

Standard Safety Procedures for the Imaging Facility - 525

In the event of an emergency, contact Bret Judson and contact Campus Police.

In urgent cases, such as:

- Fire or medical emergency: call 911
- Campus public safety emergency: call Campus Police 2-4444
- If in doubt call both #'s starting with 911

Instrument specific safety information:

- Do not tamper with any safety devices.
- Follow all training protocols and wear the appropriate PPE if working with living organisms.
- In case of a dire emergency (eg sparks, fire), leave the room immediately closing all doors behind you. When it is safe to do so call 911 and then the Campus Police. Finally, contact the facility staff. **Do not attempt to shut down the instruments.**

Please notify a staff member immediately if you encounter any problems. For assistance, please contact:

- Bret Judson (bret.judson@bc.edu, Higgins 525), email is preferred, if urgent call: 607-220-3017

Please make sure you acknowledge the facility/staff in all publications resulting from work done using Boston College's imaging facilities using the following text as appropriate:

"We thank Bret Judson and the Boston College Imaging Core for infrastructure and support."

If the Zeiss 880 Elyra Airyscan microscope was used then: "We thank Bret Judson and the Boston College Imaging Core for infrastructure and support. This material is based upon work supported by the National Science Foundation under Grant No. 1626072."

Lastly, please provide Bret with a copy of any publications for display within the core facility/on the core facility webpage.
