Other Firms

Overview: Students have also stated that they have interned at companies such as Merrill Lynch, MTV (although website says internships are open to college juniors and seniors...), Daversa Partners, Johnson & Johnson, McKinsey, Kraft, Co-vidien, and Liberty Mutual to name a few. Look on their website, reach out to BC alumni, and check on Eaglelink for more information.

State Street – Corporate Finance Summer Internship

Overview: The Finance Summer Internship Program gives college and university undergraduate students exposure to different departments and teams within the Finance Division at State Street. These departments include:

- Corporate Accounting
- Business Unit Finance
- Global Tax
- Global Treasury
- Structured Products
- Finance Transformation

Students who meet the program criteria and are accepted into the program are assigned to a specific position within one of these departments.

The internship provides an opportunity for students to learn about the financial services industry and to experience the corporate environment first hand. Through on-the-job experience, interns develop their business, financial and analytical skills. Interns have opportunities to learn about various jobs and career paths that align with their field of study and majors

Application Requirements: We seek well-rounded students who:

- Are currently enrolled in an undergraduate program and will be entering their junior or senior year after the summer of 2015
- Are majoring in finance or accounting. Economics and business majors with a finance and/or accounting concentration will also be considered
- Maintain a GPA of 3.2 or above (no exceptions)
- Demonstrate academic aptitude, a strong work ethic and involvement in college and/or community programs and events

United Health Group

Overview: Internships at UnitedHealth Group. If you want an intern experience that will dramatically shape your career, consider a company that's dramatically shaping our entire health care system. UnitedHealth Group internship opportunities will provide a hands-on view of a rapidly evolving, incredibly challenging marketplace of ideas, products and services. You'll work side by side with some of the smartest people in the business on assignments that matter. So here we are. You have a lot to learn. We have a lot to do. It's the perfect storm. And even better? Join us and you may end up staying for a career in which you can do your life's best work. SM

Our businesses serve the entire spectrum of health care participants: individual consumers and employers, commercial payers and intermediaries, physicians, hospitals, pharmaceutical and medical device manufacturers, and more. UnitedHealth Group IT is decisive, brilliant and passionate about technology and helping people live healthier lives.

You'll have the opportunity for continuous learning, the ability to explore different work areas while building a foundation of skills that will help you launch your career at UnitedHealth Group and develop into a well-rounded technology professional.

Responsibilities by role may include, but are not limited to:

Analyst: Systems or Business

- Define requirements using interviews, document analysis, requirements gathering, business process, use cases and standard analysis workflow.
- Analyze business or functional requirements to deliver artifacts and prepare detailed specifications from which programs will be written.
- Use enterprise-wide requirements definition, management systems, methodologies and standards as required

Application Developer:

- Collaborate with business users, systems analysts and or development teams in defining, analyzing and interpreting business and technical requirements.
- Develop technical expertise in any number of programming languages including but not limited to: Microsoft.NET (C#, ASP.NET, VB.NET), Java, COBOL, or PeopleSoft and application details.
- Participate in code and documentation or design reviews according to standards or new specifications.

IT Project Analyst/Manager:

- Collaborate with business to gather project requirements, maintain project status reports and assist in running project team meetings.
- Maintain resource tracking and responsible for the work flow of the project.
- Assists in communicating consolidated project milestones and deliverables for readiness

Application Requirements:

- Pursuing a Bachelor's or Master's degree in an IT related field, math, science, engineering or health policy/management from an accredited college/university. Junior/Senior level preferred. Other degrees are considered if candidates have related IT experience.
- Minimum 3.00 cumulative GPA
- Must be eligible to work in the U.S. without company sponsorship, now or in the future, for employment-based work authorization (F-1 students with practical training and candidates requiring H-1Bs, TNs, etc. will not be considered)

Application: Immediately upon submitting a resume for consideration through the school's recruiting system, students should also complete our Network With Us form to receive on-going communications about employment at UnitedHealth Group, activities on-campus, and recruitment updates. To complete the form visit:

<http://careers.unitedhealthgroup.com/network-with-us.aspx>

If selected for an on-campus interview, you will be sent an invitation to create a profile in our system. You must create a profile in our system in order to move forward in the recruitment process. Please ensure your account preferences in your school's system are adjusted to accept employer communications
