Loan Cost Examples

The total amount you will pay for this loan will vary depending upon when you start to repay it. This example provides estimates based upon two (2) different repayment options available to you while enrolled in school.

Repayment Option (while enrolled in school)	Amount Provided (amount provided directly to you or your school)	Interest Rate (fixed rate)	Loan Term (how long you have to pay off the loan)	Total Paid over 10 years
1. DEFER PAYMENTS Make no payments while enrolled in school. Interest will not accrue during this time.	\$10,000	5%	10 years starting <u>after</u> the deferment and grace periods	\$12,728
2. MAKE FULL PAYMENTS Make minimum payments while enrolled in school. Payments made while enrolled will be credited entirely to the principal balance.	\$10,000	5%	13 years starting from the date of your first payment	\$12,237

About these examples

The first repayment example assumes that you remain in school for 2 years and have a 12 month grace period before beginning repayment. It is based on the **fixed interest rate** and assumes all payments are made on-time. Repayment will last for 10 years beginning from the date of your first payment.

The second example is based on the same assumptions, with the additional assumption that you make minimum monthly payments of \$50 while enrolled in school. As no interest is accruing while you are enrolled, these payments would go entirely to the principal balance of your loan.
