connected to Professor Kanstroom's Immigration Law class as a co-requisite. Students who are in that class may register for an additional 2 or 3 credits (Pass/Fail) to work on asylum, withholding of removal, Convention Against Torture or human trafficking [T Visa] cases. Students will be assigned to work with pro bono attorneys who have taken on such cases through the PAIR Project www.pairproject.org or other similar organizations. Students will meet with clients, and undertake factual and legal investigation, research and writing, etc. They will be supervised by the pro bono attorneys, by Attorney Heather Friedman and Professor Kanstroom.
Requirements: 4 hours of case-related work per credit, journals, and attendance at a weekly seminar. To apply, e-mail Tricia Gould, Director of Externship Programs, patricia.gould@bc.edu.

LAW 32901
Juvenile Rights Advocacy Project Clinic BERRY, JESSICA
Fall 2020
Students will represent, as Attorney or Guardian-Ad-Litem, youth involved in the justice system on legal issues related to dependency, status offense, delinquency, or special education cases. There is an emphasis on education law in JRAP cases. JRAP In-House students will be exposed to some of the following: special education advocacy (team meetings, hearings, appeals), school disciplinary proceedings, administrative advocacy with the state Departments of Youth Services (DYS) and Children and Families (DCF), and Juvenile Court advocacy. Cases are primarily in Middlesex County.

LAW480001
Domestic Violence Tethered Externship MERRYMAN, MITHRA D
Fall 2020
This externship opportunity provides a placement at Greater Boston Legal Services for students who are enrolled in or have previously taken Domestic Violence & the Law. The externship is limited to 6 students who will extern 12 hours/week & are required to participate in a separate 1 credit bi-weekly seminar after class. Those who commit to a full year externship will receive preference. Apply through Sage & provide a resume & cover letter explaining interest in the externship. Students, supervised by Prof. Merryman, will represent victims of domestic violence in civil cases & will engage in client-centered legal representation of victims of violence, often representing clients in two or more areas of law (e.g., family & immigration). As economic stability is a key factor in overcoming domestic violence, cases will be those that increase a victim’s economic independence (e.g., attaining child & spousal support & equitable property division in Family Court, obtaining secure immigration status through U visa & VAWA self- petitions, and accessing & preserving child-care vouchers, food stamps, health care, & housing). Students will assist clients who are witnesses with ongoing criminal court involvement to understand their rights & options as well as interview & counsel clients, undertake factual investigation through discovery, develop case theories, draft pleadings & motions, negotiate with opposing counsel, interact with courts & administrative agencies, & argue cases in court.

LAWS855002
Trial Practice CURTIN, KEVIN J
Fall 2020
There are several sections of trial practice, which are taught by adjunct faculty who are judges or practitioners. Each instructor selects his/her own readings and exercises, but the coverage of the sections is quite similar. All require students to prepare and to perform aspects of jury trial—opening and closing arguments, and direct and cross-examination. The course is designed to develop practical skills and to build an appreciation for the relationship between substantive law and strategy and tactics in litigation. This section includes both civil and criminal trial exercises. Students also participate in a mock trial held in a real courtroom. All sections focus on trial advocacy; some also consider some pre-trial skills, such as discovery depositions. All sections have limited enrollments. Evidence is a prerequisite.

MA Attorney General Civil Litigation Program BARNICO, THOMAS A; SWEENEY, JAMES A
Fall 2020
The AG Civil Litigation Program is a full-year clinical experience in civil litigation in the Massachusetts Office of the Attorney General. Students work directly with assistant attorneys general in the representation of state agencies and officials in state and federal courts. The clinic teaches the following types of legal work: (1) the drafting of pleadings, motions, discovery, and other litigation documents; (2) legal research and writing of briefs in the trial and appellate courts; (3) oral argument in the state courts; and (4) other litigation tasks. Students will be assigned to one of two Divisions in the Government Bureau, either the Administrative Law Division or the Trial Division. Students assigned to the Administrative Law Division will work on cases involving administrative and constitutional law, federal courts, and statutory construction. Students assigned to the Trial Division will work on cases involving employment, tort, contracts and eminent domain and land use law.

LAW890001
Real Estate Transactions, Development and Finance LEVINE, HOWARD A
Fall 2020
The course, clinical and practical, explores a lawyer's role and responsibilities, and the myriad of transactional documents and agreements, in residential and commercial real estate transactions from offers through acquisition and loan closing. The course examines, dissects, and teaches how to represent buyers, sellers, and lenders during the due diligence, development and permitting, and the financing phases of a real estate transaction. The course teaches practical lawyering skills such as drafting, negotiation, and problem solving. A variety of ethical issues are reviewed. Commercial leasing transactions, zoning, environmental and due authorization opinion letters, and zoning and environmental law and considerations in sale, lease, and finance transactions are taught. Case studies are presented and negotiation exercises conducted to summarize the areas of real estate law studied and to explain how the legal principles, cases, and issues work in real-life situations.

LAW891001
Litigation Skills: Fact Development MAHONEY, MICHAEL F
Fall 2020
Instruction in the theory and fundamental skills of pre-trial advocacy in civil cases. Subjects to be covered include interviewing, fact investigation and analysis, case valuation/risk analysis, client counseling, pleading, discovery, and motion practice. Professional responsibility issues will be considered throughout the course. Grading is weighted heavily toward class participation. In addition, students must maintain a "case file," consisting of a 1-inch 3 ring binder. This binder will be submitted for grading at the end of the course.

LAW893001
Dispute Negotiation CRANE, DANIEL C; WORLEY, SARAH E
Fall 2020
This is an experiential course in which students will be active participants, negotiating cases on a weekly basis. The subject matter of the disputes will include: commercial transactions, gender bias issues, criminal plea bargaining, family law matters, personal injury cases, and other disciplines. Students will be introduced to the art of negotiating, reading body language and micro-messages, interviewing clients and reaching common ground with adversaries. The work will be critiqued as actual student negotiating sessions are taking place, all in an effort to familiarize students with various techniques, strategies, tactics, persuasive skills, and effective demeanor involved in successful negotiations. Although there will be some lectures, the emphasis of the course is "learn by doing."

LAW897801
Civil Litigation Clinic MINUSKIN, ALAN D
Fall 2020
This civil clinical course allows students the opportunity to practice law under the close supervision of clinical faculty at Boston College Legal Services LAB, which is located in the Center for Experiential Learning on the Law School campus. Students are certified by the Massachusetts Supreme Judicial Court to advise and represent clients in every aspect of civil litigation. Practice areas are family law, housing, and public benefits appeals. Clinical faculty provide thorough feedback about students' work at all stages in order to help them build on their skills and learn from their experiences, including comprehensive feedback at both mid-semester and end of term. Six-credit students are expected to spend an average of 17-22 hours/week on clinic matters; ten-credit students average 30-35 hours/week. Pass/fail and variable credit options can only be exercised at the beginning of the term. Enrollment, by lottery, is limited to 16 students in the fall, and 10 in the spring.

LAWS910501 Rappaport Law and Public Policy Seminar KANSTROOM, DANIEL Fall 2020
This seminar explores contemporary issues at the intersection of law and public policy. It connects with the Rappaport Center's Senior Fellows in Residence. This year's Fellows are Jonathan B. Miller, Legal Director of the Public Rights Project and former Chief, Public Protection and Advocacy Bureau (2015-20), and Civil Rights Division (2012-2015) Massachusetts Office of the Attorney General and Aymeric Quereishi, Senior Counsel for the NAACP Legal Defense and Educational Fund and Director of the Civil and Human Rights Clinic at Howard University. Topics include: eviction policies; oversight of police misconduct; equity in public schools, executive power in a pandemic; racial inequity in the Massachusetts criminal justice system, immigrant rights, and multi-state litigation or technology in law enforcement. The seminar meets once per week for 2 hours. Students will also be required to view each Senior Fellow's public lecture. For one academic credit, students attend and participate in all classes and write two critical reflection papers. Students may enroll for 1 or 2 additional credits. For each additional credit, students will choose a topic to explore, develop a class presentation, and write a research paper of approximately 15 pages.

LAWS910701 Consumer Finance Law and Federalism CORDRAY, RICHARD A Fall 2020
This course will address issues of consumer financial law, including the historical background of consumer finance issues and how the economic life of American families has changed greatly since World War II. It will consider how consumers are affected by mortgages, credit cards, student loans, auto loans, and other types of credit, as well as by debt collectors and credit bureaus. The course will also consider how the formulation, oversight, and enforcement of consumer financial laws has evolved at both the state and federal levels over this period. The course will also draw on the personal and professional experiences of the professor, who served as the Ohio Treasurer, the Ohio Attorney General, and then as the first director of the U.S. Consumer Financial Protection Bureau.

LAWS967001 Oliver Wendell Holmes and the Making of Modern American Law WELLS, CATHERINE P Fall 2020
Holmes was a pivotal figure in American law. His career spanned well over 50 years. In 1881, he wrote The Common Law, a comprehensive treatment of the origins of the common law and its role going forward. In 1882, he was appointed to the Supreme Judicial Court of Massachusetts, and in 1899, elevated to Chief Justice. During his tenure, the Court played a central role in adapting the common law to the realities of a rapidly industrializing society. In 1903, Theodore Roosevelt appointed him to the U.S. Supreme Court. There he confronted a range of cases that arose from the Progressive Era and the growth of federal power. During the First World War, he became one of the leading champions of the First Amendment. Finally, at the end of his career, he became well known for defending legislation from the New Deal. Aside from his legal achievements, Justice Holmes led a life of adventure and celebrity. This is part of what made him such an icon of American law. The other part was insight into the connection between law and philosophy. He believed that learning the law gave important insights into the meaning of life and the nature of a life well lived.

LAWS992502 Mediation GRAY, ERICKA B Fall 2020
An introduction to the theory and practice of mediation necessary to understand the mediation process from the perspective of a mediator or as an advocate representing clients in the mediation process. Mediation is an assisted negotiation with the mediator acting as a third party neutral facilitator. Beginning with a review/overview of interest based negotiation, mediation theory, and the role of mediation in the legal system, then course progresses to include a skills training component of simulate cases with students participating as mediators and parties. The mediation process is examined and various skills and techniques of the mediator are taught. Understanding ethical practice and legislating related to mediation is an integral part of the course.

LAWS992601 Taxation I (Individual Income Taxation) OEI, SHU-YI Fall 2020
Taxation I is the basic introductory course in federal income taxation. In contrast to courses in the first year, it is primarily a statutory course, dealing with the Internal Revenue Code and the Regulations. The focus of the course is divided between mastery of the technical tax principles and understanding of the basic policy judgments which are implicit in those principles. For a student who takes no additional tax courses, Taxation I should provide an overall understanding of how the federal income taxation system functions. For students desiring to continue their studies of tax, Taxation I develops the themes which will be recurring in later courses and forms the basis on which the subsequent tax courses build.

LAWS994301
Criminal Procedure KOH, STEVEN A
Fall 2020
This course explores the constitutional rules that govern the range of actions taken by government officials (primarily law enforcement officers) in the course of investigating criminal activity. We will critically examine the way that courts regulate invasive actions such as frisks, searches, detentions, arrests, interrogations, and uses of force through the use of balancing tests that weigh the social benefits of crime prevention and criminal apprehension against the costs of individual liberty and privacy.

LAWS995701
Sports Law YEN, ALFRED C
Fall 2020
This course offers the study of selected topics in the application of law and legal thinking to sports. Particular attention is paid to how law or legal thinking shapes the business of sports and the behavior of those who run, play in, or regulate sports. Topics include league governance, merchandising, media rights, antitrust, labor law, and tort law. The class also includes a major simulation about the movement of college football teams to new conferences. The class requires a substantial research paper on a topic of the student's choice.

LAWS999001
Environmental Law PLATER, ZYGMUNT J
Fall 2020
The basic course in environmental law, studying a broad range of environmental cases—from pollution and nuclear issues to parks and wetlands—and focusing upon the legal doctrines, public and private law structures, and litigation techniques that apply to environmental protection controversies. This course studies the ways in which legal rules and procedures have been drawn from every corner of the legal system from tort and constitutional law to statutory and international law to handle environmental challenges of private and public actions. The course also serves as a case study in the implementation of public policy through litigation skills and legislative process.

LAWS999001
Banking Regulation MCCOY, PATRICIA A
Fall 2020
This course examines why the banking industry is one of the most heavily regulated U.S. industries and how federal safety and soundness regulation works from cradle to grave. The course begins by providing a historical overview and analyzing the rationales for government intervention in banking. The remainder of the course examines the techniques used by the government to constrain the risk of bank panics, including entry controls (through chartering), activities restrictions, prohibitions against mixing banking and commerce, minimum capital and other prudential requirements, and limits on risky activities by bank conglomerates. Special attention will be devoted to federal deposit insurance and the FDIC's procedures for resolving insolvent banks. Students will consider how well these rules work and the reforms enacted after the financial crisis of 2008. This course does not cover consumer financial protection or provisions of the Uniform Commercial Code.

Law Practice II BRATT, CHERYL
Spring 2021
In their second semester, all 1L students will be enrolled in this 2-credit course in satisfaction of the requirement in ABA Standard 303(a)(2) for a rigorous writing experience in the first year which is faculty supervised. Building on the research, analysis, and writing experiences in Law Practice I, students will prepare documents, primarily in the context of advocacy, which involve more complex legal problems than those presented in Law Practice I. The emphasis will be on improving clarity, precision, and effectiveness of these communications for a designated audience and purpose in a simulation, with continued attention paid to a lawyer's ethical and professional responsibilities to the client and the legal system. The course involves classroom instruction and discussion, group work, and intensive individual feedback and conferencing.

In their second semester, all 1L students will be enrolled in this 2-credit course in satisfaction of the requirement in ABA Standard 303(a)(2) for a rigorous writing experience in the first year which is faculty supervised. Building on the research, analysis, and writing experiences in Law Practice I, students will prepare documents, primarily in the context of advocacy, which involve more complex legal problems than those presented in Law Practice I. The emphasis will be on improving clarity, precision, and effectiveness of these communications for a designated audience and purpose in a simulation, with continued attention paid to a lawyer's ethical and professional responsibilities to the client and the legal system. The course involves classroom instruction and discussion, group work, and intensive individual feedback and conferencing.

LAWS219004
Professional Responsibility KAUFMAN, NANCY E
Spring 2021
This course focuses on central issues of professional responsibility faced by most lawyers in the practice of law, whether in the public or private sector. Included may be problems of client confidences, conflicts of interest, behavior in court, obligations to represent unpopular clients, and other restrictions on a lawyer’s own speech and actions. Other topics focus on the fundamental moral responsibility of lawyers, analyzed in terms of the rules governing attorney conduct, principles of moral philosophy, and the pressures that create ethical blindness.

LAWS219301
Professional Responsibility for the Legal Profession ADEDIRAN, ATINUKE
Spring 2021
This course will teach students the Model Rules of Professional Conduct and other elements of the law that govern lawyers. We will consider gaps and ambiguity in how lawyers respond (and should respond) to legal uncertainty. Alongside doctrine, this course will also draw from interdisciplinary perspectives in the social sciences to teach students about the ways in which lawyers’ work and legal practice can impact society. The course will also address issues and problems that confront the profession as a whole, such as the legal services market and its regulation, the distribution of legal services, the professions’ demographics and social structure, diversity and inclusion, and the implications of technology and globalization.

LAWS281002
Negotiation RIVERA, ANA M
Spring 2021
The goal of this course is to teach you to think about negotiation as an opportunity to solve a problem that exists, or create new value where there is none, or try to make a bad situation a bit better. I hope to enhance your ability to think creatively and synthetically as well as analytically. You will also learn that planning is essential and can sometimes make up for your status as a new legal negotiator. The skills you will learn include analysis, persuasion, creativity, listening, interviewing, counseling, question framing, and the use of law and legal principle. We will also explore the moral and ethical issues implicated in negotiation—honesty, integrity, character, reputation, and personal identity.

LEAPS283101
LEAPS Capstone Project SARDA, EVANGELINE
Spring 2021
The LEAPS Capstone Project develops a cohort of third-year students interested in leadership in public service (defined broadly). Students identify an issue of deep interest and interview with Professor Sarda to enroll. During the semester, students develop individual or joint change projects of their choosing and design to address the identified issue(s). Through weekly meetings with classmates, mentors, and professor, students receive coaching and feedback on their project design, vision, and leadership, and develop skills to manage dynamic situations that involve uncertainty and ambiguity, 180 degree shifts in vision and design, roadblocks and frustrations, and also, successes (to name a few). Benchmarks and deadlines are set throughout the semester to ensure that students develop their projects in a systematic yet dynamic and reflective fashion. Course expectations include attending all meetings, writing journals, and completing assignments related to benchmarks, a final presentation, and a final paper. Student journals reflect upon and document their journey and developing capacities, uncover links between their life mission and their project mission, and develop a philosophy of leadership, of public service, and of professional identity formation. Limited enrollment. By permission only.
Contact Professor Sarda at sarda@bc.edu. Variable credit.

LEAPS283102
LEAPS Capstone Project SARDA, EVANGELINE
Spring 2021
This seminar is designed for students who would like to examine carefully the development of legal analysis skills, test performance techniques and a strategic mindset. The course will also provide early preparation for the Bar Exam, specifically the Multistate Bar Exam (MBE), the Multistate Essay Exam (MEE), and the Multistate Performance Test (MPT), which are exams created by The National Conference of Bar Examiners (NCBE). While this course will have a skills approach it will also focus on select topics of law within two substantive subjects tested on the MBE and the MEE. The course will benefit any student who plans to take the bar exam. It will be especially helpful for those seeking to strengthen their legal analysis or legal writing skills. The course will include regular assessments, including an opening test (a “pre-test”), in-class quizzes, a mid-term exam and a final exam. This course is offered on a Pass/Fail Basis only. Students will have to achieve a minimum score on assessments to receive a passing grade. Course materials will be provided by instructor. This course is limited to fall semester third-year students who plan to sit for the bar exam in the summer immediately following graduation. This course is not intended to replace the need for a post-graduate full bar review preparation course. Students should plan to also take a full bar review course after graduation.

LAWS323201
Environmental Law Seminar (Advanced) PLATER, ZYGJMUNT J
Spring 2021
This seminar is oriented each year toward a significant current focus in land and environmental protection law. Participants study material together within the focal area, and prepare one or more research papers on a chosen aspect of the year’s theme. For Spring 2021, each seminar participants will choose and focus upon two federal environmental protection regulations that were eroded during the Trump presidency, analyzing the science and purpose of the prior-existing regulations, what changes have occurred, and whether and how optimal environmental protection can be restored; students may also choose to analyze specific prospects for limiting anti-environmental protection judicial decisions. The seminar meeting time will be scheduled to accommodate the individual schedules of those students who enroll in the seminar, not limited to any time slot that is scheduled in advance. 2 or 3 credits--no prerequisites.

LAWS334501
Movement Lawyering FARMBAN, DANIEL S
Spring 2021
This is a course about the complex relationship between lawyers, social movements, and social and legal change. We are living through a moment of instability and possibility where legal norms are eroding and transforming all around us. As lawyers (or at least soon-to-be lawyers) we are faced with the question of what roles we should or can play either in upholding, challenging, or remaking the systems that we operate within. This course offers an opportunity to reflect on this question by thinking deeply and critically about how and whether lawyers can play a role in social movements. While we will be reading and studying together as a class, we’ll also be interacting with (and reading alongside) law students and lawyers from around the country.

Students in the course will have the chance to learn from and question practicing lawyers. In addition to the traditional modes of engagement (reading and writing), students will have the chance to lead class meetings, do individualized field research in their areas of interest, and engage with law students from around the country.

LAWS337602
Business Immigration Law MANDELL, BETHANY S
Spring 2021
This course will provide an overview of the various employment-based non-immigrant and immigrant visa categories, as well as the nuts and bolts of case preparation for the most commonly pursued non-immigrant and immigrant classifications. We will review the process for becoming a lawful permanent resident of the United States through employment-based sponsorship, including the labor certification process under PERM, the I-140 immigrant petition and options for employment sponsored permanent residence petitions other than PERM, and adjustment of status or consular immigrant visa processing. The course will also include discussions regarding the practice of business immigration law in a law firm environment, touching on applicable ethical considerations, client relations, client interviewing, and tips for strategic case representation and client management for companies both large and small. There will be a practical component to the course designed to provide a more in-depth examination.

LAWS337901
Consumer Bankruptcy KOHA, DAVID
Spring 2021
This course studies bankruptcy relief for individual debtors under chapter 7 (liquidation) and chapter 13 (rehabilitation). Topics covered include pre-bankruptcy planning, the means test, eligibility, property of the estate, the automatic stay, exemptions, lien avoidance, non-dischargeable debts including domestic support and other marital obligations, jurisdiction issues, reaffirmation and redemption rights, the trustees avoiding powers, avoidance actions (preferences and fraudulent transfers), chapter 13 plans, and the bankruptcy discharge. The course adopts a problem-solving approach. The final grade for the course is based on an in- class final exam. Students should take this course if they plan to: (1) practice in a small firm; (2) represent consumers and small business owners; (3) practice domestic relations law; (4) acquire or become a bankruptcy court clerk.

LAWS368001
Mindfulness and Contemplative Practices for Lawyers ANZALONE, FILIPPA M
Spring 2021
Law practice is by nature a demanding profession that requires critical thinking, has lots of deadlines, and requires both cognitive and emotional intelligence. As a result of the demands of their chosen vocation, lawyers, and law students experience higher levels of depression than the general population due to ubiquitous overwork and feelings of being overwhelmed by the constant stresses of their work and its burdens. Setting aside time for reflection and contemplation is hard to come by. The goal of this course is to introduce students to the concept of mindfulness and to explore ways that contemplative practices will enhance and enliven the skills that they will need as lawyers. To be successful and healthy, lawyers need to develop sustainable ways of coping that will help them better withstand the rigorous demands of the legal profession. Throughout the semester, we will be using mindfulness practices for stress reduction, self-awareness, compassion for self and others, focus, resilience, and leadership. This course is practical. By taking it, you will learn about concrete tools to better deal with the problems that you will encounter in the legal profession.

LAWS396102
Business and Human Rights TAMIR, IRIT N
Spring 2021
Human rights are traditionally thought of as a set of norms and practices to protect individuals from threats by the state as a result of a state’s duty to secure the conditions necessary for people to live a life of dignity. Gradually, obligations under this regime were extended to individual persons, including heads of state, seeking to hold them to account for conduct that rises to the level of international crimes. The 1990s marked an effort to expand these norms to business enterprises, particularly multinational corporations. In 2011, the United Nations Human Rights Council unanimously endorsed the UN Guiding Principles on Business and Human Rights (UNGPs). Key elements of the UNGPs have also been adopted by numerous other international and national standard setting bodies, individual companies and business associations, workers organizations and civil society actors. This course will look at the governance gap prior to the UNGPs and their emerging doctrine, along with the three pillars they present, the state duty to protect, the business responsibility to respect, and access to remedy. In addition, participants will simulate an experience in developing a human rights impact assessment and advocacy strategy for holding corporations accountable. Students will be evaluated on two projects throughout the semester and a final paper along with class participation.

LAWS440301
Employment Law KOHLER, THOMAS C
Spring 2021
This course addresses the legal regulation of employment of those without any form of collective representation, including executives, hourly and contingent employees. It addresses three major areas: (1) The common law regulation of the employment relationship. This includes formation of the employment relationship; common law exceptions to the at-will rule; privacy and proprietary protections (including electronic media); trade secrets and other intellectual property concerns; restrictions on competition; the use of arbitration as a means to avoid jurisdiction of common law courts. (2) The second area covered is federal regulation of wages and hours pursuant to the terms of the Fair Labor Standards Act (an area of substantial growth and litigation). (3) The law and the Occupational Safety and Health Act. This course is an introduction to a controversial area of the law. Consideration of current developments and trends, economic and social, as well as comparative legal approaches, are included.

Millions of individual Americans, as well as foundations and corporations, donate well in excess of $300 billion, each year, in charitable gifts. Even in soft economies, that figure tends to grow annually. Philanthropy has become a key part of the U.S. economy, fully 2.2% of GDP and, increasingly, a discrete and important field of the practice of law. In this course, students will explore the structure of American philanthropy, its legal history, current regulation, case law, and emerging legislation and topics on public policy. The course will introduce students to sophisticated charitable giving techniques used to convey donations and trends in the practice of law and philanthropy. Whether anticipating a practice with active engagement in philanthropy, or, volunteer service as a member of foundation or non-profit boards, this course will provide students with an in-depth orientation to the field. This course requires a paper and not a final exam.

This survey course emphasizes federal copyright, trademark, and patent law and related state trade secret, rights of publicity, and unfair competition law. It is meant to provide students with a general working knowledge of the various intellectual property doctrines, and an understanding of how the individual intellectual property doctrines compare, contrast, and may be used to complement one another. This course is appropriate for the generalist who wants to understand and be able to analyze IP issues, which are ubiquitous in the modern practice of law. It is also appropriate as the first introductory course for students interested in taking a number of IP courses.

This course is about the law of payments. It can be relevant for almost all lawyers, because a large part of what lawyers do involves "moving money." This not only includes specialists who work for banks, credit card companies, and financial institutions. Corporate lawyers close deals with one party sending money to the other. Private and government litigators settle civil and criminal cases for payment of money--where the two sides do not trust each other. Family lawyers sometimes have to think about the mechanics of alimony and child support payments. And of course there is payment of a lawyer's own fees. Therefore this is a basic "primer" course for all lawyers, regardless of prior experience or planned practice area. To understand this topic, we will start with the fundamental concept of money and the rights of sellers, buyers, consumers and banks regarding traditional cash, notes, bank deposits, checks and letters of credit. But the law in this area is also changing rapidly in direct response to new payment-system businesses and consumer transactions arising from the internet and financial technology ("FinTech"). So we will turn to a range of more modern payment systems: wire transfers, credit and debit cards, and electronic banking. Finally, we will use all of these tools to examine emerging legal issues for non-bank mobile payment systems such as Venmo, cryptocurrencies such as Bitcoin, and new types of government-issued money that respond to these technologies.

This course addresses the conduct of foreign relations by the United States with specific reference to domestic legal constraints, such as statutes and the Constitution. The course treats (1) the separation of powers between the Congress and the Executive in foreign affairs, specifically with respect to the war power; (2) the treaty power and the domestic law of treaties and other international agreements; and (3) the role of the judiciary, including the immunity of foreign states ("sovereign immunity"), the "act of state" doctrine, jurisdiction to prescribe and enforce laws outside the borders of the United States, and international law in U.S. courts. The course has a particular emphasis on post-9/11 developments in the law as a result of the war on terror. There are no prerequisites and minimal overlap with subject matter with International Law, together with which this course may, but need not necessarily, be taken to form a year-long sequence.

This seminar will examine the scope and effect of existing public regulation of labor markets--with a primary focus on the National Labor Relations Act, Fair Labor Standards Act, Title VII, the Occupational Safety and Health Act, and the antitrust laws--to assess their strengths and limitations in effectuating workplace protections and combating economic inequality. The seminar will begin with a historical overview of the origins of existing regulation and evaluate their adaptability to current workplace realities. We will focus in particular on the adaptability of existing regulation to the gig economy, subcontracted and outsourced work, temporary work, provided by independent contractors, and low-wage work. In analyzing the limitations of current protections, the seminar will focus both on substantive rights and obligations imposed by current law as well as the role and ability of labor
null
Students will continue to build on the skills gained in their First Year Legal Research and Writing course and need only an interest in bettering their writing skills, including their editing skills. Using hypothetical client problems and a simulated court record, students will write client communications, including client letters and electronic communications, as well as pretrial civil litigation documents, such as legal briefs. Students will spend course time discussing each written assignment, reviewing drafts, and collaborating on in-class exercises.

Intellectual Property Licensing and Technology Transfer S. JAMES BOUMIL
Spring 2021
Licensing of intellectual property assets has become a multi-billion-dollar business annually, and many of the largest technology companies derive a significant portion of their revenue from licensing income. This course will provide an introduction to the licensing of intellectual property and negotiation of related agreements. Topics covered will include IP fundamentals, the foundations of IP licensing, licensing strategies, drafting, negotiation, and enforcement. The course will include a mix of lecture and interactive workshops. No prior experience with intellectual property is strictly required, although students are strongly encouraged to take one or more IP courses either prior to enrolling or concurrently with the class. A technical background is not required.

LAWS748201  
Law of Toxic Substances FOWLEY, JEFFRY T  
Spring 2021  
This course will provide students with an in-depth review of the laws and policies regarding the introduction of hazardous substances into the marketplace, the handling and release of such substances, and the storage, treatment, and disposal of hazardous wastes. The course will also study the investigation and remediation of chemical releases, including examining both major cleanups at "Superfund" sites and the cleanup and redevelopment of "Brownfield" sites. Students also will review how these environmental issues impact purchase and sale of real property and how due diligence and allocation of liability can be handled in transactions involving contaminated property. The course will focus in particular on the TSCA, RCRA, and CERCLA statutes. The course will emphasize the practical aspects of practicing environmental law. During the course students will do three papers/practical exercises in lieu of exams.

Federal Health Law, Policy, and Politics CHIRBA, MARY ANN  
Spring 2021  
This course will evaluate the reasons for the US health care system's high costs & poor outcomes; the Affordable Care Act's methods, successes & failures in expanding access to, & improving the quality & cost of health care; judicial & legislative challenges to the ACA's individual & employer mandates, Medicaid expansion, subsidized coverage & mandated benefits (including no-cost contraceptives); GOP efforts to repair, repeal or replace the ACA; & emerging challenges to the Trump Administration's use of executive orders, suspension of notice & comment for deregulation & incremental legislation to destabilize the ACA & change access to health care and coverage. We will also examine two of the nation's most urgent public health crises; gun violence & the opioid epidemic. Both increase mortality, morbidity & costs. Both illustrate the adverse impact of inconsistent laws & policies for individuals, health care providers, private industry and lobbyists, and state & fed. government. Both demonstrate the increasing importance of litigation in seeking redress for the unsustainable costs & unbearable health burdens that federal policies have shifted to states, municipalities & individuals. Both underscore the importance of law in promoting and impeding public & personal health. The course is NOT intended to instill a particular point of view but only to enable your own views, criticisms and disagreements to be informed by reality, not myth. No need for an interest in practicing health law.

LAWS770302  
Education Law and Public Policy FLEMING, DANA L  
Spring 2021  
This course addresses the political and legal aspects of the role of education in our democratic society. Provides an introductory survey of public policy issues and laws governing preschool, elementary, secondary, and higher education. Included are such topics as religious freedom, free speech, and due process; the liability of educational institutions and educators; the legal distinctions between private and public institutions; student and parent privacy rights; disability rights; and the promotion of educational equity among all groups regardless of gender, sexual orientation, language, race, religion, ethnicity, or socioeconomic background.

LAWS771001  
Constitutional Theory BARROZO, PAULO D  
Spring 2021  
Great constitutional questions always evoke constitutional theory. This course focuses on the great constitutional questions of our time, from the institutional design of electoral systems to the future of the separation of powers; from the constitutionalization of the economy to the constitutionalization of the environment; from the constitutionalization of the family to the constitutionalization of entertainment; from the clash between information and privacy to the tension between constitutional stability and cultural change. Students read landmark judicial decisions as well as the most fecund constitutional scholarship. Graded on final paper. No knowledge of constitutional doctrine or of legal theory assumed. Students and auditors from across the university are welcome. No pre- or corequisites. Meets the Law School's Perspectives Requirement.

Whistleblowing and Retaliation

GREGORY KEATING

Spring 2021

The laws relating to whistleblowing have evolved dramatically in the last twenty years. Additionally, whistleblowers in both the private and public sector have increasingly played a more prominent role in influencing social reform and public policy. The courts, legislatures, and government agencies charged with enforcing whistleblower laws have wrestled with the degree to which whistleblowers should be protected from retaliation and under what circumstances they should be incentivized to come forward by the prospect of a monetary award. In the private sector, courts remain divided over the proper balance between whistleblower protection and enforcement of legitimate corporate business interests such as the protection of confidential and proprietary information and trade secrets. In the public sector, challenges abound to balance competing interests in disclosing alleged wrongdoing while protecting national security. In addition to examining the dramatic evolution of the laws and social policies relating to whistleblowing, this course will also examine the many ethical issues presented such as when and under what circumstances an attorney present as a whistleblower. Finally, this course will examine best practices from a corporate compliance perspective to foster transparency and to effectively investigate whistleblower claims as they arise.

Administrative Law

LYONS, DANIEL A

Spring 2021

This course will examine the legal framework for the work of administrative agencies. We will explore the sources of authority for agency action under the U.S. Constitution and will examine the accountability of agencies to the legislative and executive branches of government. The course will survey the procedures that agencies must follow when they engage in rulemaking, enforcement, and adjudication. We will study the role of the courts in overseeing agency action. This course is intended to introduce students to regulatory agencies in a variety of substantive fields of law, such as financial, environmental, healthcare, immigration, labor, to name a few.

Business Bankruptcy

HILLINGER, INGRID M

Spring 2021

This course explores business reorganization under Chapter 11 of the Bankruptcy Code. It also touches on Chapter 7 liquidation for business entities. It adopts a problem-solving approach. Secured Transactions is recommended but not required. Students should choose this course if they plan to practice any type of business law--transactional as well as commercial litigation.

Estate Planning

MADOFF, RAY D

Spring 2021

This course is a hands-on approach to the work of the estate planner. There are certain documents that all individuals need: durable powers of attorney, health care proxies, wills, and sometimes trusts. In addition, individuals with large estates often hire estate planners to ensure that their property passes in the most tax efficient way. This course will explore the work of the estate planner in working with clients at all levels of wealth. In this course students will be involved in the estate planning process from beginning to end. Starting with the interview process, students will have the experience acting as both an attorney and a client. Students will then draft the basic estate planning documents including a durable power of attorney, basic will, and a health care document. Students will then learn about the various uses of trusts in estate planning. We will then turn to the tax rules applicable to transfers of property at death and during life and consider some of the most popular estate planning techniques that are available to reduce these tax liabilities. Finally, we will look at areas requiring special attention including planning for retirement benefits, succession of family businesses, and charitable planning. The book for this course is Estate and Testamentary Planning (CCH) by Ray Madoff (with Cornelia Tenney, Martin Hall, and Lisa Mingolla). While not required, Trusts and Estates is highly recommended.

Copyright

LIU, JOSEPH

Spring 2021

This course studies the ability of authors, publishers, artists, and others to control the distribution, sale, copying, and performance of their works. Topics will include the subject matter of copyright, requirements for copyright, proof of infringement, and remedies. The course will cover the application of copyright law to music and literature as well as the rapidly developing use of copyright law to protect high technology products such as computer programs. Students interested in pursuing careers in high technology law should seriously consider taking classes in both copyright and patent law.

Family Law

DONOHUE PRONO, CLAIRE P

Spring 2021

The practice of family law applies rights and duties to people who are in or are former members of a family. The marital relationship is the central line to all family law. In this course, we will explore the family law issues that arise among family members. We will also consider the legal consequences of a romantic relationship with someone other than a spouse. In addition, the course will consider the legal issues that arise with the death of a family member.

Corporations

FITZGIBBON, SCOTT T

Spring 2021

This is the basic course in corporation law. It focuses on the governance structure of the corporation and the allocation of power and responsibility among shareholders, directors and officers. Topics covered include corporate formation, choice of entity, shareholder voting, fiduciary duties of officers and directors, insider trading, and the role of the corporation in society. This course requires a basic understanding of business organizations and will be a prerequisite to advanced courses in corporate law.

**Taxation II explores the taxation of corporations. After a brief review of the other common forms for organizing a business and their distinctive tax treatments, the course focuses on the most important federal income tax issues relating to the organization, operation, liquidation and reorganization of publicly-traded corporations (and other "C" corporations). This includes the relationships between corporations and shareholders and the treatment of dividends and redemptions. The course is important for any student thinking of practicing in the general business area, even if she or he does not intend to become a "tax specialist."**

Introduction to Transactional Lawyering

GERMAN, LOURDES

Spring 2021

This course is designed to acquaint students with some of the legal issues associated with starting up and operating a business or venture, examining the role of a transactional lawyer and learning basic practice skills. The objective is to give first year students an introduction to legal issues that are likely to encounter in an entrepreneurial setting, how the process works, decisions that need to be made and all of the various legal issues during the life cycle of a start-up. These issues include choice of entity, selection of a company name and trademark, protecting the intellectual property of a new company or venture, financing arrangements, operating issues including employment and general business agreements and exit strategies. The course will use simulation and role-plays to explore the legal issues relevant to transactional lawyering.

Introduction to Practice in the Criminal Justice System

HUROWITZ, STUART M;
BLOOM, ROBERT M

Spring 2021

In this class, students will engage in various aspects of a simulated criminal trial, which will give students the opportunity to develop some of the lawyering skills inherent in criminal practice, including how to interview clients, argue motions, engage in plea negotiations, break down a statute, fact investigation, and plan for a trial. Students will also be confronted with the important ethical issues that face counsel in criminal cases. The course will begin with an overview of the Criminal Justice System, including perspectives from various system mechanisms–police, court system, prisons, defense attorneys, and prosecutors. As this is an introductory course, it is necessary to introduce a variety of law school courses including professional responsibility, criminal law, and criminal procedure. The goal is to have students become familiar with the criminal justice system, gain experience through simulations, and think critically while performing tasks within the practice of criminal law.

Introduction to Restorative Justice: Transforming the Law from Within

BARTHOLOMEW, MELISSA;
LISCHINSKY, KAREN

Spring 2021

This course is designed to train students in implementing restorative justice principles & practices in legal practice. Students will learn how to facilitate restorative justice circles & how to incorporate restorative justice into their daily lives through an interdisciplinary framework combining the head & heart with the aim of cultivating compassionate lawyers committed to transforming themselves & the justice system. We will identify practices which nurture & strengthen the inner life & the connection between the inner life & well-being of lawyers & the quality of legal practice. To transform the justice system through restorative justice, future lawyers must be committed to transforming themselves & their way of being in the world. We will explore the roots of restorative justice, contemporary examples of its application in post-conflict settings in the US & the world, & examine its utility in addressing the pressing mass incarceration crisis, the current penal system & mode of punishment in the US. We will practice & apply Critical Race & Systems Theories to sharpen the students’ ability to assess themselves, & their future clients, through a systems lens & to examine the impact of racism, sexism, gender discrimination & other systems of oppression on behavior & on the justice system. We anticipate holding at least one class session off-campus at a correctional facility. The grade will be based upon attendance, participation, written assignments, & facilitation skills.

Introduction to Mobile Apps and Big Data: Legal Contributions

BLODGETT-FORD, SAYOKO J

Spring 2021

The focus of this interactive and experiential course is on the role the attorney can play in the development and launch of mobile applications, particularly apps that will leverage very large databases and real-time data processing. Legal issues and strategies to be covered include: contract issues, term sheet negotiations and drafting, intellectual property and data protection/privacy. While the instructor will draw on experiences at Tetris Online, Inc., the course will not be limited to game-based apps.

Insurancce Law Research

BREDA, KAREN

Spring 2021

This course is designed as an in-depth look at legal research techniques and resources used by lawyers in the insurance field and civil litigation attorneys. Course will cover sources of insurance law and insurance obligations, including contracts, common law doctrines, statutes and regulations. Course will also cover secondary sources, research tools and organizations for both insurance specialists and trial attorneys. Both print and electronic sources will be explored and utilized.

Intellectual Property Research

SHEAR, JOAN

Spring 2021

This course is designed as an in-depth look at the legal resources and research techniques used in the practice of intellectual property law. Course will cover basic legal research techniques involving the U.S. Constitution, statutes, cases, and regulations and how they relate to IP practice. IP specific research tools and techniques involved in patent and trademark practices will also be included. Students are exposed to practical techniques and strategies for using these materials competently, effectively, and economically in the research process to enable them to develop research skills necessary to be a successful lawyer in an IP practice. Grade will be based on class participation, effort on ungraded research exercises and performance on graded research exercises.

LAWS13002
Advanced Legal Research
NEARY, MARY ANN
Spring 2021
Advanced Legal Research offers an in-depth, hands-on experience with the process of legal research. Students use a wide range of legal materials and devise practical techniques and strategies for using these materials competently and effectively. The goal of the course is to create self-sufficient legal researchers capable of analyzing and resolving legal problems effectively. Emphasis is placed on the types of legal sources and research not covered in the first year of law school (e.g., treatises, forms sources, administrative law, statutory research, legislative histories and legal practice materials). Both print sources and free and fee-based electronic sources are explored and critiqued. The course covers Westlaw, LexisNexis, BloombergLaw, and other electronic sources.

LAWS13301
Business Law Research for the Transactional Practitioner
BRUCE, AMY
Spring 2021
Business Law Research is a simulation class in which students develop primarily their legal research skills, but also other lawyering skills such as organization and management of legal work, professional ethics, and collaboration. Students will educate themselves on critical research skills for transactional law practice through legal compliance scenarios that apply state, federal, and local law. Students in this class will also develop key business law research skills needed for drafting contracts and working on other important transactional tasks, such as due diligence for business combinations. Most initial research instruction takes place outside the classroom so that students can work on simulations in the classroom and receive guidance from the instructor. There are multiple opportunities for self-evaluation as well as extensive feedback on a regular basis from the instructor.

LAWS14001
Introduction to Civil Litigation Practice
MINUSKIN, ALAN D
Spring 2021
This course provides an introduction to civil litigation practice, with emphasis on the word "practice." The 1Ls enrolled will bring a basic knowledge of Civil Procedure, plus lifetime perceptions of how civil litigation is conducted, and a personal sense of morals and ethics. The course will provide an understanding of skills involved in litigating a civil case through the stages preceding trial, with an emphasis on the interrelationship of those skills with the litigator's professional responsibilities to clients, colleagues, opponents, judges and others. In addition to discussions and guest presentations by experienced litigators, students will perform litigation skills-client interviews, negotiations, depositions, and courtroom advocacy--based on a hypothetical factual scenario. The combination of teaching techniques will provide insight into the real world of civil litigation while fostering skills that are important for all practitioners to master, whatever field they choose to enter.

LAWS15001
Introduction to Children's Rights Practice
SHERMAN, FRANCINE T
Spring 2021
Children’s Rights Practice is a 1L Elective designed to introduce students to the law and skills needed to represent children involved with state systems. A hypothetical case of a multi-system involved teenage girl will be carried through the semester exposing students to child welfare, delinquency and education law. Student simulations will include interviewing the adolescent client, representing her at a multi-disciplinary meeting, and negotiating a settlement of her education-based claim. In addition to relevant law and policy, guest speakers will discuss child development and how to work with an expert consultant to advance your client’s case. Critical issues of professional responsibility, such as client directed representation and how to navigate family relationships while representing the child, will also be studied.

LAWS23901
Representing Inmates at Prison Disciplinary Hearings
TANNENBAUM, KARI M
Spring 2021
Representing clients at prison disciplinary hearings provides a window into the hidden world of prisons. Massachusetts is one of the only states that allow students to represent clients at these hearings. All students will meet and interview clients in maximum security prisons, conduct discovery and investigation, file motions, cross-examine witnesses, make closing arguments and file appeals when necessary. Because the hearings are relatively short, students will be able to have multiple hearings each term. Legal skills learned: mini trials in 30-60 minute hearings; administrative law; adversarial practice;
client interviewing skills; witness interviews; discovery practice; motion practice (written and oral); cross-examination of witnesses; direct examination of client; closing argument; written appeals if necessary.

LAW826301
BC Innocence Clinic WHITMORE, CHARLOTTE H; BECKMAN, SHARON L
Spring 2021
Students in BC Innocence clinic work with faculty supervision on post-conviction screening and/or litigation of cases of prisoners who assert their innocence. Case screening involves review of trial transcripts, pre-trial discovery, appellate and post-conviction briefs, and judicial opinions, as well as factual and forensic research, to determine whether scientific testing or other investigative leads could establish a strong likelihood that the prisoner is factually innocent. Students produce a memorandum analyzing the case and making a recommendation as to whether post-conviction litigation should be pursued. Students engaged in litigation research and draft motions for various types of post-conviction relief with supporting memoranda and affidavits. Class component is devoted to casework and development of legal, professional, and ethical skills in the context of post-conviction innocence work. Students spend 10-12 hrs/week outside of class time on casework.

LAW826501
International Human Rights Practicum UROSA, DANIELA
Spring 2021
This course focuses on appellate submissions to regional and international courts and other legal organizations that address international human rights issues. For spring 2020, students will work on submissions to the Inter-American Court of Human Rights (IACHR) and the Inter-American Commission on Human Rights (IASHR). The Inter-American System for the protection of human rights (IASHR) is the regional system responsible for monitoring, promoting, and protecting human rights in the countries that are members of the Organization of American States (OAS). Currently, it is one of the strongest regional human rights protection systems in the world. This clinic will include two components. (1) The practicum will provide students with practical experiences in advocacy for the promotion of international protection of human rights through amicus briefs before the IACHR; drafting of legal reports, protocol proposals, and hearings before the IACHR; and the possibility of submissions to other human rights tribunals around the world. (2) The accompanying seminar will provide an overview on the study of the IASHR, including its normative framework, mechanisms, rights protected and its principal entities. Possible practicum fieldwork at the IACHR (Washington DC) or the IASHR (San Jose, Costa Rica) during spring break. Previous course work in International Law, International Human Rights, and/or International Legal Research is not required, but may provide an enriched perspective.

LAW826701
Community Enterprise Clinic TREMBLAY, PAUL R
Spring 2021
This course introduces students to transactional legal work on behalf of low- and moderate-income entrepreneurs, small businesses, nonprofit organizations, and first-time home buyers. The fieldwork is based at the Law School’s Legal Services Lab located in the Center for Experiential Learning on campus. Students will perform all of the legal work and interact with the clients. Students will be assigned to work with entrepreneurs with business-related legal needs; with emerging, community-based small businesses facing corporate, employment or similar legal issues; with nonprofit organizations or groups seeking assistance to establish a tax-exempt organization; and first-time home buyers. For fieldwork purposes students will be assigned six office hours per week at the clinic, arranged based on the student’s schedule. The fieldwork is complemented by a weekly seminar. The weekly seminar will address substantive law, ethical issues, and legal skills.

LAW830801
BC Defenders Clinic: Compassionate Release and Parole HERRMANN, FRANCIS R
Spring 2021
Under the newly enacted Criminal Justice Reform Act, inmates incarcerated at the state prison who are suffering from terminal illnesses or from irreversible physical or cognitive incapacitation may be eligible for medical release ("compassionate release"). Students will help prepare a petition for release and an accompanying medical parole plan with the assistance of a social worker or social work student. Students will advocate with the Department of Corrections and/or in the courts for release. Inmates who have become eligible for parole after serving at least fifteen years in prison appear before the Massachusetts Parole Board often without representation. Students will help prepare such inmates for their parole hearings and will represent them at the hearings.

Entrepreneurship and Innovation Clinic TARRANT

Spring 2021

The Entrepreneurship and Innovation Clinic ("EIC") is a dynamic clinic that provides free transactional legal services to under-resourced clients in the Greater Boston area on issues relating to new and emerging businesses. This innovative clinic provides students with the hands-on, practical experience needed to navigate the rapidly evolving fields of intellectual property and entrepreneurship. Law students working under the supervision of the clinic director provide a broad range of business law, intellectual property, and transactional services. Clients include micro-entrepreneurs, technology entrepreneurs, social entrepreneurs, artists, authors, filmmakers and musicians, who may be individuals or for-profit businesses in the Greater Boston area who are in need of transactional legal counsel related to starting or operating their business. The EIC is for students interested in learning to work with organizational clients and learning to represent clients in transactions.

Amicus Brief Clinic None

Spring 2021

The Amicus Brief Clinic will provide students and faculty an opportunity to weigh in on, and attempt to influence, the development of the law and public policy in the courts. In the Amicus Brief Clinic faculty will identify an important legal issue being considered or soon to be considered by a court. Faculty will then guide a small student team in the process of researching, writing, editing, and submitting an amicus brief to the court for consideration. Although the subject matter and faculty leader of each amicus brief will be different, every Amicus Brief Clinic will include instruction and supervision on legal research and writing as well as the rules relating to submission of amicus briefs.

Abraham and Eaglestone

Spring 2021

Students in the Immigration Clinic represent noncitizens in removal proceedings before the Immigration Court, which involves arguing bond motions for detained clients, conducting examination of witnesses, raising evidentiary objections, and arguing points of law. Students represent noncitizens in applications for legal status before the U.S. Citizenship and Immigration Services (CIS) office. Cases vary, but may include asylum and relief based on fear of persecution in the country of removal, waivers of deportation for long-term residents of the U.S., adjustment of status for noncitizens with U.S. citizen or permanent resident family members, visas for victims of violent crimes who have assisted in the prosecution of such crime, relief for noncitizen victims of domestic violence, and visas for juveniles who have been abused, abandoned, or neglected. Students conduct "Know Your Rights" presentations for noncitizens who are detained by the Immigration and Customs Enforcement (ICE).

This is the companion class to the national moot court teams. Enrollment and attendance in this class is mandatory for all members of a national team. The goal of the class is to help prepare students for not only for their individual competitions but also for litigation practice. The class is divided into three parts: overview of the moot court experience, appellate written advocacy and oral advocacy. The class will meet formally during the fall semester until October 15. The class will reconvene in the first half of the spring with their team coaches for oral advocacy/moot sessions until the competitions are complete. Students should expect an "incomplete" grade until they have completed their moot court experience (February/March).

Trial Practice
CHERNOFF, PAUL; GINSBURG, EDWARD M
Spring 2021
There are several sections of trial practice, which are taught by adjunct faculty who are judges or practitioners. Each instructor selects his/her own readings and exercises, but the coverage of the sections is quite similar. All require students to prepare and to perform aspects of jury trial—opening and closing arguments, and direct and cross-examination. The course is designed to develop practical skills and to build an appreciation for the relationship between substantive law and strategy and tactics in litigation. This section includes both civil and criminal trial exercises. Students also participate in a mock trial held in a real courtroom. All sections focus on trial advocacy; some also consider some pre-trial skills, such as discovery depositions. All sections have limited enrollments. Evidence is a prerequisite.

LAW876501
International Legal Research
CHEN, XIN
Spring 2021
This course aims to help students build knowledge, skills, and strategy in international and foreign legal research. Students will learn to use a variety of specialized legal research tools, both online and in print, to research treaties, decisions of international courts and tribunals, official documents of international organizations (United Nations, European Union, WTO, etc.), and legislation and court decisions of selected common law and civil law jurisdictions. Private international law, international and regional human rights systems, trade law, investment, and commercial arbitration will also be singled out for special attention. Students will develop their skills and receive feedback in in-class exercises and simulations. Grades will be based on three take-home assignments. Recommended for students interested in international legal practice and topics, members of the BC Law Review or Jessup Moot Court teams. Enrollment is limited to 20 students.

The goal of this course is to teach you to think about negotiation as an opportunity to solve a problem that exists, or create new value where there is none, or try to make a bad situation a bit better. I hope to enhance your ability to think creatively and synthetically as well as analytically. You will also learn that planning is essential and can sometimes make up for your status as a new legal negotiator. The skills you will learn include analysis, persuasion, creativity, listening, interviewing, counseling, question framing, and the use of law and legal principle. We will also explore the moral and ethical issues implicated in negotiation—honesty, integrity, character, reputation, and personal identity.

Judicial Process: Appeals MACGOWAN, ERIN R
Spring 2021
Judicial Process is a course which allows a student to sit as law clerks two days per week with Massachusetts Superior Court Judges (Trial Court). Students will be assigned to individual judges. It is expected that the student will perform one day doing assignments and the second day observing. There will be an opportunity to work with more than one judge. Students will therefore have the opportunity to observe and work directly with different judges and thereby learn from different judicial styles and perspectives. There will be a bi-weekly two-hour seminar meetings, which will be used to discuss various topics including the following: selection and discipline of judges; role of the jury; and a critique of the adversary system.

MA Attorney General Civil Litigation Program BARNICO, THOMAS A; SWEENEY, JAMES A
Spring 2021
The AG Civil Litigation Program is a full-year clinical experience in civil litigation in the Massachusetts Office of the Attorney General. Students work directly with assistant attorneys general in the representation of state agencies and officials in state and federal courts. The clinic teaches includes the following types of legal work: (1) the drafting of pleadings, motions, discovery, and other litigation documents; (2) legal research and writing of briefs in the trial and appellate courts; (3) oral argument in the state courts; and (4) other litigation tasks. Students will be assigned to one of two Divisions in the Government Bureau, either the Administrative Law Division or the Trial Division. Students assigned to the Administrative Law Division will work on cases involving administrative and constitutional law, federal courts, and statutory construction. Students assigned to the Trial Division will work on cases involving employment, tort, contracts and eminent domain and land use.

Landlord Tenant Practice NEIL SHERRING
Spring 2021
This course is a one semester course combining substantive law surrounding the relationship between residential real estate owners and/or lessors and their lessees with practical applications including a wide range of lawyering skills such as how to prepare for and conduct an initial client meeting, client communications, court hearings with an emphasis on ethical issues, research and investigations, strategic counseling, and courtroom performance. Students will examine strategic approaches to: (1) eviction bench trials with defenses and counterclaims including discrimination, retaliation, breach of warranty, breach of contract, and violations of the Massachusetts Consumer Protection Law (Chapter 93A), (2) injunctions seeking to void the tenancy based upon criminal conduct, and (3) temporary restraining orders seeking to compel landlords to remedy health code violations or stop a move out. This class will provide students with the practical skills needed for engaging in mediation and alternative dispute resolution, preparing for an eviction bench trial, evidentiary hearings and motions. We will examine the development of Housing Law during the current pandemic and legislative moratorium on certain evictions, evictions hearings/trials, access to justice, pro se litigants, and the legalization of marijuana in the areas of reasonable accommodation and federally subsidized housing.

LAWS981401
Introduction to Consumer Rights Litigation Practice MILLER, ELIZABETH
Spring 2021
In this simulation course, you will use consumer protection laws to help a client who has errors on his credit report and is being harassed by a debt collector. You will learn how to read a credit report, dispute errors and how to use this knowledge to help your client. You will also learn how to communicate with the client, how to avoid ethical conflicts and how to identify claims and evidence needed to prove each claim. You will engage in mediation and discovery, including a deposition of the debt collector's witness. Finally, you will draft and argue a motion for summary judgment. Method of Evaluation: Assignments.

Dispute Negotiation CRANE, DANIEL C; WORLEY, SARAH E
Spring 2021
This is an experiential course in which students will be active participants, negotiating cases on a weekly basis. The subject matter of the disputes will include: commercial transactions, gender bias issues, criminal plea bargaining, family law matters, personal injury cases, and other disciplines. Students will be introduced to the art of negotiating, reading body language and micro-messages, interviewing clients and reaching common ground with adversaries. The work will be critiqued as actual student negotiating sessions are taking place, all in an effort to familiarize students with various techniques, strategies, tactics, persuasive skills, and effective demeanor involved in successful negotiations. Although there will be some lectures, the emphasis of the course is "learn by doing."

LAWS987001
Civil Rights Clinic PARikh, reena
Spring 2021
This clinic will focus on civil rights issues affecting low-wage workers and immigrants in the Boston & MA area. Students will have the opportunity to practice different models of lawyering, including individual client representation, as well as community & movement lawyering. We will spend a good deal of time thinking critically about the role of the lawyer, client, & community in these different models & the intersection of worker & immigrant rights & racial justice. Our docket will have both litigation & community advocacy/policy matters on it that support the organizing efforts of grassroots & membership-based organizations. Each student will be assigned at least one litigation matter & one community advocacy matter & will be working in teams. On the litigation side, representative matters may include lawsuits on behalf of low-wage workers & immigrants who have experienced wage theft & other forms of exploitation, discrimination, & mistreatment, including in detention facilities. On the community advocacy side, we will provide legal, policy & other technical assistance to organizational clients including worker centers, local unions, & immigrant rights coalitions, in support of their legislative priorities or other organizing campaigns. Student Attorneys handle all phases of their client matters with close supervision & guidance of the professor, including fact gathering, client counseling, negotiation, oral advocacy, & as applicable, brief writing & courtroom advocacy.

LAWS989701
Civil Litigation Clinic MINUSKIN, ALAN D
Spring 2021
This civil clinical course allows students the opportunity to practice law under the close supervision of clinical faculty at Boston College Legal Services LAB, which is located in the Center for Experiential Learning on the Law School campus. Students are certified by the Massachusetts Supreme Judicial Court to advise and represent clients in every aspect of civil litigation. Practice areas are family law, housing, and public benefits appeals. Clinical faculty provide thorough feedback about students' work at all stages in order to help them build on their skills and learn from their experiences, including comprehensive feedback at both mid-semester and end of term. Six-credit students are expected to spend an average of 17-22 hours/week on clinic matters; ten-credit students average 30-35 hours/week. Pass/fail and variable credit options can only be exercised at the beginning of the term. Enrollment, by lottery, is limited to 16 students in the fall, and 10 in the spring.

LAWS9891001
Race, Policing, and the Constitution GERALDINE HINES
Spring 2021
The well-documented phenomenon of racial profiling and the widely publicized police killings of African-American males has sparked a lively public debate about the viability of legal and policy responses to these issues. In this seminar, we will examine the problem from three points of view. First, we will consider the legal context in which racial profiling came to be a constitutionally permissible mode of operation for police officers. In this part of the seminar, students will examine the role of the Supreme Court's Fourth Amendment jurisprudence in abetting racial profiling. Beginning with the Supreme Court's decision in Terry v. Ohio, 392 U.S. 1 (1968), students will review the cases that have defined the rules of engagement for encounters with the police and the public, paying particular attention to how the application of ostensibly neutral constitutional principles have, over time, validated racial profiling. In the second part of the seminar, students will explore the legal barriers to achieving accountability for racially discriminatory police conduct that results in a deprivation of the rights of the public. This last part of the seminar will challenge students to imagine doctrinal changes in the Fourth Amendment jurisprudence that potentially could nullify the legal significance now accorded to racially motivated police conduct.

Rappaport Law and Public Policy Seminar KANSTROOM, DANIEL
Spring 2021
This seminar explores contemporary issues at the intersection of law and public policy. It connects with the Rappaport Center's Senior Fellows in
Residence. This year's Fellows are Jonathan B. Miller, Legal Director of the Public Rights Project and former Chief, Public Protection and Advocacy Bureau (2015-20), and Civil Rights Division (2012-2015) Massachusetts Office of the Attorney General and Ajmel Quereshi, Senior Counsel for the NAACP Legal Defense and Educational Fund and Director of the Civil and Human Rights Clinic at Howard University. Course topics include: evasion policies, oversight of the police misconduct; equity in public schools, executive power in a pandemic, racial inequity in the Massachusetts criminal justice system, immigrant rights, and multi-state litigation or technology in law enforcement. The seminar meets once per week for 2 hours. Students will also be required to view each Senior Fellow's public lecture. For one academic credit, students attend and participate in all classes and write two critical reflection papers. Students may enroll for 1 or 2 additional credits. For each additional credit, students will choose a topic to explore, develop a class presentation, and write a research paper of approximately 15 pages.

LAWS915501
The Cradle to Prison Pipeline BLITZMAN, JAY
Spring 2021
In 2012, the DOJ's Civil Rights Division formally accused the city of Meridian, Mississippi and the state's departments of youth & human services of operating "a school-to-prison pipeline". While it is rare that such explicit practices are alleged, the reality of the school to prison pipeline is well documented. However, the realities of systemic practices & policies that have fueled what Marrian Write Edelman & others have characterized as the cradle to prison pipeline are now being scrutinized. The BBA's Cradle to Prison Pipeline Committee describes the process as the mechanism by which disparities in a wide range of arenas--including economic, health care, mental health, housing, child welfare & juvenile justice factors--"funnel" people of color, the poor, the LGBTQ+ community, & youth with disabilities into the system of mass incarceration. "Unpacking" this phenomena entails examining critical issues of race, class, geographical & educational segregation & implicates consideration of the larger frames that affect families in & out of courtrooms. As Jill Lepore notes in Baby Doe: A Political Tragedy, between 2010-12, 72% of the youth committed to the MA DYS had been involved with DCF & over half of that number has been the subject of abuse & neglect petitions. In exploring this terrain this course will consider the evolution of child welfare & juvenile justice systems, de facto v. de jure segregation & to encourage students to think about ways to chart a different course.

LAWS931301
Modern Conservative Legal Thought LYONS, DANIEL A; OLSON, DAVID S
Spring 2021
This reading group will consider the application of modern conservative thought to questions of law, regulation, and governance. We will begin with the inquiry: what is conservative thought in the United States in the twenty-first century? We will then consider alternative schools of thought, focusing mostly on progressive thought, but also considering libertarianism as well as critical legal thought. After creating a schema of schools of thought, we will apply these to legal, regulatory, and governance problems. Depending on the pace of the course, we will apply our schemas to topics including the allocation of authority in a democratic republic, constitutional and statutory interpretation, separation of powers, speech rights, association rights, separation of church and state, law and economics, antitrust law, administrative law, and the regulatory state. Enrolled students will have the option to add a two-credit paper that will satisfy the upper-level writing requirement.

LAWS992603
Taxation I (Individual Income Taxation) REPETTI, JAMES R
Spring 2021
Taxation I is the basic introductory course in federal income taxation. In contrast to courses in the first year, it is principally a statutory course, dealing with the Internal Revenue Code and the Regulations. The focus of the course is divided between mastery of the technical tax principles and understanding of the basic policy judgments which are implicit in those principles. For a student who takes no additional tax courses, Taxation I should provide an overall understanding of how the federal income taxation system functions. For students desiring to continue their studies of tax, Taxation I develops the themes which will be recurring in later courses and forms the basis on which the subsequent tax courses build.

Antitrust Law HAFIZ, HIBA M
Spring 2021
Antitrust law issues abound in many areas of law, including corporate work, litigation, and even tax law. This course covers basic U.S. antitrust law, as codified in the major federal antitrust statutes, and the body of case law interpreting these statutes. Specific topics to be covered include agreements in restraint of trade, monopolization, vertical and horizontal mergers, price discrimination, and tying. No prior understanding of economics or trade regulation is required. Students will be instructed in the basic economics of competition and monopoly needed to analyze and practice antitrust law.

**Neurobiology of Stress and Resilience in the Life Course** BRUECK-CASSOLI, STEPHANIE  
**Summer 2020**  
This course examines the ways in which stress poses risk to healthy biological, psychological, and social development. Using life course perspective and ecological systems theory (micro through macro), the course also highlights the characteristics, relationships, and contexts that increase resilience at each life stage (in utero through end of life). Circumstances relevant to social work (including but not limited to perinatal stress, trauma, bullying, violence, poverty and homelessness) are examined through the dual lenses of stress and resilience. Neuroscientific, genetic, and related biological research is emphasized in the course; however, no background in biological sciences is required as a prerequisite.

**Families Impacted by Military Service** CANFIELD, JULIE A  
**Summer 2020**  
This course explores how families are impacted by military service (FIMS) emphasizing the effects of military culture within which military families function. Stressors such as deployment, and the protective factors associated with military communities will be discussed. Attachment theory will be explored as it pertains to the loss and separation involved in long-term and sometimes repetitive deployment cycles. Substance use, anxiety, avoidance behaviors, and risk- taking behaviors will be discussed in terms of their impact on family life and family system functioning. Resiliency theory will be highlighted in terms of preventing or ameliorating post-deployment difficulties in families impacted by military service.

Group Therapy for Children and Adolescents ROMANO, CAROLYN
Summer 2020
This course will prepare students to design and facilitate experiential skills-based groups with both children and adolescents. Building on first-year foundational content this course prepares students to learn how to facilitate skills-based group therapy with youth. Several guiding theories, including (Cognitive Behavior Therapy, Dialectical Behavior Therapy, Solution Focused Therapy, Narrative Therapy, and Motivational Interviewing), will be integrated with multiple experiential activities as vehicles for the engagement in the interventions. Each guiding theory dominates a minimum of two weeks in the syllabus to ensure depth of learning and exploration of possibilities for theory into practice. The experiential activities will include music, adventure, bibliotherapy, art therapy, and technology to assist in the engagement of clients in the learning process and will be utilized throughout the course. Assignments challenge students to develop two innovative original experiential group sessions and demonstrate competence in facilitating both of their group sessions.
Credits: 3
Room and Schedule: TH 1-4;REMOTE LEARNING;SYNCHRONOUS;MAY 21 - JUL 23;
Satisfies Core Requirement: None
Prerequisites: SCWK7721.

SCWK886001
Couples Therapy PILOWA, EMILY
Summer 2020
An advanced course examining and analyzing theories, research, and interventions with couples. The use of cognitive, behavioral, emotion-focused, brief treatment, and skills-training approaches are critically evaluated. Research on their empirical bases is examined. Emphases include working with couples from diverse cultural backgrounds, practice with same-sex couples, and special issues such as living with chronic illness, poverty and economic stress, facing divorce, infidelity, interpersonal violence, and sexual dysfunctions. The course will describe how to adapt couple-based assessments and interventions to various settings, such as acute medical, psychiatric, and child-focused settings.
Credits: 3
Room and Schedule: T TH 9-12;REMOTE LEARNING;SYNCHRONOUS;MAY 19 - JUN 18;
Satisfies Core Requirement: None
Prerequisites: SCWK7762.

SCWK886201
Cognitive-Behavioral Therapy PIMENTEL DIAZ, YLIRA
Summer 2020
An advanced practice course that integrates CBT theory, practical assessment tools, and treatment applications with work with children and adults. Lab skills classes will provide students with the opportunity to practice specific techniques. With an emphasis on the extensive literature supporting CBT as an evidence-based model, the course focuses on the CBT assessment and treatment of specific disorders, including anxiety, pain, depression, bipolar disorder, ADHD, substance abuse disorders, and personality disorders. The relevance of Cognitive-Behavioral practice with populations at risk confronting issues of age, race/ethnicity, gender, class, religion, sexual orientation, and disability will be addressed.
Credits: 3
Room and Schedule: T TH 1-4;REMOTE LEARNING;SYNCHRONOUS;MAY 19 - JUN 18;
Satisfies Core Requirement: None
Prerequisites: SCWK7762.
Corequisites: None Cross-listed with: None Frequency: Annually

SCWK886401
Group Therapy RILEY, P ANITA L
Summer 2020
This course considers many applications of social work group treatment. Through a thoughtful review of selected group therapy literature, analysis of process recordings of group therapy sessions, lectures, class discussion and role-play exercises, students will develop an appreciation of the unique ways in which group treatment can promote individual psychosocial competence. Students will develop skills in the practice of social work group treatment.
Credits: 3
Room and Schedule: T TH 1-4;REMOTE LEARNING;SYNCHRONOUS;MAY 19 - JUN 18;
Satisfies Core Requirement: None
Prerequisites: SCWK7721.

SCWK886801
Dialectical Behavioral Therapy NEWMAN, ALISON B
Summer 2020
This course is designed to instruct and prepare students to integrate and apply Dialectical Behavioral Therapy (DBT), a comprehensive and flexible evidence-based treatment. Students will learn to conduct thorough risk assessments, develop crisis management client plans, understand borderline personality disorder from the DSM-IV and DBT lenses, create a DBT theory-driven case formulation and treatment plan by stages and targets, observing dialectic dilemmas, balancing acceptance and validation, integrating communication styles, applying commitment strategies, conducting chain/solution analysis, implementing diary cards and collaboratively problem-solving with clients and peers. Students will learn the four DBT modules: Mindfulness, Distress Tolerance, Interpersonal Effectiveness, and Emotion Regulation.
Credits: 03
Room and Schedule: MAY 21 - JUL 23; Satisfies Core Requirement: None
Prerequisites: SCWK7762.

SCWK887401
Adult Psychological Trauma: Assessment and Treatment FLINTON, KATHLEEN
Summer 2020
An advanced clinical course focusing on adults exposed to acute or chronic psychological trauma. Theoretical constructs stress an interactive approach: person, environment, situation. Emphasis is on the interconnections of intrapsychic, interpersonal, cognitive, and behavioral sequelae to catastrophic life events, with attention to socio-economic and cultural factors which influence an individual's differential response to trauma. Various methods are evaluated with the goal of multi-model treatment integration. Clinical presentations on specialized populations (e.g., combat veterans, victims of abusive violence, traumatic loss, disasters, people with AIDS, and the homeless) are used to integrate theory, research designs and strategies, and practice skills.
Credits: 03
Room and Schedule: T TH 1-4;REMOTE LEARNING;SYNCHRONOUS;MAY 19 - JUN 18;
Satisfies Core Requirement: None
Prerequisites: SCWK7762.
Corequisites: None Cross-listed with: None Frequency: Annually
Student Level: GRADUATE Comments: Elective Status: CLOSED

SCWK887402
Adult Psychological Trauma: Assessment and Treatment FITZGERALD, ZANE M
Summer 2020
An advanced clinical course focusing on adults exposed to acute or chronic psychological trauma. Theoretical constructs stress an interactive approach: person, environment, situation. Emphasis is on the interconnections of intrapsychic, interpersonal, cognitive, and behavioral sequelae to catastrophic life events, with attention to socio-economic and cultural factors which influence an individual's differential response to trauma. Various methods are evaluated with the goal of multi-model treatment integration. Clinical presentations on specialized populations (e.g., combat veterans, victims of abusive violence, traumatic loss, disasters, people with AIDS, and the homeless) are used to integrate theory, research designs and strategies, and practice skills.

SCWK887601
Solution-Focused Therapy TOHN, SUSAN
Summer 2020
An advanced clinical course focusing on time-effective treatments with individuals, families and groups. The course centers around Solution-Focused Therapy. Primary concepts include the paradigm shift from problem to possibility, the role of an active intentional clinician, and the careful use of language. Emphasis is given to the evaluation as key to the process, which involves building rapport, identifying a goal, and understanding the client's relationship to that goal. The course examines pivotal treatment strategies, including language, task setting, and creating hope in clients through our interventions.

SCWK995801
Community Engaged Partnership Research GALINDEZ-BIANCO, MARIA E
Summer 2020
Social work researchers have opportunities and ethical responsibilities to identify emergent trends in social issues, contribute to the evidence base needed for policy and practice, and to explore the experiences of vulnerable populations in their communities. Responsive community-based research projects will be conceptualized, designed, and implemented in partnership with community groups, community-based organizations, and/or public agencies. This three credit course is structured as a series of in-class sessions covering values, knowledge, and skills related to the process of conceptualizing and implementing community-based research in collaboration with local agencies. The course will prepare students for the Summer Intensive Research Internship.
Credits: 03
Room and Schedule: M T W TH 9-11 30; REMOTE LEARNING; SYNCHRONOUS; JUN 01 - JUN 24;

Doctoral Independent Study None
Summer 2020
Individualized study for a student or small groups of students in an area that is not fully covered in existing courses. Specific guidelines available from Doctoral Program chairperson.
Credits: 01
Room and Schedule: BY ARRANGEMENT; MAY 25 - AUG 14;
Satisfies Core Requirement: None
An opportunity for Macro students to investigate one aspect of social work practice with groups or communities in-depth. In addition to being of interest to the individual student, the area of investigation must be of substantive import to the field and of clear significance to contemporary community organization and social planning practice. Any student who has successfully completed the first year program of Macro studies is eligible to pursue an independent study in the fall and/or spring semester of the second year.
programs, or examines alternatives in evaluating, formulating, and implementing social welfare policies and programs.

SCWK772101 Human Behavior and the Social Environment TEIXEIRA, SAMANTHA
Fall 2020
A foundation course emphasizing a systemic perspective in human development and social functioning. Concepts from biology and the behavioral sciences provide the basis for understanding the developmental tasks of individuals, their families, and groups in the context of complex, environmental forces which support or inhibit growth and effective functioning.

Attention is given to the variations that occur relative to ethnicity, race, social class, gender, and other differences which mediate the interface of these human systems with their environment.

Credits: 3

SCWK772301
Re-thinking Diversity: Systems of Oppression and Privilege GONSAVELS, BRIAN P
Fall 2020
The course provides a critical perspective on current issues and problems in American racism, sexism, heterosexism, ableism, and ageism. These issues and problems are studied in the context of the dynamics of social process, historical and anthropological perspectives, and theories of prejudice and social change. Social work's responsibility to contribute to solutions is emphasized. Different models for examining the issues of race, sex, sexual orientation, age, and ability are presented.

### Neuroscience of Human Relationships and Development

**SCWK772601**

Neuroscience of Human Relationships and Development

**PIONKE, PEGGY M**  
**Fall 2020**

Following human development from conception to end of life, the course provides students with an introduction to key neurobiological aspects (such as brain development and genetics) of the life course. Special attention is paid to examining the association between neurobiology and the nested layers and relationships in which development unfolds, including family, school, community, and wider society/policy. Concepts important to social work (including but not limited to attachment, trauma, stress, social relationships, emotions, health, and mental health) are addressed within various stages of development. No background in the biological sciences is required.

**Credits:** 3  
**Room and Schedule:** TH 2-3 50;ONLINE;SYNCHRONOUS;  
**Satisfies Core Requirement:** None  
**Prerequisites:** SCWK7721. With permission of the Instructor. With permission of the Department.  
**Corequisites:** None  
**Student Level:** OPEN

### Substance Use Disorders

**SCWK772701**

Substance Use Disorders

**HARDY, LEIGH**  
**Fall 2020**

A course providing an overview of alcohol/drug use, abuse, and addiction. Issues covered include high risk populations, poly-drug abuse, and families with alcohol-related problems. Several models and theories are examined and integrated with relevant treatment techniques and settings.

**Credits:** 3  
**Room and Schedule:** TH 2-3 50;ONLINE;SYNCHRONOUS;  
**Satisfies Core Requirement:** None  
**Prerequisites:** SCWK7721.  
**Corequisites:** None  
**Student Level:** OPEN

### Public Health Social Work

**SCWK772901**

Public Health Social Work

**HAWKINS, SUMMER S**  
**Fall 2020**

Public health social work (PHSW) emphasizes health promotion and prevention as well as targeting populations through population-based strategies. The course integrates research on health topics, populations, and settings to learn about the field of PHSW and application of skills to real-world problems. A life course perspective is used to discuss health behaviors and outcomes through all stages of development and across a range of settings. The aim of the course is to provide students a unique perspective on social work from the field of public health by focusing on health promotion, prevention, and reducing disparities at the population-level.

**Credits:** 3  
**Room and Schedule:** F 1-3;ONLINE;SYNCHRONOUS;  
**Satisfies Core Requirement:** None  
**Prerequisites:** SCWK7721.  
**Corequisites:** None  
**Student Level:** OPEN

### Research Methods in Social Work Practice

**SCWK774702**

Research Methods in Social Work Practice

**MATZ, CHRISTINA J**  
**Fall 2020**

An introduction to research methods and statistical analysis of social work data. The course covers basic methods of social research including principles of research investigation, research design and problem formulation, survey methods, sampling, measurements, and the use of a statistical software package for descriptive and basic inferential statistics for data analysis and hypothesis testing.

**Credits:** 3  
**Room and Schedule:** W 7-9;ONLINE;SYNCHRONOUS;  
**Satisfies Core Requirement:** None  
**Prerequisites:** None  
**Corequisites:** None  
**Student Level:** OPEN

### Public Health Social Work

**SCWK774703**

Research Methods in Social Work Practice

**O’HARE, THOMAS**  
**Fall 2020**

An introduction to research methods and statistical analysis of social work data. The course covers basic methods of social research including principles of research investigation, research design and problem formulation, survey methods, sampling, measurements, and the use of a statistical software package for descriptive and basic inferential statistics for data analysis and hypothesis testing.

**Credits:** 3  
**Room and Schedule:** TH 8 30-10 20;ONLINE;SYNCHRONOUS;  
**Satisfies Core Requirement:** None  
**Prerequisites:** None  
**Corequisites:** None

Community-Based System Dynamics for Understanding Complex Social Problems WERNER, KELSEY

**Fall 2020**

Some of the world’s most pressing social problems are seemingly intractable and complex. Efforts to solve these kinds of ‘wicked’ problems often lead to unintended consequences. The course introduces Community Based System Dynamics (CBSD) as a method for understanding complex social problems and designing potential solutions. CBSD is being used around the world, both in research and practice, to engage communities and organizations on a variety of social issues at many scales, from social justice and public health to evidence-based intervention adoption and program design. The course will focus on the use of CBSD for engaging communities using a structured set of group model building exercises grounded in the foundations of system dynamics. The course will also introduce system dynamics simulation modeling, including basic theory and its use in problem solving. Students will gain hands-on experience modeling complex social problems, facilitating group model building sessions, and engaging stakeholders to design projects for real world applications of CBSD.

Immigrant and Refugee Issues in the United States OLAYO MENDEZ, JAIME ALEJAN

**Fall 2020**

An overview of the prominent theories, major issues, and controversies in immigration policy is presented. While immigration has become a crucial concern of the American social welfare system as well as an issue of global urgency, immigration controls the fate of growing numbers of asylum seekers. The course will discuss the special needs and problems faced by immigrant and refugee clients and communities; adaptation and coping with a new culture; refugee experience; the impact of relocation on individuals, families, and communities; and a range of world view perspectives including acculturation and assimilation, biculturalism, marginality, and traditional ethnic identities.

Legal Aspects of Social Work APTAKER, DAVID
Fall 2020
An examination of various areas of the law and legal implications of interest to social workers. The course provides a useful study of the framework of the American legal system, the process of litigation, and the constitutional principles of due process and equal protection. The seminar explores the interaction between social workers and lawyers by placing real life social work problems in a legal context. The format is designed to engage students in critical legal thinking and explore the relationship between social policy and the development of the law.

SCWK882301
Practice in Health and Mental Health Settings with Older Adults KEARY, SARA A
Fall 2020
An advanced course designed to develop micro and macro practice skills in working with older adults and their families in health and mental health settings. The course explores the biopsychosocial knowledge base required to develop effective interventions with specific foci on the physical and mental health considerations facing older adults and their families. Substance abuse issues and the special challenges of reaching a client population often invisible to service providers are discussed. The role of spirituality in older adults' lives and the challenges of death, dying, and bereavement facing the older adults are also covered.
Credits: 03
Room and Schedule: TH 2-3 50;ONLINE;SYNCHRONOUS; Satisfies Core Requirement: None Prerequisites: SCWK8800 AND SCWK7762.

SCWK883101
Dying, Grief, and Bereavement FRANCHITTO, JOHN D
Fall 2020
Beginning with an overview of the social phenomena of death and how social attitudes and practices influence the environmental context in which death takes place in contemporary society, the course explores the influence of cultural diversity in the way death is experienced by diverse groups. The tasks of mourning following a person's death and the bereavement process present complex socio-emotional challenges for family and friends throughout the lifespan. Issues in self-reflection and self-care are presented to offer practitioners ways to grow personally and professionally through the process of their clients' losses.
Credits: 03

SCWK883601
Psychodynamic Theories of Individual Development KOVARSKY, MARINA E
Fall 2020
An advanced course that provides an overview of the psychodynamic theories that best explicate individual psychological development over the life cycle from a biopsychosocial perspective, with attention given to sources of development of individual strength and resilience. These theories include drive theory, ego psychology, object relations, self psychology, and intersubjectivity theory. Students will begin to learn to critique and compare theories for their applications to, and usefulness for, social work practice as they reflect particular sets of values and intersect with ethnicity, social class, gender, sexual orientation, religion, age, disability, and other forms of diversity.
Credits: 03
Room and Schedule: TH 2-3 50;ONLINE;SYNCHRONOUS; Satisfies Core Requirement: None Prerequisites: SCWK7762.

SCWK884001
Climate Change and Environmental Justice: Implications for Social Work
KUMAR, PRAVEEN
Fall 2020
Realization of the United Nations Sustainable Development Goals necessitates understanding the interface of developmental aspirations and environmental degradation and their impacts on the most fragile and vulnerable communities of the world. This course is designed as a seminar to give students an in-depth understanding of environment and climate change—its interface with communities and its impact on vulnerable populations in North America and the Global South (particularly South Asia and Sub-Saharan Africa). Topics discussed in this course will explore current literature and evidence on the interactions between ecological and social systems. Students will learn about the debates and issues foregrounding the need to view ecology and human society as a whole in order to understand and prepare for these changes. The course emphasizes evidence-based approaches for arriving at program strategies and policy recommendations to improve environment and climate response of the most vulnerable. This course will cover three broad aspects: (1) Environmental and climate variability and development. Concepts on vulnerability, adaptation, and resilience. Social-Ecological-Systems Framework for understanding environment and climate impacts on communities; (2) Interventions, policies and programs in this realm in North America as well as South Asia and Sub-Saharan Africa; (3) New ways of involving communities to understand and design strategies to environment and climate risk.

SCWK886501
Family Therapy
RODNEY-OSBOURNE, FELICIA P
Fall 2020
An advanced course designed to integrate family therapy theories of practice and intervention techniques. Throughout the course critical issues relative to power, gender, and race will be interwoven with outcome effectiveness, research, and evaluation. Emphasis will be placed on the adaptation of the family process to the stressors of chronic illness, aging, addictions, and interpersonal violence. The strengths and problems of minority families, families living in poverty, blended families, adoptive families, and families of same sex parents will be reviewed.

Internal Family Systems Therapy: A Contemporary Approach for Working with Individuals, Couples, Families, and Groups
WARSH, ROBIN
Fall 2020
This advanced clinical course focuses on the Internal Family Systems Model (IFS) into a comprehensive approach that includes guidelines for working with individuals, couples, families, and groups. The IFS Model is a new synthesis of two already existing paradigms: systems thinking and the multiplicity of minds. One major and unique contribution of IFS is the concept that it is the connection of the Self to the Parts that brings healing. The IFS Model offers a non-pathologizing approach to identifying and unburdening the faulty beliefs people carry from childhood trauma and troubling patterns of interaction and replacing them with Self-led resources.

SCWK886801
Dialectical Behavioral Therapy SCHAEFER, ERIN K
Fall 2020
This course is designed to instruct and prepare students to integrate and apply Dialectical Behavioral Therapy (DBT), a comprehensive and flexible evidence-based treatment. Students will learn to conduct thorough risk assessments, develop crisis management plans, understand borderline personality disorder from the DSM-IV and DBT lenses, create a DBT theory-driven case formulation and treatment plan by stages and targets, observing dialectic dilemmas, balancing acceptance and validation, integrating communication styles, applying commitment strategies, conducting chain/solution analysis, implementing diary cards and collaboratively problem-solving with clients and peers. Students will learn the four DBT modules: Mindfulness, Distress Tolerance, Interpersonal Effectiveness, and Emotion Regulation.
Credits: 03
Room and Schedule: TH 4 30-6; ONLINE; SYNCHRONOUS;

SCWK887401
Adult Psychological Trauma: Assessment and Treatment BONAZOLI, ROBERT J
Fall 2020
An advanced clinical course focusing on adults exposed to acute or chronic psychological trauma. Theoretical constructs stress an interactive approach: person, environment, situation. Emphasis is on the interconnections of intrapsychic, interpersonal, cognitive, and behavioral sequelae to catastrophic life events, with attention to socio-economic and cultural factors which influence an individual's differential response to trauma. Various methods are evaluated with the goal of multi-model treatment integration. Clinical presentations on specialized populations (e.g., combat veterans, victims of abusive violence, traumatic loss, disasters, people with AIDS, and the homeless) are used to integrate theory, research designs and strategies, and practice skills.
Credits: 3

SCWK887601
Solution-Focused Therapy TOHN, SUSAN
Fall 2020
An advanced clinical course focusing on time-effective treatments with individuals, families and groups. The course focuses primarily on Solution-Focused Therapy. Primary concepts include the paradigm shift from problem to possibility, the role of an active intentional clinician, and the careful use of language. Emphasis is given to the evaluation as key to the process, which involves building rapport, identifying a goal, and understanding the client's relationship to that goal. The course examines pivotal treatment strategies, including language, task setting, and creating hope in clients through our interventions.

SCWK888001
Social Work Practice in Child Welfare RHEAUME, PAMELA
Fall 2020
An advanced course designed to provide practice knowledge and skills for micro and macro interventions. Throughout the course, the issues of poverty, diversity, and services for children of color are considered. Stressing the importance of providing services to children and families so that the family unit is preserved, issues related to family preservation, foster care, family reunification, adoption, legal issues, and emerging trends will be explored. The central focus will be on developing a solid foundation in child welfare policy and practice as a means to promoting a more responsive service delivery system.
Credits: 3

SCWK888701
Global Child Protection WILLIAMS, TIMOTHY P
Fall 2020
This course introduces the systems in which children, families, groups, organizations, and communities thrive and struggle in international settings. In particular the course focuses on child protection in the context of vulnerable international settings and complex humanitarian emergencies including famine, conflict and displacement. The role of social work and allied professions in such settings is explored with emphasis on the principle of 'do no harm.' The International child protection policies of Governments, United Nations agencies and International Non-Government agencies will be presented and analyzed. Strategies for translating these policies into best practice will include identifying child protection concerns and developing rigorous international child protection programs.

SCWK996401
Introduction to Statistics and Data Analysis TRAN, THANH V
Fall 2020
This course introduces basic statistics and practical applications of data analysis in social work research and evaluation. The course aims to teach students pragmatic tools for assessing basic statistical analyses. Students will learn: (1) descriptive statistics including measures of central tendency and variability; (2) hypothesis testing using chi-square, t-tests, one way ANOVA, correlation, and simple regression; (3) presenting and interpreting statistical results, and (4) using SPSS statistical package for data analysis. Other topics will be covered are data acquisition/management, data cleaning, data transformation, and introduction to SAS and Stata statistical packages. Upon completion of this course, students should be able to think critically about data and apply standard statistical to describe the data and to draw conclusions from such analyses.

SCWK660002
Introduction to Social Work RYAN, SARAH E
Spring 2021
Starting with a discussion of its history and the relevance of values and ethics to its practice, the course takes up the various social work methods of dealing with individuals, groups, and communities and their problems. In addition to a discussion of the theories of human behavior that apply to social work interventions, the course examines the current policies and programs, issues, and trends of the major settings in which social work is practiced.
Credits: 03

Frequency: Annually
Student Level: GRADUATE
Comments: Available to undergraduate students
Status: OPEN

SCWK660601
Macro Independent Study
CREA, THOMAS M; WERNER, KELSEY
Spring 2021
This course bridges theory and practice by applying community-based system dynamics (CBSD) to an ongoing project with a partner organization. Course content will vary depending on the needs and topics of the project. Students will work together to develop and apply skills in CBSD project design, management, and implementation alongside organizational partners in a hybrid course, including virtual meetings. Students will also design a CBSD capacity-building workshop and facilitate modeling sessions with stakeholders during an intense field experience, potentially abroad. This field-based, hands-on experience will apply CBSD to engage communities to inform the partner organization's practices and programs.
Credits: 03
Room and Schedule: TH 4 30-6 20; ONLINE; SYNCHRONOUS;
Satisfies Core Requirement: None
Prerequisites: With permission of the Department.

SCWK770101
The Social Welfare System CASTANEDA, YVONNE C
Spring 2021
The course explores current social welfare issues in the context of history and underlying political rationale and societal values. The course is designed to provide students with an understanding of the relationship between contemporary social welfare policy and social work practice. The course focuses on the historical, political, economic, and other social conditions that influence policy development in the United States. Models of social welfare are presented and critiqued. Policy issues and programs that impact specific populations are explored with an emphasis on social and economic justice. The course content will be framed through the lens of distributive equity and social justice. Understanding how policy influences practice and how social workers can influence social welfare policy are examined.

SCWK772401
Neurobiology of Stress and Resilience in the Life Course BLACK, JESSICA M
Spring 2021
This course examines the ways in which stress poses risk to healthy biological, psychological, and social development. Using life course perspective and ecological systems theory (micro through macro), the course also highlights the characteristics, relationships, and contexts that increase resilience at each life stage (in utero through end of life). Circumstances relevant to social work (including but not limited to prenatal stress, trauma, bullying, violence, poverty and homelessness) are examined through the dual lenses of stress and resilience. Neuroscientific, genetic, and related biological research is emphasized in the course; however, no background in biological sciences is required as a prerequisite.
Credits: 03
Room and Schedule: F 1-3;ONLINE;SYNCHRONOUS;
Satisfies Core Requirement: None
Prerequisites: SCWK7721.

SCWK773201
Authority and Leadership in Professional Life SARDA, EVANGELINE
Spring 2021
This course focuses on the conscious and unconscious group and systemic dynamics that arise from the exercise of authority, leadership, and power. Students learn about leadership and authority dynamics by focusing on boundaries, authority, role, and task, and by studying their own experience and linking this to theory and class reading. Classes are intensely psychodynamic in nature and promote powerful and often emotional interchange as students explore the dynamics of social identity and processes such as splitting, projection, and projective identification. Students experiencing a difficult period in life should speak to the professor before enrolling.
Class attendance is required. Grade is based on class attendance, exercises, short papers, journals, and final paper. Attendance at a group relations conference is strongly encouraged; the working title for the March 2020 conference is Intersectionality: Exploring Relatedness and Dividedness in Self and Systems, March 27-29, 2020, Stokes Hall, Boston College (registration fee required). Variable credit offered for attendance at, and reflection paper on, conference experience. Contact Professor Sarda for information (sarda@bc.edu). Limited enrollment.

Services to Migrants: A Border Perspective CALVO VILCHES, MARIA ROCIO
Spring 2021
The right to migrate and protective stance of sovereign nations creates an inevitable conflict. Along the U.S. border with Mexico there has arisen a varied response by government, religious, and community organizations that seeks to address various aspects of migration. This field based study of policy and services will seek understanding of the conflicts, explore the wants and needs of migrants, pursue the social policies that impact migration north from Central America and assess the range of human services and their outcomes in the Nogales AS corridor.

SCWK880201
Policy for an Aging Society: Issues and Options HALVORSEN, CAL
Spring 2021
This advanced policy course provides an opportunity to examine how historical and contemporary forces and demographic change shape the perceived problems of the elderly, the politics of aging, and public policy responses. New questions are being raised about the cost of public and private retirement and health care commitments directed at the old and about the responsibilities of older Americans. The implications of the diversity (ethnic, racial, gender, health and economic status) of current and future cohorts of elders need to be understood to adequately plan service and policy responses to the aging of America.

Practice in Home and Community Settings with Older Adults MATZ, CHRISTINA J
Spring 2021
An advanced course that explores the roles of micro and macro-level social workers with older adults in home and community settings. Beginning with a consideration of aging in place, the course addresses the person-in-environment challenges facing older adults living outside of institutional settings. Attention is given to protecting vulnerable adults from abuse and neglect, grandparents raising grandchildren, and older adults with disabilities. The course concludes with a discussion of the legal, competency, guardianship, and end-of-life decision-making while considering issues of diversity, including race, ethnic group, sexual orientation, and gender, that affect the appropriateness of services.

Clinical Practice with Children and Families: Assessment, Intervention, and Evidence- Based Practice
PARCHMENT, TYRONE M
Spring 2021
An advanced clinical course intended to prepare students for effective practice with children, adolescents, and families. Building on foundation content, the course provides a comprehensive review of child and family development, reviews major theories and research literature concerning the evaluation and treatment of children and families, and examines how clinical social workers may effectively utilize evidence-based treatments to help youth and their families achieve their goals. Students will learn practice techniques of various evidence-based interventions.

**Clinical Practice with Adults: Assessment, Intervention, and Evidence-Based Practice**

**LINBERG, ANDREW H**

*Spring 2021*

An advanced course focusing on effective interventions with common adult psychosocial disorders. Intervention methods, drawn from current practice evaluation literature, encompass a contemporary eclectic model incorporating cognitive-behavioral, psychodynamic and other relational thinking, practice wisdom, and empirical evidence in determining the most suitable intervention. Special attention is given to recognition of individual and demographic factors influencing clients, as well as their expectations and input concerning the selective intervention. Class discussion draws on students' reading and field experience. Through the use of case studies, the course addresses strategies for practice evaluation.

SCWK885701
Group Therapy for Children and Adolescents ROMANO, CAROLYN
Spring 2021
This course will prepare students to design and facilitate experiential skills-based groups with both children and adolescents. Building on first-year foundational content this course prepares students to learn how to facilitate skills-based group therapy with youth. Several guiding theories, including (Cognitive Behavior Therapy, Dialectical Behavior Therapy, Solution Focused Therapy, Narrative Therapy, and Motivational Interviewing), will be integrated with multiple experiential activities as vehicles for the engagement in the interventions. Each guiding theory dominates a minimum of two weeks in the syllabus to ensure depth of learning and exploration of possibilities for theory into practice. The experiential activities will include music, adventure, bibliotherapy, art therapy, and technology to assist in the engagement of clients in the learning process and will be utilized throughout the course. Assignments challenge students to develop two innovative original experiential group sessions and demonstrate competence in facilitating both of their group sessions.

SCWK886701
Clinical Practice in Schools BAGLEY-JONES, KRISTAN M
Spring 2021
An advanced clinical course that provides a comprehensive overview of the necessary skills to prepare students for effective communication with teachers and school personnel as well as with diverse families on issues related to assessment, building family partnerships, family-based treatment, and multicultural issues. The course reviews assessment and use of state-of-the-art diagnostic testing instruments. Given the relationship between school social work and special education, students will be exposed to the diverse populations served in schools and learn how to engage in practice with children with a variety of issues, including learning, physical, behavioral, developmental, neurological, and emotional disabilities.

Couples Therapy PILOWA, EMILY
Spring 2021
An advanced course examining and analyzing theories, research, and interventions with couples. The use of cognitive, behavioral, emotion-focused, brief treatment, and skills training approaches are critically evaluated. Research on their empirical basis is examined. Emphases include working with couples from diverse cultural backgrounds, practice with same-sex couples, and special issues such as living with chronic illness, poverty and economic stress, facing divorce, infidelity, interpersonal violence, and sexual dysfunctions. The course will describe how to adapt couple-based assessments and interventions to various settings, such as acute medical, psychiatric, and child-focused settings.

SCWK886801
Spring 2021
This advanced clinical course focuses on the Internal Family Systems Model (IFS) into a comprehensive approach that includes guidelines for working with individuals, couples, families, and groups. The IFS Model is a new synthesis of two already existing paradigms: systems thinking and the multiplicity of minds. One major and unique contribution of IFS is the concept that it is the connection of the Self to the Parts that brings healing. The IFS Model offers a non-pathologizing approach to identifying and unburdening the faulty beliefs people carry from childhood trauma and troubling patterns of interaction and replacing them with Self-led resources.

Clinical Social Work Independent Study None
Spring 2021
An opportunity for those in the Clinical Social Work concentration to investigate one aspect of social work practice in-depth. The area of investigation must be of clear significance to contemporary clinical social work practice with individuals, families, or groups. Any clinical social work student may submit (in the prior semester) a proposal for independent study in the fall and/or spring semester of his/her final year.

SCWK887401
Adult Psychological Trauma: Assessment and Treatment FLINTON, KATHLEEN M
Spring 2021
This advanced clinical course focusing on adults exposed to acute or chronic psychological trauma. Theoretical constructs stress an interactive approach: person, environment, situation. Emphasis is on the interconnections of intrapsychic, interpersonal, cognitive, and behavioral sequelae to catastrophic life events, with attention to socio-economic and cultural factors which influence an individual's differential response to trauma. Various methods are evaluated with the goal of multimodal treatment integration. Clinical presentations on specialized populations (e.g., combat veterans, victims of abusive violence, traumatic loss, disasters, people with AIDS, and the homeless) are used to integrate theory, research designs and strategies, and practice skills.

SCWK887501
Macro Independent Study CREA, THOMAS M; WERNER, KELSEY
Spring 2021
This course bridges theory and practice by applying community based system dynamics (CBSD) to an ongoing project with a partner organization. Course content will vary depending on the needs and topics of the project. Students will work together to develop and apply skills in CBSD project design, management, and implementation alongside organizational partners in a hybrid course, including virtual meetings. Students will also design a CBSD capacity-building workshop and facilitate modeling sessions with stakeholders during an intensive field experience, potentially abroad. This field-based, hands-on experience will apply CBSD to engage communities to inform the partner organization's practices and programs.
Credits: 03
Room and Schedule: TH 4 30-6 20;ONLINE;SYNCHRONOUS;
Satisfies Core Requirement: None
Prerequisites: With permission of the Department.
Corequisites: None
Cross-listed with: SCWK6606 Frequency: Annually
Student Level: GRADUATE Comments: The SCWK6606 number should be used for any undergrads enrolled in the course, and the SCWK8875 number should be used for any graduate students enrolled in the course.

SCWK887701
Narrative Therapy GADDIS, STEPHEN R
Spring 2021
This course focuses on narrative practice skills that are based on a belief in the power of the meaning-making systems. The course will examine models, research, theory, and theoretical and clinical foundations of narrative therapy. Using lecture, discussion, and exercises, students will be introduced to various narrative therapy practices.

SCWK888301
Creating and Sustaining Social Enterprises HIGGINS, CHARMANE
Spring 2021
This course has the dual goals of understanding the conceptual characteristics of "social enterprise" and the more practical objective of knowing how to create, implement, and sustain a program based on social enterprise principles. These goals are achieved through examining how social enterprise fits with important values, learning key models and considerations, and by creating a complete business plan for an actual social enterprise initiative. Students work in teams gathering essential information, formulating strategy, develop analytic tools, and create financial documents that provide a road map for a new revenue oriented program or service.
Credits: 03
Room and Schedule: TH 10 30-12 20;ONLINE;SYNCHRONOUS;

SCWK888401
Strategic Planning for Public and Nonprofit Organizations LLOYD, JOHN D
Spring 2021
Focusing on the strategic trends and issues which impact the public and nonprofit sectors, this course explores the role of strategic planning as a fundamental tool of public and nonprofit institutions to build high performance organizations, maximize organizational strengths, and enhance community problem-solving. Students will acquire practical skills through case study analysis and the development of a strategic plan.

SCWK888601
Financial Management and Resource Development ESSACK, SUMAYYA M
Spring 2021
This required macro practice course prepares students to develop and manage appropriate resources for creating, supporting, and sustaining effective human service organizations. Managers must understand an organization's financials to exercise fiduciary responsibility. In order to meet the mission, agencies also depend on effective and efficient direct care staff, supervisors, and managers. If there is no money, there is no mission; and if there is not sufficient and motivated staff to perform their functions, human service organizations cannot be successful. This course concentrates on these two core aspects of human services management: understanding organizational finances and human resources management and development.
Credits: 03

SCWK888901
Social Innovation BAUM, JONATHAN
Spring 2021
Designed to prepare students with the skills to develop transformational responses to social problems through learning concepts related to innovation, needs assessment, and grant development, this course provides students with knowledge about how to create new, innovative responses to social problems and put these ideas into action. Students study examples of social entrepreneurship, learn how to assess social need, and develop new programmatic responses through grant-writing. Participation in the Social Innovation Lab allows students a first-hand look at innovation in action in existing non-profits and at how the redesign process promotes and supports new thinking.

SCWK995601
The Dialectics of Social and Behavioral Theory SALAS-WRIGHT, CHRISTOPHER
Spring 2021
In this course, students will read selected original publications of classical and contemporary theorists in psychology, sociology, political science, urban planning and community development, and economics. They will consider how theories which are foundational to different disciplines in the social and behavioral sciences can inform their studies and predict empirical findings. The theories selected for examination in the course will include: theories of identity and stigma, social integration theories, exchange theory, conflict theories, theories of social integration; critical race theory, role theories, rational choice theory, life course theories, role theories, social justice theories, theories of social change and, and epidemiology. The students will use the assumptions of different theories to prepare three papers, each of which will examine a single issue from a different perspective.

SCWK996301
Applied Methods in Multicultural Mental Health Research BETANCOURT, THERESA
Spring 2021
Applied Methods in Multicultural Mental Health Research course prepares doctoral students and post-doctoral fellows to apply culturally-informed methods for research and interventions in low resource settings. Students will be expected to possess a strong formative base of training in research methods. Deepening the discourse, students will work through exercises to link research questions to methods, examine ethical issues in global mental health/social work research, and operationalize their knowledge of culture and measurement psychometrics in designing studies. The course will include a focus on sequencing mixed methods (qualitative and quantitative) for work in diverse cultural settings in LMICs and in the U.S. Students will gain an understanding of research along the spectrum of community-based participatory approach and will learn more on negotiating research relationships especially in working with vulnerable populations and those serving them. This course will highlight the role of implementation science in solving challenges in global mental health and social work and how research can be translated to practice through prevention and culturally-appropriate and scalable interventions and strategies. This course will also provide grant writing training to help students integrate their learning in related theories and methodologies into fundable research proposals.

Theories and Methods of Teaching in Professional Education BLACK, JESSICA M
Spring 2021
Effective teaching in social work education requires an understanding of the components of curriculum building and professional practice skills required by the Council on Social Work Education. Based on a strong theoretical base in the principles of adult learning, this course is designed to introduce the student to the theory and methods of professional social work education with a concentrated focus on course design and classroom execution. A broad range of specific teaching techniques are presented along with the means by which to evaluate student performance and learning.

ACCT8814 AND ACCT3302. ACCT3302 (undergraduate) or ACCT8814 (graduate).
At the outset, course work will be concerned with the development and use of accounting information to evaluate the status and performance of business enterprises. Attention will be given to the reporting of information by persons and institutions outside the enterprise. In the second part of the course, the focus will be on the use of accounting information in managerial decision making. Section number 1 of this course will be offered on-campus and section number 11 will be offered online. Please see the link http://bit.ly/CSOM1 for details about the online section.

### ACCT882001

**Communications Skills for Managers**

**OWENS, RITA R**

**Summer 2020**

This course focuses on specific practical applications of business communication required of MSA students and future managers. Writing assignments include memos, analytic reports, proposals, and a variety of business correspondence. Students also write and present collaboratively. During the summer, the course is offered in a lab environment. Students write in class as well as out of class, and receive personalized communications guidance.

### ACCT882401

**Financial Statement Analysis**

**CROWLEY, MARK D**

**Summer 2020**

This course covers techniques and applications of financial statement analysis. It exposes students to the contemporary financial reporting environment and current reporting practices of U.S. companies. It analyzes real-life cases to foster an understanding of the economic and strategic information conveyed in financial reports.

This course develops an understanding of the basic elements of financial accounting and the role of accounting in society. Students are introduced to financial statements and to the fundamental accounting concepts, procedures, and terminology employed in contemporary financial reporting. The skills necessary to analyze business transactions, to prepare and comprehend financial statements, and to examine a firm's profitability and financial condition are developed. Students are required to use the Internet to conduct a financial statement analysis project.

ACCT332101
Intermediate Accounting for Finance and Consulting CARTER, MARY ELLEN
Fall 2020
This intermediate financial accounting course builds on ACCT1021 to provide, in greater depth, a comprehensive understanding of financial accounting topics important to assessing firm performance. The course is designed to teach users of financial statements (rather than preparers of financial statements) how accounting information, shaped by regulation, has advantages and limitations in assessing the economics of the underlying business. The goal of the course is to provide a better understanding of financial reporting and accounting information as an input to
evaluating a firm. With hands-on use of cases and SEC filings, this course is beneficial for students seeking careers that require the use of financial statement information as an input to decision-making.

This course also examines the impact the Internet has had on business and its financial implications with regard to accounting information systems. | 03      | M 7-9 30;ONLINE;Synchronous; | Annually      | UNDERGRAD & GRAD | None          | None                      | ACCT4405 or ACCT8816 |               | CLOSED   
| ACCT662301  | Fair Value Accounting and Measurement             | PEARSON, ROGER M                  | Fall 2020  | Fair Value is an important measurement basis in financial reporting, an area of interest and debate with current financial market events and changes in the global economy. This course will focus on the practical application of fair value measurement as an integrated feature of financial reporting, investments, risk management, valuation, and regulatory reforms. | 03      | FULTON HALL 110, T 7-9 30;Hybrid; | Annually      | UNDERGRAD & GRAD | None          | None                      | ACCT1021 or ACCT1021 |               | OPEN     
| ACCT662801  | Taxes and Management Decisions                    | MANZON, GIL                       | Fall 2020  | This course provides students with a framework for tax planning. Specific applications of the framework integrate concepts from finance, economics, and accounting to help students develop a more complete understanding of the role of taxes in business strategy (e.g., tax planning for mergers, acquisitions, and divestitures; tax arbitrage strategies; taxation of competing legal entities; employee compensation; and others). | 03      | FULTON HALL 135,W 7-9 30;Hybrid; | Annually      | GRADUATE      | None          | None                      | ACCT1021 or ACCT1021 |               | OPEN     
| ACCT663401  | Ethics and Professionalism in Accounting          | CURLEY, BRAD                      | Fall 2020  | The professional role of the Certified Public Accountant is to protect the investing public, yet the CPA’s profit is dependent on controlling costs and managing a portfolio of satisfied corporate clients. These realities lead to a conflict of interest that is at the heart of this course. This course will focus on the nature of professions and professionalism. Specific attention will be paid to the AICPA’s code of ethics, economic and regulatory factors affecting the public accounting profession, and various aspects of the current accounting environment. | 03      | FULTON HALL 110,M 3-5 30;Satisfies Core Requirement: None | Annually      | UNDERGRAD & GRAD | None          | None                      | ACCT3309 or ACCT8815 |               | CLOSED   
| ACCT663501  | Forensic Accounting                               | MCCALL, MICHAEL P                 | Fall 2020  | Forensic Accounting is a growing area of practice in which the knowledge, skills, and abilities of accounting are combined with investigative expertise and applied to legal problems. Forensic accountants are often asked to provide litigation support where they are called on to give expert testimony about financial data and accounting activities. In other more proactive engagements, they probe situations using specialized investigative accounting skills and techniques. Some even see forensic accounting as practiced by skilled accounting specialists becoming part and parcel of most financial audits—an extra quality control step in the auditing process that will help reduce financial statement fraud. | 03      | FULTON HALL 130,M 7-9 30;Hybrid; | Annually      | UNDERGRAD & GRAD | None          | None                      | ACCT3301 or ACCT3321 |               | CLOSED

ACCT332101
Intermediate Accounting for Finance and Consulting WILLIAMS, CHRISTINA
Spring 2021
This intermediate financial accounting course builds on ACCT1021 to provide, in greater depth, a comprehensive understanding of financial accounting topics important to assessing firm performance. The course is designed to teach users of financial statements (rather than preparers of financial statements) how accounting information, shaped by regulation, has advantages and limitations in assessing the economics of the underlying business. The goal of the course is to provide a better understanding of financial reporting and accounting information as an input to evaluating a firm. With hands-on use of cases and SEC filings, this course is beneficial for students seeking careers that require the use of financial statement information as an input to decision-making.

### ACCT662301
**Fair Value Accounting and Measurement**
*PEARSON, ROGER M*
**Spring 2021**

Fair Value is an important measurement basis in financial reporting, an area of interest and debate with current financial market events and changes in the global economy. This course will focus on the practical application of fair value measurement as an integrated feature of financial reporting, investments, risk valuation, and regulatory reforms.

**Credits:** 3
**Room and Schedule:** FULTON HALL 145; 7 3-5 30; HYBRID; Satisfies Core Requirement: None
**Prerequisites:** None
**Corequisites:** None
**Cross-listed with:** None
**Frequency:** Annually
**Student Level:** UNDERGRAD & GRAD

**Status:** OPEN

### ACCT662601
**Taxes and Management Decisions**
*MANZON, GIL*
**Spring 2021**

This course provides students with a framework for tax planning. Specific applications of the framework integrate concepts from finance, economics, and accounting to help students develop a more complete understanding of the role of taxes in business strategy (e.g., tax planning for mergers, acquisitions, and divestitures; tax arbitrage strategies; taxation of competing legal entities; employee compensation; and others).

**Credits:** 3
**Room and Schedule:** FULTON HALL 235; T 4 30-6 50; HYBRID; Satisfies Core Requirement: None
**Prerequisites:** ACCT4405 or ACCT7701 or ACCT7713
**Corequisites:** None
**Cross-listed with:** None

### ACCT663401
**Ethics and Professionalism in Accounting**
*CURLEY, BRAD*
**Spring 2021**

The professional role of the Certified Public Accountant is to protect the investing public, yet the CPA’s profit is dependent on controlling costs and managing a portfolio of satisfied corporate clients. These realities lead to a conflict of interest that is at the heart of this course. This course will focus on the nature of professions and professionalism. Specific attention will be paid to the AICPA’s code of ethics, economic and regulatory factors affecting the public accounting profession, and various aspects of the current accounting environment.

**Credits:** 3
**Room and Schedule:** FULTON HALL 235; T 4 30-6 50; HYBRID; Satisfies Core Requirement: None

**Student Level:** UNDERGRAD & GRAD
**Comments:** The Department
**Status:** OPEN

### ACCT663501
**Forensic Accounting**
*MCCALL, MICHAEL P*
**Spring 2021**

Forensic Accounting is a growing area of practice in which the knowledge, skills, and abilities of accounting are combined with investigative expertise and applied to legal problems. Forensic accountants are often asked to provide litigation support where they are called on to give expert testimony about financial data and accounting activities. In other more proactive engagements, they probe situations using special
forensic accounting skills and techniques. Some even see forensic accounting as practiced by skilled accounting specialists becoming part and parcel of most financial audits—an extra quality control step in the auditing process that will help reduce financial statement fraud.

**Credits:** 3
**Room and Schedule:** T 7-9 30; ONLINE; SYNCHRONOUS
**Satisfies Core Requirement:** None
**Prerequisites:** ACCT3301 or ACCT3321 (undergrad), or ACCT7701, or ACCT7713, or ACCT8813 (graduate).
**Corequisites:** None
**Cross-listed with:** None
**Frequency:** Annually

Dive, Dissect, and Decide with Big Business Data LO, KIN Y

Spring 2021

‘Big data’ has become a business buzzword, and in accounting and related fields there is an ever-growing demand for individuals who can dive into, dissect and drive decisions with data. This course draws on examples from both academic and practitioner research to introduce students to commonly used data analytics methods and processes in accounting settings. The course is designed with the following objectives in mind: (1) To develop students’ ability to apply data analytics skills and research findings to evaluate business problems and solutions in accounting-related contexts. (2) To expose students to the process of extracting, processing, and analyzing accounting data. Students will learn how to perform data analytics using statistical software such as SAS and Python. Students will also acquire practical skills such as exposure to Structure Query Language (SQL) and learn to analyze structured and unstructured data. (3) To enhance students’ ability to work in a group and to present findings either from their own research or from other people’s work in front of colleagues from different disciplines.

**Credits:** 3
**Room and Schedule:** FULTON HALL 115, T 4 30-6 50;

### ACCT881501
**Financial Auditing**
**Department:** KHAITAN, DIVYA  
**Spring 2021**
This course examines contemporary auditing theory and practice. The topics include the environment of the auditing profession, audit planning and analytical review, internal control, audit evidence, and auditor communications. Project assignments require students to perform various aspects of audit practice using simulated audit cases.
**Credits:** 03

### ACCT882401
**Financial Statement Analysis**
**Department:** SHU, SUSAN  
**Spring 2021**
This course covers techniques and applications of financial statement analysis. It exposes students to the contemporary financial reporting environment and current reporting practices of U.S. companies. It analyzes real-life cases to foster an understanding of the economic and strategic information conveyed in financial reports.
**Credits:** 03  
**Room and Schedule:** MERKERT CENTER 127, T 7-9 30; Satisfies Core Requirement: None

### ACCT889301
**Empirical Topics in Accounting III**
**Department:** CARTER, MARY ELLEN; LEE, LIAN FEN  
**Spring 2021**
The objective of this course is to provide students with a sound framework for understanding and assessing the quality of empirical archival research in accounting. The course has two objectives. Part of the course is aimed at facilitating a deeper understanding of the econometric issues facing empirical archival research. This part of the course will survey the common problems and potential solutions. The other part of the course will survey the empirical research on accounting and contracting. Topics will include the role of accounting information in evaluating managers and setting executive compensation, earnings management induced by the use of accounting in contracting, and the relation between accounting and corporate governance.
**Credits:** 03

Business Analytics Courses: Summer 2020
OPER770011
Operations Management BEEBE, JONATHAN R
Summer 2020
Operations, like accounting, finance, and marketing, is one of the primary functions of every organization. Operations managers transform human, physical and technical resources into goods and services. Hence, it is vital that every organization manage this resource conversion effectively and efficiently. How effectively this is accomplished depends upon the linkages between operating decisions and top management (strategic) decisions. The focus of the course is decision-making at the operating level of the firm, converting broad policy directives into specific actions within the organization. Strong emphasis will be placed on the development and use of quantitative models to assist in decision making.
Credits: 03

OPER770315
Managerial Statistics VANDERWERF, PIETER A
Summer 2020
This course teaches the tools and techniques of statistics most commonly used in business. The major topic areas include: populations, random variables, distributions, and sampling; parameter estimation; hypothesis testing; and simple and multiple regression. All topics are taught by application to actual business problems using original data. The course provides the tools students will need for their functional courses, such as finance and marketing, as well as for core courses in business analytics.

Status: OPEN

OPER770601
Data Analytics 1: Model Building VANDERWERF, PIETER A
Summer 2020
This course focuses on the use of quantitative methods to support managerial decisions. Fundamental to this type of decision analysis is a model, which is a
representation of reality. A child enjoys a model car or a model train. An engineer uses a model of an airplane wing in a wind tunnel. An architect uses a set of blueprints as a model to illustrate what is to be built. The National Weather Service uses computer models to predict the track of a hurricane. In this course we will see how mathematical models and modern spreadsheet software can be used to support managerial decision analysis. We will pay special attention to the assumptions and limitations of using mathematical models as part of the iterative process of making operational and strategic management decisions. Examples will be used to illustrate this process in real world situations.

Business Statistics BOARDMAN LIU, LINDA
Fall 2020
This course focuses on the analytical tools of statistics that are applicable to management practice and decision making. Topics include descriptive statistics, probability, random variables, sampling distributions, estimation of parameters, hypothesis testing, and regression.

Credits: 3
Room and Schedule: HIGGINS HALL 300, T TH 1 30*;
Satisfies Core Requirement: None Prerequisites: None Corequisites: OPER1136. Cross-listed with: None Frequency: Annually
Student Level: UNDERGRAD-MAJORS
Comments: This course is not open to students who have completed BIOL2300.
Status: CLOSED

OPER225501
Managing Projects COAKLEY, CHARLES E
Fall 2020
This course takes a holistic approach to planning, organizing, and controlling projects. It looks at how projects are uniquely suited to support an organization’s strategy in a fast-paced business environment. Topics include project life cycle, algorithms and statistical concepts underlying network planning models, managing risk, and resource allocation. Microsoft Project will be used as to support the planning and monitoring phases of project management. The conceptual part of this course is framed with an eye to the behavioral realities a manager faces and the psychology of managing project teams.
Credits: 03
Room and Schedule: FULTON HALL 130,W 7-9 30;
Satisfies Core Requirement: None
Prerequisites: None
Corequisites: None
Cross-listed with: ISYS2255

OPER331001
Sports Analytics NEALE, JOHN J
Fall 2020
The focus of the course will be the development and use of quantitative analysis, particularly mathematical and statistical models, that are widely used to assist in decision making at all levels in the management of professional sports organizations. Concentration will be on player, team, and organizational performance in baseball, basketball, and football for the purpose of tactical and strategic decisions. If time permits, applications in other sports (e.g., golf) will be discussed, as well as collegiate baseball.
Credits: 03
Room and Schedule: FULTON HALL 150,W 4 30-6 50;
Satisfies Core Requirement: None
Prerequisites: OPER2235 AND OPER1135. Students taking this course should possess a passion for sports and numbers, working knowledge of basic probability and statistics, strong Excel skills. Students should have successfully completed OPER1135 or a similar statistics course.
Corequisites: None
Cross-listed with: None
Frequency: Annually
Student Level: UNDERGRAD ELECT

OPER337501
Operations Strategy and Consulting FIELD, JOY M
Fall 2020
This course examines concepts, principles, and techniques for formulating, implementing, and evaluating operations strategy. It links strategic and tactical operational decisions to creation of a competitive advantage. Topics include operations strategy content and process, service operations, capacity and facilities strategy, supply chain management, process design and technology choice, and quality and productivity improvement. Case studies are used to illustrate concepts covered in the course. In collaboration with a consulting firm, students also learn how to develop and deliver a consulting presentation. These skills are applied to a mock consulting project.
Credits: 03
Room and Schedule: FULTON HALL 220,W 1 30-3 50;HYBRID;
Satisfies Core Requirement: None

OPER660401
Management Science NEALE, JOHN J
Fall 2020
This course provides an overview of the concepts and methods of Management Science. Sometimes referred to as Prescriptive Analytics or Decision Analytics, management science is a subset of the larger field of Business Analytics and focuses on the use of math models to make better business decisions. The primary goal of the course is to help you become a more skilled builder and consumer of models. The course will show you how to use Excel spreadsheets effectively for business analysis and introduce you to some of the more important analytic methods including optimization and simulation. These methods will be applied to problems arising in a variety of functional areas including operations, finance, and marketing.
Credits: 03
Room and Schedule: FULTON HALL 150, M 7-9 30; HYBRID
Satisfies Core Requirement: None
Prerequisites: A previous course in statistics and probability and familiarity with Excel.

OPER660701
Machine Learning for Business Intelligence UNUVAR, MERVE
Fall 2020
Machine learning (ML) has been a popular topic for data scientists and analysts. The goal in ML is to learn from existing data and extract useful information such as patterns, behaviors and trends. We can then use this information to predict future activity. The ability of learning patterns from data and making accurate predictions on new instances makes ML a powerful tool for Business Intelligence since it helps us transform the raw data into better decisions. This course will not dive into the technical details of ML algorithms but rather focus on how to use these algorithms in Business Intelligence applications. We will study business applications including but not limited to customer segmentation, propensity, and churn.

Data Analytics 1: Model Building VANDERWERF, PIETER A
Fall 2020
This course focuses on the use of quantitative methods to support managerial decisions. Fundamental to this type of decision analysis is a model, which is a representation of reality. A child enjoys a model car or a model train. An engineer uses a model of an airplane wing in a wind tunnel. An architect uses a set of blueprints as a model to illustrate what is to be built. The National Weather Service uses computer models to predict the track of a hurricane. In this course we will see how mathematical models and modern spreadsheet software can be used to support managerial decision analysis. We will pay special attention to the assumptions and limitations of using mathematical models as part of the iterative process of making operational and strategic management decisions. Examples will be used to illustrate this process in real world situations.

Business Analytics Courses: Spring 2021
BZAN102101
Operations Management ALEV, ISIL
Spring 2021
This course is an introduction to operations management. Operations, like accounting, finance, marketing, and human resources, is one of the primary functions of every organization. Operations managers transform human, physical, and technical resources into goods and services. Hence, it is vital that every organization manage this resource conversion effectively and efficiently. How effectively this is accomplished depends upon the linkages between operating decisions and top management (strategic) decisions. The focus of the course is decision-making at the operating level of the firm. A strong emphasis will be placed on the development and use of quantitative models to assist decision making.

BZAN113501
Business Statistics BOARDMAN LIU, LINDA
Spring 2021
This course focuses on the analytical tools of statistics that are applicable to management practice and decision making. Topics include descriptive statistics, probability, random variables, sampling distributions, estimation of parameters, hypothesis testing, and regression.

Credits: 3
Room and Schedule: T TH 7 30*; ONLINE; SYNCHRONOUS;
Satisfies Core Requirement: None
Prerequisites: None
Corequisites: BZAN1136. Cross-listed with: None
Frequency: Annually
Student Level: UNDERGRAD-MAJORS
Comments: This course is not open to students who have completed BIOL2300.
Status: OPEN

BZAN113502
Business Statistics BOARDMAN LIU, LINDA
Spring 2021
This course focuses on the analytical tools of statistics that are applicable to management practice and decision making. Topics include descriptive statistics, probability, random variables, sampling distributions, estimation of parameters, hypothesis testing, and regression.

Credits: 3
Room and Schedule: T TH 9*; ONLINE; SYNCHRONOUS;
Satisfies Core Requirement: None
Prerequisites: None
Corequisites: BZAN1136. Cross-listed with: None
Frequency: Annually
Student Level: UNDERGRAD-MAJORS
Comments: This course is not open to students who have completed BIOL2300.
Status: CLOSED

BZAN113503
Business Statistics BOARDMAN LIU, LINDA
Spring 2021
This course focuses on the analytical tools of statistics that are applicable to management practice and decision making. Topics include descriptive statistics, probability, random variables, sampling distributions, estimation of parameters, hypothesis testing, and regression.

Credits: 3
Room and Schedule: HIGGINS HALL 300, T TH 1 30*;
Satisfies Core Requirement: None
Prerequisites: None
Corequisites: BZAN1136. Cross-listed with: None
Frequency: Annually
Student Level: UNDERGRAD-MAJORS
Comments: This course is not open to students who have completed BIOL2300.

BZAN338401
Predictive Analytics PAN, XIAOHONG
Spring 2021
The Predictive Analytics course teaches advanced statistics used in business. The first third of the course goes into greater depth on traditional statistics than introductory courses and covers additional advanced techniques for hypothesis testing. The other two-thirds focuses on the new methods developed for building predictive models based on large data sets. These include advanced regression and logistic regression, k-Nearest neighbors, neural networks, and decisions trees.
Credits: 3
Room and Schedule: FULTON HALL 115, T TH 1 30*; HYBRID;
Satisfies Core Requirement: None
Prerequisites: ISYS1021 AND OPER1135. Or other appropriate statistics course.
Corequisites: None Cross-listed with: None Frequency: Annually

BZAN225501
Managing Projects COAKLEY, CHARLES E
Spring 2021
This course takes a holistic approach to planning, organizing, and controlling projects. It looks at how projects are uniquely suited to support an organization's strategy in a fast-paced business environment. Topics include project life cycle, algorithms and statistical concepts underlying network planning models, managing risk, and resource allocation. Microsoft Project will be used as to support the planning and monitoring phases of project management. The conceptual part of this course is framed with an eye to the behavioral realities a manager faces and the psychology of managing project teams.

BZAN660401
Management Science NEALE, JOHN J
Spring 2021
This course provides an overview of the concepts and methods of Management Science. Sometimes referred to as Prescriptive Analytics or Decision Analytics, management science is a subset of the larger field of Business Analytics and focuses on the use of math models to make better business decisions. The primary goal of the course is to help you become a more skilled builder and consumer of models. The course will show you how to use Excel spreadsheets effectively for business analysis and introduce you to some of the more important analytic methods including optimization and simulation. These methods will be applied to problems arising in a variety of functional areas including operations, finance, and marketing.
Credits: 03
Room and Schedule: FULTON 150,T 7-9;30;
Satisfies Core Requirement: None
Prerequisites: A previous course in statistics and probability and familiarity with Excel.
Corequisites: None Cross-listed with: None Frequency: Annually
Student Level: UNDERGRAD & GRAD

BZAN660601
Forecasting Techniques TOMIC, ALEKSANDAR S
Spring 2021
The theory and practice of applied time series analysis will be explored. First the different segments (trend, seasonality, cyclical, and irregular) of a time series will be analyzed by examining the Autocorrelation functions (ACF) and Partial Autocorrelation functions (PACF). The specifics model the various types of time series include linear regression, panel regression, seasonal decomposition, exponential smoothing, and ARIMA modeling as well as combining models. PLEASE NOTE: This course is also offered as an online hybrid course with Fr. McGowan, OPER/MFIN6606.12, ECON2229.12. For his sections only: in addition to the online lectures presented on the Canvas LMS, there are three required on-campus class meetings on: Saturday morning February 22, and Saturday May 2. The midterm exam will also be held on campus on Monday evening March 16. Please see the course syllabus for additional details.
Credits: 03
Room and Schedule: T 7-9;30;ONLINE;SYNCHRONOUS;
Satisfies Core Requirement: None
Prerequisites: MFIN1021. Undergraduate: ECON1151 or ECON1155; MFIN1021; Statistics/Graduate: OPER7725.

Machine learning (ML) has been a popular topic for data scientists and analysts. The goal in ML is to learn from existing data and extract useful information such as patterns, behaviors and trends. We can then use this information to predict future activity. The ability of learning patterns from data and making accurate predictions on new instances makes ML a powerful tool for Business Intelligence since it helps us transform the raw data into better decisions. This course will not dive into the technical details of ML algorithms but rather focus on how to use these algorithms in Business Intelligence applications. We will study business applications including but not limited to customer segmentation, propensity, and churn.

Credits: 03
Room and Schedule: FULTON HALL 415,W 7-9 30;
Satisfies Core Requirement: None
Prerequisites: BZAN1135 AND BZAN2235 AND BZAN7703 AND BZAN7706 AND BZAN7716. For Undergraduate Students - BZAN1135, BZAN2235, and familiarity with R. For MBA Students - BZAN7703, BZAN7706 OR BZAN7716, and familiarity with R.

Operations, like accounting, finance, and marketing, is one of the primary functions of every organization. Operations managers transform human, physical and technical resources into goods and services. Hence, it is vital that every organization manage this resource conversion effectively and efficiently. How effectively this is accomplished depends upon the linkages between operating decisions and top management (strategic) decisions. The focus of the course is decision-making at the operating level of the firm, converting broad policy directives into specific actions within the organization. Strong emphasis will be placed on the development and use of quantitative models to assist in decision making.

Data Analytics 1: Model Building VANDERWERF, PIETER A
Spring 2021
This course focuses on the use of quantitative methods to support managerial decisions. Fundamental to this type of decision analysis is a model, which is a representation of reality. A child enjoys a model car or a model train. An engineer uses a model of an airplane wing in a wind tunnel. An architect uses a set of blueprints as a model to illustrate what is to be built. The National Weather Service uses computer models to predict the track of a hurricane. In this course we will see how mathematical models and modern spreadsheet software can be used to support managerial decision analysis. We will pay special attention to the assumptions and limitations of using mathematical models as part of the iterative process of making operational and strategic management decisions. Examples will be used to illustrate this process in real world situations.

How effectively this is accomplished depends upon the linkages between operating decisions and top management
This course discusses the resource structure and the execution of activities that produce goods or deliver services. It focuses on the design and integration of the supply chain processes that support a company's business strategy. It offers a blend of the theory and practice of operations management. At the same time, the course shows the role of quantitative techniques in guiding the operations decisions. The pedagogy involves lecture, readings, and discussion of case studies.

BSLW110201
Law and Ethics POWERS, RICHARD E
Fall 2020
This course examines the legal and ethical challenges faced by business people in today's global society, focusing on the interplay of legal and ethical obligations in the business environment, the extent to which they overlap, and the application of moral principles in the absence of legal requirements. While laws provide some guidance on the right course of action, individuals are not strictly constrained by legal principles. The emphasis throughout this course is on assisting students to develop the decision-making skills necessary for their future roles as responsible managers and leaders.

Real Estate Fundamentals
CHAZEN, EDWARD
Fall 2020
This course serves as an introduction to the field of real estate. The course is structured around several themes that will seem more interconnected by the end of the course than at the start.
The course covers an overview of real estate and society; landlord-tenant relationship; numbers and capital in real estate; property development; market research and analysis; housing markets; environmental impact and sustainability; and risk management. The course uses various teaching and learning methods: class lectures; case study discussions; videos of interviews with experts and about illustrative projects; homework exercises and guest lectures.

BSLW118501
Topics: Law and Economics WESNER, THOMAS L
Fall 2020
Can we be optimistic about our future as phrases such as "new normal" and "austerity measures" take hold of our national psyche? Is there reason for hope after the Great Recession has substantially altered the global economic landscape? Through this course, students will utilize an interdisciplinary approach to understanding important legal, business, and economic issues they will soon be called to address as leaders, policymakers, businesspersons, and citizens. Over the course of the semester, students will work to create politically and economically viable solutions to many of the most critical legal, economic, and policy issues facing our nation and world.

BSLW220001
The State of Affordable Housing in the States LEBLANC, DANIEL R
Fall 2020
How does housing affect the lives of Americans? Where you live determines your access to schools, quality of healthcare, fresh food, clean air, parks and recreation, affordable credit, and even how long you are likely to live. This course explores concepts of housing policy and planning at the national, state, and local levels. It examines programs and policies used to subsidize housing for millions of Americans and help them gain access to a decent place to live. Topics will be considered from multiple perspectives including housing finance, design, community planning, inequality, operations management, and sustainability. We will explore the historical and economic context of U.S. housing and discuss the barriers that low-income families face that affects their access to decent housing. The course will be divided into three sections: history, policies, and today's issues. Students will explore some of the most recently developed programs and how they fit into effective community revitalization. These programs will be evaluated in class discussions and group presentations.

BSLW220601
Real Estate and Urban Action MCCULLAGH, NEIL P
Fall 2020
Real Estate and Urban Action is a class in which students explore the interdisciplinary fields that are engaged in neighborhood revitalization. The course uses the transformation of the failed Columbia Point housing project (Dorchester, MA) into Harbor Point, a successful mixed income neighborhood, as a core teaching case study, highlighting how successful redevelopment addresses the social and economic needs of community residents. Classes include guest lectures from developers, public planning officials, and supportive services experts on the social, cultural, and political factors critical to transforming distressed neighborhoods into safe and economically viable neighborhoods. It is a practical course, in which students gain experience through field trips and interactions with real estate and supportive services professionals, culminating in a team neighborhood transformation proposal.

BSLW220701
Urban Design for Complexity and Sustainability LITTELL, MATTHEW
Fall 2020
The course explores the changing demands on urban environments in the twenty-first century and the newest policies, technologies, and design approaches that are being developed to address them. Topics will include analyses of the factors that shape the physical form of cities, including zoning and regulatory contexts, real estate development patterns, transportation infrastructure, environmental challenges, and aesthetics. The material will be introduced as case studies and surveys, with presentations by design professionals, city officials, and real estate developers. Students will gain literacy in zoning, real estate metrics, planning, and issues related to architectural design and large scale urban design. The semester will conclude with a final project synthesizing many of the topics covered.

Urban Action Lab MCCULLAGH, NEIL P; PERKINS, TAYLOR A
Fall 2020
Urban Action Lab is a semester long class that provides students with first-hand experience working on projects that advance affordable housing and access to opportunity. Students will develop and pursue research projects in partnership with mission driven organizations from across the City of Boston. Each project is completed
in collaboration with a partner organization and are selected based on their potential for high-impact contribution to the organization. Project components include research, evaluation, interviewing, and writing. Students will work in close collaboration with partner agencies, the teaching team, and fellow students. The class will meet once per week and will occasionally require students to attend meetings off campus. Please schedule a meeting with professors to discuss.

Law for the Entrepreneur REDER, MARGO
Fall 2020
This course examines the legal issues and challenges created by the migration of business applications to the internet. The intersection of law, business, and technology is explored in depth in this course. Students learn some aspects of entrepreneurship with practical application to business transactions. This course covers business' digital assets, in the form of intellectual property--trademarks, copyrights, patents, and trade secrets. Other topics surveyed include: contracts, licensing agreements, jurisdiction, tax, financing start-ups, privacy, speech, defamation, content control, filtering, information security, and crime. The course introduces students to critical high-tech issues necessary for effective managers of e-commerce enterprises.

Topics: Law for CPAs KAMERON, MATTHEW A
Fall 2020
The course focuses on the law of commercial transactions relevant to business professionals, especially accountants. It covers the common law of contracts and comprehensively reviews the Uniform Commercial Code, emphasizing the law of sales, commercial paper, and secured transactions. Agency and major forms of doing business such as partnerships, corporations, and limited liability companies, along with securities regulation are examined. The laws of property, bankruptcy, insurance, wills, trusts and estates, along with accountants' liability round out the course. Leading cases and major statutory laws pertaining to business regulation are discussed.

<td>Securities Regulation SPOONER, RACHEL S</td>
<td>Spring 2021</td>
</tr>
<tr>
<td></td>
<td>Securities Regulation is the study of how the government regulates financial markets and their participants, whether a start-up seeking capital through a Kickstarter campaign, a multi-national public company disclosing news to its shareholders, or an investment banker advising a company in its IPO. The course focuses upon the key federal statutes that regulate securities and participants in the securities markets: Securities Act of 1933, Securities Exchange Act of 1934, Sarbanes-Oxley, Dodd-Frank Act of 2010, Foreign Corrupt Practices Act, and several criminal statutes. The students learn the role of the Securities and Exchange Commission and how the SEC will impact securities markets and their participants. The course covers the multitude of methods for raising capital within the confines of the Securities Act and the J.O.B.S. Act. Students learn how executives of public companies, and their auditors, lawyers, and bankers, decide when and how to make disclosures about the company. The course also examines financial scams and fraud, considering the ethical boundaries of the complex, fast-paced financial world. The class hosts guests ranging from SEC enforcement attorneys, to in-house counsel at a large bank, to defense counsel with specialties in insider trading and white-collar crime, Foreign Corrupt Practices Act, and the Bernie Madoff class. The class is intended for students interested in careers in finance, audit, leadership in public companies, or law.</td>

<tr>
<td></td>
<td>Real Estate and Urban Action is a class in which students explore the interdisciplinary fields that are engaged in neighborhood revitalization. The course uses the transformation of the failed Columbia Point housing project (Dorchester, MA) into Harbor Point, a successful mixed income neighborhood, as a core teaching case study, highlighting how successful redevelopment addresses the social and economic needs of community residents. Classes include guest lectures from developers, public planning officials, and supportive services experts on the social, cultural, and political factors critical to transforming distressed neighborhoods into safe and economically viable neighborhoods. It is a practical course, in which students gain experience through field trips and interactions with real estate and supportive services professionals, culminating in a team neighborhood transformation proposal.</td>

Urban Action Lab is a semester long class that provides students with first-hand experience working on projects that advance affordable housing and access to opportunity. Students will develop and pursue research projects in partnership with mission driven organizations from across the City of Boston. Each project is completed in collaboration with a partner organization and are selected based on their potential for high-impact contribution to the organization.

Project components include research, evaluation, interviewing, and writing. Students will work in close collaboration with partner agencies, the teaching team, and fellow students. The class will meet once per week and will occasionally require students to attend meetings off campus.

Please schedule a meeting with professors to discuss.

Real Estate Field Projects CHAZEN, EDWARD
Spring 2021
This course is a complement to in-class learning and provides an experiential learning component to the real estate education at CSOM. The course consists of teams of 4-5 students working on a field project for a real estate/developer investor, not-for-profit organization, or government agency. The field projects are "real world" real estate projects that involve extensive data collection/analysis, interviews with a range of experts and others that can influence the conclusions and recommendations of the team, and presentations to management of the sponsoring organization. The field projects typically include development proposals for a property; re-development plans for an existing property; and, real estate market research to assist an investor considering expansion into new geographic markets.

### BSLW880301  
**Topics: Law for CPAs**  
**PAIGE, MICHAEL D**  
**Spring 2021**  

This course focuses on the law of commercial transactions relevant to business professionals, especially accountants. It covers the common law of contracts and comprehensively reviews the Uniform Commercial Code, emphasizing the law of sales, commercial paper, and secured transactions. Agency and major forms of doing business such as partnerships, corporations, and limited liability companies, along with securities regulation are examined. The laws of property, bankruptcy, insurance, wills, trusts and estates, along with accountants' liability round out the course. Leading cases and major statutory laws pertaining to business regulation are discussed.

BCOM212001
The Business of Journalism DAHL, DAVID K

This course will help students to become literate in the business of journalism and the changes underway in the profession. Discussing the history of mainstream news organizations and new business models brought by the digital revolution, we consider how questions of audience, revenue, and platform shape the rapidly changing news business. We live in an age of new money, new platforms, and new ways of telling stories, but also an age in which many journalism jobs have disappeared. The opportunities unleashed by these changes are helping to create the most exciting period ever for journalism. We need to know how and why these changes have occurred.

MFN668001
Renewable Energy and Sustainable Investments ADAMSON, SEABRON C; RAIKAR, SANTOSH G
Summer 2020
In this course we will examine how large scale renewable energy projects actually get financed and built, using the structures of modern non-recourse project finance. We will examine the economics of large-scale green power production, and how it fits into the U.S. and global energy industries. Through a mixture of lectures and real-life examples, students will get to see how renewable energy project finance works in actual deals that mix finance, public policy, legal, engineering, and environmental issues. The skills developed in analyzing non-recourse cash flow-based finance will be generally applicable to students interested not just in green energy, but also more widely in private equity and infrastructure investing. The course is designed to introduce students to the theory and practice of project finance in the energy and renewables sector, complementing academic finance theory with the practical aspects of financing capital intensive energy projects.

MFN770401
Financial Management JAMES, ROBERT F
Summer 2020
This course deals primarily with a firm’s investment and financing decisions. Topics treated intensively include valuation and risk, capital budgeting, financial leverage, capital structure, and working capital management. Also discussed are financial statistical analysis and tools of planning and control. Some attention is given to financial institutions and their role in supplying funds to businesses and non-profit organizations. Section number 1 of this course will be offered on-campus and section number 12 will be offered online. Please see the link bit.ly/CSOM1 for details about the online section.
Credits: 03

MFN880101
Investments BARRY, MICHAEL J
Summer 2020
In a competitive market, investors allocate funds among financial securities in response to perceived values and subjective attitudes toward risk. This course addresses the issues that seem to determine the relative values of financial instruments and the techniques available to assist the investor in making risk/return tradeoff. The course will include the development and implementation of various pricing models of financial assets. Section numbers 1 and 2 will be offered on-campus and section number 11 will be offered online. Please see the link bit.ly/CSOM1 for details about the online section.

MFIN8882001
Management of Financial Institutions JAMES, ROBERT F
Summer 2020
This course considers banks and other financial institutions as information and deal-making entities. This broad perspective is used to explain how and why changing information and contracting technologies are altering the structure of the financial services industry and financial regulation. Lectures explore the implications of these ongoing changes for the methods financial institution executives should use to measure and manage an institution's risk and return.

MFIN8883501
Real Estate Finance CHAZEN, EDWARD
Summer 2020
Real Estate Finance is for graduate students to learn the ways that private and public capital sources are used to finance income-producing property. The class covers the following topics:
1. basics of real estate financial analysis and financial statements;
2. how to value income property and terminology unique to real estate;
3. permanent loans;
4. construction loans;
5. equity financing and joint ventures;
6. distressed debt and equity, and workouts;
7. institutional real estate, private equity investing;
8. Real Estate Investment Trusts (REITs);
9. Commercial Mortgage-Backed securities (CMBS);
10. corporate sale-leaseback financing;
11. residential mortgage financing and the sub-prime mortgage crisis;
12. government role in real estate finance and tax credit financing.
Teaching methods include lectures, illustrative case studies, Excel-based financial exercises and videos of interviews with industry experts and representative transactions. Grades consist of a midterm exam, one individual case study report, class participation, a team case study presentation, a team presentation of a REIT stock analysis, and a final project preparing an investment memorandum for debt or equity financing of an actual property.

MFIN8886901
Fundamental Analysis ARGYROPLE, CHRISTOPHER
Summer 2020
This course will focus on cash-flow oriented models of the valuation of the firm. Wall Street-style analytical techniques will be utilized, including the production of quarterly earnings forecasts and the development of buy/sell/hold recommendations. Topics include enterprise value, free cash flow, economic value added, risk/reward analysis, and the art of the management interview. Due to the overlap of material, graduate students can only enroll in one of the following classes to count towards their Master's degree in the Carroll School: either MFIN8869 (Fundamental Analysis) or MFIN6665 (Applied Fundamental Analysis).

MFN220701
Real Estate Finance CHAZEN, EDWARD
Fall 2020
This course focuses on debt and equity financing of income-producing real property, primarily in the U.S. market. The course will look at both the private debt and equity and public securities markets for real estate finance. Teaching methods include lectures, case study discussions, videos, select chapters in the text and relevant articles, practice exercises in Excel and guest speakers. The course considers real estate finance from the perspective of the users of capital (developers and property owners) and the sources of capital (lenders and equity investors). The course also covers the role of the public sector in using tax payer funds to advance public purposes by offering various kinds of subsidies to developers, and evaluating the relative success of such programs. The primary student goals and learning outcomes are to learn how the private and public securities capital markets provide funds to the real estate industry, understand risks unique to real estate and how to structure a financing of commercial real estate, the ability to discuss and present a professional financing request for real estate debt and equity, and appreciate the diverse ways financing can be used to positively influence community and neighborhood improvement.

Entrepreneurial Finance HESSION-KUNZ, ANDREW
Fall 2020
This course introduces undergraduate students to entrepreneurial finance with a focus on the strategic financing of rapidly growing ventures. Through a combination of readings, simulations, and analysis of current news and events, students will learn to
assess the value drivers of a firm, determine the capital needs and fundability of growth, assess and mitigate corporate risks, and study the strategy of potential exits. We will look at the most common vehicles for funding hyper-growth, including venture capital, angel funding, crowdfunding, and other alternatives. We will study the cost of capital, including terms, for building a balance sheet for growth.

MFIN223501
Investment Banking KISGEN, DARREN
Fall 2020
This course is the study of investment banking beginning with strategic planning and financial management; moving to the analysis, financing and valuation of investment opportunities; and finishing with the study of corporate governance and ethical issues faced by investment bankers. This course examines the primary functions of investment banking such as syndication, mergers and acquisitions (M&A), leveraged buyouts (LBO) and corporate restructuring.

MFIN226001
Active Portfolio Management ZIEFF, WILLIAM E
Fall 2020
The course provides an introduction to portfolio management with focus on quantitative investment process and methods. The course balances theoretical foundations with practical applications. Primary topics include asset allocation, portfolio construction including optimization, risk modeling, and risk measurement and management. Instruction will combine lectures, case discussions, and workshops, providing opportunities for students to apply quantitative methods to real world problems in several of the explored areas. The course combines investment ideas with analytics, so prior study in any or all of the following areas will make the course more enjoyable: probability/statistics (e.g., normal distributions, regression analysis), linear algebra (e.g., matrix algebra), and introductory calculus (e.g., derivatives). In addition, workshops will include use of both Microsoft Excel and Python (e.g., Jupyter Notebooks). Basic competency in each is a minimum requirement, and of course, the greater your skills, the better.

Credits: 03
Room and Schedule: FULTON HALL 117,M W 9*; Satisfies Core Requirement: None
Corequisites: MFIN1151. With permission of the Department.
Prerequisites: MFIN1127. Comments: None

MFIN227001
Data Analytics in Finance REUTER, JONATHAN M
Fall 2020
Corporations, investment banks, and asset management firms increasingly base their operational and investment decisions on the statistical analysis of "big data." In this course, you will be introduced to Python, a popular open-source modern programming language, and learn how to use it to extract data from online sources, estimate univariate and multivariate regressions on real-world financial data, and perform Monte Carlo simulations. THERE WILL BE AN OPTIONAL REVIEW/HELP SESSION ON FRIDAY AFTERNOONS.

MFIN229001
Individual Directed Study SADKA, RONNIE
Fall 2020
This is an opportunity for students interested in independent study to engage in a one-to-one relationship with a faculty member of the Finance Department. This course is only available to students who have demonstrated (1) an extremely strong interest in a particular area of finance, and (2) a strong self-motivation and self-discipline in previous studies. Students are required to present their research results to a departmental faculty group towards the end of the semester. The permission of the department chairperson is to be obtained when the individual faculty member has agreed to direct the student's research project.
Credits: 03
Room and Schedule: BY ARRANGEMENT;
Satisfies Core Requirement: None
Prerequisites: MFIN1021. Senior status, CSOM, and permission of faculty member and department chairperson.

MFIN660612
Forecasting Techniques GOWAN, RICHARD
Fall 2020
The theory and practice of applied time series analysis will be explored. First the different segments (trend, seasonality, cyclical, and irregular) of a time series will be analyzed by examining the Autocorrelation functions (ACF) and Partial Autocorrelation functions (PACF). The specifics model the various types of time series include linear regression, panel regression, seasonal decomposition, exponential smoothing, and ARIMA modeling as well as combining models. PLEASE NOTE: This course is also offered as an online hybrid course with Fr. McGowan, OPER/MFIN6606.12, ECON2229.12. For his sections only: in addition to the online lectures presented on the Canvas LMS, there are three required on-campus class meetings on: Saturday morning February 22, and Saturday May 2. The midterm exam will also be held on campus on Monday evening March 16. Please see the course syllabus for additional details.

MFIN662201
Mergers and Acquisitions MARCUS, PAUL A
Fall 2020
This course will review the merger and acquisition process from the perspective of buyers and sellers of both private and public companies. Placing emphasis on the valuation of companies as well as the analysis of non-financial factors, the course will endeavor to provide the participants with a practical approach to analyzing and advising clients on the positive and negative aspects of an M&A transaction. Additional topics will include understanding the use of leverage, transaction structure, due diligence, and the concept of fairness. The class will be a combination of lectures and case studies presented in class by the participants.

International Financial Management JEFFUS

Fall 2020
This is a graduate [advanced undergraduate] level (elective) course. Topics include exchange rate determinants, international financial markets for debt and equity, foreign direct investment, and cross-border mergers and acquisitions. These topics are discussed in light of multiple political jurisdictions, legal environments, currency regimes, and other multinational complexities. Frontier topics such as digital currencies and trends in international markets are also introduced.

MFIN664001
Finance Seminar: Simulation and Optimization in Finance HAIDAR, HAISSAM

Fall 2020
This course studies the theory and practice of financial simulation and optimization using quantitative techniques that enable financial professionals to make optimal decisions under uncertainty. While theoretical material and background for these techniques will be introduced, the focus is on their applications and hands-on implementation utilizing software packages and programing platforms that are widely used in the financial industry. Topics include simulation of important probability distributions, random walks, linear and nonlinear optimization, and backtesting. Lectures draw on examples such as asset allocation under different definitions of risk; portfolio risk management; modeling asset price dynamics; trading strategies; index tracking; derivative pricing, hedging, arbitrage; and capital budgeting under uncertainty and real options.

MFIN666501
Applied Fundamental Analysis NAVARATNAM, ARVIND

Fall 2020
The objective of the course is to provide hands-on experience in financial statement analysis in a real-world setting. Students will be exposed to general tools of financial analysis, theoretical concepts, and practical valuation issues. By the end of the course, students should develop a framework for evaluating an investment opportunity by using a firm’s financial statements to draw an understanding of their performance and provide a basis for making reasonable valuation estimates, as well as have an understanding of the challenges investor faces in determining the earnings power of a company. Due to the overlap of material, graduate students can only enroll in one of the following classes to count towards their Master's degree in the Carroll School: either MFIN8869 (Fundamental Analysis) or MFIN6665 (Applied Fundamental Analysis).
