**New Spring Elective: Business Econometrics (OPER3385)**

Econometrics uses economic theory and statistics to model the complexities of real-world systems, where the primary tool is advanced application of multiple linear regression. This course provides an introduction to using econometric techniques in a variety of business disciplines. Students will learn how to use R, a statistical computing application, and will gain the skills necessary to build their own econometric models. The course has two prereqs, OPER1135 Business Statistics, and OPER2235, Math for
Management Science, and it counts as an elective for **Business Analytics** and **Operations Management**. The course will be taught by Professor Stephanie Jernigan.

**If you are going abroad in the spring, make sure you get courses approved before you go!**

You must get courses approved before you leave for study abroad. Getting approval will require you to bring a course syllabus to the home department at Boston College and have it approved on a Study Abroad Course Substitution Form (available in Fulton 315.) The deadlines for submitting course substitutions to Student Services are September 29th for spring and summer courses and March 1st for fall courses.

Tips for course approvals:

- The only two Carroll School core classes that may possibly be approved are Organizational Behavior and Operations Management. It is not a guarantee, but a possibility.
- You can only obtain concentration elective approval from the department after completing the core classes (e.g. Basic Finance or Marketing Principles.)
- To obtain approval for Cultural Diversity, students should visit [www.bc.edu/core/for-students](http://www.bc.edu/core/for-students) and click on the "Cultural Diversity Substitution Request Form" on the left. Students can submit their request for approval using that form.
